

Paging Actions

MailMan V. 7.1 with Patch 50 introduced paging action commands that allow you to navigate to different locations within long lists of messages when using either the Detailed or Summary Full Screen message readers. As you can see from the list of action commands (Table 2 in this chapter), you can perform any of the following paging actions on long list of messages:

- **Return/Enter**—Pressing the Return/Enter key functions just like the "+" paging action by paging forward one page.
- **Equal Sign ("=")**—Enter an equal sign (i.e., "=" on the keyboard) at the "Enter message number or command:" prompt in order to redisplay the basket message list page (screen) you were viewing ("refresh" the page/screen).
- **Plus Sign ("+")**—Enter a plus sign (i.e., "+" on the keyboard) at the "Enter message number or command:" prompt in order to advance to the next page (screen) of messages, when a mail basket contains a large number of messages.
- **Plus Number (" +n")**—Enter a plus sign and a specific number (i.e., "+n") at the "Enter message number or command:" prompt in order to advance n pages (screens) of messages, when a mail basket contains a large number of messages.
- **Minus Sign ("-")**—Enter a minus sign (i.e., "-" or hyphen on the keyboard) at the "Enter message number or command:" prompt in order to return to the previous page (screen) of messages, when a mail basket contains a large number of messages and you are *not* on the first page of messages.
- **Minus Number ("-n")**—Enter a minus sign and a specific number (i.e., "-n") at the "Enter message number or command:" prompt in order to go back n pages (screens) of messages, when a mail basket contains a large number of messages and you are *not* on the first page of messages.
- **Zero ("0")**—Enter a zero (i.e., "0") at the "Enter message number or command:" prompt in order to return to the first page (screen) of messages, when a mail basket contains a large number of messages and you are *not* on the first page of messages.

MailMan only displays these action codes in the list of action codes when the mail basket you are currently processing has more than one page (screen) of messages.

These paging action codes (except the Return/Enter key) are *not* available with MailMan's Classic message reader.
