

## **VA Northeast Ohio Healthcare System - PGY2 Psychiatric Pharmacy Residency**

The VANEOHS is a teaching healthcare system with 18 locations in Northeast Ohio that serves more than 111,500 Veterans across 21 counties. It is a training environment for more than 3,000 students across various disciplines in affiliation with more than 200 academic institutions. The main medical center, the Louis Stokes Cleveland VA Medical Center, is one of the largest VA facilities in the country and serves as the primary residency site. It is located about six miles east of downtown Cleveland at Wade Park in University Circle.

PGY2 Program Purpose: PGY2 pharmacy residency programs build on Doctor of Pharmacy (Pharm.D.) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete an accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification, if available.

The PGY-2 Psychiatric Pharmacy Residency program provides a broad range of inpatient and outpatient psychiatric experiences. The VANEOHS employs 13 psychiatric clinical pharmacy specialists working in a variety of mental health settings (2 in Acute Inpatient Psychiatry, 9 in Outpatient Psychiatric Clinics, 1 in Pain Management/Opioid Safety/Prescription Drug Monitoring Program, and 1 in Domiciliary/Substance Use Disorders). Pharmacy residents have the opportunity to work with these individuals either on rotation or by preceptorship on projects (i.e., research/quality improvement project, medication use evaluation, journal clubs, case presentation, etc.). The goal of the residency is to promote individual growth, personal development, self-reliance and responsibility to the patient. Clinical practice and teaching at multiple levels and settings are emphasized. Pharmacy residents will gain extensive experience educating medical students and other trainees during the year through monthly lectures on the topics of pharmacotherapy of psychosis, mood disorders, and anxiety disorders. Upon completion of the PGY-2 Psychiatric Pharmacy Residency program, the resident will be able to provide and establish clinical psychiatric pharmacy services, obtain board certification in psychiatric pharmacotherapy, and implement teaching programs in any patient care setting.

### **REQUIRED EXPERIENCES:**

Adult Inpatient Psychiatry (5 months)  
Adult Advanced Inpatient Psychiatry I & II (2 months total)
