Weekly update on Virtual Lifetime Electronic Record (VLER)

On January 27, 2013, Department of Veterans Affairs (VA) Virtual Lifetime Electronic Record (VLER) deployed Veterans Tracking Application (VTA) version 2.1.1, which adds Service member separation data (13 data elements, including date of separation, separation pay, etc.) to the VTA data extract. Department of Defense (DoD) and VA Integrated Disability Evaluation System (IDES) customers completed User Acceptance Testing on January 17, 2013, and confirmed the delivery of VA/DoD Information Repository (VADIR) historical records to VTA. VTA is a legacy application which currently helps IDES program offices track Service members and Veterans separating through the IDES.
