VHA TRAIN Course Catalog: Introduction

VHA TRAIN is a gateway into TRAIN National, the most comprehensive catalog of public health learning products. TRAIN is one of the most widely used learning management systems and is a free service of the Public Health Foundation. Access VA-approved and sponsored learning on Veteran health topics now! Also, subscribe to specific topics of interest to receive periodic VHA TRAIN eblasts and other news tailored to your area of interest.

Below is a list of current courses available through VHA TRAIN organized by topic and updated monthly:

MILITARY CULTURE

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Military Culture Training for Health Care Professionals: Self-Awareness and Military Ethos	This series aims to help learners understand the role that military culture plays in the lives of those they serve. In this first module, participants will be given the opportunity to reflect on their own beliefs and potential biases that might impact their work with service members, Veterans and family members. A conceptual framework for military culture will be introduced as the first step in increasing knowledge about military ethos and its impact on psychological health and treatment.	2 hours	1056248	11/1/2021
Military Culture in Primary Care	The purpose of this knowledge-based educational web course is to close an information gap by providing specific information on military culture and related screening tools that are available. Tools to assess include the reasons to ask new patients if they have served in the military; their pre-existing attitudes/behaviors/expectations to health care; the variations in Veteran presentations; their behaviors that facilitate communication and build trust; and changes to a primary care environment that demonstrate awareness/knowledge of the Veteran population. **Expiring soon!**	1 hour	1068888	3/14/2021
Military Culture in the Reserve and National Guard	The purpose of this knowledge-based educational web course is to discuss the Reserve Components (RC) as a unique culture within the military culture that warrants awareness and understanding from health care providers. A panel of experts from various backgrounds and settings will orient learners to the basics of service in the RC and then provide a	1 hour	1070966	5/12/2021

MILITARY CULTURE

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	more in-depth discussion regarding how membership in the RC culture can affect the health care seeking and response of RC service members and their families. Additionally, unique stressors of RC will be reviewed to include common deployment-related health and mental health concerns. **Expiring soon!**			
Providing Health Care for Military Veterans	This recorded, knowledge-based webinar will familiarize the attendee with the unique health care needs of military Veterans and will enhance their capacity to provide optimal care for Veterans they are seeing in any health care setting. The areas of focus will include military culture, military service, and deployment related health risks and impacts.	1 hour	1089371	1/27/2023

OPIOIDS, ADDICTION, AND PAIN MANAGEMENT

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Treatment of Substance Use Disorders Using Cognitive Behavioral Therapy	The purpose of this recorded training is to increase community-based outpatient clinic clinicians' awareness and understanding of evidence-based psychotherapy for substance use disorders (SUDs). An overview of elements of cognitive behavior therapy for substance use will be provided, and resources for further training will be provided.	1 hour	1093366	8/14/2023
Substance Use Disorders in Women	The purpose of this recorded presentation on substance use disorders (SUD) in women is to describe some of the unique aspects of these disorders. The training will review the nature of the SUDs, unique issues based on sex and gender, and review in greater detail the consequences of opioid and alcohol use disorders.	1 hour	1095178	12/4/2023
Opioid Use Disorder Treatment, Naloxone, and Overdose and Suicide Prevention	This recorded, knowledge-based virtual training, will seek to provide background on OUD, OUD treatment and describe the relations between OUD, suicide risk and overdose. Shared risk factors and specific interventions will also be discussed.	1 hour	1095926	2/1/2024

OPIOIDS, ADDICTION, AND PAIN MANAGEMENT

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Reviewing Your Pain Coping Toolbox (Your Gate Closers)	The purpose of this recorded, knowledge-based webinar series is to train providers in the components, techniques, structure and delivery of an effective, literacy-adapted cognitive behavioral therapy group for patients with chronic pain. Cognitive behavioral therapy stresses the relationship between one's thoughts, feelings and actions.	1 hour	1095310	11/30/2022
Pain Management and Opioid Safety in VHA: Update and Outlook Towards 2020	This recorded, knowledge-based webinar will provide updated information to community care providers and health care teams about VHA pain management approaches and the VA Opioid Safety Initiative	1 hour	1089763	2/27/2023
Evidence-Based Tobacco Cessation Care in the VA Health Care System	The goal of this web-based series is to further educate non-VA providers and health care teams about VA policies, practices, expertise, standards and resources for treating Veterans. This particular session will address evidence-based tobacco cessation care in VA.	2 hours	1086645	9/30/2022
Pain Management and the Opioid Safety Initiative in the Veterans Health Administration	The purpose of this series is to further educate non-VA providers about VA's policies, practices, expertise, standards and resources for treating Veterans. This particular session will discuss pain management and the opioid safety initiative in Veterans Health Administration.	2 hours	1083377	3/22/2022

EPILEPSY

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Anti-Seizure Medications: A Changing Landscape	The VA Epilepsy Center of Excellence has determined that there is a knowledge gap throughout the system of a common understanding of changing landscapes of anti-seizure medications and epilepsy. This is a web-based training course on the concepts of that changing landscape. The purpose of this knowledge-based module is to provide pharmacists, physicians and non-physician health care providers with detailed information about anti-seizure medications (ASM) and how they are	1 hour	1076882	4/15/2021

OPIOIDS, ADDICTION, AND PAIN MANAGEMENT

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	associated with epileptic and nonepileptic conditions. Key lessons within this course include a review of seizure types, comparison of anti-seizure medications, treatment and finding the right medication, and discontinuing ASMs. **Expiring soon!**			

HEALTH DISPARITY AND HEALTH EQUITY

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Treating the Unique Health Care Needs of Veterans with Lesbian, Gay, Bisexual and Transgender	The goal of this live, web-based series is to further educate non-VA providers and health care teams about VA policies, practices, expertise, standards and resources for treating Veterans. This particular session will address the unique health care needs of the lesbian, gay, bisexual and transgender community.	2 hours	1085486	6/15/2022
Transgender: Masculinizing Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses on masculinizing hormone therapy.	0.25 hour	1087996	10/25/2022
Transgender: Medical Evaluation for Masculinizing Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses on medical evaluation for masculinizing hormone therapy.	0.25 hour	1087992	10/25/2022
Transgender: Medical Evaluation for Feminizing Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses on medical evaluation for feminizing hormone therapy.	0.25 hour	1087993	10/25/2022
Transgender: Feminizing Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses on feminizing hormone therapy.	0.25 hour	1087995	10/25/2022
Transgender: Diagnosing Gender Dysphoria	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses on diagnosing gender dysphoria.	0.25 hour	1087990	10/25/2022
Transgender: Assessment of Readiness and Consent for Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses assessment of readiness and consent for hormone therapy.	0.25 hour	1087994	10/25/2022

WAR RELATED ILLNESS/POST DEPLOYMENT HEALTH

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
War-Related Injury and Illness Study Center Module 2: Airborne Hazards	The War-Related Illness and Injury Study Center Module 2: Airborne Hazards training will provide clinicians with the knowledge needed to enhance their role regarding deployment-related airborne hazards in Veteran health. In the course, clinicians will share the importance of considering each patient's concerns regarding potential exposure during military service.	1 hour	1070422	7/26/2023
War-Related Injury and Illness Study Center Module 1: Assessing Deployment-Related Environmental Exposures	The War-Related Illness and Injury Study Center, a national program in VA's Post-Deployment Health Services, provides expertise to Veterans and providers on difficult to diagnose illnesses and environmental exposure concerns. Module 1, Assessing Deployment-Related Exposures provides clinically relevant knowledge on the role of environmental exposures in Veteran health and the importance of addressing each patient's exposure concerns. In the following lessons, the course participant will learn how to conduct a deployment-related exposure assessment and determine whether an exposure could be associated with a Veteran's specific health concern.	1.5 hours	1070234	7/26/2023
War-Related Illness and Injury Study Center - Module 4: Chronic Multi-Symptom Illness	The purpose of this course is to improve the ability of clinicians to evaluate, diagnose and manage health concerns and medically unexplained conditions affecting Veterans of all eras and civilians, including chronic multi-symptom illness.	1.25 hours	1084440	3/28/22
War-Related Illness and Injury Study Center Module 2: Airborne Hazards	This web-based series will give evidence-based behavioral treatments for pain, illness and respiratory self-management. The VA has a commitment to provide effective, evidence-based treatment for chronic pain, illnesses and environmental exposures, during deployments and to provide Veterans with the tools they need to	1 hour	1070422	7/26/2023

WAR RELATED ILLNESS/POST DEPLOYMENT HEALTH

	self-manage pain, illness and respiratory issues.			
War-Related Illness and Injury Study Center Module 1: Assessing Deployment-Related Environmental Exposures	The War-Related Illness and Injury Study Center, a national program in VA's Post-Deployment Health Services, provides expertise to Veterans and providers on difficult to diagnose illnesses and environmental exposure concerns. Module 1: Assessing Deployment-Related Exposures is the first in a series of post-deployment health web-based training modules. Module 1 provides clinically relevant knowledge on the role of environmental exposures in Veteran health and the importance of addressing each patient's exposure concerns. In the following lessons, the course participant will learn how to conduct a deployment-related exposure assessment and determine whether an exposure could be associated with a Veteran's specific health concern.	1.5 hours	1070234	7/26/2023
War-Related Illness and Injury Study Center: Module 5 – Depleted Uranium and Toxic Embedded Fragments	This curriculum provides health care providers with knowledge about the current research on health effects in depleted uranium (DU)-exposed populations; information about enrolling Veterans with suspected DU exposure or toxic embedded fragments into VA registry programs; and guidance about the clinical approach to Veterans with embedded fragments.	1 hour	1087697	10/1/2022
War-Related Illnesses and Injury Study Center Module 4: Chronic Multi-symptom Illness	This module offers health care professionals an opportunity to gain insight into chronic multi-symptom illness including the incidence in civilian and military populations, defining characteristics and the latest resources and management strategies to consider for care.	1.25 hours	1084440	3/28/2022

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Supporting Military Veterans With PTSD at the End-of-Life: Video Illustrations	The purpose of this webinar is to help prepare hospice staff and others working with military Veterans at the end-of-life who may be demonstrating behaviors or thinking consistent with PTSD. With the use of video vignettes, the presenters will describe signs of PTSD in older Veterans with advanced illness and will discuss applied strategies for reacting when signs of PTSD are observed. Finally, consideration will be given to techniques for assisting Veterans who are living with both cognitive impairment and PTSD symptoms. **Expiring soon!**	1 hour	1096256	Live event to be held March 11 only
The Nuts and Bolts of Providing PTSD Treatment Over a Telehealth Modality	This recorded, knowledge-based webinar will provide findings from recent and ongoing studies along with the shared clinical experience of delivering evidence-based psychotherapy for PTSD via telemental health.	1 hour	1096027	2/28/2023
Suicide and PTSD: Navigating Risk and Tailoring Evidence-Based Treatment	This recorded, knowledge-based webinar will review factors driving risk among those with PTSD within the context of leading theoretical models of suicide. It will discuss empirically-supported methods of assessing and intervening upon suicide risk within the context of evidence-based treatment.	1 hour	1096011	1/31/2023
Clinician-Administered PTSD Scale for DSM-5 (CAPS-5) Clinician Training	This course includes both written material and observation of experts conducting assessments with CAPS, learners can rate along with the CAPS-5 diagnostic interview. Expert tips and feedback are provided throughout the course, and participants will also have the opportunity to learn advanced interview skills for using the CAPS-5 in complex and challenging clinical situations.	1 hour	1068095	12/31/2023

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
PTSD 101: PTSD and Experiences of Sexual Harassment and Sexual Assault During Military Service	The purpose of this knowledge-based course is to close a training gap by offering clinicians an opportunity to learn certain principles and tools to improve their clinical practice with military sexual trauma (MST) survivors. In addition to providing background information about the nature of MST and its impact, there will also be an emphasis on the interpersonal and sexual health implications of MST, by using an in-depth focus on core areas that commonly arise in the course of treating MST-related PTSD and other mental health difficulties.	1 hour	1072850	8/28/2023
Medication Management of PTSD in Veterans With Mild Traumatic Brain Injury Pocket Card	The purpose of this recorded training is to review symptoms of PTSD and mild traumatic brain injury (mTBI); an integrated mental health care model at the Polytrauma Rehabilitation Center San Antonio; complications of polypharmacy practice; lack of access; and accessible pharmacological and augmentative non-pharmacological options to minimize polypharmacy while ensuring effective treatment for PTSD in Veterans with mTBI.	1 hour	1093367	8/14/2023
Treating PTSD in Rural Settings	This purpose of this recorded, knowledge-based training is to identify and discuss the unique challenges rural health care providers encounter related to PTSD care. Education will be provided on the updated VA/DOD clinical practice guideline for the treatment of PTSD. A variety of resources related to assistance with education, diagnosis and treatment of PTSD, available to VA staff nationally, will be presented.	1 hour	1093341	8/14/2023
Rural PTSD Improvement in the Northeast Through Outreach	This recorded training will address the challenges that rural providers face in effectively treating PTSD in their clinics. An overview of the protocol	1 hour	1093340	8/14/2023

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	and outcomes of an implementation project that use facilitation and academic detailing in rural New England, and supported by the VA Office of Rural Health, will be shared. Resources developed to support such an intervention will also be reviewed.			
PTSD 101: PTSD and Reintegration Challenges	The purpose of this knowledge-based web course is to describe the stresses associated with different phases of the deployment cycle, with particular attention to the impact of PTSD on the process of reintegration following combat deployments.	1 hour	1072847	8/282023
PTSD 101: PTSD and Reintegration Challenges	The purpose of this knowledge-based web course is to describe the stresses associated with different phases of the deployment cycle, with particular attention to the impact of PTSD on the process of reintegration following combat deployments.	1 hour	1072847	8/28/2023
Veterans Integration to Academic Leadership: Understanding PTSD	This course will provide college and university staff the knowledge and skills needed to assist Veterans with transitional issues and needs for mental health assistance through the Veterans Integration to Academic Leadership, or VITAL, initiative.	1 hour	1091486	5/18/2023
Clinician Administered PTSD Scale for DSM-5 (CAPS-5) Training Simulator – Part 2	At the conclusion of this game-based learning program, learners will be able to identify the interview principles required for administering the Clinician-Administered PTSD Scale for DSM-5 (CAPS-5); appropriately pose follow-up clarifying questions when warranted; conduct a concise and thorough CAPS-5 interview; and apply the CAPS-5 scoring criteria appropriately. Note: You must log into TMS/TRAIN using the Google Chrome web browser for this module to load properly.	2.5 hours	1090937	3/5/2023
Integrating National Center for PTSD Mobile Apps into Veteran Mental Health Care	This series of video demonstrations will show health care team members how to effectively inquire about access to, and interest in, using mobile apps as an integrated part of mental health treatment for PTSD and related	1 hour	1090455	1/31/23

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	concerns; introduce apps to Veterans, incorporating discussion of security and privacy issues; obtain informed consent and document in the medical record; assign and review homework; and collaborate with family members to support Veterans' treatment goals.			
PTSD 101: Posttraumatic Stress and Substance Use Disorder Comorbidity	The purpose of this knowledge-based course is for team members to review assessment and treatment recommendations for treating co-occurring PTSD and substance use disorder (SUD) from the revised PTSD (2017) and SUD (2015) VA/DOD clinical practice guidelines.	1 hour	1089429	12/31/22
PTSD 101: Assessing and Reducing Violence Risk in Veterans with PTSD	The purpose of this knowledge-based course is to provide an evidence-based approach to improving the current team processes of clinical assessment and management of violence risk in Veterans with PTSD. By addressing a training practice gap, learners will be presented with a review of empirical literature associated with violence in Veterans with PTSD; a discussion on how psychosocial rehabilitation can help manage and reduce violence risk; and an overview of a systematic approach to violence risk assessment to PTSD.	1 hour	1088734	9/30/2022
PTSD 101: Practical Applications of Trauma-Focused Psychotherapies	The purpose of this knowledge-based course is to provide training by using clinical case examples to compare/contrast evidence-based trauma-focused psychotherapies.	1 hour	1088857	10/31/2022
PTSD 101: Prolonged Exposure Therapy: Effective Treatment for PTSD	The purpose of this knowledge-based course is to review the recent research on prolonged exposure (PE), provide a basic description of the treatment and to describe areas of future research for the team. By addressing a training practice gap, current PE providers/team members may improve their delivery of PE by learning about how recent research has informed new clinical recommendations for this treatment.	1 hour	1088863	11/30/2022

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
PTSD 101: PTSD Treatment via Tele-Mental Health Technology	The purpose of this knowledge-based course is to provide an evidence-based approach to improving the current team processes of how Tele-Mental Health (TMH) technology, specifically home-based clinical video telehealth, can be used to address common barriers to care for Veterans with PTSD. By addressing a training practice gap, learners will be able to identify access and barriers to care for rural or remote Veterans with PTSD; describe how to offer evidenced-based PTSD treatment to rural Veterans via the telehealth technology team; and list clinical and research resources to help providers start a TMH program.	1 hour	1088865	9/30/2022
PTSD 101: Cognitive Processing Therapy	The purpose of this knowledge-based course is to provide an updated description of the various versions of cognitive processing therapy (CPT), as well as a summary of recent and future research for the team. By addressing a training practice gap, current CPT providers/team members may improve their delivery of CPT by learning about how recent research has informed new clinical recommendations for this treatment, particularly changes in various CPT modalities.	1 hour	1088864	10/31/2022
PTSD 101: Assessing and Reducing Violence Risk in Veterans With PTSD	The purpose of this knowledge-based course is to provide an evidence-based approach to improving the current team processes of clinical assessment and management of violence risk in Veterans with PTSD. By addressing a training practice gap, learners will be presented with a review of empirical literature associated with violence in Veterans with PTSD; a discussion on how psychosocial rehabilitation can help manage and reduce violence risk; and an overview of a systematic approach to violence risk assessment to PTSD.	1 hour	1088734	9/30/2022
Community Hospices – PTSD in Vietnam Veterans	This recorded, knowledge-based presentation will define PTSD, its causes and symptoms, and how this	1 hour	1086813	8/29/2022

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	may manifest at the end of life. A number of treatment options for PTSD specific to those under hospice will be presented, as well as the similarities and differences between PTSD and other conditions.			
Cognitive Processing Therapy for PTSD Enhanced Practice	The purpose of this knowledge-based educational web course is to provide knowledge and skills to implement CPT in order to be able to offer this therapy as an option for all Veterans seeking treatment for their PTSD symptoms. Learners will explore a number of scenarios using techniques to have Veterans work through Stuck Points and learning to Self-Challenge. These topics will help address training gaps as well as identify how the use of CPT for PTSD can help Veteran patients.	4 hours	1084993	6/30/2021
PTSD Assessment and Treatment	The purpose of this series is to further educate non-VA providers and health care teams about VA policies, practices, expertise, standards and resources for treating Veterans. This session will discuss PTSD assessment and treatment.	2 hours	1084439	5/25/2022
PTSD 202: Skills Training in Affective and Interpersonal Regulation	This e-learning course is split into three sections, each containing a series of 15 to 20-minute sessions about skills training in affective and interpersonal regulation or STAIR, a trauma-informed, skills-focused treatment for PTSD and depression symptoms. Each session provides interactive, engaging and learner-centric training and resources for behavioral health clinicians learning to perform this therapy. The course relies heavily on a situational learning approach that involves scenarios, realistic examples, storytelling and characters. This approach takes several forms which is useful in expressing the nuances necessary to demonstrate behavioral, emotional and cognitive processes.	8 hours	1084691	9/30/2021

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
PTSD: From Neurobiology to Treatment	This presentation will highlight major advances in the neurobiology of PTSD and link these insights to novel therapeutic strategies. In doing so, this presentation will take a historical perspective and highlight advances from the 25 years of research within the Clinical Neuroscience Division of the National Center for PTSD of the U.S. Department of Veterans Affairs.	1 hour	1083779	9/1/2021
PTSD 101: The 2017 Revised Clinical Practice Guideline for PTSD: Recommendations for Psychotherapy	The purpose of this knowledge-based web course is to help clinicians become knowledgeable about the guideline recommendations and to assist them in providing care based on the latest evidence. This course will review the process by which the PTSD Clinical Practice Guideline was developed, clearly explain the recommendations related to psychotherapy and discuss the clinical implications for providers treating Veterans.	1 hour	1083765	1/31/2022
PTSD 101: The 2017 Revised Clinical Practice Guideline for PTSD: Recommendations for Medications	This course will review the process by which the PTSD Clinical Practice Guideline was developed, clearly explain the recommendations related to medications and discuss the clinical implications for providers treating Veterans.	1 hour	1083746	1/31/2022
PTSD 101: The 2017 Revised Clinical Practice Guideline for PTSD: How it Impacts Primary Care	This course will review the process by which the PTSD Clinical Practice Guideline was developed, clearly explain the recommendations related to primary care and discuss the clinical implications for providers treating Veterans.	1 hour	1083776	1/31/2022
Prescribing for Older Veterans With PTSD	This series of 10 courses are designed to address key areas of PTSD that have the most profound impact on Veterans and active duty Servicemembers.	1 hour	1065018	7/1/2021
Addressing Traumatic Guilt in PTSD Treatment	This course is part of the PTSD 101 education series, which is presented by experts in their field to increase provider knowledge related to the assessment and treatment issues of PTSD. The curriculum will be presented in a web-based learning	1 hour	1081427	7/1/2021

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	module with additional resources available for use after the training session. After successfully completing the course, learners will be able to use the information to describe the relationship between guilt and trauma and explain how to assess traumatic guilt; illustrate how guilt can be addressed in prolonged exposure therapy; and discuss how guilt can be addressed in cognitive processing therapy.			
Assessment and Treatment of Sleep Problems in PTSD - Alternate Methods for Delivery of Cognitive Behavioral Therapy	The goals of this course are to address this practice gap by providing information on both pharmacological and cognitive behavioral interventions for Veterans seeking help with their PTSD-related sleep problems and highlighting the innovative ways the psychotherapy interventions can be implemented in groups and through telehealth technology. **Expiring soon!**	1 hour	1084873	4/1/2021
Assessment and Treatment of Sleep Problems in PTSD – Background	One of the most common complaints in those with PTSD is sleep disturbance. Problems with sleep may lead to further exacerbation of PTSD and other comorbid symptoms. Despite the growing recognition that sleep disturbances are one of the most common detrimental components of PTSD, many providers are not well educated on effective protocols for improving sleep. The goals of this course are to address this practice gap by providing information on both pharmacological and cognitive behavioral interventions for Veterans seeking help with their PTSD-related sleep problems, and to highlight the innovative ways the psychotherapy interventions can be implemented in groups and through telehealth technology. **Expiring soon!**	1 hour	1058582	4/1/2021
Assessment and Treatment of Sleep Problems in PTSD - Pharmacological Treatments	One of the most common complaints of individuals with PTSD is sleep disturbance. ETHICS IN HEALTH CARE/WHOLE HEALTH CARE/CULTURAL TRANSFORMATION

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Whole Health Nutrition and Pain Management: Tools for Providers	This knowledge-based training is designed to give providers without extensive nutrition training both theoretical background and practical tools for incorporating nutrition as a tool for pain management. Recommendations for collaborating with nutrition professionals will also be discussed.	1 hour	1095076	11/13/2023
Facilitation Tips and Techniques for Whole Health Partners	The purpose of this knowledge-based web course is to provide facilitation tips and techniques for delivering face-to-face courses for whole health facilitators. These techniques will help address training gaps and were designed to augment and provide for opportunities to practice the skills developed in the in-person course, Whole Health Group Facilitation.	1 hour	1072952	9/15/2022

Introduction to Whole Health Skill Building Classes Module 2: Food and Drink	This course introduces whole health coaches to the eight whole health skill-building classes that are available to teach at local VHA facilities. The program will model how to teach the area of personal development, and it is the second course in a series of eight classes covering each area of the circle of health.	1 hour	1093760	9/23/2022
Whole Health Coaching-Kaizen: Less is More (More or Less)	This course will introduce whole health coaches to the concept of Kaizen. It will offer a definition of Kaizen, as well as an invitation for coaches to write a personal goal and to reflect on moments where they created Kaizen goals in their coaching. The speaker will feature examples from coaching experiences from the past and will reference the book, "One Small Step Can Change Your Life."	1 hour	1093706	9/23/2022
Whole Health Coaching: Creating Traction Between Sessions Leading to the Final Session	This course will teach the coach how to guide their coaching partners forward through the change process from one session to the next, linking the individual coaching sessions into a program that will support the wholistic integration of new behavior patterns for health and lifestyle. This course will also teach the process of how to complete a coaching program with the coaching partner to harvest what they have gained through their coaching program, as well as to empower the partner to successfully sustain their new behaviors moving forward.	1 hour	1093705	6/3/2022
Whole Health Coaching: Tracking Mechanisms	This program will enable learners to explain stop codes, CHAR4 codes and health factors associated with whole health coaching. It will outline the differences between count and non-count clinics and how to apply to whole health coaching, and will discuss within what service lines coaches could be hired.	1 hour	1085561	7/3/2022
Whole Health Coaching Stage 4: Debrief, Integrate and Forward Traction	The purpose of this knowledge-based Whole Health Community of Practice Coaching webinar series is to provide fundamental knowledge and skills in transforming the culture from transactional care based on illness and disease, to care focused on the individual Veteran's life and what matters to him or her. Moreover, these offerings will focus on strengthening personal resilience and self-care practices that are essential for effective health and wellness coaching.	1 hour	1085560	7/3/2022

Whole Health: Providing Health Care in VHA and in the Community	This recorded, knowledge-based presentation will provide an overview of the whole health system of care implementation in VHA to date, a summary of the evidence for several complementary and integrative health (CIH) approaches provided in this model, and a discussion around provision of CIH within VHA and in the community and health care teams.	1 hour	1093424	9/3/2023
Safety Aids and the Ethics	This recorded training will educate attendees about safety aids and challenges clinicians may face when trying to help patients eliminate the use of safety aids.	1 hour	1093360	8/14/2023
The Whole Health System: An Update on VHA Health Care Transformation	The purpose of this series is to further educate non-VA providers and health care teams and give an in-depth review of the whole health system of care, including the elements of the model in action throughout the country, implementation and evaluation strategies, as well as testimonials from Veterans receiving this care. The recorded training will also include a discussion around provision of complementary and integrative health within VHA and in the community.	2 hours	1088250	12/2/2022
Eating for Whole Health: Introduction to Functional Nutrition	The purpose of this knowledge-based educational web course is to inform learners of the latest research in nutrition and draw from the wisdom of dietitians and functional nutrition practitioners throughout VA in order to incorporate nutrition recommendations into Veterans' personal health plans. Learners will explore several nutrition-related topics ranging from how food affects bodies at a molecular level, to how best to support Veterans in making changes related to their eating patterns. In addition, this course will introduce a series of whole health tools and techniques and an array of nutrition resources that can support clinical work.	1 hour	1078889	6/30/2021
Whole Health for Pain and Suffering: Neck and Back	This knowledge-based whole health education program is designed to support clinicians who work with patients that experience pain. Participants will learn about evidence-informed, safe and effective non-pharmaceutical approaches to pain care. The program is built around patient vignettes and explores the role of self-care approaches, such as nutrition,	1 hour	1077809	3/8/2021

	physical activity, sleep and interpersonal relationships. Special emphasis is given to mind-body approaches and ways to cultivate mindful awareness. This particular video will discuss whole health for the neck and back. **Expiring soon!**			
Whole Health for Pain and Suffering: Osteoarthritis	This knowledge-based whole health education program is designed to support clinicians who work with patients that experience pain. Participants will learn about evidence-informed, safe and effective non-pharmaceutical approaches to pain care. The program is built around patient vignettes and explores the role of self-care approaches, such as nutrition, physical activity, sleep and interpersonal relationships. Special emphasis is given to mind-body approaches and ways to cultivate mindful awareness. This particular video will discuss whole health for patients dealing with osteoarthritis. **Expiring soon!**	1 hour	1077808	3/8/2021
Whole Health for Pain and Suffering: Self Care	This knowledge-based whole health education program is designed to support clinicians who work with patients that experience pain. Participants will learn about evidence-informed, safe and effective non-pharmaceutical approaches to pain care. The program is built around patient vignettes and explores the role of self-care approaches, such as nutrition, physical activity, sleep and interpersonal relationships. Special emphasis is given to mind-body approaches and ways to cultivate mindful awareness. This particular video will discuss self-care as part of whole health for pain and suffering. **Expiring soon!**	1 hour	1077811	3/8/2021
Whole Health for Pain and Suffering: Mind and Body Part I	This knowledge-based whole health education program is designed to support clinicians who work with patients that experience pain. Participants will learn about evidence-informed, safe and effective non-pharmaceutical approaches to pain care. The program is built around patient vignettes and explores the role of self-care approaches, such as nutrition, physical activity, sleep and interpersonal relationships. Special emphasis is given to mind-body approaches and ways to cultivate mindful awareness. This particular video will dive into whole health	1 hour	1077810	3/8/2021

	for the mind and body for patients dealing with pain and suffering. **Expiring soon!**			
Whole Health for Pain and Suffering: Mind and Body Part II	This knowledge-based whole health education program is designed to support clinicians who work with patients that experience pain. Participants will learn about evidence-informed, safe and effective non-pharmaceutical approaches to pain care. The program is built around patient vignettes and explores the role of self-care approaches, such as nutrition, physical activity, sleep and interpersonal relationships. Special emphasis is given to mind-body approaches and ways to cultivate mindful awareness. This video will dive a bit deeper into whole health for the mind and body for patients dealing with pain and suffering. **Expiring soon!**	1 hour	1077768	3/8/2021
Whole Health for Pain and Suffering: Headache	This knowledge-based whole health education program is designed to support clinicians who work with patients that experience pain. Participants will learn about evidence-informed, safe and effective non-pharmaceutical approaches to pain care. The program is built around patient vignettes and explores the role of self-care approaches, such as nutrition, physical activity, sleep and interpersonal relationships. Special emphasis is given to mind-body approaches and ways to cultivate mindful awareness. This particular video will discuss whole health for patients dealing with headaches. **Expiring soon!**	1 hour	1077803	3/8/2021
Whole Health for Pain and Suffering: Chronic Pain	This knowledge-based whole health education program is designed to support clinicians who work with patients that experience pain. Participants will learn about evidence-informed, safe and effective non-pharmaceutical approaches to pain care. The program is built around patient vignettes and explores the role of self-care approaches, such as nutrition, physical activity, sleep and interpersonal relationships. Special emphasis is given to mind-body approaches and ways to cultivate mindful awareness. This particular video will discuss whole health for patients suffering from chronic pain. **Expiring soon!**	1 hour	1077806	3/8/2021

Difficult Airway Algorithm and Rescue Cricothyrotomy	The Difficult Airway Algorithm and Rescue Cricothyrotomy (DAARC) training program intends to help reduce patient morbidity and mortality associated with difficult and lost airways. In order to provide Veterans mission-critical, personalized, proactive, patient-driven health care through innovation and improvements, professional medical providers need iterative Emergency Difficult Airway Algorithm and Rescue Percutaneous Cricothyrotomy training.	6 hours	1071302	4/20/2023

Disability and Medical Assessment Skin and Scar Examinations	The purpose of this web-based training course is to provide an overview of the skin and scar disability examination. It will address a knowledge gap by providing updated information including procedures and a demonstration regarding how to prepare for, conduct and properly document a thorough and legally defensible skin and scar disability examination.	1 hour	1064862	9/30/2022
Disability and Medical Assessment (DMA) Cold Injury Residuals Examination	The compensation and pension cold injury protocol examination provides one model demonstration of an exemplary compensation and pension examination.	1 hour	1067762	8/30/2022
Next Steps in Assessment of Patients Diagnosed With Dementia: A Holistic Approach	The purpose of this program is to provide an opportunity for interdisciplinary learning to improve dementia care management throughout all VISNs and community partnerships. This program will also utilize innovative technology to increase access to patient-centered education for providers nationwide.	3 hours	1090644	2/1/2022
Geriatric Late-Life Depression	Geriatric Late-Life Depression is a gaming learning product that will provide learners with a surrogate measure of clinical competency in managing late-life depression in geriatrics.	1.25 hours	1086750	7/31/2022
Community Hospices – Moral Injury in Vietnam Veterans	This webinar will define the concept of moral injury (MI) to health care teams and how it affects some Veterans of the Vietnam War. How to identify symptoms of MI, especially in the last weeks to months of life, will be described, and treatment options, particularly those that are viable in the home setting and used by hospice and other health care professionals, will be discussed.	1 hour	1086811	8/29/2022
Recognizing and Managing Dementia in Primary Care	This module was developed to help clinicians better recognize dementia using a warning signs approach, and to integrate knowledge of dementia into management of other chronic conditions in the primary care setting to improve patient care outcomes and safety.	1.25 hours	1086464	7/25/2022

GERIATRICS AND EXTENDED CARE

VA Geriatric Scholars Program: Rural Interdisciplinary Team Training April Session	The purpose of this knowledge-based, live webinar is to provide knowledge to the inter-professional health care team on common geriatric conditions and increase geriatric, team-based expertise in rural community-based outpatient clinics. This program will provide information on the dynamics of building and managing an interdisciplinary team; identification of geriatric "red flags" that require immediate attention when recognized; identifying team-based solutions to care; and offer an understanding of common geriatric syndromes and their formal assessment. **Expiring soon!**	1 hour	1096117	Live event to be held Apr. 16 only
Geriatric Research Education and Clinical Centers Series: How the Brain Deals With Pain and How to Deal With the Brain	The purpose of this recorded, knowledge-based webinar series is to train providers in the components, techniques, structure and delivery of an effective, literacy-adapted cognitive behavioral therapy group for patients with chronic pain. This training will bridge the knowledge with what is currently known about the brain and pain stimulus and introduce new concepts on how to handle pain and the mental fallout from pain management.	1 hour	1095269	11/30/2022
Geriatric Research Education and Clinical Centers Series: Working With Deeper Beliefs	The purpose of this knowledge-based webinar series is to train providers in the components, techniques, structure and delivery of an effective, literacy-adapted cognitive behavioral therapy group for patients with chronic pain. This session will focus on working with deeper beliefs.	1 hour	1095610	11/30/2022
Geriatric Research Education and Clinical Centers Series: Pain and Stress	The purpose of this knowledge-based recorded webinar series is to train providers in the components, techniques, structure and delivery of an effective, literacy-adapted cognitive behavioral therapy group for patients with chronic pain. Cognitive behavioral therapy stresses the relationship	1 hour	1095346	11/30/2022

DISABILITY

	between one's thoughts, feelings and actions. This session will focus on pain and stress.			
Geriatric Research Education and Clinical Centers Series: Pain and Emotions	The purpose of this recorded, knowledge-based webinar series is to train providers in the components, techniques, structure and delivery of an effective, literacy-adapted cognitive behavioral therapy group for patients with chronic pain. Cognitive behavioral therapy stresses the relationship between one's thoughts, feelings and actions. This session will focus on pain and emotions.	1 hour	1095312	11/30/2022
Geriatric Research Education and Clinical Centers Series: Pain and Communication	The purpose of this knowledge-based recorded webinar series is to train providers in the components, techniques, structure and delivery of an effective, literacy-adapted cognitive behavioral therapy group for patients with chronic pain. Cognitive behavioral therapy stresses the relationship between one's thoughts, feelings and actions. This session will focus on pain and communication.	1 hour	1095313	11/30/2022
Geriatric Research Education and Clinical Centers Series: Getting Active and Other Useful Health Habits	This program is intended to train providers in the components, techniques, structure and delivery of an effective cognitive behavioral therapy group for Veterans with chronic pain. This session will focus on useful health habits.	1 hour	1095276	11/30/2022
Geriatric Patient Cognitive Impairment	The goal of this Veterans Health Administration geriatrics workforce effort is to design an educational game that provides an adaptable, competency-based learning experience and develops "geriatrics-equipped" inter-professional team members.	1 hour	1094380	9/16/2023
Plan of Care for the Older Adult	The purpose of this knowledge-based training is to review components of person-centered care planning for the older adult. When developing a plan of care, it is important to be aware of the unique developmental and physical needs of the patient as it refers to the aging process, including any disease processes	1 hour	1091116	8/13/2021

DISABILITY

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	occurring, such as dementias or other diseases that can affect cognition. The nurse must also be able to identify expected outcomes and modify the plan of care related to normal and abnormal processes of aging. Having this knowledge can positively impact the patient-centered, team-delivered care that the VA provides to Veterans.			
Safety of the Older Adult	Nursing specialty certification validates nursing knowledge and skills. With more Veterans aging, obtaining gerontological nursing certification becomes important to promote quality and standardization of care. This webinar series will review requirements for certification, why certification is important, and work to close the knowledge gap on geronological nursing skills and practice behavior required to optimize geriatric Veteran care and prepare nurses for board certification in gerontological nursing.	1 hour	1091118	10/14/2021
Medication and Treatment Considerations in Older Adults	This training focuses on the topics of medication and treatments specific to the care of older adults, such as polypharmacy, medication reconciliation and use of alternative/complementary medications for common geriatric syndromes.	1 hour	1091107	9/10/2021
Communication With Older Adults	This knowledge-based training will address effective communication and teaching techniques as they relate to older adults and gerontological nursing practice. As such, this training will work to close the knowledge gap among nurses on communication and teaching with older adults thereby enhancing their gerontological nursing skills and practice behavior to better optimize geriatric Veteran care.	1 hour	1091113	7/8/2021

DENTAL CARE

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Advances in Brain Stimulation Therapies to Boost Veterans' Mental Health	This recorded webinar will focus on the knowledge gap of uses of non-Food and Drug Administration approved repetitive transcranial magnetic stimulation (rTMS) protocols. In particular, it will focus on closing this gap with education on the clinical utility of rTMS in Veterans, especially those with TBI and unexplained pain syndromes associated with Gulf War illness.	1 hour	1096331	12/28/2023
Coordinating Across All Levels of the Continuum of Mental Health Care: The Role of Veterans Crisis Line With Each of You	This live, knowledge-based training will provide clinicians and the inter-professional health care team a comprehensive overview of the crisis intervention services provided by the Veterans Crisis Line (VCL), both during and after the call. The presentation will highlight the current data about the elevated risk of this population and the critical importance of engagement in services after the call as a method of suicide prevention. Finally, attendees will learn about the current research related to VCL and the implementation of new evidence-based programs to support callers. **Expiring soon!**	1 hour	1096138	Live event to be held Mar. 10 only
Recognizing and Managing Thoughts That Work Against You	The purpose of this recorded, knowledge-based webinar series is to train providers in the components, techniques, structure and delivery of an effective, literacy-adapted cognitive behavioral therapy group for patients with chronic pain. Cognitive behavioral therapy stresses the relationship between one's thoughts, feelings and actions.	1 hour	1095314	11/30/2022
Veterans Health Administration's Rapid Conversion to Virtual Mental Health Care During the COVID-19	The purpose of this recorded, knowledge-based training is to describe the factors that allowed the Veterans Health Administration to quickly pivot and provide increased virtual mental health care during the pandemic, the impact of virtual care on Veterans' mental health care, and future implications. Providers	1 hour	1095535	1/18/2024

	would benefit from understanding the VA's investment in virtual care and how this has improved access and outcomes so they can adopt successful virtual care services.			
Women's Mental Health Across the Lifespan	This is a of a live, knowledge-based training will provide an overview of women-specific influences on mental health throughout the lifespan, from in utero influences through adolescence; pregnancy; the postpartum period; the transition to menopause; and aging.	1 hour	1095025	12/4/2023
Recent Developments in Parkinson's Disease Neuropsychiatry	Movement disorders represent a key intersection of psychiatry and neurology, with psychiatric and cognitive disorders common in disorders such as Parkinson's disease, dementia with Lewy bodies and movement disorders common in patients with primary psychiatric disorders treated with psychotropic medications. The purpose of this course is to continue the practice of delivering an informative symposium for clinicians and clinical researchers. **Expiring soon!**	4 hours	1094066	Live event to be held Mar. 24 only
Shared Decision-Making	The goal of this course is to promote shared decision-making (SDM) and provide practical examples and models of SDM with Veterans with a range of mental health conditions, including depression, posttraumatic stress disorder, substance use disorder s and serious mental illness. The training defines each step of the SDM process, including team talk, option talk, and decision talk and provides interactive, behavioral examples of how clinicians engage in SDM.	1 hour	1093491	4/1/2022
Skills for Psychological Recovery	Skills for psychological recovery is a skills-building intervention for post-disaster environments that uses components of cognitive behavioral treatments that are common across many diagnoses. This course will allow those who work with Veterans to learn a skills-building approach that can both be applied to increasing resilience in Veterans and to	4.5 hours	1091207	3/23/2023

MENTAL HEALTH

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	better respond to mass casualty and disaster situations.			
Military Sexual Trauma: Considerations for Mental Health Providers in Rural Settings and VA Community-Based Outpatient Clinics	The purpose of this recorded training is to disseminate current knowledge regarding military sexual trauma, including rates, mental health sequelae and comorbidities, and optimal practices for screening, assessment, and intervention when working with survivors of military sexual trauma. Clinical considerations for mental health providers working with rural Veterans will also be discussed.	1 hour	1093338	8/14/2023
Computerized Clinical Services in Mental Health and Introduction to the Tele-Psychosis Consultation Service	The purpose of this recorded training is to inform providers about the new VA tele-psychosis consultation service, and to address challenges providers face making the best use of clinical informatics tools and predictive analytics. There will also be discussion of predictive analytics and the uses of these analytics for prediction of health risks, suicide prevention and improving complex primary care.	1 hour	1093355	8/14/2023
Depression Treatment for Pregnant and Nursing Women	The purpose of this recording of a live, knowledge-based training is to address the knowledge gap in diagnosis and treatment of depressive disorders during pregnancy and lactation. The webinar includes information on two evidence-based skills building interventions that are readily available for VA clinicians nationally to improve care of women during pregnancy and lactation.	1 hour	1093362	8/14/2023
Assessing and Treating Obsessive Compulsive Disorder in Veterans	This recorded training will provide information and resources regarding the assessment and treatment of obsessive-compulsive disorder in Veterans. The use of telehealth to deliver treatment for OCD will also be discussed.	1 hour	1093361	8/14/2023
Whole Health for Mental Health and Well-Being	The purpose of this knowledge-based course is to explore how whole health can support mental health care in VA. This course provides an overview that shifts the perspective away from mind-body dualism and toward a system of care where mental health is seamlessly incorporated as a core aspect of whole-person care. The course highlights the connections between mental health and	1 hour	1092555	7/15/2023

MENTAL HEALTH

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	each of the components of the circle of health, including mindful awareness and the various aspects of self-care This course is designed to help clinicians and VA staff bridge mental health care with every other aspect of Veterans' lives.			
Skills for Psychological Recovery	Skills for Psychological Recovery is a skills-building intervention for post-disaster environments that uses components of cognitive behavioral treatments that are common across many diagnoses. The course will allow those who work with Veterans to learn a skills-building approach that can both be applied to increasing resilience in Veterans and to better respond to mass casualty and disaster situations.	4.5 hours	1091207	3/23/2023
Conducting Research in the Inpatient Mental Health Unit	The goal of the Institutional Review Board (IRB) Chairs webinar series is to discuss ethical and regulatory considerations that affect IRB review of human subjects' research. Cases will be used to highlight interesting and complex issues that the IRB encounters while performing its review. This session covers ethical and regulatory considerations when conducting research in the inpatient mental health unit.	1.5 hours	1089539	1/31/2023
What is Social Skills Training for Serious Mental Illness: An Overview and Refresher	This training will teach learners the outcomes of social skills training (SST) research; explain what occurs in an individual session and SST group sessions; outline logistical considerations of SST; and state how to get more information on SST resources and VA training. **Expiring soon!**	1.5 hours	1086072	4/29/2021

LEAD COORDINATOR TRAINING

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE

TRAUMATIC BRAIN INJURY (TBI)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Management of TBI and Co-Occurring Disorders	This live, knowledge-based training will improve the quality, competence and availability of providers to offer evidenced-based management of TBI with co-occurring conditions (CODs). Time will be spent providing an overview system of diagnosis and management for TBI with CODs. The course will also highlight the clinical care and use of the clinical practice guidelines for management of TBI. **Expiring soon!**	1.5 hours	1096253	Live event to be held March 16 only
Veterans Health Initiative: Traumatic Brain Injury	Academic medical and allied health institutions do not provide adequate training in TBI and poly-trauma in general and particularly as it affects the Veteran population. This training will specifically address practice inconsistencies in planning, execution and provision of services from acute rehabilitation, to follow up, and management of chronic problems of TBI and poly-trauma in the Veteran population. The goal is to ensure that VA health care providers have the knowledge and skills necessary for optimal delivery of health care services for Veterans with TBI.	1 hour	1084807	5/11/2022
Managing the Agitated Brain Injury Patient's Behavior in a Rehab Setting	Brain injury recovery can include a period of time transitioning through a specific behavior trajectory. The Rancho Los Amigos Scale allows the rehabilitation provider to describe the behaviors being observed and assigns a level to a particular type of behavior. Some of these behaviors can be difficult for staff to manage in a patient care setting, and simultaneously use interventions that are therapeutic to encourage the resolution of these same behaviors. This recorded webinar will address the knowledge gap that exists among nursing staff in managing difficult behavior during brain injury recovery.	1 hour	1068147	2/17/2023
Traumatic Brain Injury: Diagnosis and Management	The purpose of this recorded, knowledge-based training will be to inform community providers and health care teams about traumatic brain injury (TBI) and the differences that Veterans with TBI may present with compared to civilians	1 hour	1091174	5/15/2023

TRAUMATIC BRAIN INJURY (TBI)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	with TBI. They will be informed about VA's TBI/polytrauma system of care, the need to develop an individualized plan of care for Veterans with TBI, and how to connect their Veteran patients to VA resources. Additionally, they will learn about online tools and training resources highlighting issues related to Veterans and service members with TBI.			
Best Practice in Cognitive Rehabilitation for Traumatic Brain Injury	This program aims to increase consistency in cognitive rehabilitation practices for service members and Veterans diagnosed with mild to moderate TBI.	2 hours	1088051	10/25/2021

SUICIDE PREVENTION

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Clinical Practice Guideline for Suicide Prevention: Suicide Risk Stratification and Documentation	This knowledge-based recording will address risk stratification for the interprofessional health care team who will attend to risk in terms of both severity and temporality. It will also offer related documentation strategies.	1 hour	1096046	2/26/2024
Home Visit as a Suicide Prevention Strategy	This recorded, knowledge-based webinar will inform attendees and health care teams about the research done on home visits that led recommendations in the Clinical Practice Guideline for the Assessment and Management of Patients at Risk for Suicide. This training will also describe a clinical program called the Home-Based Mental Health Evaluation, or HOME program, which involves a home visit and has been implemented in VA.	1 hour	1096149	3/26/2024
Suicide Risk Management: PTSD Trauma Focused Treatment Recording	This recorded, knowledge-based course will review the evidence on how suicidality is affected by trauma-focused treatments. It will discuss when to provide trauma-focused treatments in the context of suicidality and how to successfully manage both.	1 hour	1096025	1/15/2023
Understanding and Addressing Suicide Among Homeless and At-Risk Veterans Recording	This recorded, knowledge-based presentation will review risks and programing for health care teams to be	1 hour	1096014	1/15/2023

	aware of when working with homeless or at-risk Veterans.			
Clinical Practice Guide for Suicide Prevention: Evidence-Based Practice in Suicide Risk Screening and Evaluation	This virtual, knowledge-based webinar will provide an overview of evidence-based recommendations for suicide risk screening and evaluation. It will also discuss strategies for implementation of these practices in routine health care settings. **Expiring soon!**	1 hour	1096009	Live event to be held Mar. 9 only
Ketamine and Esketamine Treatment: Implications for VA Suicide Prevention Recording	This recorded, knowledge-based webinar will review the evidence supporting use of Ketamine and Esketamine in patients with suicidal ideation and major depressive disorder.	1 hour	1095893	2/2/2024
Clinical Practice Guideline for Suicide Prevention: Perceived Barriers and Facilitators of Clozapine Use Recording	The VA Office of Mental Health and Suicide Prevention will host monthly training webinars to educate VA field employees on how to implement the components of the organization's public health approach to suicide prevention. This recorded training will focus on the perceived barriers and facilitators of Clozapine use.	1 hour	1095638	1/15/2024
Suicide Risk Management: Welfare Checks and Therapeutic Risk Management Recording	This recorded, knowledge-based webinar will address therapeutic risk management and how it represents a patient-centered approach to risk assessment and management that strives to balance the competing ethical principles of autonomy, non-maleficence and beneficence, to simultaneously optimize clinical care and support therapeutic alliances.	1 hour	1095536	1/15/2023
Veterans Integration to Academic Leadership: Moral Injury Recording	The purpose of this program is to provide college and university staff the knowledge and skills needed to assist Veterans with transitional issues and needs for mental health assistance through the VITAL initiative. This topic covers Moral Injury in Veterans and considerations for care providers and others.	1 hour	1095472	12/31/2023
Preventing Suicide Through Lethal Means Safety and Safety Planning	Suicide is a major public health concern, and the age-adjusted suicide rate in the U.S. increased 33 percent from 1999-2017. This recorded, knowledge-based webinar will educate VHA Mental Health health care teams on Lethal Means Safety Counseling. Participants will learn about the purpose of Lethal Means Safety for Suicide Prevention, including how to work with Veterans and	1 hour	1095272	12/21/2023

	their friends and family to facilitate lethal means safety during high-risk periods.			
Clinical Practice Guideline for Suicide Prevention: Status of VA Ketamine and Esketamine Services	The U.S. Department of Veterans Affairs (VA), Office of Mental Health and Suicide Prevention (OMHSP), will host monthly training webinars to educate VA field employees on how to implement the components of the organization's public health approach to suicide prevention.	1 hour	1095268	10/15/2023
Suicide Risk Management Consultation Program: Providers Working in Suicide Prevention	This recorded presentation promotes the importance of self-care and sustainability for providers and health care teams who work with individuals who are at higher risk for suicide. An area of focus will be on one presenter's experience of post-traumatic growth, recovery and healing in the wake of a colleague's death by suicide. The importance of recognizing signs of burnout and actualizing self-care strategies will be reviewed in order to allow for sustainability in challenging work.	1 hour	1094245	10/15/2023
Suicide Risk Management Consultation: Patient-Centered Approach to Lethal Means Safety	This recorded, knowledge-based training will review the rationale for lethal means safety (LMS) as a critical component of suicide prevention. LMS involves reducing access to lethal means (e.g., excess medication, firearms) when suicide risk is elevated. In this training, important clinical considerations regarding how to take a patient-centered approach to LMS when health care teams are working with Veteran patients will be discussed.	1 hour	1093090	9/15/2023
Suicide Risk Management: Using Chain Analysis to Assess and Intervene on Suicidal Ideation	This knowledge-based recorded training will provide attendees and health care team members critical tools for executing chain analysis, helping participants to build new strategies for intervening on suicidal ideation and behavior. First, participants will learn how to identify the factors sustaining suicidal ideation and behavior, with positive and negative reinforcement investigated as pathways maintaining suicide risk. Next, participants will learn about the components of the behavioral chain. Finally, applying the chain as an intervention strategy when working with suicide risk will be discussed.	1 hour	1093092	9/1/2023

Suicide Prevention Partnerships: Promoting Veteran Mental Health	The VA Office of Mental Health and Suicide Prevention will host monthly training webinars to educate VA field employees on how to implement the components of the organization's public health approach to suicide prevention.	1 hour	1092577	7/24/2023
Suicide Risk Management - Safety Basics	This recorded webinar will assist the clinicians and health care teams in advancing safety planning skills by reviewing the basics of safety planning, the rationale for safety planning and the concept of the suicide risk curve.	1 hour	1092111	7/15/2023
Suicide Risk Management Consultation Program– April Recording	The Department of Veteran Affairs Office of Mental Health and Suicide Prevention will host monthly training webinars to educate VA field employees on how to implement the components of the organization's public health approach to suicide prevention.	1 hour	1092104	7/1/2023
S.A.V.E Training for Employees	Per directive from VA secretary, S.A.V.E. training will be delivered to all employees.	1 hour	1091625	6/1/2023
Skills Training for Evaluation and Management of Suicide	Veterans are at an increased risk of suicide compared to the general population. According to the National Violent Death Reporting System, in 2016, there was an average of 20 Veteran suicide deaths each day. VA/DOD has developed Clinical Practice Guidelines (CPG) as one component of a comprehensive strategy to reduce Veteran suicide. The purpose of this knowledge-based course is to provide training on how best to utilize this CPG to facilitate the development of suicide risk assessment and management skills.	1 hour	1090912	4/11/2023
Veteran Suicide Prevention Resources for Providers	The goal of this web-based series is to further educate non-VA providers and health care teams about VA policies, practices, expertise, standards and resources for treating Veterans. This particular session will address Veteran suicide prevention resources for providers.	1 hour	1090505	3/23/2023
Overview Suicide Risk Management	This training will provide an overview of the updated VA/DOD clinical practice guideline (CPG) for suicide risk management, including key changes and differences from previous CPGs and resources for implementation.	1 hour	1089347	12/20/2022
Suicide Prevention-Public Health Model: Lethal Means Safety Education	The purpose behind this one-hour enduring training session is to expose suicide prevention coordinators (SPCs) to lethal means safety measures and increase their confidence when having discussions	1 hour	1088698	6/30/2022

	relating to lethal means. At the end of this session, SPCs and health care teams will have a tactical understanding of how to talk about lethal means, including firearms and gun lock safety, as well as detailed information on how to provide upstream interventions for Veterans.			
Suicide Prevention Partnerships: Caring for Those Who Care for Military Families and Veterans	This recorded webinar will provide education to VA partners, VA employees and subject-matter experts, as well as anyone who supports VA's suicide prevention program and partnerships.	1 hour	1088533	1/2/2022
Suicide Prevention Partnerships: September Is Suicide Prevention Month; Let's Prepare!	This webinar provides education to non-VA mental health providers participating in the Suicide Prevention Month program. Information includes available resources, military/Veteran culture, and clinical resources.	1 hour	1087214	9/30/2021
Assessment and Management of Patients at Risk for Suicide	The purpose of this knowledge-based video program is to educate and assist health care teams to deliver high-quality, evidence-based care. Suicide prevention is a high priority for members of the health care teams who care for Veterans. This video will assist health care teams better understand how the guideline was developed, how to use it and how to effectively assess and manage patients who are at risk for suicide.	1 hour	1087422	10/26/2022
Introduction to Self-Directed Violence Classification System	In less than six minutes, the presenter of this training explains clearly why the adoption of the Self-Directed Violence Classification System is important for clinical practice and research related to suicide prevention. Learners may be surprised that exercise plays a part.	1 hour	1086995	9/2/2022
Self-Directed Violence Classification System – I'm Done	In this eight-minute video, the clinician meets with a young Veteran who has had a recent suicide attempt. The consultant explores the issues of determining suicidal intent, bodily injury and what is meant by "interrupted by self or other."	1 hour	1087003	9/2/2022
Self-Directed Violence Classification System – Going to Bed and Not Waking Up	In this five-minute video, the clinician meets with a Veteran who says she is down and not getting out. The clinician asks directly, "Have you been having any thoughts of suicide or killing yourself?" The Veteran gives an ambiguous answer, and a consultant helps tease out the Self-Directed Violence Classification System.	1 hour	1086999	9/2/2022

Self-Directed Violence Classification System – What Is Self-Cutting	In this scenario, the clinician interviews a Veteran who describes getting mad at his roommate and has thoughts of cutting himself or drinking bleach. The clinician explores how this relates to the Self-Directed Violence Classification System.	1 hour	1087013	9/2/2022
Self-Directed Violence Classification System – Interrupted by Self or Other	In this video, an older Veteran feeling overwhelmed by health issues and a pending divorce decides to drive his car into a ditch as a way to end his life. Before he can act, he is stopped for careless driving. The clinician and consultant unpack all that happens in this session before deciding on the Self-Directed Violence Classification System.	1 hour	1087009	9/2/2022
Self-Directed Violence Classification System – Can We Determine Intent	In this video, a suicide prevention coordinator (SPC) reaches out to a Veteran who has missed an appointment. As the SPC checks in with her, the Veteran brings up burning her arm with a cigarette. In the following supervision session, the clinician is faced with determining intent and what a specific behavior means.	1 hour	1087000	9/2/2022
Self-Directed Violence Classification System – Asking Three Questions to Determine Intent	The Veteran in this vignette is dealing with chronic pain from a back injury. One night, he searches for information on how to overdose on pain medication. With her supervisor, the clinician explores what makes a behavior preparatory and what is intent when it comes to preparatory behavior.	1 hour	1087007	9/2/2022
Self-Directed Violence Classification System – An Accident or Intentional	In this scenario, the clinician interviews a Veteran who witnesses the death of his friend, a fellow Veteran.	1 hour	1087012	9/2/2022
Self-Directed Violence Classification System – After an Inpatient Stay	In this scenario, the clinician interviews a Veteran who has come home from an inpatient hospital stay. The interview highlights the difficulty of transitions and the role of thoughts and behaviors in the Self-Directed Violence Classification System. The Veteran also discusses how he called the Veterans Crisis Line to seek help as part of his safety plan.	1 hour	1087015	9/2/2022
Self-Directed Violence Classification System – Six-Month Follow-Up	In this scenario, the clinician interviews a Veteran who had a serious suicide attempt. The clinician discusses the attempt with the Veteran and tries to place it on the Self-Directed Violence Classification System.	1 hour	1087018	9/2/2022

Self-Directed Violence Classification System – Postvention After a Suicide Death	In this scenario, the clinician interviews a Veteran's daughter about the suicide death of her mother. The clinician discusses how this could fit on the Self-Directed Violence Classification System. Importantly, the video also touches on the need for postvention after a clinician loses a client to suicide.	1 hour	1087179	9/2/2022
Self-Directed Violence Classification System – Does a Gun Always Make It Serious?	In this scenario, the clinician interviews a Veteran about his plans for a long weekend. The clinician checks in about his plans to go to a firing range and asks about thoughts related to self-directed violence.	1 hour	1087017	9/2/2022
Patient Care Services Grand Rounds: Suicide Prevention Overview Within VA	Designed to increase the awareness and overall understanding of public health, this training will provide health care teams with an overview of suicide in the U.S. among both Veteran and non-Veteran populations; review the national strategy for preventing Veteran suicide; provide evidentiary support for public health initiatives; and discuss VA's path forward in leveraging a public health model to prevent Veteran suicide.	1 hour	1086757	8/28/2021
Suicide Prevention Partnerships: How Technology Can Help Veterans Stay Connected	This VA Office of Mental Health and Suicide Prevention webinar will educate VA field employees on how to implement the components of the VA organization's public health approach to suicide prevention.	1 hour	1086666	8/15/2021
Veteran Affair's Suicide Prevention Strategy	The purpose of this series is to further educate non-VA providers and health care teams about VA policies, practices, expertise, standards and resources for treating Veterans. This recorded session will discuss VA's suicide prevention strategy.	2 hours	1086480	9/5/2022
Treatment Improvement Protocols 50: Addressing Suicidal Thoughts and Behaviors in Substance Abuse Treatment	This interactive web-based training addresses evidence-based treatment improvement protocols for treating substance use disorders. This program will give mental health providers in all disciplines up-to-date, standardized skills assessment training to assess suicidality and develop effective treatment plans to prevent suicide in the Veteran population.	1 hour	1081765	12/31/2021

Treating PTSD and Suicide Risk: Separating Myth From Fact	PTSD is a well-established risk factor for suicidal behavior. Although suicidal thoughts and behaviors are common among patients with PTSD, myths and misconceptions about suicide abound among clinicians. Data that will refute these myths, especially the belief that suicidal patients cannot be safely or effectively treated with empirically-supported trauma therapies, will be presented and discussed in this training.	1 hour	1083785	9/1/2021
Veteran Affair's Suicide Prevention Strategy	The purpose of this knowledge-based series is to further educate non-VA providers about VA policies, practices, expertise, standards and resources for treating Veterans. This particular recorded session will discuss the VA's strategy for suicide prevention.	2 hours	1082085	11/15/2021

GRAND ROUNDS

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Amputation Grand Rounds April 2021: The Art and Science of Amputation Level Decision-Making	The purpose of this live, knowledge-based presentation is to provide health care teams with specific knowledge and skills to be better able to engage in shared decision-making with the patient who requires lower extremity amputation secondary to chronic limb threatening ischemia.	1 hour	1096024	Live event to be held Apr. 20 only
Amputation Grand Rounds December 2020: Prosthesis Candidacy Determination: The Power of the Team	This recorded, knowledge-based session is designed to provide clinicians and health care teams with specific knowledge and skills to evaluate and manage the Veteran with limb loss who presents with the need for prosthetic restoration. During this course, participants will obtain enhanced knowledge and skills for determining prosthesis candidacy; gain understanding of the critical factors influencing prosthesis candidacy; gain skills to perform a comprehensive, team-based evaluation; and obtain skills for enhanced communication with the Veteran and family members regarding the rationale and justification for prosthesis candidacy determination.	1 hour	1095758	3/4/2023
Amputation Grand Rounds August 2020: VA Amputation Care in a Virtual World and Beyond	The purpose of this session is to educate health care teams on current and planned VA amputation care initiatives. The initiatives are designed to improve access to care, enhance the consistency of care and the timeliness of service delivery. The program will emphasize virtual care initiatives including the utilization of VA Video Connect for prosthesis checkout visits and future expansion opportunities, as well as clinical guidance in the realm of artificial limb fitting.	1 hour	1093867	11/2/2022
Amputation Grand Rounds June 2020: Amputation System of Care - National Upper Extremity Center of Expertise Program	This recorded webinar will review the assistance available through the Amputation System of Care Upper Extremity Center of Expertise program. A brief introduction of the program followed by detailed descriptions of the key staff and the various clinical assistance available through the program will be discussed. Standard operating procedures relating to	1 hour	1092748	8/10/2022

	patient referrals, or field requests for assistance involving upper extremity limb loss will be presented.			
Amputation Grand Rounds April 2020: Scar Wars	This training is hosted by the VHA Amputation System of Care and the Extremity Trauma and Amputation Center of Excellence. Devastating wounds and their resultant scars are highly prevalent afflictions among those who risk their lives in combat. This webinar will encompass the source, progression and potential treatments of scarring seen in both active military and Veterans wounded while serving our country. It will delve into which scars can be treated, when they should be treated, how lasers have revolutionized the process and prognosis of scar treatment, and why these strong soldiers should no longer have to suffer the way they once did. With the right treatment, health care teams can help our wounded heroes walk again.	1 hour	1091507	6/20/2022
Amputation Grand Rounds: Acupuncture in Amputee Pain Management	When it comes to pain management in the amputee population, integrative medicine approaches are becoming more and more popular with patients and clinicians. This training will discuss the role of acupuncture and how it should be considered as an adjunctive approach to non-narcotic pain management throughout the rehabilitative process.	1 hour	1077950	5/24/2023
Amputation Grand Rounds: Percutaneous Peripheral Nerve Stimulation for Post-Amputation Pain	The purpose of this lecture is to provide an overview on post-amputation pain, including epidemiology, etiologies, risk factors and mechanisms, with special emphasis on service members. During this recorded webinar, health care teams will discuss the evidence for pharmacological and non-pharmacological treatment to include prevention and interventions. Specifically, the participants will review the results of peripheral nerve stimulation in the context of post-amputation pain.	1 hour	1088728	12/8/2021
Amputation Grand Rounds August 2019: Fall Prevention and Techniques for Lower Limb Amputation	The purpose of this knowledge-based presentation is to provide health care teams involved in prosthetic rehabilitation with information regarding fall risks, outcomes and interventions for use in the lower limb amputation patient population.	1 hour	1087588	10/10/2021

Diffusion of Excellence Grand Rounds August 2019: The Gerofit Program and STRIDE Program	During this recorded webinar, presenters will provide an overview of two best practices within VHA that aim to improve immobility of hospitalized older adults: the Gerofit Program and the STRIDE Program. This training will provide an overview of the programs' content, dissemination, program outcomes and return on investment metrics.	1 hour	1087618	9/30/2022
Diffusion of Excellence: The Three Box Solution: A Strategy for Leading Innovation	In this recorded, knowledge-based virtual training, health care teams will be introduced the three boxes that will enable them to harness the power of each, intensifying the velocity by which we create the future.	1 hour	1088153	10/25/2022
Diffusion of Excellence Grand Rounds: Patient Experience	This knowledge-based webinar will provide an overview of four patient experience domains within the Diffusion of Excellence and VHA. During the presentation, four patient experience coaches will review the 10-4 Campaign, the Hourly Rounding Toolkit, the Take Five Toolkit, the Commit to Sit Toolkit and WECARE Behaviors.	1 hour	1086951	6/18/2022
Diffusion of Excellence Grand Rounds: The Learn, Engage, Act and Process Quality Improvement Training Program	The Learn. Engage. Act. Process. (LEAP) Program is designed to empower the frontline providers by building quality improvement skills within the context of significant constraints on time and resources. During this virtual training, health care teams will learn about the LEAP program and the results so far from 42 teams who have participated.	1 hour	1086958	8/26/2022
Amputation Grand Rounds: Empathic Pain Accuracy	In this training, using Goubert et al.'s (2005) Empathic Pain Accuracy Model, participants will examine the various influences that make perceiving pain as a health care provider or health care team more or less challenging, the importance of this as a skill, and the impact of this ability on patient perceptions and their pain.	1 hour	1086269	8/11/2021
Diffusion of Excellence Grand Rounds: Virtual Blood Pressure Visits	During this recorded, knowledge-based training, presenters will review the VA Video Connect process and best practices associated with this new modality. VA Video Connect is a new modality for delivering patient care into the home using video capable devices and a secure internet connection. Clinicians and health care teams can monitor blood pressure virtually through the use of Video Connect and a VA-issued blood pressure cuff.	1 hour	1086270	8/8/2022

Patient Care Services Grand Rounds May 2019: Understanding Headache Among Veterans	During this knowledge-based webinar, the presenter will provide an overview of the current understanding of headache, including headache associated TBI and such primary headache disorders as migraine and tension headache. Also, health care teams will learn about several exciting new advances in headache medicine and how to access them within VHA.	1 hour	1085719	7/8/2022
Patient Care Services Grand Rounds April 2019: Project HAPPEN	The purpose of this knowledge-based webinar is to discuss prevention of non-ventilator associated hospital acquired pneumonia (NV-HAP) and the innovative nurse led Diffusion of Excellence practice: Project HAPPEN. Health care teams will learn that improving oral hygiene reduces NV-HAP risk saving Veteran lives and reducing health care costs. This will help to close the gap in information in the field pertaining to the correlation between non-ventilator associated hospital acquired pneumonia and oral hygiene.	1 hour	1085327	6/2/2021
April 2019 Amputation Grand Rounds: VA Suicide Risk Identification Strategy	The purpose of this presentation is address risk, screening assessment and treatment in the Veteran population with major limb amputation. The program will describe VA's new standardized suicide risk identification process (Risk ID) and the role of health care teams in Risk ID screening. The program will identify potential implementation strategies for screening and evaluation in amputation care settings and identify important indicators of risk and essential elements of a suicide risk screening assessment.	1 hour	1085410	6/10/2021
Diffusion of Excellence Grand Rounds April 2019: Reducing Hospitalizations by Targeting Interventions at Transitions of Care	During this knowledge-based webinar, presenters will discuss the steps health care teams may take to implement this practice change, resources and barriers, as well as the results achieved by the Coatesville VA Medical Center.	1 hour	1085475	6/11/2022
Patient Care Services Grand Rounds	This presentation connects nutrition and suicide prevention by examining nutrition's role in well-being. The knowledge-based webinar will equip health care teams in basic suicide prevention knowledge, mastery of motivational interviewing and tips that can be utilized to understand if a patient requires further assessment and triage to mental health professionals. **Expiring soon!**	1 hour	1084721	5/5/2021

Diffusion of Excellence Grand Rounds	This knowledge-based, recorded training will review how facilities can implement new ways of patient dining that are customized for their individual needs, including dining rooms, cafeteria style dining, restaurant style menus and the gold standard room service.	1 hour	1084869	4/23/2022
Diffusion of Excellence Grand Rounds: Light Electronic Action Framework	During this knowledge-based webinar, participants will be provided with information on what the light electronic action framework (LEAF) is and how to obtain a LEAF site. Learners will learn how to incorporate LEAF into their arsenal of tools to support primary processes and functions within their facility or program office.	1 hour	1084278	3/2/2022
PCS Grand Rounds February 2019: Primary Prevention, Secondary Prevention and Prospects for Precision Medicine for Cardiovascular Disease	During this live, knowledge-based webinar, participants will review the epidemiology of cardiovascular disease (CVD) and its risk factors. The presenters will provide a contemporary overview of optimal primary prevention approaches centered on lifestyle (including diet, exercise and weight maintenance) and other primary prevention approaches, including use of aspirin.	1 hour	1084140	3/15/2022
Diffusion of Excellence Grand Rounds January 2019: Transforming the Care of Veterans With Obstructive Sleep Apnea	The presentation will show how innovative applications of new technologies are transforming the delivery of medical care to Veterans with sleep disorders and enabling patients to obtain care without traveling to a medical facility, using video teleconferencing, home sleep testing, wireless transmission of treatment results from the Veteran's home and interactive web-based platforms.	1 hour	1083790	3/12/2022
Diffusion of Excellence Grand Rounds December 2018: Hospital-Based 3D Printing in VHA	During this knowledge-based webinar on hospital-based 3D printing, presenters will discuss how VHA is defining use cases, what a quality assurance program looks like, information technology and security challenges that must be tackled, as well as how VHA is preparing to train the next generation of leaders in the emerging field of 3D printing. This webinar will help to close in gap in information throughout VHA pertaining to uses of 3D printing.	1 hour	1083011	2/11/2022
Diffusion of Excellence Nov 2018: Celebrating Veterans Month with Veteran-Centered Practices	This training will introduce the VA's My Life, My Story program and the Last Roll Call Ceremony of Remembrance. Participants will have the opportunity to learn how to implement these two programs at their local facilities.	1 hour	1082193	12/14/2021

Diffusion of Excellence Grand Rounds October 2018: Preventing Veteran and Servicemember Suicides	This knowledge-based webinar will review two programs that work to prevent Veteran and Servicemember suicides by utilizing chaplains and mental health providers across VA to reach Veterans at risk for PTSD, mortal injury and ultimately, suicide.	1 hour	1081747	12/12/2021
Amputation Grand Rounds October 2018	The purpose of this live, knowledge-based webinar is to identify and describe key risk factors for musculoskeletal and cardiovascular conditions secondary to lower extremity trauma/limb loss. During this presentation, participants will review effective approaches to mitigate onset and progression of these secondary health conditions and discuss resources for more information pertaining to these secondary health complications.	1 hour	1081766	11/26/2021
Patient Care Services Grand Rounds October 2018: Optimization of the Clinical Pharmacy Specialist	This knowledge-based webinar will highlight integration of the clinical pharmacy specialists across the VA with a focus on increasing access and quality of Veteran care in primary care, mental health and pain management.	1 hour	1081649	11/28/2021
Diffusion of Excellence Grand Rounds: September 2018	This live, knowledge-based webinar will highlight the different Veteran experience domains that together may positively influence the Veteran experience.	1 hour	1081258	11/12/2021
Amputation Grand Rounds August 2018: VA Amputation Care Initiatives and Updates	The purpose of this live, knowledge-based webinar is to educate health care providers on new amputation care initiatives in the VA. The goals of these new initiatives are to improve access to care, enhance the consistency of care and the timeliness of service delivery.	1 hour	1080939	9/18/2021
Grand Rounds January 2018: VA Telehealth Services Update: Anywhere to Anywhere VA Quality Care	This recorded training will provide an overview of the history of VA telehealth and summary of current activities, as well as a description of national VA telehealth targets and planned activities for fiscal year 2018. This training will give special focus to VA Video Connect, VA's latest software app that enables Veteran patients at home or on the go and/or teleworking VA providers to connect by video using any device for VA quality care. The training will give an update on VA's most recent advancements in regulatory affairs and legislation designed to remove ambiguity for VA telehealth providers and telehealth activity. **Expiring soon!**	1	1075933	3/1/2021

VISION

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Low Vision and Blind Module 7 Advanced Management Topics	This course goes beyond basic and intermediate low vision rehabilitation and will address advanced management topics, which include specialized examination, testing, training techniques and devices. The training provided in this module will provide advanced management topics to enhance current treatment methods.	6 hours	1073742	1/15/2022
Retinal Cases From a Hospital Setting	This knowledge-based, recorded webinar will focus on retinal cases in a hospital setting. Various ocular conditions will be covered in the context of the hospital setting, to include talc retinopathy, toxic optic neuropathy, commotio retinae and intercranial hemorrhage. Given that these various diagnoses hold systemic and potentially lifesaving implications, eye care providers should be familiar with how these conditions are addressed in a hospital setting. **Expiring soon!**	1 hour	1076615	5/18/2021
Low Vision Telehealth Webcast	With the advent of the various levels of low vision care available at each VA hospital, a need has been created to standardize testing protocols specifically regarding recommendations for telehealth. Due to the different levels of familiarity and background training with low vision providers at each clinic, the following program hopes to establish a guideline to setting up and organizing low vision clinical video telehealth services. This online program will address specialized examination and testing techniques and devices that specifically address problems associated with visual impairment due to diseases such as age-related macular degeneration, diabetic retinopathy and stroke. **Expiring soon!**	1 hour	1077170	4/14/2021
Low Vision and Blind Rehabilitation - Module 1: Introduction	This introductory course provides a historic overview of low vision services along with different service delivery models of low vision clinics. The training provided in this module will help guide providers on how to identify visually impaired patients and how the multiple disciplines can be involved in providing care to them.	2 hours	1073724	1/14/2022

Low Vision and Blind Rehabilitation: Module 10 – Emerging Technology	The purpose of this knowledge-based educational module is to review and discuss emerging technology, their characteristics and the best use of these devices for the visually impaired. This module will also discuss the use electronic optical devices and optical character readers have increased the functionality and independence of Veterans.	1 hour	1087125	8/29/2022

VETERAN COMMUNITY CARE PROVIDER

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Community Care Network Prescriptions for Veterans	This recorded presentation will provide an overview for community care or VA providers on the process and eligibility for prescribing medications from community care referrals for Veterans. It will also focus on the VA formulary and how to prescribe medications for Veterans that are not on the VA formulary or have restrictions for use. Finally, it will also briefly discuss the operations in place to make communication with the VA pharmacies more streamlined and efficient.	1 hour	1094496	11/9/2023

COVID-19

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Impact of COVID-19 on Dementia Care: Lessons Learned From Providers	The purpose of this recorded webinar is to provide teams with an opportunity for interdisciplinary learning to improve dementia care management in the time of COVID-19.	3 hours	1095568	12/31/2022
Dementia Evaluation During COVID -19: When Face-to-Face Care is Not Possible	This session is a case-based, educational session focusing on performing cognitive evaluation when a Veteran with dementia warning signs is unable to attend clinic safely due to COVID-19. Faculty will review evidence-based recommendations related to dementia evaluation, cognitive assessment tools and the utilization of these tools during both phone and video-based care.	1 hour	1094554	11/10/2023
Where are we now? Caring for patients with COVID-19 (August 2020)	This session will provide an update on the COVID-19 status and emerging issues. Topics will include relevant known updates on caring for patients with COVID-19 and ongoing challenges.	1 hour	1094558	11/10/2023

COVID-19: Key Concepts in Geriatric Emergency Care	In this course, a specialist in geriatric emergency medicine will use an interactive, case-based learning approach to illustrate key concepts of geriatric emergency care during COVID-19. This will include the clinical presentation of COVID-19 among older patients; initiating conversations about goals of care; improving communication with patients and families during the COVID-19 pandemic; and strategies to offer safer and more efficient emergency department care with community and nursing home coordination.	1 hour	1094564	11/10/2023
COVID-19: Ethics and Moral Distress	This session will include updates on COVID-19 with a specific purpose of examining some of the ethical and moral distress responses accompanying the pandemic.	1 hour	1094562	11/10/2023
Inpatient Management of COVID-19: Disposition, Respiratory Care and Medical Therapies	This session will provide recent updates on COVID-19 with special emphasis on the disposition, respiratory care and medical therapies in support of patient care.	1 hour	1094563	11/10/2023
COVID-19 Modeling and Forecasting	This session will explore modeling and forecasting tools and recent updates on knowledge around COVID-19.	1 hour	1094559	11/10/2023
Values and Principles in Care Delivery During COVID-19 Pandemic	This session will use an interactive, case-based learning approach to contrast clinical and public health ethics; describe the ethics of standard, contingency, and crisis standards of care; and describe how planning can promote strong ethics practices and reduce moral distress during a pandemic such as COVID-19.	1 hour	1094560	11/10/2023
Economic Impact of COVID-19: A Health Economist's Perspective	In this course, a health economist with expertise in health care cost analyses, cost-effectiveness analyses and health services research in the areas of infectious diseases, homelessness and rural health, will discuss the current understanding about the economic impact of COVID-19. In addition, the training will review the general U.S. economic impact and will discuss specific populations including Veterans, persons with housing insecurity and rural communities.	1 hour	1094555	11/10/2023
Acute Complications of COVID-19	This session will discuss acute complications of COVID-19 in adults including, central nervous system complications; acute kidney injury, acute liver injury; acute respiratory distress syndrome; and hematologic complications. At the conclusion of the session, learners will be able to describe the current evidence related to patient risk	1 hour	1094556	11/10/2023

	factors, as well as prevention and management strategies.			
Healthcare Provider Wellness During COVID-19	In this session, a panel of providers working in critical care medicine and clinical psychology will review the reasons health care provider wellness is important and some strategies to improve your wellness and the wellness of ones colleagues. At the conclusion of this session, participants will be able to list effects that poor provider wellness has on patients and the health care system; describe activities that enhance wellbeing and resilience; and implement one new method for improving their or their colleagues' well-being.	1 hour	1094557	11/10/2023
Where Are We Now? Caring for Patients Without COVID-19	This session will include updates on COVID-19 with discussion on caring for patients without COVID-19 during the pandemic.	1 hour	1094508	11/10/2023
Testing for SARS-CoV-2 Infection	In this training, the presenter will address common questions regarding the role of diagnostic testing when evaluating and managing adults with COVID-19, including current understanding of sensitivity and specificity; persistence of COVID-19 positive results in recovered patients; resolution and recovery; and antibody tests. Learners attending this session will have an improved understanding of COVID-19 testing and be better equipped to educate patients and colleagues regarding diagnostic testing.	1 hour	1094509	11/10/2023
COVID-19 and Delirium: The Hidden Comorbidity	This session will focus on delirium as an atypical but prevalent symptom in older adults with COVID-19. At the conclusion of the session, learners will be able to identify barriers to care posed by COVID-19 and delirium, as well as discuss care strategies to maintain quality of life for older adults with COVID-19 complicated by delirium.	1 hour	1094511	11/10/2023
COVID-19 – Personal Protective Equipment Powered Air Purifying Respirator Donning and Doffing	This interactive training experience will demonstrate the procedures for donning and doffing Powered Air Purifying Respirator (PAPR) PPE for all health care providers entering the room of a patient with known or suspected COVID-19 virus disease.	0.75 hour	1092055	6/19/2021
Precepting Trainees Remotely During the Time of COVID-19: Tips and Tricks	This training session will examine elements of precepting trainees remotely during the time of COVID-19 and include presenter's tips and tricks for success.	1 hour	1092993	6/17/2021

COVID-19 PPE Donning and Doffing Simulation	This interactive training experience will demonstrate the procedures for donning and doffing personal protection equipment (PPE) for all health care providers entering the room of a patient with known or suspected COVID-19 virus disease. You must log into TMS using Google Chrome web browser for this module to load properly. **Expiring soon!**	0.75 hour	1090956	4/15/2021

OTHER

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Challenges Serving Veterans Experiencing Homelessness and Housing Instability in Rural Areas	This live, knowledge-based webinar will present findings from a recent study funded by the VA's National Center on Homelessness among Veterans that examined challenges to serving Veterans experiencing homelessness in rural areas, and strategies and resources needed to address these challenges. It will also summarize an ongoing study funded by the VA's Office of Rural Health that seeks to identify and disseminate strategies for improving access to health care among unstably housed Veterans in rural areas. **Expiring soon!**	1 hour	1096306	Live event to be held March 17 only
Too Tired to Reason: How to Support Medical Decision-Making in Medically Complex Patients	This training course will discuss the impact of multiple co-morbidities on medical decision-making capacity; identify strategies for adapting capacity evaluations for medically complex individuals; and identify supported decision-making strategies to help promote patient autonomy.	1 hour	1083620	2/28/2022
Care For the Caregiver: An Inclusive Care Approach	This live, knowledge-based training will assist health care teams in understanding the needs of caregivers, their critical role in the care of the Veteran and the benefits of practicing inclusive care. **Expiring soon!**	1 hour	1096148	Live event to be held March 25 only
Rehabilitation Strategies for Parkinson's Disease	During this presentation, the presenter will discuss the definition of rehabilitation, components of rehabilitation and identify the main players in rehabilitative services. It will also discuss and identify the options of rehabilitation for the Parkinson's Disease	1 hour	1096147	Live event to be held Mar. 11 only

	population and make recommendations on a basic exercise program. **Expiring soon!**			
Driving Cessation Strategies for Older Adults	The purpose of this live, knowledge-based webinar is to introduce health care teams to cessation strategies for older adults. Driving cessation can have serious implications for the quality of life and well-being of older adults. Specific strategies will be reviewed so that participants will have greater knowledge and confidence in managing cessation discussions and implementations for older adults. **Expiring soon**!	1 hour	1096118	Live event to be held Mar. 12 only
Program for Advancing Cognitive Disorders Education for Rural Staff: Dementia and Delirium	This course will describe two of the most common neurocognitive disorders that occur among elderly Veterans, delirium and dementia.	1 hour	1085133	2/28/2022
Veterans Integration to Academic Leadership: Peer Advisors for Veteran Education	The goal of this virtual, knowledge-based webinar is to provide training and education on the health and mental health needs of student Veterans and the best practices for meeting those needs. **Expiring soon!**	1 hour	1096120	Live event to be held Mar. 17 only
Healthcare Planning and Management for Older Adults With Dementia	These clinical case courses will train and enhance the skills of interdisciplinary providers and staff in topics that meet the care needs of older Veterans through on-demand, self-paced, virtual educational opportunities.	1 hour	1096045	11/2/2023
Preventing Falls in Hospitalized Patients: Chasing the Holy Grail	This knowledge-based training series on practical care of mature adults will provide health care teams with adequate knowledge and/or skills to appropriately manage common geriatric conditions and syndromes in mature adults. A portion of these webinars will focus on the quality of care of mature adults in community living centers. The goal of these education opportunities is to improve the care of mature adults, allowing them to maintain as much of their independence while receiving the best care. **Expiring soon!**	1 hour	1095903	Live event to be held Mar. 9 only
Recurring Series: Life Goals Virtual Training: Training Level 2	This course is open to those who have passed the Life Goals Virtual Training: Level 1. The goal of Level 2 is to review life goals skills and allow members of a health care team to practice implementing these skills using interactive role plays and small group discussion.	1 hour	1095011	6/19/2021

Amputation Skills Training: Pain Management Skills for the Amputation Specialty Team	This recorded, knowledge-based webinar will focus on a pragmatic approach to pain management without pharmacologic means. Health care teams will be provided with instruction in desensitization techniques, mirror therapy and sock ply management, as well as cortical reorganization evaluation. This training session will help to close the gap in knowledge among clinicians in the field regarding pain management skills for Veterans with limb loss.	1 hour	1095393	1/1/2023
Amputation Skills Training March 2021: Prosthetic Gait Training From Beginning to End	The purpose of this presentation is to provide clinicians with education and resources to implement prosthetic gait training with their patients. Participants will review how to develop and instruct the patients in a treatment plan which includes progressive exercises for a patient with newly acquired limb loss. Patients and clinicians alike may be poorly informed regarding the post-amputation recovery and timeline, especially concerning healing time and acquisition of prostheses. Clinicians not frequently treating persons with amputations are not familiar with techniques for prosthetic training. This training will address this in order to promote high-reliability health care principles and streamline the continuum of care for patients. **Expiring soon!**	1 hour	1095690	Live event to be held Mar. 16 only
Managing Common Symptoms at the End-Of-Life	This program will include a systematic approach to evaluating symptoms and the concept of "total suffering" for Veterans who are approaching end-of-life care. Specific strategies, medications and interventions will be reviewed so that participants will have greater knowledge and confidence in managing these symptoms for older Veterans with advanced and terminal illness. **Expiring soon!**	1 hour	1095640	Live event to be held Mar. 26 only
Disability Medical Assessment: Medical Opinions	This training will provide information on medical opinions for compensation and pension clinicians that will address identifying the purposes and types of medical opinions, as well as understanding the legal basis for opinions. It will provide training on recognizing required content of opinions, including use of legally appropriate language, and will also describe best practices for producing acceptable, accurate opinions and improve clinicians' skills in writing medical opinions. **Expiring soon!**	1.5 hours	1064529	5/11/2021

National State Home Per Diem Program	The purpose of the National State Home Per Diem Program (SHPDP) training is intended to educate participants in understanding the step-by-step process through interactive learning for the SHPDP procedures. This training addresses regulations and procedures, to include program roles and responsibilities; communication; admission package and eligibility requirements; Veteran movement reconciliation; and per diem payment.	2 hours	1095537	7/25/2023
Disability Medical Assessment: Diabetes Mellitus Examination	The purpose of this web-based training course is to provide an overview of the diabetes disability examination. It will address a knowledge gap by providing updated information including procedures and a demonstration regarding how to prepare for, conduct and properly document a thorough and legally defensible diabetes disability examination.	1 hour	1095248	9/30/2021
A Team Approach to Pain Management Strategies in People With Limb Loss	The purpose of this recorded knowledge-based session is to provide health care teams with an update on pain management strategies in people with limb loss with an emphasis on utilization of a team approach to care. The types of pain syndromes that can occur following amputation will be reviewed. The session will cover the breadth of strategies that are available for pain management with an emphasis on the advantages and disadvantages of different strategies. Emphasis will be placed on a holistic approach to care and the role of the interdisciplinary team in effective pain management.	1 hour	1095176	12/1/2022
Addressing Female Sexual Dysfunction in VA and DOD: Research, Policy, and Clinical Considerations	The purpose of this recorded live, knowledge-based virtual training was to raise awareness of the complex issues surrounding sexual dysfunction amongst female Service members and Veterans.	1 hour	1095228	12/4/2023
Diagnosing and Treating Insomnia in Women Veterans	This recorded, knowledge-based training will discuss general principles and application of cognitive behavioral therapy for insomnia, with a focus on conceptualizing and adapting treatment recommendations for women.	1 hour	1095179	12/4/2023
Deployment Stressors Unique to Women	This recorded, knowledge-based training will discuss deployment stressors unique to women, to include practical considerations	1 hour	1095177	12/4/2023

	of equipment and self-care; mental health stressors, such as sexual assault/harassment; and relationship/family concerns.			
Culturally Sensitive Care for Female Service Members and Veterans: The Role of Intersectionality	This is a of live, knowledge-based training that will provide an overview of cross-cultural clinical work with female service members and Veterans. This training will define key terms and help clinicians understand how intersectionality can foster greater understanding of an individual's experiences outside of treatment. This session will acknowledge the importance of personal awareness and provide guidance as providers seek to increase their cultural competency.	1 hour	1095027	12/4/2023
Recurring Series: Life Goals Virtual Training: Training Level 2	This course is open to those who have passed the Life Goals Virtual Training: Level 1. The goal of Level 2 is to review life goals skills and allow members of a health care team to practice implementing these skills using interactive role plays and small group discussion.	4 hours	1095019	Live event to be held Sept. 23, 2021 only
Recurring Series: Life Goals Virtual Training: Training Level 2	This course is open to those who have passed the Life Goals Virtual Training: Level 1. The goal of Level 2 is to review life goals skills and allow members of a health care team to practice implementing these skills using interactive role plays and small group discussion. **Expiring soon!**	1 hour	1095004	Live event to be held Mar. 11 only
Healing Through Awareness/Breaking Barriers: Then and Now	This recorded training is about resiliency. Learners will hear all about one woman's traumatic experience, and how determination and self-advocacy helped in her physical and mental recovery.	1 hour	1095026	12/4/2023
VA Pharmacy Procurement: Wall-to-Wall Inventory	This module will provide pharmacy procurement staff the understanding of the wall-to-wall inventory, including preparation; completion; reports; review and analysis; as well as submission and editing of data.	1 hour	1094928	8/15/2023
Pharmaceutical Prime Vendor Creating and Submitting an Order	Purpose of this module is to inform, educate and provide specific training on procurement and regulatory requirements to procure medications and medical supplies for pharmacy staff. This module will give staff the tools and understanding to order specialty pharmaceuticals, plasma and biologics and ensure the correct fiscal	1 hour	1094927	6/1/2021

	account is utilized for adherence to the contract.			
VA Pharmacy Procurement B09 Reconciliation Training - Pharmacist	This module will provide VA pharmacy procurement staff the understanding of the B09 Reconciliation, including preparation, completion, reports, review and analysis as well as submission of data.	1 hour	1094926	8/31/2023
Rehabilitation as Part of Comprehensive Care	This live webinar will discuss care options and recommendations for health care teams within rehabilitative medicine. **Expiring soon!**	1 hour	109482	Live event to be held Mar. 8, only
Sex and Intimacy in Multiple Sclerosis	This live, knowledge-based webinar, planned for the inter-professional health care team, will discuss the current evidence for treating sexual dysfunction in Veterans with multiple sclerosis, which is available to health care teams. **Expiring soon!**	1 hour	1094740	Live event to be held May 10, only
Medical Marijuana for Multiple Sclerosis Symptom Management	This live, knowledge-based webinar will discuss the current evidence available to the inter-professional health care team in treating multiple sclerosis symptoms with cannabis.	1 hour	1094663	Live event to be held Sept. 13, 2021 only
Cognition in Multiple Sclerosis: What You Can Do	This live, knowledge-based webinar will discuss the current evidence available for the inter-professional health care team in treating cognition. **Expiring soon!**	1 hour	1094639	Live event to be held March 29, only
Introduction to the New VA/DOD Clinical Practice Guideline: The Primary Care Management of Headache	The purpose of this activity is to educate members of the health care team on key principles of the 2020 VA/DoD Clinical Practice Guideline: The Primary Care Management of Headache. This recorded, asynchronous knowledge-based webinar will provide important information to members of the inter-professional health care team about managing patients who suffer from headaches. Listening to the webinar will assist them to deliver high-quality, evidence-based care to patients with many different types of headaches. These different types of headaches have an important impact on the well-being of active duty service members, Veterans, and their families. This webinar will assist health care teams better understand how the guideline was developed, how to use it, and which interventions can provide the most benefit to their patients.	1 hour	1094635	11/9/2023

Sleep in Older Adults	This recorded session will review the topic of appropriate prescribing and deprescribing in older Veterans. This program will bridge the knowledge gap for providers with what is currently known about how older adults experience sleep issues; common errors in sleep issue assessments; current treatment approaches; common biopsychosocial contributors to sleep in later life; and the diagnostic criteria for sleep disorders and the VA approach to correct them.	1 hour	1094056	11/1/2022
Lethal Means Safety Training	This virtual knowledge-based presentation will educate VHA mental health providers and health care teams on lethal means safety counseling. Participants will learn about the purpose of lethal means safety counseling, including how to work with Veterans and their friends and family to facilitate lethal means safety during high-risk periods. The training emphasizes Veteran autonomy and teaches clinicians to work collaboratively with Veterans towards solutions that align with each Veteran's values and preferences.	1 hour	1075258	9/30/2023
Updated VA/DoD Clinical Practice Guideline: The Management of Adult Overweight and Obesity	This live, knowledge-based webinar will provide important information to members of the health care teams about managing patients who are overweight or obese. It will assist in delivering high-quality, evidence-based care to all overweight and obese patients; and will support health care teams to better understand how the clinical practice guideline was developed, how to use it and which interventions can provide the most benefit to their patients.	1 hour	1094239	10/8/2023
Updated VA/DOD Clinical Practice Guideline: The Management of Hypertension in Primary Care	This recorded, knowledge-based webinar will provide important information to members of the health care teams about managing patients with hypertension. The management of hypertension has changed in recent years as a result of new evidence. This video will assist health care teams better understand how the clinical practice guideline for the management of hypertension was developed, how to use it and which interventions will provide the most benefit to their patients.	1 hour	1093866	8/31/2023
Everyday Capacity Challenges in Community Living Centers and Home Based Primary Care	Everyday capacity refers to decisions about specific daily activities and most often arise in residential treatment settings. This course aims to provide guidance on how to make determinations of capacity around everyday decisions.	0.25 hour	1091172	10/31/2022

Academic Detailing Service Virtual Refresher Training	The goal of this web-based training is to provide best practices and evidence-based resources for the development of trusted and useful relationships with providers to improve both knowledge and clinical decision-making for our Nation's Veterans. This training will provide an overview of an academic detailing visit and discuss various skills utilized during a visit. Learners will be able to recall the structure of an academic detailing visit; distinguish best practices toward achieving the goals of a needs assessment; and detect effective steps for closing an academic detailing visit. *Disclaimer: No VA clinicians, Veterans or Veteran data were used or displayed during filming of this course.	1.25 hours	1093481	10/14/2022
Cognitive Behavioral Treatment for Insomnia	Recording of a live, knowledge-based training will discuss the effects of insomnia on general health and mental well-being, and provide a comprehensive overview of cognitive behavioral therapy for insomnia, the gold-standard behavioral treatment.	1 hour	1093359	8/14/2023
Problem-Solving Training: Overcoming Life's Challenges	This recorded virtual training will increase community-based outpatient clinic clinicians' awareness of problem-solving therapy, an evidence-based psychotherapy that may beneficial to their patients. Further, this training will present information on the many ways to access this valuable treatment.	1 hour	1093370	8/14/2023
Military Culture and Spiritual Health	In this knowledge-based web course, a panel of experts with various backgrounds will provide an overview of the knowledge and skills needed to provide culturally informed pastoral care. The course will focus on warrior ethos; the impact of deployment and combat; moral injury; spiritual growth; and reintegration into civilian life. Evidence-based strategies to best engage military families will be reviewed from chaplains with extensive experience in working with this population.	1 hour	1072794	8/15/2021
Acute Ischemic Stroke Pathophysiology	This training module will describe acute ischemic stroke and their causes and will discuss stroke pathophysiology.	1 hour	1092763	8/13/2023
National VA Homeless Program Staff: Workplace Violence Prevention and Safety in Homeless Programs	This knowledge-based webinar will provide an overview of the workplace violence prevention model in VHA. It will include specific guidance for employees in homeless programs to respond to workplace violence	1 hour	1092753	7/15/2023

	events effectively and safely; engage in prevention and management of disruptive behavior training; report disruptive behavior events in the disruptive behavior reporting system; collaborate with disruptive behavior committees (DBC) to formulate effective care interventions; and maintain ongoing and iterative communications between patients, caregivers, providers and DBCs.			
Provider Strategies for Coping With Burnout and Secondary Traumatic Stress	This web-based training will provide psychoeducation, motivation, brief intervention and implementation strategies for work-related burnout and secondary traumatic stress (STS). Learners will be able to define burnout and STS and understand how they differ from normal daily stress; identify values related to working with PTSD patients; and recall intervention and practical implementation strategies.	1 hour	1071800	7/8/2023
Caring for Women Veterans in the Community	Women Veterans are a rapidly growing group, but still remain scattered and numerically small, presenting challenges to the achievement of health equity, expertise and access. Given that more female Veterans will be seeking care, there is a need for ongoing, Veteran-centered training of medical providers. This recorded knowledge-based webinar will provide clinicians and health care teams with the ability to recognize the female Veteran perspective and provide health care to this unique population.	1 hour	1092299	7/10/2023
Safe Patient Handling and Mobility for VA Employees	The Safe Patient Handling and Mobility Program at VA utilizes proven methods and the latest specialized devices and equipment to keep Veterans and staff safe when patients need to be moved and lifted. The most important assistive device is ceiling lifts that help care providers transfer Veterans from beds to stretchers or wheelchairs and can even help them walk. Portable devices can be moved from room to room. The lifting equipment uses slings or vests to hold patients securely and reduce the risk of slipping, falling or being dropped when walking. The program has led to an over 40% reduction in injuries to care providers since 2006.	1 hour	1083300	7/9/2021

Transgender: Introduction	This brief training is part of a series of programs on health care for transgender and gender diverse Veterans. This session introduces the overall training.	0.5 hour	1091921	10/25/2022
Do Ask, Do Tell: Five Awkward Minutes to Better Patient Care	Veterans Health Administration Directive 1340, published in July 2017, establishes policy regarding the respectful delivery of clinically appropriate health care to lesbian, gay and bisexual (LGB) Veterans. It is VHA policy that all staff provides clinically appropriate, comprehensive, Veteran-centered care with respect and dignity to LGB Veterans. This video addresses how to ask the appropriate questions and provides scenarios to demonstrate the conversation.	1 hour	1073854	10/8/2021
WRIISC PDHS: Military Cultures – Experiences, Reintegration and Whole Health	War-Related Illness & Injury Study Center (WRIISC) Post-Deployment Health Service (PDHS) web-based training designed to educate VA staff about what life in the military is like, what deployment is like, and what VA and community health care providers should know about military service so that they can provide optimal health care for Veterans within the context of a whole health approach.	1 hour	1072371	7/29/2023
Veterans Integration to Academic Leadership: VA Education Benefits	This course will provide college and university staff with the knowledge and skills needed to assist Veterans with transitional issues and needs for mental health assistance through the Veterans Integration to Academic Leadership or VITAL initiative.	1 hour	1091485	5/18/2023
Practicum Instructor for Hearing Technicians Course	This training will provide supervising audiologists who will serve as VA practicum instructors for Certified Occupational Hearing Conservationists (COHC) with the tools to be successful as mentors and preceptors, in order to 1) ensure quality, standardized training for VA Health Technicians pursuing their COHC from the Council for Accreditation in Occupational Hearing Conservation (CAOHC), and 2) facilitate the best use of both the audiologist's and health technician's time spent training for and completing the required audiometric monitoring and hearing protection devices CAOHC-mandated practice.	2 hours	1091208	5/6/2023
Charge Nurse Simulation Game	This serious educational game is designed to help new and future charge nurses understand and develop some of the skills	2 hours	1071303	4/20/2023

	needed for the position. The skills and abilities that are being developed through this game include effective communication, collaboration, team building, systems thinking, decision-making, creative problem solving, supervision, evaluation, support and mentoring.			
Amputation February 2020: Osseointegration Update From DOD and VA	This training is hosted by the Amputation System of Care and the Extremity Trauma and the Amputation Center of Excellence. This webinar is designed to provide health care teams with an update from both DOD and VA on osseointegration and the use of osseointegrated, percutaneous implants for the direct skeletal attachment of prosthetic limbs. This course will touch on the historical development of osseointegration, as well as general indications/contraindications for osseointegration. Differences in implant designs, connector components and rehabilitation protocols will be highlighted. The current Food and Drug Administration classification status of various implants will be covered, in addition to recent VA and DOD research findings and ongoing research activities.	1 hour	1090736	4/8/2022
Transgender: Writing Support Letters for Transgender Veterans	This session addresses writing support letters for transgender Veterans.	0.25 hour	1090826	4/1/2023
Transgender: Older Transgender and Gender Diverse Veteran Care	This brief training is part of a series of programs on health care for transgender and gender diverse Veterans. This session focuses on older transgender and gender diverse Veteran care.	0.25 hour	1090827	4/1/2023
Transgender: Psychotherapy for Gender Dysphoria	This brief training is part of a series of programs on health care for transgender and gender diverse Veterans. This session focuses on psychotherapy for gender dysphoria.	0.25 hour	1090829	4/1/2023
Transgender: Mental Health Evaluation for Gender Affirming Surgery	This brief training is part of a series of programs on health care for transgender and gender diverse Veterans. This session focuses on diagnosing gender dysphoria	0.25 hour	1090830	4/1/2023

Veteran Affairs and Department of Defense Clinical Practice Guideline for Insomnia	The purpose of this knowledge-based video program is to educate members of the health care team on key principles of the 2019 VA/Department of Defense Chronic Insomnia Disorder and Obstructive Sleep Apnea clinical practice guideline. The knowledge-based video program that we develop will provide important information to members of the health care teams about managing patients with sleep disorders. Watching the video will assist them to deliver high-quality, evidence-based care to all chronic insomnia disorder and obstructive sleep apnea patients. These disorders have an important impact on the well-being of Veterans and their families. This video will assist health care teams better understand how the guideline was developed, how to use it, and which interventions will provide the most benefit to their patients.	1 hour	1090812	3/23/2023
Whole Health Coaching Theories	This course will introduce whole health coaches to five foundational coaching theories. The speakers will discuss how coaches can draw from and apply these theories in coaching to support sustainable behavior change.	1 hour	1090795	1/24/2023
Tinnitus Clinical Management - Module 1 - Overview of Tinnitus and its Management	This is Module 1 of a series of four online courses describing tinnitus clinical management. Module 1 is appropriate for all health care providers who are interested in learning about tinnitus and what can be done about it.	1 hour	1090587	9/16/2022
Tinnitus Clinical Management - Module 2 - Tinnitus Assessment and Basic Care	This is Module 2 of a series of four online courses describing tinnitus clinical management. Module 2 describes the basic steps that audiologists take to provide tinnitus care, which is Progressive Tinnitus Management (PTM) Level 2. This module may be of interest to other health care providers who wish to know what is done by audiologists.	1 hour	1090589	10/28/2022
Tinnitus Clinical Management – Module 3 – Clinical Intervention for Tinnitus	This is Module 3 of a series of four online courses describing tinnitus clinical management. Module 3 describes Progressive Tinnitus Management (PTM) Level 3 Skills Education that is provided for patients needing care beyond PTM Level 2 (Audiologic Evaluation). Level 3 is conducted by both audiologists and behavioral health	1 hour	1090590	10/28/2022

	providers. This module may also be of interest to other health care providers who wish to learn about Level 3 Skills Education.			
Tinnitus Clinical Management – Module 4 – Virtual Practicum for Tinnitus Management	This is Module 4 of a series of four online courses describing tinnitus clinical management. Module 4 contains a series of videos depicting a patient going through the five stepped-care levels of Progressive Tinnitus Management (PTM). The clinical services are provided primarily by an audiologist and a psychologist. This entertaining module may also be of interest to other health care providers who wish to know how PTM services are provided through all of its five levels.	1 hour	1090591	10/28/2022
Introduction to Complementary and Integrative Health (CIH) Approaches	The purpose of this knowledge-based web course is to explore how complementary approaches may fit into clinical practice. In this course, participants can reflect on and learn how to converse with patients about complementary approaches by learning how to discuss what a complementary approach is and why it is important; learning how to incorporate different approaches into practice; and exploring how to guide patients on the use of complementary approaches.	1 hour	1069357	2/22/2022
Introduction to Whole Health Skill-Building Classes Module 2: Working Your Body	This course introduces whole health coaches to the eight whole health skill-building classes that are available to teach at local VHA facilities. The program will model how to teach the area of working your body and it is the third course in a series covering each area of the circle of health.	1 hour	1090206	1/9/2023
Problem Solving Training Video Series	The purpose of this six-part, knowledge-based lecture series is to provide an overview of problem-solving therapy (PST), and the brief psychoeducational intervention of PST, which is based on the tenants of PST and has been adapted for VA. This training can assist VA primary care and mental health providers when providing problem-solving interventions to Veterans.	2.25 hours	1090177	2/9/2023
Complementary and Integrative Health - A Closer Look at List One Approaches	This knowledge-based training is designed to introduce the eight list one approaches, which are now part of the Veteran benefits package. Each approach will be addressed individually, along with its history and impact to Veterans. Emphasis will be placed on	1 hour	1089490	2/2/2022

	describing what they are; reviewing the research to date; listing which conditions it will be best used for; and discussing any harms that might occur with its use. This course will provide discussion, exploration and offer resources to participants, including health care teams.			
Diabetes Nutrition Counseling	This course presents novice level nutrition in diabetes information for staff new to the area of teaching patients with diabetes. Content reviews basic carbohydrate information in diabetes, components of a healthy diet and the basics of teaching a patient with diabetes how to read a food label. Other important issues such as portion control, meal planning and components of a healthy Mediterranean style diet approach are discussed.	0.75 hour	1087036	6/27/2022
Clinical Practice Guideline for The Management of Asthma	The purpose of this knowledge-based video program is to educate members of the health care team on key principles of the 2019 Veteran Affairs and Department of Defense Management of Asthma Clinical Practice Guideline. This training will provide important updated information to members of the health care teams about managing asthma patients. This video will assist health care teams to better understand how the guideline was developed, how to use it and which interventions will provide the most benefit to their patients.	1 hour	1089379	1/20/2023
Veterans Health Information Exchange Community Partner Education	This recorded webinar will provide useful insights on VA's overall health information exchange experience which will benefit other organizations who are working on their own exchange efforts. Additionally, it will provide specific examples and steps of how VA's partners can support Veteran care by engaging with VA in health information exchange activities.	1 hour	1088789	12/23/2022
Veterans Integration to Academic Leadership: Many Faces of Student Veterans	This training will provide college and university staff the knowledge and skills needed to assist Veterans with transitional issues and needs for mental health assistance through the Veterans Integration to Academic Leadership, or VITAL, initiative.	1 hour	1088530	12/9/2022
Delivery Order Training – Pharmacist	This knowledge-based web course will provide procurement staff education, training and process information for pharmaceutical delivery order. This will include how the authority has been granted for pharmaceutical ordering officers to utilize	1 hour	1087954	6/1/2022

	the delivery order menu options for the purchase of contracted pharmaceutical items, such as the seasonal influenza vaccine.			
Meeting the Fiduciary Needs of Vulnerable At-Risk Veterans	The purpose of this web-based program is to strengthen the knowledge of the VA Fiduciary program and processes to enhance communication and collaboration between VHA social work and VBA Fiduciary Service. The improved access, communication and enhanced collaboration are expected to lead to elimination of delays in the fiduciary processes that create negative clinical outcomes for at-risk Veterans.	1 hour	1087215	8/29/2022
Partnering With Communities for Safe Firearm Storage	This recorded webinar will provide education to non-VA mental health providers participating in the Safe Firearm Storage program. Information will include available resources on military/Veteran culture, training opportunities and clinical resources.	1 hour	1087336	10/15/2021
Using 2237 to Purchase Pharmaceuticals	This training provides ongoing, on-demand training for current and future pharmacists and procurement staff on how to complete a 2237 form of procurement to ensure that purchasing of pharmaceuticals is conducted legally, safely and judiciously.	1 hour	1086978	8/21/2022
Drug Enter/Edit: Special Cases	This training will educate on creating local drug file entries for special cases and discuss how to enter an investigational drug, how to create a brand-specific entry and how to create a half tablet entry for the unit dose package. Lastly, it will cover how to have different dosages for inpatients and outpatients, with warfarin as an example, and explain how to manipulate the drug file to provide options to assist in formulary management.	1 hour	1086071	12/1/2021
Drug Enter/Edit: Editing Drug File Entries	This course educates on how to make basic edits to current drug file entries including how to inactivate drugs and make drug accountability edits.	1 hour	1086070	4/1/2022
Whole Health Coaching: Tracking Mechanisms	This program will focus on stop codes, CHAR4 codes, and health factors associated with whole health coaching. It also focuses on the differences between count and non-count clinics and how to apply to whole health coaching and what service lines coaches could be hired.	1 hour	1085561	7/3/2022
Pharmacy Orderable Item	This course will educate pharmacists on the proper maintenance in ensuring medications are ordered and delivered in a safe and efficient manner. This module discusses how to match a new drug or supply entry to a new orderable item, how to create a new	1 hour	1077641	3/1/2021

	orderable item and how to match a new drug/supply entry to an existing orderable item. This module also covers how to mark an orderable item as high risk/high alert and how to link an associated immunization. **Expiring soon!**			
Entering a New Drug Into the Local Drug File	Drug files are part of an extremely complicated database that interfaces with the Computerized Patient Record System or CPRS and are an integral part of medication orders and the management of medications and supplies within VA facilities. This module will give VA staff the tools to correctly enter a new drug into the database and to update those currently in the databases ensuring medication safety to Veteran patients. **Expiring soon!**	1 hour	1077623	3/1/2021
Marking a New Drug for Pharmacy Packages	The drug files are part of an extremely complicated database. These files are an integral part of medication orders and the management of medications and supplies within the facility. This course will educate on the proper maintenance that is essential to ensure that medications are ordered and delivered in a safe and efficient manner. This module discusses what application packages are available, explains how to mark a drug/supply for each application package and explains the relationship between VistA drug enter/edit and the Computerized Patient Record System or CPRS. **Expiring soon!**	1 hour	1077642	3/1/2021
Computerized Patient Record System Tab by Tab: A Basic Orientation	This training covers the basic aspects of using the VA Computerized Patient Record System (CPRS). Learners will experience each tab of the CPRS, basic operations and how they may customize settings to make more efficient use of the system. It will equip the new employee with the skills necessary to navigate the electronic health record and provide existing employees ongoing training and job aids they can use to build their CPRS skills while working in their professional capacity. The modules in this course may be completed in any order and may be completed at different times. **Expiring soon!**	6 hours	1078082	5/15/2021
Empowering Patients in Chronic Care: Behavioral Health Coaching for Diabetes Management	This application-based training is to address a gap in targeted, patient-centered goal-setting skills among diabetes care staff in VHA primary care. Upon completion, participants will use awareness of patients' values and care priorities to personalize feedback, prepare self-management goals	2.25 hours	1086711	6/30/2022

	and action plans, and, ultimately, improve clinical and patient-centered outcomes.			
Applying Therapeutic Communication: Enhance Patient Care Through Engagement and Building Trust	The purpose of this knowledge-based webinar is to initiate and/or improve therapeutic communication (verbal/non-verbal) and engagement skills by health care staff to enhance Veteran trust, and develop therapeutic rapport, especially with those who may be experiencing suicidal ideation.	1.5 hours	1080603	9/17/2021
Rehabilitation Nursing: Therapeutic Communication Training and Crisis Intervention	Rehabilitation nurses on polytrauma/spinal cord injury units (SCI) care for high suicide risk Servicemembers/Veterans. Nursing staff on polytrauma/SCI rehabilitation units are challenged to understand varied patient responses, and novice nurses may have little experience in caring for patients with these challenges. This webinar will work to close the knowledge gap that exists among rehabilitation nurses and provide strategies establishing a therapeutic alliance with this high-risk Veteran population.	1 hour	1078740	7/9/2021
VA Telemental Health Innovations 2019: Enhancing Veteran Access to Care	The purpose of this series is to further educate non-VA providers about VA's policies, practices, expertise, standards and resources for treating Veterans. This particular session will discuss telemental health innovations.	2 hours	1084106	4/22/2022
VA/DOD Clinical Practice Guideline for Stroke Rehabilitation	The purpose of this knowledge-based video program is to educate members of the health care team on key principles of the 2019 VA and DOD Stroke Rehabilitation Clinical Practice Guideline. This training program will provide important information that will assist the health care team to deliver high-quality, evidence-based stroke rehabilitation care.	1 hour	1086777	9/26/2022
Two-Step Clean	This task order will support the development of a frontline staff-based learning product as part of an integrated curriculum plan to address VHA Environmental Management Service's two-step cleaning process training requirements. This learning product will provide a readily accessible, cost-effective educational tool to reinforce the two-step cleaning process and provide personalized instruction through mentor feedback within the microsimulation.	1 hour	1081269	10/26/2021
Clinical Practice Guideline: Pregnancy	Delivering high-quality, evidence-based care is a priority for both VA and the Department of Defense. The purpose of this practiced-based video program is to provide important information to members of the health care teams that will assist to improve the care	1 hour	1081790	11/5/2021

	that they deliver to pregnant women. There are many variables to consider when caring for a pregnant woman. This video will help the health care teams to better understand how the guideline was developed and which interventions are supported by evidence.			
Diabetes Medications and Complications	This course provides a basic overview of common diabetes medications and complications for the novice learner. VA/DoD guidelines as well as other government site resources are provided to help educate patients about their diabetes.	1 hour	1088759	12/1/2022
Shared Decision-Making: Diabetes Self-Management Education and Support	This training supports the Health and Human Services Directive that recommends the Office of Disease Promotion improve the coordination of Federal education on diabetes. It will provide learners with information regarding shared decision-making concerning diabetes self-management education and support.	1 hour	1087037	4/8/2022
Diabetes Nutrition Counseling	This training is on the Health and Human Services Directive that recommends the Office of Disease Promotion improve the coordination of Federal education on diabetes. It will discuss proven reference information that outlines the Commission's recommendations on nutrition counseling skills that are needed when nurses and dietitians are working with patients with diabetes.	0.75 hour	1087036	6/27/2022
Patient Safety in Diabetes for the Inpatient Nurse	This training aims to improve risk assessment, prevention and critical thinking skills of licensed vocational nurses (LVNS), licensed practical nurses (LPNS) and registered nurses (RNS) to provide nursing strategies for optimal diabetes care for hospitalized patients to improve outcomes.	2 hours	1082155	1/1/2022
Emergency Medicine Chat: Alternative Pain Management	This live, recorded webcast will address pain management and whole health approaches for treatment in the emergency department, as well as effective strategies to help Veterans achieve greater and longer lasting relief from pain using non-traditional medical approaches.	1 hour	1086997	8/13/2022
EMchat: Treating Geriatric Patients in the Emergency Department	Clinicians with various specialties in specialty care and primary care are placed in VHA Emergency Departments (ED) and expected to perform emergency medicine functions on a whim, without becoming acclimated to emergency medicine clinical policies, procedures and practices. Practicing emergency medicine without ED training	1 hour	1082934	1/31/2022

	increases liability of VHA ED and urgent care facilities. This training will focus on working with geriatric patients.			
Basic Safe Patient Handling and Mobility Training for VA Employees	The purpose of this knowledge-based Safe Patient Handling and Mobility educational program of best practices is to support safety for all VA staff and patients, as well as increase improvement of patient-centered care.	1 hour	1083300	7/9/2021
PsychArmor Institute Military Sexual Trauma Course	This course provides information about military sexual trauma, (MST) which is sexual assault or sexual harassment during military service. After reviewing the course, learners will be able to define MST; describe the health and general impact of MST on Veterans' lives; screen Veterans for MST; and describe the MST-related services available from VA.	1 hour	1084802	5/31/2022
Interdisciplinary Approach to Optimize Resources in Assistive Technology	To achieve Veteran access to assistive technologies (AT) and the associated outcomes, clinical staff need collaboration with the interdisciplinary team members, and must have the knowledge, skills and ability to optimize access and apply resources. This knowledge-based recording is aimed to fill the knowledge gap regarding AT application in rehabilitation among health care team members.	1 hour	1085194	6/21/2021
