Prosthodontics Residency Program at New York
Program Director (as of 9/1/2016): Dr. Frank J. Tuminelli

The Post Graduate Program at the Manhattan VA campus is fully accredited by CODA. The program duration is 36 months and stipend based. The program provides an education in the full scope of fixed and removable prosthodontics with strong clinical experience in all phases of treatment. The full scope of implant treatment planning, restoration and defined surgical exposure is integrated throughout the three-year curriculum. Treatment is provided to a most deserving Veteran population of the United States.

The facility has a state of the art laboratory that enables the prosthodontic resident to have a comprehensive understanding of the fabrication of most prostheses. Didactic education is provided by the director, attending staff and course attendance at NYU School of Dentistry. Graduates of the program are prepared to challenge the American Board of Prosthodontics (ABP) examination.

The application deadline for this program is September 1, 2016. Please contact Dr. Gayle Miranda (Gayle.Miranda@va.gov).
