

Acupressure for Well-Being

Pairs with VHA YouTube video Acupressure for Well-Being

Instructions

- With your thumb or finger, press or rub to massage each acupressure point pictured below for 30 seconds.
- Use the amount of pressure that feels good and is not painful.
- You can do the same point on the right and left side of the body for 30 seconds each.
- Repeat as needed up to five times daily.

Cautions

- If you are pregnant, or think you may be pregnant, talk to your medical provider before you start acupressure.
- If any of the points are in areas where you are numb, where you have a wound, severe swelling, active infection, or a recent blood clot, acupressure should not be used. Skip points that are in these areas, but you may use the other points shown in this handout away from those sites.
- If you experience any discomfort, dizziness, or other unusual symptoms, **stop acupressure immediately**.
- Contact your medical provider if symptoms do not stop.
