<td>The Decision Support System (DSS) is the designated Managerial Cost Accounting (MCA) System of the Department of Veterans Affairs. This system is the VA's only means of complying with Public Laws (e.g., PL 101-576 – the Chief Financial Officers Act of 1990) that mandates that all Cabinet-level Departments use of a MCA system that can assign costs to the product level. Prior to FY 2008, DSS served as the MCA system of the Veterans Health Administration exclusively. In October 2006, the VA Assistant Secretary for Management mandated that DSS be adapted for use as the Department's single MCA system. MCA operations at the Department of Veterans Affairs level began on October 1, 2007. There were no software or hardware modifications required to adapt DSS for use as the Department's single MCA system and no IT funding were expended. DSS cost data is used at all levels of the VA for important functions, such as cost recovery (billing), budgeting and resource allocation. Additionally, the system contains a rich repository of clinical information which is used to promote a more proactive approach to the care of high risk (i.e., diabetes and acute coronary patients) and high cost patients. The data in DSS is also used to calculate and measure the productivity of physicians and other care providers.</td>

I.B.1) FILL IN TABLE IN CURRENT VALUES (in millions)

(Provides the total estimated life-cycle cost for this investment by completing the following table. All amounts represent budget authority in millions, and are rounded to three decimal places. Federal personnel costs should be included only in the row designated “Government FTE Cost,” and should be EXCLUDED from the amounts shown for “Planning,” “Full Acquisition,” and “Operation/Maintenance.” The total estimated annual cost of the investment is the sum of costs for “Planning,” “Full Acquisition,” and “Operation/Maintenance.” For Federal buildings and facilities, life-cycle costs should include long term energy, environmental, decommissioning, and/or restoration costs. The costs associated with the entire life-cycle of the investment should be included in this report.)

**Section D: Performance Information (All Capital Assets)**

In order to successfully address this area of the exhibit 300, performance goals must be provided for the agency and be linked to the annual performance plan. The investment must discuss the agency’s mission and strategic goals, and performance measures (indicators) must be provided. These goals need to map to the gap in the agency’s strategic goals and objectives this investment is designed to fill. They are the internal and external performance benefits this investment is expected to deliver to the agency (e.g., improve efficiency by 60 percent, increase citizen participation by 300 percent a year to achieve an overall citizen participation rate of 75 percent by FY 2xxx, etc.). The goals must be clearly measurable investment outcomes, and if applicable, investment outputs. They do not include the completion date of the module, milestones, or investment, or general goals, such as, significant, better, improved that do not have a quantitative measure.

Agencies must use the following table to report performance goals and measures for the major investment and use the Federal Enterprise Architecture (FEA) Performance Reference Model (PRM). Map all Measurement Indicators to the corresponding “Measurement Area” and “Measurement Grouping” identified in the PRM. There should be at least one Measurement Indicator for each of the four different Measurement Areas (for each fiscal year). The PRM is available at www.egov.gov. The table can be extended to include performance measures for years beyond the next President’s Budget.

PART I: SUMMARY INFORMATION AND JUSTIFICATION

In Part I, complete Sections A, B, C, and D for all capital assets (IT and non-IT). Complete Sections E and F for IT capital assets.

OMB Text Limitations - SHORT ANSWER(250 Characters), MEDIUM ANSWER(500 Characters) and LONG ANSWER(2500 Characters)

Section F: Enterprise Architecture (EA) (IT Capital Assets only)

In order to successfully address this area of the business case and capital asset plan you must ensure the investment is included in the agency’s EA and Capital Planning and Investment Control (CPIC) process, and is mapped to and supports the FEA. You must also ensure the business case demonstrates the relationship between the investment and the business, performance, data, services, application, and technology layers of the agency’s EA.

I.F.1) Is this investment included in your agency’s target enterprise architecture?
No

I.F.1.a) If “no,” please explain why? (LONG ANSWER)
This is a steady state maintenance project under operation and maintenance.

I.F.2) Is this investment included in the agency’s EA Transition Strategy?
No

I.F.2.a) If “yes,” provide the investment name as identified in the Transition Strategy provided in the agency’s most recent annual EA Assessment. (MEDIUM ANSWER)

I.F.2.b) If “no,” please explain why? (LONG ANSWER)
This is a steady state maintenance project under operation and maintenance.

I.F.3) Is this investment identified in a completed (contains a target architecture) and approved segment architecture?
Yes

I.F.3a) If “yes,” provide the six digit code corresponding to the agency segment architecture. The segment architecture codes are maintained by the agency Chief Architect.
500-000

NOTE:

(a*) - Use existing SRM Components or identify as “NEW”. A “NEW” component is one not already identified as a service component in the FEA SRM.

(b*) - A reused component is one being funded by another investment, but being used by this investment. Rather than answer yes or no, identify the reused service component funded by the other investment and identify the other investment using the Unique Project Identifier (UPI) code from the OMB Ex 300 or
Ex 53 submission.

(c*) - ‘Internal’ reuse is within an agency. For example, one agency within a department is reusing a service component provided by another agency within the same department. ‘External’ reuse is one agency within a department reusing a service component provided by another agency in another department. A good example of this is an E-Gov initiative service being reused by multiple organizations across the federal government.

(d*) - Please provide the percentage of the BY requested funding amount used for each service component listed in the table. If external, provide the funding level transferred to another agency to pay for the service.

**NOTE:**

(a*) - Service Components identified in the previous question(I.F.3) should be entered in this column. Please enter multiple rows for FEA SRM Components supported by multiple TRM Service Specifications

(b*) - In the Service Specification field, Agencies should provide information on the specified technical standard or vendor product mapped to the FEA TRM Service Standard, including model or version numbers, as appropriate.

I.F.5) Will the application leverage existing components and/or applications across the Government (i.e., FirstGov, Pay.Gov, etc)?
This is a steady state system
### III.B) Cost and Schedule Performance:

#### III.B.1) Was operational analysis conducted?

Yes

#### III.B.1.a) If “yes,” provide the date the analysis was completed.

Mar 31, 2008

#### III.B.2) Complete the following table to compare actual performance against the current performance baseline and to the initial performance baseline. In the Current Baseline section, for all milestones listed, you should provide both the baseline and actual completion dates (e.g., “03/23/2003”/“04/28/2004”).
