

THE BENEFITS

This partnership between the VA and Gunnison Valley Hospital allows Veterans near Gunnison who are enrolled in the Salt Lake City VA Health Care System the option to connect with high-speed internet access, site support, and needed technology to complete video telehealth visits through VA Video Connect (VVC).

Veterans may contact their VA Care provider to request Gunnison Valley Hospital as an ATLAS site for their next video telehealth appointment.

Gunnison Valley Hospital is an ATLAS site only. **NOT Community Care.**

ATLAS partnership with Gunnison Valley Hospital

What is ATLAS?

ATLAS (Accessing Telehealth through Local Area Stations) is part of VA's Anywhere-to-Anywhere telehealth initiative which sets out to better serve the nearly 9 million Veterans who receive care through VA no matter where they are.

ATLAS partnerships with public and private organizations enhance Veteran's access to VA healthcare by offering convenient locations to receive VA care closer to home. This reduces travel time to appointments or poor internet connection at home through video telehealth (VA Video Connect).
