Chapter 1: About the Output Reports Menu

This chapter describes the options on the *Output Reports* menu.

Output Reports

[PSO OUTPUTS]

The *Output Reports* menu generates a variety of management reports. These reports contain current medication profiles, utilization, cost, and workload information that help management maintain the highest level of patient care.

The following reports and menus are available on the *Output Reports* menu:

- *Action Profile (132 COLUMN PRINTOUT)*
- *Alpha Drug List and Synonyms*
- *AMIS Report*
- *Bad Address Reporting Main Menu ...*
- *CMOP Controlled Substance Rx Dispense Report*
- *Commonly Dispensed Drugs*
- *Cost Analysis Reports ...*
- *Daily AMIS Report*
- *Drug List By Synonym*
- *Free Text Dosage Report*
- *Inactive Drug List*
- *Internet Refill Report*
- *List of Patients/Prescriptions for Recall Notice*
- *List Prescriptions on Hold*
- *Management Reports Menu ...*
- *Medication Profile*
- *Monthly Drug Cost*
- *Narcotic Prescription List*
- *Non-Formulary List*
- *Non-VA Meds Usage Report*
- *Poly Pharmacy Report*
- *Prescription List for Drug Warnings*
- *Released and Unreleased Prescription Report*

Action Profile (132 COLUMN PRINTOUT)

[PSO ACTION PROFILE]

This option provides a list of a patient's active prescriptions, the expired and canceled prescriptions that may be renewed, and any Non-VA Med orders documented via the CPRS GUI application, and any remote prescriptions the patient may have are added to the end of the list as shown in the following report. Each prescription is followed by a place for the provider to indicate the action, renew or discontinue. This profile can be printed for an individual patient, for all patients with appointments in a clinic, all patients in all clinics, or for a clinic group.

In addition, a polypharmacy report can be printed with the action/informational profile. To get this report, answer **Yes** to the "POLYPHARMACY W/ACTION PROFILE" prompt in the *Site Parameter Enter/Edit* option to turn on this site parameter. This profile can be printed in an 80- or 132-column format. The Action Profile must be sent to a printer.

Barcodes may not show up on the action profile if the site parameters have not been set up for them.

If a prescription is for a drug marked for lab monitoring, the most recent lab result will be printed.

Copay affects the output report for this option. The letters SC (service connected) and NSC (non-service connected) will print on the same line as the RENEW/MD line only if the veteran is rated service connected less than 50% and the prescription is not a supply item. This allows the physician to indicate (circle) the correct veteran eligibility so that the veteran may be charged a copay for the prescription, if applicable.

This report now displays ****BAD ADDRESS INDICATED**** if the patient has a bad address indicator. Also, if a temporary address has no end date, the following text is now displayed: "(Temp address from XXX 99,9999 till (no end date))".

If the prescription has been returned to stock, the letter (R) will appear next to the last fill date.

Before continuing, please set up your terminal to capture the detailed report data. On some terminals, this can be done by clicking on the 'Tools' menu above, then click on 'Capture Incoming Data' to save to Desktop. This report may take a while to run.

The output of this report is in a delimited output format suitable for export to MS Excel and includes data from original prescription fills, refills, partial fills, and Consolidated Mail Outpatient Pharmacy (CMOP) fills. The report output is sorted primarily by patient name and secondarily by prescription number.
