2020-03-14	613 (+45.6%)	2

March 3, NYC COH "We are encouraging New Yorkers to go about their everyday lives"

March 7, Governor Coumo Declares State of Emergency

March 12, Restrictions of Mass Gatherings

March 13, Bx is notified 2 staff PUI – presumptive +

VA-Metro New York Market Area Surge Plan

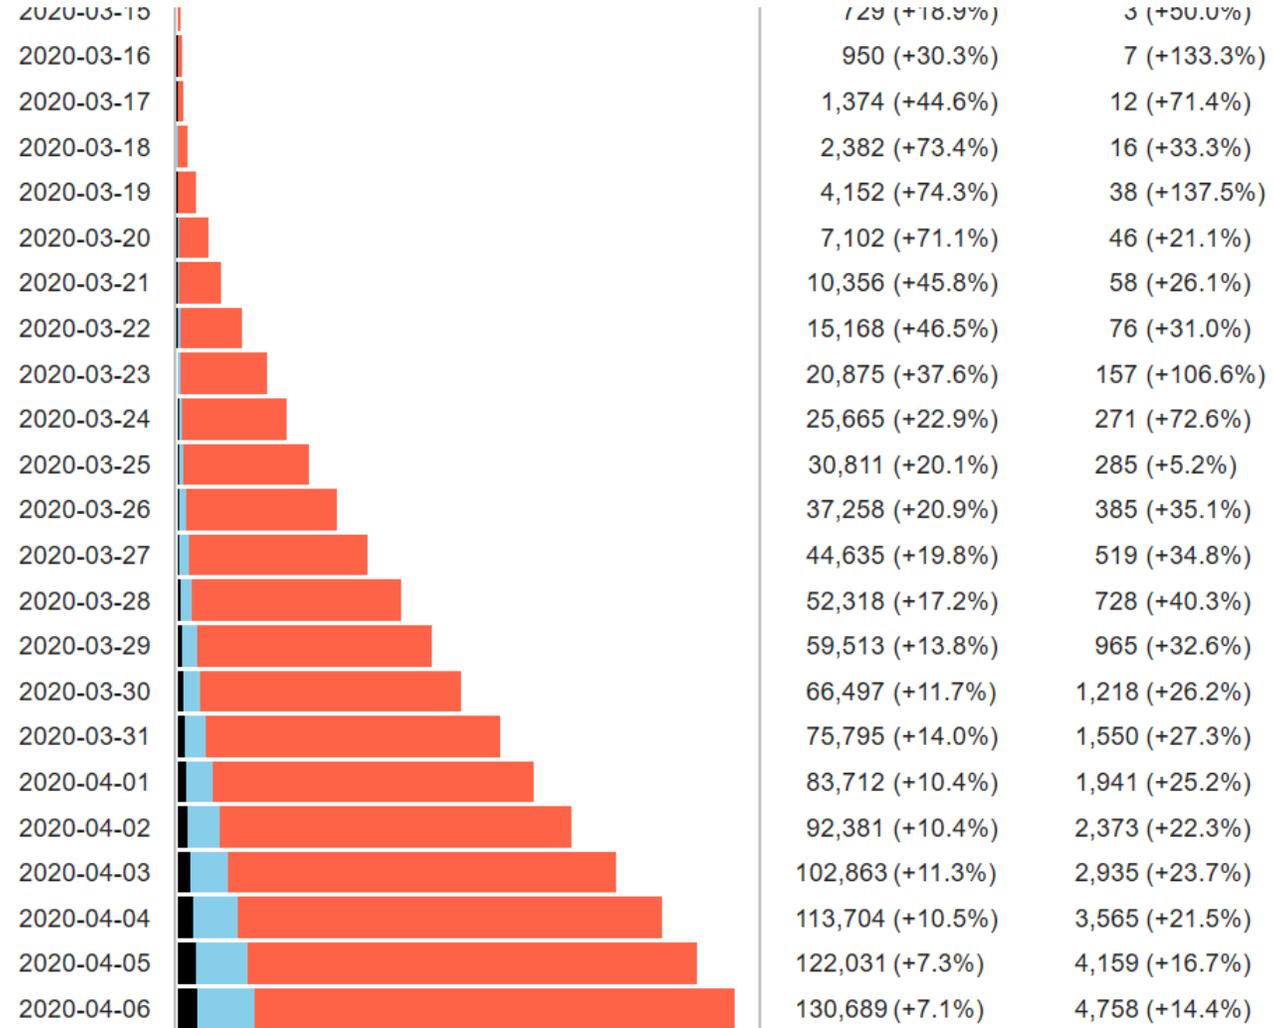

New York Harbor (2 acute Care Facilities) Bronx VA – James J Peters level 1B

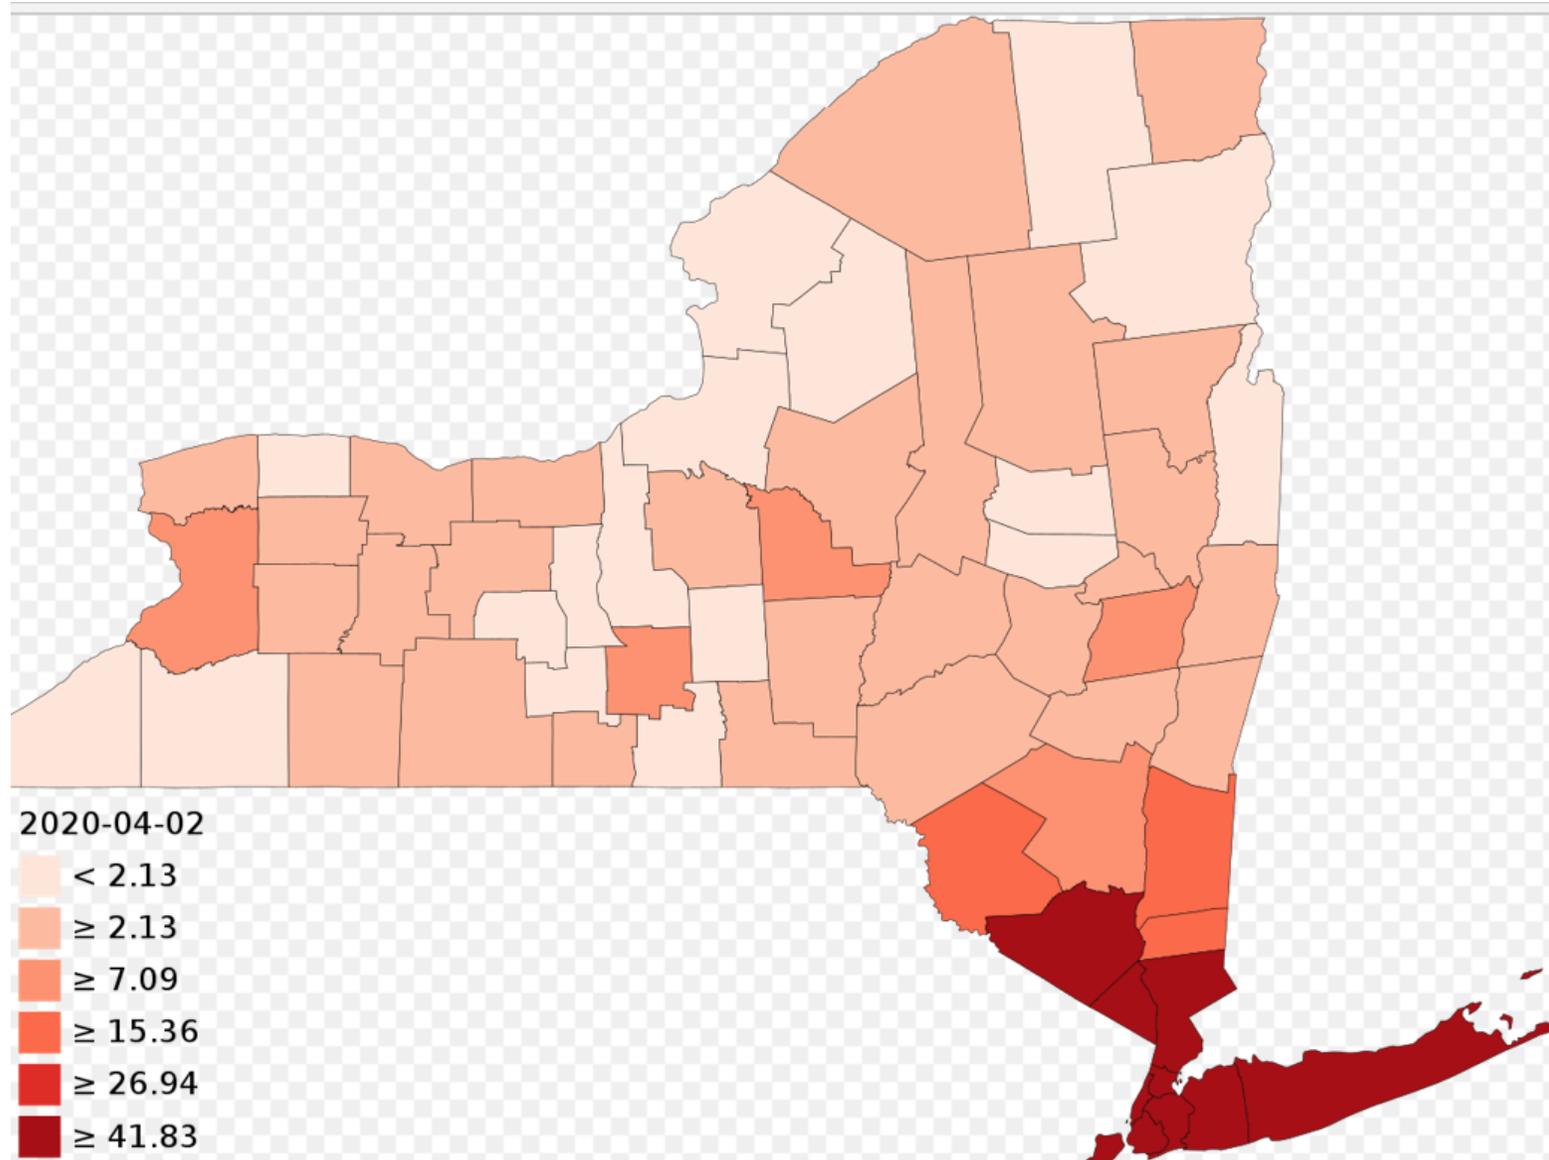

- Numbers projected for the three facilities can be managed within the current capabilities.
- Any positive COV-ID 19 Veteran who requires admission at the Brooklyn Campus
 - A previously closed inpatient unit with negative pressure is being activated to handle 12 patients
 - Single-bed rooms with appropriate bathroom facilities (13 West)
 - When census of 2-3 positive patients on 13 West transfer Non-COVID to Manhattan Campus and to JJP in the Bronx
 - Brooklyn also has a 9-bed ICU, 18 intensive care ventilators and 22 transport ventilators. T
 - Manhattan is a 1a facility with 15 Medical ICU beds and 7 Surgical ICU beds. 21 ICU ventilators and 22 transport ventilators.
 - JJP is a 1b facility with 20 ICU beds, 20 Vents
- When acute care not needed transfer to VA Hudson Valley, a level 3 complexity facility

Javitz and USS Comfort

- Non-COVID
- Now accepting COVID, 30 and 36 patients
 - 1 crew member + on USNS comfort

VISN 2 CLC Experience

- Suspected CLC to ED to keep CLCs “cold”
- First COVID + CLC resident
 - 140 bed campus style CLC in Westchester County
 - Index case tested positive on 3-17-20
 - Transferred to community 3-15-20
 - Asymptomatic CLC Employee positive on 3-19-20
 - 1 week 3 more positive cases
 - All residents tested 2/3 were COVID + and asymptomatic
- CLC now creating COVID negative neighborhood, can allow COVID + residents to return

VISN 2 CLC Experience

- 5 more CLCs now with positive cases
 - Asymptomatic spread from staff to residents before risk of asymptomatic spread fully understood and universal masking of CLC staff recommended
- Additional screening capacity likely to show more asymptomatic cases
- 3 CLCs appear to show a cluster of cases related to dialysis
 - Can be an additional concern as the dialysis residents may reside on different neighborhoods
 - CDC now recommending masking all LTC patients when leaving for medical appointments or dialysis

Take home

- Use your crystal ball
 - Do today what your future self wishes you did
 - The surge is a tsunami
 - You are the face of the Federal Government in your community
- Great leaders will emerge, but invisible folks will be your salvation
- We've never seen anything like this but we've been here before
