<b>Postdoctoral Program Admissions</b>	
Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on intern selection and practicum and academic preparation requirements:	
The Psychology Department at the VALBHCS is committed to competency-based training and close supervision in a highly collegial setting. Prior to beginning their postdoctoral experience, Fellows are expected to have a solid grounding in generalist psychology training. The primary goal of the Psychology Postdoctoral Fellowship Program is for our Fellows to develop the full range of skills required for independent functioning as a psychologist in the arenas of clinical assessment and intervention, consultation, supervision and teaching, scholarly inquiry and research, and awareness of and sensitivity to professional, ethical, legal and diversity issues. We have a commitment to the enhancement of diversity within our training programs. A second major goal of our Psychology Postdoctoral Fellowship Program is to prepare fellows to practice in one of the current high-priority areas of mental health care for Veterans, as illustrated by our Emphasis areas. Through professional activities in these areas, Fellows receive training that facilitates their development of the core advanced practice competencies. In addition, Fellows develop a depth of knowledge and advanced skills in working with specific populations and treatment settings (i.e., older adult Veterans, Veterans with Traumatic Brain Injury, Veterans with physical and sensory disabilities, and those living with Post Traumatic Stress Disorder). For the Postdoctoral Fellowship in Clinical Neuropsychology, high-priority areas include working with Veterans with	

head injury, mild cognitive impairment, dementia, or other neurological conditions.
