

## **Department of Veterans Affairs (VA) Executive Order 13520 – Reducing Improper Payments FY 2012 Third Quarter High-Dollar Overpayments Report**

The President signed Executive Order 13520, "Reducing Improper Payments" on November 20, 2009. On March 22, 2010, the Office of Management and Budget (OMB) issued Governmentwide guidance on the implementation of the Executive Order. The guidance is under Part III, Appendix C of OMB Circular A-123. This guidance requires agencies with programs susceptible to significant improper payments to submit to the agency's Inspector General and the Council of Inspectors General on Integrity and Efficiency, and make available to the public, a quarterly report on any high-dollar overpayments identified by the agency.

In its 2011 Performance and Accountability Report, VA reported five programs under the Veterans Benefits Administration (VBA) and four programs under the Veterans Health Administration (VHA) that meet the Improper Payments Elimination and Recovery Act of 2010 (IPERA) thresholds for susceptibility to significant improper payments. These programs are Compensation, Pension, Education, Insurance, Vocational Rehabilitation and Employment (VR&E), Non-VA Care Fee, Other Contractual Services, State Home Per Diem Grants, and Supplies and Materials.

In accordance with OMB Circular A-123, Appendix C, Part III, VBA and VHA reviewed the nine programs susceptible to significant improper payments. The OMB guidelines define a high-dollar improper payment as any payment in excess of 50 percent of the correct amount of the intended payment under the following circumstances:

1. Where the total payment to an individual exceeds \$5,000 as a single payment or in cumulative payments for the quarter; or
2. Where a payment to an entity exceeds \$25,000 as a single payment or in cumulative payments for the quarter.

The OMB guidelines require that agencies submit, on a quarterly basis, a report to:

1. List all high-dollar overpayments identified by the agency during the quarter;
2. Describe whether each high-dollar overpayment was made to an entity or individual, and the city/county and state where that entity or individual was located;
3. List the program responsible for each high-dollar overpayment error;
4. Describe any actions the agency has taken or plans to take to recover high-dollar overpayments; and
5. Describe any actions the agency will take to prevent overpayments from occurring in the future.

The report is divided into nine parts for each program area, and the high-dollar overpayments are identified from the highest to lowest overpayments within each program area. In addition to OMB's guidelines, our report includes two additional categories: the cause of overpayment and the status of overpayment. The status of an overpayment will be "collection in progress," or "collection in full." Collection in Progress is defined as actions taken by VA to recover from future benefit awards or payments, referral to the Treasury Offset Program, or request to return money that was paid after the death of a beneficiary through reclamation procedures. Veterans also have dispute and waiver request rights during the collection processes.

Beginning the second quarter of 2012, Compensation and Pension high-dollar overpayments reporting are no longer combined due to reorganization within VBA. These programs were divided into two distinct services to allow for greater infrastructure and oversight of each program area.

### **1. Compensation Program**

VBA uses analytical procedures to improve the statistical validity of the high dollar overpayment review. This procedure requires a review of a stratified random sample of the total number of overpayments. There were 4,072 compensation overpayments identified in the third quarter of FY 2012. A random sample of 385 overpayments was reviewed. The review revealed that 83 (22 percent) were compensation high dollar overpayments, and 302 (78 percent) were compensation payments that did not meet the high dollar

overpayment criteria. Based on these results, we projected that 896 of 4,072 overpayments originally identified were high dollar compensation overpayments, and an estimated 3,176 were payments that did not meet the high dollar overpayment criteria. These results are based on estimates at a 95 percent confidence level with a  $\pm 5$  percent interval.

Compensation Service identified 83 high-dollar compensation overpayments.

Thirty-one overpayments (37 percent) were created due to the death of the beneficiary. Entitlement to benefits ceases effective the first day of the month in which death occurs. These overpayments are caused when a beneficiary dies too late in a month to stop the release of the payment for the month of death, or when VA is not timely notified of the death of a beneficiary. While VA has a death match program with the Social Security Administration (SSA), the match is received monthly from SSA, and usually after a benefit payment has been released. The number of overpayments following death has been reduced as a result of VA's VETSNET "real time" processing technology.

Twenty-two overpayments (27 percent) were caused when Veterans returned to Active Duty status. The Department of Defense runs a quarterly match of the active duty and VA disability files to identify persons who are receiving active duty pay and VA disability benefits concurrently. Once notified of active duty status, VA must provide due process notice to the beneficiary before any adjustment may occur.

Six overpayments (7 percent) were caused by retroactive adjustments due to incarceration or fugitive felon status. Notification of incarceration is a function of agreements made with states, the Bureau of Prisons, and other law enforcement agencies. Once notified of a beneficiary's incarceration, VA must provide due process notice to the beneficiary before any adjustment may occur. Law enforcement agencies notify VA when a beneficiary has been identified as a fugitive felon. Once notified, VA must provide due process notice to the beneficiary before any adjustment may occur.

Fourteen overpayments (17 percent) were caused by changes in dependency. VA beneficiaries may receive additional monetary allowance for eligible dependents. In some cases, VA is not notified timely when there is a change in dependency status due to circumstances such as divorces or a school-aged child who is no longer attending school. If we receive first-party information from the beneficiary indicating the change in dependency status, VA will adjust the award to reflect the change. When this type of information is received from a third-party source, VA must provide due process notice to the beneficiary before any adjustment may occur.

Nine overpayments (11 percent) were due to a variety of reasons to include military retired pay adjustments or a change in countable income for beneficiaries.

One overpayment (1 percent) was identified, but there was insufficient information available electronically to determine the period covered by the overpayment and/or the propriety or cause of the overpayment.

Some VA overpayments are inherent based on the requirements of 38 CFR § 3.103, Procedural Due Process and Appellate Rights, which does not allow VA to take adverse action regarding the payment of benefits without providing the beneficiary 60 days advance notice, unless the beneficiary requests that VA take the adverse action immediately. This "due process" period extends an overpayment period by 2 months. An exception to this requirement is when VA is notified of a beneficiary's death.

Total Compensation Payments made this quarter: \$13,708,113,806.00

Projected High-Dollar Overpayments for this quarter: \$131,638,998.00

Percentage of High-Dollar Overpayments to Compensation payments: 0.96

Note:

- Overpayments are routinely recovered from future benefits awarded. If not recovered, further actions are then taken by the VA Debt Management Center, including referral to the Treasury Offset Program, as appropriate.
- VBA established a workgroup in March 2012 that will review the Compensation program, and identify best practices for reducing high-dollar overpayments.
- VBA manages timeliness of completing action on issues involving potential overpayments, by using special controls such as the workload End Product 690.
- Field personnel monitor exception reports and take corrective action when system-generated messages indicate there are potential overpayments. Claims processors are directed to initiate action within 30 days of receiving these notices.
- VBA requires field personnel take immediate action to resolve claims involving due process, once their associated controls mature. This reduces the amount of potential overpayments created through delayed processing.

## 2. Pension Program

VBA uses analytical procedures to improve the statistical validity of the high dollar overpayment review. This procedure requires a review of a stratified random sample of the total number of overpayments. There were 6,781 overpayments identified in the third quarter of FY 2012. A random sample of 385 overpayments was reviewed. The review revealed that 127 (33 percent) were pension high dollar overpayments, and 258 (67 percent) were pension payments that did not meet the high dollar overpayment criteria. Based on these results, we projected that 2,238 overpayments originally identified were high dollar pension overpayments, and an estimated 4,543 were payments that did not meet the high dollar overpayment criteria. These results are based on estimates at a 95 percent confidence level with a  $\pm 5$  percent interval.

Following is a breakdown of the 127 high-dollar pension overpayments.

Ninety-seven (76 percent) were due to a change in countable income or a change in unreimbursed medical expenses. Increases in countable income may result in high dollar overpayments when there are not enough medical expenses to reduce the countable income, or if the income itself has increased.

- Beneficiaries that receive pension before the end of the month of August, and who are not exempt from reporting their income, receive an Eligibility Verification Report (EVR) form in January of the following year. Beneficiaries use these forms to report income for the prior calendar year, and have 60 days to return them. If the returned information is insufficient, VBA makes an additional request and provides the beneficiary an additional 60 days to submit the requested evidence. If a beneficiary fails to respond after the additional 60 days, VBA suspends the beneficiary's award and takes steps to terminate the award, retroactively to January 1 of the current EVR period.
- VBA receives information from several Federal agencies and compares it to information already of record to determine eligibility for continuation of benefits. Two agencies that provide data to VBA through matching programs are the Internal Revenue Service (IRS) and the Social Security Administration (SSA). A pension recipient's benefits may be reduced or terminated based on underreported countable income identified through these matching agreements.
- The EVR process and the data matching agreements with other Federal agencies ensure that VBA appropriately processes the necessary adjustments in countable income upon notification regarding a change in countable income or unreimbursed medical expenses.

Seventeen (13 percent) were due to the death of the beneficiary. Entitlement to benefits ceases effective the first day of the month in which death occurs. These overpayments occur when a beneficiary dies too late in the month to stop the release of the payment for the month of death, or when VBA is not timely notified of the death of the beneficiary. While VBA has a death match program with SSA, it is a monthly match regarding prior benefit payments.

Eleven (9 percent) were due to retroactive adjustments due to incarceration or fugitive felon status. Notification of incarceration is a function of agreements made with state and local law enforcement agencies. VA must provide due process before reducing an award when notified by law enforcement agencies of the beneficiary's incarceration or fugitive felon status.

One (1 percent) was due to dependency changes. VA beneficiaries may receive additional monetary allowances for eligible dependents. In some cases, VA is not notified timely of a change in the dependency status due to the death of or divorce from a dependent spouse, or a school-age child who is no longer attending school. First-party information received from a beneficiary indicating a change in dependency status will result in a change to their award. VA must provide due process when notified by a third-party before adjusting the beneficiary's benefits.

One (1 percent) was identified but insufficient information was available electronically to determine the overpayment and/or the propriety or cause of the overpayment.

Total Pension Payments made this quarter: \$1,257,375,033.51  
Projected High-Dollar Overpayments for this quarter: \$28,068,502.81  
Percentage of High-Dollar Overpayments: 2.23

Note:

- VBA workgroup – March 2012. The workgroup was implemented to formulate and implement strategy to reduce the amount of High Dollar Overpayments.
- Continue to provide reminders to the field offices of the provisions of Fast Letter (FL) 08-05, *Controls to Minimize Compensation Benefit Overpayments*, which requires the field to establish an End Product (EP) 690 in addition to the control EP. The purpose of EP 690 is to help monitor timeliness in completing action on pending issues with potential overpayments. That same EP is used in potential pension overpayment cases.
- Continue to provide reminders to the field offices of the current procedures for monitoring notice of exception reports per FL 08-09, *Prioritization and Processing of System-Generated Messages (Writeouts)*. The FL provides guidance for prioritization and processing of system-generated messages (write-outs) to reduce or eliminate overpayment or underpayment of VA benefits.
- Develop specific guidance on pension benefit adjustments.
- Provide guidance under M21-1MR, Part I, Chapter 2.B.7.a, which requires field personnel to resolve claims involving due process when the associated controls mature.
- Continue to provide feedback to field employees, through PMC conference calls.
- Share the findings from this review with the field, so they can implement local reviews and address local high-dollar overpayment issues.
- Include matching program training in the mandatory topics for the FY 2012 National Pension Training Curriculum.

### 3. Education Program

There were 18,985 Education overpayments initially identified in third Quarter of FY 2012. A random sample of 269 Education overpayments was reviewed. The review revealed a total of 21 overpayments due to either VA error (8 or 3 percent) or school error (13 or 4.8 percent) for an error rate of 7.8 percent. This compares to a 7.5 percent overpayment rate due to VA error and a 3.6 percent overpayment rate due to school error in the second quarter of FY 2012. The remaining 248 overpayments in the sample were proper at the time of payment but later changed due to students changing enrollment status. These 248 overpayments accounted for 92.2 percent of all overpayments in the third quarter of FY 2012. Of the initial 18,985 Education overpayments identified, 50.2 percent were to entities and 49.8 percent were to individuals. Based on the review of the sample, it is estimated that there were a total of 1,461 overpayments (550 due to VA error and 911 due to school error). It is estimated that the remaining 17,524 were correct on the date of payment but later changed based on students changing enrollment status.

The errors identified in the sample accounted for 7.6 percent of the total value of overpayments in the sample. The total value of all overpayments was \$66,917,110.44. Based on the findings of the review, the estimated total value of overpayments due to VA error is \$1,940,596.20 and the estimated total value of overpayments due to school error was \$3,212,021.30. The remaining amount of \$61,764,492.94 is estimated to come from payments that were correct at the time of payment.

Total Education payments made this quarter: \$2,130,335,163.64  
 Projected High-Dollar Overpayments for this quarter: \$66,917,110.44  
 Percent of Projected High-Dollar Overpayments: 3.14

**Note:**

To reduce the number of payments later adjusted due to students changing enrollment status, VA provides cautionary information in print publications and electronic media, and also includes this information in letters to students each time they are awarded benefits.

The main causes of VA error were issuing duplicate payments and data input errors. In the second quarter of FY 2012 the most common VA errors were the same. Common errors identified are a result of human error. To decrease the potential for human error, VA continues to take a two step approach; one, focus on training employees; and two, field improvements in electronic processing systems to aid in decreasing human errors. Each Regional Processing Office and the Central Office have established training that employees are required to attend. Supervisory officials also monitor individual employee performance and provide additional training as necessary. Fielding improvements in electronic processing systems continues to be a challenge for VA due to recent and possible future statutory changes in the Post-9/11 GI Bill. The recent changes required VA to redirect its Information Technology resources away from enhancing current systems to developing changes to current systems to reflect the recent Post-9/11 GI Bill changes. Barring further statutory changes, VA expects to implement additional enhancements in FY 2012, which are intended to decrease human errors.

The main cause of school error remains incorrect reporting of tuition and fees. VA published a Nationwide School Certifying Official Handbook, which establishes common requirements and detailed instructions for School Certifying Officials to prepare and submit enrollment and attendance information to VA. In addition, recent statutory changes authorized State Approving Agencies to conduct school Compliance Surveys. This will increase VA presence on campuses and enable additional assessment of school official compliance and increase VA opportunities to provide focused training for school officials.

#### 4. Vocational Rehabilitation and Employment (VR&E)

For the third quarter of FY 2012, there were 65 records for VR&E Service that met the high dollar overpayment criteria.

Eleven overpayments (17 percent) were created due to school error. This is mainly caused when a school provides a school certification with information that is incorrect or not updated in regards to the number of credits a Veteran is enrolled for in a particular semester. This causes the subsistence allowance to be processed at a certain amount and then has to be adjusted based on the Veteran's actual number of credits they are pursuing. An overpayment is created because the Veteran is only entitled to receive subsistence allowance based on number of credits being pursued. This also occurs when a Veteran drops a class during add/drop period but the school does not provide the certification until after add/drop period closes.

Three overpayments (5 percent) were caused due to VA error. A Vocational Rehabilitation Counselor (VRC) is in charge of processing an award based on credits being pursued and number of dependents for a particular Veteran. These instances were mainly due to the following:

- Veteran's subsistence allowance award was stopped to change number of dependents. However, full file pass (FFP) ended and the award was not re-processed in enough time to collect back the overpayment. FFP is the last day of the month to process a payment in order for the Veteran to receive payment (or reduction in pay) by the 1<sup>st</sup> of the following month.
- VRC was notified of a change in Veteran's training facility but award was not stopped in time.
- Subsistence allowance award was processed at a higher rate of pursuit and did not match certification from the school.

Forty-four overpayments (67 percent) were actually payments that were properly made at the time they were disbursed. However, most of these overpayments occurred when the Veteran failed to timely inform their VRC of any changes in enrollment. Therefore, by the time change was known and proper documentation was obtained from the school, an overpayment was created.

Seven overpayments (11 percent) were due to other causes. These were mainly due to medical issues. Based on information gathered from the field, Veterans had medical issues that prevented them from continuing with their training and notifying their counselors in a timely manner. Mitigating circumstances were granted in most instances but by the time the award was stopped, an overpayment was still created.

Total VR&E payments made this quarter: \$192,505,150.46

Total of high-dollar overpayments identified in this quarter: \$182,751.03

Percent of random sample overpayments: 0.09

\$664.71	Individual	Crawfordville	FL	Other: Medical	due process for 60 days, just created on 7/28/12	Collection in Progress	Remind veteran to contact us as soon as she drops to avoid overpayment

Note:

Overall, the number of high-dollar overpayments decreased from 102 in the second quarter to 65 in the third quarter. During the second Quarter review; there were a total of 22 overpayments due to school error. This has now decreased to 11 for this past quarter. This is due in part to the field having constant communication with certifying officials at the schools and reminding them of the importance of receiving certifications in a timely manner. Promoting a rapport with the certifying officials at the school has decreased the errors over time.

There has also been a decrease of the number of overpayments that were properly made at the time it was disbursed, going from 56 in the second quarter to 44 in the third quarter. This is an area that we continue to work in order to continue to reduce the number of overpayments. To support the reduction of the number of payments later adjusted due to students changing enrollment status, VR&E provides cautionary information in print publications and also includes this information in letters to students each time they are awarded benefits. VR&E also assigns a case manager to each Veteran in the program. The managers are reminded to communicate up-to-date information to Veterans on the benefits they receive, how they receive them, and the importance of informing VA of changes relative to training and dependent status, which could affect their subsistence allowance.

It is the responsibility of each VR&E Officer and other management staffs to ensure their case managers are provided appropriate training to address overpayment issues with Veterans. They must also conduct on-the-spot training based on quality reviews completed by the Quality Assurance team on a monthly basis. Quality assurance of cases helps to reduce human error by providing the right guidance and follow-up to ensure these errors are reduced. provide an update to the field during future VR&E Hotline Bulletin meetings continuing to communicate with the Veterans and provide constant reminders about the importance of communicating any changes in a timely manner.

**5. Insurance  
None.**

**6. Non-VA Care Fee Program**

VHA identified 33 Non-VA Care Fee high-dollar overpayments totaling \$1,398,916 through the expanded efforts of the VHA Chief Business Office (CBO), the Veterans Integrated Service Networks (VISNs), and the Financial Services Center (FSC). High-dollar overpayments consisted of both single and cumulative payments. Of the overpayments, 16 overpayments totaling \$710,001 were caused by incorrect application of payment methodology. Six overpayments totaling \$190,987 were caused by duplicate payments. Six overpayments totaling \$224,083 were caused by data entry errors. Two overpayments totaling \$111,464 were caused by vendor billing errors. Two overpayments totaling \$93,020 were caused by failure to verify other health insurance (OHI) information and one for \$69,360 was paid to the wrong vendor.

The CBO Purchased Care Program Office worked closely with each VISN to identify high-dollar overpayments during the third quarter of 2012. VISN overpayments were consolidated nationally to ensure the appropriate capture of all high-dollar overpayments. Facilities used numerous techniques to identify overpayments. Those techniques included but are not limited to reviewing internal reports and bills of collections and conducting self audits and reviews. CBO internal reports included (1) monthly outlier reports, (2) monthly inpatient outlier reports, and (3) post payment duplicate reports. The FSC identified high-dollar overpayments during its payment reviews. Management Quality and Assurance Services (MQAS) and the VA Office of Inspector General (OIG), who identified high-dollar overpayments in prior quarters, reported no high-dollar overpayments this quarter.
