

You asked, we listened!

Introducing Zipit® Now™ TS

The newest member of the Zipit® Enterprise Critical Messaging Solution™ is smaller, lighter, faster, provides longer battery life, delivers more features, and has all of the accessories you need.

Zipit® Now™ TS

- The same low cost data plan and messaging service you're used to from Verizon Wireless and Zipit - \$15/month¹
- Receive and respond to Priority Messages (Pages)
- Send Priority Messages and track delivery and responses
- Send and receive Secure Text messages
- Send and receive ZText messages that allow you to communicate with any cell phone
- Login with multiple identities to handle rotating roles
- Full HIPAA Compliance

You asked for better battery life and we delivered.

The standard battery provides approximately 50 hours of normal usage² and will last for almost 5 days in Standby mode. A larger, extended life battery is also available and provides ~144 hours (6 days) of normal usage and approximately 13 days of Standby.

The batteries are user replaceable and can easily be swapped with a fully charged battery or recharged in the device in ~ 3 hours with the included AC Adapter.

3 external chargers are available to charge spare batteries – a single battery charger, a 4-bay battery charger, and a 12-bay battery charger. All 3 chargers support the standard and the extended life batteries.

You wanted it smaller and with a touch screen - we've got both.

1 – Taxes and surcharges may be added to your Verizon bill.

2 – Normal Usage is based on receiving and responding to 50 critical messages per day. Poor network reception can significantly impact results.

Zipit® Now™ TS — Specification

Hardware & Software Implementation

Feature	Hardware Specification
Physical Dimensions - Length, Height, Width (Inches)	4.63”h x 2.30”w x 0.47”d
Screen Size & Type	Color 3.7” WVGA 480x800 OLED touch
Weight - (Ounces / Grams)	4.59 oz / 130 gm
Standard Battery	1300 mAh ~50 hours of normal usage (5 days standby)
Extended Battery	3500 mAh ~144 hours (13 days standby)
Charging	Micro USB
Operating Temperature	32° to 140° F (0° to 40° C)
FCC	Class B
Camera	Disabled
Feature	Software Specification
Wi-Fi	802.11 b/g
Wi-Fi Standards	WEP, WPA-AES, WPA-TKIP, WPA2-AES, WPA2-TKIP, WPA Enterprise-AES, WPA Enterprise-TKIP, WPA2 Enterprise-AES, WPA2 Enterprise-TKIP
