## Chapter 7 Health and Healthcare Disparities Among Veterans with Serious Mental Illness

	Hierarchical Presence of Serious Mental Illness, FY13						Total 5,652,071
	A. Serious Mental Illness (SMI)	B. Mood Anxiety (w/o A)	C. PTSD (w/o AB)	D. Substance Abuse (w/o ABC)	E. Other Mental Health Diagnoses (w/o ABCD)	F. No Mental Health Diagnoses (no ABCDE)	
<b>Count</b>	261,730	1,149,541	235,025	164,616	68,220	3,772,939	
	%	%	%	%	%	%	%
<b>Residual Codes</b>	22.2	17.7	14.4	19.1	15.9	10.8	13.2

<sup>a</sup> Infectious Disease domain conditions representing systemic infections (such as HIV disease) or infection of an unspecified organ system are listed in this Exhibit. Other infectious diseases secondarily mapping to the Infectious Disease domain (but listed under the organ system to which they primarily map) are: Pneumonia (Respiratory domain); Respiratory System Infections - Other (Respiratory domain); Hepatitis C (Gastrointestinal domain); Urinary Tract Infection (Cystitis/Urethritis/Pyelonephritis) (Urinary domain); Sexually Transmitted Infections (Reproductive Health domain); Vaginitis and Other Pelvic Inflammatory Conditions (Reproductive Health domain); Osteomyelitis/Infectious Arthritis (Musculoskeletal domain); Skin Infection (Dermatologic domain).

<sup>b</sup> All Endocrine/Metabolic/Nutritional domain conditions are listed in this Exhibit, except for: Pregnancy Complicated by Diabetes Mellitus (listed under Reproductive Health, the domain to which it is primarily mapped), and Cancer – Thyroid (listed under Cancer, the domain to which it is primary mapped).

<sup>c</sup> All Cardiovascular domain conditions are listed in this Exhibit, except for Pregnancy Complicated by Hypertension (listed under Reproductive Health, the domain to which it is primarily mapped).

<sup>d</sup> All Respiratory domain conditions are listed in this Exhibit, except for Cancer – Bronchopulmonary (listed under Cancer, the domain to which it is primarily mapped).

<sup>e</sup> All Gastrointestinal domain conditions are listed in this Exhibit, except for: Cancer – Esophagus; Cancer – Gastric; Cancer – Colorectal; Cancer – Anal; Cancer – Hepatobiliary; and Cancer – Pancreatic (all listed under Cancer, the domain to which they are primary mapped).

<sup>f</sup> All Urinary domain conditions are listed in this Exhibit, except for: Cancer – Renal; and Cancer – Bladder, which are listed under Cancer, the domain to which they are primary mapped.

<sup>g</sup> All Reproductive Health domain conditions are listed in this Exhibit, except for: Cancer – Cervical; Cancer – Uterine; Cancer – Ovarian; Cancer – Female Reproductive – Other; Carcinoma in Situ – Cervical; Carcinoma in Situ – Female Reproductive – Other; Cancer – Prostate; and Cancer – Testicular (all listed under Cancer, the domain to which they are primary mapped). A very small number of women were coded with men-only conditions and men coded with women-only conditions; this may be legitimate (in transgender patients), or may represent coding errors.

<sup>h</sup> Contraceptive Care Management is treated as a “condition,” because it is such a common and important health issue for women. This is the only medical procedure that is treated as a condition in this report. This procedure is counted towards the frequencies listed here only if a clinician enters one of the ICD-9-CM diagnosis codes mapping to Contraceptive Care Management on an encounter form.

<sup>i</sup> All Breast domain conditions are listed in this Exhibit, except for: Cancer – Breast; and Carcinoma in Situ – Breast, Ductal or Lobular, which are listed under Cancer, the domain to which they are primary mapped.

<sup>j</sup> Cancer rates do not necessarily represent new (incident) cancer cases. Carcinoma in Situ can be grouped in this report within the Cancer domain.

<sup>k</sup> All Hematologic/Immunologic domain conditions are listed in this Exhibit, except for: Lymphomas; Leukemias; and Multiple Myeloma (all listed under Cancer, the domain to which they are primary mapped).

<sup>l</sup> All Musculoskeletal domain conditions are listed in this Exhibit, except for Cancer – Bone/Connective Tissue (listed under Cancer, the domain to which it is primarily mapped).

<sup>m</sup> All Neurologic domain conditions are listed in this Exhibit, except for Cerebrovascular Accident/Transient Ischemic Attack (listed under Cardiovascular, the domain to which it is primarily mapped), and Cancer – Brain/Nervous System (listed under Cancer, the domain to which it is primary mapped).

<sup>n</sup> All Dermatologic domain conditions are listed in this Exhibit, except for Melanoma (listed under Cancer, the domain to which it is primarily mapped).

<sup>o</sup> The “Other” domain consists of symptoms, health risk factors, psychosocial factors, external factors, and residual conditions that do not fit within another major condition.

## Chapter 7 Health and Healthcare Disparities Among Veterans with Serious Mental Illness

<sup>p</sup> The rate of tobacco use may under-estimate true prevalence, as clinicians may not code this health risk behavior as a diagnosis on the clinical encounter form.

<sup>q</sup> Housing Insufficiency frequencies should not be used to estimate the proportion of Veteran VHA patients who are homeless, since it detects only Veterans who received a diagnosis code for housing insufficiency as part of a medical encounter. Also see: Montgomery AE, Fargo JD, Byrne TH, Kane VR, Culhane DP. Universal screening for homelessness and risk for homelessness in the Veterans Health Administration. *American Journal of Public Health* 2013;103 Suppl 2:S210-S211.

**Denominator:** All Veterans who used any VHA care in FY2013 (VHA outpatient care, inpatient care, pharmacy care, or Non-VA [Fee] Medical Care), referred to as “Veteran FY2013 VHA patients” (Data source: WHEI Master Database).
