Joanna Briggs Institute

- JBI is a scientific non-profit organization with HQ in the Health Sciences Faculty at the University of Adelaide in South Australia
- Through its database and the tools, JBI aims to promote and support evidence-based practice for patient care
- The information available in JBI comes from over 70 JBI collaborating centers in every continent worldwide
- JBI is available exclusively on the Ovid platform
Access JBI via VA National Desktop Library

VHA National Desktop Library

Find a Database

- AccessAnesthesiology*
  AccessAnesthesiology includes anesthesiology ebooks, videos, interactive self-assessments, case studies, practice guidelines, drug database, curriculum development tools and more.

- AccessEmergency Medicine*
  AccessEmergency Medicine includes emergency medicine ebooks, videos, interactive self-assessments, images, drug database, curriculum development tools and more.

- AccessMedicine*
  AccessMedicine includes medical ebooks, videos, interactive self-assessments, diagnostic tests, practice guidelines, drug database, curriculum development tools and more.

- AccessMedicine – Hematology Oncology Collection*
  AccessMedicine – Hematology Oncology Collection includes hematology oncology ebooks, quick reference, interactive review questions, case studies, calculators, curriculum development tools and more.

Access JBI via VA National Desktop Library

- **Health Business Elite**
  Health Business Elite provides comprehensive full-text journal content detailing all aspects of health care administration and other non-clinical aspects of health care institution management.

- **Health Policy Reference Center**
  Health Policy Reference Center is a full-text research database providing full-text publications and journal articles covering all aspects of health policy.

- **Joanna Briggs Institute Evidence Based Practice (EBP) Database**
  The Joanna Briggs Institute EBP database is a comprehensive range of resources including evidence summaries, evidence-based recommended practices, best practice information sheets, systematic reviews, consumer information sheets, systematic review protocols, and technical reports.

- **Joint Commission Manual E-dition**
  Joint Commission E-dition provides all standards and requirements for Joint Commission accreditation and certification programs.

  *No remote access via Athens - Available only at a VA facility*

- **Lexicomp Online for Dentistry**
  Lexicomp Online for Dentistry provides dental-specific pharmacology information and drug interaction analysis tools.

- **Library, Information Science & Technology Abstracts (LISTA)**
  LISTA is a citation database covering librarianship, classification, cataloging, bibliometrics, online information retrieval, information management and more.

7 full text publications

- Guidelines to implement in clinical practice
  1. Evidence Summaries
  2. Evidence Based Recommended Practice
  3. Best Practice Information Sheets
  4. Consumer Pamphlet Sheets

- Detailed documents for further investigation
  5. JBI Systematic Reviews
  6. JBI Systematic Review Protocols
  7. Technical Report
Evidence Summaries

- A summary of the best existing international evidence among the most common diseases and conditions.
- The summary always starts with a clinical question and the clinical bottom line “summary of the condition/disease/treatment”.
- Evidence is graded to indicate its importance, with complete references at the end showing the sources used.
Evidence Based Recommended Practice

Evidence Based Recommended Practice Sheets

- Document detailing evidence based steps or procedures to take when treating a variety of diseases or conditions.
- Offers a list of tools at the beginning which inform what you will need use to undertake the procedure correctly.
- The practice sheets are always accompanied with an evidence summary making this a very complete document.
Best Practice Sheets & Technical Report

**Best Practice Sheets**
- Document summarizing the data and recommendations of systematic reviews by specialised treatment areas.
- Offers health professionals easy to understand guidelines which they can apply directly in their daily practice.

**Technical Reports**
- The ‘Technical Reports’ detail all the steps and information used to create the Best Practice Sheets above.
Consumer Information Sheets

- The information found in this documentation is always derived from Evidence Based Medicine.
- Concise information which is easy to digest within a 2 page format.
- Useful for both Health professionals as well as for patient information.
- The JBI tool “Pamphlet Builder” allow users to create their own information sheet.
Systematic Reviews & Protocols

**Systematic Review**
- Document offering a very detailed analysis of the current scientific international literature for specific treatments and therapies.

**Protocols**
- Document that shows the steps and methods being followed in order to conduct and complete a future systematic review.
JBI levels of evidence

- **JBI Levels of Evidence (PDF)**
  - The JBI levels of evidence help describe the strength of the evidence found in the Evidence Summaries. JBI assigns levels 1 to 5 [1 systematic reviews, 5 expert opinions].

- **JBI Grades of Recommendation (PDF)**
  - Grading system that helps professionals to quickly establish the importance of the evidence. JBI assigns a level *[A or B]* to its recommendations found within the Best Practice Sheets and the Evidence Summaries.
    * Some older Best Practice Sheets will continue to show A, B, C, D grades.
JBI Tools
Overview of the JBI tools

Click on the image
Overview of the JBI tools

- **Evaluate the evidence**
  - Journal Club
    Tool to evaluate the evidence found in the literature in groups
  - RAPid (Rapid Appraisal Protocol Internet Database)
    Tool to evaluate the evidence found in the literature individually
  - SUMARI (System for the Unified Management of the Assessment & Review of Information)
    Premier tool that allows experienced reviewers to create systematic reviews
  - TAP (Thematic Analysis Program)
    Tool that allows a user to demonstrate graphically qualitative evidence

- **Implement the evidence in practice**
  - Manual Builder [available in Spanish]
    Tool that allows users to create clinical procedure manuals for their ward/hospital
  - Pamphlet Builder [available in Spanish]
    Tool that allows users to create evidence based information sheets for patients and staff
  - CAN-IMPLEMENT
    Tool that allows users to adapt national guidelines for local requirements

- **Measure the application of evidence based procedures [Audits]**
  - PACES (Practical Application of Clinical Evidence System) [available in Spanish]
    Tool that allows users to create clinical audits for approx. 160 predetermined evidence based processes
A tool that allows a group of users to evaluate the evidence found within the literature, with the added option of being able to share the conclusions within the Journal Club group.

Conclusion

The purpose of this review was to assess handwashing research approaches in LMIC and understand their impact with regard to long-term behaviour adoption. Our findings determined that the evidence base regarding successful, behaviourally based handwashing approaches is inadequate. While handwashing adherence is recognized as a foundation of health maintenance in communities and institutional settings, global health initiatives frequently overlook its importance and the need to support studies capable of determining the most effective approach for measuring and promoting its long-term adoption. This

The JBI Systematic Review Suite

A tool that permits researchers to undertake in-depth quality systematic reviews of the literature for a particular topic.

Click for additional information
What is SUMARI?

- What is SUMARI?
  The System for the Unified Management, Assessment and Review of Information

- The new JBI SUMARI is designed to facilitate the entire review process, from protocol development, team management, study selection, critical appraisal, data extraction, data synthesis and writing a systematic review report

The process of creating a systematic review involves the phases listed across the top of the screen

- What has changed?
  - JBI SUMARI supports the entire review process, including allowing you to manage review teams and contributors to your review. It's now an online web-based application so there's no need to download and install any software. The new SUMARI supports more review types
What is SUMARI?

- The new SUMARI now supports more review types. What are the review types?

- Effectiveness Review
- Qualitative Review
- Cost/Economic Review
- Prevalence/incidence Review
- Diagnostic test accuracy
- Etiology/risk Review
- Text/opinion Review
- Mixed methods *
- Umbrella/overviews
- Scoping reviews
- Custom Review *

* you can choose to include multiple approaches within the one review.

The Review Frameworks may be qualitative or quantitative, the steps that we see later, and the types of analysis and results are selected during the review.
Thematic Analysis Program

A tool that allows researchers to use qualitative methods to find the best evidence.
This page lists the **Projects** that are in the system. To add a project, click on the *Add* button. To edit a project, click on the *edit* link under the *edit* column.

What is Evidence Based Health Information?

Just as a detective searches for evidence to solve a crime, so too do health professionals look for evidence to guide their practice. The detective must have evidence to support their case. In a similar fashion, the health care professional must have evidence to support their proposed course of treatment. They search for information that will help them to provide the most effective or beneficial form of care to their patients. Due to the wealth of information available to them, the process of discovering which information is the best can be difficult and time consuming. It would take an enormous amount of time for your doctor to sift through the large amounts of research and information available to them on a particular topic. This is where the Joanna Briggs Institute comes into play. We conduct the ‘detective’ work, providing them (and you) with the best available evidence.

Evidence Reliability

The evidence related to the topic of each consumer publication produced by the Joanna Briggs Institute is assessed for reliability and quality. We do not call a procedure or treatment, but the evidence (or research) that is available to support it. Evidence can play a critical role in any investigation and it is important for detectives to recognize evidence that will provide painful information to aid in the investigation.

This is also the case when assessing health information, as some types of evidence are more reliable than others. For Joanna Briggs Institute evidence based information for consumers, you can be assured that the best available evidence is utilized. If you would like more information about research and levels of evidence, please contact the Joanna Briggs Institute or visit the research page of our consumer website.

What does this mean for consumers?

As consumers of health care it is important to know that your treatment is based on the best available evidence. It is also important that you are provided with all of the information in order to have greater independence in relation to your own health care decisions and to be involved in the decision making process.

Further Information

The Joanna Briggs Institute Consumer Information Program provides up to date literature reviews to ensure your information is based on the best available evidence. The Institute also produces systematic reviews and Best Practice information sheets aimed at clinicians and health professionals. This means you are provided with the same high standard of publications based on the same information as those working directly in the field.

The VHA National Desktop Library is an online medical library available staff VA-wide that provides full-text access to clinical textbooks, journals and databases. You are now on an internet site, but some of the resources in the Desktop Library will link to sites that are on the VA intranet. To access those, you will have to log into your remote account (VPN) or be on the VA network. Resources on the site are only available to VA staff. However, the Veterans Health Library is available to provide health related information to Veterans, their families and caregivers.

Find an Online Journal or Online Book

**JBI Resource Center**

- **Welcome to the JBI Resource Center**
  - This site contains information about the many support and training options available to you as a Joanna Briggs Institute member.
  - There are pre-recorded training videos for the JBI EBP Database and the various JBI Tools. You can view these videos directly from this site, or copy the video links into your own site so that your users can watch the videos at their own convenience. There are also a range of reference cards and user guides for you to download and make available to your users.
  - Simplify your access to JBI resources, and enable your users to access from anywhere in their workflow with the many access options available to you from Ovid Technical Support. Set a custom search box so that users can search the JBI EBP Database directly from your website. If you do not have a website, Ovid Technical Support can provide a custom landing page for you to access the JBI EBP Database and Tools quickly and easily.
  - If you have any questions or requests about the information in this site, please don't hesitate to contact the Ovid Training Department and Ovid Technical Support.
