Weekly update on Virtual Lifetime Electronic Record (VLER)

As of December 20, 2012, Department of Veterans Affairs (VA) and Department of Defense (DoD) have transferred approximately 3,100 Integrated Disability Evaluation System (IDES) case files within Electronic Case File Transfer (eCFT). Eleven of the 139 IDES sites began using eCFT on September 28, 2012. eCFT enables VA and the Military Services to meet the Secretary of VA and the Secretary of Defense's directive to create a paperless, searchable IDES claims file transferred between VA and DoD. Previously, hard-copy case files—including service treatment records (STRs), commanders' letters, narrative summaries, and compensation and pension examination reports—were sent via FedEx or other delivery methods. By using a shared, paperless, and searchable system, the Military Services and VA will increase the accountability, efficiency, and transparency of the IDES process.
