1 SRM Map.....2

1. SRM Map

The following Pivot Table performs two functions:

1. It maps sharable components within the VA Sharable Service Component Registry to appropriate component categories within the FEA-SRM taxonomy.
2. It also maps intended and potential usability of those VA components to VA business functions

This mapping should be used in conjunction with the VA sharable component registry and the FEA component repository when reviewing Project Milestone 0 and 1 proposals for EA component reuse and sharing issues and when reviewing Ex-300 Budget Requests for EA compliance. The cross reference can be viewed in *MS Excel* by clicking the referenced document.
