A Phase I ESA seeks to identify any recognized environmental conditions (RECs). RECs are the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

The state shall complete the CATEX form for VA review and signature and, as needed, address potential extraordinary circumstances by providing descriptions, plans, regulatory compliance information, and protective measures for extraordinary circumstances that may be present, such as asbestos, lead-based paint, PCBs, endangered species, wetlands, historic properties, or any others; see CATEX form for complete list.

In general, the EA states the purpose of and need for the proposed project, identifies alternatives for meeting the purpose and need, and evaluates the potential environmental impacts of the proposed action and alternatives, including impacts from taking no action. Upon VA approval, the state shall publish the Draft EA for public, interagency, and tribal comment; address any comments in a Final EA; and draft a finding of no significant impact (FONSI). The draft Final EA and draft FONSI shall also be provided for VA review and approval. The FONSI will include two signature blocks: VA's Environmental Engineer and VA's SVH Program Manager.
