

# CLINICAL VIEWER

The new way HealthShare Referral Manager (HSRM) is making information sharing easy and convenient

Clinical Viewer is a module available within HSRM that allows VA staff and community providers to access a clinical summary of each Veteran's history, including details such as:

- diagnoses
- prior medical procedures
- medications
- lab results
- immunizations
- allergies

**Community providers' insight into Veteran medical history is more robust than ever before!**

These details will be automatically synced to any HSRM referral a Veteran has, so information is readily available for viewing

The screenshot shows the Clinical Viewer interface with the following sections:

- Chartbook:** Clinical Summary, Conditions, Allergies, Medications, Documents, Immunizations, Vital Signs, Lab Results, Diagnostic Studies, Procedures, Histories, Encounters, Appointments, Care Team, Cohorts, Claims, Demographics, Insurance.
- Diagnoses:** Table with columns: Diagnosis, Type, Last Updated.
 

Diagnosis	Type	Last Updated
PROPHY VACC. STREP PNEU	PRIMARY	01/20/2012 09:15
