VistA Imaging Approved DICOM Modality Interfaces
November 1 - 30, 2020

VistA Imaging has successfully tested many modalities and interfaced them to VistA using DICOM. The following list of approved DICOM modalities was generated based on the most current information and will change as more information becomes available.

A DICOM modality is considered “Supported” if it passes the VA’s internet validation test suite listed in the Joint VA/DoD DICOM Modality Conformance Requirements (Rev 3.0) document. Some modalities have superscript numbers which refer to the notes at the end of the document.

If the software used on a modality is revised by the manufacturer, the modality will need to be re-validated.

The VA retains the right to change modality testing requirements at any time as needed for VA medical care. These changes could require re-testing of the modalities.

VA facilities are required to complete a quality review for the images produced by the device before it may be placed into clinical use. The results of the quality review must be filed with the National VistA Imaging Project Office.

This list of approved DICOM modalities does not in any way constitute a product endorsement by the VA. It only states whether or not the listed product has passed the VA’s internet-based validation testing. Upgrades to the vendor devices can affect interoperability and may require re-validation. The validation process does not indicate how well the actual product will work operationally, either within the VA or elsewhere.

### Modality/Device Types

Approved modalities and devices are grouped into the categories listed below. A list of approved devices for each category can be found on the page listed below.

US-Vascular Vasculab 4040, version 1.0.180
Viasionix Falcon
Volcano S5
Volcano S5i
Zonare Z.One
Zonare Z.OneUltra
Zonare ZS3

Notes
1. No DICOM Modality Worklist capability.
5. Tested as DICOM Object. Test images were not converted to Targa format.
9. Automatic measurements may not be possible; manual calibration may be required.
17. DICOM Query/Retrieve – Study/Root Q/R fully supported.
19. Reported connectivity issues, please contact support for assistance
23. Not approved for DICOM Query/Retrieve.

**Notes**

18 DICOM Encapsulated PDF.
This device is not approved for the following SOP Classes: Multi-Frame Secondary Capture Storage, Video Endoscopic Image Store and Video Photographic Image Store. Only approved for Secondary Capture Image Storage and VL Endoscopic Image Storage.

**VL – Endoscopy/Microscopy**  
Supported VL – Endoscopy/Microscopy Devices

- ImageStream nStream
- ImageStream nCare MX
- ImageStream nCare RX
- ImageStream nStream GX
- ImageStream VaultStream

**VL – Pathology**  
Supported VL – Pathology Devices

- Apollo Telemedicine ASAP Imaging

**XC – External-camera Photography (Encapsulated PDF)**

- Global Media Group, LLC CapSure Version 2.1.6.4
- GlobalMedia Group, LLC CapSure Version 3.2
- Image Stream Medical nCare /PatInfoEngine, 10.2.1
Notes
The notes below are included for reference purposes; see specific listing for details.

1. No DICOM Modality Worklist capability.
2. Poor DICOM Modality Worklist capability.
3. Tested using the DeJarnette Netshare for interfacing.
4. Data transferred via an intermediary device. Confirm intermediary device was purchased as well.
5. Tested as DICOM Object. Test images were not converted to Targa format.
6. Obsolete; retained for numbering purposes.
7. Obsolete; retained for numbering purposes.
8. Only supplies Modality Worklist.
9. Automatic measurements may not be possible; manual calibration may be required.
10. Older versions of vendor's software are not supported.
11. Obsolete; retained for numbering purposes.
12. Obsolete; retained for numbering purposes.
13. Obsolete; retained for numbering purposes.
14. Obsolete; retained for numbering purposes.
15. Does not support OP SOP Classes.
16. DICOM Query/Retrieve – Performs C-Find SCU and C-Move SCU roles only.
17. DICOM Query/Retrieve – Study/Root Q/R fully supported.
18. DICOM Encapsulated PDF only
19. Reported connectivity issues, please contact support for assistance
20. Version of DICOM Software approved on prior
21. Requires using NNT/iRYS Workstation w/DICOM module
22. At the time of validation VA HDIV was out of date with the DICOM Standard and doesn't have the ability to recognize the value, POSTMARKER, the third value of Image Type (0008,0008). Validation testing was done with the Application Entity Security Matrix (AESM) entry configured to: VALIDATE=NO and RELAX VALIDATION=YES.
23. This device is not approved for Query Retrieve
24. During testing it was noted that if the objects sent by the vendor have different accession numbers, then the ePDF objects stored in VistA do not display an accession number. But if the ePDF objects are made up of images that are from the same accession number, then the ePDF objects stored in VistA display the accession number.
25. This device is not approved for the following SOP Classes: Multi-Frame Secondary Capture Storage, Video Endoscopic Image Store and Video Photographic Image Store. Only approved for Secondary Capture Image Storage and VL Endoscopic Image Storage.
26. Device does not perform MWL, it is a Vista Storage only device
27. Approved HL7 interface 5/2/2014. The latest version 3.5 is not validated for use within VA.
28. Since the VistA Imaging Query/Retrieve Provider only supports Study Level at this time and the device cannot perform Study Level retrieves, the device may be used to obtain prior radiology images from a Query/Retrieve provider other than VistA Imaging.
29. VistA Imaging does not support biometry related SOP classes such as: Keratometry Measurements Storage (1.2.840.10008.5.1.4.1.1.78.3), Ophthalmic Axial Measurements Storage (1.2.840.10008.5.1.4.1.1.78.7) and Intraocular Lens Calculations Storage (1.2.840.10008.5.1.4.1.1.78.8).
30. This device was validated for US SOP Classes only.
31. Comments: Broad Query matching key attributes is not supported. Can filter by Modality
32. VistA Imaging does not support PET (Radiopharmaceutical) Dose SR storage
