

VistA Imaging Approved DICOM Modality Interfaces

22 June 2018

VistA Imaging has successfully tested many modalities and interfaced them to VistA using DICOM. The following list of approved DICOM modalities was generated based on the most current information and will change as more information becomes available.

A DICOM modality is considered “Supported” if it passes the VA’s internet validation test suite listed in the [Joint VA/DoD DICOM Modality Conformance Requirements \(Rev 3.0\)](#) document. Some modalities have superscript numbers which refer to the notes at the end of the document.

If the software used on a modality is revised by the manufacturer, the modality will need to be re-validated.

The VA retains the right to change modality testing requirements at any time as needed for VA medical care. These changes could require re-testing of the modalities.

VA facilities are required to complete a quality review for the images produced by the device before it may be placed into clinical use. The results of the quality review must be filed with the National VistA Imaging Project Office.

This list of approved DICOM modalities does not in any way constitute a product endorsement by the VA. It only states whether or not the listed product has passed the VA’s internet-based validation testing. Upgrades to the vendor devices can affect interoperability and may require re-validation. The validation process does not indicate how well the actual product will work operationally, either within the VA or elsewhere.

Modality/Device Types

Approved modalities and devices are grouped into the categories listed below. A list of approved devices for each category can be found on the page listed below.

| | | | |
|-------------------------------------------|----|------------------------------------------------------------|----|
| Bone Density | 3 | Ophthalmic Photography | 21 |
| Cardiology | 3 | Ophthalmic Ultrasound..... | 22 |
| CD/DVD Burners | 3 | Optical Coherence Tomography (Ophthalmology use only)..... | 22 |

Notes

The notes below are included for reference purposes; see specific listing for details.

- ¹ No DICOM Modality Worklist capability.
- ² Poor DICOM Modality Worklist capability.
- ³ Tested using the DeJarnette Netshare for interfacing.
- ⁴ Data transferred via an intermediary device. Confirm intermediary device was purchased as well.
- ⁵ Tested as DICOM Object. Test images were not converted to Targa format.
- ⁶ *Obsolete; retained for numbering purposes.*
- ⁷ *Obsolete; retained for numbering purposes.*
- ⁸ Only supplies Modality Worklist.
- ⁹ Automatic measurements may not be possible; manual calibration may be required.
- ¹⁰ Older versions of vendor's software are not supported.
- ¹¹ *Obsolete; retained for numbering purposes.*
- ¹² *Obsolete; retained for numbering purposes.*
- ¹³ *Obsolete; retained for numbering purposes.*
- ¹⁴ *Obsolete; retained for numbering purposes.*
- ¹⁵ Does not support OP SOP Classes.
- ¹⁶ DICOM Query/Retrieve – Performs C-Find SCU and C-Move SCU roles only.
- ¹⁷ DICOM Query/Retrieve – Study/Root Q/R fully supported.
- ¹⁸ DICOM Encapsulated PDF.
- ¹⁹ Reported connectivity issues, please contact support for assistance
- ²⁰ Version of DICOM Software approved on prior
- ²¹ Requires using NNT/iRYS Workstation w/DICOM module
- ²² At the time of validation VA HDIG was out of date with the DICOM Standard and doesn't have the ability to recognize the value, POSTMARKER, the third value of Image Type (0008,0008). Validation testing was done with the Application Entity Security Matric (AESM) entry configured to: VALIDATE=NO and RELAX VALIDATION=YES.
