Figure 75: Displaying the Command Action List—Using the Detailed or Summary Full Screen Message Reader

In the previous figure (Figure 75), we chose the Detailed Full Screen message reader to manage messages in our "Transportation News" mail basket.

We first selected messages using the message selection functionality, so we could subsequently perform group actions on the selected messages. For this example, we chose to select all four messages by entering ".1-4" at the "Enter message number or command:" prompt.

After selecting the messages, we entered a single question mark ("?") at the "Enter message number or command:" prompt. MailMan displayed the list of available action codes.

*For more information on selecting messages for subsequent group action, please refer to the action codes described in the "Message Selection Actions" topic in Chapter 2 in the MailMan V. 7.1. &Patch XM*7.1*50 User Manual.*

The list of action codes available with the new Detailed or Summary Full Screen message readers will differ from those action codes available with MailMan's Classic message reader. Also, some action codes are only available when certain conditions exist (e.g., messages selected for subsequent group action).

For a complete list of action commands available with basket message lists, please refer to Table 3 that follows in this chapter.
