

Data Dictionary: GPD Case Management Caseload Tracking Tool

VHA Homeless Programs

This manual provides information and data definitions regarding the GPD Case Management Caseload Tracking Tool.

GPD Case Management Caseload Tracking Tool Overview

The GPD Case Management Tool is designed to give providers an Excel-based tool for tracking Veterans served in their GPD Case Management (CM) grant. Providers should maintain this spreadsheet for the duration of their grant award. Any edits/deletions will result in changes to the grant's overall total counts. Providers are expected to send completed workbooks to their VA GPD Liaison each month for review. Keep in mind, these spreadsheets contain Protected Health Information (PHI). When emailing completed spreadsheets to your Liaison each month ensure that they are sent encrypted. Liaisons will upload the data for GPD Program Office reporting and compliance purposes.

Information captured in this tool can be filtered using the built-in tabs:

- **All Veterans:** This button displays all Veterans served for the duration of the grant award.
- **Current Census:** This button displays all Veterans actively enrolled (not yet exited) under the grant.
- **Closed:** This button displays all Veterans that have exited from the grant.

To verify completeness of the data entered, clicking the “**Data Validation**” button will loop through the records and provide feedback on records requiring corrections. The “**Upload Data to SharePoint Site**” button is for VA internal use only and will not work for users outside the VA firewall.

Please refer to the **GPD CM Caseload Tracking Tool Quick Guide** document for more information on working with the Excel functionality.

Please address any questions and concerns regarding the GPD CM Caseload Tracking Tool to the GPD Program Office at GPDGrants@va.gov.

TABLE OF CONTENTS

The tool is divided into four sections: Veteran Information, Lead Case Manager, Entry Information, and Exit Information.
