Comprehensive Integrated Inpatient
Rehabilitation Program (CIIRP)

Working Together to Improve
Quality of Life
and to
Safely Return You Home!

About the CIIRP Unit

The Comprehensive Integrated Inpatient Rehabilitation Program (CIIRP) is a rehabilitation program in which Veterans receive intensive rehabilitation services. The CIIRP team addresses physical and medical problems to maximize each Veteran's quality of life and a safe return to home.

The CIIRP unit is located in the Community Living Center (CLC) at the Dallas VA North Texas Health Care System.

The CIIRP unit is accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) and the Joint Commission (TJC).

Services Offered

The CIIRP provides services to Veterans with problems in ambulation, self care, feeding, communication and others. The rehabilitation team includes:

- ☞ Veteran/Family
- ☞ Physician
- ☞ Rehabilitation Coordinator
- ☞ Rehabilitation Nurse
- ☞ Physical Therapist
- ☞ Occupational Therapist
- ☞ Kinesiotherapist (Drivers Training)
- ☞ Speech/Language Pathologist
- ☞ Psychologist
- ☞ Social Worker
- ☞ Recreation Therapist
- ☞ Chaplain, Dietitian & Others based on need

Admission Criteria

The CIIRP team provides rehabilitation services to Veterans with the following conditions: Stroke, Amputation, Orthopedics (fractures), Deconditioning, Cardiac, Pulmonary, Neurological conditions and others.

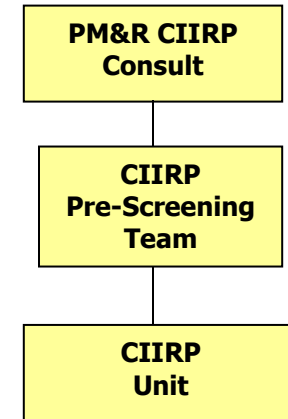

The Veteran is assessed through the following criteria:

- ☞ Must be medically stable
- ☞ Must be able to participate in therapy 3 hours a day, 5 out of 6 days a week
- ☞ Must need at least two forms of therapy (PT/OT/ST)
- ☞ Must be alert and able to follow instructions consistently
- ☞ Must be motivated, capable and willing to participate in therapy
- ☞ Should have potential to improve function or achieve independence
- ☞ Should have potential to be discharged outside of the institutional setting.

Referral Procedure

Veterans in need of intensive inpatient rehabilitation services can be referred through the PM&RS CIIRP Consult or from community through Social Workers.

Screening team assesses Veterans within 1-2 business days and communicates with referral provider via CPRS documentation or via telephone.

Benefits of Rehabilitation

Many common functional problems that benefit from rehabilitation:

- ☞ Balance and coordination
- ☞ Difficulty swallowing
- ☞ Difficulty moving in bed or from one place to another
- ☞ Difficulty with activities of daily living such as eating, grooming, dressing, bathing, etc
- ☞ Memory deficits, judgment difficulties, and/or speech and language problems, in conjunction with physical limitation
- ☞ Inability to work or function in the community due to physical impairment
- ☞ Recent weakness or limited motion in arms, legs or trunk
