0201 Overview

This chapter establishes the Department of Veterans Affairs (VA) financial policies and procedures relating to the accounting and reporting of funds related to Major Construction Working Reserves.

Major construction projects are defined in Title 38, U.S.C. § 8104(a) (3) (A) and P.L.115-182, VA Mission Act of 2018, Title V, § 503 as construction projects that have a total value in excess of $20 million. Examples of such projects include medical and benefits facility construction and renovations; national cemetery and gravesite expansion; land acquisitions for additional national cemeteries and medical facilities; and support for other construction-related activities. The funds for specific major construction projects or programs are appropriated annually by Congress.

Because major construction projects can span several years, VA is authorized to carry forward fund balances from year-to-year in its construction accounts. Excess project or program funds are transferred to the Major Construction Working Reserve.

VA has the authority to reprogram amounts transferred to Working Reserve. Reprogramming in excess of $7M cumulatively by project or $7M per instance per program per fiscal year requires Congressional approval.

**0203 Definitions**

**Bid Savings** - Bid Savings are funds in excess of the estimated needs of a major construction project as calculated at the time of the last award on a major construction project.

**Major Construction Projects** - Construction, alteration, extension or improvement of any VA facility, including planning, architectural and engineering services, construction
management services, maintenance or guarantee period services costs associated with equipment guarantees provided under the project, services of claims analysts, offsite utility and storm drainage system construction costs and site acquisition, where the estimated cost of the project is greater than $20,000,000 or where funds for a project were made available in a previous appropriation.

**Major Construction Working Reserve** - Established by VA to capture available major construction funds, allowing for the redirection of those funds to other construction projects, upon approval.

**Project Reserve** - Funds remaining after the last construction contract award that are held for the project until a decision is made that the remaining funds are no longer required for the project.

**Reprogramming** - Shifting funds within an appropriation or fund to use them for purposes other than those contemplated at the time of appropriation.

**Programmed Amount:**
1) Total amount of funding for a VHA major project that has been authorized by law and has been approved by Congress in the budget process in conjunction with an appropriations act plus the amount of funding that has been reprogrammed to the project by a reprogramming action that complies with Congressional notification and/or approval requirements.
2) Total amount of funding for any NCA, VBA or Staff Office major project that has been approved by Congress in the budget process in conjunction with an appropriations act plus the amount of funding that has been reprogrammed to the project by a reprogramming action that complies with Congressional notification and/or approval requirements.

**0204 Roles and Responsibilities**

**VA Secretary** is responsible for approving and requesting Congressional approval of all reprogramming in excess of $7 million.

**The Assistant Secretary for Management/Chief Financial Officer (VA CFO)** will approve the reprogramming of Major Construction Working Reserve funds with a cumulative value over $500,000 but less than or equal to $7M.

**Under Secretaries, Assistant Secretaries, Chief Financial Officers, Fiscal Officers, Chief Accountants, and other key officials** are responsible for ensuring compliance with the policies and procedures in this chapter.

**The Office of Construction and Facilities Management (CFM)** Oversees major construction activities and funding for construction projects and programs, including Major Construction Working Reserve which can be used to finance, the construction,
alteration, extension, and improvement of VA facilities or any of the purposes in various sections of Title 38 of the United States Code.

0205 Policies

020501 Bid Savings

After all costs associated with a project have been taken into account (e.g., design and construction, construction period services, construction management services, testing labs, contingencies, impact funds) and the award for the last phase is made on a major construction project, bid savings will be calculated. Bid Savings will be held and tracked as a project reserve line item on a project. The VA Secretary will notify Congress within 14 days when a major project realizes bid savings in excess of $5M or 5% of the programmed amount of the project.

020502 Bid Savings Moved to Project Reserve

A. VA will maintain the project reserve line item on a major construction project until such time as it appears that additional funding will not be necessary to complete the project. After this determination has been made, project reserve funds will be transferred to the Major Construction Working Reserve. CFM will notify the Office of Asset Enterprise Management (OAEM) of the intent to transfer funds via email before the transfer occurs.

B. The Executive Director, CFM, is responsible for tracking and managing major construction project and program account balances to ensure that any excess funds are transferred to the Working Reserve.

C. Annually, as part of the financial reporting year-end accounting certification, the Executive Director, CFM, will certify that all unobligated and unliquidated funds on substantially completed projects or projects accepted for use are not excess and are necessary for project completion.

020503 Reprogramming of Bid Savings

A. Reprogramming of bid savings less than or equal to $5M from a major construction project may be done without Congressional approval.
   • The Executive Director, CFM, will approve the reprogramming of bid savings with a cumulative value less than or equal to $500,000.
   • The Assistant Secretary for Management/CFO will approve the reprogramming of bid savings with a cumulative value over $500,000 but less than or equal to $5M.
B. Reprograming of bid savings in excess of $5M or 5% of the programmed amount for the project requires notification and approval of the VA Secretary and both authorizing and appropriating Committees of Congress at least 14 days before obligation of the reprogrammed bid savings. The notification sent to Congress should include at a minimum:
   • The major construction project that is the source of the bid savings;
   • If the major construction project that is the source of the bid savings is not complete:
     1. The amount already obligated by the Department or available in the project reserve for such project;
     2. The percentage of such project that has been completed; and
     3. The amount available to the Department to complete such project.
   • The major construction project for which the bid savings amounts are being obligated and the amounts being obligated.

020504 Reprogramming of Major Construction Projects or Programs

A. The Executive Director, CFM is responsible for overseeing the preparation of reprogramming packages for submission to the Major Construction Working Reserve Board (WRB).

B. The WRB members will review and recommend reprogramming requests to add funds to a project or program and provide their concurrence with the request. Recommendations of the Board will be forwarded to the Executive Director, CFM for approval.

WRB Membership:
   • Associate Executive Director, CFM Office of Resource Management (Chairperson);
   • Representative from the Office of the Deputy Under Secretary for Health for Operations and Management;
   • Representative from the Office of Asset Enterprise Management;
   • Representative from the National Cemetery Administration (NCA);
   • Representative from the Veterans Benefits Administration (VBA);
   • Representative from the Office of CFM (respective Director of the Regional Office from which the project is being overseen); and
   • The CFO (or representative) of each Administration.

C. VA can reprogram funds from the Major Construction Working Reserve to defray the costs of completing major construction projects.
D. VA will only reprogram funds from the Major Construction Working Reserve to defray construction costs that were within the Congressionally approved scope of the project or program.

E. VA will reprogram 5-year funds to the maximum extent practicable, prior to using no-year funds. (See Appendix A. Fund Availability).

F. Reprogramming less than or equal to $7M cumulatively for a major construction project may be done without Congressional approval.
   • The Executive Director, CFM, will approve the reprogramming of Major Construction Working Reserve with a cumulative value less than or equal to $500,000.
   • The Assistant Secretary for Management/CFO will approve the reprogramming of Major Construction Working Reserve with a cumulative value over $500,000 but less than or equal to $7M.

G. Reprogramming less than or equal to $7M for each instance for a major construction program may be done without Congressional approval.
   • The Executive Director, CFM, will approve the reprogramming of Major Construction Working Reserve with a value less than or equal to $500,000.
   • The Assistant Secretary for Management/CFO will approve the reprogramming of Major Construction Working Reserve with a value over $500,000 but less than or equal to $7M.

H. Reprograming in excess of $7M cumulatively of the original project or program requires notification and approval of the VA Secretary and both authorizing and appropriating Committees of Congress. The notification sent to Congress should include at a minimum:
   • The major construction project or program for which the amounts are being obligated; and
   • The amount being reprogrammed.

I. Reprograming for a change in scope of the original project or program requires notification and approval of the VA Secretary and both authorizing and appropriating Committees of Congress regardless of dollar amount. The notification sent to Congress should include at a minimum:
   • The major construction project for which the Secretary intends to expand the purpose;
   • A description of the expansion;
   • The reason for expansion;
   • The amount the Secretary intends to obligate to expand the purpose; and
   • The major project that would be the source of the bid savings, if applicable.

J. CFM will provide a quarterly report of activities for the Major Construction Working Reserves.
K. The Executive Director, CFM and the Assistant Secretary for Management/CFO will ensure that all available funds from major construction projects are properly reprogrammed and accounted for within the Major Construction Working Reserve.

APPENDIX A: Fund Availability

This appendix provides guidance for the source of funds from the Major Construction Working Reserves to support completion of a major project needing additional funds. In accordance with 38 USC 8104, Congressional approval of certain major construction projects, paragraph (d) 2, bid savings funds are available to fund projects authorized in current or prior fiscal years. The below chart and examples provide availability for allocating funds from the Major Working Reserve line items. VA will reprogram 5-year funds to the maximum extent practicable, prior to using no-year funds.

A - Available - for new obligations and for upward adjustments of projects obligated during the 5 years or prior fiscal years.

E - Expired - available for upward adjustment for within scope changes to an existing obligation made in prior fiscal years.

C - Canceled - not available for any adjustments.

Examples of Availability

1. Funds returned in FY 16 to the Working Reserve from a project obligated in FY 13 with 5-year funds. FY 13-17 will be available for new obligation in FY 16 or FY 17, and available for upward adjustments for any projects initiated prior to FY 17.

2. A project obligated in FY 16 with FY 16-20 funds could receive additional funds from: No-year, FY 13-17; FY 14-18; FY 15-19; FY 16-20, and up until each fund cancels.
