Welcome to Community Care- Decision Support Tool (DST) Office Hours

For Audio please call VANTs (800) 767-1750 – Participant Code 85286 You will hear silence until we begin at the top of the hour.
Decision Support Tool (DST) Office Hours

DST office hours will take place the third Monday of each month. First session starting 6/15/2020 DST office hour information:

https://vacctraining.adobeconnect.com/dstoh/  
Time: 3:00-4:00pm ET (800) 767-1750  Participant Code: 85286  
The call will consist of an overview of any DST updates and an open forum question and answer session to assist participants in utilizing DST.
Office of Community Care is currently working on improved functionality for DST that will include the following:

Clinical Services Synonyms- Ability to find the correct clinical service in the drop-down based on a search of common clinical service synonyms. For example: User enters “Acupuncture” and is returned the official Clinical Service value of “Complementary and Integrative Health Treatment”. [May 19, 2020]

Clinical Service Mapping Updates- Updates to the Clinical Service mapping to align with the MCAO FY20 Mid-Year Active Stop Codes list. [May 19, 2020]

Community Wait Time- The Facilities list will now show the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service. [June 22, 2020]

Adjustment to VHA Average Wait Time- The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments. [June 22, 2020]
Clinical Services Synonyms

• As of May 19, 2020, DST supports Clinical Service Synonyms. When you are selecting the clinical service, you can start typing the value you are looking for. Common synonyms are searchable and will appear in the drop down along with the official clinical service name. When you select a Clinical service synonym from the drop-down list, the official clinical service name will be displayed. Only official clinical service names will be saved with the DST information and written to the consult when signed. Example: Value typed in the Clinical Service field: Acupuncture
  Clinical Service drop-down option displays: Acupuncture <Complementary and Integrative Health Treatment>
  When selected, Clinical Service field displays: Complementary and Integrative Health Treatment
Clinical Service Mapping Updates

As of May 19, 2020, the following Clinical Services have been added and are available for selection in DST, per the MCAO FY20 Mid-Year Active Stop Codes list (http://vaww.dss.med.va.gov/programdocs/pd_oident.asp):

- 391 Cardiac ECHO
- 392 Ambulatory ECG Monitoring

The following Clinical Services have been renamed, per the MCAO FY20 Mid-Year Active Stop Codes list (http://vaww.dss.med.va.gov/programdocs/pd_oident.asp):

- 311 Cardiac Implantable Electronic Devices (CIED) (previously Pacemaker)
- 372 Weight Management and MOVE! Program- Individual (previously MOVE! Program- Individual)
Beginning on June 22, 2020, DST will display the average wait times of all community care appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). The mapping table that indicates which SEOCs are associated with each clinical service is available on the DST SharePoint site:
The average wait times reflected for community care appointments are based on the community care appointments captured in HSRM. The specific calculation is based on the following:

- Days between the appointment made date and the appointment date based on HSRM calculations
- HSRM referrals with an appointment in booked or completed status and an appointment date time within the past 90 days

Exclusions:
- Appointments with a null made date or appointment date
- Appointments with a made date greater than the appointment date

No minimum referral number required in order to capture the community care wait time average.
The addition of the community care average wait time to DST will assist end users, to include the Referral Coordination Team (RCT) and specialty clinic schedulers, when having that thoughtful conversation with Veterans regarding their VA and community care options and the average wait times both in VA and community care. It is important to note: DST is providing the average wait time for both calculations and not the exact wait time. The methodology of the calculations is similar but a different date parameter is applied. In both situations, the exact wait time is determined at the time of scheduling into the specific clinic where the Veteran is to be seen, when knowledge of the next available appointment is accessible. The data for facility community care offices currently under PC3 that have the TPA schedule for them will not be all inclusive, as these sites do not use HSRM to process community care referrals. The data for these sites will reflect the most up to date average community care wait time once they begin to use HSRM for referral management.
When having the conversation with the Veteran, after community care eligibility has been determined, the end user should be aware of the following:

1. Available options within the VA to provide the care (i.e. Interfacility Consult (IFC), e-consult, Telehealth (TH) etc.)
2. Review the average wait times in the community and within the VA for the care being requested in order to provide the patient with an overall idea on the appointment wait time, once the request is routed.
3. Emphasize that the average community wait times presented in DST are not reflective of the actual available appointments at any one community provider’s office, but an average of all community providers who offer the service to Veterans seen at this VAMC’s Healthcare system (CBOCs and off-site facilities).
4. If the Veteran opts into community care, capture their Community Care Scheduling Preferences (per Field Guidebook chapter 2, section 2.19) prior to forwarding the consult to a community care consult title.
Average wait times for community care appointments will be displayed here
During the COVID-19 Pandemic, many VA facilities have seen a reduction in the number of face to face VHA appointments scheduled or have been offering telehealth alternatives for more than 60 days. For this reason, some VA facilities that do offer specific services are no longer seeing this information reflected in the DST facilities list. To resolve this issue, the algorithm used to capture VHA Average Wait Time data in DST will be temporarily updated to identify VA facilities within the search radius that report pending or completed appointments back to January 1, 2020 linked to consults associated with the stop code of the selected clinical service. Facilities that only offer the service via telehealth are excluded. The search radius logic in DST searches the Provider Profile Management System (PPMS) for VA facilities within a defined radius of the Veteran’s residential address (100 miles for Specialty Care; 40 miles for Primary Care / Mental Health) that may offer the requested service.
What must be installed on my desktop for DST to work? Consult Toolbox v1.9.0065 with the DST URL defined must be installed on the user’s computer; the user must ensure that Consult Toolbox is enabled (CPRS Tools Menu - Consult Toolbox - Enable). In addition, a patch must be installed at the user’s VistA site in order for the DST data to be added to the consult when the order is signed. Furthermore, the Google Chrome web browser must be installed on the user’s machine. If you are unsure if your computer is compatible with DST, please contact your local IT staff.
Is it required that all community care consults have at least one (1) staff person run DST on it? No, use of the DST is not nationally mandated for any VA staff person. Providers may choose not to launch DST. Even if the provider has not run DST, it is not required that the scheduler use DST. Nevertheless, use of DST is highly encouraged in order to review a Veteran’s eligibility for Community Care and document the care decision. Also, if the ordering provider strongly feels that the Veteran is eligible for community care based on Best Medical Interest, the ordering provider should launch DST at the time of entering the consult and capture the BMI eligibility at that time. The consult will still be routed to the (RCT) or Specialty clinic for review and final referral to community care, if appropriate.
Why doesn’t the residential address in DST match the Veteran’s current address? DST displays the Veteran’s residential address as documented in the Enrollment System (ES), not CPRS. If the address in DST is incorrect, please make the needed update in the ES. You may need to work with your facility enrollment office to make the appropriate corrections in ES. Allow two to three (2-3) business days for the change to reach DST.
Cardiology at our VAMC shows an average wait time of 20 days in the DST and our real clinic availability is out about 50 days. DST does not allow us to show that the eligibility is really due to wait time. Why doesn’t DST’s wait time data match our availability? It’s important to note two (2) things: Average wait time and next available appointment are different metrics. We would never expect average wait time to match actual clinic availability. Average wait time data in DST is displayed for reference only. DST should not be used to determine wait time eligibility. It is determined on a case by case basis by the MSA at the point of scheduling, who may use Consult Toolbox to document the eligibility and Veteran’s opt-in decision.
How does DST identify which facilities to display? Sometimes my VAMC doesn’t show up, and sometimes a facility on the list does not offer the consult service I’m ordering. DST searches PPMS for VA facilities within a defined radius of the Veteran’s residential address (40 miles for Primary Care/Mental Health; 100 miles for Specialty Care) that may offer the requested clinical service. Because clinical service is broader than the specific consult service, DST may display facilities that do not actually offer the specific consult service. DST will display VA facilities within this search radius that report pending or completed appointments within the last 60 days (see Note 2) linked to consults associated with the stop code of the selected clinical service. Facilities that only offer the service via telehealth will be excluded.

Note 1: When the selected clinical service is one (1) of the five (5) direct scheduling services, DST will display facilities that have reported workload in the stop code within the last 60 days, regardless of whether the appointments were linked to consults. The five (5) exceptions are: Primary Care, Optometry, Audiology (including Hearing Aid Services), Podiatry, and Nutrition.

Note 2: A temporary modification will take effect on June 22, 2020. The algorithm will identify VHA facilities within the search radius that have reported pending or completed appointments from January 1, 2020 onward linked to consults associated with the stop code of the selected clinical service.
DST is displaying a facility that does not offer the consult service I’m ordering. How can I correctly capture the Veteran’s community care eligibility? In the case that the DST facility list misrepresents a Veteran’s community care eligibility, VA staff may use Consult Toolbox at the time of forwarding the internal VA consult to a community care consult to document the eligibility, as appropriate.
Action Required: In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

Questions?

We will remain on the line until the top of the hour to answer any DST-related questions.
MISSION Act Quality — Overview

VA Standards for Quality (MISSION Act Section 104 - § 1703C)
• Identify a common set of quality standards
• Compare performance to the community and analyze at the level of medical service lines
• Serve as the foundation for subsequent eligibility decisions for Community Care

Quality Criterion for Community Care Eligibility (MISSION Act Section 101 - § 1703[e])
• Provides the authority to VA to enable eligibility for Community Care by designating VA medical service lines based on the quality criterion
• Affects VA medical service lines not complying with VA standards for quality, as determined through measures of both timeliness and quality

Remediation of Medical Service Lines (MISSION Act Section 109 - § 1706A)
• Required for designated VA medical service lines
• Requires extensive Congressional response and public awareness

MISSION Act-specific needs, distinct from routine VHA improvement and consultation

*This represents a condensed version of the list of measures posted on the Federal Register on 10/3/2019*
Things to Remember...

- VA standards for quality reflect care that is timely, effective, safe, and Veteran-centered.
- VA compares its care to the care provided in the community.
- Where VA compares favorably to the community, that’s great!
- Where we do not, we are committed to improving our care.
- If there is a significant or serious concern, Veterans have the option to receive care in the community for specific medical services that do not meet the VA standards for quality and timeliness while remediations are underway at their VA facility.
Veterans may be provided the option for community care if a medical service line* does not meet VA's standards for quality based on two conditions:

- Quality – compared to community (2 or more measures)
- Timeliness – compared to same service line at other VA facilities

Example: If VA has identified that the cardiology service line at a local VA medical facility is not providing care that meets VA’s standards for quality, the Veteran may be able to elect to receive their cardiology care in the community. However, there may be limits on when, where, and what is available under this criterion.

*Medical service line - “a specific medical service or set of services delivered in a VA facility.”
Source: VA regulations (AU-46)
Overview: Three-Step Process

1. Data Surveillance/Screening

- Eligible for Community Care, paired with intensive remediation and Congressional reporting

2. Detailed Data Analysis to determine service lines not meeting VA standards

3. Shared accountability in implementation process

- TAG
Surveillance Logic Leading to Technical Advisory Group (TAG) Evaluation

Data Surveillance

- Measures are triggered through comparisons against a benchmark (one or two standard deviations worse than the benchmark average)
  - Timeliness measures are compared with internal VA data
  - Quality measures are primarily compared with community data
- Medical Service Lines are flagged in timeliness and/or quality
  - Flagging is based on the number of triggered measures
  - For example, Primary Care at Everytown VAMC is flagged in quality due to triggering in two quality measures

Detailed Data Evaluation

- Any Medical Service Line flagged in both timeliness and quality is brought to the TAG for further evaluation
- The TAG reports Detailed Data Evaluation findings to the Senior Decision-Making Group (USH's Office) to inform their recommendations to the VA Secretary on medical service lines to be designated
Technical Advisory Group (TAG)

Ensure objective review and MISSION guidance is followed

- Conduct detailed analysis of quantitative and qualitative data
- Maintain confidentiality requirements
- Consider factors beyond initial data
- Meet with field leadership as needed
- Support virtual or F2F reviews of impacted facilities as needed
- Provide recommendations and supporting data to VHA Exec Leadership

Essential Responsibilities

TAG Review Schedule 2021

- Monitoring Review — August 31
- Annual Intensive Review — November/December

(Note — 3 monitoring meetings each year)

Due to the lack of timeliness measures, Inpatient medical service lines may not be designated by the VA Secretary, per MISSION Act requirements.
MISSION TAG Monitoring
Review August 31, 2021

Surveillance Summary: Extended Care Services
(No sites flagged for TAG review during this surveillance interval)

Due to the lack of timeliness measures, Skilled Nursing Home medical service lines may not be designated by the VA Secretary, per MISSION Act requirements.

Triggering Quality Measures:
- Short Stay: Antipsychotic Medications (26)
- Long Stay: Falls with Major Injury (4)
- Functional Improvement (8)
- Physical Restraints (3)
- Pressure Ulcer (0)

Due to the lack of timeliness measures, Skilled Nursing Home medical service lines may not be designated by the VA Secretary, per MISSION Act requirements.

Legends:
- For TAG review before SDMS recommendations
- For standard VHA improvement processes
- No performance issues identified

Remediation of Medical Service Lines – Section 109 - § 1706A

- **Required** for those occasions *where VA medical service lines are designated* based on the quality standards criterion for Community Care eligibility

- **Community care eligibility** concludes when **remediation is complete** (service line meets standards)

- Requires extensive response:
  - **Federal Register posting of service lines** that did not meet VA standards
  - **Remediation action plan** submitted within 30 days
  - **Identification of VAMC, VISN, VHA Central Office individuals accountable** for remediation of medical service line to meet VA standards for quality
  - **Ongoing Congressional reporting** of status *and* cost of remediation actions
  - Reporting annually on public facing website

MISSION Act-specific needs, distinct from routine VHA improvement and consultation
Mission Act Quality Standards Tracking Report (MAQSTR)

The MISSION Act Quality Standards Tracking Report (MAQSTR) is designed to help compare VHA performance measure results to comparable community benchmarks.

The main report displays:
- Measure Domains
- Short description of performance measures
- Preferred data direction
- Short description of performance measures
- Quarterly and yearly data
- Community scores
- Facility prior year score
- Links to the source reports
- Measure data timeframes

MISSION Act Requirements

MISSION Act Requirements – Section 101

✓ – Measure quality of a medical service line of a VA facility by comparing it with 2 or more distinct and appropriate quality measures at non-Department medical service lines.

✓ – Measure timeliness of the medical service line of a VA facility by comparing with the same medical service line at different Department facilities.
Are there differences between the quality criterion and other eligibility criteria for community care?

<table>
<thead>
<tr>
<th>Other Eligibility Criteria</th>
<th>Standards for Quality</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Criteria are applied on a <strong>case-by-case basis</strong> using information <strong>specific to each Veteran</strong>. Veteran decision to opt-in or opt-out</td>
<td>• Criterion applies to the entire medical service line based on analysis for care. Veteran decision to opt-in or opt-out</td>
</tr>
<tr>
<td>• The decision to use the criteria is made at the clinic or provider level</td>
<td>• The decision to use the criterion is made by the VA Secretary based on the analysis of the data</td>
</tr>
<tr>
<td>• Available for use any time a Veteran is eligible, <strong>without any limit</strong></td>
<td>• Cap limit placed by Congress on the number of service lines eligible (3 locally and 36 nationally)</td>
</tr>
<tr>
<td>• These criteria are <strong>always active</strong>, so Veterans are eligible <strong>any time the conditions are met</strong></td>
<td>• When the service line <strong>MEETS the standards</strong> for quality, this eligibility for community care ends</td>
</tr>
</tbody>
</table>
### Full Measure List by VA Medical Service Line – 11/2020 to Present

* From 38 CFR Part 17 § 17.4015 (e)
What about VAMCs needing support outside the MISSION process?

- It is anticipated that there may be VAMCs with medical service lines which are experiencing challenges but do not meet the requirements for MISSION Act related remediation.
- Remediation efforts under the parameters of the MISSION Act are separate from VHA’s ongoing consultation, improvement and monitoring activities undertaken by VISNs and VHACO Program Offices.
- **Sites not triggered under MISSION** — the TAG has the option to recommend that a VAMC medical service line (*not triggered under MISSION*) explore support options from the VISN or relevant program office to help drive quality improvement and high value care for Veterans.
- **Sites triggered under MISSION** — the TAG may also recommend additional VISN or programmatic support for sites *triggered under MISSION* as an adjunct to formal remediation. In these cases, reporting of other improvement efforts is completed through existing channels — separate to the specific remediation reporting requirements under the Act.
QPS/CIC’s Engagement Protocol for Improvements in Quality (EPIQ)

Strategic Engagement Needs Algorithm (SENA)

- **Relative Comparison**
  - ≥40% metrics in 5th quintile of SAIL
  - ≥65% metrics in 4th or 5th quintiles of SAIL

- **Absolute Improvement or Decline**
  - >50% of all SAIL metrics worsened from 1 year ago
  - >50% of all SAIL supporting indicators worsened from 1 year ago

- **Community Comparison**
  - Under-served VA (Mental Health and Primary Care)
  - MISSION Act (Monitor List)

  - Moderate engagement need

- **Tier 3**
  - Routine observation
MISSION Act Quality — Overview

**VA Standards for Quality (MISSION Act Section 104 - § 1703C)**
- Identify a common set of quality standards
- Compare performance to the community and analyze at the level of medical service lines
- Serve as the foundation for subsequent eligibility decisions for Community Care

**Quality Criterion for Community Care Eligibility (MISSION Act Section 101 - § 1703[e])**
- Provides the authority to VA to enable eligibility for Community Care by designating VA medical service lines based on the quality criterion
- Affects VA medical service lines not complying with VA standards for quality, as determined through measures of both timeliness and quality

**Remediation of Medical Service Lines (MISSION Act Section 109 - § 1706A)**
- Required for designated VA medical service lines
- Requires extensive Congressional response and public awareness

MISSION Act-specific needs, distinct from routine VHA improvement and consultation

*This represents a condensed version of the list of measures posted on the Federal Register on 10/3/2019.
Things to Remember...

- VA standards for quality reflect care that is *timely, effective, safe, and Veteran-centered.*
- VA compares its care to the care provided in the community.
- Where VA compares favorably to the community, *that’s great!*  
- Where we do not, we are committed to improving our care.
- If there is a *significant or serious concern,* Veterans have the option to receive care in the community for specific medical services that do not meet the VA standards for quality and timeliness while remediations are underway at their VA facility.
Veterans may be provided the option for community care if a medical service line* does not meet VA's standards for quality based on two conditions:

- Quality – compared to community (2 or more measures)
- Timeliness – compared to same service line at other VA facilities

Example: If VA has identified that the cardiology service line at a local VA medical facility is not providing care that meets VA’s standards for quality, the Veteran may be able to elect to receive their cardiology care in the community. However, there may be limits on when, where, and what is available under this criterion.

*Medical service line - “a specific medical service or set of services delivered in a VA facility.”
Source: VA regulations (60-46)
### Process Overview

**Overview: Three-Step Process**

1. **Data Surveillance/Screening**
   - Eligible for Community Care, paired with intensive remediation and Congressional reporting.

2. **Detailed Data Analysis to determine service lines not meeting VA standards**

3. **Eligible for Community Care, paired with intensive remediation and Congressional reporting**

**Shared accountability in Implementation Process**

- **Data Surveillance**
  - Details of Data Evaluation
    - Community Care Eligibility and Remediation
      - TAG

**VA**

U.S. Department of Veterans Affairs
Surveillance Logic Leading to Technical Advisory Group (TAG) Evaluation

Data Surveillance

- Measures are triggered through comparisons against a benchmark (one or two standard deviations worse than the benchmark average)
  - Timeliness measures are compared with internal VA data
  - Quality measures are primarily compared with community data
- Medical Service Lines are flagged in timeliness and/or quality
  - Flagging is based on the number of triggered measures
  - For example, Primary Care at Everytown VAMC is flagged in quality due to triggering in two quality measures

Detailed Data Evaluation

- Any Medical Service Line flagged in both timeliness and quality is brought to the TAG for further evaluation
- The TAG reports Detailed Data Evaluation findings to the Senior Decision-Making Group (USH’s Office) to inform their recommendations to the VA Secretary on medical service lines to be designated
Technical Advisory Group (TAG)

Ensure objective review and MISSION guidance is followed

- Conduct detailed analysis of quantitative and qualitative data
- Maintain confidentiality requirements
- Consider factors beyond initial data
- Meet with field leadership as needed
- Support virtual or F2F reviews of impacted facilities as needed
- Provide recommendations and supporting data to VHA Exec Leadership

TAG Review Schedule 2021
- Monitoring Review — August 31
- Annual Intensive Review — November/December

(Note – 3 monitoring meetings each year)

Due to the lack of timeliness measures, Skilled Nursing Home medical service lines may not be designated by the VA Secretary, per MISSION Act requirements.
Remediation of Medical Service Lines – Section 109 - § 1706A

- Required for those occasions where VA medical service lines are designated based on the quality standards criterion for Community Care eligibility

- Community care eligibility concludes when remediation is complete (service line meets standards)

- Requires extensive response:
  - Federal Register posting of service lines that did not meet VA standards
  - Remediation action plan submitted within 30 days
  - Identification of VAMC, VISN, VHA Central Office individuals accountable for remediation of medical service line to meet VA standards for quality
  - Ongoing Congressional reporting of status and cost of remediation actions
  - Reporting annually on public facing website

MISSION Act-specific needs, distinct from routine VHA improvement and consultation
The MISSION Act Quality Standards Tracking Report (MAQSTR) is designed to help compare VHA performance measure results to comparable community benchmarks.

The main report displays:
- Measure Domains
- Short description of performance measures
- Preferred data direction
- Short description of performance measures
- Quarterly and yearly data
- Community scores
- Facility prior year score
- Links to the source reports
- Measure data timeframes

Appendix – Supporting Materials
MISSION Act Requirements

MISSION Act Requirements – Section 101

✓ — Measure quality of a medical service line of a VA facility by comparing it with 2 or more distinct and appropriate quality measures at non-Department medical service lines

✓ — Measure timeliness of the medical service line of a VA facility by comparing with the same medical service line at different Department facilities
Are there differences between the quality criterion and other eligibility criteria for community care?

<table>
<thead>
<tr>
<th>Other Eligibility Criteria</th>
<th>Standards for Quality</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Criteria are applied on a <strong>case-by-case basis</strong> using information <strong>specific to each Veteran</strong>. Veteran decision to opt-in or opt-out</td>
<td>• Criterion applies to the <strong>entire medical service line</strong> based on analysis for care. Veteran decision to opt-in or opt-out</td>
</tr>
<tr>
<td>• The decision to use the criteria is made at the clinic or provider level</td>
<td>• The decision to use the criterion is made by the VA Secretary based on the analysis of the data</td>
</tr>
<tr>
<td>• Available for use <strong>any time a Veteran is eligible</strong>, <strong>without any limit</strong></td>
<td>• Cap limit placed by Congress on the number of service lines eligible (3 locally and 36 nationally)</td>
</tr>
<tr>
<td>• These criteria are <strong>always active</strong>, so Veterans are eligible <strong>any time the conditions are met</strong></td>
<td>• When the service line <strong>MEETS the standards</strong> for quality, <strong>this eligibility for community care ends</strong></td>

What about VAMCs needing support outside the MISSION process?

- It is anticipated that there may be VAMCs with medical service lines which are experiencing challenges but do not meet the requirements for MISSION Act related remediation.
- Remediation efforts under the parameters of the MISSION Act are separate from VHA’s ongoing consultation, improvement and monitoring activities undertaken by VISNs and VHACO Program Offices.
- Sites not triggered under MISSION — the TAG has the option to recommend that a VAMC medical service line (not triggered under MISSION) explore support options from the VISN or relevant program office to help drive quality improvement and high value care for Veterans.
- Sites triggered under MISSION — the TAG may also recommend additional VISN or programmatic support for sites triggered under MISSION as an adjunct to formal remediation. In these cases, reporting of other improvement efforts is completed through existing channels — separate to the specific remediation reporting requirements under the Act.

Due to the lack of timeliness measures, Skilled Nursing Home medical service lines may not be designated by the VA Secretary, per MISSION Act requirements.
Remediation of Medical Service Lines – Section 109 - § 1706A

- Required for those occasions where VA medical service lines are designated based on the quality standards criterion for Community Care eligibility
- Community care eligibility concludes when remediation is complete (service line meets standards)
- Requires extensive response:
  - Federal Register posting of service lines that did not meet VA standards
  - Remediation action plan submitted within 30 days
  - Identification of VAMC, VISN, VHA Central Office individuals accountable for remediation of medical service line to meet VA standards for quality
  - Ongoing Congressional reporting of status and cost of remediation actions
  - Reporting annually on public facing website

MISSION Act-specific needs, distinct from routine VHA improvement and consultation
The MISSION Act Quality Standards Tracking Report (MAQSTR) is designed to help compare VHA performance measure results to comparable community benchmarks.

The main report displays:
- Measure Domains
- Short description of performance measures
- Preferred data direction
- Short description of performance measures
- Quarterly and yearly data
- Community scores
- Facility prior year score
- Links to the source reports
- Measure data timeframes

MISSION Act Requirements

MISSION Act Requirements – Section 101

✓ – Measure quality of a medical service line of a VA facility by comparing it with 2 or more distinct and appropriate quality measures at non-Department medical service lines.

✓ – Measure timeliness of the medical service line of a VA facility by comparing with the same medical service line at different Department facilities.
Are there differences between the quality criterion and other eligibility criteria for community care?

<table>
<thead>
<tr>
<th>Other Eligibility Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Criteria are applied on a <strong>case-by-case basis</strong> using information <strong>specific to each Veteran</strong>. Veteran decision to opt-in or opt-out</td>

<td>The potential impact on patient outcomes.</td>
</tr>
<tr>
<td>Collateral Effects</td>
<td>The effect that designating one VA medical service line would have on other VA medical service lines.</td>
</tr>
</tbody>
</table>

* From 38 CFR Part 17 § 17.4015(e)
What about VAMCs needing support outside the MISSION process?

- It is anticipated that there may be VAMCs with medical service lines which are experiencing challenges but do not meet the requirements for MISSION Act related remediation.
- Remediation efforts under the parameters of the MISSION Act are separate from VHA’s ongoing consultation, improvement and monitoring activities undertaken by VISNs and VHACO Program Offices.
- Sites not triggered under MISSION — the TAG has the option to recommend that a VAMC medical service line (not triggered under MISSION) explore support options from the VISN or relevant program office to help drive quality improvement and high value care for Veterans.
- Sites triggered under MISSION — the TAG may also recommend additional VISN or programmatic support for sites triggered under MISSION as an adjunct to formal remediation. In these cases, reporting of other improvement efforts is completed through existing channels — separate to the specific remediation reporting requirements under the Act.

*This represents a condensed version of the list of measures posted on the Federal Register on 10/3/2019*
Things to Remember...

- VA standards for quality reflect care that is *timely, effective, safe, and Veteran-centered.*
- VA *compares its care* to the care provided in the community.
- Where VA compares favorably to the community, *that’s great!*
- Where we do not, we are committed to improving our care.
- If there is a **significant or serious concern**, Veterans have the option to receive care in the community for specific medical services that do not meet the VA standards for quality and timeliness while remediations are underway at their VA facility.
Veterans may be provided the option for community care if a medical service line* does not meet VA's standards for quality based on two conditions:

- Quality – compared to community (2 or more measures)
- Timeliness – compared to same service line at other VA facilities

Example: If VA has identified that the cardiology service line at a local VA medical facility is not providing care that meets VA’s standards for quality, the Veteran may be able to elect to receive their cardiology care in the community. However, there may be limits on when, where, and what is available under this criterion.

*Medical service line - “a specific medical service or set of services delivered in a VA facility.”
Source: VA regulations (AQ-46)
Process Overview

1. Data Surveillance/Screening
   - Identify areas with potential issues
   - TAG: Eligible for Community Care, paired with intensive remediation and Congressional reporting

2. Detailed Data Analysis to determine service lines not meeting VA standards
   - TAG

3. Eligible for Community Care, paired with intensive remediation and Congressional reporting

Shared accountability in implementation process
Surveillance Logic Leading to Technical Advisory Group (TAG) Evaluation

Data Surveillance

- Measures are triggered through comparisons against a benchmark (one or two standard deviations worse than the benchmark average)
  - Timeliness measures are compared with internal VA data
  - Quality measures are primarily compared with community data
- Medical Service Lines are flagged in timeliness and/or quality
  - Flagging is based on the number of triggered measures
  - For example, Primary Care at Everytown VAMC is flagged in quality due to triggering in two quality measures

Detailed Data Evaluation

- Any Medical Service Line flagged in both timeliness and quality is brought to the TAG for further evaluation
- The TAG reports Detailed Data Evaluation findings to the Senior Decision-Making Group (USH’s Office) to inform their recommendations to the VA Secretary on medical service lines to be designated
Technical Advisory Group (TAG)

Ensure objective review and MISSION guidance is followed

- Conduct detailed analysis of quantitative and qualitative data
- Maintain confidentiality requirements
- Consider factors beyond initial data
- Support virtual or F2F reviews of impacted facilities as needed
- Meet with field leadership as needed
- Provide recommendations and supporting data to VHA Exec Leadership

TAG Review Schedule 2021
- Monitoring Review — August 31
- Annual Intensive Review — November/December

(Note — 3 monitoring meetings each year)

Essential Responsibilities

Meet with field leadership as needed

Support virtual or F2F reviews of impacted facilities as needed

- **Relative Comparison**
  - 240% metrics in 5th quintile of SAIL
  - 265% metrics in 4th or 5th quintiles of SAIL

- **Absolute Improvement or Decline**
  - >50% of all SAIL metrics worsened from 1 year ago
  - >50% of all SAIL supporting indicators worsened from 1 year ago

- **Community Comparison**
  - Under-served VA (Mental Health and Primary Care)
  - MISSION Act (Monitor List)
In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect June 22, 2020 which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx.

These changes include:

- **Community Care** Average Wait Time – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.

- **VHA** Average Wait Time – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.

- Clinical Service Synonyms – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.

- Clinical Service Mapping Updates – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

**Community Care Average Wait Time**
The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.

**Action Required**
Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

**Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

**Time:** 3:00-4:00pm ET

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.
Action Required

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

Office Hours

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

**Time:** 3:00-4:00pm ET

VHA Office of Community Care
In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx.

These changes include:

- **Community Care Average Wait Time** — DST will display a weighted average wait time for Community Care appointments for the requested clinical service.

- **VHA Average Wait Time** — The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.

- **Clinical Service Synonyms** — DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.

- **Clinical Service Mapping Updates** — An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

**Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). Due to technical issues, we are unable to share today's PowerPoint. In the meantime, please follow along with the attachment.

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect June 22, 2020 which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx.

These changes include:

- **Community Care** Average Wait Time – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.

- **VHA** Average Wait Time – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.

- Clinical Service Synonyms – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.

- Clinical Service Mapping Updates – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

**Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.
**Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

**Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

**Time:** 3:00-4:00pm ET

### Community Care Average Wait Time

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.
**Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

**Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

**Time:** 3:00-4:00pm ET

VHA Office of Community Care
In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx.

These changes include:

- **Community Care** Average Wait Time – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.

- **VHA** Average Wait Time – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.

- Clinical Service Synonyms – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.

- Clinical Service Mapping Updates – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

*Due to technical issues, we are unable to share today’s PowerPoint. In the meantime, please follow along with the attachment.

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect June 22, 2020 which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at https://dvagov.sharepoint.com/sites/VHAOCC/CMN/CI/OCCFGB/SitePages/FGB.aspx.

These changes include:
- **Community Care** Average Wait Time – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.
- **VHA** Average Wait Time – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.
- Clinical Service Synonyms – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.
- Clinical Service Mapping Updates – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

**Community Care Average Wait Time**
The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.
**Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

**Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

**Time:** 3:00-4:00pm ET

Thank you,

VHA Office of Community Care
Due to technical issues, we are unable to share today’s PowerPoint. In the meantime, please follow along with the attachment.

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at [https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx](https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx).

These changes include:

- **Community Care Average Wait Time** – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.

- **VHA Average Wait Time** – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.

- **Clinical Service Synonyms** – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.

- **Clinical Service Mapping Updates** – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

**Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.
**Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

**Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.
