

CONTROLLED SUBSTANCES

NURSES' USER MANUAL

Version 3.0

March 1997

(Revised August 2008)

Preface

The Controlled Substances (CS) Nurses' User Manual is designed to provide you with information on the CS software package. This product is one segment of the Veterans Health Information Systems and Technology Architecture (**VISTA**) installed at VA medical centers. The Controlled Substances module provides functionality to monitor and track the receipt, inventory, and dispensing of all controlled substances. This module provides the pharmacy with the capability to define a controlled substance location and a list of controlled substances to maintain a perpetual inventory.

This software provides nursing personnel with the ability to request orders for Controlled Substances via on-demand requests and to monitor and track the Green Sheets from the time of issuance from pharmacy to the time of return and review in pharmacy. Pharmacy may dispense controlled substances via the software automating all necessary documents (VA FORMS 10-2321 and 10-2638) to complete an order request. The software provides functionality to record Automated Management Information Systems (AMIS) and Cost data, address returns to stock, destructions, order cancellations, transfers between locations, and log outpatient prescriptions.

This software is continually being enhanced to provide additional options and capabilities. The CS Development Team encourages you to send questions and comments to them about the completeness and accuracy of this manual and suggestions for its improvement. Electronic mail messages can be sent to G.ControlledSubstancesTeam@ISC-BIRM.

(This page included for two-sided copying.)

Revision History

The table below lists changes made since the initial release of this manual. Use the Change Pages document to update an existing manual or use the entire updated manual.

Note: The Change Pages document may include unedited pages needed for two-sided copying. Only edited pages display the patch number and revision date in the page footer.

Date	Revised Pages	Patch Number	Description
08/08	All	PSD*3*64	New menu options added to the Transfer Green Sheet Menu. Reformatted to conform to national standards. T. Dawson, Technical Writer, A. Scott, Project Manager

Index	37

Orientation

Within the terminal dialogues used as examples in this manual, the user's input is underlined and bolded. Whenever the Return/Enter key should be pressed, you will see the symbol <ENT>. Whenever you see the underline and bold representing the user's input, you can assume the Return/Enter key was pressed.

Electronic Signature

In Controlled Substances, the Electronic Signature functionality will be used for identification for pharmacy personnel, nursing personnel, and narcotic inspectors.

Identification will be used to reconfirm the identity of the user at the keyboard before proceeding with the next step in a critical process. In the documentation, when your Electronic Signature Code is to be entered, it is represented as XXXXXX.

If you have not previously been issued an Electronic Signature code you can assign yourself one at any menu option by entering TBOX and then choosing Edit Electronic Signature Code. You can also enter "EDIT E and follow the prompts as shown below.

Electronic Signature Codes

This option is designed to permit you to enter or change your Initials, Signature Block Information and Office Phone number. In addition, you are permitted to enter a new Electronic Signature Code or to change an existing code.

INITIAL: OAC

SIGNATURE BLOCK PRINTED NAME: CSNURSE, ONE A

SIGNATURE BLOCK TITLE: R.N.

OFFICE PHONE: 555-7101

ENTER NEW SIGNATURE CODE: XXXXXX (Signature Code will not appear on screen)

RE-ENTER SIGNATURE CODE FOR VERIFICATION: XXXXXX

DONE

(Page included for two-sided copying)

Sign Out Doses for Patients

A feature to the new *Sign Out Doses for Patients Menu* is that you will be asked to supply the ward that you would like to exercise these options for before you will be able to select them.

```
Select Ward: WARD 10

  Sign Out Dose for Patient
  Activity Report
  Patient ID List Print
  Record Delayed Wastage
  Not Given, Return to Stock
  Record Defective Dose
```

Sign Out Dose for Patient

This option is designed for dispensing via a radio frequency device.

Example:

```
Select Sign Out Doses for Patients Option: SIGN Out Dose for Patient
Enter your Current Signature Code: XXXXXX SIGNATURE VERIFIED
Scan/Enter Patient: CSPATIENT,ONE 04-04-58 000-45-6789
Scan Drug Label or Enter Label # or Drug: LORAZEPAM 2MG/ML TUBEX
Doses signed out in the last eight hours:
Starting Balance: 30 Correct count? Yes// NO
Correct Count: 32
You are about to adjust the balance upward.
Before you do, let's check to see if there are any orders that need receiving.
REASON: MISCOUNTED
WITNESS ACCESS CODE: XXXXXX [The witness must be someone other than the nurse
signing out the doses]
WITNESS VERIFY CODE: XXXXXX
[Tip: If you type your access and verify code separated by a semicolon, they can be entered on the same
line...e.g., access;verify]
Thank you, Nurse Recording transaction... .....done.
Amount given: 2
Remaining Balance: 30 Recording transaction... done.
Scan Drug Label or Enter Label # or Drug: <ENT>
Scan/Enter Patient: <ENT>
```

Activity Report

This option provides a detailed and summary listing of dispensing for a drug(s) to a Narcotic Area of Use (NAOU).

Example:

Select Sign Out Doses for Patients Option: ACTivity Report

Select one of the following:

D	DETAIL LISTING ONLY
S	SUMMARY LISTING ONLY

Select Dispensing Report(s) to Print: DETAIL LISTING ONLY

Select NAOU: WARD 10

You may select a single drug, several drugs,
or enter ^ALL to select all drugs.

Select DRUG: LORAZEPAM 2MG/ML TUBEX *** INACTIVE ***

Select DRUG: <ENT>

Start with Date and Time: T-35@1:00 (AUG 29, 1996@13:00)

End with Date and Time: T@1:00 (OCT 03, 1996@13:00)

This report is designed for a 132 column format.
You may queue this report to print at a later time.

DEVICE: [Select Print Device]

.....*printout follows*.....

```

Record Delayed Wastage

This option is used when a dispensed dose needs to be wasted.

Example:

```
Select Sign Out Doses for Patients Menu Option: RECord Delayed Wastage
Wastage can only be recorded within twelve hours after signing out a dose.
Enter your Current Signature Code: XXXXXX SIGNATURE VERIFIED
Please enter the ward from which the drug(s) will be signed out.
Select Ward: WARD 10
Wastage can only be recorded within 12 hours after signing out a dose.
(except for PCA syringes and Infusions)
Scan/Enter Patient: CSPATIENT, ONE 04-04-58 000-45-6789
Scan Drug Label or Enter Label # or Drug: LORAZEPAM 2MG/ML TUBEX CN302
LORAZEPAM 2MG/ML TUBEX WARD 10
Doses dispensed in the last 12 hours:
4/24/96 10:38:49 am 1 TUBEX (1 WASTED) LANSING, EMILY
dropped
4/24/96 2:28:18 pm 2 TUBEX LANSING, EMILY
Amount actually given at 4/24/96 2:28:18 pm: 1 Amount wasted: 1
REASON: DROPPED ON FLOOR
WITNESS ACCESS CODE: XXXXXX [Witness enters access code]
WITNESS VERIFY CODE: XXXXXX [Witness enters verify code]
[Tip: If you type your access and verify code separated by a semicolon, they can be entered on the same line...e.g.,
access;verify]
Thank you, Nurse
```

Not Given, Return to Stock

When a dose has not been given to a patient and must be returned to stock, the dispensing nurse **MUST** use this option, within the specified amount of time determined by pharmacy, of the last dispensed dose. Pharmacy is able to determine at the site level an amount of time for the information to be entered. If the nurse does not enter the information within this amount of time a balance adjustment, which is only available on the *Supervisor's Menu*, will need to be done or a count correction can be entered next time there is a signing out of the dose.

Example:

```
Select Sign Out Doses for Patients Option: NOT Given, Return to Stock
Enter your Current Signature Code: XXXXXX SIGNATURE VERIFIED
Please enter the ward from which the drug(s) was signed out.
Select Ward: WARD 10
Returns can only be recorded within 12 hours after signing out a dose.
Scan/Enter Patient: CSPATIENT,ONE 04-04-58 000-45-6789
Scan Drug Label or Enter Label # or Drug:
LORAZEPAM 2MG/ML TUBEX
Doses signed out in the last 12 hours:
11/18/96 9:30:49 am 2 TUBEX (1 WASTED) LANSING,EMILY
DROPPED
Starting Balance: 13
Amount actually given at 11/18/96 9:30:49 am: 0
Amount returned: (1-2): 2// <ENT>
REASON: Not given, returned to stock Replace <ENT>
Balance: 15
```

Record Defective Dose

When a nurse discovers a damaged drug that cannot be dispensed to a patient, this option is used to record the wasting.

Example:

```
Select Sign Out Menu Option: RECORD DEFECTIVE Dose
Enter your Current Signature Code: XXXXXX SIGNATURE VERIFIED
Please enter the ward from which the defective drug(s) will be destroyed.
Select Ward: WARD 10
Scan Drug Label or Enter Label # or Drug:
LORAZEPAM 2MG/ML TUBEX
Doses signed out in the last eight hours:
1/16/97 3:50:13 pm 0 TUBEX (1 WASTED) (2 RETURNED) LANSING,EMILY
Starting Balance: 10 Correct count? Yes// <ENT> YES
Amount defective: 2
WITNESS ACCESS CODE: XXXXXX
WITNESS VERIFY CODE: XXXXXX
Thank you, Nurse
Remaining Balance: 8 Recording transaction... .....done.
Scan Drug Label or Enter Label # or Drug: <ENT>
```

All about Ordering

This menu contains options for ordering and checking on orders.

CS Order Entry for Ward

Use this option to electronically request Controlled Substances drug requiring the VA FORM 10-2638 from pharmacy.

There are three types of orders that can be entered.

Scheduled Delivery: Orders for drugs which are input during the scheduled delivery time.

Unscheduled Pick Up: Orders that are being requested at an unscheduled time.

One-Time Request: Orders for drugs that are not normally stocked on an NAOU. Your orders will be limited to the package amount specified for that drug. These can be entered through the Scheduled or Unscheduled route.

The nurse is not restricted to the ordering multiples established by the package size. If the default order size is one (1) and you need to enter four (4), your order will be broken into four (4) separate orders of one (1) each. You will be prompted four (4) times for comments on each separate order.

Under Version 2.0 the nurse had to enter an order and approve it before another order could be entered. In Version 3.0 the nurse can now enter multiple orders and then approve/delete them at one time.

Infusion or PCA Syringe Order Entry For Patient

This option is for ordering an infusion or PCA syringe for a specific patient.

Example:

Select Ordering Menu Option: INFUsion or PCA Syringe Order Entry

Select Ordering NAOU: WARD 10

THIS IS WHERE THE ORDER ENTRY BANNER WILL DISPLAY.

Scan/Enter Patient: CSPATIENT,ONE 04-04-58 000-45-6789

Select one of the following:

I	Infusion
P	PCA Syringe

Enter response: Infusion

Checking for active Controlled Substance IV orders.

Select the primary Controlled Substance for this infusion: MORPHINE

Pending CS Orders Report for an NAOU

Use this option to list all pending CS orders. This report may be generated for a single drug or all drugs within the NAOU.

Orders Filled Not Delivered

This option generates a list of all Controlled Substances orders filled from the pharmacy dispensing site (vault) but not yet delivered to the NAOUs. A summary total sorted by drug is also generated.

To receive these orders on the NAOU use the *Receipt of Controlled Substances from Pharmacy* option

Check on Priority Orders

This option will check the status of Priority Orders that Pharmacy has filled today for a selected NAOU.

Verify Count

This option may be used to verify and correct balances.

Example

```
Select Controlled Substances Nurses' (CS) Menu Option: VERify Count

Select NAOU:      WARD 10

WITNESS ACCESS CODE: XXXXXX
WITNESS VERIFY CODE: XXXXXX

All about Green Sheets

This menu contains options for handling Green Sheets.

Receipt of Controlled Substance from Pharmacy

After physically receiving the Green Sheet (VA FORM 10-2638) from **pharmacy**, it is important to update the status from “Filled not Delivered” to “Delivered-Perpetual Inventory” or “Delivered-Actively on NAOU” on your computer by using this option.

To view a list of the pending orders from pharmacy, use the option *Orders Filled Not Delivered*.

If you are receiving a Green Sheet from another **NAOU**, use the *Receive Green Sheet and Drug from another NAOU* option or the *Receive GS for PCA/Infusion Signed Out to Patient* option under the *Transfer Green Sheet Menu* so that your count is correct.

Completing a Green Sheet - Ready for Pickup

When a nurse has completed dispensing from a Green Sheet, the nurse needs to update the status of that Green Sheet to “Ready for Pick Up” by using this option.

Green Sheet History

Provides a detailed account of every transaction affecting a VA FORM 10-2638. Information shown on the reports may be different due to recent activity that has taken place on the Green Sheet number.

Transfer Green Sheet Menu

Use this menu to transfer and receive Green Sheets between NAOUs.

Transfer Green Sheet and Drug to another NAOU

This option transfers Controlled Substances drugs and their associated Green Sheet to another NAOU. The transferring of Controlled Substances drugs between NAOUs requires two processing steps.

Step 1 - The Green Sheet and Drug must be transferred to an NAOU.

Step 2 - The Green Sheet and Drug must then be received on that NAOU.

Receive Green Sheet & Drug from another NAOU

This option receives Controlled Substances drugs and their associated Green Sheet from another NAOU. The transferring of Controlled Substances drugs between NAOUs requires two processing steps. The Green Sheet **MUST** be received on the NAOU in the computer for the information to be correct.

Step 1 - The Green Sheet and Drug must be transferred to an NAOU.

Step 2 - The Green Sheet and Drug must then be received on that NAOU.

Transfer GS for PCA/Infusion Signed Out to Patient

This option provides nurses the ability to transfer Green Sheets with a quantity of 0 for PCA/Infusions to another NAOU. The transferring of these Green Sheets between NAOUs requires two processing steps.

Step 1 - The Green Sheet and Drug must be transferred to an NAOU.

Step 2 - The Green Sheet and Drug must then be received on that NAOU.

Receive GS for PCA/Infusion Signed Out to Patient

This option provides nurses the ability to receive Green Sheets with a quantity of 0 for PCA/Infusions from another NAOU. The transferring of these Green Sheets between NAOUs requires two processing steps. The Green Sheet **MUST** be received on the NAOU in the computer for the information to be correct.

Step 1 - The Green Sheet and Drug must be transferred to an NAOU.

Step 2 - The Green Sheet and Drug must then be received on that NAOU.

Reprint Transfer Between NAOUs (VA FORM 10-2321)

Nurses may reprint the transfer between NAOUs form (in lieu of VA FORM 10-2321) for any Green Sheet and drug transferred from their NAOU. The form may be reprinted only if the transferred Green Sheet and drug has not been received into the NAOU receiving the transfer.

Transferred Green Sheets - Pending NAOU Receipt

This report lists all Green Sheets that have been transferred from an NAOU and are pending receipt in another NAOU.

To receive these pending Green Sheets on an NAOU use the *Receive Green Sheet & Drug from another NAOU* option.

Receipt of Controlled Substance from Pharmacy

Use this option to receive Controlled Substances orders with a Green Sheet (VA FORM 10-2638).

Ward (NAOU) Drug History

Use this report to list all ACTIVE Controlled Substances orders currently on a specific NAOU.

Example:

Select Controlled Substances Nurses' (CS) Menu Option: WARD (NAOU) Drug History

Select NAOU: WARD 10

You may queue this report to print at a later time.

DEVICE: [Select Print Device] [I chose to print it to my terminal]

.....printout follows.....

                RECEIVING

After physically receiving the GS (VA FORM 0-2638, it is important to
Update the status on your computer so that your account is correct,

Select HELP SYSTEM action or <return>:<ENT>
```

Electronic Signature

In Controlled Substances, the electronic signature functionality will be used for identification for pharmacy personnel, nursing personnel, and narcotic inspectors.

Identification will be used to reconfirm the identity of the user at the keyboard before proceeding with the next step in a critical process.

In the documentation, when your Electronic Signature Code is to be entered, it is represented as XXXXXX.

If you have not previously been issued an Electronic Signature code you can assign yourself one at any menu option by entering TBOX and then choosing *Edit Electronic Signature Code*. You can also enter "EDIT E and follow the prompts as shown below.

Electronic Signature Codes

This option is designed to permit you to enter or change your Initials, Signature Block Information and Office Phone number. In addition, you are permitted to enter a new Electronic Signature Code or to change an existing code.

Example:

```
INITIAL: OAC
SIGNATURE BLOCK PRINTED NAME: ONE A CSNURSE
SIGNATURE BLOCK TITLE: R.N.
OFFICE PHONE: 555-7101

ENTER NEW SIGNATURE CODE: XXXXXX(Signature Code will not appear on screen)
RE-ENTER SIGNATURE CODE FOR VERIFICATION: XXXXXX

DONE
```

TIP: It may help to use your access code as your Electronic Signature Code, this will help eliminate the possibility of forgetting it!

Nursing Supervisor Menu

This is a menu containing special options to support the dispensing of Controlled Substances.

Patient ID List Print

This option supports the printing of barcode labels for patient ID.

Example:

```
Select Nursing Supervisor Menu Option: PATIent ID List Print

  Select one of the following:

      N      Nursing Location
      W      Ward

You may select Nursing Location or Ward to print the Patient ID List.
Select Method: Ward

Select Ward to print Patient ID List:   1 NORTH
Select Ward to print Patient ID List: <ENT>

  Select one of the following:

      A      Alphabetical
      R      Room-Bed

Sort: Alphabetical

This report is designed to print bar codes on a printer.
You may queue this report to print at a later time.

DEVICE:  [Select Print Device]
```

.....*printout follows*.....

```
Patient ID List for 1 NORTH Printed: Oct 09, 1996 9:51:51 am      Page: 1

-----
CSPATIENT,TWO (5119)                    1 NORTH

CSPATIENT,THREE (6543)                  160-B 1 NORTH

```

Initialize NAOU Drug Balance

This option may be used to establish beginning balances for drugs.

Delayed Sign Out Dose for Patient

This option may be used when there is computer down time and it is necessary to sign out doses that were already given to patients.

Example:

```
Select Nursing Supervisor Menu Option: DELAYed Sign Out Dose for Patient
Enter your Current Signature Code: XXXXXX SIGNATURE VERIFIED
Please enter the ward from which the drug(s) will be signed out.
Select Ward: WARD 10
Scan/Enter Patient: CSPATIENT,ONE 04-04-58 000-45-6789
Scan Drug Label or Enter Label # or Drug:
LORAZEPAM 2MG/ML TUBEX
Doses signed out in the last eight hours:
Starting Balance: 29 Correct count? Yes// NO
Correct Count: 28
REASON: DROPPED ONE
WITNESS ACCESS CODE: XXXXXX
WITNESS VERIFY CODE: XXXXXX
Thank you, Nurse Recording transaction... .....done.
Amount given: 2
Date/time given: NOW (OCT 09, 1996@09:56)
Nurse that signed out dose: CSNURSE,TWO
Remaining Balance: 26 Recording transaction... done.
Scan Drug Label or Enter Label # or Drug: <ENT>
Scan/Enter Patient: <ENT>
```

Balance Adjustments - NAOU

This option may be used to adjust the balance of controlled substances.

Patient/Location Inquiry

This option may be used to verify the location of a patient.

Unscheduled Order Report

This option will print a report of unscheduled orders shown by drug or NAOU.

Example:

```
Select Supervisor (CS) Menu Option: Unscheduled Order Report
```

```
Select Date Range for NAOU Unscheduled Order Report
```

```
Start with Date: T-2 (SEP 19, 1996)
```

```
End with Date: T (SEP 11, 1996)
```

```
Do you want to print a summary only? NO// YES
```

```
    Select one of the following:
```

```
        D          DRUG/ALL NAOUS
        N          NAOU/ALL DRUGS
```

```
You may print by either of these sorting methods.
```

```
Select SORT ORDER for Report: NAOU/ALL DRUGS
```

```
    You may select a single NAOU, several NAOUs,
    or enter ^ALL to select all NAOUs.
```

```
Select NAOU: ^ALL
```

```
This report is designed for a 80 column format.
```

```
You may queue this report to print at a later time.

Expiration Date Report

This option will print a Controlled Substances Expiration Date Report for a single, several, or all NAOUs. This report may be sorted by DATE/DRUG/NAOU or by DATE/NAOU/DRUG.

Example:

Select Nursing Supervisor Menu Option: EXpiration Date Report

Controlled Substances Expiration Date Report

Start with Date: T-50 (JUL 23, 1996)

End with Date: T (SEP 11, 1996)

You may select a single NAOU, several NAOUs,
or enter ^ALL to select all NAOUs.

Select NAOU: ^ALL

Select one of the following:

D	DATE/DRUG/NAOU
N	DATE/NAOU/DRUG

You may print by either of these sorting methods.

Select SORT ORDER for Report: DATE/DRUG/NAOU

This report is designed for a 80 column format.

You may queue this report to print at a later time.

Steps to Prepare a Ward (NAOU) for use of a Radio Frequency Device

Converting a ward from the use of Green Sheets (VA FORM 10-2638) to the use of an RF device should be carefully coordinated between Nursing and Pharmacy. Timing is an issue and it is recommended that the conversion NOT take place in the midst of processing a large number of receipts. There are several steps to consider in order to avoid confusion and/or frustration.

1. Pharmacy should use the Label for Dispensing (Barcode) option to print barcode labels for Controlled Substances dispensed to Wards. If labels are needed for drug already received on a ward, the reprint option should be used by Pharmacy:

Example:

```
Select Dispensing Menu Option: REprint Reports Menu
Select Reprint Reports Menu Option: LAbel Reprint for Dispensing Drug
Green Sheets/Transactions that have a status of FILLED - NOT DELIVERED
or DELIVERED - ACTIVELY ON NAOU will be reprinted for a given number range.
```

These barcodes may then be scanned by Nursing for receiving and dispensing.

2. Nursing should use the *Patient ID List Print* option to print barcode labels for patients currently on the ward. Readability of labels will be affected by the condition of the ribbon on the printer. For help on specific DEVICE file set up, please refer IRMS to the Controlled Substances Version 3.0 Technical Manual. These labels may then be scanned by Nursing for dispensing to Patients.
3. If there are any drugs dispensed by Pharmacy that will always require a green sheet, such as infusions, those drugs should be flagged in the vault as follows:

```
Select Enter/Edit Menu Option: STock CS Drugs - Enter/Edit
Select NAOU: MAST VAU
Do you wish to ADD or EDIT stock drugs? ADD// EEDIT
Select DRUG: MEPERIDINE HCL 100MG/ML INJ                CN101
LOCATION: S15// ^ALWAYS PRINT VA FORM 10-2638?
ALWAYS PRINT VA FORM 10-2638?: ??
    Answer "1" or "YES" to force printing a VA FORM 10-2638 even when
    dispensing to a Narcotic Area of Use that is keeping a perpetual
    inventory.
    Choose from:
        1          YES
        0          NO
ALWAYS PRINT VA FORM 10-2638?: Y YES
```

4. Pharmacy should flag any liquids using the same option so that Nursing can dispense partial doses.

Do you wish to ADD or EDIT stock drugs? ADD// EDIT

Select DRUG: OPIUM CAMPHORATED TINC

LOCATION: LIQUID?

LIQUID?: 1 YES

5. Pharmacy must set the USING PERPETUAL INVENTORY flag to YES.

Select Supervisor (CS) Menu Option: SET Up CS (Build Files) Menu

Select Set Up CS (Build Files) Menu Option: ENter/Edit Menu

Select Enter/Edit Menu Option: CREAte/Edit the Narcotic Area of Use

Select NAOU: WEST 4

CONTROLLED SUBSTANCES SITE : NAME

NAOU: WEST 4// USING PERPETUAL INVENTORY?

USING PERPETUAL INVENTORY?: YES// ??

This flag is used to determine if this NAOU is using the Controlled Substances perpetual inventory functionality. If this field is set to "YES" or "1" the standard Controlled Substance Administration Record VA FORM 10-2638 (Green Sheet) WILL NOT be printed and will be replaced by the perpetual inventory method of tracking CS drugs.

6. Nursing should then initialize the balances. If there are pending receipts for the NAOU, it is better to first initialize balances and then process the receipts.

Select Nursing Supervisor Menu Option: Initialize NAOU Drug Balance

Select NAOU: WEST 4

This option will set all balances to zero before initializing.

Are you sure you want to proceed? YES

Give me a second to alphabetize.

ACETAMINOPHEN W/CODEINE 15MG TAB

Package Size: 50 Breakdown Unit: TAB

Initial Balance: 0// 100

Updating beginning balance and transaction history.

LORAZEPAM 2MG TAB U/D

Package Size: 20 Breakdown Unit: TAB

Initial Balance: 0// 20

Updating beginning balance and transaction history.

Would you like a report of current balances? Yes//<ENT>

You may queue this report to print at a later time.

Glossary

Completion Status

A review status is attached to each Controlled Substances Green Sheet returned to pharmacy. The following are valid:

NO DISCREPANCY—No discrepancy found.

TURN IN FOR DESTRUCTION—CS drug turned in to be destroyed.

RETURNED TO STOCK—CS Drug returned to stock. The dispensing site inventory balance will be updated.

MATH ERROR—CS drug discrepancy found.

GREEN SHEET NOT SIGNED BY NURSE—GS missing nurse's signature.

OTHER—REFERRED TO PHARMACY SUPERVISOR—CS drug discrepancy referred to supervisor for resolution.

Dispensing Number

Control number assigned by pharmacy when dispensing a Controlled Substances drug. This number is used to track the Green Sheet and drug. Also referred to as the Disp #, Green Sheet #, GS #, or transaction # throughout the CS package.

Dispensing/Receiving Report (in lieu of VA Form 10-2321)

This report can be printed in lieu of VA Form 2321 and lists all Controlled Substances orders dispensed to an NAOU. The signatures of the dispensing pharmacist and the nurse receiving the drug are required.

Dispensing Site

An NAOU set up as a pharmacy vault that dispenses Controlled Substances drugs.

Dispensing Worksheet

This worksheet compiles a list of all pending Controlled Substances request orders for a selected dispensing site. A worksheet number, drug name, quantity ordered, requesting NAOU, ordered by, comments, and blanks for pharmacy dispensing number, manufacturer, lot number, and expiration date are listed on the worksheet.

Drug Address Code (Location Code)	A code that represents the location of a drug in the NAOU. For example, if TYLOX is stored in an NAOU on the second set of shelves, third shelf from the top, its drug address code could be expressed as S,2,3. The address code can consist of up to three levels separated by a comma. Each level should further define the exact location. The code is associated with an expansion code for clarity.
Drug Address Code Expansion	Text used to clarify the meaning of a drug address code. For example, the code S would be expanded and printed as shelf. (These codes and expansions are locally created terms.)
Green Sheet	The CONTROLLED SUBSTANCE ADMINISTRATION RECORD (VA Form 10-2638) is referred to as a Green Sheet or GS throughout the CS package. Pharmacy dispensing number, drug name, expiration date, quantity dispensed, lot number, ordered by, dispensed by, and ward (NAOU) are printed on the form.
Green Sheet number	Control number assigned by pharmacy when dispensing a Controlled Substances drug. This number is used to track the Green Sheet and drug. It is also referred to as the GS #, dispensing #, or disp #, or transaction # throughout the CS package.
Inpatient Site	Inpatient Site must be defined for each NAOU. The Controlled Substances software utilizes this data to distinguish multi-divisional sites.
Inspector's Log	This report lists all active Green Sheets by NAOU. It includes the following information: Green Sheet #, drug name, date dispensed, quantity dispensed, expiration date (if available), blanks for quantity on hand, and a signature blank for verification.
Intranet	A company wide computer network available via modem that connects users.
Master Vault	An NAOU set up as your primary dispensing site.
NAOU - Narcotic Area of Use	A Narcotic Area of Use (NAOU) is a place where commonly stocked Controlled Substances drugs are stored for use by pharmacy, wards or treatment areas.
	There are three types of NAOUs:

- 1) Master Vault,
- 2) Satellite Vault, and
- 3) Narcotic Locations.

NAOU Inventory Group

An NAOU Inventory Group is defined by pharmacy to represent the Narcotic Areas of Use which are inventoried together as a group. By grouping the commonly inventoried NAOUs under an easy to remember group name, the elements of the inventory are established, and do not have to be redefined every time an inventory is scheduled.

Narcotic Location

An NAOU set up for the nursing wards, pharmacy IV room, or a pharmacy working stock area.

Order Entry Banner

Provides a free text field as a site parameter to appear upon Nursing CS Order Entry. When the user accesses the following 3 options, the free text field will be displayed:

- 1) Nursing Order Entry
- 2) Pharmacy Order Entry from Nursing
- 3) Infusion Order Entry

Order Status

A processing status is attached to each Controlled Substances request order. The following are valid:

REQUESTED—NOT ORDERED

Requests created by batch processing but not yet approved.

ORDERED—NOT PROCESSED

Ordered by nursing but not processed by pharmacy.

PROCESSED—NOT DISPENSED Processed (filled) by pharmacy but not yet dispensed.

FILLED—NOT DELIVERED Dispensed and verified by pharmacy but not delivered to the requesting NAOU.

DELIVERED—ACTIVELY ON NAOU Drug stored on the NAOU.

COMPLETED—GREEN SHEET READY FOR PICKUP Nursing has flagged the Green Sheet ready for pharmacy pickup.

COMPLETED—GREEN SHEET PICKED UP Green Sheet returned to pharmacy but not yet reviewed.

COMPLETED—REVIEWED Pharmacy has reviewed the Green Sheet .

COMPLETED—PENDING PROBLEM RESOLUTION Pharmacy has reviewed the Green Sheet and a problem exists

CANCELLED Order cancelled.

TRANSFERRED TO ANOTHER NAOU Order and drug transferred to another NAOU.

UNDER REVIEW BY INSPECTOR Order and drug pulled from NAOU by CS Inspector for review.

LOGGED BY TRAKKER All drug doses from this order have been logged out to patients using the TRAKKER. (Not currently used in Version 2.0.)

PSD ERROR

This key should be allocated to pharmacy supervisors responsible for maintaining the narcotic vault. This key controls access to reports listing various error and exception conditions generated when entries are filed from the barcode TRAKKER. Also, the holders of this key will receive electronic mail messages created by using the TRAKKER.

PSD NURSE

This key should be allocated to nurses, usually LPNs, who may only receive and administer controlled substances but cannot place the order requests.

PSD PARAM

This key should be allocated **only** to the Inpatient Pharmacy Package Coordinator(s). This lock controls the printing of the Green Sheets and the range of automated dispensing numbers for a dispensing site (vault).

PSD TRAN

This key should be allocated to the Inpatient Pharmacy Coordinator(s). This key controls the access to the Transfer NAOU Stock Entries option. Users can copy stock entries from one NAOU into another NAOU or from an AR/WS AOU into an NAOU.

PSDMGR	This key should be allocated to the Inpatient Pharmacy Package Coordinator(s) or his/her designee. This lock controls the editing of CS files for package set up. This key locks the Supervisor's Menu options [PSD MGR].
PSJ PHARM TECH	This key should be allocated to pharmacy technicians handling narcotic orders.
PSJ RNURSE	This key should be allocated to nurses who request narcotic orders, receive, and administer controlled substances on the wards.
PSJ RPHARM	This key should be given to pharmacists dispensing and receiving narcotic orders.
Satellite Vault	An NAOU set up as a secondary dispensing site.
Stock Drug	A drug (from the DRUG file) stored in an NAOU.
Stock Level	The quantity of a drug stocked in a specific NAOU.
VistA	Veterans Health Information Systems and Technology Architecture
Ward (for Drug)	The name of the ward or wards that will use this particular drug. It is important to accurately answer this prompt because this is the link between the Unit Dose package and the Controlled Substances package. The Unit Dose package looks at this field to know if the drug is a Controlled Substances stocked drug.
