# 1 Introduction

The VistA Build Analyzer utility (aka Build Analyzer) assists developers and software quality assurance (SQA) in preparing and reviewing a new Veterans Health Information Systems and Technology Architecture (VistA) patch.

This utility analyzes all of the components included in a Kernel Installation and Distribution System (KIDS) build. It provides an assessment based on standards and best practices.

The Build Analyzer is primarily run in a Development or SQA Test accounts to verify a build meets standards prior to release into a Production account. However, it can also be run in a Production account to review an already released build to verify if any issues arise after release to confirm any build discrepancies.

The VistA Build Analyzer utility includes the **Build Analyzer Main Menu** [XPDANLYZ MAIN MENU] with the following options and actions:”

- **KIDS Build Analyzer** [XPDANLYZ] and the following actions:
  - **Print the Report**
  - **Create the Report in .TXT Files**
  - **Send the Report in MailMan Messages**
- **Delete Build Analyzer Text Files** [XPDANLYZ\_DEL].
- **KIDS Build Analyzer - Full SQA Search** [XPDANLYZ\_SQA] and the following actions:
  - **Print the Report**
  - **Create the Report in .TXT Files**
  - **Send the Report in MailMan Messages**

**REF:** These options and actions are described in Section [2](#), “[Using the VistA Build Analyzer](#).”

This tool was created to help maintain constancy between developers and catch simple errors prior to submitting a patch for further reviews. The VistA Build Analyzer utility will be continuously improved to maintain conventions and speed reviews of new VistA patches.

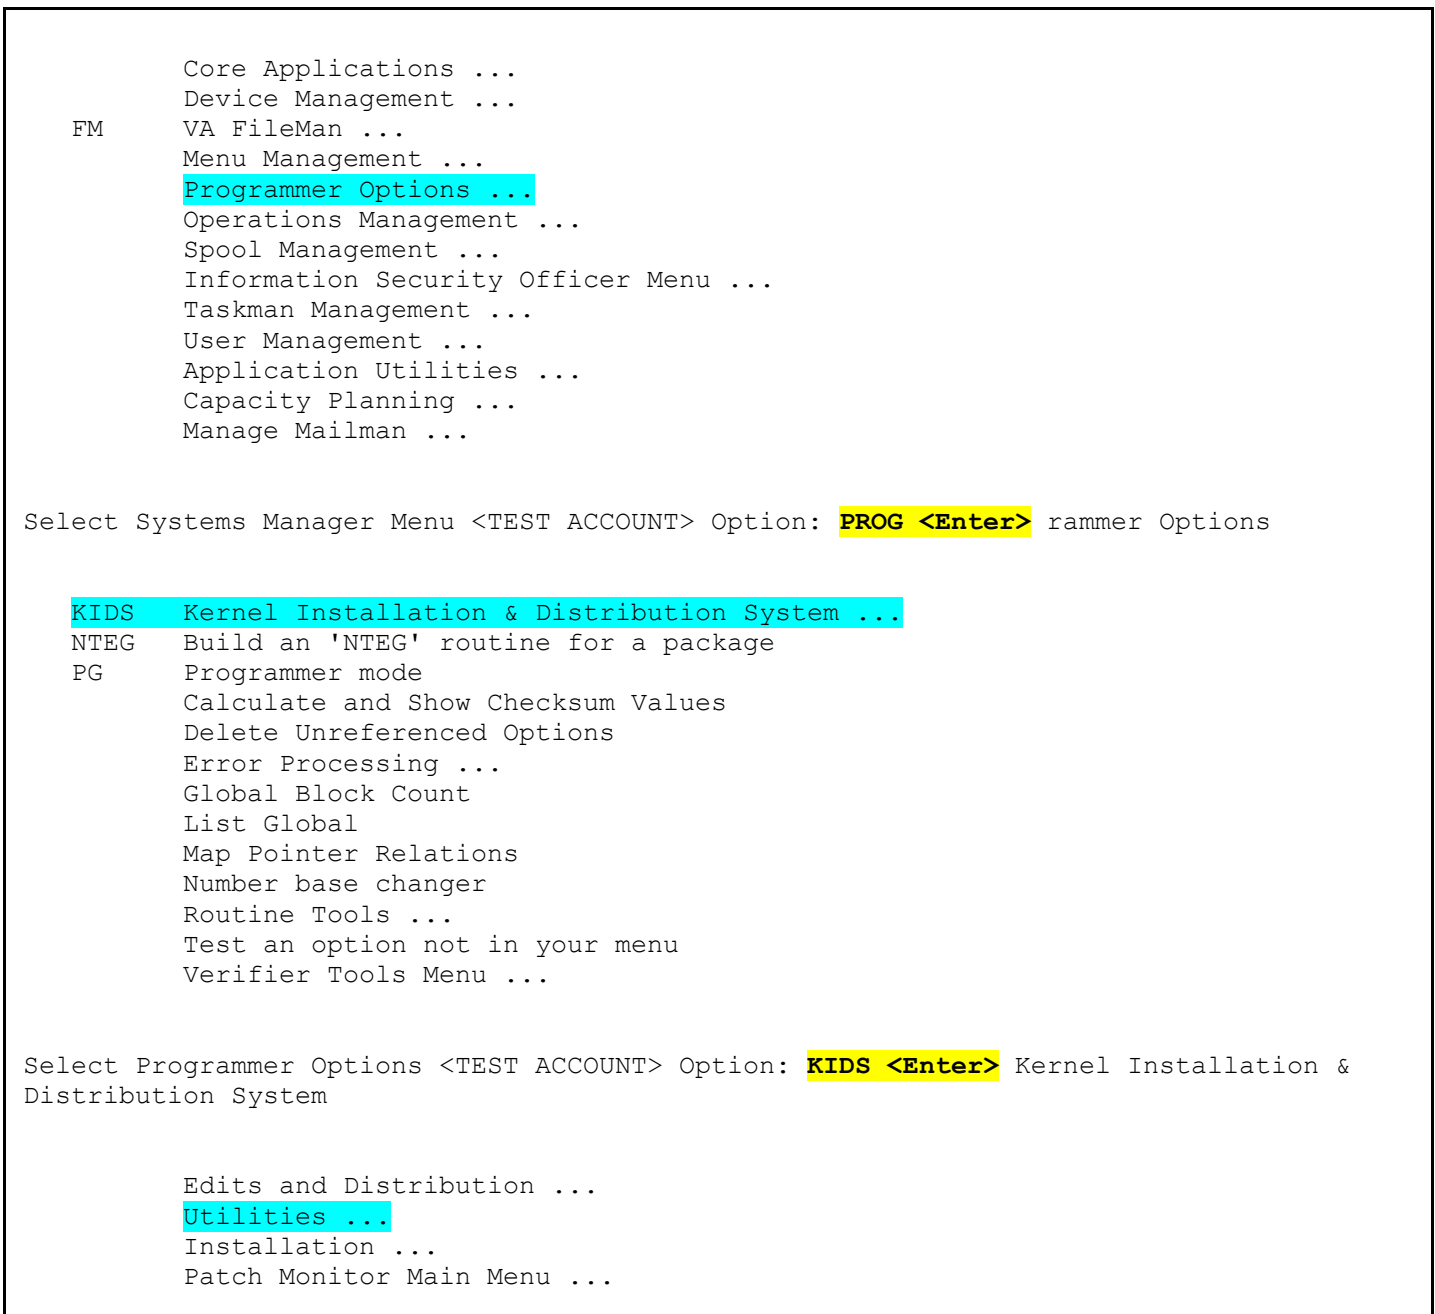

## 2 Using the VistA Build Analyzer

### 2.1 Build Analyzer Main Menu

To access the VistA Build Analyzer utility, do the following ([Figure 1](#)):

1. Select the **Programmer Options** [XUPROG] menu.
2. Select the **Kernel Installation & Distribution System** [XPD MAIN] menu.
3. Select the **Utilities** [XPD UTILITY] menu.
4. Select the **Build Analyzer Main Menu** [XPDANLYZ MAIN MENU].

**Figure 1: Accessing the Build Analyzer Main Menu [XPDANLYZ MAIN MENU]—System Prompts and User Entries**

Select Kernel Installation & Distribution System <TEST ACCOUNT> Option: **UTIL <Enter>**  
ities

**The display order and list of menu options can vary from site to site. It depends on site settings and the security keys assigned to the user.**

**Build Analyzer Main Menu ...**

Build File Print  
Convert Loaded Package for Redistribution  
Display Patches for a Package  
Edit Install Status  
Install File Print  
Purge Build or Install Files  
Rollup Patches into a Build  
Update Routine File  
Verify a Build  
Verify Package Integrity

Select Utilities <TEST ACCOUNT> Option: **BUILD AN <Enter>** alyzer Main Menu

- 1 KIDS Build Analyzer
- 2 Delete Build Analyzer Text Files
- 3 KIDS Build Analyzer - Full SQA Search

Select Build Analyzer Main Menu <TEST ACCOUNT> Option:

## 2.2 KIDS Build Analyzer Option

Use the **KIDS Build Analyzer** [XPDANLYZ] option ([Figure 2](#)) to analyze the build components to identify adherence to standards and best practices.

**Figure 2: Running the KIDS Build Analyzer [XPDANLYZ] Option—System Prompts and User Entries**

```
Select Build Analyzer Main Menu <TEST ACCOUNT> Option: KIDS
1 KIDS Build Analyzer
  2 KIDS Build Analyzer - Full SQA Search
CHOOSE 1-2: 1 <Enter> KIDS Build Analyzer
```

This tool is used to analyze the components of a build to identify adherence to standards and best practices.

**Enter the VistA build name as it appears in the BUILD (#9.6) file. Sometimes, KIDS has a backup of a patch, which is indicated by a lowercase “b” following the patch ID (e.g., XU\*8.0\*688b); so, it is best to always select the *non-backup* build.**

```
Select Build Name: XU*8*688
1 XU*8*688      KERNEL
  2 XU*8*688b     KERNEL
CHOOSE 1-2: 1 <Enter> XU*8.0*688 KERNEL
```

**The “Namespace” value is displayed from the first piece of the build name.**

```
Namespace: XU
Package: KERNEL
```

**The “Package” value is displayed if it is listed in the BUILD (#9.6) or PACKAGE (#9.4) file.**

```
Do you want to include a section that displays the routine lines containing
specific code references reviewed on the SQA checklist? NO// <Enter>
```

```
Do you want to include a section that displays the component descriptions
and text found in routines? NO// <Enter>
```

```
Analysis Results Display Choices:
```

```
1. Print the Report
2. Create the Report in .TXT Files
3. Send the Report in MailMan Messages
```

```
Select number: (1-3):
```

## 2.2.1 Analysis Results Display Choices

The **KIDS Build Analyzer** [XPDANLYZ] option provides the following actions to view or save the report output ([Figure 2](#)):

1. [Print the Report](#)—Output displayed to the screen (Default: **HOME**) or other specified device.
2. [Create the Report in .TXT Files](#)—Output sent to separate text files.
3. [Send the Report in MailMan Messages](#)—Output sent to email messages.

If the user chooses to see the lines with Software Quality Assurance (SQA) references or review component descriptions and text found in routines, they will be packaged in the same format as chosen with these actions.

## 2.2.2 Incorrect or Missing Build

If the PACKAGE NAMESPACE OR PREFIX (#23) Multiple field of the BUILD (#9.6) file is *not* **NULL** and if the build does *not* include the namespace obtained from the first part of the build name; you will see the warning shown in [Figure 3](#):

**Figure 3: Sample Warning Message—Build Namespace Missing or Inconsistent**

Select Build Name: **ZZ\*1.0\*1**

\*\*\* Warning: BUILD namespace not consistent with PACKAGE NAMESPACE OR  
PREFIX (#23) field of BUILD file.

## 2.2.3 Print the Report Action

If the “**Print the Report**” action is selected in [Figure 2](#), the user is prompted for a “Device”, as shown in [Figure 4](#):

**Figure 4: Print Analysis Report—Sample Dialog to Choose a Device**

Print Analysis to which Device: HOME//

If you choose to display the whole report without breaks (e.g., “HOME// ;9999999”), then you will get all data scrolling on the screen. If it is a large build, this could be a lot of data and the pause above at the “Print” prompt should be used to set up to log the display into a text file. If you just accept the “HOME//” default, it will display one screen at a time for your review.

### 2.2.3.1 No SQA Checklist Items, Component Descriptions, or Routine Text

[Figure 5](#) shows the results when answering **NO** to the following prompts in the **KIDS Build Analyzer** [XPDANLYZ] option and then using the **Print the Report** action to see the report:

- “Do you want to include a section that displays the routine lines containing specific code references reviewed on the SQA checklist? NO//” **NO**
- “Do you want to include a section that displays the component descriptions and text found in routines? NO//” **NO**

**Figure 5: Running the “KIDS Build Analyzer” Option: “Print the Report” Action: No SQA Checklist Items, Component Descriptions, or Routine Text—System Prompts and User Entries**

```
Select Utilities <TEST ACCOUNT> Option: XPDANLYZ MAIN MENU <Enter> Build Analyzer Main
Menu

1 KIDS Build Analyzer
2 Delete Build Analyzer Text Files
3 KIDS Build Analyzer - Full SQA Search

Select Build Analyzer Main Menu <TEST ACCOUNT> Option: 1 <Enter> KIDS Build Analyzer

This tool is used to analyze and list the components of a build to identify adherence
to standards and best practices.

Select Build Name: XU*8*688 <Enter> KERNEL

Namespace: XU
Package: KERNEL

Do you want to include a section that displays the routine lines containing specific
code references reviewed on the SQA checklist? NO// NO

Do you want to include a section that displays the component descriptions
and text found in routines? NO// NO

Analysis Results Display Choices:

1. Print the Report
2. Create the Report in .TXT Files
3. Send the Report in MailMan Messages

Select number: (1-3): 1 <Enter> . . .

Print Analysis to which Device: HOME// ;9999999 TELNET PORT Right Margin:
80// <Enter>
```

[Figure 6](#) shows the results from the **Print the Report** action from the **KIDS Build Analyzer** option *without* including SQA checklist items, component descriptions, and routine text:

**Figure 6: Reviewing the “Print the Report” Action Results—Output *without* SQA Checklist Items, Component Descriptions, and Routine Text**

This field is used to enter the provider's Drug Enforcement Administration
(DEA) number(s). Enter the DEA number as two upper case letters followed
by 7 digits. e.g., AA1234567.
HELP-PROMPT:
Enter DEA number in the format 2 upper case letters followed by 7 numbers.
TECHNICAL DESCRIPTION:
This is the algorithm for the DEA number
```

```
FIELD: 53.2: DEA#
This field is used to enter the Drug Enforcement Agency (DEA) number.
Enter the DEA number as two upper case letters followed by 7 digits.
e.g., AA1234567.
HELP-PROMPT:
Enter the DEA number 2 letters 7 numbers.
TECHNICAL DESCRIPTION:
This is the algorithm for the DEA number
HELP-PROMPT: missing.
```

```
FILE: DEA BUSINESS ACTIVITY CODES
The DEA BUSINESS ACTIVITY CODES FILE is associated with the DEA numbers
and provider information in the DEA NUMBERS file. This file links a
provider with the type of service provided. It contains BUSINESS
ACTIVITY CODES that are supplied by the DOJ/DEA web service.
```

Field - BUSINESS ACTIVITY (#.02):

Description:

This field holds the Business Activity value used for DEA numbers. This value can currently be one of the following:  
A,B,C,D,E,F,G,H,J,K,L,M,N,P,R,S,T or U

This value, combined with a numeric business sub-type, categorizes a DEA number.

Help-Prompt:

Enter the Business Activity value for used for DEA numbers. Answer must be 1-3 characters in length.

Field - BUSINESS ACTIVITY DESCRIPTION (#1):

Description:

This is the description given for the Business Activity Code and Sub-code.

Help-Prompt:

Enter the Business Activity description given for the Business Activity code and Business Activity Sub-code. Answer must be 3-60 characters in length.

Field - BUSINESS ACTIVITY SUB-CODE (#.03):

Description:

DEA uses an alpha character business activity code to identify various categories of registrants. For example business activity code "C" indicates a "Practitioner". DEA added a business activity sub-code field to identify new sub-categories of registrants.  
For example business activity code "C" in combination with business activity sub-code "1" indicates a practitioner who has received a Drug Addiction Treatment Act (DATA) Waiver (DATA Waived or DW) to provide office based opioid treatment to 30 or 100 or 275 patients (DW/30, DW/100, DW/275). As new sub-categories of business activities become regulated, additional sub-code combinations (e.g. C-2, C-3, A-1, etc.) will be assigned. MLP = Mid-Level Practitioner. NG = National Guard

Help-Prompt:

Enter the business activity sub-code associated with the Business Activity Code. Answer must be 1-3 characters in length.

Field - FULL BUSINESS ACTIVITY CODE (#.01):

Description:

DEA uses an alpha character business activity code to identify various categories of registrants. For example business activity code "C" indicates a "Practitioner". DEA added a business activity sub-code field to identify new sub-categories of registrants.  
For example business activity code "C" in combination with business activity sub-code "1" indicates a practitioner who has received a Drug Addiction Treatment Act (DATA) Waiver (DATA Waived or DW) to provide office based opioid treatment to 30 or 100 or 275 patients (DW/30, DW/100, DW/275). As new sub-categories of business activities become regulated, additional sub-code combinations (e.g. C-2, C-3, A-1, etc.) will be assigned. MLP = Mid-Level Practitioner. NG = National Guard.

Help-Prompt:

Enter the full business activity code. This is composed of the Business activity code and sub-code used for DEA numbers. Answer must be 2-4 characters in length.

Field - MANUAL ENTRY DATE/TIME (#2):

Description:

This field should only be populated when a new Business Activity Code (BAC) is entered manually due to the failure of the PSO DOJ/DEA WEB SERVICE to establish a connection to the DOJ web server.

Help-Prompt:

This is the date/time this Business Activity Code was manually entered.

FILE: DEA NUMBERS

The DEA NUMBERS FILE is designed to contain demographic and permission information about a provider related to the ability to order controlled substance prescriptions.

Field - ADDITIONAL COMPANY INFO (#1.2):

Description:

This is the additional company information of the person or institution associated with this DEA Number.

Help-Prompt:

Enter additional company info for the given person/institution. Answer must be 1-40 characters in length.

Field - BUSINESS ACTIVITY CODE (#.02):

Description:

This is the business activity code related to this DEA Number.

Help-Prompt:

Enter the Business Activity code given to this DEA Number.

Field - CITY (#1.5):

Description:

This is the city of the permanent address of the person or institution related to this DEA Number.

Help-Prompt:

Enter the city of the permanent address of the person or institution associated with this DEA Number. Answer must be 1-33 characters in length.

Field - DEA NUMBER (#.01):

Description:

This field is used to enter the providers' Drug Enforcement Administration (DEA) number. Enter the DEA number as two upper case letters followed by 7 digits. e.g., AA1234567.

Help-Prompt:

Enter the DEA number in the format of 2 letters followed by 7 numbers.

Field - DETOX NUMBER (#.03):

Description:

If the DEA provider has detox privileges, this field will be populated with a 'VX' or 'XA' followed by the numeric portion of the DEA number.

Help-Prompt:

Enter the detox number associated with this DEA Number. Answer must be 9 characters in length.

Field - EXPIRATION DATE (#.04):

Description:

This is the date of expiration for the DEA Number.

Help-Prompt:

Enter the date this DEA Number expires.

Field - LAST DOJ UPDATE DATE/TIME (#10.3):

Description:

This is the date/time the DOJ (Department of Justice) data was used to update this DEA record.

Help-Prompt:

Enter the date/time this DEA record was last updated by the DOJ source.

Field - LAST UPDATED BY (#10.1):

Description:

This is the person from the NEW PERSON file who last initiated an update to this DEA record.

Help-Prompt:

Enter the person who last updated this DEA record.

Field - LAST UPDATED DATE/TIME (#10.2):

Description:

This is the date/time of the last update to this DEA record.

Help-Prompt:

Enter the date/time this DEA record was last updated.

Field - NAME (PROVIDER OR INSTITUTION) (#1.1):

Description:

This is the name of the facility or person who is associated with this DEA Number.

Help-Prompt:

Enter the name associated with this DEA Number. Answer must be 1-40 characters in length.

Field - SCHEDULE II NARCOTIC (#2.1):

Description:

This field is used to determine if the provider has privileges for Schedule II drugs.

Help-Prompt:

DEA number allows for schedule II drugs?

Field - SCHEDULE II NON-NARCOTIC (#2.2):

Description:

This field is used to determine if the provider has privileges for Schedule II non-narcotic.

Help-Prompt:

Provider has privileges for schedule II non-narcotic?

Field - SCHEDULE III NARCOTIC (#2.3):

Description:

This field is used to determine if the provider has privileges for Schedule III narcotic.

Help-Prompt:

Provider has privileges for schedule III narcotic?

Field - SCHEDULE III NON-NARCOTIC (#2.4):

Description:

This field is used to determine if the provider has privileges for Schedule III non-narcotic.

Help-Prompt:

Provider has privileges for schedule III non-narcotic?

Field - SCHEDULE IV (#2.5):

Description:

This field is used to determine if the provider has privileges for Schedule IV controlled substances.

Help-Prompt:

Provider has privileges for schedule IV?

Field - SCHEDULE V (#2.6):

Description:

This field is used to determine if the provider has privileges for Schedule V controlled substances.

Help-Prompt:

Provider has privileges for schedule V?

Field - STATE (#1.6):

Description:

This is the state of the permanent address of the person or institution associated with this DEA Number.

Help-Prompt:

Enter the state of the permanent address associated with the person or institution associated with this DEA Number.

Field - STREET ADDRESS 1 (#1.3):

Description:

This is the first line of the street address of the permanent address of the person or institution associated with this DEA Number.

Help-Prompt:

Enter street address line 1 for the given person/institution. Answer must be 1-40 characters in length.

Field - STREET ADDRESS 2 (#1.4):  
Description:  
This is the second line of the street address of the permanent address of the person or institution associated with this DEA Number.  
Help-Prompt:  
Enter street address line 2 for the given person/institution. Answer must be 1-40 characters in length.

Field - TYPE (#.07):  
Description:  
This identifies whether the DEA number is an individual DEA number or an Institutional DEA number.  
Help-Prompt:  
Enter the usage type for the DEA. The DEA usage type may be 'Individual', or 'Institutional'.

Field - USE FOR INPATIENT ORDERS? (#.06):  
Description:  
This field indicates if this DEA number can be used for inpatient orders.  
Help-Prompt:  
Can this DEA be used for inpatient orders? Answer 'YES' or 'NO'.

Field - ZIP CODE (#1.7):  
Description:  
This is the postal ZIP code of the person or institution associated with this DEA Number.  
Help-Prompt:  
Enter the ZIP CODE or ZIP+4. Answer must be 5-9 characters in length.

HELP-PROMPT: missing.

FILE: DEA BUSINESS ACTIVITY CODES  
The DEA BUSINESS ACTIVITY CODES FILE is associated with the DEA numbers and provider information in the DEA NUMBERS file. This file links a

provider with the type of service provided. It contains BUSINESS ACTIVITY CODES that are supplied by the DOJ/DEA web service.

Field - BUSINESS ACTIVITY (#.02):

Description:

This field holds the Business Activity value used for DEA numbers. This value can currently be one of the following:

A,B,C,D,E,F,G,H,J,K,L,M,N,P,R,S,T or U

This value, combined with a numeric business sub-type, categorizes a DEA number.

Help-Prompt:

Enter the Business Activity value for used for DEA numbers. Answer must be 1-3 characters in length.

Field - BUSINESS ACTIVITY DESCRIPTION (#1):

Description:

This is the description given for the Business Activity Code and Sub-code.

Help-Prompt:

Enter the Business Activity description given for the Business Activity code and Business Activity Sub-code. Answer must be 3-60 characters in length.

Field - BUSINESS ACTIVITY SUB-CODE (#.03):

Description:

DEA uses an alpha character business activity code to identify various categories of registrants. For example business activity code "C" indicates a "Practitioner". DEA added a business activity sub-code field to identify new sub-categories of registrants.

For example business activity code "C" in combination with business activity sub-code "1" indicates a practitioner who has received a Drug Addiction Treatment Act (DATA) Waiver (DATA Waived or DW) to provide office based opioid treatment to 30 or 100 or 275 patients (DW/30, DW/100, DW/275). As new sub-categories of business activities become regulated, additional sub-code combinations (e.g. C-2, C-3, A-1, etc.) will be assigned. MLP = Mid-Level Practitioner. NG = National Guard

Help-Prompt:

Enter the business activity sub-code associated with the Business Activity Code. Answer must be 1-3 characters in length.

Field - FULL BUSINESS ACTIVITY CODE (#.01):

Description:

DEA uses an alpha character business activity code to identify various categories of registrants. For example business activity code "C" indicates a "Practitioner". DEA added a business activity sub-code field to identify new sub-categories of registrants.

For example business activity code "C" in combination with business activity sub-code "1" indicates a practitioner who has received a Drug Addiction Treatment Act (DATA) Waiver (DATA Waived or DW) to provide office based opioid treatment to 30 or 100 or 275 patients (DW/30, DW/100, DW/275). As new sub-categories of business activities become regulated, additional sub-code combinations (e.g. C-2, C-3, A-1, etc.) will be assigned. MLP = Mid-Level Practitioner. NG = National Guard.

Help-Prompt:

Enter the full business activity code. This is composed of the Business activity code and sub-code used for DEA numbers. Answer must be 2-4 characters in length.

Field - MANUAL ENTRY DATE/TIME (#2):

Description:

This field should only be populated when a new Business Activity Code (BAC) is entered manually due to the failure of the PSO DOJ/DEA WEB SERVICE to establish a connection to the DOJ web server.

Help-Prompt:

This is the date/time this Business Activity Code was manually entered.

FILE: DEA NUMBERS

The DEA NUMBERS FILE is designed to contain demographic and permission information about a provider related to the ability to order controlled substance prescriptions.

Field - ADDITIONAL COMPANY INFO (#1.2):

Description:

This is the additional company information of the person or institution associated with this DEA Number.

Help-Prompt:

Enter additional company info for the given person/institution. Answer must be 1-40 characters in length.

Field - BUSINESS ACTIVITY CODE (#.02):

Description:

This is the business activity code related to this DEA Number.

Help-Prompt:

Enter the Business Activity code given to this DEA Number.

Field - CITY (#1.5):

Description:

This is the city of the permanent address of the person or institution related to this DEA Number.

Help-Prompt:

Enter the city of the permanent address of the person or institution associated with this DEA Number. Answer must be 1-33 characters in length.

Field - DEA NUMBER (#.01):

Description:

This field is used to enter the providers' Drug Enforcement Administration (DEA) number. Enter the DEA number as two upper case letters followed by 7 digits. e.g., AA1234567.

Help-Prompt:

Enter the DEA number in the format of 2 letters followed by 7 numbers.

Field - DETOX NUMBER (#.03):

Description:

If the DEA provider has detox privileges, this field will be populated with a 'VX' or 'XA' followed by the numeric portion of the DEA number.

Help-Prompt:

Enter the detox number associated with this DEA Number. Answer must be 9 characters in length.

Field - EXPIRATION DATE (#.04):

Description:

This is the date of expiration for the DEA Number.

Help-Prompt:

Enter the date this DEA Number expires.

Field - LAST DOJ UPDATE DATE/TIME (#10.3):

Description:

This is the date/time the DOJ (Department of Justice) data was used to update this DEA record.

Help-Prompt:

Enter the date/time this DEA record was last updated by the DOJ source.

Field - LAST UPDATED BY (#10.1):

Description:

This is the person from the NEW PERSON file who last initiated an update to this DEA record.

Help-Prompt:

Enter the person who last updated this DEA record.

Field - LAST UPDATED DATE/TIME (#10.2):

Description:

This is the date/time of the last update to this DEA record.

Help-Prompt:

Enter the date/time this DEA record was last updated.

Field - NAME (PROVIDER OR INSTITUTION) (#1.1):

Description:

This is the name of the facility or person who is associated with this DEA Number.

Help-Prompt:

Enter the name associated with this DEA Number. Answer must be 1-40 characters in length.

Field - SCHEDULE II NARCOTIC (#2.1):

Description:

This field is used to determine if the provider has privileges for Schedule II drugs.

Help-Prompt:

DEA number allows for schedule II drugs?

Field - SCHEDULE II NON-NARCOTIC (#2.2):

Description:

This field is used to determine if the provider has privileges for Schedule II non-narcotic.

Help-Prompt:

Provider has privileges for schedule II non-narcotic?

Field - SCHEDULE III NARCOTIC (#2.3):

Description:

This field is used to determine if the provider has privileges for Schedule III narcotic.

Help-Prompt:

Provider has privileges for schedule III narcotic?

Field - SCHEDULE III NON-NARCOTIC (#2.4):

Description:

This field is used to determine if the provider has privileges for Schedule III non-narcotic.

Help-Prompt:

Provider has privileges for schedule III non-narcotic?

Field - SCHEDULE IV (#2.5):

Description:

This field is used to determine if the provider has privileges for Schedule IV controlled substances.

Help-Prompt:  
 Provider has privileges for schedule IV?

Field - SCHEDULE V (#2.6):  
 Description:  
 This field is used to determine if the provider has privileges for  
 Schedule V controlled substances.

Help-Prompt:  
 Provider has privileges for schedule V?

Field - STATE (#1.6):  
 Description:  
 This is the state of the permanent address of the person or institution  
 associated with this DEA Number.

Help-Prompt:  
 Enter the state of the permanent address associated with the person or  
 institution associated with this DEA Number.

Field - STREET ADDRESS 1 (#1.3):  
 Description:  
 This is the first line of the street address of the permanent address of  
 the person or institution associated with this DEA Number.

Help-Prompt:  
 Enter street address line 1 for the given person/institution. Answer must  
 be 1-40 characters in length.

Field - STREET ADDRESS 2 (#1.4):  
 Description:  
 This is the second line of the street address of the permanent address of  
 the person or institution associated with this DEA Number.

Help-Prompt:  
 Enter street address line 2 for the given person/institution. Answer must  
 be 1-40 characters in length.

Field - TYPE (#.07):  
 Description:  
 This identifies whether the DEA number is an individual DEA number or an  
 Institutional DEA number.

Help-Prompt:  
 Enter the usage type for the DEA. The DEA usage type may be 'Individual',  
 or 'Institutional'.

Field - USE FOR INPATIENT ORDERS? (#.06):  
 Description:  
 This field indicates if this DEA number can be used for inpatient orders.

Help-Prompt:  
 Can this DEA be used for inpatient orders? Answer 'YES' or 'NO'.

Field - ZIP CODE (#1.7):  
 Description:  
 This is the postal ZIP code of the person or institution associated with  
 this DEA Number.

Help-Prompt:  
 Enter the ZIP CODE or ZIP+4. Answer must be 5-9 characters in length.

## 2.2.4 Create the Report in .TXT Files Action

If you chooses the **Create the Report in .TXT Files** action in [Figure 2](#), the report content is sent to text (.txt) files.

### 2.2.4.1 Text File Directory Path

You are asked to either accept the default directory path to place the text files, or to choose a different directory path ([Figure 13](#)):

- To accept the default path, press **<Enter>** at the “Replace” prompt.
- To replace or modify the path, do the following at the “Replace” prompt:
  1. Type the part of the path to replace or type **three (3)** dots to replace the whole path.
  2. Press **<Enter>**.
  3. Type the replaced path changes.

**Figure 13: Sending Data to Text Files—Sample Dialog to Accept or Modify the .TXT Path Directory**

```
Set the path to place the .TXT files
or accept the standard default.

PATH: /srv/vista/ddv/user/hfs/  Replace
```

**REF:** Use Secure Shell (SSH) File Transfer Protocol (SFTP) to move text documents to your PC.

## 2.2.4.2 Text File Naming Formats

### 2.2.4.2.1 Build Analysis

The following is the Build Analysis text file name format:

*<Directory Path>/XPBA\_Anal\_<Build Name: Namespace-Version-Patch ID>\_<Date Build Analysis Run: MM-DD-YY>.TXT*

For example:

*/srv/vista/oak/user/hfs/XPBA\_Anal\_XU-8.0-688\_04-27-23.TXT*

Where:

- Directory Path: */srv/vista/ddv/user/hfs/*
- Build Name: **XU-8.0-688**
- Date: **04-27-23**

### 2.2.4.2.2 SQA Checklist Review

The following is the SQA Checklist Review text file name format:

*<Directory Path>/XPBA\_SQA\_<Build Name: Namespace-Version-Patch ID>\_<Date Build Analysis Run: MM-DD-YY>.TXT*

For example:

*/srv/vista/oak/user/hfs/XPBA\_SQA\_XU-8.0-688\_04-27-23.TXT*

Where:

- Directory Path: */srv/vista/ddv/user/hfs/*
- Build Name: **XU-8.0-688**
- Date: **04-27-23**

### 2.2.4.2.3 Description/Routine Text Review

The following is the Description/Routine Text Review text file name format:

*<Directory Path>/XPBA\_Spell\_<Build Name: Namespace-Version-Patch ID>\_<Date Build Analysis Run: MM-DD-YY>.TXT*

For example:

*/srv/vista/oak/user/hfs/XPBA\_Spell\_XU-8.0-688\_04-27-23.TXT*

Where:

- Directory Path: `/srv/vista/ddv/user/hfs/`
- Build Name: **XU-8.0-688**
- Date: **04-27-23**

### 2.2.4.3 No SQA Checklist Items, Component Descriptions, or Routine Text

[Figure 14](#) shows the results when answering **NO** to the following prompts in the **KIDS Build Analyzer** [XPDANLYZ] option and then selecting the **Create the Report in .TXT Files** action:

- “Do you want to include a section that displays the routine lines containing specific code references reviewed on the SQA checklist? NO//” **NO**
- “Do you want to include a section that displays the component descriptions and text found in routines? NO//” **NO**

In this example ([Figure 14](#)) and with these prompt settings, the **Create the Report in .TXT Files** action produces only **one** text file:

**XPBA\_Anal\_XU-8.0-688\_01-26-23.TXT**

Text for Review/Spell Check, Build XU*8.0*688; 4/27/23

Descriptions and other text associated with this build (for review and
spell check):

BUILD: XU*8.0*688
See FORUM Patch description.

FILE: NEW PERSON

SUBFILE 200.5321; FIELD: .01: DEA NUMBER
This field is used to enter the provider's Drug Enforcement Administration
(DEA) number(s). Enter the DEA number as two upper case letters followed
by 7 digits. e.g., AA1234567.
HELP-PROMPT:
Enter DEA number in the format 2 upper case letters followed by 7 numbers.
TECHNICAL DESCRIPTION:
This is the algorithm for the DEA number

FIELD: 53.2: DEA#
This field is used to enter the Drug Enforcement Agency (DEA) number.
Enter the DEA number as two upper case letters followed by 7 digits.
e.g., AA1234567.
HELP-PROMPT:
Enter the DEA number 2 letters 7 numbers.
TECHNICAL DESCRIPTION:
This is the algorithm for the DEA number
HELP-PROMPT: missing.

FILE: DEA BUSINESS ACTIVITY CODES
The DEA BUSINESS ACTIVITY CODES FILE is associated with the DEA numbers
and provider information in the DEA NUMBERS file. This file links a
provider with the type of service provided. It contains BUSINESS
ACTIVITY CODES that are supplied by the DOJ/DEA web service.

Field - BUSINESS ACTIVITY (#.02):
Description:
    This field holds the Business Activity value used for DEA numbers. This
```

value can currently be one of the following:

A,B,C,D,E,F,G,H,J,K,L,M,N,P,R,S,T or U

This value, combined with a numeric business sub-type, categorizes a DEA number.

Help-Prompt:

Enter the Business Activity value for used for DEA numbers. Answer must be 1-3 characters in length.

Field - BUSINESS ACTIVITY DESCRIPTION (#1):

Description:

This is the description given for the Business Activity Code and Sub-code.

Help-Prompt:

2023-04-27 14:51 /srv/vista/oak/user/hfs/XPBA\_Spell\_XU-8.0-688\_04-27-23.TXT Pag2

Enter the Business Activity description given for the Business Activity code and Business Activity Sub-code. Answer must be 3-60 characters in len.

Field - BUSINESS ACTIVITY SUB-CODE (#.03):

Description:

DEA uses an alpha character business activity code to identify various categories of registrants. For example business activity code "C" indicates a "Practitioner". DEA added a business activity sub-code field to identify new sub-categories of registrants. For example business activity code "C" in combination with business activity sub-code "1" indicates a practitioner who has received a Drug Addiction Treatment Act (DATA) Waiver (DATA Waived or DW) to provide office based opioid treatment to 30 or 100 or 275 patients (DW/30, DW/100, DW/275). As new sub-categories of business activities become regulated, additional sub-code combinations (e.g. C-2, C-3, A-1, etc.) will be assigned. MLP = Mid-Level Practitioner. NG = National Guard

Help-Prompt:

Enter the business activity sub-code associated with the Business Activity Code. Answer must be 1-3 characters in length.

Field - FULL BUSINESS ACTIVITY CODE (#.01):

Description:

DEA uses an alpha character business activity code to identify various categories of registrants. For example business activity code "C" indicates a "Practitioner". DEA added a business activity sub-code field to identify new sub-categories of registrants. For example business activity code "C" in combination with business activity sub-code "1" indicates a practitioner who has received a Drug Addiction Treatment Act (DATA) Waiver (DATA Waived or DW) to provide office based opioid treatment to 30 or 100 or 275 patients (DW/30, DW/100, DW/275). As new sub-categories of business activities become regulated, additional sub-code combinations (e.g. C-2, C-3, A-1, etc.) will be assigned. MLP = Mid-Level Practitioner. NG = National Guard.

Help-Prompt:

Enter the full business activity code. This is composed of the Business activity code and sub-code used for DEA numbers. Answer must be 2-4 charac.

Field - MANUAL ENTRY DATE/TIME (#2):

Description:

This field should only be populated when a new Business Activity Code (BAC) is entered manually due to the failure of the PSO DOJ/DEA WEB

SERVICE to establish a connection to the DOJ web server.

Help-Prompt:

This is the date/time this Business Activity Code was manually entered.

#### FILE: DEA NUMBERS

The DEA NUMBERS FILE is designed to contain demographic and permission information about a provider related to the ability to order controlled substance prescriptions.

Field - ADDITIONAL COMPANY INFO (#1.2):

Description:

This is the additional company information of the person or institution associated with this DEA Number.

2023-04-27 14:51 /srv/vista/oak/user/hfs/XPBA\_Spell\_XU-8.0-688\_04-27-23.TXT Pag3

Help-Prompt:

Enter additional company info for the given person/institution. Answer must be 1-40 characters in length.

Field - BUSINESS ACTIVITY CODE (#.02):

Description:

This is the business activity code related to this DEA Number.

Help-Prompt:

Enter the Business Activity code given to this DEA Number.

Field - CITY (#1.5):

Description:

This is the city of the permanent address of the person or institution related to this DEA Number.

Help-Prompt:

Enter the city of the permanent address of the person or institution associated with this DEA Number. Answer must be 1-33 characters in length.

Field - DEA NUMBER (#.01):

Description:

This field is used to enter the providers' Drug Enforcement Administration (DEA) number. Enter the DEA number as two upper case letters followed by 7 digits. e.g., AA1234567.

Help-Prompt:

Enter the DEA number in the format of 2 letters followed by 7 numbers.

Field - DETOX NUMBER (#.03):

Description:

If the DEA provider has detox privileges, this field will be populated with a 'VX' or 'XA' followed by the numeric portion of the DEA number.

Help-Prompt:

Enter the detox number associated with this DEA Number. Answer must be 9 characters in length.

Field - EXPIRATION DATE (#.04):

Description:

This is the date of expiration for the DEA Number.

Help-Prompt:

Enter the date this DEA Number expires.

Field - LAST DOJ UPDATE DATE/TIME (#10.3):

Description:

This is the date/time the DOJ (Department of Justice) data was used to update this DEA record.

Help-Prompt:

Enter the date/time this DEA record was last updated by the DOJ source.

Field - LAST UPDATED BY (#10.1):

Description:

This is the person from the NEW PERSON file who last initiated an update to this DEA record.

Help-Prompt:

Enter the person who last updated this DEA record.

Field - LAST UPDATED DATE/TIME (#10.2):

Description:

2023-04-27 14:51 /srv/vista/oak/user/hfs/XPBA\_Spell\_XU-8.0-688\_04-27-23.TXT Pag4

This is the date/time of the last update to this DEA record.

Help-Prompt:

Enter the date/time this DEA record was last updated.

Field - NAME (PROVIDER OR INSTITUTION) (#1.1):

Description:

This is the name of the facility or person who is associated with this DEA Number.

Help-Prompt:

Enter the name associated with this DEA Number. Answer must be 1-40 characters in length.

Field - SCHEDULE II NARCOTIC (#2.1):

Description:

This field is used to determine if the provider has privileges for Schedule II drugs.

Help-Prompt:

DEA number allows for schedule II drugs?

Field - SCHEDULE II NON-NARCOTIC (#2.2):

Description:

This field is used to determine if the provider has privileges for Schedule II non-narcotic.

Help-Prompt:

Provider has privileges for schedule II non-narcotic?

Field - SCHEDULE III NARCOTIC (#2.3):

Description:

This field is used to determine if the provider has privileges for Schedule III narcotic.

Help-Prompt:

Provider has privileges for schedule III narcotic?

Field - SCHEDULE III NON-NARCOTIC (#2.4):

Description:

This field is used to determine if the provider has privileges for Schedule III non-narcotic.

Help-Prompt:  
Provider has privileges for schedule III non-narcotic?

Field - SCHEDULE IV (#2.5):

Description:  
This field is used to determine if the provider has privileges for  
Schedule IV controlled substances.

Help-Prompt:  
Provider has privileges for schedule IV?

Field - SCHEDULE V (#2.6):

Description:  
This field is used to determine if the provider has privileges for  
Schedule V controlled substances.

Help-Prompt:  
Provider has privileges for schedule V?

Field - STATE (#1.6):

Description:

2023-04-27 14:51 /srv/vista/oak/user/hfs/XPBA\_Spell\_XU-8.0-688\_04-27-23.TXT Pag5

This is the state of the permanent address of the person or institution  
associated with this DEA Number.

Help-Prompt:  
Enter the state of the permanent address associated with the person or  
institution associated with this DEA Number.

Field - STREET ADDRESS 1 (#1.3):

Description:  
This is the first line of the street address of the permanent address of  
the person or institution associated with this DEA Number.

Help-Prompt:  
Enter street address line 1 for the given person/institution. Answer must  
be 1-40 characters in length.

Field - STREET ADDRESS 2 (#1.4):

Description:  
This is the second line of the street address of the permanent address of  
the person or institution associated with this DEA Number.

Help-Prompt:  
Enter street address line 2 for the given person/institution. Answer must  
be 1-40 characters in length.

Field - TYPE (#.07):

Description:  
This identifies whether the DEA number is an individual DEA number or an  
Institutional DEA number.

Help-Prompt:  
Enter the usage type for the DEA. The DEA usage type may be 'Individual',  
or 'Institutional'.

Field - USE FOR INPATIENT ORDERS? (#.06):

Description:  
This field indicates if this DEA number can be used for inpatient orders.

Help-Prompt:  
Can this DEA be used for inpatient orders? Answer 'YES' or 'NO'.

Field - ZIP CODE (#1.7):

Description:

This is the postal ZIP code of the person or institution associated with this DEA Number.

Help-Prompt:

Enter the ZIP CODE or ZIP+4. Answer must be 5-9 characters in length.

## 2.2.5 Send the Report in MailMan Messages Action

If choosing to email the build analysis data, you get a choice of to whom or to what mail groups the emails should be sent. If you optionally include SQA checklist items, component descriptions, and routine text you will get 1-3 messages, depending on the choices made in [Figure 2](#), and will be prompted for each one on where to send it.

### 2.2.5.1 No SQA Checklist Items, Component Descriptions, or Routine Text

[Figure 20](#) shows the results when answering **NO** to the following prompts in the **KIDS Build Analyzer** [XPDANLYZ] option and then selecting the **Send the Report in MailMan Messages** action:

- “Do you want to include a section that displays the routine lines containing specific code references reviewed on the SQA checklist? NO//” **NO**
- “Do you want to include a section that displays the component descriptions and text found in routines? NO//” **NO**

In this example ([Figure 20](#)) and with these prompt settings, the **Send the Report in MailMan Messages** action produces only **one** email message:

**Build Analysis - XU\*8.0\*688**

**Figure 20: Running the KIDS Build Analyzer Option: “Send the Report in MailMan Messages” Action: No SQA Checklist Items, Component Descriptions, or Routine Text—System Prompts and User Entries**

FIELD: 53.2: DEA#
This field is used to enter the Drug Enforcement Agency (DEA) number.
Enter the DEA number as two upper case letters followed by 7 digits.
e.g., AA1234567.
HELP-PROMPT:
Enter the DEA number 2 letters 7 numbers.
TECHNICAL DESCRIPTION:
This is the algorithm for the DEA number
HELP-PROMPT: missing.

FILE: DEA BUSINESS ACTIVITY CODES
The DEA BUSINESS ACTIVITY CODES FILE is associated with the DEA numbers
and provider information in the DEA NUMBERS file. This file links a
provider with the type of service provided. It contains BUSINESS
ACTIVITY CODES that are supplied by the DOJ/DEA web service.

Field - BUSINESS ACTIVITY (#.02):
Description:
    This field holds the Business Activity value used for DEA numbers. This
    value can currently be one of the following:
```

A,B,C,D,E,F,G,H,J,K,L,M,N,P,R,S,T or U

This value, combined with a numeric business sub-type, categorizes a DEA number.

Help-Prompt:

Enter the Business Activity value for used for DEA numbers. Answer must be 1-3 characters in length.

Field - BUSINESS ACTIVITY DESCRIPTION (#1):

Description:

This is the description given for the Business Activity Code and Sub-code.

Help-Prompt:

Enter the Business Activity description given for the Business Activity code and Business Activity Sub-code. Answer must be 3-60 characters in length.

Field - BUSINESS ACTIVITY SUB-CODE (#.03):

Description:

DEA uses an alpha character business activity code to identify various categories of registrants. For example business activity code "C" indicates a "Practitioner". DEA added a business activity sub-code field to identify new sub-categories of registrants.

For example business activity code "C" in combination with business activity sub-code "1" indicates a practitioner who has received a Drug Addiction Treatment Act (DATA) Waiver (DATA Waived or DW) to provide office based opioid treatment to 30 or 100 or 275 patients (DW/30, DW/100, DW/275). As new sub-categories of business activities become regulated, additional sub-code combinations (e.g. C-2, C-3, A-1, etc.) will be assigned. MLP = Mid-Level Practitioner. NG = National Guard

Help-Prompt:

Enter the business activity sub-code associated with the Business Activity Code. Answer must be 1-3 characters in length.

Field - FULL BUSINESS ACTIVITY CODE (#.01):

Description:

DEA uses an alpha character business activity code to identify various categories of registrants. For example business activity code "C" indicates a "Practitioner". DEA added a business activity sub-code field to identify new sub-categories of registrants.

For example business activity code "C" in combination with business activity sub-code "1" indicates a practitioner who has received a Drug Addiction Treatment Act (DATA) Waiver (DATA Waived or DW) to provide office based opioid treatment to 30 or 100 or 275 patients (DW/30, DW/100, DW/275). As new sub-categories of business activities become regulated, additional sub-code combinations (e.g. C-2, C-3, A-1, etc.) will be assigned. MLP = Mid-Level Practitioner. NG = National Guard.

Help-Prompt:

Enter the full business activity code. This is composed of the Business activity code and sub-code used for DEA numbers. Answer must be 2-4 characters in length.

Field - MANUAL ENTRY DATE/TIME (#2):

Description:

This field should only be populated when a new Business Activity Code (BAC) is entered manually due to the failure of the PSO DOJ/DEA WEB SERVICE to establish a connection to the DOJ web server.

Help-Prompt:

This is the date/time this Business Activity Code was manually entered.

## FILE: DEA NUMBERS

The DEA NUMBERS FILE is designed to contain demographic and permission information about a provider related to the ability to order controlled substance prescriptions.

### Field - ADDITIONAL COMPANY INFO (#1.2):

#### Description:

This is the additional company information of the person or institution associated with this DEA Number.

#### Help-Prompt:

Enter additional company info for the given person/institution. Answer must be 1-40 characters in length.

### Field - BUSINESS ACTIVITY CODE (#.02):

#### Description:

This is the business activity code related to this DEA Number.

#### Help-Prompt:

Enter the Business Activity code given to this DEA Number.

### Field - CITY (#1.5):

#### Description:

This is the city of the permanent address of the person or institution related to this DEA Number.

#### Help-Prompt:

Enter the city of the permanent address of the person or institution associated with this DEA Number. Answer must be 1-33 characters in length.

### Field - DEA NUMBER (#.01):

#### Description:

This field is used to enter the providers' Drug Enforcement Administration (DEA) number. Enter the DEA number as two upper case letters followed by 7 digits. e.g., AA1234567.

#### Help-Prompt:

Enter the DEA number in the format of 2 letters followed by 7 numbers.

### Field - DETOX NUMBER (#.03):

#### Description:

If the DEA provider has detox privileges, this field will be populated with a 'VX' or 'XA' followed by the numeric portion of the DEA number.

#### Help-Prompt:

Enter the detox number associated with this DEA Number. Answer must be 9 characters in length.

### Field - EXPIRATION DATE (#.04):

#### Description:

This is the date of expiration for the DEA Number.

#### Help-Prompt:

Enter the date this DEA Number expires.

### Field - LAST DOJ UPDATE DATE/TIME (#10.3):

#### Description:

This is the date/time the DOJ (Department of Justice) data was used to update this DEA record.

#### Help-Prompt:

Enter the date/time this DEA record was last updated by the DOJ source.

### Field - LAST UPDATED BY (#10.1):

#### Description:

This is the person from the NEW PERSON file who last initiated an update

to this DEA record.

Help-Prompt:  
Enter the person who last updated this DEA record.

Field - LAST UPDATED DATE/TIME (#10.2):  
Description:  
This is the date/time of the last update to this DEA record.

Help-Prompt:  
Enter the date/time this DEA record was last updated.

Field - NAME (PROVIDER OR INSTITUTION) (#1.1):  
Description:  
This is the name of the facility or person who is associated with this DEA Number.

Help-Prompt:  
Enter the name associated with this DEA Number. Answer must be 1-40 characters in length.

Field - SCHEDULE II NARCOTIC (#2.1):  
Description:  
This field is used to determine if the provider has privileges for Schedule II drugs.

Help-Prompt:  
DEA number allows for schedule II drugs?

Field - SCHEDULE II NON-NARCOTIC (#2.2):  
Description:  
This field is used to determine if the provider has privileges for Schedule II non-narcotic.

Help-Prompt:  
Provider has privileges for schedule II non-narcotic?

Field - SCHEDULE III NARCOTIC (#2.3):  
Description:  
This field is used to determine if the provider has privileges for Schedule III narcotic.

Help-Prompt:  
Provider has privileges for schedule III narcotic?

Field - SCHEDULE III NON-NARCOTIC (#2.4):  
Description:  
This field is used to determine if the provider has privileges for Schedule III non-narcotic.

Help-Prompt:  
Provider has privileges for schedule III non-narcotic?

Field - SCHEDULE IV (#2.5):  
Description:  
This field is used to determine if the provider has privileges for Schedule IV controlled substances.

Help-Prompt:  
Provider has privileges for schedule IV?

Field - SCHEDULE V (#2.6):  
Description:  
This field is used to determine if the provider has privileges for Schedule V controlled substances.

Help-Prompt:  
Provider has privileges for schedule V?

Field - STATE (#1.6):

Description:

This is the state of the permanent address of the person or institution associated with this DEA Number.

Help-Prompt:

Enter the state of the permanent address associated with the person or institution associated with this DEA Number.

Field - STREET ADDRESS 1 (#1.3):

Description:

This is the first line of the street address of the permanent address of the person or institution associated with this DEA Number.

Help-Prompt:

Enter street address line 1 for the given person/institution. Answer must be 1-40 characters in length.

Field - STREET ADDRESS 2 (#1.4):

Description:

This is the second line of the street address of the permanent address of the person or institution associated with this DEA Number.

Help-Prompt:

Enter street address line 2 for the given person/institution. Answer must be 1-40 characters in length.

Field - TYPE (#.07):

Description:

This identifies whether the DEA number is an individual DEA number or an Institutional DEA number.

Help-Prompt:

Enter the usage type for the DEA. The DEA usage type may be 'Individual', or 'Institutional'.

Field - USE FOR INPATIENT ORDERS? (#.06):

Description:

This field indicates if this DEA number can be used for inpatient orders.

Help-Prompt:

Can this DEA be used for inpatient orders? Answer 'YES' or 'NO'.

Field - ZIP CODE (#1.7):

Description:

This is the postal ZIP code of the person or institution associated with this DEA Number.

Help-Prompt:

Enter the ZIP CODE or ZIP+4. Answer must be 5-9 characters in length.

=====  
Text in ROUTINES between quotes and/or after ;;, by line number:

XUSER3

- 3: Per VA Directive 6402, this routine should not be modified.
- 10: Exceeds maximum length (9).
- 11: Less than minimum length (9).
- 12: Invalid format. Must be 2 upper case letters followed by 7 digits.
- 14: Provider DEA number is already associated to another profile. Please check the number entered.
- 15: DEA number is invalid. Please check the number entered.

```
16: DEA number doesn't match provider's last name. Please verify the
    information.
21: Type <Enter> to continue
27: Exceeds maximum length (9).
28: Less than minimum length (9).
29: Invalid format. Must be 2 upper case letters followed by 7 digits.
32: DEA number is invalid. Please check the number entered.
50: That Suffix is in use.
```

## 2.3 Delete Build Analyzer Text Files Option

Use the **Delete Build Analyzer Text Files** [XPDANLYZ\_DEL] option to delete any previously generated .txt files.

[Figure 27](#) demonstrates using the **Delete Build Analyzer Text Files** [XPDANLYZ\_DEL] option:

**Figure 27: Running the Delete Build Analyzer Text Files Option—System Prompts and User Entries**

```
Select Utilities <TEST ACCOUNT> Option: XPDANLYZ MAIN MENU <Enter> Build Analyzer Main
Menu

1      KIDS Build Analyzer
2      Delete Build Analyzer Text Files
3      KIDS Build Analyzer - Full SQA Search

Select Build Analyzer Main Menu <TEST ACCOUNT> Option: 2 <Enter> Delete Build Analyzer

Set the path to find the .TXT files
or accept the standard default.

PATH: /srv/vista/oak/user/hfs/ Replace <Enter>

Build Analyzer text files:

1. XPBA Anal DI-22.0-31_04-14-22.TXT
2. XPBA Anal XU-8.0-688_01-26-23.TXT
3. XPBA Anal XU-8.0-770_01-20-23.TXT

Delete all the files above? NO// <Enter>

Select number of file or files to delete: (1-3): 2
Deletions completed.
```

## 2.4 KIDS Build Analyzer - Full SQA Search Option

Use the **KIDS Build Analyzer - Full SQA Search** [XPDANLYZ\_SQA] option to check the build with a full SQA check for SQA checklist items and naked references. The SQA logic in the Build Analyzer software goes through the XPDARRR array ([Figure 28](#)), which is set in the XPDANYLZ2 routine, and checks for occurrences in the build routines.

Figure 28: SQA Logic—XPDARRR Array

```
SQA(RR) ;Sets SQA CL array XPDARRR
S XPDARRR ("////", RR, 0)=""
S XPDARRR ("DIC(0)", RR, 0)=""
S XPDARRR ("^UTILITY", RR, 0)=""
S XPDARRR ("^TMP", RR, 0)=""
S XPDARRR ("^XTMP", RR, 0)=""
S XPDARRR ("% ", RR, 0)=""
S XPDARRR ("$_I", RR, 0)=""
S XPDARRR ("U=", RR, 0)=""
S XPDARRR ("K ^", RR, 0)=""
S XPDARRR ("K:", RR, 0)=""
S XPDARRR ("K @", RR, 0)=""
S XPDARRR ("^( ", RR, 0)=""
S XPDARRR ("IO", RR, 0)=""
```

The **KIDS Build Analyzer - Full SQA Search** option goes through the contents of the build routines line-by-line and checks for the following code variables, globals, array references, commands, and other code statements:

- “////”
- “DIC(0)”
- “^UTILITY”
- “^TMP”
- “^XTMP”
- “% ”
- “\$\_I”
- “U=”
- “K ^”
- “K:”
- “K @”
- “^( ”
- “IO”
- **Naked References**—If found they appear in the SQA output section at the end of the report.

If there are any issues, as described in Section 3.9, “[SQA Check—Full Lines](#),” the Build Analyzer tool builds the **XPDSQA** array, which is set in the **XPDANYLZ2** routine and contains the errors found in the build ([Figure 29](#)).

**Figure 29: Sample XPDSQA Array with Errors Found in a Build**

```
XPDSQA("XUSER3","IO",10,"VALN1DEA +4")=" I $D(X) I $L(X)>9 K X D EN^DDIOL($C(7)_
"Exceeds maximum length (9).)"

Warning: Build not set to track package nationally Please validate that is correct.		
Warning: The PACKAGE FILE LINK is missing. This should be defined for a national VISTA product build.		
-----		
*** Detailed results for components included in build ZZDAVE*1.0*2 ***		
-----		
ROUTINES		
Routines can be analyzed using ^XINDEX. This section displays first two lines of routines so they can be validated. The third line will be included if it begins with a ";" It also lists the date ^XINDEX was last run.		
Routine information:		
ZZDSTEST ; K ^SRF K ^SRF(0) K ^SRAFY(139.9) K ^SRAFY(139.9,0)		
* ZZDSTEST is not in the Package namespace.		
* Date ^XINDEX last run was not found.		
* Missing current patch number on second line.		

<><><>

```
=====
This build may include references to components (i.e. Routines,
Globals, etc.) outside the build namespace. Review and validate
that all appropriate Integration Control Registrations (ICRs)
exist for each external reference.
=====
```

These ^TMP calls have kill statements within the included routines:

```
^TMP (XXX,$J
      ZZDSTEST      ZZDSTEST +4
```

All ^TMP calls have at least one kill statement in this build's routines.

ALL ^XTMP calls have zero nodes defined in this build's routines

ZZDSTEST

```

ROUTINES		
Routines can be analyzed using ^XINDEX. This section displays		
first two lines of routines so they can be validated.		

The third line will be included if it begins with a ";"  
It also lists the date ^XINDEX was last run.

Routine information:

```
XPDANLYZ1 ;OAK/RSF- BUILD ANALYZER ;10/28/22
;;8.0;KERNEL;**782**;Jul 10, 1995;Build 4
;;Per VHA Directive 2004-038, this routine should not be modified.
```

\* Date ^XINDEX last run was not found.

<><><>

```
XPDANLYZ2 ;OAK/RSF- BUILD ANALYZER ;10/28/22
;;8.0;KERNEL;**782**;Jul 10, 1995;Build 4
;;Per VHA Directive 2004-038, this routine should not be modified.
```

\* Date ^XINDEX last run was not found.

<><><>

```
XPDANLYZ3 ;OAK/RSF- BUILD ANALYZER ;10/28/22
;;8.0;KERNEL;**782**;Jul 10, 1995;Build 4
;;Per VHA Directive 2004-038, this routine should not be modified.
```

\* Date ^XINDEX last run was not found.

### 3.2 General Build Checks

If the patch is sending components that are set to **DELETE AT SITE**, the Build Analyzer lists them here ([Figure 37](#)):

If the patch is *not* set to track nationally, you get the warning shown in [Figure 38](#):

If a build does *not* have a PACKAGE LINE, you get the warning shown in [Figure 39](#):

If patch contain an environment check routine and it is *not* set as **DELETE AT SITE**, the Build Analyzer displays the warning shown in [Figure 40](#):

If the patch contain a POST-INSTALL routine and it is *not* set as **DELETE AT SITE**, the Build Analyzer displays the warning shown in [Figure 41](#):

If the patch contain a PRE-INSTALL routine and it is *not* set as **DELETE AT SITE**, the Build Analyzer displays the warning shown in [Figure 42](#):

**Figure 42: Sample Warning Message—Patch Contain a Pre-Install Routine and it is Not Set as DELETE AT SITE**

```
Warning:  PRE-INSTALL routine is NOT set to DELETE AT SITE.
```

### 3.3 Build Component Analysis

The VistA Build Analyzer utility report displays analysis of each component included in the build, as shown in [Figure 43](#):

**Figure 43: Sample Report Displaying Build Component Analysis**

```

```

- \* DGPFHLU is not in the Package namespace.
- \* Date of Last ^XINDEX: APR 09, 2021
- \* Missing current patch number on second line.
- \* The SQA Checklist identifies the following specific code references to check in this routine:
  - No specific code references from the SQA Checklist were found.

<><><>

[display cut here]

If the user included descriptions of the components/routine text (to have in one place so that they can copy/paste them into a spellcheck program), the output will look like the example in [Figure 45](#):

**Figure 45: Sample Output Showing the Build Components and Routine Descriptions**

Descriptions associated with this build:

BUILD: SR\*3.0\*200 (#11341)

This enhancement to the VISTA Surgery package includes a new field ROBOTIC ASSISTANCE (Y/N) for tracking whether robotic assistance was used when completing a surgery procedure. The new field is included on the Operation, Operation Short Screen, and Nurse Intraoperative Report options within the Operation Menu and is required to be entered prior to signing the Nurse Intraoperative Report. The field is also included on Non-Cardiac and Cardiac Risk Assessment data entry options. This indicator is transmitted to VASQIP for all cases. A new field, ROBOTIC DEFAULT (#12) has been added to the LOCAL SURGICAL SPECIALTY file (137.45). If defined for a local specialty, the software will automatically enter NO in the ROBOTIC ASSISTANCE (Y/N) field when a surgery case is created for the selected specialty.

Update to transmission code to restrict date/time field 613 to 12 characters.

FILE: SURGERY (#130)

FIELD: .04: SURGERY SPECIALTY

Definition Revised (2007):

This is the surgical specialty credited for doing this operative procedure. Many reports, including the Annual Report of Surgical Procedures, are sorted by the surgical specialty. This field should be entered prior to completion of this case. (If you enter '?' in the surgical package, it will display the entire local surgical specialty list and a copy of the national list can be found in the Operations Manual.)

HELP-PROMPT:

Enter the assigned surgical specialty, or section, of the surgeon.

FIELD: 2006: ROBOTIC ASSISTANCE (Y/N)

This field indicates whether robotic assistance was used for any portion of the procedure. It must be entered prior to signing the Nurse Intraoperative Report. Enter YES if robotic assistance was used during the procedure. Otherwise, enter NO.

HELP-PROMPT:

Enter YES if robotic assistance was used for any part of the procedure.

FILE: LOCAL SURGICAL SPECIALTY (#137.45)

FIELD: 12: ROBOTIC DEFAULT

Setting this field to NO - ROBOTICS NOT USED will cause the software to automatically set the ROBOTIC ASSISTANCE (Y/N) field to NO when a surgical case is created and this specialty is selected. The value of the ROBOTIC ASSISTANCE (Y/N) for the case can still be modified for the case later.

Leave this field blank if the specialty uses robotics for any procedures.

HELP-PROMPT:

Enter NO to automatically set the ROBOTIC ASSISTANCE (Y/N) field to NO when cases are created for this specialty.

\*\* Analysis Complete \*\*

## 3.4 Description of Build

This section parses the build from the BUILD (#9.6) file into its included components among the list of all potential components for a build, such as [Figure 46](#):

**Figure 46: Sample List of Build Components**

DIALOG	Not Included
ENTITY	Not Included
FILES	Included

The VistA Build Analyzer utility does the following:

- Checks if the “Track Package Nationally” is *not* set to **YES**.
- Looks for a PACKAGE LINK.
- Looks for Environmental, Pre-Install, and Post-Install routines and warns if not set to **DELETE AT SITE**.
- Checks for and lists any components designated **DELETE AT SITE** for reviewer to be able to confirm.

## 3.5 Individual Components

The VistA Build Analyzer utility checks component and routine names to determine if the package is in the correct namespace. It does this by potentially checking against an array of acceptable namespaces derived from the first part of the build name, and, if found, any ADDITIONAL PREFIXES (#14) Multiple field from the PACKAGE (#9.4) file. If there are excluded name spaces (#919) listed in the PACKAGE (#9.4) file, it checks the namespace of the component/routine against those as well.

This section looks for certain aspects of the included components and notes if something does *not* seem to be in order. Files and Routines are handled differently from the other components.

### 3.5.1 Files

For files, the VistA Build Analyzer utility display differs depending on if the build includes the full Data Dictionary (DD) or a partial DD of the file.

- **Full DD** with *new* file, it checks the following:
  - File name is in uppercase.
  - If the new file uses the ^DIC global.
  - If tracked nationally, checks if the ^DIZ global is used.
  - For a file description, notes if it is minimal or missing.
- **Full DD** with *existing* file, it checks each field and subfield for the following:
  - Name is in uppercase.
  - Description is present.
  - Help-Prompt is present. If present, it also checks if the Help-Prompt and Description are the same.

- **Partial DD** with *existing* file, it only checks the specific fields being sent for the following:
  - Name is in uppercase.
  - Description is present.
  - Help-Prompt is present. If present, it also checks if the Help-Prompt and Description are the same.

For partial DDs, It does *not* check the attributes at the file level (e.g., file description or name), or other fields.

### 3.5.2 Routines

For routines included in the build, the VistA Build Analyzer utility prints out the first **two** lines of each routine allowing the user to easily confirm that they are set correctly. It includes the **third** line if it starts with a “;”.

The Build Analyzer also checks for the following:

- Current patch number is the last patch listed on the second line of the routine (between the set of double asterisks).
- Date of the last XINDEX. The last XINDEX date is only populated if the question in [Figure 47](#) was answered **YES** when XINDEX was performed:

**Figure 47: XINDEX Question—Answering YES Adds a Date for the Last XINDEX**

```
Save parameters in ROUTINE file? NO//
```

When the user enters **YES** at this prompt, the last XINDEX date run gets stored with that Build, so the VistA Build Analyzer utility can check for this date.

- Reviews the BUILD (#9.6) file and looks for this routine to make sure all patch numbers are current on the second line.
- If the routine appears to be in the same namespace and if the routine name is uppercase.

The example in [Figure 48](#) shows some of the routine-related issues found by the VistA Build Analyzer utility:

**Figure 48: Sample Build Routine Output**

```
SRZZUTL ;BIR/ADM,SBW - UTILITY ROUTINE ;10/21/2019
;;3.0;SURGERY RISK ASSESSMENT;;23 Sep 91

* SRZZUTL is not in the Package namespace.
* Missing current patch number on second line.
* Date ^XINDEX last run was not found.
* BUILD file also lists this routine in these patches:
  SRA*3.0*1
```

```
XUSER3      ;ISF/RWF - New Person File Utilities History ;08/11/08  14:18
            ;;8.0;KERNEL;**492,500**;Jul 10, 1995
            ;Per VHA Directive 2004-038, this routine should not be modified.
```

The Build Analyzer then checks each line of the routine for existence of questionable\* code snippets; if found, it indicates the line number(s).

\*These are *not* contraindicated for use, but SQA checks **how** they are used.

The following lists the code that the SQA checklist indicates to check, and what the VistA Build Analyzer utility looks for in a build:

- `////`
- `DIC(0)`
- `^UTILITY`
- `^TMP`
- `^XTMP`
- `%`
- `$I`
- `U=`
- `K ^`
- `^(`
- `K:`
- `K @`
- `IO`

The VistA Build Analyzer utility shows line numbers for each of those codes.

It also checks for variations of the **KILL** statement in the search:

- Conditional **KILL (K:)**.
- **KILL** with indirection (**K @**).
- Added **KILL**: For the added **KILL** statements, the Build Analyzer checks if **KILLs** go to a caret (^) or an at-sign (@). For example, these would be flagged:

**Figure 49: Sample Variations of KILL Statements**

```
D UTIL K:SRK ^SRF("APCE",SRTN) I 'SRK D PCE
K:N'="KEY"&(N'="OPT") @ (DIC_ "+Y")
```

### 3.5.3 Examples

Figure 50: Two Examples of Routine Output

```

references to check in this routine:
- No specific code references from the SQA Checklist were found.
```

## 3.6 All Components

The following components are checked by the VistA Build Analyzer utility:

- APPLICATION ACTION (#1.61)
- BULLETIN (#3.6)
- DIALOG (#.84)
- ENTITY (#1.5)
- FORM (#.403)
- FUNCTION (#.5)
- HELP FRAME (#9.2)
- HL7 APPLICATION PARAMETER (#771)
- HLO APPLICATION REGISTRY (#779.2)
- HL LOGICAL LINK (#870)
- INPUT TEMPLATE (#.402)
- LIST TEMPLATE (#409.61)
- MAIL GROUP (#3.8)
- OPTION (#19)
- PARAMETER DEFINITION (#8989.51)
- PARAMETER TEMPLATE (#8989.52)

- POLICY (#1.6)
- POLICY FUNCTION (#1.62)
- PRINT TEMPLATE (#.4)
- PROTOCOL (#101)
- REMOTE PROCEDURE (#8994)
- ROUTINE (#9.8)
- SECURITY KEY (#19.1)
- SORT TEMPLATE (#.401)
- XULM LOCK DICTIONARY (#8993)

All component checks include:

- Validates that the Name is uppercase.
- Validates that the Name is in the same namespace.
- Validates the component has a Description.

## 3.7 Specific Components

Specific Components have the same checks as indicated in the “[All Components](#)” section, plus component-specific checks:

### 3.7.1 Options

From the OPTIONS (#19) file, the VistA Build Analyzer utility checks for the following:

- Validates that the MENU TEXT (#1) field is defined.
- Validates that the PACKAGE (#12) field is defined.
- Checks to determine whether routines referenced in the following fields are included in the build/namespace:
  - ROUTINE (#25)
  - ENTRY ACTION (#20)
  - EXIT ACTION (#15)

### 3.7.2 Remote Procedures

From the REMOTE PROCEDURE (#8994) file, the VistA Build Analyzer utility checks for the following:

- If the RETURN VALUE TYPE (#.04) field exists, it checks for data in the RETURN PARAMETER DESCRIPTION (#3).
- If it has input variables, it validates that a description exists for each input variable.
- Check if routine it calls is included in the build/namespace.

### 3.7.3 Bulletin

From the BULLETIN (#3.6) file, the VistA Build Analyzer utility checks for the following:

Validates that the MAIL GROUP (#4) field is listed.

### 3.7.4 Dialog

From the DIALOG (#.84) file, the VistA Build Analyzer utility checks for the following:

If it calls a routine, it checks if the ROUTINE NAME (#8,.01) field is in the build/namespace.

## 3.8 Issues

Issues for each component are noted in the Build Analyzer output, as shown in [Figure 51](#):

**Figure 51: Sample Output from the Build Analyzer for Each Component**

```

  * ROUTINE NAME (subfield #.01) within the CALLED FROM ENTRY POINTS sub-file
    (#8) calls DIR3 not found in build.
  * ROUTINE NAME (subfield #.01) within the CALLED FROM ENTRY POINTS sub-file
    (#8) calls DIR3 not in the patch namespace.
OPTION:
  A1AX EDIT PARAMETER FILE
  * The OPTION name might be incorrectly namespaced
  * PACKAGE field (#12) missing.
  * ENTRY ACTION field (#20): Calls routine DIC not in build or namespace.
  *                               Calls routine DIE not in build or namespace.
  * ENTRY ACTION field (#20): Calls file: EXT REV REGION PARAMETER.
```

If a component passes all these checks, the Build Analyzer report displays “No issues noted”, as shown in [Figure 52](#):

**Figure 52: Sample Report Output with No Issues Found**

```
ZZSRA VISA RN LIST
  No issues noted
```

## 3.9 SQA Check—Full Lines

You can choose to do a full SQA check when you answer **YES** at the prompt shown in [Figure 53](#):

**Figure 53: Performing a Full SQA Check—System Prompts and User Entries**

Do you want to include a section that displays the routine lines containing specific code references reviewed on the SQA checklist? NO// **YES**

If you answer **YES** at the prompt shown in [Figure 53](#), SQA checklist items will be included in the screen display output, as an additional text file, or a mail message that lists the line content, by line tag, of lines with SQA checklist items. The VistA Build Analyzer utility attempts to reduce the number of these lines by removing clearly inconsequential entries; hoping to better target the response to what is concerning. This is a growing field, but currently this is what is screened out:

- If line has multiple uses of the text in question, if one is *not* excluded, the whole line is shown, not just the questionable code usage.
- **K ^**

It will show if:

- There are references, such as: **K ^SRF**, **K ^SRF(0)**, **K ^SRAFY(139.9)**, or **K ^SRAFY(139.9,0)**.
- There is an indirection **KILL**, such as: **K ^@KILLME**.

It will *not* show if:

- First piece in parentheses is *not* a number (e.g., **^SRF(SRIEN)**).
- **TMP**, **UTILITY (K ^TMP(XXX,\$J))**, or **K ^UTILITY("SOMETHING")**.
- Naked reference (shows in the “^” section).

Added a conditional **KILL** check (**K:**) that shows if the first section after the conditional meets the prior requirements.

### 3.9.1 ^TMP

**^TMP** does *not* show if:

- First piece in the parenthesis is a **\$J**.
- If *not* **\$J**, it does *not* show if the first piece is NAMESPACED and the second piece is **\$J**.

Also, at the beginning of the “SQA” section it lists the locations of **^TMP KILL** statements and **^TMPs** used that do *not* have a **KILL** in the included build routines.

These ^TMP calls have **KILL** statements within the included routines:

**Figure 54: Sample ^TMP Calls with an Associated KILL Statement**

```
ZZSRAT2 PTEST +16      K ^TMP("SRATEST"),SRA
ZZSRAT2 TCAS +1        K ^TMP("SRATEST")
SRZZUTL ZDNLDED +11    K ^TMP("SRLIST",$J)
SRZZUTL DNLDED +14     S SRTOT=0 K ^TMP("SRLIST",$J)
SRZZUTL DNLDED +24     K ^TMP("SRLIST",$J)
SRZZUTL DNLDED2 +5     S SRTOT=0 K ^TMP("SRLIST",$J)
```

These ^TMP calls have no associated **KILL** in this build's included routines:

**Figure 55: Sample ^TMP Calls with No Associated KILL Statement**

```
ZSROPCE NITE +4        S SRS="SURGERY DATA",SRFILE=0,^TMP("SRPXAPI",$J)=""
```

### 3.9.2 ^XTMP

Currently, *not* restricting **XTMP**, but it looks for any ^XTMP **zero** nodes in the included routines, and in addition to the line tags, lists which ones it found and which it did *not*, such as [Figure 56](#):

**Figure 56: Sample ^XTMP Report Output**

```
General ^XTMP Notes
These ^XTMP calls have zero nodes defined in this build's included routines:
  Routine: ZZSRAT2      ^XTMP("SSNINQ",$J,0)=SRNOW_"^"_SRNOW_"^SSN CHECK"

These XTMP calls have no zero nodes defined in this build's included routines
  Routine: ZZSRAT2      ^XTMP("SRPARSE"
```

### 3.9.3 U=

U= does *not* show a line if:

- U="^".
- If part of another variable, such as SRAU=.

### 3.9.4 %

% does *not* show a line if:

- Variable = "%" or % (standalone %, with or without quotes)
- %=something
- % is part of a quote, such as "rejected by 10% rule"
- If %XXX is part of a **DO**, **IF**, **eXecute** statement

- **%DT.**
- **%DTC**
- **%RCR**
- **%ZIS**
- **%ZTLOAD**
- **%ZOSF**

**%** shows if:

- If **%XXX** is part of a **SET**, **NEW**, or **KILL** statement.
- If *not* skipped due to the above exclusions.

### 3.9.5 \$I

**\$I** does *not* show a line if:

Part of longer code, such as **\$\$ICDX=** or **\$ISD**

### 3.9.6 IO

**IO** does *not* show a line if:

- **IO\*** (\* = a letter), such as: “**IOF**”
- **\*IO** (\* = a letter), such as “**S SRIO=**”
- **U IO**
- **I IO**

**IO** shows if:

- **K IO**
- **S IO**
- **N IO**
- **G IO**

### 3.9.7 DIC(0)

**DIC(0)** does *not* show a line if:

- It also has a **FILE^DICN** call with **two KILL DOs** found on the line.
- If there is no **FILE^DICN** call, it checks for **DIC(0)** containing an **L** parameter. If so, it *must* have a **DLAYGO** defined.
- No **FILE^DICN** call and **DIC(0)** does *not* contain “**L**”.

DIC(0) shows if:

- If FILE^DICN but cannot find the **K DO** statements on the same line.
- No FILE^DICN, **DIC(0)** contains an **L**, but no **DLAYGO** defined.

## 3.10 Text Check

### 3.10.1 Component Descriptions/Text

If a user chooses to show descriptions/text, they appear following the “Detailed Build Analysis” section when displayed to the screen, or in a separate email or text file. The descriptions can be reviewed, and the text copied and pasted into a spellcheck document. If displayed to the screen, it is easy to capture the information by setting it up to log the display. The display shows the component description or notes if it is missing. If a partial DD file is included, it includes, if present, the field description, help-prompt ,and Tech description for the spellcheck ([Figure 57](#)).

**Figure 57: Sample Partial DD Output**

```
FILE: SURGERY (#130)

FIELD: .04: SURGERY SPECIALTY
Definition Revised (2007):
This is the surgical specialty credited for doing this operative
procedure. Many reports, including the Annual Report of Surgical
Procedures, are sorted by the surgical specialty. This field should be
entered prior to completion of this case. (If you enter '?' in the
surgical package, it will display the entire local surgical specialty
list and a copy of the national list can be found in the Operations
Manual.)
HELP-PROMPT:
Enter the assigned surgical specialty, or section, of the surgeon.
```

Other examples in description section ([Figure 58](#)):

**Figure 58: Sample Description Output**

```
FILE: EXT REV REGION PARAMETER
No description.

MAIL GROUP: SRA OIT SUPPORT
This mailgroup receives SURGERY RISK ASSESSMENT transmission messages from
the medical centers.
```

### 3.10.2 M Routines

This section displays text that is presented to users in a **WRITE** statement or a **\$text (“;;”)** from routines included in the build.

Text displayed meets the following requirements:

- Text between quotes or following a “;;” (does *not* include the second line of the routine).
- Text between quotes contains at least three consecutive letters.
- Text after “;;” of at least **three characters**.
- Routine line does *not* begin with a semicolon.

Text that meets these requirements is excluded if:

- If has **15** or more characters *without* a space.
- If a section has no space and letters that make up less than half of the characters.
- If no space and ends in a “(”.
- If the quoted text follows:
  - **DIC=**
  - **DIC(0)=**
  - **DR=**
  - **DIE=**
  - **DIC("S")=**
  - **\$J,**
  - “(”. For example: **^XTMP(“SRAM”** would be skipped. Or, if “**\$J**” follows quoted text

The information is displayed for each routine and identifies the line number where found ([Figure 59](#)):

**Figure 59: Sample Routine with Line Number Output**

```
SRONIN
14: Nurse Intraoperative Report
15: TIU
21: TIU
23: PRNT^SRONIN
