

Dr. Shauna Yuan, M.D., is a staff physician Neurologist at the GRECC and an Associate Professor in the Department of Neurology at University of Minnesota, Twin Cities. Dr. Yuan is a board-certified Neurologist, subspecializing in Behavioral Neurology. She sees patients with memory disorders, including Alzheimer's disease. Her laboratory research focuses on elucidating the disease mechanisms of neurodegeneration using disease-in-a-dish model with patient-derived induced pluripotent stem cells. She hopes through her research she can help to advance treatment options for her patients. She is a member of the Grossman Center and an Institute for Translational Neuroscience Scholar at the University of Minnesota.
