**Do you experience unwanted memories?  
Do you avoid stressful situations?  
Do you have difficulty sleeping?  
Are you constantly nervous or anxious?**

You may be eligible for a research study involving a state-of-the-art treatment for PTSD, called Prolonged Exposure.

The study goal is to make this PTSD treatment work even better for more people. You will be randomly assigned to have a friend, family member, or significant other either complete surveys from home about VA treatment or to come to a few treatment sessions to learn about PTSD.
