\* Part of the Department of Veterans Affairs MyVA vision is to provide our Veterans with a seamless, unified Veteran Experience across the entire organization and throughout the country. In support of this goal VA is creating a website solely dedicated to helping Veterans learn about the benefits they've earned and providing a clear path for applying for them. MyVA's Veterans Experience office along with our Digital Service team are building a new Veteran-centric experience that will consolidate our services and benefit application process into one portfolio for an organized and distinct destination for Veterans.

Vets.gov initial release is planned for November 2015 and will provide clear instructions and steps for some of VA's most popular services and transactions. Vets.gov will evolve over the upcoming year as we include existing and build new self-service functionality and tools. The ultimate goal for Vets.gov is to become the single, one-stop shop for information and self-service for Veterans and those that care for them. Our initial launch will be your first look into how we are modernizing the Veteran experience. New content and functionality will be added week by week, with improvements based on user feedback and usage data, incrementally evolving to become a valued Veteran-focused digital experience.
