Executive Summary

Review Purpose: The purpose of the review was to evaluate selected patient care activities to determine whether the Community Based Outpatient Clinics and other outpatient clinics under the oversight of the VA St. Louis Health Care System and Veterans Integrated Service Network 15 provide safe, consistent, and high-quality health care. The review evaluated the clinics' compliance with selected requirements for alcohol use disorder, human immunodeficiency virus screening, and outpatient documentation. We also randomly selected the Primary Care Team 2 Annex, St. Louis, MO, as a representative site and evaluated the environment of care on March 3, 2015.

Review Results: We conducted four focused reviews and had no findings for the Human Immunodeficiency Virus Screening and Outpatient Documentation reviews. However, we made recommendations for improvement in the following two review areas:

Environment of Care: Ensure that the:

- Information technology server closet at the Primary Care Team 2 Annex is maintained according to information technology safety and security standards.

Alcohol Use Disorder: Ensure that:

- Clinic staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.
- Clinic Registered Nurse Care Managers receive motivational interviewing training within 12 months of appointment to Patient Aligned Care Teams.
- Clinic Registered Nurse Care Managers, providers, and clinical associates receive health coaching training within 12 months of appointment to Patient Aligned Care Teams.

Comments

The VISN and Facility Directors agreed with the Community Based Outpatient Clinic and other outpatient clinic review findings and recommendations and provided acceptable improvement plans. (See Appendixes C and D, pages 14–17, for the full text of the Directors' comments.) We will follow up on the planned actions until they are completed.

JOHN D. DAIGH, JR., M.D.
Assistant Inspector General for
Healthcare Inspections

Objectives, Scope, and Methodology

Objectives

The CBOC and OOC reviews are an element of the OIG's efforts to ensure that our Nation's veterans receive high-quality VA health care services. As such, the CBOC and OOC reviews are recurring evaluations of selected outpatient care activities that focus on patient care quality and the EOC. In general, our objectives are to determine whether:

- The selected CBOC is compliant with EOC requirements.
- The CBOCs/OOCs are compliant with selected VHA requirements for AUD care.
- The CBOCs/OOCs are compliant with selected VHA requirements for HIV Screening.
- Healthcare practitioners at the CBOCs/OOCs comply with the requirements for outpatient documentation.

Scope

To evaluate for compliance with requirements related to patient care quality and the EOC, we conducted an onsite inspection, reviewed clinical and administrative records, and discussed processes and validated findings with managers and employees. The review covered the following four activities:

- EOC
- AUD
- HIV Screening
- Outpatient Documentation

The scope of this review is limited to the established objectives. Issues and concerns that come to our attention but are outside the scope of this standardized inspection will be reviewed and referred accordingly.

Methodology

The onsite EOC inspection was conducted at a randomly selected outpatient site of care that had not been previously inspected.¹ Details of the targeted study populations

¹ Each outpatient site selected for physical inspection was randomized from all primary care CBOCs, multi-specialty CBOCs, and health care centers reporting to the parent facility and was operational and classified as such in VA's Site Tracking Database by October 1, 2014.

for the AUD, HIV Screening, and Outpatient Documentation focused reviews are noted in Table 1.

Table 1. CBOC/OOC Focused Reviews and Study Populations

Review Topic	Study Population
AUD	All CBOC and OOC patients screened within the study period of July 1, 2013, through June 30, 2014, and who had a positive AUDIT-C score; ² and all licensed independent providers, RN Care Managers, and clinical associates assigned to PACT prior to October 1, 2013.
HIV Screening	All outpatients who had a visit in FY 2012 and had at least one visit at the parent facility's CBOCs and/or OOCs within a 12-month period during April 1, 2013, through March 31, 2014.
Outpatient Documentation	All patients new to VHA who had at least three outpatient encounters (face-to-face visits, telephonic/telehealth care, and telephonic communications) during April 1, 2013, through March 31, 2014.

In this report, we make recommendations for improvement. Recommendations pertain to issues that are significant enough to be monitored by the OIG until corrective actions are implemented.

The review was performed in accordance with OIG standard operating procedures for CBOC and OOC reviews.

² The AUDIT-C is a brief alcohol screen that reliably identifies patients who are hazardous drinkers or have active alcohol use disorders. Scores range from 0–12.

Results and Recommendations

EOC

The purpose of this review was to evaluate whether CBOC managers have established and maintained a safe and clean EOC as required.^a

We reviewed relevant documents and conducted a physical inspection of the Primary Care Team 2 Annex. The table below shows the areas reviewed for this topic. The area marked as NM did not meet applicable requirements and needed improvement.

Table 2. EOC

NM	Areas Reviewed	Findings	Recommendations
	The furnishings are clean and in good repair.		
	The CBOC is clean (walls, floors, and equipment are clean).		
	The CBOC's inventory of hazardous materials was reviewed for accuracy twice within the prior 12 months.		
	The CBOC's safety data sheets for chemicals are readily available to staff.		
	If safety data sheets are in electronic form, the staff can demonstrate ability to access the electronic version without coaching.		
	Employees received training on the new chemical label elements and safety data sheet format.		
	Clinic managers ensure that safety inspections of CBOC medical equipment are performed in accordance with Joint Commission standards.		
	Hand hygiene is monitored for compliance.		
	Personal protective equipment is readily available.		

NM	Areas Reviewed (continued)	Findings	Recommendations
	Sterile commercial supplies are not expired.		
	The CBOC staff members minimize the risk of infection when storing and disposing of medical (infectious) waste.		
	The CBOC has procedures to disinfect non-critical reusable medical equipment between patients.		
	There is evidence of fire drills occurring at least every 12 months.		
	Means of egress from the building are unobstructed.		
	Access to fire extinguishers is unobstructed.		
	Fire extinguishers are located in large rooms or are obscured from view, and the CBOC has signs identifying the locations of the fire extinguishers.		
	Exit signs are visible from any direction.		
	Multi-dose medication vials are not expired.		
	All medications are secured from unauthorized access.		
	The staff protects patient-identifiable information on laboratory specimens during transport.		
	Documents containing patient-identifiable information are not visible or unsecured.		
	Adequate privacy is provided at all times.		
	The women veterans' exam room is equipped with either an electronic or manual door lock.		
	The information technology network room/server closet is locked.		

NM	Areas Reviewed (continued)	Findings	Recommendations
	Access to the information technology network room/server closet is restricted to personnel authorized by Office of Information and Technology.		
X	Access to the information technology network room/server closet is documented.	Access to the information technology network room/server closet at the Primary Care Team 2 Annex was not documented.	1. We recommended that the information technology server closet at the Primary Care Team 2 Annex is maintained according to information technology safety and security standards.
	All computer screens are locked when not in use.		
	Information is not viewable on monitors in public areas.		
	The CBOC has an automated external defibrillator.		
	There is an alarm system and/or panic buttons installed and tested in high-risk areas (for example, mental health clinic), and the testing is documented.		
	CBOC staff receive regular information/updates on their responsibilities in emergency response operations.		
	The staff participates in scheduled emergency management training and exercises.		

AUD

The purpose of this review was to determine whether the facility’s CBOCs and OOCs complied with selected alcohol use screening and treatment requirements.^b

We reviewed relevant documents and 39 EHRs. We also validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

Table 3. AUD

NM	Areas Reviewed	Findings	Recommendations
	Diagnostic assessments are completed for patients with a positive alcohol screen.		
	Education and counseling about drinking levels and adverse consequences of heavy drinking are provided for patients with positive alcohol screens and drinking levels above National Institute on Alcohol Abuse and Alcoholism guidelines.		
X	Documentation reflects the offer of further treatment for patients diagnosed with alcohol dependence.	We did not find documentation of the offer of further treatment for 3 of 10 patients diagnosed with alcohol dependence.	2. We recommended that clinic staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.
	For patients with AUD who decline referral to specialty care, clinic staff monitored them and their alcohol use.		
	Counseling, education, and brief treatments for AUD are provided within 2 weeks of positive screening.		
X	Clinic RN Care Managers have received motivational interviewing training within 12 months of appointment to PACT.	We found that 26 of 30 RN Care Managers (87 percent) did not receive MI training within 12 months of appointment to PACT.	3. We recommended that Clinic Registered Nurse Care Managers receive motivational interviewing training within 12 months of appointment to Patient Aligned Care Teams.

NM	Areas Reviewed (continued)	Findings	Recommendations
X	Clinic RN Care Managers have received VHA National Center for Health Promotion and Disease Prevention-approved health coaching training (most likely TEACH for Success) within 12 months of appointment to PACT.	We found that 11 of 30 RN Care Managers (37 percent) did not receive health coaching training within 12 months of appointment to PACT.	4. We recommended that Clinic Registered Nurse Care Managers, providers, and clinical associates receive health coaching training within 12 months of appointment to Patient Aligned Care Teams.
X	Providers in the outpatient clinics have received VHA National Center for Health Promotion and Disease Prevention-approved health coaching training (most likely TEACH for Success) within 12 months of appointment to PACT.	We found that 20 of 38 providers (53 percent) did not receive health coaching training within 12 months of appointment to PACT.	
X	Clinical associates in the outpatient clinics have received VHA National Center for Health Promotion and Disease Prevention-approved health coaching training (most likely TEACH for Success) within 12 months of appointment to PACT.	We found that 16 of 42 clinical associates (38 percent) did not receive health coaching training within 12 months of appointment to PACT.	
	The facility complied with any additional elements required by VHA or local policy.		

HIV Screening

The purpose of this review was to determine whether CBOCs/OOCs are compliant with selected VHA requirements for HIV Screening.^c

We reviewed the facility’s self-assessment, VHA and local policies, and guidelines to assess administrative controls over the HIV screening process. We also reviewed 35 EHRs and validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The facility generally met requirements. We made no recommendations.

Table 4. HIV Screening

NM	Areas Reviewed	Findings	Recommendations
	The facility has a Lead HIV Clinician to carry out responsibilities as required.		
	The facility has policies and procedures to facilitate HIV testing.		
	The facility had developed policies and procedures that include requirements for the communication of HIV test results.		
	Written patient educational materials utilized prior to or at the time of consent for HIV testing include all required elements.		
	Clinicians provided HIV testing as part of routine medical care for patients.		
	When HIV testing occurred, clinicians consistently documented informed consent.		
	The facility complied with additional elements as required by local policy.		

Outpatient Documentation

The purpose of this review was to determine whether healthcare practitioners at the CBOCs/OOCs comply with selected requirements for outpatient documentation.^d

We reviewed relevant documents and 44 EHRs. We also validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The facility generally met requirements. We made no recommendations.

Table 5. Outpatient Documentation

NM	Areas Reviewed	Findings	Recommendations
	A relevant history of the illness or injury and physical findings are documented when the patient is first admitted for VA medical care on an outpatient level.		
	Randomly selected progress notes contain the required documentation components in the EHR.		

Clinic Profiles

The CBOC/OOC review evaluates the quality of care provided to veterans at all of the outpatient clinics under the parent facility's oversight.³ In addition to primary care integrated with women's health, mental health, and tele-health services, the CBOCs provide various specialty care and ancillary services. The following table provides information relative to each of the outpatient clinics and lists the additional specialty care and ancillary services provided at each location.

Location	Station #	Rurality ⁶	Outpatient Workload / Encounters ⁴			Services Provided ⁵	
			PC	MH	Specialty Clinics ⁷	Specialty Care ⁸	Ancillary Services ⁹
Belleville, IL	657GA	Urban	6,197	421	NA	NA	MOVE! Program ¹⁰ Pharmacy
Florissant, MO	657GB	Urban	7,825	317	NA	NA	Diabetes Care Diabetic Retinal Screening Nutrition MOVE! Program
O'Fallon, MO	657GD	Urban	7,643	1,075	NA	NA	Diabetes Care Diabetic Retinal Screening Nutrition MOVE! Program
Washington, MO	657GS	Rural	3,584	768	NA	NA	MOVE! Program

³ Includes all CBOCs in operation before April 1, 2014.

⁴ An encounter is a professional contact between a patient and a practitioner vested with responsibility for diagnosing, evaluating, and treating the patient's condition. Encounters occur in both the outpatient and inpatient setting.

⁵ The denoted Specialty Care and Ancillary Services are limited to Primary Clinic Stops with a count ≥ 100 encounters during the October 1, 2013, through September 30, 2014, timeframe at the specified CBOC.

⁶ <http://vssc.med.va.gov/>

⁷ The total number of encounters for the services provided in the "Specialty Care" column.

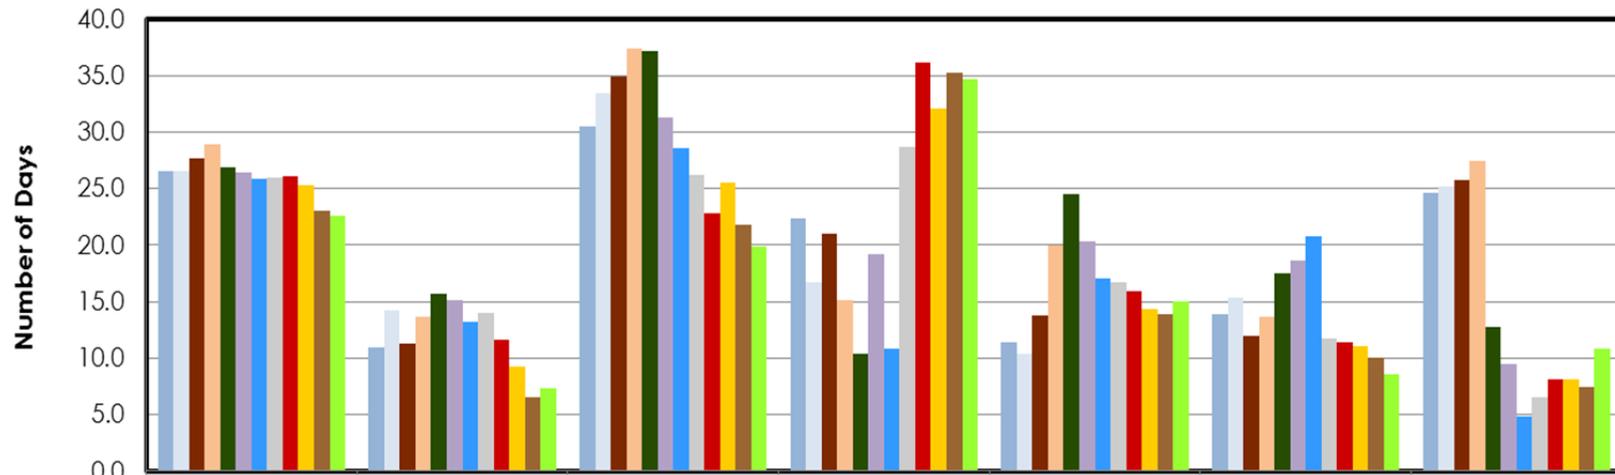

⁸ Specialty Care Services refer to non-Primary Care and non-Mental Health services provided by a physician.

⁹ Ancillary Services refer to non-Primary Care and non-Mental Health services that are not provided by a physician.

¹⁰ VHA Handbook 1120.01, *MOVE! Weight Management Program for Veterans*, March 31, 2011.

Data Definition.^e This is a measure of where the patient receives his primary care and by whom. A low percentage is better. The formula is the total VHA ER/Urgent Care/FEE ER encounters while on panel (including FEE ER visits) divided by the number of Primary Care encounters while on panel with the patient’s assigned primary care (or associate) provider plus the total VHA ER/Urgent Care/FEE ER encounters (including FEE ER visits) while on panel plus the number of Primary Care encounters while on panel with a provider other than the patient’s Primary Care Provider/Associate Provider. No data was reported in VSSC for the Washington CBOC (657GS).

FY 2014 Team 2-Day Contact Post Discharge Ratio

Data Definition.^e The percent of discharges (VHA inpatient discharges) for the reporting timeframe for assigned Primary Care patients where the patient was contacted by a member of the Patient Aligned Care Team the patient is assigned to within 2 business days post discharge. Discharges resulting in death and discharges where a patient is readmitted within 2 days of discharge are excluded from this metric. No data was reported in VSSC for the Washington CBOC (657GS).

Veterans Integrated Service Network Director Comments

**Department of
Veterans Affairs**

Memorandum

Date: April 1, 2015

From: Director, VA Heartland Network (10N15)

Subject: **Review of CBOCs and OOCs of VA St. Louis Health Care System, St. Louis, MO**

To: Director, Kansas City Office of Healthcare Inspections (54KC)

Director, Management Review Service (VHA 10AR MRS OIG CAP CBOC)

Attached is the response from VA St Louis Health Care System. I have reviewed and concur with the Interim Medical Center Director responses. Thank you for the review and its focus on continuous improvement.

For additional questions, please feel free to contact Mary O'Shea VISN 15 Quality Management Officer.

(original signed by:)

William P. Patterson, MD, MSS
Network Director
VA Heartland Network (VISN 15)

Facility Director Comments

**Department of
Veterans Affairs**

Memorandum

Date: April 1, 2015

From: Interim Director, VA St. Louis Health Care System (657/00)

Subject: **Review of CBOCs and OOCs of VA St. Louis Health Care System, St. Louis, MO**

To: Director, VA Heartland Network (10N15)

I have reviewed the report, we appreciate the feedback from the OIG CBOC review conducted at the VA St Louis Health Care System. Please find the attached response for each recommendation. I am in agreement with the findings presented in this review.

Corrective action plans have been established with completion dates as outlined in this report.

Denise M. Deitzen
Interim Medical Center Director
VA St Louis Health Care System

Comments to OIG's Report

The following Director's comments are submitted in response to the recommendations in the OIG report:

OIG Recommendations

Recommendation 1. We recommended that the information technology server closet at the Primary Care Team 2 Annex is maintained according to information technology safety and security standards.

Concur

Target date for completion: April 15, 2015

Facility response: An information technology service closet access sign in sheet will be placed in the Primary Care Team 2 closet in accordance with the information technology safety and security standards. The Chief OI&T or designee will inspect the closet and sign in.

Recommendation 2. We recommended that clinic staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.

Concur

Target date for completion: May 15, 2015

Facility response: Associate Chief of Staff (ACOS) for Primary Care Services will ensure clinicians document the offer of further treatment of patients diagnosed with alcohol dependence. To assess compliance a sample of 50 randomly selected medical records per month will be audited until 90 percent compliance is reached for 3 consecutive months. The results will be reported to Performance Improvement Committee.

Recommendation 3. We recommended that Clinic Registered Nurse Care Managers receive motivational interviewing training within 12 months of appointment to Patient Aligned Care Teams.

Concur

Target date for completion: June 1, 2015

Facility response: The Associate Chief Nurse for Primary Care, Medicine, Surgery, Mental Health and Extended care will ensure that all Clinic Registered Nurse Care Managers will receive motivational interviewing within 12 months of appointment to Patient Aligned Care Team. Completed training will be recorded in Talent Management

System (TMS) using local course number. PACT Coordinator will monitor compliance monthly until 90 percent for 3 consecutive months.

Recommendation 4. We recommended that Clinic Registered Nurse Care Managers, providers, and clinical associates receive health coaching training within 12 months of appointment to Patient Aligned Care Teams.

Concur

Target date for completion: June 1, 2015

Facility response: The Associate Chief of Staff and Associate Chief Nurse for Primary Care, Medicine, Surgery, Mental Health and Extended care will ensure that all Clinic Registered Nurse Care Managers, providers and clinical associates will receive health coaching training within 12 months of appointment to Patient Aligned Care Team. Completed training will be recorded in Talent Management System (TMS) using local course number. PACT Coordinator will monitor compliance monthly until 90 percent for 3 consecutive months.
