

PGY1 Pharmacy Residency Program

Please submit applications online using
National Matching Service Code: #238813

This residency site agrees that no person at this site
will solicit, accept or use any ranking-related information
from any residency applicant.

Nestled at the foot of the Big Horn Mountains in Northeastern Wyoming, Sheridan has been voted the original #1 Western Town and the King of Cowboy Towns. Beautiful scenery, friendly people, bike paths, and a historic downtown consistently make Sheridan one of the top places to live, work, and explore. The majestic Big Horn Mountains are situated perfectly to provide four seasons with spectacular beauty and grand vistas. Take to your cross country skis and snowmobiles in the winter then enjoy hiking and fishing in the summer. Make sure you attend a PRCA rodeo weekend. Fly fishing in the Big Horns is second to none. You can always finish off your day at one of the many restaurants or unique shops on historic Main Street and enjoy the wide variety of boutiques and western wear.

About Our VA

The Sheridan VA Health Care System is a mental health and primary care facility for men and women who served their country in the Armed Forces. In 1898, the grounds that are now the Sheridan VA Medical Center were set aside by President William McKinley as Fort McKenzie. In the 1920s, the fort transferred to the Bureau of Health as a hospital for men coming home from WWI with battle fatigue, or what is currently known as PTSD. Today the Sheridan VA has 200 beds and serves nearly 13,000 Veterans yearly. The health care system boasts eight community outpatient clinics, located strategically across Wyoming. Sheridan has several residential treatment programs that address multiple aspects of psychiatric care, including substance abuse, PTSD, and co-occurring mental health disorders.

Purpose

Our PGY1 residency program builds on Doctor of Pharmacy (PharmD) education and outcomes to contribute to the development of clinical pharmacists responsible for medication-related care of patients with a wide range of conditions, eligible for board certification, and eligible for postgraduate year two (PGY2) pharmacy residency training.

This unique program offers extensive involvement in ambulatory and mental health training. The preceptors and staff are deeply invested in the growth and development of residents both personally and professionally to create the optimal learning experience.
