

Department of Veterans Affairs Retrospective Review Plan Report

January 14, 2014

Agency/ Admin	RIN/OMB Control No.	Title of Initiative/ Rule/ICR	Brief Description	Actual or Target Completion Date	Anticipated savings in costs and/or information collection burdens, together with any anticipated changes in benefits (please quantify, to the extent feasible, and also specify baseline, time horizon, and affected groups)	Progress updates and anticipated accomplish- ments	Notes*
Office of the General Counsel	2900- AO13, proposed rule	VA Compensation and Pension Regulation Rewrite Project	VA has reorganized and rewritten its compensation and pension regulations in a logical, user-friendly format. The intent of the Rewrite Project is to assist veterans, their representatives, and VA staff in locating and understanding these regulations. The new regulations will be placed in 38 CFR, and become effective for claims filed after a	TBD, this project will continue to be updated but is not expected to be finalized for a couple of years. VA already has published 20 proposed rules and revised the rules based on public comments. This year we published a 21st consolidated proposed rule to allow the public to comment on the	No anticipated cost savings. The new regulations will not alter the benefits VA provides nor alter claims procedures. By reorganizing and redrafting these regulations they will become much easier to find, read, understand, and apply. The new reorganization and redrafting should reduce the amount of time it takes to	Proposed rule AO13 was published in the Federal Register on November 27, 2013. 78 FR 71042. Due to the size of the proposed rule, VA is providing 120 days for public comment. VA will draft a final rule based on comments but publication

Burden Reduction Initiatives

Sub-Agency	Title	Description of the initiative	Hours of paperwork / reporting eliminated	Estimated effective date of the change	Notes
Veterans Benefits Administration	E-Benefits Portal	2900-0737 - eBenefits is a joint VA and Department of Defense (DoD) web portal that provides resources and self-service capabilities to Veterans, Servicemembers, and their families, to research, access, and manage their VA and military benefits and personal information. eBenefits uses secure credentials to allow access to personal information and gives users the ability to perform numerous self-service functions. In April 2012, DoD, with support from VA, changed the registration form resulting in a simpler and faster registration process. The reduction in burden hours for the enhanced form is estimated to be 2 minutes (a decrease from 5 minutes). In September 2013, the estimated eBenefits user base grew to 3,000,000. As a result, it is assumed hours of paperwork will be eliminated based on the portal's user base. Registration information belongs to DoD and is not collected by eBenefits. Once an authenticated user accesses their personal profile screen, numerous fields are pre-populated, e.g. name, thus the user has fewer fields to complete.	100,000	9/2013

January 14, 2014

Veterans Benefits Administration	Disability Benefits Questionnaires (Groups 1 and 2)	2900-0776 and 2900-0779-DBQs use standardized questions specifically designed to address the questions needed by VA to adjudicate a veteran's disability claim. Additionally, DBQs enable a Veteran to have a treating physician complete the DBQ and, thereby, aid in VA's disability examination process. VA, VA-contracted, and private providers will all use the same identical standardized questionnaire in the future, resulting in consistent products regardless of who completes the form. VA is currently building and will soon field an online, interview-based tool that will allow both VA and private providers to complete and submit DBQs online. This interview-based tool will assist in the completion of a DBQ thereby making it easier and faster to complete. Additionally, the tool will collect data and automatically upload it into VA adjudication system which will create an aggregate timeliness and quality advantage for claims processing and thus help alleviate claims backlog. At this time, there will be no changes to the forms but VA does plan to have future improvements to the content of the forms. The estimated timeframe for implementation of this planned improvement is in late FY2014.	180,750	09/30/2014

Veterans Health Administration	Application and Renewal for Health Benefits	2900-0091 Collects Veteran information to enroll for health care benefits. It establishes basic eligibility, identifies 3rd party health insurance coverage, identifies prescription copayment, provides for income verification, and serves as a mechanism to make changes upon admission or yearly financial updates. VHA plans to consolidate the 10-10EZ and 10-10EZR online applications by electronically presenting questions to Veterans based on responses they provide and data needed by VA to effect a determination for benefits or renewal for VA health care. VA eliminated the financial reporting requirements for the 10-10EZR in 2013. It is now optional. VA has discontinued use of the VA Form 10-10EZ to collect updated veteran information. This further eliminates the collection of needless and duplicative information from veterans. The 10-10 EZ had a reduction of 15 minutes, due to reduction of questions and current information from the Enrollee survey.	658,990	Spring 2014	<i>\$6,988,950 - Cost Savings to the Government.</i>
