

Personal Health Inventory

Use this circle to help you think about your whole health.

- All areas are important and connected.
- The body and mind have strong healing abilities.
- Improving one area can help other areas.
- The inner ring represents your values and aspirations. Your care focuses on you as a unique person.
- Mindful awareness is being tuned in and present.
- Your self-care and everyday choices make up the green circle.
- The next ring is professional care (tests, medications, supplements, surgeries, examinations, treatments, and counseling). This section includes complementary approaches like acupuncture and yoga.
- The outer ring includes the people and groups who make up your community.

Rate where you feel you are on the scales below from 1-5, with 1 being miserable and 5 being great.

Physical Well-Being				
1 Miserable	2	3	4	5 Great
Mental/Emotional Well-Being				
1 Miserable	2	3	4	5 Great
Life: How is it to live your day-to-day life?				
1 Miserable	2	3	4	5 Great

What do you live for? What matters to you? Why do you want to be healthy?

Write a few words to capture your thoughts:

I like having a sense of purpose, serving the common good, and satisfaction of a job well done. Family, the camaraderie and structure of Army life, and always having someone who's got my back, matter to me.

Where You Are and Where You Would Like to Be

For each area below, consider “Where you are” and “Where you want to be”. Write in a number between 1 (low) and 5 (high) that best represents where you are and where you want to be. The goal is not to be perfect in all areas. You do not need to be a “5” in any of the areas now, nor even wish to be a “5” in the future.

Area of Whole Health	Where I am Now (1-5)	Where I Want to Be (1-5)
Working the Body: “Energy and Flexibility” Moving and doing physical activities like wheeling, walking, dancing, gardening, sports, lifting weights, yoga, cycling, swimming, and working out in a gym.	2	5
Recharge: “Sleep and Refresh” Getting enough rest, relaxation, and sleep.	2	4
Food and Drink: “Nourish and Fuel” Eating healthy, balanced meals with plenty of fruits and vegetables each day. Drinking enough water and limiting sodas, sweetened drinks, and alcohol.	3	4
Personal Development: “Personal life and Work life” Learning and growing. Developing abilities and talents. Balancing responsibilities where you live, volunteer, and work.	2	5
Family, Friends, and Co-Workers: “Relationships” Feeling listened to and connected to people you love and care about. The quality of your communication with family, friends and people you work with.	1	5
Spirit and Soul: “Growing and Connecting” Having a sense of purpose and meaning in your life. Feeling connected to something larger than yourself. Finding strength in difficult times.	2	5
Surroundings: “Physical and Emotional” Feeling safe. Having comfortable, healthy spaces where you work and live. The quality of the lighting, color, air, and water. Decreasing unpleasant clutter, noises, and smells.	3	5
Power of the Mind: “Relaxing and Healing” Tapping into the power of your mind to heal and cope. Using mind-body techniques like relaxation, breathing, or guided imagery.	2	4
Professional Care: “Prevention and Clinical Care” Staying up to date on prevention and understanding your health concerns, care options, treatment plan, and their role in your health.	3	5

Reflections

Now that you have thought about what matters to you in all of these areas, what is your vision of your best possible self? What would your life look like? What kind of activities would you be doing?

I have a sense of purpose with a job that matters. I feel happy and content with civilian life. I have more friends and don't have nightmares. I am connected with my wife and daughter and my marriage is strong.

Are there any areas you would like to work on? Where might you start?

I'd like some help with nightmares. No more drinking, pills, or smoking. Connect with my wife. Find a sense of purpose. I'd like to communicate with some of my buddies.

After completing the Personal Health Inventory, talk to a friend, a family member, your health coach, a peer, or someone on your healthcare team about areas you would like to explore further.
