Decentralized Hospital Computer Program**

PROSTHETICS INSTALLATION GUIDE

Version 3.0

December 1995

**Birmingham IRM Field Office
Birmingham, Alabama**

**Carl T. Hayden
Veterans Administration Medical Center
Phoenix, Arizona**

Preface

This guide is for use by Information Resources Management Service and Information Systems Center personnel to install the DHCP Prosthetics package. Prosthetics automates the Record of Prosthetic Services (VA Form 10-2319) and purchasing functions within Prosthetics Service. Prosthetics also integrates individual purchasing transactions with IFCAP (Integrated Funds Distribution, Control Point Activity, Accounting and Procurement) and Generic Inventory.

Introduction

The Decentralized Hospital Computer Program (DHCP) Prosthetics package automates many functions for Prosthetics. The Record of Prosthetics Service (VA Form (VAF) 10-2319), and the appropriate VAF 4-1358 obligation, are updated at the time of purchase (entry into the computer) of the item or service provided to the veteran. This update is accomplished through direct links to IFCAP (Integrated Funds Distribution, Control Point Activity, Accounting and Procurement) and the Electronic Patient VAF 10-2319. Purchasing is simplified by entering the information only once into the computer and letting it update your 1358 account balances and VAF 10-2319. The Prosthetics package automates the tracking of appliances and services issued, suspense records, correspondence to veterans and vendors, and scheduled meetings and home/liaison visits. It also provides counts for AMIS and generates code sheets for segments 120-121, and 122-131/139.

Purchasing Module

Purchasing interfaces with IFCAP into the IFCAP 1358 module. Forms printed include Prosthetics Authorization and Invoice (VAF 10-2421), and Authority to Exceed Amount on Service Card (Form Letter (FL) 10-55). For tracking transactions associated with purchasing, Prosthetics will accommodate Prosthetic Service Card Invoice (VAF 10-2520), No-Form, Pickup/Delivery Charges, Request for Estimate (FL 10-55), and Patient Notification Letter.

Electronic Record of Prosthetic Services Module

The Record of Prosthetics Services, VAF 10-2319, is fully incorporated into DHCP, displayed in multiple terminal screens. Appliances and services issued are automatically recorded to the electronic VAF 10-2319 when purchases are obligated or issued from stock. In addition, Prosthetic Service Card (PSC), Clothing Allowance, Auto-Adaptive Equipment, Patient Correspondence, and other patient data, are recorded and displayed within the electronic VAF 10-2319 module. This is the module that provides the basis for AMIS (Automated Management Information System) reports.

AMIS Module

This module calculates the new and repair work sheets based on the information collected in the electronic VAF 10-2319 file.

Inventory Module

Inventory is linked to the Generic Inventory package (GIP). Each station has the option to activate GIP.

Introduction

Correspondence Module

Letters to patients are generated from this module. Denial letters are counted on AMIS automatically when end-of-quarter AMIS reports are run.

Scheduled Meetings and Home/Liaison Visits Module

Appointment information for Prosthetics Clinics may be pulled over into VAF 10-2527 to be printed as Appointment Roster and Action Sheets. Home/liaison visits may also be entered and printed in this module. All appointment visits and home/liaison visits will be calculated on AMIS at the end of the quarter.

Prosthetic Lab Module

The Prosthetic Lab module automates the Request and Receipt for Prosthetic Appliances or Services (VAF 10-2529-3) which is used to maintain a consolidated record of prosthetic services furnished to eligible veterans. This includes activities at Orthotic Laboratories, Restoration Laboratories, Shoe Last Clinics, Wheelchair Repair Shops, National Foot Centers, and the Denver Distribution Center.

Entitlement Module

Information collected by Medical Administration Service (MAS) to determine eligibility of benefits to the veteran is displayed in this module. Patient data includes name, social security number, date of birth, address, remarks, temporary address, phone, sex, next of kin, military service, eligibility status, verification of eligibility, disability ratings, diagnostic codes, admission date, discharge date, type of discharge, clinic enrollment, and pending appointments.

Installation Instructions

The installation instructions include a detailed description of pre-installation, installation and post-installation instructions. Examples of the installation process over a previous release or into a virgin account are included. An Installation Checklist has been provided to aid in installing Prosthetics. It is recommended that you install Prosthetics in a test account prior to installing it in a production account, and for reference purposes, you may want to slave print the initialization process.

Two IFCAP options are used by Prosthetics. They are Item File Edit (PRCHPC ITEM EDIT) and Vendor File Edit (PRCHPC VEN EDIT). These two options are under the IFCAP Utilities menu (RMPR VEN/ITEM) which is locked with the RMPRSUPERVISOR key. One security key from the IFCAP package is used with Prosthetics. The PRCHZ REV is a reverse lock for the Item File Edit option (PRCHPC ITEM EDIT).

NOTE: File 663 - All AMIS calculations are accomplished according to codes stored in this file. *DO NOT* add, edit or delete data stored in this file.

Pre-Installation

Required Resources:

1. Software:

The minimal hardware requirements for Prosthetics is three CRTs to one printer. The following statistics regarding the disk storage requirements for Prosthetics were compiled by the alpha and beta sites (Phoenix and Atlanta) after running the software for about one year.

<u>Globals</u>	<u>Data Type</u>	<u>Size</u>
RMPR	prosthetic data	10,000 VMS blocks 5,000 DSM blocks
RMPRA	temporary global	
DDs		90 VMS blocks 45 DSM blocks
Routines 120 (not including inits and onits)		478 VMS blocks 238 DSM blocks

2. Global Description and Placement:

Two globals are created when Prosthetics is installed into a virgin account. The first global, ^RMPR, is the main global. All routines, options and templates are namespaced RMPR. The second global, ^RMPRA, is a storage global for AMIS data. The data in this global is updated each time AMIS worksheets are run. If you are installing Prosthetics into a virgin account, place and define access privileges (RWD for System, World, Group, and UCI) for ^RMPR and ^RMPRA using ^%GLOMAN (DSM) or ^%GCH (MSM).

Journaling is recommended for the ^RMPR global.

3. **Required Packages:**

<u>Application</u>	<u>Minimum Version Number</u>
FileMan	21
IFCAP	5.0
Kernel	8.0
PIMS	5.3
Integrated Billing	2.0
OE/RR	2.5
Generic Code Sheet	2.0

Required Resources:

4. Hardware:

Disk space (expected growth) = 3 MB per 20,000 patient visits.

Number of CRTs = number of Prosthetics Service FTEEs (Full-Time Employment Equivalent) that utilize the package.

Number of Printers (PRTs) depends on the CRT ratio below:

# CRTs	#PRTs
1 - 4	1
5 - 6	2
7 - 8	3
9 - 10	4
11 - 12	5
13 - 14	6
15	7

Prosthetics Installation

Step Description

1. Get Prosthetic Users off the system(s).
2. Backup system(s).
3. Load RMPR* and RMPT* routines. have a slaved printer copy a listing of the exported routines
>D ^%RR

✓ Do NOT Delete RMPR* routines prior to loading RMPR * and
4. Define Programmer Variables

D ^XUP to define DUZ, DT, DTIME and U
S DUZ(0)="@"
RMPT* routines.
5. Run RMPRNTEG to a printer. Make sure the exported routines have correct checkfile sums.
6. Initialize Prosthetics
Accept all default prompts (see examples with previous version installed, or installation into a virgin account). For a virgin install the RMPRTINITs will be run first, then The RMPRINITs. If installing over a previous version of Prosthetics, the RMPRINITs must be run first, then the RMPTINITs.
7. Pre-Inits

The RMPRPRE checks the system to insure that the software applications required for Prosthetics have been installed.
8. ✓ When running the inits, be sure to run RMPRINIT prior to running RMPTINIT if installing over a previous version of Prosthetics.

9. Make sure the RMPRINITs and RMPTINITs completed correctly, and in the correct order. If one of the inits fails to complete, determine why, and rerun the init before continuing.

10. Post-Init

If this is a Virgin Install, this step will not apply, as you will not have a prior Loan Program to be concerned with. This information is solely for those sites installing this PROSTHETICS PACKAGE over a previous version of the PROSTHETICS PACKAGE.

LOAN^RMPRPOST removes the Loan Program. If your site has made a local decision to use the Loan Program option, then do not run this routine. The Prosthetic Expert Panel is not recommending the support of the Loan Program.

LOAN^RMPRPOST will delete the following options: RMPR LOAN DEL, RMPR LOAN CREATE, RMPR LOAN RET, RMPR LOAN DISP, RMPR LOAN FOLLOW-UP, RMPR LOAN PRINT ALL, RMPR LOAN EDIT, RMPR LOAN STAT, and RMPR LOAN MENU.

Do NOT delete this routine once the Loan Program has been deleted. It does more than delete the Loan Program.

11. Delete RMPRI* and RMPTI* routines, if desired.
12. Move RMPR* routines to all systems.

Installation Over a Previous Release

The following is an example of the installation of Prosthetics Version 3.0 with Version 2.0 installed.

✓ Make sure you D ^RMPRINT before you D ^RMPTINIT.

```
>D ^XUP
```

```
Setting up programmer environment
Access Code:
```

```
Terminal Type set to: C-VT320
```

```
Select OPTION NAME:
```

```
>S DUZ(0)="@"
```

```
>D ^RMPRINT
```

```
This version (#3.0) of 'RMPRINT' was created on 29-NOV-1995
(at PHOENIX, by VA FileMan V.21.0)
```

```
I HAVE TO RUN AN ENVIRONMENT CHECK ROUTINE.
I AM GOING TO SET UP THE FOLLOWING FILES:
```

```
660 RECORD OF PROS APPLIANCE/REPAIR
Note: You already have the 'RECORD OF PROS APPLIANCE/REPAIR' File.
```

```
660.1 PROS RETURNED/CONDEMNED
*BUT YOU ALREADY HAVE 'PROS RETURN/LOAN' AS FILE #660.1!
Shall I change the NAME of the file to PROS RETURNED/CONDEMNED? NO// YES
```

```
660.1 PROS RETURNED/CONDEMNED
Note: You already have the 'PROS RETURNED/CONDEMNED' File.
```

```
661 PROS ITEM MASTER
Note: You already have the 'PROS ITEM MASTER' File.
```

```
662 PROS DISABILITY CODE (including data)
Note: You already have the 'PROS DISABILITY CODE' File.
I will MERGE your data with mine.
```

```
663 PROS AMIS CODES (including data)
Note: You already have the 'PROS AMIS CODES' File.
I will MERGE your data with mine.
```

```
663.2 ACTIVITIES NEW/REPAIR WORKSHEET TOTALS
Note: You already have the 'ACTIVITIES NEW/REPAIR WORKSHEET TOTALS' File.
```

```
663.3 PROSTHETIC DISABILITY WORKSHEET
*BUT YOU ALREADY HAVE 'PROSTHETICS DISABILITY WORKSHEET' AS FILE #663.3!
Shall I change the NAME of the file to PROSTHETIC DISABILITY WORKSHEET? NO// YES
```

```
663.3 PROSTHETIC DISABILITY WORKSHEET
Note: You already have the 'PROSTHETIC DISABILITY WORKSHEET' File.
```

```
663.4 PROSTHETIC APPOINTMENT WORKSHEET
*BUT YOU ALREADY HAVE 'PROSTHETICS APPOINTMENT WORKSHEET' AS FILE #663.4!
Shall I change the NAME of the file to PROSTHETIC APPOINTMENT WORKSHEET? NO// YES
```

663.4 PROSTHETIC APPOINTMENT WORKSHEET
Note: You already have the 'PROSTHETIC APPOINTMENT WORKSHEET' File.

664 PROSTHETICS 1358
Note: You already have the 'PROSTHETICS 1358' File.

664.1 PROSTHETIC 2529-3

664.2 PROSTHETIC WORK ORDER

664.3 PROSTHETIC LAB HOURS DATE

664.4 PROS LABORATORY/RESTORATIONS WORKSHEET

665 PROSTHETICS PATIENT
Note: You already have the 'PROSTHETICS PATIENT' File.

665.1 PROSTHETIC HOME/LIAISON VISITS
*BUT YOU ALREADY HAVE 'PROSTHETICS HOME/LIAISON VISITS' AS FILE #665.1!
Shall I change the NAME of the file to PROSTHETIC HOME/LIAISON VISITS? NO// YES

665.1 PROSTHETIC HOME/LIAISON VISITS
Note: You already have the 'PROSTHETIC HOME/LIAISON VISITS' File.

665.2 PROS LETTER (including data)
Note: You already have the 'PROS LETTER' File.
I will MERGE your data with mine.

665.4 PROS LETTER TRANSACTION
Note: You already have the 'PROS LETTER TRANSACTION FILE' File.

667 VEHICLE OF RECORD
Note: You already have the 'VEHICLE OF RECORD' File.

667.1 PROS AUTO-ADAPTIVE EQUIP
Note: You already have the 'PROS AUTO-ADAPTIVE EQUIP' File.

667.2 AUTO ADAPTIVE MANUFACTURER
Note: You already have the 'AUTO-ADAPTIVE MANUFACTURER' File.

667.3 V.O.R. TRANSACTION
Note: You already have the 'V.O.R. TRANSACTION' File.

668 PROSTHETIC SUSPENSE
*BUT YOU ALREADY HAVE 'PROSTHETICS SUSPENSE' AS FILE #668!
Shall I change the NAME of the file to PROSTHETIC SUSPENSE? NO// YES

668 PROSTHETIC SUSPENSE
Note: You already have the 'PROSTHETIC SUSPENSE' File.

669.1 PROSTHETIC LAB W.O #

Deleting Expired Fields From File 660

Deleting Expired Fields From File 665

Setting New Cross References

Removing Obsolete Keys ...

Checking Purge Parameters ...

THANK YOU, ALL DONE!

If your site is multi-divisional, you may enter an additional Site, or edit an existing Site by using the Enter/Edit Site Parameter option.

If any problems occur during installation, error messages will be displayed indicating the nature of the problem.

✓ The PROSTHETICS SITE PARAMETERS file (#669.9) will need to be populated after an installation in a virgin account. Populate the file using the Enter or Edit File Entries menu option under VA FileMan.

Post Installation

For complete instructions on setting up and implementing Prosthetics Version 3.0, please refer to the Implementation Section of the Technical Manual.

Site Parameters Set-Up

Displayed below is a screen depicting the Prosthetics Site Parameters which are set up when Prosthetics is installed. To edit these Site Parameters, use the Enter/Edit Station Site Parameters option (RMPR SITE PARA). Refer to the Implementation and Maintenance Section of the Technical Manual for a detailed explanation.

```
SS      Enter/Edit Station Site Parameters

Select Enter/Edit Site Parameters Option: SS  Enter/Edit Station Site Parameters

The grouper counter is used to associate multiple entries in File 660, Record of Pros Appliances/Repair, to a single patient visit. This counter is initially set at 99999999, then counts backwards. Do NOT edit this number.

Be sure to enter the MAS Clinic Names from the Hospital Location file in the Prosthetic Clinics field. This information will enable you to generate the AMIS Code Sheets and print VA Form 10-2527.

If your site is running a lab, e.g., Orthotic, Resoration, etc., print devices may be entered in the Prosthetics Site Parameters file.
