

Case File Transfer using Medchart, VLER DAS and VBMS (IDES case)

Medchart IOC:

When Medchart is launched, users from VA and DoD will each upload and access joint files.

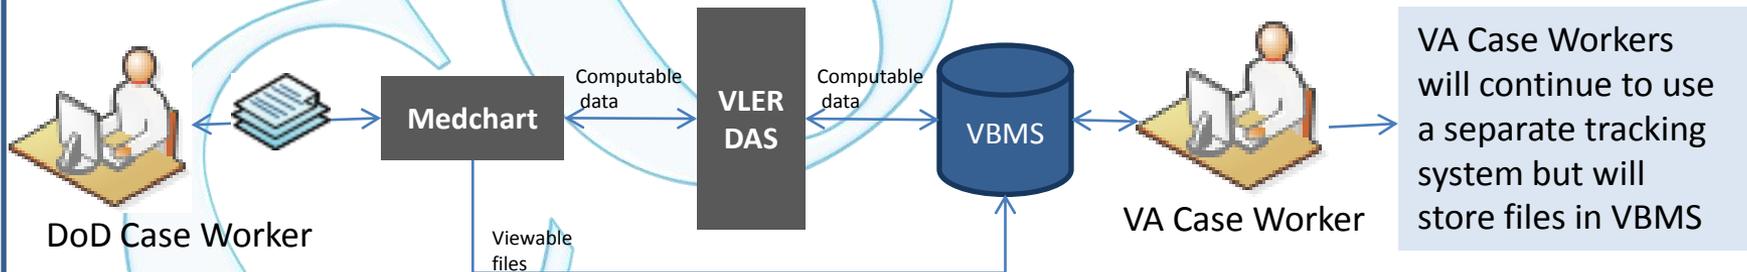

DoD Case Workers will continue to use legacy systems, such as VTA, AWCTS

VA Case Workers will continue to use legacy systems for tracking and storage

Mid-term future state:

DoD will continue to upload files to Medchart. The files will be distributed by the DAS to VA and held in VBMS.

VA Case Workers will continue to use a separate tracking system but will store files in VBMS
