

User Story Number: US005.07

User Story Name: Retrieve Exam Result by Claim Number/SSN, 'Completed' Status, and Date Range

Priority: High

ClearQuest Number: DAS_CR245

Author: James Picker/Business Analyst

Story: As a VBA consuming application, I want a list of available exam results (first pass) having a status of 'Completed' retrieved by Social Security Number (SSN) for a given date range, so that I can request the exam result (second pass) that I need from the list.

Revision History

Date	Version	Description	Author
08/03/2012	v0.01	Draft	James Picker
09/11/2012	v0.03	Analyst Review	James Picker
09/14/2012	v0.04	Peer Review	James Picker
09/17/2012	v0.05	Technical Writer Review	Nancy Burak
09/26/2012	v0.06	DAS PM Review	Stephen Pelchar Ken Brunetto
10/4/2012	v1.0	Formal Review - Approval	Joshua Lawton-Belous
10/11/2012	v1.1	Changed code to 'Completed' and added Date Range. Formal Review and Approval received.	Joshua Lawton-Belous
10/17/2012	v2.0	Sent for signature	Nancy Burak
11/20/2012	v2.1	Made changes to include Assigning Facility for Patient ID	Eniola Alabi
11/20/2012	v3.0	Formal Review – Approved	William G. Jackson
12/06/2012	v3.1	Added element "Date (Status) Modified" to the list of query elements and first pass pick list.	Eniola Alabi
12/13/2012	v4.0	Formal Review - Approved	William G. Jackson
12/31/2012	v5.0	Clerical change only. Reordered acceptance criteria.	Janice Clayton
1/4/2013	v5.1	Added "Date/Time/Time Zone" to the Date Status Modified data element	Eniola Alabi
1/3/2013	v6.0	Formal Review - Approved	William G. Jackson

Background

Interested parties must retrieve stored exam results to review and adjudicate disability claims. An example of how this functionality may be used is as follows:

Veterans Benefits Administration (VBA) must retrieve stored exam results, in order to automate disability rating calculations for VBA Ratings Specialists. VBA Ratings Specialists will only retrieve those exam results that are deemed 'Completed' and have an associated claim established. VBA currently uses (in most cases) the SSN as the identifier for established claims. A veteran/servicemember's SSN is used as the identifier for an initial claim established with VBA, and subsequent claims for that veteran/servicemember will continue to use this SSN as the identifier. Therefore, a query for exam results by SSN aligns with VBA's current business workflow.

The DBQ Forms Service sends the SSN to Virtual Lifetime Electronic Record (VLER) Data Access Services (DAS) with the exam result. VLER DAS sends the SSN to the Health Data Repository (HDR) for storage with the exam result. Hence, consuming applications can query VLER DAS for exam results that have been previously stored with an SSN.

Conversation

1. VLER DAS receives a request from a consuming application for a list of exam results filtered by SSN and Status is 'Completed' for a given date range.
2. VLER DAS sends a list of available exam results filtered by SSN and Status is 'Completed' for a given date range to the consuming application (first pass).
3. In the first pass pick-list VLER DAS sends the following common data elements for each available exam result to the consuming application:
 - a. Patient Information (First Name, Middle Name, Last Name, Date of Birth, ID, Assigning Authority, and Assigning Facility)
 - b. Document ID
 - c. Disability Benefit Questionnaire (DBQ) Document Type
 - d. Creation Date (Date, Time, and Time Zone)
 - e. Date Status Modified (Date, Time, and Time Zone)
 - f. VA Facility Information (Name, ID, Assigning Authority)
 - g. Physician Information (First Name, Middle Name, Last Name, ID, Assigning Facility or Assigning Authority)
 - h. Status of Exam Result
 - i. Claim Number/SSN
4. The consuming application sends the Uniform Resource Locator (URL) for a specific exam result from the first pass pick-list to VLER DAS. VLER DAS processes the request for a specific exam result. This request and its response for a specific exam result is called the second pass.
5. VLER DAS sends the specific exam result to the consuming application (second pass).

6. VLER DAS sends the specific exam result to the consuming application (second pass) each time the user selects an item from the same pick-list.

Detailed Listing of Acceptance Criteria

Requirement ID	Description
US005.07.01	VLER DAS sends a pick-list of available exam results to the consuming application (first pass) in response to a request for exam results filtered by SSN and Status is 'Completed' for a given date range.
US005.07.02	In the first pass pick-list VLER DAS sends the common data element Patient Information (First Name, Middle Name, Last Name, Date of Birth, ID, Assigning Authority, and Assigning Facility) for each available exam result to the consuming application.
US005.07.03	In the first pass pick-list VLER DAS sends the common data element Document ID for each available exam result to the consuming application.
US005.07.04	In the first pass pick-list VLER DAS sends the common data element DBQ Document Type for each available exam result to the consuming application.
US005.07.05	In the first pass pick-list VLER DAS sends the common data element Creation Date (Date, Time, and Time Zone) for each available exam result to the consuming application.
US005.07.06	In the first pass pick-list VLER DAS sends the common data element VA Facility Information (Name, ID, Assigning Authority) for each available exam result to the consuming application.
US005.07.07	In the first pass pick-list VLER DAS sends the common data element Physician Information (First Name, Middle Name, Last Name, ID, Assigning Facility or Assigning Authority) for each available exam result to the consuming application.
US005.07.08	In the first pass pick-list VLER DAS sends the common data element Status of Exam Result for each available exam result to the consuming application.
US005.07.09	In the first pass pick-list VLER DAS sends the common data element Claim Number/SSN for each available exam result to the consuming application.
US005.07.10	VLER DAS sends the specific exam result to the consuming application (second pass) each time the user selects an item from the same pick-list.
US005.07.11	In the first pass pick-list VLER DAS sends the common data element Date Status Modified (Date, Time, and Time Zone) for each available exam result to the consuming application.

Constraints

VLER DAS can only retrieve and send available first pass data elements stored in HDR. For example, if physician name is not present in the exam result when stored, then VLER DAS cannot return the physician name in the first pass pick-list.
