

Albany Stratton VA Medical Center

Honoring All Who Served

Our Mission

The Registered Nurse Transition to Practice (RNTTP) Program mission is to bridge nursing academic education and professional nursing practice. It is designed to support graduate registered nurses as they transition from an entry-level, advanced beginner nurse to a competent professional nurse. The overarching goal is safe, high-quality care for Veterans. The mission serves to provide a program which will further develop effective decision-making skills related to clinical judgment and performance, strategies to incorporate research-based and other evidence into practice, clinical leadership skills at the point of patient care; and to formulate an individual career plan that promotes a life-long commitment to professional nursing.

- Respect
- Excellence
- Trustworthy, Accessible, Quality, Innovative, Agile and Integrated

Our Program

The first month of the RNTTP Program focuses on baseline skill assessment, skill development and competency validation followed by a "rolling" curriculum.

This "rolling" curriculum includes program content offered in order throughout the year. This hybrid model facilitates the successful transition from beginning RN to competent RN by ensuring a supportive environment to facilitate acquisition of the necessary knowledge and skills.

The VA Team

Our team of experts are here to support the new graduate RN to successfully transition from an entry level RN to a practicing competent professional nurse.
