

CLINICAL VIEWER

The new way HealthShare Referral Manager (HSRM) is making information sharing easy and convenient

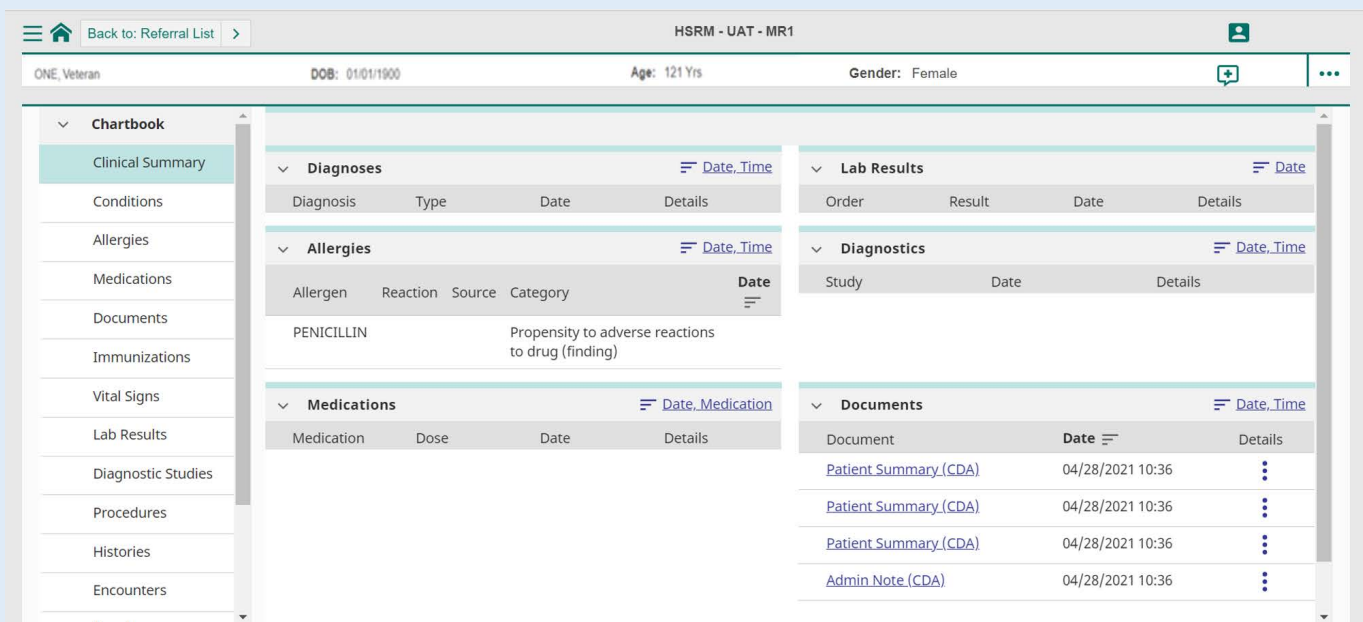

Clinical Viewer is a module available within HSRM that allows VA staff and community providers to access a clinical summary of each Veteran's history, including details such as:

- diagnoses
- prior medical procedures
- medications
- lab results
- immunizations
- allergies

Community providers' insight into Veteran medical history is more robust than ever before!

These details will be automatically synced to any HSRM referral a Veteran has, so information is readily available for viewing

The screenshot displays the Clinical Viewer interface for a patient named ONE, Veteran, with a date of birth of 01/01/1900, age of 121 years, and gender of Female. The interface is titled "HSRM - UAT - MR1" and includes a "Back to: Referral List" link. The main content area is organized into several sections:

- Diagnoses:** A table with columns for Diagnosis, Type, Date, and Details.
- Allergies:** A table with columns for Allergen, Reaction, Source, Category, and Date. One entry is listed: PENICILLIN with a reaction of "Propensity to adverse reactions to drug (finding)".
- Medications:** A table with columns for Medication, Dose, Date, and Details.
- Lab Results:** A table with columns for Order, Result, Date, and Details.
- Diagnostics:** A table with columns for Study, Date, and Details.
- Documents:** A table with columns for Document, Date, and Details. It lists four documents: three "Patient Summary (CDA)" and one "Admin Note (CDA)", all dated 04/28/2021 10:36.
