Decentralized Hospital Computer Program

DIETETICS INSTALLATION GUIDE

Version 5.0
October 1995

Hines IRM Field Office
Hines, Illinois

Installation Guide

The Dietetics system contains a single file of routines all of which begin with the letters FH. All globals, options, and templates created during the initialization process likewise begin with FH. Files have internal numbers in the range 110-119.99 as assigned by the Data Base Administrator.

NOTE: Although this version is designed as an upgrade to FH 4.6, it is compatible with all prior versions and can be installed even if a prior version of Dietetics is not present (Virgin Installation).

Changes from FH 4.6

This version contains a very substantial amount of new and complex functional changes that are detailed in the Release Notes. Please notify the Dietitians and have them review the Pre-installation and Post-installation check list in the ADPAC Manual before installing.

NOTE: In this version, the four entries in the Nutrition Status file #115.4 are being renamed to Normal, Mildly Compromised, Moderately Compromised, and Severely Compromised in accordance to guidelines. If your site has similar entries, then ignore them. Any entries greater than four will be considered UNCLASSIFIED from now on. If any entries greater than four have data in the 'Status Text (U/L CASE)' field, contact the Dietitians to see whether they want to merge those entries with the first four entries. If the Dietitians want to merge the data, contact the Hines Information Resource Management Field Office developers for assistance.

Resource Requirements

Refer to the Dietetics Technical Manual chapter on Resource Requirements.

Installation

This system requires the following for proper initialization and operation:

1. KERNEL 7 or later
2. MAS 5 or later
3. VA FileMan 21
4. Allergy Tracking Systems Version 3
5. OE/RR Version 2.5

Recognizing the importance of up-time in a medical environment, it is not necessary to disable the system during the initialization. However, since the

initialization will render the dietetic menus inoperative during the process, loading should be done at a time of low activity.

Install the system as follows:

1. Disable memory mapping.
2. Load the routines into your account.
3. Initialize the system: D ^FHINIT
4. The regular VA FileMan initialization process will begin. Note the responses to the various prompts in the appropriate sample initialization.
5. Following the regular initialization, a post-initialization will occur which will do the following:
 1. Verify that a site parameter file exists or create one if necessary.
 2. Remove deleted Data Dictionary fields.
 3. Remove unused options.
 4. Move Single Tubefeeding to Multiple Tubefeeding fields for inpatients.
 5. Insert ward names in Dietetic Wards file #119.6 with MAS ward names in file #42 and move Room-Beds also into file #119.6.
 6. Create the new Dietetic Facilities entries.
 7. Convert the delivery points to service points in the Meals file.
 8. Dietetic Annual Report data conversion and removal of unused Dietetic Survey entries.
 9. Update the ingredients in the Ingredient file with Food Nutrient entries.
 10. Insert code in the 'Code' field in the Recipe Category file for recipe category entries.
 11. Check files, #113, #114, and #112.6 for any reference to the American Dietary Product entries in the Food Nutrient file #112 before removing them all.
 12. Update the Dietetic Location for inpatients and move single Tubefeeding entries to multiple field entries for all patients.

After Installation

The system is functional at this point. It may be necessary to move the FH* routines (less the FHINI* initialization routines) to other accounts or other CPU's.

Likewise, memory mapping of some FH routines may be in place and should be disabled.

Upon successful initialization, it might be desirable to write all FH* routines to tape. You can then delete all FHINI* routines which will clean up the account considerably.

Set Printer Characteristics

- A. If your site already has version 4.6, skip A and go to B.
Provisions have been made for reprinting certain portions of the diet labels in emphasized or bold-face type providing the appropriate device sub-type characteristics have been entered.

In File 3.2 (Terminal Type), make the following entries for the subtype associated with the printer used for labels. These entries are OPTIONAL but are necessary if the emphasized printing is desired. **Note:** Make sure that the * form of characters is used in order to properly preserve the \$X and \$Y values (e.g., *69 rather than "E").

Field	Value (for Genicom)
HIGH INTENSITY (BOLD)	*27,*69
LOW INTENSITY (UNBOLD)	*27,*70

Two of the reports generated by the system require printing at 16.5 characters/inch on wide paper. These reports are the Daily Menu and the Weekly Menu. If the printer in the Dietetic Administration area, which will be used to print these reports, is not permanently set for 16.5 cpi then the following two fields of File 3.2 (Terminal Type) should be set:

Field	Value (for Genicom)
10 PITCH	*30
16 PITCH	*29

Again, note that the * form of all characters is used in order to properly preserve the \$X and \$Y values.

- B. The Tray Tickets and Diet Cards must to be printed on a laser printer in LANDSCAPE mode set at 12 cpi with 7.35 in. page length, 8 lines per inch, and the font used should be 12 point (size) and pitch (cpi) landscape. The font used for Kyocera is Letter Gothic Bold (which is OPTIONAL) and Roman-8 (with Letter Gothic typeface and bold stroke weight) for Hewlett Packard. It is OPTIONAL to print the Tray Tickets on the reverse side of the green 8-1/2x11 inch menu cards that are perforated. Both the Tray Tickets and Diet Cards can be printed on regular letter style paper of 8-1/2x11 inch. The five fields in file 3.2 (Terminal Type) should be set:

Field	Value (for Kyocera)
RIGHT MARGIN	160
FORM FEED	#
PAGE LENGTH	60
OPEN EXECUTE	W "!R! RES;UNIT I;SPO L;SPL 7.35;FONT 28;SLPI 8;EXIT;"
CLOSE EXECUTE	W "!R! PAGE; RES; EXIT;"
Field	Value (for Hewlett Packard LaserJet III)
RIGHT MARGIN	160
FORM FEED	#
PAGE LENGTH	60
OPEN EXECUTE	W *27,*38,*108,*49,*111,*56,*68, *27,*40,*56,*85,*27,*40,*115,*48, *112,*49,*50,*104,*49,*50,*118, *48,*115,*51,*98,*54,*84
CLOSE EXECUTE	W *27,*69

In the Device file, the setting for the three fields should be:

FIELD	Value (for Kyocera and Hewlett Packard LaserJet III)
MARGIN WIDTH	160
FORM FEED	#
PAGE LENGTH	60

Assign/Review Menu Assignments

If a prior version of Dietetics was already in use, further menu assignments may not be necessary.

FHMGR	Main supervisory menu; allows clinical, administrative, file maintenance and system management.
FHMGRC	Clinical supervisory menu; access to all clinical menus and clinical file options.
FHMGRA	Administrative supervisory menu; access to all administrative options.
FHADM	Food production personnel menu; access to all lists and reports used for production.
FHPRO	Senior food production menu; allows access to all frequently used production options and reports.
FHBUD	Budget Assistant menu.
FHDIET	Clinical Dietitian menu.
FHTECH	Diet Technician menu.
FHWARD	Ward Clerk menu; allows all appropriate diet order functions.
FHUSR	Allows access to patient's dietetic profile & history as well as casual use of abbreviated nutritive analysis and nutritional assessment.

OE/RR

Instructions for linking Dietetics and other packages to OE/RR are contained in the OE/RR Manuals.

Security

A great deal of file security is built into the system; it is the expectation that very rarely will direct use of VA FileMan be used to alter files since security at the VA FileMan level is much less strict.

Data Dictionary access is reserved to those with File Manager code '#'; all files are readable with code 'F' and user-oriented files are likewise editable with this code. Important files are protected against entry creation, editing, and deletion with the code 'f'.

Supervisory menus contain the necessary code for those menus assigned to add and modify file entries. Holders of the FHMGR key may delete file entries although such is dangerous in view of the heavy pointing contained in the package.

Options

As noted above, only the options listed are designed for direct assignment to users or for incorporation into non-dietetic menus. Assignment of other options beginning with the letters FH is acceptable however.

Routine Mapping, Journaling & Global Protection

If routine mapping is available, the following routines are extensively utilized and are worthwhile candidates for mapping:

FH FHDPA FHN02 FHN021 FHN03 FHN07 FHN09 FHORD7
FHREC1 FHWADM FHWDIS FHWTRN FHWMAS

Journaling of these FH globals is recommended:

^FH ^FHPT ^FHING ^FHEN

Load the routines of the package by executing the %RR.

D ^%RR

Routine Restore

Sample Initialization To Upgrade Dietetics 4.6

Initialize the package by executing the FHINIT routine. Be sure to answer "NO" to each time the question "Want my data merged with yours?" is asked.

D ^FHINIT

This version (#5.0) of 'FHINIT' was created on 07-AUG-1995
(at HIS/C, by VA FileMan V.21.0)

I AM GOING TO SET UP THE FOLLOWING FILES:

111 DIETS (including data)

Note: You already have the 'DIETS' File.
Want my data merged with yours? NO//

111.1 DIET PATTERNS

112 FOOD NUTRIENTS (including data)

Note: You already have the 'FOOD NUTRIENTS' File.
I will OVERWRITE your data with mine.

112.2 RDA VALUES (including data)

Note: You already have the 'RDA VALUES' File.
I will OVERWRITE your data with mine.

112.6 USER MENU

Note: You already have the 'USER MENU' File.

113 INGREDIENT (including data)

Note: You already have the 'INGREDIENT' File.
Want my data merged with yours? NO//

113.1 STORAGE LOCATION

Note: You already have the 'STORAGE LOCATION' File.

113.2 VENDOR (including data)

Note: You already have the 'VENDOR' File.
Want my data merged with yours? NO//

114 RECIPE (including data)

Note: You already have the 'RECIPE' File.
Want my data merged with yours? NO//

114.1 RECIPE CATEGORY (including data)

Note: You already have the 'RECIPE CATEGORY' File.
Want my data merged with yours? NO//

114.2 PREPARATION AREA (including data)

Note: You already have the 'PREPARATION AREA' File.
Want my data merged with yours? NO//

114.3 SERVING UTENSIL (including data)

Note: You already have the 'SERVING UTENSIL' File.

Want my data merged with yours? NO//

114.4 EQUIPMENT (including data)

Note: You already have the 'EQUIPMENT' File.

Want my data merged with yours? NO//

115 DIETETICS PATIENT

Note: You already have the 'DIETETICS PATIENT' File.

115.2 FOOD PREFERENCES

Note: You already have the 'FOOD PREFERENCES' File.

115.3 NUTRITION CLASSIFICATION

*BUT YOU ALREADY HAVE 'NUTRITIONAL CLASSIFICATION' AS FILE #115.3!

Shall I change the NAME of the file to NUTRITION CLASSIFICATION? NO// YES

115.3 NUTRITION CLASSIFICATION

Note: You already have the 'NUTRITION CLASSIFICATION' File.

115.4 NUTRITION STATUS (including data)

*BUT YOU ALREADY HAVE 'NUTRITIONAL STATUS' AS FILE #115.4!

Shall I change the NAME of the file to NUTRITION STATUS? NO// YES

115.4 NUTRITION STATUS (including data)

Note: You already have the 'NUTRITION STATUS' File.

I will OVERWRITE your data with mine.

115.5 DIETETIC NUTRITION PLAN

*BUT YOU ALREADY HAVE 'DIETETIC NUTRITIONAL PLAN' AS FILE #115.5!

Shall I change the NAME of the file to DIETETIC NUTRITION PLAN? NO// YES

115.5 DIETETIC NUTRITION PLAN

Note: You already have the 'DIETETIC NUTRITION PLAN' File.

115.6 ENCOUNTER TYPES (including data)

Note: You already have the 'ENCOUNTER TYPES' File.

Want my data merged with yours? NO//

115.7 DIETETIC ENCOUNTERS

Note: You already have the 'DIETETIC ENCOUNTERS' File.

116 MENU CYCLE

Note: You already have the 'MENU CYCLE' File.

116.1 MEAL

Note: You already have the 'MEAL' File.

116.2 PRODUCTION DIET (including data)

Note: You already have the 'PRODUCTION DIET' File.

Want my data merged with yours? NO//

116.3 HOLIDAY MEALS

Note: You already have the 'HOLIDAY MEALS' File.

117 MEALS SERVED

Note: You already have the 'MEALS SERVED' File.

117.1 STAFFING DATA

Note: You already have the 'STAFFING DATA' File.

117.2 DIETETIC COST OF MEALS

117.3 ANNUAL REPORT

117.4 DIETETIC REPORT CATEGORIES (including data)
I will OVERWRITE your data with mine.

118 SUPPLEMENTAL FEEDINGS (including data)

Note: You already have the 'SUPPLEMENTAL FEEDINGS' File.
Want my data merged with yours? NO//

118.1 SUPPLEMENTAL FEEDING MENU (including data)

Note: You already have the 'SUPPLEMENTAL FEEDING MENU' File.
Want my data merged with yours? NO//

118.2 TUBEFEEDING (including data)

Note: You already have the 'TUBEFEEDING' File.
Want my data merged with yours? NO//

118.3 STANDING ORDERS

Note: You already have the 'STANDING ORDERS' File.

119 DIETITIAN TICKLER FILE

119.1 UNITS (including data)

Note: You already have the 'UNITS' File.
Want my data merged with yours? NO//

119.4 ISOLATION/PRECAUTION TYPE (including data)

Note: You already have the 'ISOLATION/PRECAUTION TYPE' File.
Want my data merged with yours? NO//

119.5 DIETETIC CONSULTS (including data)

Note: You already have the 'DIETETIC CONSULTS' File.
Want my data merged with yours? NO//

119.6 DIETETICS WARD

Note: You already have the 'DIETETICS WARD' File.

119.71 PRODUCTION FACILITY

119.72 SERVICE POINT

119.73 COMMUNICATION OFFICE

119.74 SUPPLEMENTAL FEEDING SITE

119.8 DIETETIC EVENTS

119.9 FH SITE PARAMETERS (including data)

Note: You already have the 'FH SITE PARAMETERS' File.
Want my data merged with yours? NO//

SHALL I WRITE OVER FILE SECURITY CODES? NO// Y (YES)

NOTE: This package also contains BULLETINS

SHALL I WRITE OVER EXISTING BULLETINS OF THE SAME NAME? YES// (YES)

NOTE: This package also contains INPUT TEMPLATES
SHALL I WRITE OVER EXISTING INPUT TEMPLATES OF THE SAME NAME? YES//
(YES)
NOTE: This package also contains PRINT TEMPLATES
SHALL I WRITE OVER EXISTING PRINT TEMPLATES OF THE SAME NAME? YES//
(YES)
NOTE: This package also contains SECURITY KEYS
SHALL I WRITE OVER EXISTING SECURITY KEYS OF THE SAME NAME? YES//
(YES)
NOTE: This package also contains OPTIONS
SHALL I WRITE OVER EXISTING OPTIONS OF THE SAME NAME? YES// (YES)

ARE YOU SURE EVERYTHING'S OK? NO// Y (YES)
