Executive Summary

Review Purpose: The purpose of the review was to evaluate selected patient care activities to determine whether the Community Based Outpatient Clinics and other outpatient clinics under the oversight of the VA Ann Arbor Healthcare System and Veterans Integrated Service Network 11 provide safe, consistent, and high-quality health care. The review evaluated the clinics' compliance with selected requirements for alcohol use disorder, human immunodeficiency virus screening, and outpatient documentation. We also randomly selected the Jackson VA Clinic, Michigan Center, MI, as a representative site and evaluated the environment of care on January 13, 2015.

Review Results: We conducted four focused reviews and had no findings for the Outpatient Documentation review. However, we made recommendations for improvement in the following three review areas:

Environment of Care: Ensure that at the Jackson VA Clinic:

- Review of the hazardous materials inventory occurs twice within a 12-month period.
- Employees receive the required training on hazardous materials.
- CBOC staff minimize the risk of infection when storing and disposing of medical (infectious waste).
- Fire drills are performed every 12 months.
- The information technology server closet is maintained according to information technology safety and security standards.
- Staff receive regular information/updates on their responsibilities in emergency response operations.
- Staff participate in scheduled emergency management training and exercises.

Alcohol Use Disorder: Ensure that:

- Clinic staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.
- Clinic Registered Nurse Care Managers receive motivational interviewing training within 12 months of appointment to Patient Aligned Care Teams.
- Providers in the outpatient clinics receive health coaching training within 12 months of appointment to Patient Aligned Care Teams.

Human Immunodeficiency Virus Screening: Ensure that:

- The Facility Director develops policies and procedures that facilitate human immunodeficiency virus testing as part of routine medical care for patients.
- Clinicians provide human immunodeficiency virus testing as part of routine medical care for patients and that compliance is monitored.
- Clinicians consistently document informed consent for human immunodeficiency virus testing and that compliance is monitored.

Comments

The VISN and Facility Directors agreed with the Community Based Outpatient Clinics and other outpatient clinics review findings and recommendations and provided acceptable improvement plans. (See Appendixes C and D, pages 14–19, for the full text of the Directors’ comments.) We consider recommendations 2 and 5 closed. We will follow up on the planned actions for the open recommendations until they are completed.

JOHN D. DAIGH, JR., M.D.
Assistant Inspector General for
Healthcare Inspections

Objectives, Scope, and Methodology

Objectives

The CBOC and OOC reviews are an element of the OIG's efforts to ensure that our Nation's veterans receive high-quality VA health care services. As such, the CBOC and OOC reviews are recurring evaluations of selected outpatient care activities that focus on patient care quality and the EOC. In general, our objectives are to determine whether:

- The selected CBOC is compliant with EOC requirements.
- The CBOCs/OOCs are compliant with selected VHA requirements for AUD care.
- The CBOCs/OOCs are compliant with selected VHA requirements for HIV Screening.
- Healthcare practitioners at the CBOCs/OOCs comply with the requirements for outpatient documentation.

Scope

To evaluate for compliance with requirements related to patient care quality and the EOC, we conducted an onsite inspection, reviewed clinical and administrative records, and discussed processes and validated findings with managers and employees. The review covered the following four activities:

- EOC
- AUD
- HIV Screening
- Outpatient Documentation

The scope of this review is limited to the established objectives. Issues and concerns that come to our attention but are outside the scope of this standardized inspection will be reviewed and referred accordingly.

Methodology

The onsite EOC inspection was only conducted at a randomly selected outpatient site of care that had not been previously inspected.¹ Details of the targeted study populations

¹ Each outpatient site selected for physical inspection was randomized from all primary care CBOCs, multi-specialty CBOCs, and health care centers reporting to the parent facility and was operational and classified as such in VA's Site Tracking Database by October 1, 2014.

for the AUD, HIV Screening, and Outpatient Documentation focused reviews are noted in Table 1.

Table 1. CBOC/OOC Focused Reviews and Study Populations

Review Topic	Study Population
AUD	All CBOC and OOC patients screened within the study period of July 1, 2013, through June 30, 2014, and who had a positive AUDIT-C score; ² and all licensed independent providers, RN Care Managers, and clinical associates assigned to PACT prior to October 1, 2013.
HIV Screening	All outpatients who had a visit in FY 2012 and had at least one visit at the parent facility's CBOCs and/or OOCs within a 12-month period during April 1, 2013, through March 31, 2014.
Outpatient Documentation	All patients new to VHA who had at least three outpatient encounters (face-to-face visits, telephonic/telehealth care, and telephonic communications) during April 1, 2013, through March 31, 2014.

In this report, we make recommendations for improvement. Recommendations pertain to issues that are significant enough to be monitored by the OIG until corrective actions are implemented.

The review was performed in accordance with OIG standard operating procedures for CBOC and OOC reviews.

² The AUDIT-C is a brief alcohol screen that reliably identifies patients who are hazardous drinkers or have active alcohol use disorders. Scores range from 0–12.

Results and Recommendations

EOC

The purpose of this review was to evaluate whether CBOC managers have established and maintained a safe and clean EOC as required.^a

We reviewed relevant documents and conducted a physical inspection of the Jackson VA Clinic. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

Table 2. EOC

NM	Areas Reviewed	Findings	Recommendations
	The furnishings are clean and in good repair.		
	The CBOC is clean (walls, floors, and equipment are clean).		
X	The CBOC's inventory of hazardous materials was reviewed for accuracy twice within the prior 12 months.	The inventory of hazardous materials and waste at the Jackson VA Outpatient Clinic was not reviewed for accuracy twice within the prior 12 months.	1. We recommended that managers ensure review of the hazardous materials inventory occurs twice within a 12-month period at the Jackson VA Outpatient Clinic.
	The CBOC's safety data sheets for chemicals are readily available to staff.		
	If safety data sheets are in electronic form, the staff can demonstrate ability to access the electronic version without coaching.		
X	Employees received training on the new chemical label elements and safety data sheet format.	Three of 26 employees had not received training on the new chemical label elements and safety data sheet format.	2. We recommended that employees at the Jackson VA Outpatient Clinic receive the required training on hazardous materials.
	Clinic managers ensure that safety inspections of CBOC medical equipment are performed in accordance with Joint Commission standards.		
	Hand hygiene is monitored for compliance.		

NM	Areas Reviewed (continued)	Findings	Recommendations
	Personal protective equipment is readily available.		
	Sterile commercial supplies are not expired.		
X	The CBOC staff members minimize the risk of infection when storing and disposing of medical (infectious) waste.	The Jackson VA Outpatient Clinic did not have a separate secured storage room/area or an acceptable alternative process for storing and disposing of medical (infectious) waste.	3. We recommended that CBOC staff minimize the risk of infection when storing and disposing of medical (infectious waste) at the Jackson VA Outpatient Clinic.
	The CBOC has procedures to disinfect non-critical reusable medical equipment between patients.		
X	There is evidence of fire drills occurring at least every 12 months.	There was no evidence of fire drills occurring at least every 12 months at the Jackson VA Outpatient Clinic.	4. We recommended that fire drills are performed every 12 months at the Jackson VA Outpatient Clinic.
	Means of egress from the building are unobstructed.		
	Access to fire extinguishers is unobstructed.		
	Fire extinguishers are located in large rooms or are obscured from view, and the CBOC has signs identifying the locations of the fire extinguishers.		
	Exit signs are visible from any direction.		
	Multi-dose medication vials are not expired.		
	All medications are secured from unauthorized access.		
	The staff protects patient-identifiable information on laboratory specimens during transport.		
	Documents containing patient-identifiable information are not visible or unsecured.		
	Adequate privacy is provided at all times.		
	The women veterans' exam room is equipped with either an electronic or manual door lock.		

NM	Areas Reviewed (continued)	Findings	Recommendations
	The information technology network room/server closet is locked.		
X	Access to the information technology network room/server closet is restricted to personnel authorized by Office of Information and Technology.	Access to the information technology network room/server closet at the Jackson VA Outpatient Clinic was not restricted to personnel authorized by Office of Information and Technology.	5. We recommended that the information technology server closet at the Jackson VA Outpatient Clinic is maintained according to information technology safety and security standards.
	Access to the information technology network room/server closet is documented.		
	All computer screens are locked when not in use.		
	Information is not viewable on monitors in public areas.		
	The CBOC has an automated external defibrillator.		
	There is an alarm system and/or panic buttons installed and tested in high-risk areas (e.g., mental health clinic), and the testing is documented.		
X	CBOC staff receive regular information/updates on their responsibilities in emergency response operations.	The staff at the Jackson VA Outpatient Clinic did not receive regular information/updates on their responsibilities in emergency response operations.	6. We recommended that the staff at the Jackson VA Outpatient Clinic receive regular information/updates on their responsibilities in emergency response operations.
X	The staff participates in scheduled emergency management training and exercises.	The staff at the Jackson VA Outpatient Clinic did not participate in scheduled emergency management training and exercises.	7. We recommended that the staff at the Jackson VA Outpatient Clinic participate in scheduled emergency management training and exercises.

AUD

The purpose of this review was to determine whether the facility's CBOCs and OOCs complied with selected alcohol use screening and treatment requirements.^b

We reviewed relevant documents and 35 EHRs. We also validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

Table 3. AUD

NM	Areas Reviewed	Findings	Recommendations
	Diagnostic assessments are completed for patients with a positive alcohol screen.		
	Education and counseling about drinking levels and adverse consequences of heavy drinking are provided for patients with positive alcohol screens and drinking levels above National Institute on Alcohol Abuse and Alcoholism guidelines.		
X	Documentation reflects the offer of further treatment for patients diagnosed with alcohol dependence.	We did not find documentation of the offer of further treatment for 3 of 12 patients diagnosed with alcohol dependence.	8. We recommended that clinic staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.
	For patients with AUD who decline referral to specialty care, clinic staff monitored them and their alcohol use.		
	Counseling, education, and brief treatments for AUD are provided within 2 weeks of positive screening.		
X	Clinic RN Care Managers have received motivational interviewing training within 12 months of appointment to PACT.	We found that 8 of 32 (25 percent) RN Care Managers did not receive MI training within 12 months of appointment to PACT.	9. We recommended that Clinic Registered Nurse Care Managers receive motivational interviewing training within 12 months of appointment to Patient Aligned Care Teams.

NM	Areas Reviewed (continued)	Findings	Recommendations
	Clinic RN Care Managers have received VHA National Center for Health Promotion and Disease Prevention-approved health coaching training (most likely TEACH for Success) within 12 months of appointment to PACT.		
X	Providers in the outpatient clinics have received VHA National Center for Health Promotion and Disease Prevention-approved health coaching training (most likely TEACH for Success) within 12 months of appointment to PACT.	We found that 17 of 25 (68 percent) providers did not receive health coaching training within 12 months of appointment to PACT.	10. We recommended that providers in the outpatient clinics receive health coaching training within 12 months of appointment to Patient Aligned Care Teams.
	Clinical associates in the outpatient clinics have received VHA National Center for Health Promotion and Disease Prevention-approved health coaching training (most likely TEACH for Success) within 12 months of appointment to PACT.		
	The facility complied with any additional elements required by VHA or local policy.		

HIV Screening

The purpose of this review was to determine whether CBOCs/OOCs are compliant with selected VHA requirements for HIV Screening.^c

We reviewed the facility's self-assessment, VHA and local policies, and guidelines to assess administrative controls over the HIV screening process. We also reviewed 32 EHRs and validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

Table 4. HIV Screening

NM	Areas Reviewed	Findings	Recommendations
	The facility has a HIV Lead Clinician to carry out responsibilities as required.		
X	The facility has policies and procedures to facilitate HIV testing.	The facility had no policy that required HIV testing as a part of routine medical care for patients.	11. We recommended that the Facility Director develops policies and procedures that facilitate human immunodeficiency virus testing as part of routine medical care for patients.
	The facility had developed policies and procedures that include requirements for the communication of HIV test results.		
	Written patient educational materials utilized prior to or at the time of consent for HIV testing include all required elements.		
X	Clinicians provided HIV testing as part of routine medical care for patients.	Clinicians did not provide HIV testing to 28 of 32 (88 percent) patients.	12. We recommended that clinicians provide human immunodeficiency virus testing as part of routine medical care for patients and that compliance is monitored.
X	When HIV testing occurred, clinicians consistently documented informed consent.	Clinicians did not document informed consent for HIV testing for three of four patients.	13. We recommended that clinicians consistently document informed consent for human immunodeficiency virus testing and that compliance is monitored.
	The facility complied with additional elements as required by local policy.		

Outpatient Documentation

The purpose of this review was to determine whether healthcare practitioners at the CBOCs/OOCs comply with selected requirements for outpatient documentation.^d

We reviewed relevant documents and 39 EHRs. We also validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The facility generally met requirements. We made no recommendations.

Table 5. Outpatient Documentation

NM	Areas Reviewed	Findings	Recommendations
	A relevant history of the illness or injury and physical findings are documented when the patient is first admitted for VA medical care on an outpatient level.		
	Randomly selected progress notes contain the required documentation components in the EHR.		

Clinic Profiles

The CBOC/OOC review evaluates the quality of care provided to veterans at all of the outpatient clinics under the parent facility's oversight.³ In addition to primary care integrated with women's health, mental health, and tele-health services, the CBOCs provide various specialty care and ancillary services. The following table provides information relative to each of the outpatient clinics and lists the additional specialty care and ancillary services provided at each location.

Location	Station #	Rurality ⁶	Outpatient Workload / Encounters ⁴			Services Provided ⁵		
			PC	MH	Specialty Clinics ⁷	Specialty Care ⁸	Ancillary Services ⁹	
Toledo, OH	506GA	Urban	32,979	19,134	8,471	Cardiology Dental Dermatology Optometry	Anti-Coagulation Clinic Audiology Diabetic Retinal Screening EKG HBPC Imaging Services Laboratory	MOVE! Program ¹⁰ Nuclear Medicine Nutrition Prosthetics/Orthotics Rehabilitation Services Social Work Vascular Lab
Flint, MI	506GB	Urban	4,995	5,843	117	Dermatology	Anti-Coagulation Clinic	MOVE! Program Nutrition
Michigan Center, MI	506GC	Urban	7,234	3,771	376	Dermatology	Anti-Coagulation Clinic Diabetic Retinal Screening	EKG MOVE! Program Nutrition

³ Includes all CBOCs in operation before April 1, 2014.

⁴ An encounter is a professional contact between a patient and a practitioner vested with responsibility for diagnosing, evaluating, and treating the patient's condition. Encounters occur in both the outpatient and inpatient setting.

⁵ The denoted Specialty Care and Ancillary Services are limited to Primary Clinic Stops with a count ≥ 100 encounters during the October 1, 2013, through September 30, 2014, timeframe at the specified CBOC.

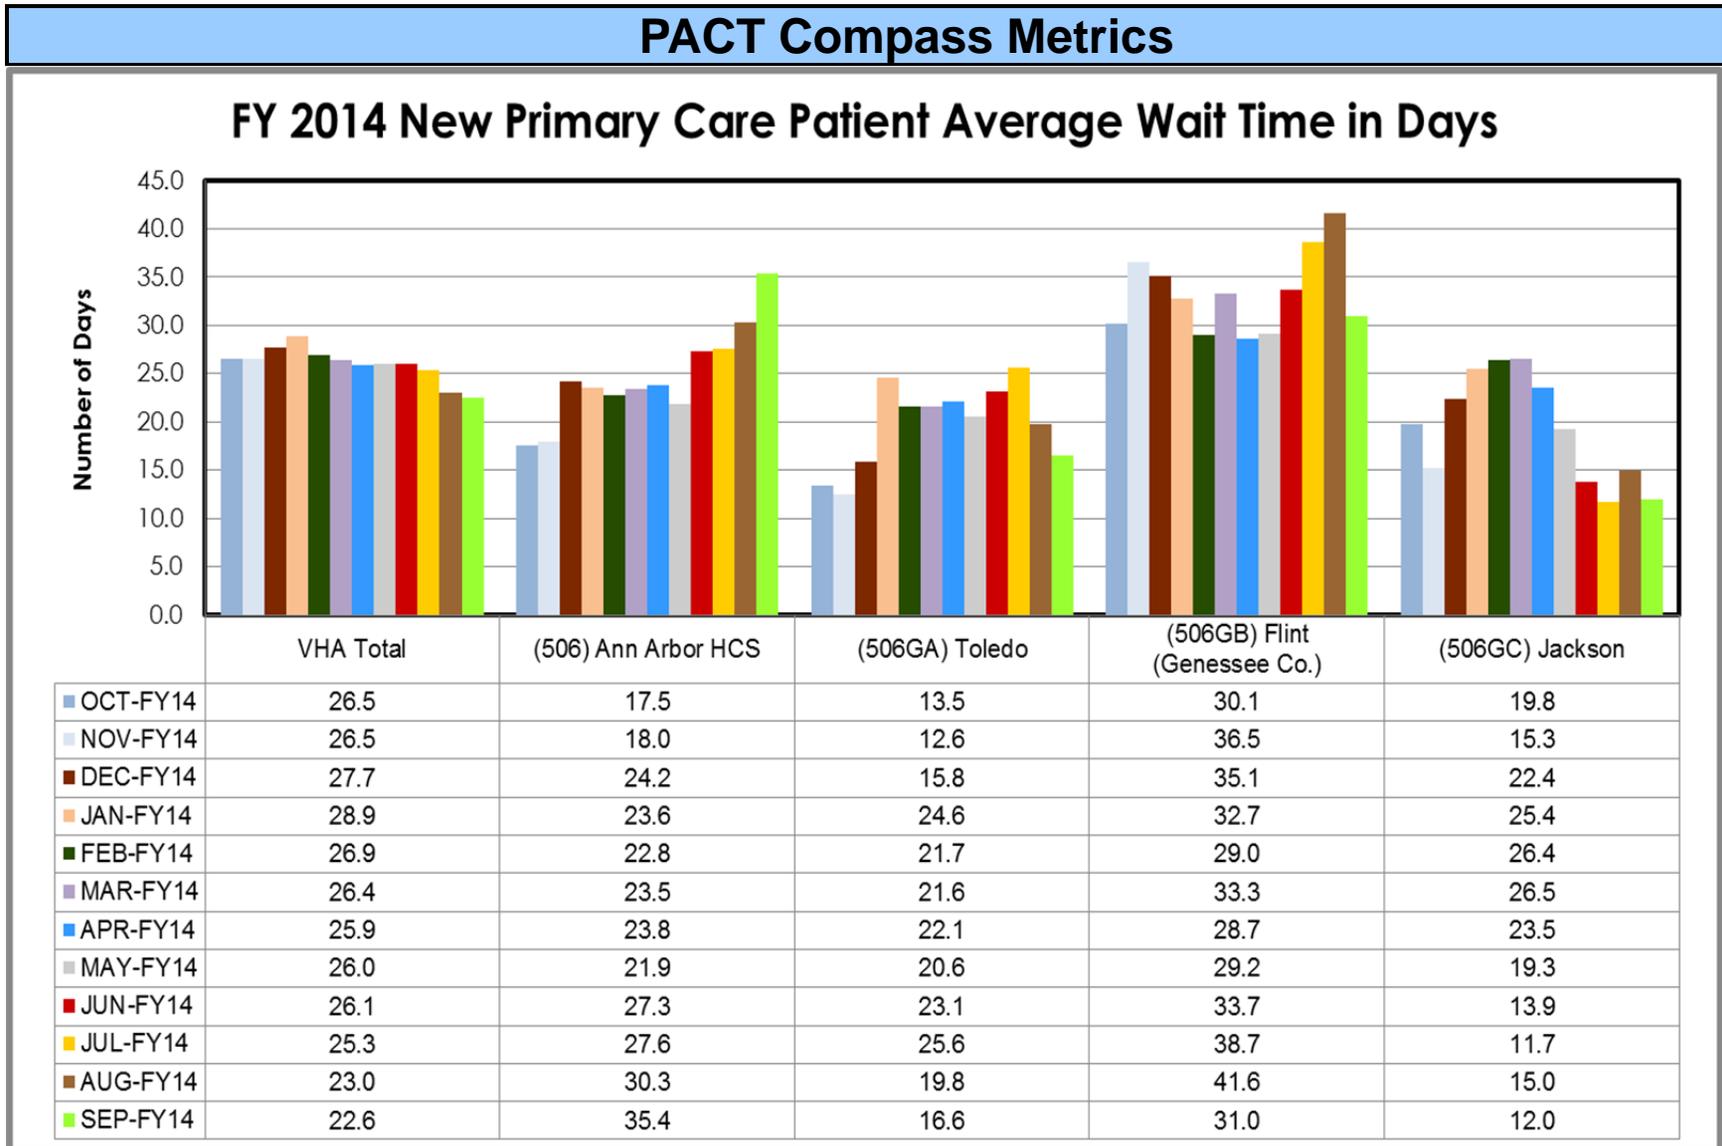

⁶ <http://vssc.med.va.gov/>

⁷ The total number of encounters for the services provided in the "Specialty Care" column.

⁸ Specialty Care Services refer to non-Primary Care and non-Mental Health services provided by a physician.

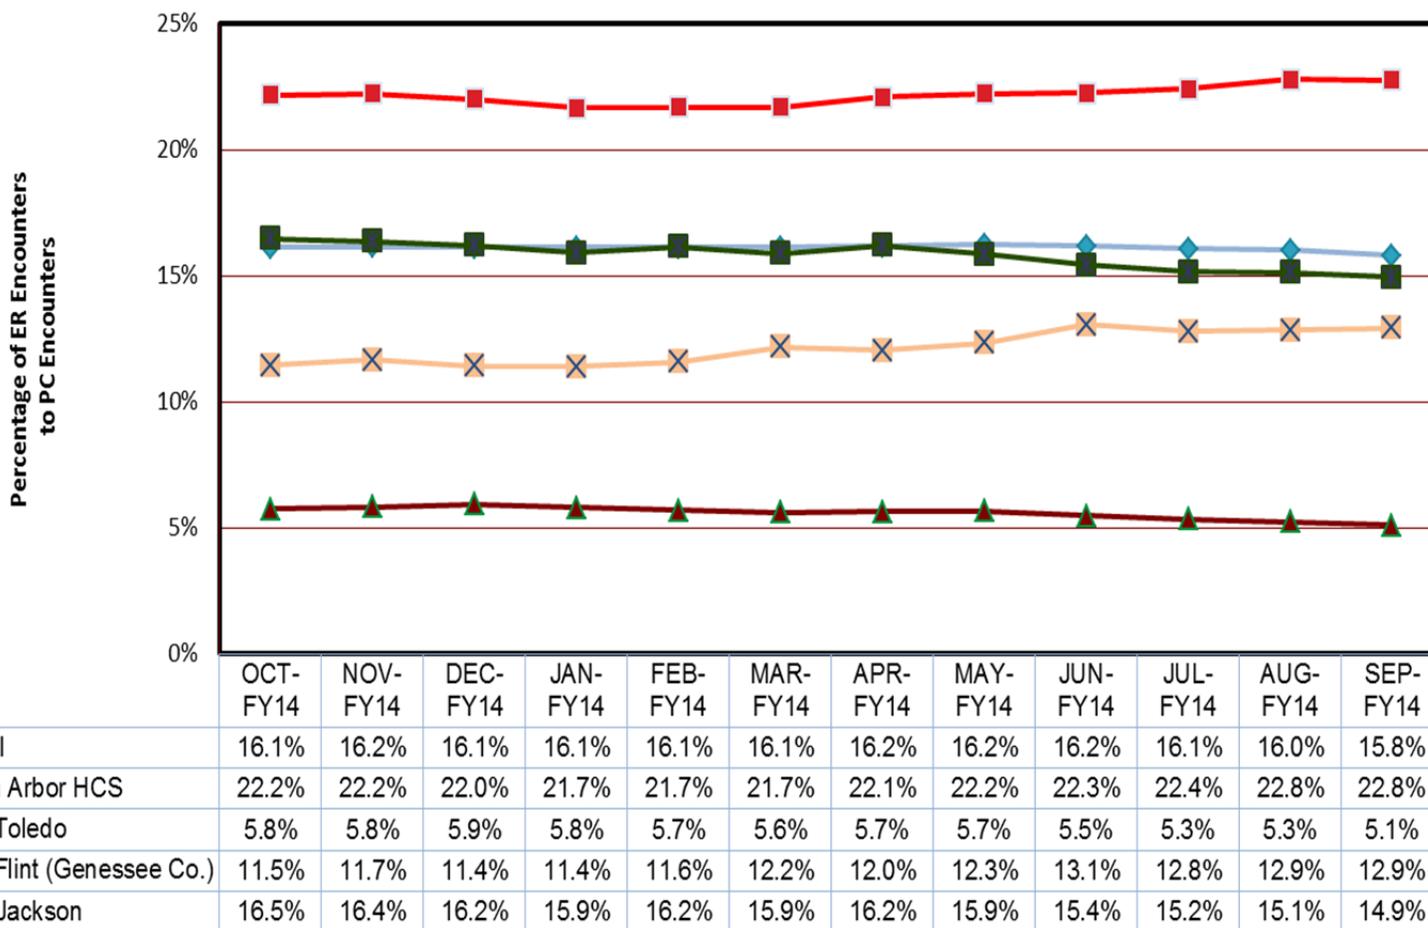

⁹ Ancillary Services refer to non-Primary Care and non-Mental Health services that are not provided by a physician.

¹⁰ VHA Handbook 1120.01, *MOVE! Weight Management Program for Veterans*, March 31, 2011.

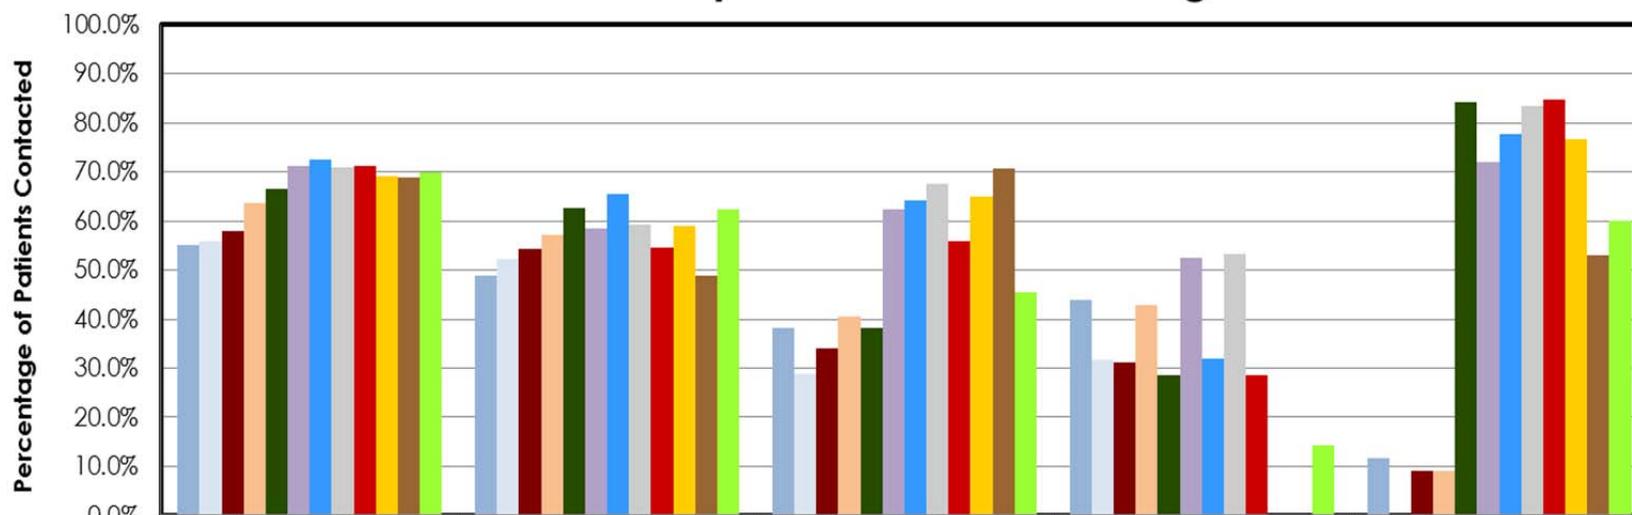

Data Definition.^e The average number of calendar days between a new patient’s Primary Care appointment (clinic stops 322, 323, and 350), excluding compensation and pension appointments, and the earliest creation date.

FY 2014 Ratio of ER Encounters While on Panel to PC Encounters While on Panel (FEE ER Included)

Data Definition.^e This is a measure of where the patient receives his primary care and by whom. A low percentage is better. The formula is the total VHA ER/Urgent Care/FEE ER encounters while on panel (including FEE ER visits) divided by the number of Primary Care encounters while on panel with the patient’s assigned primary care (or associate) provider plus the total VHA ER/Urgent Care/FEE ER encounters (including FEE ER visits) while on panel plus the number of Primary Care encounters while on panel with a provider other than the patient’s Primary Care Provider/Associate Provider.

FY 2014 Team 2-Day Contact Post Discharge Ratio

	VHA Total	(506) Ann Arbor HCS	(506GA) Toledo	(506GB) Flint (Genessee Co.)	(506GC) Jackson
OCT-FY14	55.1%	48.9%	38.2%	44.0%	11.8%
NOV-FY14	55.9%	52.3%	28.8%	31.6%	0.0%
DEC-FY14	57.8%	54.3%	34.0%	31.3%	9.1%
JAN-FY14	63.6%	57.1%	40.5%	42.9%	9.1%
FEB-FY14	66.4%	62.5%	38.1%	28.6%	84.2%
MAR-FY14	71.2%	58.5%	62.3%	52.4%	72.0%
APR-FY14	72.6%	65.4%	64.2%	32.0%	77.8%
MAY-FY14	70.8%	59.1%	67.4%	53.3%	83.3%
JUN-FY14	71.3%	54.5%	55.7%	28.6%	84.6%
JUL-FY14	69.1%	59.0%	64.9%	0.0%	76.7%
AUG-FY14	68.9%	48.8%	70.7%	0.0%	52.9%
SEP-FY14	69.8%	62.3%	45.5%	14.3%	60.0%

Data Definition.^e The percent of discharges (VHA inpatient discharges) for the reporting timeframe for assigned Primary Care patients where the patient was contacted by a member of the Patient Aligned Care Team the patient is assigned to within 2 business days post discharge. Discharges resulting in death and discharges where a patient is readmitted within 2 days of discharge are excluded from this metric.

Comments to OIG's Report

The following Director's comments are submitted in response to the recommendations in the OIG report:

OIG Recommendations

Recommendation 1. We recommended that managers ensure review of the hazardous materials inventory occurs twice within a 12-month period at the Jackson VA Outpatient Clinic.

Concur

Target date for completion: November 1, 2015

Facility response: The facility Hazardous Materials Management Plan policy was updated on November 26, 2014. Jackson VA Outpatient Clinic will complete semi-annual hazardous materials inventory annually in March and September. Chief of Safety Service will monitor bi-annually to ensure 90% compliance is achieved.

Recommendation 2. We recommended that employees at the Jackson VA Outpatient Clinic receive the required training on hazardous materials.

Concur

Target date for completion: Closed

Facility response: Jackson VA Outpatient Clinic staff received the required training on hazardous materials. We recommend closure.

Recommendation 3. We recommended that CBOC staff minimize the risk of infection when storing and disposing of medical (infectious waste) at the Jackson VA Outpatient Clinic.

Concur

Target date for completion: February 1, 2016

Facility response: Jackson VA Outpatient Clinic is scheduled for expansion this year. New construction will include separate storage area for disposing of medical (infectious waste). Quality Management will monitor until construction completed and separate storage area is in place.

Recommendation 4. We recommended that fire drills are performed every 12 months at the Jackson VA Outpatient Clinic.

Concur

Target date for completion: November 1, 2015

Facility response: Jackson VA Outpatient Clinic will conduct fire drills annually, not to exceed a 12 month period. To ensure sustained compliance, fire drill reports will be provided to the Environment of Care Committee. Quality Management will monitor fire drill reports to ensure 90% compliance.

Recommendation 5. We recommended that the information technology server closet at the Jackson VA Outpatient Clinic is maintained according to information technology safety and security standards.

Concur

Target date for completion: Closed

Facility response: The Security and Access Memorandum has been updated to designate personnel allowed to access the information technology server closet at the Jackson VA Outpatient Clinic. We recommend closure.

Recommendation 6. We recommended that the staff at the Jackson VA Outpatient Clinic receive regular information/updates on their responsibilities in emergency response operations.

Concur

Target date for completion: November 1, 2015

Facility response: Emergency Manager and Jackson VA Nurse Manager have updated the Emergency Operations Plan. Nurse Manager will ensure all staff are educated regarding their roles in an emergency. Staff education will be monitored by the Jackson VA Nurse Manager and submitted monthly to Quality Management. Quality Management will monitor education until 90% compliance is achieved for 2 consecutive quarters.

Recommendation 7. We recommended that the staff at the Jackson VA Outpatient Clinic participate in scheduled emergency management training and exercises.

Concur

Target date for completion: November 1, 2015

Facility response: Emergency Manager and Jackson VA Nurse Manager will ensure staff participation in an emergency management training and exercise. Staff participation will be monitored by the Jackson VA Nurse Manager. Quality management will monitor staff participation until 90% compliance is achieved for 2 consecutive quarters.

Recommendation 8. We recommended that clinic staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.

Concur

Target date for completion: November 1, 2015

Facility response: Associate Chief of Staff (ACOS) for Ambulatory Care Services will ensure clinicians document the offer of further treatment to patients diagnosed with alcohol dependence. Quality Management will randomly audit 40 patient records per month until 90% compliance is achieved for 2 consecutive quarters.

Recommendation 9. We recommended that clinic Registered Nurse Care Managers receive motivational interviewing training within 12 months of appointment to Patient Aligned Care Teams.

Concur

Target date for completion: November 1, 2015

Facility response: Associate Chief Nurse for Ambulatory Care services will ensure all Registered Nurse Care Managers receive motivational interview training within 12 months of appointment to Patient Aligned Care Teams. Completion of motivational interview training for Registered Nurse Care Managers will be submitted to Quality Management monthly. Quality Management will monitor compliance monthly until 90% compliance is achieved for 2 consecutive quarters.

Recommendation 10. We recommended that providers in the outpatient clinics receive health coaching training within 12 months of appointment to Patient Aligned Care Teams.

Concur

Target date for completion: November 1, 2015

Facility response: Associate Chief of Staff (ACOS) for Ambulatory Care Services will ensure all providers receive health coach training within 12 months of appointment to Patient Aligned Care Teams. Completion of health coach training for providers will be submitted to Quality Management monthly. Quality Management will monitor compliance monthly until 90% compliance is achieved for 2 consecutive quarters.

Recommendation 11. We recommended that the Facility Director develops policies and procedures that facilitate human immunodeficiency virus testing as part of routine medical care for patients.

Concur

Target date for completion: May 1, 2015

Facility response: The facility will finalize policy to facilitate human immunodeficiency virus testing as part of routine medical care for patients.

Recommendation 12. We recommended that clinicians provide human immunodeficiency virus testing as part of routine medical care for patients and that compliance is monitored.

Concur

Target date for completion: November 1, 2015

Facility response: Clinical reminder for human immunodeficiency virus testing has been revised. Quality Management will randomly audit 40 patient records per month to ensure human immunodeficiency virus testing is offered as a routine part of medical care until 90% compliance is achieved for 2 consecutive quarters.

Recommendation 13. We recommended that clinicians consistently document informed consent for human immunodeficiency virus testing and that compliance is monitored.

Concur

Target date for completion: November 1, 2015

Facility response: Clinical reminder for human immunodeficiency virus testing has been revised to include documentation of informed consent. Quality Management will randomly audit 40 patient records per month to ensure informed consent is documented until 90% compliance is achieved for 2 consecutive quarters.
