Welcome Statement

**VA Sierra Pacific Network (VISN 21)
975 Kirman Ave (10N21R)
Reno, NV 89502**

I would like to take this opportunity to welcome you to the PGY2 Population Health Management and Data Analytics Residency Program at the VA Sierra Pacific Network. You are entering a special portion of your pharmacy career.

The purpose of the PGY2 residency at the VA Sierra Pacific Network is to prepare clinicians and analysts for positions that focus on evidence-based therapeutics and practice applied to small and large populations of patients. The residency will encourage each resident to intellectual and personal development and foster the development of lifelong learners committed to advancing the profession of pharmacy. Your preceptors will assist and guide you in getting the greatest benefit from each experience. Goals and objectives will be set; however, I am confident that you will strive to exceed these expectations.

The Outcomes:

1. Demonstrate effective leadership and practice management skills in the areas of administration, analytics, informatics, and outcomes.
2. Optimize patient outcomes through the provision of evidence-based, patient-centered therapy and fostering effective decision support as an integral part of interdisciplinary healthcare teams. Provide medication and practice-related information, education, and/or training
3. Serve as an authoritative resource on the optimal use and development of analysis tools, formulary management, and pharmacy outcomes.
4. Demonstrate excellence in the provision of training and educational activities for health care professionals, health care professionals in training, and the public.
5. Demonstrate the technical skills essential to the role of a pharmacist specializing population health management and data analytics.
6. Understand a pharmacy benefits management structure and contribute to the organization's formulary management.
7. Perform effective direct patient care on high-risk or other target patients using developed analysis tools as part of a population management strategy.
8. Contribute to the body of pharmacotherapy knowledge by conducting outcomes-based research or quality improvement projects with the assistance of analysis tools.

The year as a resident, you should be challenged and busy. I am confident that through teamwork we will all benefit greatly by your residency training. The faculty members are available to assist you in reaching your highest potential. I look forward to working with you, watching your growth, and subsequently seeing your professional career develop as our colleagues.

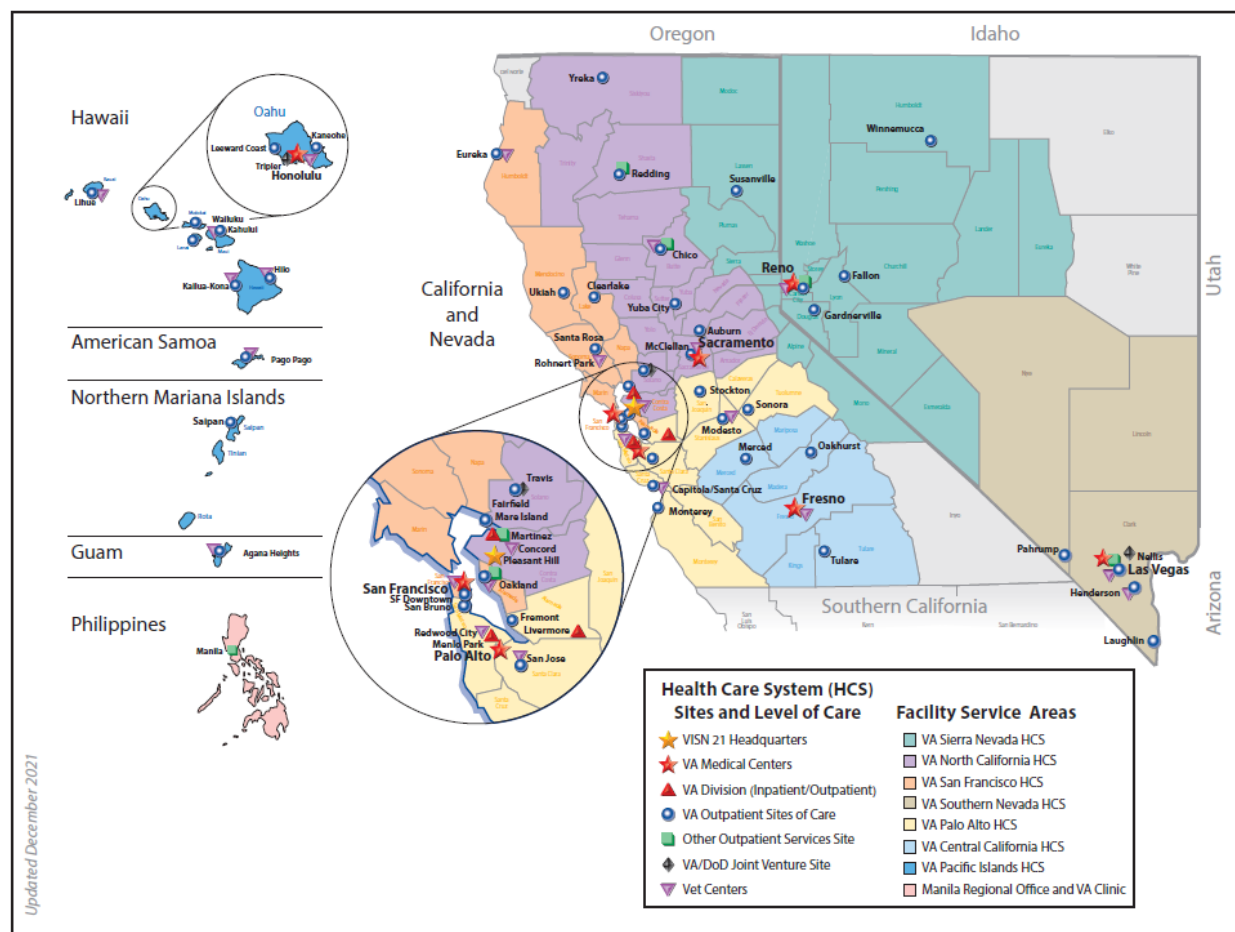

Sincerely,

Janice Taylor, PharmD, BCPS
VISN 21 Deputy Pharmacist Executive – Clinical
PGY2 Residency Program Director

Introduction to VISN 21

VA Sierra Pacific Network (VISN 21)

VA Sites of Care by Health Care System

VISN 21, also known as Veterans Integrated Service Network 21, is one of 18 health care service Networks in the Veterans Health Administration (VHA). The mission of the VA Sierra Pacific Network is to honor America's Veterans by providing exceptional health care that improves their health and well-being. The vision is to continue to be the benchmark of excellence and value in health care and benefits by providing exemplary services that are both patient-centered and evidenced based. This care will be delivered by engaged, collaborative teams in an integrated environment that supports learning, discovery and continuous improvement. It will emphasize prevention and population health and contribute to the Nation's well-being through education, research and service in national emergencies. Our core values reflect that of VA "ICARE"; Values of Integrity, Commitment, Advocacy, Respect, and Excellence.

VISN 21 is geographically diverse in nature and is one of the most challenging service areas in VHA. With over 257,000 square miles of land and literally millions of square miles of ocean separating our sites in the Pacific, access to care often requires extensive travel for enrolled

Veterans. VISN 21 serves three states and three U.S. Territories. Within this Network, there are four time zones, including crossing the International Date Line. In addition, VISN 21 operates the only VHA direct patient care activity located in a foreign country (Manila, Philippines). VISN 21 sites of care are located in Nevada, central/northern California, Hawaii, the Philippines, and the vast Pacific Rim including Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands (CNMI).

The eight VA medical centers/health systems listed below manage over one hundred care sites:

- [VA Central California Health Care System](#)
- [VA Northern California Health Care System](#)
- [VA Pacific Islands Health Care System](#)
- [VA Palo Alto Health Care System](#)
- [VA Medical Center \(VAMC\), San Francisco](#)
- [VA Sierra Nevada Health Care System](#)
- [VA Southern Nevada/Las Vegas Health Care System](#)
- [VA Regional Office/Outpatient Clinic \(VARO/OC\), Manila](#)
- [VISN 21 Home Page](#)

VISN 21 PBM Data and Program Manager
VA Sierra Pacific Network, Scottsdale, AZ

VISN 21 PBM Staff Activities

- VISN PBM has 4 main pillars
 - Formulary Management
 - Support and Oversight for Operations and Clinical Pharmacy Services
 - Data Analytics and Outcomes
 - Education/Residency
- Oversee operations at the VISN 21 Pharmacies through Pharmacy Leadership Groups
- Maintain a large Clinical Data Warehouse of patient specific information
- Develop and implement quality and cost performance metrics for the VISN with patient specific reports and dashboards
- Direct activities of the National and VISN Formulary within VISN 21
 - Coordinate development and updates of VISN 21 Drug Use Criteria and maintain VISN web-based services
 - Lead activities of the Medication Utilization Management Team such as pharmacoeconomic analysis and development of contract initiatives
- Coordinate pharmacy activities with selected VISN committees, task forces and with executive leadership

- Participate in development of treatment protocols, critical pathways, order sets, measures/metrics, and other systems approaches involving improving patient care
- Coordinate training programs for pharmacists and non-pharmacists within the VISN 21 PBM
- Provide oversight and serve as a resource to facilities in ensuring compliance with operational and clinical accreditation and VA standards

VISN 21 PBM Residency Board Responsibilities

The Pharmacy Residency Committee, chaired by the RPD and composed of residency preceptors, is established for these goals:

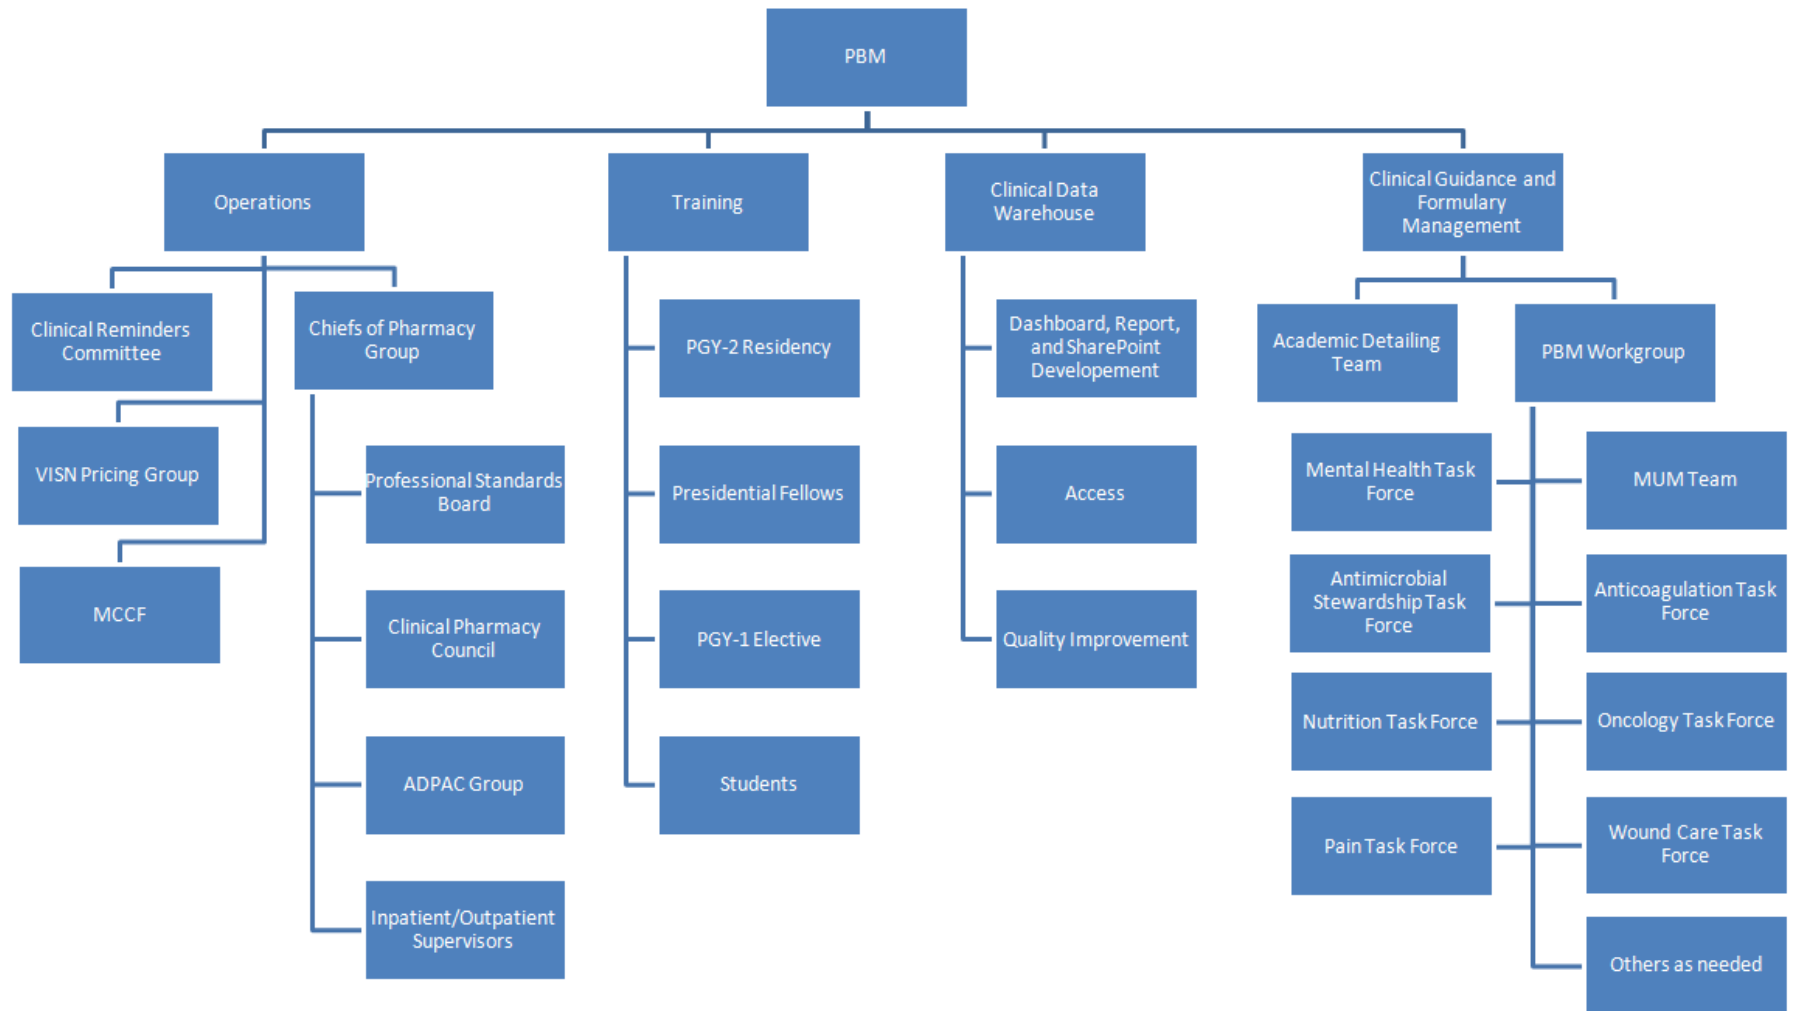

1. To assure that each resident meets the goals and objectives of the pharmacy practice residency over the course of the year.
2. To assess and improve the residency program, including the program manual, required activities and elective offerings.
3. To assure that the residency surpasses the standards as set by the ASHP and the Department of Veterans Affairs.
4. To foster the resident's professional and personal growth.
5. To assure a balance between clinical activities/learning and administrative/staffing is maintained throughout the residency year.

The Board will meet at least quarterly to review quarterly reports, rotation evaluations, project proposals, and evaluate resident project progression. Residents are asked to meet with the residency board quarterly to review their evaluations, as well as discuss the residents' progress, areas for improvement, project, career goals and feedback about the residency program. The Board will also approve/disapprove the chosen electives for each resident.

Board members take an active role in the professional development of the residents.

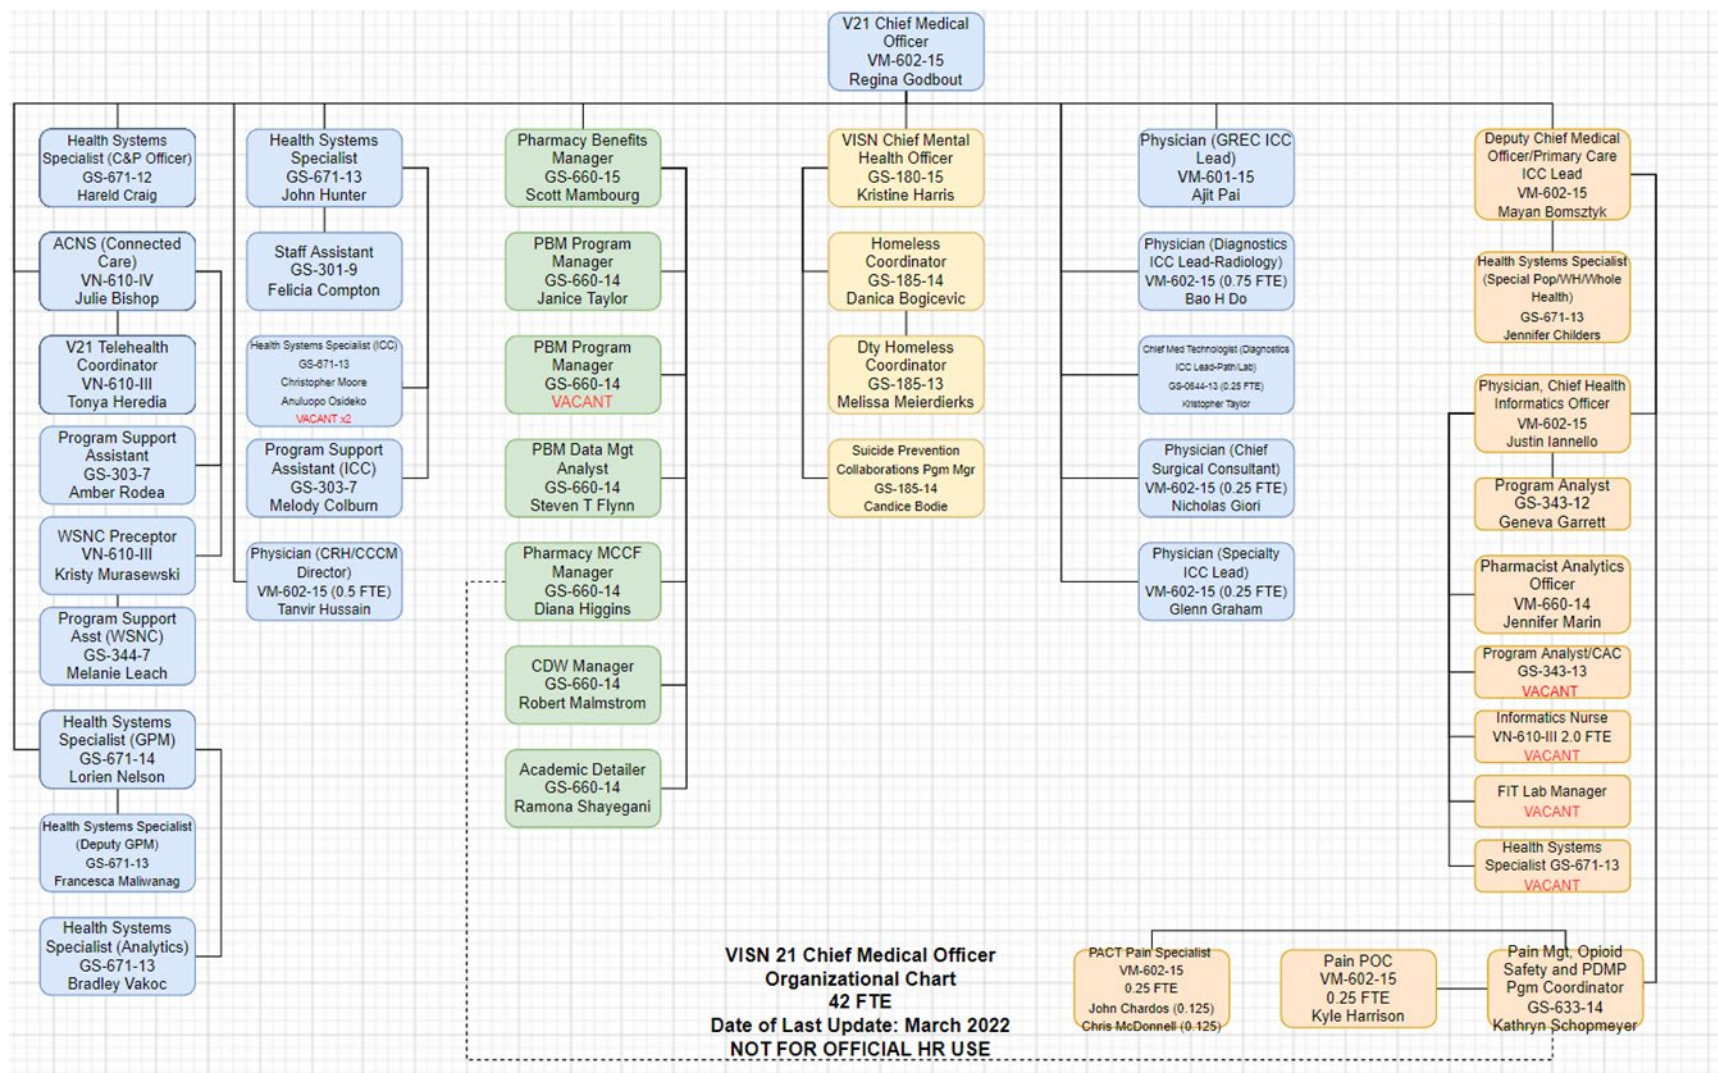

Residents are expected to take an active role in meeting their program goals and assessing their rotations.

PGY-2 Pharmacy Residency General Information

Population Health Management and Data Analytics

VISN 21 Pharmacy Benefits Management (PBM)

VISN 21 Mission

To honor America's Veterans by providing exceptional health care that improves their health and well-being. The VA Core Values -- Integrity, Commitment, Advocacy, Respect and Excellence -- can be summarized in the simple but appropriate acronym: "I CARE."

VA Sierra Pacific Network PBM Mission and Vision

Mission: *Supporting the provision of clinical care and healthcare operations by leveraging best practices, health analytics, stewardship, and safe and effective medication use to improve Veteran outcomes and quality care.*

Vision:

Building the healthcare of tomorrow while supporting Veteran's health and wellness goals today

- *We will build relationships and collaborations with all members of the healthcare team.*
- *We will control costs while maximizing the value of medications for our veterans.*
- *We will utilize the most evidenced-based biomedical literature to improve veteran outcomes.*
- *We will promote quality measures and metrics to hold ourselves accountable for the care we provide.*
- *We will advance the use of innovative data technologies to ensure safe and optimal care is being consistently provided to our veterans.*
- *We will be an employer of choice for pharmacists and supportive staff by providing a compassionate, progressive work environment.*
- *We will create a practice environment that fosters educations, research and professional development.*

PGY2 Purpose

PGY2 residency programs build upon Doctor of Pharmacy (PharmD) education and PGY1 pharmacy residency training to develop pharmacist practitioners with knowledge, skills, and abilities as defined in the educational competency areas, goals, and objectives for advanced practice areas. Residents who successfully complete PGY2 residency programs are prepared for advanced patient care or other specialized positions, and board certification in the advanced practice area, if available.

Program Vision

The goal of the VA Sierra Pacific Network (VISN 21) PGY2 Population Health Management and Data Analytics Residency Program is to develop clinically proficient healthcare data analysts who will improve the quality, and outcomes of patient care services. The Residency Program promotes the integration of information technology, informatics, and data analysis with the practice of evidence-based medicine and medical treatments and process improvement.

Healthcare data analytics is an evolving area within the healthcare industry. As the prevalence of electronic health records and the integration of health systems increases as well as the need to monitor

health outcomes, the demand for clinically competent healthcare data analysts will be great. The VA Sierra Pacific Network (VISN 21) PGY2 Population Health Management and Data Analytics Residency Program will help to meet this demand through its innovative approach to training and education. This PGY2 program is designed to develop accountability, practice patterns, habits, and expert knowledge, skills attitudes and abilities to meet the needs of this advanced area of pharmacy practice.

Program Outcomes

Educational Outcomes:

1. Demonstrate effective leadership and practice management skills in the areas of administration, analytics, informatics, and outcomes.
2. Optimize patient outcomes through the provision of evidence-based, patient-centered therapy and fostering effective decision support as an integral part of interdisciplinary healthcare teams. Provide medication and practice-related information, education, and/or training
3. Serve as an authoritative resource on the optimal use and development of analysis tools, formulary management, and pharmacy outcomes.
4. Demonstrate excellence in the provision of training and educational activities for health care professionals, health care professionals in training, and the public.
5. Demonstrate the technical skills essential to the role of a pharmacist specializing in population health management and data analytics.
6. Understand a pharmacy benefits management structure and contribute to the organization's formulary management.
7. Perform effective direct patient care on high-risk or other target patients using developed analysis tools as part of a population management strategy.
8. Contribute to the body of pharmacotherapy knowledge by conducting outcomes-based research or quality improvement projects with the assistance of analysis tools.

Elective Outcomes:

1. Demonstrate advanced skills in working with a specific technology or automation product
2. Utilize added knowledge and skills to enable the application of contemporary quality methodology to the management of pharmacy services.
3. Demonstrate skills required to function in an academic setting.

Qualifications of the Resident

Pharmacist Licensure

All pharmacy residents are expected to possess full, current, and unrestricted licensure to practice pharmacy in a State, Territory, or Commonwealth of the United States (i.e. Puerto Rico), or the District of Columbia. The pharmacist must maintain current registration if this is a requirement for maintenance of this full, current, or unrestricted licensure. All residents are required by human resources to submit a copy of their licensure during the onboarding process for the PGY2.

Additional Qualifications and Application

1. Residents must be a graduate of a degree program in pharmacy from an approved college or university. The degree program must have been approved by the American Council on Pharmaceutical Education (ACPE), or prior to the establishment of ACPE, have been a member of the American Association of Colleges of Pharmacy (AACP). Verification of approved degree programs may be obtained from the American Council on Pharmaceutical Education, 311 West Superior Street, Suite 512, Chicago, Illinois 60610, Phone (312) 664-3575.
2. Completion of a first-year pharmacy practice residency is required to be considered for this PGY-2 program. Applicants must either be in the process of completing or have completed a first-year pharmacy practice residency prior to application to the residency program. All residents are required to submit a copy of their PGY1 certificate during the onboarding process for the PGY2.
3. Each applicant must enroll in the ASHP Resident Matching Program through the online application process known as ([PhORCAS](#)) or, if offered, partake in the Early Commitment process ([Appendix I](#)) in order to be considered for a resident position. Residents and the program will participate in and adhere to the rules of the Resident Matching Program (RMP) process
 - a. Applications are typically due in early January and interviews are conducted in mid-February.
 - b. Residency applicant qualifications will be evaluated by the residency program director (RPD) through an established, formal procedure that includes an assessment of the applicant's clinical knowledge and critical thinking skills, as well as an assessment of baseline knowledge relevant to the Population Health Management and Data Analytics residency. In addition, the ability to achieve the educational goals and objectives for the PGY-2 selected for the program will be evaluated.
 - c. The criteria for assessment and acceptance is provided to all preceptors by the RPD and are assessed during the interview process.
 - d. The formal, criteria-based process to evaluate and rank program applicants is in place ([Appendix II](#))
 - e. The RPD will provide residents with a letter outlining their acceptance to the program and terms and conditions of the appointment will be provided by Human Resources staff. ([Attachment F](#)) Documentation of resident acceptance will be on file prior to the beginning of the residency year.
4. More information can be found at the PGY2 [residency website](#).

Obligations of the Program to the Resident

Program Description

This residency is a 12 month program designed to meet the [ASHP Accreditation Standards for PGY2 Pharmacy Residencies](#) and the [Required Competency Areas, Goals, and Objectives for PGY2 Population Health Management and Data Analytics Pharmacy Residencies](#). Completion of the residency leads to a Certificate of Residency. The role of the pharmacy resident is to develop into clinically competent pharmacists capable of managing small and large populations of patients, primarily through longitudinal experiences in population health management, data management, formulary management, and health outcomes. The PGY2 resident provides specialized support to promote the integration of information technology, informatics, and data analysis with the practice of evidence-based medicine and medical treatments for VISN 21 PBM projects. Residents are under the general supervision of the residency director, and under the preceptorship of the residency director and other assigned personnel. Under such oversight, the resident will design computerized reports and interfaces for various demographics; will demonstrate project development, implementation, and management skills; will initiate and implement clinical programs to enhance the efficiency of patient care; will monitor the local Veterans Integrated Service Network (VISN) performance measures and metrics; will provide education to health care professionals and participate in clinical research.

The program is accredited in associated with the VASNHCS PGY-1 Pharmacy Practice Program, though the PGY-2 residents will work with clinicians, interdisciplinary teams, and patients throughout VISN 21. The primary location for the residency is virtual with a VISN 21 satellite office located in Reno, NV. The medical center and pharmacy affiliated with the program (VASNHCS) is accredited by Joint Commission and the affiliated pharmacy schools are accredited by ACPE. The management and professional staff of both the VASNHCS and VISN 21 PBM are committed to seeking excellence in patient care, have demonstrated substantial compliance with professionally developed and nationally applied practice and operational standards, and have sufficient resources to achieve the educational goals and objectives selected for the residency program.

Minimum Qualifications of the Program Director and Preceptors

1. Residency Program Directory (RPD)

- Must be a licensed pharmacist with demonstrated expertise in population health management and data analytics.
- Must have completed an ASHP-accredited PGY-2 residency in a relevant advanced practice area followed by a minimum of 3 years of practice or experience equivalent in this area. Alternatively, the RPD may have an equivalent experience (5+ years relevant experience) with demonstrated mastery of the knowledge, skills, attitudes, and abilities expected of one who has completed a PGY-2 area in this residency.
- Have board certification in a relevant specialty
- Maintain active practice in the pharmacy outcomes/healthcare analytics practice area
- Maintain a sustained record of contribution and commitment to pharmacy practice
- Have documented evidence of their own ability and interest to teach effectively (i.e. through resident evaluations)
- Have demonstrated ability to direct and manage a pharmacy residency, through previous involvement in an ASHP-accredited program, management experience, or previous academic experience as a course coordinator.

2. *Preceptors*

- Must be a licensed pharmacist and have completed an ASHP-accredited PGY-2 residency followed by a minimum of one year of pharmacy practice in a relevant area. Alternatively, preceptors without a PGY-2 residency must demonstrate mastery of knowledge, skills, attitudes, and abilities expected of one who completed a PGY-2 in this area.
- Must have training and experience in pharmacy outcomes and analytics (or other relevant area in the case of elective rotations) and maintain a continuity of practice in this area and be practicing within it during resident training
- Must have a record of contribution and commitment to pharmacy practice as per ASHP Preceptor Qualification Guidelines.
- Must demonstrate a desire and aptitude for teaching that includes mastery of the four preceptor roles fulfilled during clinical problem solving (instructing, modeling, coaching, facilitating)
- Must demonstrate an ability to provide criteria-based feedback and evaluation of resident performance and pursue refinement of their teaching skills.
- If non-pharmacist preceptors are utilized, a pharmacist preceptor works closely with the non-pharmacist preceptor to select educational goals and objectives for the learning experience and participates actively in the criteria-based evaluation of the resident's performance.

Appointment and Reappointment of Preceptors

The PGY2 Residency Program Directors, in conjunction with the Residency Board, will support initial appointment, re-appointment and development of preceptors to ensure that each preceptor has the knowledge, skills and abilities to appropriately prepare pharmacy residents for independent clinical practice. It is an expectation of pharmacists within our VISN 21 PBM staff to serve as preceptors and our VISN Pharmacy Executive does outline this as part of our employees performance plans. Please see the Preceptor Manual ([Appendix XIII](#)) that contains formal appointment and reappointment processes, preceptor in training processes, expectations, and forms to be used.

Continuous Professional (Preceptor) Development

Preceptors will be expected to participate in the following:

1. Participation in the San Francisco VA/VISN 21 Preceptor Development Pharmacy Series (Schedule will be sent out yearly)
2. Participation in bi-weekly VISN 21 PBM staff meetings where topics related to residency and preceptor development are discussed
3. Participation in monthly VISN 21 Residency Program director meetings or National VA Residency Advisory Board meetings
4. Participation in monthly VISN 21 Residency Program director meetings

For further details please see the Preceptor Manual ([Appendix XIII](#))

Program Evaluation and Improvement

Program evaluation and improvement activities will be directed at enhancing achievement of the program's outcomes. Annually in May of each residency year a formal program evaluation meeting will be held for quality improvement. Action plans with timelines and responsible parties will be

developed to ensure recommended changes resulting from the meeting are implemented. Through the year, the residency program director (RPD) will evaluate potential preceptors based on their desire to teach and their aptitude for teaching and will provide preceptors with opportunities to enhance their teaching skills. The residency program director (RPD) will devise and implement a plan for assessing and improving the quality of preceptor instruction. Consideration will be given to the resident's documented evaluation of preceptor performance as one measure of preceptor performance. At least annually, the residency program director (RPD) will use evaluations, observations, and other information to consider program changes. The resident is responsible for completing a Continuous Quality Improvement (CQI) ([Appendix III](#)) assessment during the month of May before residency is complete. The purpose is to identify specific areas of the residency that may be improved and to continuously re-evaluate the educational outcomes, goals, and objectives evaluated throughout the residency to ensure they are up-to-date and consistent with resident experiences. The program aims to utilize the available learning experience to facilitate achievement of the program's educational goals and objectives. The educational outcomes, welfare of the resident, and the welfare of patients are to be in no way compromised by excessive reliance on residents to fulfill service obligations. The program will also provide sufficient professional and technical staff complement to ensure that appropriate supervision and preceptor guidance is available to all residents. However, the program encourages regular feedback from residents if they feel the program is deficient in any of these areas. Residents can assist the with program improvement by inquiring if the way things are done can be improved. Challenging the staff is an important contribution to our constantly ongoing improvement process. Additionally, the PBM Staff/Residency board will meet and self-assess on a regular basis to ensure these goals are being met.

Tracking of Graduates

The residency program director (RPD) will periodically contact past residents and track employment and professional development of residency graduates to evaluate whether the residency produces the type of practitioner described in the program's purpose statement. Information on program graduates can be found at this link: <https://www.va.gov/sierra-nevada-health-care/work-with-us/internships-and-fellowships/pgy-2-population-health-management-and-data-analytics-residents/> Many former residents continue to be employed within the VA and have collaboration and regular meetings still with staff and residents in our program.

Meeting with the Residency Program Director

At the beginning of the residency year, the RPD will discuss and determine a regularly scheduled huddle meeting time(s) and schedule for weekly meetings with the residents based on their needs and preference. Each resident is welcome at any time to discuss issues with the RPD. These can be individual discussions or group discussions. It is best to schedule a time via Outlook to arrange these meetings. However, if a need arises to discuss a topic regarding the residency, the resident should not hesitate to reach out to the RPD for a discussion.

Customized Training Plan

Before the program begins, each resident completes an ASHP Entering Interests Form and Entering Objective Based Self-Evaluation that are generated through PharmAcademic. This allows the RPD and Residency Board to tailor the residency experience to the individual resident's desires, needs, and experiences. The generalized residency plan will be customized to address strengths, areas for improvement, strategies for improvement, plans for residency individualization based on resident

interests, status of assigned projects, residency project assessment, overall assessment, duty hours, and a global assessment of resident progress in relation to program goals and objectives. The training plan will be customized based upon an assessment of the resident's entering and ongoing knowledge, skills, attitudes, and abilities and the resident's interests. The Customized Training Plan (CTP) will be reviewed during quarterly evaluations and updated as needed to meet unaccomplished goals, or modified if one or more of the required educational objectives is performed and judged to indicate full achievement. The resulting CTP will be tailored according to identified strengths/opportunities for improvement and will maintain consistency with the program's purpose and outcomes and will not interfere with the achievement of the program's stated educational goals and objectives. The CTP and any modifications to it, including the residents' schedule, will be shared with the resident and appropriate preceptors. The CTP will contain documented, individualized sets of educational outcomes, goals, and objectives that are derived from the program's documented outcomes, goals, and objectives (as well as remedial actions). Additional program outcomes, goals, or objectives will reflect the site's strengths.

Benefits

General: For in person activities: Parking, laboratory coats, office space, and office keys are furnished. Computers are available for use by the residents in the pharmacy resident's office at the VISN satellite office and in the resident office at the VASNHCS medical center. For virtual: residents are issued a laptop, keyboard, mouse, and 2 monitors (if available) from the nearest geographical VA medical center providing them with IT support. Use of online resources is available on the intranet. Preceptors will provide education and any necessary passwords to use these resources.

Pay: Residents are paid at the rate of \$45,221 per year. The resident's stipend is based on a 40-hour workweek; however, the very nature of a residency training program is such that additional time is required to complete training assignments. ACGME/ASHP guidelines for duty hours must be observed (see "Duty Hours"). No additional compensation is available, though dual appointment opportunities may be available through the VASNHCS pharmacy as funding and need allow. Funding for travel and related meeting expenses are reimbursed for the one required state/regional and one required national meeting.

Attendance: The residency is a full-time temporary appointment of 12 months in duration. The resident is expected to complete 2080 hours and be virtually present during duty hours for at least 40 hours per week to perform activities related to the residency as necessary to meet the goals and objectives of the program. Additional hours are expected to complete assignments and projects in a timely manner. When the resident will not be onsite during normal duty hours, the program director and preceptor must approve the time off or away and procedures for leave must be followed. At times, the resident will be expected to attend other residency-related conferences or experiences off-site during regular working hours. If an extended absence occurs (i.e. extended family or sick leave), extension of the residency program may be necessary. The maximum length of extension is not to exceed 3 months, and the program must be completed before September 30th. Opportunity to extend the program with pay will depend on the decision of the VA regarding extending the funding. If the resident feels that the need for extended absence may be necessary, they should immediately inform the Residency Program Director (RPD). For more information see [Appendix IV: Extended Leave of Absence](#). Unexcused absences may be dealt with under the Residency Disciplinary Actions and Dismissal Policy as necessary.

Annual Leave: Residents earn annual leave at the rate of 4 hours per 2 week pay period. Annual leave must be requested electronically, as far as possible in advance, via VATAS. An email request should also be sent to the residency program director with the date(s) in the subject line. Scheduled leave must be approved by the Residency Program Director (RPD). Approval of the preceptor (if applicable) should be obtained prior to submitting leave request to the Residency Director. The resident should consider what impact the use of leave has on their educational experience before scheduling.

Authorized Absence/Travel: Administrative or authorized absence to attend professional meetings is granted at the discretion of the Residency Program Director and VISN/Facility leadership.

Sick Leave: Residents earn sick leave at the rate of 4 hours per 2 week pay period. Sick leave for scheduled doctor's appointments or elective procedures must also be electronically requested two weeks in advance if at all possible. The RPD and, if applicable, current preceptor should be notified of any unscheduled absence due to illnesses prior to the scheduled tour of duty. Entry of leave into VATAS should be completed upon the resident's return to work and timekeeper notified.

Family Friendly Leave (CB): Family leave or bereavement leave policies indicate that each employee can use up to 104 hours of family leave each year. Family leave must be requested electronically prior to planned event or immediately upon employee return if absence due to an emergency. RPD approval is required as is the current preceptor, if applicable. Family leave will be deducted from the sick leave balance.

Emergencies: Personal emergencies/accidents during tour of duty should be reported to the RPD and current preceptor, if applicable, as soon as possible so that appropriate action can be taken.

Inclement Weather: The hospital's inclement weather policy is that **all personnel are required to report to work in the event of inclement weather. There may be a small allowance for travel delays due to severe weather; notify your RPD if this might be the case and enter appropriate leave upon arrival to work.** If you are entirely unable to report for duty due to weather conditions, you will be charged the appropriate amount of annual leave.

Holidays: Residents are not scheduled to work on the paid federal holidays.

Employee Assistance Program (EAP): The goal of EAP is to promote wellbeing and assist employees with both personal and family issues. Please consult with the RPD if you feel you have challenges that are affecting your wellbeing. Residency can be stressful and we want to ensure you feel supported and are able to access needed resources.

Burnout Management Plan

Burnout has been defined by one of the leading researchers as “a condition of emotional exhaustion, depersonalization, and reduced personal accomplishment and satisfaction in jobs where there is high stress with low rewards and the minimal goals are unachievable” (Maslach 1976). There has been increasing focus within the healthcare community on the concept of burnout of both clinicians and trainees due to recognition of the high rates of burnout, mental health issues, and suicidality within

healthcare residents. The following section identifies the steps that the VASNHCS Pharmacy Residency program is taking to identify resident burnout, and provide resources for prevention and management of resident burnout.

Prevention of Resident Burnout: One step towards preventing burnout is to increase awareness and provide strategies for reducing emotional exhaustion. In order to do this, the Residency program will:

- Review burnout during resident orientation, including definition and coping/resiliency strategies
- Provide resources for preventing and managing burnout (see resources below)

Identification of Resident Burnout: Identification of burnout will occur through, but not limited to, the following mechanisms:

- Resident notifying RPD or mentor of concerns
- Preceptor or another individual notifying RPD or mentor of possible concerns
- A PharmAcademic evaluation called “Duty Hours Evaluation” that includes the following:
 - Number of weekly hours worked
 - A question regarding effective time management and feelings of burnout
 - This evaluation is required for residents to complete on a monthly basis to identify and track potential burnout

Management of Resident Burnout: Residents who have been identified as potentially developing burnout will be addressed in the following manner:

- Initial discussion with RPD, with intent to develop a plan for reducing burnout
- Routine follow-up to assess continued feelings of burnout
- If burnout continues, utilizing VA resources to assist resident. For example, a resident experiencing burnout or other concerns may be referred to the VA Employee Assistance Program or local providers that can assist with coaching and coping skills

Requirements to Receive Residency Certificate

It is the responsibility of the program to determine whether a resident has satisfactorily completed the requirements of the residency. Any resident who fails to meet the accepted standards of the residency program will not be issued a certificate. Knowingly presenting a certificate of completing the residency when, in fact, inadequate achievement has occurred, can result in revocation of the accreditation of the residency by ASHP. Clearly, this makes the issuing of a residency certificate an important event. Throughout the course of the residency it will be made clear whether or not objectives are being met. Some individuals may require remedial actions. If remedial actions taken by the resident are insufficient the residency certificate will not be issued. This determination will be made jointly by the resident, Residency Program Director, Residency Board, and the Chief of Pharmacy or VISN Pharmacy Executive (if applicable).

Please see [Appendix XV: Checklist of Requirements to Receive a Residency Certificate](#) for a complete list of all requirements.

The residency certificate will indicate the program's accreditation by ASHP, that it is issued in accordance with the provisions of the [ASHP Regulations on Accreditation of Pharmacy Residencies](#), and will be signed by the RPD and CEO of the organization.

Obligations of the Resident to the Program

Obligations

- The residency is a full-time obligation
- The resident will be committed to attaining the program's educational goals and objectives and will support the organization's mission and values.
- The resident's primary professional commitment must be to the residency program.
- The resident shall be committed to the values and mission of the training organization.
- The resident shall be committed to making active use of the constructive feedback provided by the residency program preceptors.

Dress Code

In brief, the dress code requires that residents dress in an appropriate manner. Residents should be available daily and appropriately dressed for meetings requiring video chat/camera capabilities. Residents should also utilize appropriate and professional Microsoft TEAMS background filters during video meetings. For in person meetings and activities professional attire & footwear are required. Any specific problems with attire will be discussed with the Residency Advisory Board and/or the Residency Program Director.

Tour of Duty

Tour of duty for all residents is 8:00 a.m. to 4:30 p.m. Pacific Standard Time (PST), Monday through Friday regardless of their geographical location. This 8.5 hour tour of duty additionally allows for a 30 minute lunch break. The RPD and time keeper must be informed of all changes in tours of duty prior to the change being made.

Duty Hours

Residents, program directors, and preceptors are required to follow ASHP Pharmacy Specific Duty Hour Requirements.

<https://www.ashp.org/-/media/assets/professional-development/residencies/docs/duty-hour-requirements.ashx>

Duty hours are defined as all scheduled clinical and academic activities related to the pharmacy residency program. This includes inpatient and outpatient care, in-house call, administrative duties, and scheduled and assigned activities (such conferences, committee meetings, and health fairs) that are required to meet the goals and objectives of the residency program. Duty hours do not include reading, studying, and academic preparation time for presentations and journal clubs, travel time to and from conferences, and hours that are not scheduled by the residency program director or preceptor.

1. Duty hours must be limited to 80 hours per week, averaged over a four-week period.
2. Residents must be provided with one day in seven free from all educational and clinical responsibilities, averaged over a four-week period.
3. Residents should have 10 hours free of duty between scheduled duty and must have at a minimum 8 hours between scheduled duty periods.

Residents are responsible for tracking duty hours via PharmAcademic. If a violation occurs, this must be documented and reported immediately.

Moonlighting: Moonlighting at VASNHCS or outside of VASNHCS is permitted but must meet the above duty hour requirements. Resident moonlighting hours will be documented in PharmAcademic or during evaluations at regularly scheduled intervals. If the resident, preceptors, or Residency Program Director finds that the resident's judgment is impaired or they are unable to meet the requirements of the PGY-2 program, individual adjustments to permitted moonlighting hours may be made.

Professional Practice and Development

Pharmacy residents are representatives of the VISN 21 PBM and when at the VASNHCS, the Pharmacy Department, at all times. It is important that high standards of professional conduct are upheld at all times, including during professional meetings.

Professional development of residents is enhanced through membership and participation in local and national organizations. Membership in the American Society of Health-system Pharmacists (ASHP) is **required**. Residents are encouraged to become members of the Nevada Society of Health-Systems Pharmacists (NVSHP) and American College of Clinical Pharmacy (ACCP). Residents are **required** to attend one state or regional pharmacy organization meeting (i.e. Western States Residency Conference or a conference relevant to the PGY2s residency project) and one national pharmacy organization meeting (i.e. ASHP Midyear Meeting) and are encouraged to attend local Board of Pharmacy meetings if offered virtually.

Confidentiality

Development of professional ethics and awareness of a patient's need for confidential and private counseling are important components of clinical education. Residents will receive training on HIPAA

guidelines. It is their responsibility to never mention patients by name at inappropriate times or discuss patients with team members in areas where information may be overheard (ex. while in stairwells or on elevators). Paperwork containing patient or employee personal information must be placed in appropriate containers for shredding. Emails containing patient information will be sent using encryption and only to parties permitted to receive this information. It is critical that all employees do not leave a computer terminal open for access by other individuals. If residents find themselves in a position where patient confidentiality may be compromised, they should remove themselves from the situation.

The U.S. Government computer system is for official use only. The files on this system include federal records that contain sensitive information. All activities on this system may be monitored to measure network performance and resource utilization; to detect unauthorized access to or misuse of the system or individual files and utilities on the system including personal use; and to protect the operational integrity of the system. Use of this system constitutes your consent to such monitoring. Misuse of or unauthorized access to this system may result in criminal prosecution and disciplinary, adverse, or other appropriate action.

Grievances

Conflict in the workplace is very common and needs to be dealt with in a healthy, productive fashion. When conflicts go unaddressed, they can have a negative impact on productivity and teamwork. Because of this, conflict resolution is a necessary component of the workplace. Successful conflict resolution requires a mature, non-confrontational approach and should always begin with the involved parties. If the resident is unable to resolve a conflict with the involved party, the residency chain of command should be employed to effectively communicate and resolve conflicts that may arise during the residency year. It is the resident's responsibility to explain, understand, and utilize the appropriate chain of command within the department. The residency chain of command generally consists of:

1. Preceptor
 2. Residency Program Director
 3. VISN Pharmacy Executive
 4. National Director of Pharmacy Residency Programs and Education
- Lori Golterman, PharmD, Lori.Golterman@va.gov, (202) 641-4059

Attitude

The resident is expected to demonstrate professional responsibility, dedication, motivation, and maturity with regards to all activities and responsibilities associated with the residency for its entirety. The resident shall demonstrate the ability to work and interact with all staff and patients of the Medical Center in a productive and harmonious manner. Appropriate attire, personal hygiene and conduct are expected at all times. The resident will adhere to all the regulations governing the operations of the Department of Veterans Affairs Medical Center without exception.

Residency Disciplinary Actions and Dismissal Policy

It is not expected that any disciplinary actions will be needed during the residency. However, criteria have been established to avoid making an unpleasant situation more difficult. Each resident is expected to perform in an exemplary manner. If a resident fails to meet the requirements of the program, disciplinary action will be taken. Examples of inadequate or poor performance include

dishonesty, repetitive failure to complete assignments, being late for clinical assignments, abuse of annual and/or sick leave, violating VISN 21 or VA policies and procedures, patient abuse, violating ethics or laws of pharmacy practice, and failure to maintain pharmacy licensure. The following sequence of disciplinary actions is outlined:

- 1. Minor and initial failure to adhere to requirements will result in an initial verbal counseling by the primary preceptor or the Residency Program Director. A note stating a verbal counseling has occurred will be sent to the Residency Board. If a resident is late to work more than one time the resident will be considered absent without leave and a pay reduction will be assessed for the time missed.*
- 2. For repeated or more severe incidents, the Residency Program Director or Residency Board will give residents a formal written warning of failure to meet the requirements of the residency program. A list of actions and/or additional assignments required to continue in the program will be determined by the Residency Program Director or Residency Board and must be signed by the resident. The RPD will follow the resident's compliance with the required actions. Failure with compliance may lead to the dismissal of the resident from the program. Failure to maintain licensure will result in dismissal of the resident from the program.*
- 3. For identified Needs Improvements (NIs) on summative evaluations, immediate RPD involvement is required. A written Performance Improvement (PI) plan will be created with routine check-in (i.e. monthly) regardless of whether improvement is noted to ensure there is no reverting or new issues that arise and to allow the resident to gauge performance and offer adequate time for remediation if necessary.*
- 4. Failure to comply with the required actions set forth by the Residency Program Director or Residency Board will be documented in writing by the preceptor, Residency Board, or Residency Director. The Residency Board, Chief of Pharmacy/VISN Pharmacy Executive, and Residency Program Director will decide whether dismissal is necessary after reviewing the situation with the resident and preceptor. If dismissal is necessary, the proper process will be initiated. For minor or initial failure to adhere to requirements will result in a verbal counseling by the primary preceptor or the RPD.*

Termination Policy

A PGY1/PGY2 Pharmacy resident may be terminated at the discretion of the Chief of Pharmacy, VISN Pharmacy Executive, and Residency Program Director for failure to meet the program objectives and requirements as outlined in the PGY1/PGY2 Pharmacy Residency Manual or failure to meet the terms of employment of the Reno VA Medical Center set forth in the Medical Center's Standards of Ethical Conduct and Related Responsibilities of Employees.

ASHP Accreditation Standards

The ASHP standards for the Pharmacy Practice Residency Program are important for understanding because they are our contract with each resident. The areas and functions in which residents will have involvement are described in the accreditation standards. The supporting guidelines, technical

bulletins, and statements for the best practice involving a required aspect of training are available online at <http://www.ASHP.org>

To ensure training efficiency and effectiveness, the program will use a systems-based approach to training design, delivery and evaluation. It is important to continuously assess individual practice skills, particularly in relation to these [*ASHP Accreditation Standards for Postgraduate Year Two \(PGY2\) Pharmacy Residency Programs*](#) and the [*ASHP Regulations on Accreditation of Pharmacy Residencies*](#). Provided in [Appendix V](#) is the comprehensive list of outcomes and instructional objectives specific to the Population Health Management and Data Analytics PGY2 residency. These, in combination with our drafted document will assist with the Continuous Quality Improvement (CQI) ([Appendix III](#)) that is completed in the last month of the residency year.

Residency Structure and Rotations

Core Rotation Experiences

The residents are scheduled for experiences throughout the year in order to allow for learning in various areas. Most of the learning experiences during this PGY-2 residency are longitudinal in structure. Any changes to this schedule need to be in agreement with all preceptors involved, the Residency Board, and/or the Residency Program Director. The resident will be expected to achieve 90% of the program objectives in order to graduate from the residency. The resident's rotation schedule is available to view in PharmAcademic under the Resident Master schedule Report option.

The core required rotations will be in the areas of:

Required Rotations	Duration	Estimated Time Commitment Per Week
Orientation	First 2 weeks of residency starting in July	N/A
Population-Based Health Care	4 Quarters, July through June	8 hours
Clinical Data Management and Analytics	3 Quarters, July through March	16 hours
Quality Improvement or Research Project	4 Quarters, July through June	2 hours
Leadership and Management	3 Quarters, July through March	4 hours
Teaching Education and Dissemination of Knowledge	4 Quarters, July through June	2 hours
Pharmacy Benefit Design and Formulary Management	3 Quarters, July through March	8 hours

All required goals and objectives must be taught and formally evaluated at least once in the residency. The program will identify if any additional elective goals and objectives will be evaluated. These outcomes/goals are listed earlier in the Residency Manual, and the full Outcomes, Goals, and Objectives document can be found in [Appendix V](#) and are also included under each rotation experience description. The Goals and Objectives form the basis for feedback and evaluation.

A table with the full mapping of Outcomes, Goals, and Objectives and the rotations where objectives are taught or taught plus evaluated is available in PharmAcademic under the Goals and Objectives Taught/Taught and Evaluated in Learning Experiences report in PharmAcademic. Residency teams assign their choice of educational goals and objectives to the learning experiences in which they will be taught and decide in which of these learning experiences each goal will be evaluated. The goals can be taught and evaluated once or multiple times. T stands for Taught and TE stands for taught and evaluated. See also <https://www.pharmacademic.com> for further PharmAcademic information and guidance.

Elective Experiences

Each resident will have opportunities to choose two experiences that are considered electives. Elective experiences are specifically intended to tailor the residency experience to the resident's needs, goals, and interests to help them gain more confidence and skills.

Currently we offer electives in the following areas:

Elective Rotations	Duration	Estimated Time Commitment Per Week
Academia*	2 weeks in either Q3 or Q4 based on teaching schedule	N/A
Advanced Skills with Technology or Automation Systems	1 Quarter, March through June	8-16 hours
Advanced Pharmacy Benefit Design and Formulary Management	1 Quarter, March through June	8-16 hours
Advanced Leadership and Management	1 Quarter, March through June	8 hours

*The Academia elective experience is a short-term opportunity residents can also elect to take in addition to their two required elective choices if interested.

Additionally, if there is a specific area that the resident is interested in gaining more experience and there is a viable rotation site available, the residency program director, at their discretion, may facilitate arrangement of a one-month elective. This would occur in the last 6 months of the year and only if the resident is on track to successfully complete all rotations and assigned projects and anticipated to achieve critical objectives and demonstrate adequate improvement on all other program goals and objectives. **The resident is responsible for arranging all electives with the preceptor and the RPD.** Please notify the RPD and Preceptor by 10/1 if you are interested in the Academia elective experience and by 12/1 what advanced elective experiences you are interested in for the last quarter of the residency.

Orientation

Brief Learning Experience Descriptor:

Orientation will occur during the first two-weeks of residency in July and will include orientation to VISN 21 and the PBM structure, an introduction to the residency/PharmAcademic system, computer training, and other miscellaneous mandatory training (HR, organization, etc.). Residents will be oriented to the program including the residency manual, purpose, applicable accreditation regulations and standards, required and elective learning experiences, residency checklist, and the evaluation strategy and policy. In addition, strategies for maintaining well-being and resilience will be discussed and resources provided. The RPD will perform this orientation according to a schedule provided via Outlook calendar invites. The staff will also be oriented to the residency program as necessary. Additionally, preceptors will be responsible for orienting their residents to their assigned learning experiences including reviewing and providing written copies of the learning experience educational goals and objectives, associated learning activities, and evaluation

strategies. The resident will also begin T-SQL training as part of their Clinical Data Management and Analytics rotation during orientation.

Rotation Schedule:

2 Week Learning Experience

- The learning experience will occur during the first two weeks of residency in July
- Assignments made daily by the RPD and sent out via Outlook invites.

Role(s) of the Pharmacist(s):

The residency program director is responsible for coordinating orientation activities for the resident and has multiple years of experience working in VISN 21. Preceptors will also meet with the resident to introduce their rotation experiences and provide an overview of their practice areas and how they will be interacting with the resident throughout the year.

Expectations of Residents:

Residents are expected to attend all orientation sessions on time and be actively engaged during the sessions. They are to demonstrate professional behavior when interacting with the presenters as well as each other. Residents are expected to be familiar with all aspects of the residency program and a majority of the VISN 21 PBM department and functions upon completion of orientation. Residents have the responsibility to ask questions on any topics which continue to remain unclear.

Progression of Residents:

By the end of the two-week orientation period residents should have access to all the necessary databases and programs needed for their training, be familiar with the VISN 21 PBM structure, staff, and workgroups, and be fully oriented to the residency program, manual, and requirements to receive a residency certificate.

Goals and Associated Objectives to be taught and evaluated during this experience:

Orientation: Select Objectives/Activities	
Objective	Related Activity/Instructional Objectives
Objective R1.1.1: (Understanding) Describe the concept of population health and the basic framework that relates healthcare policy and health factors to overall population health.	<ul style="list-style-type: none"> • <i>Participates in discussion of the structure of the VA health care system, VISN network, and VISN 21 PBM team and role</i> • <i>Reviews and becomes familiar with relevant websites such as the PBM SharePoint and PBM Dashboard Home page</i> • <i>Reviews the organization's process for designing and/or participating in population health management programs at the facility.</i>
Objective R4.1.1 (Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership.	<ul style="list-style-type: none"> • <i>Demonstrates professionalism during all staff interactions and meetings</i>

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	Resident	Preceptor	End of learning experience
Preceptor Evaluation	Preceptor	Resident	End of learning experience
Learning Experience Evaluation	Resident	Learning experience	End of learning experience

Population-Based Health Care

Brief Learning Experience Descriptor:

This is a longitudinal rotation intended to provide continued clinical practice in combination with population management throughout the residency year. The resident will be working in collaboration with the pharmacy service of our VISN 21 stations Pharmacy Service and available VISN 21 dashboard tools to improve patient safety, quality, and other outcomes. The resident will be assigned to this experience ½ day/week throughout the residency year. The purpose of this rotation is to expose the resident to direct patient care through the use of analytical tools to identify/target patients based on local needs at the assigned VISN 21 station (e.g., performance metrics, patient care, pharmacy operations). This experience will maintain and improve the resident's clinical abilities while offering them the opportunity to utilize tools they are creating/troubleshooting in order to provide the perspective of an end-user. The resident will collect and analyze patient information from the analytic tools and work in collaboration with other healthcare providers at the medical center to create patient care plans and directly involve themselves in patient care as necessary.

Rotation Schedule:**Longitudinal Learning Experience**

- The learning experience will begin in July and continue through the entire residency year to June
- Estimated time commitment per week is 8 hours
- Assignments made on a bi-weekly basis by the preceptors.

Role(s) of the Pharmacist(s):

The Pharmacy Program Manager for Pharmacoeconomics is responsible for:

- Formulary management [development and maintenance of drug use criteria/treatment algorithms/restriction policies; evaluation of non-formulary drug requests; address medication shortages and medication recalls; development of computerized tools to assist with formulary

implementation, such as consult forms, reminder dialog templates, blue text, drug file messages; provider education]

- Population medication use monitoring [development and achievement of medication use performance metrics; medication use evaluations]
- Pharmaceutical budget oversight [budget preparation; evaluation of recent utilization trends and identification of targets for improvement; development and implementation of pharmacoeconomic cost-saving initiatives]

The Pharmacy Program Manager for Clinical Resource Hub (CRH) is responsible for:

- Oversight and supervision of clinical pharmacy practitioners (CPP) providing direct patient care services in primary and specialty care
- Development and oversight of population health related activities through the CRH

The Deputy VISN Pharmacy Executive - Clinical is responsible for:

- Serving as a consultant to the VISN and stations for needs related to clinical pharmacy practice
- Development of a strategic plan every fiscal year for population health metrics related to pharmacy and monitoring and review of those metrics and related data and clinical activities
- Serving as a representative of PBM and providing council and oversight on VISN and national workgroups, clinical task forces, and Integrated Clinical Communities (ICCs)

Expectations of Residents:

- Actively engage in population health, formulary management, medication use monitoring, and pharmacoeconomic initiatives as identified by the preceptor.
- Recognize the Clinical Resource Hub (CRH) patient care delivery model.
- Understand the use of various population management tools and how to incorporate them into practice.
- Observe and/or participate in population management efforts.
- Identify at least one clinical task force or workgroup within the VISN to provide administrative support, address population health related data needs, and serve as a PBM clinical pharmacy representative for
- Develop a population health measure or metric and goal as part of the VISN PBMs fiscal year strategic plan
- Develop drug use criteria, treatment algorithms/restriction policies, and computerized tools to assist with formulary implementation and driving population health related decisions
- Assist with reviewing and acting on population health performance metrics and implementation of pharmacoeconomic cost-saving initiatives
- Evaluate medication utilization trends and identification of targets for improvement.
- Address medication shortages and medication recalls and implement mitigation strategies to prevent delays in care when applicable
- Participate at administrative meetings for understanding the pharmacy benefit policy development processes, when applicable.

- Utilize analysis tools to identify high risk patients for population management activity. Evaluate patient profiles for drug-related problems. Appropriately monitor and evaluate therapy based on indication/formulary preferences. Make therapeutic care plans and recommendations to physicians as needed. Answer drug information questions for colleagues (pharmacists, nurses, physicians, patients).

Progression of Residents:

Quarter 1: During the first quarter residents will begin to become familiar with the concepts of population health, formulary management, and pharmacoeconomics and how each are approached from a VISN versus a station level. The resident will be responsible for scheduling any meetings needed for topic discussions with the preceptors. Dashboard tools that are available nationally and at the VISN level for population health management will be introduced and the resident will be responsible for capturing, reviewing, and tracking progress of PBM monitored metrics for quarter 3 and quarter 4 of the fiscal year. The resident will also start to gain experience in how clinical task forces and workgroups in the VISN function and support population health activities by selecting one to support throughout the year.

Quarter 2: Resident will continue to learn more about population health management at different levels (VISN, Station, CRH) and will schedule and actively participate in population health management discussions. The resident should be able to independently review various VISN 21 population management tools to identify important measures and actionable patients for intervention. The resident will be taking an active role to begin the review process, assessment, and can develop therapeutic care plans for actionable patients. They will also take an active role in reviewing the previous fiscal years performance and using data visualization skills to create an annual report to show the information.

Quarter 3: By this point in the residency, the resident should have a good foundational understanding of the activities that occur at national, VISN, and station levels for population health. It is expected that the resident will be utilizing dashboards to identify actionable patients, assess their care needs and provide direct patient care with a therapeutic care plan. The preceptor will still provide oversight and coaching but expects the resident to work towards well-formed care plans independently. The resident will also be able with their understanding of regulatory requirements and VISN and PBM priorities identify potential gap areas where a population health tool might be needed.

Quarter 4: The resident will be able to function and perform roles to the equivalent of the preceptors with minimal to no instruction. The resident should establish themselves as a subject matter expert in population health and be able to actively give input during workgroup meetings. At this time the resident should be creating a population management tool and actively diffusing it's use and utility through the VISN to other health care professionals.

Goals and Objectives:

Competency Area R1: Population-Based Health Care		
Goal R1.1: Demonstrate understand of basic population-based health principles, standards, and best practices.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R1.1.1: (Understanding) Describe the concept of population health and the basic framework that relates healthcare policy and health factors to overall population health.	<ul style="list-style-type: none"> • <i>Describes the concept of population versus individual patient health management with preceptor.</i> • <i>Understands the concepts of health disparities, health equity, social determinants of health (SDOH), and population health and their relationship to each other.</i> • <i>Discuss the pharmacist's role in population health management and review VISN 21 Dashboards.</i> • <i>Reviews the organization's process for designing and/or participating in population health management programs at the facility.</i> 	1, 2
Objective R1.1.2: (Understanding) Identify standards and standard-setting bodies governing the use of data, information and knowledge in population-based health and best practices.	<ul style="list-style-type: none"> • <i>Identifies standards and key external governing bodies that influence implementation and ongoing management of information systems in population-based healthcare (e.g., CMS, TJC, NCQA, PQA, SAIL).</i> • <i>Reviews population health and cost related measures set at the VA national and VISN level.</i> • <i>Reviews evidence-based, patient-centered practice guidelines pertinent to the population health metric/dashboard.</i> • <i>Discuss best practices for population and practice management with preceptor/pharmacy colleagues throughout the VISN.</i> 	1, 2
Goal R1.2: Collect and analyze patient population data for the health system or organization.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R1.2.1: (Applying) Identify the targeted patient population(s) that meets the needs of the organization.	<ul style="list-style-type: none"> • <i>Reviews pharmacy and/or health-system strategic plan and short/long-term goals to align target population with organizational priorities.</i> • <i>Meets with pharmacy/organizational leaders to identify target population(s) of interest to leadership.</i> • <i>Review pertinent registries/population health tools and identify patients who are appropriate candidates for panel.</i> • <i>Identify one VISN clinical task force to support for the year and begin attending monthly meetings and providing support for the remainder of the year.</i> 	1,2

Objective R1.2.2: (Applying) Identify targeted patient population(s) using analytical tools such as dashboards or reports to prioritize the delivery of pharmaceutical care.	<ul style="list-style-type: none"> Review the population health metric/dashboard of interest and conduct chart review in the EHR, assessment, and proposed interventions. Understand data definitions and how the queries identify appropriate patients needing clinical intervention. Conducts quality checks of processes to ensure capture of correct patients and determines the validity and reliability of the tool. 	2
Objective R1.2.3: (Analyzing) Assess patient data against evidence-based medical literature to make decisions at the individual patient and/or population-based level, to assess/resolve a medication-related problem and to make patient-centered, medication and/or non-medication, health improvement, wellness, and/or disease prevention recommendations.	<ul style="list-style-type: none"> Accurately assesses a patient and/or population-based medication regimen to ensure it is concordant with best evidence-based medical literature available. Assesses gaps in medication and/or non-medication therapies. Accesses patient data to improve medication and/or non-medication based care at the individual patient and/or population-based level. 	2, 3, 4
Objective R1.2.4: (Understanding) Demonstrate understanding of analytic tools utilized in the evaluation of patient care improvement projects.	<ul style="list-style-type: none"> Identifies a variety of analytic tools utilized VISN 21 and nationally. Articulates the pros and cons of the analytic tools identified. Participates in capturing fiscal year quarter 3 and 4 performance measure scores and compare previous quarter scores and progress of each station in the VISN by accessing analytical tools. 	1
Objective R1.2.5: (Analyzing) Prioritize the development of analytic tools based on the potential for improvement of patient care.	<ul style="list-style-type: none"> Identifies relevant factors when determining priority for patient care improvement initiatives. Demonstrates the change to the urgency of tool development or reordering of current priorities based on the complexity or severity of patient problems. Analyze VISN performance on priority metrics for the fiscal year and develop the VISN PBM annual report. 	2
Goal R1.3:		

Collaborate with departmental and/or interdisciplinary teams in the design, implementation, and/or enhancement of the organization's criteria for appropriate medication use management.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R1.3.1: (Creating) Collaborate with a team to write, revise, or provide input to a health plan and/or health system on an existing guideline/protocol.	<ul style="list-style-type: none"> • <i>Collaborates effectively with peers to create/revise a guideline/protocol or population health metric.</i> • <i>Assures guideline/protocol is able to be practically implemented by all affected parties.</i> • <i>Uses appropriate evidence-based, peer reviewed, literature.</i> • <i>Ensures that guideline/protocol adheres to all applicable rules and regulations of the organization.</i> 	3,4
Objective R1.3.2: (Creating) Create a measure/metric of population health outcome(s) collaborating with peers as appropriate.	<ul style="list-style-type: none"> • <i>Effectively compiles suggestions from peers to create/revise a measure/metric(s).</i> • <i>Constructs measurable measure/metric(s).</i> • <i>Uses existing guideline-based external quality metric sources where appropriate.</i> 	3
Goal R1.4: Ensure that all patient-specific, medication-specific, and evidence-based pharmacotherapy information required to support effective medication-related decisions is readily available in a useful format to all end users.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R1.4.1: (Creating) Develop an evidenced-based resource/tool.	<ul style="list-style-type: none"> • <i>Creates/updates/maximizes a new resource/tool using appropriate evidence-based literature to optimize medication related decisions at the population, patient, and provider level for the VISN.</i> • <i>Identifies gaps between current literature and/or clinical guidelines and how information is presented in an existing population management tool.</i> • <i>Identifies essential data to include in the tool that will maximize efficiency and capability of drawing conclusions about patient care.</i> • <i>Outlines presentation of data within the tool that optimizes understanding and feasibility of implementation by the end user.</i> • <i>Proposes updates to an existing tool or framework for a new tool to clinical leaders and other stakeholders for approval.</i> • <i>Creates an implementation plan for the new tool or update and completes implementation of the final product to the end user level.</i> 	3, 4

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	Preceptors	Resident	Quarterly and end of rotation
Summative Evaluation (Self-Eval)	Resident	Resident	Quarter 1, 2, 3
Preceptor Evaluation	Resident	All preceptors of learning experience	End of learning experience
Learning Experience Evaluation	Resident	Learning Experience	End of learning experience

Clinical Data Management and Analytics

Brief Learning Experience Descriptor:

Overall, the resident will learn and apply a variety of data skills from database extraction to final product development, with the goal of independent creation and maintenance of electronic dashboards and reports. Knowledge and applied use of structured query language (SQL) will be taught for leveraging relational databases. This includes formulating, executing, and revising plans and coding procedures for data extractions using T-SQL. Upon graduation from the program, the resident will have an overall understanding of the VA health data repository, the Corporate Data Warehouse (CDW), and the VISN 21-specific database within the CDW. In addition to T-SQL, the resident will be taught data analysis and report design with programs such as Power BI.

Rotation Schedule:**Longitudinal Learning Experience**

- The learning experience will begin in July and concludes at the end of March (End of Quarter 3).
- Estimated time commitment per week is 16 hours.
- Assignments made on a weekly basis by the preceptors.

Role(s) of the Pharmacist(s):

The VISN network office and facilities rely on data for various activities, including but not limited to measuring performance and operationalizing healthcare quality initiatives. Because pharmacists have a strong clinical background, operational knowledge and naturally play a role in an interprofessional team, pharmacists who serve as data SME and can design projects, extract and present data, and effectively leverage data to improve healthcare delivery.

Expectations of Residents:**Designated Meetings/Responsibilities**

- VISN 21 PBM Staff Huddle
- VISN 21 Clinical Data Manager Meeting
- SQL Training

- Front-end Reporting Training (currently SSRS and Power BI)
- Subcommittee/Taskforce Meetings (as assigned)

Checklist of assignments/projects/requirements that must be complete to successfully pass the learning experience

- SQL Training Exercises
- Journal club presentation related to data topic. [Appendix VI](#) has guidance for completing a journal club that may be useful.
- Queries involving basic SQL coding
- Conduct data queries using Pyramid Analytics
- Use and interpret analysis tools effectively
- Perform validation of data using SQL, Pyramid, Dashboards, and EHR
- Prepare data for presentation using Microsoft Excel, PowerPoint, or similar program
- Utilize/Create ETL packages using SSIS
- Development of data elements in dashboard tool or other end-user products
- Perform maintenance and troubleshooting on analysis tools
- Actively participate in new product development and design

Assigned Readings/Discussion topics:

[*Translating Data Into Action: Using Information to Optimize Patient Care*
Kathi Kellenberger. Beginning T-SQL 2012, Apress Publications
Database Onboarding](#)

Progression of Residents:

(Length of time preceptor spends in each of the phases will be customized based upon resident's abilities and timing of the learning experience during the residency training year)

Quarter 1: Residents will train on various software applications including T-SQL (basic) and Pyramid Analytics. They will become familiar with processes for data access and data requests, including VISN 21 LEAF. Residents will understand and be able to explain various database concepts including relational databases, efficient programming, data warehouse architecture and permissions, indexing, data security methods and purpose, and clinical decision support through technology. Residents will be able to write basic efficient queries of the level of those demonstrated during General SQL Training, build prescription utilization reports in Pyramid or Power BI, and manipulate existing reports for analyses. Preceptors will conduct training courses and work with residents while building their first several queries and analyses, modeling/demonstrating application of the programs. The residents will progress over the first half to being able to independently perform data queries and analyses, with preceptors reviewing and providing input on modifications or additional analytic concepts for incorporation as the residents gain more skill and independence.

Quarter 2: Residents become more independent and assume active role as data management experts in the organization, providing data extraction and analytics services to customers

(pharmacoeconomists, formulary managers, clinical teams, service line chiefs, and network leadership). Preceptors attend meetings or discussions when data or analysis is requested, coaching the resident on how to inquire and customize products to the customer's needs. Preceptors coach residents to take on more responsibilities, as residents will serve as the point of contact for new analytics projects. Preceptors will offer troubleshooting assistance on more complex queries and projects.

Quarter 3: The resident will work on existing and new projects, using his/her best practices and becoming fully independent from the preceptor. Throughout the projects, the resident will evaluate data and implement appropriate interventions. Preceptor will facilitate when necessary.

If a resident is not progressing as expected during a block on specific objectives, those deficiencies will be identified during the rotation's ongoing formative evaluations and/or customized plans and activities re-assigned during the existing block and/or the next rotation block. Specific activities will be assigned to address deficient objectives to be completed either by the end of the current rotation block or within the first 2 months of the next block, in order to demonstrate progression. The resident will be formally re-evaluated on those objectives upon completion of the current block or at the end of the first 2 months of the next block (using PharmAcademic summative evaluation or on-the-fly evaluation) to ensure ongoing monitoring of progression and mastery of skills. The resident will continue to be required to meet the objectives already assigned to the block, even when objectives from prior block(s) have been re-assigned, in order to ensure adequate progression through the year.

Goals and Associated Objectives formally taught and evaluated during this experience:

<i>Competency Area R2: Clinical Data Management and Analytics</i>		
Goal R1.1: Demonstrate knowledge of data generation, flow and capture, storage, and use in business and clinical decision-making.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R2.1.1: (Understanding) Explain available technology for medication prescribing, order processing and verification, preparation, distribution, dispensing, monitoring, safe and efficient administration and documentation of these activities.	<i>Discuss understanding of medication related EHR functions. If the resident does not have clinical experience in the VHA, they will be assigned training in TMS or through PBM Clinical Informatics.</i>	1
Objective R2.1.2: (Understanding) Explain the concept of data warehousing, capture of documented healthcare data in a primary system and translation to a data warehouse, and its use in querying data for clinical and operational decision-making.	<i>Participates in lecture and discussion, "Translating Data into Action: Using Information to Optimize Patient Care" where these topics are covered</i>	1

Objective R2.1.3: (Creating) Construct a workflow process diagram(s) using knowledge of data flow, workflows, and identification of appropriate team members.	<i>Prior to conducting data extraction for a project, map out plan of data sources and data transformations</i> <i>When working with existing reports, map out connection between report object, stored procedures, and data sources</i>	1
Goal R2.2: Demonstrate and apply understanding of basic analytics principles, standards, and best practices.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R2.2.1: (Understanding) Utilize best practice strategies to maximize code performance and data management.	<i>Participate in lecture and discussion on code optimization</i> <i>Utilize BSL's recommend Six Simple Steps for Query Optimization</i> <i>Adhere to D05_VISN21 workspace naming conventions</i>	1
Objective R2.2.2: (Applying) Collaborate with information technology staff and other professionals to assess analysis tool security and patient protections for conformance with accepted standards including access control, data security, data encryption, HIPAA privacy regulations, and ethical and legal issues.	<i>Participate in lecture and discussion on BSL guidance for securing PHI/PII data</i> <i>Apply BSL standards for securing PHI/PII in all communications and front-end reports</i>	2
Objective R2.2.3: (Creating) Demonstrate proficiency in the use of databases and data analysis software to successfully construct reports and dashboards.	<i>Writes T-SQL code to extract and transform data</i> <i>Generates scripts for code updates</i> <i>Develops front-end report with SSRS or Power BI</i>	2
Goal R2.3: Establish oneself as an expert for data retrieval, evidence-based medication information, and outcomes-related resources within the organization.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R2.3.1: (Applying) Implement a strategy for earning credibility within the organization as an authoritative expert on the creation of analytic tools, measurement of outcomes, and overall evidence-based medication-related care of patients.	<i>Thoroughly validates all data presented</i> <i>Presents data-driven solutions on VISN committee and task force meetings</i> <i>Educates colleagues on data tools available</i> <i>Respond to data requests through the LEAF portal, collaborating with the data requestors to troubleshoot issues with existing tools or develop new tools</i>	3
Objective R2.3.2: (Applying) Contribute clinical perspective and expertise regarding the development, implementation,	<i>Serve as data SME on VISN committees and task forces</i> <i>Respond to data requests through the LEAF portal, collaborating with the data requestors to develop solutions</i>	2

utilization, and revision of outcomes measures and metrics, and analysis tools in interactions with information technology staff, clinicians and end users.		
Objective R2.3.3: (Analyzing) Analyze feedback from the end user(s) on usability and efficacy of the resource/tool and revise accordingly.	<i>New data tools: engage with stakeholders throughout the report development process</i> <i>Existing data tools: provide customer support through the LEAF portal</i>	3
Goal R2.4: Evaluate opportunities for improving patient outcomes, clinical and operational efficiencies, safety and quality of the medication-use process through the application of Continuous Quality Improvement (CQI) strategies.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R2.4.1: (Understanding) Demonstrate knowledge of the formal structure of a CQI initiative.	<i>Participates in "LEAN Lite" training</i>	1
Objective R2.4.2: (Applying): Design and/or deliver processes and/or initiatives that support quality measures to improve population health outcomes of medication therapy.	<i>Serves as data SME on one of the VISN subcommittees</i>	2
Objective R2.4.3: (Evaluating) Use data collection tools and/or methodologies to identify opportunities to improve medication-use processes.	<i>Analyzes data from existing dashboards and reports for presentation at VISN Medication Use Management workgroup</i>	2
Objective R2.4.4: (Applying) Participate in a CQI initiative and lead a component of a technology or automation system.	<i>Uses T-SQL skills to extract data from the data warehouse for CQI project</i> <i>Coordinates communication between stakeholders and serves as data SME for project completion</i>	3

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	All preceptors	Resident	End of learning experience
Preceptor Evaluation	Resident	All Preceptors	End of learning experience and quarterly if needed
Learning Experience Evaluation	Resident	Learning Experience	End of Learning experience
Summative Evaluation (Self-Eval)	Resident	Resident	End of quarter 2 and quarter 3

Quality Improvement or Research Project

Brief Learning Experience Descriptor:

This learning experience is designed for the resident to learn how to develop, execute, and report results of investigations of pharmacy practice-related issues. The resident will be responsible for obtaining experience in all areas of a research or quality improvement project including development of a hypothesis, submission of a project proposal, application to IRB (for research approval or classification as a QI), data collection, data analysis, drawing conclusions, and manuscript presentation. The resident will work with the RPD and one or more preceptors throughout the project life cycle as well as the Research personnel from the VASNHCS who will assist in coordinating project deadlines and IRB approval. Residents will be encouraged to conduct outcomes-based research or quality improvement projects, preferably incorporating the skills learned from other rotations and building a new analysis tool that will assist in the data mining component of the project. In addition to the manuscript, residents are required to present a project poster at the ASHP Midyear Clinical Meeting and attend another professional meeting of their choosing in the spring to present their final project results as either a poster or platform presentation.

Rotation Schedule:

Longitudinal Learning Experience

- The learning experience will begin in July and continue through the entire residency year to the end of June.
- Estimated time commitment per week is 2 hours but may be more in July as the resident works on their initial protocol
- Residents will follow the project timeline outlined below

Role(s) of the Pharmacist(s):

VISN PBM program managers all take an active role in quality improvement and evaluating outcomes of our pharmacy services and developed dashboard tools. The pharmacists in this role serve as mentors and may provide input and consultation to the resident during each stage of the project based on their experience. The RPD takes an active role in oversight of all QI projects and ensures projects selected relate to health care system priorities. The RPD and project preceptor also actively participate in the stages of the project including contributing to statistical analysis, review of results, and submission of the manuscript for publication.

Expectations of Residents:

The resident must receive approval from the Residency Committee prior to initiating the project. The project preceptor and RPD must be apprised of the progress and all problems encountered in a timely manner. The resident must meet with the project advisor at least monthly to discuss the progress and report on progress to the program director. The Project Resources folder on the V21PBMSHare drive will include useful resources and the resident may find all the latest up to date forms they will need at this link: <https://renovaresearch.org/>. For both the proposal and the presentation of the results, the resident must demonstrate to the PBM Staff a thorough understanding of the topic, the methods, any shortcomings of the study and the results and conclusions supported by the project. The resident must meet scientific standards for quality in all aspects of the project. The resident may be required to repeat any or all aspects of the project if the

standards are not met. The resident will not receive a residency certificate if the project is not completed or if a final paper suitable for publication is not submitted by the approved deadline. Suitability will be determined by the residency advisor and program director with the advice of the Residency Board. See below the Residency Project Timeline for list of deliverables.

Progression of Residents:

The resident is given appropriate time during orientation to complete research training. During the first several months the resident is encouraged to select a project and begin study development. IRB R&D or QI approval should be secured as appropriate to the study design. The resident will begin to learn data visualization techniques and data collection and study conduct should be given significant time in December and January.

The following timeline should provide a rough idea of how the project should proceed throughout the residency year and required deliverables:

Residency Project Timeline		
Month	Due Date	Description
July	On scheduled meeting date	Meet Reno research staff and attend any meetings scheduled through Reno to learn about their submission process
	On scheduled meeting date	Receive information on available projects Residency director and preceptors will meet with residents as a group to describe available research projects and ideas
	Last Thursday of the month	Complete CITI Training – Web based training Complete TMS training – titled “Ethics Most Wanted” Print 2 completion certificates, place one copy in your residency binder and give the other to the research pharmacist [research pharmacist will fax a copy to the research department for their records]
		Choose project for residency year Email RPD chosen project and project preceptor name
August	When posted by ASHP (date varies)	ASHP Midyear Clinical Meeting poster submission site for students, residents and fellows opens. Watch for early bird registration deadlines for residents and team members. Become familiar with submission process and poster guidelines, as you will be submitting a poster of your planned project. Applications are due by October 1 st to ASHP. (<i>Midyear poster may be different than year-long residency project</i>)
	Second Thursday of the month	Complete draft of research proposal and present to staff at VISN 21 PBM Staff meeting or to project team - Be prepared to talk about your project idea and proposed methods for about 5 minutes, and take notes on questions and suggestions for your final draft https://renovaresearch.org/
	Third Thursday of the Month	Final draft of research proposal, with prior approval from preceptor, due to project team and RPD <ul style="list-style-type: none"> • Complete Quality Improvement Form 130 and get signatures from primary preceptor and RPD • Final QI Project Template • Save template as QIProjectTemplate.Lastname.Firstname • Save form 130 as Form130.Lastname.Firstname

		Email document to RPD and cc project preceptor(s), noting that this has been approved as a final draft. After all signatures have been completed resident will email required QI forms and Project proposal to Reno Research.
September	Second Thursday of the Month	ASHP Midyear Clinical Meeting – first draft of abstract for poster submission due to research pharmacist and project preceptor(s) Follow directions at http://www.ashp.org/ Email link to version for editing to RPD and preceptor(s).
	Third Thursday of the Month	Final draft of abstract due. ASHP Midyear Clinical Meeting – Abstract for poster submission due October 1 to ASHP. Follow directions at http://www.ashp.org/ Once finalized with project team, follow instructions to submit to AHSP and Email RPD with your submission number and an electronic copy of your submitted abstract.
October	First Thursday of the Month	All IRB and R&D approvals or final authorized QI form (for non-research) should have been obtained at this point, copies of all approval letters are due to the RPD. Start work on ASHP Poster
	Set personal deadline	Begin Manuscript Start document by refining ASHP abstract and editing background/introduction information from project proposal.
	Second Thursday of the month	DRAFT of ASHP poster due to preceptor(s) and RPD for review and comment.
	Third Monday of the Month	DRAFT of ASHP poster due to preceptor(s) and RPD for review and comment.
November	First Monday of the Month	FINAL ASHP poster due to preceptor(s) and RPD along with <ol style="list-style-type: none"> 1) Complete research form 180 and signatures 2) VA privacy forms *Once approved promptly work with RPD and Trace Schade to use VISN purchase card to order through MakeSigns and have shipped directly to you
December	Occurs the first or second week of the month	Attend ASHP Midyear Clinical Meeting and Present Research Poster
	Whole month	Resident should finish pulling all data needed for project and meet with project team as needed. Work on manuscript in spare time
January	Third Monday of January	Choose spring conference you would like to attend Draft of Spring Conference Abstract due to preceptor(s) and RPD for comment and review *note western states will be our back up and we will still submit here just in case See http://www.westernstates-rx.org/ for information and regulations regarding abstract format and submission
February	Mid-February	Register for Spring Conference
	End of Month	Finish data analysis and results for project

March	First week in March and as needed per resident	Finish draft of Spring Conference presentation and complete first presentation to preceptors and pharmacy staff
April	Schedule as needed	Continue data analysis and refinement of project presentation
	Second Friday in April	Submit journal choice and author guidelines for manuscript to preceptor(s) and RPD via email Start/continue work on draft of manuscript
May	Dates vary, check website	Attend Spring Conference and present project
	Last Friday in May	Submit 2 research project ideas for next year's residents (usually you will see some project presentations at the spring Conference that might be beneficial if performed here) Submit projects via V21PBMSHare for new residents. Use the project proposal form and save to the submitted project ideas folder.
		Submit project closure documents to research department Note: this is only for research projects, no closure documentation is needed for non-research/QI projects
June	2 weeks before end of residency	Submit finalized manuscript in a form that is ready for publication

Goals and Associated Objectives formally taught and evaluated during this experience:

Competency Area R3: Quality Improvement or Research Project		
Goal R3.1: Demonstrate the ability to conduct a population health, data analytics, quality improvement, or research project using effective project management skills.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R3.1.1: (Understanding) Explain the principles and methodology of study design (i.e., clinical, humanistic, and economic outcomes analysis).	<ul style="list-style-type: none"> Discuss understanding of the different types of clinical, humanistic, or economic outcomes analysis along with their purpose. If the resident has not previously attended the Understanding Designs for Clinical Research course offered through the VA or needs a refreshed course, they will be assigned that training. Explains possible reliable sources of data for conducting a quality improvement project. Explains how results of an outcomes analysis can be applied to make VISN decisions and modifications to a clinical program or formulary process. 	1, 2
Objective R3.1.2: (Analyzing) Identify and/or demonstrate understanding of specific project topic related to population health management, data analytics, or advancing the pharmacy profession.	<ul style="list-style-type: none"> Appropriately identifies or understands problems and opportunities for improvement projects based on best practices or evidence-based principles. Conducts a comprehensive literature search and draws appropriate conclusions. Determines an appropriate research question or topic for a practice-related project of significance to patient care that can realistically be addressed in the desired time frame. 	1

	<ul style="list-style-type: none"> • <i>Accurately evaluates or assists in the pulling of and evaluation of electronic health record or dashboard data to identify opportunities for improvement.</i> 	
<p>Objective R3.1.3: (Creating) Develop a plan or research protocol for a quality improvement or research project related to the care of a specified population of patients or for advancing the pharmacy profession in population health management.</p>	<ul style="list-style-type: none"> • <i>Follows the established project timeline outlined in the residency manual.</i> • <i>Develops specific aims, selects an appropriate study design, and develops study methods to answer the research question(s) and writes into a protocol for approval.</i> • <i>Presents ideas and seeks input, review, and approval by VISN PBM and other relevant stakeholders affected by the project.</i> • <i>Applies evidence-based and/or basic pharmacoeconomic principles, if needed.</i> • <i>Identifies and obtains necessary approvals, (e.g., IRB, quality review board, funding) and responds promptly to feedback or reviews for a practice-related project.</i> • <i>Submits for approval to present project as a poster at ASHP Midyear.</i> 	1, 2
<p>Objective R3.1.4: (Evaluating) Collect and evaluate data for a quality improvement or research project related to the care of a specified population of patients or advancing the pharmacy profession in population health management.</p>	<ul style="list-style-type: none"> • <i>Develops a plan for utilizing T-SQL to pull the appropriate types of data as required by project design.</i> • <i>Uses appropriate electronic data and information from internal information databases, external online databases, appropriate Internet resources, and other sources of decision support, as applicable to obtain data.</i> • <i>Uses appropriate methods for analyzing data in a prospective and retrospective clinical, humanistic, and/or economic outcomes analysis.</i> • <i>Correctly identifies need for additional modifications or changes to the project.</i> • <i>Uses continuous quality improvement (CQI) principles to assess the success of the implemented change, if applicable.</i> • <i>Considers the impact of the limitations of the project or research design on the interpretation of results.</i> • <i>Accurately and appropriately develops plans to apply results of the project or address opportunities for additional changes.</i> • <i>Present preliminary findings of project as a poster at ASHP Midyear</i> 	2, 3

Objective R3.1.5: (Applying) Implement quality improvement or research project related to the care of a specified population of patients or advancing the pharmacy profession related to population health management.	<ul style="list-style-type: none"> • <i>Submits abstract for approval to present results of project at a professional conference.</i> • <i>Present final project results in a platform presentation or poster format at a professional conference.</i> • <i>Effectively presents project and accurately recommends or contributes to recommendation for change, to appropriate workgroups and committees in the VISN.</i> • <i>Demonstrates appropriate assertiveness in presenting pharmacy concerns, solutions, and interests to external stakeholders.</i> • <i>Gains necessary commitment and approval for implementation of recommendation.</i> • <i>Effectively communicates any changes in medication formulary, medication usage, or other procedures to appropriate parties.</i> 	3,4
Objective R3.1.6: (Evaluating) Assess changes or need to make changes to improve care of a specified population of patients or advancing the pharmacy profession related to population health management.	<ul style="list-style-type: none"> • <i>Evaluates data and/or outcome of project accurately and fully.</i> • <i>Uses continuous quality improvement (CQI) principles to assess the success of the implemented change, if applicable.</i> • <i>Correctly identifies need for additional modifications or changes based on outcome.</i> • <i>Accurately assesses the impact of the project, including its sustainability (if applicable).</i> • <i>Accurately and appropriately develops a plan to address opportunities for additional changes.</i> • <i>Completes a final manuscript for the project that is in a format ready for publication.</i> 	3, 4

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	Preceptors	Resident	Quarterly and end of rotation
Summative Evaluation (Self-Eval)	Resident	Resident	Quarter 1, 2, 3
Preceptor Evaluation	Resident	All preceptors of learning experience	End of learning experience
Learning Experience Evaluation	Resident	Learning Experience	End of learning experience

Leadership and Management

Brief Learning Experience Descriptor:

This rotation is an extended learning experience that will help residents become familiar with the key principles utilized in health systems for leadership and overall practice improvement. The VISN 21 Pharmacy Executive and Deputy VPEs will serve as the primary preceptor and evaluators for this experience, though the resident will be precepted by other management/leaders within the organization as well. This experience is designed to expose the resident to leadership nomenclature, key principles, tools, and available resources that will assist them in growing as clinicians, practitioners, and leaders. During the residency, practice foundation skills and values will be taught and observed by preceptors and the experience will be individualized based on the resident's baseline knowledge and growth throughout the year. The resident will participate in several activities designed to improve their working knowledge and experience with leadership concepts. The overarching goal of this longitudinal experience is to enable the resident to apply the knowledge gained to any pharmacy practice setting to improve their individual practice and confidently utilize leadership skills. Topics may include mission/vision statements, strategic plans, effective communication, networking, mentoring, clinical leadership, leadership strategies, available resources/opportunities, regulatory bodies, finances, medication safety, organizations, the importance of publishing, and various programs/activities designed to develop the resident's pharmacy practice/leadership foundation.

Rotation Schedule:

Longitudinal Learning Experience

- The learning experience will begin in July and concludes at the end of March (End of Quarter 3).
- Estimated time commitment per week is 4 hours
- Assignments made on a weekly basis by the preceptors.

Role(s) of the Pharmacist(s):

The VISN network office and facilities rely on strong leadership for the integrity and advancement of pharmacy services and for a variety of other activities, including but not limited to measuring performance and operationalizing healthcare quality initiatives. Because pharmacists have a strong clinical background, operational knowledge and naturally play a role in an interprofessional team, strong leadership and networking abilities are critical to service success at all levels (local, VISN, national). The VISN Pharmacy Executive and Deputy VPEs provide consultation and oversight serving as subject matter experts for pharmacy to stations, the VISN, and at national levels. This rotation exposes the residents to these opportunities cultivating skillsets and establishing lasting networking relationships.

Expectations of Residents:

Designated Responsibilities:

- VISN PBM Staff meeting attendance and participation
- Attendance and participation in all leadership lecture series topics
- USP Meetings – active participation
- V-Care planning/attendance as allowed

- VISN Vaccine Workgroup – co-chair meetings, develop agendas, track follow-up as part of the minutes
- Various other meetings, short-term projects, etc as they come up during the year
- Co-chair the VISN Vaccine Workgroup
- Attend assigned VPE/MAP Meetings, take notes, report topics at MUM/VISN PBM
- Attend ASHP Midyear Meeting and participate in residency recruitment (December)
- Participate in and help facilitate residency candidate interviews for the PGY2 program

Progression of Residents:

Quarter 1: Resident is oriented, and preceptors instruct and model for the resident. During this time there is shared responsibility with the resident.

Quarter 2: At this stage the resident is coached to take on more autonomous roles including actively leading the vaccine workgroup and independently forming suggestions and ideas to present to relevant stakeholders.

Quarter 3: At this stage the resident should be nearly autonomous with preceptor facilitation only

Goals and Associated Objectives formally taught and evaluated during this experience:

<i>Competency Area R4: Leadership and Management</i>		
Goal R4.1: Demonstrate leadership skills for successful self-development in the provision of population health management and data analytics.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R4.1.1: (Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership.	<ul style="list-style-type: none"> • <i>Demonstrates efficient time management by completing assigned projects on-time or communicating delays to the preceptor.</i> • <i>Manages conflict effectively. Meet with preceptor to discuss the conflict and outline a plan to address.</i> • <i>Demonstrates effective negotiation skills in change management (knowing that change is never comfortable for all stakeholders).</i> • <i>Demonstrates ability to lead interprofessional teams by co-chairing the VISN Vaccine Workgroup and assisting with VISN level committees i.e. MUM team and PBM Formulary Committee.</i> 	1, 2
Objective R4.1.2: (Applying) Apply a process of ongoing self-evaluation and personal performance improvement in the provision of population health management and data analytics.	<ul style="list-style-type: none"> • <i>Accurately summarizes own strengths and areas for improvement in quarterly self-evaluations that assess progress from last quarter. These are submitted to RPD and shared with Preceptors.</i> • <i>Demonstrates ability to use and incorporate constructive feedback from others. Preceptor meets with resident to discuss areas of growth in this area which is part of the quarterly summative eval.</i> 	1, 2, 3

	<ul style="list-style-type: none"> Effectively uses principles of continuous professional development (CPD) planning (reflect, plan, act, evaluate, record/review). 	
Goal R4.2: Demonstrate management skills in the provision of population health management and data analytics.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R4.2.1: (Applying) Contribute to departmental management of population health management and data analytics.	<ul style="list-style-type: none"> Helps identify and define VISN PBM Fiscal Year Performance Metrics. Effectively participates in, or evaluates, strategic plan by assisting with putting together the annual VISN PBM report. Participates effectively on VISN committees or informal work groups to complete group projects, tasks, or goals. Specifically, co-chairing the VISN Vaccine Workgroup. Participates effectively in implementing changes, using change management and quality improvement best practices and tools, consistent with team, departmental, and organizational goals. Specifically: resident active participation in achieving VISN PBM FY Performance Metrics. 	2
Objective R4.2.2: (Applying) Manage one's own advanced practice effectively.	<ul style="list-style-type: none"> Reviews and interprets the most recent primary literature when tasked with a project, data request, pharmacoeconomic evaluation when applicable or upon request from a preceptor/colleague. Demonstrates effective workload and time-management skills. Residents are asked to be transparent with the ability and/or inability to meet expected deadlines early (not waiting til last minute). Participation in weekly huddles and bi-weekly staff meetings set for this purpose. Demonstrates enthusiasm, self-motivation, and a "can-do" approach. When obstacles/questions arise, meet with the preceptor to discuss. Come with proposed action plan. Strives to maintain a healthy work-life balance. Active participation in Coping Corner and HRO Focused Stories at the weekly huddles and bi-weekly Staff Meetings. Demonstrates pride in and commitment to the profession through: <ul style="list-style-type: none"> Appearance, Personal conduct, Planning to pursue board certification. Membership in professional organizations related to the pharmacy practice. 	2,3

Goal R4.3: Assist the organization in achieving compliance with accreditation, legal, regulatory, and safety requirements related to the use of medications (e.g., appropriate accrediting bodies and related professional organization standards, statements, and/or guidelines; state and federal laws regulating pharmacy practice).			
Objective	Related Activity/Instructional Objectives	Quarter Evaluated	
Objective R4.3.1: (Analyzing) Determine appropriate activities and documentation needed to meet accreditation, legal, regulatory, and safety requirements for pharmacy.	<ul style="list-style-type: none"> • <i>Accurately interprets legal (e.g., Medicaid/Medicare, State, Federal), regulatory (e.g., CMS), and accreditation requirements (e.g., TJC, HEDIS, NCQA, URAC) in ad hoc leadership audits during learning experience.</i> • <i>Demonstrates knowledge of and understanding related to VHA policy in relation to ad-hoc leadership questions/audits during learning experience.</i> • <i>Reviews current organizational documentation related to compliance by assisting with preparation, reviews and follow-up of VCARE Site Visits</i> • <i>Articulates implications associated with non-compliance to various VHA policies (Handbooks, Directives, Memorandums, Guidance Documents, Inservice Policies, and SOPs)</i> 	3	
Objective R4.3.2: (Applying) Participate in the organizational compliance processes for accreditation, legal, regulatory, and safety requirements related to data, medications, and pharmacy practice.	<ul style="list-style-type: none"> • <i>Actively participates in the preparation, review and follow-up of at least one VCARE Site Visit for Pharmacy Service.</i> • <i>Effectively addresses VHA policy questions as they arise.</i> • <i>Identifies gaps in compliance and develops proposed strategies to address.</i> • <i>Actively participates in VHA committees which oversee organizational compliance (i.e. VPE/MAP, HOC, Executive Leadership Committee, and others as assigned)</i> 	3	

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	Preceptor	Resident	Quarterly (Quarters 1,2,3)

Preceptor Evaluation	Resident	All Preceptors of Learning Experience	End of Learning Experience
Learning Experience Evaluation	Resident	Learning Experience	End of Learning Experience

Assigned Leadership Lecture Series topics include:

- a. Professionalism
- b. Career planning
- c. [Whitney Award Winners](#)
- d. Strength Finders (Gallup Training) – purchased for each resident – ongoing
- e. HBDI (whole brain thinking) – ongoing
- f. Annual Pharmacist Workshop
- g. Nevada Law CE
- h. Interviewing Skills
- i. Axiom “Leadership Lessons” for a Lifetime
 - Vision and Strategy
 - Teamwork and Communication
 - Activity and Assessment
 - Personal Integrity
 - Hiring for talent
- j. LEAN Management
- k. Immortal Life of Henrietta Lacks

Teaching, Education, and Dissemination of Knowledge

Brief Learning Experience Descriptor:

The purpose of the Academic Detailing experience is to introduce the pharmacy resident to the skills and techniques of Academic Detailing and to allow them to practice the skill. Within VISN 21 we have one VISN Academic detailing lead and each station has their own academic detailer. The resident will get exposure to all the detailers within VISN 21 facilities and will participate in VISN academic detailing meetings. The Academic Detailers are responsible for providing Academic Detailing to staff based on national and VISN initiatives. Academic Detailing involves reviewing and learning evidence-based medicine, developing and/or promoting educational pieces that include key messages, providing Academic Detailing outreach visits to VA staff, identifying, and resolving barriers, and socializing new Academic Detailing campaigns. The pharmacy resident will be expected to contact and request (via email, phone call, or other form of communication as necessary) academic detailing outreach visits with VA staff, prepare for each outreach visit, and lead an outreach visit after practicing and shadowing preceptor. The resident will also be expected to follow-up with the staff member(s) after the outreach visit and to address or resolve (if possible) any barriers discovered/uncovered during the visit. The resident may also be asked to socialize Academic Detailing campaigns at team and/or leadership meetings as well as develop and/or edit provider and patient level educational materials. In the past years, residents have collaborated with VISN data managers to create dashboard reports and/or to update database tools as related to various academic detailing program needs.

Rotation Schedule:

Longitudinal Learning Experience

- The learning experience will begin in July and continue through the entire residency year to the end of June.
- Estimated time commitment per week is 2 hours.
- Assignments made on a weekly basis by the preceptors.

Role(s) of the Pharmacist(s):

- Provide leadership and guidance to academic detailers by assessing resource requirements, programming needs, and addressing infrastructure
- Hold a position of high visibility to provide specialized support for promotion of evidence-based therapies through healthcare professional educators primarily pharmacists structured face to face encounters with VA clinicians for the purpose of improving veterans' health.
- Consult with VACO, VISN, and Facility level Clinical Specialty Care Leadership, Mental Health Leadership, Primary Care and PBM staff to help initiate, develop, validate and execute projects promoting the application of evidence-based therapies for common and/or chronic illnesses.
- Exercise initiative and to collaborate effectively with clinical and administrative staff at all VISN stations to meet performance goals and support quality patient care activities.

Expectations of Residents:

- Complete academic detailing training with VISN AD program lead
- Ability to provide balanced evidence-based information to identified providers in order to help them meet the needs of their patients
- Contribute to at least one AD newsletter per year
- Prepare 1-2 presentations for academic detailers to discuss leadership skills, communication techniques, data visualization, various VA resources and initiatives and more.
- Utilize data analysis and visualization to measure programming impact and to trend changes in metrics. Monitor outcomes of educational outreach programs.
- Become familiar with VA rules, VA clinical direction, ethical conduct, and CPG implementation process.
- Interpret policy, procedures, and philosophy for applicable staff for purpose of enhancing programming efforts.
- Conduct a minimum of two academic detailing visits as lead with a preceptor.
- Take an active role in serving as the preceptor for any PGY1s that take an elective with our program
- Participate in VISN preceptor development activities

AD Basic Skills Training Manual and Example Academic Detailing Outreach Visit Assessment Form

Basic Skills Workshop Training Manual.docx Academic Detailing Outreach Visit Assess

Progression of Residents:

Quarter 1: Residents will be properly trained on the basic knowledge skills of academic detailing and communication techniques. They will attend and participate in monthly VISN academic detailing calls and meet the detailers.

Quarter 2: Residents will slowly be asked to join individual AD visits to shadow other detailers during provider visits. They will continue to take an active role in providing any needed analysis or data support for the VISN calls. If we have any PGY1 residents taking an elective rotation with our program the resident will take the lead on precepting with the RPD coaching them during the experience.

Quarter 3: Residents should feel confident enough to lead provider visits on their own with the supervision of their preceptors. Residents should be able to identify practice areas in need of academic detailing intervention and be able to help facilitate campaigns to contribute to outcomes of the AD program in the VISN.

Quarter 4: Residents should be able functioning autonomously at this stage. It's expected the resident should be able to develop final education products and conduct outcomes analysis as needed for the AD program during this quarter. They may also can continue to lead provider visits under supervision.

Goals and Associated Objectives formally taught and evaluated during this experience:

Competency Area R5: Teaching, Education, and Dissemination of Knowledge		
Goal R5.1: Provide effective medication and practice-related education to health care professionals in population health management and data analytics.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R5.1.1: (Creating) Design effective educational activities related to population health management and data analytics.	<ul style="list-style-type: none"> • <i>Understands national and VISN academic detailing priorities and can select relevant topics to focus on.</i> • <i>Identifies appropriate target audience and education needs. Creates educational objectives that are specific, measurable, and at a relevant learning level.</i> • <i>Selects and uses evidence-based information (using primary literature where appropriate) and best practices to support educational campaign development and dashboards.</i> 	1, 2, 3
Objective R5.1.2: (Applying) Use effective presentation and teaching skills to deliver education related to population health management and data analytics.	<ul style="list-style-type: none"> • <i>Prepares and presents 1-2 topic presentations for VISN academic detailing meetings.</i> • <i>Presents at appropriate rate and volume and without exhibiting poor speaker habits (e.g., excessive use of "um" and other interjections) and is able to solicit active participation and engagement from audience.</i> • <i>Summarizes key messages at appropriate times throughout presentations and is able to transition smoothly between concepts.</i> • <i>Effectively develops and uses audio-visual aids and handouts to support learning activities.</i> 	3, 4
Objective R5.1.3: (Applying) Use effective written communication to disseminate knowledge related to population health management and data analytics.	<ul style="list-style-type: none"> • <i>Contributes to at least 1 Academic Detailing newsletter.</i> • <i>Writes in a manner that is easily understandable, at a level appropriate for target audience, and free of errors.</i> • <i>Includes critical evaluation of the literature and a summary of what is currently known on the topic using tables/graphs/figures when appropriate. All citations and references should be included.</i> 	2

Objective R5.1.4: (Evaluating) Assess effectiveness of education related to population health management and data analytics.	<ul style="list-style-type: none"> • <i>Asks learner/audience open-ended questions and identifies any barriers or objections to information being discussed.</i> • <i>Provides timely, constructive, and criteria-based feedback to learner.</i> • <i>Plans for follow-up educational activities to enhance or support learning and (if applicable) ensure that goals were met.</i> • <i>Utilizes data analysis and visualization to measure programming impact and to trend changes in metrics. Monitor outcomes of educational outreach programs</i> 	3
Goal R5.2: Effectively employ appropriate preceptor roles when engaged in teaching students, pharmacy technicians, or fellow health care professionals.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective R5.2.1: (Analyzing) When engaged in teaching, select a preceptor role that meets learners' educational needs.	<ul style="list-style-type: none"> • <i>Identifies which preceptor role is applicable for the situation (direct instruction, modeling, coaching, facilitating).</i> <ul style="list-style-type: none"> o <i>Selects direct instruction when learners need background content.</i> o <i>Selects modeling when learners have sufficient background knowledge to understand the skill being modeled.</i> o <i>Selects coaching when learners are prepared to perform a skill under supervision.</i> o <i>Selects facilitating when learners have performed a skill satisfactorily under supervision.</i> 	1,2,3,4
Objective R5.2.2: (Applying) Employ preceptor roles, as appropriate, when instructing, modeling, coaching, or facilitating skills.	<ul style="list-style-type: none"> • <i>Accurately assesses the learner's skill level to determine the appropriate preceptor role for providing practice-based teaching.</i> • <i>Attends and participates in VISN Preceptor Development activities</i> 	1, 2, 3, 4

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	Preceptors	Resident	Quarterly and end of rotation
Summative Evaluation (Self-Eval)	Resident	Resident	Quarter 1, 2, 3
Preceptor Evaluation	Resident	All preceptors of learning experience	End of learning experience
Learning Experience Evaluation	Resident	Learning Experience	End of learning experience

Pharmacy Benefit Design and Formulary Management

Brief Learning Experience Descriptor:

This is a required longitudinal learning experience that begins after orientation and continues throughout the residency year. The VISN 21 Pharmacy Program Managers of Pharmacoeconomics and the Centralized Prior Authorization Drug Request Team will serve as the primary preceptors for this learning experience. The resident will develop the knowledge, skills, values, and abilities necessary to assist in creating and maintaining Drug Use Criteria/Criteria for Use, improving procurement, contract compliance, and inventory control activities to achieve maximum savings and data accuracy. Several standing committees and many practitioners are involved with the work of developing, modifying, and maintaining the VA National Formulary. In addition, the VISNs are responsible for adherence to Drug Use Criteria and Criteria for Use developed nationally and locally which is accomplished through evaluating prior authorization drug requests. The VISN PBM supports many aspects of the programs designed to support this system. The resident will be exposed to the concepts of managed care systems through their involvement in all aspects of VISN formulary management. Overall, the resident will better understand the complete cycle of drug procurement from the formulary addition, to negotiating contracts with the manufacturer, to ordering, and to receiving the pharmaceuticals. In addition, the resident will gain the necessary knowledge and experience in revenue generation to better understand the legislation, regulation and policies concerning the prescription benefit within the Veterans Health Care Administration. From this fundamental knowledge the resident will also be able to gain expertise in minimizing drug expenditures through cost-containment projects such as medication sequencing and pharmacoeconomic conversion proposals. These are therapeutic interchanges which assess the feasibility of changing a VISN 19 and 21 population from one drug or product to another which incorporate safety, efficacy, cost projections and logistics of changing market share. These projects will be developed and assigned by the preceptor at the direction of committees, task forces, informal groups and will be independent and group learning experiences. The resident will be assigned tasks and will work with a variety of VISN employees in diverse areas to accomplish PBM goals/business for this learning experience.

The resident will develop skills, values and abilities in the practical application of pharmacoeconomic principles to the VA healthcare environment and in research design and methodologies to assess pharmaceutical-related economic, clinical, and humanistic health outcomes. The VISN Pharmacoeconomics lead, PADR team, VASNHCS Pharmacoeconomics Pharmacist, and VISN data managers serve as the preceptors for this learning experience that begins after orientation and continues through March with the option of an Advanced elective. The resident will be assigned tasks and will work with a variety of VISN employees in diverse areas to accomplish tasks for this learning experience. Outcome projects will be developed and assigned by the preceptor at the direction of committees, task forces, informal groups and will be independent and group learning experiences.

Rotation Schedule:

Longitudinal Learning Experience

- The learning experience will begin in July and concludes at the end of March (End of Quarter 3).
- Estimated time commitment per week is 8 hours
- Assignments made on a weekly basis by the preceptors.

Role(s) of the Pharmacist(s):

- Independently assess the needs of the VISN related to cost containment that can be impacted by drug shortages, contract/formulary changes, generic drug availability and new pharmaceutical approvals.
- Accurately estimate the annual savings goals for each station and provide tools and individualized coaching necessary to successfully achieve these goals in targeted areas such as lost opportunity of cost (LOC), additional savings, conversion monitors, local initiatives, tablet splitting, dose optimization, 3rd party collections and inventory turns.
- Efficiently chair Medication Use Management (MUM) and Pharmacy Benefits Management (PBM) committees which includes accurate minute taking, agenda development, conflicts of interest reviews and membership roster updates. The pharmacist will also seamlessly transition, when requested, as a voting alternate on the VISN Pharmacy Executive (VPE) and Medical Advisory Panel (MAP) meetings to represent the needs of the VISN.
- Routinely mentor and precept all residents on rotation by assigning and reviewing projects, scheduling frequent meetings to discuss issues and questions, and providing valuable feedback in a timely manner.
- Constantly monitor standard work due dates from all taskforces and subcommittees, send reminders to appropriate chairs, coordinate the voting of items, and update the SharePoint site when needed.
- Promptly respond to station questions and advise based on established directives, policies, and standard operating procedures.
- Accurately pull data from SQL, Pyramid and McKesson to assess utilization across the VISN and use this data to estimate the potential cost avoidance on an annualized basis.
- Review all centralized prior authorization drug request consults in a timely manner and determine whether the requests should be approved or denied
- Serve as a subject matter expert on various VISN level workgroups
- Create drug use criteria (DUC), criteria for use (CFU), or drug sequencing guidance for medications or classes of medications when needed.

Expectations of Residents:

- Within the first month, residents will be proficient in the McKesson Connect application which includes price, contract status/expiration date, distribution center availability, detail messages and sorting features.
- Within the first month, residents will be proficient in supporting MUM and PBM Committees with vote polling and accurate minutes.

- By the first quarter, residents will be proficient in the expectations of the stations and VISNs related to LOC, additional savings and contract compliance as per the National PBM Pharmacoeconomics recommendations.
- By the first quarter, residents will be able to accurately calculate past and expected annualized drug cost, number of actionable patients, annualized cost avoidance for all stations and VISN (total and per patient) using a combination of Pyramid Analytics, SQL and/or McKesson purchasing data.
- By the first quarter, residents will be able to construct a detailed therapeutic interchange proposals that provides a safe guide for conversion. These proposals will be presented at appropriate committees and questions will be answered appropriately.
- By the first quarter, residents will update expired drug use criteria and drug sequencing documents with updated literature, pricing, and formulary status changes.
- By the 3rd quarter, residents will update tablet splitting and dose optimization tables with cost changes, recommend changes and present to appropriate committees. New drug use criteria and/or drug sequencing documents will be completed as needed.
- The resident will attend all MUM, PBM, VISN 19 Pharmacoeconomics and any other pertinent task force or sub-committees unless otherwise excused.
- Ability to complete assigned PADRs Create a VISN 21 Drug Use Criteria (DUC) based on an extensive review of the literature in combination with VA preferred alternatives which are specific to the indication for therapy

Progression of Residents:

Quarter 1: The resident will become acquainted with PBM Workgroup policies and procedures and the roles of the various disciplines serving on a P&T Committee, as well as present topics as applicable. The resident will become acquainted with the VA formulary, National Pharmacy Benefits Management structure, definitions and VISN 21 resources to aid in VISN formulary management decisions and evaluation of non-formulary/prior approval consults. The preceptor will coach the resident in the non-formulary process and model appropriate response style. The resident will become more independent with the non-formulary process over the first quarter.

- PADR Aspect:
 - Initially it is not expected residents will complete all assigned PADRs
 - By week 3-4 it is expected all assigned PADRs will be completed in a timely manner
 - By week 6 it is expected all assigned PADRs will be completed in a timely manner AND require no or minimal changes in the review by preceptors

Quarter 2: The resident will create therapeutic interchanges and other PE proposals through their independent thinking and problem-solving. In presentations, the resident will become more confident and able to provide justifications for proposals, including fielding questions from PBM Formulary Committee members. Justifications will be backed by sound interpretation of the literature used to develop the proposal(s). The resident will become more independent in being a member of the Formulary Committee and in presenting information to stakeholders at the facility with less assistance required from the preceptor throughout the progression of the second quarter.

Quarter 3: The resident will assume the role of a facility level applied pharmacoeconomic specialist to develop drug criteria for use independently and help the organization's decision makers addressing complex drug utilization issues. During quarters 2-3, residents will continue to build upon their skills and become more proficient in the items listed above. During this time, residents will be able to independently run the MUM and PBM meetings which includes membership attendance and quorum status, agenda development, calling meeting to order, moderating, and presenting the items on the agenda and time management. The resident will apply concepts from both prospective and/or retrospective outcomes analyses to various functions of the MUM workgroup and PBM Formulary Committee. The resident will also participate in academic detailing activities that support the acceptance of PE proposals or drug use criteria.

Goals and Associated Objectives formally taught and evaluated during this experience:

<i>Competency Area E1: Pharmacy Benefit Design and Formulary Management</i>		
Goal E1.1: Explain the interrelationship of the pharmacy benefit design elements and the organization's health care systems.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective E1.1.1: (Analyzing) Examine elements of pharmacy benefit design and management such as co-pay, formulary, medication utilization management, prior authorization procedures, consults, access to pharmacy networks, and contract negotiations (medication acquisition and/or network pharmacies).	<ul style="list-style-type: none"> • <i>Apply evidence-based medicine principles to the review and critique of pertinent literature and apply to formulary and population health management issues.</i> • <i>Perform a medication use evaluation on a targeted drug or prescribing practices and present results and recommendations to an appropriate committee or workgroup</i> • <i>Explain the purpose and organization of a health system's drug formulary and the role of the P&T Committee in establishing it.</i> • <i>Develop proficiency in McKesson connect and Pyramid analytics to allow accurate cost avoidance calculations, past and expected annualized drug cost and number of actionable patients</i> • <i>Develop proficiency in understanding lost opportunity of cost (LOC) calculations for stations and VISN.</i> • <i>Write SOAP notes for all PADR consults utilizing VHA PBM CFU, VISN DUC or other standardized criteria with the goal of determining whether a PADR should be approved or disapproved. All disapproved PADRs will include VA preferred alternative recommendations.</i> 	1 and 2

Objective E1.1.2: (Analyzing) Research literature, business publications, websites and other relevant resources to assemble a list of factors that will influence sites' budget projections for the organization's funding period.	<ul style="list-style-type: none"> • <i>Reviews resources for identifying pipeline drugs.</i> • <i>Analyzes factors considered when determining whether a particular drug would be used by the covered population.</i> • <i>Analyzes the influence of specialty drugs on the pharmacy budget.</i> • <i>Update tablet splitting and dose optimization tables with new cost and make recommendations to align station recommendations</i> 	3
Objective E1.1.3: (Creating) Assist the organization in planning and managing pharmacy drug spend.	<ul style="list-style-type: none"> • <i>Designs models to predict drug spend, considering various plausible scenarios that could influence spend trajectory over the projected time frame.</i> • <i>Generates cost savings plans that use formulary management techniques to achieve cost savings or cost avoidance.</i> • <i>Constructs monitoring tools to track drug spend and savings.</i> • <i>Produces financial reports that are meaningful and tailored to various customers (e.g., organizational leadership, clients, pharmacy directors, and formulary management staff).</i> • <i>Applies clinical perspective and expertise to devise metrics to track and trend drug spend.</i> 	3
Goal E1.2: Manage aspects of the medication-use process related to formulary management through use of pharmacoeconomic proposals, medication use criteria, and organizational policies and procedures affecting the care of patients.		
Objective	Related Activity/Instructional Objectives	Quarter Evaluated
Objective E1.2.1: (Applying) Communicate formulary changes and/or outcomes to the organization.	<ul style="list-style-type: none"> • <i>Maintains the PBM website/SharePoint and MUM and PBM agendas and minutes for effective communication.</i> • <i>Develops clear and concise communication messages and assesses communication effectiveness.</i> • <i>Support MUM and PBM committees with vote polling and accurate minute taking.</i> 	2, 3
Objective E1.2.2: (Creating) Prepare written medication use policy, applying clinical expertise, literature evaluation and appropriate pharmacoeconomic analyses.	<ul style="list-style-type: none"> • <i>Explains the principles and methodology of basic pharmacoeconomic analyses.</i> • <i>Using evidence-based principles, create and update VISN 21 criteria for use (CFU), standard work and sequencing documents.</i> 	1, 2, 3

	<ul style="list-style-type: none"> • Prepares succinct, comprehensive written products that address technical, operational and clinical perspectives and are considerate of workload/staff impact. • Conducts at least two pharmacoeconomic analysis to support MUM team projects and present them to appropriate committees for approval. • Develop an analytical review of approved conversions that have not been implemented in VISN 19 and 21 and provide this information to the stations. 	
Objective E1.2.3: (Applying) Present the medication use policy to an interdisciplinary organizational committee and gain consensus for approval.	<ul style="list-style-type: none"> • Demonstrates appropriate assertiveness in presenting pharmacy concerns, solutions, and interests to internal and external stakeholders. • Presentations reflect understanding of the composition and responsibilities of the organization's committee. • Presentations reflect understanding of the pharmacist's responsibilities when participating in committee decision-making. • Presentations use appropriate style of presentation for committee meetings. 	1, 2, 3
Objective E1.2.4: (Evaluating) Assess the impact of a policy or process recommendation on patient safety and quality of care.	<ul style="list-style-type: none"> • Demonstrates a systematic approach to gathering data and accurately analyzes it. • Updates the Performance Measure and Monitors Grid quarterly and assess station performance. • Presents finding to key stakeholders and implements approved changes, as applicable. • Participates in Pharmaceutical Representative presentations and is able to evaluate relevance of information being presented. 	3

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	All preceptors	Resident	End of learning experience
Preceptor Evaluation	Resident	All Preceptors	End of learning experience and quarterly if needed
Learning Experience Evaluation	Resident	Learning Experience	End of Learning experience
Summative Evaluation (Self-Eval)	Resident	Resident	End of quarter 2 and quarter 3

Designated Meetings to Attend:

- VISN 21 PBM Formulary Committee
- VISN 19 PBM Formulary Committee
- VISN MUM Team
- Task Force Meetings as needed based on project
- VISN 21 Procurement Team (optional)
- VISN 21 PADR Team Meetings (held weekly; expected to attend 2)
- VISN 21 PADR Appeals Meetings (held 3 times weekly; expected to attend 2)

Elective: Academia

Brief Learning Experience Descriptor:

Residents will have the opportunity to develop their teaching skills and understanding of Academia through this abbreviated elective. Through partnership with a retired VISN 21 PBM preceptor Joy Meier, residents will have the opportunity to teach a pharmacotherapy lecture at the Samuel Merritt Physician Assistant School in Oakland, CA. The resident will be responsible for development of an interactive learning session and lab, quiz questions, exam questions, and for holding office hours/assisting students with questions related to their topic area.

Rotation Schedule:

One-time Learning Experience

- The learning experience will occur over a two-week period with one or two lecture dates scheduled by the Samuel Merritt Faculty during the Spring semester
- Expected time commitment is 10-20 hours total for material creation and presentation
- Assignments will be made directly by Samuel Merritt faculty

Role(s) of the Pharmacist(s):

- Pharmacists are the medication and pharmacotherapy experts
- The pharmacist serves as the instructor of record for pharmacotherapy at a physician assistant graduate program
- The pharmacist instructor is responsible for developing education content, lectures, interactive activities, and formal assessments for physician assistant students

Expectations of Residents:

- Set up initial calls with preceptor to discuss topic area assignment, structure of pharmacotherapy class, and lecture/material expectations
- Independently develop learning objectives and a lecture on assigned topic area that includes information relevant for a physician assistant audience
- Maintain professionalism when interacting with students and present oneself as the subject matter expert in the assigned pharmacotherapy topic
- Be able to successfully present the lecture to students and answer any relevant questions to the topic area

Progression of Residents:

- The preceptor will be available to demonstrate and model the expected lecture and material format that will be required
- The resident is expected to be proficient in literature review and evaluation for forming lecture materials
- The resident will have the opportunity to have their lecture materials reviewed by the preceptor for feedback prior to the lecture date
- The resident will also be able to practice their lecture with the preceptor before hand

- The day of the lecture the resident is expected to present themselves as a professional knowledgeable in the pharmacotherapy topic area and will independently present their lecture with the preceptor present for evaluation

Goals and Associated Objectives to be formally taught and evaluated during this experience:

Competency Area E2: Academia	
Goal E2.1: Demonstrate understanding of key elements of the academic environment and faculty roles within it.	
Objective	Related Activity/Instructional Objectives
Objective E2.1.1: (Understanding) Demonstrates understanding of key elements of the academic environment and faculty roles within it.	<ul style="list-style-type: none"> • <i>Accurately describes variations in the expectations of different colleges/schools of pharmacy for teaching, practice, research, and service, including public versus private colleges/schools of pharmacy and relationships between scholarly activity and teaching, practice, research and service.</i> • <i>Accurately describes the academic environment, including how the decisions by university and college administration impact the faculty and how outside forces (e.g., change in the profession, funding source, accreditation requirements) impact administrator and faculty roles.</i> • <i>Accurately describes faculty roles and responsibilities.</i> • <i>Accurately describes the types and ranks of faculty appointments, including the various types of appointments (e.g., non-tenure, tenure-track, and tenured faculty), various ranks of faculty (e.g., instructor, assistant professor, associate professor, full professor), and the role and implications of part-time and adjunct faculty as schools continue to expand and faculty shortages occur, and promotion and tenure process for each type of appointment, including types of activities that are considered in the promotion process and for tenure.</i> • <i>Accurately explains the role and influence of faculty in the academic environment, including faculty in governance structure (e.g., the faculty senate, committee service) and faculty related to teaching, practice, research, and service roles (e.g., curriculum development and committee service).</i> • <i>Accurately identifies resources available to help develop academic skills, including the role of academic-related professional organizations (e.g., AACP) and other resources to help develop teaching skills and a teaching philosophy.</i>

	<ul style="list-style-type: none"> • <i>Accurately identifies and describes ways that faculty maintain balance in their roles.</i> • <i>Accurately describes typical affiliation agreements between a college of pharmacy and a practice site (e.g., health system, hospital, clinic, retail pharmacy).</i>
Goal E2.2: Exercise case-based and other teaching skills essential to pharmacy faculty.	
Objective	Related Activity/Instructional Objectives
Objective E2.2.1: (Applying) Develop and deliver cases for workshops and exercises for laboratory experiences.	<ul style="list-style-type: none"> • <i>Identifies the appropriate level of case-based teachings for small group instruction.</i> • <i>Identifies appropriate exercises for laboratory experiences.</i> • <i>Provides appropriate and timely feedback to improve performance.</i>
Objective E2.2.2: (Evaluating) Compare and contrast methods to prevent and respond to academic and profession dishonesty and adhere to copyright laws.	<ul style="list-style-type: none"> • <i>Accurately evaluates physical and attitudinal methods to prevent academic dishonesty.</i> • <i>Accurately describes methods of responding to incidents of academic dishonesty.</i> • <i>Accurately explains the role of academic honor committees in cases of academic dishonesty.</i> • <i>Identifies examples and methods to address unprofessional behavior in learners.</i> • <i>Accurately describes copyright regulations as related to reproducing materials for teaching purposes.</i> • <i>Accurately describes copyright regulations as related to linking and citing on-line materials.</i>
Goal E2.3: Develops and practices a philosophy of teaching.	
Objective	Related Activity/Instructional Objectives
Objective E2.3.1: (Creating) Develop or update a teaching philosophy statement.	<ul style="list-style-type: none"> • <i>Teaching philosophy includes:</i> <ul style="list-style-type: none"> o <i>Self-reflection on personal beliefs about teaching and learning;</i> o <i>Identification of attitudes, values, and beliefs about teaching and learning; and,</i> o <i>Illustrates personal beliefs on practice and how these beliefs and experiences are incorporated in a classroom or experiential setting with trainees.</i> • <i>If updating, reflect on how one's philosophy has changed.</i>
Objective E2.3.2: (Creating) Prepare a practice-based teaching activity.	<ul style="list-style-type: none"> • <i>Develops learning objectives using active verbs and measureable outcomes.</i> • <i>Plans teaching strategies appropriate for the learning objectives.</i>

	<ul style="list-style-type: none"> • <i>Uses materials that are appropriate for the target audience.</i> • <i>Organizes teaching materials logically.</i> • <i>Plans relevant assessment techniques.</i> • <i>When used, develops examination questions that are logical, well-written, and test the learners' knowledge rather than their test-taking abilities.</i> • <i>Participates in a systematic evaluation of assessment strategies (e.g., post-exam statistical analysis) when appropriate.</i> • <i>Ensures activities are consistent with learning objectives in course syllabus.</i>
Objective E2.3.3: (Applying) Deliver a practice-based educational activity, including didactic or experiential teaching, or facilitation.	<ul style="list-style-type: none"> • <i>Incorporates at least one active learning strategy in didactic experiences appropriate for the topic.</i> • <i>Uses effective skills in facilitating small and large groups.</i> • <i>For experiential activities:</i> <ul style="list-style-type: none"> o <i>Organizes student activities (e.g., student calendar).</i> o <i>Effectively facilitates topic discussions and learning activities within the allotted time.</i> o <i>Effectively develops and evaluates learner assignments (e.g., journal clubs, presentations, SOAP notes).</i> o <i>Effectively assesses student performance.</i> o <i>Provides constructive feedback.</i>
Objective E2.3.4: (Creating) Document one's teaching philosophy, skills, and experiences in a teaching portfolio.	<ul style="list-style-type: none"> • <i>Portfolio includes:</i> <ul style="list-style-type: none"> o <i>A statement describing one's teaching philosophy.</i> o <i>Curriculum vitae.</i> o <i>Teaching materials including slides and other handouts for each teaching experience.</i> o <i>Documented self-reflections on one's teaching experiences and skills, including strengths, areas for improvement, and plans for working on the areas for improvement.</i> o <i>Peer/faculty evaluations.</i> o <i>Student/learner evaluations.</i>

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	Resident	Preceptor	End of learning experience
Preceptor Evaluation	Preceptor	Resident	End of learning experience
Learning Experience Evaluation	Resident	Learning experience	End of learning experience

Elective: Advanced Skills with Technology or Automation Systems

Brief Learning Experience Descriptor:

Resident is responsible for notifying primary preceptor by their 2nd quarter evaluation if they would like to do this elective.

This rotation is designed to give the resident exposure to an advanced area of informatics and database management. This experience will cover the fundamentals of database architecture, database management systems, database systems, and cube design. Principles and methodologies of database design and techniques/best practices for database application development will be covered as well.

Rotation Schedule:

3-Month Learning Experience

- The learning experience will begin April 1st, the beginning of quarter 4 of the residency and continues until the end of residency on June 30th.
- Estimated time commitment per week is 8-16 hours
- Assignments made on a weekly basis by the preceptors.

Role(s) of the Pharmacist(s):

The VISN network office and facilities rely on data for various activities, including but not limited to measuring performance and operationalizing healthcare quality initiatives. Because pharmacists have a strong clinical background, operational knowledge and naturally play a role in an interprofessional team, pharmacists who serve as data SME and can design projects, extract and present data, and effectively leverage data to improve healthcare delivery. VISN 21 pharmacists will foster new opportunities for residents to expand their data skills by assigning new data request and dashboard development to residents. Pharmacist to provide support as resident expands into a data manager role.

Expectations of Residents:

Meeting Responsibilities:

- VISN 21 PBM Staff Huddle
- VISN 21 Clinical Data Manager Meeting
- Subcommittee/Taskforce Meetings (as assigned)
- Advanced Skills with Technology and Automation Training
 - Advanced Power BI Training lecture
 - Introduction to Python lecture
 - SQL Server Integration Services

Progression of Residents:

Quarter 4

- Month 1 - Advanced SQL and Power BI: Residents will attend the advanced skills with technology and automation training which occurs weekly. Residents will be expected to

develop queries involving advanced SQL coding and develop independence as a data manager in answering data requests. Residents will be expected to build a Power BI report that demonstrates effective presentation of data and data management skills.

- Month 2 – Automation: Residents will be expected to demonstrate the ability to develop automated packages using SQL Server Integration Services, automated gateway refreshes in Power BI and automated data refreshes using SQL and Python.
- Month 3 – Independence: In the 3rd month of this rotation residents will be expected to function independently in answering user data requests and facilitate appropriate communication with a variety of audiences. Residents will be expected to participate in change management and leveraging data to solve clinical gaps.

Goals and Associated Objectives to be taught and evaluated during this experience:

Competency Area E3: Advanced Skills with Technology or Automation Systems		
Goal E3.1: Serve as an expert resource for the management of a specific technology or system.		
Objective	Related Activity/Instructional Objectives	Month
Objective E3.1.1: (Understanding) Demonstrate understanding in the operation of the technology or system.	<ul style="list-style-type: none"> • <i>Demonstrates understanding of the user view of the technology or automation system.</i> • <i>Demonstrates understanding of the technical view of the technology or automation system.</i> • <i>Demonstrate the operation of the technology or system.</i> 	2
Objective E3.1.2: (Applying) Formulate effective explanations, geared for a variety of interested audiences, of the functions of the technology or system.	<ul style="list-style-type: none"> • <i>Adjusts communications appropriately when interacting with a technical audience versus a non-technical audience.</i> • <i>Uses effective communication strategies with information technology vendors.</i> 	2
Objective E3.1.3: (Creating) Contribute to a change or improvement utilizing the technology or system.	<ul style="list-style-type: none"> • <i>When presented with a non-standard problem, apply lateral (out-of-box) thinking to its solution.</i> • <i>Engages with or develops a plan to implement a change in the technology or system.</i> • <i>Participates in the change or implementation plan.</i> 	3

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	All Preceptors	Resident	End of rotation
Preceptor Evaluation	Residents	All Preceptors	End of rotation
Learning Experience Evaluation	Resident	Learning Experience	End of rotation

Elective: Advanced Pharmacy Benefit Design and Formulary Management

Brief Learning Experience Descriptor:

The resident will further develop advanced skills, values and abilities in the practical application of formulary management and pharmacoeconomic principles through advanced assignments around outcomes assessment in this field.

Rotation Schedule:

3-Month Learning Experience

- The learning experience will begin April 1st, the beginning of quarter 4 of the residency and continues until the end of residency on June 30th.
- Estimated time commitment per week is 8-16 hours
- Assignments made on a weekly basis by the preceptors.

Role(s) of the Pharmacist(s):

- Independently assess the needs of the VISN related to cost containment that can be impacted by drug shortages, contract/formulary changes, generic drug availability and new pharmaceutical approvals.
- Accurately estimate the annual savings goals for each station and provide tools and individualized coaching necessary to successfully achieve these goals in targeted areas such as lost opportunity of cost (LOC), additional savings, conversion monitors, local initiatives, tablet splitting, dose optimization, 3rd party collections and inventory turns.
- Efficiently chair Medication Use Management (MUM) and Pharmacy Benefits Management (PBM) committees which includes accurate minute taking, agenda development, conflicts of interest reviews and membership roster updates. The pharmacist will also seamlessly transition, when requested, as a voting alternate on the VISN Pharmacy Executive (VPE) and Medical Advisory Panel (MAP) meetings to represent the needs of the VISN.
- Routinely mentor and precept all residents on rotation by assigning and reviewing projects, scheduling frequent meetings to discuss issues and questions, and providing valuable feedback in a timely manner.
- Constantly monitor standard work due dates from all taskforces and subcommittees, send reminders to appropriate chairs, coordinate the voting of items, and update the SharePoint site when needed.
- Promptly respond to station questions and advise based on established directives, policies, and standard operating procedures.
- Accurately assess the impact of a conversion in terms of cost avoidance, safety, efficacy and overall impact on patient care.
- Accurately pull data from SQL, Pyramid and McKesson to assess utilization across the VISN and use this data to estimate the potential cost avoidance on an annualized basis.
- Review all centralized prior authorization drug request consults in a timely manner and determine whether the requests should be approved or denied
- Serve as a subject matter expert on various VISN level workgroups

- Create drug use criteria (DUC), criteria for use (CFU), or drug sequencing guidance for medications or classes of medications when needed.

Expectations of Residents:

- Residents are expected to continue to build upon their pharmacy benefit and formulary management and data analytics skills from Q1-3 and use them to assess the success (or failure) of a conversion or conversions by reviewing the outcomes.

Progression of Residents:

- Over the course of the 4th quarter of the residency, the resident should gain expertise in the process of conversion outcomes assessment. This includes the ability to accurately analyze the impact of the conversion on adverse effects, urgent, emergent and unscheduled provider visits, efficacy of the new drug, pertinent labs, patient population, disease states and cost impact.

Goals and Associated Objectives to be taught and evaluated during this experience:

<i>Competency Area E1: Pharmacy Benefit Design and Formulary Management</i>	
Goal E1.1: Explain the interrelationship of the pharmacy benefit design elements and the organization's health care systems.	
Objective	Related Activity/Instructional Objectives
Objective E1.1.3: (Creating) Assist the organization in planning and managing pharmacy drug spend.	<ul style="list-style-type: none"> • <i>Constructs at least 2 conversion outcomes assessment >1 year post approval. Details to include, but not limited to: % conversion rate, total savings by station and VISN, % recidivism rate, ADR's related to the new drug and ED/UC/hospitalizations related to the conversion.</i> • <i>Develop a process and/or tool for reporting cost impact and efficiency of the PADR team.</i>
Goal E1.2: Manage aspects of the medication-use process related to formulary management through use of pharmacoeconomic proposals, medication use criteria, and organizational policies and procedures affecting the care of patients.	
Objective	Related Activity/Instructional Objectives
Objective E1.2.2: (Creating) Prepare written medication use policy, applying clinical expertise, literature evaluation and appropriate pharmacoeconomic analyses.	<ul style="list-style-type: none"> • <i>Present at least one approved pharmacoeconomic conversion proposal to a local P&T Committee, provide tools for provider and pharmacist education and organize provide support for implementation in at least 1 station in VISN 19 or 21.</i>
Objective E1.2.3: (Applying) Present the medication use policy to an interdisciplinary organizational committee and gain consensus for approval.	<ul style="list-style-type: none"> • <i>Develop agenda for and run at least 1 VISN 21 Medication Use Management and 1 PBM meeting</i>
Objective E1.2.4: (Evaluating) Assess the impact of a policy or process recommendation on patient safety and quality of care.	<ul style="list-style-type: none"> • <i>Constructs at least 2 conversion outcomes assessment >1 year post approval. Details to include, but not limited to: % conversion rate, total savings by station and VISN, %</i>

	<i>recidivism rate, ADR's related to the new drug and ED/UC/hospitalizations related to the conversion.</i>
--	---

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	All Preceptors	Resident	End of rotation
Preceptor Evaluation	Residents	All Preceptors	End of rotation
Learning Experience Evaluation	Resident	Learning Experience	End of rotation

Elective: Advanced Leadership and Management

Updated 01/17/2023

Brief Learning Experience Descriptor:

Advanced elective that expands on the foundations of the required Leadership and Management rotation. Residents choosing to take this rotation will participate in higher level VISN committees and take more of a direct leadership role in given assignments.

Rotation Schedule:

3-Month Learning Experience

- The learning experience will begin April 1st, the beginning of quarter 4 of the residency and continues until the end of residency on June 30th.
- Estimated time commitment per week is 8 hours
- Assignments made on a weekly basis by the preceptors.

Role(s) of the Pharmacist(s):

- Leadership is critical to organizational and service level successes
- This learning experience is meant to build on the successes of the core learning experience: Leadership and Management

Expectations of Residents:

- Residents are expected to show more autonomy and preceptors spend more time in the 4th preceptor role of facilitation (4 preceptor roles = instructing, modeling, coaching, facilitating)
- Residents should have teaching/precepting opportunities in this advanced rotation
- Handle all incoming and outgoing pharmacy related IBs
- Take the lead for PBM on all interdisciplinary ad hoc workgroups that may occur
- Attend and provide updates for VISN committees (for example HOC)
- Take the lead for all VCARE related reviews (directives, SOPs, etc)

Progression of Residents:

- Residents should already be functioning at a much higher level with expectations of autonomy and preceptors only needing to facilitate at this time in residency and in this advanced rotation

Goals and Associated Objectives to be taught and evaluated during this experience:

Competency Area R4: Leadership and Management	
Goal R4.1: Demonstrate leadership skills for successful self-development in the provision of population health management and data analytics.	
Objective	Related Activity/Instructional Objectives
Objective R4.1.1: (Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership.	<ul style="list-style-type: none">• <i>Facilitate/teach efficient time management strategies to staff and/or students/PGYI</i>• <i>Demonstrates additional autonomy in leading interprofessional teams by assisting with VISN level committees i.e. MUM team and Formulary Committee.</i>• <i>Increased Co-chair responsibilities with the VISN Vaccine Workgroup and/or precepting of student/PGYI involvement</i>
Objective R4.1.2: (Applying) Apply a process of ongoing self-evaluation and personal performance improvement in the provision of population health management and data analytics.	<ul style="list-style-type: none">• <i>Conduct in-service on use a self-evaluation process for developing professional direction, goals, and plans.</i>• <i>Effectively uses principles of continuous professional development (CPD) planning (reflect, plan, act, evaluate, record/review) in precepting students/PGYI and/or through staff education</i>
Goal R4.2: Demonstrate management skills in the provision of population health management and data analytics.	
Objective	Related Activity/Instructional Objectives
Objective R4.2.1: (Applying) Contribute to departmental management of population health management and data analytics.	<ul style="list-style-type: none">• <i>Participates effectively on VISN committees or informal work groups to complete group projects, tasks, or goals. May be greater number of assignments and/or higher-level accountability in this advanced rotation.</i>• <i>Increased resident personal accountability from core rotation to this advanced rotation: Participates effectively in implementing changes, using change management and quality improvement best practices and tools, consistent with team, departmental, and organizational goals. Specifically: resident active participation in achieving VISN performance metrics</i>

Objective R4.2.2: (Applying) Manage one's own advanced practice effectively.	<ul style="list-style-type: none"> • <i>Staff In-services and/or student/PGYI precepting on Staff Development, HRO Principles, Primary literature to inform projects and requests to pharmacy services</i>
Goal R4.3: Assist the organization in achieving compliance with accreditation, legal, regulatory, and safety requirements related to the use of medications (e.g., appropriate accrediting bodies and related professional organization standards, statements, and/or guidelines; state and federal laws regulating pharmacy practice).	
Objective	Related Activity/Instructional Objectives
Objective R4.3.1: (Analyzing) Determine appropriate activities and documentation needed to meet accreditation, legal, regulatory, and safety requirements for pharmacy.	<ul style="list-style-type: none"> • <i>Demonstrates knowledge of and understanding related to VHA policy in relation to ad-hoc leadership questions/audits during learning experience (advance rotation – takes on more ad hoc responsibilities and/or accountability for outcomes greater)</i>
Objective R4.3.2: (Applying) Participate in the organizational compliance processes for accreditation, legal, regulatory, and safety requirements related to data, medications, and pharmacy practice.	<ul style="list-style-type: none"> • <i>Reviews current organizational documentation related to compliance by assisting with preparation, reviews, and follow-up of VCARE Site Visits.</i> • <i>Effectively addresses VHA policy questions as they arise.</i> • <i>Identifies gaps in compliance and develops proposed strategies to close gaps in compliance.</i>

Evaluations:

Evaluation Type	Evaluator	Evaluated	Timing
Summative Evaluation	Preceptor	Resident	End of Learning Experience
Preceptor Evaluation	Residents	All Preceptors Involved	End of Learning Experience
Learning Experience Evaluation	Resident	Learning Experience	End of Learning Experience

Evaluations

PGY-2 Population Health Management and Data Analytics

Residency Evaluation Process

PharmAcademic is used fully by this program. **Before the program begins**, each resident completes an **initial self-evaluation** ([Appendix VII](#)). This allows the RPD and Residency Board to tailor the residency experience to the individual resident's desires, needs, and experiences. Each resident's **individualized residency** training program and evaluation process is entered into a security protected on-line computerized program. The residency director has entered all documents and determined time frames for scheduled rotations, appropriate preceptors and evaluation documents. Descriptions of each rotation experience are available which include: a brief descriptor, goals and associated objective to be formally taught and evaluated during this experience, learning activities to facilitate achievement of the goals and objectives, schedule, designated meetings/responsibilities, checklist of assignments/projects/requirements and assigned readings.

Residents are assigned to preceptors for training and guidance. Preceptors will meet with the resident on a regular basis and review the resident's accomplishments. **Midway through a rotation** the preceptor will determine if the resident is likely to meet all goals and objectives of the rotation. If the resident has not met the goals and objectives necessary to pass the rotation, the preceptor will discuss this with the resident so corrective actions can be taken. If the resident is not on track to meet these goals and objectives by the last quarter of the longitudinal rotation, the residency board will discuss and plan the course of action at that time. **During the rotation** formative evaluation will be given by the preceptor as projects are completed. **Formative evaluations** occur as daily feedback: verbal or written. Examples of written evaluation can be signing progress notes and addendums, journal club or presentation evaluations, corrected minutes and agendas etc.

Summative evaluations occur at the **end of each Learning Experience** if 6 weeks or shorter or quarterly for those that are longitudinal experiences. **At the conclusion of each rotation**, required evaluations will be completed in PharmAcademic. These include a summative self-evaluation, and preceptor evaluation. Preceptors will also perform a summative evaluation at the end of the rotation. The evaluations for rotations are performed online, on the PharmAcademic website (<https://www.pharmacademic.com/>). After the preceptor enters and signs a summative evaluation, an alert will be sent to the resident via Outlook e-mail. The resident will then need to sign off on the evaluation. Also, the resident will enter a summative self-evaluation and a preceptor evaluation. After completion, these will be sent back to the preceptor to sign. If the preceptor has questions or comments about the evaluations, they may send it back to the resident for review or edits, or they may sign it if it is complete.

Each resident is asked to give an honest appraisal of the preceptor and the rotation. Once the preceptor and the resident have completed evaluations they will be discussed. After discussion the preceptor and resident will sign the evaluation which will then be sent to the Residency Board and the Program Director. Evaluations will be reviewed and deficiencies and/or disciplinary actions that are needed will be addressed by the Residency Board. These are then signed by the Residency Director and filed.

In addition, **at the end of each quarter** the resident's entire program evaluation is done by the Residency Director with input from the Residency Board. A review and discussion between the resident and Residency Director is documented and an individualized plan is developed to accommodate changes in the resident's learning experience based on their or the preceptors requests. Once goals for the program are achieved they need not be evaluated again. If satisfactory progress is made the goals continue to be evaluated.

Quarterly evaluations are done by the Residency Board and are presented to the resident. The evaluation involves identifying any objective evaluated that has been rated as "Needs Improvement". Specific suggestions for improvement are made. In addition, strengths and areas of improvement are identified and the **residency experience is tailored to the resident's needs**. The resident is also asked to complete a **quarterly self-assessment** ([Appendix VIII](#)) similar in nature to the initial assessment to assist in this individualization. A quarterly self-evaluation is an important component of the residency program. These will be completed in October, January, April, and June. The evaluation should be introspective of where the resident feels he/she is progressing. The self-evaluation should be related to the initial plan that was submitted in June. These evaluations will be reviewed by the Residency Board members. Changes in experiences may be recommended by the Advisory Board to help residents attain the goals. In addition, the residents will self-evaluate the same goals and objectives that the preceptor is evaluating at the end of the Learning Experience. The preceptors will also self-evaluate their teaching skills.

At the end of the residency year, residents will be asked to complete a final self-evaluation as well as an evaluation of the program and overall residency experience. This will take place through the completion of two forms – a final quarterly self-evaluation and an outgoing resident survey ([Appendix IX](#)). The resident will also receive a final evaluation by the Residency Board that will be presented to the resident in a format similar to the above quarterly evaluations.

Meaning of Objective Ratings

Achieved

You have fully accomplished the educational goal for this particular learning experience. No further instruction or evaluation is required.

Achieved for Residency

This is reserved for the Residency Board to decide and is generally left until the end of residency as it makes the Goal/Objective optional for future evaluation in other learning experiences. As the Residency Board intends many of these to be evaluated multiple times in residency, they will make the decision on marking achieved for residency.

Satisfactory Progress

This applies to an educational goal whose achievement requires skill development in more than one learning experience. The learning experience being evaluated is not the last one in which this goal will be taught. In this current experience you have progressed at the required rate to attain full achievement by the end of the program.

Needs Improvement

Your level of skill on the educational goal does not meet the preceptor's standards of either "Achieved" or Satisfactory Progress," whichever applies.

On demand evaluations can be created if a resident needs additional work in a specific objective (formerly known as "snapshots").

Objectives Rated as “Needs Improvement” and Remediation

Needs Improvement on On Demand or Formative Evaluation

Preceptors are encouraged to provide verbal feedback during the rotation in addition to written feedback in PharmAcademic. If the preceptor has provided initial verbal feedback and the resident is not meeting “satisfactory progress” for a specific goal or objective, the preceptor should document an On Demand evaluation as soon as possible and discuss with the resident. Especially for longitudinal rotations in which evaluations are scheduled quarterly, waiting until the scheduled formative evaluation will result in a delay and frustration for both the resident and preceptor. On Demand or formative (mid-point) evaluations that include a “needs improvement” must include a documented action plan in PharmAcademic that will target “satisfactory progress” by the end of the learning experience. The preceptor will notify the RPD regarding the evaluation and action plan. If needed, the preceptor and RPD will meet to discuss further actions.

Needs Improvement on Less than Two Summative Evaluations

If a preceptor determines that a resident still needs improvement for selected goals and objectives by the end of the rotation, the preceptor will meet with the RPD PRIOR to the end of the rotation and PRIOR to meeting with the resident. The preceptor and RPD will determine how the objective will be addressed on future rotations and will decide if a warm-hand off is needed between the current and upcoming preceptor. The RPD will determine if any modifications are necessary to future rotations to ensure satisfactory progress. The current preceptor will meet with the resident to provide the summative evaluation.

Needs Improvement for Same Objective on More than Two Summative Evaluations

If a resident receives “needs improvement” for the same objective on more than one summative evaluation, a formal remediation process will be implemented to assist the resident in addressing the areas needing improvement. The RPD will meet with the preceptors and resident to discuss the evaluations. Based on this discussion, the RPD and resident will develop and document an action plan in PharmAcademic. Example items in the action plan include goal-setting, additional assignments, timelines, and frequent follow up meetings. The RPD will determine if any modifications are necessary to future rotations to ensure satisfactory progress. Modifications may include extending or repeating specific learning experiences and elimination of elective learning experiences to provide additional time for remediation.

Needs Improvement on Any Required Objectives at Quarterly Meetings

If at each quarterly meeting, a resident has received multiple “needs improvement” for required program objectives on summative evaluations, a formal remediation process will be implemented to assist the resident in addressing the areas needing improvement. The RPD will meet with the preceptors and resident to discuss the evaluations. Based on this discussion, the RPD and resident will develop and document an action plan in PharmAcademic. Example items in the action plan include goal-setting, additional assignments, timelines, and frequent follow up meetings. The RPD will determine if any modifications are necessary to future rotations to ensure satisfactory progress. Modifications may include extending or repeating specific learning experiences and elimination of elective learning experiences to provide additional time for remediation. If the resident still receives “needs improvement” for required program objectives on summative evaluations after completion of a formal remediation process, or if the resident is unable to complete the remediation process, the RPD may recommend termination from the program.

PharmAcademic Evaluation Forms:

See also <https://www.pharmacademic.com/> for further PharmAcademic information and guidance

Rating	Definition
Needs Improvement (NI)	Resident is not performing at an expected level at that particular time; significant improvement is needed <ul style="list-style-type: none">• Deficient in knowledge/skills in the area• Often requires assistance to complete the objective• Unable to ask appropriate questions to supplement learning **Will result in action plan if given on a summative evaluation
Satisfactory Progress (SP)	Resident is performing and progressing at a level that should eventually lead to mastery of the goal/objective <ul style="list-style-type: none">• Adequate knowledge/skills in the area• Sometimes requires assistance to complete the objective• Able to ask appropriate questions to supplement learning• Requires skill development over more than one rotation
Achieved (ACH)	Resident can perform associated activities independently for the specific learning experience <ul style="list-style-type: none">• Fully accomplished the ability to perform the objective• Rarely requires assistance to complete the objective, minimal supervision required• No further developmental work needed
Achieved for Residency (ACHR)	Determined by the RPD/Residency Board – Resident can perform associated activities independently across the scope of pharmacy practice.

APPENDIX I: Early Commitment Process

VA Sierra Pacific Network (VISN 21)

August 2022

1. PURPOSE: To establish procedures for early commitment to the postgraduate year 2 (PGY2) residency program in Population Health Management and Data Analytics in advance of the matching process.

The program does not currently offer the option for early commitment and prefers all interested candidates go through the regular application and Match cycle. However, this program does reserve the right to re-evaluate and decide to offer early commitment within the VISN 21 network on a year-by-year basis. When/if the option for early commitment is offered, the PGY2 in Population Health Management and Data Analytics will abide by the following:

2. PROCEDURE:

- A. VA PGY1 residency programs within the VA Sierra Pacific Network (VISN 21) may promote current VA postgraduate year 1 (PGY1) residents into a PGY2 residency in Population Health Management and Data Analytics when general qualifications and selection criteria are met. The program and resident will follow the most up to date requirements and procedures outlined at this link [ASHP Match | Early Commitment Process \(natmatch.com\)](https://natmatch.com)
- B. The PGY1 resident will submit of a letter of interest and participate in an interview with the PGY2 residency program director and residency board.
- C. The letter of interest must meet the following criteria:
 1. Describe what the PGY1 resident would like to accomplish through the PGY2 residency including future professional goals
 2. Describe why the PGY1 resident specifically would like to train with VISN 21
 3. Be delivered to the PGY2 residency program director and Director of the PGY1 residency by the last Friday in November at the latest (though preferred earlier).
- D. If there are more than one PGY1 residents applying for one PGY2 position, the offering of the PGY2 position will be based on performance in the PGY1 position, formative evaluations, summative evaluations, and interview evaluations by the Resident Advisory Board (RAB) members.
- E. Letters offering positions to selected applicants must be delivered in hardcopy format no later than the date of Early Commitment.
- F. The signed offer letter must be returned to the PGY2 program director and copies given to the PGY1 program director.

APPENDIX II: Application and Evaluation Procedure

PGY2 Residency Program

VA Sierra Pacific Network (VISN 21)

Updated August 2022

1. **PURPOSE:** The Veterans Affairs Sierra Nevada Healthcare System (VASNHCS) Pharmacy Service and VA Sierra Pacific Network are committed to providing a high-quality experience for PGY2 Pharmacy Residents. In order for the Service, providers, patients, and staff to benefit from the residency programs, it is important to identify qualified pharmacists committed to attaining professional competence beyond entry-level practice. The following outlines the procedure involved with evaluating applications, inviting applicants for interviews, post-interview assessment and ranking for match, as well as post-match procedures for unmatched positions.

2. **POLICY:** The Residency Program Directors, Residency Board, and Pharmacy Staff will adhere to this policy when receiving, assessing, and ranking resident applications to ensure there is a criteria-based processes to evaluate and rank program applicants.

3. DEFINITIONS:

- a. *PGY1 Resident:* Post graduate year 1 resident
- b. *PGY2 Resident:* Post graduate year 2 resident
- c. *Residency Program Director (RPD):* Person responsible for directing residency learning and to ensure ASHP accreditation standards are met
- d. *Residency Committee:* Committee made up of the RPD and PGY2 Preceptors representative of clinical pharmacy areas and rotations
- e. *ASHP:* American Society of Health System Pharmacists

4. RESPONSIBILITY:

a. Application Process:

(1) We will participate in the suggested WebAdMIT portal of the pharmacy online residency centralized application service (PhORCAS) for receiving applications and enforcing deadlines. All ASHP regulations regarding resident application will be followed.

(2) *Application Development:* Application materials are developed by the Residency Program Directors (RPDs) and may be reviewed and approved by the Residency Board. These materials include: Eligibility Requirements, Recruitment brochure/flyer, and Application review materials.

(3) *Applicant Deadline:* The deadline is determined annually by the RPDs (generally early to mid-January).

(4) *Handling of Application Materials:* Candidates wishing to apply to the program are required to submit the following:

- (a) A “letter of intent” stating why they are pursuing a residency position in our program. This should be a maximum of 1 typed page.
- (b) A current curriculum vitae.
- (c) A current official University/College Pharmacy School transcript.
- (d) Three letters of recommendation. These should be from individuals capable of commenting on the applicant’s professional capabilities, including academic ability, communication skills, behavioral attributes (leadership, initiative, dependability, ability to handle multiple tasks, etc.), clinical problem solving skills, an assessment of potential capability to perform research, and any other attributes which will assist us in assessing their ability to flourish and succeed in our program. All comments and information will be held in strictest confidence.
- (e) All application materials are maintained in WebAdMIT or the recommended online application program. Application materials received after the deadline will NOT be accepted.
- (f) **After** selection is made, the candidates will be required to submit the US Government form VA Form 10-2850D “Application for Health Professions Trainees” **AND** form OF-306 “Declaration for Federal Employment”. These forms are available at <http://www.opm.gov/forms>

(5) *Evaluating Applications:*

- (a) *Application Review Sheet:* The RPDs and Residency Board will track incoming documents with the Application Review Sheet (Attachment A). Completed applications will be ranked using Attachment A and the related rubric and a determination will be made whether or not to offer an interview. A “completed” application is defined as containing all required materials.

(b) Minimum requirements for an interview: Only complete applications will be considered for an interview. Prior to the time of the interview, the WebAdmit application and other materials may be printed or stored electronically in the applicant's folder. Applicant folders will be kept in a secure location within the Pharmacy Service.

5. PROCEDURES:

a. Interview Process

- (1) Invitation for Interviews: The RPD and available Residency Board members will complete the scoring section of the Application Review Sheet (Attachment A) for all completed applications. Applications will be ranked in order of Application Review Sheet score (average score if more than one Application Review Sheet is available for an applicant). Invitation letters for interviews will be sent in order of highest to lowest score. Once all interview appointments are filled or if the Board determines that a candidate has scored too low for being offered an interview, they will be alerted to this effect by an email or letter (Attachment B) prior to the interview notification date.
- (2) Structure of Interview: The PGY2 Residency Program interview includes a meeting with the RPD, current PGY2 residents, and an interview panel consisting of Preceptors/Clinical Pharmacy Specialists/Current PGY2 Residents, as appropriate.
- (3) Program Review: The RPD meets with the scheduled applicants to discuss the setting, Pharmacy Service, Residency Program, benefits offered to residents and background/ qualifications of the RPD. This is also the component of the interview process that allows the applicant the opportunity to have their questions about the residency program answered by the RPD.
- (4) Panel Interview: The residency program utilizes a panel interview format to optimize the number of preceptors exposed to applicants and allow for the broadest input into the selection process of the residency.
- (5) Interviewers: The interview panel is made up of pharmacist preceptors appropriate to the areas of service that pharmacy benefits management team provides and the rotations offered by the program, along with the RPD and the current PGY2 pharmacy residents.
- (6) Development of Interview Questions: The Residency Committee utilizes the VA's Performance-Based Interviewing technique. After determining key knowledge, skills, abilities, attitudes and experiences, reviewing recent resident exit interviews, and reflecting on recent and current resident classes, the Residency Board develops a set of interview questions that asks applicants about specific examples in their past work or life experiences that relate to the key knowledge, skills, abilities, attitudes and experiences needed for success in the residency. Some examples of past questions may be found on Attachment C.
- (7) Evaluation of Interview Answers: Immediately after the applicant interview, interview panel members individually complete the Pharmacy Residency Program Interview Evaluation Form (Attachment D). Completed forms are saved by the interviewers into a secure electronic folder and the RPD collates all the data into a spreadsheet for candidate comparison and files the forms in the applicant's application folder.
- (8) Reference Check: If there are wide differences in opinion between Committee members regarding an applicants' rank or if Committee members request more information regarding applicants, a reference check will be used to gain more insight into an applicant's previous performance. Applicant's references or past preceptors as identified by the applicant's curriculum vitae may be contacted by telephone by either a committee member or the RPD, and interviewed using the Reference Check form (Attachment E).
- (9) Ranking Process: The PGY2 Residency Program complies with all ASHP Resident Matching Program rules and policies, as set forth by ASHP and National Matching Services, Inc. (NMS).
- (10) Final Ranking Meeting: All data is collected, charted, and graphed for comparison reasons. Individual assessment scores, section scores, and total interview scores are listed in applicant tables with interviewer comments are noted at the bottom. Additionally, total interview scores are graphed against other applicants for comparison reasons. This information is utilized by the interview panel members to make a final rank list.
- (11) Submission of Rank List: The PGY2 Residency Program Rank Order List is submitted to NMS by the RPD via prescribed methods, before the deadline set by NMS.

b. Post-Rank Process

- (1) Matched Positions:
 - (a) Once match results are available, the RPD will notify the VISN 21 Leaders, Residency Board, and local Chief of Pharmacy of the results, and contact matched residents by telephone or email. The RPD will also send a group email to all matched residents introducing them to each other.
- (2) Commitment Letter

- (a) A Resident Appointment letter (Attachment F) is sent to each matched resident, postmarked no later than 30 days following receipt of the Match results. The matched resident is asked to acknowledge receipt of the Resident Appointment letter by sending back a signed copy of the letter to the RPD within two weeks of the date of the letter.
- (3) In the event that phase I match does not fill all PGY-2 positions, we will follow ASHP guidance regarding the Phase II match. <https://www.natmatch.com/ashprmp/aboutdates.html>
- c. Unmatched Positions from Phase I and Phase II match:
 - (1) Applicant Search and Recruitment
 - (a) In the event that both Phase I and Phase II match do not fill all PGY2 positions, the RPD will notify the Chief of Pharmacy and VISN 21 Leaders and follow ASHP guidance for the Post-Match Process.
 - (b) The process for resident ranking and selection will be like that outlined for match phase I and II.
 - (2) Interview Process
 - (a) The interview process will utilize the same materials and processes as outlined above. If no suitable applicant can be found the VA National Director of Pharmacy Residency Programs will be contacted for further direction.
 - (3) Ranking Process
 - (a) The Residency Committee will utilize the same materials and processes as outlined above to rank applicants. Once applicants are ranked by the Residency Committee and approved by the RPD, the applicant will be contacted by telephone. Ranked candidates will be given 48 hours to decide if they want to accept the position. If they decline the position or if the offer expires (e.g., no contact with the RPD in 48 hours), the next ranked candidate will be called. This will continue through all ranked candidates until a candidate verbally accepts the position, or all ranked candidates have been contacted and no candidate accepts the position.
 - (b) Applicants not ranked will be sent a letter (Attachment B) notifying them that they will not be offered the residency position.
 - (4) Appointment Letter
 - (a) A Resident Appointment letter (Attachment F) is sent to applicants that have verbally accepted the offer for a residency position. The resident is asked to acknowledge receipt of the Resident Appointment letter by sending back a signed copy of the letter to the RPD within two weeks of the date of the letter.
 - (5) Unfilled Positions
 - (a) The Chief of Pharmacy and VISN 21 Leaders will be notified by the RPD if any resident positions are not filled. VA Central Office (VACO) will be notified and the unfilled position will be returned to VACO for redistribution per VA policy.

Resident Address

Dear Dr.:

Thank you for your interest in the VA Sierra Pacific Network PGY 2 Pharmacy Residency program. We were very fortunate to receive an unexpected number of applications this year and therefore are unable to grant interviews to all applicants. Pre-screening of your application packet did not meet our entrance criteria for offering interviews this year, and we will be unable to offer you an interview.

Again, thank you for your interest in our program and best of luck in obtaining the residency best suited for your professional interests and goals.

Best Regards,

Jannet M. Carmichael, Pharm.D., BCPS, FCCP, FAPhA
VISN 21 Pharmacy Executive and
PGY2 Residency Director

APPOINTMENT AND OFFER LETTERS FOR PGY1 AND PGY2

DEPARTMENT OF VETERANS AFFAIRS
Veterans Health Administration
Sierra Pacific Network
VISN 21 Pharmacy Benefits Management Group
975 Kirman Avenue
Reno, NV 89502-2597

Date 3/16/2022

In Reply Refer to: 10N21R/

Dear Dr. Resident's name:

As the residency program director of the VA Sierra Pacific Network PGY2 Pharmacy Residency in Population Health Management and Data Analytics, it is my pleasure to offer you a PGY2 residency position for the academic year 2022-2023. In keeping with the ASHP Residency Matching Program requirements, I am sending you this letter of confirmation. ASHP requires that you read, sign and return this letter to me within 2 weeks of receipt. There is a place for signature below.

The residency will begin July 1, 2022, and end June 30, 2023, unless other arrangements are made with me, at a salary of \$45,221 and benefits. As discussed during the interview process, this year we are offering the opportunity for you to work virtually in lieu of relocating to Reno, NV. If you choose to work virtually during your PGY2 appointment, your signature below indicates that you understand that you will still be paid a stipend based on locality out of Reno, NV and that coordination for necessary equipment (i.e., laptop and IT support) may occur at the VA nearest your physical location. Complete details will be discussed with you 1 on 1 based on your individual decision to relocate or remain virtual.

The Human Resources Management Service will be contacting you with more information, processes to complete and forms required prior to employment in the upcoming months. Should you have any immediate questions please contact me via my work cell at 775-505-9024.

Requirements for pre-employment, Human Resource benefits, and requirements for successful completion of the program are listed below. Additional policies on the residency structure, leave, dismissal, duty hours etc. should be reviewed and can be found at the link below in the program Residency Manual. <https://www.va.gov/files/2021-08/PGY2Manual2020.pdf>
Resident Initials acknowledging receipt of residency manual via link above _____

Your signature below (and initials on each page) confirms that you agree with the results of the National Matching Service and accept a PGY2 residency position at the VA Sierra Pacific Network during the 2022-2023 Residency Year.

I have read and understand the Residency Terms and Conditions of Appointment and acknowledge acceptance.

Resident Signature

Date

We look forward to receipt of your response as soon as possible and look forward to you joining our team.

Warm professional regards,

Janice M. Taylor, PharmD, BCPS
VISN 21 PBM Deputy VISN Pharmacy Executive – Clinical
PGY2 Residency Program Director

DEPARTMENT OF VETERANS AFFAIRS
Veterans Health Administration
Sierra Pacific Network
VISN 21 Pharmacy Benefits Management Group
975 Kirman Avenue
Reno, NV 89502-2597

Description: The Sierra Pacific Network (VISN 21) Pharmacy Residency is a full-time, temporary appointment of 1 year in duration. Appointment is within the Federal government and residents are therefore subject to all regulations and requirements of the Federal system. In order to complete the on-boarding process and be appointed as a resident at our facility, you must complete the following items prior to July 1st:

- Proof of COVID Vaccination
- 10-2850D Application for Health Profession Trainees
- PIV Application Form
- Fingerprint Form and complete finger printing process for VA Reno
- Successful completion of a background check by Human Resources
- *VA Privacy and Information Security Awareness and Rules of Behavior* is required for VA computer access. This training is available through the VA Talent Management System (TMS).
- Physical exam at a VAMC
- Random urine drug testing

Benefits:

- a. Stipend: \$45,221
- b. Annual Leave (AL): 4 hours per pay period (13 days per year)
- c. Sick Leave (SL): 4 hours per pay period (13 days per year)
- d. Federal Holidays: 10 paid Federal Holidays
- e. Leave Without Pay (LWOP) and Family Medical Leave Act (FMLA): Residents are entitled to pre-approved, unpaid leave for FMLA per national policy, however extended periods of leave that would require an extension of the residency program are subject to approval through VA Central Office
- f. Administrative/Travel leave: Authorized absence may be approved for VA authorized travel to professional meetings.
- g. Health/Life Insurance: Pharmacy residents are eligible to participate in the Federal Employees Health Benefit (FEHB) and the Federal Employees Group Life Insurance (FGLI) Programs. You are responsible for paying a portion of the insurance. <http://www.opm.gov/>.
- h. Liability Insurance: You are covered by the "Public Officers Law" and will not need any practice liability insurance during your residency. While performing within your scope of practice and in conformance with VA rules and regulations, the VA will cover all liability issues. Your only risk would be if you exceed your scope of practice or violate VA policies.
- i. Employee Assistance Program: Getting appropriate support early can prevent difficult situations which may severely interfere with a resident completing the requirements of the program and getting a residency certificate. See: <http://www.opm.gov/policy-data-oversight/worklife/employee-assistance-programs/>

DEPARTMENT OF VETERANS AFFAIRS
Veterans Health Administration
Sierra Pacific Network
VISN 21 Pharmacy Benefits Management Group
975 Kirman Avenue
Reno, NV 89502-2597

Requirements to Receive a PGY2 Residency Certificate in the Program:

- Receive "Achieved" status on **all** of the *Required* residency competency areas, goals, and objective (CAGOS) by the end of the residency
- Satisfactory completion of all rotations and required activities. If a rotation is not satisfactorily completed, appropriate remedial work must be completed as determined by the preceptors and program director
- Completion of 2080 hours of training
- Compliance with all institutional and departmental policies
- Completion of all assignments and projects as defined by the preceptors and RPD
- Completion of a residency project with a **draft manuscript submitted in the journal format of choice to the Residency Program Director** no later than two weeks prior to the end of residency
- Attend at least one professional state or regional meeting and one national meeting (must be pharmacy-related) as approved by the RPD
- Participate in recruiting activities for the residency
- Contribute to optimal patient care and achieve the mission and goals of VISN21, the VISN 21 PBM and the VASNHCS Pharmacy Service

Resident Initials _____

Proudly Serving America's Heroes

APPENDIX III: Continuous Quality Improvement (CQI)

Background: Our program is committed to continuous quality improvement and solicits feedback from residents and preceptors on a formal basis during quarterly evaluation discussions and encourages informal/spontaneous feedback at any time throughout the year. As a PBM service we also continually evaluate our activities and make real time changes and formally every year produce an annual report and strategic plan or blueprint for quality improvement and performance measures.

This assignment will be completed in the last month of the residency. In order to ensure that this residency program is addressing the needs of our residents, it is important to review the experiences of residents completing the program. You may want to share some aspects of the residency that you found particularly useful, and you may also wish to share aspects of the residency that may have been less rewarding. In this process, and particularly when identifying areas in need of improvement, it is important to identify potential changes that may make the particular process more fulfilling and educational.

From a practical point of view, it is likely that you will find yourself in the position of either creating a new PGY2 residency or directing an existing residency. ASHP does have guidelines to help you design your residency program, but there is also room for individualization. You are currently part of an existing PGY2 residency program. The following assignment will require that you approach the program as if you were walking into an existing program and looking for ways to make improvements. If you were given unlimited resources (staff, time) this would be an easy undertaking, however, that is seldom the case. For this assignment you will:

1. Review the current ASHP Regulations and Standards for Pharmacy Outcomes and Healthcare Analytics ([Appendix V](#))
2. Review ASHP Regulations and Standards for related PGY2 Residency Programs (Advanced Areas of Practice, Informatics, Health System Administration, Medication Safety, and Managed Care Pharmacy Systems)
3. Review other applicable resources available to the current PGY2 Pharmacy Outcomes and Healthcare Analytics Residency Program
4. With consideration of available resources and related PGY2 residencies, identify areas of the residency or outcomes, goals, or objectives that can use improvement
5. Review orientation materials and based on your experiences, suggest ways that the contents be improved and what could be added to improve the orientation process
6. Prepare a written list or plan for improving the current PGY2 Pharmacy Outcomes and Healthcare Analytics Residency Program including, but not limited to:
 - a. Orientation for new residents
 - b. Changes in existing rotations
 - c. Additional rotations
 - d. Teaching responsibilities (students, PGY1 residents)
 - e. Any other features that could use improvement

APPENDIX IV: Extended Leave of Absence

1.0 Background

A Postgraduate Year One (PGY1) or Postgraduate Year Two (PGY2) Pharmacy Resident is offered a unique opportunity to be trained in a well-organized health care system, but is only given a temporary appointment at the facility. This temporary appointment does not allow the resident full access to certain leave policies (e.g., Family and Medical Leave Act). Nonetheless, a resident may find him/herself in a situation that requires that they request an extended period of time off. In the event that the Residency Program Director (RPD), Chief of Pharmacy or facility Human Resources service cannot utilize established policies or procedures to adequately accommodate a resident's request for extended leave, this policy and procedure has been established to provide guidance.

The RPD, Chief of Pharmacy, or Human Resources service is in no way obligated to exercise this policy and procedure. This policy and procedure does not supersede, negate or otherwise nullify any standing national, regional (e.g., VISN 21) or local policy regarding leave.

2.0 Policy

In the event that a resident requests an extended period of time off and is granted leave without pay (LWOP) to accommodate this request, the resident will have their temporary appointment extended beyond one year, in the amount of time necessary to complete their training. This extended amount of time is typically the same amount of time as the LWOP granted to the resident.

3.0 Definitions

3.0.1 Extended Leave Request

A leave request will be considered an extended leave request when the time off requested is for longer than 3 working days and not exceeding 3 months without adequate leave to cover it. Requests shorter than 3 working days that cannot be covered by accrued annual leave (AL), sick leave (SL) (if appropriate), or at the discretion of the Chief of Pharmacy, leave without pay (LWOP) are not considered significant enough to extend a residency beyond the scheduled one-year appointment and will not be addressed in this policy & procedure. If an extended absence occurs (i.e. extended family or sick leave), extension of the residency program may be necessary. The maximum length of extension is not to exceed 3 months, and the program must be completed before September 30th. Opportunity to extend the program with pay will depend on the decision of the VA regarding extending the funding. It is recognized that a resident gains experience throughout the course of the year. If a resident is unable to return to the residency after 3 months, the resident is unable to build upon their experience gained prior to the leave. In this case, it is recommended that the resident voluntarily withdraw or resign from the residency.

4.0 Procedure

Trainees such as pharmacy residents who have legitimate reasons for extended leave can be placed on Leave Without Pay (LWOP) after using their accrued annual and sick leaves. It would be a rare occasion for a facility to grant advanced leave. Most facilities won't agree to put trainees in the Voluntary Leave Sharing Program but it has been approved for special circumstances. The resident who goes on LWOP may return to complete the program in a paid status for a time extension equal to the time of the LWOP. If additional time is needed beyond the extension to meet the training objectives that will not be met because of the extended absence on annual and sick leave, any additional time will be without pay. VA's Office of Academic Affiliations (OAA) will only pay for the equivalent of 12 months.

4.1 Resident requests leave

The resident must submit her/his leave request to the RPD in writing. If at all possible, the resident is encouraged to submit the request 2 months prior to requested time off. In the event of an emergent request, the resident should submit the request to the RPD as soon as possible. The written request should include:

- Dates requested off
- Reason for leave
- Amount of AL and SL accrued

4.2 RPD review of leave request

Upon receipt of resident's extended leave request, the RPD has (X number of hours? Days?) to review the request for completeness.

4.2.1 RPD meets with resident to discuss request

RPD discusses request with resident, presents alternative options (e.g., use of AL, or SL) to accommodate request. Depending on length of requested leave, RPD may need to advise resident that they will be responsible to pay their share of benefits (portion that is normally deducted from paycheck), or risk losing benefits. (Government will typically continue to pay its portion of benefits, though facility's Fiscal department will have to be advised and a plan will have to be in place to secure this funding prior to leave being approved.)

4.2.2 RPD discusses request with Chief of Pharmacy

Based on written request and discussion with resident, RPD meets with Chief of Pharmacy to review request and potential ways to accommodate request. If RPD and Chief of Pharmacy refuse to accommodate request, RPD will present this decision to the resident and document decision in writing. If RPD and Chief of Pharmacy wish to determine accommodation to request using a LWOP and extending the residency, the RPD will contact the following sections to advise of situation and develop plan.

4.2.3 RPD contacts facility HR, Fiscal

4.2.4 RPD contacts VA PBM and OAA

VA PBM Contact: Lori Golterman, Ken Kellick

OAA Contact: Linda D. Johnson, Ph.D., R.N., Director, Associated Health Education

4.3 Based on guidance, RPD develops accommodation to leave request

4.3.1 Approval of accommodation by Chief of Pharmacy

4.4 RPD reviews approved accommodation with resident

4.4.1 RPD documents resident review and acceptance of approved accommodation

4.4.2 Approved accommodation not accepted by resident

4.5 RPD notifies Chief of Pharmacy, facility HR and Fiscal, VA PBM and OAA of accepted, approved accommodation

4.5.1 Notification of OAA

If the extension goes into the next fiscal year (after September 30), the Office of Academic Affiliations (OAA) will send next fiscal year's funds to pay for the extension in the next year. When a resident goes on LWOP, the program director should discuss this situation with the facility fiscal people to

- (1) Tell them that the person is on LWOP but will be returning so fiscal won't send all of the unused money back to OAA ;

- (2) Tell them the anticipated date of return so they'll know how much, if any, of the money should be returned to OAA that won't be used in the fiscal year; and
- (3) Let them know that OAA will be sending additional funds in the next fiscal year to pay for the period of extension that goes into the next fiscal year.

The facility residency program director should let the Office of Academic Affiliations, Director of Associated Health Education know of the situation and how much funding, if any, will be needed in the next fiscal year to pay for the extension.

4.6 Resident goes on extended leave

4.7 Resident returns from extended leave

APPENDIX V: Outcomes, Goals, & Objectives

REQUIRED COMPETENCY AREAS, GOALS, AND OBJECTIVES FOR POSTGRADUATE YEAR TWO (PGY2) POPULATION HEALTH MANAGEMENT AND DATA ANALYTICS PHARMACY RESIDENCIES

Introduction

The PGY2 residency in Population Health Management and Data Analytics (PHMDA) builds upon PGY1 residency graduates' competence in the delivery of patient-centered care and support of optimal medication therapy outcomes. The residency trains pharmacists to integrate health information, evidence-based medicine, outcomes measurement, and data analytics to inform decisions surrounding pharmacy services and population health management. Graduates are adept in discovering and optimizing synergy between clinical knowledge, information technology, and pharmaceutical operations, equipping them to function in a multifaceted professional environment and lead change to improve patient outcomes.

Graduates of this program will become skilled in concepts of population health management, applied pharmacoeconomic principles, and data analytics, thereby enabling them to create, implement, and optimize population health care initiatives designed to improve health outcomes of patients covered by government, managed care, or public/private health care systems, agencies, companies, and organizations.

Definitions

Competency Areas: Categories of the residency graduates' capabilities.

Competency areas are classified into one of three categories:

Required: Five competency areas are required (all programs must include them and all their associated goals and objectives).

Additional (for program): Competency area(s) that residency programs may choose to use (in addition to the five required areas) to meet program-specific program needs.

Elective (for specific residents): Competency area(s) selected optionally for specific resident(s).

Educational Goals (Goal): Broad statement of abilities.

Educational Objectives: Observable, measurable statements describing what residents will be able to do as a result of participating in the residency program.

Criteria: Examples that describe competent performance of educational objectives. Since the criteria are examples, they are not all required but are intended to be used to give feedback to residents on how well

they are doing and how they can improve on the skill described in educational objectives while they engage in an activity.

Activities: The *ASHP Accreditation Standard for Postgraduate Year Two (PGY2) Pharmacy Residency Programs* requires that learning activities be specified for each educational objective in learning experience descriptions. Activities are what residents will do to learn and practice the skills described in objectives. Activities are the answer to the question, “What can residents do in the context of this learning experience that will provide the kind of experiences necessary to achieve the educational objective?” (Compare and contrast activities with criteria by referring to the definition of criteria immediately above.) Specified activities should match the Bloom’s Taxonomy learning level stated in parentheses before each objective.

Example:

Objective R1.1.2: (Applying) Interact effectively with patients, family members, and caregivers.

Learning activity: Provide education to patients regarding proper medication use and administration, adherence, and possible adverse drug effects for all new medications initiated during clinic appointments.

Criteria:

- Interactions are respectful and collaborative.
- Uses effective communication skills.
- Shows empathy.
- Empowers patients to take responsibility for their health.
- Demonstrates cultural competence.

¹Anderson, L. W. and Krathwohl, D. R., et al (Eds.) (2001) *A Taxonomy for Learning, Teaching, and Assessing: A Revision of Bloom's Taxonomy of Educational Objectives*. Allyn & Bacon. Boston, MA (Pearson Education Group).

Competency Area R1: Population-Based Health Care

Goal R1.1: Demonstrate understanding of basic population-based health principles, standards, and best practices.

Objective R1.1.1: (Understanding) Describe the concept of population health and the basic framework that relates healthcare policy and health factors to overall population health.

Criteria:

- Describes the concept of population versus individual patient health management.
- Understands the concepts of health disparities, health equity, social determinants of health (SDOH), and population health and their relationship to each other.
- Discusses the pharmacist's role in population health management.
- Reviews the organization's process for designing and/or participating in population health management programs.

Objective R1.1.2: (Understanding) Identify standards and standard-setting bodies governing the use of data, information and knowledge in population-based health and best practices.

Criteria:

- Identifies standards and key external governing bodies that influence implementation and ongoing management of information systems in population-based healthcare (e.g., CMS, NCQA, PQA, URAC, NCPDP).
- Identifies appropriate internal stakeholders that influence population health management (e.g., employer groups, clinical leadership, and medical practice groups).
- Reviews evidence-based, patient-centered practice guidelines that may be used in the development of a population health program or initiative.
- Explains how changes to laws and regulations (e.g., value-based purchasing, consumer driven healthcare, reimbursement models) relate to medication use, pharmacy practice, and patient outcomes impact the practice and services provided.
- States current legal and regulatory requirements relevant to organization's operations (e.g., prescription drug benefits).
- Explains the purpose of external quality metrics (e.g., CMS Five Stars, HEDIS, PQA, and URAC) and how they are developed, abstracted, reported, and used in the context of a value-based health care system.

- Identifies appropriate resources (e.g., pipeline information, clinical trials, practice guidelines) to keep updated on trends and changes within pharmacy and health care.

Goal R1.2: Collect and analyze patient population data for the health system or organization.

Objective R1.2.1: (Applying) Identify the targeted patient population(s) that meets the needs of the organization.

Criteria:

- Reviews pharmacy and/or health-system strategic plan and short/long-term goals to align target population with organizational priorities.
- Discusses recently completed or planned pharmacy projects to discover target populations of recent interest to the department.
- Meets with pharmacy/organizational leaders to identify target population(s) of interest to leadership.

Objective R1.2.2: (Applying) Identify targeted patient population(s) using analytical tools such as dashboards or reports to prioritize the delivery of pharmaceutical care.

Criteria:

- Effectively develops queries which identify appropriate patients needing clinical intervention.
- Displays patient lists and data in dashboards or reports which are easily utilized by the end user.
- Conducts quality checks of processes to ensure capture of correct patients and determines the validity and reliability of the tool.

Objective R1.2.3: (Analyzing) Assess patient data against evidence-based medical literature to make decisions at the individual patient and/or population-based level, to assess/resolve a medication-related problem and to make patient-centered, medication and/or non-medication, health improvement, wellness, and/or disease prevention recommendations.

Criteria:

- Accurately assesses a patient and/or population-based medication regimen to ensure it is concordant with best evidence-based medical literature available.
- Assesses gaps in medication and/or non-medication therapies.
- Accesses patient data to improve medication and/or non-medication based care at the individual patient and/or population-based level.

Objective R1.2.4: (Understanding) Demonstrate understanding of analytic tools utilized in the evaluation of patient care improvement projects.

Criteria:

- Identifies a variety of analytic tools utilized in healthcare informatics.
- Articulates the pros and cons of the analytic tools identified.

Objective R1.2.5: (Analyzing) Prioritize the development of analytic tools based on the potential for improvement of patient care.

Criteria:

- Identifies relevant factors when determining priority for patient care improvement initiatives.
- Demonstrates the change to the urgency of tool development or reordering of current priorities based on the complexity or severity of patient problems.
- Ensures time and effort is productively focused on organizational priorities.

Goal R1.3: Collaborate with departmental and/or interdisciplinary teams in the design, implementation, and/or enhancement of the organization's criteria for appropriate medication use management.

Objective R1.3.1: (Creating) Collaborate with a team to write, revise, or provide input to a health plan and/or health system on an existing guideline/protocol.

Criteria:

- Collaborates effectively with peers to create/revise a guideline/protocol.
- Assures guideline/protocol is able to be practically implemented by all affected parties.
- Uses appropriate evidence-based, peer reviewed, literature.
- Ensures that guideline/protocol adheres to all applicable rules and regulations of the organization.

Objective R1.3.2: (Creating) Create a measure/metric of population health outcome(s) collaborating with peers as appropriate.

Criteria:

- Effectively compiles suggestions from peers to create/revise a measure/metric(s).
- Constructs measurable measure/metric(s).
- Uses existing guideline-based external quality metric sources where appropriate.

Goal R1.4: Ensure that all patient-specific, medication-specific, and evidence-based pharmacotherapy information required to support effective medication-related decisions is readily available in a useful format to all end users.

Objective R1.4.1: (Creating) Develop an evidenced-based resource/tool.

Criteria:

- Creates/updates/maximizes a new resource/tool using appropriate evidence-based literature to optimize medication related decisions at the population, patient, and provider level.
- Identifies gaps between current literature and/or clinical guidelines and how information is presented in an existing population management tool.
- Identifies essential data to include in the tool that will maximize efficiency and capability of drawing conclusions about patient care.
- Outlines presentation of data within the tool that optimizes understanding and feasibility of implementation by the end user.

- Proposes updates to an existing tool or framework for a new tool to clinical leaders and other stakeholders for approval.

Competency Area R2: Clinical Data Management and Analytics

Goal R2.1: Demonstrate knowledge of data generation, flow and capture, storage, and use in business and clinical decision-making. (See Figure A. as a reference in the Appendix)

Objective R2.1.1: (Understanding) Explain available technology for medication prescribing, order processing and verification, preparation, distribution, dispensing, monitoring, safe and efficient administration and documentation of these activities.

Criteria:

- Describes the technology for prescribing, order processing, distribution/dispensing, monitoring, safe/efficient administration and documentation.
- Describes the interconnectivity of technology systems/processes.
- Explains current literature with regard to patient safety related to technology and automation systems for the medication ordering life cycle.
- Explains the benefits of and challenges to the positive identification of medication and the patient during medication administration and documentation.
- Explains the “seven rights” of medication administration and documentation.
- Describes the function and pros and cons of synchronous versus asynchronous decision support.
- Explains the components of a rule-based order alerts.
- Explains the impact of rule-based order alerts on clinical pharmacy practice.

Objective R2.1.2: (Understanding) Explain the concept of data warehousing, capture of documented healthcare data in a primary system and translation to a data warehouse, and its use in querying data for clinical and operational decision-making.

Criteria:

- Explains what a data warehouse is.
 - Explains the data flow from primary systems into a data warehouse.
 - Explains the roles of data aggregation and data integration in population health.
 - Explains some of the challenges of data aggregation and data integration in population health.
- Explains examples of use cases, using data from a data warehouse for population health decision-making.

Objective R2.1.3: (Creating) Construct a workflow process diagram(s) using knowledge of data flow, workflows, and identification of appropriate team members.

Criteria:

- Explains how data flow and workflow process diagrams integrate into clear identification of current processes and stakeholders.
- Develops a workflow process diagram(s) for a project.

- Plans for a project that includes appropriate reviews and approvals required by stakeholders.

Goal R2.2: Demonstrate and apply understanding of basic analytics principles, standards, and best practices.

Objective R2.2.1: (Understanding) Utilize best practice strategies to maximize code performance and data management.

Criteria:

- Explains the principles and uses of databases in the management of large volumes of data to facilitate decision making, including effective use of dashboards and reports.
- Explains the difference between transactional and analytic database design.
- Explains how to develop analysis tools that are sufficiently detailed to support desired user goals.
- Understands strategies for efficient programming (e.g., indexing, dimensional modeling, limiting data retrieval to only necessary information, data consistency, and best practices for data warehouse architecture).

Objective R2.2.2: (Applying) Collaborate with information technology staff and other professionals to assess analysis tool security and patient protections for conformance with accepted standards including access control, data security, data encryption, HIPAA privacy regulations, and ethical and legal issues.

Criteria:

- Demonstrates understanding of the organization's regulatory policies for maintaining security of patient information.
- Explains accepted criteria for system security.
- Demonstrates understanding of current HIPAA regulations and the application of those regulations to pharmacy technology and automation systems.
- Articulates ethical considerations related to management of protected health information.
- Identifies specific steps to guard patient data.
- Applies accepted criteria for system security during assessments.
- Understands various risks and security issues with regard to all potential vectors, for example, email, external software systems, electronic health records.
- Articulates the following data issues: De-identification, encryption, HIPAA, PHI, and understanding proper approvals.

Objective R2.2.3: (Creating) Demonstrate proficiency in the use of databases and data analysis software to successfully construct reports and dashboards.

Criteria:

- Applies strategies for efficient programming (e.g., indexing, dimensional modeling, limiting data retrieval to only necessary information, data consistency, and best practices for data warehouse architecture).
 - Follows/interprets data process flow chart and identify appropriate tables to extract data for clinical and operational tools in response to internal queries.
 - Demonstrates the ability to refactor queries to improve performance.

- Evaluates the effectiveness, utilization, and quality of the tools requested by providers within the organization.
- Performs statistical analyses for the purpose of evaluating the data.
- Draws accurate conclusions regarding significance of information.

Goal R2.3: Establish oneself as an expert for data retrieval, evidence-based medication information, and outcomes-related resources within the organization.

Objective R2.3.1: (Applying) Implement a strategy for earning credibility within the organization as an authoritative expert on the creation of analytic tools, measurement of outcomes, and overall evidence-based medication-related care of patients.

Criteria:

- Explains the business reason behind a data request and the clinical impact of the results.
- Raises awareness within the organization of role and services offered, serving as a resource for reliable data and information for other providers.
- Fulfills requests for provider-requested data, reports, or outcomes in an accurate and efficient manner.
- Participates in committees and/or collaborates with team members on organizational activities.
- Provides consultation to limit or expand the scope of a request, enhances use across all care team members, and tailors to specific end user types to ensure highest value to the organization.
- Engages in continuing education activities related to role as applicable.

Objective R2.3.2: (Applying) Contribute clinical perspective and expertise regarding the development, implementation, utilization, and revision of outcomes measures and metrics, and analysis tools in interactions with information technology staff, clinicians and end users.

Criteria:

- Engages with information technology staff, clinicians and end users to ensure that the appropriate clinical perspective is incorporated into the data extraction, outcomes measures and metrics, and analysis tools.
- Effectively bridges knowledge gaps, utilizing clinical and technical knowledge in collecting and analyzing population health data, to efficiently address operational and clinical aims of the organization.
- Presents the resource/tool to the end user(s) and explains the benefits of the resource/tool.
- Prepares an effective communication for presentation to the end user(s).
- Assesses the benefits and risks associated with use of the resource/tool.

- Discusses the implementation and evaluation plans.
- Appropriately responds to questions regarding the resource/tool.
- Reports outcome of change accurately to appropriate stakeholders(s) and policy-making bodies according to departmental or organizational processes.
- Uses effective communication skills to accommodate the target audience.

Objective R2.3.3: (Analyzing) Analyze feedback from the end user(s) on usability and efficacy of the resource/tool and revise accordingly.

Criteria:

- Effectively prepares methods to collect feedback from end user(s).
- Analyzes data/feedback from end user(s) on the resource/tool.
- Uses end user data/feedback to revise resource/tool to meet the needs of the end user(s).

Goal R2.4: Evaluate opportunities for improving patient outcomes, clinical and operational efficiencies, safety and quality of the medication-use process through the application of Continuous Quality Improvement (CQI) strategies.

Objective R2.4.1: (Understanding) Demonstrate knowledge of the formal structure of a CQI initiative.

Criteria:

- Identifies the basic components of a CQI initiative (Plan-Do-Study-Act).
- Articulates the purpose of each step of the PDSA cycle.
- Reviews the Institute for Healthcare Improvement (IHI) Model.
- Describes the quality measures in healthcare and how they relate to population health as well as economic incentives and reimbursement.
- Describes the process of health technology assessment and healthcare decision making.

Objective R2.4.2: (Applying): Design and/or deliver processes and/or initiatives that support quality measures to improve population health outcomes of medication therapy.

Criteria:

- Participates in the organization's process for designing and aligning with population health management initiatives.
- Applies an understanding of evidence-based, patient-centered medication therapy to identify practice guidelines to be used in the development of population health management initiatives.

- Applies an understanding of evidence-based, patient-centered medication therapy to establish process and outcome measures used to implement and evaluate population health management initiatives.
- Uses appropriate outcome measurements to measure and evaluate the success of population health management programs and initiatives.

Objective R2.4.3: (Evaluating) Use data collection tools and/or methodologies to identify opportunities to improve medication-use processes.

Criteria:

- Demonstrates understanding of the process of direct observation of the human/technology interface for the purpose of analysis.
- Effectively uses interviewing skills for the purpose of understanding the human/technology interface.
- Recognizes and articulates limitations of identification techniques.
- Utilizes subjective direct observation, survey and interview techniques.
- Incorporates objective data collection techniques to confirm subjective root cause analysis.
- Determines the appropriate tool and/or methodologies for data collection, including, but not limited to: fish bone diagrams, Five Whys, Pareto, 80/20 rule, other reports, root cause analysis.
- Develops a basic financial model for developing and reviewing a program, including key quality and safety metrics.

Objective R2.4.4: (Applying) Participate in a CQI initiative and lead a component of a technology or automation system.

Criteria:

- Develops group leadership skills through team based engagement with population health concepts.
- Organizes an appropriate team to evaluate a technology or automation system and identify areas for improvement.
- Identifies a specific aim for the CQI initiative.
- Establishes outcome measures for the CQI initiative.
- Agrees on changes that will address the aim of the CQI initiative.
- Tests changes.

- Implements changes.
- Evaluates results.

Competency Area R3: Quality Improvement or Research Project

Goal R3.1: Demonstrate the ability to conduct a population health, data analytics, quality improvement, or research project using effective project management skills.

Objective R3.1.1: (Understanding) Explain the principles and methodology of study design (i.e., clinical, humanistic, and economic outcomes analysis).

Criteria:

- Explains the different types of clinical, humanistic or economic outcomes analysis, along with the pros and cons of each (prospective versus retrospective).
- Explains the purpose of a clinical, humanistic or economic outcomes analysis.
- Explains study designs appropriate for a clinical, humanistic and economic outcomes analysis.
- Explains the technique and application of modeling.
- Explains the types of data that must be collected in a clinical, humanistic and economic outcomes analysis.
- Explains possible reliable sources of data for a clinical, humanistic and economic outcomes analysis.
- Explains methods for analyzing data in a clinical, humanistic and economic outcomes analysis.
- Explains how results of an outcomes analysis can be applied to internal business decisions and modifications to a customer's formulary or benefit design.

Objective R3.1.2: (Analyzing) Identify and/or demonstrate understanding of specific project topic related to population health management, data analytics, or advancing the pharmacy profession.

Criteria:

- Appropriately identifies or understands problems and opportunities for improvement or research projects.
- Conducts a comprehensive literature search and draws appropriate conclusions.
- Determines an appropriate research question or topic for a practice-related project of significance to patient care that can realistically be addressed in the desired time frame.
- Uses best practices or evidence-based principles to identify opportunities for improvements.
- Accurately evaluates or assists in the evaluation of data generated by health information technology or automated systems to identify opportunities for improvement.

Objective R3.1.3: (Creating) Develop a plan or research protocol for a quality improvement or research project related to the care of a specified population of patients or for advancing the pharmacy profession in population health management.

Criteria:

- Develops specific aims, selects an appropriate study design, and develops study methods to answer the research question(s).
- Applies safety design practices (e.g., standardization, simplification, human factors training, lean principles, FOCUS-PDCA, other process improvement or research methodologies) appropriately and accurately.
- Develops a plan for improvement that includes appropriate reviews and approvals required by department or organization and addresses the concerns of all stakeholders.
- Applies evidence-based and/or basic pharmacoeconomic principles, if needed.
- Develops a feasible design for a prospective or retrospective clinical or outcomes analysis project that considers who or what will be affected by the project.
- Identifies and obtains necessary approvals, (e.g., IRB, quality review board, funding) and responds promptly to feedback or reviews for a practice-related project.
- Acts in accordance with the ethics of research on human subjects, if applicable.
- Implements the project as specified in its design.
- Designs plans that are practical to implement and are expected to remedy or minimize the identified challenge or deficiency.

Objective R3.1.4: (Evaluating) Collect and evaluate data for a quality improvement or research project related to the care of a specified population of patients or advancing the pharmacy profession in population health management.

Criteria:

- Collects the appropriate types of data as required by project design.
- Uses appropriate electronic data and information from internal information databases, external online databases, appropriate Internet resources, and other sources of decision support, as applicable.
- Uses appropriate methods for analyzing data in a prospective and retrospective clinical, humanistic, and/or economic outcomes analysis.
- Develops and follows an appropriate research or project timeline.
- Correctly identifies need for additional modifications or changes to the project.
- Applies results of a prospective or retrospective clinical, humanistic, and/or economic outcomes analysis to internal business decisions and modifications to a customer's formulary or benefit design as appropriate.
- Uses continuous quality improvement (CQI) principles to assess the success of the implemented change, if applicable.
- Considers the impact of the limitations of the project or research design on the interpretation of results.
- Accurately and appropriately develops plans to address opportunities for additional changes.

Objective R3.1.5: (Applying) Implement quality improvement or research project related to the care of a specified population of patients or advancing the pharmacy profession related to population health management.

Criteria:

- Effectively presents a research project (e.g., accurately recommends or contributes to recommendation for operational change, formulary addition or deletion, implementation of medication guideline or restriction, or treatment protocol implementation) to appropriate audience.
- Demonstrates appropriate assertiveness in presenting pharmacy concerns, solutions, and interests to external stakeholders.
- Gains necessary commitment and approval for implementation.
- Follows established timeline and milestones.
- Effectively communicates any changes in medication formulary, medication usage, or other procedures to appropriate parties.

Objective R3.1.6: (Evaluating) Assess changes or need to make changes to improve care of a specified population of patients or advancing the pharmacy profession related to population health management.

Criteria:

- Evaluates data and/or outcome of project accurately and fully.
- Includes operational, clinical, economic, and humanistic outcomes of patient care, if applicable.
- Uses continuous quality improvement (CQI) principles to assess the success of the implemented change, if applicable.
- Correctly identifies need for additional modifications or changes based on outcome.
- Accurately assesses the impact of the project, including its sustainability (if applicable).
- Accurately and appropriately develops a plan to address opportunities for additional changes.

Competency Area R4: Leadership and Management

Goal R4.1: Demonstrate leadership skills for successful self-development in the provision of population health management and data analytics.

Objective R4.1.1: (Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership.

Criteria:

- Demonstrates efficient time management.
- Manages conflict effectively.
- Demonstrates effective negotiation skills.
- Demonstrates ability to lead interprofessional teams.
- Uses effective communication skills and styles.

- Demonstrates understanding of perspectives of various health care professionals.
- Effectively expresses benefits of personal profession-wide leadership and advocacy.

Objective R4.1.2: (Applying) Apply a process of ongoing self-evaluation and personal performance improvement in the provision of population health management and data analytics.

Criteria:

- Accurately summarizes own strengths and areas for improvement (in knowledge, values, qualities, skills, and behaviors).
- Effectively uses a self-evaluation process for developing professional direction, goals, and plans.
- Effectively engages in self-evaluation of progress on specified goals and plans.
- Demonstrates ability to use and incorporate constructive feedback from others.
- Effectively uses principles of continuous professional development (CPD) planning (reflect, plan, act, evaluate, record/review).

Goal R4.2: Demonstrate management skills in the provision of population health management and data analytics.

Objective R4.2.1: (Applying) Contribute to departmental management of population health management and data analytics.

Criteria:

- Helps identify and define significant departmental needs, including:
 - Manpower/staffing.
 - Staff scheduling and contingencies.
 - Staff qualifications.
 - Assesses and develops educational opportunities regarding population health management for service line staff.
- Helps develop plans that address departmental needs, including:
 - Orientation.
 - Training and supervision.
 - Effectively participates in, or evaluates, strategic plan.
- Participates effectively on committees or informal work groups to complete group projects, tasks, or goals.
- Participates effectively in implementing changes, using change management and quality improvement best practices and tools, consistent with team, departmental, and organizational goals.

Objective R4.2.2: (Applying) Manage one's own advanced practice effectively.

Criteria:

- Reviews and interprets the most recent primary literature.
- Evaluates clinical practice activities for potential contributions to scholarship.
- Accurately assesses successes and areas for improvement (e.g., a need for staffing projects or education) in managing one's own practice.

- Makes accurate, criteria-based assessments of one's own ability to perform practice tasks.
- Regularly integrates new learning into subsequent performances of a task until expectations are met.
- Routinely seeks applicable learning opportunities when performance does not meet expectations.
- Demonstrates effective workload and time-management skills.
- Assumes responsibility for personal work quality and improvement.
- Is well prepared to fulfill responsibilities (e.g., patient care, projects, management, and meetings).
- Sets and meets realistic goals and timelines.
- Demonstrates awareness of own values, motivations, and emotions.
- Demonstrates enthusiasm, self-motivation, and a "can-do" approach.
- Strives to maintain a healthy work-life balance.
- Works collaboratively within the organization's political and decision-making structure.
- Demonstrates pride in and commitment to the profession through appearance, personal conduct, planning to pursue board certification.
- Demonstrates pride in and commitment to population health management and data analytics through membership in professional organizations related to the pharmacy practice.
- Demonstrates personal commitment and adheres to organizational and departmental policies and procedures.

Goal R4.3: Assist the organization in achieving compliance with accreditation, legal, regulatory, and safety requirements related to the use of medications (e.g., appropriate accrediting bodies and related professional organization standards, statements, and/or guidelines; state and federal laws regulating pharmacy practice).

Objective R4.3.1: (Analyzing) Determine appropriate activities and documentation needed to meet accreditation, legal, regulatory, and safety requirements for pharmacy.

Criteria:

- Accurately interprets legal (e.g., Medicaid/Medicare, State, Federal), regulatory (e.g., CMS), and accreditation requirements (e.g., TJC, HEDIS, NCQA, URAC).
- Reviews current organizational documentation related to compliance.
- Articulates implications associated with non-compliance.

Objective R4.3.2: (Applying) Participate in the organizational compliance processes for accreditation, legal, regulatory, and safety requirements related to data, medications, and pharmacy practice.

Criteria:

- Accurately assesses organizational current practice to requirements.
- Identifies gaps in compliance.
- Develops proposed strategies to close gaps in compliance.

- Actively participates in organizational committees which oversee organizational compliance.

Competency Area R5: Teaching, Education, and Dissemination of Knowledge

Goal R5.1: Provide effective medication and practice-related education to health care professionals in population health management and data analytics.

Objective R5.1.1: (Creating) Design effective educational activities related to population health management and data analytics.

Criteria:

- Accurately defines educational needs, including learning styles, with regard to target audience (e.g., individual versus group) and learning level (e.g., health care professional versus patient, student versus PGY1 resident).
- Selects topics of significance.
- Defines educational objectives that are specific, measurable, at a relevant learning level (e.g., applying, creating, evaluating), and address the audiences' defined learning needs.
- Plans use of teaching strategies that match learner needs, including active learning (e.g., patient cases, polling).
- Selects content that is relevant, thorough, evidence based (using primary literature where appropriate), timely and reflects best practices.
- Includes accurate citations and relevant references and adheres to applicable copyright laws.

Objective R5.1.2: (Applying) Use effective presentation and teaching skills to deliver education related to population health management and data analytics.

Criteria:

- Demonstrates rapport with learners.
- Captures and maintains learner/audience interest throughout the presentation.
- Implements planned teaching strategies effectively.
- Effectively facilitates audience participation, active learning, and engagement in various settings (e.g., small or large group, distance learning).
- Presents at appropriate rate and volume and without exhibiting poor speaker habits (e.g., excessive use of "um" and other interjections).
- Body language, movement, and expressions enhance presentations.
- Summarizes important points at appropriate times throughout presentations.
- Transitions smoothly between concepts.
- Effectively uses audio-visual aids and handouts to support learning activities.

Objective R5.1.3: (Applying) Use effective written communication to disseminate knowledge related to population health management and data analytics.

Criteria:

- Writes in a manner that is easily understandable and free of errors.

- Demonstrates thorough understanding of the topic.
- Notes appropriate citations and references.
- Includes critical evaluation of the literature and knowledge advancements or a summary of what is currently known on the topic.
- Develops and uses tables, graphs, and figures to enhance reader's understanding of the topic when appropriate.
- Writes at a level appropriate for the target readership (e.g., physicians, pharmacists, other health care professionals, patients, and the public).
- Creates one's own work and does not engage in plagiarism.

Objective R5.1.4: (Evaluating) Assess effectiveness of education related to population health management and data analytics.

Criteria:

- Selects assessment method (e.g., written or verbal assessment or self-assessment questions, case with case-based questions, and learner demonstration of new skill) that matches activity.
- Provides timely, constructive, and criteria-based feedback to learner.
- If used, assessment questions are written in a clear, concise format that reflects best practices for test item construction.
- Determines how well learning objectives were met.
- Plans for follow-up educational activities to enhance or support learning and (if applicable) ensure that goals were met.
- Identifies ways to improve education-related skills.
- Obtains, reviews, and applies feedback from learners and others to improve effectiveness as an educator.

Goal R5.2: Effectively employ appropriate preceptor roles when engaged in teaching students, pharmacy technicians, or fellow health care professionals.

Objective R5.2.1: (Analyzing) When engaged in teaching, select a preceptor role that meets learners' educational needs.

Criteria:

- Identifies which preceptor role is applicable for the situation (direct instruction, modeling, coaching, facilitating).
 - Selects direct instruction when learners need background content.
 - Selects modeling when learners have sufficient background knowledge to understand the skill being modeled.
 - Selects coaching when learners are prepared to perform a skill under supervision.
 - Selects facilitating when learners have performed a skill satisfactorily under supervision.

Objective R5.2.2: (Applying) Employ preceptor roles, as appropriate, when instructing, modeling, coaching, or facilitating skills.

Criteria:

- Accurately assesses the learner's skill level to determine the appropriate preceptor role for providing practice-based teaching.
- Instructs students, technicians, or others as appropriate.
- Models skills, including "thinking out loud," so learners can "observe" critical-thinking skills.
- Coaches, including effective use of verbal guidance, feedback, and questioning, as needed.
- Facilitates, when appropriate, by allowing learner independence and uses indirect monitoring of performance.

ADDITIONAL FOR PROGRAM: REQUIRED COMPETENCY AREAS, GOALS, AND OBJECTIVES SPECIFIC TO THE PGY2 PROGRAM AT VA SIERRA NEVADA HEALTH CARE SYSTEM

Competency Area E1: Pharmacy Benefit Design and Formulary Management

Goal E1.1: Explain the interrelationship of the pharmacy benefit design elements and the organization's health care systems.

Objective E1.1.1: (Analyzing) Examine elements of pharmacy benefit design and management such as co-pay, formulary, medication utilization management, prior authorization procedures, consults, access to pharmacy networks, and contract negotiations (medication acquisition and/or network pharmacies).

Criteria:

- Compares and contrasts government (e.g., VA, DoD, Medicare) PBM roles and functions to private sector PBM roles and functions.
- Differentiates patient eligibility requirements and benefits for various plans.
- Appraises the methods for pharmaceutical procurement (e.g., prime vendor, open market, contract, use of inventory management systems).

Objective E1.1.2: (Analyzing) Research literature, business publications, websites and other relevant resources to assemble a list of factors that will influence sites' budget projections for the organization's funding period.

Criteria:

- Reviews resources for identifying pipeline drugs.
- Analyzes factors considered when determining whether a particular drug would be used by the covered population.
- Analyzes the influence of specialty drugs on the pharmacy budget.

Objective E1.1.3: (Creating) Assist the organization in planning and managing pharmacy drug spend.

Criteria:

- Designs models to predict drug spend, taking into account various plausible scenarios that could influence spend trajectory over the projected time frame.
- Generates cost savings plans that use formulary management techniques to achieve cost savings or cost avoidance.

- Constructs monitoring tools to track drug spend and savings.
- Produces financial reports that are meaningful and tailored to various customers (e.g., organizational leadership, clients, pharmacy directors, and formulary management staff).
- Applies clinical perspective and expertise to devise metrics to track and trend drug spend.

Goal E1.2: Manage aspects of the medication-use process related to formulary management through use of pharmacoeconomic proposals, medication use criteria, and organizational policies and procedures affecting the care of patients.

Objective E1.2.1: (Applying) Communicate formulary changes and/or outcomes to the organization.

Criteria:

- Accurately evaluates the effectiveness of channels of communication throughout the organization.
- Proposes communicating through an existing channel or suggests the development of a new/revised channel.
- Develops clear and concise communication messages.
- Assesses communication effectiveness.

Objective E1.2.2: (Creating) Prepare written medication use policy, applying clinical expertise, literature evaluation and appropriate pharmacoeconomic analyses.

Criteria:

- Explains the principles and methodology of basic pharmacoeconomic analyses.
- Appraises published and unpublished literature and other clinical information in the development of prior authorization/drug use criteria.
- Prepares succinct, comprehensive written products that address technical, operational and clinical perspectives and are considerate of workload/staff impact.
- Conducts a pharmacoeconomic analysis to support a medication policy and/or process recommendation or decision (e.g., Decision Analysis, Cost-Effectiveness Analysis, Cost-Benefit Analysis, Cost-Minimization Analysis, and Cost-Utility Analysis).
- Gains consensus for the approval of the written criteria or policy through the organization's governing bodies.
- Uses evidence-based principles to develop criteria for use.

Objective E1.2.3: (Applying) Present the medication use policy to an interdisciplinary organizational committee and gain consensus for approval.

Criteria:

- Demonstrates appropriate assertiveness in presenting pharmacy concerns, solutions, and interests to internal and external stakeholders.
- Presentations reflect understanding of the composition and responsibilities of the organization's committee.
- Presentations reflect understanding of the pharmacist's responsibilities when participating in committee decision-making.
- Presentations use appropriate style of presentation for committee meetings.

Objective E1.2.4: (Evaluating) Assess the impact of a policy or process recommendation on patient safety and quality of care.

Criteria:

- Demonstrates a systematic approach to gathering data.
- Accurately analyzes data gathered.
- Presents finding to key stakeholders.
- Implements approved changes, as applicable.

Competency Area: Orientation

Goal R1.1: Demonstrate understanding of basic population-based health principles, standards, and best practices.

Objective R1.1.1: (Understanding) Describe the concept of population health and the basic framework that relates healthcare policy and health factors to overall population health.

Criteria:

- Describes the concept of population versus individual patient health management.
- Understands the concepts of health disparities, health equity, social determinants of health (SDOH), and population health and their relationship to each other.
- Discusses the pharmacist's role in population health management.
- Reviews the organization's process for designing and/or participating in population health management programs.

Goal R4.1: Demonstrate leadership skills for successful self-development in the provision of population health management and data analytics.

Objective R4.1.1: (Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership.

Criteria:

- Demonstrates efficient time management.
- Manages conflict effectively.
- Demonstrates effective negotiation skills.
- Demonstrates ability to lead interprofessional teams.
- Uses effective communication skills and styles.
- Demonstrates understanding of perspectives of various health care professionals.
- Effectively expresses benefits of personal profession-wide leadership and advocacy.

ELECTIVE COMPETENCY AREAS, GOALS, AND OBJECTIVES FOR POSTGRADUATE YEAR TWO (PGY2) POPULATION HEALTH MANAGEMENT AND DATA ANALYTICS PHARMACY RESIDENCIES

Competency Area E2: Academia

Goal E2.1: Demonstrate understanding of key elements of the academic environment and faculty roles within it.

Objective E2.1.1: (Understanding) Demonstrates understanding of key elements of the academic environment and faculty roles within it.

Criteria:

- Accurately describes variations in the expectations of different colleges/schools of pharmacy for teaching, practice, research, and service, including public versus private colleges/schools of pharmacy and relationships between scholarly activity and teaching, practice, research and service.
- Accurately describes the academic environment, including how the decisions by university and college administration impact the faculty and how outside forces (e.g., change in the profession, funding source, accreditation requirements) impact administrator and faculty roles.
- Accurately describes faculty roles and responsibilities.
- Accurately describes the types and ranks of faculty appointments, including the various types of appointments (e.g., non-tenure, tenure-track, and tenured faculty), various ranks of faculty (e.g., instructor, assistant professor, associate professor, full professor), and the role and implications of part-time and adjunct faculty as schools continue to expand and faculty shortages occur, and promotion and tenure process for each type of appointment, including types of activities that are considered in the promotion process and for tenure.
- Accurately explains the role and influence of faculty in the academic environment, including faculty in governance structure (e.g., the faculty senate, committee service) and faculty related to teaching, practice, research, and service roles (e.g., curriculum development and committee service).
- Accurately identifies resources available to help develop academic skills, including the role of academic-related professional organizations (e.g., AACP) and other resources to help develop teaching skills and a teaching philosophy.
- Accurately identifies and describes ways that faculty maintain balance in their roles.
- Accurately describes typical affiliation agreements between a college of pharmacy and a practice site (e.g., health system, hospital, clinic, retail pharmacy).

Goal E2.2: Exercise case-based and other teaching skills essential to pharmacy faculty.

Objective E2.2.1: (Applying) Develop and deliver cases for workshops and exercises for laboratory experiences.

Criteria:

- Identifies the appropriate level of case-based teachings for small group instruction.
- Identifies appropriate exercises for laboratory experiences.
- Provides appropriate and timely feedback to improve performance.

Objective E2.2.2: (Evaluating) Compare and contrast methods to prevent and respond to academic and profession dishonesty and adhere to copyright laws.

Criteria:

- Accurately evaluates physical and attitudinal methods to prevent academic dishonesty.
- Accurately describes methods of responding to incidents of academic dishonesty.
- Accurately explains the role of academic honor committees in cases of academic dishonesty.
- Identifies examples and methods to address unprofessional behavior in learners.
- Accurately describes copyright regulations as related to reproducing materials for teaching purposes.
- Accurately describes copyright regulations as related to linking and citing on-line materials.

Goal E2.3: Develops and practices a philosophy of teaching.

Objective E2.3.1: (Creating) Develop or update a teaching philosophy statement.

Criteria:

- Teaching philosophy includes:
 - Self-reflection on personal beliefs about teaching and learning;
 - Identification of attitudes, values, and beliefs about teaching and learning; and,
 - Illustrates personal beliefs on practice and how these beliefs and experiences are incorporated in a classroom or experiential setting with trainees.
 - If updating, reflect on how one's philosophy has changed.

Objective E2.3.2: (Creating) Prepare a practice-based teaching activity.

Criteria:

- Develops learning objectives using active verbs and measurable outcomes.
- Plans teaching strategies appropriate for the learning objectives.
- Uses materials that are appropriate for the target audience.
- Organizes teaching materials logically.
- Plans relevant assessment techniques.
- When used, develops examination questions that are logical, well-written, and test the learners' knowledge rather than their test-taking abilities.
- Participates in a systematic evaluation of assessment strategies (e.g., post-exam statistical analysis) when appropriate.
- Ensures activities are consistent with learning objectives in course syllabus.

Objective E2.3.3: (Applying) Deliver a practice-based educational activity, including didactic or experiential teaching, or facilitation.

Criteria:

- Incorporates at least one active learning strategy in didactic experiences appropriate for the topic.
- Uses effective skills in facilitating small and large groups.
- For experiential activities:
 - Organizes student activities (e.g., student calendar).
 - Effectively facilitates topic discussions and learning activities within the allotted time.
 - Effectively develops and evaluates learner assignments (e.g., journal clubs, presentations, SOAP notes).
 - Effectively assesses student performance.
 - Provides constructive feedback.

Objective E2.3.4: (Creating) Document one's teaching philosophy, skills, and experiences in a teaching portfolio.

Criteria:

- Portfolio includes:
 - A statement describing one's teaching philosophy.
 - Curriculum vitae.
 - Teaching materials including slides and other handouts for each teaching experience.
 - Documented self-reflections on one's teaching experiences and skills, including strengths, areas for improvement, and plans for working on the areas for improvement.
 - Peer/faculty evaluations.
 - Student/learner evaluations.

Competency Area E3: Advanced Skills with Technology or Automation Systems

Goal E3.1: Serve as an expert resource for the management of a specific technology or system.

Objective E3.1.1: (Understanding) Demonstrate understanding in the operation of the technology or system.

Criteria:

- Demonstrates understanding of the user view of the technology or automation system.
- Demonstrates understanding of the technical view of the technology or automation system.
- Demonstrate the operation of the technology or system.

Objective E3.1.2: (Applying) Formulate effective explanations, geared for a variety of interested audiences, of the functions of the technology or system.

Criteria:

- Adjusts communications appropriately when interacting with a technical audience versus a non-technical audience.
- Uses effective communication strategies with information technology vendors.

Objective E3.1.3: (Creating) Contribute to a change or improvement utilizing the technology or system.

Criteria:

- When presented with a non-standard problem, apply lateral (out-of-box) thinking to its solution.
- Engages with or develops a plan to implement a change in the technology or system.
- Participates in the change or implementation plan.

ADDITIONAL FOR PROGRAM: ELECTIVE COMPETENCY AREAS, GOALS, AND OBJECTIVES FOR POSTGRADUATE YEAR TWO (PGY2) POPULATION HEALTH MANAGEMENT AND DATA ANALYTICS PHARMACY RESIDENCIES

Competency Area: Advanced Pharmacy Benefit Design and Formulary Management (Elective)

Goal E1.1: Explain the interrelationship of the pharmacy benefit design elements and the organization's health care systems.

Objective E1.1.3: (Creating) Assist the organization in planning and managing pharmacy drug spend.

Criteria:

- Designs models to predict drug spend, taking into account various plausible scenarios that could influence spend trajectory over the projected time frame.
- Generates cost savings plans that use formulary management techniques to achieve cost savings or cost avoidance.
- Constructs monitoring tools to track drug spend and savings.
- Produces financial reports that are meaningful and tailored to various customers (e.g., organizational leadership, clients, pharmacy directors, and formulary management staff).
- Applies clinical perspective and expertise to devise metrics to track and trend drug spend.

Goal E1.2: Manage aspects of the medication-use process related to formulary management through use of pharmacoeconomic proposals, medication use criteria, and organizational policies and procedures affecting the care of patients.

Objective E1.2.2: (Creating) Prepare written medication use policy, applying clinical expertise, literature evaluation and appropriate pharmacoeconomic analyses.

Criteria:

- Explains the principles and methodology of basic pharmacoeconomic analyses.
- Appraises published and unpublished literature and other clinical information in the development of prior authorization/drug use criteria.
- Prepares succinct, comprehensive written products that address technical, operational and clinical perspectives and are considerate of workload/staff impact.
- Conducts a pharmacoeconomic analysis to support a medication policy and/or process recommendation or decision (e.g., Decision Analysis, Cost-Effectiveness Analysis, Cost-Benefit Analysis, Cost-Minimization Analysis, and Cost-Utility Analysis).
- Gains consensus for the approval of the written criteria or policy through the organization's governing bodies.
- Uses evidence-based principles to develop criteria for use.

Objective E1.2.3: (Applying) Present the medication use policy to an interdisciplinary organizational committee and gain consensus for approval.

Criteria:

- Demonstrates appropriate assertiveness in presenting pharmacy concerns, solutions, and interests to internal and external stakeholders.
- Presentations reflect understanding of the composition and responsibilities of the organization's committee.
- Presentations reflect understanding of the pharmacist's responsibilities when participating in committee decision-making.
- Presentations use appropriate style of presentation for committee meetings.

Objective E1.2.4: (Evaluating) Assess the impact of a policy or process recommendation on patient safety and quality of care.

Criteria:

- Demonstrates a systematic approach to gathering data.
- Accurately analyzes data gathered.
- Presents finding to key stakeholders.
- Implements approved changes, as applicable.

Competency Area: Advanced Leadership and Management

Goal R4.1: Demonstrate leadership skills for successful self-development in the provision of population health management and data analytics.

Objective R4.1.1: (Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership.

Criteria:

- Demonstrates efficient time management.
- Manages conflict effectively.
- Demonstrates effective negotiation skills.

- Demonstrates ability to lead interprofessional teams.
- Uses effective communication skills and styles.
- Demonstrates understanding of perspectives of various health care professionals.
- Effectively expresses benefits of personal profession-wide leadership and advocacy.

Objective R4.1.2: (Applying) Apply a process of ongoing self-evaluation and personal performance improvement in the provision of population health management and data analytics.

Criteria:

- Accurately summarizes own strengths and areas for improvement (in knowledge, values, qualities, skills, and behaviors).
- Effectively uses a self-evaluation process for developing professional direction, goals, and plans.
- Effectively engages in self-evaluation of progress on specified goals and plans.
- Demonstrates ability to use and incorporate constructive feedback from others.
- Effectively uses principles of continuous professional development (CPD) planning (reflect, plan, act, evaluate, record/review).

Goal R4.2: Demonstrate management skills in the provision of population health management and data analytics.

Objective R4.2.1: (Applying) Contribute to departmental management of population health management and data analytics.

Criteria:

- Helps identify and define significant departmental needs, including:
 - Manpower/staffing.
 - Staff scheduling and contingencies.
 - Staff qualifications.
 - Assesses and develops educational opportunities regarding population health management for service line staff.
- Helps develop plans that address departmental needs, including:
 - Orientation.
 - Training and supervision.
 - Effectively participates in, or evaluates, strategic plan.
- Participates effectively on committees or informal work groups to complete group projects, tasks, or goals.
- Participates effectively in implementing changes, using change management and quality improvement best practices and tools, consistent with team, departmental, and organizational goals.

Objective R4.2.2: (Applying) Manage one's own advanced practice effectively.

Criteria:

- Reviews and interprets the most recent primary literature.
- Evaluates clinical practice activities for potential contributions to scholarship.

- Accurately assesses successes and areas for improvement (e.g., a need for staffing projects or education) in managing one's own practice.
- Makes accurate, criteria-based assessments of one's own ability to perform practice tasks.
- Regularly integrates new learning into subsequent performances of a task until expectations are met.
- Routinely seeks applicable learning opportunities when performance does not meet expectations.
- Demonstrates effective workload and time-management skills.
- Assumes responsibility for personal work quality and improvement.
- Is well prepared to fulfill responsibilities (e.g., patient care, projects, management, and meetings).
- Sets and meets realistic goals and timelines.
- Demonstrates awareness of own values, motivations, and emotions.
- Demonstrates enthusiasm, self-motivation, and a "can-do" approach.
- Strives to maintain a healthy work-life balance.
- Works collaboratively within the organization's political and decision-making structure.
- Demonstrates pride in and commitment to the profession through appearance, personal conduct, planning to pursue board certification.
- Demonstrates pride in and commitment to population health management and data analytics through membership in professional organizations related to the pharmacy practice.
- Demonstrates personal commitment and adheres to organizational and departmental policies and procedures.

Goal R4.3: Assist the organization in achieving compliance with accreditation, legal, regulatory, and safety requirements related to the use of medications (e.g., appropriate accrediting bodies and related professional organization standards, statements, and/or guidelines; state and federal laws regulating pharmacy practice).

Objective R4.3.1: (Analyzing) Determine appropriate activities and documentation needed to meet accreditation, legal, regulatory, and safety requirements for pharmacy.

Criteria:

- Accurately interprets legal (e.g., Medicaid/Medicare, State, Federal), regulatory (e.g., CMS), and accreditation requirements (e.g., TJC, HEDIS, NCQA, URAC).
- Reviews current organizational documentation related to compliance.
- Articulates implications associated with non-compliance.

Objective R4.3.2: (Applying) Participate in the organizational compliance processes for accreditation, legal, regulatory, and safety requirements related to data, medications, and pharmacy practice.

Criteria:

- Accurately assesses organizational current practice to requirements.

- Identifies gaps in compliance.
- Develops proposed strategies to close gaps in compliance.
- Actively participates in organizational committees which oversee organizational compliance.

APPENDIX VI: Journal Club/Literature Evaluation

1. Reason for doing a journal club.

- To encourage the student to keep up with the literature.
- To teach the student to analyze the validity of an article and not to just accept it as fact.

2. Choosing an article: Explain why you chose this article.

- Original article (not a review article) from a reputable journal.
- Human studies.
- It is preferable to choose an article published within the last 4 months.
- Subject that could impact your practice or be of special interest to you.
- Who sponsored the article.
- A study should contain: Title, abstract, introduction, methods, results and discussion.

3. Analyzing an article.

- Validity of an article: How precisely and accurately was the outcome measured.
Internal Validity: How well the study was done. Can the results stand up to scrutiny? Were the patients equal throughout the study? Were the means of measuring the outcome the same throughout the study? Was there bias?
External Validity: Can the results of the study be extrapolated to patients outside the study?
- Study design: To answer a hypothesis.
 May vary depending upon cost, time, sample, size, disease state, outcomes measured, etc.
 Should anticipate, eliminate or minimize any potential sources of **bias**. Bias is a systematic error that enters a study through study design and distorts the data obtained.

Strategies to minimize bias:

Double blinded study > Single Blinded > Open label

Placebo controlled

Randomization

Prospective > Retrospective

Reader bias:

Over critical evaluation of the study

Reader has preconceived idea of what the results of the study should demonstrate

Draw your own conclusion as to whether the study answered the hypothesis before reading

4. Handout (Provide a one page handout and the first page of the article)

- Objectives of the article
- Pertinent points of the article
- Patient population
- Study design
- Results of the study
- Presenters critique of the article

5. Presentation: Should run about 15-30 minutes and include the following in the same order:

- Explain why you chose the article
- Briefly discuss the type and results of the study.
- Critique the article: Do you agree with the study design. Does it have internal and external validity? Was there study bias?

APPENDIX VII: Initial Self-Evaluation

VA Sierra Pacific Network (VISN 21) Pharmacy Outcomes & Healthcare Analytics Resident Initial Achievement Plan & Self-Evaluation Program Planning Form

2020-2021

Name of Resident: _____, PharmD Type of Residency _____ Population Health Management and Data Analytics

In order to design a program that will best meet a resident's needs and interests, each Resident is asked to complete an individual initial evaluation for Program Individualization. Please complete this form and return to the VISN 21 PBM staff. This information will be used to assess your current strengths, areas where you would like to gain experience, and your professional goals to guide in the planning of your residency experiences for the upcoming year.

Career Goal Setting:

What are your immediate goals? Ideally, what would you like to do after completing your residency? Describe the type of professional practice and setting in which you would like to be.

Describe how you think your practice will change over the next five years.

What are your long-range career goals?

Professional Goal Setting:

What immediate goals do you want to accomplish during your residency as they relate to the following items. Please identify any specific skills or training you may want to receive during your upcoming residency.

Clinical training:

Teaching Skills:

Research Skills:

Other:

Pharmacy Practice Experience Inventory:

As part of our assessment of your previous pharmacy practice experiences (including internships, externships, clerkships, residency etc.), please describe your practice experiences and proficiency in the following areas:

Acute care (hospital experiences and activities performed; include supervisory activities, working with directors or supervisors of pharmacy services, etc.):

Ambulatory care (outpatient or community pharmacy experiences and activities):

Drug Information/DUE/Drug Policy Development (regardless of setting, whether inpatient or outpatient; also describe your experiences in providing drug information, whether formal or informal):

Pharmacy Practice Management (orientation and familiarity with pharmacy operations, ordering systems, inventory control, pharmacy computer systems, etc., whether inpatient or outpatient):

Pharmacy Practice Experience Inventory (continued):

After reflecting on your PharmD student clerkships, internships, clinical and previous resident experiences **please rank yourself as competent and confident using a scale of 1 (not competent or confident at all) to 5 (very competent and confident).**

<input type="checkbox"/>	Internal medicine
<input type="checkbox"/>	Geriatrics
<input type="checkbox"/>	Hypertension
<input type="checkbox"/>	Diabetes
<input type="checkbox"/>	Institutional practice (staffing)
<input type="checkbox"/>	Drug literature evaluation
<input type="checkbox"/>	Research project
<input type="checkbox"/>	Cardiology
<input type="checkbox"/>	Drug safety
<input type="checkbox"/>	Ambulatory Care
<input type="checkbox"/>	Pharmacy Practice Management

<input type="checkbox"/>	Surgery/TPN
<input type="checkbox"/>	Critical care
<input type="checkbox"/>	Anticoagulation
<input type="checkbox"/>	Hyperlipidemia
<input type="checkbox"/>	Drug usage evaluation
<input type="checkbox"/>	Formulary monographs/management
<input type="checkbox"/>	Oncology
<input type="checkbox"/>	Respiratory diseases
<input type="checkbox"/>	HIV
<input type="checkbox"/>	Pharmacoeconomics
<input type="checkbox"/>	Other (please specify)

Considering the areas listed above, what suggestions would you have to tailor your experiences during the residency to improve your competency and confidence?

Residency Elective Experience Preferences:

The following are possible areas where a resident can participate as elective rotations.

Please indicate your interest in the following areas based on the following scale.

1 = Very Interested, 2 = Moderately Interested, 3 = Indifferent, 4 = Moderately Uninterested, 5 = Very Uninterested

<input type="checkbox"/>	Mental Health Inpatient
<input type="checkbox"/>	Mental Health Outpatient
<input type="checkbox"/>	Women's Health (VA + community)
<input type="checkbox"/>	Triage (Emergency Room) Medicine
<input type="checkbox"/>	Diabetes Care
<input type="checkbox"/>	Pediatrics (Community Rotation)
<input type="checkbox"/>	Didactic Experience (e.g. P'Econ, Pharmacoepidemiology, statistics, etc.)
<input type="checkbox"/>	Advanced ICU Experience
<input type="checkbox"/>	Advanced Medicine Experience
<input type="checkbox"/>	Advanced Data Management
<input type="checkbox"/>	ID/HIV
<input type="checkbox"/>	Advanced Ambulatory Care Experience
<input type="checkbox"/>	VA Community Based Outpatient Clinic (CBOC)
<input type="checkbox"/>	Other (please define):
<input type="checkbox"/>	Other (please define):

Please identify the type of activities that you would like to participate in during any ambulatory care experiences. Describe the type of skills you would like to develop. **(Please include P'Econ in this assessment)**

Personal and Clinical Strengths & Weaknesses:

At this point in time, what *clinical* strengths do you feel that you have?

What *clinical* strengths do you wish to develop during the Residency year?

What *clinical* weaknesses do you feel that you have?

How would you like preceptors to help you improve your *clinical* strengths and weaknesses?

At this point in time, what *personality* strengths do you feel that you have?

Please list three *personality* strengths that you would like to develop during the Residency Year.

What *personality* weaknesses do you feel that you have?

How would you like preceptors to help you improve your *personality* strengths and weaknesses?

Understanding of Pharmaceutical Care:

How do you design, recommend, monitor, and evaluate an individual patient's pharmacotherapy?
(Discuss your process and what you believe are the important aspects of each step).

--

Other:

Other comments and suggestions/preferences for your residency. Please include any time off requests for special events (weddings, family events, etc.) that you may need during the upcoming year.

--

*****Residents please do not write below this line*****

Comments from Residency Director:
--

This above information will be used to create an individualized plan for your residency training. This plan will then be reviewed and updated each Quarter during your training.

PGY2 Initial Individualized Resident Plan:

Immediate Interests to Address Professional and Career Goals:

Pharmacy Practice Experience Inventory: (additional clinical practice experiences requested)
--

Residency Elective Experience Preferences:
--

Specific Projects to Address the Resident's Strengths and Weaknesses:

Research Interests/Teaching/Didactic Goals:

Other

Additional Individualized Training Plans (include added goals and objectives and plan for evaluation):

Projects currently planned to meet goals and objectives for the first Quarter include:

1. Formulary Management
2. P'Econ/Outcomes

3. Service/Policy Development
4. Data Management
5. Practice and Practice Foundation

This Resident Assessment and Program Planning document was discussed with the undersigned resident.

Date

APPENDIX VIII: Resident Quarterly Self-Evaluation

Resident Name:

Date:

Included below is a list of questions for you to utilize as a guide for your self-evaluations. ***Please refer to your Initial Self-Evaluation when answering these questions.***

I. Goals to accomplish during the PGY-2 Residency Year

1. Based on the Goals accomplished thus far in the residency program?
 - a. Do you feel you have accomplished these goals to the best of your ability? If not, what can be done to help you further achieve these goals?
2. Identify those goals, which you have yet to accomplish. Have projects been identified to accomplish these remaining goals?
3. Are any of those goals you identified previously no longer applicable?
4. What goals would you like to add at this time?

II. Current Interests of Clinical Pharmacy Practice

1. What are your primary interests at this time?
2. What has confirmed your interest in these areas, or what experiences have contributed to your decision to change your focus?
3. Have you decided how you would like to complete your elective rotations?

III. Strengths and Weaknesses

1. How have you utilized your strengths during the residency?
2. What experiences have occurred or feedback have you received, which have confirmed your strengths?
3. What additional strengths have you acquired during the residency?
4. How have you strived to overcome your weaknesses?

5. Were any weaknesses uncovered during the residency experience, which you were not previously aware of?

IV. Methods to Help Overcome Areas of Weakness

1. How have your preceptors helped you with the weaknesses you listed?
2. What aspects of the residency helped you with the weaknesses you listed?
3. How could the residency have been improved or what could your preceptors have done to help you overcome these areas of weakness?

V. Personal Preferences and Strategies

1. What Suggestions would you have to tailor your experiences during the residency to improve your competency and confidence?
2. Describe the frequency and type of preceptor interaction you feel to be ideal. Where do you see the preceptor fitting into your professional development and maturity?

APPENDIX IX: PGY-2 Outgoing Resident Survey

Veterans Affairs
Medical Center
Reno, NV

PGY-2 Pharmacy Outcomes & Healthcare Analytics

Outgoing residents: I would like to request your feedback about the residency. I appreciate if you would take a few minutes and complete the following survey. I want your honest feedback and I am trying to identify areas of improvement.

Please fill out electronically, print and sign. You can give to me in hardcopy or have scanned into PDF and e-mailed. If you have any questions, please see me or call me at 775-326-5724

1. What did you like the best about this residency program? What did you like the least?
2. What specific skill did you improve/learn in this residency program that will help you in the future?
3. What experience and or skill would you have liked (that you did not get) in the residency program?
4. If you could change one or two aspects of the residency program what would it (they) be?
5. If you had to do the residency again, would you choose this one again?
6. Do you have specific comments (positive and/or negative about specific rotations?
7. Do you have specific comments (positive and/or negative about specific preceptors?
8. Do you have specific comments (positive and/or negative about the RPD?
9. Any other final comments?

Name: _____

Date: _____

APPENDIX X: Functional Statement

Position Title: PGY-2 Population Health Management and Data Analytics Resident

General Program Description:

The role of the pharmacy resident is to develop into clinically competent pharmacists capable of managing small and large populations of patients, primarily through longitudinal experiences in data management, pharmacoeconomics, and health outcomes. The PGY2 resident provides specialized support to promote the integration of information technology, informatics, and data analysis with the practice of evidence-based medicine and medical treatments for VISN 21 PBM projects.

Residents are under the general supervision of the residency director, and under the preceptorship of the residency director and other assigned personnel. Under such oversight, the resident will design computerized reports and interfaces for various demographics; will demonstrate project development, implementation, and management skills; will initiate and implement clinical programs to enhance the efficiency of patient care; will monitor the local Veterans Integrated Service Network (VISN) performance measures and metrics; will provide education to health care professionals and participate in clinical research.

Functions:

1. Clinical and population management

- a. Demonstrates professionalism, creativity, and cooperation to work with various VISN 21 PBM task forces, workgroups and committees to improve patient care through various projects.
- b. Evaluates drug related problems, designs systematic problem solving routines, assist in therapeutic selection, monitoring and evaluation of therapy.
- c. Clinically manages patients directly or by using dashboard tools to improve patient safety, quality and other outcomes under the supervision of a preceptor.

2. Data management

- a. Initiates, develops, validates, and executes projects in support of the data warehouse.
- b. Provides feedback to clinical staff to improve user interface of data tools.
- c. Demonstrates understanding of the VA health data repository enterprise architecture data warehouse by manipulating the local, regional, and central databases to improve performance measures and metrics, improve efficiency of patient care, and identify at risk patients for VA personnel as appropriate for research and program purposes.

3. Research, Pharmacoeconomics and Health Outcomes

- a. Reviews PBM performance measures/metric, Lost Opportunity Costs (LOC)/PBM contract adherence, and other pharmacoeconomic initiatives.
- b. Applies pharmacoeconomic principles to the VA healthcare environment and in research design and methodologies to improve economic, clinical, and humanistic health outcomes.
- c. Manages and directs outcome projects developed and assigned by the preceptor at the direction of committees, task forces, and informal groups.
- d. Monitors and records both clinical and economic outcomes of programs.
- e. Continually monitors new literature, evidence, and pricing changes to improve care and cost-containment.

- f. Designs and participates in research studies involving therapy outcomes, pharmacoeconomics, and quality care.
4. *Education*
- a. Precepts other trainees as part of duty responsibilities as assigned.
 - b. Provides accurate and comprehensive information about drugs and drug use to other health care providers and patients.
 - c. Participates in in-service education programs to pharmacists, nurses, and other health care professionals.
 - d. Reviews and presents evaluations of articles in Pharmacy Journal Club as scheduled.
 - e. Assumes responsibility for self-development in learning about new medications and current changes within the practice of pharmacy.
 - f. Demonstrates strong interpersonal skills dealing with other health providers and patients.
5. *Administration*
- a. Participates in defining strategic goals, educates clinicians regarding processes related to operations, assists in measurements of those goals, and contributes to PBM and Medical Care Collections Fund (MCCF) success.
 - b. Demonstrates responsibility and initiative by managing projects in all aspects of VISN formulary.
 - c. Attends, participates and contributes to decisions of P&T Committees, VISN MUM team and other committees and/or work groups.
 - d. Participates in various Continuous Quality Improvement (CQI) initiatives, including Drug Use Evaluations (DUEs).
 - e. Reviews questions/problems dealing with all aspects of pharmacy operations and implements projects to better utilize available resources.
6. *Quality Assurance/Drug Use Evaluation/Research*
- a. Designs, develops, and completes at least one approved research/quality improvement project to evaluate the quality of clinical pharmacy services, other pharmacy service or drug usage, and prescribing practices. Completion includes a manuscript submission.
 - b. Coordinates targeted physician and pharmacist task forces or project groups to address performance measures, and optimize the cost-effective use of medications and respective concerns.
 - c. Exercises initiative and collaboration effectively with clinical and administrative staff to meet performance goals and support quality patients care activities.
 - d. Participates in a longitudinal experience where the resident will gain exposure and contribute to the development and achievement of PBM and pharmacy service goals on the local, VISN, and National levels.
 - e. Develops and implements VISN-wide targeted programs to achieve performance measures and contract goals in a global and time-efficient manner. Monitors needs of individual sites and guides sites on project implementation.

Qualifications:

1. The resident must be a United States Citizen.
2. Graduate of a degree program in pharmacy from an approved college or university. The degree program must have been approved by the American Council on Pharmaceutical Education (ACPE), or prior to the establishment of ACPE, have been a member of the American Association of Colleges of Pharmacy (AACP). Verification of approved degree programs may

be obtained from the American Council on Pharmaceutical Education, 311 West Superior Street, Suite 512, Chicago, Illinois 60610, Phone (312) 664-3575

3. **Licensure:** Full, current and unrestricted license to practice pharmacy in a State, Territory, Commonwealth of the United States (i.e., Puerto Rico), or the District of Columbia. The pharmacist must maintain current registration if this is a requirement for maintaining full, current, and unrestricted licensure.
4. Completion of a first-year pharmacy practice residency or an equivalent experience approved by ASHP, 3 years of clinical experience minimum, is required to be considered for this PGY-2 program.
5. See VA Handbook 5005, Part II, Appendix G-15.

Additional/Preferred Qualifications:

- A. Meets the age-specific competency as outlined in the "Competency Assessment Plan". Meets the general competencies as outlined in the "Competency Assessment Plan", which includes the following:
 1. Knowledge of proper infectious disease precautions/procedures.
 2. Knowledge of Fire/Safety/Emergency/Hazardous Material Procedures.
 3. Knowledge of Medical Center Quality Assurance.
 4. Knowledge of the appropriate responses for initiating CPR.
 5. Knowledge of the principles of information management.
 6. Knowledge of the customer service standards and interpersonal skills.
 7. Knowledge and skill to meet the position specific competencies as outlined in the "Competency Assessment Plan".
- B. The ability to communicate effectively in consultative roles with physicians, allied health care professionals, and counsel patients on drug therapy is essential to the accomplishment of the pharmacy mission.
- C. The resident will review and evaluate medication therapies and recommend viable alternatives to the providers on problems concerned with drug regimens. The difficulty and complexity of the resident's responsibilities are compounded by personal contacts with an ambulatory patient population who are (a) usually severely handicapped and/or mentally/physically ill or (b) harbor/manifest attitudes of depression, resentment or anger which may present emotional/physical stress factors. It is requisite that courtesy, tact, discretion, resourcefulness, initiative and a sympathetic understanding of the patient's manifested behavior are exercised at all times.

Supervisory Controls:

The resident serves with considerable independence in all areas of pharmacy activity under the general supervision of the Residency Director. The resident reports to and keeps the Clinical Pharmacy Specialist Preceptor apprised of trends/problems affecting any aspects of the activity, also, recognizing the need for changes in policy and procedures and makes viable recommendations.

Customer Service:

- A. Relationships with supervisors, co-workers and others within the organization must be consistently courteous and cooperative in nature and overall contribute to the effective operation of the office. Performance must demonstrate the ability to adjust to change or work pressure in a pleasant manner; handle differences of opinion in a businesslike fashion; follow

instructions conscientiously; and function as a team member, helping the group effort where possible.

- B. Interacts with a wide variety of staff and demonstrates sensitivity to and an understanding of their needs by taking ownership of the problem and adopting the customer's needs as their own.
- C. Provides professional and technical advice, support and assistance to all customers with a view towards accomplishing the service mission (i.e. customer service). Personal interactions will be free of legitimate negative feedback.
- D. Customers are treated in a professional manner, with tact, courtesy and respect. Instills confidence and trust with supervisors, peers and subordinates by providing timely and quality service. Meets established time frames and deadlines in area of responsibility.

Age Related Competency:

- A. The resident demonstrates the skills and knowledge necessary to provide care appropriate to the adult and geriatric patients served, including the ability to obtain and interpret information to identify patient needs to provide the care needed.
- B. Demonstrates the ability to work with a variety of diagnosis and ages meeting the special needs of the following age groups as stated on the "Competency Assessment Plan ":
 - 1. Young Adulthood: 18 -39 Years Old
 - 2. Middle Adulthood: 40 -64 Years Old
 - 3. Older Adult: 65 -80 Years Old
 - 4. Geriatric: 80+Years Old

Drug Testing Position:

In accordance with criteria contained in Executive Order 12564, this position has been determined as "sensitive" for drug testing purposes. VA employees in positions involving law enforcement, national security, the protection of life and property, public health or safety, or other functions requiring a high degree of trust and confidence, will be designated as subject to drug testing.

Occupational Safety and Health:

- A. Follow safe work practices and procedures, including use of required personal protective equipment (PPE).
- B. Recognize and report unsafe or unhealthy conditions/practices to supervisory personnel.
- C. Report work-related injuries or illness to supervisory personnel.

ADP Security:

In the performance of official duties, the employee has regular access to printed and electronic files containing sensitive information, which must be protected under the provisions of the Privacy Act of 1974, Health Insurance Portability and Accountability Act (HIPAA) of 1996, and other applicable law and regulations. The employee is responsible for (1) protecting that information from unauthorized release or from loss, alteration, or unauthorized deletion and (2) following applicable regulations and instructions regarding access to computerized files, release of access codes, etc. as set out in a computer access agreement which the employee signs.

Language Proficiency:

The resident in this position has direct patient care duties and must be proficient in the English language.

Duties:

1. Abide by the bylaws, rules, and regulations of this Medical Center which apply to activities as a member of the professional staff
2. Abide by the professional standards established by the American Society of Hospital Pharmacists and the policies and procedures of this Medical Center and the Department of Veterans Affairs
3. In the performance of official duties, the employee has regular access to both printed and electronic information containing sensitive data which must be protected under the provisions of the Privacy Act of 1974 and other applicable laws, federal regulations, VA statutes and policies, and VHA policy. The employee is responsible for (1) protecting that data from unauthorized release or from loss, alteration or unauthorized deletion and (2) following applicable regulations and instructions regarding access to computerized files, release of access codes, etc., as set out in a "Rules of Behavior" signed by each employee.
4. The resident is required to obtain a pharmacist license as defined by the Department of Veterans Affairs and the Erie VAMC Residency Manual.
5. Meet the requirements of the ASHP Accreditation Standard for post graduate year 1 (PGY2) pharmacy residency program

I have read and received a copy of this Functional Statement. I understand that I am responsible for the contents within.

Supervisor Signature: _____ Date: _____

APPENDIX XI: VA National Formulary FAQ

1) Q: Where can I find detailed information about the VA National Formulary Management Process?

A: VHA Handbook 1108.08 “VHA Formulary Management Process”.

2) Q: What is the purpose of the VA National Formulary (VANF)?

A: The purpose of the VANF is to provide high quality, best value pharmaceutical products while assuring the portability and standardization of the pharmacy benefit to eligible veterans accepted by VA for care.

3) Q: Why aren’t strengths listed on the VA National Formulary (VANF)?

A: The VANF is dosage form specific to allow flexibility at VISN/facility level.

4) Q: Why can’t I locate a brand name product on the VA National Formulary?

A: Items are listed by generic name and VA class. In some cases the brand name drug is included in parentheses for standardization or as an example for complicated generic name combinations.

5) Q: What is the VA Class?

A: It is a therapeutic classification system to help identify similar products.

6) Q: What does "R" mean by antibiotics?

A: This is defined in the heading of the VA National Formulary and states: “The national restriction for antibiotics is that all decisions regarding which agents to carry in these classes will be made at the local or VISN level. These decisions should be based on local culture and sensitivity patterns.”

7) Q: Where can I find VA clinical guidance (e.g., Criteria for Use, Drug Class Reviews, and Drug Monographs)?

A: Refer to the PBM Webpage at <https://vaww.cmopnational.va.gov/cmop/PBM/default.aspx> under “Clinical Guidance”.

8) Q: Can agents be added on the VISN/local level?

A: No. The VANF is the sole drug formulary used in VA. (Reference: VHA Handbook 1108.08, paragraph 17. a.)

9) Q: How do I know if a drug is on a National Contract or other special contract?

A: Refer to the PBM Webpage at <https://vaww.cmopnational.va.gov/cmop/PBM/default.aspx> under “Drug & Pharmaceutical Prices” or the Prime Vendor Webpage (<https://connect.mckesson.com>).

10) Q: Can agents listed on the VA National Formulary (VANF) be deleted on the VISN/facility level?

A: No. The VANF is a listing of products (drugs and supplies) that must be available for prescription at all VA facilities, and cannot be made non-formulary by a VISN or individual medical center. (Reference: VHA Handbook 1108.08, paragraph 3. q.)

11) Q: How do I know if an item is on the VA National Formulary (VANF)?

A: Items are listed by generic name or VA class on the PBM Webpage at <https://vaww.cmopnational.va.gov/cmop/PBM/default.aspx> under “National Formulary”.

12) Q: How is the VA National Formulary (VANF) updated?

A: The VANF is updated by the PBM after changes are made from Medical Advisory Panel/VISN Pharmacist Executives (MAP/VPE) meetings.

13) Q: Where can I obtain a current copy or changes previously made to the VA National Formulary?

A: Refer to the PBM Webpage at <https://vaww.cmopnational.va.gov/cmop/PBM/default.aspx> under “National Formulary”.

14) Q: How is an item added to the VA National Formulary (VANF)?

A: Requests for change in VANF status may be submitted to the PBM by a VISN Formulary Committee, the VFL Committee, the MAP, a VHA Chief Medical Consultant, or VHA Chief Medical Officer. **NOTE:** *An individual or group of physicians may submit a request for VANF addition through their VISN Formulary Committee(s).*

1. All requests for change in VANF status must contain:
 - a. Minutes of the VFL Committee or other acknowledged meeting in which action was taken on the product (if applicable).
 - b. Literature citations that support the recommendation.
2. All requests for addition to the VANF must contain:
 - a. Criteria for drug use that addresses indications, monitoring, and any efficacy or safety outcomes specific to the Veteran population;
 - b. Completion of VA Form 10-0450, VHA National Formulary Request for Formulary Review;
 - c. Completion of VA Form 10-0451, Conflict of Interest Disclosure Form, by the parties presenting the drug for formulary addition; and
 - d. The signature of the VISN Pharmacist Executive, VHA Chief Medical Consultant, or Chief Medical Officer.

(Reference: VHA Handbook 1108.08, paragraph 17. 1.)

15) Q: What is the non-formulary use procedure?

A: A non-formulary request process must exist at each VA facility. The process should assure that decisions are evidence-based and timely. Non-formulary products may be approved under the following circumstances:

1. Contraindication(s) to the formulary agent(s).
2. Adverse reaction to the formulary agent(s).
3. Therapeutic failure of formulary alternatives.
4. No formulary alternative exists.

5. The patient has previously responded to a non-formulary agent and risk is associated with a change to a formulary agent.

(Reference: VHA Handbook 1108.08, paragraph 17. q.)

16) Q: Can I use a non-formulary agent if I am involved in a clinical trial?

A: Yes. Drugs and supplies are not added to the VANF solely for the purpose of performing a clinical trial; however, the VANF is not intended to impede the use of any pharmaceutical agent in legitimate scientific studies. (Reference: VHA Handbook 1108.08, paragraph 17)

17) Q: How was the original National Formulary compiled?

A: By combining the VISN formularies for matches, and then field review for comment, and selection.

18) Q: When was the original VA National Formulary published?

A: May 1997.

19) Q: How will drug classes be reviewed?

A: The PBM will determine which drug therapeutic classes will be reviewed in preparation of awarding national contracts or as needed based on scientific evidence or safety concerns. Requests for drug or drug class reviews may be submitted to the PBM by a VISN Formulary Committee, the VPE Committee, the MAP, VHA Chief Medical Consultants, or VHA Chief Medical Officers. (Reference: VHA Handbook 1108.08, paragraph 17. k.)

20) Q: What is the function of the VISN formulary committee?

A: The VISN Formulary Committee's function is to provide clinical oversight and guidance for the formulary review process; coordinate VANF initiatives at the VISN and facility levels; and communicate VISN-specific submissions to the PBM and MAP for consideration as part of the VANF process. (Reference: VHA Handbook 1108.08, paragraphs 3. t. and 10)

21) Q: Can the VISN or facility level restrict National Formulary agents?

A: VISNs are not permitted to modify PBM-MAP Criteria for Use documents; however, restrictions to prescribing can be established for VANF items that require close monitoring to ensure appropriate use. For example, in the case of anti-infective, facility level restrictions intended to prevent resistance are permissible. Restrictions may include evidence-based guidelines or prescribing privileges for providers with specific expertise. Restrictions are not to be based solely on economics, nor are they to be so limiting as to prevent patients with legitimate medical needs from receiving these medications and supplies. (Reference: VHA Handbook 1108.08, paragraphs 17. b. and 17. aa.)

22) Q: Where can I look up drug prices?

A: Refer to the PBM Webpage at <https://vaww.cmopnational.va.gov/cmop/PBM/default.aspx> under "Drug & Pharmaceutical Prices" or the Prime Vendor Webpage (<https://connect.mckesson.com>).

APPENDIX XII: Web Sites Used by Past Residents

1. Drug information site provided by the VA:
http://vaww.reno.va.gov/pharmacy_service/Drug_Information.asp
This address links into the intranet drug information site that the VA has. This page will give you access to Facts and Comparisons, Up-to-date, Micromedex, GlobalRPH and a few more.
2. VISN 21 site: <http://vaww.visn21.portal.va.gov/pharmacy/default.aspx>
This address has links to important areas that you will need to get to during the residency. Here is a list of a few items on the site: National Formulary link, National PBM website, VISN 21 Drug Use Criteria, Treatment Algorithms, VISN 21 Shared Drive, VISN 21 PBM Clinical Performance Dashboard, VISN 21 PBM Workgroup Committee Minutes/Agendas, VISN 21 MUM Team Minutes/Agendas.
3. National PBM site: <https://vaww.cmopnational.va.gov/cmop/PBM/default.aspx>
This address has links to important national documents. Here is a list of a few documents: Criteria For Use, Drug Class Reviews, Drug Monographs, Patient and Provider Letters and much more. Future residents should become familiar with this site.
4. Fed Traveler: <https://www.fedtraveler.com/>
This site is used to confirm travel plans that are work related.
5. McKesson:
<https://connect.mckesson.com/portal/site/smo/template.LOGIN/?cid=SMODEcom2>
Use this to look up cost data and run reports. Ask Diana for the access code when needed. If unfamiliar with McKesson ask Diana Higgins for a tutorial.
6. VISN 21 Clinical Performance Dashboard:
<http://vaww.dwh.r01.portal.va.gov/VISN%2021/Pages/default.aspx>
The dashboard is used for HEDIS measures, VISN 21 measures and monitors and National LOCs. It is always being worked on for new ideas and is a wealth of information. Future residents should become very familiar with the dashboard.
7. PharmAcademic: <https://www.pharmacademic.com/>
The resident will be using this site for evaluations, which is required by ASHP
8. VA Talent Management System (aka TMS):
<https://www.tms.va.gov/plateau/user/login.jsp>
The resident will have to complete certain task on the LMS during the residency that are required by the VA.
9. Pharmacoeconomic Data Management:
<http://vaww.national.cmop.va.gov/pre/PharmacoEconomic/default.aspx>
This is a share point site used by the national PBM. It consists of national documents from national and different VISN on “Cost savings and Clinical Initiatives”.

10. VA Information Resource Center (VIREC): <http://vaww.virec.research.va.gov/>
Health Services Research & Development Service (HSR&D):
<http://www.hsrdr.research.va.gov/>
Both of these sites have lecture series on many different topics in research.
11. ASHP: <http://www.ashp.org/default.aspx>
This site will be used to register for Mid-Year.
12. National Center for Patient Safety: <http://www.patientsafety.gov/>
13. Xerox Printer Address: <http://10.172.78.223/>
14. National Acquisition Center (contracting/pricing information): <http://www1.va.gov/nac/>
15. CDW Metadata: <http://vaww.cdw.va.gov/metadata/default.aspx>
16. Citrix (for remote desktop access): <https://varwest.vpn.va.gov/vpn/index.html>
17. VISN 21 research SharePoint: <http://vaww.visn21.portal.va.gov/sierranevada/research>
18. Benefit info: www.benefeds.com
19. Update contact information in Outlook: \\vhasfcapps\apps\galmod\galmod32.exe

APPENDIX XIII: Preceptor Manual

VASNHCS Preceptor
Manual.pdf

APPENDIX XIV: Scope of Practice

What is a Scope of Practice or Collaborative Practice Agreement?

Clinical pharmacy specialists may have a range of practice privileges that vary with their level of authority and responsibility. The specific practice should be defined within a scope of practice document or protocol developed by the health care institution. This protocol should define the activities that pharmacists will provide within the context of collaborative practice as a member of the interdisciplinary team, as well as any limitations that may be needed. Quality of care review procedures and processes to assure professional competency should also be included in the scope of practice.

At VASNHCS, all clinical staff (excluding physicians) that prescribes treatment in the medical record (dietitians, nurses, pharmacists, podiatrists, physician assistants, social workers, physical therapists, audiologists, speech/language pathologists and respiratory therapists) will function under a scope of practice approved by the Chief of Staff. Pharmacy Service has a peer review committee to assure high quality care is provided and that clinical pharmacy specialists are qualified to perform under their scope of practice.

In order to be granted prescriptive authority, clinical pharmacy specialists must possess:

1. A current state license, and
2. A PharmD or M.S. degree (or equivalent). Example equivalent qualifications include (but not limited to):
 - a. Completion of an American Society of Hospital Pharmacists accredited residency program,
 - b. Specialty board certification, or
 - c. Two years of clinical experience.

VASNHCS Pharmacy Service has clinical pharmacists practicing in a wide variety of clinical settings and has various protocols in place to cover these activities.

What is a pharmacist/resident WITHOUT a Scope of Practice ALLOWED to do?

Upon receiving a pharmacist's license, a resident can perform any function typically performed by a pharmacist such as processing prescriptions written by providers, pulling refills, discontinuing medications, limited partial prescriptions, providing patient education, and documenting patient allergies. All activities must be accomplished within the guidelines, policies and procedures set forth by the hospital and Pharmacy and Therapeutics Committee. Residents will document their activities in the patient medical record with a progress note that will need to be cosigned by the preceptor.

What is a pharmacist/resident WITHOUT a Scope of Practice PROHIBITED from doing?

A Scope of Practice is required for writing (most prescriptions at the VA are electronically entered not written) or renewing prescriptions and ordering labs. A pharmacy resident may perform these functions under the supervision of their rotation preceptor but must be cosigned. Progress notes that document these activities must be electronically cosigned by the supervising pharmacist on a timely basis. This may be accomplished by the addition of a cosigner or additional signer to the note.

Note: prescriptions for antineoplastic agents and controlled substances (i.e. narcotics, benzodiazepines) are excluded and shall not be written by pharmacists.

APPENDIX XV: Checklist of Requirements to Receive a Residency Certificate

Requirements of Certificate - VASNHCS PGY2 Population Health Management and Data Analytics

Upon successful completion of all the requirements of the PGY2 pharmacy residency program, the resident will be awarded a certificate indicating successful completion of the program. In order to receive the certificate, the resident must complete the checklist below. It is the responsibility of the resident to ensure all activities are completed by obtaining a preceptor or RPD signature/initial for each completed activity.

Requirements of Certificate Checklist

Activity	Preceptor/ RPD Initial	Date																																																			
GENERAL REQUIREMENTS																																																					
Completion of a minimum of 2080 hours of training																																																					
<p>Satisfactory completion of all rotations. If a rotation is not satisfactorily completed, appropriate remedial work and an action plan must be completed as determined by the preceptor(s) and Residency Program Director. All critical objectives must be marked "Achieved for Residency". No goals may be marked as "Needs Improvement" by the end of the residency year</p> <table border="1"> <thead> <tr> <th colspan="3"><u>Critical Objectives</u></th></tr> </thead> <tbody> <tr> <td>• OBJ R1.1.1</td><td>• OBJ R2.3.1</td><td>• OBJ R4.2.2</td></tr> <tr> <td>• OBJ R1.1.2</td><td>• OBJ R2.3.2</td><td>• OBJ R4.3.1</td></tr> <tr> <td>• OBJ R1.2.1</td><td>• OBJ R2.3.3</td><td>• OBJ R4.3.2</td></tr> <tr> <td>• OBJ R1.2.2</td><td>• OBJ R2.4.1</td><td>• OBJ R5.1.1</td></tr> <tr> <td>• OBJ R1.2.3</td><td>• OBJ R2.4.2</td><td>• OBJ R5.1.2</td></tr> <tr> <td>• OBJ R1.2.4</td><td>• OBJ R2.4.3</td><td>• OBJ R5.1.3</td></tr> <tr> <td>• OBJ R1.2.5</td><td>• OBJ R2.4.4</td><td>• OBJ R5.1.4</td></tr> <tr> <td>• OBJ R1.3.1</td><td>• OBJ R3.1.1</td><td>• OBJ R5.2.1</td></tr> <tr> <td>• OBJ R1.3.2</td><td>• OBJ R3.1.2</td><td>• OBJ R5.2.2</td></tr> <tr> <td>• OBJ R1.4.1</td><td>• OBJ R3.1.3</td><td>• OBJ E1.1.1</td></tr> <tr> <td>• OBJ R2.1.1</td><td>• OBJ R3.1.4</td><td>• OBJ E1.1.2</td></tr> <tr> <td>• OBJ R2.1.2</td><td>• OBJ R3.1.5</td><td>• OBJ E1.1.3</td></tr> <tr> <td>• OBJ R2.1.3</td><td>• OBJ R3.1.6</td><td>• OBJ E1.2.1</td></tr> <tr> <td>• OBJ R2.2.1</td><td>• OBJ R4.1.1</td><td>• OBJ E1.2.2</td></tr> <tr> <td>• OBJ R2.2.2</td><td>• OBJ R4.1.2</td><td>• OBJ E1.2.3</td></tr> <tr> <td>• OBJ R2.2.3</td><td>• OBJ R4.2.1</td><td>• OBJ E1.2.4</td></tr> </tbody> </table>	<u>Critical Objectives</u>			• OBJ R1.1.1	• OBJ R2.3.1	• OBJ R4.2.2	• OBJ R1.1.2	• OBJ R2.3.2	• OBJ R4.3.1	• OBJ R1.2.1	• OBJ R2.3.3	• OBJ R4.3.2	• OBJ R1.2.2	• OBJ R2.4.1	• OBJ R5.1.1	• OBJ R1.2.3	• OBJ R2.4.2	• OBJ R5.1.2	• OBJ R1.2.4	• OBJ R2.4.3	• OBJ R5.1.3	• OBJ R1.2.5	• OBJ R2.4.4	• OBJ R5.1.4	• OBJ R1.3.1	• OBJ R3.1.1	• OBJ R5.2.1	• OBJ R1.3.2	• OBJ R3.1.2	• OBJ R5.2.2	• OBJ R1.4.1	• OBJ R3.1.3	• OBJ E1.1.1	• OBJ R2.1.1	• OBJ R3.1.4	• OBJ E1.1.2	• OBJ R2.1.2	• OBJ R3.1.5	• OBJ E1.1.3	• OBJ R2.1.3	• OBJ R3.1.6	• OBJ E1.2.1	• OBJ R2.2.1	• OBJ R4.1.1	• OBJ E1.2.2	• OBJ R2.2.2	• OBJ R4.1.2	• OBJ E1.2.3	• OBJ R2.2.3	• OBJ R4.2.1	• OBJ E1.2.4

Complete academic detailing training with the VISN academic detailing lead		
Participate in at least 2 academic detailing provider visits Dates of visits and detailer preceptor _____		

APPENDIX XVI: Transferring NT Login Procedure

Responsibility of Reno IT Department

<http://vaww.r01.portal.va.gov/systems/disd/Knowledge%20Base/Transferring%20User%20Accounts.aspx>

INTRA-VISN (Same Domain)

1. Losing or Gaining Site OI&T (Tier 2 IT support) needs to submit a Request to the ROC (1-877-746-3895) to move account from Site XXX (Provide Losing site, IE: User is moving from Las Vegas (LAS)) to gaining Site xxx(San Diego, SDC). Tier 2 IT support should note what security or distribution groups from losing site are no longer needed for the user account in question. This needs to be communicated to the ROC, so that it gets noted on the CA Request for R01 Domain Infrastructure Team to perform (Tier 2 of gaining site has reported problems with deleting these groups assigned from losing site). NOTE: Do not create a new domain account or new email account (User's can logon to their old account as long as it hasn't been disabled at the new site)
2. Ask the ROC to assign it to the Region 1 Domain Infrastructure Division
3. Region 1 Domain Infrastructure Division will move the account from the Losing Site's OU to the Gaining Site's OU and close out the request.
4. The Gaining site will need to rename the account (IE. VHALASxxxx to VHASDCxxxx) after the Request is closed and move the Exchange account to the proper Exchange Server and Storage groups for your site.
5. In the case where a new Domain account and Exchange account are created at the new site.

Follow the above steps 1 -3 to get the account moved to your Site.

Export the user's mail from the New account to a PST file. Delete New domain & exchange account, only after your Request is closed.

Follow step 4 above and reset password if necessary.

Have the user login and import the exported pst file.

This will allow the user to continue use of his/her existing PIV cards.

INTER-VISN (Outside your VISN/Different Domain)

1. Losing Site to contact the Gaining site to create a New domain account only.
2. Losing Site to contact National Helpdesk (1-888-596-4357) to request that the mailbox be moved to the New Domain account.
3. National Helpdesk will move mailbox and close ticket.
4. However, in cases where the user shows up at the Gaining site and a New domain account and email box are created.
 - a. Gaining site contacts National Helpdesk to request mail be merged from old account to New Account (you will need to provide National with the User's old domain account and email address).
 - b. National Helpdesk normally has a 3-5 day turnaround time for the mail to be moved/merged.
