(e) Assignments. This assignment serves as the MRA Veterans Integrated Service Networks (VISN) HIM with responsibility for the management and direction of the health information management program. VISN medical record administrators serve at the Network level and have health information management oversight responsibilities for the Network. This position may be supervisory or non-supervisory. The MRA VISN HIM is responsible for the programmatic oversight of HIM programs and assures that the VISN has a state-of-the-art HIM program that meets all accreditation, regulatory, and VA requirements, in addition to meeting the needs of executive management. The MRA VISN HIM coordinates overall strategy for HIM services across the multi-facility integrated healthcare system. They implement and support all VISN HIM initiatives and activities and provide operational support to HIM departments at the facility level. The MRA VISN HIM develops, implements, and provides oversight to facility HIM leadership in the management of accuracy and timeliness of work, work processes, and overall workload responsibilities. This position is responsible for all aspects of the HIM program, which includes developing and/or acquiring shared resources, such as contracts, staff, and education and training opportunities.

(10) Medical Records Administrator, GS-14

(a) Experience. One year of creditable experience equivalent to the next lower grade level that demonstrates the KSAs described at that level. In addition, the candidate must demonstrate the following professional KSAs:
AND

(b) Certification. Employees at this level must have a HIM Certification.

NOTE. See paragraph 2d of this appendix for detailed definitions of HIM Certification.

AND

(c) Demonstrated Knowledges, Skills, and Abilities

[i]. Ability to develop, maintain, and evaluate health information management policy and program needs at the national level, and serve as a national technical expert in the medical record administration/health information management program area;

[iii]. Ability to provide formal clinical, research, and/or educational consultation on a wide range of health information management issues for use by the field MRAs and VHA Central Office program officials;

[iii]. Ability to determine methodologies for achieving compliance with new and changing health information program issues for use by the field MRAs and VHA Central Office program officials.

(d) Assignments. [These positions are for MRAs assigned to VHA Central Office and] are limited to positions which have national level program assignments as a primary responsibility. They function as a national technical expert in the field of medical record administration/health information management, provide leadership and guidance at the national level, and have final and independent technical authority.

They initiate, develop, oversee, and direct assigned national HIM program areas, assess their impact on VHA HIM programs system-wide, and produce work products, such as written policies and procedures, guidelines, references, and training. They represent the VHA HIM program office on issues in areas such as the electronic health record, the personal health record, health information exchange, privacy, clinical coding, data capture, documentation principles, health record standards, health record maintenance, release of information, records management, and other areas that are either impacted by or impact HIM. The HIM specialist represents HIM on a wide variety of groups, committees, and task forces, which requires a thorough understanding of HIM policies, requirements, and business needs, and ensures those needs are adequately articulated and included in policy or process development. They participate as a subject matter expert on investigative teams, upon request of the Office of Medical Inspector,
Office of General Counsel, Office of Inspector General, and Congressional Affairs and work with HIM staff at facilities to collect relevant information. They act as the HIM subject matter expert and advisor to various customers, agencies, programs, and offices within and external to VHA. The HIM specialist serves as VHA’s HIM subject matter expert on federal and/or national organizations. They collaborate with facilities and networks to identify HIM program strengths and weaknesses to determine corrective actions for remediation, when applicable. The HIM specialist identifies potential best practices for implementation at facilities. The HIM specialist monitors HIM metrics, identifies trends, and provides training to the field regarding data patterns and trends. They develop sustainable methodologies, at the national level, for achieving compliance with new and changing regulations pertaining to all assigned program areas related to HIM, to improve program effectiveness.

5]. DEVIATIONS.

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for [MRAs] in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, [warrant] such action based on demonstrated competence to meet the requirements [of] the proposed grade.

[b. Under no circumstances will the certification requirements be waived.

c.] The placement of individuals in grade levels [or assignments] not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. § 7401(3), 7402, 7403 and 7405.]
[APPENDIX G34. PROSTHETIC REPRESENTATIVE QUALIFICATION STANDARD
GS-0672
Veterans Health Administration]

1. COVERAGE. This standard applies to all Prosthetic Representative positions in the Veterans Health Administration (VHA). Prosthetic Representatives perform the work of rendering prosthetic and sensory aids services to disabled patients. The work may include planning, developing, and directing a prosthetic and sensory aids program. The Prosthetic Representative works with Veterans, caregivers, vendors, and the clinical team to ensure the right devices, equipment, services, and benefits are matched with patient rehabilitative and medical needs.

2. DEFINITIONS

   a. **Appointing Official.** The Human Resources Management Officer is delegated appointing authority, to process and authenticate notifications of personnel actions, and to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

   b. **Approving Official.** The Veterans Integrated Service Network (VISN) Director, Medical Center Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

   c. **Journey Level.** The full performance level for this qualification standard is the GS-11 grade level.

   d. **Paraprofessional.** A job title given to persons in various occupational fields, such as education, healthcare, engineering, and law, who are trained to assist professionals, but do not themselves have professional licensure.

   e. **Creditable Experience.** To be creditable, the experience must have demonstrated the use of knowledge, skills, and abilities associated with Prosthetic Representative responsibilities. The experience is only creditable if documented in the application and verifiable through employment references and/or other means. Examples of qualifying experience include experience in a health care setting, and familiarity with home medical equipment, rehabilitation, home oxygen, visual or hearing impairment, assistive technology, orthotics, or prosthetics.

   f. **Part-Time Experience.** Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.

   g. **Specialty Services.** These are services that are unique to more complex facilities and require in-depth, specialized knowledge of the multiple disabilities that are associated with patients receiving medical and rehabilitative services in these specialty programs. The Prosthetic Representative needs to be aware of the different rehabilitative treatment goals and strategies that are unique to patients in these specialized programs and specific program requirements. These specialty services include, but are not limited to:
(1) Prosthetic implants (biological and non-biological);

(2) Blind Rehabilitation Center;

(3) Orthotic and Prosthetic Laboratory;

(4) Poly-Trauma Level I Center;

(5) Spinal Cord Injury Center - injuries that disrupt movement, sensation, and function often, with paralysis can impact lower body, upper body, bowel and bladder;

(6) Traumatic Brain Injury Center - injuries that frequently occur as part of the polytrauma spectrum in combination with other disabling conditions, such as amputations, burns, pain, fractures, auditory and visual impairments, post-traumatic stress disorder, and other mental health conditions; and

(7) Driver Rehabilitation Program.

2. BASIC REQUIREMENTS

a. Citizenship. Citizen of the United States. After a determination is made that it is not possible to recruit qualified citizens, necessary personnel may be appointed on a temporary basis under authority of 38 U.S.C. 7405 without regard to the citizenship requirements of 38 U.S.C. 7402 or any other law prohibiting the employment of or payment of compensation to a person who is not a citizen of the United States. Candidates must meet all other requirements for the grade level and position concerned.

b. Experience and Education. Individual must meet at least one of the requirements below.

(1) Experience. One year of creditable experience that demonstrates: Knowledge of basic anatomy and medical terminology; knowledge of accounting methods; ability to research, analyze, comprehend, and apply decisions; basic knowledge of inventory management procedures; ability to use computer software packages for word processing, spreadsheet development, and database management; and ability to work independently and as a member of a team; or

(2) Education. A bachelor’s degree from an accredited educational institution AND at least 24 semester hours in course work related to health care, public administration, or business. The 24 semester hours could include but is not limited to any combination from the following fields: occupational therapy, physical therapy, kinesiotherapy, social work, psychology, prosthetics, orthotics, respiratory therapy, assistive technology, business law, leadership, healthcare, public administration, or business management. This course work may have been completed within the degree or in addition to the degree; or

(3) Experience/Education Combination. Equivalent combinations of experience and education are qualifying.
c. Grandfathering Provision. All persons employed in VHA as a Prosthetic Representative on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees grandfathered into the GS-0672 occupational series as prosthetic representatives may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) Prosthetic Representatives who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees who are retained as a Prosthetic Representative under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as a prosthetic representative.

d. Foreign Education. To be creditable, education completed outside the United States must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials, and such education must have been deemed at least equivalent to experience gained in conventional United States programs.

e. Physical Requirements. Pre-placement and periodic physical examinations are required for hybrid occupations to ensure workers are placed in positions where they can perform the essential functions of their job including their physical, mental and emotional capacities, without endangering their health or the health of their co-workers. See VA Directive and Handbook 5019.

f. English Language Proficiency. Candidates will not be appointed under authority of 38 U.S.C. chapters 73 or 74, to serve in a direct patient-care capacity in VHA who are not proficient in written and spoken English. See Chapter 2, section D, paragraph 5a, this part.

3. Grade Determinations. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:

(1) GS-5 Prosthetic Representative (Entry Level)

(a) Experience. None beyond the basic requirement.

(b) Assignment. Assignments at this grade level are entry level trainee in nature where the individual receives developmental assignments designed to build upon the base knowledge, skills, and abilities. At this level, the Prosthetic Representative receives training and instruction to develop proficiency in essential occupational tasks. The work is performed under close supervision.
(2) GS-7 Prosthetic Representative (Developmental Level)

(a) **Experience.** In addition to the basic requirements, one year of creditable experience equivalent to the GS-5 grade level, directly related to the position to be filled.

(b) **Demonstrated Knowledge, Skills, and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to understand and apply processes, procedures, regulations, and laws as it applies to purchasing and the provision of prosthetic items/services.

2. Ability to coordinate multiple requests for durable medical equipment (DME), including repairs, services, and benefits.

3. Ability to act as a liaison with and work effectively with health care providers, patients, caregivers and vendors to ensure that the most appropriate device and services are received timely.

4. Ability to monitor contractors and vendors for compliance with contract requirements.

(c) **Assignment.** At this level, responsibilities include interaction with Veterans, caregivers, and clinical staff by answering questions related to benefit programs such as automobile adaptive equipment, home improvement and structural alterations, and clothing allowance programs. Assignments include developmental duties involving more complex work performed under supervision. The Prosthetic Representative addresses questions about the provision of prosthetic items, home care equipment, benefits or service issues, to include discharge planning requirements. The employee ensures requests for items or services are complete and received in accordance with established timeframes. Work may include authorizing and preparing purchase orders for a wide variety of prosthetic and orthotic devices, medical supplies and home medical equipment and repairs. For orders exceeding the micro-purchase threshold, they may conduct market research, price history review, complete justification and approval, and submit to the contracting department. They ensure correct Healthcare Common Procedure Codes are entered into the appropriate database(s). They ensure surgical implants are Federal Drug Administration (FDA) approved; shipped to retain product integrity; delivered to correct location; and received before for the surgical procedure. They collaborate with clinical staff when devices and equipment requires repair or replacement and takes necessary actions to resolve issues.

(3) GS-9 Prosthetic Representative (Developmental level)

(a) **Experience.** In addition to the basic requirements, one year of creditable experience equivalent to the GS-7 grade level, that is directly related to the position to be filled.

**OR,**

(b) **Education.** Education equivalent to two full years of progressively higher level graduate education or Master’s or equivalent graduate degree from an accredited educational institution AND at least 24 semester hours in course work related to health care, public administration, or business. The 24 semester hours may include, but is not limited to, any combination from the following fields:
occupational therapy, physical therapy, kinesiotherapy, social work, psychology, prosthetics, orthotics, respiratory therapy, assistive technology, business law, leadership, healthcare, public administration, or business management. This course work may have been completed within the degree or in addition to the degree.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of methods to identify trends and causation factors sufficient to analyze prepared data and gather information to inform and advise management.

2. Ability to organize, prioritize, and monitor actions to ensure timeliness.

3. Ability to understand and articulate the benefits program options available. This includes communicating with patients, caregivers, health care providers and vendors.

4. Ability to apply and educate others about national, VISN, and facility directives, policies, procedures and regulations.

5. Ability to work effectively with a clinical team and provide recommendations for prosthetic devices.

(d) **Assignment.** The Prosthetic Representative works directly with Veterans and clinical teams to assist with applications for benefits related to benefit programs such as automobile adaptive equipment, home improvement and structural alterations, and clothing allowance programs. The employee ensures devices, equipment, and services, are based on the patient’s rehabilitative and medical needs. They work closely with the treatment team in development of prescriptions and provide technical assistance and guidance to assist in planning and coordination to obtain equipment, services, and benefits. The Prosthetic Representative conducts home visits, in collaboration with other healthcare providers to determine if requested equipment is appropriate or can be installed in the home. They are familiar with national, VISN, and facility contracts that apply to Prosthetics and Sensory Aids Service (PSAS), and responsible for providing management with documentation pertaining to contract compliance issues or concerns. This includes working with clinical staff to create quality improvement reports. They work closely with the clinical teams to assist in identifying products available on contract that meet the medical needs of patients. Duties are typically performed independently with minimal supervision. Prosthetics representatives have knowledge and the ability to apply and educate others about national, VISN, and facility directives, policies, procedures and regulations. They analyze and interpret data for trends and provide guidance to improve quality assurance, policies, and procedures.

(4) **GS-11 Prosthetic Representative (Full Performance Level)**

(a) **Experience.** In addition to the basic requirements, one year of creditable experience equivalent to the GS-9 grade level, that is directly related to the position to be filled.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:
1. Ability to work independently to set priorities; delegate tasks; meet multiple deadlines; analyze organizational problems; and develop and implement effective solutions to optimize quality, efficiency, performance, and productivity.

2. Ability to work with a team, to provide technical guidance, plan, organize, and coordinate activities to effectively complete job duties of assignment, such as distributing workload; and monitoring the accuracy, status and progress of work.

3. Ability to communicate tactfully and effectively, both orally and in writing, to meet program objectives. This may include preparing reports in various formats and presenting data to various organizational levels.

4. Ability to assist in staff development, outcome management, and strategic planning.

5. Ability to act as liaison between staff to resolve informal employee complaints and concerns.

6. Knowledge of rehabilitative treatment goals and strategies that are unique to patients in specialized programs and knowledge of those specific program requirements. (See paragraph 2.g. above)

(c) Assignment. Work at the full performance level is performed independently and with minimal supervision. Prosthetic Representatives provide oversight, administration and coordination for a number of services including but not limited to procurement, clinical services, customer service/reception, inventory management associated with medical, rehabilitative, and durable medical equipment devices; home durable medical equipment delivery/set-up/installation; visual or hearing devices; assistive technology; and orthotics/prosthetics. The Prosthetic Representative assists with management and oversight of contract programs such as home oxygen, durable medical equipment, and eyeglasses. They are responsible for the administration of benefit programs, such as home and structural alterations, automobile adaptive equipment, and clothing allowance. The Prosthetic Representative is aware of rehabilitative treatment goals and strategies that are unique to patients in order to obtain specialized service programs as stated in paragraph 2.g. above. When non-contract products are required, the Prosthetic Representative assists the clinical team in developing appropriate justifications, to ensure access to the most clinically appropriate products and services when such as product functionality not available with contract products to ensure access to the most clinically appropriate products and services. The Prosthetic Representative works directly with Veterans and clinical teams to assist with applications and answer questions related to benefit programs that cannot be handled by lower level employees. They provide recommendations to the treatment team regarding the development of prescriptions and provide technical assistance and guidance on planning and coordination efforts, to address complex patient medical and rehabilitative needs for equipment, services, and benefits. They develop and monitor quality improvement metrics to ensure the program is functioning in accordance with all established guidelines. They have a full working knowledge of national, VISN, and facility contracts that apply to PSAS and responsible for providing management with documentation pertaining to contract compliance issues or concerns. This includes working with clinical staff to make recommendations for improvements based on quality improvement reports. At this level, employees may serve as the lead for the prosthetic program providing oversight of specific services within PSAS. They may assist with oversight duties including making work assignments, monitoring work flow,
providing input on performance, resolving daily workplace issues, and maintaining efficient flow of patient care. They may provide training to PSAS staff and other medical center employees, students and/or trainees.

(5) **GS-12 Prosthetic Representative (Supervisor)**

(a) **Experience.** At least one year of experience equivalent to the GS-11 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

a. 1. Leadership and managerial skills, including skill in interpersonal relations and conflict resolution to deal with employees, team leaders, and managers.

2. Ability to perform the full range of supervisory duties, including responsibility for assignment of work to be performed; evaluation of performance; selection of staff; and recommendation of awards, advancements, and disciplinary actions.

3. Ability to manage a health care program that provides home medical equipment, rehabilitation services, home oxygen, visual or hearing impairment devices, assistive technology, orthotics, or prosthetics.

4. Skill in coordinating work flow and work assignments.

5. Ability to counsel patients and work effectively with a clinical team to resolve conflict.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and must be performed by the incumbent at least 25% of the time. The supervisor is responsible for the supervision, administrative management, and direction of assigned PSAS staff. The supervisor is delegated full administrative and professional responsibility for planning and directing the staff activities for the section or equivalent work unit. Program areas of responsibility include, but are not limited to, procurement; PSAS clinical services, customer service/reception, inventory management associated with medical, rehabilitative, and durable medical equipment devices, home durable medical equipment deliver/set-up/installation, visual or hearing devices, assistive technology, orthotics/prosthetics, PSAS contract development, management and oversight of contract programs, such as home oxygen, durable medical equipment, orthotics/prosthetics, and eyeglasses, and benefit programs, such as home and structural alterations, automobile adaptive equipment, clothing allowance. They serve as contract officer representative for PSAS contracts and chair facility committees and administer benefit programs. The Supervisor provides education and training to Veterans, caregivers, VA clinical teams and PSAS staff. The Supervisor assures compliance with accrediting agency and regulatory requirements; establishes and monitors performance and quality metrics; reviews and modifies work processes to achieve optimal efficiency and effectiveness; ensures customer satisfaction; and takes corrective actions as needed. He/She develops policies and procedures; manages document control; develops performance standards, position descriptions and functional statements; and is responsible for professional and administrative management of an assigned area to include budget execution. Approves and disapproves employee
leave requests; monitors time and attendance; and ensures that all requests for hiring, promotions, awards and disciplinary actions are justified and carried out according to appropriate VA Human Resources policies and procedures. The supervisor maintains interdepartmental relations with other services to accomplish medical center goals.

(6) **GS-12 Prosthetic Representative (Assistant Chief)**

(a) **Experience.** At least one year of experience equivalent to the GS-11 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to perform the full range of supervisory duties, including responsibility for assignment of work to be performed; assessment of competencies; evaluation of performance; selection of staff; and recommendation of awards, advancements, and disciplinary actions.

2. Ability to analyze data and make recommendations to optimize quality, efficiency, performance, and productivity within the service.

3. Ability to manage a health care program that provides home medical equipment, rehabilitation services, home oxygen, visual or hearing impairment devices, assistive technology, orthotics, or prosthetics.

4. Knowledge of compliance and regulatory accrediting organizations.

5. Ability to manage, interpret, and present fiscal data (i.e. fund controls, contracts and equipment expenditures), forecast resource and equipment needs, and administer an allocated budget.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Assistant Chief positions are normally located at larger facilities that provide specialty services to smaller facilities and report to a PSAS Service Chief. Assignment as an Assistant Chief is restricted to those serving as a full Assistant to the Chief. Assistant Chiefs share with the Chief full responsibility for managing and supervising all phases of prosthetic operations. This person functions as the Chief of the service in the Chief’s absence. They develop and maintain a system of internal reviews that ensure service programs operate in compliance with regulatory and accrediting organizations. They contribute to the effective utilization of resources, budgetary allocation and fiscal management. He/She makes selections; assigns personnel; and provides direction to subordinate staff. They manage the training and evaluation of staff and develop local organizational policies and procedures. Serves as liaison between Prosthetic Service and other departments. Typically, there are no subordinate supervisory prosthetic representatives at the facility level.

(7) **GS-12 Prosthetic Representative (Service Chief)**

(a) **Experience.** At least one year of experience equivalent to the GS-11 grade level.
(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of legal, ethical, and professional standards applicable to providing home medical equipment, rehabilitation services, home oxygen, visual or hearing impairment devices, assistive technology, or orthotics/prosthetics services.

2. Ability to manage, interpret, and present fiscal data (i.e. fund controls, contracts and equipment expenditures), forecast resource and equipment needs and administer an allocated budget.

3. Ability to manage a health care program that provides home medical equipment, rehabilitation services, home oxygen, visual or hearing impairment devices, assistive technology, orthotics, or prosthetics.

4. Ability to perform the full range of supervisory duties, including responsibility for assignment of work to be performed; assessment of competencies; evaluation of performance; selection of staff; and recommendation of awards, advancements, and disciplinary actions.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. At this level, the Service Chief has full responsibility for managing and supervising all aspects of prosthetic operations and is the highest level professional position, at the facility, with responsibility for the professional practice of facility prosthetic and sensory aid service staff. Assignments may include managing programs at more than one facility. The Service Chief has full management and supervisory responsibility for program management, education, human resource management and supervision, and organizational stewardship for the prosthetic program. They are responsible for all supervisory functions including recruitment and hiring. He/She approves and disapproves employee leave requests; monitors time and attendance; and ensures that all requests for hiring, promotions, awards and disciplinary actions are justified and carried out according to appropriate VA Human Resources policies and procedures. Typically, there are no subordinate supervisory prosthetic representatives at the facility level.

(8) **GS-13 Prosthetic Representative (Service Chief)**

(a) **Experience.** At least one year of experience equivalent to the GS-12 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of directives, handbooks, clinical practice guidelines, and regulations that apply to Prosthetic and Sensory Aids Service to resolve complex, controversial, or precedent-setting matters.

2. Ability to manage specialty prosthetic services. This includes the ability to provide specialty services based on the unique needs of the patient.

3. Skill and ability to effectively advise senior management officials.
4. Ability to manage a health care program that provides home medical equipment, rehabilitation services, home oxygen, visual or hearing impairment devices, assistive technology, orthotics, or prosthetics.

5. Ability to supervise/manage through subordinate supervisors the activities of prosthetic representatives that have diverse functions.

6. Ability to establish and monitor productivity standards and production and performance priorities.

c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Service chiefs have full responsibility for managing and supervising all phases of Prosthetic and Sensory Aids Service operations. This is the highest level professional position, at the facility, with responsibility for the professional practice of all facility PSAS staff. Individuals at the GS-13 level are typically assigned as Chiefs at a complex facility that provide multiple specialty services such as those described in paragraph 2.g and may manage more than one facility through subordinate supervisors. The chief has full management and supervisory responsibility for the PSAS program. Service Chiefs plan, develop, organize, direct, manage, control, implement and evaluate programs for the Service. They have overall responsibility to ensure proper coordination between care delivered by PSAS and the overall delivery of healthcare within the facility. They are responsible for all supervisory functions, including recruitment and hiring, administering employee leave requests and ensuring all requests for hiring, promotions, awards and disciplinary actions are justified and carried out according to appropriate VA Human Resources policies and procedures. The Chief is a member of the senior leadership team providing advice for integrated care programs for a diverse Veteran population with multiple diagnoses, and other needs. The Chief is involved in management planning to achieve medical center, VISN, and national goals.

(9) **GS-13 Deputy VISN Prosthetic Representative**

(a) **Experience.** At least one year of experience equivalent to the GS-12 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to build and maintain partnerships with top management and stakeholders.

2. Skill in persuading others and gaining cooperation to accomplish goals.

3. Ability to effectively communicate orally and in writing regarding complex clinical and technical issues.

4. Knowledge of directives, handbooks, clinical practice guidelines, and regulations that apply to Prosthetic and Sensory Aids Service to develop and implement operational programs.

5. Ability to conduct regional reviews of Prosthetic and Sensory Aids Service.
(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Deputy VISN Prosthetic Representatives are program managers responsible for assisting in the administration and management of Prosthetic and Sensory Aids Service for an entire network. Assignment may be a collateral duty or a separate position within the VISN. The Deputy assists in providing VISN-level oversight to facility Prosthetic Programs to achieve mission goals by utilizing available resources, adjusting workloads, developing/implementing/monitoring performance measures, and ensuring accountability. They assist Prosthetic Representatives in all aspects of PSAS operation within a network. The Deputy assists with the development of policies and standard operating procedures. They assist with communications and reports for VACO, VISN, and facility Leadership. The Deputy provides advice for new and renovated space for Prosthetic and Sensory Aids Services. Assignments include VISN oversight of quality and performance metrics, staffing and workload distribution, recruitment, staff training requirements, contract development, and compliance with accreditation bodies such as the American Board for Certification in Prosthetics, Orthotics, and Pedorthics (ABC) and Joint Commission; and stakeholder satisfaction. Analyzes results across facilities in the VISN and recommends changes to procedures to enhance services and correct deficiencies. Assists in the coordination of VISN level review and monitoring of high profile benefit programs which include clothing allowance, home oxygen, automobile adaptive equipment, and home and structural alterations to assure all program activities are carried out in accordance with eligibility requirements and VHA regulations. He/She assists in developing VISN level proposals, business, and action plans. Assists the VISN Prosthetic Representative with interaction with Veteran Service Organizations; responds to Congressional inquiries; cooperates with General Accounting Office, Office of the Inspector General, ABC, and Joint Commission audits, and collaborates with other Federal agencies or organizations outside the Federal health care system. He/She reports to the VISN Prosthetic Representative and has interactions with VACO, VISN, and facility level Leadership in the execution of responsibilities. Each VISN may only establish one VISN Deputy Prosthetic Representative position.

(10) GS-14 Veteran Integrated Service Network Prosthetic Representative

(a) Experience. At least one year of experience equivalent to the GS-13 grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to build and maintain partnerships with VISN, facility, and VACO Leadership and Veteran Service Organizations.

2. Skill in persuading others and gaining cooperation to accomplish goals.

3. Ability to effectively communicate orally and in writing regarding complex clinical and technical issues.

4. Knowledge of directives, handbooks, clinical practice guidelines, and regulations that apply to Prosthetic and Sensory Aids Service to develop and implement operational programs.
5. Ability to conduct regional level reviews of Prosthetic and Sensory Aids Service.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Veteran Integrated Service Network Prosthetic Representatives (VPRs) are supervisory or non-supervisory program managers responsible for the administration and management of Prosthetic and Sensory Aids Service for an entire network comprised of varying complexity level facilities. They serve as an advisor to the VA Central Office for development of PSAS policies. VPRs manage and provide VISN-level oversight to facility PSAS Programs to achieve mission goals by standardizing policies, standard operating procedures, and best practices utilizing available resources; adjust workloads; develop/implement/monitor quality and performance measures; and ensure accountability. He/She serves as the VISN lead on all aspects of PSAS operations within a network, such as development of policies and standard operating procedures, communications and reports for VACO, VISN, and facility Leadership. Additionally, the VPR provide guidance on developing new and renovated space for PSAS, quality and performance metrics, staffing and workload distribution, recruitment, staff training requirements, contract development, and ensuring compliance with accreditation bodies such as the ABC and Joint Commission; and stakeholder satisfaction. They analyze results across facilities in the VISN and recommend changes to procedures to enhance services and correct deficiencies. They coordinate VISN level review and monitoring of specialty programs that include clothing allowance, home oxygen, automobile adaptive equipment, home and structural alterations to assure all program activities are carried out in accordance with eligibility requirements and VHA regulations. They develop VISN level proposals, business, and action plans. VPRs serve as lead for PSAS interactions with Veteran Service Organizations; respond to Congressional inquiries; cooperate with General Accounting Office, Office of the Inspector General, ABC, and Joint Commission audits; and collaborate with other Federal agencies or organizations outside the Federal health care system. They report to VISN Leadership and have interactions with VA Central Office, VISN, and facility level Leadership in the execution of responsibilities. Each VISN may establish only one VISN Prosthetic Representative position.

(11) GS-14 Prosthetic Representative National Program Manager

(a) Experience. At least one year of experience equivalent to the GS-13 grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to work effectively with key VA Central Office stakeholders including Veteran Service Organizations and VISN stakeholders such as VISN Prosthetic Representatives.

2. Ability to effectively communicate orally and in writing regarding complex clinical and technical issues.

3. Skill in persuading others and gaining cooperation to accomplish goals.

4. Knowledge of directives, handbooks, clinical practice guidelines, and regulations that apply to Prosthetic and Sensory Aids Service.
(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Employees at this level serve as a National Program Manager responsible for multiple programs at the national level and interact with other government agencies and standards organizations. Develop national level proposals and business and action plans.

5. **DEVIATIONS**

   a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

   b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health or designee in the VHA Central Office prior to placement in the position.

**Authority: 38 U.S.C. §§ 7402, 7403.]**
APPENDIX G35. MEDICAL RECORD[S] TECHNICIAN [(CANCER REGISTRAR)]
QUALIFICATION STANDARD
GS-0675
Veterans Health Administration

1. COVERAGE. The following are the requirements for appointment as a Medical Record Technician (MRT) [(Cancer Registrar)] in the Veterans Health Administration (VHA). [ ] [Cancer registrars maintain clinical registries and work to meet the standards of regulatory and accrediting agencies that approve cancer programs and/or other programs requiring registries.] Coverage under this standard and the assignment of individuals to this occupation is restricted to the specific position [ ] identified above. [All qualification requirements for other Medical Records Technician parenthetical titles are in the respective newly established qualification standard] in this handbook 5005 part II.

[2. DEFINITIONS.]

a. **Creditable Experience.** Knowledge of current medical record technology. To be creditable, the candidate’s experience must have demonstrated the use of knowledge, skills, and abilities associated with current cancer registry practice and may be paid or non-paid employment.

b. **Quality of Experience.** Experience is only creditable if it is either directly related to the position to be filled or in a related field. Qualifying experience must also be equivalent to the next lower grade level. Experience satisfying this requirement must be active practice, which is paid/non-paid employment as a MRT [(Cancer Registrar)].

c. **Part-Time Experience.** Part-time experience as a professional MRT is creditable according to its relationship to the full-time workweek. For example, a MRT would receive one week of full-time credit for each two weeks of half-time work.

[3.] BASIC REQUIREMENTS.

a. **Citizenship.** Be a citizen of the United States. Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with [38 U.S.C. § 7407(a).]

b. **Experience and Education**

   (1) **Experience.** One year of experience that indicates knowledge of medical terminology and general understanding of the health record. Six months of the required one year of experience must have provided the knowledge, skills, and abilities (KSAs) needed to perform MRT work.

   OR
(2) **Education.** Two years above high school with a minimum of 12 semester hours directly related to MRT work (e.g., courses in medical terminology, anatomy and physiology, and introduction to health records).

OR

(3) **Experience/Education Combination.** Equivalent combinations of experience and education are qualifying. The following educational/training substitutions are appropriate for combining education and experience:

(a) Six months of experience that indicates knowledge of medical terminology and general understanding of the health record and one year above high school with a minimum of six semester hours of health information technology courses.

(b) Successful completion of a course for medical technicians, hospital corpsmen, medical service specialists, or hospital training obtained in a training program given by the Armed Forces or the U.S. Maritime Service under close medical and professional supervision. Training may be substituted on a month-for-month basis for up to six months of experience, provided the training program included courses in anatomy, physiology, and medical record techniques and procedures. The position requires six additional months of experience that indicates knowledge of medical terminology and general understanding of the health record.

c. **Grandfathering Provision.** All persons employed in VHA as a [MRT (Cancer Registrar)] on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education that is part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) MRTs [(Cancer Registrar)] who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed on a temporary or permanent basis, until they fully meet the basic requirements of the standard.
(3) MRTs [(Cancer Registrar)] initially grandfathered into this occupation, who subsequently obtain additional education that meets all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

(4) Employees who are retained as a MRT [(Cancer Registrar)] under this provision and subsequently leave the occupation, lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as a MRT [(Cancer Registrar)].

e. **English Language Proficiency.** MRT (Cancer Registrar) candidates must be proficient in spoken and written English to be appointed as authorized by 38 U.S.C. § 7403(f).

[4.] **GRADE REQUIREMENTS.** [All individuals assigned to this occupation must have an approved title as described below:]

[a.] MRT (Cancer Registrar) [ ]

[b.] MRT (Cancer Registrar) Coordinator; or

[c.] MRT (Cancer Registrar) VISN Coordinator

[d. Lead MRT (Cancer Registrar)]

[5.] **GRADE DETERMINATIONS.**

a. [ ] MRT (Cancer Registrar), [GS-4]

   (1) **Experience or Education.** None beyond basic requirements.

   (2) **Assignment.** [MRT (Cancer Registrar)] at this level serve in entry level [ ] positions and receive close supervision from more experienced [MRT (Cancer Registrar)] staff members.

b. [ ] MRT (Cancer Registrar), [GS-5]

   (1) **Experience.** One year of experience equivalent to the next lower grade level or successful completion of four years of education above high school from an
accredited college or university with a minimum of 24 semester hours in health information technology.

(2) **Demonstrated [Knowledge, Skills, and Abilities].** In addition to the experience above, the candidate must demonstrate [all of] the following KSAs:

(a) Ability to utilize health information technology and various office software products utilized in MRT (Cancer Registrar) positions (e.g., the electronic health record, coding and abstracting software, release of information systems, etc.).

(b) Knowledge of the Joint Commission requirements, [Centers for Medicare & Medicaid Services], Commission on Cancer, and American College of Surgeons (ACoS) guidance and/or health record documentation guidelines.

(c) Ability to manage priorities and coordinate work to complete duties within required timeframes and ability to follow-up on pending issues.

(3) **Assignment.** MRTs (Cancer Registrar) at this grade level serve in developmental positions and receive guidance from more experienced MRT (Cancer Registrar) staff members for more complex issues and/or procedures.

c. **MRT (Cancer Registrar), [GS-6]**

(1) **Experience.** One year of experience equivalent to the next lower level.

(2) **Demonstrated [Knowledge, Skills, and Abilities].** In addition to the experience above, the candidate must demonstrate [all of] the following KSAs:

(a) Knowledge of medical terminology to understand the content of the medical record.

(b) Knowledge of anatomy and physiology to understand the location of the cancer.

(c) Ability to operate computerized programs to review documentation within the electronic medical record.

(d) Ability to notify appropriate parties and organize all required documentation to ensure complete case presentation at tumor boards.

(3) **Assignment.** MRT (Cancer Registrar) at this grade level searches the medical record to identify and abstract/code information. The abstract is conducted by collecting, summarizing, coding detailed demographic and clinical information, and assisting with organizing and maintaining the cancer registry data system.
Assists with lifetime follow-up on patients, including cancer status and vital status. Coordinates and participates on tumor boards to ensure that appropriate documentation is maintained.

d. [ ] MRT (Cancer Registrar), [GS-7]

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated [Knowledge, Skills, and Abilities].** In addition to the experience above, the candidate must demonstrate [all of] the following KSAs:

   (a) Knowledge of pathophysiology [ ] to understand the spread of the cancer disease process[.]

   (b) Ability to analyze the electronic health record and enter appropriate data into the OncoTrax cancer registry software abstract[.]

   (c) Knowledge of ACoS standards regarding tumor boards, including clinical staging, prognostic indicators, clinical guidelines, and clinical trials availability.

(3) **Assignment.** [MRTs (Cancer Registrar)] at this grade level serve in developmental cancer registrar positions by thoroughly searching the medical record to identify and abstract/code all information. Organizes and maintains the cancer registry data system. Reviews lifetime follow-up on patients including cancer status and vital status. Coordinates and attends multidisciplinary tumor boards to ensure that appropriate documentation is maintained. Abstracts by collecting, summarizing and coding detailed demographic, and clinical information.

e. [ ] MRT (Cancer Registrar), [GS-8]

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated [Knowledge, Skills, and Abilities].** In addition to the experience above, the candidate must demonstrate [all of] the following KSAs:

   (a) Knowledge of professional registry operations[.]

   (b) Knowledge of medical terminology, staging of cancer, and requirements of internal and external approving organizations[.]

   (c) Knowledge of the cancer committee processes and procedures [ ] to improve patient care and verify compliance with ACoS and/or facility standards[.]
(d) Ability to serve as a subject matter expert on cancer programs for the medical center.

(e) Skill in utilizing electronic health records and cancer registry software.

(3) **Assignment.** This is [ ] the full performance level for this assignment. [MRTs (Cancer Registrar)] at this level perform all tasks and duties autonomously. Searches the medical record to identify and abstract/code all information. Organizes and maintains the cancer registry data system. Reviews lifetime follow-up on patients including cancer status and vital status. Oversees tumor board documentation, ensuring documentation meets the requirements and standards set forth by ACoS and/or facility standards.Ascerts a random sampling of annual analytic case load for physician review to ensure quality registry data.

f. [ ] Lead MRT (Cancer Registrar), [GS-9]

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated [Knowledge, Skills, and Abilities].** In addition to the experience above, the candidate must demonstrate [all of] the following KSAs:

(a) Ability to organize work, set priorities, and delegate tasks/responsibilities [ ] to meet deadlines.

(b) Knowledge of neoplastic disease processes, cancer staging systems, biologic and molecular prognostic indicators to determine derived stage.

(c) Knowledge of reportable diseases, surveillance, epidemiology and end results program, cancer staging systems, multiple primary and histology rules, international classification of diseases for oncology, morphology and topography, cancer treatment modalities, and data requirements.

(d) Ability to analyze data using comparative statistical methods and present the data in graph format.

(e) Ability to interpret and apply facility bylaws regarding the cancer program.

(f) Knowledge of legal and regulatory requirements governing cancer registry operations to plan, organize, and maintain special cancer registries.

(g) Ability to communicate orally and in writing to ensure staff compliance with written directives, rules, and regulations.
(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Lead [MRTs (Cancer Registrar)] are responsible for developing, organizing, implementing and maintaining an accurate system to identify all reportable diagnoses, assuring that all eligible cases are identified and coded into the registry system. Utilizes the electronic health record to identify and abstract/code the required data elements. Conducts lifetime follow-up on patients, documenting the progression/recurrence of their disease and other required elements. Distributes workload and maintains productivity while assuring accuracy and completeness of registry data. Analyzes and submits data to the internal and external entities as required. Prepares routine statistical reports.

g. [ ] MRT (Cancer Registrar) Coordinator, GS-9

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated [Knowledge, Skills, and Abilities].** In addition to the experience above, the candidate must demonstrate [all of] the following KSAs:

(a) Knowledge and understanding of ACoS and/or facility requirements for administering, monitoring, and reporting compliance of the cancer program to the governing bodies[

(b) Ability to interpret data [ ] to set, evaluate, and adjust the cancer program and/or facility goals and objectives[

(c) Ability to inform cancer registry staff on the technical components of the cancer database, coordinate workflow and monitor data for accuracy and quality measures[

(d) Ability to multitask[

(f) Ability to communicate with diverse disciplines regarding the facility requirements of the cancer program[

(g) Ability to analyze and interpret data for use in facility strategic planning[

(h) Ability to develop cancer program/cancer registry policies and procedures to ensure patient-centered care for cancer patients in accordance with government-wide, agency, and facility requirements.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), [ ] range of variety, and be performed by the incumbent at least 25% of the time. [MRTs (Cancer Registrar)] function as the coordinator of all activities associated with the cancer
registry and cancer program. Provides technical direction to program clerks and technicians who assist with the cancer registry. Performs analysis of work processes to identify reasonable and efficient measurement of the quality of the work and identify areas of possible improvement. Prepares routine and special statistical reports, narratives and graphic representations requiring use of registry data. Conducts special studies and surveys for identifying opportunities to improve patient care. [MRT (Cancer Registrar)] are subject matter experts on ACoS and/or facility standards pertaining to setting and monitoring goals, presenting statistical and written reports to identify resource needs and process improvement opportunities, and participating in strategic planning. Serves as a liaison between the cancer committee and internal and external entities. Serves as a core member on cancer committees to ensure that the discussions are consultative, address patient management issues, and contain applicable staging schema. [MRT (Cancer Registrar)] are subject matter experts on registry and cancer program issues.

h. [ ] MRT (Cancer Registrar) VISN Coordinator, [GS-9]

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated [Knowledge, Skills, and Abilities].** In addition to the experience above, the candidate must demonstrate [all of] the following KSAs:

(a) Knowledge and application of program data sources, professional association standards, and other data resources.

(b) Ability to organize, coordinate and prioritize simultaneous work assignments, both individual and team related.

(c) Knowledge of data extraction, data and statistical analysis techniques, operations and research techniques, and methods of problem analysis to make appropriate recommendations.

(d) Ability to identify and recommend changes in procedures or programs that lead to accreditation and/or a minimum set of standards for cancer care.

(e) Knowledge of pertinent laws, regulations, policies and precedents relating to the use of cancer registry information.

(f) Ability to communicate both verbally and in writing with administrative and management personnel, line supervisors, and top-management to optimally disseminate information, resolve queries, and handle administrative functions.

(g) Ability to develop and implement training mechanisms for registry staff within the VISN.
(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.  [MRTs (Cancer Registrar)] function as VISN registry coordinator mentoring and training new and experienced tumor registrars within the VISN utilizing electronic cancer registry data collection systems. Performs quality assurance on registry data and may initiate studies to assess completeness, appropriateness and consistency in data collection. Encourages team building by means of teleconferencing and face-to-face meetings within the VISN to assure continuity of care, training, education, and support. Develops training mechanisms utilizing resources available via the web and other sources. Serves as VISN registry experts to VISN management and staff for all programs requiring access to registry data.  [MRT (Cancer Registrar)] are responsible for supporting programs with backlog abstraction and/or follow-up. Provides support in the development of cancer registrar programs including establishing a set of minimum standards for cancer care throughout the VISN.

[6.] **DEVIATIONS.**

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for MRTs [(Cancer Registrar)] in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

**Authority:** 38 U.S.C. §§ 7401(3), 7402, 7403, 7405, 7407(a)]
APPENDIX G36. DENTAL ASSISTANT QUALIFICATION STANDARD
GS-681
Veterans Health Administration

1. COVERAGE. Following are requirements for appointment as a Dental Assistant in the Veterans Health Administration (VHA). These requirements apply to all VHA dental assistants in the General Schedule (GS)-681 series.

2. BASIC REQUIREMENTS
   
   a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. Experience and Education
      
      (1) Experience. Six months experience that demonstrates the applicant’s ability to perform the work, or provides familiarity with the work.

      OR,

      (2) Education. Successful completion of a 1-year dental assistant program accredited by the American Dental Association’s Commission on [Dental] Accreditation [(CODA)].

      (3) Experience/Education Combination. Equivalent combinations of experience and education are qualifying.

   c. Certification. Public Law 97-35 requires that persons who administer radiologic procedures meet the credentialing standards in 42 CFR Part 75. Essentially, they must have successfully completed an educational program that meets or exceeds the standards described in that regulation, and is accredited by an organization recognized by the Department of Education, and be certified as radiographers in their field.

      (1) [ ] Provisions for Certification of Radiologic Competence

      (a) Successful completion of the Dental Radiation Health and Safety Examination administered by the Dental Assisting National Board, Inc.;

      OR,

      [(b)] Successful completion of the Principles and Practice of Dental Radiology and Radiographic Safety courses and examinations developed by the Assistant Under Secretary for Health for Dentistry. [ ]

      OR,

      [(c) Successful completion of a radiation health and safety program or examination approved by a state board of dentistry or the Department of Defense (DoD).]
(2) Non-certified applicants who otherwise meet the eligibility requirements for certification of radiologic competence may be given a temporary appointment as a graduate dental assistant under the authority of 38 U.S.C. § 7405 (a) (1) (D). Failure to obtain certification during that period is justification for termination of the temporary appointment. This will result in removal from the GS-681 series and may result in termination of employment.

(3) Certification in basic life support methods is highly desirable.

[(4) Certification by the Dental Assisting National Board (DANB). The American Dental Association (ADA) recognizes DANB as the national certification for Dental Assistants. DANB certification is not required, but highly desirable for the appointment of Dental Assistants up to and including the full performance level, and is required for all positions above the full performance level.]

[(5)] **Loss of Credential.** An employee in this occupation who fails to obtain licensure/certification/registration within the required time frame, or who fails to maintain the required licensure/certification/registration must be removed from the occupation, which may also result in termination of employment.

[(d) **Grandfathering Provision.**] All persons employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including [ ] certification [(for positions above the full performance level)] that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

[(1)] Such employees [ ] may be reassigned, promoted up to and including the full performance (journey) level, or [changed to lower grade] within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions. Such employees [MUST] meet the [certificationion] requirement before they can be promoted to those higher grade levels.

[(2)] Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

[(3)] Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

[(4)] If an employee who was retained [ ] under this provision leaves [the] occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

[(e) **Physical Requirements.** See VA Directive and Handbook 5019.]
3. GRADE REQUIREMENTS

a. Definitions

(1) Creditable Experience

(a) **Knowledge of Current Professional Dental Assistant Practices.** To be creditable, the experience must have required the use of knowledge, skills, abilities [(KSAs)], and other characteristics (also referred to as “core competencies”) associated with current professional dental assisting practice. Evidence of such experience includes graduation from a certified dental assisting training program, experience in private practice, VHA, Department of Defense (DoD), or other federal[, state, community or charitable] health care agency.

(b) **Quality of Experience.** Experience is only creditable after the training program certifies that the individual has completed all required courses, an internship if it is part of the program, and graduated with passing grades.

(c) **Part-Time Experience.** Part-time experience as a dental assistant is credited according to its relationship to full-time workweek. For example, a dental assistant would receive 1 week of full-time credit for each 2 weeks of half-time work.

(2) **Expanded Function Level.** Expanded function level is defined as possessing the training and ability to provide independent and expert dental procedures as well as providing clinical assistance to the treating dentists in more complex procedural cases. The expanded function dental assistant has an increased depth and breadth of dental practice skills, and has mastered a range of dental procedures and interventions and provides direct patient care within the scope of practice. Examples of procedures may be diagnostic, restorative and/or surgical in nature. The expanded function dental assistant will make independent professional decisions and recommendations to the treating dentist and interdisciplinary care teams. The expanded functional dental assistant has the expertise to participate in the professional development of colleagues through mentorship and teaching.

b. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

(1) **GS-3**

(a) **Experience or Education.** None beyond the basic requirements.

(b) **Assignment.** Employees at this level serve in dental assistant career development positions. It is expected that they receive guidance from more experienced staff members for more complex patient issues, and require daily close supervision.
(2) GS-4

(a) **Experience or Education.** In addition to the basic requirements, 1 year of experience at the next lower level, OR 2 years of education above high school that included completion of a dental assistant program accredited by the American Dental Association’s Commission on [Dental] Accreditation [(CODA)]. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. [Basic knowledge of infection control and safe instrument handling].

2. Basic knowledge of dental procedures and [medical emergencies].

3. [Ability to perform basic radiographic image capture and processing/retrieval].

4. Basic knowledge of maintenance, care and storage of dental equipment.

5. Basic knowledge of patient privacy requirements.]

(c) **Assignment.** Employees at this level serve as [developmental] staff dental assistants. It is expected that they receive guidance from more experienced staff members for more complex patient issues and require daily and direct contact at the site of work from the assigned supervisor. [Assignments at this level include but are not limited to: receiving and preparing patient for treatment including seating, positioning chair, placing napkin, performing disinfection and sterilization procedures; performing basic chair side assisting with direct instruction from treating dentist; reporting medical emergencies to dentist; preparing procedural trays/armamentaria set-ups; exposing and processing basic dental radiographs with direct supervision; mounting and labeling dental radiographs and/or saving digital images to the electronic medical record with direct supervision; complying with standard recommendation for equipment maintenance; retrieving all pertinent patient records prior to seating the dental patient; directing patient to appropriate staff for the intent of scheduling visits.]

(3) GS-5

(a) **Experience or Education**

(1) [In addition to the requirements listed at GS-4 above, applicants must demonstrate] at least 1 year of experience [equivalent to] at the next lower grade level that demonstrates the core competencies described at that level. [ ]

OR,

(2) Successful completion of a full 4-year course of study that included or was supplemented by completion of a dental assistant program by [CODA].

(3) In addition to meeting paragraph (1) or (2) above, the applicant must demonstrate the following KSA’s:]

II-G36-4
(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of anatomy and [ability to evaluate diagnostic quality].

2. [Broad knowledge of common medical emergencies and vital signs measurement].

3. [Basic] knowledge of instruments, materials and standardized dental procedures.

4. [Ability to learn and utilize software programs used within VHA].

5. [Basic communication skills to provide patient instructions according to established protocol].

(c) **Assignment.** Employees at this level serve as staff dental assistants [for routine dental procedures. Direct supervision is given for any complex patient procedures from more experienced dental assistants or the treating dentist]. [Assignments at this level include but are not limited to: responds to basic medical emergencies; measures and records vital signs; provides pre- and post-operative instructions; maintains a field of operation during dental procedures through the use of retraction, suction, irrigation, drying, placing and removing cotton rolls; using the concepts of four-handed dentistry, assists with basic restorative procedures; mixes basic dental materials; assists in preparation of laboratory prescription forms; applies pressure indicator paste to removable prostheses; exposes and processes basic dental radiographs; mounts and labels dental radiographs and/or saves digital imaging to electronic medical records; evaluates radiographs for diagnostic quality; maintains routine dental equipment per manufacturer and dental service standards.]

(4) **GS-6 [Staff Dental Assistant (Full Performance Level)]**

(a) **Experience.** At least 1 year of experience [equivalent to] the next lower grade level that demonstrates the core competencies described at that level. In addition, the candidate must demonstrate the [following] technical KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. [Ability to identify normal oral anatomy].

2. Advanced knowledge of instruments, materials, and standardized dental procedures used in all phases of restorative, surgical, endodontic and periodontal care and procedures.

3. Ability to monitor and perform basic interpretation of vital signs.

4. Ability to independently provide procedure-specific patient education and appropriate referral of patient concerns to treating dentist.
5. Ability to capture standard and special dental images of good diagnostic quality in traditional or digital formats.

6. Ability to perform maintenance on dental equipment used for routine and specialty dentistry.

7. Ability to enter and retrieve data utilizing electronic dental records.

8. Ability to perform dental assistant-appropriate laboratory procedures.

(c) **Assignment.** [Employee serves at the full performance level with the ability to perform full range of duties with some independence in assigned specialties, with indirect supervision from the lead dental assistant, dental assistant supervisor or treating dentist. Assignments at this level include, but are not limited to: using the concepts of four-handed dentistry; assists with specialty procedures including oral surgery, periodontal therapy, endodontic, prosthodontic and implant placement and restoration; anticipates surgeons/specialists needs at each stage of treatment; takes preliminary impressions; selects and manipulates a variety of gypsums and waxes; pours, trims and evaluates the quality of diagnostic casts; fabricates custom trays.

(5) **GS-7 Clinical Expanded Function Dental Assistant or Lead Dental Assistant.** At this level, dental assistants serve either as a Clinical Expanded Function Dental Assistant or Lead Dental Assistant. For all positions above the full performance level, duties must be assigned to the position at least 25% of the time.

(a) **Clinical Expanded Function Dental Assistant**

1. **Experience.** At least 1 year of experience at the next lower grade level or equivalent that demonstrates the core competencies described at that level. In addition, the candidate must demonstrate the following technical KSAs:

2. **Demonstrated Knowledge, Skills, and Abilities**

   a. Ability to perform dental assisting expanded functions.

   b. Comprehensive working knowledge of advanced imaging techniques in order to provide instruction (e.g. cone beam, cephalometric, advanced panoramic imaging, TMJ, etc).

3. **Assignment:** In this position, the employee performs a higher level, scope, complexity and variety representing the clinical assignment, and applies advanced clinical skills. Representative duties at this level include, but are not limited to: gathering diagnostic information, pulp vitality testing, charting of existing conditions, placing of rubber dam and matrices, selecting shades, placing retraction cord, placing and removing temporary restorations, fabricating temporary crowns and removing permanent cement from supragingival surfaces. In addition, the expanded function assistant may place and remove surgical dressing, monitor nitrous oxide analgesia, and perform coronal polishing and the cleaning and polishing of removable prostheses.
(b) GS-7 Lead Dental Assistant

1. **Experience.** At least 1 year of experience at the next lower grade level that demonstrates the core competencies described at that level. In addition, the candidate must demonstrate the following technical KSAs:

2. **Demonstrated Knowledge, Skills, and Abilities**
   
a. Advanced knowledge of dental assisting across multiple areas of practice, and demonstrated ability to provide guidance to staff dental assistants.

   b. Skill in coordinating clinical work flow and assignments.

   c. Ability to assist in dental program development, outcome management, and strategic planning.

   d. Skill in acting as liaison between staff dental assistants and the supervisor.

   e. Ability to provide professional oversight and consultation for staff dental assistants.

3. **Assignment.** The Lead Dental Assistant works with the supervisor or Chief Dental Service to monitor and make work assignments, provide input on performance, resolve daily workplace issues, and maintain efficient flow of patient care; may approve brief periods of leave, provide training to staff dental assistants, students and/or trainees; may recommend special advancements and promotions, disciplinary actions, etc. Assignments at this level include but are not limited to: provides instruction to other assistants in achieving diagnostic quality radiographs, provides instruction in maintenance of all dental service equipment, provides primary support to the chief for the daily delivery of department programs, reporting, staffing and scheduling, coordinates the patients’ care plans to reduce redundancies and delay in patient treatment. Lead Dental Assistants generally would be found in Complexity Level 1 (High Complexity) or Complexity Level 2 (Medium Complexity) facilities, or in facilities of lesser complexity levels where large dental services are found. Individuals may perform ancillary assignments, including program management duties on an occasional basis.

(6) GS-8 Senior Clinical Expanded Function Dental Assistant or Supervisory Dental Assistant.

At this level, dental assistants serve either as a Senior Clinical Expanded Function Dental Assistant or Supervisory Dental Assistant. For all positions above the full performance level, duties must be assigned to the position at least 25% of the time.

(a) GS-8 Senior Clinical Expanded Function Dental Assistant

1. **Experience.** At least 1 year of experience at the next lower grade level or equivalent that demonstrates the core competencies described at that level. In addition, the candidate must demonstrate the following technical KSAs.
2. **Demonstrated Knowledge, Skills, and Abilities**

   a. Competency in expanded functions to include placement and finishing of permanent restorative materials such as amalgam and/or composite; or recording of final impressions.

   b. Comprehensive and thorough knowledge of all aspects of dental imaging.

3. **Assignment.** Representative duties at this level include, but are not limited to: supragingival scaling; placing pit and fissure sealants; placing and finishing permanent restorative materials such as amalgam, glass ionomer or composite resin; making final impressions and adjusting dentures, applying pit and fissure sealants, placing liners and bases, carving amalgams, placing, curing and finishes composite resin restorations. Responsible for the imaging quality control program, troubleshooting and appropriate referral of identified imaging issues. Participates in developing equipment requests and justifications based on workload analysis. Specialty functions may include managing post-surgical bleeding, tying-in arch wires and selecting and placing orthodontic brackets.

(b) **GS-8 Supervisory Dental Assistant**

1. **Experience.** At least 1 year of experience at the next lower grade level that demonstrates the core competencies described at that level. In addition, the candidate must demonstrate the following technical KSAs and demonstrate the potential to acquire the assignment specific KSAs designated by an asterisk (*)

2. **Demonstrated Knowledge, Skills, and Abilities**

   a. Advanced knowledge of dental assisting across multiple areas of practice, and the demonstrated ability to provide guidance to staff dental assistants.

   b. Skill in coordinating clinical work flow and assignments.

   c. Ability to assist the Chief in Dental Clinic operations related to policy development, equipment requests and workload analysis.

   d. Ability to establish and maintain effective and cooperative work relationships.

   e. Ability to analyze clinically appropriate data effectively to optimize quality, performance, and productivity within section.

   f. *Ability to perform supervisory functions such as assessing competency, providing performance appraisals and managing training.

3. **Assignment.** The supervisory dental assistant is responsible for the supervision, administrative management, and direction of dental assistants. The incumbent may be delegated full administrative and professional responsibility for planning and directing the dental assisting activities for the service or equivalent unit at an independent outpatient clinic. They have full supervisory responsibility over a section or equivalent work unit which would require three or more dental assistants. Typical duties include: making work assignments, monitoring of staff dental assistant clinical performance, conducting
performance appraisals, and other clinical and administrative responsibilities as assigned by the Service Chief to ensure that the mission of the service and the medical center has been satisfied.

4. DEVIATIONS

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for dental assistants in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements on the proposed grade.

b. Under no circumstances will the certification requirements of radiologic competence be waived.

c. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

APPENDIX G37. DENTAL HYGIENIST QUALIFICATION STANDARD

GS-0682

Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Dental Hygienist in the Veterans Health Administration (VHA). These requirements apply to all VHA Dental Hygienists employed in the General Schedule (GS)-0682 series. Dental Hygienists perform a wide variety of interventions which contribute to the overall oral health of Veterans. Their work requires a professional knowledge of the field of dental hygiene and the biomedical sciences related to dentistry.

2. DEFINITIONS.

   a. Journey Level. The full performance level for this occupation in VHA is the GS-0682-09 grade level.

   b. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills, abilities and clinical competencies associated with current professional dental hygiene practice. This experience must be verified with the practitioner or the supervising officers. Experience satisfying this requirement may be paid or non-paid employment in private practice, United States (U.S.) military services, local/state/federal health care or educational facilities.

   c. Quality of Experience. Experience satisfying this requirement must be active, paid or non-paid professional practice employment as a dental hygienist. Qualifying experience must be at a level comparable to dental hygienist experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

   d. Part-Time Experience. Part-time experience is creditable according to its relationship to a full-time workweek. For example, an individual employed 20 hours per week, or on a half time basis, would receive one full-time work week of credit for each two weeks of service.

3. BASIC REQUIREMENTS. To qualify for appointment as a dental hygienist, all applicants must possess the following:

   a. Citizenship. Be a Citizen of the United States. Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with
b. **Education.** Applicants must possess an Associate degree or higher from an accredited dental hygiene program. The degree must have been obtained from an institution whose accreditation was in place for the year in which the course of study was completed. Approved programs are:

(1) Dental hygiene programs accredited by the American Dental Association’s Commission on Dental Accreditation (CODA).

(2) Education completed outside of the United States must be considered at least equivalent to that gained in CODA accredited United States programs and would enable the candidate to sit for the National Board Dental Hygiene Examination, which is administered by the Joint Commission on National Dental Examinations.

c. **Licensure/Certification**

(1) **Licensure.** Applicants must be currently licensed to practice as a dental hygienist with a full, current and unrestricted license in a State, Territory or Commonwealth of the United States, or the District of Columbia.

(2) **Certification.** P.L. 97-35, Omnibus Budget Reconciliation Act Of 1981, requires persons who administer radiologic procedures meet the credentialing standards in 42 C.F.R. Part 75, Standards for the Accreditation of Educational Programs for and the Credentialing of Radiologic Personnel. To meet this requirement, they must have successfully completed an educational program that meets or exceeds the standards described in that regulation and is accredited by an organization recognized by the Department of Education and be certified as radiographers in their field. Accredited dental hygiene programs contain curriculum addressing radiologic procedures meets the requirement for certification as dental radiographers.

(3) **Exceptions for Non-Certified Dental Hygienist.**

(a) Non-certified applicants who otherwise meet the eligibility requirements for licensure, may be given a temporary appointment as a graduate dental hygienist under the authority of 38 U.S.C. § 7405(c)(2)(B), Temporary Full-Time Appointments, Part-Time Appointments and Without-Compensation Appointments for a Period Not to Exceed Two Years.

(b) Non-certified individuals shall only provide care under the supervision of a certified dental hygienist at or above the full performance level.
(c) Non-certified individuals may only be appointed at the entry level and may not be promoted/converted until certification is obtained.

(d) Temporary appointments of non-certified dental hygienist may not be extended beyond two years or converted to a new temporary appointment.

(e) **Failure to Obtain Certification.** In all cases, dental hygienists must actively pursue meeting requirements for certification starting from the date of their appointment. At the time of appointment, the dental hygienist supervisor will provide the dental hygienist with the written requirements for licensure/certification, including the time by which the licensure/certification must be obtained and the consequences for not becoming certified by the deadline. Management officials will remove dental hygienists from their positions who fail to obtain licensure/certification during this time period, which may result in termination of employment.

(4) **Loss of Credential.** Management officials will remove dental hygienists from their positions who fail to maintain the required licensure/certification, which may also result in termination of employment.

d. **Grandfathering Provision.** All individuals employed in VHA in this occupational series or in another occupational series performing the duties as described in the qualification standard on the effective date of the qualification standard are considered to have met all qualification requirements for the grade held including positive education and licensure/trademark/registration/certification. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees may be reassigned, promoted up to and including the full performance (journey) level or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) Employees in an occupation that requires a licensure/certification only at higher grade levels must meet the licensure/certification requirement before they can be promoted to those higher grade levels.

(3) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis until they fully meet the basic requirements of the standard.

(4) Employees who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet
the full VA qualification standard requirements in effect at the time of reentry to the occupation.

(5) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

e. **Foreign Education.** To be creditable, education completed outside the U.S. must be deemed at least equivalent to that gained in a conventional U.S. program by a private organization specializing in the interpretation of foreign educational credentials.

f. **Physical Requirements.** See VA Directive and Handbook 5019, Employee Occupational Health Service for requirements.

g. **English Language Proficiency.** Dental hygienist candidates must be proficient in spoken and written English in accordance with 38 U.S.C. § 7403(f).

4. **GRADE DETERMINATIONS.** In addition to the basic requirements outlined in paragraph 3.b., the following criteria must be met when determining the grade of candidates.

a. **Grade Determinations.**

(1) **Dental Hygienist, GS-05**

(a) **Experience.** None, beyond the basic requirements.

(b) **Assignment.** Employees at this level serve in entry level dental hygienist positions. They receive guidance from more experienced staff members for patient issues and require daily supervision at the site of work.

(2) **Dental Hygienist, GS-06**

(a) **Experience.** At least one year of experience at the next lower grade level.

(b) **Assignment.** Employees at this level serve as developmental level 1 dental hygienists. It is expected that they receive guidance from more experienced staff members for complex patient issues and require daily and direct contact at the site of work from the assigned supervisor.

(c) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:
i. Knowledge of oral prophylactic, therapeutic, and preventive procedures for periodontal diseases, or inflammation, or on patients with other medical and/or dental problems.

ii. Knowledge of dental methods and techniques used in performing intra and extra oral procedures.

iii. Ability to use communication techniques to encourage and inform individuals and groups.

(3) **Dental Hygienist, GS-07**

(a) **Experience.** At least one year of experience at the next lower grade level that demonstrates the clinical competencies described at that level.

(b) **Assignment.** Employees at this level serve as developmental level 2 dental hygienists. It is expected that they perform more complex work while receiving less frequent supervision than at the GS-6 level.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

i. Knowledge of oral pathology to include disease of the hard and soft tissues, disorders of tooth structure, developmental and congenital anomalies, salivary gland disorders, symptoms of infectious disorders, and appropriate protocols.

ii. Practical knowledge of medical diseases, conditions, and chronic degenerative diseases as they relate to dental health and treatment.

iii. Knowledge of radiographic exposure techniques to produce radiographs of high diagnostic quality.

(4) **Dental Hygienist, GS-08**

(a) **Experience.** At least one year of experience at the next lower grade level that demonstrates the clinical competencies described at that level.

(b) **Assignment.** Employees at this level serve as developmental level 3 dental hygienists with the ability to perform direct patient care under the general supervision of the dentist. It is expected that they receive guidance from higher-level or supervisory staff members for only the most complex patients. Assignments at this level include, but are not limited to: patient assessments (e.g. risk assessments, oral health assessments), prevention recommendations, prophylaxis, periodontal treatment for mild to moderate disease (e.g. scaling and root planing, full mouth debridement), Periodontal Screening and Recording (PSR)
radiograph/image capture, fluoride treatment application, topical anesthesia administration and management of stable medically compromised patients (including risk factors).

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the KSAs for the GS-07 level, the candidate must demonstrate the following KSAs:

i. Knowledge of state-of-the-art preventive dentistry measures for patient instruction and training.

ii. Knowledge of anatomy and physiology in order to interpret the examination request accurately; to understand the functioning and interrelationship of the various anatomical structures appearing on the radiographic image and the various stages of the examination to judge the acceptability of the radiograph for diagnostic use; and to present for viewing.

iii. Knowledge of The Joint Commission (TJC), Occupational Safety and Health Administration (OSHA), and related regulations and guidelines pertaining to dental matters.

iv. Skill in providing individual and group oral health care instructions to inpatients, outpatients, Nursing Home Care Unit patients, etc.

(5) **Dental Hygienist, GS-09**

(a) **Experience.** At least one year of experience at the next lower grade level that demonstrates the clinical competencies described at that level.

(b) **Assignments.** Employees at this level serve as staff dental hygienists at the full performance level. They provide direct patient care and receive guidance from higher-level or supervisory staff members for only the most complex patients and require only general supervision from a dentist. Assignments at this level include but are not limited to patient medical assessment (e.g. medical/dental history, social history, vital signs, full periodontal assessment and charting), disease and treatment management recommendations, denture care, scaling and root planing, radiographs/image interpretation, patient education (e.g. post-procedure, tobacco cessation, caries and perio-disease prevention), behavior management, management of stable medically compromised patients (including risk factors), instrument sharpening, inter-service communication.
(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the KSAs for the GS-8 level, the candidate must demonstrate the following KSAs:

i. Knowledge of hygiene procedures to explain the process and indication, complications and expected treatment outcomes for each.

iii. Knowledge to select appropriate available fluoride products and indications/limitations for safe and proper application.

iv. Skill in detecting plaque and calculus, dental abnormalities/pathologies, assessing inflammation and providing safe instrumentation for each procedure.

v. Skill in educating patients and caregivers on periodontal disease, wellness, health maintenance, oral hygiene practices, parafunctional habits, and effects of illness, addictions, medications and tobacco on the oral cavity.

vi. Ability to assess the patient’s medical, dental, anxiety/phobias, medications and comorbidities to administer safe patient care.

vii. Ability to assess the impact of patient’s medical and dental condition on maintaining oral health, recognize age-related changes in individual patients, adapt patient environment, and maximize patient’s physical comfort.

(6) **Dental Hygienist, GS-10 (Advanced Clinical)**

(a) **Experience.** At least one year of experience equivalent to the next lower grade level that is directly related to the position being filled fully meets the KSAs at that level.

(b) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, and range of variety, and be performed by the incumbent at least 25% of the time. At this level, dental hygienists are advanced-level practitioners in assigned areas. Employee assignments may include but are not limited to advanced patient assessments/clinical evaluations (blood glucose levels, medication reconciliation, oral cancer screening, dietary analysis for caries risk, pulse oximeter, comprehensive periodontal charting), prophylaxis in complex restorative cases (e.g. multiple dental implants, orthognathic, post-surgical trauma, etc.), advanced scaling and root planing (ability to
use advanced modalities) with or without soft-tissue curettage, advanced radiographic studies (cone beam computed tomography (CT), cephalometric), local anesthesia administration, advanced adjunctive treatment (xerostomia treatment recommendations, sulcular lavage, placement of intrasulcular medicaments, applying and removing periodontal surgical dressings, orthodontic care, sealant placement, occlusion adjustment, placement of desensitizing agents, professional whitening procedures), individual and group oral hygiene instructions for special-needs populations, elevated educational instruction, development of training materials/presentations), management of medically and/or behaviorally compromised patients, and collaboration with other disciplines.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the KSAs for the GS-09 level, the candidate must demonstrate the following KSAs:

i. Knowledge of medical assessment techniques including interviewing and evaluating clinical findings (e.g. normal and critical lab values) to adapt treatment based on medical and psychological issues.

ii. Advanced knowledge of oral and dental anatomy including root anatomy, common pathologies and anomalies, and indications for advanced radiographic imaging and proper technique to detect potential abnormalities.

iii. Knowledge of medical treatment adjuncts and indications and the ability to safely administer medicaments (e.g. intrasulcular medicaments, local anesthesia, sulcular lavage, applying and removing periodontal surgical dressing).

iv. Knowledge of advanced adjunctive diagnostic and therapeutic equipment, indication for use and ability to utilize safely (e.g. sonic, magnetostrictive ultrasonic, and piezo ultrasonic scalers).

v. Skill in providing safe and thorough prophylaxis, root planing and soft-tissue curettage for complex periodontal and/or restorative cases and skill in providing safe care for patients with complex medical/psychiatric issues.

vi. Ability to apply adult education techniques/methods, organize curriculum, judge cognitive ability, and provide healthcare education regarding relationships between medical and dental pathologies to groups, interdisciplinary staff, and other outside contacts.
(7) **Lead Dental Hygienist, GS-10**

(a) **Experience.** At least one year of experience at the next lower grade level that demonstrates the clinical competencies described at that level.

(b) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, and range of variety, and be performed by the incumbent at least 25% of the time. Lead dental hygienists generally are found in Complexity Level 1 (High Complexity) or Complexity Level 2 (Medium Complexity) facilities, or in facilities of lesser complexity levels where large dental services are found. The lead dental hygienist monitors work flow and makes work assignments, provides input on performance, resolves daily workplace issues, and maintains efficient flow of patient care; may approve brief periods of leave, provide training to dental auxiliary staff (dental assistants and/or dental hygienists), students and/or trainees; may recommend special advancements and promotions, disciplinary actions, etc. Assignments at this level include but are not limited to providing instruction to dental auxiliary staff (dental assistants and/or dental hygienists) in achieving diagnostic quality radiographs, providing instruction in maintenance of all dental service equipment, providing primary support to the chief for the daily delivery of department programs, reporting, staffing and scheduling, coordinates patient care plans to reduce redundancies and delay in patient treatment. They may perform ancillary assignments, including program management duties, on an occasional basis.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the KSAs for the GS-09 level, the candidate must demonstrate the following KSAs:

i. Advanced knowledge of dental hygiene and/or dental assisting across multiple types of dental practice and demonstrated ability to provide guidance to dental auxiliary staff (dental assistants and/or dental hygienists).

ii. Knowledge of procedures and policies to provide oversight and training for dental auxiliary staff (dental assistants and/or dental hygienists).

iii. Ability to monitor and report on the status and progress of work and make adjustments to accomplish the workload in accordance with established procedures.

iv. Ability to assist in dental program development, outcome management, and strategic planning.
v. Ability to act as liaison between dental staff to resolve informal employee complaints and concerns.

(8) **Supervisory Dental Hygienist, GS-10**

(a) **Experience.** At least one year of experience at the next lower grade level that demonstrates the clinical competencies described at that level.

(b) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, and range of variety, and be performed by the incumbent at least 25% of the time. Supervisory dental hygienists generally are found in Complexity Level 2 (Medium Complexity) or Complexity Level 3 (Low Complexity) facilities. The supervisory dental hygienist is responsible for the supervision, administrative management, and direction of dental auxiliary staff. They have full supervisory responsibility over a section or equivalent work unit; but may also be delegated full administrative and professional responsibility for planning and directing the dental auxiliary staff activities for the service or equivalent unit at an independent outpatient clinic. Supervisory dental hygienists’ typical duties include preparing work assignments, monitoring clinical performances of dental auxiliary staff, conducting performance appraisals, and other clinical and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. They ensure compliance with accrediting agency and regulatory requirements, establishes and monitors the quality of the pre-analytical processes as part of the overall dental service quality management program, and assures corrective action is initiated as needed. They conduct orientation and competency assessments of assigned staff. They develop policies and procedures, manages document control, develop performance standards, position descriptions and functional statements, and are responsible for professional and administrative management of an assigned area to include budget execution. Supervisory dental hygienists maintain interdepartmental relations with other services to accomplish medical center goals.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the KSAs for the GS-9 level, the candidate must demonstrate the following KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

i. Advanced knowledge of dental hygiene and/or dental assisting across multiple types of dental practice to provide guidance and training to dental auxiliary staff;
ii. Skill in coordinating clinical workflow and work assignments;
iii. Ability to develop policy, manage equipment requests and provide workload analysis in Dental Clinic operations;
iv. Demonstrated leadership and managerial skills, including skill in interpersonal relations and conflict resolution to deal with employees, team leaders, and managers;
v. Ability to analyze clinically appropriate data and make recommendations to optimize quality, efficiency, performance, and productivity within service; and

*vi. Ability to perform the full range of supervisory duties which would include responsibility for assignment of work to be performed; competency assessments; performance evaluations; selection of staff; and recommendation of awards, advancements, and when appropriate, disciplinary actions.

(9) **Dental Hygienist (Senior Clinical), GS-11**

(a) **Experience.** At least one year of experience equivalent to the next lower grade level that is directly related to the position being filled fully meets the KSAs at that level.

(b) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, and range of variety, and be performed by the incumbent at least 25% of the time. At this level, dental hygienists are senior-level clinical practitioners in assigned areas. Assignments may include but are not limited to conducting comprehensive medical assessment, adaptive treatment of the medically/mentally/physically compromised, using more advanced adjunctive, diagnostic tools and techniques in patients with severe and recalcitrant periodontal disease, designing customized adaptive aids, participating in patient wellness programs, advanced medical and behavioral management, curriculum and examination fabrication, and giving lectures and presentations.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the KSAs for the GS-10 Advanced Clinical Hygienist level, the candidate must demonstrate the following KSAs:

i. Knowledge of comprehensive medical assessment (including contraindications to dental treatment) and appropriate adaptation techniques to provide safe and effective periodontal care in severely compromised patients.
ii. Knowledge of more advanced adjunctive, diagnostic tools and techniques (e.g. microscopy, toluidine blue dye, intraoral camera) for monitoring clinical disease processes and patient selection for their indicated use.

iii. Knowledge of tobacco cessation treatments and counseling techniques to select and manage patients in a comprehensive program and make recommendations for prescribing tobacco cessation medications.

iv. Knowledge of medical and behavioral management risk factors for medically/mentally/physically compromised patients including indication of administration of adjunctive therapies (e.g. nitrous oxide, self-induced hypnosis techniques).

v. Skill in designing custom adaptive aids based on assessment of patients’ abilities and disabilities and training patients and caregivers for proper usage.

vi. Ability to write curriculum, examinations, training protocol, present lectures and presentations at the level of dental hygiene school faculty.

vii. Ability to effectively interview, screen and adapt treatment based on findings of medically/mentally/physically compromised patients.

(10) **Supervisory Dental Hygienist, GS-11**

(a) **Experience.** At least one year of experience at the next lower grade level that demonstrates the clinical competencies described at that level.

(b) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, and range of variety, and be performed by the incumbent at least 25% of the time. Supervisory dental hygienists generally are found in Complexity Level 1 (High Complexity) facilities, or in facilities of lesser complexity levels where large dental services are found. Supervisory dental hygienists are responsible for the supervision, administrative management, and direction of dental auxiliary staff in a section or equivalent work unit. They may be delegated full administrative and professional responsibility for planning and directing the dental auxiliary staff activities for the service or equivalent unit at an independent outpatient clinic. Supervisory dental hygienists’ typical duties include preparing work assignments, monitoring clinical performances of dental auxiliary staff, conducting performance appraisals, and other clinical and administrative responsibilities to ensure that the mission of the service and the medical center is satisfied. They ensure compliance with accrediting
agency and regulatory requirements; establish and monitor the quality of the pre-analytical processes as part of the overall dental service quality management program, and ensure corrective action are initiated as needed. They conduct orientation and competency assessment of assigned staff. Supervisory dental hygienists develop policies and procedures, manage document control, develop performance standards, position descriptions and functional statements, and are responsible for professional and administrative management of an assigned area to include budget execution. The supervisor will maintain interdepartmental relations with other services to accomplish medical center goals.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the KSAs for the GS-10 level, the candidate must demonstrate the following KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*).

i. Ability to work independently to set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions to optimize quality, efficiency, performance, and productivity within the service;

ii. Ability to develop policy, manage equipment requests, and provide workload analysis in Dental Clinic operations;

iii. Demonstrated leadership and managerial skills including skill in interpersonal relations and conflict resolution to deal with employees, team members, managers and other departments; and

*iv. Ability to perform the full range of supervisory duties which would include responsibility for assignment of work to be performed; competency assessments; performance evaluations; selection of staff; and recommendation of awards, advancements, and when appropriate, disciplinary actions.

5. **DEVATIONS.**

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade and/or assignment.

b. The Under Secretary for Health in VHA Central Office must approve the placement of individuals in grade levels or assignments not described in this standard must be prior to placement in the position.
c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement or when specific credentials are identified as necessary to meet minimum requirements, unless an exception is annotated in the qualification standard.

Authority: P.L. 111-163, Caregivers and Veterans Omnibus Health Services Act of 2010, 38 U.S.C. §§ 7401, Appointments in Veterans Health Administration; 7402, Qualifications of appointees; 7403, Period of appointments; promotions; 7405, Temporary full-time appointments, part-time appointments, and without-compensation appointments; 7407, Administrative provisions for section 7405 and 7406 appointments.
APPENDIX G38. BIOMEDICAL ENGINEER QUALIFICATION STANDARD

GS-[0]858
Veterans Health Administration

1. COVERAGE. This qualification standard applies to all Biomedical Engineer, GS-0858, positions in the Veterans Health Administration (VHA). The work requires the application of engineering concepts and methodology to investigate problems and phenomena of living systems, in order to advance the understanding of these systems and to improve medical practices. In addition, the work involves the development and/or deployment of materials, instruments, diagnostic and therapeutic devices, other equipment applicable to the study of living systems, and to the practice of medicine to improve healthcare delivery within VHA. Biomedical Engineering work requires knowledge and skill in multiple engineering disciplines and specialized subject matter expertise in areas such as computer applications, electronics, mathematics, along with a background in human anatomy and physiology.

2. DEFINITIONS.

   a. Appointing Official. The Human Resources Management Officer is delegated appointing authority to process and authenticate notifications of personnel actions, and the authority to effect management-approved employment actions on behalf of officials, employees, and facilities for which service is provided.

   b. Approving Official. The Assistant Deputy Under Secretary for Health (ADUSH) for Administrative Operations, Veterans Integrated Service Network (VISN) Director, Facility Director, or designee is the approving official and will approve or disapprove the appointment or promotion of employees in hybrid occupations.

   c. Background Investigation. Due to the sensitivity and criticality of systems managed by Biomedical Engineers, individuals may require higher than minimum background investigations based on the roles and responsibilities outlined in their Functional Statement. The Office of Personnel Management’s Position Designation Automated Tool (PDAT) will be used to determine the appropriate investigation level.

   d. Certified Clinical Engineer (CCE). Certification means having successfully passed a CCE written and oral examination administered by the American College of Clinical Engineering. Individuals with CCE certification demonstrate competency and professional recognition, as measured by an examination designed by their peers. Certification promotes healthcare delivery improvement through the continuing assessment and recognition of the competency of professionals. These professionals support and advance patient care by applying engineering and management skills to healthcare technology. If appointed with a CCE requirement, the employee must maintain certification throughout employment. The American College of Clinical Engineering determines acceptable educational preparation and degree requirements for CCE eligibility.
e. **Creditable Professional Engineering Experience.** To be creditable, experience must have been accomplished after receipt of the bachelor’s degree, and/or CCE certification, and requires the possession and use of knowledge, skills, and abilities associated within the scope of the biomedical engineering profession. Additionally, the experience must have been attained in a healthcare setting for Biomedical Engineer (Clinical) positions, or a research setting for Biomedical Engineer (Research) positions, and be directly applicable to the assignment.

f. **Foreign Education.** To be creditable for the education requirement, a degree/curriculum completed outside the U.S. must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials. Such education must be, at a minimum, equivalent to a bachelor’s degree, as outlined in Section 3.b. below.

g. **Lifecycle Management.** A Core Biomedical Engineering/Healthcare Technology Management function for medical equipment which includes: technology assessments, clinical/technical procurement specifications, equipment evaluations, pre-procurement planning, security configurations, deployment project management, technical configurations, ongoing maintenance/management/support, decommissioning, and cyber security sanitization.

h. **Part-Time Experience.** Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.]

3. **BASIC REQUIREMENTS.**

a. **Citizenship.** [Be] a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with [VA Handbook 5005, Part II,] chapter 3, section A, paragraph 3.g.)

b. **Education and/or Experience.** [The individual must meet either item (1) or (2) below to meet this requirement:

(1) **Bachelor's Degree or Higher in Engineering.** To be creditable, the curriculum must be from a school of engineering with at least one curriculum accredited by the Accreditation Board for Engineering and Technology (ABET), as a professional engineering curriculum. Examples of acceptable engineering degrees include: Biomedical Engineering, Clinical Engineering, Bioengineering, Biomechanical Engineering, Electrical Engineering, Mechanical Engineering, and Biochemical Engineering. Titles may vary from educational institutions and change over time.

   **OR,**

(2) Certification as a Certified Clinical Engineer (CCE) and a bachelor’s degree not listed in item 3.b.(1) above.]
c. **Grandfathering Provision.** All persons employed in VHA in this occupation, on the effective date of this qualification standard, are considered to have met all qualification requirements for the title, series and grade held, including positive education, and/or certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees in an occupation that does not require a certification/registration, may be reassigned, promoted, or demoted within the occupation.

(2) Employees who are appointed on a temporary basis, prior to the effective date of the qualification standard, may not have their temporary appointment extended, or be reappointed on a temporary, or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or certification/registration, that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

(4) If an employee, who was retained in an occupation listed in 38 U.S.C. § 7401(3) under this provision, leaves that occupation, the employee loses protected status, and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. **English Language Proficiency.** Biomedical Engineers must be proficient in spoken and written English in accordance with chapter 2, section D, paragraph 5a, this part.

[4.] **GRADE REQUIREMENTS.**

[a.] **Grade Determinations.** In addition to the basic requirements for employment [listed in paragraph 3 above], the following education and experience criteria must be met when determining the grade of candidates:

[(1) **Biomedical Engineer.** GS-7 [(Entry Level)]

(a) **Experience.** [None beyond the basic requirements.]

(b) **Education.** Bachelor’s degree as outlined in paragraph 3.b.(1), above, or CCE certification with at least a bachelor’s degree not listed in paragraph 3.b.(1).]

(c) **Demonstrated Knowledge, Skills, and Abilities [**. None beyond the basic requirements.
(d) **Assignment.** Employees serve in an entry level biomedical engineer career development position. It is expected that biomedical engineers at the entry level receive ongoing guidance from more experienced staff members and perform assignments under close supervision.

(2) **[Biomedical Engineer,] GS-9 [(Developmental Level 1)]**

(a) **Experience.** At least [one] year of specialized experience equivalent to the next lower level.

OR,

(b) **Education**

i. [Master's degree in Biomedical Engineering, or a related field of study, as outlined in paragraph 3.b.(1).]

OR,

ii. Bachelor’s degree, as outlined in paragraph 3.b.(1), plus two full years of progressively higher level graduate education in a related field of study, provided the applicant’s total background demonstrates the KSAs for the GS-9 level assignment.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of the principles, theories, concepts, and practices of the Biomedical Engineering profession.

ii. [Ability to interpret relevant codes, regulations, guidelines, and standards, and make recommendations to ensure compliance with medical center programs.]

iii. Ability to understand the operational needs of clinical services in the health care system.

iv. Ability to prepare material on current technical topics and trends, for presentation to other technical staff and mid-level hospital management, and the ability to keep abreast of changes in technology.

(d) **Assignment.** Biomedical Engineers, at this developmental level, require direction on more complex tasks. Employees complete technical assignments in the engineering field, under the direction of a senior biomedical engineer and will be required to rotate through, and participate in, the operations of other hospital services. At the GS-9 grade level, employees function with oversight by a supervisor for more complex assignments.]
(3) [Biomedical Engineer,] GS-11 [(Developmental Level 2)]

(a) Experience. At least [one] year of experience equivalent to the next lower level, [and must fully meet the KSAs at that level.]

OR,

(b) Education

i. [Ph.D., or equivalent doctoral degree in Biomedical Engineering, or a related field of engineering, as outlined in paragraph 3.b.(1).]

OR,

ii. Bachelor’s degree, plus three full years of progressively higher level graduate education in a related field of study, as outlined in paragraph 3.b.(1).]

(c) Demonstrated Knowledge, Skills, and Abilities. [In addition to the experience above, the candidate must demonstrate all of the following KSAs:]

i. Ability to implement and/or sustain an equipment management or biomedical research program that meets The Joint Commission (TJC), National Fire Protection Association (NFPA), or other applicable regulatory requirements.

ii. Ability to develop material for a continuing education program for clinical or research staff, that address the principles and application of medical technology, and/or biomedical theory used in healthcare.

iii. Ability to advise [ ] staff on emerging medical [ ] technology[. or research procedures], while keeping abreast of changes in such technology, and utilizing the information to solve biomedical engineering problems.

iv. [Knowledge of basic project management principles, as applied to the healthcare setting and medical equipment, and information system implementation.]

(d) Assignment. [At the developmental level, employees function on a semi-independent basis with limited oversight by senior biomedical engineers. They participate in medical device hazard investigations, to assure compliance with patient safety goals, the Safe Medical Devices Act (SMDA), TJC requirements, and assist in the development of an equipment management program at the medical center. Employees may lead medical technology deployments, directly support medical equipment, or participate in research projects.]
(4) [Biomedical Engineer,] GS-12 [(Full Performance Level)]

(a) **Experience.** Completion of at least [one] year of specialized experience equivalent to the next lower level; or completion of a post-doctoral research fellowship in the field of biomedical engineering, and must fully meet the KSAs at that level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** [In addition to the experience above, the candidate must demonstrate all of the following KSAs:]

   i. Ability to conduct a medical equipment management [or biomedical research program that is compliant with applicable healthcare standards and regulatory agencies.]

   ii. Ability to develop a curriculum for a continuing education program, that address the safe and effective use of medical technology, and/or research devices.

   iii. Ability to manage a recall and safety alert program for medical devices, including medical device hazard investigations, to assure compliance with patient safety goals, SMDA, and [TJC] requirements.

   iv. Ability to conduct capital asset and infrastructure planning for medical equipment spanning initial concept, installation, and effective implementation of complex medical equipment.

   v. Ability to function as the subject matter expert in the field of biomedical engineering, directly supporting specialized clinical technology, including service, system administration, training, quality assurance, and life-cycle management.

   vi. Ability to effectively advise clinical and administrative staff on medical technology, including existing and emerging technology, which addresses viability, long-term suitability, compatibility, and/or safety.

   vii. Knowledge of concepts related to computer based medical systems, networking protocols, and information security as it applies to medical technology within VHA.

   viii. Skill in communicating and working collaboratively with key stakeholders, including technical and professional staff at various levels of the organization.

   ix. Ability to apply project management principles to deployment of medical equipment and health information technologies.

(c) **Assignment.** At the full performance level, employees work under general supervision, with wide latitude to exercise independent judgment. Drawing upon extended professional and technical experience, employees demonstrate an intimate understanding of complex clinical and biomedical subject matter. They serve as institutional resources, working extensively with clinical stakeholders, supporting clinical services by leading market
research, technology assessments, integration planning, and implementation of both current and emerging medical technologies. The employee shares responsibility for managing the Health Insurance Portability and Accountability Act (HIPAA), network security issues for medical systems, and the information communicated across these systems. Biomedical Engineers at the GS-12 grade level further support the clinical mission by contributing to the continuing education program for clinical staff, helping ensure safe and efficient healthcare delivery. Biomedical Engineers at the GS-12 grade level support the institution by assisting with capital asset and infrastructure planning, to help ensure successful strategic planning. They may collaborate frequently with contracting to execute judicious healthcare technology procurements. Within the Biomedical Engineering Department, the employee provides leadership that ensures high quality and responsive customer service is an integral component of biomedical engineering service delivery. They are highly effective communicators, capable of serving as subject matter experts directly supporting the life cycle management of clinical technology, to include ongoing service, system administration, training, and quality assurance. At this level, employees may assist in clinical research projects in the biomedical engineering field.]

(5) [Biomedical Engineer, (Clinical), GS-13]

(a) **Experience.** Completion of at least one year of experience equivalent to the next lower level, and must be fully meet the KSAs at that level. Including:

i. Ability to implement and/or sustain an equipment management or biomedical research program that meets The Joint Commission (TJC), National Fire Protection Association (NFPA), or other applicable regulatory requirements.

ii. Ability to develop material for a continuing education program for clinical or research staff, that address the principles and application of medical technology, and/or biomedical theory used in healthcare.

iii. Ability to advise [ ] staff on emerging medical [ ] technology[ , or research procedures], while keeping abreast of changes in such technology, and utilizing the information to solve biomedical engineering problems.

iv. [Knowledge of basic project management principles, as applied to the healthcare setting and medical equipment, and information system implementation.]

(b) **Demonstrated Knowledge, Skills, and Abilities.** [In addition to the experience above, the candidate must demonstrate all of the following KSAs. In addition, the candidate must demonstrate the following KSAs found at subparagraph (b) of this subsection (5) and potential to acquire the assignment specific KSAs designated by an asterisk (*).]

i. Ability to conduct capital asset and infrastructure planning for medical equipment spanning initial concept, installation, and effective implementation of complex medical equipment.
ii. *Knowledge [and capacity to support the most complex and specialized clinical technology including service, system administration, training, and quality assurance.]

iii. Knowledge of, and the ability to interpret and apply complex codes, regulations, guidelines, and standards associated with the biomedical engineering field.

iv. [Ability to develop and implement policies that are consistent with organizational objectives.

v. Ability to communicate and work collaboratively with key stakeholders, including technical and professional staff at various levels of the organization.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. At this level, employees are non-supervisory, and are organizationally aligned at the facility, Regional, VISN, or National Program Offices. At the facility level, employees must have notable ongoing responsibilities as assigned by the VISN, and/or Healthcare Technology Management Program Office. The employee supports and advances patient care by applying engineering and managerial skills to healthcare technology, as demonstrated by at least four of the following major responsibilities:

i. Assures provision of a continuing education program for clinical or technical staff, addressing the principles and application of healthcare technology used in the delivery of care. This includes a curriculum that addresses the safe and effective use of medical equipment and/or technology.

ii. Manages a recall and safety alert program for medical devices, including medical device incident investigations, to assure compliance with patient safety goals, SMDA, and TJC requirements.

iii. Serves as advisor to senior clinical and leadership staff on medical engineering technology (including existing and emerging technology), addressing viability, long-term suitability, compatibility, and/or safety for strategic initiatives.

iv. Conducts capital asset and infrastructure planning for medical technology spanning initial concept, installation, and effective implementation of highly complex medical technology. Responsible for life-cycle management for medical technology across the scope of a facility or VISN.

v. Serves as a VISN or national expert, who provides support of one or more complex, multi-site systems, to include service, system administration, training, and quality assurance.

vi. Responsible for a medical equipment management program that meets current TJC and NFPA hospital requirements.

vii. Develops and implements VISN or national-level policies that are consistent with Healthcare Technology Management Program Office organizational objectives.
(6) **Supervisory Biomedical Engineer (Clinical), GS-13**

(a) **Experience.** Completion of at least one year of experience equivalent to the next lower level, and must fully meet the KSAs at that level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of the management of overall department resources, i.e., finances, space, equipment, supplies, and staffing at the local level.

ii. Ability to draft and/or recommend local policies and/or directives related to healthcare technology management.

iii. Ability to balance multiple responsibilities, set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions.

iv. Ability to analyze organizational and operational problems to develop and implement solutions that result in efficient operations, and use data effectively to manage workload, quality, performance, and productivity within the area of responsibility.

v. Skill in interpersonal relationships in leading and dealing with employees, team leaders, and managers, both within and outside the biomedical engineering program, to include conflict management, dispute resolution, mediation, or reasonable accommodations.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. At this level, employees are supervisors and are at the facility level. The supervisory biomedical engineer (clinical) is responsible for the professional and administrative management of a facility biomedical engineering program. Such individuals have responsibility supervising technical staff, including lower level engineers, biomedical engineering technicians, and other staff. The range of supervisory responsibility includes development of performance standards and performance evaluations; recommendations for appointments, awards, advancements, and when appropriate, disciplinary actions; and identification of continuing training needs etc. The supervisory biomedical engineer (clinical) is responsible for financial management of budget resources allocated to support quality assurance and maintenance activities necessary to assure the facility’s medical equipment is available for patient care activities. The supervisory biomedical engineer (clinical) is responsible for compliance and reporting of medical device cyber security and isolation for facilities under their management oversight.

(7) **Biomedical Engineer (Research), GS-13**

(a) **Experience.** Completion of at least one year of experience equivalent to the next lower level and must fully meet the KSAs at that level.
(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the biomedical engineer (research) must demonstrate all of the following KSAs:

i. Ability to apply appropriate scientific methods in the design and execution of basic and applied research in the field of biomedical engineering.

ii. Ability to coordinate work across multiple settings, e.g., medical centers, universities.

iii. Ability to convey scientific biomedical engineering concepts and methodology to individuals with diverse levels of technical expertise.

(c) **Assignment.** The biomedical engineer (research) is responsible for conducting biomedical research involving significant engineering concepts and applications as an investigator; serving as senior author in the preparation of manuscripts published in peer-reviewed archival journals; serving as principal investigator on competitive research proposals for funding by Federal and non-Federal peer reviewed sources; disseminating research findings at the local facility, and interacting with clinicians and clinical biomedical engineers.

(8) **Biomedical Engineer (Clinical), GS-14**

(a) **Experience.** Completion of at least [one] year of experience equivalent to the next lower level, and must fully meet the KSAs at that level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the biomedical engineer (clinical) must demonstrate all of the following KSAs. In addition, the candidate must demonstrate the potential to acquire the assignment specific KSAs designated by an asterisk (*):

i. [*][ Ability to apply advanced knowledge of relevant codes, regulations, guidelines, and standards associated with biomedical engineering to support the needs of multiple facilities.]

ii. Ability to effectively convey highly technical information to a wide variety of individuals, including technical and professional clinical staff, and senior level managers at the facility, VISN and/or national level.

iii. *Ability to manage a recall and safety alert program for medical devices, including medical device incident investigations to assure compliance with patient safety goals, SMDA, and [TJC requirements for multiple facilities.]

iv. [ ] Ability to apply advanced knowledge of principles, theories, concepts, and practices of biomedical engineering. This would include the ability to keep abreast of changes in technology and utilize the information gained in the solution of biomedical engineering problems to meet operational needs of multiple facilities.

v. *Ability to directly support the most complex and specialized clinical technology including service, system administration, training, and quality assurance for
multiple facilities.

vi. Ability to work collaboratively with other disciplines, senior management, VHA Central Office, and VISN staff.

vii. Ability to develop and implement healthcare technology management policies that are consistent with organizational objectives. Scope of organization spans from multiple facilities to national.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. At this level, employees are non-supervisory and are typically at the VISN or National Program Offices. At the VISN level, employees must have notable ongoing responsibilities, as assigned by the VISN and/or Healthcare Technology Management Program Office. Major duties must include at least four of the following major responsibilities:

i. Supports and advances patient care by applying engineering and managerial skills to healthcare technology across the VISN, or nationally.

ii. Assists and advises facilities in the implementation of an equipment management program that meets current TJC and NFPA requirements. Evaluates other biomedical engineering programs in the VISN or the national program office.

iii. Assures provision of a continuing education program for professional staff addressing the principles and application of healthcare technology management. This includes a curriculum that addresses the safe and effective management of medical equipment and/or technology. Provides continuing education on behalf of the VISN and/or the national program office.

iv. Provides support and oversight for a recall and safety alert program for medical devices in the VISN, or for the national program office, including medical device incident investigations, to ensure compliance with patient safety goals, SMDA, and TJC requirements. Conducts medical equipment investigations for the VISN or the national program office.

v. Serves as a subject matter expert advisor to senior VISN or national clinical and leadership staff on medical technology crossing multiple clinical disciplines, including existing and emerging technology, addressing viability, long-term suitability, compatibility, and/or safety.

vi. Conducts and/or supports capital asset and infrastructure planning of medical technology found in a hospital, spanning initial concept, installation, and effective implementation of complex medical equipment.

vii. Implementation of complex medical technology. Participates in capital asset planning at the VISN and/or national level. Analyzes organizational and operational problems and develops timely and economical solutions to meet facility, VISN, and/or national needs.
viii. Serves as an institutional expert supporting the most complex and specialized clinical technology, including service, system administration, training, sustainment, and quality assurance across multiple facilities.

(9) **Supervisory Biomedical Engineer (Clinical), GS-14**

(a) **Experience.** Completion of at least one year of experience equivalent to the next lower level, and must fully meet the KSAs at that level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the biomedical engineer (clinical) must demonstrate all of the following KSAs:

i. Ability to manage overall department resources, i.e., finance, space, equipment, supplies, and staffing at a highly complex medical center or at the VISN level.

ii. Ability to develop local or VISN policies and/or draft directives related to healthcare technology management.

iii. Skill in balancing multiple responsibilities, setting priorities, delegating tasks and projects, meeting multiple deadlines, analyzing organizational problems, and developing and implementing effective solutions.

iv. Ability to analyze complex organizational and operational problems to develop and implement solutions that result in efficient operations, and use data effectively to manage workload, quality, performance, and productivity within the area of responsibility.

v. Skill in interpersonal relationships leading and dealing with employees, team leaders, and managers, within and outside the biomedical engineering program, to include conflict management, dispute resolution, mediation, or reasonable accommodations.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. At this level, employees are supervisors and are at the facility, VISN, or National Program Office level. The supervisory biomedical engineer (clinical) is assigned overall biomedical engineering program management responsibility typically found at a university affiliated tertiary care facility (complexity level 1,) with one or more subordinate biomedical engineers. In this assignment, supervisory biomedical engineers at the facility level will have notable ongoing responsibilities, supporting VISN biomedical engineering initiatives, and/or notable ongoing responsibilities as assigned by the Healthcare Technology Management (HTM) Program Office. The range of supervisory responsibility includes development of performance standards and performance evaluations; recommendations for appointment; awards; advancements; and when appropriate,
disciplinary actions and identification of continuing training needs, etc. At this level, the supervisor is responsible for the financial management of budget resources allocated to support quality assurance and maintenance/management activities necessary to assure the facility medical equipment inventory is available for patient care activities. The supervisory biomedical engineer (clinical) is responsible for compliance and reporting of medical device, cyber security, and isolation for facilities under their management oversight.

OR,

At the VISN level, the supervisory biomedical engineer (clinical) is responsible for oversight and coordination of facility biomedical engineering programs, and will serve as the primary liaison between the HTM Program Office and the VISN and facilities. The supervisory biomedical engineer (clinical) must have notable ongoing responsibilities, as assigned by the HTM Program Office. The supervisory biomedical engineer (clinical) is responsible for compliance and reporting of medical device security and isolation for facilities under their management oversight.

OR,

At the national level, the supervisory biomedical engineer (clinical) is assigned responsibility for specific program areas within the HTM Program Office.

(10) Biomedical Engineer (Research), GS-14

(a) **Experience.** Completion of at least one year of experience equivalent to the next lower level and must fully meet the KSAs at that level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the biomedical engineer (research) must demonstrate the following KSAs and potential to acquire the assignment specific KSAs designated by an asterisk (*):

i. Ability to provide formal clinical, research, and/or educational consultation to multidisciplinary staff.

[ii.] Knowledge of the legal, ethical, and professional standards applicable to clinical research in the field of biomedical engineering.

*[iii.] Knowledge of budget control procedures that including funding from multiple sources and may vary annually.

[(c) **Assignment.** At this level, the biomedical engineer (research) designs and supervises biomedical research projects, including the assembly and supervision of an investigative team; has a record of publication as a senior author on manuscripts published in peer-reviewed archival journals; participates in the peer-review of manuscripts in archival journals; has a record of funded, competitive research proposals by Federal or non-Federal peer-reviewed sources; disseminates research findings at the VISN, national, and international level; and participates in the mentorship and training of junior researchers and investigators.]*
(11) Supervisory Biomedical Engineer (Clinical), GS-15

(a) **Experience.** Completion of at least one year of experience equivalent to the next lower level and must fully meet the KSAs at that level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the biomedical engineer (research) must demonstrate the following KSAs and potential to acquire the assignment specific KSAs designated by an asterisk (*) below:

i. Ability to balance responsibilities in an extremely complex environment and to work with great autonomy.

*ii. Ability to independently create, organize, manage, and maintain high-quality programs.

iii. Knowledge of budget control procedures that include funding from multiple sources, which may vary annually.

iv. Ability to interpret and apply relevant codes, regulations, guidelines, and standards associated with biomedical engineering to establish criteria on a national basis for biomedical engineering programs across VHA.

v. Ability to effectively communicate technical information with a wide variety of individuals, including senior VHA executives at the VACO level.

vi. Ability to apply the principles, theories, concepts, and practices of the biomedical engineering profession to establish guidance and national policies.

vii. Knowledge of, and experience in conducting medical equipment investigations or biomedical engineering program reviews for the National Program Office.

(c) **Assignment.** The Under Secretary for Health, or designee, may approve the assignment of a biomedical engineer at the GS-15 grade level when the composite record of qualifications, scope, and complexity of the assignment justifies such action. At this level, employees may be in supervisory or research positions. Other positions may be established when the composite record of qualifications, scope, and complexity of the assignment justifies such action. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time.

Within this assignment, the GS-15 grade level is for the Director and the senior program manager within the VHA HTM Program Office, as well as VISN biomedical engineers with full programmatic responsibility (staffing, budget, planning, compliance, etc.) over all facility biomedical engineering programs within their VISN. On a limited basis, VISN biomedical engineers with notable, ongoing national responsibilities, a composite record of qualifications and accomplishments, and HTM Program Office leadership will qualify.
The supervisory biomedical engineer (clinical) supports and advances patient care by applying engineering and managerial skills to healthcare technology, as demonstrated by at least four of the following major responsibilities:

i. Establishes national criteria for VHA's medical equipment management program that meet current TJC, NFPA, and VA standards. Responsibility at this level would typically be held by the Director or Associate Director of the HTM Program Office.

ii. Manages a VISN biomedical engineering program with direct management/supervisory responsibilities over all facility biomedical engineering programs.

iii. Serves as a national subject matter expert for the HTM Program Office in one or more.

iv. Core competency or programmatic areas for biomedical engineering and has notable ongoing.

v. Responsibility in the area, in support of the National Program Office.

vi. Assures provision of a continuing education program for professional staff addressing the principles and application of medical instrumentation used in the delivery of healthcare. This includes a curriculum that addresses the safe and effective use of medical equipment and/or technology. Develops and organizes training for the VISN or national level for professional engineering, and medical staff as appropriate on engineering topics.

vii. Leads high profile medical equipment investigations or program reviews for the VHA HTM Program Office.

viii. Works with the full range of clinical programs at the national level to identify medical equipment needs and priorities, determines maintenance, support, and quality assurance requirements. Serves as an expert technical advisor to senior clinical and HTM staff on medical technology (including existing and emerging technology), for multiple sites addressing viability, long-term suitability, compatibility, and/or safety. Leads technology assessment activities for the VHA HTM Program Office.

ix. Represents VHA capital asset and infrastructure planning for medical equipment at the national level. Reviews all requests for major medical equipment systems to assure they meet economic and programmatic requirements established by VA and good clinical practice; or coordinates VISN requests for major medical equipment systems to assure they meet VISN economic and programmatic requirements; and assists with capital asset review at the national level.

(12) Biomedical Engineer (Research), GS-15

[(a) Experience. Completion of at least one year of experience equivalent to the next lower level and must fully meet the KSAs at that level.
(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the biomedical engineer (research) must demonstrate the following KSAs and potential to acquire the assignment specific KSAs designated by an asterisk (*):

[i.] Ability to balance responsibilities in an extremely complex environment and to work with great autonomy.

[ii.] Ability to independently create, organize, manage, and maintain high-quality programs.

[iii.] Knowledge of budget control procedures that include funding from multiple sources which may vary annually.

[(c) **Assignment.** At this level the biomedical engineer (research) assembles, maintains, and guides broad-based research efforts involving multiple independently funded investigators; maintains a competitive publication record achieving national and/or international recognition for research accomplishments; serves as a principal investigator on multiple research projects funded by Federal and/or non-Federal sources; serves as a principal investigator on programs or center research proposals for funding by Federal or non-Federal peer-reviewed sources; designs and supervises a mentoring and career development program for junior researchers and investigators; participates in editorial decisions, or serves on the editorial board of an archival journal, and/or is involved in research grant proposal peer-review, and/or in regional or national research policy development. An employee achieving the academic rank at the full professor level, at an affiliated university’s promotion and tenure committee, may demonstrate this recognition.

5.** DEVIATIONS.**

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for Biomedical Engineers in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health or designee, in VHA Central Office.

**Authority:** 38 U.S.C. §§ 7402, 7403.
APPENDIX G39. SOCIAL WORKER QUALIFICATION STANDARD
GS-0185
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a social worker in the Veterans Health Administration (VHA). These requirements apply to all social workers in the GS-0185 series, including those assigned to VA medical centers, Community-Based Outpatient Clinics (CBOCs), Readjustment Counseling Service (RCS)/Veteran Centers, Veterans Integrated Service Network (VISN) offices, and VHA Central Office.

2. DEFINITIONS.
   a. Journey Level. The full performance level for this qualification standard is at the GS-11 grade level.
   b. Creditable Experience. The candidate must have knowledge of current professional social work practices. To be creditable, the experience must have required the use of knowledge, skills, abilities, and other characteristics associated with current professional social work practice. The experience or education must be post-Masters of Social Work (MSW) degree. Experience and education satisfying this requirement must be active professional practice, which is paid/non-paid employment as a professional social worker, as defined by the appropriate state licensing board.
   c. Quality of Experience. Experience is only creditable if it is obtained following graduation with a master’s degree in social work and if it includes work as a professional social worker directly related to the position to be filled. Qualifying experience must also be at a level comparable to social work experience at the next lower level.
   [d. Facility Size and Complexity. The size of the medical center, the type of program managed, and scope of responsibility are critical aspects of the assignments in the standard. The following definitions apply throughout the standard when discussing a small, moderate, and large social work service.
      (1) Small. A small social work service is located in a VA facility which provides general medical services to Veterans, families, and caregivers and may have an affiliated health care system. Services include programs that are technical and complex. Services may be delivered at a variety of VA sites.
      (2) Moderate. A moderate social work service is located in a complex VA facility which provides general medical and specialty services to Veterans, families and caregivers and may have an affiliated health care system. Services include multi-faceted specialty care programs that are technical and complex. Services may be delivered at a variety of VA sites.
      (3) Large. A large social work service is located in a highly complex VA facility which provides diverse services to Veterans, families and caregivers, and is typically an affiliated tertiary care health care system. Services include multiple specialty care programs and VA Centers of Excellence that are highly technical and complex.
across the continuum of care. Services may be delivered at VA sites spanning a large geographic area.]

e. **Advanced Practice Level.** For all assignments above the full performance (journey) level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Advanced Practice Level is defined as the ability to provide independent and expert clinical psychosocial and case management services in a specialized area of practice to Veterans who tend to have serious and severe crises, may lack any familial and community support, may be poor self-monitors, may frequently fail to comply with instructions and treatment, or may have major deficits in coping skills and require continuing professional psychological support. The advanced practice or senior social worker has an increased depth and breadth of practice skills; has expertise in participating in the professional development of colleagues through mentorship and teaching; demonstrates leadership in developing and expanding professional intervention strategies; demonstrates leadership in defining and attending to professional practice issues; and has the ability to expand the conceptual knowledge of the profession. The advanced practice or senior social worker will make independent professional decisions and recommendations for agency action; the consequences to the Veteran of these decisions and actions may be quite serious. Work involves intensive social work services requiring the exercise of mature professional judgment and the flexible use of a wide range of complex social work practice skills not typically required in routine social work interventions. The advanced practice or senior social worker has mastered a range of specialized interventions and provides consultation to colleagues, renders professional opinions based on experience and expertise, develops new models of psychosocial assessment or intervention, and incorporates complex multiple causation in differential diagnosis and treatment. The advanced practice or senior social worker utilizes outcome evaluations to further treatment and designs system changes based on empirical findings.

f. **Differentiating Independent Practice from Advanced Practice Level.** Experience must be evaluated to differentiate between independent practice and advanced practice levels. A social worker practicing at the independent level has a generalized knowledge of practice, (which is required for all social workers at the full performance level and above.), whereas the social worker practicing at the advanced level has specialized knowledge of practice typically related to a particular diagnosis or patient population. The advanced practice social worker can be further differentiated from the independent practice social worker by their ability to expand clinical knowledge in the profession, provide consultation and guidance to colleagues, role model effective social work practice skills, teach or provide orientation to less experienced social workers, develop innovations in practice interventions, and provide clinical supervision for social work licensure or certification. A social worker with advanced practice skills and personal qualifications that meet the standard for the senior social worker will have passed an advanced generalist or clinical Association of Social Work Boards (ASWB) examination and be assigned to a position that requires use of the advanced practice skills in order to be considered for the senior social worker grade.
g. **Part-Time Experience.** Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.

h. **Fellowships or Post-Graduate Training.** Fellowship and post-graduate training programs are typically in a specialized area of clinical practice, i.e., group or family practice. Training as a fellow or post-graduate may be substituted for creditable experience on a year-for-year basis.

i. **Practicum in a VA Setting.** A VHA practicum experience may not be substituted for experience, as the practicum (field placement) is completed prior to graduation with a master’s degree in social work.

3. **BASIC REQUIREMENTS.** The basic requirements for employment as a VHA social worker are prescribed by statute in 38 U.S.C. § 7402(b)(9), as amended by section 205 of Public Law 106-419, enacted November 1, 2000. To qualify for appointment as a social worker in VHA, all applicants must meet the following:

   a. **Citizenship.** Be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g this part).

   b. **Education.** Have a master’s degree in social work from a school of social work fully accredited by the Council on Social Work Education (CSWE). Graduates of schools of social work that are in candidacy status do not meet this requirement until the School of Social Work is fully accredited. A doctoral degree in social work may not be substituted for the master’s degree in social work. Verification of the degree can be made by going to [http://www.cswe.org/Accreditation](http://www.cswe.org/Accreditation) to verify that the social work degree meets the accreditation standards for a masters of social work.

   c. **Licensure.** Persons hired or reassigned to social worker positions in the GS-0185 series in VHA must be licensed or certified by a state to independently practice social work at the master’s degree level. Current state requirements may be found by going to [http://vaww.va.gov/OHRM/T38Hybrid/](http://vaww.va.gov/OHRM/T38Hybrid/).

   ((1) **Exception.** VHA may waive the licensure or certification requirement for persons who are otherwise qualified, pending completion of state prerequisites for licensure/certification examinations. This exception only applies at the GS-9 grade level. For the GS-11 grade level and above, the candidate must be licensed or certified. At the time of appointment, the supervisor, chief social work or social work executive will provide the unlicensed/uncertified social worker with the written requirements for licensure or certification, including the time by which the license or certification must be obtained and the consequences for not becoming licensed or certified by the deadline.]

   (a) For appointments at the GS-9 grade level, VHA social workers who are not licensed or certified at the time of appointment must become licensed or certified at the independent, master’s level within three years of their appointment as a

II-G39-3
social worker. Most states require two years of post-MSW experience as a prerequisite to taking the licensure/certification exam, and VHA gives social workers one additional year to pass the licensure/certification exam. In states such as California, Washington, and others where the prerequisites for licensure exceed two years, social workers must become licensed at the independent, master’s level within one year of meeting the full state prerequisites for licensure.

(b) A social worker who does not yet have a license that allows independent practice must be supervised by a licensed independent practitioner of the same discipline who is a VA staff member and who has access to the electronic health record.

(c) Different states have different levels of licensure or certification, making it difficult for VHA staff to determine the independent practice level. Each state, Puerto Rico, and the District of Columbia completed surveys identifying the level of licensure or certification allowing independent practice. Copies of the surveys are on file in the VHA Office of Care Management and Social Work Services, and a summary spreadsheet of the levels of licensure or certification is available to social work professional standards board members for purposes of determining whether the social worker’s level of licensure or certification meets the VHA qualification standards. All states except California use a series of licensure exams administered by the ASWB. Information can be found at https://www.aswb.org/. The ASWB is the association of boards that regulates social work. ASWB develops and maintains the social work licensing examination used across the country and is a central resource for information on the legal regulation of social work. The ASWB offers three examinations. The master’s examination is generally used by states for the independent practice level of licensure or certification, while the advanced generalist and the clinical examinations are used for the advanced practice level of licensure or certification. Differences between the master’s and the advanced exams demonstrate the expectation that advanced practice social workers will have a more sophisticated knowledge of practice theory and its application.

(2) Failure to Obtain License or Certification. In all cases, social workers must actively pursue meeting state prerequisites for licensure or certification starting from the date of their appointment. Failure to become licensed or certified within the prescribed amount of time will result in removal from the GS-0185 social worker series and may result in termination of employment.

(3) Loss of Licensure or Certification. Once licensed or certified, social workers must maintain a full, valid, and unrestricted independent license or certification to remain qualified for employment. Loss of licensure or certification will result in removal from the GS-0185 social worker series and may result in termination of employment.

d. Grandfathering Provision. The following is the standard grandfathering policy for all title 38 hybrid qualification standards. Please carefully review the qualification standard to determine the specific education and/or licensure/certification/registration requirements that apply to this occupation.
(1) All persons employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and licensure or certification that are part of the basic requirements of the occupation. For employees who do not meet all of the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(2) Such employees in an occupation that requires a licensure or certification, may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

(3) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(4) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all of the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

(5) If an employee who was retained in an occupation listed in 38 U.S.C. § 7401(3) under this provision leaves that occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

**NOTE:** If social workers covered under the grandfathering provision of the 1991 Federal law regarding licensure or certification of VHA social workers leave the GS-0185 social work series, they lose the grandfathering protection. If they choose to return at a later date to the GS-0185 series, they must be licensed or certified to qualify for employment as a social worker.

f. **English Language Proficiency.** Candidates must be proficient in spoken and written English to be appointed as authorized by 38 U.S.C. § 7403(f).

**4. GRADE DETERMINATIONS.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

a. **Social Worker, GS-9 [ ]**

   (1) **Experience, Education, and Licensure.** None beyond the basic requirements.
(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to work with Veterans and family members from various socioeconomic, cultural, ethnic, educational, and other diversified backgrounds utilizing counseling skills.

(b) Ability to assess the psychosocial functioning and needs of Veterans and their family members, and to formulate and implement a treatment plan, identifying the Veterans problems, strengths, weaknesses, coping skills, and assistance needed.

(c) Ability to implement treatment modalities in working with individuals, families, and groups to achieve treatment goals. This requires judgment and skill in utilizing supportive, problem solving, or crisis intervention techniques.

(d) Ability to establish and maintain effective working relationships and communicate with clients, staff, and representatives of community agencies.

(e) Fundamental knowledge of medical and mental health diagnoses, disabilities, and treatment procedures. This includes acute, chronic, and traumatic illnesses/injuries; common medications and their effects/side effects; and medical terminology.

(3) **[Entry Level] Assignments.** Individuals assigned as GS-9 grade level social workers are considered to be at the entry level and are closely supervised, as they are not yet functioning at the independent practice level conferred by independent licensure or certification. Social workers at the GS-9 entry level are typically assigned to program areas that do not require specialized knowledge or experience. Duties may include but are not limited to: identifying behaviors or symptoms of abuse, neglect or exploitation; providing education on advance directives and advanced care planning; providing social work case management; acting as an advocate with appropriate VA and community service providers/agencies when it serves the best interest of the Veteran and family members/caregiver; assessing the psychosocial functioning and needs of Veterans and their family members identifying the Veteran’s strengths, weaknesses, coping skills and psychosocial acuity, in collaboration with the Veteran, family, and interdisciplinary treatment teams; maintaining a current network of internal and external resources to educate the Veteran and/or family members/caregivers and assist with the appropriate referrals. Since social workers at this level are not practicing at an independent level, they should not be assigned to program areas where independent practice is required, such as in a CBOC, unless there is a licensed social worker in the program area who can provide supervision for practice. GS-9 social workers provide psychosocial services in the assigned area under supervision.

b. **Social Worker, GS-11 [ ]**

(1) **Experience and Licensure.** Appointment to the GS-11 grade level requires completion of a minimum of one year of post-MSW experience equivalent to the GS-9 grade level in the field of health care or other social work-related settings, (VA or non-
VA experience) and licensure or certification in a state at the independent practice level.

NOTE: For appointment licensure or certification at this level please refer to paragraph 3c.

OR

(2) Education. In addition to meeting basic requirements, a doctoral degree in social work from a school of social work may be substituted for the required one year of professional social work experience in a clinical setting.

(3) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, candidates must demonstrate all of the following KSAs:

(a) Knowledge of community resources, how to make appropriate referrals to community and other governmental agencies for services, and ability to coordinate services.

(b) Skill in independently conducting psychosocial assessments and treatment interventions to a wide variety of individuals from various socio-economic, cultural, ethnic, educational and other diversified backgrounds.

(c) Knowledge of medical and mental health diagnoses, disabilities and treatment procedures (i.e. acute, chronic and traumatic illnesses/injuries, common medications and their effects/side effects, and medical terminology) to formulate a treatment plan.

(d) Skill in independently implementing different treatment modalities in working with individuals, families, and groups who are experiencing a variety of psychiatric, medical, and social problems to achieve treatment goals.

(e) Ability to provide consultation services to new social workers, social work graduate students, and other staff about the psychosocial needs of patients and the impact of psychosocial problems on health care and compliance with treatment.

(4) [Full Performance Level] Assignments. This is the full performance level. Social workers at this level are licensed or certified to independently practice social work. Incumbents are assigned to all program areas, including but not limited to: inpatient or outpatient medicine, surgery, mental health, neurology, rehabilitation medicine, and geriatrics. Employees provide professional, independent social work services in the assigned area. Duties include but are not limited to: assessing and documenting identified behaviors or symptoms of abuse, neglect, exploitation and/or intimate partner violence; use of clinical social work skills and knowledge to maintain Veteran privacy and confidentiality per policies, handbooks or directives; and acts as an advocate with appropriate VA and community service providers and agencies when it serves the best interest of the Veteran and family members/caregiver. Incumbent independently assesses the psychosocial functioning and needs of Veterans and their family members, identifying the Veteran’s strengths, weaknesses, coping skills, and
psychosocial acuity. In collaboration with the Veteran, family/caregiver, and interdisciplinary treatment team, the social worker facilitates the delivery of health care services. The social worker identifies family/caregiver stressors, conducts assessment and provides specific interventions. The incumbent provides case management and care coordination to facilitate appropriate delivery of health care services, incorporates complex multiple causation in differential diagnosis and treatment of Veterans, including making psychosocial and psychiatric diagnoses within approved clinical privileges or scope of practice. The social worker links the Veteran with services, resources, and opportunities, in order to maximize the Veteran’s independence, health, and well-being. The social worker conducts timely assessment of at-risk Veterans in crisis to identify immediate needs, evaluate risk, and initiate safety plan as appropriate. The social worker provides interventions independently with Veterans and their families/caregivers who are experiencing a wide range of complicated medical, behavioral health, financial, legal, and psychosocial problems. They provide a range of interventions and treatment modalities which may include individual, group, and/or family counseling or psychotherapy. They independently formulate and implement a treatment plan including measurable, achievable goals identifying the Veterans’ needs, strengths, weaknesses, coping skills, and psychosocial acuity. Social workers serve on committees, work groups, and task forces at the facility and VISN level or in the community. They provide subject matter consultation to colleagues and students on the psychosocial treatment of Veterans offering professional opinions based on experience, expertise and role modeling effective social work practice skills. The social worker establishes and maintains ongoing education programs for Veterans, community agencies, students, and staff, to facilitate understanding of social work interventions specific to the Veteran/Military population.

c. **Senior Social Worker, GS-12**

(1) **Experience/Education.** The candidate must have at least two years of experience post advanced practice clinical licensure and should be in a specialized area of social work practice of which, one year must be equivalent to the GS-11 grade level. Senior social workers have experience that demonstrates possession of advanced practice skills and judgment. Senior social workers are experts in their specialized area of practice. Senior social workers may have certification or other post-masters training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship or equivalent supervised professional experience in a specialty.

(2) **Licensure/Certification.** Senior social workers must be licensed or certified by a state at the advanced practice level which included an advanced generalist or clinical examination, unless they are grandfathered by the state in which they are licensed to practice at the advanced practice level (except for licenses issued in California, which administers its own clinical examination for advanced practice) and they must be able to provide supervision for licensure.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, candidates must demonstrate all of the following KSAs:
(a) Skill in a range of specialized interventions and treatment modalities used in specialty treatment programs or with special patient populations. This includes individual, group, and/or family counseling or psychotherapy and advanced level psychosocial and/or case management.

(b) Ability to incorporate complex multiple causation in differential diagnosis and treatment within approved clinical privileges or scope of practice.

(c) Knowledge in developing and implementing methods for measuring effectiveness of social work practice and services in the specialty area, utilizing outcome evaluations to improve treatment services and to design system changes.

(d) Ability to provide specialized consultation to colleagues and students on the psychosocial treatment of patients in the service delivery area, as well as role modeling effective social work practice skills.

(e) Ability to expand clinical knowledge in the social work profession, and to write policies, procedures, and/or practice guidelines pertaining to the service delivery area.

(4) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Senior social workers are licensed or certified to independently practice social work at an advanced level. Senior social workers typically practice in a major program area such as but not limited to: Polytrauma Rehabilitation Center or Polytrauma Network Site; a Spinal Cord Injury Rehabilitation Center, or a national VHA referral center, such as a national Center for Post-Traumatic Stress Disorder or a national Transplant Center, or other program areas of equivalent scope and complexity. The senior social worker may be assigned administrative responsibility for clinical program development and is accountable for clinical program effectiveness and modification of service patterns. Assignments include clinical settings where they have limited access to onsite supervision such as CBOCs or satellite outpatient clinics. The senior social worker collaborates with the other members of the treatment team in the provision of comprehensive health care services to Veterans, ensures equity of access, service, and benefits to this population, ensures the care provided is of the highest quality. The senior social worker provides leadership, direction, orientation, coaching, in-service training, staff development, and continuing education programs for assigned social work staff. They serve on committees, work groups, and task forces at the facility, VISN and national level, or in the community as deemed appropriate by the supervisor, Social Work Executive or Chief of Social Work Services. This assignment is to be relatively few in number based on the size of the facility/service and applying sound position management. This assignment must represent substantial additional responsibility over and above that required at the full performance grade level and cannot be used as the full performance level of this occupation.
(d. **Social Worker (Research), GS-12**

(1) **Experience and/or Education.** One year of experience equivalent to the GS-11 grade level. Experience must demonstrate possession of advanced practice skills in administration, demonstrating progressively more professional competency skills and judgment. The candidate may have a certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** The social worker performing research must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to implement social work research methodology, health services research, and the peer review processes in the preparation of study proposals meeting the guidelines of various funding agencies.

(b) Ability to formulate a research study, from conceptualization of the research problem through the implementation, analysis, interpretation, and reporting phases.

(c) Skill in the use of computer input and analysis of social science data including the use of statistical packages.

(d) Knowledge of the principles of scientific reporting for publications in peer reviewed journals and for presentation at scientific and professional meetings.

(e) Ability to develop realistic goals and objectives, translate management needs, and concerns into operational terms that can be subjected to empirical study and analysis, and communicate the results in both verbal and written form.

(f) Knowledge of current and standard literature in disciplinary field and literature sources, including VA reporting requirements, recurring and non-recurring statistical reports, as well as computer files, forms, and procedures created to support them.

(g) Skill in the critical review and synthesizing of large amounts of information into cogent presentations, translating management needs and concerns into operational terms that can be subjected to empirical study and analysis.

(h) Knowledge in preparing research project budgets, using VA guidelines in the management of funds, monitoring and evaluating the appropriateness of research funding requests in coordination with Fiscal Service and the R&D Administrative Officer.

(4) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be
performed by the incumbent at least 25% of the time. Social workers in this assignment are responsible for social work-related research and management information activities. They are responsible for identifying, initiating, developing, conducting, and testing hypotheses related to the operational efficiency and effectiveness of social work at the facility level. They serve as an expert consultant to health services researchers throughout the facility in their disciplinary area of expertise. Research social workers provide hospital-wide research technical support to other offices such as the Associate Chief of Staff (ACOS) for Research and Development and the ACOS for Education. They are responsible for planning, implementing, and consulting on joint social work and inter-disciplinary research projects conducted through the auspices of affiliated academic institutions. They identify deficits in information regarding optimum delivery of social work services relating to both patients and the health care delivery system. The research social worker develops proposals to address identified social problems, the execution of research projects, analysis of the results, and their dissemination to improve the effectiveness and organizational efficiency of social work service and the medical center it supports. They work independently and in collaboration with other health services research scientists to formulate and conduct research projects related to their disciplinary field. Duties include but are not limited to: consulting and assisting VA health services researchers in the integration of theoretical concepts and applied research issues; advising and assisting VA health services researchers in the selection and application of appropriate analytic methods and statistical procedures for projects involving their area of expertise; preparing and submitting scientific articles and research reports to journals, publication and professional meetings; participating in the scientific review and critique of health services research proposals; and serving on medical center research related committees as appointed (i.e., Research and Development committee, Animal Care and Use Committee and Human Studies Sub-committee). With direction from the social work chief/executive and other medical center leaders, the incumbent coordinates, assesses, and develops data elements, information systems, and reports that address the reporting requirements and information needs of social work service. The research social worker participates in the needs assessments and the development of program evaluation projects that address the department needs. They determine research project staffing needs. They submit complete progress and final reports to fulfill specified reporting requirements. Responsibilities may include clinical social work duties in patient care areas.

d. **Supervisory Social Worker, GS-12 [ ]**

(1) **Education and Experience.** One year of experience equivalent to the GS-11 grade level. Experience must demonstrate possession of advanced practice skills in a specialty area or in administration demonstrating progressively more professional competency and judgment. Candidate may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.
(2) **Licensure/Certification.** Individuals assigned as Supervisory Social Workers must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

[(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to independently organize work, set priorities, and meet multiple deadlines.

(b) Knowledge of supervisory duties which includes clinical supervision, consultation, negotiation with other departments and quality improvement.

(c) Ability to ensure provision of clinical social work services.

(d) Ability to provide staff training and development.

(e) Skill in interpersonal relationships in dealing with employees, team leaders, and managers.

(4) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. At the GS-12 grade level, supervisory social workers typically have significant personnel management responsibilities for a small to moderate sized professional and non-professional staff, including support staff and professional staff at the GS-12 grade level and below. The supervisory social worker is responsible for the professional and administrative management of an area in a social work service, in a care/product line, or multiple facilities. They provide direct clinical services with or without program coordination responsibilities.]

f. Social Worker (Program Coordinator), GS-12

(1) **Experience and Education.** One year of experience equivalent to the GS-11 grade level. Experience must demonstrate possession of advanced practice skills and judgment, demonstrating progressively more professional competency. Candidate may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** Individuals assigned as social worker program coordinator must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

[(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:
(a) Knowledge of program coordination and administration which includes consultation, negotiation, and monitoring.

(b) Knowledge and ability to write policies, procedures, and/or practice guidelines for the program.

(c) Ability to supervise multidisciplinary staff assigned to the program.

(d) Skill in organizing work, setting priorities, meeting multiple deadlines, and evaluating assigned program area(s).

(e) Ability to provide training, orientation, and guidance within clinical practice.

(4) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Program coordinators at the GS-12 grade level are administratively responsible for a clinical program providing treatment to Veterans in a major specialty area, such as but not limited to: Spinal Cord Injury, Homeless Continuum Veteran Program, Hospice and Palliative Care Program, Suicide Prevention Program, Veterans Justice Outreach, Caregiver Support Program and Community Nursing Home Program. The program coordinator may be the sole practitioner in this specialty at the facility and typically provide direct patient care services in the program area. The program coordinator oversees the daily operation of the program, develop policies and procedures for program operation, and prepare reports and statistics for facility, VISN, and national use. They may be responsible for the program’s budget, developing and monitoring staff compliance with practice, standards and guidelines on documentation, workload, data entry, ethical practice and service delivery. The program coordinator provides analysis and evaluation of clinical program data and computerized programs to identify system-wide trends and needs to enhance the quality of service. They may be responsible for, or contribute to, the program’s resource and fiscal management, monitoring control points developing the annual budget, operating within that budget, and accounting for appropriated funds. The program coordinator is administratively responsible for the clinical programming and prepares reports and statistics for facility, VISN, and national use. They provide leadership, direction, orientation, coaching, in-service training, staff development, and continuing education programs for assigned staff. They initiate and conduct a variety of program or service audits and complete designated clinical practice audits and reports, including productivity assessments. They oversee program operations and evaluations, identifying areas for improvement, gathering relevant data, assessing the data, developing and implementing ideas for improvement and evaluating efficacy of improvement efforts.]

g. **Social Worker (Assistant Chief), GS-12 [ ]**

(1) **Experience/Education.** Individuals assigned as assistant service chiefs must have the equivalent of at least one year of creditable experience comparable to the GS-11 grade level. The assistant service chief must evidence possession of supervisory
and management skills. Experience must demonstrate possession of advanced practice skills in administration, demonstrating progressively more professional competency skills and judgment. Candidates may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** Individual must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

[(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of administrative and supervisory duties, which includes personnel actions, clinical supervision, consultation, negotiation with other departments, and quality improvement.

(b) Knowledge of legal, ethical, and professional standards applicable to social work practice.

(c) Ability to develop, maintain, and oversee social work programs in all settings. This includes identifying needs for social work assessment, evaluation, and treatment; determining priority needs for social work services; and recommending adjustments to staffing levels accordingly.

(d) Demonstrated global knowledge of social work practice in health care and mental health settings including resources, and the policies and procedures pertaining to home and community-based care, acute care, ambulatory care, long term care, performance measures, and clinical guidelines.

(e) Ability to provide consultation to care line managers and other staff on social work qualification standards, social work practice, social work competency, social work productivity, and social work continuing education.

(f) Ability to provide supervision for social work licensure and practice supervision for facility social workers.

(4) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. This position is restricted to those serving as a full assistant to the chief social work service for both administrative and professional practice. At the GS-12 grade level, individuals are typically assigned as an assistant chief of a small to moderately complex social work service within the organization. While the chief has full management and supervisory responsibility for clinical practice, program management, education, human resource management and supervision, and organizational stewardship for the social work program, the assistant chief is responsible for supporting these functions per the direction of the chief. In the absence of the social work chief, the assistant chief has full management and
supervisory responsibility of the social work program. Such facilities may offer specialty care and services and may be affiliated with academic institutions. Typically, there are no subordinate supervisory social workers at the facility.]

h. **Social Worker (Research), GS-13 [ ]**

(1) **Experience/Education.** One year of experience equivalent to the GS-12 grade level. Experience must demonstrate possession of advanced practice skills in administration, demonstrating progressively more professional competency skills and judgment. Individual may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** The social worker performing research must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of social work research concerns, health services research, peer review processes, and experience in the preparation of study proposals meeting the guidelines of various funding agencies.

(b) Knowledge of the processes involved in formulating a research study, from conceptualization of the research problem through the implementation, analysis, interpretation and reporting phases; various types of needs assessments, their purpose, execution and interpretation to develop realistic goals and objectives.

(c) Skill in the use of computer input and analysis of social science data including the use of statistical packages.

(d) Knowledge of the principles of scientific reporting for publications in peer reviewed journals and for presentation at scientific and professional meetings.

(e) Ability to function as principal investigator and as a team leader in conducting health services research, communicate verbally and in writing with a wide variety of facility level clinical and administrative staff, and communicate results in both verbal and written form.

(f) Skill in communicating verbally and in writing with a wide variety of clinical and administrative staff on the VISN and national levels, and to critically review and synthesize large amounts of information into cogent presentations.

(g) Knowledge in preparing and managing research project budgets, using VA guidelines in the management of funds, monitoring and evaluating the appropriateness of research funding requests in coordination with national VHA fiscal and administrative requirements.
Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. The research social worker serves as a subject matter expert to leadership at the VISN and national levels, for social work-related research and management information activities. They are responsible for identifying, initiating, developing, conducting, and testing hypotheses related to the operation efficiency and effectiveness of projects assigned at the VISN and national levels of the Veteran Health Administration. The research social worker serves as an expert consultant to health services researchers throughout the VA system in their disciplinary area of expertise. They provide VISN level and national research technical support to national program offices such as, but not limited to: Care Management and Social Work Services, Primary Care, Geriatrics and Extended Care, Office of Academic Affiliations, Homeless and Mental Health. They are responsible for planning, implementing, and consulting on national joint social work and interdisciplinary research projects conducted through the auspices of affiliated academic institutions. The research social worker identifies deficits in information regarding optimum service delivery relating to both patients and the health care delivery system. They develop proposals to address identified system wide psychosocial and health care problems, the execution of research projects, analysis of the results, and their dissemination to improve the effectiveness and organizational efficiency of social work service and the greater health care system. The research social worker works independently and in collaboration with other health services researchers to formulate and conduct research projects related to their disciplinary field. Duties include but are not limited to: consulting and assisting other VA health services researchers on a VISN and national level in the integration of theoretical concepts and applied research issues; advising and assisting VA health services researchers in the selection and application of appropriate analytic methods and statistical procedures for projects involving their area of expertise; preparing and submitting scientific articles and research reports to journals, publication and professional meetings; participating in the scientific review and critique of health services research proposals; and serving on medical center research related committees as appointed (i.e., Research and Development Committee, Animal Care and Use Committee and Human Studies Subcommittee). They coordinate, assess, and develop data elements, information systems, and reports that address national reporting requirements and information needs of program offices on the VISN and national levels. The research social worker participates in needs assessments, to include staffing needs and the development of program evaluation projects at the VISN and national level. Submits reports to fulfill specified reporting requirements. Responsibilities may include clinical social work duties in patient care areas as research projects permit.

i. Supervisory Social Worker, GS-13

Experience/Education. One year of experience equivalent to the GS-12 grade level. Experience must demonstrate possession of advanced practice skills in a specialty area or in administration demonstrating progressively more professional competency and judgment. Candidate may have certification or other post-master's degree training from a nationally recognized professional organization or university
that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** Individuals assigned as supervisory social workers must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

[(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to independently organize work, set priorities, and meet multiple deadlines.

(b) Skill in a range of supervisory duties which includes clinical supervision, consultation, negotiation with other departments and quality improvement.

(c) Ability to ensure provision of clinical social work services by supervised social workers.

(d) Ability to delegate authority, manage priorities, coordinate work, and follow up on pending issues to complete duties in an accurate and timely fashion.

(e) Ability to analyze organizational and operational problems, develop and implement solutions that result in efficient operations, and use data effectively to manage workload, quality, performance, and productivity within the service.

(f) Ability to provide staff training and development.

(4) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Supervisory social workers at the GS-13 grade level typically supervise professional and non-professional staff. They are responsible for the professional and administrative management of an area in a social work service, in a care/product line, or across multiple sites, (e.g., multi-division facilities and CBOCs). Incumbent may also provide direct clinical services.]

j. **Social Worker (Program Coordinator), GS-13 [ ]**

(1) **Experience/Education.** One year of experience equivalent to the GS-12 grade level. Experience must demonstrate possession of advanced practice skills and judgment, demonstrating progressively more professional competency. Candidates may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** Individuals assigned as social worker program coordinator must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.
[(3) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs.]

(a) Skill in coordinating and implementing one or more specialty program(s), across the facility.

(b) Skill in local policy and practice development, procedures, and/or practice guidelines for the program as prescribed by the program handbook or national directive.

(c) Skill in organizing work, setting priorities, meeting multiple deadlines, and evaluating assigned program area(s).

(d) Ability to collaborate with internal and external partners to further program goals and enhance patient centered care.

(e) Ability to provide the full range of supervisory duties including assignment of work to be performed; performance evaluations; and selection of staff, training, and recommendation of awards, advancements, and when appropriate, disciplinary action.

(f) Ability to oversee the fiscal matters of the functions supervised (including fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.

(g) Knowledge of organizational structure and impact on program operations.

(4) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. At this grade level, social worker program coordinators oversee the administrative and clinical aspects of a major specialty treatment program, such as, but not limited to: Post Traumatic Stress Disorder, Substance Abuse Treatment Program, Home-Based Primary Care, Mental Health Intensive Case Management, Caregiver Support Program or Transition and Care Management Program, or a combination of programs located at one facility or multiple divisions of a facility. They are responsible for coordinating interdisciplinary staffing, work assignments, budget, treatment services provided, and admission criteria for the program. The program coordinator may or may not have supervisory responsibilities. They have full responsibility for all phases of service delivery for a major specialty program. The program coordinator is responsible for the program’s resource and fiscal management, monitoring control points developing the annual budget, operating within that budget, and accounting for appropriated funds. They are administratively responsible for the programming and operations of the program assigned, develop policies and procedures for program operation, and prepare reports and statistics for facility, VISN, and national use. Program coordinators provide leadership, direction, orientation, coaching, in-service training, staff development, and continuing education programs for assigned staff. They initiate and conduct program or service audits and complete designated clinical practice
audits and reports, including productivity. Program coordinators oversee program operations and evaluations, identifying areas for improvement, gathering relevant data, assessing the data, developing and implementing ideas for improvement, and evaluating efficacy of improvement efforts.]

ek. Social Worker (Assistant Chief), GS-13 []

(1) **Experience and Education.** One year of experience equivalent to the GS-12 grade level. Experience must demonstrate possession of advanced practice skills in administration, demonstrating progressively more professional competency skills and judgment. Individual may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** The assistant service chief must evidence possession of supervisory and management skills, must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure. 

[(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of administrative and supervisory duties which includes personnel actions, clinical supervision, consultation, negotiation with other departments, and quality improvement.

(b) Knowledge of legal, ethical, and professional standards applicable to social work practice.

(c) Ability to develop, maintain, and oversee social work programs in all settings.

(d) Knowledge of social work practice, policy, and accreditation standards across the continuum of health care.

(e) Skill in providing consultation to facility leadership, managers, and other staff on social work qualification standards, practice, competency, productivity, and continuing education requirements.

(4) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. This position is restricted to those serving as a full assistant to the chief social work service for both administrative and professional practice. These individuals share with the chief full responsibility for managing and supervising all aspects of social work service operations. At the GS-13 grade level, individuals are typically assigned as assistant chief of a large complex social work service within the organization that offers social work services at VHA facilities with one or more divisions. While the chief has full management and supervisory responsibility for clinical practice, program management, education,
human resource management and supervision, and organizational stewardship for the social work program, the assistant chief is responsible for supporting these functions per the direction of the chief. In the absence of the social work chief, the assistant chief has full management and supervisory responsibility for the social work program. The assistant chief provides supervision to a moderate social work service and staff, members of different grades that may include multiple disciplines; treatment sites are limited and in close proximity to the medical center, and programs are with limited administrative oversight responsibility. Such facilities may offer specialty care and services and may be affiliated with academic institutions. The assistant chief develops and maintains a system of internal reviews that ensure service programs operate at a satisfactory level of performance and are in compliance with regulations. The assistant chief has responsibility for utilization of resources and budget. They make selections, assign personnel, and serve as a mentor to help employees develop their full potential.

I. Social Worker (Service Chief), GS-13

(1) **Experience/Education.** One year of experience equivalent to the GS-12 grade level. The chief social work service must evidence possession of supervisory and management skills. Experience must demonstrate possession of advanced practice skills in administration demonstrating progressively more professional competency skills and judgment. May have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** Individual must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, candidates must demonstrate all of the following KSAs:

(a) Skill in administrative and supervisory duties which includes personnel actions, clinical supervision, consultation, negotiation with other departments, and quality improvement.

(b) Skill in applying legal, ethical, and professional standards applicable to social work practice.

(c) Skill in developing, maintaining, and managing social work services in all settings.

(d) Ability to ensure compliance with social work practice, policy, and accreditation standards across the continuum of health care.

(e) Skill in providing consultation to facility leadership, managers, and other staff on social work qualification standards, practice, competency, productivity, and continuing education requirements.
(4) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. The chief social work at this level typically has responsibility for management of small to moderately complex social work service within the organization. The chief social work service is the highest level professional position at the facility with responsibility for the professional practice of all facility social workers and provision of social work services. The chief social work provides supervision to social work service staff members of different grades. Supervision may include multiple disciplines, treatment sites that are limited and in close proximity to the medical center, and programs are with limited administrative oversight responsibility. The chief social work has full responsibility for managing and supervising all aspects of social work service operations including clinical practice, program management, education, human resource management and supervision of the service.

m. Social Work Executive, GS-13

(1) **Experience/Education.** One year of experience equivalent to the GS-12 grade level. Social work executive positions are only established at facilities that do not have a chief social work service. In facilities with care/product lines, the social work executive is the highest level professional position at the facility with responsibility for the professional practice of all facility social workers and provision of social work services. The social work executive must evidence possession of supervisory and management skills. Experience must demonstrate possession of advanced practice skills in administration, demonstrating progressively more professional competency skills and judgment. Candidates may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** The social work executive must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

[(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to provide technical social work guidance in order to complete job assignments.

(b) Skill in applying legal, ethical, and professional standards to social work practice.

(c) Knowledge of social work practice, policy, and accreditation standards across the continuum of health care.

(d) Skill in providing consultation to facility leadership, care/product line managers, and other staff on social work qualification standards, practice, competency, productivity, and continuing education requirements.
(e) Skill in developing, implementing, and maintaining clinical social work practice standards.

(f) Skill in administrative oversight to ensure compliance with social work licensure requirements.

(4) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. In the absence of a facility social work chief, the social work executive is typically responsible for clinical oversight of a professional social work practice in a small to moderate program at a VHA facility. The social work executive is responsible for overseeing the provision of social work services and the professional practice of all facility social workers to include participation in the selection and credentialing of social workers. Additionally, these are generally collateral assignments, determined by the needs of the local facility, the VISN, and/or VHA Central Office.

n. Social Worker (Program Manager) [ ], GS-14

(1) Experience and Education. One year of experience equivalent to the GS-13 grade level. Experience must demonstrate possession of advanced practice skills and judgment, demonstrating progressively more professional competency. Individual may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

[(3) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all the following KSAs:

(2) Licensure/Certification. Individuals assigned as social worker program manager must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

(a) Skill in large scale program coordination and administration across multiple sites, which includes consultation, negotiation, and monitoring.

(b) Ability to translate management goals and objectives into well-coordinated and controlled work operations.

(c) Ability to analyze organizational and operational problems and to develop and implement solutions that result in sound operation of the program.

(d) Ability to collaborate with internal and external partners to further program goals and enhance patient centered care.

(e) Ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluations;
selection of staff, training, and recommendation of awards, advancements, and when appropriate, disciplinary action.

(f) Ability to oversee the fiscal matters of the functions supervised (including fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.

(g) Skill in developing policies, procedures, and/or practice guidelines for the program and in participating in national program development.

(h) Ability to collaborate with internal VHA partners, locally and on a national level, as well as external community partners to further program goals and enhance patient centered care.

(4) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. At the GS-14 grade level, social worker program managers are assigned to manage, direct, and oversee a major specialty program(s) at the facility, VISN or VA Central Office level. As the facility level program manager, typical assignments include serving as a care/product line manager. Program managers may have responsibility for staffing, work assignments, budget, services provided, program criteria, day-to-day program operations, and all reporting requirements. Additionally, program managers at this grade generally have collateral assignments, determined by the needs of the local facility. The program manager provides analysis and evaluation of program data and computerized programs to identify system-wide trends and needs to enhance the quality of service. They develop and monitor staff compliance with practice, standards and guidelines. As the VISN level program manager, typical assignments include overseeing a VISN level program. The program manager serves as consultant to facilities in matters of program operations. They develop and monitor facility compliance with practice, standards, and guidelines across the VISN. The program manager reviews program status with facility leadership. Additionally, program managers at this grade generally have collateral assignments, determined by the needs of the VISN. The VISN program manager provides analysis and evaluation of program data and computerized programs to identify system-wide trends and needs to enhance the quality of service. As the national level program manager, typical assignments include supporting implementation of a national program. The national program manager reports to senior executive service equivalent or GS-15 grade level national program director. They may have responsibility for staffing, work assignments, budget, services provided, day-to-day program operations, and all reporting requirements. Program manager responsibilities also include developing and serving as a subject matter expert for program specific policy and regulations and interface with congressional representatives. Program managers at this grade generally have collateral assignments determined by the needs of VHA Central Office. The national program manager provides analysis and evaluation of program data and computerized programs to identify system-wide trends and needs to enhance the quality of service. They develop and monitor staff compliance with program standards, guidelines, and
service delivery. They develop and implement national training programs for internal and external partners. Program managers are responsible for ensuring program development, management, and evaluation that includes assessing the mission, goals, and programs of the organization in terms of psychosocial needs of Veterans, their families, and caregivers and establishing objectives consistent with organizational goals.]

o. Social Worker (Service Chief) [], GS-14

(1) Experience/Education. One year of experience equivalent to the GS-13 grade level. The chief social work service must evidence possession of supervisory and management skills. Experience must demonstrate possession of advanced practice skills in administration, demonstrating progressively more professional competency skills and judgment. May have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) Licensure/Certification. The chief social worker must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

(3) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Skill in providing the full range of supervisory duties across multiple service divisions/sections, which would include responsibility for assignment of work to be performed, performance evaluation, selection of staff, and recommendations of awards, advancements, and when appropriate, disciplinary actions.

(b) Skill in applying legal, ethical, and professional standards to social work practice.

(c) Skill in developing, maintaining, and managing social work services in multiple divisions/sections.

(d) Ability to ensure compliance with social work practice, policy, and accreditation standards across the continuum of health care.

(e) Skill in providing consultation to facility leadership, managers, and other staff on social work qualification standards, practice, competency, productivity, and continuing education requirements.

(f) Skill in administrative oversight to ensure compliance with social work licensure requirements.

(4) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. At the GS-14 grade level, size, scope, significance and impact are greater than the GS-13 grade level. The
chief social worker responsibility includes management of large, complex, social work services within the organization. The chief social worker is the highest level professional position at the facility with responsibility for the professional practice of all facility social workers and provision of social work services. The chief social worker provides supervision to social work service, with multiple sections or programs across the health care delivery system as well as an assistant chief and supervisors. Social work service includes staff members of different grades, as well as multiple disciplines, various treatment sites and at locations close to and distant from the medical center. The chief social worker has full responsibility for managing and supervising all aspects of social work service operations including clinical practice, program management, education, human resource management and supervision of the service.

p. Social Work Executive, GS-14

(1) **Experience/Education.** One year of experience equivalent to the GS-13 grade level. Social work executive positions are only established at facilities that do not have a chief social work service. In facilities with care/product lines, the social work executive is the highest level professional position at the facility with responsibility for the professional practice of all facility social workers and provision of social work services. Social work executive must evidence possession of supervisory and management skills. Experience must demonstrate possession of advanced practice skills in administration, demonstrating progressively more professional competency skills and judgment. Individual may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** The social work executive must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

[(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, candidates must demonstrate all of the following KSAs:

(a) Skill in providing technical social work guidance in order to complete job assignments in multiple divisions/sections.

(b) Skill in applying legal, ethical, and professional standards to social work practice.

(c) Knowledge of social work practice, policy, and accreditation standards across the continuum of health care.

(d) Skill in providing consultation to facility leadership, care/product line managers, and other staff on social work qualification standards, practice, competency, productivity, and continuing education requirements.

(e) Skill in developing, implementing, and maintaining clinical social work practice standards in multiple divisions/sections.
(f) Skill in administrative oversight to ensure compliance with social work licensure requirements.

(4) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. At the GS-14 grade level the size, scope, significance, and impact are greater than at the GS-13 social work executive level. In the absence of a social work chief, GS-14, grade level, the social work executive is typically responsible for clinical oversight of a professional social work practice in a large program at a VHA facility. Social work executive is typically assigned to a care/product line management role at a VHA facility and has responsibility for overseeing the practice of social workers in the facility or of social workers in multiple divisions of a VHA facility. The GS-14 social work executive is responsible for overseeing the professional practice of all facility social workers and provision of social work services the professional practice of all facility social workers to include participation in the selection and credentialing of social workers. The position usually includes a management role, such as a care/product line manager/administrator.]

q. Social Worker (National Program Director) [], GS-15

(1) Experience/Education. The national program director must have at least four years of experience as a VA clinical social worker with at least one-year equivalent to the GS-14 grade level, and evidence of at least two years of supervisory and management experience. Experience must demonstrate possession of advanced practice skills in administration, demonstrating professional competency, skills and judgment including knowledge of the VHA System and operations. Individual may have certification or other post-master’s degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) Licensure/Certification. Individual must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

(3) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to lead a large, diverse group of clinical and administrative professionals to facilitate collaboration, and individual and organizational development.

(b) Knowledge of Department Level communication protocols to effectively communicate the program specific information, including regulatory changes and policies to VHA leadership, VA staff and community partners.

(c) Skill in advising high level officials in adoption of, and conformance to, performance measures, monitors, and other policy guidelines related to specific
program areas; setting policy for national program(s) and directing VHA staff in the monitoring, assessment, and implementation of national program(s) throughout VHA.

(d) Ability to develop education/training initiatives in concert with clinical and education officials; monitor key activities in program(s) and projects for timeliness, accomplishment of key milestones, and support of overall objectives outlined in directives and other publications of a specific program area.

(e) Ability to develop and sustain strategic partnerships with key internal and external VA stakeholders and community partners on a national level.

(f) Skill in providing technical consultation and support for various projects and special initiatives, including responses to Congressional inquiries; developing high level briefing papers to convey findings and VHA program positions.

(g) Ability to develop and maintain national program databases to track program data and trends across VHA.

(h) Ability to respond to inquiries from within the Department, the Administration, Congress, Office of Management and Budget, the Government Accountability Office, and others as appropriate.

[(4) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. The national director position is characterized by the size, scope, and high level of complexity of the program; has significant impact on the VHA mission; and is of significant importance to the VA. Examples of positions may be similar to those listed under the GS-14 grade level program manager position heading, but, at the GS-15 grade level, the individual has full responsibility for the program or programs. The size, scope, significance, and impact of the programs at the GS-15 level are greater. The national program director serves as subject matter expert to VA senior leaders, including providing consultation to facility and network directors, and other VHA program offices. The national program director is responsible for all aspects of national program operations, including but not limited to managing the national program budget, responding to inquiries from within the Department, the Administration, Congress, and the Government Accountability Office. The incumbent is responsible for the development and implementation of program specific federal regulations and VHA policies impacting all of VHA and ensuring the national program meets VA mission requirements.]

r. Social Work Program Manager, GS-15

(1) Experience/Education. The social work program manager at the GS-15 grade level must have at least four years of experience as a VA clinical social worker with at least one-year equivalent to the GS-14 grade level. The social work program manager must evidence possession of progressively higher supervisory and
management skills. Experience must demonstrate possession of advanced practice skills in administration, demonstrating progressively more professional competency skills and judgment. The individual may have certification or other post-master's degree training from a nationally recognized professional organization or university that includes a defined curriculum/course of study and internship, or equivalent supervised professional experience.

(2) **Licensure/Certification.** The social work manager must be licensed or certified at the advanced practice level, and must be able to provide supervision for licensure.

(3) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must fully meet the KSAs for the GS-14 grade level and demonstrate all the following professional KSAs:

(a) Ability to manage and direct unusually large interdisciplinary programs, complex organizational units, apply effective management practices, plan, design, implement, and evaluate a program(s) that encompasses a wide range of facility/healthcare system/VISN/CO activities.

(b) Ability to oversee issues related to budget projections and participate with senior leaders from the governing body, management and staff in upholding the facility mission, vision, value and strategic plan to include directly interacting with elected officials on VA related issues/concerns (i.e., members of Congress, Veterans Service Organizations, State and Local entities).

(c) Knowledge in establishing policy, procedures and quality monitors while considering multiple priorities, funding sources, and varying resources.

(d) Skill in assessing need for basic and complex services across multiple programmatic patient care venues, coordinate and expand the efforts of multiple program elements across a complex system.

(e) Knowledge to complete all program evaluations and documents required by the medical center, VISN and VHA Central Office, ensuring compliance with appropriate accrediting bodies such as The Joint Commission (TJC), Commission on Accreditation of Rehabilitation Facilities (CARF), and Association for the Accreditation of Human Research Protection Programs (AAHRPP).

(f) Ability to orient, teach and serve as a consultant to other medical center staff and trainees and assists in their formulation of the clinical social work characteristics and appropriate treatment expectations regarding Veterans, family members and caregivers.

(g) Skill in balancing responsibilities in a complex environment and to work with great autonomy, set priorities and delegate tasks, meet multiple deadlines; analyze complex organizational problems and develop and implement effective solutions for those problems.
(h) Ability to promote and effectively manage a culturally diverse workforce which embraces the values and needs of all individuals through long-term commitment, strategic and business planning, education, experience which broadens the mindset and by fully managing human resources.

[(4) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. At the GS-15 grade level, size, scope, significance and impact is greater than the GS-14 grade level. The broad responsibility includes management of a very large, significantly complex service within the organization. The social work program manager delivers a wide range of specialized professional services that significantly impact the health care provided to Veterans, their families, and caregivers. Provides direct oversight to services with multiple complex programs, located at multiple sites and sections across the health care delivery system. The social work program manager is typically located in a complexity level one Health Care System and is assigned as a service line director, associate chief of staff, or service chief within the facility. The service includes staff members of different grades, multiple disciplines, and various treatment sites at multiple locations close to and distant from the primary medical facility. The manager has full responsibility for managing and supervising all aspects of program operations, including clinical practice of an unusually large number of employees across multiple areas/sites, education, quality assurance for outcomes, human resource management and supervision of the extraordinarily large service. Professional staff under direct supervision may include psychiatrists, psychologists, physicians, social workers, nurses, health system specialists and patient services assistants. The social work program manager provides strategic planning, including establishment of long and short-range goals, and development of policies and procedures to ensure goal attainment management of administrative and programmatic resources (including budget and line authority within the service), and outcomes monitoring, using data-driven quality assurance processes. They may have the responsibility for managing and supervising additional facility wide programs outside of the Service including supervision, operations, clinical practice, and program management. The manager develops responses to controlled correspondence received by the Medical Center, from VISN, and VHA Central Office levels, inclusive of responding to elected representatives and the Office of Inspector General Hotline concerning Veteran care and other matters of public interest.]

5. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.
b. Under no circumstances will the educational requirements be waived. Under no circumstances will licensure requirements be waived for positions at the GS-11 grade level or above.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health or designee in VHA Central Office prior to placement in the position.

Authority: 38 U.S.C. §§ 7402, 7403
APPENDIX G40

DEVELOPMENT OF QUALIFICATION STANDARDS
FOR VETERANS HEALTH ADMINISTRATION (VHA) POSITIONS
FILLED UNDER 38 U.S.C. § 7401(1)

1. SCOPE. This appendix provides VA procedures for the development of qualification standards by VHA Central Office program officials and occupation-specific subject matter experts, working with representatives of the Recruitment & Placement Policy Service (R&PPS) (059), for VHA positions under 38 U.S.C. § 7401(1). Authority is given to the Secretary under 38 U.S.C. § 7421 to prescribe qualifications for occupations identified in § 7401(1).

2. BACKGROUND

   a. Qualification Standards are critically important documents for the identification of candidates with the needed knowledge, skills, and abilities to perform VA’s work. Qualification standards establish minimum requirements that are predictive of successful performance.

   b. A qualification standard is a statement of the minimum requirements that an individual must meet to be qualified for appointment or assignment to a position.

   c. Minimum requirements include such considerations as experience, education, training, personal characteristics, physical ability, minimum age, citizenship, and licensure or certification.

   d. In a broad sense, a qualification standard includes the examining guides, rating schedules, rating scales and other standardized measuring devices and techniques through which the qualifications of candidates are evaluated.

   e. A qualification standard does not include the more general eligibility requirements such as restrictions on employment of relatives, security/suitability determinations, etc. of successful performance. The application of qualification standards in VHA is an integral part of ensuring a fully qualified workforce is available to care for Veteran patients.

3. INTERPRETING QUALIFICATION STANDARDS. The following information is pertinent to the interpretation of VA qualification standards:

   a. VHA appointing officials and Professional Standards Boards act for the Under Secretary for Health in applying the qualification standards in a fair and consistent manner. Such decisions are made through an analysis of personal data and/or experience records.

   b. When there is disagreement on the interpretation of a qualification standard, the appropriate HRM Officer may request an interpretation or decision from the Deputy Assistant Secretary for Human Resources Management (05). A courtesy copy of such request will be sent to the appropriate VHA Program Official in VA Central Office.

4. RESPONSIBILITIES. The following is an explanation of responsibilities associated with the development of VA qualification standards:
a. Qualification standards are developed by teams with representatives from R&PPS (059) and subject matter experts from VHA.

b. VHA Field facilities may be requested to review and comment on drafts of VA qualification standards.

c. Professional Standards Boards may recommend changes to qualification standards electronically to R&PPS (059) to improve the quality and clarity of the standards. R&PPS (059) will consult with the appropriate VHA program officials before final proposed changes are submitted for consideration.

5. GENERAL GUIDELINES. These procedures describe a step-by-step process for assembling, analyzing, and verifying occupational information that can then be used to convert a qualification standard from Title 5 to Title 38 format or to revise an existing or develop a new Title 38 qualification standard.

a. For each step, an expected product is described. When the product for each step is completed, it should be forwarded to the R&PPS email box (Staffing Policy 059/VACO@va.gov). Work on the next steps(s) should proceed while R&PPS (059) representatives are reviewing each completed product.

b. For the development of a Title 38 qualification standard for which there is little to no current occupational information or no current and usable job analysis, all eight steps will usually need to be completed.

c. For the development of a Title 38 qualification standard for which there is current occupational information and/or a current and usable job analysis, but some significant changes to the basic requirements for the profession are anticipated, some steps may not need to be completed.

d. Subject-matter experts should review these procedures and identify which steps to complete in consultation with R&PPS (059) in the Office of Human Resources Management.

6. EIGHT STEPS TO DEVELOPING A TITLE 38 QUALIFICATION STANDARD

a. **Step 1.** Gather functional statements. Functional statements should represent the full range of assignments at different types and sizes of facilities, including outpatient clinics, small and large medical centers, etc. Identify representative assignments, duties, tasks, etc. for each grade level, and identify and describe special assignments at appropriate grade levels.

   Product: Representative critical duties/task statements for all grade levels and special assignments.

b. **Step 2.** Compare representative critical duties/task statements to statutory requirements for each grade level.

   Product: Analysis demonstrating how the grade levels assigned to representative critical duties/task statements meet the statutory requirements for each grade level.

c. **Step 3.** Conduct analysis to identify knowledge, skills, abilities and other characteristics required to perform the work of the position.
Product: A job analysis worksheet for each functional statement that identifies the duties performed and the KSAOs required to perform each duty, and a list of the most important KSAOs required for each grade level.

d. **Step 4.** Identify the source or means by which each KSAO is obtained, for example, through specific education or training.

Product: Itemized list of KSAOs and means by which they are obtained.

e. **Step 5.** Gather information on private sector and other Federal healthcare organization’s practices regarding licensure, certification, registration, and positive educational/training requirements, and comparable pay rates.

Product: Summary of findings with supporting documents attached.

f. **Step 6.** Compare findings of Step 5 with results of Step 4.

Product: List of duties with respective required KSAOs, and required licensure, certification, registration, and positive education/training requirements identified.

g. **Step 7.** Review product of Step 6 with statutory requirements for grade levels.

Product: Analysis discussing results of comparison.

h. **Step 8.** Write qualification standard in Title 38 format.

Product: Qualification standard with all supporting documents from Steps 1 through 8.

APPENDIX G41. BLIND REHABILITATION SPECIALIST QUALIFICATION STANDARD
GS-0601
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Blind Rehabilitation Specialist (BRS) in the Veterans Health Administration (VHA). This standard applies to all VHA BRSs, including Visual Impairment Services Team (VIST) Coordinator positions. The work requires knowledge of the concepts, principles, and practices of blind and vision rehabilitation and the use of assessments, therapies, and technologies to improve the independent function, quality of life and adjustment for Veterans who are blind or visually impaired. BRSs evaluate Veterans by interviews, tests, and measurements and use such findings solely and/or as a part of an interdisciplinary team to develop and implement blind and vision rehabilitation programs for individual Veterans. Instructional activities are directed toward achieving therapeutic objectives for Veterans who are blind and visually impaired in effective literacy and communication skills, orientation to and management of the environment, safe ambulation and travel, manual skills, proficiency and understanding in activities of daily living, pursuit of avocational and vocational skills, and adjustment to visual [impairment].

NOTE: Blind Rehabilitation Outpatient Specialist (BROS) Qualification Standard is contained in VA Handbook 5005, Part II, Appendix G42.

2. DEFINITIONS.

a. Journey Level. The BRS full performance level for this qualification standard is the GS-11 grade level. The full performance level for BRS VIST Coordinator is the GS-12 grade level.

b. Creditable Experience. To be creditable, the experience must demonstrate possession of the knowledge, skills, and abilities associated with current blind and vision rehabilitation practice, as outlined in the current scope and standards of practice for blind and vision rehabilitation. Applicants may have one or more of the following:

   (1) The equivalent of one year of active practice. Active practice means paid/non-paid employment (VA or Non-VA) as a BRS or BROS.

   (2) Academic course work leading to an advanced degree in blind or vision rehabilitation or closely related rehabilitation therapeutic intervention program.

c. Quality of Experience. Work as a graduate BRS directly related to the position to be filled; and the work to be credited is at a level comparable to BRS experience at the same or next lower grade level than the grade level being considered for placement. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.
d. **Part-Time Experience.** Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.

e. **Graduate Education.** Master's/[Doctoral] degrees may be substituted for experience through the GS-11 grade level [(Master's degree up to the GS-9 grade level, Doctoral degree up to the GS-11 grade level).] Degrees must be from a college or university that was regionally or nationally accredited at the time the candidate completed the program. To substitute the degree, it must have been completed after the individual met the basic requirements for appointment.

f. **Content Specialty.** Specialized content areas of blind and vision rehabilitation include, but are not limited to: orientation and mobility, low vision therapy, vision rehabilitation therapy, manual skills, technology and computer access for the people who are visually impaired, and case-management for disability due to blindness.

[3. **BASIC REQUIREMENTS.**]

a. **Citizenship.** [Be a ]citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3.g., of this part.)

b. **Education**

   (1) The individual must have earned:

   (a) A bachelor’s degree from an accredited college or university with a major field of study in blind or vision rehabilitation, closely related program in rehabilitation, special education for the visually impaired, family and consumer science education, or technology and industrial arts education [ ].

   OR,

   (b) A bachelor’s degree from an accredited college or university (without a major field of study as outlined in (1)(a) above) that included, or was supplemented by, at least one of the following:

   i. At least 30 semester hours of directly related, upper level undergraduate courses (e.g., at least 200-course level or higher, or as identified by the college or university).

   ii. One full year of directly related graduate level coursework (typically at least 15 -18 semester hours).

   iii. A certificate from an accredited college or university in the core curriculum in orientation and mobility, vision rehabilitation therapy, assistive technology for
blind and visually impaired individuals, or low vision therapy and a directly related practicum/internship in the occupation, either included in the degree or post-degree.

iv. Foreign Graduates must have proof of a minimum of a bachelor’s degree from an accredited college or university (or foreign equivalent, as verified through an independent credential evaluation company), with a specialization in blind rehabilitation.

c. Certification. Required at the GS-11 grade level and above.

(1) Applicants must possess at least one active, current, full and unrestricted certification to be eligible for appointment. Certification must be granted by the Academy for Certification of Vision Rehabilitation & Education Professionals (ACVREP), or another equivalent, closely related professional credential in special education or rehabilitation. []

**NOTE:** The ACVREP administers four certification programs: Low Vision Therapy, Orientation and Mobility, Assistive Technology Instruction and Vision Rehabilitation Therapy. They may then use the designation for the certification they hold (as listed in subparagraph (2)) below:

(2) BRS who provide the following service must obtain certification granted by ACVREP as follows:

(a) Orientation and mobility training - Certified Orientation and Mobility Specialists (COMS®).

(b) Communication and daily living therapy - Certified Vision Rehabilitation Therapists (CVRT®).

(c) Low vision therapy - Certified Low Vision Therapists (CLVT®).

[(d) Assistive Technology - Certified Assistive Technology Instructional Specialists (CATIS®).]

(3) BRS Advanced Practitioners at the GS-13 grade level must possess two certifications awarded by ACVREP.

(4) BRS VIST Coordinators may be drawn from traditional blind/vision rehabilitation backgrounds, and from counseling backgrounds such as social work, vocational rehabilitation counseling, etc. VIST Coordinators must be credentialed/certified through:

(a) Any certification via the ACVREP,

OR,
(b) Individuals appointed based on experience as a Social Worker must be licensed or certified by a state to independently practice social work at the master’s degree level. A doctoral degree in social work may not be substituted for the master’s degree in social work. If appointed as a VIST Coordinator, Social Workers are appointed to the GS-0601 series, but must still maintain a full, valid, and unrestricted independent license or certification to remain qualified for employment,

OR,

(c) Certification via the Commission on Rehabilitation Counselor Certification (CRCC) Certified Rehabilitation Counselor, (CRC),

OR,

(d) Individuals appointed based on experience in other health care occupations must be licensed or certified by a state to independently practice in their field. If appointed as a VIST Coordinator, such individuals are appointed to the GS-0601 series, but must still maintain their full, valid, and unrestricted independent license or certification in their occupation to remain qualified for employment. Examples of occupations may include but [are not limited to Marriage and Family Therapist or Licensed Mental Health Counselor.]

d. Loss of Credential

(1) Once certified, a BRS must maintain a full, valid, and unrestricted independent certification to remain qualified for employment. Loss of certification will result in removal from the BRS occupation and may result in termination of employment.

(2) A BRS who has, or has ever had his/her certification revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions in VA Handbook 5005, Part II, Chapter 3, Section B, Paragraph 16 of this part.

(3) If hired based on experience as a social worker, rehabilitation counselor, or equivalent, relevant professional counseling credential in rehabilitation, the VIST Coordinator must still maintain a full, valid, and unrestricted independent license or certification to remain qualified for employment.

e. Grandfathering Provision. All BRSs employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and certification(s) that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation.
(2) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or certification(s) that meet all the basic requirements of this qualification standard must maintain the required equivalent credential(s) as a condition of employment in the occupation.

(4) If a BRS who was retained under this provision leaves the occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation. **Physical Requirements.** See VA Directive and Handbook 5019, Employee Occupational Health Service.

[f.] **English Language Proficiency.** Candidates will not be appointed under authority of 38 U.S.C. chapters 73 or 74, to serve in a direct patient-care capacity in VHA who are not proficient in written and spoken English. See Chapter 2, section D, paragraph 5a, this part.

[4. **GRADE DETERMINATIONS.**] In addition to the basic requirements, the following criteria must be used when determining the appropriate grade assignment of candidates. This criteria is consistent with the two grade interval structure for professional/scientific professions found in VA Handbook 5005, Part II, Appendix G17.

a. **BRS, GS-9 [(Entry Level)]**

   (1) **Experience.** Bachelor’s degree and completion of one year of experience.

   OR,

   (2) **Education.** Completion of at least two full years of progressive graduate education or a master’s degree in a field directly related to the position.

   (3) **Certification.** No certification is required at this level.

   (4) **Demonstrated Knowledge, Skills, and Abilities (KSAs).** In addition to the education and experience above the candidate must demonstrate all the following KSAs:

   (a) Knowledge of policies and procedures of the blind/vision rehabilitation service.

   (b) Knowledge of administration and interpretation of assessments and evaluations in blind/vision rehabilitation.
(c) Ability to develop a basic written blind/vision rehabilitation plan from assessment results and develop more complex plans with consultation from supervisor.

(d) Skill in instructing [Veterans] and families in a meaningful rehabilitation program and applying blind/vision rehabilitation therapeutic techniques.

(e) Ability to recommend appropriate blind/vision prosthetic devices for Veterans within the scope of practice.

(f) Ability to serve as team coordinator for assigned Veterans during their rehabilitation programs.

(5) **Assignment.** Individuals at this grade level serve as [entry level] staff BRSs. They are responsible for intake, assessment, planning for rehabilitation, intervention, and follow-up in the content specialties. They receive guidance from experienced staff members for the most complex [Veteran cases.]

[b. BRS, GS-11 (NOTE:) Full performance level for BRS who are not VIST Coordinators.)

(1) **Experience.** In addition to meeting the basic requirements, completion of one year of progressively complex experience equivalent to the GS-9 grade.

OR,

(2) **Education.** Three years of progressively higher level graduate education leading to a Doctoral Degree; or Doctoral Degree in Blind Rehabilitation or a directly related field.

(3) **Certification.** Certification is required at this grade level and above. Staff BRS candidates must meet the certification requirements in paragraph 3c(1) above. BRSs at the GS-11 grade level must have at least one certification from ACVREP or a related, equivalent, professional certification.

(4) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs described at the GS-9 grade level, the candidate must demonstrate all the following KSAs:

(a) Knowledge and understanding of highly specialized complex evaluations and diagnostic tests and procedures of blind/vision rehabilitation.

(b) Ability to properly assess Veterans having diverse and multiple disabilities to make recommendations for blind/vision rehabilitation therapeutic interventions.

(c) Skill in writing a blind/vision rehabilitation plan that includes evaluation information from multiple disciplines with observable, measurable goals and that identifies specific outcomes.
(d) Skill in instructional methods and learning principles.

(e) Ability to employ interventions and unusual motivational techniques and coordinate treatment with other professionals to achieve outcomes of the rehabilitation plan.

(f) Ability to recommend appropriate blind/vision rehabilitation prosthetic devices for Veterans within scope of practice, making adaptations and modifications as required.

(5) Assignments. This is the full performance level for BRSs who are not VIST Coordinators. Assignments at this grade level include the following:

(a) **Staff BRS.** In addition to providing services to Veterans described at the GS-9 grade level, individuals at this level have duties that typically include the following: serving as a consultant to blind/low vision rehabilitation and other medical center staff in evaluating and treating Veterans in the specialty area; serving as a mentor to other therapists who are evaluating and treating Veterans in the content specialty or program area; serving as internship supervisor to students who are completing their supervised practice; and providing in-service and clinical training programs in the content specialty or program area.

(b) **BRS (Sole Practice).** Individuals in this assignment may serve as the only BRS at a medical center or an outpatient clinic and are responsible for independent decision-making and independent care. Individuals in this assignment serve as a member of or as consultant to a specialty care team, [and provide in-service and clinical training programs in the content specialty or program area.

c. BRS GS-11 (VIST Coordinator-Developmental Level)]

(1) **Experience.** In addition to meeting the basic requirements, completion of one year of progressively complex experience equivalent to the GS-9 grade level.

OR,

(2) **Education.** Three years of progressively higher level graduate education leading to a Doctoral Degree; or Doctoral Degree in Blind Rehabilitation or a directly related field.

(3) **Certification.** VIST Coordinator candidates must meet the certification requirements in paragraph 3c(3) above. BRSs who are VIST Coordinators may be drawn from traditional blind/vision rehabilitation backgrounds and from counseling backgrounds such as social work, vocational rehabilitation counseling, etc. VIST Coordinators may be credentialed/certified through any of the following:

(a) Certification via the ACVREP;

(b) Licensure via the Social Worker Licensure Board;

(c) Certification via the CRCC;
*OR,

(d) Equivalent and relevant professional credential in counseling or rehabilitation. [Examples of other health care occupations may include but are not limited to Marriage and Family Therapists or Licensed Mental Health Counselors.]

(4) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs described at the GS-9 grade level, the candidate must demonstrate all the following KSAs:

(a) [Ability to communicate both orally and in writing with staff at all organizational levels; with Veterans and their family members; with community groups; and individuals with varying degrees of understanding about visual impairment.]

(b) Ability to assess Veterans having diverse and multiple disabilities to make recommendations for blind/vision rehabilitation therapeutic interventions.

(c) Ability to write a blind/vision rehabilitation plan that includes evaluation information from multiple disciplines with observable, measurable goals and that identifies specific outcomes.

(d) [Knowledge of VA blind and low vision rehabilitation treatment programs.]

(e) Skill in interpersonal relationships in dealing with patients, employees, other team leaders, managers and other stakeholders.

(f) Knowledge of psychological, rehabilitation, and counseling theories and principles.

(g) Ability to coordinate with various resources to identify suitable training programs.

(5) **Assignment.** Individuals in this assignment serve in a developmental capacity as case management professionals whose knowledge must be broad ranging and include not only the medical conditions and rehabilitation of Veterans who are blind and visually impaired, but also knowledge of their compensation and benefits, as well as VA and non-VA rehabilitation programs. In addition, VIST Coordinators work with Veterans and their families in readjustment counseling.

[d. BRS,] GS-12 (VIST Coordinator-Full Performance Level)

(1) **Experience.** In addition to meeting the basic requirements, completion of a minimum of one year of progressively complex experience equivalent to GS-11 grade level.

(2) **Certification.** VIST Coordinators must meet the certification requirements in paragraph 3c(3) above.
(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs described at the GS-11 grade level, the candidate must demonstrate all the following KSAs:

((a) Skill to effectively communicate both orally and in writing with staff at all organizational levels, with Veterans and their family members, with community groups, and individuals with varying degrees of understanding.

(b) Ability to assess Veterans having diverse and multiple disabilities to make recommendations for therapeutic interventions.

(c) Skill in writing a blind/vision rehabilitation plan that includes evaluation information from multiple disciplines and contains observable, measurable goals that identify specific outcomes.

(d) Knowledge of VA and non-VA blind and low vision rehabilitation treatment programs.

(e) Skill in interpersonal relationships dealing with patients, employees, other team leaders, managers, and other stakeholders.

(f) Knowledge of psychological, rehabilitation, and counseling theories and principles.

(g) Ability to coordinate with various resources to identify and refer Veterans to suitable training programs.

(h)] Ability to apply decision-making principles to adjust programs on a day-to-day basis, to develop short term and long-range goals, and to plan for future utilization of resources.

(4) **Assignment.** The GS-12 grade level is the full performance level for a VIST Coordinator. Individuals in this assignment will demonstrate mastery in adjustment counseling, coordinating access to services, assuring adequate compensation and benefits, and must conduct complex negotiations with the medical and benefit systems as well as non-VA service delivery systems. VIST Coordinators convene and manage a local medical center Visual/Impairment Services Team that meets regularly to influence and make recommendations regarding the best programs for Veterans who are visually impaired. VIST Coordinators at the full performance level manage a support group for blinded Veterans, publish a VIST newsletter, and provide community presentations to professional and lay groups to publicize the program. They plan and execute programs to locate blinded Veterans previously unknown to Blind Rehabilitation Service through outreach in their medical centers, in the community and in other service delivery systems such as vocational rehabilitation, community services for the visually impaired, community eye care, etc. They work closely with the BRS national consultants and VA central office staff to continuously upgrade and improve their practice and programs.
e. [BRS, GS-12 (Sole Practice)]

(1) **Experience.** In addition to meeting the basic requirements, completion of one year of progressively complex experience equivalent to the GS-11 grade level.

(2) **Certification.** Staff BRS candidates must meet the certification requirements in paragraph 3c(1) above.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs described at the GS-11 grade level, the candidate must demonstrate all the following KSAs:

[(a) Knowledge and understanding of highly specialized, complex evaluations and diagnostic tests and procedures of blind/vision rehabilitation.

(c) Ability to properly assess Veterans having diverse and multiple disabilities to make recommendations for therapeutic interventions.

(d) Skill in writing a blind/vision rehabilitation plan that includes evaluation information from multiple disciplines and contains observable, measurable goals that identify specific outcomes.

(e) Ability to act as a subject matter expert in the blind/vision rehabilitation field and as a consultant, supervisor and/or mentor in evaluating and treating Veterans in specialty or program areas.

(f) Ability to employ interventions and unusual motivational techniques and coordinate treatment with other professionals to achieve outcomes of the rehabilitation plan.

(g) Ability to recommend appropriate blind/vision rehabilitation prosthetic devices for Veterans within the scope of practice, while making adaptations and modifications, as required.

(h) Ability to independently develop, plan, and administer complex treatment programs.

(i) Ability to communicate both orally and in writing with staff at all organizational levels, Veterans and their family members, community groups, and individuals with varying degrees of understanding.]

(4) **Assignment.** Individuals in this assignment serve as the only BRS at a medical center or an outpatient clinic and are responsible for a high level of decision-making and are responsible for independent care. Incumbent serves as member or consultant to specialty care teams. [Incumbent may oversee volunteers and/or may have part-time administrative clerk support. Incumbent serves as a subject matter expert, assuring that a complete range of skills is available for a diverse Veteran population at affiliated blind rehabilitation inpatient centers or outpatient clinics. Additional activities include evaluating new products and equipment and making recommendations concerning upgrades/new purchases that improve operations.]
[f. Supervisory BRS.] GS-12

(1) **Experience.** In addition to meeting the basic requirements, completion of a minimum of one year of progressively complex experience equivalent to the GS-11 grade level.

(2) **Certification.** BRS must meet the certification requirements in paragraph 3c(1) above.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs described at the GS-11 grade level, the candidate must demonstrate all the following KSAs:

[(a) Ability to plan, direct, mentor, and distribute work assignments to volunteers, assistants, interns, and/or Blind Rehabilitation Specialists at lower grade levels.]

(b) Ability to act as a subject matter expert in the blind/vision rehabilitation field and as consultant, supervisor and/or mentor in evaluating and treating Veterans in specialty or program areas.

(c) Ability to coordinate, motivate, and effectively manage staff and/or committee members to include organizing work, setting priorities, and delegating tasks and responsibilities.

(d) Ability to disseminate appropriate information through various media as a consultant or mentor.

(e) Skill in interpersonal relationships in dealing with Veterans, employees, other team leaders, managers, and other stakeholders.

(f) Ability to identify team group dynamics, objectively observe, and modify behaviors.

(g) Ability to apply decision-making principles to adjust programs on a day-to-day basis, develop short term and long-range goals, and plan for future utilization of resources.

[(h) Skill in developing, planning, and administering complex treatment programs.] VA Handbook

(4) **Assignment.** [The employee assigned to this position is located within an inpatient Blind Rehabilitation Center (BRC) and functions in a supervisory position for BRS professional staff at the GS-9 and GS-11 grade levels and who are not VIST Coordinators or Blind Rehabilitation Outpatient Specialists.] This employee serves as a subject matter expert, assuring that a complete range of skills are available for a diverse Veteran population at affiliated blind rehabilitation inpatient centers or outpatient clinics. At this level, the blind or vision rehabilitation program typically includes a variety of specialties, an extensive educational program, and data collection and review as well as research activities. Additional activities include the evaluation of new products and equipment and making recommendations concerning upgrades/new purchases that would improve operations. Other supervisory responsibilities include informing higher-level management of anticipated staffing variances and recommending promotions, reassignments, or other
personnel actions such as retention or release of probationary employees as well as recommending recognition of superior performance when applicable.

[g. BRS, GS-12 (Admission Coordinator)]

(1) **Experience.** In addition to meeting the basic requirements, completion of one year of experience as a BRS equivalent at the GS-11 grade level.

(2) **Certification.** Candidates must meet the credentialing/certification requirements in paragraph 3c(1) above.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the education and experience above, the candidate must demonstrate all the following KSAs:

(a) Ability to plan, coordinate, and manage applications, admissions and discharges, and ensure provision of the appropriate clinical care for Veterans in an inpatient BRC.

(b) Ability to ensure that cooperative partnerships exist among Veterans, Service members and their families, VHA rehabilitation providers, community providers, and other stakeholders, to support a comprehensive blind rehabilitation program structure.

(c) Ability to develop, maintain, analyze, and present statistical and programmatic data and information related to BRC operations.

(d) Knowledge of budgetary and financial management processes, including VERA reimbursement, catastrophic disability, and beneficiary travel policies.

(e) Ability to perform the full range of supervisory duties, when authorized, which would include responsibility for assignment of work to be performed, competency assessments, performance evaluations, hiring decisions, and recommendations for awards, advancements, and disciplinary actions.

(4) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety, as described in this standard, at the specified grade level, and will be performed by the incumbent at least 25% of the time. This assignment may or may not be supervisory. BRS Admission Coordinator duties include, but are not limited to coordination, review, and management of all BRC applications; admissions; discharges; and waiting lists. The Admission Coordinator organizes clinical delivery of services, schedules the Veterans’ treatment program processes, admissions and discharges, and facilitates travel arrangements for Veterans to inpatient BRCs. Develop and maintain admission and discharge, wait time/wait list statistics, and other programmatic information to assist in coordinating reports to VACO, VISN, and the BRC Director, as well as the facility Chief of Staff. Counsels and advises VIST regarding prospective applicants. Maintains good relations with all relevant stakeholders, including local, state, and regional agencies,
and Veterans Service Organizations. Maintains various internal BRC data and tracking systems. Provides technical assistance in day-to-day operations, program planning, and special projects, as assigned. May provide direct patient care to Veterans, as deemed appropriate and necessary by the BRC Chief and/or designated supervisor. Admission Coordinators who are supervisors review and approve or disapprove leave requests; interview candidates for vacancies; and assume administrative responsibilities in the absence of the BRC Chief or supervisor. Represents administration at planning and team meetings as required/needed. Reports to Blind Rehabilitation Center (BRC) Chief and/or designated supervisor.

**h. BRS, GS-13 (Advanced Practitioner)**

(1) **Experience.** In addition to meeting the basic requirements, completion of one year of experience as a BRS equivalent at the GS-12 grade level.

(2) **Certification.** Candidates must meet the credentialing/certification requirements in paragraph 3c(2) above. Advanced Practitioners at the GS-13 grade level must achieve two ACVREP certifications to demonstrate mastery in two areas of blind rehabilitation.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the education and experience above, the candidate must demonstrate all the following KSAs. (a) Ability to develop educational materials/in-service education curriculum for VA staff and providers, as well as non-VA personnel.

(b) Ability to act as a subject matter expert to create, update, and deploy models for best practice, including researching literature, developing clinical practice guidelines and guiding BRS professionals in applying these tools, as well as following up to evaluate outcomes of new practices.

(c) Ability to manage the implementation and evaluation of BRS programs.

(d) Skill to provide technical assistance in day to day operations, budget formulation, program planning, and special projects.

(e) Knowledge of scientific concepts and methodological principles related to vision impairment and blindness rehabilitation.

(f) Ability to analyze and use data effectively to manage workload, quality, performance, and productivity.

(g) Knowledge of telehealth policies and procedures, to include best practice for deployment, assessment, and training, to support and evaluate telehealth
(h) Ability to identify and develop recommendations for acquisition, training, and deployment of cutting edge technology.

(i) Skill in professional writing, such as technology evaluations, newsletters, letters to editors, etc., that are relevant, germane, and elevate the practice and profession of blind and vision rehabilitation.

(4) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and a range of variety, as described in this standard, at the specified grade level, and will be performed by the incumbent at least 25% of the time. The Advanced Practitioner assists in the creation and implementation of instructional models for BRS programs and field training opportunities. Develops educational materials and in-service education classes for VA/non-VA agencies and personnel. Assists leadership in managing the development, implementation, and evaluation of blind rehabilitation programs that demonstrate best practices and services. Provides technical assistance in day-to-day operations, program planning and special projects, as assigned. Participates in modifications and proposed innovative methods for performance and quality improvement. Analyzes clinically appropriate data to support optimization of quality, performance, and productivity. Assists in maintenance and monitoring of records required for accreditation/risk management (Joint Commission and Commission on Accreditation of Rehabilitation Facilities). May provide direct patient care to Veterans, as deemed appropriate and necessary by the BRC Chief and/or designated supervisor. Develops recommendations for acquisition, training, and deployment of emerging technology. Demonstrates knowledge of current assistive/access technology (e.g., electronic and non-electronic emerging and currently available technology). Promotes telehealth services through a partnership within all service areas in BRS. Participates in, and assists with, resource allocation, budget planning, financial management, and execution of contracts within BRS. Develops strong relationships with Veterans, families, professional organizations, and other stakeholders within the general public. Creates opportunities to educate professionals and the public about blindness and BRS programs. Works with the BRC leadership team and other medical center leadership to formulate a marketing plan to promote BRS within VHA and the local community. Contributes to literature published in professional journals that elevate blind rehabilitation practice.

i. **BRS,] GS-13 (National Program Consultant)**

(1) **Experience.** In addition to meeting the basic requirements, completion of one year of experience as a BRS equivalent to the GS-12 grade level.

(2) **Certification.** Candidates must meet the credentialing/certification requirements in paragraph 3c(1) and (2) above. VIST Coordinators must meet the certification requirements in 3c(3) above.
Demonstrated Knowledge, Skills, and Abilities. In addition to meeting the KSAs described at the GS-12 grade level, the candidate must demonstrate all the following KSAs:

(a) Ability to balance responsibilities and to work with great autonomy.

(b) Ability to set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions.

(c) Ability to monitor and report on the status and progress of work, evaluate program quality to ensure that methods, deadlines, and quality have been met, and make adjustments to accomplish the workload in accordance with established priorities.

(d) Ability to analyze and use data effectively to manage workload, quality, performance, and productivity within the section.

(e) Ability to utilize evidence-based practices and clinical practice guidelines in a professional area and to guide BRS professionals in applying these tools.

(f) Ability to apply and to instruct professionals in current practice, literature, and research to enhance the continuum of care in blind/vision rehabilitation services.

(g) Ability to provide consultation and promote best practice procedures in blind/vision rehabilitation nationally; and serve as a national leader in the field of blind/vision rehabilitation.

(h) Ability to serve as coach, facilitator, and/or negotiator in coordinating Blind Rehabilitation Service initiatives and consensus building activities among individuals with widely divergent backgrounds, interests, and points of view.

Assignment. [For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and a range of variety, as described in this standard, at the specified grade level, and will be performed by the incumbent at least 25% of the time. The employees assigned as] the BRS National Program Consultants (NPCs) are responsible for support, oversight and communication among the various local, regional, and national levels of VHA Blind Rehabilitation Service. They create and implement the instructional models for training, perform ongoing review and evaluation of programs and services, and report findings to VA Central Office. NPCs articulate findings from data and research for programmatic quality assurance.

Supervisory BRS, GS-13 (Assistant Chief)

Experience. In addition to meeting the basic requirements, completion of one year of experience as a BRS equivalent to the GS-12 grade level.
(2) **Certification.** Candidates must meet the credentialing/certification requirements in paragraph 3c(1) and (2) above. VIST Coordinators must meet the certification requirements in 3c(3) above.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs described at the GS-12 grade level, the candidate must demonstrate all the following KSAs:

(a) Ability to balance responsibilities and work with great autonomy.

(b) Ability to organize work, set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions.

(c) Ability to analyze and use data effectively to manage workload, quality, performance, and productivity within the section, and to develop and administer systematic internal reviews to ensure conformance with local and national policies as well as accreditation standards.

(d) Ability to provide technical expertise, supervise, motivate, and effectively manage a diverse clinical staff.

(e) Skill in assessing qualifications and abilities of current and prospective employees.

(f) Ability to develop productivity standards applicable to a blind rehabilitation center or equivalent clinical program.

(g) Ability to adapt to new and changing work conditions, staffing, and contingencies.

(4) **Assignment.** [For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty), and a range of variety, as described in this standard, at the specified grade level, and will be performed by the incumbent at least 25% of the time.] Assistant Chiefs serve as full assistants to Blind Rehabilitation Chief (BRC). Assistant Chiefs support the service chief and have full responsibility for all professional areas in a service-level department in the absence of the service chief. Assistant Chiefs exercise supervision, administrative management, and direction of professional areas in a blind rehabilitation center or clinical program. Assistant Chiefs have responsibility for general and/or technical supervision of key clinical and training programs within the service, and overall technical and administrative oversight of BRS.

[k. Supervisory BRS.] **GS-13 (Service Chief)**

(1) **Experience.** In addition to meeting the basic requirements, completion of one year of experience as a BRS equivalent to the GS-12 grade level.
(2) **Certification.** Candidates must meet the credentialing/certification requirements in paragraph 3c(1) and (2) above. VIST Coordinators must meet the certification requirements in 3c(3) above.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs described at the GS-12 grade level, the candidate must demonstrate all the following KSAs: (a) Ability to supervise, motivate, and manage effectively a diverse clinical staff applicable to a small Blind Rehabilitation Center or equivalent program.

[(b) Skill in assessing qualifications and abilities of current and prospective employees.

(c) Knowledge] to apply administrative and human resources policies effectively.

[(d) Skill to] organize work, set priorities, delegate tasks and responsibilities, and manage and direct the work of others to accomplish program goals and missions.

(e) Ability to adapt to new and changing work conditions, contingencies, and staffing.

(f) Ability to translate management goals and objectives into well-coordinated and controlled service operations through technical direction, review, analyses and evaluation of program components including productivity, and ability to manage budgets.

(g) Ability to provide consultation and promote best practice procedures in blind/vision rehabilitation nationally; and serve as a national leader in the field of blind/vision rehabilitation.

(4) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and [a] range of variety[,] as described in this standard[,] at the specified grade level and [will] be performed by the incumbent at least 25% of the time. Service Chiefs at this grade level have overall responsibility for a blind rehabilitation center or its equivalent clinical program. These individuals have responsibility for general supervision of clinical[,] and/or training programs, and overall technical and administrative oversight for operations within the service. Service chiefs develop, organize, direct, manage, supervise, control, and implement policies and procedures for complex service-level departments. They have overall responsibility for planning, assessing, and evaluating programs[,] to ensure proper coordination between care delivered by the service[,] and the overall delivery of health care within the facility. Service chiefs make decisions that affect section supervisors and/or assistant chiefs (if applicable), clinical and clerical staff, and other resources associated with the department, with great autonomy. Service chiefs exercise supervision, administrative management, and direction of all professional areas in a unified blind/vision rehabilitation service.

[I. Supervisory BRS, GS-14 (Service Chief)]

(1) **Experience.** In addition to meeting the basic requirements, completion of one year of experience as a BRS equivalent to the GS-13 grade level. VA Handbook 5005/109
March 13, 2019
(2) **Certification.** Candidates must meet the credentialing/certification requirements in paragraph 3c(1) and (2) above. VIST Coordinators must meet the certification requirements in 3c(3) above.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the education and experience above the candidate must demonstrate all the following KSAs:

(a) Skill to supervise, motivate, and manage effectively a diverse clinical staff applicable to a large blind rehabilitation center or equivalent program.

(b) Ability to assess qualifications and abilities of current and prospective employees.

(c) Ability to establish and monitor productivity standards and production and performance priorities and to apply administration and human resource policies effectively.

(d) Skill to organize work, set priorities, delegate tasks and responsibilities and to manage and direct the work of others to accomplish program goals and missions.

(e) Ability to [adapt] to new and changing work conditions.

(f) Ability to advance scientific methods in the oversight and management of highly creative, innovative, and complex blind rehabilitation research and to convey scientific concepts and methodological principles to individuals with diverse levels of technical expertise.

(g) Ability to provide consultation and promote best practice procedures in blind/low vision rehabilitation nationally and serve as a national leader in the field of blind/low vision rehabilitation.

(4) **Assignment.** [For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty), and a range of variety, as described in this standard, at the specified grade level, and will be performed by the incumbent at least 25% of the time.] BRS at this grade level demonstrate exceptional achievement, professional competence, and leadership and are appointed to service chief positions that have broad and overall responsibility for larger blind rehabilitation centers or their equivalent clinical programs. They manage substantive blind rehabilitation centers that deliver specialized, complex, professional services. They have responsibility for general supervision of clinical and/or training programs and overall technical and administrative oversight for operations within the service. They have responsibility for overseeing research programs that evaluate effectiveness and efficiency in service delivery, provide evidence to inform best practice, and evaluate and recommend technology for the entire blindness program. Service chiefs make decisions with great autonomy that affect section supervisors, assistant chiefs, clinical and clerical staff, and other resources associated with the department. Service chiefs exercise supervision, administrative management, and direction of professional areas in a blind rehabilitation center or equivalent clinical program.
5. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the educational or certification requirements be waived.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health or designee in VHA Central Office prior to placement in the position.

APPENDIX G42. BLIND REHABILITATION OUTPATIENT SPECIALIST
QUALIFICATION STANDARD
GS-0601
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Blind Rehabilitation Outpatient Specialist (BROS) in the Veterans Health Administration (VHA). This standard applies to all VHA BROS positions. BROS are professionals who have been cross-trained to provide outpatient services in blind/low vision rehabilitation, including orientation and mobility, communication and daily living, low vision therapy, technology and computer access and manual skills. The work requires the application of knowledge of the concepts, principles, and practices of blind and vision rehabilitation and the use of assessments, therapies, and technology to improve the independent function, quality of life and adjustment for patients who are blind or visually impaired. BROS evaluate patients by interviews, tests, and measurements. BROS use such findings solely and/or as a part of an interdisciplinary team to develop and implement blind and vision rehabilitation programs for individual patients. Instructional activities are directed toward achieving therapeutic objectives for patients who are blind and visually impaired in effective literacy and communication skills, orientation to and management of the environment, safe ambulation and travel, manual skills, proficiency and understanding in activities of daily living, pursuit of a vocation and vocational skills, and adjustment to visual impairment.

NOTE: Blind Rehabilitation Specialist (BRS) Qualification Standard, including Visual Impairment Service Team (VIST) Coordinator, is contained in VA Handbook 5005, Part II, Appendix G41.

2. DEFINITIONS.

a. **Journey Level.** The BROS initial performance level for this qualification standard is the GS-11 grade level. The full performance level for BROS is the GS-12 grade level.

b. **Creditable Experience.** To be creditable, the experience must demonstrate possession of the knowledge, skills and abilities associated with current blind and vision rehabilitation practice as outlined in the current scope and standards of practice for blind and vision rehabilitation. One or more of the following may have evidenced this:

   (1) The equivalent of one year of active practice. Active practice means paid/non-paid employment (VA or Non-VA) as a BRS or BROS.

   (2) Academic course work leading to an advanced degree in blind or vision rehabilitation or related therapeutic intervention program.

c. **Quality of Experience.** The work to be credited is at a level comparable to BROS experience at the same or next lower grade level than the grade level being considered for placement.
d. **Part-Time Experience.** Part-time experience as a professional BROS is credited according to its relationship to the full-time work week. For example, a BROS would receive one week of full-time credit for each two weeks of half-time work.

e. **Content Specialty.** Specialized content areas of blind and vision rehabilitation include, but are not limited to: orientation and mobility, low vision therapy, vision rehabilitation therapy, manual skills, technology, and computer access for people who are visually impaired, and case-management for disability resulting from blindness.

### 3. BASIC REQUIREMENTS.

a. **Citizenship.** Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, of this part.)

b. **Education and Experience**

   (1) The individual must have earned:

   (a) A bachelor’s degree from an accredited college or university with a major field of study in blind or vision rehabilitation, [or a closely] related program in rehabilitation, special education, family and consumer science education, technology, and industrial arts education;

   OR,

   (b) A master’s degree from an accredited college or university with a major field of study in blind or vision rehabilitation, [or a closely] related program in rehabilitation, special education, family and consumer science education, technology, and industrial arts education;

   OR,

   (c) A bachelor's [or master's] degree from an accredited college or university (without a major field of study as outlined in (1)(a) and (b) above) and obtained a certificate from an accredited college or university in the core curriculum in orientation and mobility, vision rehabilitation therapy, assistive technology for blind and visually impaired individuals, or low vision therapy. This education must have included supervised practice; and

   (d) Completion of one year of progressively complex experience equivalent to the BRS, GS-9 grade level;

   OR,

   (e) Three (3) years of progressively higher-level graduate education leading to a doctoral degree in blind rehabilitation or a directly related field.
(2) Foreign graduates must have proof of a minimum of a bachelor’s degree from an accredited college or university (or foreign equivalent, as verified through an independent credential evaluation company), with a specialization in blind rehabilitation.

c. Certification. Required at all levels.

(1) Applicants must possess at least one active, current, full, and unrestricted certification to be eligible for appointment.

(2) An applicant who has, or ever had his/her certification suspended, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions in Chapter 3, Section B, Paragraph 16 of this part. An applicant who has or has ever had a certification revoked or terminated for cause, or voluntarily relinquished such certification after being notified in writing by the State of potential revocation or termination for cause, is ineligible for employment and must be removed from the GS-0601 series. This applies even if the applicant possesses one or more valid certifications or registration (38 U.S.C. § 7402(f)).

**NOTE:** The Academy for Certification of Vision Rehabilitation & Education Professionals (ACVREP) administers four certification programs: Low Vision Therapy, Orientation, and Mobility, [Certified Assistive Technology Instructions Specialist] and Vision Rehabilitation Therapy. They may then use the designation for the certification they hold (as listed in subparagraph (2)) below:

(3) BROS who provide the following services must obtain and maintain one certification at the GS-11 grade level and two certifications at the GS-12 grade level granted by ACVREP as follows:

(a) Orientation and mobility training - Certified Orientation and Mobility Specialists (COMS®).

(b) Communication and daily living therapy - Certified Vision Rehabilitation Therapists (CVRT®).

(c) Low vision therapy - Certified Low Vision Therapists (CLVT®).

[(d) Assistive technology - Certified Assistive Technology Instructional Specialist (CATIS®)].

d. Loss of Credential. Once certified, a BROS must maintain a full, valid, and unrestricted independent certification(s) to remain qualified for employment. Loss of certification(s) will result in removal from the BROS occupation and may result in termination of employment.
e. **Grandfathering Provision.** All BROS employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and certification(s) that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation.

(2) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or certification(s) that meet all the basic requirements of this qualification standard must maintain the required equivalent credentials as a condition of employment in the occupation.

(4) If a BROS who was retained under this provision leaves the occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

[g]. **English Language Proficiency.** [Candidates who are not proficient in written and spoken English will not be appointed to serve in a direct patient-care capacity in VHA under the authority of 38 U.S.C. chapters 73 or 74. See Chapter 2, section D, paragraph 5a, this part.]

4. **GRADE LEVEL DETERMINATIONS.** In addition to the basic requirements, the following criteria must be used when determining the appropriate grade assignment of candidates.

**NOTE:** Appointments of BRSs at the [ ] GS-9 grade level is made in accordance with Appendix G41 (Blind Rehabilitation Specialist Qualification Standard). The only grade levels for BROS positions are the GS-11 and GS-12 grade levels as stated below.

a. **BROS, GS-11 (Entry level)**

(1) **Experience.** [None beyond the basic requirements.]
(2) **Certification.** Candidates must meet the certification requirements in subparagraph 2c above (at least one certification from ACVREP).

(3) **Demonstrated Knowledge, Skills, and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge and understanding of highly specialized complex evaluations and diagnostic tests and procedures of blind/vision rehabilitation.

(b) Ability to properly assess a wide variety of patients having diverse and multiple disabilities to make recommendations for blind/vision rehabilitation therapeutic interventions.

(c) [Skill in development and writing of a] blind/vision rehabilitation plan that includes evaluation information from multiple disciplines with observable, measurable goals and that identifies specific outcomes.

(d) Knowledge of teaching methods and learning principles.

(e) Ability to employ interventions, unusual motivational techniques, and coordinate treatment with other professionals to achieve outcomes of the rehabilitation plan.

(f) Skill in recommending appropriate blind/vision rehabilitation prosthetic devices for patients within scope of practice, making adaptations and modifications as required.

(g) Ability to plan, direct, and distribute work assignments to volunteers, assistants, interns, and/or BRSs at lower grade levels and perform assigned mentoring duties for staff, students, and interns.

(4) **Assignment.** Individuals in this assignment serve in a developmental capacity as the BROS at a medical center[,] or an outpatient clinic[,] and in patients’ homes and communities. BROS are responsible for decision-making and [ ] independent care under the direction of their supervisors and the Blind Rehabilitation National Consultant for their region. Individuals in this assignment serve as a member of a specialty care team. At the GS-11 level, BROS[es] will receive training and oversight from the Blind Rehabilitation National Consultant for their regions.

[NOTE: Upon hire, GS-11 BROS are required to obtain a 2nd certification from ACVREP within 2 years of the initial appointment date to demonstrate journey mastery in two specialty areas and to become a GS-12 BROS. Failure to do so will result in removal from the BROS occupation and may result in termination of employment.]

b. **BROS, GS-12 (Full Performance Level)**

(1) **Experience.** In addition to meeting the basic requirements, completion of a
(2) Certification. Candidates must meet the certification requirements in subparagraph 3c above. BROS at the GS-12 grade level must achieve two ACVREP certifications to demonstrate full mastery in two areas of blind rehabilitation.

(3) Demonstrated Knowledge, Skills, and Abilities (KSAs). In addition to meeting the KSAs at the GS-11 grade level, the candidate must fully demonstrate all of the following KSAs:

(a) Skill to independently develop, plan, and administer complex treatment programs.

(b) Ability to act as a subject matter expert in the blind/vision rehabilitation field[,] and as consultant, supervisor[,] and/or mentor in evaluating and treating patients in specialty or program areas.

(c) Ability to coordinate, motivate, and effectively manage staff and/or committee members to include organizing work, setting priorities, and delegating tasks and responsibilities.

(d) Ability to disseminate appropriate information through various media as a consultant or mentor.

(e) Skill in interpersonal relationships in dealing with patients, employees, other team leaders, managers, and other stakeholders.

(f) Ability to identify team group dynamics, objectively observe, and modify behaviors.

(g) Ability to apply decision-making principles to adjust programs on a day-to-day basis, to develop short[-]term and long[-]range goals, and to plan for future utilization of resources.

(4) Assignment. Individuals in this assignment may serve as the only BROS at a medical center[,] or an outpatient clinic[,] or in patients’ homes and communities, and are responsible for independent decision-making and independent care. Individuals in this assignment may serve as a member of, or as [a] consultant to a specialty care team[,] such as the Polytrauma System of Care. BROS will demonstrate mastery abilities in two of the blind/vision rehabilitation specialty areas: orientation and mobility, low vision therapy, vision rehabilitation therapy, and assistive technology [ ] for blind and visually impaired individuals. BROS will also demonstrate advanced skill in the practice of the other content specialties in blind rehabilitation, e.g., computer training and manual skills. At the GS-12 grade level, BROS practice independently, seeking support from the Blind Rehabilitation Service National Consultant for the region when necessary.

NOTE: GS-13 grade level and above. Assignments as Supervisory BRS, National Program Consultant, Assistant Chief, and/or Service Chief are filled as BRS ([See] VA Handbook 5005, Part II, Appendix G41).
5. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the educational or certification requirements be waived.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

Authority: 38 U.S.C. §§ 7402, 7403
[APPENDIX G43. LICENSED PROFESSIONAL MENTAL HEALTH COUNSELOR QUALIFICATION STANDARD
GS-0183
Veterans Health Administration]

1. COVERAGE. The following are requirements for appointment as a Licensed Professional Mental Health Counselor (LPMHC) in the Veterans Health Administration (VHA). LPMHCs provide professional counseling and mental health services using knowledge, theory, and training foundations in professional counseling. LPMHCs may be assigned to any VHA program area, may consult with peers and supervisors, and may be involved in program evaluation and/or research activities. These requirements apply to all VHA LPMHCs in the GS-0183 series, including those assigned to VA Medical Centers, Community-Based Outpatient Clinics (CBOCs), Vet Centers, Veterans Integrated Service Network (VISN) offices, and VHA Central Office.

2. DEFINITIONS.
   a. **Appointing Official.** The Human Resources Management Officer is delegated appointing authority to process and authenticate notifications of personnel actions, and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

   b. **Approving Official.** The Veterans Integrated Service Network (VISN) Director, facility Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

   c. **Journey Level.** The full performance level for this qualification standard is the GS-11 grade level.

   d. **Creditable Experience.** To be creditable, the experience must have required the use of knowledge, skills, abilities, and other characteristics (KSAs), also referred to as core competencies associated with the scope of LPMHC practice.

   e. **Part-Time Experience.** Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.

   f. **LPMHC professionals.** LPMHC professionals may be referred to differently in each state and titles may reflect different levels of practice. For example, states may license an LPMHC as a Licensed Professional Counselor (LPC), Licensed Professional Clinical Counselor (LPCC), Licensed Clinical Professional Counselor (LCPC), Licensed Mental Health Counselor (LMHC) etc. Please refer to specific state licensing guidelines. VA refers to the occupation as LPMHCs.
g. **Clinical supervision.** Clinical supervision is between a licensed and unlicensed clinician or trainee in which the supervisee’s clinical work is reviewed and reflected upon, with the aims of: improving the supervisee’s work with clients; ensuring client welfare; supporting the supervisee in relation to their work, and supporting the supervisee’s professional development. This includes co-signing clinical notes and supervising an individual as they are working towards licensure. Some state licenses do not license an individual to provide clinical supervision to trainees or unlicensed LPMHCs. Please refer to specific state licensing laws regarding the requirements for providing clinical supervision.

h. **Administrative Supervision.** Administrative supervision is supervisory responsibility including but not limited to assigning and evaluating the work of subordinate staff; resolving complex problems to ensure patient services are met; making final decisions on selections; evaluating performance, and taking disciplinary action when necessary. The employee has full administrative and professional responsibility for planning and directing the work.

3. **BASIC REQUIREMENTS.** The basic requirements for employment as a LPMHC are prescribed by statute in 38 U.S.C. §7402(b)(11). To qualify for appointment as a LPMHC all applicants must:

a. **Citizenship.** Be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with VA Handbook 5005, Part II, Chapter 3, Section A, paragraph 3.g.).

b. **Education.** Hold a master’s or doctoral degree in: Clinical Mental Health Counseling; Clinical Rehabilitation Counseling; Clinical Mental Health Counseling and Clinical Rehabilitation Counseling; or a related field, from a program accredited by the Council on Accreditation of Counseling and Related Educational Programs (CACREP). Examples of related mental health counseling fields include, but are not limited to Addiction Counseling; Community Counseling; Gerontology Counseling; Marital, Couple, and Family Counseling. CACREP defines the date when graduates are considered to have graduated from a CACREP accredited program. Additional information may be obtained from [http://www.cacrep.org/directory/](http://www.cacrep.org/directory/). **NOTE:** Traditional Rehabilitation counseling programs that are accredited by CACREP do not meet the LPMHC qualification standards as Traditional Rehabilitation counseling differs from Clinical Rehabilitation counseling.

c. **Licensure.** Persons hired or reassigned to LPMHC positions in the GS-0183 series in VHA must hold a full, current, and unrestricted license to independently practice as a Licensed Professional Mental Health Counselor, which includes diagnosis and treatment. **NOTE:** It is VHA policy that a LPMHC who does not yet have a license that allows independent practice must be supervised by a licensed independent practitioner of the same discipline who is a VA staff member and who has access to the electronic health record.
(1) **Exception.** VHA may waive the licensure requirement for persons who are otherwise qualified, pending completion of state prerequisites for licensure. This exception only applies up to the full performance level. For grade levels at or above the full performance level, the candidate must be licensed.

(2) The appointing official may waive the requirement of licensure for a period not to exceed 3 years for a LPMHC that provides care under the clinical supervision of a licensed LPMHC who is at or above the full performance level. This exception only applies at the entry level (GS-9). For grade levels at or above the full performance level, the candidate must be licensed. The Human Resources Office will provide the unlicensed LPMHC in writing the requirement to obtain licensure, the date by which the license must be acquired, and the consequences for not becoming licensed by the deadline. The written notice must be provided prior to the entrance on duty date.

(3) **Failure to Obtain License.** In all cases, LPMHCs must actively pursue meeting state prerequisites for licensure starting from the date of their appointment. Failure to become licensed within three years from date of appointment will result in removal from the GS-0183 LPMHC series and may result in termination of employment.

(4) **Loss of Licensure.** Once licensed, LPMHCs must maintain a full, valid, and unrestricted license to independently practice mental health counseling, which includes diagnosis and treatment. Loss of licensure will result in removal from the GS-0183 LPMHC occupation and may result in termination of employment.

d. **Grandfather Provision.** All persons employed in VHA in as LPMHC on the effective date of this qualification standard are considered to have met all qualification requirements for the grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees in an occupation that requires a licensure, may be reassigned, promoted up to and including the full performance level, or demoted within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

(2) Such employees in an occupation that requires a licensure/certification/registration only at higher grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher grade levels.
(3) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(4) If an employee who was retained (grandfathered) under this provision leaves that occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

(5) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

f. English Language Proficiency. LPMHCs must be proficient in spoken and written English in accordance with VA Handbook 5005, Part II, chapter 3, section A, paragraph 3.j.

4. GRADE REQUIREMENTS.

a. Creditable Experience

(1) Knowledge of Current LPMHC Practices. To be creditable, the experience must have demonstrated the knowledge, skills, and abilities associated with current mental health counseling practice. Experience satisfying this requirement must be active professional practice at the post-master’s degree level, which is paid/non-paid employment as a professional mental health counselor.

(2) Quality of Experience. Experience is only creditable if it is post-master’s degree experience as a mental health counselor directly related to the position to be filled. Qualifying experience must be at a level comparable to LPMHC experience at the next lower grade level. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

(3) Part-Time Experience. Part-time experience as a LPMHC is creditable according to its relationship to the full-time workweek. For example, a LPMHC employed 20 hours a week, or on a 1/2-time basis, would receive one full-time workweek of credit for each two weeks of service.
(4) **Fellowships or Post-Graduate Training.** Fellowship and post-graduate training programs are typically in a specialized area of clinical practice, i.e., mental health counseling. Training as a fellow or post-graduate may be substituted for creditable experience on a year-for-year basis.

(5) **Practicum in a VA Setting.** VHA practicum experience may not be substituted for experience, as the practicum (field placement) is completed prior to graduation with a master’s degree in mental health counseling or related field.

**b. Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

(1) **Licensed Professional Mental Health Counselor, GS-9 (Entry Level)**

(a) **Experience, Education, and Licensure.** The GS-9 grade level is the entry grade level for LPMHCs with less than one year of experience (post-master’s degree) or for LPMHCs at the master’s or doctoral level who are graduates not yet licensed at the independent practice level. Unlicensed LPMHCs at the GS-9 grade level have completed the required education listed in paragraph 3.b., and are working toward completion of prerequisites for licensure. In addition, the candidates must demonstrate the KSAs in subparagraph (c) below.

(b) **Assignments.** Individuals assigned as GS-9 LPMHCs are considered to be at the entry level and are closely supervised, including co-signatures where required, as they are not functioning at the full performance level. They are typically assigned to VHA areas that do not require specialized knowledge or experience. Since they are not practicing at an independent level, they should not be assigned to areas where independent practice is required, such as in a CBOC, unless there is a licensed LPMHC in the area who can provide supervision for practice. Under supervision, LPMHCs at this level provide professional mental health counseling services.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the basic requirements, the candidates must demonstrate all of the KSAs below:

1. Ability to engage in intake and assessment, problem identification, diagnosis, treatment planning and implementation, continuum of care, evaluation and follow-up.

2. Knowledge of current Diagnostic and Statistical Manual (DSM) of Mental Disorders in formulation of treatment goals and application
of appropriate clinical interventions using professional counseling practices.

3. Basic knowledge of professional counseling practice with emphasis on human development principles through cognitive, affective, behavioral or systemic interventions, and strategies that address high risk behaviors, wellness, personal growth, and career development across the life span.

4. Ability to use a wide variety of individual, group, or family counseling interventions; demonstrates sensitivity to diversity and possesses multicultural counseling skills.

5. Ability to serve on an interdisciplinary team with focus on the intrapersonal, interpersonal, and relational functioning of individuals, groups and families and on the counseling approaches, strategies, and techniques that will best help patients function effectively.

6. Basic skill in the use of computer software applications for drafting documents, data management, maintaining accurate, timely and thorough clinical documentation and delivery of services, such as Telehealth.

7. Ability to learn and utilize software programs in use by VHA.

8. Knowledge and understanding of existing relevant statutes, case laws, ethical codes, and regulations affecting professional practice of counseling.

9. Ability to communicate effectively, both orally and in writing, with people from varied backgrounds.

(2) Licensed Professional Mental Health Counselor, GS-11 (Full Performance Level)

(a) Experience, Education, and Licensure. In addition to the basic requirements, candidates must have at least one year of post-master’s or post-doctoral degree mental health counseling experience (VA or non-VA experience) and must be licensed to practice at the independent practice level and demonstrate the KSAs in subparagraph (c) below. LPMHCs may provide clinical supervision over the clinical practice of an unlicensed LPMHC or LPMHC trainee. Some state licenses do not license an individual to provide clinical supervision to trainees or unlicensed LPMHCs. Please refer to specific state licensing laws regarding the requirements for providing clinical supervision.
(b) **Assignments.** This is the full performance grade level for LPMHCs. At this level they are licensed to independently practice professional counseling and to provide mental health services within the knowledge, theory, and training foundations of professional counseling. LPMHCs may be assigned to any VHA area, consulting with peers and supervisors as appropriate. LPMHCs may be involved in program evaluation and/or research activities.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs for the GS-9 grade level, the candidate must demonstrate all of the KSAs below:

1. Ability to make professional evaluations, decisions, and recommendation for treatment planning and implementation.

2. Advanced knowledge and mastery of the fundamentals of the counseling process which includes defining patient/family problems and maintaining an effective counseling relationship.

3. Ability to provide subject matter consultation to colleagues and trainees on the counseling process within various specialty areas, build on the foundation of competence through regular meetings and discussions to explain assignments, review progress of cases and confer about the counseling perspectives and orientation.

4. Ability to provide complex crisis intervention and stabilization to patients who are in psychological distress. Requires independent judgment and skill.

5. Ability to establish goals/treatment through a collaborative process with the patient utilizing advanced counseling skills, including evidenced-based practices, screening, and psychosocial assessment.

6. Ability to use a wide variety of individual, group, or familial counseling interventions; demonstrates sensitivity to diversity and possesses multicultural counseling skills.

7. Ability to fully utilize the current DSM in making diagnoses and formulation of treatment goals and application of appropriate clinical intervention using professional counseling practices.

8. Ability to develop and facilitate psychotherapy and psycho-education groups that include life skills, family support, and community integration. This may include evidence based psychotherapy.
(3) Senior Licensed Professional Mental Health Counselor, GS-12

(a) Experience, Education, and Licensure. In addition to the basic requirements, candidates must have at least one year of progressively complex LPMHC experience equivalent to the GS-11 grade level. Senior LPMHCs must have five years of post-licensed experience that demonstrates possession of advanced practice skills and judgment, demonstrating progressive professional competency and expertise and be licensed to provide clinical supervision to trainees or unlicensed LPMHCs.

(b) Assignments. Senior LPMHCs provide treatment to patients with complex needs including multiple mental health diagnoses, and numerous psychosocial issues, using independent judgment. LPMHCs at this level provide clinical consultation to less experienced staff which may include coordinating crisis situations. Senior LPMHCs will provide clinical supervision to LPMHC staff and/or LPMHC trainees, and may serve as the subject matter expert for the discipline. Senior LPMHCs develop behavioral health related training curriculum and often conduct trainings for clinical staff. LPMHCs model ethical and professional behaviors and standards to include multicultural awareness. Senior LPMHCs meet routinely with interprofessional team members and leadership to communicate about program and patient issues for in depth problem solving. Senior LPMHCs collaborate with internal and external stakeholders and frequently serve as a liaison. This assignment is to be relatively few in number based on the size of the facility/service and applying sound position management. This assignment must represent substantial additional responsibility over and above that required at the full performance grade level and cannot be used as the full performance level of this occupation.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to meeting the KSAs for the GS-11 grade level, the candidate must demonstrate all of the KSAs below:

1. Advanced knowledge of and mastery of theories and modalities used in the specialized treatment of complex mental illness. Ability to incorporate complex multiple causation in differential diagnosis and treatment of veteran patients, including making psychosocial and psychiatric diagnoses within approved clinical privileges or scope of practice. Ability to determine priority of services needed and provide specialized treatment.

2. Advanced and expert skill in a range of specialized interventions and treatment modalities for Veterans with complex needs. This includes individual, group, and/or family counseling, or
psychotherapy and advanced level psychosocial, and/or case management interventions used in the treatment of Veterans.

3. Ability to coordinate the delivery of specialized psychosocial services and programs. Ability to design system changes based on data.

4. Ability to provide subject matter consultation to colleagues and trainees on the psychosocial treatment of patients, rendering professional opinions based on experience, expertise and role modeling effective clinical skills.

5. Ability to teach, mentor staff and trainees, and provide supervision for licensure or for specialty certifications.

6. Ability to engage in written and oral communication with leadership/staff and community stakeholders regarding policies, procedures, practice guidelines, and issues pertaining to the practice of the profession.

(4) Licensed Professional Mental Health Counselor (Program Coordinator), GS-12

(a) Experience, Education, and Licensure. In addition to the basic requirements, candidates must have at least one year of progressively complex experience equivalent to the GS-11 grade level. Experience must have been in a major specialty treatment program area such as, but not limited to, Post- Traumatic Stress Disorder (PTSD), mental health intensive case management (MHICM), or other areas of equivalent scope and complexity. Experience must demonstrate possession of advanced practice skills and judgment, demonstrating progressively more professional competency.

(b) Assignments. LPMHC Program Coordinators are administratively responsible for a clinical program and provide treatment to patients in a major specialty. They manage the daily operations of the program, develop policies and procedures, and prepare reports and statistics for facility, VISN, and national use. They may supervise unlicensed graduate LPMHCs and may administratively manage any employees assigned to their program.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to meeting the KSAs for the GS-11 grade level, the candidate must demonstrate all of the KSAs below:
1. In depth knowledge of the program coordinated, and demonstrated knowledge and ability to write policies procedures and or practice guidelines for the program.

2. Ability to make key decisions in the hiring and identification of top candidates.

3. Ability to provide leadership in facilitating the process of coordinating program consults, assessments, admissions, care assignments and discharges.

4. Ability to provide subject matter consultation to other colleagues and trainees within the field of counseling working on an interdisciplinary team.

(5) **Supervisory Licensed Professional Mental Health Counselor, GS-12**

(a) **Experience, Education, and Licensure.** In addition to the basic requirements, candidates must have at least one year of progressively complex experience equivalent to the GS-11 grade level. Experience must demonstrate possession of advanced practice skills, judgment, and competency.

(b) **Assignments.** At this level, LPMHCs administratively supervise their licensed staff and/or graduates and are considered LPMHC subject matter experts and may serve as the discipline lead. LPMHCs may provide treatment to patients. They direct the development and implementation of services and treatment to patients through the administrative supervision, mentoring, and oversight of assigned clinical staff. Their experience must demonstrate practice skills in a specialty area or in administration demonstrating progressively more professional competency and judgment.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs for the GS-11 grade level, the candidate must demonstrate all of the KSAs below:

1. Ability to administratively supervise other providers and conduct meetings.

2. Ability to maintain a professional environment by following organizational policies, guidelines and safety standards.

3. Ability to establish and clearly communicate guidelines and performance expectations for staff.
(6) Licensed Professional Mental Health Counselor (Program Manager), GS-13

(a) Experience, Education and Licensure. In addition to the basic requirements, candidates must have at least one year of progressively complex experience equivalent to the GS-12 grade level. The experience must demonstrate possession of advanced practice skills and judgment, demonstrating progressively more professional competency.

(b) Assignments. LPMHCs manage the daily operations of multiple programs, develop and implement program policies and procedures, or serve as chief or principal counselor to a number of LPHMCs. They are responsible for oversight of administrative and programmatic resources and monitoring of outcomes. They prepare reports and statistics for facility, VISN, and national leadership. Decisions may affect staff and other resources associated with the programs managed and are made while exercising wide latitude and independent judgment. They may be responsible for the program’s budget. They may also supervise employees assigned to the program.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to meeting the KSAs for the GS-12 grade level, the candidate must demonstrate the KSAs below:

1. Ability to make judgments and decisions associated with program management.

2. Ability to monitor program outcomes using data driven quality assurance process.

3. Ability to develop productivity standards appropriate to each service provided.

4. Ability to manage a wide range of programs which include the operation and management of key clinical, training or administrative programs.

(7) Licensed Professional Mental Health Counselor (Care Line Manager/VISN/National), GS-14 - Program Manager Leadership Assignments

(a) Experience, Education and Licensure. In addition to the basic requirements, candidates must have at least one year of progressively complex experience equivalent to the GS-13 grade level. They must demonstrate possession of advanced practice skills in administration, demonstrating progressively more professional competency skills and judgment.
(b) **Assignments.** Typical assignments include serving at a facility as a care line manager or at the VISN/national level. A care line manager is assigned to manage, direct, and oversee complex treatment programs within the medical center. Supervisory responsibilities cover multiple disciplines that may be separated geographically or in multi-division facilities. They have responsibility for staffing, work assignments, budget, ensuring availability and timeliness of clinical services to be provided and admission criteria for the program, day-to-day program operation, and all reporting requirements. Leadership positions at the VISN or national level are characterized by their scope, level of complexity, significant impact on VHA mission, significant importance to the VISN. They direct mental health, behavioral science or other patient care program components at the VISN or national level or direct organizational development at the national level. Duties are exercised with wide latitude, autonomy, and independence. They have delegated authority to determine long range work plans and assure that implementation of the goals and objectives are carried out. They may serve as consultants to other management officials in the field, VISN, or national level.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs for the GS-13 grade level, the candidate must demonstrate all of the KSAs below:

1. Advanced knowledge and skill in management/administration of multidisciplinary mental health programs at complex facilities and/or across multiple sites which includes supervision, consultation, negotiation, and monitoring.

2. Demonstrated global knowledge of mental health counseling practice to develop, maintain, and oversee programs in all settings.

3. Ability to provide consultation on policy implementation, qualification standards, counseling practice, and competency with medical center director, VISN, or national program managers that are consistent with organizational goals and objectives.

4. Advanced knowledge of evidence-based practices and mental health practice guidelines in multiple professional areas, and the ability to use these resources to guide the program staff in providing appropriate treatment interventions.

5. Ability to influence high level officials in adoption of, and conformance to, performance measures, monitors, and other policy guidelines.
5. DEVIATIONS

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for LPMHCs in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the educational requirements be waived. Under no circumstances will licensure requirements be waived for grade levels GS-11 or above.

c. The placement of individuals in assignments and/or grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority 38 U.S.C. 7402, 7401, 7403]
IAPPENDIX G44. MARRIAGE AND FAMILY THERAPIST QUALIFICATION
STANDARD GS-0182
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Marriage and Family Therapist (MFT) in the Veterans Health Administration (VHA). These requirements apply to all VHA MFTs in the GS-0182 series including those assigned to VA Medical Centers, Community-Based Outpatient Clinics (CBOCs), Readjustment Counseling Service (RCS)/Vet Centers, Veterans Integrated Service Network (VISN) offices, and VHA Central Office. Marriage and Family Therapist is one of the core mental health professions recognized by the Office of Mental Health and Suicide Prevention. MFTs work with couples, families, individuals and groups utilizing systemic theories, requiring expertise in interpersonal relationships, with conceptualizations that are distinct from individually oriented therapies. These professionals are licensed to diagnose and treat mental health disorders and are highly trained in psychotherapy and family systems. MFTs treat a wide range of serious mental health issues including relationship issues, child-parent challenges, depression, Post-Traumatic Stress Disorder (PTSD), anxiety and other mental health disorders.

3. DEFINITIONS.

a. Journey Level. The full performance level (FPL) for this qualification standard is the GS-11 grade level.

b. Advanced Practice Level. Advanced Practice Level is given to providers who possess the ability to provide expert clinical services from a systemic perspective in a specialized area of practice to Veterans and their families. The MFT practicing at the advanced practice level has specialized knowledge and has mastered a range of specialized family systems theory/therapy modalities.

c. Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE). The specialized accrediting body that accredits master’s degree, doctoral degree and post-graduate degree clinical training programs in marriage and family therapy throughout the U.S. and Canada. Since 1978, COAMFTE has been recognized by the U.S. Department of Education (USDE) as the national accrediting body for the field of marriage and family therapy. MFTs who have a COAMFTE accredited degree have undertaken a course of professional preparation that meets specific standards established by the discipline’s accrediting body and individuals with COAMFTE degrees have been thoroughly trained in family systems theory/therapy.

d. Association of Marital and Family Therapy Regulatory Board Examination (AMFTRBE). The AMFTRBE is the most widely used and accepted test for the MFT profession. The AMFTRBE is provided to assist State boards of examiners
in evaluating the knowledge of applicants for licensure or certification. There is a wide diversity of educational backgrounds among the applicants who seek licensure or certification in marital and family therapy. The AMFTRB offers a standardized examination, to determine if applicants have attained the knowledge considered essential for professional practice, which includes family systems theory/therapy and models.

e. **Regionally Accredited Institution.** The educational accreditation of schools, colleges, and universities in the United States by one of seven regional accrediting agencies. Each regional accredditor oversees the vast majority of public and private educational institutions, both not-for-profit and for-profit, in its region. The regional accrediting bodies recognized by the USDE are listed at Ed.gov.

f. **Related Degrees/Field.** For the purposes of this standard, VHA defines related degrees as degrees in licensed professional mental health counseling, social work, psychiatric nursing, psychology, and psychiatry.

g. **Clinical Supervision for Licensure.** Supervision between a licensed and unlicensed clinician or trainee in which the supervisee's clinical work is reviewed and reflected upon, with the aims of: improving the supervisee's work with clients; ensuring client welfare; supporting the supervisee in relation to their work, and supporting the supervisee's professional development. This includes co-signing clinical notes and supervising an individual as they are working towards licensure. Please refer to specific State licensing laws regarding the requirements for providing clinical supervision.

h. **Systemic Clinical Supervision.** Supervision focusing on working with families and those in a close relationship to foster change. These changes are viewed in terms of systems of interactions between each person in the family or relationship.

i. **Family Systems Theory/Therapy.** Theory or therapy that seeks to address Veterans on an individual level as well as in relationships. MFTs who are trained in Systemic therapy treat the entire system and evaluate the parts of a system in the relation to the whole.

j. **Administrative Supervision.** Supervisory responsibilities includes, but is not limited to, assigning and evaluating the work of subordinate staff; resolving complex problems to ensure Veteran services are met; evaluating performance, and taking disciplinary action when necessary. The supervising employee has full administrative and professional responsibility for planning and directing the work of others.

k. **American Association for Marriage and Family Therapy (AAMFT).** The AAMFT is the professional association for the field of marriage and family therapy and represents the professional interests of MFTs.
I. **AAMFT Approved Supervisor.** AAMFT issues a national credential to allow MFTs to provide clinical supervision. MFTs must take specific course work and meet specific standards to become an AAMFT approved supervisor. An AAMFT Approved Supervisor and AAMFT Supervisor candidates may clinically supervise trainees or unlicensed MFTs.

m. **State Approved Supervisor.** Some States have State-specific standards to allow MFTs to provide supervision. The requirements to become a State approved supervisor vary from state to state. A State Approved Supervisor may clinically supervise trainees or unlicensed MFTs.

3. **BASIC REQUIREMENTS.** The basic requirements for employment as a VHA MFT are prescribed by statute in 38 U.S.C. § 7402(b)(10), as amended by section 239 of Public Law 114-223, enacted Sept 29, 2016. To qualify for appointment as an MFT in VHA, all applicants must:

115- **Citizenship.** Be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

116- **Education.** Candidates must meet one of the following:

   (1) Hold a master’s degree or doctoral degree in marriage and family therapy from a program approved by COAMFTE,

   (2) Hold a master’s degree or doctoral degree in marriage and family therapy from a MFT program from a regionally accredited institution, OR,

   (3) Hold a master’s degree or doctoral degree in a comparable mental health degree (Licensed Professional Mental Health Counselor, Social Work, Psychiatric Nursing, Psychology, and Psychiatry) that meets the current VA qualification standard of that profession.

117- **Licensure.** Persons hired or reassigned to MFT positions in the GS-0182 series in VHA must hold a full, current, and unrestricted MFT license to independently practice marriage and family therapy in a State. **Exception:** The Secretary, or his/her designee, may waive the licensure requirement for persons who are otherwise qualified, pending completion of State prerequisites for licensure examinations for a period not to exceed three years from the date of employment on the condition that MFTs appointed on this basis provide care only under the supervision of a fully licensed MFT with an AAMFT approved license. Non-licensed MFTs who otherwise meet the eligibility requirements may be given an appointment as an MFT under the authority of 38 U.S.C. § 7401(3). This exception only applies at the entry grade level (GS-9). For grades at or above the full performance level, the candidate must be licensed.
(1) MFTs that are not licensed at the time of appointment must become licensed at the independent level (Journey level) within three years of their appointment as a MFT. Most States require two years of post-graduate MFT experience as a pre-requisite to taking the licensure examination; VHA allows MFTs one additional year to pass the licensure exam.

(2) It is VHA policy that a MFT who does not yet have a license that allows independent practice must be clinically supervised by an AAMFT approved licensed MFT at or above the journey level who is a VA staff member and who has access to the electronic health record.

d. **Failure to Obtain License.** In all cases, unlicensed MFTs must actively pursue meeting State prerequisites for licensure starting from the date of their appointment. At the time of appointment, the Human Resource Officer will provide the unlicensed MFT with the written requirements for licensure, the date by which the license must be obtained, and the consequences for not becoming licensed by the deadline. Failure to obtain a license by the prescribed date will result in removal from the GS-0182 MFT series and may result in termination of employment.

e. **Loss of Licensure.** Once licensed, MFTs must maintain a full, current and unrestricted license to remain qualified for employment. Loss of licensure will result in removal from the GS-0182 MFT series and may result in termination of employment.

g. **English Language Proficiency.** MFTs must be proficient in spoken and written English in accordance with VA Handbook 5005, Part II, Chapter 3, Section A, paragraph 3j.

h. **Grandfathering Provision.** All persons employed in VHA as a MFT on the effective date of this qualification standard are considered to have met all qualification requirements for the grade held, including positive education that is part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees may be reassigned, promoted up to and including the full performance (journey) level, demoted, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) MFTs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.
(3) Employees who are retained as a MFT under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as a MFT.

4. GRADE REQUIREMENTS.

a. Creditable Experience

(1) Knowledge of current professional marriage and family therapy practices. To be creditable, the experience must have required the use of knowledge, skills, and abilities associated with current professional marriage and family therapy practice. The experience must be post-master’s degree or above. The experience should include working with couples, families, individuals and/or groups utilizing family systems theory/therapy. The experience also includes the ability to diagnose and treat mental health disorders. Experience satisfying this requirement must be active professional practice, which is paid/non-paid employment as a MFT, as defined by the appropriate State licensing board.

(2) Quality of Experience. Experience is only creditable if it is obtained following graduation with a master’s or higher degree in marriage and family therapy or comparable degree in mental health (Social Work, Psychiatric Nursing, Psychology, Licensed Professional Mental Health Counselor and Psychiatry) and includes work as an MFT directly related to the position to be filled. Qualifying experience must also be at a level comparable to marriage and family therapy experience at the next lower grade level. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

(3) Part-Time Experience. Part-time experience as an MFT is creditable according to its relationship to the full-time workweek. For example, an MFT employed 20 hours a week, or on a 1/2-time basis, would receive one full-time workweek of credit for each two weeks of service.

(4) Fellowships or Post-Graduate Training. Fellowship and post-graduate training programs are typically in a specialized area of clinical practice, e.g., group or family practice. Training as a fellow or post-graduate may be substituted for creditable experience on a year-for-year basis.

(5) Practicum in a VA or other clinical setting. A practicum experience may not be substituted for experience, as the practicum (field placement) is completed prior to graduation with a master’s degree in marriage and family therapy or comparable mental health degree.
b. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

(1) **Marriage and Family Therapist, GS-9 (Entry Level)**

(a) **Experience, Education and Licensure.** The entry level grade is used for non-licensed MFTs or for MFTs (master's or doctoral level) who are graduates not yet licensed at the independent practice (Journey) level. Unlicensed MFTs at the GS-9 grade level have completed the required education listed in paragraph 3b above, and are working toward completion of prerequisites for licensure. In addition, the candidates must demonstrate the Knowledge, Skills, and Abilities (KSAs) in subparagraph (b) below.

(b) **Demonstrated KSAs.** In addition to meeting the KSAs for GS-9 grade level, the candidate must demonstrate all of the KSAs below:

1. Knowledge of human development throughout the lifespan, interventions based on research and family systems theory and therapy, formal diagnostic criteria, risk assessment, evidence-based practice and assessment tools.

2. Ability to assess, with supervision, the psychosocial functioning and needs of Veterans and their family members.

3. Knowledge to formulate, implement, and re-evaluate a treatment plan through continuous assessment identifying the Veteran’s challenges, strengths, readiness to change, external influences and current events surrounding the origins and maintenance of the presenting issue, and interactional patterns within the client system.

4. Ability to provide counseling and/or psychotherapy services, under supervision, to individuals, groups, couples and families in a culturally competent manner that facilitates change through restructuring and reorganizing of the client system.

5. Basic knowledge and understanding of existing relevant statutes, case law, ethical codes, and regulations affecting professional practice of marriage and family therapy.

6. Ability to draft documents, manage data, maintain accurate, timely and thorough clinical documentation, and track quality improvements.

(c) **Assignments.** Entry level MFTs provide mental health services under clinical supervision and within the ethics and guidelines of the professional standards.
Individuals assigned at the entry level are clinically supervised since they are not yet functioning at the independent practice level conferred by independent licensure. Entry level MFTs are not practicing at an independent level, therefore should not be assigned to program areas where independent practice is required, such as in a CBOC, unless there is a licensed MFT in the program area who can provide supervision for practice.

(2) **Marriage and Family Therapist, GS-11 (Full Performance Level)**

(a) **Experience, Education and Licensure.** In addition to the basic requirements, the GS-11 full performance level requires completion of a minimum of one year of post-master's degree experience in the field of marriage and family therapy work (VA or non-VA experience) and licensure in a State at the independent practice level. In addition, the candidate must demonstrate the KSAs in subparagraph (b) below. **OR,** In addition to the basic requirements, a doctoral degree in marriage and family therapy or comparable degree in mental health that meets the current VA qualification standard of that profession (Licensed Professional Mental Health Counselor, Social Work, Psychiatric Nursing, Psychology, and Psychiatry) may be substituted for the required one year of marriage and family therapy experience in a clinical setting. **AND** the candidate must be licensed to practice at the independent practice level and they must demonstrate the following KSA.

(b) **Demonstrated KSAs.** In addition to meeting the KSAs for GS-11 grade level, the candidate must demonstrate all of the KSAs below:

1. Skill to independently assess the psychosocial functioning and needs of Veterans and their family members.

2. Ability to provide counseling and/or psychotherapy services to individuals, groups, couples and families in a culturally competent manner that facilitates change through restructuring and reorganizing the client system.

3. Ability to establish and maintain effective working relationships with Veterans and their families, colleagues, and other professionals in collaboration throughout treatment regarding clinical, ethical and legal issues and concerns.

4. Knowledge and understanding of existing relevant statutes, case law, ethical codes, regulations and VA policies affecting the practice of marriage and family therapy. This includes the ability to assist Veterans and their families in making informed decisions relevant to treatment to include limits of confidentiality.
5. Ability to provide orientation, training and consultation to new MFTs including clinical oversight of MFT graduate students, and/or provide clinical supervision to pre-licensure MFTs.

6. Skill in the use of computer software applications for drafting documents, data management, maintaining accurate, timely and thorough clinical documentation, and tracking quality improvements.

(c) Assignments. MFTs at the full performance level are licensed to independently practice marriage and family therapy. MFTs can provide general mental health services to Veterans within the ethics and guidelines of the professional standards. MFTs at this level formulate, implement, and re-evaluate treatment plans through continuous assessment identifying the Veteran’s challenges, strengths, readiness to change, external influences and current events surrounding the origins and maintenance of the presenting issue, and interactional patterns within the client system. In the event that Advanced or Supervisory level assignments are not established/supportable, the incumbents at this level can be responsible for clinical supervision for licensing purposes only, provided they have an AAMFT approved supervisor credential.

(3) Marriage and Family Therapist, GS-12 (Advanced)

(a) Education, Experience and Licensure. Candidate must have successfully completed evidence based training in family therapy and must have graduated from a COAMFTE accredited program OR have passed the AMFRE. Candidate must have at least five years of post-licensed clinical experience in delivery of family systems therapy including one-year equivalent to the GS-11 grade level. This experience must demonstrate the use of an evidence based family therapy model while exhibiting progressive professional competency and expertise. Assignments requiring responsibility for providing clinical supervision must have an AAMFT Approved Supervisor credential. In addition, the candidate must demonstrate the professional KSAs listed below.

(b) Demonstrated KSAs:

1. Ability to provide specialized consultation for complex cases involving individuals, families and/or couples utilizing evidenced-based family systems theory/therapy.

2. Ability to provide crisis intervention which includes assessment, safety planning and complex treatment planning using independent clinical judgment utilizing family systems theory/therapy.
3. Ability to provide family systems therapy, which seeks to address Veterans and their family members on an individual level and deals with interpersonal interactions.

4. Ability to provide unlicensed MFT staff/trainees with systemic clinical supervision towards licensure from a family systems theory/therapy perspective.

(c) **Assignments:** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Advanced MFTs can be assigned as the sole licensed mental health provider in settings such as CBOCs or satellite outpatient clinics or have responsibility and oversight for a MFT training program established under VA/VHA training policy as well as provide systemic clinical supervision to those MFT interns. The Advanced MFT who has responsibility for the training program provides family systemic clinical supervision to unlicensed MFTs and provides clinical consultation to less experienced staff. Advanced MFTs develop behavioral health related training curriculum and conduct trainings for clinical staff. Advanced MFTs meet routinely with inter-professional team members and leadership to communicate about program and veteran and family issues for in depth problem solving.

(4) **Supervisory Marriage and Family Therapist, GS-12**

(a) **Experience, Education, and Licensure.** Candidates must have successfully completed evidence based training in marriage and family therapy and must have graduated from a COAMFTE accredited program OR have passed the AMFTRBE. Candidates must have at least five years of post-licensed clinical experience in delivery of family systems therapy including one-year equivalent to the GS-11 grade level. This experience must demonstrate possession of using evidence based family therapy model while demonstrating progressive professional competency and expertise. Assignments responsible for providing clinical supervision must have an AAMFT Approved Supervisor credential. In addition, the candidate must demonstrate the professional KSAs in subparagraph (b) below.

(b) **Demonstrated KSAs.** In addition to meeting the KSAs for GS-12 grade level, the candidate must demonstrate all of the KSAs below:

1. Ability to identify professional development needs of other MFTs and guide them in current family systems theory/therapy practice guidelines.
2. Ability to collaborate with members of other disciplines and supervisors and to represent the family systems theory/therapy profession both in and outside of VHA. This includes knowledge of the roles, contributions, and interrelationships with other disciplines.

3. Ability to perform the full range of administrative and clinical supervisory duties including responsibility for work assignments, competency assessments, performance evaluations, selection of staff, and recommendation of awards, advancements, and when appropriate, disciplinary actions.

4. Ability to analyze clinical data and make recommendations for corrective actions to optimize quality, efficiency, performance, and productivity within service keeping in line with accrediting bodies and policy.

(c) **Assignment.** At this level, MFTs administratively supervise professional staff which may include experienced MFTs, Advanced MFTs, MFT Program Coordinators, other Mental Health occupations and administrative staff. Duties include preparing work assignments, monitoring clinical performance, conducting performance appraisals, developing performance standards, as well as other clinical and administrative responsibilities. Interviews/recommends individuals for hire, trains, evaluates, disciplines and recommends for termination. Duties may include tracking of data to ensure that trends are analyzed and monitored, preparing appropriate administrative reports and quality assurance reviews. The supervisor at this level may be assigned to any program area. Supervisors may include coordinator responsibilities and may supervise other MFTs for licensure.

(5) **Marriage and Family Therapist, GS-12 (Program Coordinator)**

(a) **Experience, Education, and Licensure.** In addition to the basic requirements, completion of one year of progressively responsible assignments and experience equivalent to the GS-11 grade level which demonstrates knowledge, skills, and abilities that are directly related to the specific assignment. MFT program coordinators of family programs must be trained in family systems therapy/therapy. If the assignment is responsible for providing systemic clinical supervision for licensure the individual must have an AAMFT Approved Supervisor credential. In addition, the candidate must demonstrate the professional KSAs in subparagraph (b) below:

(b) **Demonstrated KSAs.** In addition to meeting the KSAs for GS-12 grade level, the candidate must demonstrate all of the KSAs below:
1. Ability to organize work, set priorities, meet multiple deadlines, delegate tasks and facilitate team building.

2. Ability to manage and direct the work of others to accomplish program goals and objectives.

3. Ability to devise innovative ways to adapt work operations to new and changing programs, to develop staffing and budget requirements, and to translate management goals and objectives into well-coordinated and controlled work operations and ensure compliance with pertinent VHA policies.

4. Ability to establish and monitor performance priorities according to standards and program evaluation criteria.

5. Knowledge of family systems theory/therapy in coordination of family programs.

(c) Assignments. MFT Program Coordinators are administratively responsible for a clinical program providing treatment to Veterans in a specialty area as defined by the National Mental Health Office. Examples include RCS/Vet Centers, Homeless Veterans program and Mental Health Intensive Case Management (MHICM). They coordinate the daily operations of the program, develop policies and procedures for program operation and prepare reports and statistics for facility, VISN and national use. At this level, MFTs are licensed to independently provide mental health services and may supervise for licensure other MFTs.

(6) Marriage and Family Therapist (Program Manager), GS-13

(a) Experience, Education, and Licensure. In addition to the basic requirements, completion of one year of progressively responsible assignments and experience equivalent to that equivalent to the GS-12 grade level which demonstrates knowledge, skills, and abilities that are directly related to the specific assignment. MFT Program Manager must have graduated from a COAMFTE approved program OR have passed the AMFTRB examination. MFT Program Manager must have five years of post-licensed clinical experience in family systems theory/therapy and must demonstrate possession of advanced practice skills and judgment, demonstrating progressive professional competency and expertise. MFT Program Manager must have an AAMFT Approved Supervisor credential.

(b) Demonstrated KSAs. In addition to meeting the KSAs for GS-13 grade level, the candidate must demonstrate all of the KSAs below:

1. Skill in assessing qualifications and abilities of current and prospective employees to include staff performance evaluation and may include
evaluations of lower level assignments and support staff.

2. Ability to facilitate professional development of other MFTs across programs/or locations (i.e. CBOC, outpatient clinics, etc.) and guide them in current practice guidelines.

3. Ability to collaborate with leaders of other disciplines within facilities, the community, VISN, and VACO.

4. Skill in managing and directing the work of others to accomplish program goals and objectives, reporting requirements and the ability to devise ways to adapt work operations to new and changing programs, staffing and budget requirements. This includes knowledge of VA policy and procedures as well as fair, principled and decisive leadership practices.

5. Ability to analyze organizational and operational problems and to develop and implement solutions that result in sound operation of the program.

6. Ability to clinically supervise in areas related to the provision of marital and family therapy services to accomplish organizational goals and objectives.

(c) Assignments.

1. MFT Program Managers have broad program management responsibilities which include the operation and management of key clinical, training, or administrative programs. Responsibilities include development and implementation of programs, policies and procedures; oversight of administrative and programmatic resources; and monitoring of outcomes using a data driven quality assurance process. Decisions made affect staff and other resources associated with the programs managed and are made while exercising wide latitude and independent judgment. Such programs deliver specialized, complex, highly professional services that are important program components and significantly impact the health care provided to Veterans and their families. They have responsibility for staffing, work assignments, budget, clinical services provided and admission criteria for the program, day-to-day program operations and all reporting requirements. Additionally, program managers at this grade generally have collateral assignments determined by the needs of the local facility, RCS/Vet Center, the VISN, and or VACO.

2. MFT Program Managers may also have full responsibility for oversight of the professional practice of MFTs to assure the highest quality of mental
health care provided to Veterans and their families throughout the facility and affiliated clinics. This responsibility also includes insuring that all MFTs in the facility and its affiliated clinics meet the requirements of this qualification standard. At this advanced performance level, GS-13 MFTs are licensed to independently provide marital and family therapy services with program management responsibilities.

(7) **Marriage and Family Therapist Program Manager Leader, GS-14 (Care Line Manager/VISN/National)**

(a) **Experience, Education, and Licensure.** In addition to the basic requirements, completion of one year of progressively responsible assignments and experience at the GS-13 grade level which demonstrates knowledge, skills, and abilities that are directly related to the specific assignment. The MFT Program Manager must have graduated from a COAMFTE approved program OR have passed the AMFTRB examination. The MFT Program Manager must have at least five years of post-licensed clinical experience in family systems theory/therapy and must demonstrate possession of advanced practice skills and judgment, demonstrating progressive professional competency and expertise. The MFT Program Manager must have an AAMFT Approved Supervisor credential.

(b) **Demonstrated KSAs.** In addition to meeting the KSAs for GS-14 grade level, the candidate must demonstrate all of the KSAs below:

1. Advanced knowledge and skill in management/administration of multidisciplinary mental health programs at complex facilities and/or across multiple sites which includes supervision, consultation, negotiation, and monitoring.

2. Demonstrated global knowledge of the practice of marriage and family therapy to develop, maintain, and oversee programs in all settings.

3. Ability to provide consultation on policy implementation, qualification standards, counseling practice, and competency with medical center director, VISN, or national program managers that are consistent with organizational goals and objectives.

4. Advanced knowledge of evidence-based practices and mental health practice guidelines in multiple professional areas, and the ability to use these resources to guide the program staff in providing appropriate treatment interventions.

5. Ability to influence high level officials in adoption of, and conformance to, performance measures, monitors, and other policy guidelines.
(c) **Assignments.** Typical assignments include serving at a facility as a care line manager or at the VISN/VACO level. A care line manager is assigned to manage, direct, and oversee complex treatment programs within the medical center. Supervisory responsibilities cover multiple disciplines that may be separated geographically or in multi-division facilities. They have responsibility for staffing, work assignments, budget, clinical services provided and admission criteria for the program, day-to-day program operation, and all reporting requirements. Leadership positions at the VISN or national level are characterized by their scope, level of complexity, significant impact on VHA mission, significant importance to the VISN, etc. They direct a mental health, behavioral science, other patient care program component at the VISN or national level or direct organizational development at the national level. Duties are exercised with wide latitude, autonomy, and independence. They have delegated authority to determine long range work plans and assure that implementation of the goals and objectives are carried out. They may serve as consultants to other management officials in the field, VISN, or national level.

5. **DEVIATIONS.**

   a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for MFTs in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

   b. Under no circumstances will the educational or licensure requirements be waived for the GS-11 grade level or above.

   c. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

**Authority 38 U.S.C. 7401, 7402, 7403**
APPENDIX G45. MEDICAL SUPPORT ASSISTANT QUALIFICATION STANDARD
GS-0679
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Medical Support Assistant (MSA) in the Veterans Health Administration (VHA). These requirements apply to all VHA MSAs in the General Schedule (GS)-0679 series. [This series covers one-grade interval administrative support positions that supervise, lead, or perform support work relating to the care and treatment given to patients in inpatient units, outpatient clinics, patient scheduling call centers, Care in the Community Support Staff (CitC), and ancillary support services. The work includes functions such as serving as an initial point of contact for the units, clinics, patient, call centers, CitC, to include, but not limited to, scheduling patient appointments, tracking, reviewing, and responding to electronic orders, consults, and other elements in the electronic medical record and medical systems. This series includes work that requires a practical knowledge of computerized data entry, information processing systems and software related to patient care, the healthcare system’s organization and services, basic rules and regulations governing visitors and patient treatment, knowledge of standard procedures, utilizing medical records, and medical terminology.]

[2. DEFINITIONS.

a. Ancillary Services. Clinics that provide diagnostic studies and/or support services to assist in the provision of patient care. Areas of service include, but are not limited to, Blind and Vision Rehabilitation, Diagnostic Laboratory, Nutrition and Food Service, Prosthetics, Radiology (x-rays and imaging), Recreation and Creative Arts Therapists (music, art, dancing, and drama), Social Work (housing, discharge, planning, family support), and Speech/Language Pathology.

b. Call Center. Centralized unit dedicated to multiple ancillary and interdisciplinary outpatient clinics that determine the need of the caller (i.e., scheduling, processing refill requests, reviewing CPRS, and routing clinical questions to appropriate clinical staff).

c. Care in the Community (CitC). The local VA Community Care department is the ‘clinic’ that coordinates all patient services for Veterans outside the VA Healthcare System.

d. Consult Management. Includes the basic review and scheduling of patient consult appointments and further review of a specific clinics consults, (i.e., care in the Community consults, primary care provider entered consults and specific clinic consult listings). This review includes identification of status issues, (i.e. scheduled but not linked; scheduled to past appointment; significant findings, etc.) and taking appropriate action to fix such issues or referring to lead/supervisor for further action.

e. Direct Scheduling. Schedules routine appointments without a consult referral.
f. **Interdisciplinary Coordinated Care Delivery Models.** Coordination of care across all elements of the broader health care system, which may include primary care, mental health, specialty care, Call Center, and community care services and support.

g. **Patient Aligned Care Team (PACT).** Team of health care professionals that provides comprehensive primary care in partnership with the patient, and the patient’s personal support person(s), and manages and coordinates health care services consistent with agreed upon goals of care.

h. **PACT Teamlets.** A typical teamlet consists of staff designated in a PACT to each of the following roles: a Primary Care Provider, Registered Nurse Case Manager (RNCM), Clinical Associate, and Administrative Associate. These roles can be occupied by various occupations. For example, a provider can be a physician, Nurse Practitioner or a Physician Assistant. Special population PACTs may designate additional or other positions to the teamlet. Teamlet members collectively take responsibility for ongoing care of all patients assigned to a single patient panel.

i. **Patient Systems.** Various software, hardware system products, and data portals used to transfer and capture information electronically used in the support of the daily operation of the unit. These systems include, but are not limited to: Veterans Integrated System Technology Architecture (VistA), Computerized Patient Record System (CPRS), Vetlink, VistA Scheduling Graphical User Interface (VS GUI), Insurance Capture Buffer (ICB), VHA Support Service Center (VSSC), Fee Basis Claim System (FBCS), Bed Management Systems (BMS), Compensation and Pension Record Interchange (CAPRI), Veterans Benefit Management System (VBMS), Strategic Analytics for Improvement and Learning (SAIL), Patient Centered Management Model (PCMM), Picture Archiving and Communication System (PACS), Telecare Record Manager (TRM), Automated Call Delivery (ACD), Audio Care (AC), Business Intelligence Service Line (BISL), Scheduling Audit Tool (SAT), and Veterans Affairs Portal to view external medical records. Patient systems names may vary from institutions and change over time.

j. **Radiology/Imaging/Nuclear Medicine.** Units which provide diagnostic testing to patients as a result of a request from a clinician in a patient care setting.

k. **Specialty Clinics.** A variety of specialized medical, surgical, and mental health outpatient clinics. Services performed in the Specialty Care Clinics include, but are not limited to: Arthritis Clinic, Cardiology Clinic, Cardio-Thoracic Clinic, Chest/Pulmonary Clinic, Colorectal Clinic, Dermatology Clinic, Diabetes Education, Ears, Nose and Throat Clinic, Eye Clinic, Gastroenterology Clinic, General Surgery Clinic, Hand and Plastics Reconstruction Clinic, Liver Clinic, Metabolic/Endocrine Clinic, Neurology and Memory Disorder Clinic, Neurosurgery Clinic, Orthopedics Clinic, Podiatry Clinic, Proctology Clinic, Renal Clinic, Traumatic Brain Injury Clinic, Urology Clinic, and Vascular Clinic. Specialty clinic names may vary from institutions and change over time.
I. Veterans Appointment Request (VAR). The VAR allows a Veteran to self-schedule appointments with a primary care provider, request help in the scheduling of primary care and/or mental health appointments, and view/cancel future appointments.

m. VistA Scheduling Graphical User Interface (VS GUI). An upgrade to the scheduling system. VS GUI will improve the efficiency of scheduling, enabling a more Veteran centric process, while addressing the need to schedule appointments through a user-friendly system (or interface).

n. Ward. Inpatient units including, but not limited to: Community Living Center (CLC), Medical Unit, Surgical Unit, Intensive Care Unit (ICU), Domiciliary, Mental Health Units (Acute, Geriatric Psych, and Substance Abuse).]

3. BASIC REQUIREMENTS.

a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with VA Handbook 5005, Part II, Chapter 3, Section A, paragraph 3.g.).

b. Experience and Education.

   (1) Experience. Six months experience of clerical, office, [customer service], or other [administrative] work that indicates the ability to acquire the particular knowledge and skills needed to perform the duties of the position;

   OR,

   (2) Education. One year above high school;

   OR,

   (3) Experience/Education Combination. Equivalent combination of experience and education are qualifying for entry level for which both education and experience are acceptable.

c. Certification. None required.

d. Grandfathering Provision. All MSAs employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series, and grade held, [which] are [a] part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply: (1) Such employees may be reassigned, promoted, or [changed to a lower grade] within the occupation.
(2) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) If an employee who was converted to [Title] 38 hybrid status under this provision leaves the occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. **Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials and such education must have been deemed at least equivalent to that gained in conventional U.S. programs.

g. **English Language Proficiency.** MSAs must be proficient in spoken and written English in accordance with VA Handbook 5005, Part II, Chapter 3, Section A, paragraph 3.j.

4. **GRADE REQUIREMENTS.**

   a. **Creditable Experience**

   (1) **Knowledge of [ ] MSA Practices.** To be creditable, the experience must have demonstrated the knowledge, skills, and abilities (KSAs) associated with current MSA responsibilities [or an equivalent administrative patient support role in a non-VA medical inpatient or outpatient setting]. Experience satisfying this requirement may be paid/non-paid employment as [an] MSA or [an equivalent position in a non-VA hospital or clinic setting].

   (2) **Quality of Experience.** Qualifying experience must be at a level comparable to MSA experience [or equivalent administrative clinical support role in a non-VA medical inpatient or outpatient setting] at the next lower grade level. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty), and a range of [varieties] as described in this standard, at the specified grade level and be performed by the incumbent at least 25% of the time.

   (3) **Part-Time Experience.** Part-time experience as [an MSA or equivalent administrative patient support in] a [non-VA medical inpatient or outpatient setting] is creditable according to its relationship to the full-time workweek. For example, [an] MSA employed 20 hours a week, or on a 1/2-time basis, would receive [one] full-time workweek of credit for each [two] weeks of service.
b. **Grade Determinations.** [In addition to the basic requirements for employment listed in paragraph 3 above, the] following [education and experience] criteria must be met when determining the grade of candidates:

(1) **Medical Support Assistant, GS-3**

(a) **Experience or Education.** None beyond the basic requirements.

(b) **Assignment.** This is an entry level MSA position. It is expected that MSAs [at this level] receive guidance from more experienced staff members and require frequent and direct supervision. [At this level, MSAs apply general rules and policies relating to clinic functions, staff, and automated data processing methods in support of treatment to patients. They utilize a variety of patient data systems in scheduling patients for treatment and annotates patient records. They perform front desk duties, receives telephone call, and visitors to the MSA unit. They make and cancel appointments, review patient records for necessary information, and review patient demographics and insurance verification. They consult with clinic staff when processing physician scheduling and administrative orders.]

[(c) **Demonstrated Knowledge, Skills, and Abilities.** Candidates must demonstrate all of] the KSAs below:

   i. Ability to meet, communicate, and interact with individuals in a courteous and helpful manner in order to give instructions and arrange appointments.

   ii. Ability to utilize computer systems to enter administrative data in patient systems.

   iii. Ability to learn and utilize basic medical terminology to record patient messages and physician requests pertaining to follow-up medical care.]

(2) **Medical Support Assistant, GS-4**

(a) **Experience.** One year of experience in clerical, office, [customer service, or other administrative] work that indicates the ability to acquire the particular knowledge and skills needed to perform the duties of the position [ ];

   OR,

   [(b)] **Education.** Two years of education above high school.]

[(c)] **Assignment.** This is a developmental level MSA position. It is expected that MSAs [at this level] receive [minor and less frequent] guidance from higher experienced staff members for more difficult tasks [ ]. Assignments at this level include, but are not limited to: [scheduling and rescheduling patients for treatment; interviewing patients for appointments; referring patients to other medical specialty
clinics; providing information to patients necessary to resolve VA Handbook complaints; interacting with both internal and external customers; [reviewing] and [documenting] medical outpatient and inpatient [electronic health records], as well as administrative records; verifying third party insurance and updating information in the Insurance Capture Buffer (ICB) system; obtaining medical information from patients; coordinating information and actions related to patient care and services; and scheduling appointments in accordance with VHA national scheduling guidelines. [ ] [MSAs at this level refer] all questions [regarding] medical attention to [the] appropriate health care team member.

[(d)] **Demonstrated Knowledge, Skills, and Abilities.** Candidates must demonstrate [all of] the KSAs below:

i. Ability to meet, communicate, and interact with individuals from varying backgrounds and other health care team members in a courteous and helpful manner in order to [facilitate medical care for patients].

ii. Ability to use, [and navigate between], various types of office automation equipment and software [(i.e. computer systems, web based scheduling programs; insurance collection system; scanning software, multiple line phone systems; electronic faxing programs) to support patient care].

iii. [Knowledge of basic medical terminology to assist in the provision of care to patients].

iv. [Skill in recording patient messages and understanding physician requests pertaining to follow-up medical care in internal or external clinics.]

(3) **Medical Support Assistant, GS-5**

(a) **Experience** [ ]. One year of experience equivalent to the [GS-4] grade level;

[OR,

(b) **Education.** Four] years of education above high school.

[(c)] **Assignment.** This is the full performance level for MSAs. At this level, the MSA independently performs a full range of duties [related to the delivery of healthcare services in an inpatient or outpatient setting. Advises clinical staff on current administrative processes.] The MSA is responsible for [answering phones, greeting patients, relaying messages to appropriate staff inside or outside of the unit], scheduling appointments, including interpreting and verifying provider orders in accordance with VHA national scheduling guidelines. Assignments at this level include, but are not limited to: scheduling, canceling, re-scheduling [patient] appointments and/or consults; entering no-show information; monitoring [appointment requests from multiple] electronic [sources; participating in huddles with other MSAs and/or clinic staff to determine the daily needs of the clinic],
monitoring both inpatient and outpatient appointments in areas of responsibility; verifying and updating demographics and insurance information when patients check-in for appointments. Coordinates administrative functions relating to emergency and non-emergency transfers to other VA facilities or private hospitals and determines appointment type based on the patient’s eligibility status (i.e., TRICARE, sharing agreements, [collaterals, research patient, VA employee], etc.).

[(d)] **Demonstrated Knowledge, Skills, and Abilities.** Candidates must demonstrate all of the KSAs below:

i. Ability to operate computerized programs and systems in order to enter, modify, and retrieve sensitive [medical and patient identifying] information ([PII]) into or from electronic [health] records, scheduling systems, and/or reports.

ii. [Advanced knowledge of medical terminology specific to understand medical diagnosis and procedures sufficient to communicate clinical staff instructions to patients.]

iii. Ability to [schedule medical] appointments in a clinical setting.

iv. Ability to work independently in the accomplishment of a wide variety of duties [performing patient support work].

v. Ability to communicate effectively and professionally [in person, electronically, and/or by telephone], with [internal and external customers].

vi. [Skill in customer service with the ability] to identify [customer] concerns, [and refer] to the [appropriate staff], as necessary, to ensure a satisfactory resolution.

(4) **Medical Support Assistant (Advanced), GS-6**

(a) **Experience.** One year of experience equivalent to the [GS-5] grade level.

(b) **Assignment.** The Advanced MSA [provides specialized and expert administrative patient support while working] collaboratively in an interdisciplinary coordinated care delivery model. [Work involves specialized administrative judgment and the flexible use of a wide range of clinical flow processes relating to access to care across multiple clinics, specialties, and/or care in the community resources. Recommends changes to existing clinic procedures based on current administrative guidelines. Expertise in utilizing numerous advanced patient systems in support of multiple clinics involved in an interdisciplinary coordinated care delivery model. Coordinates with the patient care team to review clinic [appointment availability] (utilization) to ensure that clinic [schedules are] closely monitored to effectively support the needs of the clinics, and [makes adjustments as]
necessary]. [MSAs at this level] develop [and/or] maintain effective and efficient communication with the patient, interdisciplinary [coordinated care delivery model teams], VA medical centers, and other agencies (e.g., assist with communications during the inpatient to outpatient discharge; communicate with non-VA medical facilities; [prepare correspondence] to notify patients of normal lab results; [ ] manage a [ ] system for follow-up care such as consults, tests, etc.).

Other assignments at this level include, but are not limited to: [processes incoming patient secure messaging through MyHealthyVet and coordinates with care team as appropriate; participates in] team huddles and team meetings to manage, plan, [problem solve, and follow-up with] patient [care by sharing information and collaborating with the interdisciplinary team]; setting priorities and deadlines, adjusting the flow and sequencing of the work to meet team and patient needs; [identifies incomplete encounters and communicates findings to providers; as needed; assists] the team to reinforce the plan of care and self-help solutions; [enters] appropriate information into the electronic record; monitors pre-appointment information and/or requirements to assure readiness for patient visit/procedure; [manages patient systems] to verify and validate accuracy and resolve issues; evaluates patient information and clinic schedule lists to determine whether [the patient requires an immediate appointment; informs team members] about shared patients ([i.e.], those who receive their care at multiple [VA centers] or those who [receive] care in the community [ ]). For all [assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty), and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time].

(c) **Demonstrated Knowledge, Skills, and Abilities.** Candidates must demonstrate [all of] the KSAs below:

i. Ability to collaborate [and] communicate [with a wide range of medical clinicians across multiple disciplines (e.g. medical doctors, nurse practitioners, physician assistants, psychologists, psychiatrists, social workers, clinical pharmacists, and nursing staff) to accomplish team goal setting to ensure medical care to patients is met.]

ii. [Ability to independently] set priorities and organize [ ] work to meet deadlines, ensuring compliance with established processes, policies, and regulations.

iii. Ability to communicate tactfully and effectively, [electronically, by phone, in person], and in writing, [with internal and external customers]. This may include preparing reports in various formats and presenting data to various organizational levels, [as well as resolving patient concerns].
iv. Advanced knowledge of the technical health care process [(including, but not limited to, scheduling across interdisciplinary coordinated care delivery and/or care in the community models and patient health care portals)] as it relates to access to care.

[v.] Advanced knowledge of policies and procedures associated with interdisciplinary coordinated care delivery and/or care in the community operational activities that affect patient flow, and patient support care [administrative functions] to include, but not limited to appointment cycles, outside patient referrals, follow-up care, overbooking, provider availability, etc.

[vi.] Advanced knowledge of medical terminology due to the technical nature of language utilized by clinicians.

(5) **Lead Medical Support Assistant, GS-6**

(a) **Experience.** One year of experience equivalent to the [GS-5] grade level.

(b) **Assignment.** The Lead MSA is responsible for answering questions for lower graded staff relating to healthcare services in an inpatient or outpatient setting. The Lead MSA monitors and makes work assignments, provides input on performance, resolves daily workplace issues, and maintains efficient workflow. Assignments at this level include, but are not limited to: assuring coverage of all areas of responsibility; conducting ongoing reviews to ensure quality of work; ensuring accurate and timely scheduling of appointments; providing guidance to staff members, to include changes in policies and procedures; distributing and balancing workload; creating and maintaining employee work schedules; orienting and providing on-the-job training for new and current employees; ensuring all training requirements are met; organizing the work structure of his/her assigned areas; and acting as a liaison between MSA and staff to resolve day to day conflicts. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty), and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

(c) **Demonstrated Knowledge, Skills, and Abilities.** Candidates must demonstrate all of the KSAs below:

i. Ability to organize work, set priorities, and delegate tasks/responsibilities in order to meet deadlines.

ii. Skill in communicating with individuals to obtain the desired effect, ensuring compliance with established policies and regulations.

iii. Ability to provide staff development and training.
iv. Ability to manage staffing requirements, manage priorities, and coordinate with staff in the unit in order to complete duties in an accurate and timely manner. This includes the ability to follow-up on pending issues and demonstrate an understanding of the impact of incomplete work.

v. Ability to review and monitor data to ensure all reports are complete and accurate.

(6) **Lead Medical Support Assistant, GS-7**

(a) **Experience.** One year of experience equivalent to the [GS-6] grade level.

(b) **Assignment.** The Lead MSA is responsible for the coordination of Advanced MSA assignments and workflow found in an interdisciplinary unit. The Lead MSA is responsible for daily workload assessments, assigning work, and assuring proper staffing coverage; evaluating training records; and determining training needs of MSAs to provide support across interdisciplinary settings. The Lead assists the unit with complex and non-standard procedures, including clinical flow processes related to access to care across multiple clinics, specialties, and/or community resources. Assignments at this level include, but are not limited to: ensuring accurate and timely scheduling of appointments; providing guidance to staff members, to include changes in policies and procedures; creating and maintaining employee work schedules; and acting as a liaison among Advanced MSA staff, patients, and other interdisciplinary staff to resolve day-to-day conflicts.] For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

(c) **Demonstrated Knowledge, Skills, and Abilities.** Candidates must demonstrate [all of] the KSAs below:

i. [Advanced knowledge of medical terminology and a wide range of clinical flow processes relating to access to care across multiple clinics, specialties, and/or community resources.]

ii. Ability to utilize numerous advanced patient systems in support of multiple clinics in an interdisciplinary setting.]

[iii.] Ability to organize work, set priorities, and delegate tasks/responsibilities in order to meet deadlines.

iv. Skill in communicating with individuals to obtain the desired effect [and coordinating with a variety of interdisciplinary care team staff].

[v.] Ability to provide staff development and training.
[vi.] Ability to manage staffing requirements, manage workflow priorities, and adjust the flow of work to meet team and patient needs. This includes the ability to follow-up on pending issues and demonstrate an understanding of the impact of incomplete work across multiple clinics.

(7) Supervisory Medical Support Assistant, GS-7

(a) Experience. One year of experience equivalent to the [GS-6] grade level [leading or supervising MSAs or equivalent administrative patient support staff in a non-VA medical inpatient, outpatient, or interdisciplinary setting].

(b) Assignment. Supervisory MSAs plan and direct programs at medical centers and/or satellite outpatient clinics and have full supervisory responsibility. Assignments at this level include, but are not limited to: assigning and evaluating the work of subordinate MSA staff; resolving complex problems to ensure patient services are met; evaluating new products, equipment, and systems to make recommendations for improved clinic operations; identifying educational or training needs; making final decisions on hiring selections; evaluating performance, and taking disciplinary action when necessary. The employee has full administrative and professional responsibility for planning and directing the MSA’s activities. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

(c) Demonstrated Knowledge, Skills, and Abilities. Candidates must demonstrate [all of] the KSAs below:

   i. Ability to provide the full range of administrative and supervisory duties [in a patient support setting,] which includes assignment of work, performance evaluations, selection of staff, and recommendation of awards and/or advancements.

   ii. Ability to collaborate, communicate, and demonstrate customer service and interpersonal skills with [internal and external customers] to ensure quality/continuity of care and ensure compliance with established policies and regulations.

   iii. Ability to provide briefings, orientations, staff development, and [training related to administrative functions in a patient support setting].

   iv. Ability to delegate authority, evaluate and oversee people and programs, accomplish program goals, and adapt to changing priorities.
(8) **Supervisory Medical Support Assistant, GS-8**

(a) **Experience.** One year of experience equivalent to the [GS-7] grade level [leading or supervising MSAs or equivalent administrative patient support staff in a non-VA medical inpatient, outpatient, or interdisciplinary setting.]

(b) **Assignment.** [Supervisory MSAs at this level plan and direct programs at medical centers and/or satellite outpatient clinics. They have full responsibility for supervising at least one subordinate MSA team leader, supervisor, or equivalent administrative patient support staff in a non-VA medical inpatient, outpatient, or interdisciplinary setting. Assignments at this level include, but are not limited to: evaluating the work of subordinate staff; resolving complex problems to ensure patient services are met; evaluating new products, equipment, and systems to make recommendations for improved operations; identifying educational or training needs; making final decisions on hiring selections; evaluating performance, and taking disciplinary action when necessary. The employee has administrative and professional responsibility for planning and directing the subordinate lead, supervisor, and MSA's activities. Responsible for extracting and analyzing data to provide reports to senior management in support of tracking measures.] For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

(c) **Demonstrated Knowledge, Skills, and Abilities.** Candidates must demonstrate [all of] the KSAs below:

i. Ability to provide the full range of administrative and supervisory duties [to at least one subordinate MSA supervisor or team leader in a patient support setting which includes assignment of work, performance evaluations, selection of staff, and recommendation of awards and/or advancements.]

ii. Ability to collaborate, communicate, and demonstrate customer service and interpersonal skills with internal and external customers to ensure quality/continuity of care and ensure compliance with established policies and regulations.

iii. Ability to provide briefings, orientations, staff development, and training [in a patient support setting].

iv. Ability to manage fiscal matters, forecast resource and equipment needs, and identify budget needs.

[v. Advanced knowledge of managing or leading patient support staff in a clinic. This includes independently utilizing reference sources, decision making, and...
empowering the team to collaborate and resolve problems within a complex systems environment.]

5. DEVIATIONS.

   a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for MSAs in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

   b. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority 38 U.S.C. §§ 7402, 7403]
APPENDIX G46. [ ] NURSING ASSISTANT QUALIFICATION STANDARD
GS-621
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a [ ] Nursing Assistant [(NA)] in the Veterans Health Administration (VHA). These requirements apply to all VHA [NAs] in the GS-621 series [ ].

2. BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. Education or Training. One year above high school with courses related to the [NA] occupation. Completion of an intensive, specialized, occupation-related course of study of less than one year [ ] as a nursing assistant may also meet in full the experience requirements for GS-3.

[c.]

[d.]

[d.] English Language Proficiency. [NAs] must be proficient in spoken and written English in accordance with VA Handbook 5005, part II, chapter 3, section A, paragraph 3j.

[e.]

[e.] Grandfathering Provisions. All Nursing Assistants employed in VHA on the effective date of this qualification standard are considered to have met all qualification requirements for the series and grade held that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

[(1)] Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

[(2)] If an employee who was retained (grandfathered) under this provision leaves the occupation, the employee loses protected status of the grandfathering provision and must meet the full VA qualification standard basic requirements in effect at the time of reentry to the occupation.

3. GRADE REQUIREMENTS

   a. Creditable Experience

      (1) Knowledge of Current Practice. To be creditable, the experience must have required the use of knowledge, skills, and abilities associated with the current practice.
(2) **Quality of Experience.** To be creditable, [NA] experience must be documented on the application or resume and verified in an employment reference, or through other independent means.

(3) **Part-Time Experience.** Part-time experience as a [NA] is creditable according to its relationship to the full-time workweek. For example, a [NA] employed 20 hours a week, or on a 1/2-time basis, would receive 1 full-time workweek of credit for each 2 weeks of service.

b. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

1. **GS-3 [NA] (Entry Level)**
   
   a. **Experience [and] Education [ ].** None beyond the basic requirements.

   b. **Assignments.** Individuals assigned as GS-3 [NAs] are considered to be at the entry level and are closely supervised.

2. **GS-4 [NA]**

   a. **Experience.** One year of specialized experience as a [NA] or experience in another medical field (licensed practical nurse, health technician, hospital corpsman, etc.), performing technical and nursing skills requiring knowledge of the human physical and emotional states, therapeutic communication, and technical skills required for basic and intermediate treatments;

   **OR,**

   b. **Education.** Successful completion of 2 years above high school in an accredited institution with courses related to nursing care, health care or in a field of study appropriate to the specialization of the position, such as education in a program for psychology, psychiatric, or operating room technicians; AND

   c. **Demonstrated Knowledge, Skills, and Abilities (KSAs).** In addition, the candidate must demonstrate the following KSAs:

   1. Ability to provide a range of patient/resident care and contribute to the completion of the nurse care plan and recovery of patients/residents.

   2. Ability to observe patients/residents’ or resident’s physical or emotional status and refer deviations and/or problems to supervisor in a timely manner.

   3. Ability to properly use equipment, materials and supplies in simple diagnostic and treatment procedures such as bladder scan, continuous passive motion device, blood glucose monitoring machine, specimen collection, etc.
4. Ability to communicate effectively with patients/residents, their families and other health professionals.

(d) Assignment

1. Individuals assigned as GS-4 [NAs] are considered to be at the intermediate or developmental level and are closely supervised. [NAs] at this grade level function as a member of the nursing care team and assist higher graded [NAs], licensed nursing staff, and other members of the care team in the care of patients/residents receiving outpatient care, home or community living care or other patients/residents who are in acute, sub-acute, or chronic states of illness. The significant factor is that they provide care under close supervision and refer issues/questions to supervisors, higher graded [NAs] or other healthcare professionals.

2. In this role, the Nursing Assistant functions as a member of the nursing care team and assists higher graded [NAs], licensed nursing staff, and other members of the care team in the care of patients/residents receiving outpatient care, home or community living care, or other patients who are in acute, sub-acute, or chronic states of illness. The Nursing Assistant in this role provides care under close supervision and refers issues/questions to supervisors, higher graded [NAs], or other healthcare professionals.

3) GS-5 [NA] (Full Performance Level)

(a) Experience. One year of progressively responsible assignments and experience equivalent to the GS-4 level which demonstrates knowledge, skills, and abilities that are directly related to the specific assignment. In addition, the candidate must demonstrate the professional KSAs in subparagraph (c) below; OR,

(b) Education. Successful completion of a 4-year course of study above high school leading to a bachelor’s degree that included 24 semester hours of courses related to health care or possession of a bachelor’s degree; AND

(c) Demonstrated KSAs

1. Ability to assist in the full range of nursing care to patients/residents with physical and/or behavioral problems in a hospital, long term care or outpatient setting under the direction of a Registered Nurse and/or Licensed Vocational Nurse/Licensed Practical Nurse.

2. Ability to communicate orally with patients/residents, families, interdisciplinary team and other personnel. This includes serving as a preceptor to new [NAs] by assisting with the coordination of their orientation and overseeing/assessing their practical experience while in a clinical setting.

3. Ability to recognize and react to emergent patient/resident care situations and intervene while waiting for assistance. For example, recognizing need for basic life support, controlling bleeding and assisting with behavior crisis, etc.
(d) Assignment. This is the full performance level for [NAs]. [NAs] at this grade level function as a member of the nursing care team and assist licensed nursing staff in the care of patients/residents receiving outpatient care, home or community living care or other patients/residents who are in acute, sub acute or chronic states of illness. The distinguishing factor is that patient/resident assignments typically involve more complex nursing needs which can vary within a range of predictable to unpredictable requirements. [NAs] at this level also assume more of a peer education/mentorship role.

NOTE: Students/trainees may be appointed in accordance with 38 U.S.C. 7405(a)(1)(D). See Part II, Chapter 3, paragraph 5 of VA Handbook 5005.

4. DEVIATIONS

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for [NAs] in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

[ ]

[b.] The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority 38 U.S.C. 7402, 7403
APPENDIX G47. MEDICAL SUPPLY TECHNICIAN (STERILE PROCESSING) QUALIFICATION STANDARD

GS-622
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Medical Supply Technician (Sterile Processing) in the Veterans Health Administration (VHA). These requirements apply to all VHA Medical Supply Technicians (Sterile Processing) (MSTs) in the General Schedule (GS)-0622 series. NOTE: Individuals performing supply related duties that do not meet the coverage of this qualification standard should be classified in accordance with title 5 classification procedures.

2. BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with VA Handbook 5005, Part II, Chapter 3, Section A, paragraph 3g.)

   b. Experience and/or Education

      (1) Experience. Six months of experience that demonstrates the applicant’s ability to perform the work or provides an understanding of the work; or

      (2) Education. One year above high school that included at least 6 semester hours in health care related courses such as sterile processing, nursing assistant, hospital corpsman, and operating room and surgical technician courses or other courses related to the position; or

      (3) Experience/Education Combination. Equivalent combination of experience and education are qualifying for entry level for which both education and experience are acceptable.

   c. Certification. None.

   d. Grandfathering Provision. All MSTs that are employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

      (1) Employees grandfathered into the GS-622 occupational series as MSTs may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation.

      (2) MSTs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis until they fully meet the basic requirements of the standard.
(3) MSTs who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. **Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials and such education must have been deemed at least equivalent to that gained in conventional U. S. programs.

g. **English Language Proficiency.** MSTs must be proficient in spoken and written English in accordance with chapter 3, section A, paragraph 3j, this part.

### 3. GRADE REQUIREMENTS

a. **Creditable Experience**

   (1) **Knowledge of Current MST Practices.** To be creditable, the experience must have demonstrated the knowledge, skills, and abilities (KSAs) associated with MST responsibilities. Experience satisfying this requirement may be paid/non-paid employment as a MST.

   (2) **Quality of Experience.** Qualifying experience must be at a level comparable to MST experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

   (3) **Part-Time Experience.** Part-time experience as a MST is creditable according to its relationship to the full-time workweek. For example, a MST employed 20 hours a week, or on a 1/2-time basis, would receive 1 full-time workweek of credit for each 2 weeks of service.

b. **Grade Determinations.** The following criteria must be met when determining the grade of candidates.

   (1) **GS-03 (Entry Level)**

      (a) **Experience or Education.** None beyond the basic requirements.

      (b) **Assignment.** This is an entry level MST position. MSTs receive guidance from more experienced staff members and require frequent and direct supervision.

   (2) **GS-04 (Developmental Level)**

      (a) **Experience.** Six months experience as a MST, operating room or surgical technician or other position that demonstrated knowledge of sterile processing in a clinical setting; or
(b) **Education.** Two years of education above high school that included at least 12 semester hours in courses related to the occupation. **NOTE:** Successful completion of a course for medical technicians, hospital corpsmen, medical service specialists, or nursing assistants obtained in a training program given by the Armed Forces, the U.S. Maritime Service, or hospitals under close medical and professional supervision, may be substituted on a month-for-month basis for up to 6 months of experience.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate the KSAs below:

1. Knowledge of universal precautions for safety and prevention of cross contamination.

2. Basic knowledge of medical terminology in order to assemble specialty operating room/clinic instrument sets.

3. Basic knowledge of sterilization and cleaning equipment.

4. Ability to communicate both orally and in writing.

(d) **Assignment.** This is a developmental level MST position. Performs segments of work pertaining to the decontamination, sterilization and inspection of reusable medical equipment (RME). Completes segments of work pertaining to the assembly of basic sets and trays for use in the medical center. Operates equipment involved in sterilization processes. Prepares operating room case carts. MSTs receive guidance from more experienced staff members and require frequent and direct supervision.

(3) **GS-05 (Developmental Level)**

(a) **Experience.** One year of experience equivalent to the next lower grade level; or

(b) **Education.** Four academic years above high school leading to a Bachelor’s degree with at least 12 semester hours in courses related to the occupation or a Bachelor’s degree.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate the following KSAs:

1. Basic knowledge of surgical instruments used in operating rooms and clinic settings.

2. Basic knowledge of event-related packaging in regards to sterility.

3. Knowledge of sterilization and cleaning equipment.

(d) **Assignment:** This is a developmental level MST position. Removes soil, blood, tissue fragments, body fluids, and other containments by wiping, soaking, rinsing, and scrubbing. Inspects packages for indications of proper sterilization, assembles basic sets and trays used throughout the medical center including those used in the operating room. Prepares, loads, and operates sterilizers such
as steam, Sterrad, Steris, ETO, and a high level disinfecting scope reprocessor; prepares operating room case carts daily using surgery schedule. MSTs receive guidance from more experienced staff members for more complex tasks and require direct supervision on new assignments.

(4) **GS-06 (Full Performance Level)**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Knowledge of surgical instruments used in operating rooms and clinic settings.
2. Knowledge of universal precautions for safety and prevention of cross contamination.
3. Working knowledge of medical terminology, anatomy and physiology, microbiology, medical conditions and procedures.
4. Knowledge of sterility principles in regards to instrumentation.
5. Ability to read and interpret written instructions and procedures.

(c) **Assignment.** This is the full performance level for the occupation. Receives contaminated critical and semi-critical RME in the decontamination area and may receive noncritical equipment in the decontamination area as well. Disassembles the RME and determines the correct cleaning method, such as but not limited to ultrasonic cleaners, mechanical washers, cart washers and chemical cleaning/decontamination agents, as determined by manufacturer instructions. Inspects, assembles and determines the correct method and packaging for sterilization such as but not limited to steam, Sterrad, Steris, ETO, and high level disinfecting scope reprocessors. Performs and documents daily operational checks and records for all sterilization equipment.

(5) **GS-07 (Advanced Level)**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Detailed knowledge of complex surgical instruments used in operating rooms and clinic settings.
2. Ability to assemble specialty operating room and clinic instrument sets.
3. In-depth knowledge of sterilization and cleaning equipment.
4. Ability to communicate both orally and in writing in order to convey information and thoughts to others.
(c) **Assignment.** The Advanced MST assembles highly complex instrument sets including, but not limited to, open heart, major orthopedic total joint, cardiovascular, craniotomy and complex endoscopic instrumentation. Processes all complex endoscopic instrumentation to include those medical devices used in the gastroenterology laboratory, bronchoscopy laboratory, urology and operating room. Reviews manufacturer guidelines to ensure the correct methods and parameters are followed when cleaning, decontaminating and sterilizing RME. Troubleshoots and analyzes mechanical failures and makes necessary adjustments to complex decontamination and sterilization equipment, as well as interprets alarm conditions which may occur while operating the equipment. Informs management and healthcare staff when cleaning and processing standard operating procedures (SOPs) or instruction for use have been changed or updated to assure the changes have been validated to meet all guidelines.

(6) **GS-07 Lead Medical Supply Technician (Sterile Processing)**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Ability to instruct staff on the correct procedures and protocols for completing assignments.

2. Skill in communicating with staff to ensure compliance with written directives, rules and regulations.

3. Skill in interpersonal relationships in dealing with employees, team leaders, and managers.

4. Knowledge of sterility principles in order to instruct staff on decontamination procedures.

5. Ability to lead individuals, manage priorities, and schedule work assignments.

(c) **Assignment.** The Lead MST works in support of the Sterile Processing Service (SPS) management team. Distributes and prioritizes workload among employees in accordance with established workflow and/or job specializations. Assures an even workflow and distribution of the workload. Revises work schedules to meet anticipated and unanticipated changes in the workload. Assigns work to staff based on experience and training needs. Monitors and reports on the status of work. Ensures SOPs and SPS mandates are followed during the performance of workflow. Reviews work in progress or spot checks work not requiring review to ensure completed work meets supervisors’ instructions on such things as work sequence, procedures, methods, and deadlines. Assesses the quality and quantity of work by reviewing the cleaning, reprocessing, and distribution of technical medical equipment, material and instrumentation. Provides information to management officials concerning performance issues, assignment changes and task completion. Instructs employees on work-related activities, policies, procedures and goals.

(7) **GS-07 Medical Supply Technician (Sterile Processing) - Quality Assurance**

(a) **Experience.** One year of experience equivalent to the next lower grade level.
(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Knowledge of fact-finding and investigative techniques in order to evaluate work processes.

2. Ability to analyze data and make recommendations to correct quality control problems.

3. Knowledge of sterile processing operations, infection control procedures, and Joint Commission requirements to assess compliance during quality assurance reviews.

4. Ability to compile information, evaluate facts, document findings and prepare reports.

5. Thorough knowledge of aseptic principles and techniques to maintain quality control.

6. Ability to effectively communicate with technical and professional staff on the proper use of delicate instruments and equipment, and resolve problems that may occur.

(c) **Assignment.** The Quality Assurance (QA) Technician serves as the monitoring specialist for all activities of SPS, which includes the operating room case cart management system. Monitors the process of cleaning/decontamination, sterilization, reprocessing, and distribution of critical, semi-critical and non-critical RME. This includes following the use of bacteriological controls, principles and methods of sterilization, packaging, and assembly of simple to more complex items for therapeutic and surgical procedures. Develops procedures to evaluate the quality of work performance and outcomes as it relates to the quality assurance program. Maintains a system of internal and external reviews ensuring overall compliance of all critical, semi-critical and non-critical RME used within the medical center. Tracks and analyzes required documentation pertaining to critical, semi-critical and non-critical RME within the scope of SPS for quality control purposes. Utilizes qualitative analysis tools to prepare reports for trending, evaluate operations and facilitate improvements in workflow and quality processes. Troubleshoots computer programs related to SPS operations and trains staff on the inputting of data associated with the cleaning and sterilization of equipment, biological processing, and quality assurance programs. Collaborates with SPS management when deviations occur. Validates SPS policies on cleaning and sterilization as it relates to manufacturer information for use, standards and mandates. Updates the quality assurance program annually or when manufacturer information and guidelines are changed.

(8) **GS-07 Medical Supply Technician (Sterile Processing) - RME Coordinator**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Ability to interact with individuals of varying backgrounds in order to assess the needs of the department.

2. Ability to coordinate work in order to complete duties in an accurate and timely fashion.
3. Ability to interpret and apply sterile processing/infection prevention regulations and policies.

4. Ability to evaluate new products and equipment.

5. Ability to initiate and lead interdisciplinary groups in carrying out sterile processing functions.

(c) **Assignment.** The RME Coordinator provides oversight in the development, implementation, coordination, maintenance and evaluation of critical and semi-critical medical devices within the RME Program. Reviews the acquisition of new equipment and advises using services of anticipated delivery dates. Controls the release of any new equipment until verification of all SOPs have been developed and communicated to staff. This includes coordination across services and/or disciplines which can influence the organizational mission, vision, values and strategic priorities for RME. Monitors, analyzes and provides consultation on infection control issues regarding RME. Participates in clinical rounds to assist in the verification of each service’s SOPs for RME. Investigates the need for any manufacturer and model-specific SOP required for new RME at the time of the acquisition request. When new SOPs are required, obtains the necessary information from the manufacturer or vendor. Develops SOPs to standardize equipment used in the medical center. Educates hospital staff, including the executive level, on all new equipment to ensure compliance is met as it relates to RME.

(9) **GS-07 Medical Supply Technician (Sterile Processing) – Trainer**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Knowledge of SPS and Infection Prevention regulations.

2. Knowledge of procedures and/or operations in training developed for, and operations of SPS functions for both new and existing staff.

3. Ability to manage integrated training programs as it relates to sterile processing procedures.

4. Working knowledge of Microsoft Word, Excel or other software programs in order to complete reports and develop skills.

5. Ability to communicate effectively with staff and management officials in regards to sterile processing procedures.

(c) **Assignment.** The MST Trainer is responsible for developing formal and informal written plans for the SPS training program, in compliance with accreditation organizations and VHA-specific requirements as well as medical center policies and procedures for SPS and related staff. Facilitates training of SPS staff through educational programs and job specific instruction. Improves SPS processes by facilitating the application for new technology of reusable medical devices by training all new and existing staff. Develops, monitors, and revises SPS educational programs for both new and
existing staff. Documents and assesses staff’s training, to identify areas of strength and need. Develops an education plan (literature review, continuing education, in-services, certification and/or formal education) to maintain and improve knowledge in specialized areas of processing reusable medical devices. Participates in tracking, trending and analyzing education data. Identifies opportunities for improvement, makes recommendations and/or prepares reports based on findings. Develops and conducts the annual review of the SPS preceptor program.

(10) **GS-07 Medical Supply Technician (Sterile Processing) – Coordinator**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Practical knowledge of conventional fact-finding or investigative techniques in order to evaluate internal work processes.

2. Skill to develop, analyze and evaluate facts relative to unsatisfactory conditions or trends.

3. Knowledge of and skill in applying various methods and techniques for investigating, analyzing and recommending corrective action on complex quality problems.

4. Knowledge of the SPS policies and procedural manuals, infection control procedures, and accrediting agencies and quality assurance guidelines to assure appropriateness of work during quality assurance reviews.

5. Working knowledge of Microsoft Word, Excel and other software programs.

6. Thorough knowledge of aseptic principles and techniques, which include sterilized operations, sterilizer mediums, and tests to determine the effectiveness of sterilization, packaging, storage, and shelf life.

7. Ability to communicate orally and in writing to ensure staff compliance with written directives, rules and regulations.

(c) **Assignment.** The MST Coordinator monitors quality assurance in the cleaning/decontamination, sterilization, reprocessing, and distribution of surgical instruments and technical medical equipment processed in SPS, ensuring proper procedures are followed and the items are safe for use. Ensures national sterile processing standards are followed in the process of cleaning/decontamination, sterilization, reprocessing, and distribution of critical and/or semi-critical reusable medical equipment. Coordinates training that is well structured and includes appropriate materials. Ensures staff is competent for reprocessing critical and semi-critical RME by reviewing actual demonstration of tasks. Coordinates with hospital staff (e.g. operating room, emergency department and clinics) on critical and semi-critical medical equipment to ensure compliance with all national and local directives. Updates the Chief (or designee) on patient safety alerts and issues concerning reusable medical equipment.
Establishes and maintains frequent contacts with interdisciplinary staff and outside vendors and manufacturers.

(11) **GS-08 Lead Medical Supply Technician (Sterile Processing)**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Ability to read and interpret written procedures and select appropriate action in order to instruct staff in correct procedures and protocols for completing assignments.

2. Ability to communicate orally and in writing to ensure staff compliance with written directives, rules and regulations.

3. Skill in interpersonal relationships in dealing with employees, team leaders, and managers.

4. Knowledge of sterility principles in order to instruct staff on decontamination procedures.

5. Ability to lead individuals, manage priorities, and schedule work assignments.

(c) **Assignment.** The Lead MST at this level oversees a work team that includes at least one MST position that is above the full performance. Distributes and prioritizes workload among employees in accordance with established workflow and/or job specializations. Assures an even distribution of the workload. When necessary, revises work schedules to meet anticipated and unanticipated changes in the workload. Assigns tasks as necessary to provide new employees with the experience and training required to perform decontamination of scopes and instrumentation in the work area. Monitors and reports on the status of work. Ensures SOPs and SPS mandates are followed during the performance of workflow. Reviews or spot checks scope processing work to ensure completed work meets supervisors’ instructions (e.g., work sequences, procedures, methods, and deadlines). Assesses the quality and quantity of work by reviewing the cleaning, reprocessing, and distribution of scope medical equipment, material and instrumentation. Provides information to management officials concerning performance issues, assignment changes and task completion. Instructs employees on work-related activities, policies, procedures and goals.

(12) **GS-08 Supervisory Medical Supply Technician (Sterile Processing)**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Ability to manage, interact and deal with individuals of varying backgrounds.
2. Ability to direct staff and manage tasks to be completed.

3. Ability to oversee and supervise all aspects of decontamination, preparation, sterilization, monitoring, and distribution of RME.

4. Ability to perform a full range of supervisory duties, including assigning, planning and evaluating work, recommending awards, approving leave, identifying training needs, and resolving staff issues.

(c) **Assignment.** The Supervisory MST functions as a first-level supervisor responsible for the oversight of a group of MSTs, with administrative responsibility for planning and directing the work. Oversees attendance and leave, including approval of sick and annual leave and vacation schedules. Informs higher level management of anticipated vacancies or increases in workload. Recommends promotions, reassignments, recognition of superior performance, retention or release of probationary employees or other changes of assigned personnel. Holds corrective interviews with employees, referring disciplinary problems to higher levels of management. Resolves informal complaints of employees and deals with union representatives on personnel matters. Provides technical supervision necessary for accomplishing the work of the organizational unit.

(13) **GS-09 Supervisory Medical Supply Technician (Sterile Processing) - Assistant Chief**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Ability to plan and project staffing needs and requirements.

2. Ability to manage, interact and deal with individuals of varying backgrounds.

3. Ability to manage, direct and adapt work to accomplish program goals and objectives, and meet new and changing program requirements.

4. Ability to develop and recommend new or revised policies that are consistent with organizational goals and objectives.

5. Ability to perform a full range of supervisory duties, including assigning, planning and evaluating work, recommending awards, approving leave, identifying training needs, and resolving staff issues.

6. Ability to evaluate new products and equipment, develop options, and make recommendations.

7. Ability to manage, interpret, and present fiscal data (i.e. fund controls, contracts and equipment expenditures), forecast resource and equipment needs and administer an allocated budget.

(c) **Assignment.** The Assistant Chief contributes to the oversight of all supervision, administrative management and direction of the SPS. Oversees all decontamination, sterilization and disposition of facility critical and semi-critical RME. Develops and maintains a system of internal reviews that
ensure service programs operate in compliance with regulatory and accrediting organizations. Contributes to the effective utilization of resources, budgetary allocation and fiscal management. Makes selections, assigns personnel and provides direction to subordinate staff. Manages the training, documenting and evaluating of staff. Serves as liaison between SPS and other departments.

(14) **GS-10 Supervisory Medical Supply Technician (Sterile Processing) - Chief**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Ability to implement and incorporate regulations, policies, and procedures to manage SPS operations.

2. Ability to evaluate new products and equipment, develop options, and make recommendations.

3. Ability to integrate SPS managerial duties, which includes strategic planning of facility organizational goals and integration of SPS vision and values within the organizational mission.

4. Ability to perform a full range of supervisory duties, including assigning, planning and evaluating work, recommending awards, approving leave, identifying training needs, and resolving staff issues.

5. Skill to initiate and lead interdisciplinary groups in order to facilitate daily SPS functions.

6. Ability to analyze and interpret fiscal data in order to forecast resource and equipment needs.

(c) **Assignment.** The Chief has the overall responsibility for the supervision, administrative management and direction of the SPS. Ensures SPS functions are in compliance with all regulatory mandates. Forecasts, plans, develops and manages the SPS program. Manages SPS personnel and serves as liaison between SPS and other departments. Maintains effective interdepartmental relationships, coordinates and resolves problems, and ensures cooperation with other programs and services. Manages the overall SPS budget including determining resource needs, allocating resources, and ensuring proper utilization in productivity, efficiency and cost effectiveness of SPS operations. Formulates objectives, develops priorities and implements plans that support organizational goals. Ensures operations are in compliance with all safety, regulatory and accrediting requirements. Oversees orientation and training of staff.

4. **DEVIATIONS**

   a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for Medical Supply Technician (Sterile Processing) in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments warrant such action based on demonstrated competence to meet the requirements of the proposed grade.
b. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee in VHA Central Office.

Authority 38 U.S.C. § 7402, 7403]
[APPENDIX G48. THERAPEUTIC MEDICAL PHYSICIST QUALIFICATION STANDARD
GS-601
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Therapeutic Medical Physicist (TMP) in the Veterans Health Administration (VHA). These requirements apply to all VHA TMPs in the GS-601 General Health Science series.

2. BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. Education. Master’s degree or higher in a physics, science, or engineering discipline recognized by an accredited college or university with at least 30 semester hours in medical physics, health physics, radiological science, physics, engineering, chemistry, or biology; or an equivalent foreign degree and coursework substantiated by the National Association of Credential Evaluation Services.

   c. Board Certification. Persons hired or reassigned to TMP positions in the VHA must be board certified in the field of therapeutic medical physics by an approved certifying body. The board certificate must be current and the applicant must abide by the certifying body's requirements for continuing education.

      (1) Approved Certifying Bodies

         (a) The American Board of Radiology (ABR) in any of the following field titles:

            1. Therapeutic Medical Physics

            2. Therapeutic Radiologic or Therapeutic Radiological Physics

            3. Radiologic Physics or Radiological Physics

         (b) The American Board of Medical Physics (ABMP) in the subfield of Radiation Oncology Physics.

         (c) The Canadian College of Physicists in Medicine (CCPM) in the subfield of Radiation Oncology Physics.

      (2) Exception for Non-Board Certified, Entry Level Candidates. Non-board certified TMPs designated by the certifying agency (e.g., American Board of Radiology) as “board eligible”, who otherwise meet the eligibility requirements, may be given a temporary appointment as a graduate TMP under the authority of 38 U.S.C. § 7405(c)(2)(B). The appointing official may waive the requirement of certification for a period not to exceed 2 years for a TMP that provides care under the supervision of a board certified TMP at or above the full performance level. This exception only applies at the GS-12 entry level. For grade levels at or above the full performance level, the candidate must be board certified. Temporary
appointments of non-board certified TMPs may not be extended beyond 2 years, or converted to a new temporary appointment.

(3) **Failure to Obtain Board Certification.** In all cases, uncertified TMPs must actively pursue obtaining board certification from the date of their appointment. At the time of appointment, the supervisor will provide the uncertified TMP with the written requirements for board certification, the date by which board certification must be obtained, and the consequences for not becoming board certified by the deadline. Failure to obtain board certification by the prescribed date will result in removal from the GS-601 TMP series and may result in termination of employment.

(4) **Loss of Board Certification.** Once board certified, TMPs must maintain a full, valid and unrestricted board certification to remain qualified for employment. Loss of board certification may result in termination of employment.

d. **Grandfathering Provision.** All persons employed in VHA as a TMP on the effective date of this qualification standard are considered to have met all qualifications requirements for the title, series and grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following apply.

(1) Such employees may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) TMPs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or certification that meet all the basic requirements of the qualification standard must maintain the required credentials as a condition of employment in the occupation.

(4) TMPs who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as a TMP.

e. **Physical Requirements.** See VA Directive and Handbook 5019.

f. **English Language Proficiency.** TMPs must be proficient in spoken and written English as required by 38 U.S.C. 7402(d), and 7407(d).

3. **GRADE REQUIREMENTS**

a. **Creditable Experience**
II-G48-3

(1) **Knowledge of Current Medical Physicist Practices.** To be creditable, the experience must have required the use of knowledge, skills, and abilities (KSAs) associated with current professional TMP practice. The experience must be post-master’s degree or above. Experience satisfying this requirement must be active professional practice, which is paid/non-paid employment as a professional TMP.

(2) **Quality of Experience.** Experience is only creditable if it is obtained following graduation with a master’s or doctoral degree in medical physics, physics, or another relevant physical science or engineering discipline from an accredited training program and includes work as a professional TMP directly related to the position to be filled. Qualifying experience must also be at a level comparable to TMP experience at the next lower grade level. For all assignments above the full performance level, the higher level duties must consist of significantly larger scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

(3) **Part-Time Experience.** Part-time experience as a professional TMP is creditable according to its relationship to the full-time workweek. For example, a TMP employed 20 hours a week, or on a 1/2-time basis, would receive 1 full-time workweek of credit for each 2 weeks of service.

(4) **Clinical Training/Clinical Residency.** TMPs go through a post-graduate clinical training program in therapeutic medical physics before they are eligible to work as a TMP. The post-graduate clinical training may be substituted for creditable experience on a year-for-year basis.

b. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

(1) **GS-12 Therapeutic Medical Physicist (Entry Level)**

(a) **Experience, Education, and Board Certification.** None beyond the basic requirements. (NOTE: See exception to certification requirement in subparagraph 2c(2) above.)

(b) **Assignments.** The employee works under the direction of a board-certified TMP. The employee provides direct evaluation of radiation therapy patients with regard to safety and accuracy of delivery through determination of the methodology for accurate positioning of the patient and assessment of the feasibility of delivery of the prescribed plan. The employee applies specialized knowledge of treatment planning in order to assess the fidelity of treatment plan alternatives. The employee organizes treatment plans, chooses the modality, and oversees the delivery of treatment. The employee provides direct assessment of the patient in order to render clinical physics judgment for radiation planning and delivery. The employee works and exercises sound judgment in the evaluation of the quality, safety, and accuracy of radiation treatments planned and delivered to patients, thus ensuring that correct radiation dose is delivered as prescribed. The employee implements radiation therapy of marked difficulty and responsibility because the underlying radiotherapy planning and delivery process has multiple potential failure modes of a highly complex nature. The employee is responsible for the technical aspects of external beam and brachytherapy treatment procedures from treatment simulation to treatment planning to the actual treatment delivery. The employee provides limited leadership, guidance and oversight of the work of medical dosimetrists and radiation therapists. The employee performs the following actions to assist in the implementation of new equipment and processes: assesses radiation
therapy equipment needs; performs acceptance testing and commissioning of new radiation therapy equipment; evaluates the adequacy of room shielding; performs radiation surveys; and develops and implements treatment processes. The employee also performs the following actions to oversee radiation therapy treatment planning: monitors and improves treatment processes; evaluates treatment plans for conformance to department standards, ensures the accuracy of treatments and integrity of data recorded in the patient’s medical records; performs patient-specific treatment validation measurements; and documents medical physics policies and procedures for the delivery and quality assessment of advanced treatment procedures such as intensity modulated radiation therapy, stereotactic body radiation therapy, and brachytherapy. The employee operates and documents the medical physics quality assurance program; applies Federal regulations as they relate to ionizing radiation medical use; and manages the radiation safety program for radiation oncology.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the basic requirements, the candidate must demonstrate the following KSAs:

1. Knowledge of the scientific and technical principles and properties of radiotherapy devices for external beam radiotherapy. This includes specialized knowledge of the clinical applications of these devices.

2. Ability to exercise independent judgment in the calibration and commissioning of external beam photon and electron beam delivery devices for clinical use. This includes specialized knowledge of the acceptance testing and commissioning of radiation therapy treatment simulation equipment such as Computerized Tomography (CT) simulators.

3. Scientific and technical knowledge of electronic data handling techniques and software.

4. Ability to exercise independent judgment in the safe operation of radiotherapy equipment and quality assurance. This includes specialized knowledge of sources of uncertainty associated with treatment delivery and how to minimize the deviation between planned and delivered treatments; configuration of test equipment and associated software; and expected equipment performance for external beam radiotherapy treatment, brachytherapy, and simulation equipment.

5. Detailed scientific and technical knowledge of radiotherapy treatment planning principles, treatment planning algorithms, and treatment delivery.

6. Knowledge of scientific and technical aspects of brachytherapy delivery systems and radiation sources.

7. Ability to exercise independent judgment in radiation shielding techniques for external beam delivery systems. This includes specialized knowledge of detection and survey methods for external beam delivery systems. This also includes knowledge of regulatory requirements and guidelines for radiation shielding and protection.

8. Knowledge of multi-modality medical imaging to include a detailed scientific and technical understanding of megavoltage photon beam imaging, CT, radiographic imaging, magnetic resonance imaging, and positron emission computed tomography.
(2) GS-13 Therapeutic Medical Physicist (Full Performance Level)

(a) **Experience.** In addition to the basic requirements, completion of a minimum of 1 year of progressively complex experience equivalent to the next lower grade level.

(b) **Assignments.** The full performance level TMP is board certified and performs the clinical practice of therapeutic medical physics in its entirety with considerable discretion and independent judgment. The employee plans, delivers, verifies, and monitors quality assurance of radiotherapy at all levels of complexity. Specific tasks include: recommending an optimal modality and treatment technique for the patient; evaluating the quality, safety, and accuracy of radiation treatments planned and delivered to patients, thus ensuring that radiation dose is carried out correctly and completely; and safely operating all radiation planning and delivery devices. The TMP implements radiation therapy of outstanding technical difficulty and responsibility, providing knowledge-based solutions to resolving issues where no rule-based solutions exist. The employee plans and directs a specialized program encompassing all physics and clinical aspects of external beam and brachytherapy treatment procedures from treatment simulation to treatment planning to the actual treatment delivery. The TMP provides technical oversight for the work of entry level TMPs, medical dosimetrists and radiation therapists. The incumbent oversees radiation therapy treatment planning; designs and approves treatment plans; monitors the accuracy of treatment data recorded in the patient’s medical records; provides consultation to the radiation oncologist regarding difficult treatment cases; performs patient-specific treatment validation measurements; and develops medical physics policies and procedures for the delivery and quality assessment of advanced treatment modalities such as intensity modulated radiation therapy, stereotactic body radiation therapy, and brachytherapy. The TMP develops, operates and fully documents the medical physics quality assurance program and ensures regulatory compliance within the Radiation Safety Officer’s radiation safety program. The employee safely utilizes and properly operates all radiation oncology equipment, and is therefore qualified and responsible for educating radiation oncology team members including radiation oncologists, radiation therapists and dosimetrists in safety issues that relate to radiotherapy planning and delivery.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Knowledge regarding the safe and efficient use of all radiotherapy devices for external beam radiotherapy.

2. The ability to evaluate and ensure correct and safe operation of radiotherapy equipment through complex problem diagnosis and scheduled quality assurance.

3. Knowledge of the scientific, clinical, and technical applications of high dose rate and low dose rate brachytherapy treatment simulation, planning, dosimetry, and treatment methods.

4. Expertise in the professional, scientific, and technical aspects of shielding methods for external beam radiation delivery systems, radiation survey methods, developing procedures, setting action levels, delivering radiation safety training, developing and documenting competencies, and reporting. This includes an in-depth knowledge of regulatory requirements and guidelines for radiation shielding and personnel protection.
5. Ability to exercise independent professional judgment in the performance and evaluation of calibration, acceptance testing, and clinical commissioning procedures for all types of external beam photon and electron beam delivery systems. Skilled in the evaluation of acceptance testing and commissioning results of CT simulators.

6. Technical skills in 3-D treatment planning, intensity modulated radiation therapy treatment planning, and stereotactic body radiation therapy planning. This includes specialized knowledge of clinical process steps and resource requirements for planning and delivery of radiation oncology treatments.

7. Ability to process information from multi-modality imaging datasets for treatment planning, treatment verification, and radiotherapy response assessment.

(3) GS-14 Therapeutic Medical Physicist (Advanced Level)

(a) Experience. In addition to the basic requirements, completion of a minimum of 1 year of progressively complex experience equivalent to the next lower grade.

(b) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Employees at this level who are not supervisors are able to carry out assigned tasks independently in all areas of radiation therapy requiring TMP competencies which substantially exceed the full performance level and require advanced knowledge in all areas of radiation therapy. Regardless of the nature of the specific assignment, the work must be of sufficient scope and complexity to meet the knowledge, skills, and abilities to perform at this grade level.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Advanced expertise and experience in the safe and efficient use of all radiotherapy devices for external beam radiotherapy and brachytherapy.

2. Highly developed expertise with commissioning linear accelerators and treatment planning systems for complex clinical use, to include project management, performance testing, data acquisition, beam modeling, and validation testing.

3. Advanced knowledge (treatment simulation, planning, dosimetry, and treatment methods) of the scientific, clinical, and technical applications of one or more specialized procedures including, but not limited to, high dose rate brachytherapy, low dose rate brachytherapy, stereotactic body radiation therapy, stereotactic radiation therapy, intensity modulated radiation therapy, volumetric modulated arc therapy, total body irradiation, advanced image-guided therapy, and adaptive therapy.

4. Advanced expertise in acceptance testing, clinical commissioning, and (when applicable) calibration procedures for a variety of ancillary radiation oncology delivery, imaging, dosimetry, metrology, and computational systems.
(4) **GS-14 Supervisory Therapeutic Medical Physicist**

(a) **Experience.** In addition to the basic requirements, completion of a minimum of 1 year of progressively complex experience equivalent to the next lower grade.

(b) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. A supervisory TMP provides professional, scientific, and clinical practice of therapeutic medical physics for external beam and brachytherapy treatment procedures from treatment simulation to treatment planning to the actual treatment delivery. The incumbent oversees the technical development and implementation of new radiotherapy techniques and modalities; oversees the activities of all other TMPs, dosimetrists, and other staff members assigned to the unit; directs the technical aspects of treatment procedures; and, performs duties qualifying them as a supervisor to include planning and directing work, developing performance plans, evaluating staff performance, and other administrative functions. The supervisory TMP has full supervisory responsibility for a staff that includes lower level TMP positions and other clinical and professional staff within the unit. The employee directs the implementation of new equipment and processes through oversight of the following activities: assesses radiation therapy equipment needs; monitors acceptance testing and commissioning of new radiation therapy equipment; evaluates the adequacy of room shielding and radiation surveys; develops and implements treatment processes in concert with a radiation oncologist; and, ensures the precision and accuracy of treatment delivery. The employee optimizes technical infrastructure and workflow for streamlined operations in the department of radiation oncology through the mastery and application of techniques such as Failure Mode and Effect Analysis (FMEA), Root Cause Analysis (RCA), and Fault Tree Analysis (FTA). The employee directs the radiation therapy treatment planning team through oversight of the following activities: designs and approves of treatment plans; monitors the accuracy of treatment data recorded in the patient’s medical records; provides consultation to the radiation oncologist regarding difficult treatment cases; performs patient-specific treatment validation measurements; develops medical physics policies and procedures for the delivery and quality assessment of advanced treatment modalities such as intensity modulated radiation therapy, stereotactic body radiation therapy and brachytherapy. The employee develops, operates, and documents the medical physics quality assurance program; ensures regulatory compliance; supervises the Radiation Safety Officer’s radiation safety program; and, trains and educates radiation oncology team members in safe operations in Radiation Oncology.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Ability to oversee the technical development and implementation of new radiotherapy techniques and modalities. This includes knowledge of current standards of care, VA policies, trends and changes in delivery technology, as well as fair, principled, and decisive leadership practices.

2. Ability to optimize technical infrastructure and workflow for streamlined operations in the department of radiation oncology. This includes the knowledge and application of techniques such as Failure Mode and Effect Analysis (FMEA), Root Cause Analysis (RCA), and Fault Tree Analysis (FTA).
3. Ability to assess the qualifications and abilities of current and prospective employees, to include staff performance evaluations and professional development.

4. Advanced knowledge of regulatory requirements, manufacturer's standards, and professional society guidelines for performing quality assurance of radiation therapy equipment to include accelerators, simulators, and high dose rate/low dose rate brachytherapy delivery systems.

5. Ability to use written and verbal communication with a strong command of technical writing considerations.

6. Ability to collaborate with the members of other disciplines and supervisors and to represent the profession both in and outside of VHA. This includes knowledge of the roles, contributions, and interrelationships with other health care specialties and supporting divisions.

7. Knowledge of instructional methods and documenting competencies.

8. Ability to manage and supervises employees.

(5) GS-15 Medical Physicist (Program Manager)

(a) Experience. In addition to the basic requirements, completion of a minimum of 1 year of progressively complex experience equivalent to the next lower grade level.

(b) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The employee provides leadership and exceptional experience in dealing with complex and challenging professional, scientific, and technical practice in therapeutic medical physics for external beam and brachytherapy treatment procedures from treatment simulation to treatment planning to the actual treatment delivery. The TMP at program manager level supervises the activities of other TMPs and dosimetrists and performs all duties of a supervisory level TMP. The program manager TMP manages the development and implementation of advanced techniques and special initiatives in radiotherapy, collaborates with radiation oncologists in the development of new clinical protocols, and directs special projects involving clinical applications, clinical research, or quality assurance. The employee serves as a subject matter expert on certain aspects of therapeutic medical physics in which the incumbent has achieved national recognition. The employee’s expertise in medical physics is utilized to provide consultative services to the National Radiation Oncology Program (NROP), the National Health Physics Program (NHPP), other VHA program offices and other Federal agencies. In addition, the program manager level TMP provides liaison with those professional organizations whose purview is the organization, development or regulation of medical physics.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Knowledge at an in-depth level of the processes and underlying medical physics principles used in the planning and delivery of therapeutic radiation.
2. Skill to directly supervise program specialists for Departmental critical initiatives and indirectly oversee medical physicists at the facility level.

3. Knowledge of regulatory frameworks, implementation details, and their evolution in time.

4. Skill in the performance of investigatory team leadership, causal analysis, investigatory interviewing techniques, and communication of conclusions.

5. Ability to formulate, refine, and deploy major initiatives of national significance to the Department.

6. Ability to assess and improve the quality of facility-level programs based on accreditation reports and similar documentation or direct inspection.

7. Ability to communicate both in writing and verbally with exceptional concision and clarity for disparate audiences.

8. Skill in managing resources, i.e. space, equipment, personnel; at the regional or national level.

4. DEVIATIONS

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for TMPs in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the educational requirements be waived for any grade level. Under no circumstance will the board certification requirement be waived for grade levels GS-13 or above.

c. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority 38 U.S.C. 7402, 7403]
[APPENDIX G49. BIOMEDICAL EQUIPMENT SUPPORT SPECIALIST QUALIFICATION STANDARD
GS-1601
Veterans Health Administration

1. COVERAGE. The following are the requirements for appointment as a Biomedical Equipment Support Specialist (BESS) in the Veterans Health Administration (VHA). These requirements apply to all BESSs in the GS-1601 series. The work requires the application of engineering and mechanical concepts and methodology to provide life-cycle management and technical support of diagnostic, therapeutic devices, monitoring, and other equipment applicable in the practice of medicine, and to improve health service delivery systems for communities and within individual VA facilities (medical centers, outpatient clinics, domiciliaries). BESS work requires, in addition to knowledge and skill in engineering disciplines, a background in physiology and anatomy, and a practical facility in specialized subject matter areas such as computer applications, electronics, or mathematics.

2. DEFINITIONS

   a. Appointing Official. The Human Resources Management Officer is delegated appointing authority, to process and authenticate notifications of personnel actions, and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

   b. Approving Official. The Veterans Integrated Service Network (VISN) Director, Facility Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

   c. Journey Level. The full performance level for this qualification standard is at the GS-11 grade level.

   d. Creditable Experience. To be creditable, experience must demonstrate the use of knowledge, skills, and abilities associated with Biomedical Equipment Support. Experience may be acquired by paid or non-paid employment.

   e. Quality of Experience. Experience is only creditable if it is either directly related to the position to be filled or in a related field (i.e. Biomedical Equipment Support Specialist, Biomedical Equipment Technician, Field Service Engineer, Medical Equipment Repairer, or IT Specialist in a healthcare setting). Experience satisfying this requirement may be paid or non-paid employment as a BESS in the parenthetical title as described in subparagraph 3 b. below.

   f. Part-Time Experience. Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.
3. BASIC REQUIREMENTS

a. **Citizenship.** Citizen of the United States. After a determination is made that it is not possible to recruit qualified citizens, necessary personnel may be appointed on a temporary basis under authority of 38 U.S.C. 7405 without regard to the citizenship requirements of 38 U.S.C. 7402 or any other law prohibiting the employment of or payment of compensation to a person who is not a citizen of the United States. Candidates must meet all other requirements for the grade and position concerned.

b. **Experience and Education.** Associates degree in Biomedical Electronics Technology, Biomedical Equipment Technology or Biomedical Engineering Technology or in a related technical field such as Electronic Technology or Information Technology and two years of experience as a Biomedical Equipment Support Specialist, Biomedical Equipment Technician, Field Service Engineer, Medical Equipment Repairer, or Information Technology Specialist.

Or,

Bachelor’s degree in Biomedical Engineering Technology or in a related field such as Electronics Engineering Technology (EET) or Information Technology.

Or,

Completion of a military training program in biomedical equipment and two years of experience as a Biomedical Equipment Support Specialist or Biomedical Equipment Technician, Field Service Engineer, Medical Equipment Repairer or Information Technology Specialist.

c. **Licensure/Certification/Registration.** None

d. **Grandfathering Provision.** All persons employed in VHA as a BESS on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education that is part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

   1. Such employees may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

   2. BESSs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

   3. BESSs initially grandfathered into this occupation, who subsequently obtain additional education that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.
(4) Employees who are retained as a BESS under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as a BESS.

e. **English Language Proficiency.** Candidates will not be appointed under authority of 38 U.S.C. chapters 73 or 74, to serve in a direct patient-care capacity in VHA who is not proficient in written and spoken English. See Chapter 2, section D, paragraph 5a, this part.

4. **GRADE DETERMINATIONS.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:

   a. **Biomedical Equipment Support Specialist, GS-5 (Entry Level)**

      (1) **Experience or Education.** None beyond basic requirements.

      (2) **Assignment.** This is an entry level BESS position. Employees at this level receive guidance from more experienced BESS staff members and require frequent direction from a supervisor. The incumbent acquires training from in-house as well as outside sources (e.g. attendance in community college courses, vendor service schools, conferences/seminars, etc.) to improve working knowledge of medical equipment, including current technology and future advances. This employee will provide support of basic medical equipment and systems to include, but not limited to: installation, preventive maintenance, troubleshooting, repair, calibrations and safety inspections.

   b. **Biomedical Equipment Support Specialist, GS-7 (Developmental Level 1)**

      (1) **Experience.** At least one year of experience equivalent to the GS-5 grade level.

      (2) **Demonstrated Knowledge, Skills, and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

         (a) Ability to read, interpret, and apply a great variety of technical data such as schematic drawings, wiring diagrams, table charts, mathematical expressions and formulas.

         (b) Ability to learn equipment maintenance, operating procedures, and repair procedures from training materials and courses.

         (c) Fundamental knowledge of electronics to include analog, digital and microprocessor theory, pneumatics, hydraulics, optics, electro-mechanics, physics, basic networking, and chemistry.

         (d) Knowledge of the use of standard level test equipment to include, but not limited to, multimeters, electrical safety analyzers, patient simulator, storage oscilloscopes, manometers, tachometers, etc.

         (e) Knowledge of anatomy, physiology, medical terminology, medical equipment, and technology.
(f) Knowledge of basic networking, computer/server hardware/software and information technologies and computer virus protection software, available software patches and upgrades, and information security tools (i.e. Microsoft Office, Windows operating systems, McAfee, etc.).

(3) Assignment. Employees at this grade level serve as developmental BESSs and receive guidance from more experienced staff members. The incumbent acquires training from in-house as well as outside sources (e.g. attendance in community college courses, vendor service schools, conferences/seminars, etc.) to maintain and improve working knowledge of medical equipment, including current technology and future advances. This employee will provide support of medical equipment and systems to include, but not limited to: installation, preventive maintenance, troubleshooting, repair, reliability, calibrations and safety; supporting basic biomedical equipment such as but not limited to infusion pumps; PCA pumps, feeding pumps, suction pumps, defibrillators, clinical video systems, hypo/hyperthermia units, vital sign monitors, physiological monitors, dental equipment, and other patient care devices; performs and documents all repairs and preventive maintenance activities; and ensures that the data is correctly entered into the medical equipment management computer system. Utilizes schematic drawings, wiring diagrams, and technical manuals as guidelines for accomplishing work. Uses specialized electronic test gear or software to analyze, evaluate, diagnose, troubleshoot, calibrate or repair analog and digital microprocessor controlled, computerized or networked digital systems. Makes determinations as to whether systems are safe for patient and operator use and initiates appropriate corrective action when necessary. The specialist performs incoming inspections on new medical equipment and systems to determine that all government safety regulations, manufacturer's specifications, contract requirements, and needs of the user are met. Contacts vendors and their representatives to obtain information on equipment and coordinate problem resolution. Monitors the quality of vendor service provided and ensures satisfactory and timely completion. Provides tactful instruction to equipment operators on the proper use of equipment to avoid use error recurrences; and documents appropriately; and instructs on operator level preventative maintenance. Provides biomedical equipment related technical training to peer and clinical staff.

c. Biomedical Equipment Support Specialist, GS-9 (Developmental Level 2)

(1) Experience. At least one year of experience equivalent to the GS-7 grade level.

(2) Demonstrated Knowledge, Skills, and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of electronics and electricity including analog and intermediate digital electronics to test, calibrate, maintain, and repair biomedical equipment and moderately complex biomedical instrumentation systems.

(b) Skill in the setup and use of standard and advanced level test equipment to perform precise and detailed analysis of the operating and design characteristics of equipment and initiate repairs, reconfiguration, or redesign of moderately complex medical systems.
(c) Skill in applying theory, concepts, techniques, design characteristics, operation, and functions to assist and support installation, operation, test, maintenance, repair, design, and modification for a comprehensive range of medical equipment connected to networks or other operating systems.

(d) Ability to evaluate practical and technical information from manufacturers, contract specifications, manuals, and historical data in order to perform analysis required to make effective recommendations concerning operation, maintenance, and repair of medical equipment.

(e) Ability to perform testing and troubleshooting of medical devices involving their interfaces and connections to other medical devices, clinical systems, or information systems either directly or through the hospitals hardwired and wireless networks.

(f) Ability to use application software and hardware as it relates to the operation and diagnostics of medical equipment.

(g) Knowledge of computer equipment with a wide variety of software to input and retrieve data as required, and to prepare a variety of specific working documents and forms such as spreadsheet, database, word processing, and other similar products.

(3) Assignment: Employees at this grade level serve as developmental level 2 BESSs and receive minimal guidance from more experienced staff members. This employee will provide support of medical equipment and systems, install, maintain, safety test, calibrate, troubleshoot, and support medical technologies such as sleep lab monitoring systems, GI endoscopic systems, dental imaging equipment, surgical equipment, and clinical laboratory equipment. Performs and documents all repairs and preventive maintenance activities and ensures that the data is correctly entered into the medical equipment management computer system. Utilizes schematic drawings, wiring diagrams, and technical manuals as guidelines for accomplishing work. Maintains inventory documentation of assigned networked-attached medical equipment/systems to include electronic protected health information (ePHI) requirements, Virtual Local Area Network (VLAN), IP addresses, Access Control Lists (ACL), anti-virus software, and other necessary information. Provides biomedical equipment related technical training to peer and clinical staff.

d. Biomedical Equipment Support Specialist, GS-11 (Full Performance Level)

(1) Experience. At least one year of experience equivalent to the GS-9 grade level. Certification as a Certified Biomedical Equipment Technician (CBET), Certified Laboratory Equipment Specialist (CLES), Net+ and A+ are highly desirable at this level but not required.

(2) Demonstrated Knowledge, Skills, and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of a wide range of sciences including, but not limited to, electronics (analog and digital), computer science/networking, mechanical engineering design, pneumatics, hydraulics, chemistry, physiology, medical terminology, anatomy, optics, and biology to perform duties of a broad scope and nature on complex and sophisticated patient-related medical systems and sub-systems.
(b) Ability to perform advanced testing and troubleshooting of medical devices involving their interfaces and connections to information systems either directly or through the hospitals hardwired and wireless networks.

(c) Knowledge of codes and standards relevant to safe operation of medical instrumentation such as National Fire Protection Association (NFPA), Food and Drug Administration (FDA), Nuclear Regulatory Commission (NRC), the Joint Commission (TJC), and the Association for the Advancement of Medical Instrumentation (AAMI).

(d) Skill in the use of all types of test and calibration equipment such as digital multi-meters, electrical safety analyzers, defibrillator analyzers, patient simulators, digital oscilloscopes, pulse generators, and Local Area Network (LAN) analyzers in performing troubleshooting/repair and preventive maintenance activities.

(e) Ability to configure and maintain medical servers and desktop computers.

(f) Knowledge of contracting regulations, requirements, and specific contract specifications including performance-based contracts.

(3) **Assignment.** Responsible for the life-cycle management of diagnostic, therapeutic, and other patient related medical equipment and systems. Performs routine and complex tasks involved in the installation, maintenance, modification, troubleshooting and calibration of complex therapeutic, diagnostic and life support biomedical equipment. Responsible for monitoring system backups, file integrity, ensuring-network connectivity between systems, servers, databases, and the electronic medical record. Must be able to reload operating systems and clinical application software in the event of a system failure and interface with Office of Information and Technology (OI&T) locally and at other sites to keep systems operational. Conducts pre-purchase evaluations and addresses pre-implementation security issues to ensure that medical device isolation architecture (MDIA) requirements are met. Serves as project leader for equipment installation to include but not limited to: discussing contract requirements and concerns with the architect/engineer and contractor; identifying the site requirements, preparing cost analysis and justifications, preparing site plans and progress reports; acting as the project coordinator during installation, testing phases and through to completion of the project to include acceptance testing, planning and coordinating work schedules with other services, arranging utility shutdowns; identifying and ordering materials and arranging for assistance from other trades and crafts as necessary. Responds appropriately to hazard recall notifications concerning medical equipment. Investigates equipment incidents and alerts, cases of equipment damage and abuse, equipment failure reports that cannot be duplicated and medical device security incidents. May be a member of a Root Cause Analysis (RCA) team when appropriate. May serve as a Contracting Officer Representative (COR) for the purchase of medical equipment, maintenance/repair contracts, and facility projects. This work includes but is not limited to; drafting Request for Proposal (RFP) language, Sole-source justifications, Statements of Work (SOW), conducting market research, product evaluations, evaluating contractor performance, and pre-procurements assessments. Consults and advises clinical and administrative staff in evaluating medical equipment proposed for purchase. Determines when healthcare technology, instrumentation, or systems are obsolete, hazardous and/or not cost effective to
maintain. Performs incoming inspections on new and unfamiliar medical equipment and systems upon receipt to determine that all government safety regulations, manufacturer's specifications, contract requirements are met. Attends training from in-house as well as outside sources (e.g. attendance in community college courses, vendor service schools, conferences/seminars, etc.) to maintain and improve working knowledge of medical equipment, including current technology and future advances. Provides biomedical equipment related technical training to peer and Developmental BESS’s as well as clinical staff.

e. **Biomedical Equipment Support Specialist (Biomedical Information Systems), GS-12**

1. **Experience.** At least one year of specialized experience equivalent to the GS-11 grade level.

2. **Demonstrated Knowledge, Skills, and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   a. Current knowledge of computer virus protection software, available software patches and upgrades, and information security tools.

   b. Expert knowledge of electronics, computer and networking theory with experience maintaining, interfacing and troubleshooting networked medical equipment to include VLAN configuration, IP addressing, sub-netting, and network security.

   c. Ability to utilize and maintain computer and server based medical equipment, medical record databases, and proprietary and generic software, Experience with TCP/IP, HL7, networking, network security, and DICOM standards.

   d. Ability to interpret, identify, and apply network engineering principles and practices where there often times is no previous example to follow, or precedence.

   e. Skill to distinguish networking problems from non-networking problems and discuss various options with IT networking and operations staff members.

3. **Assignment.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Manages complete systems of central computerized networks, databases, analytic servers and medical device networks. Implements and plans for new or emerging technologies such as new diagnostic modalities, network management and storage appliances, virtual data centers and associated software. Coordinates and provides technical and project oversight of CIS, ARK, Imaging, and similar biomedical information systems (e.g., analytics, data bridge interface, anesthesia record keeping, cardiology information systems, and diagnostic medical imaging systems). Coordinates with OI&T for functionality, space availability, maintenance and replacement of server(s), and facilitating infrastructure updates and upgrades for servers, operating system problems, and virus protection. May manage entire data center dedicated to medical device servers. Identities and troubleshoots issues related to VLAN configuration, IP addressing, sub-netting, HL7 messaging, DICOM standards, and network security to minimize downtime. Most systems are server based with special requirements both in scope of attention and environmental security concerns. Examples of
typical devices or systems include, but is not limited to, Computerized Voice Recognition systems, Picture Archiving and Communication Systems (PACS) (Dental, Ophthalmology, Radiology & Cardiology PACS), and patient data management systems. Evaluates compatibility and adaptability of the biomedical devices for integration over the medical center’s local area network (LAN) and wide area network (WAN). Maintains documentation of assigned medical IT equipment/systems to include ePHI requirements, VLAN, IP addresses, anti-virus software, security, and other necessary information. Addresses pre-implementation security issues to ensure that medical device isolation architecture (MDIA) requirements are met. Regularly reviews available software patches/updates and virus software updates for applicability to medical IT equipment. Coordinates with other BESSs, manufacturers, informatics, and IT staff to complete required software updates and system/data backups. Ensures compliance of networked attached clinical systems to all Medical Device Protection Program (MDPP) requirements. Designs, implements and manages appropriate security measures and disaster recovery plan that is critical to ensure system uptime and prevent loss of patient data from critical computerized databases and operating systems. May participate in VISN wide projects to provide their expertise in medical device isolation architecture (MDIA), Biomedical Server Virtualization, storage of Protected Health Information (PHI). May serve as a Contracting Officer Representative (COR) for the purchase of medical equipment, maintenance/repair contracts, and facility projects. This work includes but is not limited to; drafting Request for Proposal (RFP) language, sole-source justifications, Statements of Work (SOW), conducting market research, product evaluations, evaluating contractor performance, and pre-procurements assessments.

f. Biomedical Equipment Support Specialist (Imaging), GS-12

(1) Experience. At least one year of experience equivalent to the GS-11 grade level. Certification as a Certified Radiology Equipment Specialist (CRES) is highly desirable at this level however it is not required.

(2) Demonstrated Knowledge, Skills, and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of codes and standards relevant to safe operation of radiation producing medical devices such as National Fire Protection Association (NFPA), Food and Drug Administration (FDA), Nuclear Regulatory Commission (NRC), The Joint Commission (TJC), American College of Radiology (ACR), Center for Devices and Radiological Health (CDRH) and The Association for the Advancement of Medical Instrumentation (AAMI).

(b) Comprehensive knowledge of imaging techniques, technologies, radiological practices and procedures.

(c) Skill in using advanced radiological test equipment such as radiation dosimeters, calibration phantoms, high voltage testing devices, KV and MA meters and monitor calibration devices.

(d) Ability to resolve highly complex breakdowns that have an immediate risk to patient safety.
(e) Ability to maintain and troubleshoot networked medical imaging equipment to include VLAN configuration, IP addressing, sub-netting, and network security, and build, configure, repair and install workstations and servers in imaging and non-imaging environments.

(f) Ability to utilize and maintain computer and server based medical equipment, medical record databases, and proprietary and generic software, experience with TCP/IP, HL7, networking, and DICOM standards.

(3) Assignment. For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The incumbent may be responsible for the complete systems management of computerized/networked imaging systems and databases and their inter-connectivity with PACS, related modalities and the Electronic Medical Record (EMR). Utilizes specialized diagnostic software, specialized quality assurance tools and measuring equipment, detailed technical literature, and standard electronic and computer test equipment. Ensures required software updates and backups are completed to maintain continued functionality of equipment, patient safety, and data integrity. The incumbent assists in designing and implementing best approaches to recovery of critical computerized databases and operating systems. The incumbent should be considered a technical expert on one or more advanced imaging system and may provide input to the VISN High-Cost/High-Tech Committee, may serve as a VISN or national technical resource as needed. Advises clinicians and management regarding the acquisition, integration, and application of medical imaging technologies. Participates in the acquisition, technical requirements and evaluations, project planning and deployment of medical imaging systems. May serve as a Contracting Officer Representative (COR) for purchase of medical equipment, maintenance/repair contracts, and facility projects. He/she is responsible for coordinating with the facility stakeholders including but not limited to medical staff, clinical personnel, Biomedical Engineering, OI&T, service managers, Patient Safety, senior salespeople and equipment manufacturers on procurement related or technical issues.

g. Biomedical Equipment Support Specialist, GS-12

(1) Experience. One year of experience equivalent to the GS-11 grade level.

(2) Demonstrated Knowledge, Skills, and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of VA, NFPA, FDA, NRC, The Joint Commission, and other relevant safety and radiation safety standards.

(b) Ability to lead biomedical staff and work on medical equipment if needed to maintain compliant workflow.

(c) Knowledge of project management principles required to effectively and efficiently manage multiple, concurrent projects.

(d) Skill in communication to interact with clinical, technical and managerial staff.
(e) Ability to instruct staff, lead individuals, manage priorities, and schedule work assignments.

(3) **Assignment.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The Lead BESS works in support of the BESS management team. Distributes and prioritizes workload among employees in accordance with established workflow and/or job specializations. Revises work schedules to meet anticipated and unanticipated changes in the workload. Assigns daily work to staff, establishing priorities based on workload related to BESS. Prepares estimates and reports on expected time of completion of work. Reviews progress of work assignments and modifies as needed and checks completed work for accuracy. Ensures SOPs and mandates are followed during the performance of workflow. Instructs employees on work-related activities, policies, procedures and goals. Implements the Biomedical Section training program, in-house cross training, and vendor training, to ensure that technicians are kept abreast of the changing technology as effectively as possible within the available resources. May participate in VISN wide projects to provide their expertise in a particular technology. The incumbent may provide input to the VISN High-Cost/High-Tech Committee and capital investment proposals, and may serve as a VISN technical resource. Provides information to management officials concerning performance issues, assignment changes and task completion. Responds and supports resolution of customer service concerns.

h. **Supervisory Biomedical Equipment Support Specialist, GS-12**

(1) **Experience.** At least one year of experience at the GS-11 grade level that demonstrates the technical competencies described at that level. Certification as a Certified Healthcare Technology Manager (CHTM) is highly desirable at this level but not required.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the KSAs for the GS-11 level, the candidate must demonstrate all of the following KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

(a) Advanced knowledge of Healthcare Technology Management across multiple types of equipment modalities to provide guidance and training to Healthcare Technology Management staff;

(b) Skill in managing Healthcare Technology Management work flow and directing the work of others to accomplish programs goals and objectives.

(c) Ability to develop policy, manage medical equipment life-cycle processes, and provide workload analysis in Healthcare Technology Management operations.

(d) Knowledge of interpersonal relations and conflict resolution to deal effectively with individuals or groups representing widely divergent backgrounds, interests, and points of view.

(e) Ability to analyze Healthcare Technology data and make recommendations to optimize quality, efficiency, performance, and productivity within service.
*(f) Ability to perform the full range of supervisory duties which would include responsibility for assignment of work to be performed; assessments of competency; evaluation of performance; selection of staff; and recommendation of awards, advancements, and disciplinary actions.

(3) Assignments. For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Supervisory BESS at this level are generally found in Complexity Level 2 (Medium Complexity) or Complexity Level 3 (Low Complexity) facilities. Although uncommon, they may also be found in a Complexity Level 1 facility. The Supervisory BESS is responsible for the supervision, administrative management, and direction of lower level BESS. The incumbent supports the Chief Biomedical Engineer with assisting in the administrative and professional responsibilities of planning and directing the Biomedical Engineering/Healthcare Technology Management staff activities for the service or equivalent unit at an independent outpatient clinic. Incumbent may have full supervisory responsibility over a section or equivalent work unit if there is not a Biomedical Engineer at the facility. Typical duties may include: preparing work assignments, monitoring technical performance of some Biomedical Engineering staff, conducting performance appraisals, and other department and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. The supervisor assures compliance with accrediting agencies and regulatory requirements, establishes and monitors the quality of the pre-analytical processes as part of the overall Biomedical Engineering service quality management program, and assures corrective action is initiated as needed. The supervisor assures orientation and competency assessment of assigned staff. Develops policies and procedures, manages document control, develops performance standards, position descriptions and functional statements. They may be responsible for professional and administrative management of an assigned area to include budget execution. The supervisor maintains interdepartmental relations with other services to accomplish medical center goals.

i. Supervisory Biomedical Equipment Support Specialist, GS-13

(1) Experience. At least one year of experience at the GS-12 grade level that demonstrates the technical competencies described at that level.

(2) Demonstrated Knowledge, Skills, and Abilities. In addition to meeting the KSAs at the GS-12 grade level, the candidate must demonstrate all of the following KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

(a) Ability to work independently to set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions to optimize quality, efficiency, performance, and productivity within the service.

(b) Ability to develop policy; manage medical equipment life-cycle processes; and provide workload analysis in Healthcare Technology Management operations.

(c) Ability to translate management goals and objectives into well-coordinated and controlled biomedical work operations.
*(d) Ability to perform the full range of supervisory duties which would include responsibility for assignment of work to be performed; assessments of competency; evaluation of performance; selection of staff; and recommendation of awards, advancements, and when appropriate, disciplinary actions.

(3) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Supervisory Biomedical Engineering Support Specialists are generally found in Complexity Level 1 (High Complexity) facilities. The supervisory BESS is responsible for the supervision, administrative management, and direction of lower level BESSs. The incumbent supports the Chief Biomedical Engineer with assisting in the administrative and professional responsibilities of planning and directing the Biomedical Engineering/Healthcare Technology Management staff activities for the service or equivalent unit at an independent outpatient clinic. Incumbent may have full supervisory responsibility over a section or equivalent work unit if there is not a Biomedical Engineer at the facility. Typical duties may include: preparing work assignments, monitoring medical equipment life-cycle management performances of Biomedical Engineering/Healthcare Technology Management staff, conducting performance appraisals, and other technical and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. The supervisor assures compliance with accrediting agency and regulatory requirements; establishes and monitors the quality of the pre-analytical processes as part of the overall Biomedical Engineering service quality management program, and assures corrective action is initiated as needed. The supervisor assures orientation and competency assessment of assigned staff. The supervisor develops policies and procedures, manages document control, develops performance standards, position descriptions and functional statements. They may be responsible for professional and administrative management of an assigned area to include budget execution. The supervisor will maintain interdepartmental relations with other services to accomplish medical center goals.

j. Biomedical Equipment Support Specialist, GS-13 (VISN Level) or Biomedical Equipment Support Specialist (Geographical Regional Technical Specialist), GS-13

(1) Experience. At least one year of experience equivalent to the GS-12 grade level. Certification as a Project Manager highly desired but not required.

(2) Demonstrated Knowledge, Skills, and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to effectively communicate with professionals of varying levels of technical knowledge within multiple levels of the VHA organization.

(b) Ability to coordinate work across multiple settings, e.g., medical centers, VISNs.

(c) Knowledge of the codes and standards of VA, TJC, NFPA, AAMI, FDA, and AHA as they apply to the safety and operation of medical instrumentation.

(d) Knowledge related to the characteristics, capabilities, installation, and configuration of medical equipment and their associated networks.
(e) Ability to analyze regional technical issues and develop timely and economical solutions.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The incumbent supports medical technology systems in multiple facilities in a geographic region. The incumbent provides maintenance and technology management support to the facilities both remotely and on-site as needed. May participate in regional (e.g. VISN-wide) medical technology projects to provide technical and Biomedical Engineering expertise. The incumbent may provide input on healthcare technology to the regional High-Cost/High-Tech or other equipment committees. He/she is responsible for coordinating with the regional and facility stakeholders including but not limited to medical staff, clinical personnel, Biomedical Engineering, OI&T, Facilities Engineering, Patient Safety, Logistics, Contracting, and equipment manufacturers on procurement related or technical issues. Incumbent may provide technical support and/or advice to the national VHA Healthcare Technology Management Program Office as needed.

k. Biomedical Equipment Support Specialist, GS-13 (National Level)

(1) Experience. At least one year of experience equivalent to the GS-12 grade level. Certification as a Project Manager highly desired but not required.

(2) Demonstrated Knowledge, Skills, and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to recommend and review policies and/or directives regarding medical technology.

(b) Ability to effectively communicate and coordinate work across multiple settings, e.g. medical centers, VISNs, VACO.

(c) Knowledge of the codes and standards of VA, TJC, NFPA, AAMI, FDA, and AHA as they apply to the safety and operation of medical instrumentation.

(d) Knowledge related to the characteristics, capabilities, installation, and configuration of medical equipment and their associated networks.

(e) Ability to analyze national and VISN-level technical issues and develop timely and economical solutions.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The incumbent supports medical technology systems that span across multiple regions in the VHA organization. The incumbent provides maintenance and technology management support nationally across VHA both remotely and on-site as needed. He/she provides assistance and technical support to the regional BESS as needed. The incumbent participates in national workgroups and projects to provide technical and Biomedical Engineering expertise. Assists with drafting and reviewing national policies and procedures for VHA-wide implementation. The incumbent
may draft RFP (request for proposal) requirements; translating clinical needs into technical specifications. The incumbent may provide input on healthcare technology to the national Healthcare Technology Management Program Office on High-Cost/High-Tech requests. He/she is responsible for coordinating with national, regional and facility stakeholders including but not limited to medical staff, clinical personnel, Biomedical Engineering, OI&T, Facilities Engineering, Patient Safety, Logistics, Contracting, and equipment manufacturers on procurement related or technical issues.

5. DEVIATIONS

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will education requirements be waived.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health or designee in VHA Central Office prior to placement in the position.

Authority: 38 U.S.C. §§ 7402, 7403]
1. COVERAGE. The following are requirements for appointment of a Health Technician (Telehealth Clinical) in the Veterans Health Administration (VHA). These requirements apply to all VHA Health Technicians (Telehealth Clinical) in the General Schedule (GS)-0640 series.

2. DEFINITIONS

a. Appointing Official. The Human Resources Management Officer is delegated appointing authority, to process and authenticate notifications of personnel actions, and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

b. Approving Official. The Veterans Integrated Service Network (VISN) Director, Facility Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

c. Journey Level. The full performance level for this qualification standard is at the GS-6 grade level.

d. Creditable Experience. Candidates need to have knowledge of current Health Technician (Telehealth Clinical) Practice. To be creditable, experience must demonstrate the knowledge, skills, and abilities (KSAs) associated with a health care field or knowledge, skills, and abilities related to the current occupation. Experience satisfying this requirement may be paid or non-paid employment in the health care field.

e. Quality of Experience. Qualifying experience must be at a level comparable to the Health Technician (Telehealth Clinical) experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

f. Part-Time Experience. Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.

3. BASIC REQUIREMENTS

a. Citizenship. Citizen of the United States. After a determination is made that it is not possible to recruit qualified citizens, non-citizen personnel may be appointed on a temporary basis under authority of 38 U.S.C. 7405, without regard to the citizenship requirements of 38 U.S.C. 7402 or any other law prohibiting the employment of or payment of compensation to a person who is not a citizen of the United States. Candidates must meet all other requirements for the grade and position concerned.
b. **Experience and Education.**

(1) **Experience.** One year of experience in a health care field that demonstrates the applicant's ability to perform the work or provides an understanding of the work such as but not limited to a medical or clinical assistant (or technician) or health technician.

OR

(2) **Education.** Four academic years above high school leading to a bachelor's degree with courses related to the occupation.

OR

(3) **Experience/Education Combination.** Equivalent combination of experience and education are qualifying for entry level for which both education and experience are acceptable. Examples are listed below:

(a) Six months of experience in the health care field and two years of education above high school that included at least six semester hours in health care related courses such as, biological science, surgical technician courses, nursing assistant or other courses related to the position; or an associate's degree in a health care related field; or

(b) Six months of experience in the health care field and successful completion of a course for health care technicians, hospital corpsmen, or medical service specialists given by the U.S. Armed Forces.

c. **Certification.** None

d. **Grandfathering Provision.** All Health Technicians (Telehealth Clinical) employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series, and grade held. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation, but **may not** be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) If an employee who was retained (grandfathered) under this provision leaves that occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of re-entry to the occupation.

II-G50-2
4. GRADE DETERMINATIONS. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

a. Health Technician (Telehealth Clinical), GS-5 (Entry Level)

(1) **Experience or Education.** None beyond the basic requirements.

(2) **Assignment.** This is an entry level Health Technician (Telehealth Clinical) position. It is expected that the Health Technician (Telehealth Clinical) receive guidance from more experienced staff members and require frequent and direct supervision. Assignments associated with this position include, but are not limited to, schedule telehealth appointments using an electronic scheduling system; obtain and document patient history and pertinent clinical information in electronic medical records; prepares the telehealth room where the Health Technician (Telehealth Clinical) readies the equipment for examination, establishes video conferencing connection, makes introductions between patient site and provider site; monitors and maintains electronic schedule of rooms, patients, technologies, and presenters; administers the patient satisfaction survey; cleans and performs minor routine maintenance of assigned telehealth technology.

b. Health Technician (Telehealth Clinical), GS-6 (Full Performance Level)

(1) **Experience.** One year of experience equivalent to the next lower grade level

(2) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs.

(a) Comprehensive knowledge of computer systems and programs to perform a variety of tasks.

(b) Ability to communicate, consult, and interact with other members of the healthcare team, external relations, customer service and patient education.

(c) Ability to provide and receive guidance and technical direction.

(d) Ability to plan, organize, set priorities, work as a team member, and effectively complete assignments.

(e) Ability to read, interpret, and apply complex written instructions.

(f) Knowledge of general clinical policies and procedures in a healthcare environment.
(g) Skilled in the use of telehealth technologies for the facilitation of telehealth clinical encounters.

(3) **Assignment.** This is considered the full performance level for this assignment. The Health Technician (Telehealth Clinical) performs a full range of duties and is responsible for day-to-day operation of the Connected Care Services. Assignments at this level include, but are not limited to, screening patients for Telehealth modality and referring patients that do not meet established criteria to appropriate care; communicating effectively with administrative and professional staff, and obtaining assistance for issues that may arise or backlogs that cannot be resolved in a timely manner. Responsible for performing imaging duties in accordance with VHA national telehealth guidelines such as: capture and transmission of clinical images and/or data, obtains consent as necessary, generates consults according to established procedures for each telehealth specialty, transmits images or clinical data to the electronic medical record, provides patient education regarding general anatomy, disease processes and prevention as appropriate, and takes appropriate action based on the providers’ findings and recommendations. Responsible for facilitation of real-time Telehealth encounters by providing hands on assistance and reporting clinical observations under the direction of a licensed independent Practitioner or clinical specialist; schedules, confirms and coordinates Telehealth services between internal and external VA and non-VA sites; analyzes own work flow to determine potential problem areas and recommends corrective action to improve coordination between various units/facilities; has regular contact with the Facility Telehealth Coordinator to work out process issues, equipment needs, problems, data collection and any other logistical issues; responsible for conducting routine inventories and consistently tracking location/status of Telehealth technology located at assigned site; and communicates with National Telehealth Technology Help Desk to facilitate troubleshooting, repair, and coordination of replacement equipment as necessary.

c. **Health Technician (Telehealth Clinical), GS-7 (Advanced)**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs.

(a) Ability to use independent technical judgment to analyze, evaluate and resolve problems.

(b) Knowledge of quality control and assurance procedures and principles of performance improvement.

(c) Ability to function effectively between competing priorities.

(d) Knowledge of proper maintenance and troubleshooting of telehealth equipment.

(e) Ability to work with a team to provide technical guidance, plan, organize and coordinate activities of a health technician in order to effectively complete job duties of assignment such as distributing workload, monitoring the status and progress of work, monitoring accuracy of work.
(f) Ability to assist in Health Technician (Telehealth Clinical) development, outcome management and strategic planning.

(g) Ability to perform successful knowledge transfer regarding the use of telehealth technologies.

(3) **Assignment.** At the Advanced Health Technician (Telehealth Clinical) level, the incumbent will monitor and capture workload credit, develop reporting procedures and participate in performance improvement activities aimed at improving patient care access and Telehealth processes. This would include; sampling techniques, taking measurements at various points in the telehealth process; and develop and provide reporting procedures that identifies and analyzes inherent weaknesses in work and telehealth procedures. The incumbent will coordinate and work with Biomed and IT staff for the installation and upgrade of hardware and software for all telehealth technologies; will be responsible for advanced telehealth technical support to patients, staff and providers; provides technical consultation and support for staff and patients via phone, web chat, social media and face to face sessions; provides instruction, training and resources on the use of advanced telehealth technologies to patients, staff and providers alike for the delivery of care using telehealth technologies. For all assignments above the full performance level, the higher level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time.

d. **Lead Health Technician (Telehealth Clinical), GS-8**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs.

(a) Ability to work with a team to provide technical guidance, plan, organize and coordinate activities of a Health Technician (Telehealth Clinical) in order to effectively complete job duties of assignment such as distributing workload, monitoring the status and progress of work, monitoring accuracy of work.

(b) Skill in leadership and interpersonal relations and conflict resolution to deal with employees, team leaders, providers, and managers.

(c) Ability to communicate effectively in order to meet program objectives. This may include preparing reports in various formats and presenting data to various organizational levels.

(d) Knowledge of quality control and assurance procedures and principles of performance improvement.

(e) Skill in the assessment and resolution of complex workload capture issues using multiple data sources.

(f) Ability to develop and compose complex written instructions.

(g) Knowledge of analytical and evaluative processes to independently resolve complex issues.
(3) **Assignment.** The Lead Health Technician (Telehealth Clinical) provides an array of complex and specialized duties related to leadership, staff education, technology management, as well as project and program management related duties for all dimensions of virtual care and telehealth initiatives. Duties include: serves as an official team lead for telehealth staff; monitors and reports on the status of work to ensure that the supervisor’s instructions on work priorities, methods, deadlines and quality have been met; works with the supervisor to develop assignments for team members and distributes workload and tasks among employees in accordance with established workflows and specialized requirements, and provides information to the supervisor regarding all conduct and performance related achievements or concerns. The Lead Telehealth Clinical Technician is responsible for independently reviewing performance metrics to ensure telehealth operations are timely, effective and efficient. This includes the assessment and analysis of the impact, demand and utilization of telehealth services, the coordination of establishing telehealth clinics according to the Decision Support System and VHA guidelines, the monitoring of workload credit for interfacility workload credit and specialized encounters; responsible for the development or revision of diverse and complex standard operating procedures, and assisting stakeholders to develop new telehealth programs based on patient needs; serves in an official capacity as a telehealth preceptor and provides standardized training related to patient care, telehealth technology and quality assurance. This includes the facilitation of interactive simulations and referential documents, the assessment of competency of all clinical staff participating in telehealth programs and maintaining compliance with national VA standards established by the Office of Connected Care regarding training and operations. For all assignments above the full performance level, the higher level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time.

c. **Supervisory Health Technician (Telehealth Clinical), GS-9**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   (a) Ability to perform the full range of supervisory duties which includes responsibility for assignment of work to be performed, performance evaluations, selection of qualified staff, and recommendations of awards, advancements, and when appropriate disciplinary actions.

   (b) Ability to plan, organize, and coordinate clinical workflow and set short and long-term goals for the program.

   (c) Ability to work independently, to set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions to optimize quality, efficiency, performance, and productivity within the service.

   (d) Ability to develop policy, manage equipment requests, and provide workload analysis.

   (e) Knowledge of all Connected Care programs and operations.
(3) **Assignment.** At the supervisory level, in addition to the regular clinical and administrative duties of a Health Technician (Telehealth Clinical), the incumbent performs a full range of supervisory duties to include complex assignments and program management in the direct oversight of a team of Health Technicians (Telehealth Clinical). Supervisory duties will include: interviewing and selecting staff; assigning, amending or rejecting work; ensuring production and accuracy requirements are met; the development of performance plans including recommending performance standards and ratings, and conducting regular performance appraisals of staff. Additionally, the incumbent will respond to questions or matters not covered by standards and problems in meeting performance standards and effect corrective and disciplinary measures to address conduct and performance issues; responsible for the creation and modification of work schedules to meet anticipated and unanticipated changes in the workload and to oversee attendance and review and approve leave requests of direct reports ensuring adequate staff is available to perform all needed telehealth duties; involved in the development of policies and standard operating procedures, analyzing program workload, the acquisition and deployment of telehealth equipment. The incumbent will work independently to set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions to optimize quality, efficiency, performance, and productivity. For all assignments above the full performance level, the higher level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time.

5. **DEVIATIONS**

   a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee Health Technician (Telehealth Clinical) in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements on the proposed grade.

   b. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

**Authority:** 38 U.S.C. §§ 7402, 7403.
[APPENDIX G51. Genetic Counselor Qualification Standard
GS-0601
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Genetic Counselor (GC) in the Veterans Health Administration (VHA). These requirements apply to all VHA GCs in the GS-0601 General Health Science series. Genetic Counselors are health professionals with specialized graduate degrees and experience in the areas of medical genetics and counseling.

2. DEFINITIONS
   a. Appointing Official. The Human Resources Management Officer is delegated appointing authority to process and authenticate notifications of personnel actions, and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

   b. Approving Official. The Veterans Integrated Service Network (VISN) Director, Facility Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupation.

   c. Journey Level. The full performance level for this qualification standard is at the GS-11 grade level.

   d. Creditable Experience. To be creditable, experience must have required the use of Knowledge, Skills, and Abilities (KSA) (KSAs) associated with current professional Genetic Counseling practice. The experience must be post-master’s degree or above. Experience satisfying this requirement must be active professional practice, which is paid/non-paid employment as a professional Genetic Counselor.

   e. Quality of Experience. Experience is only creditable if it is obtained following graduation with a master’s or higher degree in Genetic Counseling from an accredited training program. Qualifying experience must also be at a level comparable to Genetic Counseling experience at the next lower grade level.

   f. Part-Time Experience. Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.

3. BASIC REQUIREMENTS
   a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part).
1. **b. Education.** Master’s degree or higher in genetic counseling from a program in the United States or Canada accredited by the Accreditation Council for Genetic Counseling (ACGC). Coursework typically includes clinical genetics, population genetics, cytogenetics and molecular genetics coupled with psychosocial theory, ethics, and counseling techniques. Clinical rotations in medical genetics centers approved by the ACGC are an integral part of the degree requirements. Individuals who graduated prior to 1993 must have graduated from a program accepted by the American Board of Genetic Counselors as equivalent for certification purposes at that time.

2.  
3. **c. Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials and such education must have been deemed at least equivalent to that gained in conventional U.S. programs.

4. **d. Licensure.** Persons hired or reassigned to Genetic Counselor positions in the GS-0601 series in VHA must hold a full, current, and unrestricted license to independently practice as a Genetic Counselor.

   (1) **Exception.** Non-licensed Genetic Counselors who otherwise meet the eligibility requirements may be given a temporary appointment as a graduate Genetic Counselor under the authority of 38 U.S.C. § 7405(c)(2)(B). The appointing official may waive the requirement of licensure for a period not to exceed two years for a Genetic Counselor who provides care under the supervision of a licensed Genetic Counselor at or above the full performance level. This exception only applies at the entry level (GS-9). For grade levels at or above the full performance level, the candidate must be licensed.

   (2) **Failure to Obtain License.** Failure to become licensed with a full and unrestricted license within two years from date of appointment will result in removal from the Genetic Counselor, GS-0601 series and may result in termination from the Veterans Health Administration.

   (3) **Loss of Licensure.** Once licensed, Genetic Counselors must maintain a full, valid, and unrestricted license to independently practice genetic counseling. Loss of licensure will result in removal from the GS-0601 Genetic Counselor occupation and may result in termination from the Veterans Health Administration.

   e. **Board Certification.** Persons hired or reassigned to Genetic Counselor positions in VHA must be board certified in the field of Genetic Counseling by the American Board of Genetic Counseling (ABGC). The board certification must be current and the applicant must abide by the certifying body's requirements for continuing education.

   (1) **Exception for Non-Board Certified, Entry Level Candidates.** Non-board certified Genetic Counselors designated by the certifying agency (e.g., American Board of Genetic Counseling) as “board eligible”, who otherwise meet the eligibility requirements, may be given a temporary appointment as a graduate Genetic Counselor under the authority of 38 U.S.C. § 7405(c)(2)(B). The appointing official may waive the requirement of certification for a period not to exceed two years for a Genetic Counselor who provides care under the supervision of a board certified Genetic Counselor at or above the full performance level. This exception only applies at the GS-9 grade/entry level. For grade levels at or
above the full performance level, the candidate must be board certified. Temporary appointments of non-board certified Genetic Counselor may not be extended beyond two years, or converted to a new temporary appointment.

(2) **Failure to Obtain Board Certification.** In all cases, uncertified Genetic Counselors must actively pursue obtaining board certification from the date of their appointment. At the time of appointment, the supervisor will provide the uncertified Genetic Counselor written notification of the requirement to become certified, including the date by which board certification must be obtained and the consequences for not becoming board certified by the deadline. Failure to obtain board certification by the prescribed date will result in removal from the GS-0601 Genetic Counselor series and will result in termination of employment.

(3) **Loss of Board Certification.** Once board certified, Genetic Counselors must maintain a full, valid and unrestricted board certification to remain qualified for employment. Loss of board certification will result in removal from the GS-0601 Genetic Counselor series and will result in termination of employment and may result in termination of employment.

f. **Grandfathering Provision.** All persons employed in VHA as a Genetic Counselor on the effective date of this qualification standard are considered to have met all qualifications requirements for the title, series and grade held, including education, licensure and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, all of the following apply:

(1) Such employees may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) Genetic Counselors who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education, licensure and/or certification that meet all the basic requirements of the qualification standard must maintain the required credentials as a condition of employment in the occupation.

(4) Genetic Counselors who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as a Genetic Counselor.

g. **Physical Requirements.** See VA Directive and Handbook 5019.

h. **English Language Proficiency.** Genetic Counselors must be proficient in spoken and written English in accordance with chapter 2, section D, paragraph 5a, this part.
3. GRADE REQUIREMENTS

   a. Creditable Experience.

      (1) **Knowledge of Current Genetic Counseling Practices.** To be creditable, the experience must have required the use of Knowledge, Skills, and Abilities (KSAs) associated with current professional Genetic Counseling practice. The experience must be post-master’s degree or above. Experience satisfying this requirement must be active professional practice, which is paid/non-paid employment as a professional Genetic Counselor.

      (2) **Quality of Experience.** Experience is only creditable if it is obtained following graduation with a master’s or higher degree in Genetic Counseling from an accredited training program. Qualifying experience must also be at a level comparable to Genetic Counseling experience at the next lower grade level. For all assignments above the full performance level, the higher level duties must consist of significantly larger scope, administrative independence, complexity (difficulty), and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

      (3) **Part-time Experience.** Part-time experience as a Genetic Counselor is credited according to its relationship to the full-time workweek. For example, a Genetic Counselor would receive one week of full-time credit for each two weeks of half-time work.

   b. Grade Determinations. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

      (1) **Genetic Counselor, GS-9 grade (Entry Level)**

         (a) **Experience, Education, and Licensure.** The entry level is used for Genetic Counselors who are recent graduates, not yet licensed and/or certified at the independent practice level or Genetic Counselors with less than one year of post-master’s degree experience.

         (b) **Assignments.** Individuals assigned as GS-9 grade level Genetic Counselors are considered to be at the entry level and are closely supervised, including co-signatures where required, as they are not functioning at the full performance level. Under supervision, Genetic Counselors at this level provide genetic counseling services.

         (c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** None other than basic requirements.

      (2) **Genetic Counselor, GS-11 (Full Performance Level)**

         (a) **Experience, Education, and Licensure.** In addition to the basic requirements, candidates must have at least one year of post-master’s degree genetic counseling experience;

         **OR**

         In addition to the basic requirements, a doctoral degree in clinical genetic counseling or a related field may be substituted for the required one year of professional genetic counseling experience.

II-G51-4
(b) **Assignments.** This is the full performance level for Genetic Counselors. At this level they are licensed to independently practice and provide genetic counseling services.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to meeting the entry level criteria candidate must demonstrate all of the KSAs below:

1. Oral and written communication skills to communicate the needs of different audiences (i.e., patients, referring providers, colleagues).

2. Ability to synthesize personal and family history, test results, and other pertinent information to determine the risk of conditions with a genetic component and make appropriate recommendations, including genetic testing, prevention, and screening options.

3. Ability to efficiently use primary resources (i.e., guidelines, webinars, journal articles) and secondary resources (i.e., GeneReviews) to identify, evaluate, and synthesize relevant scientific literature.

4. Ability to evaluate genetic test selection and methodology available at different laboratories, including the analytic validity, clinical validity, and clinical utility of a genetic test, and order germline genetic test.

5. Ability to select the best test strategies while balancing the various needs of stakeholders (i.e., VA pathology departments, the patient, the referring providers).

6. Knowledge of various federal and state regulations (i.e., documentation of informed consent) related to provision of care.

(3) **Genetic Counselor, GS-12 (Advanced Clinical Level)**

(a) **Experience, Education, and Licensure.** In addition to the basic requirements, candidates must have at least one year of progressively complex experience equivalent to the next lower grade level. Experience must have included a wide range of genetic counseling activities of advanced scope and complexity. Experience must demonstrate possession of advanced practice skills and judgment, demonstrating progressively more professional competency.

(b) **Assignments.** This is the advanced performance level for Genetic Counselors. Genetic Counselors at the advanced level may be responsible for specific clinical programs such as educational programming, clinical program evaluation and/or research activities. Genetic Counselors at this level demonstrate advanced knowledge of genetic conditions with specific expertise in targeted conditions. In addition, they can provide mentorship and education to students and newly hired genetic counselors.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to meeting the KSAs for the GS-11 level, the candidate must demonstrate all of the KSAs below:

1. Ability to organize, synthesize and select relevant clinical and programmatic information and effectively manage and organize time/priorities.
2. Advanced knowledge of genetic conditions, with specific expertise in targeted conditions.

3. Knowledge of, and ability to integrate, general learning/teaching principles.

4. Knowledge of national genetic counseling services, and most current methods and practices, as well as services available in VA, including program infrastructure and operations.

5. Ability to identify target audiences within and outside the VA for whom genetics educational material would be relevant.

6. Knowledge of educational resources available for genetic counselors as well as other medical specialties, as appropriate.

7. Ability to mentor/train genetic counseling students as well as newly hired genetic counselors.

(4) Genetic Counselor, GS-13 (Manager/Supervisor)

(a) Experience, Education and Licensure. In addition to the basic requirements, candidates must have at least one year of progressively complex experience equivalent to the next lower grade level. The experience must demonstrate possession of advanced practice skills and judgment, demonstrating progressively more professional competency. Candidates must also demonstrate possession of management/supervisory skills.

(b) Assignments. Genetic Counselor Supervisors manage the daily operations, develop and implement program policies and procedures, and/or serve as Chief or Principal Counselor to a number of Genetic Counselors. They have responsibility for staffing, work assignments, budget, ensuring availability and timeliness of clinical services to be provided, day-to-day program operation, and all reporting requirements. They monitor outcomes and prepare reports and statistics for national leadership. They have delegated authority to develop and implement work plans. They may serve as consultants to other management officials at the national level.

(c) Demonstrated Knowledge, Skills, and Abilities (KSA). In addition to meeting the KSAs for GS-12 grade level, the candidate must demonstrate all of the KSAs below:

1. Advanced knowledge of genetic practice guidelines and evidence-based practices and the ability to use these resources to make judgments and decisions associated with program management to guide program staff.

2. Ability to develop productivity standards for provision of services.

3. Knowledge and skill in management/administration which includes supervision, collaboration, and monitoring.

4. Ability to conduct outreach to create and foster collaborative relationships.

5. Strong public speaking and presentation skills.
(5) Genetic Counselor, GS-14 (Program Leadership Assignments) (VISN/National)

(a) **Experience, Education and Licensure.** In addition to the basic requirements, candidates must have at least one year of progressively complex experience equivalent to the next lower grade level. They must demonstrate possession of advanced practice skills in administration, with progressively more professional competency skills and judgment.

(b) **Assignments.** In addition to supporting Genetic Counselor Managers with daily operations, they oversee internal human and financial resources. They are responsible for oversight of administrative and programmatic resources across multiple facilities or at a national level. They may direct genetic counseling or organizational development at the national level. Their decisions may affect staff and other resources associated with the programs managed and are made while exercising wide latitude and independent judgment. They monitor outcomes and have delegated authority to determine long range work plans and assure that implementation of the goals and objectives are achieved. They may serve as consultants to other management officials at the national level.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to meeting the KSAs for GS-13 grade level, the candidate must demonstrate all of the KSAs below:

1. Demonstrated global knowledge of genetic counseling practice to develop, maintain and oversee programs.

2. Advanced knowledge and skill in management/administration of a wide range of programs, which involves the operation and management of key clinical, training, or administrative programs at complex facilities and/or across multiple sites, and includes consultation, negotiation, and monitoring.

3. Ability to provide consultation on policy implementation, qualification standards, counseling practice, and competency that are consistent with organizational goals and objectives.

4. Ability to influence high level officials in adoption of, and conformance to, performance measures, monitors, and other policy guidelines.

4. **DEVIATIONS**

   a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for Genetic Counselor in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements on the proposed grade.

   b. Under no circumstances will the certification, educational or licensure requirements be waived.

   c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

**Authority:** 38 U.S.C. §§ 7402, 7403]
[APPENDIX G52. HEALTH TECHNICIAN (OPHTHALMOLOGY)
QUALIFICATION STANDARD
GS-0640
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Health Technician (Ophthalmology) in the Veterans Health Administration (VHA). These requirements apply to all VHA Health Technicians (Ophthalmology) in the General Schedule (GS)-0640 series.

2. BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. Experience and Education

      (1) Experience. One year of experience in a health care field, such as but not limited to nursing, medical assistant, or health technician.

      OR

      (2) Education. Two years above high school with a minimum of six semester hours directly related to a health care field or associate’s degree in a health care related degree.

      OR

      (3) Experience/Education Combination. Equivalent combinations of experience and education are qualifying. Examples are listed below:

         (a) Six months of experience in the health care field; and one year above high school; or

         (b) Six months of experience in the health care field and successful completion of a course for health care technicians, hospital corpsmen, medical service specialists, or ophthalmology technicians given by the U.S. Armed Forces; or

         (c) Six months of experience in the health care field and completion of an independent study course in Ophthalmic Medical Assisting.

   c. Certification. All applicants must be certified as a Certified Ophthalmic Assistant (COA) with the Joint Commission on Allied Health Personnel in Ophthalmology (JCAHPO). The COA certification is JCAHPO’s entry-level certification examination for a Health Technician (Ophthalmology).

      (1) Exception. Non-certified applicants who otherwise meet the minimum qualification requirements may be appointed as a graduate Health Technician (Ophthalmology) under the authority of 38 U.S.C. 7405(c)(2)(B). The appointing official may waive the requirement of certification for a period not to exceed two years for a Health Technician (Ophthalmology) that provides care under the
supervision of an Ophthalmologist. The exception only applies below the full performance level. For grade levels at or above the full performance level the candidate must be certified. Failure to obtain COA certification during that period is justification for termination of the temporary appointment and may result in termination of employment.

(2) **Failure to Obtain Certification.** In all cases, the Health Technician (Ophthalmology) must actively pursue meeting certification requirements starting from the date of appointment. At the time of appointment, the supervisor will provide the uncertified Health Technician (Ophthalmology) with the written requirement to obtain certification, the date by which the certification must be acquired, and the consequences for not becoming certified by the deadline. Failure to become certified within two years from date of appointment will result in removal from the Health Technician (Ophthalmology), GS-0640 series and may result in termination of employment.

(3) **Loss of Credentials.** A Health Technician (Ophthalmology) who fails to maintain the required certification must be removed from the occupation, which may also result in termination of employment.

d. **Grandfathering Provision.** All persons employed in VHA as a Health Technician (Ophthalmology) on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including certification requirements. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

(2) Health Technicians (Ophthalmology) who were appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or certification that meet all the basic requirements of the qualification standard must maintain the required credentials as a condition of employment in the occupation.

(4) Health Technicians (Ophthalmology) who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. **Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials and such education must have been deemed at least equivalent to that gained in conventional U.S. programs.

g. **English Language Proficiency.** Health Technicians (Ophthalmology) must be proficient in spoken and written English as required by 38 U.S.C. 7402(d) and 38 U.S.C. 7407(d).

### 3. GRADE REQUIREMENTS

a. **Creditable Experience**

(1) **Knowledge of Current Health Technician (Ophthalmology) Practice.** To be creditable, the experience must have demonstrated the knowledge, skills, and abilities associated with a health care field or knowledge, skills, and abilities related to the current occupation. Experience satisfying this requirement may be paid or non-paid employment in the health care field.

(2) **Quality of Experience.** Qualifying experience must be at a level comparable to Health Technician (Ophthalmology) experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

(3) **Part-time Experience.** Part time experience as a Health Technician (Ophthalmology) is creditable according to its relationship to the full time work week. For example, a Health Technician (Ophthalmology) employed 20 hours per week, or on a ½ time basis, would receive one full-time work week credit for each two weeks of service.

b. **Grade Determinations.** In addition to the basic requirements for employment in section A, the following criteria must be met when determining the grade of candidates.

(1) **Health Technician (Ophthalmology), GS-5 (Entry Level)**

(a) **Experience or Education.** None beyond the basic requirements.

(b) **Assignment.** Employees at this grade level serve in a Health Technician (Ophthalmology) entry level position and are trainee in nature. The entry level performs limited routine assignments under daily direct supervision. Deviations from unanticipated problems and unfamiliar situations are referred to the supervisor for a decision or help. Obtains and records vital signs including blood pressure, pulse, and glucose levels. Participates in performance of quality assurance activities such as staff meetings, mandatory educational in-services, quality control reports, systems redesign, and team and morale improvement.

(2) **Health Technician (Ophthalmology), GS-6 (Developmental Level 1)**

(a) **Experience.** One year of experience equivalent to the GS-5 grade level.

(b) **Assignment.** The Health Technician (Ophthalmology) at this level operates and monitors commonly used equipment performing basic screening procedures. Assists ophthalmology staff by obtaining an accurate medical and ophthalmic history, measuring and recording visual acuity, administering anesthetic eye drops, performing basic tonometry, estimating the anterior chamber depth.
and recording a simple spectacle reading through automated lensometry. Deviations from regular procedures, unanticipated problems, complex patients and unfamiliar situations are referred to the supervisor for a decision or assistance. Some assignments at this level also include developmental duties involving more complex procedures performed under supervision.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of general outpatient clinical policies and procedures in a healthcare environment;

2. Ability to obtain, document and record demographic and medical information from patients in order to develop an accurate medical record;

3. Ability to use basic ophthalmic equipment; and

4. Knowledge of basic disinfection of non-critical reusable medical equipment.

(3) **Health Technician (Ophthalmology), GS-7 (Developmental Level 2)**

(a) **Experience.** One year of experience equivalent to the GS-6 grade level.

(b) **Assignment.** At this level, the Health Technician (Ophthalmology) performs the following: triages patient phone calls or requests; ensures exam rooms are stocked with adequate supplies; instructs patients on administration of eye drops and post-operative instructions; accurately measures, compares, and evaluates pupillary responses; administers eye drops to dilate pupils; performs basic color vision screening; performs visual field testing (using Amsler grid or automated equipment). Performs basic imaging testing such as corneal topography; external photography; performs basic ocular testing such as pachymetry, tear production with test strips, glare testing, stereo acuity, contrast sensitivity, potential acuity meter, measuring spectacles using both automated and manual lensometry and transposing cylinders. The employee assists the ophthalmologist during minor ophthalmic surgical procedures and is adept at applying sterile technique and infection control procedures. Performs autorefractor to determine spectacle prescription.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of anatomy and function of the eye and basic ocular pharmacology;

2. Knowledge of outpatient eye care policies and procedures in a health care environment;

3. Ability to use basic ophthalmic diagnostic equipment to perform preliminary ocular testing;

4. Ability to perform minor extraocular surgical assisting; and

5. Ability to provide eye care patient education.
(4) Health Technician (Ophthalmology), GS-8 (Full Performance Level)

(a) **Experience.** One year of experience equivalent to the GS-7 grade level.

(b) **Assignment.** This is considered to be the full performance level for this assignment. The Health Technician (Ophthalmology) at this level performs a range of standard, but complex, diagnostic procedures with responsibility for checking calibration of instruments prior to the procedure. Responsible for obtaining patient physical history, to include chief complaint; reason for visit; pertinent signs/symptoms; past history both ocular and general; family history both ocular and general; social history; and review of medications and allergies, including current ocular prescription and non-prescription medications. Accurately tests visual acuity at distance and near, with and without correction or with and without a pinhole. Measures eyeglass prescription using manual or automated lensometer, recording sphere, cylinder, axis, and prism in both plus and minus cylinder. Performs pupil evaluation recording pupil size, shape, symmetry, reaction to light and accommodation, and any abnormalities, including relative afferent pupillary defect. Performs basic refractometry utilizing an auto refraction or habitual glass prescription in the phoropter. Instills eye medications (i.e., drops or ointments, including anesthetic, dye, dilation, cycloplegic, or antibiotics. Responsible for measuring intraocular pressure of the eye utilizing techniques, including Goldmann applanation tonometry. Performs pachymetry to determine corneal thickness and manual keratometry or automated topography to determine corneal curvature. Performs intra-ocular lens calculations using the IOL Master. Performs automated visual field testing using various perimetry machines. Performance of external photographs and fundus photography. Performs optical coherence tomography (OCT) of the anterior segment, retina and optic nerve. Performs patient screening and triage emergencies identifying ocular emergencies. Performs patient screening and telephone triage for immediate care. Assists during clinic-based ophthalmic surgery, including revision of wounds, biopsies of the eyelid lesions, cultures of conjunctiva, or cornea; reformation of anterior chamber, evacuation of hyphema, repositioning of corneal endothelial grafts, intra-vitreous injections, and laser surgical procedures. Educates patients and legal authorized representatives in eye care, including preoperative and postoperative instructions. Assists in the education and training of medical students, residents and fellows in those facilities with medical school affiliations. Ensures proper cleaning and disinfection; calibration, maintenance, backup, annual inventory and ordering of instruments, supplies and equipment; obtains quotes as needed; and reports needed repairs to biomedical engineering.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to perform advanced tonometry and pupil evaluation;

2. Ability to perform calculations for selection of intraocular lens;

3. Knowledge of clinic based ophthalmic surgical assisting;

4. Knowledge of eye anatomy and physiology;

5. Knowledge of medication effects and proper instillation in the eye;

6. Knowledge of optics; and
7. Knowledge of proper cleaning and maintenance of clinic equipment.

(5) **Health Technician (Ophthalmology), GS-9 (Advanced Level)**

(a) **Experience.** One year of experience equivalent to the GS-8 grade level.

(b) **Assignment.** For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. At the advanced level, the Health Technician (Ophthalmology) performs difficult ophthalmic technical duties with considerable latitude for the exercise of independent judgment. Duties include but are not limited to: refractometry utilizing retinoscopy to determine spectacle prescription; kinetic visual field testing (Goldmann); intraocular pressure measurements by applation tonometry and other current methods; pupil evaluation recording pupil size, shape, symmetry, reaction to light and accommodation, and any abnormalities, including relative afferent pupillary defect; and basic slit lamp biomicroscopy evaluation to check for abnormalities prior to dilation (i.e.: anterior chamber depth/iris anomalies). The technician may perform advanced color vision testing of the entire visual spectrum to detect complex color vision defects such as monochromats, dichromats and anomalous trichromats. Measures eyeglass prescriptions using manual lensometer, recording sphere, cylinder, axis and prism in both plus and minus cylinder. Performs A-scan ultrasonography, including intra-ocular lens calculations, using immersion A-scan on eyes with complex pathology such as corneal scarring, irregular and/or high astigmatism, zonular weakness, high refractive error that requires multiple alternative calculating formulas. Performs B-scan ultrasonography to identify intraocular masses or abnormalities. Determines the corneal curvature by either manual keratometry or automated topography. Performs fluorescein or indocyanine green (icg) angiography, with diagnostic photography of retinal vessels. Performs slit lamp photography. May perform anterior segment OCT, confocal microscopy, electroretinography, electrooculography, and visual evoked potential. Assists in minor clinical surgical procedures, including laser surgery and intravitreal injections. Scrub technician assists in main OR surgical procedures, set up of sterile fields, operation and maintenance of phacoemulsification and vitrectomy units, cryosurgery, endolaser units, all of which require a thorough understanding of complex instrumentation and the ability to troubleshoot problems quickly and efficiently during surgical procedures and care of instruments. Assists with the microbiology testing of patients with sight-threatening ocular infections, preparing instrumentation and media for intraocular biopsy and/or culture. Performs thorough preparatory cleaning of critical reusable medical equipment in the operating room. Responsible for training other health technicians (ophthalmology).

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of advanced clinical optics, advanced ocular motility, advanced diagnostic testing, and microbiology testing;

2. Knowledge of ophthalmic surgical instruments;

3. Knowledge of appropriate preparatory cleaning of reusable medical equipment; and
4. Ability to assist in ophthalmic surgical procedures performed in the main operation room.

(6) **Lead Health Technician (Ophthalmology), GS-9**

(a) **Experience.** One year of experience equivalent to the GS-8 grade level.

(b) **Assignment.** For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The Lead Health Technician (Ophthalmology) carries additional responsibilities that involve the oversight of specific services within the ophthalmology clinic. The Lead Health Technician (Ophthalmology) may assist with technician oversight duties including: making work assignments, monitoring work flow, providing input on performance, resolving daily workplace issues, and maintaining efficient flow of patient care. They may provide training to eye care staff, students and/or trainees; and may provide input into special advancements, promotions, and disciplinary actions.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to work with a team to provide technical guidance, plan, organize, and coordinate activities of a Health Technician (Ophthalmology) in order to effectively complete job duties of assignment such as distributing workload, monitoring the status and progress of work, monitoring accuracy of work, etc.;

2. Ability to communicate effectively in order to meet program objectives. This may include preparing reports in various formats and presenting data to various organizational levels;

3. Ability to assist in Health Technician (Ophthalmology) development, outcome management, and strategic planning; and

4. Ability to act as liaison between Health Technicians (Ophthalmology) to resolve informal employee complaints and concerns.

(7) **Supervisory Health Technician (Ophthalmology), GS-9**

(a) **Experience.** One year of experience equivalent to the GS-8 grade level.

(b) **Assignment.** For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. Supervisory Health Technicians (Ophthalmology) at the GS-9 grade level generally are found in Complexity Level 2 (Medium Complexity) or Complexity Level 3 (Low Complexity) facilities. Supervisors may perform other complex ancillary assignments and program management duties such as overseeing the integration between ophthalmic medical devices and the electronic medical record system, serving as the point of contact and lead for the Eye Care electronic health record and serving as the liaison between other departments and services. The supervisory Health Technician
(Ophthalmology) is responsible for the supervision, administrative management, and direction of Health Technician (Ophthalmology) auxiliary staff. May be delegated full administrative and professional responsibility for planning and directing the Health Technician (Ophthalmology) staff activities for the service or equivalent unit at an independent outpatient clinic. Has full supervisory responsibility over a section or equivalent work unit. Typical duties include preparing work assignments, monitoring clinical performances of Health Technician (Ophthalmology) staff, conducting performance appraisals, and other clinical and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. The supervisor assures compliance with accrediting agency and regulatory requirements, establishes and monitors the quality of the pre-analytical processes as part of the overall Health Technician (Ophthalmology) service quality management program, and assures corrective action is initiated as needed. Assures orientation and competency assessment of assigned staff, and supervises interactions of Health Technicians (Ophthalmology) with affiliate ophthalmology residents. Develops policies and procedures, manages document control, develops performance standards, position descriptions and functional statements, and is responsible for professional and administrative management of an assigned area to include budget execution. Maintains interdepartmental relations with other services to accomplish medical center goals. May have overall responsibility for planning, assessing, and evaluating programs to ensure proper coordination between care delivered by the program and overall delivery of healthcare within the facility, or coordination of non-VA care as appropriate.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Demonstrated leadership and managerial skills, and skills in interpersonal relations and conflict resolution to deal with employees, team leaders, providers, and managers;

2. Ability to perform the full range of supervisory duties, which includes responsibility for assignment of work to be performed; performance evaluations; selection of qualified staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions; and

3. Ability to plan, organize, coordinate clinical work flow, set short and/or long term goals for the section, and conduct studies on technical and administrative problems, including personnel shortages, organizational structure, and new technology.

(8) **Supervisory Health Technician (Ophthalmology), GS-10**

(a) **Experience.** One year of experience equivalent to the next lower grade level.

(b) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Supervisory Health Technicians (Ophthalmology) at the GS-10 grade level generally are found in Complexity Level 1 (High Complexity) facilities, or in facilities of lesser complexity levels where large ophthalmology services are found. Supervisors may perform other complex assignments and program management duties such as overseeing the integration between ophthalmic medical devices and the electronic medical record system. The Supervisory Health Technician (Ophthalmology) is responsible for the supervision, administrative management, direction of
ophthalmology staff, and supervises interactions of Health Technicians (Ophthalmology) with affiliate ophthalmology residents. May be delegated full administrative and professional responsibility for planning and directing the ophthalmology staff activities for the service or equivalent unit at an independent outpatient clinic. Has full supervisory responsibility over a section or equivalent work unit. Typical duties include preparing work assignments, monitoring clinical performances of ophthalmology staff, volunteers, and/or students, conducting performance appraisals, and other clinical and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. Assures compliance with accrediting agency and regulatory requirements, and the quality management program, assuring corrective action is initiated as needed. Assures orientation and competency assessment of assigned staff. Develops policies and procedures; manages document control; develops performance standards, position descriptions and functional statements; and is responsible for professional and administrative management of an assigned area to include budget execution. Maintains interdepartmental relations with other services to accomplish medical center goals. May have overall responsibility for planning, assessing, and evaluating programs to ensure proper coordination between care delivered by the program and overall delivery of healthcare within the facility, or coordination of non-VA care as appropriate.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to meeting the all KSAs for the GS-10 grade level, the candidate must demonstrate the potential to acquire the assignment-specific KSA designated by an asterisk (*).

1. Ability to work independently to set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions to optimize quality, efficiency, performance, and productivity within the service;

2. Ability to develop policy, manage equipment requests, and provide workload analysis in Ophthalmology Service;

3. Demonstrated leadership and managerial skills including skill in interpersonal relations and conflict resolution to deal with employees, team members, managers and other departments; and

*4. Ability to perform the full range of supervisory duties which includes responsibility for assignment of work to be performed; competency assessments; performance evaluations; selection of staff; and recommendation of awards, advancements, and when appropriate, disciplinary actions.

(9) **Health Technician Program Coordinator (Ophthalmology), GS-11**

(a) **Experience.** One year of experience equivalent to the GS-10 grade level.

(b) **Assignment.** For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The Program Coordinator is generally found in Complexity Level 1 (High Complexity) facilities, or in facilities of lesser complexity levels where large ophthalmology services are found. Has full responsibility for managing the day to day activities of the clinic and may supervise all phases of a
facility specialty program. These duties include but are not limited to promoting health education for patients and staff; patient care coordination; referral and consults, oversight of surgery scheduling and coordination; preceptor and mentorship of personnel; quality improvement activities; patient advocate; polytrauma liaison for all ophthalmology issues, and participation in and coordination of approved research projects. Responsible for the overall technical and administrative oversight for operations within their program area to include coordination with multidisciplinary team members, as well as liaison with other sections that support ophthalmology care, such as Nursing Service, Telephone Care, Sterile Processing Service, Pharmacy, and Infection Control. Typically these duties include assigning and evaluating the work of subordinate staff; resolving problems which may interfere with patient examination or treatment; providing Health Technician (Ophthalmology) services in more complex and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads. At this level, assignments include intrafacility, interfacility and interagency coordination of care, triage and coordination of urgent ophthalmic patients, program evaluation and analysis, budgetary issues and planning. Assures orientation and competency assessment of assigned staff and maintains interdepartmental relations with other services to accomplish medical center goals. Plans and develops policies, procedures and goals, interprets, implements and educates staff on applicable VHA directives, handbooks, or other policies. Has overall responsibility for planning, assessing, and evaluating programs to ensure proper coordination between care delivered by the program and overall delivery of healthcare within the facility, or coordination of non-VA care as appropriate.

(c) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to perform the full range of supervisory duties, which includes responsibility for assignment of work to be performed; competency assessments; performance evaluations; selection of staff; and recommendation of awards, advancements, and when appropriate, disciplinary actions;

2. Ability to analyze clinically appropriate data and make recommendations to optimize quality, efficiency, performance, and productivity within service;

3. Advanced understanding of interdisciplinary issues and VA organizational structure to serve as liaison between eye care and other programs that would affect coordination of care, healthcare access, program evaluation, assessment and planning for future needs; and

4. Demonstrated leadership and managerial skills in interpersonal relations and conflict resolution to deal with employees, team leaders, providers and managers.

4. **DEVIATIONS**

   a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for Health Technicians (Ophthalmology) in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.
b. Under no circumstances will the requirement for certification at the full performance level or above be waived.

c. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

APPENDIX G53. ACUPUNCTURIST QUALIFICATION STANDARD
GS-0601
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as an Acupuncturist in the Veterans Health Administration (VHA). These requirements apply to all VHA Acupuncturists in the general schedule (GS) 0601 series. Acupuncture is a modality used to treat a wide range of conditions, used alone or as an adjunct to other treatment modalities. Acupuncture is the stimulation of specific points along the skin of the body using thin needles. It can be associated with the application of heat, pressure, or laser light to these points.

2. DEFINITIONS
   a. **Appointing Official.** The Human Resources Management Officer is delegated appointing authority, to process and authenticate notifications of personnel actions, and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.
   
   b. **Approving Official.** The Veterans Integrated Service Network (VISN) Director, Facility Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.
   
   c. **Journey Level.** The full performance level for this qualification standard is GS-11.
   
   d. **Creditable Experience.** To be creditable, the experience must have required the use of Knowledge, Skills, and Abilities (KSA), (KSAs) associated with acupuncture. The experience must be post-master’s degree or higher.
   
   e. **Part-Time Experience.** Part-time experience as a professional acupuncturist is creditable according to its relationship to the full-time work week. For example, an acupuncturist employed 20 hours per week, or on a half time basis, would receive 1 full-time workweek of credit for each 2 weeks of service.
   
   f. **Master’s level program.** Degree-granting authority is authorized by relevant state regulatory authorities. The Accreditation Commission for Acupuncture and Oriental Medicine (ACAOM), the accrediting agency recognized by the U.S. Department of Education for accreditation is aware that some states may not presently authorize the awarding of a professional master's degree in acupuncture or Oriental medicine. In addition, certain states have different levels of degree-granting authority and institutional operation. Because state degree-granting authority is not under the Commission's control, the Commission deliberately does not base its scope upon the awarding of such a degree but rather upon the education and training at that "level" of instruction. An institution that offers a coherent professional program at the master's...
degree level is eligible to seek accreditation whether or not it is located in a state that permits the institution to grant a professional master’s degree.

3. BASIC REQUIREMENTS

a. Citizenship. Citizen of the United States. After a determination is made that it is not possible to recruit qualified citizens, necessary personnel may be appointed on a temporary basis under authority of 38 U.S.C. 7405 without regard to the citizenship requirements of 38 U.S.C. 7402 or any other law prohibiting the employment of or payment of compensation to a person who is not a citizen of the United States. Candidates must meet all other requirements for the grade and position concerned.

b. Education. Individual must meet one of the requirements below:

(1) Master’s degree in acupuncture or oriental medicine from a program accredited by the Accreditation Commission for Acupuncture and Oriental Medicine (ACAOM).

OR

(2) Advanced level degree in acupuncture or oriental medicine from a program accredited by the Accreditation Commission for Acupuncture and Oriental Medicine (ACAOM).

c. Foreign Graduates. Graduates of foreign acupuncture programs meet the requirements in subparagraph 3b if they have a full unrestricted and current license to practice acupuncture in a State, Territory or Commonwealth of the United States, or in the District of Columbia.

d. Certification. Acupuncturists hired in the VHA must be board certified through the National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM). The board certification must be current and the acupuncturist must abide by the certifying body's requirements for continuing education.

e. Loss of Certification. An acupuncturist who fails to maintain the required certificate must be removed from the occupation, which may result in termination of employment. At the discretion of the appointing official, an employee may be reassigned to another occupation if qualified and if a placement opportunity exists.

f. Licensure. Current, full, active, and unrestricted license to practice acupuncture in a State, Territory or Commonwealth (i.e. Puerto Rico) of the United States, or District of Columbia.

g. Loss of licensure. An acupuncturist who fails to maintain the required license must be removed from the occupation, which may result in termination of employment. At the discretion of the appointing official, an employee may be reassigned to another occupation if qualified and if a placement opportunity exists.
h. **Grandfathering Provision.** All persons employed in VHA in this occupational series or in another occupational series that are performing the duties as described in this qualification standard on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following apply:

1. Such employees may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

2. Acupuncturists who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

3. Acupuncturists who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as an acupuncturist.

i. **Physical Requirements.** See VA Directive and Handbook 5019.

j. **English Language Proficiency.** Candidates will not be appointed under authority of 38 U.S.C. chapters 73 or 74, to serve in a direct patient-care capacity in VHA who are not proficient in written and spoken English. See Chapter 2, section D, paragraph 5a, this part.

4. **GRADE REQUIREMENTS**

a. **Creditable Experience**

   1. **Knowledge of Acupuncture Practices.** To be creditable, the experience must demonstrate possession of Knowledge, Skills, and Abilities (KSA) associated with current professional acupuncture practice. The experience must be post-master’s degree or above.

   2. **Quality of Experience.** Experience is only creditable if it is obtained following graduation with a certificate, masters or doctoral degree in Acupuncture or Oriental Medicine from an accredited training program. Creditable experience must include work as a professional licensed acupuncturist. Qualifying experience must also be at a level comparable to acupuncture experience at the next lower grade level. For all assignments above the full performance level, the higher level duties must consist of significantly larger scope, administrative independence, difficulty and range of variety and described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

b. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:
(1) **Acupuncturist, GS-9 (Entry Level)**

(a) **Experience.** None beyond the basic requirements.

(b) **Assignments.** Individuals at this grade level are considered to be entry level and are closely supervised. The employee works under the direction of a journey level or higher acupuncturist or other health care providers licensed to perform acupuncture. The acupuncturist provides professional services in accordance with the established treatment plan. Deviations from regular procedures, unanticipated problems, and unfamiliar situations are referred to more experienced staff for a decision or assistance.

(2) **Acupuncturist, GS-11 (Full Performance Level)**

(a) **Experience or Education:** Individual must meet at least one of the requirements below:

1. **Experience.** In addition to the basic requirements, must have one year of creditable experience equivalent to the GS-9 grade level, which is directly related to the position to be filled.

   OR,

2. **Education.** Doctoral degree or equivalent degree from an accredited college or university in an acupuncture or oriental medicine.

(b) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   1. Ability to screen referrals and direct veterans to other services as appropriate.

   2. Ability to formulate an appropriate differential diagnosis.

   3. Ability to formulate an acupuncture treatment plan independently or with other health care professionals.

   4. Ability to educate patients on health lifestyle changes including nutrition, exercise, sleeping habits, stress management, mind body techniques and other matters related to acupuncture care. This includes the ability to communicate with individuals of varying backgrounds.

   5. Skill in the selection and use of the appropriate acupuncture tools and supplies based on needs of the patient.

(c) **Assignment.** Acupuncturists at this level review and triage acupuncture referrals. The incumbent serves as a member of an interdisciplinary team providing acupuncture treatment as well as further coordination of care for patients referred for acupuncture services. The acupuncturist analyzes medical histories and physical findings to formulate a differential diagnosis based on oriental and western medicine paradigms. Duties include the design and oversight of acupuncture treatment plans as well as a full range of acupuncture services, monitoring the accuracy of needle placement during a treatment. The incumbent communicates with patients about any abnormal or unexpected results or responses to
treatment and advises patients regarding lifestyle changes including nutrition, exercise, sleeping habits, stress management, mind body techniques and other matters related to acupuncture care. The acupuncturist may submit referrals and requests for devices, materials and appliances available and commonly used by the acupuncture profession. Duties include documentation of information related to patient care including assessment, diagnosis, treatment, response to treatment, plan of care, and patient education as well as identification and documentation of appropriate coding for each patient encounter. The acupuncturist provides information regarding the patient consultation to other health care providers. The incumbent manages clinical workload demands. The incumbent serves as a mentor to new staff or less experienced staff and students.

3) **Acupuncturist, GS-12 (Advanced Level)**

   (a) **Experience.** In addition to the basic requirements, completion of a minimum of one year of progressively complex experience equivalent to the GS-11 grade level.

   (b) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   1. Skill and ability to perform safe and effective advanced acupuncture techniques.

   2. Knowledge of complex issues surrounding the delivery of care as it relates to acupuncture services, such as evidence based and cost effectiveness.

   3. Ability to apply and adapt acupuncture to new and changing programs.

   4. Knowledge of research strategies, methodologies and principles.

   5. Ability to problem solve issues surrounding delivery of acupuncture.

   (c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, range of variety, and be performed by the incumbent at least 25% of the time. Employees at this level carry out assigned tasks independently in all areas of acupuncture which substantially exceed the full performance level and require advanced knowledge in all areas of acupuncture. Regardless of the nature of the specific assignment, the work must be of sufficient scope and complexity to meet the Knowledge, Skills, and Abilities (KSA) to perform at this grade level. The advanced level acupuncturist serves as the leader of an interdisciplinary team to provide evaluation, monitoring, planning, and coordination of care of patients for acupuncture services. At this level of employment, the acupuncturist provides advanced acupuncture techniques that may include but are not limited to injections at acupuncture points. Duties include participation in case reviews and treatment plan discussions, demonstrating advanced knowledge of techniques and discussion of theory, as well as promoting and maintaining communication with staff and others. The acupuncturist participates in the creation of new programs or interventions that may include group acupuncture, combining acupuncture with other interventions, and expansion of acupuncture care into new populations or new settings. The incumbent works with others on improvement projects to discover, examine and test knowledge, theories, and innovative Oriental Medicine approaches. The advanced level acupuncturist may participate in clinical research projects that strengthen the scientific
basis of acupuncture and related complementary and alternative medical treatments. Duties include the participation in teaching principles of acupuncture to staff, students and residents including journal clubs, grand rounds and in-service trainings. The incumbent provides assistance as needed for issues or problems that arise in relation to the acupuncture practice or service and serves as a preceptor to new staff or less experienced staff and students. The advanced level acupuncturist serves as an advisor to leadership on issues pertaining to acupuncture.

(4) **Supervisory Acupuncturist, GS-12**

(a) **Experience.** In addition to the basic requirements, completion of a minimum of one year of experience equivalent to the GS-11 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all the following KSAs:

1. Ability to perform the full range of supervisory duties including: responsibility for work assignments; competency assessments; performance evaluations; selection of staff; and recommendation of awards, advancements, and when appropriate, disciplinary actions.

2. Ability to analyze organizational and operational problems to develop and implement solutions that result in efficient operations and use data effectively to manage workload, quality, performance, productivity within the service.

3. Knowledge of how acupuncture integrates with other healthcare disciplines.

4. Ability to analyze clinical data and make recommendations for corrective actions to optimize quality, efficiency, performance, and productivity within service keeping in line with accrediting bodies and policy.

5. Knowledge related to administrative functions such as, material, supply, and equipment management.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, range of variety, and be performed by the incumbent at least 25% of the time. Supervisory acupuncturists demonstrate professional and scientific expertise in order to provide therapeutic clinical acupuncture procedures. The supervisor may have overall responsibility for planning, assessing and evaluating programs to ensure proper coordination between care delivered by the program and overall delivery of healthcare within the facility, or coordination of non-VA care as appropriate. The supervisory level acupuncturist oversees an Acupuncture Program including an outpatient clinic where patients are seen for initial visits and follow-up care. The incumbent facilitates collaboration with other specialties and disciplines maintaining interdepartmental relations in the planning and provision of acupuncture services to accomplish Medical Center goals. Duties include preparing work assignments, monitoring clinical performances, conducting performance appraisals, developing performance standards, as well as other clinical and administrative responsibilities. Duties include tracking of outcome data and patient satisfaction data to ensure that trends are analyzed and monitored, preparing appropriate administrative reports and quality assurance
reviews. The supervisory level acupuncturist assists in developing, analyzing, integrating, monitoring, and managing acupuncture service care delivery and associated data to promote quality and cost-effective outcomes across the continuum. The acupuncturist demonstrates consideration of costs and benefits in the selection of resources, services, and products for patients, analyzing resource utilization and workload data for strategic decision making. The acupuncturist demonstrates leadership in quality improvement activities for the clinic operations and is responsible for applying problem solving skills. The incumbent supervises clinical research projects that strengthen the scientific basis of acupuncture and related complementary and alternative treatments. The acupuncturist obtains assistance from leadership as needed for problems or issues that arise as well as routinely apprising leadership of situations that may require higher level interventions and/or actions. The supervisor assures compliance with accrediting agencies, regulatory requirements, and the quality management program, assuring corrective action as needed.

(5) **Acupuncturist Program Coordinator, GS-13**

(a) **Experience.** In addition to the basic requirements, completion of a minimum of one year of progressively complex experience equivalent to the GS-12 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to analyze organizational and operational problems to develop and implement solutions that result in efficient operations and use data effectively to manage workload, quality, performance, and productivity within the service.

2. Broad knowledge of how healthcare disciplines and other modalities integrate.

3. Ability to plan, organize, and integrate clinical work flow, set short and/or long term goals for the program, and conduct studies on technical and administrative problems, including personnel shortages, organizational structure, and new technology.

4. Knowledge of quality improvement process.

5. Ability to conceptualize, define, plan and implement new programs.

6. Ability to apply current research findings and standards of care in the health care setting.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, range of variety, and be performed by the incumbent at least 25% of the time. The incumbent is responsible for developing, analyzing, integrating, monitoring, and managing healthcare delivery systems through communication and use of resources to promote high-quality, cost-effective outcomes across the continuum. The incumbent provides executive/upper level leadership and exceptional experience in dealing with complex and challenging professional, scientific, and technical acupuncture issues that arise. The program manager is responsible for assessing, evaluating, and developing programs to ensure proper coordination of care delivered by the program with the overall delivery of healthcare within an individual facility or with non-VA
providers as appropriate. The incumbent serves as a subject matter expert to resolve problems at a lower level as necessary. The program coordinator provides oversight for clinical workflow, including, but not limited to, tracking outcome data, patient satisfaction data, monitoring work productivity, and ensuring trends are routinely analyzed. The incumbent performs a cost-benefit analysis during the selection of resources, services, and products, requesting the aforementioned as necessary; reviews and prioritizes resource utilization to develop and maintain a budget. The program coordinator presents administrative reports, quality assurance reviews and quarterly reports to reflect strategic goals. The program manager demonstrates leadership in quality improvement activities for program operations and develops new programs as needs arise. The incumbent supports clinical research projects by providing resources as needed. The program coordinator incorporates research findings into clinical practice and program development. The incumbent develops, reviews, updates, and implements educational materials to meet the needs of the veterans, the general public, and other professionals. The incumbent assures program compliance with accrediting agencies, regulatory requirements, and quality management programs, taking corrective action where necessary.

5. DEVIATIONS

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the education, certification or license requirements be waived for any grade level.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health or designee in the VHA Central Office prior to placement in the position.

Authority 38 U.S.C. 7402, 7403]
APPENDIX G54. REGISTERED RADIOLOGIST ASSISTANT
QUALIFICATION STANDARD
GS-0601
Veterans Health Administration

1. COVERAGE. The following are the requirements for appointment as a Registered Radiologist Assistant (RRA) in the Veterans Health Administration (VHA). These requirements apply to all VHA RRAs in the GS-0601 series.

2. DEFINITIONS.

a. Appointing Official. The Human Resources Management Officer is delegated the appointing authority to process and authenticate notifications of personnel actions, and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

b. Approving Official. The Veterans Integrated Service Network (VISN) Director, Facility Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in hybrid occupations.

c. Journey Level. The full performance level for this qualification standard is at the GS-9 grade level.

d. Creditable Experience. To be creditable, experience must have demonstrated possession of the knowledge, skills, abilities, and other characteristics (also referred to as clinical competencies) associated with current radiologist assistant practices. The experience may have been evidenced by the equivalent of one year of active practice, which is paid or non-paid employment as an RRA, as defined by the American Registry of Radiologic Technologists (ARRT).

e. Quality of Experience. Experience is only creditable if it was earned after completing an ARRT approved radiologist assistant program with a minimum of a Bachelor’s degree. The experience may be acquired under a temporary appointment while seeking ARRT RRA certification.

f. Part-Time Experience. Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.

3. BASIC REQUIREMENTS.

a. Citizenship. Be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g this part.)
b. **Education.** Completion of a Radiologist Assistant program, and a bachelor's degree approved by the ARRT.

c. **Credentialing Standards.** Public Law 97-35, the Consumer-Patient Radiation Health and Safety Act of 1981, requires that persons who administer radiologic procedures meet the credentialing standards in 42 C.F.R. Part 75 - Standards for the Accreditation of Educational Programs and the Credentialing of Radiographic Personnel. Applicants must have successfully completed an educational program that meets or exceeds the standards described in that regulation, and is accredited by an organization recognized by the Department of Education, and be certified as radiographer (RT). Except as noted below, applicants must also have passed the ARRT exam and obtained Registered Radiologist Assistant (RRA) certification.

(1) **Exception for Non-Certified, Entry Level Candidates.** Non-certified RRAs, who otherwise meet the eligibility requirements for the ARRT radiologist assistant certification, may be given a temporary appointment under 38 U.S.C. § 7405 (c)(2)(B), as a graduate RRA. The appointing official may waive the requirement of certification for a period not to exceed two years for a graduate RRA, under the supervision of a physician. This exception only applies at the GS-7 grade level. For grade levels above the GS-7 grade level, the candidate must be a certified RRA. Temporary appointments of non-certified RRAs as described in this section may not be subsequently converted or reappointed to a new temporary appointment as a graduate RRA.

(2) **Failure to Obtain Certification.** In all cases, the registered radiologist assistant must actively pursue meeting certification requirements starting from the date of appointment. At the time of appointment, the supervisor will provide the non-certified RRA with the written requirement to obtain certification, the date by which the certification must be acquired, and the consequences for not becoming certified by the deadline. Failure to become certified within two years from the date of appointment will result in removal from the registered radiologist assistant, GS-0601 series and may result in termination of employment.

(3) **Loss of Credential.** An employee in this occupation, who fails to maintain the required certifications (ARRT and RRA), must be removed from the occupation, which may also result in the termination of employment.

d. **Foreign Education.** Foreign education is vetted and approved by ARRT as a pre-requisite for certification. No additional documentation or verification of foreign education is required for applicants fully certified by ARRT.

e. **Grandfathering Provision.** None

g. **English Language Proficiency.** Candidates will not be appointed under the authority of 38 U.S.C. chapters 73 or 74, to serve in a direct patient-care capacity in VHA who are not proficient in written and spoken English. See Chapter 2, section D, paragraph 5a, this part.

4. **GRADE REQUIREMENTS.**

a. **Specialized Assignments.** Specialized areas of a registered radiologist assistant include: patient assessment and management following electronic health record (EHR) review and documentation, selected procedures (invasive and non-invasive) using fluoroscopy, computed tomography (CT), diagnostic ultrasound (sonography) and cardiovascular (CV) interventional procedures, and quality management (QM). These specialized assignments are done under the general supervision of a radiologist or similarly-privileged physician who is qualified to supervise the RRA.

(1) **Patient Assessment and Management.** The RRA performs procedures and examinations in hospitals and/or clinics under the general supervision of a radiologist and/or other physician. The RRA reviews the patients EHR and may directly question the patient to achieve the knowledge for determining the procedure and/or exam which best obtains a medical diagnosis for the clinician. This is achieved following the American College of Radiology (ACR) and other established standards for ordering exams. RRAs may perform and document a radiology-focused physical examination, including the analysis of available data (signs and symptoms, laboratory values, vital signs) to report to the radiologist, to ensure the patient meets the criteria to safely have the procedure. The RRA provides pre- and post-care instructions to the patient and documents the procedure and post-procedure evaluations in the EHR. Patient admission and/or discharge summaries are reviewed and cosigned by the radiologist or other supervising physician.

(2) **Fluoroscopy.** Following VA, State, and Federal requirements, the RRA uses fluoroscopy to visualize and image the anatomy while acting as the fluoroscoper for routine exams under the general supervision of the radiologist or other supervising physician. This modality is also used by the RRA during interventional procedures under the direct supervision of the radiologist and or other supervising physician.

(3) **Diagnostic Ultrasound (Sonography).** Diagnostic ultrasound uses high frequency sound waves to produce images. The RRA must be competent in the use, recognition, and analysis of ultrasound images for patient diagnosis and treatment, as they pertain to the performance of invasive procedures.

(4) **Computed Tomography (CT).** This specialty modality requires specific knowledge of cross sectional human anatomy and its application in computed tomography, inclusive of 3-D reconstruction scans. The RRA requires specific knowledge and training to understand the functioning and inter-relationship of the various organs; to use the methods and techniques which will identify organs appearing on the digital display monitor (or on film); and the various stages of the examination to judge the...
acceptability of the image and/or scan for diagnostic use. CT may be utilized for drainages, biopsies, peripheral vasculars, and other image-guided procedures, complex and non-complex, under the direct supervision of the radiologist or other supervising physician. Performance of and assistance with CT-guided procedures may be accomplished by RRAs without advanced modality certification; however, independent operation of the CT scanner requires Advanced ARRT certification in CT.

(5) **Cardiovascular-Interventional Technology.** RRAs performing and/or assisting with complex vascular interventional and therapeutic procedures use highly specialized equipment. This specialty requires additional knowledge of the vascular system and major vessel anatomy.

(6) **Quality Management.** The RRA must have the skills and knowledge to evaluate images for completeness and diagnostic quality, and recommend additional images as appropriate, for the procedure and/or diagnosis. The RRA must participate and contribute to quality improvement activities/projects in the Imaging Service.

b. **Grade Determinations.** In addition to the basic requirements for appointment, the following criteria must be used when determining the appropriate grade assignment of candidates:

1. **Registered Radiologist Assistant, GS-7**
   - (a) **Experience.** None beyond the Basic Requirements.
   - (b) **Assignment.** RRAs at this level operate and monitor equipment, such as fluoroscopy and CT, to perform procedures under close supervision as limited by modality specific advanced certification (see subparagraph 4a above). The RRA functions under the direct supervision of a radiologist or similarly-privileged physician qualified to supervise the RRA in carrying out these standardized procedures of various complexities. Deviations from regular procedures, unanticipated problems, and unfamiliar situations are referred to the radiologist or supervising physician for review. Some assignments at this level also include developmental duties involving more complex procedures, such as biopsies, aspirations, and/or peripherally inserted central catheter line placements, which are designed to prepare the RRA for promotion to higher grades in a functional area. Such duties are performed under closer supervision.

2. **Registered Radiologist Assistant, GS-9**
   - (a) **Experience.** One year of experience equivalent to the GS-7 grade level.
   - OR
(b) **Education.** Master's degree related to the duties of a specific position or to the occupation must be appropriate for the position being filled.

(c) **Assignment.** In addition to assignments at the entry level, RRAs at this level operate and monitor equipment, such as Fluoroscopy and CT, to perform procedures under general supervision as limited by modality specific advanced certification, see 4a above. The RRA functions independently in carrying out these standardized procedures of various complexities. In addition to the entry level duties, RRAs at this level perform complex invasive and non-invasive procedures utilizing the various modalities in Imaging. These are performed under the general and direct supervision of the radiologist or other supervising physician. The full performance level RRA is skilled in assessing patient vital signs, responding to emergent situations, and entering documentation in the EHR.

(d) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following Knowledge, Skills, and Abilities (KSA):

i. Knowledge of Imaging techniques following as low as reasonably achievable principles in various modalities.

ii. Ability to perform various diagnostic procedures, including fluoroscopy, and evaluate images for completeness and diagnostic quality.

iii. Knowledge of anatomy and physiology, as well as, contrast and general medications prescribed by the radiologist/physician.

iv. Ability to perform all routine invasive procedures under the direct and/or general supervision of the radiologist or supervising physician, including vascular procedures with image guidance, contrast administration, needle and/or catheter placement.

v. Ability to assess a patient’s clinical record, diagnosis, laboratory results, perform a radiology focused physical exam on the patient and documenting the EHR.

vi. Ability to perform invasive vascular procedures with image guidance, including contrast administration, needle or catheter placement.

(3) **Registered Radiologist Assistant, GS-11**

(a) **Experience.** At least one year of experience equivalent to the GS-9 grade level that demonstrates the clinical competencies described at that level.

(b) **Assignment.** RRAs at this level perform and/or assist with complex invasive procedures, such as embolization and interventional oncology procedures in the Interventional Section, receiving guidance and direction from the radiologist or
other supervising physician, regarding unfamiliar or unusual situations for the more complex patient issues. Candidates at this grade level may be assigned to provide specialty service in the Interventional Section.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the KSAs listed above, the candidate must demonstrate all of the following KSAs:

i. Ability to perform complex invasive procedures in the Interventional Section under the direct supervision of the radiologist or other supervising physician.

ii. Skills to maintain image quality in multiple sections of radiology.

iii. Ability to function with initiative and progressively independent judgment within his/her sphere of responsibility.

iv. Advanced knowledge to prioritize exams and procedures.

(4) **Lead Registered Radiologist Assistant, GS-11**

(a) **Experience.** At least one year of experience equivalent to the GS-9 grade level.

(b) **Assignment.** This assignment is generally found in facilities where there are no diagnostic radiology technicians (DRT) lead or supervisory positions. At this level, RRAs demonstrate advanced competency in their field performing duties of a full performance level or advanced RRA. They are proficient in assessing, evaluating, and planning the patient care in their area. This is achieved by determining the necessary staff and materials needed to coordinate the Imaging Service and the other involved service for the best patient outcomes in a procedure. Duties include: the daily assignments of staff; managing inventory and resources, recommendations to the supervisor for awards; and conducting performance evaluations.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to make decisions leading RRAs and Technologists for the best patient outcomes.

ii. Ability to manage the working staff, and ensuring adherence to the policies and procedures developed by the service and the medical center.

iii. Ability to resolve complex problems.

iv. Ability to communicate orally and in writing with a variety of people from different backgrounds.
v. Advanced knowledge to prioritize exams and procedures.

vi. Comprehensive knowledge of local and national policies related to Radiology.

(5) **Supervisory Registered Radiologist Assistant, GS-11**

(a) **Experience.** At least one year of experience equivalent to the GS-09 level demonstrating the clinical competencies at that level. Team leadership skills have been acquired through education and/or experience.

(b) **Assignment.** This assignment is generally found in less complex facilities where there are no DRT supervisory position, or lead RRA, GS-11 positions. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Performs the full range of supervisory duties over staff below the GS-11 grade level, including assignment of staff, development of performance standards in their section, recommendations for advancement, and when appropriate, disciplinary action. RRA’s at this level maintain regulatory compliance, and contribute to budget planning. Equipment planning and research is performed to maintain overall quality and effective patient health care delivery in Radiology.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of Federal and State laws, regulations and accrediting/regulatory requirements, in order to develop plans and procedures for a lower to medium complexity radiology service.

ii. Knowledge of radiology quality management procedures and principles, to provide education and/or training to fully functioning non-supervisory and/or junior supervisory staff.

iii. Skills to interview and evaluate candidates for positions in the section and recommend appointments, advancements, or, when appropriate, disciplinary actions.

iv. Ability to perform the full range of supervisory duties that include responsibility for assignment of work, performance evaluations, selection of staff, recommendation of awards, advancements and disciplinary actions.

v. Ability to analyze organizational, technical, and administrative problems, including equipment needs, and to develop and implement solutions that result in efficient section operation.
vi. Knowledge of general concepts, principles and methods of radiologic technology and operations.

vii. Knowledge of maintaining records for review by external regulatory agencies, and of local and national policies related to Radiology.

(6) Supervisory Registered Radiologist Assistant, GS-12

(a) **Experience.** At least one year of experience or the equivalent at the GS-11 grade level.

(b) **Assignment.** This assignment is generally found in facilities where supervisory duties might include oversight of DRT’s, regardless of facility complexity. RRAs at this level demonstrate advanced competency in their field performing duties above the RRA, GS-11 level. Performs the full range of supervisory duties over staff at the GS-11 level and below, including assignment of staff, development of performance standards in their section, recommendations for advancement, and when appropriate, disciplinary action. RRAs at this level maintain regulatory compliance, and contribute to budget planning. Equipment planning and research is performed to maintain overall quality and effective patient health care delivery in radiology.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to meeting the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of Federal and State laws, regulations and accrediting/regulatory requirements in order to develop plans and procedures for Radiology.

ii. Knowledge of radiology quality management procedures and principles sufficient to lead a radiology quality management program, and/or education and training of supervised staff.

iii. Demonstrated leadership and managerial skills, including skills in interpersonal relations and conflict resolution, in order to effectively interact with employees internal and external to the service.

iv. Ability to perform the full range of supervisory duties, that include responsibility for assignment of work, performance evaluations, selection of staff, recommendations for awards, advancements and disciplinary actions.

v. Ability to plan, organize, set short and/or long term goals, and conduct studies on technical and administrative problems, including personnel shortages, organizational structure, upgrades and new equipment purchasing.
vi. Knowledge of concepts, principles, and methods of radiologic technology and operations.

vii. Ability to maintain records for review by an outside regulatory agency, and of local and national policies related to Radiology.

5. DEVIATIONS.

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for registered radiologist assistants in VHA, whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action, based on demonstrated competence to meet the requirements of the proposed grade. This deviation only applies to grades and/or assignments published in this qualification standard.

b. Under no circumstances will the education and/or ARRT Certification requirements be waived.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

Authority: 38 U.S.C. §§ 7402, 7403]
II-G55-1

APPENDIX G55. Histopathology Technician
GS-0646
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment of a Histopathology Technician in the Veterans Health Administration (VHA). These requirements apply to all VHA Histopathology Technicians in the General Schedule (GS) 0646 series. As crucial members of the Pathology and Laboratory Medicine Service, histopathology technicians possess the knowledge and skills to process anatomical tissue and cytological cell samples obtained from the Veteran by a clinician. The work performed by histopathology technicians is vital for pathologists to interpret laboratory results and provide diagnoses that allow clinicians to plan appropriate and life-saving treatments for Veterans.

2. DEFINITIONS

   a. Journey Level. The full performance level for this qualification standard is at the GS-6 grade level.

   b. Creditable Experience. To be creditable, the experience must have demonstrated the knowledge, skills, and abilities (KSAs) associated with a health care field or knowledge, skills, and abilities related to the Histopathology Technician practice. Experience satisfying this requirement may be paid or non-paid employment in the health care field.

   c. Quality of Experience. Qualifying experience must be at a level comparable to Histopathology Technician experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

   d. Part-time Experience. Part-time experience as a Histopathology Technician is credited according to its relationship to the full-time workweek. For example, one week of full-time credit is equivalent to two weeks of part-time work.

3. BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. Experience and Education

      (1) Experience. One year of experience in a health care field that demonstrates the applicant's ability to perform the work or provides an understanding of the work such as but not limited to a medical or clinical laboratory assistant (or technician) or health technician.

      OR,
(2) **Education**

(a) Four academic years above high school leading to a bachelor's degree with courses related to the occupation such as biological science or chemistry; or

(b) Successful completion of two academic years of study above high school that included at least 24 semester hours in Chemistry and/or in appropriate fields of biological science and successful completion of a 12-month program of education and training in histopathology or cytotechnology.

**OR,**

(3) **Experience/Education Combination.** Equivalent combination of experience and education are qualifying for entry level for which both education and experience are acceptable. Examples are listed below:

(a) Six months of experience in the health care field and two years of education above high school that included at least six semester hours in health care related courses such as biological science, surgical technician courses or other courses related to the position; or an associate’s degree in a health care related field.

(b) Six months of experience in the health care field and successful completion of a course for health care technicians, hospital corpsmen, medical service specialists, or histopathology technicians given by the U.S. Armed Forces.

c. **Certification.** None

d. **Grandfathering Provision.** All Histopathology Technicians employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series, and grade held. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees in an occupation that does not require a licensure/certification/registration, may be reassigned, promoted, or demoted within the occupation.

(2) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) If an employee who was retained (grandfathered) under this provision leaves that occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. **Physical Requirements.** See VA Directive and Handbook 5019.
f. **English Language Proficiency.** Histopathology Technicians must be proficient in spoken and written English in accordance with chapter 2, section D, paragraph 5.a., this part.

4. **GRADE REQUIREMENTS.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

   a. **Histopathology Technician, GS-5 (Entry Level)**

      (1) **Experience or Education.** None beyond the basic requirements.

      (2) **Assignment.** This is an entry level histopathology technician position. It is expected that histopathology technicians receive guidance from more experienced staff members and require frequent and direct supervision. Assignments associated with this position include, but are not limited to, retrieving and accessioning surgical, cytology, and autopsy specimens; enter and track workload data and disposition of pathology materials and documents electronically; perform pre and post-analytical duties; and may assist in preparation of autopsy protocols as assigned. The incumbent must maintain the integrity of patient identification throughout all processes.

   b. **Histopathology Technician, GS-6 (Full Performance Level)**

      (1) **Experience.** One year of experience equivalent to the next lower grade level.

      (2) **Assignment.** At the full performance level, the histopathology technician uses independent judgment to perform the full range of duties including analyzing and evaluating laboratory results. The histopathology technician carries out the day-to-day operations in the laboratory with minimal technical supervision. This includes routine and complex histopathological and cytopathological procedures, quality control and assurance procedures, operation and routine maintenance of instrumentation, troubleshooting, and principles of performance improvement. The incumbent utilizes specialized techniques for handling cell blocks, frozen sections, bone marrows, autopsies, and fine-needle biopsies. The technician prepares technically adequate slides of surgical, cytology, and autopsy specimens by processing, embedding tissue, cutting, staining (including immunohistochemistry), and coverslipping.

      (3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs.

         (a) Knowledge of professional anatomic pathology principles, practices, concepts, and theories providing for sound independent work.

         (b) Knowledge of laboratory quality control and assurance procedures, principles of performance improvement, reagent management, inventory supply systems, and document control systems.

         (c) Knowledge of anatomic pathology laboratory equipment and ability to operate, maintain, and troubleshoot instrumentation.
(d) Ability to plan, organize, set priorities, work as a team member, and effectively complete assignments.

(e) Ability to use independent technical judgment to analyze and evaluate laboratory results.

c. Histopathology Technician, GS-7 (Advanced)

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Assignment.** Histopathology technicians at this level generally have a higher level of responsibility for technical oversight, and are expected to carry out assigned tasks of considerable difficulty independently. The incumbent will have the responsibility of performing difficult specialized histological, histochemical, and immunohistochemical procedures, as well as developing, modifying, or adapting new staining methods or techniques, improving existing methods as necessary for routine histotechnology procedures. The technician will be responsible for troubleshooting issues with instruments and resolving problems. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs.

(a) Skill in applying professional, complex anatomic pathology principles, practices, concepts, and theories in performing new or difficult specialized testing methods or techniques.

(b) Ability to provide technical oversight of laboratory quality control and assurance procedures and principles of performance improvement exhibiting competence in managing reagent and supply inventories and document control systems.

(c) Ability to validate methodologies, operate anatomic pathology laboratory equipment and perform complex instrument troubleshooting.

(d) Ability to use independent technical judgment to analyze and evaluate laboratory results and resolve problems.

e. Histopathology Technician, GS-8 (Lead)

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Assignment.** Lead Histopathology technicians at this level perform duties which consist of a significant scope, complexity and administrative independence. The Lead provides direction to the daily operations and assumes responsibility for integrating and monitoring the standard adherence to methods and protocols to maintain continuous work flow and quality within the unit. Duties include: prepare, direct, and approve work schedules and assign tasks.
for timely completion of duties; ensure resources are in optimal working condition and address workflow needs; calibrate, operate, and maintain instruments and equipment used in surgical pathology, immunohistochemistry, and special stains; provides guidance and instruction to Histopathology Technicians on a broad range of specific tasks and job techniques; monitors work in progress often performing spot checks to ensure protocols are being followed; reviews completed work to ensure guidelines are met regarding work sequences, procedures, and methods; provides on-the-job training to new employees; provides cross-training to staff; provides input to supervisor on performance and training needs of employees; adjusts work assignments due to absences or changes in priorities; resolves simple informal complaints of employees and patients, referring the more difficult problems to the supervisor; recommends approval and/or disapproval of leave requests. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs.

(a) Ability to use independent judgment and apply comprehensive technical histopathology knowledge to solve complex problems concerning a broad range of tests, procedures, and protocols.

(b) Ability to perform procedural technical review and provide written and practical application training and instructions to laboratory personnel in all areas of histology.

(c) Ability to manage staffing requirements, plan and organize workload and priorities, and coordinate work in order to complete duties in an accurate and timely manner. This includes the ability to follow-up on pending issues and demonstrating an understanding of the impact of incomplete work.

(d) Comprehensive knowledge of regulatory, licensing, and accrediting agency requirements that govern laboratory operations in order to insure that work practices, documentation, and reporting are consistent with all governing standards and regulations.

(e) Skill in communicating with individuals in order to obtain the desired effect, provide technical guidance and ensure compliance with established policies and regulations.

f. **Supervisory Histopathology Technician, GS-9**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Assignment.** Employees in this assignment perform the full range of supervisory duties for the anatomic pathology laboratory, including responsibility for assignment of work performed; performance evaluations; recommendations for appointment, awards, advancement and disciplinary actions; identification of continuing education and training needs. The individual ensures compliance with accrediting agency and regulatory requirements; establishes and monitors the quality of the pre-analytical processes as part of the overall laboratory quality management program, and initiates corrective action. This individual develops policies and
procedures, manage document control, develops performance standards, position descriptions and functional statements. The incumbent is responsible for professional and administrative management of an assigned area, to include budget execution, orientation and competency assessment of assigned staff. The Supervisory Histopathology Technician maintains effective interdepartmental relations with other services in order to accomplish medical center goals. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs.

(a) Expert knowledge of Federal and state laws, regulations, and accrediting/regulatory requirements in order to develop policies and procedures for the laboratory.

(b) Expert knowledge of laboratory quality management procedures and principles sufficient to establish and monitor a laboratory quality management program and/or education and training of laboratory staff.

(c) Demonstrated leadership and managerial skills including skill in interpersonal relations and conflict resolution in order to deal with employees, team leaders and managers.

(d) Ability to perform the full range of supervisory duties which includes responsibility for assignment of work, performance evaluations, selection of staff, recommendation of awards, advancements and disciplinary actions.

(e) Ability to plan, organize, set short and/or long term goals and conduct studies on technical and administrative problems, including personnel shortages, organizational structure, new technology.

(f) Expert knowledge of concepts, principles and methods of laboratory technology and operations.

5. **DEVIATIONS**

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for Histopathology Technicians in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements on the proposed grade.
b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. §§ 7402, 7403]
1. COVERAGE. The following are requirements for appointment as a Health Technician (Massage Therapy) in the Veterans Health Administration (VHA). The requirements apply to all VHA Health Technicians (Massage Therapy) employed in the GS-0640 series. Massage Therapy is the practice of manual assessment and manipulation of the superficial soft tissues of skin, muscle, tendon, ligament, fascia, and the structures that lie within the superficial tissues. The Health Technician (Massage Therapy) occupation provides clinical services that address a vast array of problems impacting the health and function of a diverse patient population. The work requires the application of knowledge of therapeutic massage concepts, principles and practices, and encompasses a large variety of modalities from Western and Eastern traditions. Massage Therapy promotes circulation of blood and lymph, relieves muscle tension, and can induce a general relaxation response, alleviate pain and anxiety, promote sleep, reduce stress, and enhance the general sense of wellness. Employees in this occupation may utilize appropriate tools and the external applications of water, heat, and cold to enhance therapeutic benefits. Employees in this occupation incorporate knowledge of various systems of anatomy, physiology, and pathology to apply a plan of care for those with a variety of soft tissue dysfunctions, stress related conditions, and imbalances.

2. DEFINITIONS.
   a. Journey Level. The full performance level for this qualification standard is the GS-7 grade level.
   b. Creditable Experience. To be creditable, the candidate’s experience must be evidenced by active professional practice, paid/non-paid employment in the practice of massage therapy, using knowledge, skills, abilities, and other characteristics referred to as core competencies associated with the scope of massage therapy practice.
   c. Part-Time Experience. Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of half-time work.
   d. Graduate Health Technician (Massage Therapy). A Health Technician (Massage Therapy) candidate who has completed the education requirements, but has not obtained the appropriate license, registration, or certification to practice as a Health Technician (Massage Therapy) in a State, Territory, or Commonwealth of the United States, or the District of Columbia.

3. BASIC REQUIREMENTS. The basic requirements for employment as a Health Technician (Massage Therapy) are prescribed by Public Law 96-151 and codified in 38 U.S.C. § 7402. To qualify for appointment, all applicants for the position of Health Technician (Massage Therapy) in VHA must meet the following:
a. **Citizenship.** Candidates must be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with chapter 3, section A, paragraph 3g, this part.)

b. **Education.** Candidates must complete a minimum 500-hour massage therapy education program.

c. **Licensure, Registration, or Certification**

(1) Candidates must be currently licensed, registered, or certified to practice as a massage therapist in a state, territory, or Commonwealth of the United States, or the District of Columbia. Acceptable credentials must have required successful completion of a minimum 500-hour massage therapy education program and pass the Massage and Bodywork Licensing Examination, National Certification Board for Therapeutic Massage and Bodywork Examination, or equivalent state-issued examination.

OR,

(2) Candidates must possess and maintain a board certification from the National Certification Board for Therapeutic Massage and Bodywork (NCBTMB).

**NOTE:** As of the date of this standard, several states do not offer a credential in massage therapy. Additionally, some states offer a credential that does not meet the 500-hour education program and/or state-issued examination requirements described above in subparagraph 3.c.(1). Candidates may satisfy the basic requirement of licensure/certification/registration by possessing and maintaining a board certification from the NCBTMB.

(3) **Exception.** Non-certified applicants, who have pending registrations or licensures in a state, or a certification by a national board recognized by the Secretary, and otherwise meet the eligibility requirements for licensure, may be given a temporary appointment as a Graduate Health Technician (Massage Therapy), under the authority of 38 U.S.C. § 7405(c)(2)(B), for a period not to exceed two years. Failure to obtain licensure/registration/certification during this period may result in termination of employment.

(4) **Loss of Credential.** An employee who fails to maintain the required licensure/certification/registration must be removed from the occupation, which may result in termination of employment.

(5) **Foreign Graduates.** Graduates of foreign massage therapy programs that require a minimum 500-hour education program are considered to meet the basic education requirements if they have a full unrestricted and current license, registration, or certification, as described in subparagraph 3.c., or by maintaining a board certification from the NCBTMB.
d. **Grandfathering Provision.** Health Technicians (Massage Therapy) employed in VHA on the effective date of this qualification standard are considered to have met all qualification requirements for the grade held, including positive education and licensure that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements of this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees grandfathered into the GS-0640 occupational series as a Health Technician (Massage Therapy) may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation.

(2) Health Technicians (Massage Therapy) who are appointed on a temporary basis prior to the effective date of this qualification standard may not have their temporary appointment extended or be reappointed on a temporary or permanent basis until they fully meet the basic requirements of this standard.

(3) Health Technicians (Massage Therapy) initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure, certification, registration, and meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

(4) If Health Technicians (Massage Therapy), who are grandfathered under this provision, leave the GS-0640 series, they lose their grandfathered protected status. These employees must meet the full VA qualification standard requirements in effect at the time of re-entry to the Health Technician (Massage Therapy) occupation in this series.

f. **English Language Proficiency.** Individuals appointed under the authority of 38 U.S.C. chapters 73 or 74, to serve in a direct patient-care capacity in VHA, must be proficient in written and spoken English. See Chapter 2, section D, paragraph 5a, this part.

4. **GRADE REQUIREMENTS.**

a. **Creditable Experience**

(1) **Knowledge of Contemporary Professional Massage Therapy Practice.** To be creditable, a candidate must have demonstrated possession of the required knowledge, skills, and abilities associated with the scope of massage therapy practice.

(2) **Quality of Experience.** Experience is only creditable if it was experience completed in the massage therapy practice and directly related to the duties to be performed after the post education requirements were completed. Qualifying experience must be at a level comparable to, or exceeding, the Health Technician (Massage Therapy) experience at the next lower grade level.
b. **Grade Determination.** In addition to the basic requirements for appointment in paragraph 3, the following criteria must be used when determining the appropriate grade assignment of candidates.

(1) **Health Technician (Massage Therapy), GS-5 - Entry Level**

   (a) **Education, Experience, and Licensure.** None beyond the basic requirements in paragraph 3.

   (NOTE: See exception to licensure/registration/certification requirement in subparagraph 3.c. above.)

   (b) **Assignment.** Health Technician (Massage Therapy) at this level perform basic massage therapy services under close supervision. The technician functions independently in applying basic massage services. Basic massage therapy includes, but is not limited to effleurage (stroking), petrissage (kneading), tapotement/percussion, friction, vibration, passive and active stretching, and draping. The Health Technician (Massage Therapy) is responsible for changing linen between clients, refilling oils, cleaning massage table/chair/arm rest, and providing a clean, calm environment. The Health Technician (Massage Therapy) promotes and educates patients in the health and wellness benefits of massage, and develops therapeutic relationships with patient/family/significant others by demonstrating sensitivity and respect for a patient's personal beliefs. Deviations from regular procedures, unanticipated problems, and unfamiliar situations are referred to the supervisor for a decision or assistance. Any unusual patient interactions are documented and immediately reported to the supervisor. Some assignments at this level include developmental duties involving more progressive care, designed to prepare the Health Technician (Massage Therapy) for promotion to higher grades. Such duties would be performed under close supervision.

(2) **Health Technician (Massage Therapy), GS-6 - Developmental Level**

   (a) **Education, Experience, and Licensure.** In addition to the basic requirements, candidates must possess one year of experience equivalent to the GS-5 grade level, and demonstrate all the KSAs below:

   (b) **Demonstrated Knowledge, Skills, and Abilities**

      i. Skill to provide massage techniques including draping, using the appropriate tools, supplies, and equipment based on the needs of the patient;

      ii. Knowledge of anatomy, physiology, pathology, therapeutic effects, and evidence based practice of massage therapy;

      iii. Ability to work with an interdisciplinary team in a health care setting;

      iv. Knowledge of all patient safety procedures, rules, and regulations as they pertain to a clinical environment; and
v. Ability to effectively communicate verbally/non-verbally and in writing (through a variety of modalities).

(c) Assignment. Employees at this grade level serve as developmental Health Technicians (Massage Therapy) and perform treatments which are routine and standardized in nature. The Health Technician (Massage Therapy) provides treatments in various inpatient and outpatient settings, in accordance with applicable policies and procedures. Health Technicians (Massage Therapy) perform a substantially full range of duties, but receive guidance and directions regarding unfamiliar or unusual situations for more complex patient issues.

(3) Health Technician (Massage Therapy) GS-7 - Full Performance Level

(a) Education, Experience, and Licensure. In addition to the basic requirements, candidates must possess one year of specialized experience equivalent to the GS-6 grade level performing massage therapy and demonstrate all the KSAs below:

(b) Demonstrated Knowledge, Skills, and Abilities

i. Ability to assess the physical and mental status of patients (including history and physical assessment), interpret the appropriate information to identify each patient's population-specific needs, identify indications/contraindications for massage, develop the plan of care, and monitor their response to treatment;

ii. Ability to use various communication techniques to encourage and educate individuals and groups to enhance massage therapy outcomes;

iii. Skill in developing and maintaining strong interpersonal relationships; and

iv. Ability to advise staff and students in massage therapy practices.

(c) Assignment. At the full performance level, Health Technicians (Massage Therapy) independently assess the physical and mental status of patients. The Health Technician (Massage Therapy) takes complete patient history and performs a physical assessment. The Health Technician (Massage Therapy) interprets relevant clinical information to identify each patient's population-specific needs, identify indications/contraindications for massage, and develop the plan of care. Health Technicians (Massage Therapy), at this level, are responsible to perform massage therapy services with complexity higher than the developmental level. The Health Technician (Massage Therapy) performs duties with limited supervision and seeks assistance from the supervisor in urgent or emergent circumstances. The Health Technician (Massage Therapy) evaluates patient responses to treatment and documents responses to treatment, by maintaining accurate records in an electronic environment. The Health Technician (Massage Therapy) coordinates follow up massage therapy as necessary. Health Technicians (Massage Therapy), at this level, serve as consultants to the health care team in
the evaluation and treatment of the patient. Under routine academic oversight, the Health Technician (Massage Therapy) assists with clinical supervision of massage therapy students.

(4) Health Technician (Massage Therapy) GS-8 - Advanced Clinical Level

(a) **Experience.** In addition to meeting the basic requirements, candidates must possess one year of progressive experience equivalent to the GS-7 grade level. In addition, the candidate must demonstrate all the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

i. Skill in providing advanced massage techniques using the appropriate tools, supplies, and equipment based on the needs of the patient;

ii. Knowledge of anatomy, physiology, and pathology relevant to massage therapy within specialty population(s);

iii. Ability to modify massage therapy techniques based on an understanding of specialty populations, and various clinical/environmental settings;

iv. Knowledge of teaching methods and learning principles;

v. Ability to conduct research and quality improvement activities, related to massage therapy; and

vi. Knowledge of complementary integrative health, and holistic health principles.

(c) **Assignment.** For all assignments above the full performance level (GS-7), the higher-level duties must consist of significant scope, complexity (difficulty), variety, and be performed by the incumbent at least 25% of the time. At this level, the Health Technician (Massage Therapy) provides a full range of complex treatment procedures and modalities, which may include, but are not limited to reflexology, injury rehabilitation, lymphatic drainage, neuromuscular therapy, myofascial release, and/or craniosacral work. The Health Technician (Massage Therapy) is responsible to provide massage therapy services for specialty areas, such as pain management, poly-trauma, surgery, traumatic brain injury, palliative care, neurology, orthopedics, geriatrics, cardiology, pulmonary, rheumatology, spinal cord injury, mental health, and oncology. The Health Technician (Massage Therapy) assists other staff through education and as a member of an interdisciplinary health care team. The Health Technician (Massage Therapy) is a subject matter expert responsible for mentoring other Health Technicians (Massage Therapy) who participate in educational and research activities. The Health Technician (Massage Therapy) provides education in massage techniques to patients, caregivers, and employees. The Health Technician (Massage Therapy) contributes to identifying, collecting, and analyzing aggregate patient care information, to ensure safety and quality of care.
(5) Lead Health Technician (Massage Therapy), GS-8

(a) **Experience.** In addition to meeting the basic requirements, candidates must possess one year of progressively complex experience equivalent to the GS-7 grade level. In addition, the candidate must demonstrate all the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

i. Ability to delegate tasks and responsibilities;

ii. Ability to manage staffing requirements, workload priorities, and coordinate the work of the unit;

iii. Ability to provide staff development and training; and

iv. Ability to review and monitor data to ensure all records and reports are complete and accurate.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), variety, and be performed by the incumbent at least 25% of the time. The Lead Health Technician (Massage Therapy) monitors workload, provides input on performance, resolves daily workplace issues, and maintains efficient workflow. Assignments at this level include, but are not limited to: ensuring coverage of all areas of responsibility; conducting clinical reviews to assess the quality of work; providing input to staff that includes changes in policies and procedures; creating and maintaining employee work schedules; orienting and providing on-the-job training for new and current Health Technicians (Massage Therapy); and ensuring all training requirements are met. The Lead Health Technician (Massage Therapy) reviews and analyzes aggregate patient care data, to ensure safety and quality of care.

(6) Supervisory Health Technician (Massage Therapy), GS-9

(a) **Experience.** In addition to meeting the basic requirements, candidates must possess one year of progressively complex experience equivalent to the GS-8 grade level. In addition, the candidate must demonstrate all the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

i. Ability to provide the full range of administrative and supervisory duties which include, but are not limited to: assignment of work, performance evaluations, selection of staff, and recommendation of awards and/or advancements;

ii. Advanced knowledge of massage therapy across multiple areas of practice, and the demonstrated ability to provide guidance to staff massage therapists;

iii. Knowledge of how massage therapy integrates with other health care disciplines;
iv. Ability to assist in matters related to policy development, equipment requests, and workload analysis; and

v. Ability to delegate authority, evaluate and oversee people and programs, accomplish program goals, and adapt to changing priorities.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), variety, and be performed by the incumbent at least 25% of the time. The Supervisory Health Technician (Massage Therapy) is responsible for the supervision, administrative management, and direction of Health Technicians (Massage Therapy). The Supervisory Health Technician (Massage Therapy) has full administrative and professional responsibility for planning and directing the activities for the service or equivalent unit. Typical duties include: making work assignments, monitoring the staff's clinical performance, conducting performance appraisals, and other clinical and administrative responsibilities, as assigned, to ensure that the mission of the service and the medical center has been satisfied. The Supervisory Health Technician (Massage Therapy) develops policies and procedures for the work unit, and contributes to the promotion of complementary and integrative health services. The Supervisory Health Technician (Massage Therapy) is responsible to review aggregate patient care data and take appropriate actions to ensure the safety and quality of care.

5. DEVIATIONS.

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the education requirements be waived.

c. The placement of individuals in grade levels or assignments not described in this standard may only be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

Authority: 38 U.S.C. §§ 7304, 7402.]
[APPENDIX G57. MEDICAL RECORDS TECHNICIAN (CODER)
QUALIFICATION STANDARD
GS-0675
Veterans Health Administration

1. COVERAGE. Medical coding falls under the jurisdiction of health information management (HIM). The following are the requirements for appointment as a Medical Records Technician (MRT) (Coder) performing medical coding in the Veterans Health Administration (VHA). These requirements apply to all VHA MRT (Coder) positions in the GS-0675 series. MRTs (Coder) are skilled in classifying medical data from patient health records in the hospital setting, and/or physician-based settings, such as physician offices, group practices, multi-specialty clinics, and specialty centers. These coding practitioners analyze and abstract patients’ health records, and assign alphanumeric codes for each diagnosis and procedure. To perform this task, they must possess expertise in international classification of diseases (ICD), current procedural technology (CPT), and the healthcare common procedure coding system (HCPCS). MRT (Coder) professionals may be assigned to outpatient coding, inpatient coding, or a combination of outpatient/inpatient coding. Also, this work can be performed in a consolidated coding unit (CCU). MRT (Coder) may also provide education related to coding and documentation. MRT (Coder) assignments above the journey level include clinical documentation improvement specialist (CDIS) and auditor.

2. DEFINITIONS.

a. **Journey Level.** The full performance level for the MRT (Coder) assignment is GS-8.

b. **Creditable Experience.** Experience is only creditable if it is directly related to the position to be filled. To be creditable, the candidate’s experience must have demonstrated the use of knowledge, skills, and abilities (KSAs) associated with current practice and must be paid or non-paid employment equivalent to a MRT (Coder).

c. **Quality of Experience.** To be creditable, experience must be documented on the application or resume and verified in an employment reference or through other independent means.

d. **Part-Time Experience.** Part-time experience as a professional MRT is creditable according to its relationship to the full-time work week. For example, an MRT would receive one week of full-time credit for each two weeks of half-time work.

e. **Predominant Specialty Area.** Lead/Supervisory MRT (Coder) whose assignments involve two or more MRT specialty areas will be assigned the parenthetical title for the predominant specialty area being led/supervised.

f. **Apprentice/Associate Level Certification.** This is considered an entry level coding certification and is limited to certification obtained through the American Health Information Management Association (AHIMA), or the American Academy of Professional Coders (AAPC).
To be acceptable for qualifications, the specific certification must represent a comprehensive competency in coding across a wide range of services. Stand-alone specialty certifications do not meet the definition of apprentice/associate level certification and are not acceptable for qualifications. Certification titles may change and certifications that meet the definition of apprentice/associate level certification may be added/removed by the above certifying bodies. However, current apprentice/associate level certifications include: Certified Coding Associate (CCA), Certified Professional Coder-Apprentice (CPC-A) and Certified Outpatient Coding-Apprentice (COC-A).

g. Mastery Level Certification. This is considered a higher-level health information management or coding certification and is limited to certification obtained through AHIMA or AAPC. To be acceptable for qualifications, the specific certification must represent a comprehensive competency in the occupation. Stand-alone specialty certifications do not meet the definition of mastery level certification and are not acceptable for qualifications. Certification titles may change and certifications that meet the definition of mastery level certification may be added/removed by the above certifying bodies. However, current mastery level certifications include: Certified Coding Specialist (CCS), Certified Coding Specialist – Physician-based (CCS-P), Registered Health Information Technician (RHIT), Registered Health Information Administrator (RHIA), Certified Professional Coder (CPC), Certified Outpatient Coder (COC), Certified Inpatient Coder (CIC).

h. Clinical Documentation Improvement Certification. This is limited to certification obtained through AHIMA or the Association of Clinical Documentation Improvement Specialists (ACDIS). To be acceptable for qualifications, the specific certification must certify mastery in clinical documentation. Certification titles may change, and certifications that meet the definition of clinical documentation improvement certification may be added/removed by the above certifying bodies. However, current Clinical Documentation Improvement Certifications include: Clinical Documentation Improvement Practitioner (CDIP) and Certified Clinical Documentation Specialist.

2. BASIC REQUIREMENTS.

a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

b. Experience and Education

(1) Experience. One year of creditable experience that indicates knowledge of medical terminology, anatomy, physiology, pathophysiology, medical coding, and the structure and format of a health records.

OR,

(2) Education. An associate’s degree from an accredited college or university recognized by the U.S. Department of Education with a major field of study in health information
technology/health information management, or a related degree with a minimum of 12 semester hours in health information technology/health information management (e.g., courses in medical terminology, anatomy and physiology, medical coding, and introduction to health records);

OR,

(3) Completion of an AHIMA approved coding program, or other intense coding training program of approximately one year or more that included courses in anatomy and physiology, medical terminology, basic ICD diagnostic/procedural, and basic CPT coding. The training program must have led to eligibility for coding certification/certification examination, and the sponsoring academic institution must have been accredited by a national U.S. Department of Education accreditor, or comparable international accrediting authority at the time the program was completed;

OR,

(4) Experience/Education Combination. Equivalent combinations of creditable experience and education are qualifying for meeting the basic requirements. The following educational/training substitutions are appropriate for combining education and creditable experience:

(a) Six months of creditable experience that indicates knowledge of medical terminology, general understanding of medical coding and the health record, and one year above high school, with a minimum of 6 semester hours of health information technology courses.

(b) Successful completion of a course for medical technicians, hospital corpsmen, medical service specialists, or hospital training obtained in a training program given by the Armed Forces or the U.S. Maritime Service, under close medical and professional supervision, may be substituted on a month-for-month basis for up to six months of experience provided the training program included courses in anatomy, physiology, and health record techniques and procedures. Also, requires six additional months of creditable experience that is paid or non-paid employment equivalent to a MRT (Coder).

c. Certification. Persons hired or reassigned to MRT (Coder) positions in the GS-0675 series in VHA must have either (1), (2), or (3) below:

(1) Apprentice/Associate Level Certification through AHIMA or AAPC.

(2) Mastery Level Certification through AHIMA or AAPC.

(3) Clinical Documentation Improvement Certification through AHIMA or ACDIS.

NOTE: Mastery level certification is required for all positions above the journey level; however, for clinical documentation improvement specialist assignments, a clinical documentation improvement certification may be substituted for a mastery level certification.
d. **Loss of Credential.** Following initial certification, credentials must be maintained through rigorous continuing education, ensuring the highest level of competency for employers and consumers. An employee in this occupation who fails to maintain the required certification must be removed from the occupation, which may result in termination of employment. At the discretion of the appointing official, an employee may be reassigned to another occupation for which he/she qualifies, if a placement opportunity exists.

e. **Grandfathering Provision.** All persons employed in VHA as a MRT (Coder) on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series, and grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees may be reassigned, promoted up to and including the journey level, or changed to lower grade within the occupation, but will not be promoted beyond the journey level or placed in supervisory or managerial positions.

(2) Such employees in an occupation that requires a certification only at higher grade levels must meet the certification requirement before they can be promoted to the higher-grade levels.

(3) MRTs who are appointed on a temporary basis, prior to the effective date of the qualification standard, may not have their temporary appointment extended, or be reappointed on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(4) MRTs initially grandfathered into this occupation, who subsequently obtain additional education that meets all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

(5) Employees who are retained as a MRT under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as a MRT.

g. **English Language Proficiency.** MRTs (Coder) must be proficient in spoken and written English as required by 38 U.S.C. § 7403(f).

3. **GRADE REQUIREMENTS.**

   a. **Titles and Specialties**
(1) **Titles.** All individuals assigned to this occupation must be assigned to one of the approved parenthetical titles, as described in subparagraph (2) below.

(2) **Specialized Areas for Medical Records Technician (Coder).** For purposes of this qualification standard, the specialty areas for MRT (Coder) have been grouped into multiple parenthetical titles. Titles include:

(a) Medical Records Technician (Coder-Outpatient);

(b) Medical Records Technician (Coder-Inpatient); or,

(c) Medical Records Technician (Coder-Outpatient and Inpatient).

(3) **Medical Records Technician (Clinical Documentation Improvement Specialist) (CDIS).** The MRT (CDIS) assignments are positions above the journey level.

(a) MRT CDIS (Outpatient);

(b) MRT CDIS (Inpatient); or,

(c) MRT CDIS (Outpatient and Inpatient).

(4) **Medical Records Technician (Coder) Auditor.** The MRT (Coder) Auditor assignment is a position above the journey level.

(5) **Lead and Supervisory Medical Records Technician (Coder) Assignments.** Lead and Supervisory MRT (Coder) assignments are positions above the journey level.

(a) Lead MRT (Coder);

(b) Supervisory MRT (Coder); or,

(c) Supervisory MRT (Coder) Consolidated Coding Unit (CCU).

4. **GRADE DETERMINATIONS AND ASSIGNMENTS.**

a. **Medical Records Technician (Coder-Outpatient)**

(1) **Medical Records Technician (Coder-Outpatient), GS-4**

(a) **Experience or Education.** None beyond basic requirements.

(b) **Assignment.** Employees at this level serve as entry level MRTs (Coder) and receive close guidance from more experienced MRTs (Coder). Outpatient MRTs (Coder) select and assign codes from current versions of ICD Clinical Modification (CM), CPT, and HCPCS classification systems. MRTs (Coder) review record documentation to abstract all required medical, surgical, ancillary,
demographic, social and administrative data, and query clinical staff, as appropriate, with close guidance from higher level MRTs (Coder). They use various computer applications to abstract records, assign codes, and record and transmit data. They ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(2) Medical Records Technician (Coder-Outpatient), GS-5

(a) Experience. One year of creditable experience equivalent to the next lower grade level;

OR,

(b) Education. Successful completion of four years of education above high school leading to a bachelor’s degree from an accredited college or university recognized by the U.S. Department of Education, with a major field of study in health information management or a related degree with a minimum of 24 semester hours in health information management or technology.

(c) Assignment. Employees at this grade level serve as developmental level 1 MRTs (Coder) and receive guidance from more experienced MRTs (Coder) for more complex coding procedures. Outpatient MRTs (Coder) select and assign codes to outpatient episodes of care, and/or inpatient professional services from current versions of ICD CM, CPT, and HCPCS classification systems. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social and administrative data, and query clinical staff, as appropriate, with guidance from higher level MRTs (Coder). They use various computer applications to abstract records, assign codes, and record and transmit data. They ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(d) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to use health information technology and software products used in MRT (Coder) positions (e.g., the electronic health record, coding and abstracting software, etc.).

ii. Ability to navigate through and abstract pertinent information from health records.

iii. Knowledge of the ICD CM, PCS Official Conventions and Guidelines for Coding and Reporting, and CPT guidelines.

iv. Ability to apply knowledge of medical terminology, human anatomy/physiology, and disease processes to accurately assign codes to outpatient/ambulatory surgery records, based on health record documentation.

v. Knowledge of The Joint Commission requirements, Centers for Medicare and Medicaid Services (CMS), and/or health record documentation guidelines.
vi. Ability to manage priorities and coordinate work, in order to complete duties within required timeframes, and the ability to follow-up on pending issues.

(3) Medical Records Technician (Coder-Outpatient), GS-6

(a) Experience. One year of creditable experience equivalent to the next lower grade level.

(b) Assignment. Employees at this grade level serve in developmental level 2 positions as MRTs (Coder) and receive intermittent monitoring. Outpatient MRTs (Coder) may perform coding on outpatient episodes of care and/or inpatient professional services. They select and assign codes from current versions of ICD CM, CPT, and HCPCS classification systems. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social and administrative data, and query clinical staff, as appropriate, with limited guidance from higher level MRTs (Coder). They utilize various computer applications to abstract records, assign codes, and record and transmit data. They also ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to analyze the health record to identify all pertinent diagnoses and procedures for outpatient coding and evaluate the adequacy of the documentation.

ii. Ability to determine whether health records contain sufficient information for regulatory requirements, are acceptable as legal documents, are adequate for continuity of patient care, and support the assigned codes. This includes the ability to take appropriate actions if health record contents are not complete, accurate, timely, and/or reliable.

iii. Ability to apply laws and regulations on the confidentiality of health information (e.g., Privacy Act, Freedom of Information Act, and Health Insurance Portability and Accountability Act (HIPAA)).

iv. Ability to accurately apply the ICD CM, procedure coding system (PCS) Official Conventions and Guidelines for Coding and Reporting, and CPT guidelines to coding scenarios.

v. Comprehensive knowledge of current classification systems, such as ICD CM, CPT, and HCPCS, and skill in applying said classifications to outpatient episodes of care, and/or inpatient professional services based on health record documentation.

(4) Medical Records Technician (Coder-Outpatient), GS-7

(a) Experience. One year of creditable experience equivalent to the next lower grade level.
(b) **Assignment.** Employees at this grade level serve as developmental level 3 MRTs (Coder) and receive minimal monitoring. Outpatient MRTs (Coder) perform coding on outpatient episodes of care and/or inpatient professional services. They select and assign codes from current versions of ICD CM, CPT, and HCPCS classification systems. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social and administrative data, with minimal guidance from higher level MRTs (Coder). They review and abstract clinical data from the record for documentation of diagnoses and procedures to ensure it is adequate and appropriate to support the assigned codes. They also review provider health record documentation to ensure that it supports the diagnostic and procedural codes assigned and is consistent with required medical coding nomenclature. MRTs in this assignment also query clinical staff with documentation requirements to support the coding process. They use various computer applications to abstract records, assign codes, and record and transmit data. They also ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. **Skill in applying current coding classifications to a variety of specialty care areas for outpatient episodes of care and/or inpatient professional services to accurately reflect service and care provided based on documentation in the health record.**

ii. **Ability to communicate with clinical staff for specific coding and documentation issues, such as recording diagnoses and procedures, ensuring the correct sequencing of diagnoses and/or procedures, and verifying the relationship between health record documentation and coder assignment.**

iii. **Ability to research and solve coding and documentation related issues.**

iv. **Skill in reviewing and correcting system or processing errors and ensuring all assigned work is complete.**

(5) **Medical Records Technician (Coder-Outpatient), GS-8**

(a) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(b) **Assignment.** This is the journey level for this assignment. Outpatient MRTs (Coder) at this level perform the full scope of outpatient coding including ambulatory surgical cases, diagnostic studies and procedures, outpatient encounters, and/or inpatient professional services. Outpatient duties consist of the performance of a comprehensive review of documentation within the health record to accurately assign ICD CM codes for diagnoses, CPT/HCPCS codes for surgeries, procedures and evaluation, and management services. They independently review and abstract clinical data from the record for documentation of diagnoses and procedures to ensure it is adequate and appropriate to support the assigned codes. They code all complicated and complex disease processes, patient injuries, and all
procedures in a wide range of ambulatory settings and specialties. They also directly consult with the clinical staff for clarification of conflicting, incomplete, or ambiguous clinical data in the health record. MRTs (Coder) must abstract, assign, and sequence codes into encoder software to support medical necessity, resolve encoder edits, and ensure codes accurately reflect services rendered. They also review provider health record documentation to ensure that it supports the diagnostic and procedural codes assigned and is consistent with required medical coding nomenclature. They also query clinical staff with documentation requirements to support the coding process. They enter and correct information that has been rejected, when necessary. MRTs (Coder) ensure audit findings have been corrected and refiled. They also use various computer applications to abstract records, assign codes, and record and transmit data. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to analyze the health record to identify all pertinent diagnoses and procedures for coding and to evaluate the adequacy of the documentation. This includes the ability to read and understand the content of the health record, the terminology, the significance of the findings, and the disease process/pathophysiology of the patient.

ii. Ability to accurately perform the full scope of outpatient coding, including ambulatory surgical cases, diagnostic studies and procedures, and outpatient encounters, and/or inpatient professional fee services coding.

iii. Skill in interpreting and adapting health information guidelines that are not completely applicable to the work or have gaps in specificity, and the ability to use judgment in completing assignments using incomplete or inadequate guidelines.

b. **Medical Records Technician (Coder-Inpatient)**

(1) **Medical Records Technician (Coder-Inpatient), GS-4**

(a) **Experience or Education.** None beyond basic requirements.

(b) **Assignment.** Employees at this level serve as entry level MRTs (Coder) and receive close guidance from more experienced MRTs (Coder). Inpatient MRTs (Coder) select and assign codes from current versions of ICD CM and the PCS, and/or, CPT and HCPCS classification systems for inpatient facility and/or professional services. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social and administrative data, and query clinical staff, as appropriate, with close guidance from higher level MRTs (Coder). They also use various computer applications to abstract records, assign codes, and record and transmit data. They ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.
(2) **Medical Records Technician (Coder-Inpatient), GS-5**

(a) **Experience.** One year of creditable experience equivalent to the next lower grade level;

OR,

(b) **Education.** Successful completion of a bachelor’s degree from an accredited college or university recognized by the U.S. Department of Education, with a major field of study in health information management or a related degree with a minimum of 24 semester hours in health information management or technology.

(c) **Assignment.** Employees at this grade level serve as developmental level 1 MRTs (Coder) and receive guidance from more experienced MRTs (Coder) for more complex coding procedures. Inpatient MRTs (Coder) select and assign codes from current versions of ICD CM, PCS, and/or CPT and HCPCS classification systems for inpatient facility and/or professional services. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social and administrative data, and query clinical staff, as appropriate, with guidance from higher level MRTs (Coder). They utilize various computer applications to abstract records, assign codes, and record and transmit data. They also ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(d) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to use health information technology and various office software products used in MRT (Coder) positions (e.g., the electronic health record, coding and abstracting software, etc.).

ii. Ability to navigate through and abstract pertinent information from health records.

iii. Knowledge of the ICD CM and PCS Official Conventions and Guidelines for Coding and Reporting.

iv. Ability to apply knowledge of medical terminology, human anatomy/physiology, and disease processes to accurately assign codes to inpatient records based on health record documentation.

v. Knowledge of The Joint Commission requirements, CMS, and/or health record documentation guidelines.

vi. Ability to manage priorities and coordinate work to complete duties within required timeframes and the ability to follow-up on pending issues.
(3) Medical Records Technician (Coder-Inpatient), GS-6

(a) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(b) **Assignment.** Employees at this grade level serve in developmental level 2 positions as MRTs (Coder) and receive intermittent monitoring. Inpatient MRTs (Coder) select and assign codes from current versions of ICD CM, PCS, and/or CPT and HCPCS classification systems for inpatient facility and/or professional services. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social and administrative data, and query clinical staff, as appropriate, with limited guidance from higher level MRTs (Coder). They use various computer applications to abstract records, assign codes, and record and transmit data. They also ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to analyze the health record to identify all pertinent diagnoses and procedures for coding and to evaluate the adequacy of the documentation.

ii. Ability to determine whether health records contain sufficient information for regulatory requirements, are acceptable as legal documents, are adequate for continuity of patient care, and support the assigned codes. This includes the ability to take appropriate actions if health record contents are not complete, accurate, timely, and/or reliable.

iii. Ability to apply laws and regulations on the confidentiality of health information (e.g., Privacy Act, Freedom of Information Act, and HIPAA).

iv. Ability to accurately apply the ICD CM and PCS Official Conventions and Guidelines for Coding and Reporting to various coding scenarios.

v. Comprehensive knowledge of current classification systems, such as ICD Clinical Modification (CM) and PCS, CPT, and HCPCS, and skill in applying said classifications to inpatient records based on health record documentation.

vi. Knowledge of complication or comorbidity/major complication or comorbidity (CC/MCC), and POA indicators to obtain correct Medicare Severity Diagnosis Related Group (MS-DRG).

(4) Medical Records Technician (Coder-Inpatient), GS-7

(a) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(b) **Assignment.** Employees at this grade level serve as developmental level 3 MRTs (Coder) and receive minimal monitoring. Inpatient MRTs (Coder) select and assign codes from current versions of ICD CM, PCS, and/or CPT and HCPCS classification systems for inpatient facility and/or professional services. They review and record documentation to
abstract all required medical, surgical, ancillary, demographic, social and administrative data, with minimal guidance from higher level MRTs (Coder). They review and abstract clinical data from the record for documentation of diagnoses and procedures to ensure it is adequate and appropriate to support the assigned codes. They review provider health record documentation to ensure that it supports the diagnostic and procedural codes assigned and is consistent with required medical coding nomenclature. They query clinical staff with documentation requirements to support the coding process. They use various computer applications to abstract records, assign codes, and record and transmit data. They ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in applying current coding classifications to a variety of inpatient specialty care areas to accurately reflect service and care provided based on documentation in the health record.

ii. Ability to communicate with clinical staff for specific coding and documentation issues, such as recording diagnoses and procedures, the correct sequencing of diagnoses and/or procedures, and the relationship between health record documentation and code assignment.

iii. Ability to research and solve coding and documentation related issues.

iv. Skill in reviewing and correcting system or processing errors and ensuring all assigned work is complete.

v. Ability to abstract, assign, and sequence codes, including complication or comorbidity/major complication or comorbidity (CC/MCC), and POA indicators, to obtain correct MS-DRG.

(5) **Medical Records Technician (Coder-Inpatient), GS-8**

(a) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(b) **Assignment.** This is the journey level for this assignment. Inpatient MRTs (Coder) select and assign codes from current versions of ICD CM, PCS, and/or CPT and HCPCS classification systems for inpatient facility and/or professional services. Inpatient duties consist of the performance of a comprehensive review of documentation within the health record to assign ICD codes for diagnosis, complications/major complications, comorbid/major comorbid conditions, surgery, and procedures for accurate assignment of diagnosis related groups (DRG), and/or assigning CPT/HCPCS codes for inpatient professional services. They independently review and abstract clinical data from the record for documentation of diagnoses and procedures to ensure it is adequate and appropriate to support the assigned codes. They code all complicated and complex medical/specialty diseases processes, patient injuries, and all medical procedures in a wide range of inpatient settings and specialties. They directly consult with the clinical staff for clarification of conflicting, incomplete, or
ambiguous clinical data in the health record. They must abstract, assign, and sequence codes into encoder software to obtain correct DRG, support medical necessity, resolve encoder edits, and ensure codes accurately reflect services rendered. They review provider health record documentation to ensure that it supports diagnostic and procedural codes assigned and is consistent with required medical coding nomenclature. They query clinical staff with documentation requirements to support the coding process. They also enter and correct information that has been rejected, when necessary. They correct any identified data errors or inconsistencies. They ensure audit findings have been corrected and refiled. They use various computer applications to abstract records, assign codes, and record and transmit data. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to analyze the health record to identify all pertinent diagnoses and procedures for inpatient coding and to evaluate the adequacy of the documentation. This includes the ability to read and understand the content of the health record, the terminology, the significance of the comments, and the disease process/pathophysiology of the patient.

ii. Ability to accurately perform the full scope of inpatient coding, including inpatient discharges, surgical cases, diagnostic studies and procedures, and inpatient professional services.

iii. Skill in interpreting and adapting health information guidelines that are not completely applicable to the work or have gaps in specificity, and the ability to use judgment in completing assignments using incomplete or inadequate guidelines.

c. **Medical Records Technician (Coder-Outpatient and Inpatient)**

1. **Medical Records Technician, GS-4**

   (a) **Experience or Education.** None beyond basic requirements.

   (b) **Assignment.** Employees at this level serve as entry level MRTs (Coder) and receive close supervision from more experienced MRTs (Coder). They select and assign codes from current versions of ICD CM, PCS, CPT, and HCPCS classification systems to both inpatient and outpatient records. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social and administrative data, and query clinical staff, as appropriate, with close guidance from higher level MRTs (Coder). They use various computer applications to abstract records, assign codes, and record and transmit data. They ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

2. **Medical Records Technician (Coder-Outpatient and Inpatient), GS-5**

   (a) **Experience.** One year of creditable experience equivalent to the next lower grade level;
OR,

(b) **Education.** Successful completion of a bachelor’s degree from an accredited college or university recognized by the U.S. Department of Education, with a major field of study in health information management, or a related degree with a minimum of 24 semester hours in health information management or technology.

(c) **Assignment.** Employees at this grade level serve as developmental level 1 MRTs (Coder) and receive guidance from more experienced MRTs (Coder) for more complex coding procedures. Selects and assigns codes from current versions of ICD CM, PCS, CPT, and HCPCS classification systems to both inpatient and outpatient records. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social, and administrative data, and query clinical staff, as appropriate, with guidance from higher level MRTs (Coder). They use various computer applications to abstract records, assign codes, and record and transmit data. They ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(d) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to use health information technology and various office software products used in MRT (Coder) positions (e.g., the electronic health record, coding and abstracting software, etc.).

ii. Ability to navigate through and abstract pertinent information from health records.

iii. Knowledge of the ICD CM, PCS Official Conventions and Guidelines for Coding and Reporting, and CPT guidelines.

iv. Ability to apply knowledge of medical terminology, human anatomy/physiology, and disease processes to accurately assign codes to inpatient and outpatient episodes of care based on health record documentation.

v. Knowledge of The Joint Commission requirements, CMS, and/or health record documentation guidelines.

vi. Ability to manage priorities and coordinate work to complete duties within required timeframes, and the ability to follow-up on pending issues.

(3) **Medical Records Technician (Coder-Outpatient and Inpatient), GS-6**

(a) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(b) **Assignment.** Employees at this grade level serve in developmental level 2 positions as MRTs (Coder) and receive intermittent monitoring. MRTs (Coder) perform a combination of inpatient and outpatient coding duties. They select and assign codes from current versions of
ICD CM, PCS, CPT, and HCPCS classification systems to both inpatient and outpatient records. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social, and administrative data, and query clinical staff, as appropriate, with limited guidance from higher level MRTs (Coder). They use various computer applications to abstract records, assign codes, and record and transmit data. They ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to analyze the health record to identify all pertinent diagnoses and procedures for coding and to evaluate the adequacy of the documentation.

ii. Ability to determine whether health records contain sufficient information for regulatory requirements, are acceptable as legal documents, are adequate for continuity of patient care, and support the assigned codes. This includes the ability to take appropriate actions if health record contents are not complete, accurate, timely, and/or reliable.

iii. Ability to apply laws and regulations on the confidentiality of health information (e.g., Privacy Act, Freedom of Information Act, and HIPAA).

iv. Ability to accurately apply the ICD CM, PCS Official Conventions and Guidelines for Coding and Reporting, and CPT Guidelines to various coding scenarios.

v. Comprehensive knowledge of current classification systems, such as ICD CM, PCS, CPT, HCPCS, and skill in applying classifications to both inpatient and outpatient records based on health record documentation.

vi. Knowledge of complication or comorbidity/major complication or comorbidity (CC/MCC) and POA indicators to obtain correct MS-DRG.

(4) **Medical Records Technician (Coder-Outpatient and Inpatient), GS-7**

(a) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(b) **Assignment.** Employees at this grade level serve as developmental level 3 MRTs (Coder) and receive minimal monitoring. MRTs (Coder) perform a combination of inpatient and outpatient coding duties. Selects and assigns codes from current versions of ICD CM, PCS, CPT, and HCPCS classification systems to both inpatient and outpatient records. They review record documentation to abstract all required medical, surgical, ancillary, demographic, social, and administrative data with minimal guidance from higher level MRTs (Coder). They review and abstract clinical data from the record for documentation of diagnoses and procedures to ensure it is adequate and appropriate to support the assigned codes. They review provider health record documentation to ensure that it supports the diagnostic and procedural codes assigned and is consistent with required medical coding nomenclature.
They also query clinical staff with documentation requirements to support the coding process. They use various computer applications to abstract records, assign codes, and record and transmit data. They ensure audit findings have been corrected and refiled. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in applying current coding classifications to a variety of inpatient and outpatient specialty care areas to accurately reflect service and care provided based on documentation in the health record.

ii. Ability to communicate with clinical staff for specific coding and documentation issues, such as recording inpatient and outpatient diagnoses and procedures, the correct sequencing of diagnoses and/or procedures, and the relationship between health record documentation and code assignment.

iii. Ability to research and solve coding and documentation related issues.

iv. Skill in reviewing and correcting system or processing errors and ensuring all assigned work is complete.

v. Ability to abstract, assign, and sequence codes, including complication or comorbidity/major complication or comorbidity (CC/MCC), and POA indicators to obtain correct MS-DRG.

(5) **Medical Records Technician (Coder-Outpatient and Inpatient), GS-8**

(a) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(b) **Assignment.** This is the journey level for this assignment. MRTs (Coder) at this level perform the full scope of inpatient and outpatient coding duties. MRTs (Coder) select and assign codes from current versions of ICD CM, PCS, CPT, and HCPCS classification systems to both inpatient and outpatient records. Inpatient duties consist of the performance of a comprehensive review of documentation within the health record to assign ICD CM and PCS codes for diagnosis, complications/major complications, comorbid/major comorbid conditions, surgery, and procedures for accurate assignment of DRGs. Outpatient duties consist of the performance of a comprehensive review of documentation within the health record to accurately assign ICD CM codes for diagnosis and complications, and CPT/HCPCS codes for surgeries, procedures, evaluation and management services, and inpatient professional services. They independently review and abstract clinical data from the record for documentation of diagnoses and procedures to ensure it is adequate and appropriate to support the assigned codes. They code all complicated and complex medical/specialty diseases processes, patient injuries, and all medical procedures in a wide range of ambulatory/inpatient settings and specialties. They directly consult with the clinical staff for clarification of conflicting, incomplete, or ambiguous clinical data in the health record. They
abstract, assign, and sequence codes into encoder software to obtain correct diagnosis-related DRG, support medical necessity, resolve encoder edits, and ensure codes accurately reflect services rendered. They review provider health record documentation to ensure that it supports diagnostic and procedural codes assigned, and is consistent with required medical coding nomenclature. They query clinical staff with documentation requirements to support the coding process. They enter and correct information that has been rejected, when necessary. They correct any identified data errors or inconsistencies. They also ensure audit findings have been corrected and refilled. They use various computer applications to abstract records, assign codes, and record and transmit data. MRTs (Coder) may be assigned to a single facility or region, such as a consolidated coding unit.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to analyze the health record to identify all pertinent diagnoses and procedures for coding and to evaluate the adequacy of the documentation. This includes the ability to read and understand the content of the health record, the terminology, the significance of the comments, and the disease process/pathophysiology of the patient.

ii. Ability to accurately perform the full scope of outpatient coding, including ambulatory surgical cases, diagnostic studies and procedures, and outpatient encounters, and inpatient facility coding, including inpatient discharges, surgical cases, diagnostic studies and procedures, and inpatient professional services.

iii. Skill in interpreting and adapting health information guidelines that are not completely applicable to the work, or have gaps in specificity, and the ability to use judgment in completing assignments using incomplete or inadequate guidelines.

(6) **Medical Records Technician (Clinical Documentation Improvement Specialist (CDIS-Outpatient)), GS-9**

(a) **Experience.** One year of creditable experience equivalent to the journey grade level of a MRT (Coder-Outpatient);

OR,

An associate's degree or higher and three years of experience in clinical documentation improvement (candidates must also have successfully completed coursework in medical terminology, anatomy and physiology, medical coding, and introduction to health records);

OR,

Mastery level certification through AHIMA or AAPC and two years of experience in clinical documentation improvement;
NOTE: See the definitions section of this standard (paragraph 2g above) for a detailed definition of mastery level certification.

OR,

Clinical experience, such as Registered Nurse (RN), Medical Doctor (M.D.), or Doctor of Osteopathy (DO), and one year of experience in clinical documentation improvement.

(b) Certification. Employees at this level must have either a mastery level certification or a Clinical Documentation Improvement Certification.

NOTE: See the definitions section of this standard (paragraph 2g and 2h) for a detailed definition of mastery level certification and clinical documentation improvement certification.

(c) Assignment. For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Outpatient CDISs must be able to perform all duties of a MRT (Coder-Outpatient). CDISs serve as the liaison between health information management and clinical staff. They are responsible for facilitating improved overall quality, education, completeness, and accuracy of health record documentation through extensive interaction with clinical, coding, and other associated staff to ensure clinical documentation supports services rendered to patients, appropriate workload, and resource allocations. They review documentation and facilitate modifications to the health record to ensure accurate complexity of care and utilization of resources. They identify opportunities for documentation improvement by ensuring that diagnoses and procedures are documented to the highest level of specificity, accurately address all acute and chronic conditions, and reflect the true health status of patients. They recommend changes and/or updates to medical center policy pertaining to clinical documentation improvement. They serve as a technical expert in health record content and documentation requirements. They query clinical staff to clarify ambiguous, conflicting, or incomplete documentation. They review appropriateness of and responses to queries through review of query reports. They are responsible for performing reviews of the health record documentation, developing criteria, collecting data, graphing and analyzing results, creating reports, and communicating orally and/or in writing to appropriate leadership and groups. They obtain appropriate corrective action plans from responsible clinical service directors and recommend improvements or changes in documentation practices when applicable. They adhere to established documentation requirements as outlined by accrediting agencies guidelines, regulations, policies, and medical-legal requirements. They monitor trends in the industry and/or changes in regulations that could or should impact coding and documentation practices and identify who may require education. They are responsible for the development and implementation of active training/education programs (i.e., seminars, workshops, short courses, informational briefings, and conferences) for all clinical staff to ensure the CDIS program objectives are met. They provide training in small or large groups, educating clinical staff about current documentation standards and improvement techniques including accurate and ethical documentation practices. They apply applicable coding conventions and guidelines to accurately reflect medical necessity and level of service or procedure performed in the outpatient setting.
(d) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of coding and documentation concepts, guidelines, and clinical terminology.

ii. Knowledge of anatomy and physiology, pathophysiology, and pharmacology in order to interpret and analyze all information in a patient’s health record, including laboratory and other test results, to identify opportunities for more precise and/or complete documentation in the health record.

iii. Ability to collect and analyze data and present results in various formats, which may include presenting reports to various organizational levels.

iv. Ability to establish and maintain strong verbal and written communication with providers.

v. Knowledge of regulations that define healthcare documentation requirements, including The Joint Commission, CMS, and VA guidelines.

vi. Extensive knowledge of coding rules and regulations to include current clinical classification systems (such as ICD, CPT, and HCPCS).

vii. Knowledge of CPT Evaluation and Management (E/M) criteria to ensure the correct selection of E/M codes that match patient type, setting of service, and level of E/M service provided.

viii. Knowledge of training methods and teaching skills sufficient to conduct continuing education for staff development. The training sessions may be technical in nature or may focus on teaching techniques for the improvement of clinical documentation issues.

(7) **Medical Records Technician (Clinical Documentation Improvement Specialist (CDIS - Inpatient)), GS-9**

(a) **Experience.** One year of creditable experience equivalent to the journey grade level of a MRT (Coder-inpatient);

OR,

An associate’s degree or higher, and three years of experience in clinical documentation improvement (candidates must also have successfully completed coursework in medical terminology, anatomy and physiology, medical coding, and introduction to health records);

OR,

Mastery level certification through AHIMA or AAPC, and two years of experience in clinical documentation improvement;
NOTE: See paragraph 2g above for a detailed definition of mastery level certification.

OR,

Clinical experience such as RN, M.D., or DO, and one year of experience in clinical documentation improvement.

(b) Certification. Employees at this level must have either a mastery level certification or a clinical documentation improvement certification.

NOTE: See paragraph 2g and 2h for a detailed definition of mastery level certification and clinical documentation improvement certification.

(c) Assignment. For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Inpatient CDISs must be able to perform all duties of a MRT (Coder-Inpatient). CDISs serve as the liaison between health information management and clinical staff. They are responsible for facilitating improved overall quality, education, completeness, and accuracy of health record documentation through extensive interaction with clinical, coding, and other associated staff to ensure clinical documentation supports services rendered to patients, appropriate workload is captured, and resources are properly allocated. They review documentation and facilitate modifications to the health record to ensure accurate severity of illness, risk of mortality, complexity of care, and utilization of resources. They identify opportunities for documentation improvement by ensuring that diagnoses and procedures are documented to the highest level of specificity. They recommend changes and/or update medical center policy pertaining to clinical documentation improvement. They serve as a technical expert in health record content and documentation requirements. They query clinical staff to clarify ambiguous, conflicting, or incomplete documentation. They review appropriateness of and responses to queries through review of query reports. They perform reviews of the health record documentation, developing criteria, collecting data, graphing and analyzing results, creating reports, and communicating orally and/or in writing to appropriate groups and leadership. They obtain appropriate corrective action plans from responsible clinical service directors and recommend improvements or changes in documentation practices, when applicable. They adhere to established documentation requirements as outlined by accrediting agencies guidelines, regulations, policies, and medical-legal requirements. They monitor trends in the industry and/or changes in regulations that could or should impact coding and documentation practices and identify who may require education. They are responsible for the development and implementation of active training/education programs (i.e., seminars, workshops, short courses, informational briefings, and conferences) for all clinical staff to ensure the CDIS program objectives are met. They provide training in small or large groups, educating clinical staff about current documentation standards and improvement techniques, including accurate and ethical documentation practices. They apply applicable coding conventions and guidelines to identify the principal and secondary diagnoses, and complete significant procedures to accurately reflect the patient’s hospital course and DRG assignment in the inpatient setting.
(d) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of coding and documentation concepts, guidelines, and clinical terminology.

ii. Knowledge of anatomy and physiology, pathophysiology, and pharmacology in order to interpret and analyze all information in a patient’s health record, including laboratory and other test results, to identify opportunities for more precise and/or complete documentation in the health record.

iii. Ability to collect and analyze data and present results in various formats, which may include presenting reports to various organizational levels.

iv. Ability to establish and maintain strong verbal and written communication with providers.

v. Knowledge of regulations that define healthcare documentation requirements, including The Joint Commission, CMS, and VA guidelines.

vi. Extensive knowledge of coding rules and regulations, to include current clinical classification systems such as ICD CM and PCS. They must also possess a knowledge of complication or comorbidity/major complication or comorbidity (CC/MCC), MS-DRG structure, and POA indicators.

viii. Knowledge of training methods and teaching skills sufficient to conduct continuing education for staff development. The training sessions may be technical in nature or may focus on teaching techniques for the improvement of clinical documentation issues.

(8) **Medical Records Technician (Clinical Documentation Improvement Specialist (CDIS-Outpatient and Inpatient)), GS-9**

(a) **Experience.** One year of creditable experience equivalent to the journey grade level of a MRT (Coder-Outpatient and Inpatient):

OR,

An associate’s degree or higher, and three years of experience in clinical documentation improvement (candidates must also have successfully completed coursework in medical terminology, anatomy and physiology, medical coding, and introduction to health records);

OR,

Mastery level certification through AHIMA or AAPC and two years of experience in clinical documentation improvement;
NOTE: See paragraph 2g for a detailed definition of mastery level certification.

OR,

Clinical experience such as RN, M.D., or DO, and one year of experience in clinical documentation improvement.

(b) Certification. Employees at this level must have either a mastery level certification or a clinical documentation improvement certification.

NOTE: See paragraph 2g and 2h for a detailed definition of mastery level certification and clinical documentation improvement certification.

(c) Assignment. For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. CDISs must be able to perform all duties of a MRT (Coder-Outpatient and Inpatient). CDISs serve as the liaison between health information management and clinical staff. They are responsible for facilitating improved overall quality, education, completeness and accuracy of health record documentation through extensive interaction with clinical, coding, and other associated staff to ensure clinical documentation supports services rendered to patients, appropriate workload is captured, and resources are properly allocated. They review documentation and facilitate modifications to the health record to ensure accurate severity of illness, risk of mortality, complexity of care, and utilization of resources. They identify opportunities for documentation improvement by ensuring that diagnoses and procedures are documented to the highest level of specificity, accurately address all acute and chronic conditions, and reflect the true health status of patients. They recommend changes and/or update medical center policy pertaining to clinical documentation improvement. They serve as a technical expert in health record content and documentation requirements. They query clinical staff to clarify ambiguous, conflicting, or incomplete documentation. They review appropriateness of and responses to queries through review of query reports. They review health record documentation, develop criteria, collect data, graph and analyze results, create reports, and communicate orally and/or in writing to appropriate groups and leadership. They obtain appropriate corrective action plans from responsible clinical service directors and recommend improvements or changes in documentation practices, when applicable. They adhere to established documentation requirements as outlined by accrediting agencies guidelines, regulations, policies, and medical-legal requirements. They monitor trends in the industry and/or changes in regulations that could, or should, impact coding and documentation practices and identify who may require education. They are responsible for the development and implementation of active training/education programs (i.e., seminars, workshops, short courses, informational briefings, and conferences) for all clinical staff to ensure the CDIS program objectives are met. They provide training in small or large groups, educating clinical staff about current documentation standards and improvement techniques, including accurate and ethical documentation practices. They apply applicable coding conventions and guidelines to identify the principal and secondary diagnoses and complete significant procedures to accurately reflect the patient’s hospital course and
DRG assignment in the inpatient setting. These are also applied to accurately reflect medical necessity and level of service or procedure performed in the outpatient setting.

(d) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of coding and documentation concepts, guidelines, and clinical terminology.

ii. Knowledge of anatomy and physiology, pathophysiology, and pharmacology to interpret and analyze all information in a patient’s health record, including laboratory and other test results to identify opportunities for more precise and/or complete documentation in the health record.

iii. Ability to collect and analyze data and present results in various formats, which may include presenting reports to various organizational levels.

iv. Ability to establish and maintain strong verbal and written communication with providers.

v. Knowledge of regulations that define healthcare documentation requirements, including The Joint Commission, CMS, and VA guidelines.

vi. Extensive knowledge of coding rules and regulations, to include current clinical classification systems such as ICDCM and PCS, CPT, and HCPCS. They must also possess knowledge of complication or comorbidity/major complication or comorbidity (CC/MCC), MS-DRG structure, and POA indicators.

vii. Knowledge of severity of illness, risk of mortality, complexity of care for inpatients, and CPT Evaluation and Management (E/M) criteria to ensure the correct selection of E/M codes that match patient type, setting of service, and level of E/M service provided for outpatients.

viii. Knowledge of training methods and teaching skills sufficient to conduct continuing education for staff development. The training sessions may be technical in nature or may focus on teaching techniques for the improvement of clinical documentation issues.

(9) **Medical Records Technician (Coder) Auditor, GS-9**

(a) Auditor assignments can be established for any of the coder subspecialties (outpatient, inpatient, or outpatient and inpatient combined). The subspecialty will be reflected in the title, e.g., MRT (Coder) Auditor (Outpatient).

(b) **Experience.** One year of creditable experience equivalent to the journey grade level of a MRT (Coder).

(c) **Certification.** Employees at this level must have a mastery level certification.

**NOTE:** See paragraph 2g for a detailed definition of mastery level certification.
(d) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Auditors must be able to perform all duties of a MRT (Coder). Auditors serve as experts of current coding conventions and guidelines related to professional and facility coding. Auditors perform audits of encounters to identify areas of non-compliance in coding. They facilitate improved overall quality, completeness, and accuracy of coded data. They provide recommendations on appropriate coding and are responsible for maintaining current knowledge of the various regulatory guidelines and requirements. They assist facility staff with documentation requirements to completely and accurately reflect the patient care provided. They provide technical support in the areas of regulations and policy, coding requirements, resident supervision, reimbursement, workload, accepted nomenclature, and proper sequencing. They directly consult with the clinical staff for clarification of conflicting or ambiguous clinical data. They use computer applications with varied functions to produce a wide range of reports, to abstract records, and review assigned codes. They perform prospective and retrospective coding audits and use results to identify documentation, coding inadequacies, and re-educate clinical and coding staff based on audit results. They act independently to plan, organize, and perform auditing with emphasis on data validation, analysis, and generation of reports. They assist in the development of guidelines for data quality, consistency, and monitoring for compliance to improve the quality of clinical, financial, and administrative data. They ensure that all coded data is fully documented and supported. They maintain statistical database(s) to track the results and validate the program. They identify patterns and variations in coding practices with regular reports to the medical staff and management.

(e) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Advanced knowledge of current coding classification systems such as ICD, CPT, and HCPCS for the subspecialty being assigned (outpatient, inpatient, outpatient and inpatient combined).

ii. Ability to research and solve complex questions related to coding conventions and guidelines in an accurate and timely manner.

iii. Ability to review coded data and supporting documentation to identify adherence to applicable standards, coding conventions and guidelines, and documentation requirements.

iv. Ability to format and present audit results, identify trends, and provide guidance to improve accuracy.

v. Skill in interpersonal relations and conflict resolution to deal with individuals at all organizational levels.
(10) Lead Medical Records Technician (Coder), GS-9

(a) Lead coder assignments can be established for any of the coder subspecialties (outpatient, inpatient, outpatient and inpatient combined). The subspecialty will be reflected in the title, e.g., Lead MRT (Coder-Outpatient).

(b) Experience. One year of creditable experience equivalent to the journey grade level MRT (Coder).

(c) Certification. Employees at this level must have a mastery level certification.

NOTE: See paragraph 2g for a detailed definition of mastery level certification.

(d) Assignment. For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Lead MRTs (Coder) must be able to perform all duties of a MRT (Coder). Lead MRTs (Coder) review coding and assist MRTs (Coder) in ensuring timeliness and improving coding accuracy; provide coding guidance to various levels of staff to promote consistency in practice and compliance with coding rules and regulations; initiate, prepare, and maintain various reports, and analyze data; and may also coordinate, assign, and monitor workflow. They provide input for performance evaluations and hiring. They orient and instruct new coding personnel and/or students on coding, abstracting, and use of the electronic health record and encoder software. They ensure audit findings and claim denials related to coding errors are resolved and/or daily coding rejects corrected for accurate billing and data collection. They monitor trends and/or changes in regulatory and policy requirements affecting coding practices and identify educational needs. They develop coding training materials and present a curriculum encompassing ongoing training initiatives. They provide assistance with coding inquiries from providers, MRTs (Coder), billers, and other facility staff. Lead MRTs whose assignments involve two or more MRT specialty areas will be assigned the parenthetical title for the predominant specialty area. Lead MRTs (Coder) may be at a facility or in a consolidated coding unit (CCU).

(e) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to work with a team to provide technical guidance, plan, organize, and coordinate activities in order to effectively complete job duties of assignment, such as distributing workload, monitoring the status and progress of work, monitoring accuracy of work, etc.

ii. Advanced knowledge of current coding classification systems for the subspecialty being assigned (outpatient, inpatient, outpatient and inpatient combined) and the ability to research and solve complex questions related to coding conventions and guidelines in an accurate and timely manner.
iii. Ability to effectively communicate, both orally and in writing, in order to meet program objectives.

iv. Knowledge of training methods and the ability to provide training to new coding staff.

v. Ability to collect and analyze data and present results in various formats, which may include presenting reports to various organizational levels.

vi. Leadership skills, including interpersonal relations and conflict resolution between employees, managers, and clinical staff.

(11) Supervisory Medical Records Technician (Coder), GS-10

(a) Supervisory coder assignments can be established for any of the coder subspecialties (outpatient, inpatient, outpatient and inpatient combined). The subspecialty will be reflected in the title, e.g., Supervisory MRT (Coder-Outpatient).

(b) Experience. One year of creditable experience equivalent to the next lower grade level.

(c) Certification. Employees at this level must have a mastery level certification. NOTE: See paragraph 2g for a detailed definition of mastery level certification.

(d) Assignment. For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Supervisory MRTs (Coder) are responsible for supervising coding staff at the facility level. Supervisory MRTs (Coder) must be able to perform all duties of a MRT (Coder). The supervisory coder is responsible for the supervision, administrative management, and direction of coding staff. They are responsible for program management of a coding section/unit to ensure performance monitors are established and met. They perform a full range of supervisory responsibilities, to include evaluating the performance of subordinate staff, approving sick and annual leave requests, identifying educational or training needs, resolving employee complaints, and taking disciplinary actions, when necessary. They inform higher level management of anticipated vacancies or increases in workload. They recommend employees for promotions, reassignments, recognitions, retention or release of probationary employees, or other changes of assigned personnel. They make decisions on the selection of employees for vacant or new positions. They serve as an expert coding resource to ensure accuracy and integrity of all coding. They collaborate with revenue, compliance, and other departments to support coding accuracy that is consistent with the official guidelines for coding and reporting. They resolve claim edits referred to coding management and monitor reports for outstanding services, rejects, or uncoded episodes of care for inpatients and/or outpatients. The supervisory coder ensures claim denials related to coding errors are resolved, and/or daily coding rejects are corrected for accurate billing and data collection. They provide education to clinical and coding staff. They assess current audit findings and evaluate impact to coding and documentation practices. They oversee the reporting of coding and documentation audit results to leadership. They collect and prepare data for studies involving inpatient stays and
outpatient encounters for clinical evaluation purposes, prepare and maintain a variety of complex records and daily, monthly, or "on demand" reports, as requested. The supervisory coder creates and monitors outpatient reports, inpatient case mix reports, top DRGs, and key performance indicators to identify patterns, trends, and variations. They investigate and evaluate potential causes for changes or problems and collaborate with the appropriate staff to effect resolution or explain variances. They participate in the formulation of objectives and strategies utilizing coded data to support goals for patient care, teaching, research, and optimizing management of resources. Supervisory MRTs whose assignments involve two or more MRT specialty areas will be assigned the parenthetical title for the predominant specialty area.

(e) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   i. Ability to perform a full range of supervisory duties, to include recommending awards, approving leave, evaluating work, resolving staff issues, and assigning, planning, and coordinating work to ensure duties are completed in an accurate and timely fashion.

   ii. Advanced knowledge of current coding classification systems such as ICD, CPT, and HCPCS for the subspecialty being assigned (outpatient, inpatient, outpatient and inpatient combined).

   iii. Ability to provide or coordinate staff development and training.

   iv. Leadership and managerial skills, including skill in interpersonal relations and conflict resolution to deal with employees, team leaders, and managers.

   v. Ability to collect and analyze data, identify trends, and present results in various formats.

(12) **Supervisory Medical Records Technician (Coder) (Consolidated Coding Unit (CCU)), GS-10**

   (a) **Consolidated Coding Unit (CCU).** Supervisory coder (CCU) assignments can be established for any of the coder subspecialties (outpatient, inpatient, outpatient and inpatient combined). The subspecialty will be reflected in the title, e.g., Supervisory (Coder-Outpatient) CCU.

   (b) **Experience.** One year of creditable experience equivalent to the next lower grade level.

   (c) **Certification.** Employees at this level must have a mastery level certification. **NOTE:** See paragraph 2g for a detailed definition of mastery level certification.

   (d) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Supervisory MRTs (Coder) (CCU) are responsible for supervising coding staff within an entire
network or region, such as a consolidated coding unit or VISN coding pool. They collaboratively work with the Chief HIM at each facility within the assigned region/network in order to coordinate work related to the consolidated coding unit and resolve any problems which could impede the progress of the unit. They coordinate and maintain effective communication with the medical centers and CPAC within an assigned region/network in order to accomplish coding assignments for the consolidated coding unit. Supervisory MRTs (Coder) (CCU) must be able to perform all duties of a MRT (Coder). The supervisory coder performs a full range of supervisory responsibilities, to include evaluating the performance of subordinate staff, approving sick and annual leave requests, identifying educational or training needs, resolving employee complaints, and taking disciplinary actions. They inform higher level management of anticipated vacancies or increases in workload. They recommend employees for promotions, reassignments, recognitions, retention or release of probationary employees, or other changes of assigned personnel. They make decisions on the selection of employees for vacant or new positions. They serve as an expert coding resource to ensure accuracy and integrity of all coding. They collaborate with revenue, compliance, and other departments to support coding accuracy that is consistent with the official guidelines for coding and reporting. They resolve claim edits referred to coding management and monitor reports for outstanding services, rejects, or uncoded discharges for inpatients and/or outpatients. They resolve claim denials related to coding errors and ensure coding corrections and rebilling, as required. They provide education to clinical and coding staff. They assess current audit findings activities and evaluate impact to coding and documentation practices. The supervisory coder oversees the reporting of coding and documentation audit results to leadership. They collect and prepare data for studies involving inpatient stays and outpatient encounters for clinical evaluation purposes, prepare and maintain a variety of complex records and daily, monthly, or "on demand" reports, as requested. They create and monitor outpatient reports, inpatient case mix reports, top DRGs, and key performance indicators to identify patterns, trends, and variations, investigate and evaluate potential causes for changes or problems, and take appropriate steps, in collaboration with the appropriate staff, to effect resolution or explain variances. They participate in the formulation of objectives and strategies using coded data to support goals for patient care, teaching, research, and optimizing management of resources.
(e) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to perform a full range of supervisory duties, to include recommending awards, approving leave, evaluating work, resolving staff issues, and assigning, planning, and coordinating work to ensure duties are completed in an accurate and timely fashion.

ii. Advanced knowledge of current coding classification systems such as ICD, CPT, and HCPCS for the subspecialty being assigned (outpatient, inpatient, outpatient and inpatient combined).

iii. Ability to provide or coordinate staff development and training.

iv. Leadership and managerial skills, including skill in interpersonal relations and conflict resolution to deal with employees, team leaders, and managers.

v. Ability to collect and analyze data, identify trends, and present results in various formats.

5. **DEVIATIONS.**

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for MRTs in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrants such action, based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the certification requirements be waived.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

**Authority:** 38 U.S.C. §§ 7402, 7403.]
[APPENDIX G58. MEDICAL RECORDS TECHNICIAN (RELEASE OF INFORMATION) QUALIFICATION STANDARD
GS-0675
Veterans Health Administration

COVERAGE. Release of information falls under the jurisdiction of Health Information Management. The following are the requirements for appointment as a Medical Records Technician (MRT) (Release of Information (ROI)) in the Veterans Health Administration (VHA). These requirements apply to all VHA MRT (ROI) assignments in the GS-0675 series. The MRT (ROI) reviews and processes requests for patient protected health information (PHI). The MRT (ROI) also provides direct customer service to the Veteran (or third party), by providing copies of the Veteran’s PHI, when a signed, written request is received, or upon the Veteran’s valid authorization to a third party. The MRT (ROI) must ensure that only the information that the Veteran specified be released, is shared only with those whom the Veteran has authorized, or who have legal authority to receive such information. To perform this task, a MRT (ROI) must possess expertise in all applicable Federal laws, rules, and regulations regarding release of health information.

DEFINITIONS.

a. **Journey Level.** The full performance level for the MRT (ROI) assignment is GS-6.

b. **Creditable Experience.** Experience is only creditable if it is paid or non-paid employment directly related to the position to be filled, or in a related field such as medical support assistants, ward clerks, health record file room/scanning technicians, incomplete health record analysis, medical coding, or other positions that included knowledge of the content and use of health records. To be creditable, the candidate’s experience must have demonstrated the use of knowledge, skills, and abilities associated with current release of information practice.

c. **Quality of Experience.** To be creditable, experience must be documented on the application or resume, and verified through an employment reference or other independent means.

d. **Part-Time Experience.** Part-time experience as a professional MRT (ROI) is creditable according to its relationship to the full-time workweek. For example, a MRT (ROI) would receive one week of full-time credit for each two weeks of half-time work.

e. **Predominant Specialty Area.** Lead and Supervisory MRT (ROI) whose assignments involve two or more MRT specialty areas will be assigned the parenthetical title for the predominant specialty area being led/supervised.
BASIC REQUIREMENTS.

a. **Citizenship.** Be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, of this part.)

b. **Experience and Education**

   (1) **Experience.** One year of creditable experience that indicates knowledge of medical terminology and general understanding of health records. Six months of the required one year of creditable experience must have provided the knowledge, skills, and abilities (KSAs) needed to perform MRT (ROI) work.

   OR,

   (2) **Education.** An associate’s degree from an accredited college or university recognized by the U.S. Department of Education with a major field of study in health information technology/health information management, or a related degree with a minimum of 12 semester hours in health information technology/health information management (e.g., courses in medical terminology, anatomy and physiology, legal aspects of health care, and introduction to health records).

   OR,

   (3) **Experience/Education Combination.** Equivalent combinations of creditable experience and education are qualifying towards meeting basic experience requirements. The following experience and educational/training substitutions are appropriate for combining education and creditable experience:

   (a) Six months of creditable experience that indicates knowledge of medical terminology, privacy and release of information, the health record, and one year above high school with a minimum of six semester hours of health information technology/health information management courses.

   (b) Six months of creditable experience that indicates knowledge of medical terminology, privacy and release of information, the health record, and successful completion of a course for medical technicians, hospital corpsmen, medical service specialists, or hospital training obtained in a training program given by the Armed Forces or the U.S. Maritime Service under close medical and professional supervision. The training program may be substituted on a month-for-month basis for up to six months of experience provided the training program included courses in anatomy and physiology, and health record techniques and procedures.

c. **Grandfathering Provision.** All persons employed in VHA as a MRT (ROI) on the effective date of this qualification standard are considered to have met all qualification
requirements for the grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. Employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees in an occupation that does not require a licensure/certification/registration may be reassigned, promoted, or demoted within the occupation, but will not be promoted beyond the journey level or placed in supervisory or managerial positions.

(2) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended, or be reappointed on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

e. **English Language Proficiency.** MRTs (ROI) must be proficient in spoken and written English, as required by 38 U.S.C. § 7403(f).

**GRADE REQUIREMENTS.**

a. **MRT (ROI).** All individuals assigned to this occupation must have an approved parenthetical title, as described below:

(1) MRT (ROI)

(2) MRT (ROI-Legal);

(3) Lead MRT (ROI); or

(4) Supervisory MRT (ROI).

**GRADE DETERMINATIONS.**

a. **Medical Records Technician (ROI), GS-4**

   (1) **Experience or Education.** None beyond basic requirements.
(2) **Assignment.** Employees at this level serve in entry level MRT (ROI) position and receive close supervision and support from more experienced ROI staff members. MRTs (ROI) receive and validate authorization forms and requests for information, and prioritize requests per policies and regulations. They use various computer applications to track and release all authorized ROI requests. They process and release health information to authorized first- and third-party requestors. MRTs (ROI) initiate and maintain the accounting of disclosure for all records disclosed from a Privacy Act system of records. They ensure compliance with policies, procedures, laws, and regulations governing privacy and release of information.

b. **Medical Records Technician (ROI), GS-5**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level;

OR,

(2) **Education.** Successful completion of a bachelor’s degree from an accredited college or university recognized by the U.S. Department of Education, with a major field of study in health information management, or a related degree with a minimum of 24 semester hours in health information technology/health information management (e.g., courses in medical terminology, anatomy and physiology, legal aspects of health care, and introduction to health records).

(3) **Assignment.** Employees at this grade level serve in developmental positions as MRTs (ROI) and receive guidance from more experienced staff members for complex release of information procedures. They receive and validate authorization forms and requests for information and prioritize requests according to policies and regulations. They utilize various computer applications to track and release all authorized release of information requests. They also process and release health information to authorized first- and third-party requestors. They initiate and maintain accounting of disclosure for all records disclosed from a Privacy Act system of records. They communicate with internal and external stakeholders to provide technical expertise regarding the release of information process. They ensure compliance with policies, procedures, laws, and regulations governing privacy and release of information.

(4) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to utilize health information technology and various office software products utilized in MRT (ROI) positions (e.g., the electronic health record, release of information systems, etc.).

(b) Knowledge of health record documentation guidelines and processes for disclosing protected health information.

(c) Ability to manage priorities and coordinate work in order to complete duties within required timeframes, and the ability to follow-up on pending issues.
(d) Knowledge of policies, procedures, laws, and regulations governing privacy and release of information.

(e) Ability to communicate with individuals from various backgrounds to obtain the desired effect or gaining information by establishing rapport.

c. **Medical Records Technician (ROI), GS-6**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(2) **Assignment.** This is considered the journey level for MRT (ROI) positions. Employees at this level apply, interpret, and analyze laws and regulations related to the disclosure of health information. MRTs (ROI) are responsible for educating requestors on requirements for submitting requests for health information. They receive and validate authorization forms and requests for information and prioritize requests according to policies and regulations. They use various computer applications to track and release all authorized release of information requests. MRTs (ROI) process and release health information to authorized first- and third-party requestors. They initiate and maintain the accounting of disclosure for all records disclosed from a Privacy Act system of records. They communicate with internal and external stakeholders to provide technical expertise regarding the release of information process. They ensure compliance with policies, procedures, laws, and regulations governing privacy and release of information.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of the laws and regulations related to the authorization and disclosure of health information (e.g., Privacy Act, Freedom of Information Act, Health Insurance Portability and Accountability Act (HIPAA), and 38 U.S.C. § 7332, Confidentiality of Certain Medical Records).

(b) Ability to apply health record documentation guidelines and processes to navigate efficiently through the paper and/or electronic health record to locate, assemble, and disclose protected health information.

(c) Ability to apply policies, procedures, laws, and regulations governing privacy and release of information to process requests for release of information.

(d) Ability to research and solve difficult questions related to release of health information in an accurate and timely manner.

d. **Medical Records Technician (ROI-Legal), GS-7**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level.
(2) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. MRTs at this grade level will serve as the sole point of contact, and accurately process and timely respond to complex medical legal requests, including, but not limited to, subpoenas, depositions, testimony, tortfeasor (Third Party Liability), Workers’ Compensation, Labor and Industries, and court orders for information from attorneys, courts, local law enforcement agencies, public defenders, or insurance agencies. They serve as a liaison to Regional Counsels and U.S. Attorney’s offices, for trial cases. They review and analyze requests to ascertain the type of case to be developed. MRTs (ROI -Legal) ensure all disclosures are made in compliance with existing policies, procedures, guidelines, laws, and regulations. They ensure that information released is limited to what is specifically authorized and to the person or agency designated to receive it. They maintain the accounting of disclosures for all legal cases. MRTs (ROI-Legal) compile the legal health record and provide advisory and technical assistance to patients and internal and external stakeholders pertaining to medical legal requests. They extensively research and resolve conflicting or inconsistent information related to complex medical legal requests.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of the laws and regulations related to the authorization and disclosure of health information.

(b) Ability to apply laws and regulations related to the disclosure of health information (e.g., Privacy Act, Freedom of Information Act, HIPAA, and 38 U.S.C. § 7332, Confidentiality of Certain Medical Records).

(c) Ability to investigate the contents of paper and electronic health records and systems that contain health information to compile the legal health record based on existing standards and requirements.

e. **Lead Medical Records Technician (ROI), GS-7**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(2) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. This assignment is for facilities that cannot justify or support a MRT (ROI-Legal) assignment, and must place a lead MRT (ROI) over employees up to the journey level. Lead MRTs (ROI) monitor quality and quantity of work to ensure adherence to applicable requirements and regulations. They ensure the work assignments of the team are carried out by performing duties which include distributing and balancing workload, monitoring the status and progress of work, instructing and answering employee questions, checking employee work, and amending or rejecting work not meeting standards. Lead MRTs (ROI) develop training and provide resources pertaining to VHA and other Federal policies, guidelines, and regulations. They conduct training for all new
release of information staff regarding the software, the process of requesting archived health records, and the use of VHA computer applications. Lead MRTs (ROI) act as the technical experts and provide consultation regarding HIPAA and the Privacy Act, as it pertains to release of information.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to work with a team to provide technical guidance, plan, organize, and coordinate activities of release of information to effectively complete job assignments (i.e., distributing workload, monitoring the status and progress of work, monitoring accuracy of work, and ensuring required timelines are met.)

(b) Knowledge of the laws and regulations related to the authorization and disclosure of health information.

(c) Ability to effectively communicate, both orally and in writing, to meet program objectives.

(d) Ability to prepare reports in various formats and present data to various organizational levels.

(e) Ability to provide or coordinate staff development and training.

f. **Supervisory Medical Records Technician (ROI), GS-7**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(2) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. This supervisory MRT (ROI) will be assigned responsibilities at smaller medical centers where a GS-7 Lead MRT (ROI) or MRT (ROI-Legal) assignment cannot be supported, justified, or established. The supervisory MRT (ROI) is responsible for the supervision, administrative management, and direction of ROI staff at or below the journey level. They generate workload reports, distribute pending workload to staff, and monitor completion status. They ensure timely release of health records in accordance with policies and procedures. The supervisory MRT (ROI) ensures orientation and competency assessment of assigned staff is conducted. They develop policies and procedures, performance standards, position descriptions, and/or functional statements. They maintain interdepartmental relations with other services to accomplish medical center goals. The supervisory MRT (ROI) also serves as the primary point of contact, and will accurately process, and provide timely responses to complex medical legal requests, including, but not limited to, subpoenas, depositions, testimony, court orders for information from attorneys, courts, local law enforcement agencies, and/or public defenders. They serve as a liaison to Regional Counsels and U.S. Attorney’s offices, for trial cases. They compile the legal health record and research and resolve conflicting or inconsistent information related to complex medical and legal requests.
(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of the laws and regulations related to the authorization and disclosure of health information.

(b) Ability to manage and supervise individuals, set priorities, and schedule work assignments.

(c) Skill in interpersonal relations and conflict resolution.

(d) Ability to investigate the contents of paper and electronic health records and systems that contain health information to compile the legal health record based on existing standards and requirements.

(e) Ability to provide or coordinate staff development and training.

(f) Knowledge of and ability to provide a full range of supervisory duties, to include responsibility for assignment of work, performance evaluation, selection of staff, recommendations of awards, advancements, and disciplinary actions.

g. **Lead Medical Records Technician (ROI), GS-8**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(2) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Lead MRTs (ROI) distribute and prioritize workload among employees. Individuals in this assignment perform lead functions over GS-6 MRT (ROI) and GS-7 MRT (ROI-Legal) positions. Lead MRTs (ROI) ensure an even workflow and distribution of the workload, as well as resolve workflow and workplace issues. They revise work assignments to meet anticipated and unanticipated needs, as necessary. They also review work in progress, or spot check work to ensure compliance with established procedures, methods, and deadlines. They monitor daily productivity and accuracy of staff ensuring turnaround times are met and backlogs are addressed. They keep management informed of performance issues, assignment changes, and task completion. They also provide guidance to employees on work-related activities, policies, procedures, and goals. The Lead MRT (ROI) develops trainings and provides resources pertaining to VHA and other Federal policies, guidelines, and regulations. They conduct training for all new release of information staff regarding the software, the process of requesting archived health records, and the use of VA computer applications. They act as a technical expert and provide consultation regarding HIPAA and the Privacy Act, as it pertains to release of information.
(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to lead individuals, set priorities, and schedule work assignments.

(b) Ability to monitor and report on the status and progress of work, and make adjustments to accomplish the workload in accordance with established procedures.

(c) Skill in communicating with staff to ensure compliance with established policies, procedures, and regulations.

(d) Ability to provide or coordinate staff development and training.

**h. Supervisory Medical Records Technician (ROI), GS-8**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(2) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. This assignment performs supervision, administrative management, and direction of release of information staff, which includes GS-7 MRT (ROI-Legal), and lead MRT (ROI) positions. They have full supervisory responsibility, including preparing work assignments, monitoring the performance of release of information staff, evaluating employee performance, selecting staff, recommending awards and advancements, and taking disciplinary actions. The supervisory MRT(ROI) generates workload reports, distributes pending workload to staff, and monitors completion status. The employee ensures the timely release of health records in accordance with policies and procedures. They ensure compliance with accrediting agency and regulatory requirements and ensure corrective action is initiated, as needed. They work collaboratively with VA Regional Counsel to ensure health records related to malpractice, subpoenas, and tort cases are prepared and disclosed in a timely manner. The supervisory MRT (ROI) ensures orientation and competency assessments are conducted for all assigned staff. They develop policies and procedures, performance standards, and position descriptions, and/or functional statements. They are responsible for professional and administrative management of release of information staff. They maintain interdepartmental relations with other services to accomplish medical center goals.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to develop policy and provide workload analysis for release of information.

(b) Skill in interpersonal relations and conflict resolution.

(c) Ability to provide or coordinate staff development and training.
(d) Ability to provide the full range of supervisory duties, to include responsibility for assignment of work to be performed, performance evaluation, selection of staff, recommendations of awards, advancements, and disciplinary actions.

1. DEVIATIONS.

   a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for MRT (ROI) in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

   b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. §§ 7402, 7403.]
[APPENDIX G59. MEDICAL RECORDS TECHNICIAN (HEALTH INFORMATION TECHNICIAN) QUALIFICATION STANDARD
GS-0675
Veterans Health Administration]

COVERAGE. Health information technology falls under the jurisdiction of Health Information Management (HIM). The following are the requirements for appointment as a Medical Records Technician (MRT) Health Information Technician (HIT) in the Veterans Health Administration (VHA). These requirements apply to all VHA MRTs HIT in the GS-0675 series. MRTs HIT perform incomplete health record analysis. They review, analyze, abstract, maintain, extract, and compile information from the health record. MRTs HIT check for accuracy, completeness, and timeliness of the health record and monitor and report for regulatory compliance.

DEFINITIONS.

a. Journey Level. The full performance level for the MRT HIT assignment is GS-7.

b. Creditable Experience. Experience is only creditable if it is paid or non-paid employment directly related to the position to be filled, or in a related field, such as medical support assistants, clinic/ward clerks, health record file room/scanning technicians, medical coding, or other positions that include knowledge of the content and uses of health records. To be creditable, the candidate’s experience must have demonstrated the use of knowledge, skills, and abilities associated with current MRT HIT practice.

c. Quality of Experience. To be creditable, experience must be documented on the application or resume and verified in an employment reference, or through other independent means.

d. Part-Time Experience. Part-time experience as a MRT HIT is creditable according to its relationship to the full-time workweek. For example, a MRT HIT would receive one week of full-time credit for each two weeks of half-time work.

e. Predominant Specialty Area. Lead and Supervisory MRTs HIT, whose assignments involve two or more MRT specialty areas, will be assigned the parenthetical title for the predominant specialty area being led/supervised.

BASIC REQUIREMENTS.

a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)
b. **Experience and Education.**

(1) **Experience.** One year of creditable experience that indicates knowledge of medical terminology, anatomy, physiology, and a general understanding of health records. Six months of the required one year of creditable experience must have provided the knowledge, skills, and abilities (KSAs) needed to perform MRT HIT work.

OR,

(2) **Education.** An associate’s degree from an accredited college or university recognized by the U.S. Department of Education, with a major field of study in health information technology/health information management, or a related degree with a minimum of 12 semester hours in health information technology/health information management (e.g., courses in medical terminology, anatomy, physiology, legal aspects of health care, and introduction to health records).

OR,

(3) **Experience/Education Combination.** Equivalent combinations of creditable experience and education are qualifying towards meeting basic experience requirements. The following educational/training substitutions are appropriate for combining education and creditable experience:

(a) Six months of creditable experience that indicates knowledge of medical terminology, privacy and release of information, the health record, and one year above high school with a minimum of six semester hours of health information technology/health information management.

(b) Six months of creditable experience that indicates knowledge of medical terminology, privacy and release of information, the health record, and successful completion of a course for medical technicians, hospital corpsmen, medical service specialists, or hospital training obtained in a training program given by the U.S. Armed Forces or the U.S. Maritime Service, under close medical and professional supervision, may be substituted on a month-for-month basis for up to six months of experience, provided the training program included courses in anatomy, physiology, and health record techniques and procedures.

c. **Grandfathering Provision.** All persons employed in VHA as a MRT HIT, on the effective date of this qualification standard, are considered to have met all qualification requirements for the grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Such employees in an occupation that does not require a licensure/certification/registration, may be reassigned, promoted, or demoted within the occupation, but will not be promoted beyond the journey level or placed in supervisory or managerial positions.
(2) Employees appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended, or be reappointed on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard, must maintain the required credentials, as a condition of employment in the occupation.

b. English Language Proficiency. MRTs HIT must be proficient in spoken and written English, as required by 38 U.S.C. § 7403(f).

GRADE REQUIREMENTS. All MRT HIT employees assigned to this occupation must have an approved parenthetical title as described below:

a. MRT (HIT);

b. Lead MRT (HIT); or

c. Supervisory MRT (HIT).

GRADE DETERMINATIONS AND ASSIGNMENTS.

a. Medical Records Technician (HIT), GS-4 (Entry Level)

(1) Experience or Education. None beyond basic requirements.

(2) Assignment. Employees at this level serve as entry level MRTs HIT, and receive close supervision from the supervisory MRT HIT or designee. MRTs HIT analyze health records for accuracy, completeness, timeliness, consistency, and compliance (e.g., scanned, uploaded, use of correct titles, linked to correct encounters, etc.), with HIM industry standards, policies, procedures, laws, regulations, and accrediting bodies. They perform health record review activities to satisfy external accreditation requirements and medical center performance measures. They monitor, verify, correct, and upload all transcription/medical speech recognition to maintain completeness and accuracy of health records.

b. Medical Records Technician (HIT), GS-5 (Developmental Level 1)

(1) Experience. One year of experience equivalent to the next lower level.

OR,

(2) Education. A bachelor's degree from an accredited college or university recognized by the U.S. Department of Education with a major field of study in health information management, or a related degree with a minimum of 24 semester hours in health information
technology/health information management (e.g., courses in medical terminology, anatomy & physiology, legal aspects of health care, and introduction to health records).

(3) Assignment. Employees at this grade level serve in developmental positions as MRTs HIT. Employees receive guidance from the supervisory MRT HIT, or designee, for more complex health record reviews. MRTs HIT analyze health records for accuracy, completeness, timeliness, consistency, and compliance (e.g., scanned, uploaded, use of correct titles, linked to correct encounters, etc.) with HIM industry standards, policies, procedures, laws, regulations, and accreditation requirement. They perform health record review activities to satisfy external accreditation requirements and medical center performance measures. They create and monitor reports to ensure that deficiencies are resolved and completed appropriately. They monitor, verify, correct, and/or upload all transcription/medical speech recognition to maintain completeness and accuracy of health records. MRTs HIT notify clinical providers regarding incomplete health records, and assist clinical providers regarding completeness of their health record documentation.

(4) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to communicate effectively with internal and external customers.

(b) Ability to utilize health information technology and various office software products used in health information management positions (e.g., Microsoft Excel, electronic health records, and delinquency tracking software).

(c) Knowledge of health record documentation guidelines and industry standards.

(d) Ability to manage priorities and coordinate work to complete duties within required timeframes.

(e) Ability to apply knowledge of medical terminology and human anatomy to fully understand the content of a health record.

C. Medical Records Technician (HIT), GS-6

(1) Experience. One year of experience equivalent to the next lower grade level.

(2) Assignment. This is a developmental level for MRT HIT. The MRT HIT at this level receives guidance from the supervisory MRT HIT, or designee, for more complex health records. The MRT HIT analyzes, abstracts, maintains, extracts and compiles information from the health record, working under the review of the supervisor. They analyze health records for accuracy, completeness, timeliness, consistency, and compliance (e.g., scanned, uploaded, use of correct titles, linked to correct encounters, etc.) with HIM industry standards, policies, procedures, laws, regulations, and accreditation requirements. They coordinate and/or perform health record review activities to satisfy external accreditation requirements and
medical center performance measures. The MRT HIT notifies clinical providers regarding incomplete health records. They assist clinical providers regarding completeness of their health record documentation, and the correction of health records. They conduct reviews of incomplete records for individuals clearing the facility. They create and monitor reports to ensure that deficiencies are resolved and completed appropriately. They monitor, verify, correct, and/or upload all transcription/medical speech recognition to maintain completeness and accuracy of health records. MRTs HIT serve as the technical experts in health record content and documentation requirements.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to navigate efficiently through the health record to locate needed information.

(b) Ability to analyze health record documentation to ensure compliance with guidelines and industry standards.

(c) Skill in investigating potential health record errors and making corrections, when appropriate.

(d) Skill in interpreting and applying health information guidelines and using judgment to complete assignments.

(e) Ability to follow up on incomplete health record documentation.

d. **Medical Records Technician (HIT), GS-7 (Full Performance Level)**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Assignment.** This is considered the journey level for MRTs HIT. MRTs HIT at this level review, analyze, abstract, maintain, extract, and compile information from the health record independently with minimal supervision. They analyze health records for accuracy, completeness, timeliness, consistency, and compliance (e.g., scanned, uploaded, use of correct titles, linked to correct encounters, etc.) with HIM industry standards, policies, procedures, laws, regulations, and accreditation requirements. They also coordinate and/or perform health record review activities to satisfy external accreditation requirements and medical center performance measures. They communicate regularly with staff at various levels of the organization regarding delinquent health records, and notify individual clinical providers regarding incomplete medical records. MRTs HIT prepare complex reports, calculate department statistics, note the status of all incomplete/delinquent records, and submit reports to the appropriate administrative and clinical staff and committees/leadership to ensure deficiencies are resolved and completed appropriately. They serve as the expert resource for clinical staff and assist clinical providers with completion or correction of their health record documentation. They conduct the review of incomplete records for individuals clearing the facility. MRTs HIT coordinate the use of medical speech recognition/transcription and monitor, verify, troubleshoot, correct, and/or upload all transcription/medical speech...
recognition to maintain completeness and accuracy of health records. They serve as the technical expert in health record content and documentation requirements.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to judge whether health records contain sufficient information for regulatory requirements, are acceptable as legal documents, are adequate for continuity of patient care, and support education and research needs.

(b) Ability to take appropriate actions if health record content is not adequate, accurate, timely, and/or reliable.

(c) Ability to communicate both orally and in writing with individuals or groups, to facilitate compliance with established policies and regulations.

(d) Skill in using appropriate software and computer applications to analyze and record documentation trends.

(e) Ability to apply qualitative and/or quantitative methods for assessment and improvement of health records.

(f) Ability to work independently and utilize problem-solving techniques in the accomplishment of work.

**e. Lead Medical Records Technician (HIT), GS-8**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Lead MRTs HIT perform quantitative and qualitative reviews of health record documentation, initiate various reports, and analyze data. They coordinate, assign, and monitor the workflow. They ensure that team assignments are carried out by distributing and balancing workload, monitoring the status and progress of work, and adjusting workload in accordance with established priorities, instructing and answering employee questions, checking employee work, and amending or rejecting work that does not meet work standards. They resolve informal complaints of employees and make recommendations to the supervisor, as requested, concerning promotions, reassignments, recognition of performance, and personnel needs. Lead MRTs HIT train and provide expert advice on specific tasks, procedures, and policies. They serve as technical expert in health record content and documentation requirements, and as an expert resource for clinical staff regarding requirements for complete documentation. They create statistical reports for medical center management. Lead MRTs HIT are responsible for assisting staff with completing the health record for patient transfers, legal cases, or other urgent requests.
They identify and abstract information from health records for internal and external audits and special studies.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Comprehensive knowledge of health record technology methods, procedures, and techniques.

(b) Ability to work with a team to provide technical guidance, and to plan, organize, and coordinate activities to effectively complete job assignments (i.e., distributing workload, monitoring the status and progress of work, monitoring accuracy of work, and ensuring required timelines are met.)

(c) Skill in communicating effectively, both orally and in writing, to meet program objectives.

(d) Ability to prepare reports in a variety of formats and present data to individuals at various organizational levels.

(e) Ability to coordinate and provide staff development and training.

**f. Supervisory Medical Records Technician (HIT), GS-8**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Supervisory MRTs HIT provide the full range of supervisory duties, which include responsibility for determining staffing needs, assignment of work, performance evaluation, selection of staff, recommendations of awards and advancements, and disciplinary actions. They perform ongoing audits of staff for all areas of responsibility, and assign work to the staff at an appropriate quality and productivity level. They establish goals, train employees in the accomplishment of tasks or projects, and develop written policies, procedures, and guidelines. They serve as subject matter experts in health record content and documentation requirements. Supervisory MRTs HIT initiate various reports, analyze data, and work closely with clinical services to facilitate timeliness, completion, and accuracy of health record documentation. They monitor, maintain, and create statistical data to include incomplete and delinquent records, as well as quantitative and qualitative analysis findings, to produce reports for medical center management.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:
(a) Knowledge of operational tasks including record completion, discharge analysis, and abstracting health records, in accordance with facility accreditation, procedures, and regulatory policies.

(b) Ability to provide expert technical guidance in health record content and documentation requirements.

(c) Skill in utilizing various software and computer applications to generate and analyze various reports.

(d) Ability to coordinate and provide staff development and training.

(e) Ability to coordinate tasks and collaborate with individuals outside the work area and at higher organizational levels.

(f) Ability to provide the full range of supervisory duties, to include assignment of work, performance evaluation, selection of staff, and recommendation of awards, advancements, and disciplinary actions, when appropriate.

DEVIANCTIONS.

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for MRTs HIT in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. §§ 7402, 7403.]
APPENDIX G60. RECREATION AND CREATIVE ARTS THERAPIST QUALIFICATION STANDARD  
GS-0638  
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a recreation therapist or creative arts therapist (art, dance/movement, drama, music), in the Veterans Health Administration (VHA). Recreation and creative arts therapists perform a wide variety of interventions, which contribute to the overall health of Veterans. The work requires a professional knowledge of recreation therapy or creative arts therapy, and skill in applying a wide range of theories, principles, and methodologies in the practice of recreation therapy or creative arts therapy. These requirements apply to all VHA recreation and creative arts therapists in the General Schedule (GS)-0638 series.

2. DEFINITIONS.

   a. **Journey Level.** The full performance level (FPL) for this qualification standard is at the GS-11 grade level.

   b. **Creditable Experience.** To be creditable, the experience must have required the use of knowledge, skills, and abilities associated with current recreation or creative arts therapy practice. Experience satisfying this requirement may be paid or non-paid employment as a recreation or creative arts therapist in the health care field.

   c. **Quality of Experience.** Qualifying experience must be at a level comparable to a recreation or creative arts therapist at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty), and range of variety, as described in this standard, at the specified grade level, and be performed by the incumbent at least 25% of the time.

   d. **Part-time Experience.** Part-time experience as a recreation or creative arts therapist is creditable according to its relationship to a full-time work week. For example, a recreation or creative arts therapist employed 20 hours per week, or on a half time basis, would receive one work week credit for each two weeks of service.

   e. **Large Affiliate Network.** Large affiliate networks consist of complexity level 1, complexity level 2, or complexity level 3 VHA facilities, where recreation and/or creative arts therapy services provide full, wide-reaching, and well-developed clinical service operations. Recreation and/or creative arts programs with large affiliate networks are integrated within multiple healthcare programs focusing on services for chronic physical and mental health illnesses and disabling conditions.
3. BASIC REQUIREMENTS.

a. Citizenship. Citizen of the United States (U.S.). (Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with 38 U.S.C. § 7407(a)).

b. Education. The following education requirements apply to the recreation therapist, creative arts therapist (art), creative arts therapist (dance/movement), creative arts therapist (drama), and creative arts therapist (music):

(1) Recreation Therapist

(a) A bachelor’s degree or higher, from an accredited college or university, with a major in therapeutic recreation or recreation/leisure, with an option and/or emphasis in therapeutic recreation. The degree must be approved by the National Council for Therapeutic Recreation Certification (NCTRC);

OR,

(b) A bachelor’s degree or higher in any field from an accredited college or university and must be a certified therapeutic recreation specialist (CTRS). The degree must be approved by the NCTRC. If hired under this education, the certification cannot be waived.

(2) Creative Arts Therapist (Art)

(a) A master’s degree or higher, from an accredited college or university, with a major in art therapy approved by the American Art Therapy Association on or before June 30, 2016. If the degree is received after June 30, 2016, a master’s degree or higher from an accredited college or university, with a major in art therapy, must be accredited by the Council on Accreditation of Art Therapy Education: a committee of the Commission on Accreditation on Allied Health Education Program.

OR,

(b) A master’s degree in a related field, plus graduate coursework and supervised field experience in art therapy. Acceptable related fields include: Counseling, Marriage and Family Therapy, Social Work, Psychology, Addictions Counseling, Psychiatric Nursing, and Psychiatry, AND must possess a full, current, and unrestricted registration as a Registered Art Therapist (ATR) approved by the Art Therapy Credentials Board. If hired under this education, the registration cannot be waived.
(3) **Creative Arts Therapist (Dance/Movement)**

(a) A master’s degree or higher, from an accredited college or university, with a major or an emphasis in dance therapy or dance/movement therapy. The degree must be approved by the American Dance Therapy Association (ADTA).

OR,

(b) A master’s degree or higher, from an accredited college or university, and must be a board-certified dance/movement therapist (BC-DMT) approved by the Dance Movement Therapy Certification Board (DMTCB). If hired under this education, the certification cannot be waived.

**NOTE.** Dance/movement therapy coursework that began on or after March 15, 2013, must have been approved by the ADTA subcommittee for the approval of alternate route courses.

(4) **Creative Arts Therapist (Drama)**

(a) A master’s degree or higher, from an accredited college or university, with a drama degree program approved by the North American Drama Therapy Association (NADTA).

OR,

(b) A master’s degree or higher, from an accredited college or university, and must be a registered drama therapist (RDT). The RDT is granted by the NADTA and indicates that one has met the educational requirements and achieved competency in the practice of drama therapy. If hired under this education, the registration cannot be waived.

(5) **Creative Arts Therapist (Music)**

(a) A bachelor’s degree or higher, from an accredited college or university, in music therapy, or in music with an emphasis in music therapy. The degree must be approved by the National Association for Schools of Music and/or the American Music Therapy Association.

OR,

(b) A bachelor’s degree or higher, from an accredited college or university, and must be a board-certified music therapist (MT-BC) approved by the Certification Board for Music Therapists (CBMT). If hired under this education, the certification cannot be waived.
(c) **Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials. The private organization must deem such education at least equivalent to that gained in conventional U.S. programs.

c. **Registration**

(1) **Creative Arts Therapy (Art).** Must possess a full, current, and unrestricted registration with the ATR. If hired under paragraph 3b(2)(b), registration cannot be waived.

(2) **Creative Arts Therapy (Drama).** Must possess a full, current, and unrestricted registration as an RDT. If hired under paragraph 3b(4)(b), registration cannot be waived.

d. **Certification**

(1) **Required Certification**

(a) **Recreation Therapist.** Applicants must be certified in recreation therapy as a CTRS by the NCTRC. If hired under paragraph 3b(1)(b), certification cannot be waived.

(b) **Creative Arts Therapy (Dance/Movement).** Applicants must be board-certified in dance/movement therapy by the DMTCB. If hired under paragraph 3b(3)(b), certification cannot be waived.

(c) **Creative Arts Therapy (Music).** Applicants must be a MT-BC approved by the CBMT. If hired under paragraph 3b(5)(b), certification cannot be waived.

(2) **Exception.** Non-registered and/or non-certified applicants, who otherwise meet the eligibility requirements for registration and/or certification, may be given a temporary appointment as a graduate recreation or creative arts therapist, under the authority of 38 U.S.C. § 7405(c)(2)(B), for a period not to exceed two years. Applicants who fail to obtain registration and/or certification during this temporary full-time appointment may be terminated. The exception only applies to positions at the GS-7 and GS-9 level. For grade levels at or above the full performance level, the candidate must be registered and/or certified.

(3) **Failure to Obtain Registration/Certification.** In all cases, recreation and creative arts therapists must actively pursue meeting registration and/or certification requirements, starting from the date of appointment. At the time of appointment, the supervisor will provide the unregistered and/or uncertified recreation or creative arts therapist with the written requirement to obtain registration/certification, the date by which the registration and/or certification must be acquired, and the consequences.
for not becoming registered and/or certified by the deadline. Failure to become registered and/or certified within two years from the date of appointment will result in removal from the GS-0638 recreation and creative arts therapist occupation, and may result in termination of employment.

(4) Loss of Credential. A recreation or creative arts therapist who fails to maintain the required registration and/or certification must be removed from the occupation, which may also result in termination of employment.

e. Grandfathering Provision. All persons employed in VHA as a recreation or creative arts therapist, on the effective date of this qualification standard, are considered to have met all qualification requirements for the title, series, and grade held, including positive education, and registration and/or certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed, the following provisions apply:

(1) Such employees may be reassigned, promoted up to, and including, the full performance (journeyman) level, or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level, or placed in supervisory or managerial positions.

(2) Employees who were appointed on a temporary basis, prior to the effective date of the qualification standard, may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/registration/certification, that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

(4) Recreation and creative arts therapists who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements, in effect at the time of reentry, as a recreation or creative arts therapist.

g. English Language Proficiency. Must be proficient in spoken and written English, as required by 38 U.S.C. § 7403(f).

4. GRADE REQUIREMENTS.

a. Creditable Experience
(1) Knowledge of Current Professional Recreation Therapy or Creative Arts Therapy Practices. To be creditable, the experience must have required the use of knowledge, skills, and abilities (also referred to as “clinical competencies”) associated with current professional recreation or creative arts therapy practices.

Evidence of such experience includes private practice, U.S. military services, local/state/federal government organizations, for profit/non-profit organizations, health care, or educational facilities.

(2) Quality of Experience. Qualifying experience must be at a level comparable to the next lower grade level. Experience satisfying this requirement must be active professional practice, which may be paid or non-paid employment as a recreation or creative arts therapist.

b. Grade Determinations. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:

c. Recreation Therapist

(1) Recreation Therapist, GS-7

(a) Experience/Education. None beyond the basic requirements.

(b) Assignment. Employees at this level serve in an entry level position as a recreation therapist. They work under the direct supervision of a recreation or creative arts therapist, at or above the full-performance level, or a designated supervisor in a clinical environment. Employees have knowledge of their respective discipline, and work with guidance from higher-level or supervisory staff. Established treatment procedures are substantially adapted and applied for acutely ill patients. Employees at this level would not be assigned work at a community-based outpatient clinic (CBOC), unless supervision is on site.

(2) Recreation Therapist, GS-9

(a) Experience/Education. At least one year of creditable experience at the next lower grade level, or a master’s degree in recreation therapy may be substituted for the required one year of professional recreation therapist experience.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   i. Knowledge of assessment tools and treatment for the diagnosis or disability of the patient.
ii. Knowledge to interpret and apply all health and safety regulations, to minimize and mitigate risks in the provisions of patient care, and environmental maintenance.

iii. Ability to effectively communicate and educate patients, families, caregivers, and other health care professionals to facilitate the treatment process.

iv. Knowledge to apply evidence-based and best practice therapeutic techniques and interventions.

(c) **Assignment.** Employees at this level serve in a developmental position as a recreation therapist. They work under general supervision to perform work in a clinical environment. Employees have knowledge of their respective discipline and work with guidance from higher level or supervisory staff to establish treatment procedures that are substantially adapted and applied for patients who are acutely ill. The recreation therapist may: conduct patient evaluations; analyze and interpret leisure, cognitive, and motor skill assessment data to develop individualized goals, objectives, and treatment plan of care; develop and select interventions to achieve patient goals; review patient progress; adapt or adjust the treatment plan and intervention strategies; implement therapeutic interventions that support measurable functional outcomes (interventions include, but are not limited to leisure education, reality orientation, memory, and gross motor activities); evaluate patient needs for additional, alternative, or termination of services; document patient's behavioral observations, progress, functioning, and intervention outcomes; and develop and provide collaborative services with other team members. Therapists at this level may be given general assignments in a program area.

(3) **Recreation Therapist, GS-11**

(a) **Experience.** At least one year of creditable experience at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to adapt assessment tools and treatment interventions to address the complexity of the diagnosis or disabilities and demonstrate the clinical reasoning necessary to identify the need for further in-depth specific assessment of function and utilization of unconventional methods and techniques.

ii. Knowledge to independently interpret provider referrals and consults; and apply all health and safety regulations to minimize and mitigate risks in the provision of patient care and the environment of care.
iii. Skill in effectively communicating and educating, in a clear and concise manner, with patients, families, caregivers, and other health care professionals to facilitate the interdisciplinary treatment process.

iv. Skill in independently utilizing appropriate screening and evaluation techniques required to appropriately provide direct patient care in areas such as, but not limited to recommendations for recreation therapy assistive devices, including fit and function.

(c) Assignment. Employees serving at the full performance level function with independent judgment to administer and interpret recreation therapy assessments and utilize clinical competencies to develop unconventional assessment and interview approaches to effectively elicit information. They conduct, analyze, interpret, and report assessment data based upon functional domains (cognitive, sensory, social, affective, physical, and leisure). Incorporating the four-step process of assessment, planning, implementation, and evaluation of services delivered, the therapist constructs evidence-based recreation therapy interventions for treating patients with complex medical or mental health issues, such as polytrauma, traumatic brain injury (TBI), posttraumatic stress disorder (PTSD), spinal cord injury (SCI), substance use disorder/addictions, serious mental illness (SMI), and hospice/palliative care requirements. They provide direct patient care and receive guidance from higher-level supervisory staff members for only the most complex patients and require only general supervision. They review recreation therapy consults and conduct comprehensive evaluations. Based upon the assessment data, and in collaboration with other stakeholders, the therapist develops individualized treatment plans with measurable therapeutic goals and objectives including scope, duration, and treatment. They recommend adaptation, modification, and/or assistive technology to meet a patient’s assessed needs and preferences in recreation therapy. Through the use of activity/task analysis, behavioral interventions, and therapeutic procedures, the therapist designs individualized treatment interventions to reduce stress, anxiety, and maladaptive behaviors; recover basic motor functioning and reasoning abilities; build confidence; and develop compensatory strategies to master critical life skills necessary to re-enter the community in a productive manner. Sophisticated techniques/strategies used to improve or support clinical outcomes may include, but are not limited to: developing positive patterns of behavior; relaxation and stress reduction; lifestyle alteration; social skills training; developing or improving (enhancing) self-esteem; developing and maintaining positive relationships; motor learning and training strategies; anger and pain management; identify risks; recovery support; lifestyle adjustment; conflict/problem resolution; adjustment to disability; and including coping with grief and loss. Resourcefulness is exercised in
providing individualized, unique, effective methods and procedures when implementing therapeutic interventions including, but not limited to: assistive technology; cognitive behavioral skills; aquatic therapy; fitness and wellness; community accessibility/reintegration/transition; and adapted sports and leisure development. Patient needs are evaluated for additional, alternative, or termination of services. Intervention plans are monitored for effectiveness, making modifications, as needed. Recreation therapists determine the effectiveness of protocols, modalities, and programs for targeted groups through quantitative analysis and identify potential risks and needs for adaptive interventions to facilitate improved biopsychosocial well-being. They participate in co-treatment opportunities, including but not limited to: neurological rehabilitation, mental health recovery programs, and palliative care related to the symptoms of a terminal illness. Discharge analysis and planning is conducted for community needs.

(4) Recreation Therapist, GS-12

(a) Experience. In addition to meeting the basic requirements, completion of two years of progressively complex experience, which includes one year equivalent to the next lower grade directly related to the position being filled.

AND,

(b) Certification. Additional certification in a specialty treatment area in recreation therapy, such as, but not limited to: Physical Medicine/Rehabilitation, Geriatrics, Developmental Disabilities, Behavioral Health, Community Inclusion Services, Aquatic Exercise Therapy/Aquatic Therapy, Adapted Sports, Assisted Technology, Social Skills, etc., or in a directly related field such as, but not limited to: acceptance and commitment therapy, cognitive behavior therapy, dementia, dialectical behavioral therapy, gambling disorder, motivational interviewing, and/or wellness recovery action plan facilitator.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of best practice and evidence-based recreation therapy across multiple areas of practice.

ii. Ability to perform clinical services and balance organizational responsibilities while developing and implementing effective strategies with great autonomy, at a level compatible with the critical necessity for accuracy and completion.

iii. Ability to adapt assessment tools and treatment to the complexity of the diagnosis or disability and demonstrate the clinical reasoning necessary to identify the need for further in-depth specific assessment.
iv. Skill in developing, implementing, and modifying recreation therapy treatment plans in response to changing medical, physical, mental, psychological and/or psychosocial conditions, as well as comorbidities.

v. Ability to provide clinical guidance using the advanced knowledge of best practice and evidence-based recreation therapy implementation across multiple areas of practice.

vi. Knowledge of how recreation therapy impacts revenue resource allocation, as it relates to complex diagnosis, treatment, and diagnostic coding.

(d) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. At this level, recreation therapists use independent judgment of clinical information to administer specialized, complex, and extensive recreation therapy treatment theories, techniques, and evaluation methodologies in the provision of care to a diverse patient population with varying diagnoses, functional impairments, and cultural backgrounds. They also provide clinical practice guidance for other recreation therapy staff. Individuals in this assignment engage in a high level of decision-making for independent care. With great autonomy, they employ specialty recreation therapy treatment modalities requiring cutting edge, sophisticated and complex skills and apply clinical expertise to a full range of patient populations. They apply advanced clinical skills to address: sensory motor, including sensory integration; neuromuscular and motor cognitive integration and cognitive components; and psychosocial skills and psychological components. The individuals in this assignment serve as the sole recreation therapist member of a multidisciplinary or specialty care treatment team. They mentor therapists who are at the full performance level or below and may coordinate clinical training programs, to include student supervision, administration and oversight, assignments, and evaluations. They may evaluate current research and coordinate or support research projects to conduct evidence-based initiatives. They assist in quality assurance efforts and strategic planning for recreation therapy programs.

(5) Recreation Therapist (Clinical Education Coordinator), GS-12

(a) Experience. At least one year of creditable experience at the next lower grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to develop, maintain, and coordinate clinical education programs and assignments for student affiliations with universities, colleges, and other academic organizations with shared values, to include the formulation of
academic agreements, memorandum of understandings (MOUs), and student assignments.

ii. Knowledge of current treatment approaches (evidence-based and best-practice) across multiple areas of practice.

iii. Ability to educate others in the application of specialized and technically advanced knowledge, skills, and treatment approaches and to clinically guide staff in using these tools.

iv. Ability to provide educational opportunities and consultation to other health care practitioners and stakeholders about clinical practice and areas of expertise.

v. Ability to synthesize clinical processes and practice to guide and train the students’ clinical/educational experience and skills.

vi. Knowledge of local and national licensing and certification boards and committees, to include guidelines and requirements.

vii. Ability to apply appropriate basic scientific methods, basic research design, and statistics.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. This assignment occurs at active, affiliated VA facilities where specialized clinical treatment programs are provided. Clinical education coordinator positions generally would be found in complexity level 1 facilities or in facilities of lesser complexity levels where there is a large affiliate network where recreation and/or creative arts therapy programs are provided. The clinical education coordinator develops, coordinates, and administers clinical training programs and practicums which may include, but are not limited to: students, interns, therapy assistant trainees, associated health trainees, new facility employees, and/or other disciplines. Duties include, but are not limited to: establishing, negotiating, mediating, and maintaining affiliation agreements and MOU; serves as a liaison with the university to determine number of students, dates of training, and areas of training and assignment; designing, coordinating, conducting, and evaluating educational experiences for students, associated health trainees, and other personnel assigned to the clinical program for training; arranging and serving as an instructor for staff in-service training programs; creating innovative education/training/research opportunities for students and staff; assisting principal investigators or co-investigators and/or serving as principal investigator or co-investigator in projects of limited complexity or scope. The employee coordinates and directs staff participating in the clinical and administrative aspects of the program.
(6) **Recreation Therapist (Program Coordinator), GS-12**

(a) **Experience.** At least one year of creditable experience at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of management/administration principles, procedures, and practice, which includes supervision, consultation, negotiation, mediation, and monitoring.

ii. Ability to analyze clinically appropriate data and make recommendations to optimize quality, efficiency, performance, and productivity within services.

iii. Ability to perform the full range of supervisory duties when authorized, which would include responsibility for assignment of work to be performed; competency assessments; performance evaluations; selection of staff; recommendation of awards, advancements, and disciplinary actions when appropriate.

iv. Ability to monitor and report on the status and progress of work, evaluate program quality to ensure that methods, deadlines, and standards have been met, and prioritize the workload.

v. Ability to effectively communicate goals, objectives, and focused initiatives to an interdisciplinary team, specialized clinical program, or subsection, as well as guide the team members on work methods, practices, standards, and procedures.

vi. Knowledge of regulatory requirements, interdisciplinary structure, and organizational structure to serve as a liaison between specialty care and other programs that would affect coordination of care, healthcare access, program evaluation, assessment, and planning future needs.

vii. Skill in employing recognized leadership and managerial methods and strategies, including interpersonal relations and conflict resolution in the management of employees, team leaders, and managers.

(c) **Assignment.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. The program coordinator is generally found in complexity level 1 facilities, or in facilities of lesser complexity levels where large affiliate network services are found. This assignment requires administrative direction and decision-making skills, interagency coordination of care, program evaluation and analysis, budgetary controls, and planning. The program coordinator has overall responsibility for planning,
assessing, and evaluating programs to ensure proper coordination between care delivered by the program and overall delivery of healthcare within the facility. They are responsible for daily program operations, developing policies and procedures, and preparing reports and statistics for facility, Veterans Integrated Service Networks (VISNs), and national use. They assist with special administrative projects which include, but are not limited to: strategic planning, performance improvement plans, and coordination and training of interdisciplinary team members. They are responsible for the overall technical and administrative oversight for operations within their program area, including coordination of clinical assignments for multiple professionals comprising of an interdisciplinary team.

They may provide treatment to patients in a specialty program, as well as services in more complex and unconventional cases. The program coordinator may or may not have supervisory responsibilities but is responsible for broad program management. They ensure orientation and competency assessment of assigned staff and maintain interdepartmental relations with other services to accomplish medical center goals. They plan and develop policies, procedures, and goals. They interpret, implement, and educate staff on applicable VHA directives, handbooks, or other policies. When performing as a supervisor at this grade level, duties include: planning and scheduling work; assigning and evaluating work of subordinate staff; resolving problems which may interfere with patient assessment or treatment; accepting, amending, or rejecting completed work; appraising performance and recommending performance standards, assessing competency levels, ratings and awards, and disciplinary actions when appropriate; approving leave; identifying continuing education and training needs; and assigning delineated clinical privileges.

(7) Lead Recreation Therapist, GS-12

(a) **Experience.** At least one year of creditable experience at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of recreation therapy across multiple types of clinical practice.

ii. Ability to provide professional oversight and consultation for staff therapists and guidance to auxiliary staff, volunteers, and trainees.

iii. Ability to monitor and report on the status and progress of work and make adjustments to accomplish the workload, in accordance with established procedures.

iv. Ability to facilitate program development, outcome management, and strategic planning.
v. Ability to act as a liaison between staff, volunteers, or trainees, and serve as an immediate supervisor to resolve informal complaints and concerns.

vi. Knowledge of procedures and policies to provide oversight and training for auxiliary staff, volunteers, and trainees.

vii. Skill in coordinating clinical activities within the workgroup.

viii. Skill in leading and directing staff to implement evidence-based recreation and/or creative arts therapy approaches to patients with varied treatment needs and skill level.

(c) **Assignment.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Lead therapists are found in complexity level 1 facilities, or in facilities of lesser complexity levels where there are large affiliate network recreation and/or creative art therapy departments. Therapists at this level have experience that demonstrates advanced practice skills and sound clinical judgment across many areas of recreation and creative arts therapies. Leads are responsible for completing complex evaluations and treatments. They are required to apply advanced evaluation methodologies and treatment theories in the provision of care to a vast array of patients with differing functional impairments. They provide clinical practice guidance for other recreation and/or creative arts therapy staff. Lead therapists monitor work flow, make work assignments, provide input on performance, resolve daily workplace issues, and maintain efficient flow of patient care. The lead may provide primary reports to the chief for the daily delivery of department programs, reporting, staffing, and scheduling. Lead therapists provide training for the department’s auxiliary staff, volunteers, and trainees. They provide instruction in maintenance of all service equipment and coordinate patient care plans to reduce redundancies and delays in patient treatment.

(8) **Supervisory Recreation Therapist, GS-12**

(a) **Experience.** At least one year of creditable experience at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to provide treatment in complex cases and work with great independence.

ii. Ability to balance multiple responsibilities, set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions.
iii. Ability to analyze organizational and operational problems to develop and implement solutions that result in efficient operations and use data effectively to manage workload, quality, performance, and productivity within the service.

iv. Skill in interpersonal relationships in dealing with employees, team leaders, and managers.

v. Ability to use evidence-based practices, clinical practice guidelines in a professional area, and to guide the staff in applying these tools.

vi. Knowledge of organizational theories and strategies to positively impact the overall goals and objectives within the service.

vii. Knowledge related to administrative functions such as fiscal, material supply, equipment management, and clinical and program management.

(c) **Assignments.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Supervisors at this level are typically found in complexity level 2 or level 3 medical centers, if needed. They are responsible for the supervision, administrative management, and direction of program services. They evaluate programs to ensure proper coordination with the overall delivery of health care. The incumbent has full administrative oversight for planning and directing the staff assignments in a variety of clinical settings. They have responsibility for general or technical supervision of key clinical and training programs. Typical duties include: assigning work, monitoring clinical performances of staff, resolving staff conflicts which may interfere with the delivery of services, identifying continuing education and training needs, preparing performance standards and ratings. They interview candidates for positions and recommend appointments, advancements, or administer disciplinary actions, when appropriate. The supervisor accepts, amends, or rejects completed work, and ensures that performance requirements are met. They ensure compliance with the accrediting agency and regulatory requirements, establish and monitor the quality of the pre-analytical processes as part of the overall service’s quality management program and take corrective action, as needed. The supervisor ensures orientation and competency assessment of assigned staff. The supervisor develops policies and procedures, manages document control, develops performance standards, position descriptions, and functional statements and is responsible for professional and administrative management of an assigned area, to include time and attendance and leave management. The supervisor conducts department meetings at regular intervals to convey information to staff. The supervisor maintains interdepartmental relations with other services/departments, individuals, and community partners to
accomplish medical center goals and may provide clinical treatment in the most complex of cases.

(9) **Supervisory Recreation Therapist, GS-13**

(a) **Experience.** At least one year of creditable experience at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to provide treatment in complex cases and work with great independence.

ii. Ability to balance multiple responsibilities, set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions.

iii. Ability to analyze organizational and operational problems and use data to manage workload, quality, performance, and productivity within the service.

iv. Skill in interpersonal relationships in dealing with employees, team leaders, and managers, to include conflict management.

v. Ability to utilize evidence-based practices and clinical practice guidelines in a professional area and to guide the staff in applying these tools.

vi. Knowledge of organizational theories and strategies to positively impact the overall goals and objectives within the service.

vii. Knowledge related to administrative functions, such as fiscal, material supply, equipment management, and clinical and program management.

(c) **Assignment.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Supervisors at this level are in complexity level 1 facilities, or in facilities of lessor complexity levels where there are large affiliate network recreation therapy and/or creative arts therapy programs. Supervisors are responsible for the supervision, administrative management, and direction of program services. They develop and initiate new treatment programs based upon current research findings. They evaluate programs to ensure proper coordination with the overall delivery of health care. The incumbent may be delegated full administrative and clinical responsibility for planning and directing staff assignments in a variety of clinical settings. They have responsibility for general or technical supervision of key clinical and training programs. Typical duties include: assigning work, monitoring clinical performances of staff, resolving staff conflicts which may interfere with the delivery of services,
identifying continuing education and training needs, and other clinical and administrative responsibilities to ensure that the mission of the service and the medical center is satisfied. They interview candidates for positions, recommend appointments, advancements, or when appropriate, disciplinary actions. They make decisions that affect staff and other resources with wide latitude of control and independent judgment. The supervisor accepts, amends, or rejects completed work and ensures that performance requirements are met. The supervisor ensures compliance with accrediting agency and regulatory requirements, establishes and monitors the quality of the pre-analytical processes as part of the overall service’s quality management program and assures corrective action is initiated, as needed. The supervisor encourages professional development and creates an environment of learning, serving as a mentor to staff. They develop policies and procedures, manage document control, develop and rate performance standards, position descriptions and functional statements and are responsible for professional and administrative management of an assigned area, to include budget execution, and time and attendance management. The supervisor conducts department meetings at regular intervals to convey information to staff. The supervisor maintains interdepartmental relations with other services to accomplish medical center goals and may provide clinical treatment in complex cases. The supervisor fosters and maintains community contacts that augment and enhance service goals.

(10) **Supervisory Recreation Therapist (Assistant Chief), GS-13**

(a) **Experience.** At least one year of creditable experience equivalent at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in the analysis and application of scientific and clinical literature in a professional area.

ii. Knowledge of contemporary recreation therapy, creative arts therapy, rehabilitation, recovery, and wellness theories, techniques, practices, and related disciplines.

iii. Ability to supervise, motivate, and manage a diverse clinical staff.

iv. Skill in assessing qualifications and abilities of current and prospective employees.

v. Ability to organize work, set priorities, delegate tasks and responsibilities, and meet multiple deadlines for the service.
vi. Ability to adapt to new and changing work conditions, staffing, and contingencies.

vii. Knowledge of management/administration theories and concepts such as supervision, consultation, negotiation, and budget execution.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Assistant chief positions are generally in complexity level 1 facilities or in facilities of lesser complexity levels where there is a large affiliate network and recreation therapy and/or creative arts therapy programs are provided. Assistant chiefs serve as an assistant to a service chief in a stand-alone recreation therapy service and share the scope of delegated managerial responsibilities. They manage and supervise all aspects of professional areas in the service-level department. Assistant chiefs exercise supervision, administrative management, and direction of professional areas. The assistant chief should be one grade less than the grade of the chief. The assistant chief serves as the acting service chief in the absence of the service chief. The assistant chief develops and maintains a system of internal review that ensures service programs operate at a satisfactory level of performance, and are in compliance with regulations. The assistant chief has responsibility for utilization of resources and budget. They make selections, assign personnel, and serve as a mentor to help employees develop to their full potential.

(11) **Supervisory Recreation Therapist (Service Chief), GS-14**

(a) **Experience.** At least one year of creditable experience equivalent at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in supervising, motivating, and managing a diverse clinical staff applicable to a service level department in a large, complex, or multi-division facility, including inherent strategic planning and fiscal management.

ii. Skill in providing authoritative advice and coordination of recreation therapy and/or creative arts therapy services across the continuum of care that may encompass multiple medical centers, including consolidated facilities or departments.

iii. Skill in collaborating with strategic planning committees at local, VISN, or national levels for new ventures addressing patient care delivery systems, facilities management, system reorganization, etc.
iv. Ability to translate extensive recreation/creative art therapy, rehabilitation, mental health, long term-care, and other specialty care knowledge areas into cogent and useful policy in complex facilities.

v. Knowledge in reconciling contradictory requirements based upon regulations and standards of various regulatory and medical or other professional credentialing groups, such as The Joint Commission.

vi. Knowledge of pertinent analytical and evaluative methods sufficient to analyze complex issues to provide workable solutions and alternative solutions to executive leadership that support timely and sound decision making.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. A recreation therapist at this level serves as the service chief of a stand-alone service. Chief positions are generally in complexity level 1 facilities or in facilities of lesser complexity levels where there is a large affiliate network and recreation therapy and/or creative arts therapy programs are provided. The work is technically authoritative. Service chiefs have broad and overall responsibility for a service-level department to include clinical practice, program management, education, human resources management, and supervision for the service. They autonomously manage substantive parts of specialized, complex, and professional services which significantly impacts the care provided to patients. Service chiefs provide leadership with objective, independent assessments and recommendations for policy, operational and administrative issues, and initiatives requiring decision and action. Service chiefs monitor work performance to ensure production and accuracy requirements are satisfied, interpret a wide variety of data, including process data related to program planning and specialized needs of the service, as well as the medical center. They ensure policies or issues have been fully coordinated, vetted and staffed; advise leadership on implications, key issues, relationships to interest groups, both internal and external, and recommend courses of action. Service chiefs coordinate and negotiate resolutions to complex problems. They may prepare special reports and responses, congressional responses, briefing papers, issue briefs, and decision papers for the medical center leadership, which may be highly sensitive, confidential, and of a complex nature. They may negotiate affiliation agreements with academic partners; set training objectives; and delegate responsibilities to subordinate section or assistant chiefs (if applicable). Service chiefs at this grade generally have assignments determined by the need of the local facility, VISN/VA Central Office (VACO), National Director, or the assistant director of recreation therapy services.
(12) **Recreation Therapist (Clinical Research), GS-14**

(a) **Experience:** At least one year of creditable experience equivalent at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in applying techniques for specific, highly complex patient populations that often involve, but are not limited to: multiple physical, mental, developmental, behavioral, sensory, motor, and cognitive conditions or diagnoses, and other comorbid concerns that may compromise biopsychosocial functioning.

ii. Skill in applying and interpreting specialized assessments, other evaluative procedures and subject specific tests, as well as qualitative and quantitative research protocols to conduct research that meets the standards of validity, reliability, and statistical significance.

iii. Skill in research administration that would include, but is not limited to grant writing, budgeting, data collection and analysis, organizing findings, and disseminating results.

iv. Skill in communicating scientific concepts and methodological principles to individuals with diverse levels of technical expertise and understanding.

v. Skill in using evidence-based practices, clinical practice guidelines, and resources to develop appropriate research protocols and methodologies.

vi. Ability to guide an interdisciplinary team through properly conducting a research protocol that minimizes extraneous variables that could jeopardize the validity of the research.

vii. Ability to collaborate with strategic planning committees at local, VISN, or national levels for new research ventures addressing patient care delivery systems, facilities management, system redesign, system reorganization, etc.

viii. Knowledge of national and local research policies, procedures, and practices.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. A recreation therapist at this level serves as clinical research specialist at the VISN level. Clinical research specialists at this grade generally have assignments determined by the need of the local facility, VISN/VACO, National Director, or the assistant director of recreation therapy services. The clinical research specialist serves as the subject matter expert in a content specialty area of recreation and/or creative arts therapy.
They function as a consultant to the departments, service lines, and other clinical staff in evaluating, treating, and researching specialty areas that may significantly have an impact on VHA. Clinical expertise should include focused areas for a specific patient population with varying degrees of highly complex biopsychosocial treatment needs, such as the medical, rehabilitative, psychosocial, comorbid conditions related to TBI, SCI, amputation, blind and low vision, PTSD, military sexual trauma, etc. The clinical research specialist is responsible for funded research projects that make discipline-specific clinical contributions to research, add merit to the field, as well as possess the potential for significant impact on the practice of recreation and/or creative arts therapy. They participate in peer-reviewed publications, professional literature, and present findings to national audiences of the same and varied treatment disciplines. The clinical research specialist provides professional, clinical oversight and consultation for staff therapists, as well as monitors and evaluates clinically appropriate treatment programs with broad latitude of variation. They may be involved in peer review activities for VHA and non-VHA research, such as grant review for VHA, National Institutes of Health (NIH) proposals, or local research service committees, which include, but are not limited to Research and Development (R&D), Internal Review Board (IRB), Geriatric Research Education and Clinical Centers (GRECC), or serving as consulting editors for peer-reviewed journals. They are responsible for ensuring the coordination of research programs and activities in collaboration or cooperation with other departments, services, and other internal or external entities. Under the guidelines of national and local research objectives, goals, and strategies, they establish research priorities, develop and coordinate projects, obtain funding to include the submission of grant proposals, and ensure the overall coordination of research efforts, as well as oversee work of others involved in a research project.

d. Creative Arts Therapist (Art)

(1) Creative Arts Therapist (Art), GS-9

(a) Experience/Education. None beyond the basic requirements.

(b) Assignment. Employees at this level serve in an entry level position as creative arts therapist (art). Employees have knowledge of their respective discipline and work with direct supervision and guidance from higher-level or supervisory staff. Established treatment procedures are substantially adapted and applied for patients who are acutely ill. Therapists at this level may be given general assignments in a program area.
(2) Creative Arts Therapist (Art), GS-11

(a) **Experience.** At least one year of creditable experience at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to identify current art resources in the community at the time of assessment, for discharge planning purposes.

ii. Ability to develop and implement quality improvement systems as related to internal and external regulatory requirements, including patient safety.

iii. Knowledge of diagnostic coding and symptoms of diagnoses in the provision of art therapy.

iv. Knowledge of the creative process and art media and their effect on the patients' cognitive, sensory, emotional, and physical states.

v. Ability to demonstrate and educate stakeholders on the value of the creative process as a therapeutic tool.

vi. Ability to establish and maintain a therapeutic relationship with professional boundaries that reflect a trusting, empathetic, and respectful interaction.

vii. Skill in collaborating and maintaining liaison with an interdisciplinary team and educating the treatment team on theoretical framework of art therapy interventions.

(c) **Assignment.** Employees at this level serve as a creative arts therapist (art) at the full performance level. They provide direct patient care and receive guidance from higher-level or supervisory staff members for complex patients only. They gather informal art-based assessment of patients' needs, aptitudes, interests, and abilities. The therapist also develops and implements individualized art therapy treatment plans, to include the scope, duration, and frequency of treatment. Treatment goals may include, but are not limited to: emotional regulation, resolving traumatic memories, active meditation, building empathy and a sense of self-worth, and identifying potential risks and the need for adaptive interventions to facilitate improved well-being. Duties may include, but are not limited to developing art therapy programs, interventions, and instructional programs, including typical and atypical materials and resources that are appropriate to the needs, skills, and aptitudes of the patient. The therapist supports engagement in, and reflection of, the art process and product, through an art therapy framework where the engagement develops specific skills attained through art making that may include increased independence, focus to task, sense of self-worth, improved coping skills,
self-care, and social skills. They provide a safe environment for patients to understand the symbolic expression of their art product, process, and their experience with the materials as it relates to their recovery and wellness.

(3) Creative Arts Therapist (Art), GS-12

(a) **Experience.** In addition to meeting the basic requirements, the completion of two years of progressively complex experience, which includes one year equivalent at the next lower grade directly related to the position being filled, is required.

AND,

(b) **Certification.** Certification in a specialty treatment area in art therapy such as, but not limited to: Trauma Informed Art Therapy, Focused-Oriented Art Therapy, Photo Therapy, Mandala Assessment Research Instrument (MARI®), Art Therapy Analytics, or in a directly related field such as dementia, motivational interviewing, and/or cognitive behavior therapy.
(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in differentiating signs, symptoms, and contraindications as related to clinical diagnoses in order to independently determine appropriate interventions.

ii. Ability to apply advanced clinical judgment and critical thinking when interpreting and documenting interactions related to complex medical conditions.

iii. Ability to design comprehensive and complex screening tools and templates.

iv. Ability as a skilled listener sensitive to a variety of human needs.

v. Ability to exhibit emotional stability, patience, and interpersonal skills.

vi. Knowledge of insight and psychological processes.

vii. Skill in using a higher degree of sensitivity of group dynamics, interpersonal interactions, and symptoms with special attention to complexity, comorbidity and contraindications.

viii. Knowledge of a variety of art mediums through continuing education for application in clinical settings.

ix. Knowledge of how therapy impacts revenue resource allocation as it relates to complex diagnosis, treatment, and diagnostic coding.

(d) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. At this level, the therapist uses independent judgment to administer clinically based complex and specialized art psychotherapy treatment interventions and programs, including an assessment of a diverse patient population with varying diagnoses, functioning levels, and cultural backgrounds. The therapist also provides clinical practice guidance for other art therapy staff. In the application of art materials and therapeutic interventions, the therapist uses advanced knowledge of theories related to clinical practice for program evaluation. The therapist independently recognizes and demonstrates an understanding of the diversity of artistic expression, symbolism, and meaning in artwork and art making from across cultures, aptitudes, and functioning levels. Therapist at this level, will have the autonomy to implement specialty art therapy treatment modalities. They serve as the sole art therapist or as a consultant member of specialty care programs or treatment teams. They use their clinical expertise in outpatient clinics and in the
development and improvement of inpatient programs, while frequently executing high-level decision making. The art therapist creates an environment that examines the symbolic expressions of the art process and art product to promote a variety of outcomes including but not limited to: behavior management, catharsis, a sense of mastery, conflict resolution, and non-verbal communications. They provide direction in quality assurance efforts and strategic planning for art therapy programs across multiple areas of practice. The creative arts therapist provides and promotes the highest quality art psychotherapy programs using best practices. They may coordinate or support medical center research projects in order to develop outcome oriented, evidence-based initiatives. They develop and implement complex art therapy programs and interventions such as multimedia projects, mixed media projects, collaborative murals, group exhibits, and other art mediums using specialty treatment. The specialty treatment may include, but is not limited to Trauma Informed Art Therapy, Focused-Oriented Art Therapy, Photo Therapy, Mandala Assessment Research Instrument (MARI®), Art Therapy Analytics, or a directly related field specialty, such as Motivational Interviewing, Cognitive Behavior Therapy, etc., to promote the utilization of the creative process for insight, resilience, self-expression, and advocacy. The creative arts therapist establishes and maintains alliances with stakeholders and educates recipients, stakeholders, and colleagues about the theory and application of art psychotherapy as applied in clinical settings, which may include formal and informal internal and external presentations and in-service training. They coordinate and train clinical student interns, to include administration and oversight, assignments, supervision, and evaluations, as well as mentor therapists at the full performance level or less.

e. Creative Arts Therapist (Dance/Movement)

(1) **Creative Arts Therapist (Dance/Movement), GS-9**

(a) **Experience/Education.** None beyond the basic requirements.

(b) **Assignment.** Employees at this level serve in an entry level position as a creative arts therapist (dance/movement). Employees have knowledge of their respective discipline and work under direct guidance from higher-level or supervisory staff. Established treatment procedures are substantially adapted and applied for patients who are acutely ill. Therapists at this level may be given general assignments in a program area.

(2) **Creative Arts Therapist (Dance/Movement), GS-11**

(a) **Experience.** At least one year of creditable experience at the next lower grade level.
(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to independently analyze and interpret assessment data for the development of an interdisciplinary treatment plan.

ii. Skill in implementing specialized programming in accordance with internal and external regulatory requirements, including patient safety.

iii. Ability to establish and maintain a safe therapeutic environment to promote expression through dance/movement therapy.

iv. Knowledge of foundational dance/movement therapy techniques, protocols, and treatment interventions that are considered best practices.

v. Skill in developing and selecting dance/movement therapy interventions for use with specific populations for therapeutic purposes (i.e., emotional regulation, containment and structure, etc.).

vi. Ability to assess and use patient cultural backgrounds and values in dance/movement treatment planning and interventions.

(c) **Assignment.** Employees at this level serve as a creative arts therapist (dance/movement) at the full performance level. They provide direct patient care and receive guidance from higher-level or supervisory staff members for complex patients only. Assignments at this level include, but are not limited to: review of pre-evaluation data in the medical record upon admission or through consult; assist with assessment and development of individualized treatment goals; conduct assessments to determine current level of functioning and clinical needs through interviews with patients and other stakeholders; and identify patient's physical, cognitive, social, and emotional needs, and quality of life. In collaboration with patients and consistent with the interdisciplinary team, the therapist conducts dance/movement therapy interventions to develop expression, communication, affect regulation, adaptive behaviors, and improve functioning. In partnership with the patient, caregiver, and interdisciplinary team, the therapist develops discharge plan, including, but not limited to establishing outpatient care and identifying community resources for dance and movement programs for therapeutic benefit. They apply dance movement therapy interventions to support coping and self-care for those living with long-term conditions within the least restrictive environment. They serve as a consultant to an interdisciplinary team and other staff on issues related to non-verbal behavior/communication and mind-body connection. The therapist plans, coordinates, and directs specialized programs, such as creative arts festivals and performances.
(3) Creative Arts Therapist (Dance/Movement), GS-12

(a) Experience. In addition to meeting the basic requirements, the completion of two years of progressively complex experience, which includes one year equivalent at the next lower grade directly related to the position being filled, is required. AND,

(b) Certification. Certification in a specialty treatment area in dance therapy/movement therapy, such as but not limited to: analytic dance therapy, cognitive behavioral dance therapy, authentic movement, or in a directly related field, such as dementia, trauma studies, and motivational interviewing.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in differentiating diagnostic signs, symptoms, and contraindications, as related to the clinical diagnoses, to independently determine appropriate interventions.

ii. Skill in adapting dance/movement therapy assessment tools and using unconventional methods.

iii. Knowledge as it relates to designing screening tools, templates, as well as designing and documenting specialized programs and specific plans of care and patient abilities.

iv. Skill in the interpretation and documentation of interactions related to complex medical conditions.

v. Knowledge of how therapy impacts revenue resource allocation as it relates to complex diagnosis, treatment, and diagnostic coding.

vi. Ability to conduct and adapt best practice dance/movement therapy interventions (e.g., Chi-Gong, Tai-Chi, Authentic Movement, Anna Haltran, etc.).

vii. Skill to effectively motivate patients with complex medical and mental health issues (e.g., aphasia, stroke, TBI, and PTSD) using motivational techniques considered as best practice.

(d) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. The creative arts therapist (dance/movement) (advanced) conducts dance/movement therapy assessments, interprets current level of functioning, and applies results to determine the most appropriate treatment options for patients with multiple
diagnosis and complex medical conditions. They develop unconventional dance/movement screening tools within the therapeutic environment. They use evidence-based or evidenced-informed advanced mind-body techniques to implement and develop specialized clinical interventions that may include meditation, yoga, martial arts, or relaxation skills (if appropriately trained in these specialties). They develop a therapeutic relationship and maintain a safe therapeutic environment with each patient to facilitate mind-body connection, deepened personal insight, and improved overall functioning by incorporating the use of metaphor, symbolism, and storytelling through movement interventions. They may evaluate current research and coordinate or support research projects to conduct evidence-based initiatives. They assist in quality assurance efforts and strategic planning for dance therapy programs. The creative arts therapist may develop dance therapy interventions or special programs focusing on the therapeutic benefit for the patient. They coordinate and manage specialized programs, such as creative arts festivals and performances. They provide an opportunity to advocate for patients and promote community reintegration. They develop and maintain alliances with stakeholders. They serve as a consultant to interdisciplinary teams and other staff on issues related to non-verbal behavior/communication and mind-body connection. They provide education on dance/movement therapy through in-service presentations, conferences, and other teaching opportunities. They may coordinate and train clinical student interns, to include administration, oversight, assignments, and evaluations.

f. Creative Arts Therapist (Drama)

(1) Creative Arts Therapist (Drama), GS-9

(a) Experience/Education. None beyond the basic requirements.

(b) Assignment. Employees at this level serve in an entry level position as a creative arts therapist (drama). Employees have knowledge of their respective discipline and work under direct guidance from a higher-level or supervisory staff. Established treatment procedures are substantially adapted and applied for patients who are acutely ill. Therapists at this level may be given general assignments in a program area.

(2) Creative Arts Therapist (Drama), GS-11

(a) Experience. At least one year of creditable experience at the next lower grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:
i. Skill in using clinical judgment and critical thinking skills in identifying potential risks, adapting interventions, or when modifying and developing new techniques for complex patients.

ii. Skill in applying evidence-based motivation techniques to develop and implement new approaches to treatment interventions, based on patient response to treatment in a manner that uses creative thinking and problem solving that goes beyond the typical diagnosis-based treatment pathways, to maximize clinical outcomes.

iii. Ability to demonstrate patient engagement in, and reflection of, the dramatic/theater process and product to develop and understand specific skills attained through drama, including but not limited to increased independence, sense of self-worth, coping skills, healthy living alternatives, and social skills.

iv. Ability to apply effective use of professional skill, objectivity, and insight to respond constructively to both positive and negative reactions and establish and maintain a therapeutic relationship with professional boundaries to reflect trusting, empathetic, and respectful interactions.

v. Ability to use drama/theater in providing opportunities to work through emotional disturbances within a safe environment for the patient to understand the symbolic expression of their theatrical product, process, and experience with the materials, as it relates to their recovery and wellness.

vi. Ability to communicate effectively through various communication techniques.

vii. Ability to develop unconventional assessment and interview approaches to gather clinical information about patients with severe or multiple diagnosis that require unconventional interview approaches and treatments to devise effective methods and approaches.

viii. Ability to use counseling skills to effectively conduct person-centered drama therapy sessions.

(c) Assignment. Employees at this level serve as a creative arts therapist (drama) at the full performance level. They provide direct patient care and receive guidance from higher-level or supervisory staff members for complex patients only. They develop drama therapy programs, objectives, and interventions that promote utilization of the creative process for insight mood management, interpersonal skill development, promote self-actualization, non-verbal communication, self-expression, and emotional expression. They independently gather drama therapy based assessment data, interpret medical record information, review drama therapy consults, and conduct mental and physical evaluations to develop and implement a drama therapy treatment plan. Interventions may include customized design of performance, digital media, media development and production,
theatrical techniques, team building, improvisations, and self-characterizations. They develop and implement an individualized treatment plan with potential goals to regulate emotion; resolve traumatic memories to promote communication; develop an understanding of negative consequences; and self-actualization. They use diverse clinical frameworks, such as drama/theatrical/psychodrama or skill-focused groups. They integrate diagnostic information and medical significance for functional performance, and support maximum rehabilitation potential to the clinical team. They evaluate current research and may initiate, coordinate, or support research projects involving drama therapy to develop evidence-based initiatives.

They may evaluate processes, including relevant and effective therapeutic drama/theater interventions for patients with multiple diagnoses that require unconventional approaches to treatment (e.g., multi-media productions, films, lighting, empty chair improvisations, enactments) and resourcefulness in devising effective therapeutic methods and procedure.

(3) Creative Arts Therapist (Drama), GS-12

(a) Experience. In addition to meeting the basic requirements, the completion of two years of progressively complex experience, which includes one year equivalent at the next lower grade directly related to the position being filled, is required.

AND,

(b) Certification. Certification in a specialty treatment area in drama therapy, such as, but not limited to: symbolic expression, theater/dramatic processes, special effects, film/theater production, script writing, or in a directly related field, such as dementia, trauma studies, conflict resolution, cognitive behavior therapy, and/or Wellness Recovery Action Plan facilitator.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in utilizing advance clinical judgment and critical thinking skills, with special attention to complexity, comorbidity, and contraindications when modifying and developing new techniques.

ii. Ability to apply advanced evidence-based motivation techniques to develop and implement new approaches to the treatment intervention, based on patient response to treatment in a manner that uses creative thinking and problem solving that goes beyond the typical diagnosis-based treatment pathways, to reach maximal outcomes.

iii. Skill to use drama/theater in providing opportunities to work through emotional disturbances within a safe environment, for the patient to understand the
symbolic expression of their theatrical product, process, and experience with the materials, as it relates to their recovery and wellness.

iv. Skill in experiential approaches, group dynamics, interpersonal interactions and symptoms, and socio drama techniques, such as team building, poetry, performance, sound, and music to create a story enactment, as well as other dramatic mediums for diverse populations to promote the utilization of the creative process for self-expression, emotional expression, insight mood management, verbal and non-verbal communication, and self-advocacy.

v. Skill in drama/theater performance, media, film production, editing and performance.

vi. Knowledge of how therapy impacts revenue resource allocation as it relates to complex diagnosis, treatment, and diagnostic coding.

(d) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Drama therapists apply independent judgment to administer and interpret drama therapy assessments. They develop new or unconventional drama therapy assessment tools, interview approaches, and procedures to effectively obtain clinical information. Duties may include, but are not limited to: independently selecting, adapting, and using appropriate drama/theater materials, including typical and atypical directives and programs for patients with complex and multiple diagnoses, and patient interventions. They apply psychodrama therapy techniques to address the patient’s identified therapeutic needs, goals, and objectives. They may coordinate and/or supervise clinical training programs, including but not limited to: administration; mentoring and oversight; and student assignments and evaluations. They provide psychodramatic specific information and consultation regarding the patient’s clinical progress to the patient and stakeholders. They assist in quality assurance efforts and strategic planning for drama therapy programs. They provide specialized techniques in designing and implementing special events and a variety of drama therapy interventions, such as but not limited to film, theater, or stage productions, enactment, improvisation, script writing and development. They develop special programs, which may involve collaboration with other clinics, service lines, community agencies, organizations, and other stakeholders. They have a thorough understanding of specialized drama therapy clinical skills for use in complex cases and to create an environment that examines the symbolic expressions of the dramatic and theater process and product to promote a variety of outcomes, such as behavior management, catharsis, a sense of mastery, focus to task, conflict resolution, and verbal/non-verbal communication of a difficult subject matter.
g. Creative Arts Therapist (Music)

(1) Creative Arts Therapist (Music), GS-7

(a) Experience/Education. None beyond the basic requirements.

(b) Assignment. Employees at this level serve in an entry level position as a creative arts therapist (music). They work under the supervision of a recreation or creative arts therapist at or above the full-performance level or a designated supervisor in a clinical environment. Employees have knowledge of their respective discipline and work with guidance from higher-level or supervisory staff. Established treatment procedures are substantially adapted and applied for patients who are acutely ill. Employees at this level would not be assigned work at a CBOC unless supervision is on site.

(2) Creative Arts Therapist (Music), GS-9

(a) Experience/Education. At least one year of creditable experience at the next lower grade level or a master’s degree in creative arts therapy (music) may be substituted for the required one year of professional creative arts therapist (music) experience.

(b) Demonstrated Knowledge, Skills, and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to perform a varied repertoire of popular, folk, and traditional songs appropriate for use in a clinical setting using at least two of the following: keyboard, voice, guitar, percussion or other musical instruments suitable to a clinical setting.

ii. Knowledge of the roles and meaning of music in various cultures and subcultures.

iii. Knowledge to design, develop, or adapt unique music therapy methods for assessment, treatment, or palliation and evaluation procedures.

iv. Skill to apply objectivity and insight to respond constructively to both positive and negative reactions while maintaining a safe environment for the patient and therapist.

(c) Assignment. Employees at this level serve in a developmental level position as a creative arts therapist (music). They work under general supervision. Employees have an understanding of music therapy processes and procedures to provide patient care. They exercise judgment, administer and interpret music therapy assessments, and use clinical knowledge to develop assessment and interview approaches. They plan and organize music therapy interventions for persons
diagnosed with chronic or life-threatening conditions, as well as their families and in collaboration with an interdisciplinary or multidisciplinary team. Duties may include, but are not limited to the use of music listening, singing, playing, creating, and improvising for therapeutic or palliative treatment. They recommend new treatment groups and programs (including co-treatment opportunities) for treating patients with medical or mental health issues.

(3) Creative Arts Therapist (Music), GS-11

(a) **Experience.** At least one year of creditable experience at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of the roles and meaning of music in various cultures and subcultures, how culture influences identity formation, concepts of health and pathology, and understanding of the role of music therapy and how music therapy is practiced.

ii. Knowledge of current methods of music therapy assessment, treatment, and evaluation related to human growth and development, musical development, diagnostic classifications, etiology, symptomatology, and prognosis in formulating complex treatment plans, including the contraindications of music therapy for individuals and groups.

iii. Ability to design, develop, or adapt unique music therapy methods for assessment, treatment or palliation, and evaluation procedures for complex clinical cases, through a broad range of specialized music therapy services for various and emerging patient populations.

iv. Ability to use music therapy interventions to provide opportunities to work through treatment issues, including emotional disturbances, by establishing a safe environment for the patient to understand the symbolic expression of their musical product, process, and experience as it relates to recovery and wellness.

v. Ability to apply effective use of professional skill, objectivity, and insight to respond constructively to both positive and negative reactions, establish and maintain a therapeutic relationship with professional boundaries to reflect trusting, empathetic, and respectful interactions.

vi. Ability to apply current research literature and co-facilitate treatment with professionals from other disciplines, the uses of the creative arts therapies and
recreation therapy, as well as understanding emerging models and trends in music therapy.

(c) **Assignment.** Employees at this level serve as creative arts therapists (music) at the full performance level. They have a full understanding of music therapy processes and procedures, and require only general supervision when providing direct patient care. They exercise independent judgment, administer and interpret music therapy assessments, and utilize clinical knowledge to develop unconventional assessment and interview approaches to effectively elicit information. They review pre-evaluation data in the medical record upon admission or through consult. They conduct, analyze, interpret, and report assessment data across functional domains (i.e., behavioral, cognitive, communicative, emotional/affective, physical, sensory, and social) as well as musical knowledge, skills, and abilities. They plan, organize, and implement developmentally and situationally appropriate and evidence-based comprehensive music therapy interventions for persons diagnosed with chronic or life-threatening conditions, as well as their families, and in collaboration with an interdisciplinary or multidisciplinary team. These may include, but are not limited to: music listening, singing, playing, creating and improvising to understand musical behaviors as a means of self-expression, communication, and adaptive behavior; for neurological or physical rehabilitation; pain management; increased independence; exploring self-concept; improved coping skills; interpersonal relationships and social skills; and group cohesion. They recommend and develop new treatment groups and programs (including co-treatment opportunities) for treating patients with complex medical or mental health issues including, but not limited to Traumatic Brain Injury (TBI) to promote a variety of clinical outcomes, such as improved coping with grief, loss, or palliative care/terminal illness; behavior management, conflict resolution, or non-verbal communication of difficult subject matter. They participate in co-treatment opportunities including neurological rehabilitation, mental health recovery programs, and palliative care, often related to the symptoms of a terminal illness. They plan, organize, implement, and evaluate public relations for the program to inform and educate others about music therapy, in various settings, including the complex interactions of the therapeutic process, as well as the efficacy of music therapy in complex cases.

(4) **Creative Arts Therapist (Music), GS-12**

(a) **Experience.** In addition to meeting the basic requirements, completion of two years of progressively complex experience, which includes one year equivalent at the next lower grade directly related to the position being filled.

AND,

(b) **Certification.** Certification in a specialty treatment area in music therapy, such as but not limited to: advanced improvisational music therapy, bonny method of guided imagery and music (BM-GIM), neurological music therapy (NMT), creative
music therapy, or in a directly related field, such as palliative care, dementia care, or substance abuse.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to apply the creative processes of music listening, singing, playing, creating, and improvising to respond to the complex dynamics of musical and interpersonal relationships that emerge at different stages in the therapeutic process and to accomplish therapeutic or palliative care treatment goals.

ii. Ability to reproduce, notate, and transcribe musical responses of patients, provide spontaneous musical support for patient improvisations, compositions, or responses, and to use different methods of musical analysis for patient assessment and evaluation.

iii. Ability to identify and differentiate theoretical constructs and treatment orientations, including but not limited to: cognitive-behavioral therapy, psychotherapy, person-centered therapy, humanistic therapy, existential therapy, psychosocial development, and human development that underlies the various clinical practices and approaches of current models of music therapy for individuals, families, or groups.

iv. Knowledge of strategies for self-care and use of self-awareness and insight, using personal reflection (e.g., journaling, artistic involvement, meditation, other spiritual pursuits) to identify and address one's personal issues and the impact of these issues within the therapeutic process, to provide appropriate breadth and depth to the patient’s experience and process in music therapy.

v. Skill in supervising and mentoring students in clinical training, supervision, teaching, and research, designing and implementing methods of observing and evaluating student competence, and the use of music and the norms and practices of other cultures.

vi. Ability to collaborate with others to conduct research, using various methods and appropriate procedures to avoid or minimize potential confounding of the data; to interpret and disseminate research results consistent with established standards of inquiry; and to evaluate scholarly and student research regarding research questions or problems, methods, procedures, data collection, analysis, and conclusions.

(d) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Music therapists at this level have an understanding of specialized music therapy clinical
skills for use in complex cases. With a high degree of autonomy and independence, they create an environment that examines the symbolic expressions of the musical process and product to promote a variety of outcomes, including but not limited to: sensory stimulation; integration in multi-sensory environments; social skills training; cognitive-behavioral change techniques; physical or neurological rehabilitation; psychomotor and impulse control skills; psychological and psychosocial issues, such as behavior management, catharsis, a sense of mastery, focus to task, conflict resolution, and non-verbal communication of difficult subject matter. They evaluate and respond to therapeutic musical interventions for patients with complex and multiple diagnoses to understand how it reflects the patient's personality, the therapeutic relationship, and the mind-body connection, to facilitate change and enhance overall functioning. They collaborate, establish, and maintain liaison and provide music therapy instruction or in-service training for employees in other disciplines or service lines, as well as the interdisciplinary team. They mentor therapists who are at the full performance level or below and may coordinate clinical training programs, to include student supervision, administration and oversight, assignments, and evaluations. They assist in quality assurance, program performance improvement, and strategic planning related to music therapy. They may develop music therapy interventions or special programs focusing on the therapeutic benefit for the patient and provide an opportunity to advocate for patients by developing and maintaining alliances with stakeholders, such as research, non-profit, and community organizations, as well as other clinics and services.

h. Creative Arts Therapist (Art, Dance/Movement, Drama, Music)

(1) Creative Arts Therapist (Clinical Education Coordinator), GS-12

(a) Experience. At least one year of creditable experience at the next lower grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to develop, maintain, and coordinate clinical education programs and assignments for student affiliations with universities, colleges, and other academic organizations with shared values, to include the formulation of academic agreements, MOUs, and student assignments.

ii. Knowledge of current treatment approaches (evidence-based and best practice) across multiple areas of practice.

iii. Ability to educate others in the application of specialized and technically advanced knowledge, skills, and treatment approaches and to clinically guide staff in using these tools.
iv. Ability to provide educational opportunities and consultation to other health care practitioners and stakeholders about clinical practice and areas of expertise.

v. Ability to synthesize clinical processes and practice to guide and train the students' clinical/educational experience and skills.

vi. Knowledge of local and national licensing and certification boards and committees to include guidelines and requirements.

vii. Ability to apply scientific methods, research design, and statistics.

(c) Assignment. For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. This assignment occurs at active, affiliated VA facilities where specialized clinical treatment programs in art, dance/movement, drama, and music are provided.

Clinical education coordinator positions are generally found in complexity level 1 facilities or in facilities of lesser complexity levels where there is a large affiliate network where recreation and/or creative arts therapy programs are provided. The clinical education coordinator develops, coordinates, and administers clinical training programs and practicums, which may include, but are not limited to: students, interns, therapy assistant trainees, associated health trainees, facility new employees, and/or other disciplines. Duties include, but are not limited to: establishing, negotiating, mediating, and maintaining affiliation agreements and memoranda of understanding (MOU); serving as a liaison with the university to determine number of students, dates of training, and areas of training and assignment; designing, coordinating, conducting, and evaluating educational experiences for students, associated health trainees, and other personnel assigned to clinical program for training; arranging and serving as an instructor for staff in-service training programs; creating innovative education/training/research opportunities for students and staff; assisting principal investigators or co-investigators and/or serving as principal investigator or co-investigator in projects of limited complexity or scope. They coordinate and direct staff participating in the clinical and administrative aspects of the program.

(2) Creative Arts Therapist (Program Coordinator), GS-12

(a) Experience. At least one year of creditable experience at the next lower grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:
i. Knowledge of management/administration principles, procedures, and practice, which includes supervision, consultation, negotiation, mediation, and monitoring.

ii. Ability to analyze clinically appropriate data and make recommendations to optimize quality, efficiency, performance, and productivity within services.

iii. Ability to perform the full range of supervisory duties, which includes responsibility for assignment of work to be performed; competency assessments; performance evaluations; selection of staff; recommendation of awards, advancements, and disciplinary actions, when appropriate.

iv. Ability to monitor and report on the status and progress of work, evaluate program quality to ensure that methods, deadlines, and standards have been met, and prioritize the workload.

v. Ability to effectively communicate goals, objectives, and focused initiatives to an interdisciplinary team, specialized clinical program, or subsection, as well as guide the team members on work methods, practices, standards, and procedures.

vi. Knowledge of regulatory requirements, interdisciplinary structure, and organizational structure to serve as a liaison between specialty care and other programs that affect coordination of care, healthcare access, program evaluation, assessment, and planning future needs.

vii. Skill in employing recognized leadership and managerial methods and strategies, including interpersonal relations and conflict resolution in the management of employees, team leaders, and managers.

(c) **Assignment.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. The program coordinator is generally found in complexity level 1 facilities, or in facilities of lesser complexity levels where large affiliate network services are found. Creative arts therapist at this level serves as program coordinator in many areas of creative arts therapy to include art, dance/movement, drama, and music. This assignment requires administrative direction and decision-making skills, interagency coordination of care, program evaluation and analysis, budgetary controls, and planning. The program coordinator has overall responsibility for planning, assessing, and evaluating programs to ensure proper coordination between care delivered by the program and overall delivery of healthcare within the facility. They are responsible for daily program operations, developing policies and procedures, and preparing reports and statistics for facility, VISN, and national use. They assist with special administrative projects, which include but are not limited to strategic planning, performance improvement plans, and coordination and training of interdisciplinary team members. They are responsible for the overall technical and administrative oversight for operations within their program area, including
coordination of clinical assignments for multiple professionals comprising of an interdisciplinary team. They may provide treatment to patients in a specialty program, as well as services in more complex and unconventional cases. The program coordinator may or may not have supervisory responsibilities but is responsible for program management. They ensure orientation and competency assessment of assigned staff and maintain interdepartmental relations with other services to accomplish medical center goals. They plan and develop policies, procedures, and goals, and interpret, implement, and educate staff on applicable directives, handbooks, or other policies. When performing as a supervisor, duties include planning and scheduling work; assigning and evaluating work of subordinate staff; resolving problems which may interfere with patient assessment or treatment; accepting, amending, or rejecting completed work; appraising performance; and recommending performance standards.

(3) Lead Creative Arts Therapist, GS-12

(a) **Experience.** At least one year of creditable experience at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of creative arts therapy across multiple types of clinical practice.

ii. Ability to provide professional oversight and consultation for staff therapists and guidance to auxiliary staff, volunteers, and trainees.

iii. Ability to monitor and report on the status and progress of work and make adjustments to accomplish the workload, in accordance with established procedures.

iv. Ability to facilitate in program development, outcome management, and strategic planning.

v. Ability to act as a liaison between staff, volunteers or trainees, and immediate supervisor to resolve informal complaints and concerns.

vi. Knowledge of clinical procedures and policies to provide oversight and training for auxiliary staff, volunteers, and trainees.

vii. Skill in coordinating clinical activities within the workgroup.

viii. Skill in leading and directing staff to implement evidence-based recreation therapy and/or creative arts therapy approaches to patients with varied treatment needs and skill level.
(c) **Assignment.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Lead therapists are found in complexity level 1 facilities, or in facilities of lesser complexity levels where there are large affiliate network recreation and/or creative art therapy departments. Therapists at this level have experience that demonstrates advanced practice skills and sound clinical judgment across many areas of recreation and/or creative arts therapies to include art, dance/movement, drama, and music. Lead therapists are responsible for completing complex evaluations and treatments. They are required to apply advanced evaluation methodologies and treatment theories in the provision of care to a vast array of patients with differing functional impairments. They provide clinical practice guidance for other recreation and/or creative arts therapy staff. Lead therapists monitor work flow and make work assignments, provide input on performance, resolve daily workplace issues, and maintain efficient flow of patient care. The lead therapist may provide primary reports to the chief for the daily delivery of department programs, reporting, staffing, and scheduling. Lead therapists provide training for the department’s auxiliary staff, volunteers, and trainees, provide instruction in maintenance of all service equipment, and coordinate patient care plans to reduce redundancies and delay in patient treatment.

(4) **Supervisory Creative Arts Therapist, GS-12**

(a) **Experience.** At least one year of creditable experience at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

    i. Ability to provide treatment in complex cases and to work with great independence.

    ii. Ability to balance multiple responsibilities, set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions.

    iii. Ability to analyze organizational and operational problems to develop and implement solutions that result in efficient operations and use data effectively to manage workload, quality, performance, and productivity within the service.

    iv. Skill in interpersonal relationships in dealing with employees, team leaders, and managers.
v. Ability to use evidence-based practices and clinical practice guidelines in a professional area, and to guide the staff in applying these tools.

vi. Knowledge of organizational theories and strategies to positively impact the overall goals and objectives within the service.

vii. Knowledge related to administrative functions such as fiscal, material supply, equipment management, and clinical and program management.

(c) **Assignments.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Supervisors at this level are typically found in complexity level 2 or level 3 medical centers. They are responsible for the supervision, administrative management, and direction of program services. They evaluate programs to ensure proper coordination with the overall delivery of health care. The incumbent has full administrative oversight for planning and directing the staff assignments in a variety of clinical settings to include art, dance/movement, drama, and music therapies. They have responsibility for general or technical supervision of key clinical and training programs. Typical duties include: assigning work; monitoring clinical performances of staff; resolving staff conflicts, which may interfere with the delivery of services; identifying continuing education and training needs; and preparing performance standards and ratings. They interview candidates for positions, recommend appointments, advancements, or when appropriate, disciplinary actions. The supervisor accepts, amends, or rejects completed work, and ensures that performance requirements are met. They ensure compliance with accrediting agency and regulatory requirements, establish and monitor the quality of the pre-analytical processes as part of the overall service’s quality management program, and take corrective action as needed. The supervisor ensures orientation and competency assessment of assigned staff. The supervisor develops policies and procedures, manages document control, develops performance standards, position descriptions and functional statements, and is responsible for professional and administrative management of an assigned area, to include time and attendance and leave management. The supervisor conducts department meetings at regular intervals to convey information to staff. The supervisor maintains interdepartmental relations with other services/departments, individuals, and community partners to accomplish medical center goals and may provide clinical treatment in the most complex of cases.

(5) **Supervisory Creative Arts Therapist, GS-13**

(a) **Experience.** At least one year of creditable experience at the next lower grade level.
(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to independently provide treatment in complex cases.

ii. Ability to balance multiple responsibilities, set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions.

iii. Ability to analyze organizational and operational problems to develop and implement solutions that result in efficient operations and use data effectively to manage workload, quality, performance, productivity within the service.

iv. Skill in interpersonal relationships and conflict management.

v. Ability to use evidence-based practices and clinical practice guidelines in a professional area and to guide the staff in applying these tools.

vi. Knowledge of organizational theories and strategies to positively impact the overall goals and objectives within the service.

vii. Knowledge related to administrative functions, such as fiscal, material supply, equipment management, and clinical and program management.

(c) **Assignment.** For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Supervisors at this level are found in complexity level 1 facilities, or in facilities of lessor complexity levels where there are large affiliate network recreation therapy and/or creative arts therapy programs to include art, dance/movement, drama, and music. The supervisor is responsible for the supervision, administrative management, and direction of program services. The supervisor develops and initiates new treatment programs based upon current research findings. They evaluate programs to ensure proper coordination with the overall delivery of health care. The incumbent may be delegated full administrative and clinical responsibility for planning and directing staff assignments in a variety of clinical settings. They have responsibility for general or technical supervision of key clinical and training programs. Typical duties include: assigning work, monitoring clinical performances of staff, resolving staff conflicts, which may interfere with the delivery of services, identifying continuing education and training needs, and other clinical and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. They interview candidates for positions, recommend appointments, advancements, or disciplinary actions, when appropriate. They make decisions that affect staff and other resources with wide latitude of control and independent judgment. The supervisor accepts, amends, or rejects completed work and ensures that performance requirements are met. The
supervisor ensures compliance with accrediting agency and regulatory requirements, establishes and monitors the quality of the pre-analytical processes as part of the overall service’s quality management program and ensures corrective action is initiated, as needed. The supervisor encourages professional development, serves as a mentor to staff, and creates an environment of learning. The supervisor develops policies and procedures; manages document control; develops performance standards, position descriptions and functional statements; and is responsible for administrative management of an assigned area, to include budget execution and time and leave management. The supervisor conducts department meetings at regular intervals to convey information to staff. The supervisor maintains interdepartmental relations with other services to accomplish medical center goals and may provide clinical treatment in more complex cases. The supervisor fosters and maintains community contacts that augment and enhance service goals.

(6) **Supervisory Creative Arts Therapist (Assistant Chief), GS-13**

(a) **Experience.** At least one year of creditable experience equivalent at the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   i. Skill in the analysis and application of scientific and clinical literature in professional area.

   ii. Knowledge of contemporary recreation therapy, creative arts therapies, rehabilitation, recovery, and wellness theories, techniques, practices, and related disciplines.

   iii. Ability to supervise, motivate, and manage a diverse clinical staff.

   iv. Skill in assessing qualifications and abilities of current and prospective employees.

   v. Ability to organize work, set priorities, delegate tasks and responsibilities, and meet multiple deadlines for the service.

   vi. Ability to adapt to new and changing work conditions, staffing, and contingencies.

   vii. Knowledge of management/administration theories and concepts.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety,
and be performed by the incumbent at least 25% of the time. Assistant chief positions are generally found in complexity level 1 facilities or in facilities of lesser complexity levels where there are large affiliate network recreation and/or creative arts therapy programs to include art, dance/movement, drama, and music. Assistant chiefs serve as an assistant to a service chief in a stand-alone recreation therapy service and share full scope of delegated managerial responsibilities. They manage and supervise all aspects of professional areas in the service-level department. Assistant chiefs exercise supervision, administrative management, and direction of professional areas. They serve as the acting service chief in the absence of the service chief. They develop and maintain a system of internal reviews that ensures service programs operate at a satisfactory level of performance and are in compliance with regulations. The assistant chief has responsibility for utilization of resources and budget. They make selections, assign personnel, and serve as a mentor to help employees develop their full potential.

(7) **Supervisory Creative Arts Therapist (Service Chief), GS-14**

(a) **Experience.** At least one year of creditable experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in supervising, motivating, and managing a diverse clinical staff applicable to a service level department in a large, complex, or multi-division facility, including inherent strategic planning and fiscal management.

ii. Skill in providing authoritative advice and coordination of recreation and/or creative arts therapy services across the continuum of care that may encompass multiple medical centers, including consolidated facilities or departments.

iii. Skill in collaborating with strategic planning committees at local, VISN, or national levels for new ventures addressing patient care delivery systems, facilities management, system reorganization, etc.

iv. Ability to translate extensive recreation/creative art therapy, rehabilitation, mental health, long-term care, and other specialty care knowledge areas into cogent and useful policy in complex facilities.

v. Knowledge in reconciling contradictory requirements based upon regulations and standards of various regulatory and medical or other professional credentialing groups, such as The Joint Commission.
vi. Knowledge of analytical and evaluative methods sufficient to analyze complex issues and provide alternative solutions to executive leadership that support timely and sound decision making.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. Creative arts therapists at this level serve as the service chief of a stand-alone service. Chief positions are generally found in complexity level 1 facilities or in facilities of lesser complexity levels where there are large affiliate network recreation and/or creative arts therapy programs to include art, dance/movement, drama, and music. The work is technically authoritative. Service chiefs have broad and overall responsibility for a service-level department. Service chiefs have full responsibility for clinical practice, program management, education, human resources management, and supervision for the service. They autonomously manage substantive parts of specialized, complex, professional services, which significantly impact the care provided to patients. Service chiefs provide leadership with objective, independent assessments, and recommendations for policy, operational and administrative issues, and initiatives requiring decision and action. Service chiefs monitor work performance to ensure production and accuracy requirements are satisfied; interpret a wide variety of data and processes data related to program planning and specialized needs of the service, as well as the medical center; ensure policies or issues have been fully coordinated, vetted and staffed; advise leadership on implications, key issues, relationships to interest groups, both internal and external and recommend courses of action. Service chiefs coordinate and negotiate resolutions to complex problems. They may prepare special reports and responses, Congressional responses, briefing papers, issue briefs, and decision papers for medical center leadership, which may be highly sensitive, confidential, and of a complex nature. They may negotiate affiliation agreements with academic partners; set training objectives; and delegate responsibilities to subordinate section or assistant chiefs (if applicable). Service chiefs at this grade generally may have assignments determined by the need of the local facility, VISN/VACO, National Director, or the assistant director of recreation therapy services.

(8) Creative Arts Therapist (Clinical Research), GS-14

(a) Experience: At least one year of creditable experience equivalent to the next lower grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in applying techniques for specific, highly complex patient populations that often involve, but are not limited to multiple physical, mental, developmental,
behavioral, sensory, motor, and cognitive conditions or diagnoses, and other comorbid concerns that may compromise biopsychosocial functioning.

ii. Skill in applying and interpreting specialized assessments, other evaluative procedures and subject specific tests, as well as qualitative and quantitative research protocols to conduct research that meets the standards of validity, reliability, and statistical significance.

iii. Skill in research administration that includes, but is not limited to: grant writing, budgeting, data collection and analysis, organizing findings, and disseminating results including publication.

iv. Skill in communicating scientific concepts and methodological principles to individuals with diverse levels of technical expertise and understanding.

v. Skill in using evidence-based practices, clinical practice guidelines, and resources to develop appropriate research protocols and methodologies.

vi. Ability to guide an interdisciplinary team through conducting a research protocol that minimizes extraneous variables that could jeopardize the validity of the research.

vii. Ability to collaborate with strategic planning committees at local, VISN, or national levels for new research ventures addressing patient care delivery systems, facilities management, system redesign, system reorganization, etc.

viii. Knowledge of national and local research policies, procedures, and practices.

(c) Assignment. For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. A creative arts therapist at this level serves as clinical research specialist at the VISN level. Clinical research specialists at this grade generally may have assignments determined by the need of the local facility, VISN/VACO, National Director, or the assistant director of recreation therapy services. The clinical research specialist serves as the subject matter expert in a content specialty area of recreation and/or creative arts therapy; functions as a consultant to the departments, service lines, and other clinical staff in evaluating, treating, and researching specialty areas that may have significant impact on VHA. Clinical expertise should include focused areas for a specific patient population with varying degrees of highly complex biopsychosocial treatment needs, such as the medical, rehabilitative, psychosocial, comorbid conditions related to TBI, SCI, amputation, blind and low vision, PTSD, military sexual trauma, etc. They are responsible for funded research projects that make discipline-specific clinical contributions to research, add merit to the field, as well as possess the potential for significant impact on the practice of recreation and
creative arts therapy. They participate in peer-reviewed publications, professional literature, and present findings to national audiences of same and varied treatment disciplines. The clinical research specialist provides professional, clinical oversight and consultation for staff therapists, as well as monitors and evaluates clinically appropriate treatment programs with broad latitude of variation. They may be involved in peer review activities for VHA and non-VHA research, such as grant review for VHA, NIH proposals, or local research service committees, which include but are not limited to Research and Development (R&D), Internal Review Board (IRB), Geriatric Research Education and Clinical Centers (GRECC), or serving as consulting editors for peer-reviewed journals. They are responsible for ensuring the coordination of research programs and activities in collaboration or cooperation with other departments, services, and other internal or external entities. Under the guidelines of national and local research objectives, goals, and strategies, they establish research priorities, develop and coordinate projects, obtain funding, to include the submission of grant proposals, and ensure the overall coordination of research efforts, as well as oversee work of others involved in a research project.

5. DEVIATIONS.

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for recreation and creative arts therapists in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments that warrant such action based on demonstrated competence and meet the requirements of the proposed grade.

b. Under no circumstances will the education requirement be waived. Under no circumstances will the registration and/or certification requirements be waived at the GS-11 level and above.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. §§ 7402, 7403.]
[APPENDIX G61. CYTOTECHNOLOGIST QUALIFICATION STANDARD
GS-0601
Veterans Health Administration

COVERAGE. The following are requirements for appointment as a cytotechnologist in the Veterans Health Administration (VHA). The requirements apply to all VHA cytotechnologists employed in the General Schedule (GS)-0601 series. Cytotechnologists are certified laboratory professionals performing highly complex laboratory diagnostic testing on human specimens for diagnosis, treatment, or prevention of disease in the laboratory specialty of cytopathology. Cytotechnologists are solely responsible for: reporting the microscopic interpretation of normal pap smear tests used to detect cervical cancer; providing preliminary interpretation of specimens from other body sites; and collaborating with pathologists to diagnose benign and infectious processes, precancerous lesions, and malignant diseases.

DEFINITIONS.

a. **Journey Level.** The full performance level for this qualification standard is the GS-9 grade level.

b. **Creditable Experience.** To be creditable, the experience must have required the use of knowledge, skills, abilities (KSAs), and other characteristics, also referred to as core competencies; be associated with the scope of cytotechnologist practice equivalent to at least the next lower grade level; be directly related to the position being filled; and may be paid or non-paid employment.

c. **Part-Time Experience.** Part-time experience is creditable according to its relationship to the full-time work week. For example, a cytotechnologist employed 20 hours per week, or on a half time basis, would receive one full-time work week of credit for each two weeks of service.

BASIC REQUIREMENTS. To qualify for appointment as a cytotechnologist, all applicants must possess the following:

a. **Citizenship.** Citizen of the United States (U.S.). (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, of this part.)

b. **Education.** Individuals must have successfully completed a baccalaureate degree from a regionally accredited college/university and successfully completed a Commission on Accreditation of Allied Health Education Programs accredited cytotechnology program.

c. **Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization approved by the American Society for Clinical Pathology (ASCP) that specializes in the interpretation of foreign educational credentials and such education must have been deemed at least equivalent to that gained in conventional U.S. programs.
d. **Certification**

(1) Candidates must currently possess the Cytotechnologist (CT) (ASCP) or Specialist in Cytotechnology (SCT) (ASCP) certification given by the ASCP Board of Certification.

(2) **Loss of Certification.** An employee who fails to maintain the required certification must be removed from the occupation, which may also result in termination of employment.

e. **Grandfathering Provision.** All cytotechnologists employed in VHA, in this occupational series, performing the duties as described in the qualification standard on the effective date of this qualification standard, are considered to have met all the qualification requirements for the grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements of this standard, but met the qualifications applicable to the position at the time they were appointed to the position, the following provisions apply:

(1) Cytotechnologists that do not meet the basic requirements for education and certification may be reassigned, promoted up to and including the full performance level, or demoted within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

(2) Cytotechnologists appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended, or be reappointed on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Cytotechnologists initially grandfathered into this occupation, who subsequently obtain education and/or certification that meets all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

(4) Cytotechnologists who were retained in this occupation, under this provision, and subsequently leave the occupation, lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

g. **English Language Proficiency.** Cytotechnologists must be proficient in spoken and written English. See 38 U.S.C. § 7403(f).

**GRADE REQUIREMENTS.** All individuals assigned to this occupation must have an approved title or parenthetical title, as described below:
a. Cytotechnologist
b. Lead Cytotechnologist
c. Cytotechnologist (Quality Management)
d. Supervisory Cytotechnologist
e. Cytotechnologist (Laboratory Information Manager)
f. Supervisory Cytotechnologist (Laboratory Manager)
g. Cytotechnologist (Regional Commissioner Technologist)
h. Cytotechnologist (Laboratory Director)

GRADE DETERMINATIONS.

a. Grade Determinations. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:

(1) Cytotechnologist, GS-7

(a) Experience. None beyond the basic requirements.

(b) Assignment. At the entry level, cytotechnologists serve in a career development position practicing under close supervision of a supervisor, lab manager, or qualified individual who reviews and ensures the employee meets competency requirements.

(2) Cytotechnologist, GS-9

(a) Experience. At this level, the candidate must have one year of creditable experience equivalent to the GS-7 grade level that is directly related to the position to be filled.

(b) Assignment. At the journey level, the cytotechnologist independently reviews clinical data of patients and evaluates all cytology preparations by light microscopy for the presence or absence of cellular patterns, presence of micro-organisms, inflammatory reactions, endocrinopathies, benign changes, pre-malignant changes, neoplasia, and cellular responses to therapeutic agents. The cytotechnologist issues and verifies the final diagnosis for negative gynecologic specimens. The cytotechnologist prioritizes, prepares, and processes all specimens for cytodiagnostic and immunohistochemical testing in compliance with the guidelines of regulatory agencies. The cytotechnologist instructs others on the proper collection methods and transportation of specimens and determines acceptability of patient samples for processing. The cytotechnologist performs routine maintenance of equipment using standard operating procedures.
(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Ability to review clinical data of patients, relate data to microscopic findings, and evaluate all cytology preparations by light microscopy for the presence or absence of cellular patterns, presence of micro-organisms, inflammatory reactions, endocrinopathies, benign changes, pre-malignant changes, neoplasia, and cellular responses to therapeutic agents.

ii. Ability to make a preliminary cytodiagnosis to issue and verify the final diagnosis for gynecologic specimens interpreted to be negative.

iii. Knowledge of processes and procedures to prepare all specimens for cytodiagnostic and immunochemistry testing, as well as filtration methods, preparation, fixation, and staining of slides.

iv. Ability to instruct others on the proper collection methods and transportation of specimens, and to determine acceptability of patient samples for processing.

v. Knowledge of the standards of regulatory agencies, such as those of Joint Commission (JC), College of American Pathologists (CAP), Clinical Laboratory Improvement Amendment (CLIA), and Occupational Safety and Health Administration (OSHA), to ensure compliance with requirements and guidelines.

vi. Ability to perform routine maintenance of laboratory equipment according to standard operating procedures.

vii. Skill in prioritizing workflow/specimen triage.

(3) Cytotechnologist, GS-11

(a) **Experience.** The candidate must have one year of creditable experience equivalent to the journey level (GS-9) that is directly related to the position to be filled.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. At the advanced level, the cytotechnologist independently performs and monitors processes such as smear preparation, slide fixation, cell block preparation, monolayer filtration processing, and staining. If a discrepancy is identified with these processes, the cytotechnologist will troubleshoot and take corrective action. The cytotechnologist may act as a technical resource in writing and establishing new processes or procedures. The cytotechnologist performs a full range of specialized tasks, including collecting, compiling, and analyzing data according to the laboratory quality management program. The cytotechnologist uses these laboratory data to implement any needed quality improvement initiatives. The incumbent will research, test, validate, and implement new procedures and equipment.
NOTE: Advanced assignments may also include one or more of the tasks identified below. When these duties are required, the Advanced Cytotechnologist must also demonstrate the corresponding advanced KSAs as identified by the corresponding asterisk(s) below in KSA (c) v. - (c) viii. These KSAs are:

**Electron Microscopy (KSA (c) v.):** Ability to utilize electron microscope, performance of ultrathin cryomicrotomy, and staining of ultrastructural components.

***Safety Coordination (KSA (c) vi.):** Ability to oversee safe handling of specimens, chemicals, and equipment by all staff and ensures adherence to safety regulations.

****Laboratory Education (KSA (c) vii.): Ability to plan and administer an ongoing continuing education program for laboratory staff to meet accreditation requirements.

*****Automated Data Processing Applications Coordinator (KSA (c) viii.): Ability to carry out day-to-day operations related to laboratory information systems/computer use and system maintenance.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the KSAs i. - iv. and the advanced KSA as identified by the corresponding asterisk(s):

i. **Ability to independently determine specimen adequacy using complex specialized testing methods or techniques during Endoscopic Ultrasound, Endobronchial Ultrasound, and other Fine Needle Aspiration procedures.**

ii. Knowledge of pre-analytical, analytical, and post-analytical processes to establish and monitor the overall laboratory quality management and quality control program, and initiate corrective action as needed.

iii. Skill in collecting, compiling, and analyzing data for quality assurance, statistics, trends and reports, and implementing quality improvement initiatives.

iv. Skill in researching, testing, validating, and implementing new procedures and equipment.

v. **Ability to perform ultrathin microtomy and operate an electron microscope. Knowledge of microanatomy sufficient to note ultrastructural and microchemical findings.**

vi. ***Ability to convey knowledge of safety regulations and guidelines such as CAP, JC, and OSHA, and to ensure staff compliance with safety requirements, including continuing education and employee orientation.**

vii. ****Knowledge and skill to plan and administer an ongoing continuing education program for the laboratory to meet accreditation standards.
viii.*****Skill to maintain and troubleshoot computers and laboratory system instrumentation.

(4) **Lead Cytotechnologist, GS-11**

(a) **Experience.** The candidate must have one year of creditable experience equivalent to the journey level (GS-9) that is directly related to the position to be filled.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. The lead cytotechnologist provides direction to cytology staff by overseeing daily operations of the cytology laboratory. The incumbent monitors the processing of cytology preparations, including associated quality control measures. The lead cytotechnologist establishes procedure manuals and forms necessary to meet departmental and regulatory needs. The lead cytotechnologist will research, test, validate, and implement new procedures and equipment. The lead cytotechnologist monitors abnormal test results, notifies the physician when necessary, and completes documentation in accordance with CAP requirements. The lead cytotechnologist will monitor and make work assignments, provide input on performance, resolve daily workplace issues, and maintain efficient workflow. Assignments at this level include, but are not limited to: assuring coverage of all areas of responsibility; conducting ongoing reviews to ensure quality of work; providing guidance to staff members to include changes in policies and procedures; distributing and balancing workload; orienting and providing on-the-job training for new and current employees; ensuring all training requirements are met; and organizing the work structure of the assigned area.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Skill in researching, testing, validating, and implementing new procedures and equipment.

ii. Ability to monitor abnormal test results, which includes notification to the physician when necessary, and to complete documentation in accordance with CAP requirements.

iii. Ability to lead others, monitor and make work assignments, balance workload, and ensure duties are completed in an accurate and timely manner. This includes the ability to follow-up on pending issues and demonstrate an understanding of the impact of incomplete work.

iv. Knowledge of laboratory requirements to develop, maintain, and issue written instructions and standard operating procedures, including the design of forms that comply with regulatory agencies.

(5) **Cytotechnologist (Quality Management), GS-11**

(a) **Experience.** The candidate must have one year of creditable experience equivalent to the journey level (GS-9) that is directly related to the position to be filled.
(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. In this assignment, the cytotechnologist provides authoritative advice and consultation on quality management laboratory services to all levels of management throughout the organization. The cytotechnologist maintains a laboratory quality management program and ensures monitoring of components and customer feedback. The cytotechnologist analyzes, identifies, defines, and resolves issues associated with complex aspects of the collected data. The cytotechnologist monitors laboratory quality control systems and performance indicators. The cytotechnologist interacts with management officials and vendors, providing inter-laboratory quality assurance and laboratory proficiency testing. The cytotechnologist is responsible for a laboratory’s continuous readiness for regulating agency inspections and accreditation from agencies, such as JC and CAP.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

i. Comprehensive knowledge of laboratory quality control/assurance policies, quality management standards, procedures and principles, as well as safety practices and regulations.

ii. Knowledge of accrediting agencies and regulatory requirements pertaining to laboratory operations, and skill in ensuring continuous readiness for inspections.

iii. Knowledge of laboratory operations and relationships to the organization.

iv. Ability to analyze quality assurance data and resolve complex data issues.

v. Knowledge of anatomic pathology, clinical laboratory, and ancillary testing.

(6) **Cytotechnologist (Supervisory), GS-12**

(a) **Experience.** At this level, the candidate must have one year of creditable experience equivalent to the GS-11 grade level that is directly related to the position to be filled.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. The supervisory cytotechnologist performs a full range of supervisory duties for one or more sections of the laboratory. The supervisor makes work assignments, writes performance evaluations and staff competencies, and solves administrative problems. The supervisory cytotechnologist plans, organizes, and communicates management goals, and ensures compliance with regulations. The cytotechnologist is able to demonstrate leadership and managerial skills, including interpersonal relations and conflict resolution, to effectively interact with employees, team leads, and managers. The supervisory cytotechnologist uses federal and state laws, regulations, and laboratory quality management procedures and principles to develop plans that aid
in the laboratory quality management program and education, testing, and training of staff. In accordance with the CAP guidelines, the cytotechnologist may be responsible for rescreening previously screened negative cases and those designated "high risk" cases, before the diagnostic interpretation is released from the cytopathology laboratory.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Demonstrated leadership and managerial skills, including interpersonal relations and conflict resolution to effectively interact with employees, team leaders, and managers.

ii. Ability to plan, organize, set short and/or long term goals, and conduct studies on technical and administrative problems, including personnel shortages, organizational structure, and new technology.

iii. Skill in communicating management goals with individuals to obtain the desired effect, while ensuring compliance with established policies and regulations.

iv. Ability to perform the full range of supervisory duties, which includes responsibility for assignment of work, performance evaluations, maintenance of staff competencies, selection of staff, recommendation of awards, advancements, and disciplinary actions, as appropriate.

v. Knowledge of federal and state laws, regulations, and accrediting/regulatory requirements to develop plans and procedures for the laboratory.

vi. Knowledge of laboratory quality management procedures and principles sufficient to establish and monitor a laboratory quality management program and/or education and training of laboratory staff, including annual CLIA proficiency testing.

vii. Ability to rescreen previously screened negative cases, including those designated as "high risk" cases, before the diagnostic interpretation is released from the cytopathology laboratory.

(7) **Cytotechnologist (Laboratory Information Manager), GS-12**

(a) **Experience.** At this level, the candidate must have one year of creditable experience equivalent to the GS-11 grade level that is directly related to the position to be filled.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. The laboratory information manager develops and recommends new policies and procedures regarding the installation of evolving tests or techniques, and the use of the laboratory information system (LIS). The laboratory information manager ensures compatibility of the LIS with the overall hospital information system (HIS), and provides authoritative advice and consultation regarding the functions and capabilities of the LIS to all levels of the
organization. The laboratory information manager implements and maintains coding and mapping for laboratory test ordering, reporting, billing and workload recording, while considering compliance principles. The laboratory information manager analyzes emerging trends, software and technology, and adopts appropriate methods for local programs to meet agency goals. The laboratory information manager serves as the local expert representing the lab end users, by interacting with software developers to test and validate new and emerging software packages. The laboratory information manager is responsible for compliance with regulatory agency requirements, as related to information systems, and performs audits, as needed. The laboratory information manager provides consultation and training of personnel on computer functions, including ordering options, and is responsible for the maintenance of computer security keys.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

i. Knowledge and understanding of laboratory operations, and compliance and regulatory requirements to provide advice, training, and problem-solving services on specific projects, programs, or functions, in order to conduct inspections and audits, as needed.

ii. Ability to independently plan, organize, set priorities, work as a team member, and effectively complete assignments.

iii. Skill in using the laboratory information system, program techniques, computer language, and program design sufficient to implement various laboratory associated packages and sustain operation of the laboratory system.

iv. Ability to adapt, implement, and integrate the use of software to specific laboratory applications and processes, including the use of office automation software.

(8) **Supervisory Cytotechnologist (Laboratory Manager), GS-13**

(a) **Experience.** At this level, the candidate must have one year of creditable experience equivalent to the next lower grade level that is directly related to the position to be filled.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. The supervisory cytotechnologist (laboratory manager) reports to the director of the laboratory.
service. The incumbent is responsible for supervising a large staff of nonsupervisory and supervisory personnel, and for managing and overseeing laboratory service operations. The incumbent also provides guidance and serves as an authority and subject matter expert on laboratory medicine, including research, agency policies, new techniques and procedures, developing guidelines, assessing laboratory effectiveness, and for establishing and maintaining quality assurance and quality management programs. The laboratory manager consults with, or serves as a consultant for, local, network, and national programs and/or officials; manages regulatory affairs and compliance; and develops and manages program budget and resource utilization, inventory, acquisition, and contracting processes.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

i. Knowledge of the requirements of regulatory, licensing, accrediting agency, and laws governing clinical laboratory operations used in planning, implementing, and monitoring laboratory programs.

ii. Ability to plan and execute short- and long-term programs and/or goals, through project management and tactical/strategic planning.

iii. Ability to work collaboratively with other disciplines, upper management, and executive leadership.

iv. Advanced knowledge of concepts, principles, and methodology of operations for a major clinical laboratory program, so as to assess program effectiveness and provide authoritative guidance of operations, personnel, and management.

v. Skill in administrative management (e.g., budgeting, contracting, procurement, and property management) in accordance with regulations.

vi. Ability to provide the full range of supervisory duties, which include responsibility for assignment of work, performance evaluations, selection of staff, and recommendation of awards, advancements, and disciplinary actions.

(9) **Cytotechnologist (Regional Commissioner Technologist), GS-13**

(a) **Experience.** At this level, the candidate must have one year of creditable experience equivalent to the next lower grade level that is directly related to the position to be filled.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. The
cytotechnologist (regional commissioner technologist) serves as an authority for multiple laboratories in a region to ensure compliance with inspection and accreditation requirements and regulations. The cytotechnologist (regional commissioner technologist) provides direction and guidance to resolve technical problems and provides interpretation of existing regulations. The cytotechnologist (regional commissioner technologist) coordinates with VHA Central Office to ensure that each testing site is in compliance with inspection and accreditation requirements and regulations. The cytotechnologist (regional commissioner technologist) assists laboratories in the correction of any cited inspection deficiencies. The cytotechnologist (regional commissioner technologist) is responsible for coordinating the CLIA license applications for all laboratories in the region. The cytotechnologist (regional commissioner technologist) serves as a consultant to national program officials and provides professional, technical, and training support. The cytotechnologist (regional commissioner technologist) requires verbal, written, and electronic communication with accrediting and regulatory bodies. The cytotechnologist (regional commissioner technologist) works under the direction and guidance of the VHA Office of Enforcement in VHA Central Office.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Advanced knowledge of laboratory regulations that pertain to quality control, quality management, and proficiency testing, in order to assess and assist with laboratory compliance of quality programs in each facility assigned to that region.

ii. Ability to differentiate and interpret accrediting and regulatory requirements to provide guidance to laboratories on regulatory requirements, and to assess compliance for each laboratory assigned to that region.

iii. Knowledge of laboratory operations and the laboratory’s role within the total organization.

iv. Ability to create and deliver educational presentations to a variety of individuals, on matters that pertain to inspection and accreditation rules, regulations, and standards of all laboratory accrediting agencies.

v. Knowledge of anatomic pathology, clinical laboratory, and ancillary testing.

(10) **Cytotechnologist (Laboratory Director), GS-14**

(a) **Experience and Education.** At this level, the candidate must possess one year of creditable experience equivalent at the GS-13 grade level that is directly related to the position to be filled. A candidate must hold a doctoral degree in
chemical, physical, biological, or clinical laboratory science from an accredited institution, be certified, and continue to be certified by a board approved by the Department of Health and Human Services.

(b) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. The laboratory director is responsible for the overall operation and administration of the laboratory, in accordance with 42 Code of Federal Regulations (CFR) § 493. The laboratory director must ensure that testing systems developed and used for each of the tests performed in the laboratory provide quality laboratory services for all aspects of test performance, which include the pre-analytic, analytic, and post-analytic phases of testing. The laboratory director ensures the physical plant, LIS, and environmental conditions of the laboratory are appropriate for the testing performed and provide a safe environment where employees are protected from physical, chemical, and biological hazards. The laboratory director ensures the test methodologies selected have the capability of providing the quality of results required for patient care; verifies procedures used are adequate to determine the accuracy, precision, and other pertinent performance characteristics of the method; and that laboratory personnel are performing the test methods, as required, for accurate and reliable results. The laboratory director ensures that quality control and quality assessment programs are established and maintained, to provide quality services and identify failures in quality as they occur. The laboratory director ensures that all necessary remedial actions are taken and documented whenever significant deviations from the laboratory’s established performance characteristics are identified, and that patient test results are reported only when the system is functioning properly. The laboratory director ensures that consultation is available to the laboratory’s clients on matters relating to the quality of the test results reported and their interpretation concerning specific patient conditions. The laboratory director ensures that a general supervisor provides on-site supervision of high complexity testing performed by an adequate number of testing personnel qualified under 42 CFR 493.1489.

(c) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

i. Expert knowledge of both clinical and anatomic pathology laboratory testing systems, test performance, and all phases of testing.

ii. Expert knowledge of testing methodologies, policies, procedures, and quality assurance requirements to ensure accurate, reliable results, in compliance with the CFR and accrediting agency requirements.

iii. Skill in identifying deviations from established performance requirements.
iv. Ability to take remedial action to address performance deficiencies.

v. Ability to provide leadership and administrative guidance to subordinate staff.

vi. Ability to communicate effectively orally and in writing with a diverse group of professional staff and management officials at all levels.

vii. Skill in use of and oversight of the LIS, program techniques, computer language, and program design.

DEVIATIONS.

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for cytotechnologists in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the certification or educational requirements as a cytotechnologist be waived. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. §§ 7401, 7402, 7403, 7405.]
APPENDIX G62. REHABILITATION COUNSELOR
QUALIFICATION STANDARD
GS-0101
Veterans Health Administration

1. **COVERAGE.** The following are requirements for appointment as a Rehabilitation Counselor (RC) in the Veterans Health Administration (VHA). These requirements apply to all VHA RCs in the General Schedule (GS) 0101 series, including those assigned to VA medical centers, Community-Based Outpatient Clinics (CBOCs), Vet Centers, Veterans Integrated Service Network (VISN) offices and VHA Central Office. This work may include the provision of a wide array of clinical rehabilitation services to support Veterans with disabilities reintegration into community, employment and independent living.

2. **DEFINITIONS.**
   a. **Appointing Official.** The Human Resources Management Officer is delegated appointing authority to process and authenticate notifications of personnel actions and to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.
   b. **Approving Official.** The Veterans Integrated Service Network (VISN) Director, Facility Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.
   c. **Journey Level.** The full performance level for this qualification standard is the GS-11 grade level.
   d. **Creditable Experience.** Creditable experience must have required the use of knowledge, skills and abilities associated with current professional rehabilitation counseling practice. Creditable experience can be obtained through employment as a RC. This may be evidenced by providing direct rehabilitation counseling services to individuals with disabilities in the context of a professional counseling relationship which may include vocational rehabilitation and personal adjustment counseling, case management, assessment, or rehabilitation, training and employment services coordination.
   e. **Quality of Experience.** The quality of creditable experience must have been obtained post-graduate as a professional RC directly related to the duties to be performed. Qualifying experience must also be at a level comparable to professional rehabilitation counseling experience at the next lower level. For all assignments above the journeyman level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.
   f. **Part-Time Experience.** Part-time experience is creditable according to its relationship to the full-time work week. For example, an RC employed 20 hours per week, or on a
half time basis would receive one full-time work week of credit for each two weeks of service.

3. BASIC REQUIREMENTS.

a. Citizenship. Candidates must be a citizen of the United States. Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with 38 U.S.C. § 7407(a).

b. Education.

(1) A master’s degree in rehabilitation counseling or clinical rehabilitation counseling from a rehabilitation counseling program accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). If the applicant’s degree was granted prior to July 1, 2017, the program must be accredited by the Council on Rehabilitation Education.

OR

(2) A master’s degree in counseling or clinical rehabilitation counseling from a college or university accredited by a national or regional accrediting body accredited by Council for Higher Education Accreditation (CHEA).

OR

(3) A master’s or doctoral degree in a related field of study with course content that emphasized rehabilitation, counseling, disability, therapy, health, employment, wellness, or human development from a college or university accredited by a national or regional accrediting body accredited by CHEA.

OR

(4) Foreign graduates with a degree acceptable by the Commission on Rehabilitation Counselor Certification (CRCC).

c. Certification. Current, full and unrestricted certification as a certified rehabilitation counselor (CRC) from the CRCC to practice vocational rehabilitation counseling.

(1) Exceptions for Graduate RCs.

(a) RC graduates from an approved counseling or rehabilitation counseling program who otherwise meet the basic qualification requirements and the additional degree requirements for CRC certification by the CRCC, but do not possess the required certification, may be appointed, pending certification, as a graduate RC on a full-time temporary appointment not-to-exceed two years under the authority of 38 U.S.C. § 7405(a)(1)(D).
(b) Graduate RCs may only be appointed at the entry grade level and may not be promoted/converted until certification is obtained.

(c) Temporary graduate RC appointments may not be extended beyond two years or converted to a new temporary appointment.

(2) **Failure to Obtain Certification.** In all cases, RCs must actively pursue meeting prerequisites for certification starting from the date of their appointment. This includes working towards completion of CRCC’s required acceptable employment experience and completing required CRCC documentation to verify employment experience and supervision by a CRC. At the time of appointment, the RC supervisor will provide the RC with the written requirements for certification, including the time by which the certification must be obtained and the consequences for not becoming certified by the deadline. Failure to become certified within the prescribed amount of time will result in removal from the GS-0101 RC series and may result in termination of employment.

(3) **Loss of Certification.** An employee in this occupation who fails to maintain the required certification must be removed from the occupation, which may also result in termination of employment.

d. **Grandfathering Provision.** All individuals employed as RCs within VHA on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series, and grade held including positive education and certification. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) They may be reassigned, promoted up to and including the journeyman level (full performance level), or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) If a RC who was retained under this provision leaves the occupation, the employee will lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

(3) RCs initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

(4) RCs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

f. **English Language Proficiency.** Candidates must be proficient in spoken and written English to be appointed as authorized by 38 U.S.C. § 7403(f).

4. **GRADE DETERMINATIONS.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

a. **Rehabilitation Counselor, GS-09**

   (1) **Experience.** None beyond the basic requirements.

   (2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to meeting the experience or educational requirements for this grade level, the candidate must demonstrate all of the following KSAs:

   (a) Knowledge of human development and behavior, medical, psychosocial, and vocational aspects of disability and differential influences of environmental and cultural factors to assist persons with disabilities in determining suitable vocational goals.

   (b) Knowledge of history, philosophy and disability rights legislation in the field of rehabilitation to apply in the practice of rehabilitation counseling.

   (c) Ability to synthesize assessment and diagnosis information in conjunction with labor market trends and community/educational resources to develop an effective individual service delivery plan.

   (d) Knowledge of caseload management strategies to maximize an individual's independent functioning from assessment through provision of post-employment services.

   (e) Ability to employ person-centered job development strategies to facilitate successful job placement.

   (f) Knowledge of assessment tools and methods, functional capacity evaluations and specific vocational preparation to evaluate transferrable skills, residual capacities and needs for accommodations and assistive technology.

   (3) **Assignments.** Employees at this level serve as entry level RCs. Provide vocational and personal adjustment counseling, case management and transferrable skills analyses to aid Veterans with severe disabilities in pursuit of their self-determined employment, educational and independent living goals. Conduct assessments through record reviews, observations and interviews with Veterans and their support systems to generate and document personal, vocational and educational histories. Customize evaluation of abilities, aptitudes, interests, values and preferences. Assist
Veterans in vocational exploration activities to include informational interviews and labor market research. Examine the impact of employment income on Veteran’s benefits. In coordination with Veteran’s interdisciplinary teams (IDT), develop and amend patient-centered treatment plans utilizing specific, measurable, agreed upon, realistic and time-based (SMART) goals. Promote employment programs to community employers to establish relationships that will result in providing work opportunities for Veterans with significant behavioral, physical, emotional and/or cognitive challenges under the general supervision of certified RCs. Conduct outreach and job development to match Veterans strengths to local workforce needs. Facilitate job placement for Veterans by teaching valuable job search skills, resume/application development, interview skills and basic computer skills. Coordinate transportation to interviews/hiring events. Complete job analyses to facilitate job coaching and retention services to aid Veterans in learning and maintaining proficiency in performance of essential job tasks. Counsel Veterans regarding importance of soft skills (e.g. personal hygiene, cooperation with co-workers, and following instructions) when employed to enhance job satisfaction and foster natural supports in the workplace. Coordinate job search clubs for Veterans to improve in self-directed job search activities. Complete clinical charting and participate in professional peer reviews.

b. Rehabilitation Counselor, GS-11

(1) **Experience.** Completion of one year of professional experience equivalent to the next lower grade level directly related to the position being filled.

OR

(2) **Education.** A doctoral degree in rehabilitation counselor education or related field (e.g. rehabilitation psychology) from a CACREP accredited institution or from an institution accredited by a national or regional accrediting body accredited by CHEA.

(3) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of physical and psychological disabilities, appropriate accommodations and assistive technology principles to mitigate and reduce or eliminate barriers to integrate into the community.

(b) Knowledge of counseling theory, medical and psychiatric terminology and signs and symptomology of suicidal and homicidal ideations, to communicate appropriately with community health care professionals to provide useful input to other team members and employers in relation to the Veteran and/or his/her family’s psychosocial needs and to recommend and help implement suitable treatment plans.

(c) Ability to use evidence-based and evidence informed vocational and professional counseling practices to include individual placement and support (IPS),
customized employment and supported employment models and motivational interviewing skills to promote self-awareness, adjustment to disability, enhanced job retention and successful integration to the community.

(d) Knowledge of career development processes and job analysis methodology to determine essential functions of jobs, worksite modifications and/or alternative vocational goals given the work history and residual functional capacities of individuals with disabilities.

(e) Ability to administer and interpret a wide variety of assessment methods including transferrable skills and labor market analyses to evaluate for individual interests, aptitudes and abilities and to identify suitable vocational goals for the development of an effective individual service delivery plan.

(f) Knowledge of marketing strategies to develop collaborative partnerships/Memorandums of Agreement within VA and local business community to enhance employment and/or work opportunities.

(g) Knowledge of military culture and specific factors and dynamics associated with Veterans, particularly combat Veterans, to assist those who are returning to community and community based-work.

(4) Assignment. This is the journey level for this assignment. Provide personal adjustment counseling, therapeutic rehabilitation interventions and case coordination services, utilizing evidence-informed and evidence-based modalities to aid Veterans with severe disabilities in achieving competitive employment and educational and independent living goals. Conduct biopsychosocial assessments using medical records, pertinent disability documentation, observation and interviews with Veterans and their support systems to generate personal, vocational, and educational histories. Select, administer and interpret vocational instruments to evaluate abilities, aptitudes, interests, values, preferences, transferrable skills and overall work resilience. Customize vocational exploration activities for identification of self-determined rehabilitation needs and goals. Consult with interdisciplinary teams (IDT) to enhance coordination of care, ensure medical clearance, and provide for optimal timing of further interventions. Synthesize assessment information to identify barriers to employment and their vocational implications. Determine clinical need for and capacity to benefit from therapeutic and rehabilitation services to include: work restoration/resilience treatment, transitional work placement and compensation, supported employment, assistive technology, financial benefits counseling and potential benefits protections. Develop patient-centered treatment plans utilizing SMART goals and provides ongoing assessment of Veteran’s progress. Procure and manage transitional work agreements from community, state and federal agencies. Monitor work site compliance with agreements to ensure Veterans are appropriately trained and evaluated consistent with industry standards. Devise solutions to reduce and/or eliminate barriers and meet Veterans’ placement needs which may require substantial modification to environmental or functional demands within a work
setting. Provide psychoeducational groups to teach effective job search skills, employer-desired soft skills and life skills fostering independence. Complete interpretive data reports. Provide disability education and program-specific training to staff and stakeholders. May supervise vocational rehabilitation students.

c. **Rehabilitation Counselor (Coordinator), GS-12**

(1) **Experience.** Completion of one year of professional experience at the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   (a) Ability to address complexity of psychosocial rehabilitation factors and deliver timely and high-quality outcomes consistent with statutes, regulations and policies.

   (b) Theoretical and practical knowledge of a range of rehabilitation service delivery systems for the administration and management of a clinical rehabilitation program.

   (c) Ability to initiate and lead interdisciplinary groups of staff utilizing sound judgement and decision-making to improve customer service while delivering Veteran-focused and outcome-oriented health care.

   (d) Knowledge of applicable accreditation bodies and standards to ensure long-term compliance.

   (e) Knowledge of business administration practices such as managing participant payroll, accounting, billing, marketing, workforce development (vocational, educational and placement of Veterans) services and/or customer service to successfully operate a rehabilitation employment program.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. Assists with the management of a clinical rehabilitation service delivery system within an organization which may include housing, independent living, vocational and educational services. Utilize complex rehabilitation counseling skills and motivational interviewing techniques not typically required in routine practice to assess a Veteran’s self-awareness, adjustment to disability and work resilience. Exhibit clinical expertise through timely application of therapeutic interventions, case coordination, crisis intervention, IDT consultation, rehabilitation plan development and ongoing assessment and job development practices. Exercise professional judgement to arrange for suitable placement of Veterans with the most severe disabilities and employment challenges through skillful analysis of their abilities,
aptitudes, preferences, disability conditions and resulting impairments. Ensure timely and accurate Veteran Compensated Work Therapy-Transitional Work (CWT-TW) payrolls, bills of collection, CWT Account balances, deposits to CWT Account and ensure all expenditures utilize approved budgeting procedures, including internal controls and separation of duties. Provide input and guidance on program evaluations, strategic plans and policy considerations to supervisor as appropriate for all interested VA entities and accrediting bodies. Monitor progress towards accomplishment of program goals and examines the benefits of process improvements. Provide oversight, support and feedback to lower level RCs and student interns on work assignments, time and caseload management and employment outcomes.

d. Rehabilitation Counselor, GS-12

(1) **Experience.** Completion of one year of professional experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate all the following KSAs:

(a) Ability to apply and teach principles and practices of the evidence-based model of individual placement and support, supported employment (IPS, SE), by engaging others in multiple training methods including hands-on, virtual and telephone trainings, utilizing excellent consultative, facilitative and organizational skills as well as coaching/listening skills.

(b) Ability to conduct in person coaching, develop community-wide learning events, and lead mock SE fidelity reviews to provide feedback regarding SE program services and adherence to the SE model.

(c) Skill to apply principles and practices of IPS, SE, psychiatric rehabilitation and recovery principles, customized employment and fidelity scale measures to successfully engage Veterans and care providers in the rehabilitation process.

(d) Skill to apply advanced counseling skills, crisis intervention and personal and family counseling to intercede on behalf of Veterans, their families and significant others needing specific assistance with employment, housing and finances.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. Serve as a CWT-SE trainer. Expand and guide VISN-wide recovery-oriented rehabilitation services within existing CWT-SE sites and/or provide training and guidance on establishment of new evidence-based CWT-SE programs. Develop curricula and uses teaching methods contextualized for adult learning styles. Lead learning communities consisting of all SE providers by developing workshops, scheduling guest speakers,
facilitating discussions on email groups, sharing resource materials and facilitating networking among VISN SE sites. Participate in and/or facilitate regularly scheduled SE clinical conference calls and the national mentor trainer meetings. Review outcome data and discuss data implications for the delivery of employment services with the VISN learning community of SE providers. Organize training events on CWT-SE services. Lead other CWT-SE programs on best practices, use of fidelity scale to guide service delivery and in the analysis, development and implementation of the IPS, SE model as directed by VA Central Office (VACO). Disseminate communications with supervisors and staff of CWT-SE, provide technical assistance to staff and managers and collaborate with programs to prepare for periodic fidelity reviews and accreditation surveys.

e. **Supervisory Rehabilitation Counselor, GS-12**

(1) **Experience.** Completion of one year of professional experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to supervise (e.g. plan, direct, oversee, review work of subordinate staff), assess employee strengths, opportunities for growth, and qualifications to accomplish program goals, adapt work operations, and guide staff.

(b) Knowledge of labor/management agreements to effectively manage issues and concerns.

(c) Knowledge of applicable accreditation bodies (i.e. Joint Commission and Commission on Accreditation of Rehabilitation Facilities) and their standards to ensure continuous compliance.

(d) Theoretical and practical knowledge of a range of rehabilitation delivery systems for the development, implementation, management and growth of rehabilitation programs and services.

(e) Knowledge of business administration practices such as managing participant payroll, accounting, budget planning, to successfully operate a rehabilitation program.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty), and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The incumbent must serve as first-level supervisor. Provide oversight of a group of RCs at the full performance level and below with administrative responsibility for planning and directing the work. They oversee attendance and leave, including approval of sick and annual leave and vacation schedules. Inform higher-level management of
anticipated vacancies or increases in workload. Recommend promotions, reassignments, performance ratings, and retention or release of probationary employees or other changes of assigned personnel. Hold corrective interviews with employees, referring disciplinary problems to higher levels of management. Resolve informal complaints of employees and deals with union representatives on personnel matters. Provide clinical and technical supervision necessary for accomplishing the work of the organizational unit including adherence to the IPS model. Assist in development and revision of comprehensive policies, risk management, and strategic plans based on feedback from stakeholders, accrediting bodies, and program evaluation data. Estimate budgetary needs based on history, anticipated workload, and the production capability of the unit and makes justified requests or proposals. Maintain accounting controls, purchase cards, payroll, and fund control point specific to the CWT-TW Program. Compile statistical reports and data for local and national leadership.

f. Rehabilitation Counselor, GS-12

(1) **Experience.** Completion of one year of professional experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Skill in program management/administration of a wide range of rehabilitation program, including such areas as clinical specialties, finance and application of specialized practices for effective rehabilitation service delivery.

(b) Theoretical and practical knowledge of a range of rehabilitation delivery systems for the development, implementation, management and growth of rehabilitation programs and services.

(c) Ability to analyze organizational and operational problems and to develop and implement solutions that result in sound operation of the major specialty treatment program, such as a CWT program.

(d) Ability to communicate, both orally and in writing, to make clear, convincing presentations and reports, represent the agency and assigned program areas and explain recommended proposals to local and national leadership.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. RCs at this level serve as program managers. Manage the administrative and clinical aspects of a major specialty treatment program, such as a CWT program (including CWT-TW and SE as required by VHA Handbook 1160.01, Uniform Mental Health Services in VA Medical Centers and Clinics). Manage work assignments, marketing, treatment
services provided and admission, transition and discharge criteria for the programs. Develop strategic plans to meet major goals after conducting thorough assessment of priorities for vocational rehabilitation and CWT programming. Serve on local task forces and/or represents VA at professional/program community group/events and committees. Provide overall maintenance of accounting controls, billings, payroll, pay records and fund control point specific to the CWT-TW Program. Ensure accuracy of all financial reports connected with the program which are submitted to VACO. Manage the administrative and programmatic resource allocations (e.g., budgets, purchasing, labor mapping) within the CWT programs, including oversight for contracts related to CWT-TW. Ensure CWT operations, documentation, and information reporting systems are compliant with the standards of all relevant accrediting bodies.

g. Supervisory Rehabilitation Counselor, GS-13

(1) **Experience.** Completion of one year of professional experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Skill in leading others, assessing employee strengths, opportunities for growth and qualifications to accomplish program goals, adapt work operations and guide staff.

(b) Knowledge of labor/management agreements and how to follow their provisions to effectively manage issues and concerns.

(c) Knowledge of applicable accreditation bodies and their standards to ensure continuous compliance and successful maintenance of program accreditations.

(d) Ability to use both qualitative and quantitative methods for the development and implementation of meaningful program evaluation tools, study of program trends and program improvement.

(e) Knowledge of business administration practices such as managing payroll, accounting, budget planning, marketing, workforce development and customer service to successfully operate a rehabilitation program.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. Supervisory RCs typically supervise a significant number of professional staff at the SE/Mentor Trainer and RC (Coordinator) level and below as well as other equivalent clinical staff. Lead, coordinate and manage all aspects of a clinical rehabilitation service delivery system within an organization. Supervise daily operations to include
coordinating interdisciplinary staffing, treatment services, work assignments, budget, staff schedules, safety in the community, training requirements and conducts meetings. Determine which programs/projects should be initiated, expanded, revised or replaced through systematic analyses, program evaluations and accountability measures. Develop and revise comprehensive policies, risk management and strategic plans based on feedback from stakeholders, accrediting bodies and program evaluation data. Allocate program resources to improve quality and delivery of care provided to Veterans while considering staff talents and achieving program mission. Establish staff performance expectations and conduct staff work performance reviews. Effect disciplinary measures as appropriate based on the authority delegated to this area. Write position descriptions and/or functional statements and recommend or select for positions, career ladder promotions, within-grade increases, status changes, awards, staff travel and overtime. Maintain effective labor/management relationships and manage personnel in accordance with applicable laws, policies, directives and labor/management agreements. Resolve formal and informal complaints and grievances. Project budget based on historical and anticipated workload taking into consideration the production capability of the unit to make justified requests or proposals. Oversee the maintenance of billings, payroll, pay records, specific to the CWT-TW program and the accuracy of all financial reports connected with the program which are submitted to VACO. Maintain oversight of the administrative and programmatic resource allocations (e.g., budgets, purchasing, labor mapping) within the VHA Vocational Rehabilitation (VHA VR) programs, including oversight for Memorandum of Agreements (MOA) related to CWT-TW. Maintain accounting controls, functions as an approving official for purchase cards and fund control points.

h. Supervisory Rehabilitation Counselor, GS-13

(1) **Experience.** Completion of one year of professional experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Skilled in program management/administration of a wide range of rehabilitation programs, including such areas as clinical specialties, finance, accountability, oversight of work performed by program staff, consultation, negotiation and monitoring to successfully operate and enhance all programs.

(b) Ability to provide individual and group training, orientation, consultation and guidance within clinical specialization of rehabilitation counseling practice to develop, improve and maintain programming.

(c) Ability to monitor program outcomes using a data driven quality assurance process to make decisions associated with program management and the development of productivity standards appropriate to the service provided.
(d) Ability to translate leadership goals and objectives into well-coordinated and controlled work processes for effective program operations.

(e) Extensive knowledge of all legal guidelines governing the operation of CWT programs, their scope and their effect on clinical programming and service delivery.

(f) Skill in leading others, assess employee strengths, opportunities for growth and qualifications to accomplish program goals, adapt work operations and guide staff.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. Serve as supervisor and program manager. Manage the administrative and clinical aspects of a major specialty treatment program, such as CWT, physical medicine & rehabilitation program, CWT-transitional residence (CWT-TR), homeless Veterans program, mental health residential rehabilitation treatment program or a psychosocial rehabilitation and recovery center located at one facility or multiple divisions of a facility. Coordinate interdisciplinary staffing, work assignments, budget, treatment services provided and admission, transition and discharge criteria for the programs. Supervise employees assigned to the program. Serve on local, VISN, and/or national VA committees or task forces and/or represents VA at professional/program community group/events and committees. Manage allocated budgetary resources and supervises the expenditure of funds; e.g., administrative travel, supplies, equipment and staff development in an efficient and economical manner. Utilize wide latitude and independent judgment in exercising line and staff authority for administrative and programmatic resource allocations (e.g., budgets, purchasing, labor mapping) within major specialty programs. Integrate major specialty treatment programs and services into the entire mental health continuum of care in collaboration with the senior leadership. Conduct surveys of rehabilitation facilities and agencies to promote the establishment of suitable medical and rehabilitation services not currently available, or to develop and implement pilot rehabilitation projects.

i. Rehabilitation Counselor, GS-14

(1) Experience. Completion of one year of professional experience equivalent to the next lower grade level directly related to the position being filled.

(2) Demonstrated Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to perform analytical studies and interpretation of results to coordinate the evaluation of programs, projects and to recommend improvements.
(b) Ability to communicate, both orally and in writing, to complete interpretative data reports and review outcomes to discuss implications of effectiveness and efficiency of services.

(c) Ability to guide the development of productivity standards appropriate to each service provided to optimize efficiency of resources.

(d) Ability to represent VHA rehabilitation related programs within VISN leadership and local stakeholders of public interest groups and/or events.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty), and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. RCs at this level are located at the service line or VISN level. Provide oversight of the service line or VISN to ensure administrative management of the clinical rehabilitation service delivery system by securing the resources necessary to implement and integrate emerging practices into existing programs. Develop strategic plans for this continuum of care involving work restoration/resilience, supported employment and residential rehabilitation programs through assessing, organizing and evaluating network and/or local outcome data. Develop network and/or local program standards utilizing clinical practice guidelines to include program specific manuals, memoranda, issue briefs, information letters and other documentation pertaining to clinical rehabilitation and employment programs. Collaborate with VISN and/or facility leadership and supervisors in a wide variety of areas including workload data capture, decision support systems, managerial cost accounting, reporting and data analysis, strategic analytics for improvement and learning, Northeast Program Evaluation Center, homeless operations management, and evaluation system program monitoring. Collect relevant program outcome data from various program evaluation systems to monitor and support facility and/or network compliance with national directives and guidelines. Prepare and maintain accurate statistical and narrative records and reports for VISN and/or facility leadership. Maintain efficient management of clinical rehabilitation services through ongoing assessment of cost effectiveness and adherence to procurement regulations thereby ensuring solvency for funds used in the operation of major programs such as the CWT and CWT-TR programs.

j. **Rehabilitation Counselor, GS-14**

(1) **Experience.** Completion of one year of professional experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   (a) Ability to communicate, both orally and in writing, to make clear, convincing presentations and reports, explain or justify recommendations, represent the
agency and assigned program areas, provide guidance and advise VISN/local program managers and supervisors.

(b) Ability to make appropriate decisions in a wide variety of situations in the absence of written guidelines without being able to consult with senior staff.

(c) Knowledge of legislative and statutory authorities, laws, policies, precedents, mandates of the US Code of Federal Regulations, Board of Veterans Appeals and Office of General Counsel for application to the administration and guidance of VA VISN/Central Office programs.

(d) Ability to represent VHA rehabilitation related programs with leadership from state and local governments, congressional district office staff, and professionals of local public interest groups and/or events.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. RCs at this level are located at Central Office and provide administrative management of a major organizational component within VHA’s clinical rehabilitation service delivery system. Create instruments for data collection and perform program analyses for trends and operational quality to lead program and service expansion within VHA. Consult with multidisciplinary elements within the organization, academia, community and private industry to develop research projects and enhanced clinical opportunities utilizing evidence-based practices that support the VHA rehabilitation programs’ mission and objectives. Develop strategic plans and program guidelines for VHA’s clinical rehabilitation programs through assessing, organizing, and evaluating national outcome data. Provide expert advice and technical assistance to VACO, program managers and field supervisors concerning all program evaluation systems and relevant outcome data to improve efficacy of VHA clinical rehabilitation programming. Prepare and maintain accurate statistical and narrative records and reports for VHA leadership on issues regarding legal or legislative matters that may require consultation within a specified time. Provide oversight and development of standard policies for all financial operations of VHA's clinical rehabilitation service delivery system. Represent the organization with respect to contract changes, adjustments, resolution of contract claims, work delays and settlements.

5. DEVIATIONS.

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the education requirements be waived.
c. The placement of individuals in grade levels or assignments not described in this standard may only be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

**Authority:** 38 U.S.C. §§ 7304, 7402.
APPENDIX G63. Clinical Perfusionist
GS-0601
Veterans Health Administration

1. **COVERAGE.** This standard applies to all Clinical Perfusionist (CP) positions in the Veterans Health Administration (VHA). A CP is a medical professional qualified by academic education, clinical education and professional credentialing to provide extracorporeal patient care services. Patient care services include conducting and managing cardiopulmonary bypass, autotransfusion, intra-aortic counter pulsation and may include ventricular assistance and extracorporeal membrane oxygenation. CPs are responsible for the selection of appropriate equipment and techniques necessary for the support, treatment, measurement and supplementation of the cardiopulmonary system of a patient. They use a comprehensive understanding of anatomy, physiology, physics, pharmaceutical administration and mechanics of extracorporeal circulation to provide monitoring, analysis and treatment of patient physiologic conditions to maintain blood pressure, anticoagulation, myocardial electromechanical silence and preservation (with unique administration of cardioplegia), thermal regulation, fluid balance, electrolyte/acid-base balance and blood gas composition according to established guidelines and protocols. The scope of practice of the CP is a dynamic and continuously evolving profession with emerging areas of practice.

2. **DEFINITIONS.**

   a. **Journey Level.** The full performance level for this qualification standard is GS-12.

   b. **Creditable Experience.** Knowledge of current clinical perfusion practices. To be creditable, the experience must have required the use of knowledge, skills and abilities (KSAs) associated with current professional clinical perfusion practice. The experience must be post bachelor’s degree. Experience satisfying this requirement must be active professional practice, which is paid/non-paid employment as a professional CP.

   c. **Quality of Experience.** Experience is only creditable if it is obtained following graduation with a bachelor’s degree or higher in clinical perfusion from an accredited training program. Qualifying experience must also be at a level comparable to CP experience at the next lower grade level. For all assignments above the full performance level, the higher-level duties must consist of significantly larger scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

   d. **Part-Time Experience.** Part-time experience as a professional CP is creditable according to its relationship to the full-time work week. For example, a CP employed 20 hours per week, or on a half time basis, would receive one full-time workweek of credit for each 2 weeks of service.
e. **Commission on Accreditation of Allied Health Education Programs (CAAHEP).** The CAAHEP is a programmatic postsecondary accrediting agency recognized by the Council for Higher Education Accreditation.

f. **EQual™ Canada.** The official accrediting agency for perfusion programs in Canada is EQual™ Canada, a branch of Accreditation Canada and the Health Standards Organization. Until 2018, the Conjoint Committee on Accreditation of the Canadian Medical Association, accredited the Canadian perfusion programs. Effective February 1, 2018, Accreditation Canada took over accreditation services to allied health education programs through the EQual™ Canada program.

g. **American Board of Cardiovascular Perfusion (ABCP).** The ABCP establishes qualifications for examination and procedures for recertification in the field of cardiovascular perfusion. Its requirements and procedures are reviewed and modified periodically as necessary.

h. **Provisional Certification.** ABCP issues a letter of provisional certification to individuals who have graduated from an accredited program and met the clinical requirements.

i. **Board Certification.** ABCP issues a certification to individuals who have graduated from an accredited program, completed all clinical requirements and achieved satisfactory performance on the ABCP’s 2-part certification examination. Once an individual has received this certification they are board certified in the field of clinical perfusion as a Certified Clinical Perfusionist (CCP) by the ABCP. Reference to “certified” or “board certified” throughout this standard is intended for those who have been deemed board certified.

3. **BASIC REQUIREMENTS.**

   a. **Citizenship.** Be a Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3.g., this part.) See 38 U.S.C. § 7401(3); 38 U.S.C. § 7405(a)(1)(B); 38 U.S.C. § 7407(a).

   b. **Education.** Candidates must hold a degree in perfusion as described below in paragraphs (1) and (2) that has been accredited by either CAAHEP or EQual™ Canada at the time the program was completed.

      (1) Bachelor’s or master’s degree in perfusion from a program in the United States or Canada accredited by the CAAHEP or EQual™ Canada.

      OR,

      (2) Bachelor’s or master’s degree in addition to a post-baccalaureate certificate in perfusion from a program accredited by CAAHEP or the EQual™ Canada.

      NOTE: The degree must have been obtained from an institution whose accreditation was in place for the year in which the course of study was completed.
The degree is to be verified by submitting a request to mail@caahep.org. The request must include the name of the school, city, state and graduation date of individual.

c. **Board Certification.** Persons hired or reassigned to CP positions in VHA must be board-certified in the field of clinical perfusion as a Certified Clinical Perfusionist by the ABCP. The board certification must be current, and the applicant must abide by the certifying body's requirements for continuing education.

(1) **Exception for Non-Board Certified, Entry Level Candidates.** CPs who possess a letter of provisional certification from the certifying agency (e.g., ABCP), who otherwise meet the eligibility requirements, may be given a temporary appointment as a CP under the authority of 38 U.S.C. § 7405(a)(1)(D). The appointing official may waive the requirement of certification for a period not to exceed two years for a CP who provides care under the supervision of a board-certified CP at or above the full performance level. This exception only applies at the entry levels (GS-5 and GS-7). For grade levels at or above the GS-9 level, the candidate must be board certified. Temporary appointments of non-board-certified CPs, may not be extended beyond two years or converted to a new temporary appointment. The Human Resources Office will provide the CP in writing the requirement to: obtain their board certification; the date by which the CP board certification must be acquired; and the consequences for not becoming board certified CP by the deadline date. The written notice must be provided to the selectee prior to the entrance on duty date.

NOTE: This temporary appointment cannot be extended or renewed.

(2) **Failure to Obtain Board Certification.** In all cases, provisionally certified CPs must actively pursue obtaining board certification from the date of their appointment. Failure to become board certified within two years from date of appointment will result in removal from the GS-0601 CP series and may result in termination of employment.

(3) **Loss of Board Certification.** Once board certified, a CP must maintain a full, valid and unrestricted board certification to remain qualified for employment. Loss of licensure, credential, or required certification will result in removal from the GS-0601 CP occupation and may result in termination of employment.

d. **Licensure.** None required, but a license or license eligibility or State required credential is strongly preferred.

e. **Grandfathering Provision.** All persons employed in VHA as a CP or Medical Instrument Technician (Perfusion), GS-0649 on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including education and/or certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following apply:
(1) Such employees may be reassigned, promoted up to and including the full performance (journey) level or changed to lower grade within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

(2) Such employees in an occupation that requires a licensure/certification/registration only at higher-grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher-grade levels.

(3) CPs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(4) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or certification that meet all the basic requirements of the qualification standard must maintain the required credentials as a condition of employment in the occupation.

(5) CPs who are converted to the occupational series 0601 title 38 hybrid status under this policy and provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as a CP.

g. **English Language Proficiency.** Candidates must be proficient in spoken and written English to be appointed as authorized by 38 U.S.C. § 7403(f).

4. **GRADE REQUIREMENTS.**

a. **Grade Determination.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

(1) **Clinical Perfusionist, GS-5**

   (a) **Experience and Education.** None beyond basic requirements.

   (b) **Assignment.** The entry level is used for CPs who have graduated from an accredited program and received their letter of provisional certification and are thus provisionally certified and/or board-certified CPs with less than one year of experience.

(2) **Clinical Perfusionist, GS-7**

   (a) **Experience and Education.** None beyond basic requirements. This level is used for CPs who are provisionally certified and/or board-certified CPs who meet the basic requirements listed and have less than one year of experience and
possess one of the following for advanced entry level placement below:

i. Bachelor's degree from an accredited college or university, with an exemplary academic record as demonstrated by at least one of the following:

   a. Class Standing: Applicants must be in the upper third of the graduating class in the college, university or major subdivision, such as the College of Liberal Arts or the School of Business Administration, based on completed courses.
   
   b. Grade-Point Average (GPA): Applicants must have a grade-point average of:

   (1) 3.0 or higher out of a possible 4.0 ("B" or better) as recorded on their official transcript, or as computed based on four years of education, or as computed based on courses completed during the final two years of the curriculum; or

   (2) 3.5 or higher out of a possible 4.0 ("B+" or better) based on the average of the required courses completed in the major field or the required courses in the major field completed during the final two years of the curriculum.

(b) Assignment. Candidates at this level serve in a developmental position practicing under close supervision of a CP at or above the full-performance level. Employees at this level must be provisionally certified, but are not required to be board certified by ABCP, if on a temporary appointment provided under 3c(1) of this appendix.

(c) Demonstrated Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate following KSAs:

i. Knowledge of general anatomy, physiology and pathology with a detailed knowledge of cardiovascular anatomy, physiology and pathology.

ii. Ability to formulate, modify and execute the perfusion plan as needed throughout the procedure while applying all safety precautions and equipment to minimize and mitigate risks and ensure environmental maintenance using judgement to ensure patient safety.

iii. Ability to select proper equipment and circuit after a pre-procedure assessment of the patient’s medical history.

(3) Clinical Perfusionist, GS-9

(a) Experience, Certification and Education. In addition to the basic requirements, candidates must have:
i. Graduated from an accredited program and met the clinical requirements; and,

ii. Obtained their provisional certification and have at least one year of CP experience equivalent to the GS-7 grade level; or

iii. Obtained their provisional certification and met one of the options under advance entry level placement in paragraph 4a(2) above with at least one year of CP experience equivalent to the GS-7 grade level; or

iv. Have obtained ABCP certification as a CCP.

(b) **Assignment.** Candidates at this grade level serve as a CP in a position progressively expanding their ability to provide perfusion services for a wider range of clinical scenarios. CPs at this level receive some clinical supervision and/or guidance by a higher-level CP. CPs at this level have obtained their ABCP certification as a CCP. CPs at this level are responsible for the management of circulatory and respiratory functions, physiologic and metabolic needs of the patient during procedures involving the heart-lung machine and/or ancillary perfusion equipment utilizing an understanding of anatomy, physiology, pharmacology, anticoagulation, physics and mechanics of cardiopulmonary bypass and/or ancillary techniques. At this level, the CP provides clinical patient assessments, perfusion, circulatory pressure, oxygenation, thermal regulation, volatile anesthetic, renal replacement, management of anticoagulation, myocardial electromechanical silence and preservation, fluid management, blood product administration, blood gas analysis and management, electrolyte and acid base balance and pharmaceutical administration according to established guidelines while using aseptic techniques. This includes anticipating, analyzing and monitoring and responding appropriately to maintain patient hemodynamic stability and homeostasis by independently adjusting and modifying case management decisions according to specific patient requirements in surgical procedures of varying complexity. Duties also include providing routine and emergent management of Intra-Aortic Balloon Pump counter pulsation, autotransfusion/cell salvage and standby/surgical assistance for any procedures that fall within the CP’s scope of practice and may include Extracorporeal Membrane Oxygenation and Ventricular Assist Devices.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate following KSAs:

i. Knowledge of general anatomy, physiology and pathology with a detailed knowledge of cardiovascular anatomy, physiology and pathology.

ii. Knowledge of extracorporeal circulation technology including adjunctive techniques.

iii. Ability to formulate, modify and execute the perfusion plan as needed throughout the procedure while applying all safety precautions and equipment
to minimize and mitigate risks and ensure environmental maintenance using a high degree of discretion and judgement to ensure patient safety.

iv. Ability to select proper equipment and circuit after a pre-procedure assessment of the patient’s medical history.

v. Ability to precisely document pre-bypass checklist(s) and official perfusion record(s).

(4) Clinical Perfusionist, GS-11

(a) Experience, Certification, and Education. In addition to the basic requirements, candidates must have at least one year of CP experience equivalent to the next lower grade and have obtained ABCP certification as a CCP. License is preferred, but not required.

(b) Assignment. Employees at this grade level practice independently, seeking guidance when necessary, have the qualifications to exhibit exceptional clinical skills and consistently demonstrate a high-level of expertise in diagnosing and treating seriously ill, multi-symptomatic patients. CPs at this level demonstrate a comprehensive, professional understanding of perfusion clinical practice and the proper application of perfusion techniques, while exhibiting the qualifications to perform more complex procedures requiring skills and competency beyond that expected in the previous grade. CPs at this level have extensive working knowledge of extracorporeal technology. At this level, CPs work collaboratively with physicians in the care of patients by autonomously managing and conducting cardiopulmonary bypass to provide complete life support during any medical situation where it is necessary to support the patient’s cardiopulmonary function. Full performance CPs independently formulate a perfusion plan of action which includes multiple tasks and priorities including review of pre-procedure patient history, pre-operative consults and clinical findings. They assist the surgeon by independently developing perfusion treatment strategies for specialty populations and providing associated specialized perfusion services (which may include isolated limb infusion, isolated limb perfusion, left heart bypass, liver bypass, thermogenic lavage, blood component therapy, platelet gel/sequestration, aquapheresis, non-differentiated progenitor cell harvest, acute normovolemic hemodilution, organ procurement and organ preservation). They work on-call independently for extended periods with no back up relief. CPs at this level may provide clinical oversight and consultation for lower graded perfusionists and medical center staff within the CP’s scope of practice and its potential applications in other medical, surgical, and specialty areas. They may also participate in collaborative research and adjunctive therapies.

(c) Demonstrated Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate all the following KSAs:

i. Ability to independently provide effective care to patients characterized by using sound judgement in assessing, planning, implementing, documenting
and evaluating perfusion applications for assigned patients.

ii. Ability to apply in-depth knowledge of anatomy, physiology, and specialized clinical procedures consistent with updated standard of care in the profession.

iii. Ability to independently practice perfusion utilizing a collaborative team concept of perfusion care, providing clinicians and professional staff with consultation.

iv. Ability to perform, under administrative direction, with wide latitude and independent judgment, work of clinical difficulty and responsibility.

v. Knowledge of associated specialized procedures to assist in independently developing the perfusion treatment strategies for specialty populations to assist the surgeon.

vi. Knowledge of specialized perfusion services.

vii. Ability to anticipate and respond appropriately to potentially serious situations involving the patient and/or equipment that may arise with the ability to use a high degree of discretion and judgement.

viii. Ability to apply expert in-depth knowledge of the principles and operation of all equipment to provide stat troubleshooting assistance.

(5) Clinical Perfusionist, GS-12

(a) Experience, Certification and Education. In addition to the basic requirements, candidates must have at least one year of CP experience equivalent to the next lower grade level and have obtained their ABCP certification as a CCP. License is preferred, but not required.

(b) Assignment. This assignment is the full performance level. CPs at this level perform at the highest level of perfusion clinical practice and independently perform task of unusual difficulty or complexity. The CP assesses, plans and evaluates the clinical perfusion program to ensure proper coordination of care. CPs oversee all aspects of perfusion documentation for the clinical perfusion department. CPs evaluate the delivery system of patient care within the area of assignment, present findings and recommendations, and contribute to changes that enhance the quality and timeliness of care. At this level they provide clinical oversight and consultation for lower graded perfusionists and medical center staff within the CP’s scope of practice and its potential applications in other medical, surgical and specialty areas. Individuals in this role create, implement, update and maintain all perfusion related documents and databases (policies/procedures, functional statements, perfusion records, paper and/or electronic). Individuals in this role implement and manage the proper storage of perfusion related documents according to established guidelines, requirements and protocols. The CP at this level instructs perfusionists, students and other facilities on perfusion related subject matter, provides educational opportunities
and serves as an educational resource. Individuals in this role develop, implement, execute and coordinate education programs to provide the appropriate resources to meet the training needs of staff. Individuals in this position perform clinical teaching, didactic teaching and provide recurring in-service training to ensure the competency of staff. CPs support evidence-based and goal directed practice with the overall goal of improving clinical practice. They also share other pertinent medical literature research findings with colleagues to enhance patient care delivery. CPs may be responsible for the development and maintenance of a system of internal reviews, direct quality control, and performance improvement studies. This includes the collection and tracking of metrics in a database and analytic software and oversight of the quality performance of perfusion devices. Their duties may include conduction and/or participation in collaborative research/adjunctive therapies and communication of findings through reports, abstracts, presentations, and publications. CP’s at this level may serve as the clinical education coordinator for perfusion students; establishing, negotiating and maintaining perfusion student agreements; coordinating clinical training rotations; and designing, conducting and evaluating educational experiences with the affiliated university.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate all the following KSAs:

i. Ability to apply the principles of program management and oversight required to develop program goals and objectives, administer and monitor programs, evaluate program outcomes/accomplishments, set and redefine priorities and implement effective solutions as needed to present findings and recommendations to the appropriate management officials.

ii. Ability to provide oversight, judgement and management of the application of clinical perfusion to patient care, organization processes and/or systems and long/short range goals, with a focus on delivering patient care and achieving program outcomes.

iii. Expert level of knowledge of best practice in the perfusion profession.

iv. Ability to validate or identify barriers to safe effective care, and manage all aspects of clinical perfusion, technical, fiscal, and administrative including daily assignments and call schedule preparation.

v. Ability to serve as a liaison, interfacing with other departments to incorporate the expertise of all disciplines in a comprehensive, integrated approach to patient care.

vi. Ability to develop, coordinate, review organizations and accrediting agencies, and manage a perfusion regulatory program including follow-up actions to ensure departmental compliance with regulatory agencies as required.

(6) **Supervisory Clinical Perfusionist, GS-12**
(a) **Experience, Certification, and Education.** In addition to the basic requirements, candidates must have at least one year of CP experience equivalent to the next lower grade level and have obtained their ABCP certification as a CCP. License is preferred, but not required.

(b) **Assignment.** For all assignments designated as supervisory, the duties must be performed by the incumbent at least 25% of the time. CPs at this level perform at the highest level of perfusion clinical practice and independently perform tasks of unusual difficulty and/or complexity. The supervisory CP is a perfusionist who has full administrative and professional responsibility for the clinical perfusion program directing, evaluating and supervising the work of at least three (3) subordinate employees. The individual assesses, plans and evaluates the clinical perfusion program to ensure proper coordination of care. The individual facilitates team or unit processes by working in collaboration with team members to ensure that tasks, priorities, goals and achievements are coordinated. The individual is responsible for ensuring compliance with internal and external regulatory authorities. The supervisory CP reviews and makes recommendations regarding new and emerging procedures; provides instruction and training to new staff; interviews candidates for positions; recommends selections for placement, advancements and promotions; takes and/or recommends disciplinary action when necessary; completes performance appraisals; and identifies initial and/or recurrent training needs.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate all the following KSAs specific to the advanced assignment:

i. Knowledge of the principles of program management and oversight required to develop program goals and objectives, administer and monitor program, evaluate program outcomes and accomplishments, set and redefine priorities and implement effective solutions as needed.

ii. Knowledge of advanced clinical perfusion principles and techniques across multiple areas of practice in order to develop, implement and coordinate best practices and supervise clinical perfusion staff.

iii. Ability to exercise independent judgment, make high level decisions and manage all aspects of clinical perfusion along technical, supervisory, fiscal and/or administrative lines with a focus on delivering patient care and achieving program outcomes.

iv. Ability to make high level decisions and provide clinical guidance with a focus on delivering patient care and achieving program outcomes.

v. Ability to supervise, direct, assign and counsel staff, students or ancillary personnel to effectively execute responsibilities.

vi. Ability to serve as a liaison and clinical perfusion consultant interfacing with
other medical center departments to incorporate the expertise of all disciplines to provide a comprehensive, integrated approach to patient care.

vii. Ability to manage daily assignment and call schedules to ensure necessary perfusion coverage while accommodating changing work conditions and staffing.

viii. Knowledge of regulatory and accrediting agency requirements.

5. DEVIATIONS.

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for CPs in VHA whose composite record of accomplishments, performance and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements on the proposed grade.

b. Under no circumstances will the educational requirements be waived. Under no circumstances will certification requirements be waived for grade levels GS-9 or above.

c. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. §§ 7402, 7403, 7405.]
APPENDIX G64. SOCIAL SCIENCE SPECIALIST (CRISIS RESPONDER) QUALIFICATION STANDARD

GS-0101
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Social Science Specialist (Crisis Responder) within the Veterans Crisis Line (VCL) component in the Veterans Health Administration (VHA). The VCL connects Veterans and Service members in crisis, along with their families and others, with qualified Social Science Specialists (also known as Crisis Responders) through a confidential toll-free hotline, online chat, or text. Crisis Responders are trained to assist Veterans and Service members through various kinds of behavioral health crisis situations by providing support and referrals to VA and local services.

2. DEFINITIONS.
   a. Journey Level. The full performance level for this qualification standard is GS-11.
   b. Paraprofessional. A job title given to persons in various occupational fields, such as education, healthcare, engineering, and law, who are trained to assist professionals, but do not themselves have professional licensure.
   c. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills, and abilities, (KSAs), also referred to as core competencies, associated with the Social Science Specialist (Crisis Responder) duties. A person could acquire specialized experience and skills in behavioral health crisis intervention while working on a paid or volunteer basis, adhering to the technical and ethical standards of the field; and spending at least part of his/her time providing crisis intervention services. Aspects of the crisis management process could be carried out by occupations such as, and similar to, a crisis worker, social worker, nurse, police officer, psychotherapist, counselor, or minister.
   d. Part-Time Experience. Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.

3. BASIC REQUIREMENTS.
   a. Citizenship. Citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with 38 U.S.C. § 7407(a).
   b. Education and experience. The candidate must meet at least one of the requirements below:
      (1) Successful completion of a bachelor’s degree or higher from an accredited college or university. The degree must be in a behavioral health or social science related field.
appropriate to the work of the position (e.g., psychology, social work, sociology, family counseling, mental health counseling, nursing, ministry and criminal justice); OR,

(2) Two years of specialized experience as a first responder (e.g., Police, Medic, Emergency Medical Technician, Emergency Dispatch, etc.) or in a social science related field that included behavioral health crisis response, and two years of higher education (i.e., above the high school level) from an accredited college or university in a behavioral health or social science related field appropriate to the work of the position (e.g., psychology, social work, sociology, family counseling, mental health counseling, nursing, ministry and criminal justice); OR,

(3) Successful completion of a bachelor’s degree from an accredited college or university in any field and, one year of specialized experience that included behavioral health crisis response or mental health counseling.

c. **Grandfathering Provision.** All persons employed in VHA in this occupational series, or in another occupational series, who perform the duties as described in the qualification standard are considered to have met all qualification requirements for the grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees in an occupation not requiring a licensure/certification/registration, may be reassigned, promoted, or demoted within the occupation.

(2) Employees in an occupation requiring a licensure/certification/registration, may be reassigned, promoted up to and including the full performance level, or demoted within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

(3) Employees in an occupation requiring a licensure/certification/registration only at higher grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher-grade levels.

(4) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(5) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.
NOTE: Employees who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. **English Language Proficiency.** Social Science Specialists (Crisis Responders) must be proficient in spoken and written English. See 38 U.S.C. § 7403(f).

4. **GRADE DETERMINATION.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade level.

a. **Social Science Specialist (Crisis Responder), GS-7**
   
   (1) **Experience.** None beyond the basic requirements.

   (2) **Assignment.** At the GS-7 entry level developmental position, Social Science Specialists (Crisis Responders) provide evidence-based paraprofessional skilled intervention services to assist with any crisis a caller or contact may be facing. Under close supervision, Crisis Responders work with contacts experiencing an emotional crisis, some of which may result in harm to themselves or others. Crisis Responders receive guidance from more experienced staff members for more complex cases/contacts and require direct supervision.

   (3) **Demonstrated Knowledge, Skills, and Abilities.** In addition, the candidate must demonstrate the following KSAs:

   (a) Ability to use critical thinking skills to solve problems in crisis situations.

   (b) Ability to communicate using a variety of modalities (e.g., correspondence, telephone interviews, chat/text services, and social media forums).

   (c) Ability to recognize individual and cultural differences and respond appropriately in all aspects of services.

   (d) Ability to clearly and concisely document/record so that it accurately reflects the content of the call or contact.

   (e) Ability to implement call center protocol. This includes the ability to carry out crisis management steps while withholding judgment on controversial behaviors and not imposing one’s values during the contact.

b. **Social Science Specialist (Crisis Responder), GS-9**

   (1) **Experience or Education.** The individual must meet at least one of the requirements below.
(a) **Experience.** In addition to the basic requirements, must have one year of creditable experience equivalent to the GS-7 grade level, which is directly related to the position to be filled; or

(b) **Education.** Master's degree from an accredited college or university in a behavioral health or social science related field appropriate to the work of the position (e.g., psychology, social work, sociology, and family counseling, mental health counseling, nursing, ministry, criminal justice).

(2) **Assignment.** At the GS-9 grade level developmental position, Social Science Specialists (Crisis Responders) provide evidence-based paraprofessional skilled intervention services to assist with any behavioral health crisis a caller or contact may be facing. Crisis Responders at this level require general supervision and receive limited guidance from more experienced staff members for more complex assignments. Crisis Responders work with contacts experiencing an emotional crisis and as a result, may harm themselves or others. Work is accomplished through telephone interviews, chat/text services, and social media forums. Crisis Responders coordinate with team members to initiate emergency services or create facility transportation plans, as clinically appropriate. Crisis Responders are responsible for providing best practice crisis care by engaging multiple entities, including law enforcement, medical and mental health providers, and third parties. Crisis Responders consistently communicate with contacts in a courteous, respectful, and clinically helpful manner, often under stressful conditions. Crisis Responders use current standards of practice to complete a risk assessment. Crisis Responders ensure accurate and efficient record keeping. Duties are performed in accordance with established crisis line policies, procedures, and standards.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition, the candidate must demonstrate the following KSAs:

(a) Ability to use evidenced based crisis intervention skills.

(b) Ability to collaboratively solve problems under stressful circumstances. This includes the ability to work effectively with a team.

(c) Ability to learn call center protocol and available approved VCL resources.

(d) Ability to use a variety of technology to gather information. This information could be used for locating resources and assessing needs of the caller.

c. **Social Science Specialist (Crisis Responder), GS-11**

(1) **Experience or Education.** Individual must meet at least one of the requirements below.

(a) **Experience.** In addition to the basic requirements, must have one year of creditable experience equivalent to the GS-9 grade level, which is directly related to the position to be filled; or
(b) Education. Ph.D. or equivalent degree from an accredited college or university in a behavioral health related field appropriate to the work of the position (e.g., psychology, social work, sociology, or family counseling).

(2) Assignment. At the GS-11 full performance level, Social Science Specialists (Crisis Responders) receive minimal guidance to manage complex interactions with contacts. They independently provide evidence-based paraprofessional skilled intervention services to assist with any behavioral health crisis a contact may be facing. Crisis Responders work with contacts experiencing an emotional crisis, which may present with varying levels of lethality. Work is accomplished through telephone interviews, chat/text services, and social media forums. The employee provides peer consultation as needed. Crisis Responders work to establish and maintain the safety of those who present with complex medical, and/or mental health care needs. Crisis Responders use current standards of practice to complete a comprehensive risk assessment. They coordinate with team members to initiate emergency services or create facility transportation plan as clinically appropriate. Crisis Responders promote the safety of callers by engaging multiple entities to provide crisis intervention, including law enforcement, medical and mental health providers, as well as, other third parties. Crisis Responders collaborate with Suicide Prevention Coordinators to expedite connections to treatment programs. They consistently communicate with contacts in a courteous, respectful, and clinically helpful manner, often under stressful conditions. Crisis Responders use current standards of practice to complete a comprehensive risk assessment. Crisis Responders ensure accurate and efficient record-keeping. All duties are performed in accordance with established crisis line policies and professional standards.

(3) Demonstrated Knowledge, Skills, and Abilities. In addition, the candidate must demonstrate the following KSAs:

(a) Ability to provide an evidenced based crisis intervention through a variety of modalities (e.g., telephone interviews, chat/text services, or social media forums).

(b) Ability to carry out crisis management steps while withholding judgment on controversial behaviors and not imposing one’s values during the contact.

(c) Ability to effectively prioritize complex problems quickly and respond appropriately in a crisis situation.

d. Supervisory Social Science Specialist, GS-12

(1) Experience. In addition to the basic requirements, one year of experience comparable to the GS-11 grade level.

(2) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, and a range of variety that the incumbent must perform at least 25% of the time. Employees at the GS-12
level provide direct supervision to Social Science Specialists (Crisis Responders). Supervisors provide oversight for evidence-based paraprofessional skilled intervention services, trainers, and silent monitors. Supervisors must possess clinical expertise to serve as a consultant to other Crisis Responder supervisors and any other staff assigned to the VCL. They troubleshoot and solve any unique problems or challenges that occur while connecting Veterans to the appropriate level of care. Supervisors resolve work problems presented by staff and recommends or implements methods to improve production/quality of work in the unit. Supervisors provide subordinates with performance requirements and expectations. They track and evaluate progress providing feedback to the Crisis Responder. Supervisory responsibilities include making recommendations for employee promotions or reassignments; approving leave requests; addressing leave issues; and taking disciplinary action in accordance with established policy and negotiated labor agreements. Supervisors assign work to be accomplished by subordinates. Supervisors manage stressful, complex, or emergent situations that may arise within the workplace. Supervisors assist in the development and implementation of policies and procedures to ensure efficient and safe operation of the VCL. Supervisors ensure policies, training, and clinical procedures of the VCL are up to date and consistent with crisis intervention practice, clinical practice, and effective coordination of care. Supervisors communicate business goals, procedures, and quality standards and provides leadership with guidance regarding clinical standards, training, policy development, and data analysis. Supervisors identify career development and training needs of employees. Supervisors promote an environment that encourages staff well-being. After an emotionally charged contact, the supervisor supports staff to ensure the Crisis Responder managed the situation in an appropriate manner, including post event review.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Knowledge and skill in management/administration, which includes supervision, consultation, negotiations, and monitoring.

(b) Ability to write policies, procedures, and or/practice guidelines.

(c) Ability to effectively interact with individuals and groups with cultural differences to problem-solve and negotiate complex issues and obtain cooperation.

(d) Ability to provide training, orientation, consultation, and guidance within clinical specialization of practice.

(e) Skill in developing interpersonal relationships including the ability to address the unique needs of Crisis Responders. This includes the provision of postvention as professionally indicated.

(f) Ability to evaluate program effectiveness and make recommendations for change, as appropriate.
5. DEVIATIONS.

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment warrants such action.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health or designee in the VA Central Office pursuant to delegated authority from the Secretary.

c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement, or when specific credentials are identified as necessary to meet minimum requirements.

Authority: 38 U.S.C. §§ 7401(3), 7402, 7403, 7405(a)(1)(B), 7407
APPENDIX G65. HISTOPATHOLOGY TECHNOLOGIST QUALIFICATION STANDARD
GS-0601
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment of a histopathology technologist in the Veterans Health Administration (VHA). These requirements apply to all histopathology technologists in the General Schedule (GS) 0601 series. As crucial members of the pathology and laboratory medicine service, histopathology technologists possess broad knowledge of biological sciences and the skills necessary to process anatomic pathology specimens. The work performed by histopathology technologists is vital for pathologists to interpret laboratory results and provide diagnoses and prognoses that allow for planning appropriate and life-saving treatments.

2. DEFINITIONS.

a. Journey Level. The full performance level for this qualification standard is the GS-9 grade level.

b. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills, and abilities (KSAs), and other characteristics, also referred to as core competencies; be associated with the scope of histopathology technologist practice; be directly related to the position being filled; and may be paid or non-paid employment.

c. Part-Time Experience. Part-time experience is creditable based on its relationship to a full-time work week. For example, a histopathology technologist employed 20 hours per week, or on a part time basis, would receive one full-time workweek of credit for each two weeks of service.

d. Graduate Education. Graduate education and graduate degrees may be substituted, as specified at each grade level. Education must be from an accredited college or university (which was accredited at the time the candidate completed the program), in a field related to histology, to include, but not limited to clinical biology, microbiology, physiology, pre-medical, medical lab technology, chemistry, immunology, physiology, anatomy, health sciences, or allied sciences.

3. BASIC REQUIREMENTS.

a. Citizenship. Candidates must be a United States citizen. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

b. Education. Individuals must meet one of the requirements below:

(1) Successful completion of a full four-year course of study from an accredited college or university, leading to a bachelor's or higher degree, that included a major study in an
academic field related to health sciences or allied sciences appropriate to the work of a histopathology technologist, such as, but not limited to clinical biology, microbiology, physiology, pre-medical, medical lab technology, chemistry, immunology, physiology, anatomy;

OR,

(2) Baccalaureate degree from a regionally accredited college/university with a combination of 30 semester hours (45 quarter hours) of biology and chemistry (must include credit hours in both);

OR,

(3) Successful completion of two years of progressively higher level graduate education, leading to a master's degree or equivalent graduate degree, with a major study in an academic field related to health sciences or allied sciences appropriate to the position of histopathology technologist, such as clinical biology, microbiology, physiology, pre-medical, medical lab technology, chemistry, immunology, physiology, anatomy.

c. **Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization approved by the American Society for Clinical Pathology (ASCP) that specializes in the interpretation of foreign educational credentials, and such education must have been deemed at least equivalent to that gained in conventional U.S. programs.

d. **Certification.**

(1) Candidates must currently possess the histotechnologist (HTL) certification given by the ASCP Board of Certification. The ASCP requires completion of one of the following for a candidate to be considered "board eligible" to take the certification exam:

(a) Successful completion of a histotechnician or histotechnology program accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS);

OR,

(b) One year of full time experience in all of the following: fixation, embedding, microtomy, processing, and staining in a histopathology (clinical, veterinary, industry, or research) laboratory.

(2) **Exception for Non-Board Certified.** Non-board-certified candidates designated by ASCP as "board eligible," who otherwise meet the eligibility requirements, may be given a temporary appointment under the authority of 38 U.S.C. § 7405(c)(2)(B). The appointing official may waive the requirement of certification for a period not to exceed two years for a histopathology technologist working under the direct oversight of a supervisor, lab manager, or qualified individual who can verify technical experience.
This exception only applies at the entry level. For grade levels at or above the full performance level, the candidate must have HTL certification. Temporary appointments of non-board-certified histopathology technologists may not be extended beyond 2 years or be converted to a new temporary appointment.

(3) **Failure to Obtain Certification.** In all cases, non-board-certified histopathology technologists must meet one of the ASCP histotechnologist eligibility routes at the date of their appointment and must actively pursue certification from the date of their appointment. At the time of appointment, the supervisor will provide the histopathology technologist with the written requirement to obtain certification, the date by which the certification must be acquired, and the consequences for not becoming certified by the deadline. Failure to obtain board certification by the prescribed date will result in removal from the histopathology technologist, GS-0601 occupational series and may result in termination of employment.

(4) **Loss of Certification.** Employees who fail to maintain the required certification must be removed from the histopathology technologist, GS-0601 occupation, which may result in termination of employment.

e. **Grandfathering Provision.** All histopathology technologists employed in VHA in this occupational series or in another occupational series, who perform the duties as described in the qualification standard on the effective date of this qualification standard, are considered to have met all qualification requirements for the grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to the position, the following provisions apply:

(1) Histopathology technologists who do not meet the basic requirements for education and certification may be reassigned, promoted up to and including the full performance level, or demoted within the occupation, but may not be promoted beyond the full performance level or placed in a supervisory or managerial position.

(2) Histopathology technologists who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or receive a new appointment on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Histopathology technologists initially grandfathered into this occupation, who subsequently obtain education and/or certification that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

(4) If histopathology technologists, who are grandfathered under this provision, leave the occupation then those employees lose grandfathered protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.
4. GRADE REQUIREMENTS. In addition to the basic requirements for employment listed above, the following experience criteria must be met when determining the grade of candidates.

a. Histopathology Technologist, GS-7
   (1) Experience. None beyond the basic requirements.
   (2) Assignment. At this level, histopathology technologists serve in developmental positions practicing under close supervision of a supervisor, lab manager, or qualified individual who can verify technical experience.

b. Histopathology Technologist, GS-9
   (1) Experience. Must have one year of creditable experience equivalent to the GS-7 grade level, which is directly related to the position to be filled.
   (2) Assignment. At the full performance level, the histopathology technologist independently performs a full range of routine and specialized tests. Utilize information technology systems to apply histopathology techniques and broad scientific principles from the fields of biology, chemistry, anatomy and physiology. The histopathology technologist acts as a technical resource, troubleshooting a variety of specialized lab tests, identifying suboptimal issues, and uses independent judgment and resources to resolve concerns. The histopathology technologist ensures goals are met by prioritizing work, as necessary, in times of short staffing, or heavy workload, and by performing simultaneous tasks. The histopathology technologist uses professional skills in applying anatomic pathology principles, practices, concepts, and theories to perform new or difficult specialized testing methods, such as immunohistochemical, histochemical, and frozen section techniques.
   (3) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:
      (a) Knowledge of laboratory information technology systems and inter-connectivity.
      (b) Knowledge of histopathology techniques, chemistry, anatomy and physiology principles, theories, concepts, and methodologies sufficient to process specimens, and the ability to perform a full range of routine specialized tests.
      (c) Ability to identify and test suboptimal specimens and take corrective action to minimize or eliminate impact on a patient’s sample.
(d) Ability to organize, coordinate, and prioritize simultaneous work assignments; both individual and team related.

(e) Skill in applying professional, anatomic pathology principles, practices, concepts, and theories in performing new or difficult specialized testing methods or techniques.

c. **Histopathology Technologist, GS-11**

(1) **Education and Experience.** Must meet one of the following:

(a) One year of creditable experience equivalent to the GS-9 grade level, which is directly related to the position to be filled; or

(b) Three full years of progressively higher-level graduate education that included a clinical practicum; or

(c) A Ph.D. or equivalent doctoral degree in histopathology technology or a directly related field that included a clinical practicum.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety, and be performed by the incumbent at least 25% of the time. At the advanced level, the histopathology technologist independently performs a full range of specialized tests, applying histopathology techniques and broad scientific principles from the fields of biology, chemistry, anatomy, and physiology. Must be able to operate, maintain, and troubleshoot instrumentation utilized while preparing specimens for diagnosis; perform advanced procedures and analysis of tissue samples; and guide staff in the preparation of the most difficult specimens. Act as a technical resource, troubleshooting a variety of specialized lab tests, identifying suboptimal issues, and using independent judgment and resources to resolve concerns. Organize, coordinate, and prioritize work assignments. The histopathology technologist uses professional skills in applying complex anatomic pathology principles, practices, concepts, and theories in performing new or difficult specialized testing methods or techniques. At the advanced level, the histopathology technologists introduce new tests, including stain protocol research, test protocol setup, validation testing, and record-keeping and documentation. Utilize information technology to perform tasks related to histotechnology. In addition to histochemical and immunohistochemistry (IHC) testing, the technologist is responsible for advanced testing including, but not limited to, fluorescence in-situ hybridization (FISH), chromogenic in-situ hybridization (CISH), and gross dissection, as dictated by the lab's needs.

**NOTE:** Advanced duties may include one or more of the tasks identified below. Additionally, when these duties are required, the advanced histopathology technologist must demonstrate the corresponding KSAs as identified in KSAs (g) through (k):

(a) *Mohs: Performs color mapping, embedding with precise orientation, cryostat
sectioning, and staining of all types of Mohs specimens under the direction of the Mohs surgeon. (KSA g)

(b) **Electron Microscopy (EM): Utilizes an electron microscope, performs ultrathin-cryomicrotomy, and carries out staining of ultrastructural components. (KSA h)

(c) ***Safety Coordination: Oversees safe handling of specimens, chemicals, and equipment by all staff and ensures adherence to safety regulations. (KSA i)

(d) ****Laboratory Education: Plans and administers an ongoing continuing education program for laboratory staff to meet accreditation requirements. (KSA j)

(e) *****Automated Data Processing Applications Coordinator: Carries out day-to-day operations related to laboratory information systems/computer use and system maintenance. (KSA k)

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate KSAs (a)-(f) and additional KSAs based on the specific duties assigned:

(a) Knowledge of histopathology techniques, chemistry, anatomy and physiology principles, theories, concepts, and methodologies sufficient to process specimens and perform a full range of routine and specialized tests.

(b) Knowledge of the operation and maintenance of the instrumentation necessary to prepare specimens for diagnosis.

(c) Skill in applying professional, complex anatomic pathology principles, practices, concepts, and theories in performing new or difficult specialized testing methods or techniques.

(d) Ability to identify and test suboptimal specimens and take corrective action to minimize or eliminate the impact on patient’s sample.

(e) Ability to organize, coordinate, and prioritize simultaneous work assignments, both individual and team related.

(f) Knowledge of laboratory information technology systems and inter-connectivity.

(g) *Skill in performing detailed Mohs procedures.

(h) **Ability to perform ultrathin microtomy, and operate an electron microscope. Knowledge of microanatomy sufficient to note ultrastructural and microchemical findings.

(i) ***Ability to convey knowledge of safety regulations and guidelines from organizations such as College of American Pathologists (CAP), The Joint Commission (TJC), and Occupational Safety and Health Administration (OSHA), to
ensure staff compliance with safety requirements, including continuing education and employee orientation.

(j) ****Skill in planning and administering an ongoing continuing education program for the laboratory to meet accreditation standards.

(k) *****Skill in maintaining and troubleshooting computers and laboratory system instrumentation.

d. **Lead Histopathology Technologist, GS-11**

(1) **Education and Experience.** Must meet one of the following:

(a) One year of creditable experience equivalent to the GS-9 grade level, which is directly related to the position to be filled; or

(b) Three full years of progressively higher-level graduate education that included a clinical practicum; or

(c) A Ph.D. or equivalent doctoral degree in histopathology technology, or a directly related field that included a clinical practicum.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety, and be performed by the incumbent at least 25% of the time. The lead histopathology technologist may lead other histopathology technicians and/or histopathology technologists or others in the performance of histopathology work. At this level, the lead histopathology technologist independently performs a full range of specialized tests, applying histopathology techniques and broad scientific principles from the fields of biology, chemistry, anatomy, and physiology. Must be able to operate, maintain, and troubleshoot instrumentation utilized while preparing specimens for diagnosis. Performs advanced procedures and analysis of tissue samples and guides staff in the preparation of the most difficult specimens. The lead histopathology technologist must be skilled in applying professional, complex anatomic pathology principles, practices, concepts, and theories in performing new or difficult specialized testing methods or techniques. Leads in the introduction of new tests including stain protocol research, test protocol setup, validation testing, record keeping, and documentation. Researches, develops, tests, optimizes and validates complex histochemical stains, immunohistochemistry (IHC) and/or in situ hybridization (ISH) protocols, including, but not limited to, new antibodies, probes, detection protocols/kits, new lots and concentrated antibody titrations. Troubleshoots a variety of specialized lab tests as well as equipment by using independent judgment and resources available to resolve issues. The lead histopathology technologist identifies suboptimal testing and takes corrective action to minimize or eliminate impact on patient samples. Monitors and makes work assignments, provides input on performance, resolves daily workplace issues, and maintains efficient workflow. Assignments at this level include, but are not limited to: assuring coverage of all areas of responsibility; conducting ongoing
reviews to ensure quality of work; providing guidance to staff members, to include changes in policies and procedures; distributing and balancing workload; orienting and providing on-the-job training for new and current employees; and ensuring all training requirements are met in addition to organizing the work structure of his/her assigned areas.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate all the following KSAs:

(a) Knowledge of the operation and maintenance of the instrumentation necessary to prepare specimens for diagnosis.

(b) Knowledge of histopathology techniques, chemistry, anatomy and physiology principles, theories, concepts, and methodologies sufficient to process specimens and perform a full range of routine and specialized tests.

(c) Skill in applying professional, complex anatomic pathology principles, practices, concepts, and theories in performing new or difficult specialized testing methods or techniques.

(d) Ability to identify and test suboptimal specimens and take corrective action to minimize or eliminate the impact on patient’s sample.

(e) Ability to monitor and make work assignments, balance workload, and ensure duties are completed in an accurate and timely manner. This includes the ability to follow-up on pending issues and demonstrate an understanding of the impact of incomplete work.

e. **Histopathology Technologist, GS-11 (Quality Management)**

(1) **Education and Experience.** Must meet one of the following:

(a) One year of creditable experience equivalent to the GS-9 grade level, which is directly related to the position to be filled; or

(b) Three full years of progressively higher-level graduate education that included a clinical practicum; or

(c) A Ph.D. or equivalent doctoral degree in histopathology technology or a directly related field that included a clinical practicum.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety, and be performed by the incumbent at least 25% of the time. In this assignment the histopathology technologist provides authoritative advice and consultation on quality management laboratory services to all levels of management throughout the organization. The histopathology technologist maintains a laboratory quality management program and ensures monitoring of components and customer feedback. Analyzes, identifies, defines, and resolves issues associated with
complex aspects of the collected data. The histopathology technologist monitors laboratory quality control systems and performance indicators. Interacts with management officials and vendors providing inter-laboratory quality assurance and laboratory proficiency testing. The histopathology technologist is responsible for laboratory continuous readiness for regulating agency inspections and accreditation from agencies, such as The Joint Commission on Accreditation of Hospitals and College of American Pathologists.

(3) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

(a) Comprehensive knowledge of laboratory quality control/assurance policies, quality management standards, procedures and principles, as well as safety practices and regulations.

(b) Knowledge of accrediting agencies and regulatory requirements pertaining to laboratory operations and ensuring continuous readiness for inspections.

(c) Knowledge of laboratory operations and relationships to the organization.

(d) Ability to analyze quality assurance data and resolve complex data issues.

f. **Supervisory Histopathology Technologist, GS-11**

(1) **Education and Experience.** Must meet one of the following:

(a) One year of creditable experience equivalent to the GS-9 grade level, which is directly related to the position to be filled; or

(b) Three full years of progressively higher-level graduate education that included a clinical practicum; or

(c) A Ph.D. or equivalent doctoral degree in histopathology technology, or a directly related field that included a clinical practicum.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety, and be performed by the incumbent at least 25% of the time. The incumbent has full supervisory responsibility for smaller, less complex laboratories, or laboratories having no GS-11 positions subordinate to the supervisor. Employees in this assignment perform the full range of supervisory duties for one or more sections of the laboratory, including responsibility for assignment of work; performance evaluations; recommendations for appointment, awards, advancement, and disciplinary actions; and identification of continuing education and training needs. The incumbent ensures compliance with the accrediting agency and regulatory requirements, establishes and monitors the quality of the pre-analytical processes as part of the overall laboratory quality management program, and initiates corrective action. This individual will develop policies and procedures, manage document
control, develop performance standards, position descriptions, and functional statements. The supervisor is responsible for professional and administrative management of an assigned area, to include budget execution, orientation, and competency assessment of assigned staff. The supervisor will maintain effective interdepartmental relations with other services in order to accomplish medical center goals.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of Federal and state laws, regulations, and accrediting/regulatory requirements, in order to develop plans and procedures for the laboratory.

(b) Skill in communicating with individuals to obtain the desired effect, ensuring compliance with established policies, regulations, and procedures.

(c) Ability to perform the full range of supervisory duties, which includes responsibility for assignment of work, performance evaluations, selection of staff, recommendation of awards, advancements, and disciplinary actions.

(d) Knowledge of laboratory quality management procedures and principles sufficient to establish and monitor a laboratory quality management program, in addition to educating and training the laboratory staff.

(e) Demonstrated leadership and managerial skills, including skill in interpersonal relations and conflict resolution, to interact with employees, team leaders, and managers.

(f) Ability to plan, organize, set short-term and/or long-term goals, and conduct studies on technical and administrative problems, including personnel shortages, organizational structure, and new technology.

g. **Supervisory Histopathology Technologist, GS-12**

(1) **Experience.** Must have one year of creditable experience equivalent to the GS-11 grade level, which is directly related to the position to be filled.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety, and be performed by the incumbent at least 25% of the time. The incumbent supervises a large staff of nonsupervisory personnel, including at least one GS-11 subordinate in the performance of complex anatomic pathology testing in multiple specialties, such as Mohs testing, cytology testing, immunohistochemistry, molecular testing, or electron microscopy. The supervisor performs the full range of supervisory duties for one or more sections of the anatomic pathology laboratory, including responsibility for assignment of work performed; performance evaluations; recommendations for appointment, awards, advancement, and disciplinary actions;
identification of continuing education and training needs; and resolving interpersonal issues. The supervisor ensures compliance with accrediting agency and regulatory requirements and establishes and monitors the quality of the pre-analytical processes, as part of the overall laboratory quality management program, and initiates corrective action. The supervisor is responsible for fiscal matters, including budget execution, sets short-term and/or long-term goals, develops policies and procedures, manages document control, and develops performance standards, position descriptions, and functional statements.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of Federal and state laws, regulations, and accrediting/regulatory requirements in order to develop plans and procedures for the laboratory.

(b) Skill in communicating with individuals, in order to obtain the desired effect, ensuring compliance with established policies, regulations, and procedures.

(c) Ability to perform the full range of supervisory duties, which includes responsibility for assignment of work, performance evaluations, selection of staff, recommendation of awards, advancements, and disciplinary actions.

(d) Knowledge of laboratory quality management procedures and principles sufficient to establish and monitor a laboratory quality management program, and/or education and training of the laboratory staff.

(e) Demonstrated leadership and managerial skills including skill in interpersonal relations and conflict resolution in order to deal with employees, team leaders, and managers.

(f) Ability to plan, organize, set short and/or long-term goals, and conduct studies on technical and administrative problems, including fiscal matters, budget execution, personnel shortages, organizational structure, and new technology.

**h. Histopathology Technologist, GS-12 (Laboratory Information Manager)**

(1) **Experience.** Must have one year of creditable experience equivalent to the GS-11 grade level, which is directly related to the position to be filled.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety, and be performed by the incumbent at least 25% of the time. The laboratory information manager develops and recommends new policies and procedures regarding the installation of evolving tests or techniques and use of the laboratory information systems (LIS). Ensures compatibility of the (LIS) with the overall hospital information system (HIS), and provides authoritative advice and consultation.
regarding the functions and capabilities of the LIS to all levels of the organization. The laboratory information manager implements and maintains coding and mapping for laboratory test ordering, reporting, billing and workload recording, and taking into account compliance principles. Analyzes emerging trends, software and technology, and adopts appropriate methods for local programs to meet agency goals. Serves as the local expert representing the lab end users by interacting with software developers to test and validate new and emerging software packages. Responsible for compliance with regulatory agency requirements, as related to information systems, and perform audits as needed. The laboratory information manager provides consultation and training of personnel on computer functions, including ordering options, and is responsible for the maintenance of computer security keys.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge and understanding of laboratory operations and compliance and regulatory requirements, and their relationship to the organization, sufficient to provide advice, training, and problem-solving services on specific projects, programs, or functions, and to conduct inspections or audits, as needed.

(b) Ability to independently plan, organize, set priorities, work as a team member, and effectively complete assignments.

(c) Skill in utilizing the LIS, program techniques, computer language, and program design sufficient to implement various laboratory associated packages, and sustain operation of the laboratory system.

(d) Ability to adapt, implement, and integrate the use of software to specific laboratory applications and processes, and the use of office automation software.

i. **Histopathology Technologist, GS-13 (Laboratory Manager)**

(1) **Experience.** Must have one year of creditable experience equivalent to the GS-12 grade level, which is directly related to the position to be filled.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety, and be performed by the incumbent at least 25% of the time. The laboratory manager reports to the director of the laboratory service, and is responsible for supervising a large staff of nonsupervisory and supervisory personnel, and managing and overseeing laboratory service operations. The incumbent provides guidance and serves as the subject matter expert on laboratory medicine, including research, agency policies, new techniques and procedures, developing guidelines, and assessing laboratory effectiveness. Establishes and maintains quality assurance and quality management programs. The laboratory manager consults with or serves as a consultant for local, network, and national programs and/or officials; manages regulatory affairs and compliance; and develops and manages
program budget and resource utilization, inventory, acquisition, and contracting processes.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of regulatory, licensing, and accrediting agency requirements and statutes that govern clinical laboratory operations used in planning, implementing, and monitoring laboratory programs.

(b) Ability to plan and execute short-range and long-range programs and/or goals through project management and tactical/strategic planning.

(c) Ability to work collaboratively with other disciplines, upper management, and executive leadership.

(d) Advanced knowledge of concepts, principles, and methodology of a major clinical laboratory program and operations to assess program effectiveness and provide authoritative guidance of operations, personnel, and management.

(e) Skill in administrative management (e.g., budgeting, contracting, procurement, and property management), in accordance with regulations.

(f) Ability to provide the full range of supervisory duties, which includes responsibility for assignment of work, performance evaluations, selection of staff, and recommendations for awards, advancements, and disciplinary actions, if applicable.

j. **Histopathology Technologist, GS-13 (Regional Commissioner Technologist)**

(1) **Experience.** Must have one year of creditable experience equivalent to the GS-12 grade level, which is directly related to the position to be filled.

(2) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety, and be performed by the incumbent at least 25% of the time. The regional commissioner technologist serves as an authority to multiple laboratories in a region, to ensure compliance with inspection and accreditation requirements and regulations. Provides direction and guidance to resolve technical problems and interpretation of existing regulations. Coordinates with VHA Central Office to ensure that each testing site is in compliance with inspection requirements, accreditation requirements, and regulations; and assists laboratories in the correction of any cited inspection deficiencies. The regional commissioner technologist is responsible for coordinating the Clinical Laboratory Improvement Amendment (CLIA) requirements for all laboratories in the region. Serves as a consultant to national program official, and provides professional, technical, and training support. The regional commissioner
technologist is required to communicate verbally, in writing, and electronically with accreditating and regulatory bodies. Works under the direction and guidance of the VHA Office of Enforcement in VHA Central Office.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

(a) Advanced knowledge of laboratory regulations that pertain to quality control, quality management, and proficiency testing to assess and assist with laboratory compliance of quality programs in each facility assigned to that region.

(b) Ability to differentiate and interpret accrediting and regulatory requirements to provide guidance to laboratories on regulatory requirements and assess compliance for each laboratory assigned to that region.

(c) Knowledge of laboratory operations and the laboratory's role within the total organization.

(d) Ability to create and deliver educational presentations to a variety of individuals on matters that pertain to inspection and accreditation rules, regulations, and standards of all laboratory accrediting agencies.

5. **DEVIATIONS.**

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for histopathology technologists in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the certification or educational requirements as a histopathology technologist be waived.

c. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

**Authority:** 38 U.S.C. § 7401, 7402, 7403, 7405, 7407.]
1. **COVERAGE.** The following are the requirements for appointment as a GS-0648, Therapeutic Radiologic Technologist (TRT) (Dosimetrist), referred to as “Medical Dosimetrist” in this standard, in Veterans Health Administration (VHA). These apply to all VHA Therapeutic Radiological Technologists (Dosimetrists) in the General Schedule (GS) 0648 series. A Medical Dosimetrist is a member of the radiation oncology team working collaboratively with the medical physicist and radiation oncologist meeting cancer patients needs through radiation therapy. Medical Dosimetrists have an in-depth knowledge of high dose ionizing radiation and clinical relevance of radiation oncology treatment machines and equipment. Medical Dosimetrists possess an in-depth knowledge of all medical imaging modalities and are cognizant of procedures commonly used in brachytherapy. Medical Dosimetrists have the background necessary to generate radiation dose distributions and dose calculations to support the medical physicist and radiation oncologist. This appendix applies to TRTs who are certified in medical dosimetry and serving in that capacity as evidenced by titling and duties outlined in the functional statement. Appendix G26 outlines the qualification standards for TRTs who are certified in therapeutic radiologic technology by the American Registry of Radiologic Technology (ARRT) (T) and only serving in that capacity.

2. **DEFINITIONS.**

   a. **Journey Level.** The full performance level for this qualification standard is the GS-11 grade level.

   b. **Creditable Experience.** To be creditable, the experience must have demonstrated possession of the knowledge, skills, abilities and other characteristics associated with current dosimetry standard operating procedures.

   c. **Medical Dosimetry Professional.** Radiation therapy planning is the pretreatment process that allows radiation oncologists to model, predict and optimize the total dose of radiation to target/tumor volumes and minimize dose to critical normal surrounding tissues before delivery of the prescribed radiation treatment. He/she possesses an in-depth knowledge of all medical imaging modalities; is cognizant of procedures commonly used in brachytherapy; and has the education and expertise necessary to independently generate radiation dose distributions and dose calculations in collaboration with the medical physicist and radiation oncologist. Medical Dosimetrists with the appropriate current ARRT(T) certification may, as needed, independently perform therapeutic radiologic duties as part of the radiation oncology team. This ARRT(T) certification requirement
applies to all grade levels for which applicable therapeutic radiologic duties may
be performed by the Medical Dosimetrist.

3. BASIC REQUIREMENTS.

a. Citizenship. Be a citizen of the United States. Non-citizens may be appointed
when it is not possible to recruit qualified candidates in accordance with chapter
3, section A, paragraph 3g, of this part.

b. Education. Completion of a medical dosimetry program of at least 12 months
long accredited by the Joint Review Committee on Education in Radiologic
Technology (JRCERT) and a baccalaureate degree is required. JRCERT is the
accrediting agency for the medical dosimetry programs recognized by the U.S.
Department of Education.

c. Certification.

(1) All applicants must be certified in medical dosimetry by the Medical
Dosimetrist Certification Board (MDCB). Certified Medical Dosimetry (CMD) is
the recognized credential for Medical Dosimetrists. NOTE: CMDs who
perform therapeutic radiologic technologist duties must also possess
American Registry of Radiologic Technology (ARRT) (T) certification and be
assigned to a functional statement that combines both types of work. NOTE:
Public Law 97-35 requires persons who administer Therapeutic Radiological
procedures meet the credentialing standards in 42 C.F.R. Part
75. They must have successfully completed an educational program meeting
or exceeding the standards described in that regulation and is accredited by
an organization recognized by the U.S. Department of Education or be a
radiation therapist certified in medical dosimetry.

(2) Exception. Non-certified applicants who otherwise meet the eligibility
requirements for Medical Dosimetrist certification may be given a temporary
appointment under 38 U.S.C. § 7405(a)(1)(B) for up to two years at the entry
level only as a graduate Medical Dosimetrist under the authority of 38 U.S.C.
§ 7405(c)(2)(B). Failure to obtain certification during the two-year time is
justification for termination of the Dosimetrist temporary appointment. This
may result in termination of employment. The Human Resources Office will
provide the uncertified Medical Dosimetrist, in writing, the requirement to
obtain certification, the date by which the certification must be acquired and
the consequences for not becoming certified by the deadline. The written
notice must be provided prior to the entrance on duty date.

(3) Failure to Obtain Certification. In all cases, uncertified Medical Dosimetrist
must actively pursue meeting the requirements for certification starting from
the date of their appointment. Failure to become certified within two years
from the date of appointment will result in removal from the GS-0648 Medical Dosimetrist occupation and may result in termination of employment.

(4) **Loss of Credential.** Once certified, Medical Dosimetrists must maintain an active, current, full and unrestricted certification to independently practice medical dosimetry. Loss of licensure will result in removal from the GS-0648 Medical Dosimetrist occupation and may result in termination of employment.

d. **Grandfathering Provision.** All persons employed in VHA as a TRT (Dosimetrist) on the effective date of this qualification standard are considered to have met all qualification requirements for the grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees in an occupation requiring a certification may be reassigned, promoted up to and including the full performance level or demoted within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

(2) Employees in an occupation requiring a certification only at higher grade levels must meet the certification requirement before they can be promoted to those higher-grade levels.

(3) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(4) If an employee who was retained (grandfathered) under this provision leaves this occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

(5) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or certification that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

f. **English Language Proficiency.** Medical Dosimetrists must be proficient in spoken and written English. See 38 U.S.C. § 7403(f).
4. GRADE REQUIREMENTS.

a. Creditable Experience.

(1) **Knowledge of Current Dosimetry Practices.** To be creditable, the experience must have demonstrated the knowledge, skills and abilities associated with current medical dosimetry practice. Experience satisfying this requirement must be active professional practice at the post-certification level, which may be paid/non-paid employment, as a Medical Dosimetrist.

(2) **Quality of Experience.** Experience is only creditable if it is post certification experience as a certified Medical Dosimetrist directly related to the position to be filled. Experience as a graduate Medical Dosimetrist is creditable provided the candidate functioned as an entry level Medical Dosimetrist with continual oversight and subsequently passed the certification examination. Qualifying experience must be at a level comparable to Medical Dosimetrist experience at the next lower grade level. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

(3) **Part-Time Experience.** Part-time experience as a Medical Dosimetrist is creditable according to its relationship to the full-time workweek. For example, a Medical Dosimetrist employed 20 hours a week, or on a 1/2-time basis, receives one full-time workweek of credit for each two weeks of service.

(4) **Practicum in a VA Setting.** VHA practicum experience may not be substituted for experience, as the practicum (field placement) is completed prior to graduation with a bachelor’s degree in medical dosimetry or a related field.

b. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:

(1) **Therapeutic Radiologic Technologist (Dosimetrist), GS-9**

   (a) **Experience.** None beyond the basic requirements.

   (b) **Assignment.** Employees at this grade level serve as entry level Medical Dosimetrists in a developmental level position. It is expected they have received the additional and specialized training necessary to generally perform technical tasks independently with general oversight, exercising independent judgement. However, they will generally receive guidance from more experienced staff members for more complex patient treatment planning and may require some direct supervision as needed in any
assignment in medical dosimetry. Medical Dosimetrists at this level have extensive training and knowledge in computer treatment planning, cross sectional anatomy, image fusion and dose tolerances will be utilized for development of treatment plans. Candidates must be able to use effective communication skills to follow the radiation oncologist directives and/or prescriptions.

(c) **Demonstrated Knowledge, Skills and Abilities (KSA).** None beyond the basic requirements.

(2) **Therapeutic Radiologic Technologist (Dosimetrist), GS-10**

(a) **Experience.** At least one year of experience equivalent to the next lower grade level directly related to the position being filled.

(b) **Assignment.** This is a developmental position. Employees at this level are substantially independently functioning as Staff TRTs and are able to carry out most procedures as Dosimetrists under general supervision.

(c) **Demonstrated Knowledge, Skills and Abilities.** The candidate must demonstrate the following technical KSAs:

i. Skill in computer treatment planning to design patient treatment plans with awareness to dose limitations to critical structures following the prescription outlined by the radiation oncologist.

ii. Ability to perform control procedures for radiation therapy including weekly chart checks for data accuracy and completion and quality assurance procedures on the treatment planning computer(s).

iii. Ability to assist in preparation and design of custom molds, boluses, templates and compensating devices.

iv. Ability to assist in computer tomography (CT) scans for tumor localization in radiation treatment planning to perform accurate patient contours for transfer to treatment planning devices.

(3) **Therapeutic Radiologic Technologist (Dosimetrist), GS-11**

(a) **Experience.** At this level, candidates must have at least one year of creditable experience equivalent to the next lower grade level, that is directly related to the position to be filled and that demonstrates possession of the knowledge, skills and abilities needed to provide services as a staff dosimetrist.

(b) **Assignment.** Medical Dosimetrists at this level are at the full performance level and are fully functional and carry out their assigned task.
independently in all areas of medical dosimetry. They are responsible for developing accurate and deliverable complex treatment plans and image importing for fusion during the planning process. Medical Dosimetrists will contour critical structures and tumor volumes. They provide input of radiation safety practices, quality standards and abides by all governing bodies and standard operating procedures.

(c) **Demonstrated Knowledge, Skills and Abilities.** The candidate must demonstrate the following technical KSA:

i. Ability to effectively communicate all aspects of the directive and treatment planning process with the radiation oncology team to solve complex clinical treatment challenges.

ii. Skill at importing diagnostic imaging studies from multiple media types and image fusion utilizing computed tomography (CT), magnetic resonance imaging (MRI) and positron emission tomography (PET), positron emission tomography-computed tomography (PET CT) for complex treatment planning.

iii. Skill in utilizing computer treatment software to develop an accurate deliverable complex plan such as, 3D conformal, intensity-modulated radiation therapy (IMRT), Volumetric Arc Therapy (VMAT) and stereotactic techniques, dose limitation to critical structures, Record and Verify software and quality assurance (QA) methods following the directive outlined by the radiation oncologist.

iv. Ability to delineate and accurately contour critical structures and tumor volumes utilized for development of a deliverable treatment plan through an in-depth knowledge of cross-sectional anatomy and all diagnostic imaging modalities.

v. Knowledge of radiation safety practices to include reporting discrepancies and ensuring compliance with regulatory requirements, quality standards, accrediting agencies, policies and standard operating procedures.

vi. Ability to provide input or assist with the use or necessity of ancillary treatment devices, patient immobilization techniques and other patient positioning techniques as needed for simulation or treatment.

vii. Ability to apply new developments, planning techniques and technology in the field of radiation therapy such as but not limited to treatment planning system QA.

(4) **Therapeutic Radiologic Technologist (Dosimetrist), GS-12**
(a) **Experience.** At this level, candidates must possess at least one year of creditable experience equivalent to the next lower grade level that demonstrates the core competencies described at that level and must fully meet the KSAs at that level.

(b) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety, and be performed by the incumbent at least 25% of the time. At the advanced level, Medical Dosimetrists are fully functional dosimetrist with the knowledge and experience applying an advanced level of treatment planning and dosimetry procedures. Medical Dosimetrists serve as an integral team member for complex treatment planning, QA verifications, weekly chart checks and ability to train on all aspects of the Record and Verify system. Medical Dosimetrists train staff, evaluate workload and ensure compliance with all necessary governing bodies and standard operation procedures.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition, the candidate must demonstrate the following technical KSAs:

i. Skill at effective communication and leadership as demonstrated by providing orientation and training for staff, providing input for yearly appraisals, directing progress and coordination of workload, ensuring compliance with standard operating procedures and directives to provide continuity of care.

ii. Skill in providing guidance and expertise related to all aspects of the treatment planning process.

iii. Ability to resolve complex physical and geometric errors of the radiation equipment, simulation procedure and treatment delivery implementation.

iv. Knowledge of the care and use of radioactive resources for implementation and treatment delivery.

v. Skill to independently perform complex treatment procedures as evidenced by completing tasks such as developing and troubleshooting highly complex isodose treatment plans delineating critical structures and tumor volumes, performing weekly chart checks, performing QA verifications and providing training on all aspects of the Record and Verify system such as Mosaiq or Aria.

vi. Ability to follow protocols including, but not limited to developing and implementing policies and standard operating procedures, participating in research programs and ensuring compliance with radiation safety
office, national program office, accrediting agencies and follow established quality standard measures.

vii. Ability to perform the application of a broad range of specific methods of radiation measurements including, but not limited to, diode, ion chamber, thermoluminescent dosimeter (TLD), or film measurement as directed by a qualified Medical Physicist and perform or assist with the QA procedures as directed by a qualified Medical Physicist.

(5) Lead Therapeutic Radiologic Technologist (Dosimetrist), GS-12

(a) Experience. At this level, candidates must possess at least one year of creditable experience equivalent to the next lower grade level that demonstrates the core competencies described at that level and must fully meet the KSAs at that level.

(b) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. In this assignment, the Medical Dosimetrists functions as a lead dosimetrist with administrative and professional responsibility for planning, directing, distributing the workload of dosimetrists up to the GS-11 level, including support staff in the medical center’s therapeutic radiologic technology program. In addition, the incumbent serves as the professional mentor, trainer and coach for the unit. The Lead Medical Dosimetrists develop and update technical policy and procedure manuals. They provide assistance and input on equipment use and resolution of machine issues. The Lead Medical Dosimetrist also ensures dosimetric protocols are up to date to reflect current standards of care, radiation safety and quality management. They ensure Medical Dosimetrists are in compliance with accrediting and regulating bodies. Lead Medical Dosimetrists also review staffing levels and work procedures to influence resource allocation decisions made at the executive level.

(c) Demonstrated Knowledge, Skills and Abilities. Candidates must demonstrate the following KSAs:

i. Ability to perform lead duties such as orientation and training for staff, provide input for yearly appraisals, directs progress and coordination of dosimetric work.

ii. Ability to develop the Quality Improvement Program by evaluating, establishing and implementing departmental policies, standard operating procedures and department compliance with the national program office, radiation accrediting agencies, hospital and outside governing body standards.
iii. Ability to solve complex technical problems by instructing and providing oversight to lower level Medical Dosimetrists and trainees with regards to treatment planning, using the Record and Verify System (or other similar systems), using newly acquired equipment and other devices and products within the service.

iv. Ability to successfully communicate with the radiation oncology team and other internal and external customers to manage the needs of patients.

v. Ability to provide broad oversight and assist in the application of specific methods of patient and/or treatment planning as directed by Medical Physicists.

5. DEVIATIONS.

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for Medical Dosimetrists in VHA whose composite record of accomplishments, performance and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements on the proposed grade.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health in VHA Central Office prior to placement in the position.

c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement, or when specific credentials are identified as necessary to meet minimum requirements.

Authority: 38 U.S.C. §§ 7401, Appointments in Veterans Health Administration; 7402, Qualifications of appointees; 7403, Period of appointments; promotions; 7405, Temporary full-time appointments, part-time appointments, and without-compensation appointments; 7407, Administrative provisions for section 7405 and 7406 appointments.
APPENDIX G67. CHAPLAIN QUALIFICATION STANDARD

GS-0060

Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a chaplain in the Veterans Health Administration (VHA). The requirements apply to all VHA chaplains employed in the General Schedule (GS)-0060 series. Chaplains provide religious, spiritual, and pastoral care to all persons that is commensurate with the needs, desires, and voluntary consent of the Veteran or caregiver or staff. Chaplains interact with healthcare professionals from many different fields to address the spiritual component of health and wellness in every patient care setting to ensure that pastoral care is fully integrated into all aspects of care.

2. DEFINITIONS.

a. Journey Level. The full performance level for this qualification standard is the GS-11 grade level.

b. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills, abilities (KSAs), and other characteristics, also referred to as core competencies; be associated with the scope of chaplain practice equivalent to at least the next lower grade level; be directly related to the position being filled; and may be paid or non-paid employment.

c. Part-Time Experience. Part-time experience is creditable according to its relationship to the full-time work week. For example, a chaplain employed 20 hours per week, or on a half time basis, would receive one full-time work week of credit for each two weeks of service.

3. BASIC REQUIREMENTS. To qualify for appointment as a chaplain, all applicants must possess the following:

a. Citizenship. Citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

b. Education. Applicants must possess a Master of Divinity degree or equivalent educational qualifications as evidenced by a graduate-level theological degree from a college, university or theological school accredited by a member of the Council for Higher Education Accreditation (CHEA) or Association of Theological Schools (ATS) and recognized by the U.S. Department of Education.

NOTE: For applicants who do not possess a Master of Divinity degree or equivalent educational degree, an approved educational equivalency review from a nationally recognized board certification body for chaplains (see paragraph f) is acceptable.
c. **Foreign Education.** To be creditable, theological or related education completed outside the U.S. must be submitted to a current affiliate agency of the National Association of Credential Evaluation Services (NACES) listed at [https://www.naces.org/members](https://www.naces.org/members).

d. **Clinical Pastoral Education (CPE).** Applicants must have completed four units of CPE from a CPE center that is accredited by an organization recognized by the U.S. Department of Education.

e. **Ecclesiastical Endorsement.** In accordance with 38 C.F.R. § 17.655, ecclesiastical endorsement is a condition of employment as a VA chaplain. An individual must possess and maintain a full and active ecclesiastical endorsement to be employed as a VA chaplain. Applicants must have an ecclesiastical endorsement, dated within the past 12 months. Ecclesiastical endorsements must be from the official national endorsing authority of the applicant’s/employee’s faith group or denomination. Ecclesiastical endorsement is a written official statement, by the official national endorsing body of the faith group or denomination, certifying that the applicant is in good standing with the applicant’s faith group or denomination; and stating that the individual is, in the opinion of the endorsing body, qualified to perform the full range of ministry required in the VA pluralistic setting. Loss of endorsement will result in removal from the GS-0060 Chaplain series and may result in termination of employment. The National Chaplain Service maintains a list of approved endorsing organizations that can be found here: [https://www.patientcare.va.gov/chaplain/Employment_Information_and_Resources.asp](https://www.patientcare.va.gov/chaplain/Employment_Information_and_Resources.asp)

f. **Board Certification.** Applicants must be a Board Certified Chaplain certified by the Board of Chaplaincy Certification Inc. (BCCI) ® or nationally recognized certification body that utilizes the BCCI ® Common Qualifications and Competencies for Professional Chaplaincy or a certifying organization that has a reciprocity agreement with BCCI ®.

**Exception.** Non-certified applicants who otherwise meet the eligibility requirements may be given a temporary appointment under the authority of 38 U.S.C. § 7405(c)(2) for a period not to exceed two years. This exception only applies at the entry level. For the journey level and above, the candidate must have board certification. At the time of appointment, the supervisor in collaboration with Human Resources, will provide the uncertified chaplain with the written requirements for obtaining certification, the date by which the certification must be acquired, and the consequences for not becoming certified by the deadline. The written notice must be provided prior to the entrance on duty date. Failure to become certified within two years from date of appointment will result in removal from the GS-0060 Chaplain series and may result in termination of employment. Temporary graduate chaplain appointments may not be extended beyond two years and may not be converted to a new temporary appointment in this occupation.

g. **Loss of Endorsement or Certification.** Chaplains must maintain ecclesiastical endorsement and board certification. Loss of endorsement or board certification will result in removal from the GS-0060 Chaplain occupation and may result in termination of employment.
h. **Grandfathering Provision.** All chaplains employed in VHA, in this occupational series, performing the duties as described in the qualification standard on the effective date of this qualification standard, are considered to have met all the qualification requirements for the grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements of this standard, but met the qualifications applicable to the position at the time they were appointed to the position, the following provisions apply:

(1) Chaplains who do not meet the basic requirements for education and certification may be reassigned, promoted up to and including the full performance level, or demoted within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

(2) Chaplains appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended, or be reappointed on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Chaplains initially grandfathered into this occupation, who subsequently obtain education and/or certification that meets all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

(4) Chaplains who were retained in this occupation, under this provision, and subsequently leave the occupation, lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

j. **English Language Proficiency.** Chaplains must be proficient in spoken and written English to be appointed as authorized by 38 U.S.C. § 7403(f).

4. **GRADE REQUIREMENTS.** All individuals assigned to this occupation must have an approved title or parenthetical title, as described below:

a. Chaplain

b. Supervisory Chaplain

c. Chaplain (CPE Educator)

d. Chaplain (National Program Coordinator)

e. Chaplain (National Program Manager)
5. GRADE DETERMINATIONS.

a. Grade Determinations. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:

(1) Chaplain, GS-9

(a) Experience. None beyond the basic requirements.

(b) Assignment. At the GS-9 entry level, chaplains serve in a career development position practicing under close supervision of a supervisor or qualified individual who reviews and ensures the employee meets competency requirements. The chaplain conducts spiritual assessments to identify patient strengths and needs and creates plans for care in response to the moral injuries and spiritual distress of patients. The candidate provides crisis intervention and stabilization as required. The chaplain collaborates with healthcare teams to create and update treatment plans to address spiritual distress, grief, and loss as existential concerns to enhance holistic care. The chaplain ensures free exercise of religion and protects Veterans from proselytization and coercion from any source. The candidate uses a variety of intervention methods, including individual and group intervention, to address the emotional and spiritual needs of patients and families. The candidate coordinates religious services in a manner which respects the faith traditions and religious expression of patient. In addition, the candidate communicates effectively both in writing and verbally with persons of varied backgrounds. The chaplain documents chaplaincy care services. The chaplain provides referrals for continuity of spiritual care.

(c) Demonstrated Knowledge, Skills, and Abilities. In addition to meeting the basic experience requirements, the candidate must demonstrate the following KSAs:

i. Knowledge of spiritual assessments to identify patient strengths and needs and documenting services provided.

ii. Ability to use the information of the spiritual assessment to create care plans in all dimensions of pastoral care.

iii. Ability to provide crisis intervention and stabilization.

iv. Skill in healthcare team collaboration to create and update treatment plans to address spiritual issues.

v. Ability to ensure free exercise of religion for patients and staff.

vi. Knowledge of individual and group interventions to address spiritual and emotional needs of patients and families; providing referrals for continuity of spiritual care.
vii. Skill in the coordination of religious services respecting the faith tradition of individual patients.

viii. Ability to communicate verbally and in writing with persons of varied backgrounds.

(2) Chaplain, GS-11

(a) Experience. At this level, the candidate must have one year of creditable experience equivalent to the GS-9 level that is directly related to the position to be filled.

(b) Assignment. At the GS-11 journey level, the chaplain independently serves as a primary resource and point of contact for the spiritual needs of patients, caregivers and staff. The chaplain provides advance care planning education, information, and counsel for patients and their families. The chaplain provides guidance and/or support for patients to express values through processes such as life review, oral history, and end of life preparation and documentation. The chaplain develops pastoral care programs that are measurable, outcome-driven, and evidence-based in coordination with the department guidelines. The chaplain provides pastoral counseling on medical and ethical matters, including but not limited to, moral injury, problems of conscience, family or marital difficulties, justice or confinement matters, terminal diagnoses, or crisis. The chaplain also supports the development of staff resiliency by providing emotional and spiritual support and compassionate presence and develops programs for staff development and wellness. The chaplain provides education and equips other healthcare staff and trainees to screen for spiritual and religious needs, and the importance of appropriate referrals to chaplains for complex spiritual distress. At this level, the chaplain coordinates with community organizations to ensure the provision of comprehensive spiritual care, and engaging community resources to meet religious needs of patients that cannot be met by chaplain staff.

(c) Demonstrated Knowledge, Skills and Abilities. In addition to meeting the KSAs for the GS-9 grade level, the candidate must meet the experience above and demonstrate the following KSAs:

i. Knowledge of advance care planning to educate, inform, and counsel patients and families.

ii. Skill in guiding patients in verbalizing and expressing values through life review, oral history, and end of life preparation and documentation.

iii. Ability to develop pastoral care programs that are measurable, outcome-driven and evidenced based within the department guidelines.
iv. Skill in counseling on medical and ethical issues, terminal diagnoses or crises, moral injury, problems of conscience, family or marital difficulties and justice or confinement matters.

v. Ability to support the development of staff resiliency and develop programs for staff development and wellness by providing spiritual and emotional support.

vi. Ability to educate and equip healthcare staff and trainees screening for spiritual and religious needs of patients and the importance of appropriate referrals to chaplains for complex spiritual distress.

vii. Knowledge of community needs to coordinate with community organizations to provide comprehensive spiritual care, utilizing outside community resources to meet the religious needs of patients that cannot be met by chaplain staff.

(3) Chaplain, GS-12

(a) **Experience.** The candidate must have one year of creditable experience equivalent to the journey level (GS-11) that is directly related to the position to be filled.

(b) **Specialty Certification.** Specialty certification is demonstrated advanced practice and/or specialization in chaplaincy beyond the board certification and is required for the GS-12 grade level. Specialty certification from a professional chaplain certifying body that is directly related to the assignment is qualifying for a senior chaplain assignment.

(c) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. This assignment is a senior chaplain. Senior chaplain assignments may include serving at a facility in clinical settings where there is limited access to onsite supervision such as small healthcare systems, Community Based Outpatient Clinics, other Federal agencies or satellite outpatient clinics. Senior chaplains typically practice in a specialized program area, that may include intensive and extended pastoral counseling as an integral part of the treatment program, with patients facing complex moral, ethical, or spiritual problems. The senior chaplain may be assigned administrative responsibility to independently develop and implement programs and curriculum. They are accountable for clinical program effectiveness and modification of service patterns, which may include research and leadership of clinical teams. The senior chaplain works with full understanding of its relationship to the objectives of the institution, and to successfully integrate it with the work of the institutional staff, collaborates with and advises the other senior members of the treatment team in the provision of comprehensive healthcare services to Veterans, ensures equity of access, service, and benefits to this population, ensures the care provided is of the highest quality. The senior chaplain provides leadership, direction, orientation, coaching, in-service training, staff development, and continuing education programs for assigned chaplain staff. This assignment is to be relatively few in
number based on the size of the facility/service and applying sound position management. This assignment must represent substantial additional responsibility over and above that required at the full performance grade level and should not be used as the full performance level of this occupation.

(d) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

i. Ability to apply relevant theories and methodologies to their ministry specialty.

ii. Ability to integrate specialized psychological and sociological theory with an advanced approach to spiritual care.

iii. Skill to seek out primary research and research literature that informs the ministry specialty and one’s spiritual care practice.

iv. Skill in developing and implementing methods for measuring effectiveness of chaplain practice and services in the specialty area, utilizing outcome evaluations to improve treatment services and to design system changes.

v. Ability to mediate conflict, hold various emotions and diffuse moral distress among staff and complex crisis situations.

vi. Ability to provide specialized consultation, teaching and mentoring to colleagues and students on advanced spiritual care interventions in the service delivery area.

vii. Ability to apply advanced clinical knowledge to write policies, procedures and/or practice guidelines pertaining to the service delivery area.

(4) **Chaplain (Clinical Pastoral Educator), GS-12**

(a) **Experience.** At this level, the candidate must have one year of creditable experience equivalent to the next lower grade level that is directly related to the position to be filled.

(b) **Certification.**

i. To provide educational supervision for CPE Level 1 and Level 2 students, the Chaplain CPE Educator must be a Certified Educator.

ii. To provide educational supervision for students seeking to become Certified Educators, the Chaplain CPE Educator must be a CPE national faculty from an organization recognized by the U.S. Department of Education.
(c) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety and be performed by the incumbent at least 25% of the time. The certified educator manages the daily operations of the CPE center, develops and implements program policies and procedures and serves as certified educators of record for all CPE students. They are responsible for administrative oversight and programmatic resources and monitoring of educational outcomes. They are responsible for all educator evaluations, student records, center portfolio and CPE accreditation requirements, which may include off-site CPE satellites and placement contracts. The certified educator seeks approval for allied health trainee positions through the Office of Academic Affiliations (OAA). They recruit, interview and select students, and ensure all documentation is completed for compliance. They develop educational curricula that are measurable, outcome-oriented and evidence-based and designed to meet board certification competencies. They develop relationships with key staff related to the CPE program, e.g., clinical preceptors, Advisory Group members, OAA staff.

(d) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience or education above, the candidate must demonstrate the following KSAs:

1. Ability to independently educate all levels of CPE students and plan, organize, and implement all levels of the CPE program.
2. Skill in adhering to all accreditation standards, processes and practices including, but not limited to, timely and professional submission of all required program reports, center portfolio, fees and dues.
3. Skill in written and verbal communication that are articulate, professional and cohesive.
4. Ability to recruit, interview and select students for the CPE program.
5. Knowledge of professional ethics for certified educators and history of CPE.
6. Ability to apply theoretical understanding for and competence in administering and conducting all levels of CPE programs.
7. Knowledge of emerging trends and research in the area of pastoral education.
8. Knowledge of diverse conceptual frameworks for developing educational curriculum.

(5) **Supervisory Chaplain, GS-12**

(a) **Experience.** At this level, the candidate must possess one year of creditable experience equivalent to the GS-11 grade level that is directly related to the position to be filled.
(b) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. The supervisory chaplain at this level typically has responsibility for management of a small to moderately complex chaplain service. The supervisory chaplain is responsible for the professional practice of all facility chaplains and provision of chaplaincy services and programming. The supervisory chaplain provides supervision to professional and non-professional staff at the GS-12 or below. The supervisory chaplain has full responsibility for managing and supervising all aspects of chaplaincy service operations including clinical practice, program management, education, human resource management and supervision of the service. The supervisory chaplain is responsible for oversight and management of all religious and spiritual care and provides counsel to facility leadership concerning religious expression. The supervisory chaplain may supervise nonsupervisory and supervisory personnel and is responsible for chaplaincy practice including all administrative functions of the department, such as budget management, development of policy and clinical practice standards, development and oversight of service programming, establishing and ensuring performance and productivity metrics and outcomes, planning and organizational development, ensuring compliance with agency and accreditation requirements and setting the strategic direction of the service. The supervisory chaplain ensures the right of free exercise of religion and protects against proselytizing. The supervisory chaplain maintains chapel space and oversees distribution of space, inventory, and resources needed for the provision of spiritual care, education, and programming. The supervisory chaplain assesses spiritual and religious needs of the organization and ensures the religious needs of patients are met through partnerships with community religious leaders and organizations, and community, state and Federal agencies.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience or education above, the candidate must demonstrate the following KSAs:

i. Knowledge of administrative, personnel, resource management and strategic planning for chaplaincy and chaplain pastoral education programs.

ii. Ability to provide the full range of supervisory duties which include responsibility for assignment of work, performance evaluations, selection of staff and recommendation of awards, advancements and disciplinary actions.

iii. Skill in interpersonal relationships including conflict resolution and ability to work collaboratively with managers from other departments.

iv. Ability to develop local policy, productivity and clinical practice standards.

v. Ability to align local chaplaincy services and programming with the strategic goals and objectives of all levels of the agency, department or organization.
vi. Ability to ensure compliance with chaplaincy practice, policy and accreditation standards across the continuum of health care.

vii. Skill in providing consultation to facility leadership, managers and other staff on all religious expression and spiritual care.

(6) Supervisory Chaplain, GS-13

(a) Experience. At this level, the candidate must possess one year of creditable experience equivalent to the GS-12 grade level that is directly related to the position to be filled.

(b) Assignment. For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety and be performed by the incumbent at least 25% of the time. The supervisory chaplain is responsible for oversight and management of all religious and spiritual care and provides counsel to facility leadership concerning religious expression. The supervisory chaplain supervises professional and non-professional nonsupervisory and supervisory staff at the GS-12 grade level or below and is responsible for chaplaincy practice including all administrative functions of the department, such as budget management, development of policy and clinical practice standards, development and oversight of service programming, establishing and ensuring performance and productivity metrics and outcomes, planning and organizational development, ensuring compliance with agency and accreditation requirements and setting the strategic direction of the service. The supervisory chaplain ensures the right of free exercise of religion and protects against proselytizing. The supervisory chaplain maintains chapel space and oversees distribution of space, inventory and resources needed for the provision of spiritual care, education and programming. The supervisory chaplain assesses spiritual and religious needs of the organization and ensures the religious needs of patients are met through partnerships with community religious leaders and organizations, and community, state and Federal agencies.

(c) Demonstrated Knowledge, Skills and Abilities. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

i. Knowledge of administrative, personnel, and resource management and strategic planning for chaplaincy and chaplain pastoral education programs.

ii. Ability to provide the full range of supervisory duties, which include responsibility for assignment of work, performance evaluations, selection of staff and recommendation of awards, advancements and disciplinary actions.

iii. Skill in interpersonal relationships, including conflict resolution and ability to work collaboratively with managers from other departments.
iv. Ability to develop local policy, productivity and clinical practice standards.

v. Ability to align chaplaincy services and programming with the strategic goals and objectives of the facility, Veterans Integrated Service Network and VHA.

vi. Ability to ensure compliance with chaplaincy practice, policy and accreditation standards across the continuum of health care.

vii. Skill in providing consultation to facility leadership, managers and other staff on all religious expression and spiritual care.

(7) Chaplain (National Program Coordinator), GS-13

(a) **Experience.** At this level, the candidate must possess one year of creditable experience equivalent to the GS-12 grade level that is directly related to the position to be filled.

(b) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety and be performed by the incumbent at least 25% of the time. The chaplain national program coordinator positions are in the National Chaplain Service and provide transitional spiritual care services and programming for beneficiaries transitioning between the Department of Defense (DOD) and the Department of Veterans Affairs and those transitioning between any of the three Veterans Administrations. The chaplain provides transitional care for Service members and their families transitioning from active duty into the VHA. The chaplain works closely with the VA/DOD Liaison Program to ensure seamless transition of care from military service to enrollment and care linkage in the VHA. The chaplain provides bereavement care for the families of Veterans who die inside or outside of VHA facilities and who seek beneficiary assistance with the Veterans Benefits Administration (VBA) and/or interment through the National Cemetery Administration (NCA). The chaplain provides site and multi-state geographical care. Chaplains may provide intensive and extended pastoral counseling during transitional periods, liaisons with facility chaplain staff to provide seamless pastoral care services with facility chaplain departments, ensures continuity and optimization of spiritual care services and programming and avoids duplication of facility chaplaincy care services or programming. The chaplain may be assigned administrative responsibility to independently develop and implement programs and curriculum. They are accountable for clinical program effectiveness and modification of service patterns. Assignments may include DOD facilities, VHA facilities and NCA facilities. The chaplain works with full understanding of the relationship to the objectives of the institution, and successfully integrates with the work of the institutional staff, collaborates with and advises members of the institution in the provision of comprehensive healthcare services to Veterans, ensures equity of access, service and benefits to Veteran and Veteran beneficiaries and ensures the care provided is of the highest quality.
(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

i. Ability to effectively liaison and build relationships with transitioning Service members or family members.

ii. Skill in assessing need for basic and complex spiritual care or bereavement care across multiple programmatic venues.

iii. Knowledge of chaplain practice, policy, standards and strategic planning in relationship to a large multi-layered, multi-organizational program (e.g., United States Military Bases or National Cemeteries).

iv. Skill in maintaining relationships with appropriate offices and individuals to keep them abreast of significant accomplishments, program changes, and other substantive events.

v. Ability to develop and sustain strategic partnerships with key internal and external VA stakeholders and community partners on a national level.

(8) **Chaplain (National Program Manager), GS-14**

(a) **Experience.** At this level, the candidate must possess one year of creditable experience equivalent to the GS-13 grade level that is directly related to the position to be filled.

(b) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety and be performed by the incumbent at least 25% of the time. The chaplain (national program manager) serves as a program manager for the National Chaplain Service for either the Transitional Care; Clinical Care; or Bereavement/Family Care program at the national level. The chaplain program manager provides executive management leadership for policy, planning, programming, education and evaluation related to program assigned. The program manager has national oversight of programming implementation and data collection; and administration, communication, public relations, and outreach concerning the program. The chaplain (national program manager) has personnel management responsibilities for professional and non-professional staff. The chaplain (national program manager) provides organizational direction and serves as the principle interagency liaison with other Federal departments.
Demonstrated Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:

i. Ability to serve as facilitator, negotiator, primary point of contact, head writer and principal decision-maker for a multi-layered, multi-organizational chaplain health care, transitional care or bereavement/family care program.

ii. Ability to provide day-to-day technical guidance to chaplain staff across the continuum of a large geographically dispersed organization, monitor performance, review and approve staffing models, review and approve reports and deliverables, recommends required adjustments to existing staff models and debrief both positive and negative field action proposal merits/deficiencies.

iii. Ability to collaborate with internal and external partners (such as, VHA, VBA, NCA, DOD, and Faith Group Endorsers) to further program goals and enhance Veteran centered care.

iv. Skill in supporting large-scale public relations events as required, which may attract the attention of U.S. and world press resulting in multimedia reports.

v. Ability to conduct onsite assessments of progress towards meeting program goals; to modify objectives; and keep the agency, department or organization’s leadership informed of fluctuations in performance trends.

vi. Skill in developing reports, policies, procedures and/or practice guidelines for the program and in participating in national program development.

vii. Ability to provide technical management support for complex, long-range, multi-year strategic goals for a very large, complex, geographically dispersed national program.

6. DEVIATIONS.

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for chaplains in VHA whose composite record of accomplishments, performance and qualifications, as well as current assignments, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

c. Under no circumstances other than the exception at the entry level, will the certification, endorsement or educational requirements as a chaplain be waived.

Authority: 38 U.S.C. §§ 7401, 7402, 7403, 7405, 7407.
APPENDIX G68. HEALTH TECHNICIAN (OPTOMETRY) QUALIFICATION STANDARD

GS-0640

Veterans Health Administration

1. **COVERAGE.** The following are requirements for appointment as a Health Technician (Optometry) in the Veterans Health Administration (VHA). These requirements apply to all VHA Health Technicians (Optometry) in the General Schedule (GS)-0640 series.

2. **DEFINITIONS.**
   
a. **Appointing Official.** The Human Resources Officer is delegated appointing authority to process and authenticate notifications of personnel actions and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

   b. **Approving Official.** The Veterans Integrated Service Network Director or Facility Director is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

   c. **Journey Level.** The full performance level for this qualification standard is the GS-07 grade level.

   d. **Creditable Experience.** To be creditable, the experience must have required the use of knowledge, skills and abilities associated with current health technician/assistant or health technician (optometry)/assistant practice. Experience satisfying this requirement may be paid or non-paid employment as a health technician/assistant or health technician (optometry)/assistant in the health care field.

   e. **Quality of Experience.** Qualifying experience must be at a level comparable to health technician/assistant or health technician (optometry)/assistant experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

   f. **Part-Time Experience.** Part-time experience is creditable according to its relationship to a full-time workweek. For example, an individual employed 20 hours per week, or on a half time basis, would receive one full-time work week of credit for each two weeks of service.
3. **BASIC REQUIREMENTS.**

   a. **Citizenship.** Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

   b. **Experience and Education.**

      (1) **Experience.** One year of experience as a health technician or assistant in the health care field demonstrating the applicant's ability to perform the work or by demonstrating a basic understanding of work in the health care field;

      OR

      (2) **Education.** Successful completion of two academic years above high school with a minimum of 12 semester hours related to health technician/assistant or health technician (optometry)/assistant or associate degree, or completion of an independent study course in an optometry related technician or assistant field;

      OR

      (3) **Experience/Education Combination.** Equivalent combinations of experience and education are qualifying. Examples are listed below:

      (a) Six months of experience comparable to the next lower level which demonstrates the knowledge of optometry assistant theory and practices and general understanding of the health technician/assistant duties and one year above high school with a minimum of six semester hours of health technician/assistant or health technician (optometry)/assistant related courses.

      (b) Successful completion of a course for health care technicians or assistants, hospital corpsmen, medical service specialists, or hospital training in a program given by the U.S. Armed Forces, the U.S. Maritime Service, or the U.S. Public Health Service, may be substituted on a month-for-month basis.

   c. **Licensure/Certification/Registration.** None.

   d. **Grandfathering Provision.** All individuals employed in VHA in this occupational series or in another occupational series performing the duties as described in the qualification standard on the effective date of the qualification standard are considered to have met all qualification requirements for the grade held including positive education and licensure/trademark/registration/certification. For employees who do not meet all the basic requirements required in this standard,
but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) They may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis until they fully meet the basic requirements of the standard.

(3) Health Technicians (Optometry) who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of re-entry to the occupation.

e. **Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials and such education must have been deemed at least equivalent to that gained in conventional U.S. programs.

g. **English Language Proficiency.** Health Technician (Optometry) candidates must be proficient in spoken and written English to be appointed as authorized by 38 U.S.C. § 7403(f).

4. **GRADE DETERMINATIONS.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

a. **Health Technician (Optometry), GS-04**

   (1) **Experience.** None beyond the basic requirements.

   (2) **Assignment.** Employees at this grade level serve in a health technician (optometry) entry level position. More experienced staff members guide and provide daily direct supervision for the health technicians (optometry).

b. **Health Technician (Optometry), GS-05**

   (1) **Experience.** One year of experience equivalent to the next lower grade.

   (2) **Demonstrated Knowledge, Skills and Abilities (KSA).** In addition to the experience above, the candidate must demonstrate the following KSAs:
(a) Knowledge of basic eye anatomy and function.

(b) Ability to obtain, document and record ophthalmic and medical information from patients in order to develop an accurate electronic progress note.

(c) Ability to practice basic hygiene and infection control in a patient care setting.

(d) Ability to follow eye clinic and patient care medical policies and procedures.

(e) Ability to perform minor eyeglasses repairs, such as replacing nose pads and screws.

(3) Assignment. Employees at this grade level serve as developmental level 1 health technicians (optometry). It is expected they receive guidance from more experienced staff members for patient issues and require daily and direct contact with senior optometry personnel at the work site.

C. Health Technician (Optometry), GS-06

(1) Experience. One year of experience equivalent to the next lower grade.

(2) Demonstrated Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Ability to provide patient education for eye health and/or vision conditions, to include assisting with patient contact lens insertion, removal and hygiene (cleaning and disinfection) care.

(b) Ability to accurately enter into a phoropter the autorefractometry or habitual refractive prescription (i.e., eyeglasses prescription) or lensometer findings, including sphere, cylinder and axis.

(c) Ability to perform patient spectacle fitting and dispensing, including selection of appropriate frame, ophthalmic lenses, interpupillary measurements (distance and near) and proper segment height determination, as well as the ability to transpose sphere, cylinder and axis.

(d) Ability to provide basic triage of patient telephone calls or optometry requests.

(e) Knowledge of ophthalmic medications and supplies needed in the process of restocking the eye clinic exam rooms.

(3) Assignment. Employees at this grade level serve as developmental level 2 health technicians (optometry). The technicians operate and monitor
commonly used equipment performing basic screening procedures. The health technicians (optometry) understand basic hygiene, cleaning and disinfection of reusable medical equipment (RME) instruments and ophthalmic equipment. At this level, the technicians assist optometry staff by obtaining an accurate medical/ophthalmic history, as well as coding and entering eye testing performed on the encounter form. Deviations from regular procedures, unanticipated problems and unfamiliar situations are referred to the supervisor for a decision or assistance. Assignments at this level involve procedures performed under supervision from senior optometry personnel.

d. **Health Technician (Optometry), GS-07**

(1) **Experience.** One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Ability to determine preliminary objective estimate and/or refinement of the optical status of the eye, not to include the patient’s final subjective refraction.

(b) Ability to triage and manage eyeglasses issues (e.g., measurement of vertex distance, base curve, prism correction, center thickness, slab off, Fresnel prism, decentration, etc.).

(c) Ability to perform accurate assessment of accommodation, near point of convergence and ocular alignment (far and near).

(d) Ability to assist the eye care provider (optometrist or ophthalmologist) with ophthalmic procedures.

(e) Ability to assist with obtaining accurate ocular cultures and smears.

(f) Knowledge and ability to provide advanced patient education for eye health and/or vision conditions.

(3) **Assignment.** Employee at this grade level serves as a full performance level health technician (optometry). The technicians perform duties such as measuring and recording visual acuity (with use of pinhole testing as indicated), obtaining accurate potential acuity meter, laser interferometry, contrast sensitivity or other specialized visual acuity measurements. The technicians also evaluate pupillary light responses and measure pupil size,
determine the presence or absence of fusion and perform stereoacuity measurements. The health technicians (optometry) perform Amsler grid testing, administer eye drops under the supervision of an eye care provider (optometrist or ophthalmologist), perform basic tonometry (e.g., non-contact, Goldmann, Tono-Pen) and estimate the anterior chamber depth with a penlight or slit lamp biomicroscope. The technicians are skilled in properly reading a basic spectacle prescription using an automated or manual lensometer, obtaining accurate autorefractometry and keratometry measurements, performing confrontation and standard automated visual field testing and administering and scoring basic color vision tests (e.g., pseudoisochromatic plates, Farnsworth D-15). The technicians are also adept at measuring and recording corneal thickness by pachymetry as well as performance of advanced corneal measurements, exophthalmometry, tear testing and ocular imaging (e.g., stereo fundus, basic slit lamp biomicroscopy, intraocular lens master measurements, ocular ultrasonography, posterior segment optical coherence tomography, fundus autofluorescence and/or ocular angiography).

e. **Health Technician (Optometry), GS-08**

(1) **Experience.** One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Ability to provide patient education and training to manage complex eye and vision conditions.

(b) Knowledge of advanced triage of patients depending upon level of urgency or optometry needs.

(c) Knowledge of complex, non-standard treatment and/or complex examinations and techniques.

(d) Knowledge of ocular pharmacology and systemic medications with ocular side effects.

(3) **Assignment.** For all assignments above the full performance level, the higher level duties must be of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. At the advanced level, the health technicians (optometry) perform difficult and responsible ophthalmic technology duties with considerable
latitude for the exercise of independent judgment. The health technicians (optometry) perform duties such as advanced color vision testing, advanced perimetry including both automated and manual techniques, advanced ophthalmic imaging and diagnostic testing (e.g., anterior segment optical coherence tomography, advanced ultrasonography, confocal microscopy, electro-diagnostic testing, etc.), advanced patient education and training and vision rehabilitation services.

f. Lead Health Technician (Optometry), GS-08

(1) **Experience.** One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Ability to assign, coordinate and oversee health technician (optometry) daily duties, tasks and other responsibilities as appropriate.

(b) Ability to provide and/or monitor staff education and training activities, including interdisciplinary training as necessary.

(c) Ability to manage and oversee eye clinic RME disinfection activities that include researching manufacturers’ cleaning and disinfection recommendations, ordering appropriate RME related supplies, as well as ensuring health technician (optometry) clinic staff RME competency.

(d) Ability to address and resolve patient complaints and/or concerns and addressing patient health technician (optometry) relationships.

(e) Ability to develop and train health technicians (optometry) to ensure competency in performance of eye and vision care duties, activities and tasks.

(3) **Assignment.** For all assignments above the full performance level, the higher level duties must be of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The lead health technician (optometry) carries additional responsibilities that involve the oversight of specific services within the eye clinic. The lead health technician (optometry) leads three or more health technician (optometry), GS-07 positions and assists with technician oversight duties by carrying out a combination of the following, or similar, duties sufficient to ensure work assignments are carried out by team members: making work
assignments, monitoring work flow, providing input on performance and maintaining efficient flow of patient care. The lead health technician (optometry) provides training to optometry staff, students and/or trainees and may provide input into special advancements, promotions and disciplinary actions.

g. **Supervisory Health Technician (Optometry), GS-08**

(1) **Experience.** One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Ability to perform the full range of supervisory duties which would include responsibility for assignment of work to be performed, competency assessments, performance evaluations, selection of staff and recommendation of awards, advancements and when appropriate, disciplinary actions.

(b) Ability to analyze clinically appropriate data and make recommendations to optimize quality, efficiency, performance and productivity within the eye clinic.

(c) Advanced understanding of interdisciplinary issues and organizational structure to serve as liaison between optometry and other programs that would affect coordination of care, healthcare access, program evaluation, as well as assessment and planning for future need.

(d) Demonstrated leadership and managerial skills, including skill in interpersonal relations and conflict resolution, to deal with employees, team leaders and managers.

(3) **Assignment.** For all assignments above the full performance level, the higher level duties must be of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. This assignment is established for facilities with a clinical structure that does not include a lead and/or advanced level assignment(s). The supervisory health technicians (optometry) supervise, administratively manage and direct the health technician (optometry) clinical staff. Individuals in this position plan and direct programs at VA medical facility eye clinics and have supervisory responsibility for a staff of health technicians (optometry) up to the full performance level. Typically these duties include assigning and
evaluating the work of subordinate staff, resolving problems which may interfere with patient examination or treatment, providing optometry services in more complex and non-standard cases, making recommendations which would improve clinic operations, participating in facility clinical training programs as assigned, participating in selection of eye clinic staff applicants, evaluation of performance, taking disciplinary action when necessary and identifying educational or training needs. At this level, assignments include coordination of care, program evaluation and analysis, as well as budgetary issues and planning. The supervisors assure orientation and competency assessment of assigned health technician (optometry) clinic staff. The supervisors maintain interdepartmental relations with other services to accomplish VA medical facility goals.

h. Supervisory Health Technician (Optometry), GS-09

(1) Experience. One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

(2) Demonstrated Knowledge, Skills and Abilities. In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Ability to perform the full range of supervisory duties which would include responsibility for assignment of work to be performed, competency assessments, performance evaluations, selection of staff and recommendation of awards, advancements and when appropriate, disciplinary actions.

(b) Ability to analyze clinically appropriate data and make recommendations to optimize quality, efficiency, performance and productivity within the eye clinic.

(c) Advanced understanding of interdisciplinary issues and organizational structure to serve as liaison between optometry and other programs that would affect coordination of care, healthcare access, program evaluation, as well as assessment and planning for future need.

(d) Demonstrated leadership and managerial skills, including skill in interpersonal relations and conflict resolution, to deal with employees, team leaders and managers.

(3) Assignment. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the
time. The supervisory health technicians (optometry) supervise, administratively manage and direct the health technician (optometry) clinical staff. Individuals at this level plan and direct programs at affiliated medical centers and their satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory personnel. Individuals in the position have supervisory responsibility for a staff of health technicians (optometry) up to the GS-08 grade level. Typically, these duties include assigning and evaluating the work of subordinate staff, resolving problems which may interfere with patient examination or treatment, providing optometry services in more complex and non-standard cases, evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program, making selections based on recommendations from subordinates and/or other optometry personnel, evaluating performance, taking disciplinary action when necessary and identifying educational or training needs. At this level, assignments may include interagency coordination of care, program evaluation and analysis and budgetary issues and planning. The supervisors assure orientation and competency assessment of assigned staff. The supervisors maintain interdepartmental relations with other services to accomplish medical center goals.

5. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health in VHA Central Office prior to placement in the position.

c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement, or when specific credentials are identified as necessary to meet minimum requirements.

[APPENDIX G70. HEALTH TECHNICIAN (AUDIOLOGY), HEALTH TECHNICIAN (SPEECH-LANGUAGE PATHOLOGY) AND HEALTH TECHNICIAN (AUDIOLOGY & SPEECH-LANGUAGE PATHOLOGY) QUALIFICATION STANDARD

GS-0640

Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a Health Technician (Audiology) (HTA), Health Technician (Speech-Language Pathology) (HTSLP) and Health Technician (Audiology & Speech-Language Pathology) (HTASLP) in the Veterans Health Administration (VHA). These requirements apply to all VHA HTA, HTSLP and HTASLP in the General Schedule (GS) 0640 series, including those assigned to VA medical centers, Community-Based Outpatient Clinics, Vet Centers, Veterans Integrated Service Network (VISN) offices and VHA Central Office. This work may include the provision of a wide array of clinical rehabilitation services to support Veterans with disabilities reintegration into community, employment and independent living.

2. DEFINITIONS.

a. Appointing Official. The Human Resources (HR) Officer is delegated appointing authority, to process and authenticate notifications of personnel actions and authority to effect management approved employment actions on behalf of officials, employees and facilities for which service is provided.

b. Approving Official. The VISN Director, Facility Director, or designee, is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

c. Journey Level. The full performance level for this qualification standard is GS-06.

d. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills and abilities associated with current HTA, HTSLP or HTASLP practice. Experience satisfying this requirement may be paid or non-paid employment as a health technician in the health care field.

e. Quality of Experience. Qualifying experience must be at a level comparable to HTA, HTSLP or HTASLP experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.
f. **Part-Time Experience.** Part-time experience is creditable according to its relationship to a full-time workweek. For example, an individual employed 20 hours per week, or on a half time basis, would receive one full-time work week of credit for each two weeks of service.

3. **BASIC REQUIREMENTS.**

a. **Citizenship.** Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

b. **Experience and Education.**

   (1) **Experience.** Six months of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

   OR

   (2) **Education.** Successful completion of two academic years above high school leading to an associate degree or a bachelor’s degree with at least 12 semester hours in courses related to the position.

   OR

   (3) **Experience/Education Combination.** Equivalent combinations of experience and education are qualifying. An example of a combination of experience/education is three months of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled and one year above high school with a minimum of 6 semester hours related to the health care industry.

c. **Certification.** Certification by the Council for Accreditation in Occupational Hearing Conservation (CAOHC) as a Certified Occupational Hearing Conservationist (COHC) is required for the HTA, GS-08 assignment only.

d. **Loss of Credential.** An employee in this occupation who fails to maintain the required certification identified for the HTA, GS-08 position must be removed from the assignment, which may also result in termination of employment.

e. **Grandfathering Provision.** All individuals employed in VHA in this occupational series or in another occupational series performing the duties as described in the qualification standard on the effective date of the qualification standard are considered to have met all qualification requirements for the grade held including positive education and licensure/trademark/registration/certification. For employees who do not meet all the basic requirements required in this standard,
but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) They may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

(2) If an HTA, HTSLP or HTASLP who was retained under this provision leaves the occupation, the employee will lose protected status and must meet the full VA qualification standard requirements in effect at the time of re-entry to the occupation.

(3) HTAs, HTSLPs or HTASLPs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(4) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

f. **Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials and such education must have been deemed at least equivalent to that gained in conventional U.S. programs.

g. **Physical Requirements.** See VA Directive and Handbook 5019.

h. **English Language Proficiency.** HTA, HTSLP or HTASLP candidates must be proficient in spoken and written English to be appointed as authorized by 38 U.S.C. § 7403 (f).

4. **GRADE DETERMINATIONS.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

a. **HTA, GS-04**

(1) **Experience.** None beyond the basic requirements.

(2) **Assignment.** This is an entry level developmental position. The HTA at this level works independently under the direction of a licensed audiologist. The assignment of this position includes but is not limited to assisting the audiologist with patient assessment and treatment. The health technician must adhere to the audiology clinic policy and standard operating
procedures for infection control and cleaning, sterilization and disposition of reusable medical equipment (RME). The health technician maintains a comprehensive supply and equipment tracking system to include monitoring stock of RME and consumable items; ensuring proper inventory levels to complete the daily tasks; prioritizing the acquisition of all supplies and equipment with regard to date of expiration; maintaining proper levels of mailing/shipping supplies; preparing mailing and shipping requests for items including but not limited to hearing aid and hearing assistive technology repairs, ear mold orders and return for credit items; and maintaining loaner hearing aid inventory.

b. **HTSLP, GS-04**

1. **Experience.** None beyond the basic requirements.

2. **Assignment.** This is an entry level developmental position. The HTSLP at this level works independently under the direction of a licensed speech-language pathologist (SLP). The assignment of this position includes but is not limited to assisting the SLP with patient assessment and treatment. The health technician adheres to the speech-language pathology clinic policy and standard operating procedures for infection control, cleaning, sterilization and disposition of RME, as well as, radiation safety requirements. The health technician maintains a comprehensive supply and equipment tracking system to include monitoring stock of RME and consumable items; ensuring proper inventory levels to complete the daily tasks; prioritizing the acquisition of all supplies and equipment with regard to date of expiration; maintaining proper levels of mailing and shipping supplies; preparing mailing and shipping requests for items including but not limited to hearing aid and hearing assistive technology repairs, ear mold orders and return for credit items; and maintaining loaner hearing aid inventory.

c. **HTASLP, GS-04**

1. **Experience.** None beyond the basic requirements.

2. **Assignment.** This is an entry level developmental position. The HTASLP at this level works independently under the direction of a licensed audiologist or SLP. The assignment of this position includes but is not limited to assisting the audiologist or SLP with patient assessment and treatment. The health technician will adhere to audiology and speech-language pathology clinic policy and standard operating procedures for infection control and cleaning, sterilization and disposition of RME and radiation safety. The health technician maintains a comprehensive supply and equipment tracking system to include: monitoring stock of RME and consumable items; ensuring proper inventory levels to complete the daily tasks; prioritizing the acquisition of all supplies and equipment with regard to date of expiration; maintaining proper levels of mailing and shipping supplies; preparing mailing/shipping requests for items including but not limited to: hearing aid and hearing assistive technology repairs, ear mold...
orders and return for credit items; and maintaining loaner hearing aid inventory.

d. **HTA, GS-05**

(1) **Experience.** One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

OR

(2) **Education.** Successful completion of four academic years above high school leading to a bachelor’s degree with at least 24 semester hours in courses related to the position or a bachelor’s degree in a major field of study appropriate to the functions of the occupation.

(3) **Demonstrated Knowledge, Skills, Abilities.** In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Knowledge of anatomy of the head and neck.

(b) Ability to communicate clearly orally and in writing.

(c) Knowledge of basic hearing assistive technologies.

(d) Knowledge of basic infection control procedures and guidelines.

(e) Ability to maintain stock and supply level inventories.

(f) Skill in using basic computer software such as email, spreadsheet and word processing.

(4) **Assignment.** This is a developmental position. The HTA at this level works independently under the direction of a licensed audiologist. Assignments associated with this position include, but are not limited to answering and screening calls from patients regarding audiology needs; assisting the audiologist with patient assessment and treatment; assisting with walk-in appointments; processing incoming devices from patients with concerns related to their hearing aids or hearing assistive technology; and preparing and charging (if required) hearing aids and assistive devices for delivery. The health technician must adhere to the audiology clinic policy and standard operating procedures for infection control and cleaning, sterilization and disposition of RME. The health technician maintains a comprehensive supply and equipment tracking system to include: monitoring stock of RME and consumable items; ensuring proper inventory levels to complete the daily tasks; prioritizing the acquisition of all supplies.
and equipment with regard to date of expiration; maintaining proper levels of mailing/shipping supplies; preparing mailing and shipping requests for items including but not limited to: hearing aid and hearing assistive technology repairs, ear mold orders and return for credit items; and maintaining loaner hearing aid inventory.

e. **HTSLP, GS-05**

(1) **Experience.** One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

OR

(2) **Education.** Successful completion of four academic years above high school leading to a bachelor’s degree with at least 24 semester hours in courses related to the position or a bachelor’s degree in a major field of study appropriate to the functions of the occupation.

(3) **Demonstrated Knowledge, Skills, Abilities.** In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Knowledge of anatomy of the head and neck.

(b) Ability to communicate clearly orally and in writing.

(c) Knowledge of basic speech-language pathology needs.

(d) Knowledge of basic infection control procedures and guidelines.

(e) Ability to maintain stock and supply level inventories.

(f) Skill in using basic computer software such as email, spreadsheet and word processing.

(4) **Assignment.** This is a developmental position. The HTSLP at this level works independently under the direction of a licensed SLP. Assignments of this position include, but are not limited to answering and screening calls from patients regarding speech-language pathology needs; assisting the SLP with patient assessment and treatment; assisting walk-in appointments; and processing incoming devices from patients with concerns related to their communication devices or cognitive prosthetics. The health technician adheres to the speech-language pathology clinic policy and standard operating procedures for infection control, cleaning, sterilization and disposition of RME including endoscopes, as well as, radiation safety requirements. The health technician maintains a
comprehensive supply and equipment tracking system to include monitoring stock of RME and consumable items; ensuring proper inventory levels to complete the daily tasks; prioritizing the acquisition of all supplies; and equipment with regards to date of expiration.

f. **HTASLP, GS-05**

1. **Experience.** One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

   OR

2. **Education.** Successful completion of four academic years above high school leading to a bachelor’s degree with at least 24 semester hours in courses related to the position or a bachelor’s degree in a major field of study appropriate to the functions of the occupation.

3. **Demonstrated Knowledge, Skills, Abilities (KSAs).** In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

   a. Knowledge of anatomy of the head and neck.

   b. Ability to communicate clearly orally and in writing.

   c. Knowledge of basic hearing technologies and speech-language pathology needs.

   d. Knowledge of basic infection control procedures and guidelines.

   e. Ability to maintain stock and supply level inventories.

   f. Skill in using basic computer software such as email, spreadsheet and word processing.

4. **Assignment.** This is a developmental position. The HTASLP at this level works independently under the direction of a licensed audiologist or SLP. Assignments associated with this position include, but are not limited to answering and screening calls from patients regarding audiology and/or speech-language pathology needs; assisting the audiologist and/or SLP with patient assessment and treatment; supporting walk-in appointments; processing incoming devices from patients with concerns related to their hearing aids, hearing assistive technology or cognitive-communication devices; and preparing and charging, if required, assistive devices for delivery. The health technician adheres to the audiology and speech-language pathology clinic policy and standard operating procedures for
infection control and cleaning, sterilization and disposition RME including endoscopes and radiation safety. The health technician maintains a comprehensive supply and equipment tracking system to include monitoring stock of RME and consumable items; ensuring proper inventory levels to complete the daily tasks; prioritizing the acquisition of all supplies and equipment with regard to date of expiration; maintaining proper levels of mailing and shipping supplies; preparing mailing/shipping requests for items including but not limited to hearing aid and hearing assistive technology repairs, ear mold orders and return for credit items; and maintaining loaner hearing aid inventory.

g.  **HTA, GS-06**

1. **Experience.** Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.

2. **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

   a. Knowledge of normal and abnormal ear anatomy.

   b. Knowledge of hearing physiology and function to educate patients and families.

   c. Knowledge of hearing aids, hearing assistive technology, hearing aid manufacturers and manufacturer software.

   d. Ability to solve problems or make decisions regarding hearing aid, hearing assistive technology and patient care, consistent with the documented and co-signed plan of care under the supervision of an audiologist.

   e. Ability to prepare patients for testing procedures.

   f. Ability to document and code patient procedures.

3. **Assignment.** Employees at this grade level serve as a full performance level HTA. The HTA at this level works independently under the direction of a licensed audiologist. Assignments associated with this position include, but are not limited to: completing visual and auditory checks of hearing aids and hearing assistive technology; repairing or returning hearing aids to the factory; restoring hearing aid or hearing assistive technology settings after repair or replacement; and ordering, registering, certifying, issuing and tracking prosthetic devices. The health technician assists in setting up and delivering face to face and telehealth visits by preparing the equipment for
patient evaluation and other audiology procedures. The health technician provides clinical procedures consistent with the documented and co-signed plan of care which may include non-diagnostic otoscopy, cerumen management, foreign body removal and ear mold impressions and without interpretation, immittance screening and hearing screening. The health technician educates patients, family and staff on topics including but not limited to hearing aid and hearing assistive technology care, maintenance, use and operation, hearing conservation and realistic expectations for hearing aid use. The health technician completes documentation for each episode of care and codes procedures as appropriate in the patient record in preparation for co-signature by the audiologist.

h. **HTSLP, GS-06**

(1) **Experience:** Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

   (a) Knowledge of anatomy of the head and neck and oral structures and functions.

   (b) Knowledge of medical terminology as it relates to speech-language pathology for communication and swallowing impairments.

   (c) Knowledge of prosthetic items and communication devices often prescribed by speech-language pathology staff and assist with ordering and tracking process.

   (d) Ability to prepare supplies and equipment for speech, language, voice and/or swallowing evaluation and treatment.

   (e) Ability to document and code patient procedures.

(3) **Assignment.** Employees at this grade level serve as a full performance level HTSLP. The HTSLP at this level works independently under the direction of a licensed SLP. Assignments associated with this position include but are not limited to triaging inpatient and outpatient consults in collaboration with the SLP and checking the integrity of instrumentation such as speech science equipment and voice measurement equipment in the clinic. The health technician assists in setting up and delivering face to face and telehealth visits by preparing the equipment for patient evaluation and preparing evaluation rooms for speech-language pathology procedures. The health technician generates therapeutic stimuli and home
programs for routine treatments in collaboration with the SLP; monitors facility compliance with established policies; and verifies radiology orders for swallow procedures. The health technician tracks the progress of prosthetic orders and communicates with the SLP and patient regarding the order status. The health technician completes documentation in the patient record for each episode of care and codes procedures as appropriate in preparation for co-signature by the SLP.

i. **HTASLP, GS-06**

1. **Experience.** Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.

2. **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

   a. Knowledge of normal and abnormal ear anatomy and structures and functions of the oral mechanism.

   b. Knowledge of medical terminology as it relates to speech-language pathology and audiology for communication, swallowing impairments and hearing impairments.

   c. Ability to solve problems or make decisions regarding devices such as hearing aids, hearing assistive technologies, and communication devices for patient care.

   d. Knowledge of hearing aids, hearing assistive technology, hearing aid manufacturers and manufacturer software.

   e. Knowledge of prosthetic items and communication devices and supplies commonly prescribed by the speech-language pathology staff and assist with ordering and tracking process.

   f. Ability to prepare supplies and equipment for speech, language, voice and/or swallowing evaluation and treatment.

   g. Ability to document and code patient procedures.

3. **Assignment.** Employees at this grade level serve as a full performance level HTASLP. The HTASLP at this level works independently under the direction of a licensed audiologist and/or SLP. Assignments associated with this position include, but are not limited to completing visual and auditory checks of hearing aids and hearing assistive technology; repairing or returning hearing aids to the factory; restoring hearing aid or hearing assistive technology settings after repair or replacement; generating
therapeutic stimuli for clinical and home programs in collaboration with the SLP for routine treatments; ordering, registering, certifying, issuing and tracking prosthetic devices; verifying radiology orders; reviewing inpatient and outpatient speech-language pathology consults; and monitoring facility compliance with established policies. The health technician assists in setting up and coordinating face to face and telehealth visits, by preparing the equipment for patient evaluation and preparing evaluation rooms for audiology and speech-language pathology procedures. The health technician provides clinical procedures which may include non-diagnostic otoscopy, cerumen management, foreign body removal and ear mold impressions and without interpretation and performs immittance screening and hearing screening. The health technician educates patients, family and staff on topics including but not limited to hearing aid and hearing assistive technology care, maintenance, use and operation; hearing conservation; realistic expectations for hearing aid use; and aspiration precautions. The health technician completes documentation for each episode of care and codes procedures as appropriate in the patient record in preparation for co-signature by the audiologist or SLP.

j. HTA, GS-07

(1) **Experience.** Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Ability to mentor and train new HTAs.

(b) Ability to prepare patients for advanced testing procedures performed by the audiologist, such as evoked potentials.

(c) Ability to develop and implement the technician role for a program in a focused area of audiology.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The HTA at this level works under supervision and direction of a licensed audiologist. Assignments associated with this position include, but are not limited to: completing adjustments to hearing aid settings as outlined in the audiologist’s plan of care, preparing patients for advanced diagnostic procedures such as evoked potentials and
collaborating with audiology team to develop training programs for patients and staff.

k. **HTSLP, GS-07**

(1) **Experience.** Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Ability to mentor and train new HTSLPs.

(b) Ability to identify the diagnosis and dysphagia risk factors in the medical record to assist the SLP.

(c) Knowledge of safe feeding and swallowing strategies.

(d) Knowledge of linguistic parameters such as semantic, syntactic and phonological categories, to assist in creating materials for therapeutic stimuli and home programs.

(e) Ability to develop and implement the technician role for a program in a focused area of speech-language pathology.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The HTSLP at this level works under direction of a licensed SLP. Under the direction of the SLP, assignments associated with this position include, but are not limited to completing communication and swallow screenings including review of medical history, imaging reports and diet orders; and generating therapeutic stimuli and home programs for complex treatments such as cognitive and aphasia treatment. This health technician may collaborate with the health care team to develop educational materials for patients and staff and processes for monitoring patient safety initiatives as outlined in established policies.

l. **HTASLP, GS-07**

(1) **Experience.** Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.
(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Ability to mentor and train new HTASLPs.

(b) Ability to prepare patients for advanced testing procedures performed by the audiologist, such as evoked potentials.

(c) Ability to identify the diagnosis and dysphagia risk factors in the medical record to assist the SLP.

(d) Ability to identify the components of dysphagia monitoring.

(e) Knowledge of linguistic parameters such as semantic, syntactic and phonological categories, to assist in creating therapeutic stimuli and home programs.

(f) Ability to develop and implement the technician role for a program in a focused area of audiology and/or speech-language pathology.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The HTASLP works under the direction of a licensed audiologist or SLP. Assignments associated with this position include, but are not limited to completing adjustments to hearing aid settings as outlined in the audiologist’s plan of care, preparing patients for advanced diagnostic procedures such as evoked potentials and collaborating with team to develop training programs for patients and staff. Under the direction of the SLP, assignments associated with this position include, but are not limited to: completing communication and swallow screenings including review of medical history, imaging reports and diet orders; and generating therapeutic stimuli and home programs for complex treatments such as cognitive and aphasia treatment. This health technician may collaborate with the health care team to develop educational materials for patients and staff and processes for monitoring patient safety initiatives as outlined in established policies.

m. **HTA, GS-08**

(1) **Experience.** Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.
(2) **Certification.** CAOHC certification as a COHC is required for this assignment.

(3) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Ability to conduct employee hearing conservation education and training.

(b) Knowledge of the hearing conservation program requirements to manage records and files.

(c) Ability to perform pure tone air conduction testing.

(d) Ability to provide audiologic technical support to the employee hearing conservation program.

(e) Ability to identify a threshold shift and make appropriate referrals for further testing when indicated.

(4) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The health technician works under the direction of a licensed audiologist. Assignments associated with this position include, but are not limited to completing adjustments to hearing aid settings as outlined in the audiologist’s plan of care, preparing patients for advanced diagnostic procedures such as evoked potentials and collaborating with team to develop training programs for patients and staff. The health technician may perform pure tone air conduction threshold testing for established patients and employees, without interpretation. The health technician may provide employee hearing conservation education and training, basic counselling of employees concerning test results and criteria for employee referral. This health technician collaborates with the Hearing Conservation Program Manager and manages records associated with the hearing conservation program.

n. **Lead HTA, GS-08**

(1) **Experience.** Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:
(a) Knowledge of organization theory and leadership theory.

(b) Ability to apply principles of leadership during interactions with staff.

(c) Ability to identify problems in clinic operations, consider possible solutions and implement actions approved by supervisor.

(d) Skill in communicating programmatic decisions to staff.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The Lead HTA carries additional responsibilities that involve the oversight of specific services within the audiology clinic. The Lead HTA will assist the audiology supervisor and/or staff audiologist with technician oversight duties including making work assignments, monitoring workflow, providing input on performance, resolving daily workplace issues and maintaining efficient flow of patient care. They may provide training to staff, students and/or trainees; and may provide input into special advancements, promotions and disciplinary actions for HTA staff.

o. Lead HTSLP, GS-08

(1) Experience. Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.

(2) Demonstrated Knowledge, Skills and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Knowledge of organization theory and leadership theory.

(b) Ability to apply principles of leadership during interactions with staff.

(c) Ability to identify problems in clinic operations, consider possible solutions and implement actions approved by supervisor.

(d) Skill in communicating programmatic decisions to staff.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The Lead HTSLP carries additional responsibilities that involve the oversight of specific services within the speech-language pathology clinic. The Lead HTSLP will assist the speech-language
pathology supervisor and/or staff SLP with technician oversight duties including making work assignments, monitoring workflow, providing input on performance, resolving daily workplace issues and maintaining efficient flow of patient care. They may provide training to staff, students and/or trainees; and may provide input into special advancements, promotions and disciplinary actions for HTSLP staff.

p. Lead HTASLP, GS-8

(1) **Experience.** Completion of one year of progressive experience and/or experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

   (a) Knowledge of organization theory and leadership theory.

   (b) Ability to apply principles of leadership during interactions with staff.

   (c) Ability to identify problems in clinic operations, consider possible solutions and implement actions approved by supervisor.

   (d) Skill in communicating programmatic decisions to staff.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. The Lead HTASLP carries additional responsibilities that involve the oversight of specific services within the audiology and/or speech-language pathology clinic. The Lead HTASLP will assist the audiology and/or speech-language pathology supervisor and/or staff audiologist or SLP with technician oversight duties including making work assignments, monitoring workflow, providing input on performance, resolving daily workplace issues and maintaining efficient flow of patient care. They may provide training to staff, students and/or trainees; and may provide input into special advancements, promotions and disciplinary actions for HTASLP staff.

5. **DEVIATIONS.**

   a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well
as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the education or certification requirement be waived.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

1. **COVERAGE.** The following are requirements for appointment as a Healthcare Engineer in the Veterans Health Administration (VHA). These requirements apply to all VHA general engineers employed in the General Schedule (GS) 0801 series. Healthcare Engineers provide overarching professional services focusing on engineering and/or architecture involved in all aspects of the healthcare delivery processes and systems. They ensure the appropriate infrastructure, facilities and equipment are available for the medical mission. Healthcare Engineers are a specialized subset of more broadly defined professional engineering or architect occupations with general or specialty area degrees (e.g., general engineering, mechanical engineering, electrical engineering, civil engineering, architecture, architectural engineering, etc.). Healthcare Engineers collaborate with biomedical engineers to provide seamless integration of medical technology into the patient care environment. Healthcare Engineers specify the spatial layouts, infrastructure and environmental requirements to enable medical equipment integration into the healthcare facility. Healthcare Engineers must understand functional relationships in how clinicians, patients and supplies circulate within the treatment space where the medical equipment is located. Using healthcare engineering knowledge, they plan and design custom site preparation requirements for medical equipment, including installation.

**NOTE:** Some Engineer and Architect specialty disciplines may be excluded when not fully performing the duties and assignments described in this standard, such as the GS-0807 Landscape Architect, the GS-0854 Computer Engineer, the GS-0858 Biomedical Engineer (currently covered under VA Handbook 5005, Part II, Appendix G38) and the GS-0890 Agricultural Engineer.

2. **DEFINITIONS.**

   a. **Appointing Official.** The Human Resources Officer is delegated appointing authority, to process and authenticate notifications of personnel actions and authority to effect management approved employment actions on behalf of officials, employees and facilities for which service is provided.

   b. **Approving Official.** The Veterans Integrated Service Network (VISN) Director, VHA Office of Healthcare Engineering Director or facility Director or designee, is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

   c. **Journey Level.** The full performance level for this qualification standard is the GS-12 grade level.
d. **Creditable Experience.** To be creditable, the experience must have been accomplished after satisfying the basic education requirement as outlined in paragraph 3.b. of this appendix, required the use of knowledge, skills and abilities (KSAs) directly applicable to the assignment and be associated within the scope of the healthcare engineering profession.

e. **Quality of Experience.** Qualifying experience must be at a level comparable to healthcare engineering experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

f. **Part-Time Experience.** Part-time experience is creditable according to its relationship to a full-time workweek. For example, an individual employed 20 hours per week, or on a half time basis, would receive one full-time work week of credit for each two weeks of service.

3. **BASIC REQUIREMENTS.** To qualify for appointment to this position, all applicants must possess the following:

a. **Citizenship.** Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

b. **Education.**

   (1) **Bachelor's degree or higher in Engineering or Architecture.** To be acceptable, the curriculum must be from a school with at least one curriculum accredited by the Accreditation Board for Engineering and Technology, Engineering Accreditation Commission (excludes engineering technology) or National Council of Architectural Registration Boards curriculum. Examples of acceptable engineering and architectural degrees include, but are not limited to: Electrical Engineering, Mechanical Engineering, Biomedical Engineering, Civil Engineering, Architecture and Architectural Engineering. Titles may vary from educational institutions and change over time;

   OR

   (2) **Evidence of passing the Fundamentals of Engineering Examination with a bachelor's degree.** Evidence can be in the form of an Engineering in Training certificate issued from any State, the District of Columbia, Guam or Puerto Rico, or test results from the National Council of Examiners for Engineering and Surveying (NCEES) identifying a passing score;

   OR
(3) **Evidence of current professional registration or licensure as a Professional Engineer or Architect.** Evidence of current professional registration or licensure can be from any State, the District of Columbia, Guam or Puerto Rico.

c. **Grandfathering Provision.** All individuals employed in VHA in this occupational series or in another occupational series performing the duties as described in the qualification standard on the effective date of this qualification standard, are considered to have met all the qualification requirements for the grade held including positive education that is part of the basic requirements of the occupation. For employees who do not meet all the basic requirements of this standard, but met the qualifications applicable to the position at the time they were appointed to the position, the following provisions apply:

   (1) Employees may be reassigned, promoted up to and including the full performance (journey) level or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

   (2) Employees in an occupation that requires a licensure/certification/registration only at higher grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher grade levels.

   (3) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis until they fully meet the basic requirements of the standard.

   (4) Employees who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

   (5) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

d. **Foreign Education.** To be creditable, engineering, architecture or related education completed outside the U.S. must be submitted to a private organization that specializes in the interpretation of foreign educational credentials and such education must have been deemed at least equivalent to a Bachelor's degree as outlined in paragraph 3.b. of this appendix.

e. **Physical Requirements.** See VA Directive and Handbook 5019, Employee Occupational Health Service for requirements.
f. **English Language Proficiency.** Healthcare Engineer candidates must be proficient in spoken and written English in accordance with 38 U.S.C. § 7403(f).

4. **GRADE DETERMINATIONS.** In addition to the basic requirements outlined in paragraph 3, the following criteria must be met when determining the grade of candidates.

a. **Healthcare Engineer, GS-07.**

   (1) **Experience.** None beyond the basic requirements.

   (2) **Assignment.** At the entry level, Healthcare Engineers serve in a career development position, performing under close supervision of a supervisor or qualified individual who reviews and ensures the employee meets competency requirements. At the entry level, they perform general healthcare engineering assignments to gain knowledge and experience necessary to support engineering operations, project management and compliance. Developmental assignments include, but are not limited to, assessing healthcare facility programs and making recommendations to assure compliance with relevant regulations, guidelines and standards; applying engineering and code related knowledge to support the operational engineering requirements of the healthcare system; and preparing material on current technical topics and trends for presentation to the supervisor.

b. **Healthcare Engineer, GS-09.**

   (1) **Experience or Education.** Candidates at this level must meet one of the following:

   (a) One year of experience equivalent to the next lower grade;

   **OR**

   (b) Master of Engineering degree or Master of Architecture degree or Master of Science degree in Engineering or a related field of study as outlined in paragraph 3.b.(1);

   **OR**

   (c) Bachelor’s degree as outlined in paragraph 3.b.(1) plus two full years of progressively higher-level graduate education in a related field of study, provided the applicant’s total background demonstrates the core competencies for GS-09 level assignment.

   (2) **Knowledge, Skills and Abilities (KSAs).** In addition to the experience or education above, the candidate must demonstrate the following KSAs:
(a) Knowledge of the principles, theories, concepts and practices of the engineering profession.

(b) Ability to interpret relevant codes, regulations, guidelines and standards to make recommendations to assure compliance with healthcare facility programs.

(c) Ability to understand the operational professional engineering needs of clinical services in the healthcare system.

(d) Ability to prepare material on current technical topics and trends for presentation to other technical staff and mid-level hospital management and to keep abreast of changes in engineering technology related to a healthcare facility.

(3) Assignment. At the developmental level 1, Healthcare Engineers receive guidance from more experienced staff members and require frequent and direct supervision. Employees complete technical assignments in the engineering field as assigned by senior Healthcare Engineers and may be required to rotate through, and participate in, the operations of other hospital services. At the GS-9 grade level, employees function in a developmental capacity with oversight by a supervisor for more complex assignments.

(1) Experience or Education. Candidates at this level must meet one of the following:

(a) One year of experience equivalent to the next lower grade;

OR

(b) Ph.D. or equivalent doctoral degree in Engineering or a related field of engineering as outlined in paragraph 3.b.(1);

OR

(c) Master of Engineering degree, Master of Architecture degree, Master of Science degree in Engineering or a related field of study as outlined in paragraph 3.b.(1), plus 1 full year of progressively higher-level graduate education in a related field of study, provided the applicant's total background demonstrates the knowledge, skills and abilities for GS-11 level assignment;

OR
(d) Bachelor’s degree as outlined in paragraph 3.b.(1) plus 3 full years of progressively higher-level graduate education in a related field of study, provided the applicant’s total background demonstrates the knowledge, skills and abilities for GS-11 level assignment.

(2) Knowledge, Skills and Abilities (KSA). In addition to the experience or education above, the candidate must demonstrate the following KSAs:

(a) Knowledge of either mechanical, electrical, structural, civil or other engineering/architectural principles, practices and their applications in the healthcare environment.

(b) Knowledge of basic project management principles as applied to the healthcare setting.

(c) Ability to apply healthcare engineering related standards, codes, policies and regulations, inclusive of, state and local codes.

(d) Ability to communicate effective orally and in writing with internal and external customers with tact and diplomacy.

(e) Ability to develop material for clinical or administrative staff that addresses the principles and application of engineering technology and/or theory used in healthcare.

(f) Ability to advise staff on emerging engineering technology related to a healthcare facility, while keeping abreast of changes in such technology and utilizing the information to solve healthcare facility engineering challenges.

(3) Assignment. At developmental level 2, Healthcare Engineers function on a semi-independent basis with limited oversight by senior Healthcare Engineers. They conduct audits and inspections of worksites to assure compliance, prepare reports and findings, devise solutions and implement corrective actions with limited oversight. They perform project management related to the healthcare setting with limited oversight.

d. Healthcare Engineer, GS-12.

(1) Experience. One year of experience equivalent to the next lower grade.

(2) Knowledge, Skills and Abilities (KSAs). In addition to meeting the experience requirements for this grade level, the candidate must fully demonstrate the following KSAs:
(a) Knowledge of mechanical, electrical, structural, civil and other engineering/architectural principles, practices and their applications in the healthcare environment.

(b) Knowledge of healthcare industry standards and related regulatory agency and organization (including, but not limited to The Joint Commission (TJC), Occupational Safety and Health Administration (OSHA), National Fire Protection Agency (NFPA), etc.) regulations, requirements, guides, policies, procedures, directives, standards and general medical program requirements as they relate to healthcare engineering.

(c) Knowledge of construction standards, methods, practices and techniques, materials and equipment to determine compliance with engineering regulations and standards.

(d) Skill in researching and analyzing information, conditions, human factors and projections to make sound engineering and business recommendations and decisions to proactively identify problems and develop innovative solutions within the context of applicable rules, regulations and procedures.

(e) Ability to plan and execute complex, multi-faceted projects and inspections while prioritizing resources against approved scopes of work, contract documents and budgets.

(f) Ability to organize and lead multi-disciplinary task forces with members from different departments and divisions, as well as design and construction firms.

(3) **Assignment.** Employees at this level serve as Healthcare Engineers at the full performance level. They work independently, under general supervision with wide latitude to exercise independent judgment. Healthcare Engineers demonstrate intimate grasp of high order healthcare engineering and capital subject matter. They serve as institutional resources for healthcare delivery processes and systems, working extensively with clinical stakeholders, acquisition staff, contractors and executive leadership by leading healthcare engineering programs, technology assessments, integration planning and implementation of both current and emerging technologies. Healthcare Engineers support the delivery of healthcare to Veterans by contributing to the education of clinical staff, planners and leadership to ensure safe and efficient healthcare delivery. Healthcare Engineers plan, execute and document highly complex, multi-faceted healthcare facility construction projects and inspections while prioritizing resources against approved scopes of work, contract documents and budgets. They identify problems
and develop innovative solutions within the context of applicable rules, regulations and procedures, as it relates to the healthcare environment.

e. **Healthcare Engineer, GS-13.**

   (1) **Experience.** One year of experience equivalent to the next lower grade.

   (2) **Knowledge, Skills and Abilities (KSAs).** In addition to meeting the experience requirements for this grade level, the candidate must fully demonstrate the following KSAs:

      (a) Knowledge of current and evolving concepts and principles of general engineering to resolve novel or obscure problems; extend and modify techniques; develop new approaches that guide other engineers who solve a variety of technical problems; and/or apply new, innovative or experimental advanced engineering theories, developments or practices.

      (b) Skill in construction, capital planning and multiple healthcare system portfolio management inclusive of budget development and tracking.

      (c) Skill to collaborate with persons having diverse viewpoints, goals or objectives to achieve a common understanding of the problem and a satisfactory solution by justifying, defending, negotiating or settling controversial and far-reaching matters through active participation in conferences, meetings or presentations.

      (d) Ability to interpret broad guidelines and exercise considerable judgment and ingenuity in interpreting and adapting existing guides, developing new and improved hypotheses, concepts or approaches to previously tested or reported and/or in developing new policies that advance the organization.

      (e) Ability to coordinate and interact with regional facilities, national and corresponding staff for the implementation and coordination of policies and program plans to apply prioritization methodologies that align facilities’ capital asset requests and develop infrastructure options that result in the efficacious use of regional level capital strategic plans.

      (f) Ability to adapt and apply trends in healthcare delivery systems that impact long-term capital assets (such as aging equipment and physical plants) for regionally integrated healthcare systems.

      (g) Ability to consult and collaborate with all organizational levels in a national healthcare organization, outside organizations and
businesses regarding both strategic and financial activities of a regional healthcare organization.

(h) Ability to implement and/or sustain a capital asset and construction program that meets healthcare facility related standards, codes, policies and regulations inclusive of state and local codes.

(3) Assignment. For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety and be performed by the incumbent at least 25% of the time. At this level, employees are non-supervisory and are typically found at the Veterans Integrated Service Networks (VISN) or national program office level, however, employees may be located at the facility level with VISN or national assignments. Healthcare Engineers are the project managers for all VISN or some national level operations, accreditation, construction (major, minor and nonrecurring maintenance) and capital planning activities. At this level, Healthcare Engineers are advanced engineers overseeing engineering and project design programs for several VA Medical Centers (VAMCs) and Community Based Outpatient Clinics (CBOCs). They implement value engineering theories and principles and assure the most economical methods of construction or construction materials are utilized and achieve cost efficiency for the Federal Government. They coordinate VISN capital investment project submissions and provide guidance on investment categories, strategies, financial planning and budgeting. Healthcare Engineers evaluate and establish VISN-wide cost estimating strategy. They assist facility management when developing strategies to address the correction of space, functional and operational deficiencies and provide guidance, direction and policy interpretation on sensitive and complex issues in support of the acquisition and administration of all construction projects and capital planning.

(1) Experience. One year of experience equivalent to the next lower grade.

(2) Knowledge, Skills and Abilities (KSAs). In addition to meeting the experience requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Knowledge of data analysis techniques related to managing workload, quality, performance and productivity within the area of responsibility.

(b) Knowledge related to the management of overall department resources, (i.e., finances space, equipment, supplies, schedules and staffing) at the local level.
(c) Knowledge of the full range of supervisory duties, which include responsibility for assignment of work, performance evaluations, selection of staff, training and development, recommendation of awards, advancements and disciplinary actions.

(d) Skill in using effective communication in managing interpersonal relationships, leading and dealing with employees, team leaders, labor representatives and managers.

(e) Ability to balance multiple responsibilities, set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems and develop and implement effective solutions that result in efficient operations.

(f) Ability to draft and/or recommend local policies and/or directives related to healthcare engineering management.

(g) Ability to recognize and assess evolving scenarios, utilizing initiative, self-direction and assigned resources to affect resolutions.

(3) Assignment. For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, range of variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must supervise staff for at least 25% of the time, administratively and technically at the full performance grade level or below. At this level, Supervisory Healthcare Engineers are assigned at the facility level, supervising professional engineers and other support positions at GS-13 equivalent and below. Supervisory Healthcare Engineers exercise the full range of supervisory responsibility to include development of performance standards and performance evaluations; recommendations for appointment, awards, advancements, and when appropriate, disciplinary actions; and identification of continuing training needs, etc. They provide complex professional engineering advice to peers, subordinates and/or non-professional administrators/managers. They review or direct the review of technical plans, specifications and analyses of design as submitted by subordinates. Supervisory Healthcare Engineers provide professional advice to improve such plans, specifications and analyses. They direct necessary changes and furnish assistance as required. They advise subordinate personnel on methods and procedures to be used in special studies on highly complex projects. Supervisory Healthcare Engineers oversee subordinate professionals’ work. They are the technical authority, providing expert advice pertaining to the maintenance of facilities, structures or landscapes that may involve large geographic regions. Supervisory Healthcare Engineers review subordinates’ activity plans, specifications and cost estimates for technical adequacy and feasibility. They oversee maintenance
standards for advanced equipment or systems technology. Supervisory Healthcare Engineers provide for the budgeting and financial management for engineering. They supervise a staff to accomplish the construction work and maintenance of the organization.

g. **Supervisory Healthcare Engineer (Deputy), GS-13.**

(1) **Experience.** One year of experience equivalent to the next lower grade.

(2) **Knowledge, Skills and Abilities (KSAs).** In addition to meeting the experience requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Knowledge of the management of overall healthcare system resources, (i.e., finances, space, equipment, supplies, schedules and staffing).

(b) Knowledge of mechanical, electrical, structural, civil and other engineering/architectural principles, practices and their applications as related to healthcare facilities.

(c) Skill in using effective communication in managing interpersonal relationships with internal and external customers, stakeholders, executive leadership, labor representatives and managers.

(d) Skill in balancing priorities, delegating tasks and meeting multiple competing deadlines.

(e) Skill in interpreting broad or general national policies and guidelines and adapting/applying them to specific compliant programs at the local healthcare system.

(f) Skill in recognizing and assessing evolving scenarios, utilizing initiative, self-direction and assigned resources to affect resolutions.

(g) Ability to analyze complex organizational problems and develop and implement effective solutions that result in efficient operations.

(h) Ability to anticipate, develop and implement strategies in meeting the healthcare system’s short term and long-term strategic goals in a highly fluid environment.

(i) Ability to ensure compliance with healthcare industry standards and regulatory agency and organization (including but not limited to TJC, OSHA, NFPA, etc.), regulations, requirements, guides, policies, procedures, directives and general medical program requirements as they relate to healthcare engineering.
(j) Ability to interview candidates for positions, recommend appointments, advancements, or when appropriate, disciplinary actions; evaluate performance and identify continuing education and training needs.

(3) **Assignment.** For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, range of variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must supervise staff for at least 25% of the time, administratively and technically at the full performance grade level or below. This Supervisory Healthcare Engineer, GS-13, position is the deputy to the Supervisory Healthcare Engineer, GS-14, who supervises professional engineers and other support staff. They supervise the engineering service to accomplish the operations of the service. The deputy, as an assistant chief, in this position exercises the full range of supervisory responsibility to include but not limited to development of performance standards and performance evaluations, recommendations for appointment, awards, advancements, and when appropriate, disciplinary actions and identification of continuing training needs. The deputy provides a safe, reliable and precisely controlled operating environment for direct patient care. They are experts in the design, sustainment and improvement of the medical care environment, including all hospital building features, automated building management and environmental control systems, critical utility systems and medical equipment technology. They work under the authority and direction of the Supervisory Healthcare Engineer, GS-14, and may collaborate directly with executive leadership, medical staff, nursing staff and other clinical personnel regarding the design and operation of the environment for medical care. They manage the healthcare system’s capital assets program and construction projects. They educate and advise clinical staff on the safe use of critical building features, utility systems and fire prevention systems as they relate to the environment of care. They educate and advise clinical staff on medical equipment technology including selection, operation, safety and security. Deputies/Assistant Chiefs ensure the healthcare system complies with a multitude of VA established or adopted standards, codes, accreditation and regulatory requirements including, but not limited to, those issued by TJC, OSHA and Environmental Protection Agency (EPA). In summary, they apply engineering concepts and methodologies to enhance the delivery of healthcare by providing a technologically advanced, safe and reliable healthcare environment. They coordinate the operational planning, organizing, directing, evaluating and management process for service line programs, which may include setting qualitative and quantitative standards. They may develop and provide the Executive Leadership Team and the clinical staff information on the methods, techniques and procedures necessary to integrate engineering, maintenance, biomedical, capital management and other engineering
programs into the mission of the medical center. They assist the Supervisory Healthcare Engineer, GS-14, with oversight of the TJC, Environment of Care Programs for Utility Systems Management, Safety, Life Safety and Medical Equipment Management for both their assigned medical center and all CBOCs.

h. **Healthcare Engineer, GS-14.**

(1) **Experience.** One year of experience equivalent to the next lower grade.

(2) **Knowledge, Skills and Abilities (KSAs).** In addition to meeting the experience requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Knowledge of current and evolving concepts and principles of general engineering to resolve novel or obscure problems; extend and modify techniques; develop new approaches that guide other engineers who solve a variety of technical problems; and/or apply new, innovative or experimental advanced engineering theories, developments or practices to problems or studies not susceptible to treatment by acceptable methods.

(b) Skill in construction, capital planning and multiple healthcare system portfolio management, inclusive of budget development and tracking.

(c) Skill in collaborating with persons having diverse viewpoints, goals or objectives to achieve a common understanding of the problem and a satisfactory solution of sometimes controversial and far-reaching matters through active participation in conferences, meetings or presentations.

(d) Ability to interpret broad guidelines and exercise considerable judgment and ingenuity in interpreting and adapting existing guides; in developing new and improved hypotheses, concepts or approaches not previously tested or reported; and/or in developing new policies that advance the organization.

(e) Ability to coordinate and interact with regional facilities, national and Department-level staff for the implementation and coordination of policies and program plans to apply prioritization methodologies that align facilities’ capital asset requests and develop infrastructure options that result in the efficacious use of a regional healthcare organization capital strategic plan.

(f) Ability to adapt and apply trends in healthcare delivery systems that impact long-term capital assets (such as aging equipment and physical plants) for regionally integrated healthcare systems.
(g) Ability to consult and collaborate with all organizational levels in a national healthcare organization, outside organizations and businesses regarding both strategic and financial activities of a regional healthcare organization.

(3) **Assignment.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety and be performed by the incumbent at least 25% of the time. This position serves as the national or VISN engineer for all activities related to engineering operations, compliance and/or construction and leases (major, minor, clinical specific initiative-inclusive of high-tech, high-cost medical equipment installations and nonrecurring maintenance) and capital planning to include budget approval, funding allocation and activation. Healthcare Engineers oversee project design programs for all VAMCs and CBOCs by reviewing, evaluating and coordinating planning data such as projected space requirements and strategic, operational, program and design requirements. They coordinate national or VISN capital investment submissions and provide guidance on investment categories, strategies, financial planning and budgeting. Healthcare Engineers provide technical expertise on capital asset proposals and develop guidelines and data tools in completing the application, Cost-Effectiveness Analysis, Earned Value Analysis, Alternatives Analysis and Risk Analysis.

(a) Healthcare Engineers oversee project progress reviews and overall project performance levels to identify slippage, cost overruns and other issues, and provide direction and lead a collaborative approach with facility engineering and contracting (and when warranted, VACO-level program managers) to bring about solutions to issues impacting project performance. They manage and track funding of national or VISN approved capital programs and assist VAMC facility management in developing strategies to address the correction of space, functional and operational deficiencies to include lead for VISN-wide space and functional surveys, updates and maintenance of the Facility Conditional Assessment and other capital performance management requirements and databases. They provide guidance, direction and policy interpretation on sensitive and complex issues in support of the acquisition and administration of all construction projects and capital planning. Healthcare Engineers ensure compliance with VHA capital related policies, procedures and program design criteria.

(b) Healthcare Engineers provide a system of communication and training for facility-level engineering staff on a wide variety of infrastructure and compliance related issues both in terms of capital and project planning and facility operations. They review, evaluate
and provide professional oversight to VISN/VAMC Environment of Care Programs to ensure compliance with VHA Directives, accreditation standards, national codes and other regulatory requirements. They brief network and VHA leadership on Environment of Care and healthcare engineering programs and develop strategies to address gaps and opportunities for improvement. Healthcare Engineers formulate and establish policies for national or VISN-wide energy conservation initiatives relating to utility system energy operation/performance and operational and maintenance procedures with the objective of meeting VA and VISN energy conservation goals. They are required to monitor progress and report to VISN and VHA management on a recurring basis.

(c) Healthcare Engineers ensure value engineering theories and principles are implemented to assure the most economical methods of operations and construction or construction materials are utilized and to achieve cost efficiency for the Federal Government. They evaluate and establish a national or VISN-wide cost estimating strategy. They are responsible for identifying, developing, evaluating and implementing business opportunities for VISN-wide operational efficiencies and quality enhancements.

i. **Supervisory Healthcare Engineer, GS-14.**

   (1) **Experience.** One year of experience equivalent to the next lower grade.

   (2) **Knowledge, Skills and Abilities (KSAs).** In addition to meeting the experience requirements for this grade level, the candidate must fully demonstrate the following KSAs:

   (a) Knowledge of mechanical, electrical, structural, civil and other engineering/architectural principles, practices and their applications as related to healthcare facilities.

   (b) Knowledge related to the management of overall healthcare system resources, (i.e., finances, space, equipment, supplies, schedules and staffing).

   (c) Skill in using effective communication in managing interpersonal relationships with internal and external customers, stakeholders, executive leadership, labor representatives and managers.

   (d) Skill in balancing multiple responsibilities, setting priorities, delegating tasks and projects, meeting multiple deadlines, analyzing complex organizational problems and developing and implementing effective solutions that result in efficient operations.
(e) Skill in applying considerable independent judgment to interpret broad or general national policies and guidelines and adapt/apply them to specific compliant programs at the local healthcare system.

(f) Skill in recognizing and assessing evolving scenarios, utilizing initiative, and self-directing and assigning resources to affect resolutions.

(g) Skill in complying with national internal and outside regulatory agency and organization (including, but not limited to TJC, OSHA, NFPA, etc.) regulations, requirements, guides, policies, procedures, directives, standards and general medical program requirements as they relate to healthcare engineering.

(h) Ability to anticipate, develop and implement strategies in meeting the healthcare system’s short-term and long-term strategic goals in a highly fluid environment.

(i) Ability to interview candidates for positions, recommend appointments, advancements, or when appropriate, disciplinary actions; evaluate performance and identify continuing education and training needs.

(3) **Assignment.** For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, range of variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must supervise staff for at least 25% of the time, administratively and technically at the full performance grade level or below. This Supervisory Healthcare Engineer, GS-14 position is the Chief Engineer. Chief Engineers supervise engineering service, including subordinate the Supervisory Healthcare Engineer(s) at the GS-13 level, to ensure compliance with VA, TJC and a variety of other prevailing codes and standards. In addition to Chief Engineers’ integral role in providing capability and capacity for the primary medical mission, they ensure the availability of facilities for complex medical research and participate in community partnerships and supports Department of Defense contingency planning. Chief Engineers supervise the engineering staff to accomplish the operations of the service. As Chief Engineers, they exercise the full range of supervisory responsibility to include but not limited to development of performance standards and performance evaluations; recommendations for appointment, awards, advancements, and when appropriate, disciplinary actions and identification of continuing training needs.

(a) Chief Engineers provide for a safe, reliable and precisely controlled operating environment for direct patient care. Chief Engineers serve
as experts in the design, sustainment and improvement of the medical care environment, including all hospital building features, automated building management and environmental control systems, critical utility systems and medical equipment technology. They collaborate directly with executive leadership, medical staff, nursing staff and other clinical personnel regarding the design and operation of the environment for medical care. They manage capital asset programs and construction projects.

(b) Chief Engineers educate and advise clinical staff on the safe use of critical building features, utility systems and fire prevention systems as they relate to the environment of care. They educate and advise clinical staff on medical equipment technology including selection, operation, safety and security. They ensure the healthcare system complies with a multitude of accreditation and regulatory requirements including, but not limited to, those issued by TJC, OSHA and EPA.

(c) Chief Engineers apply engineering concepts and methodologies to enhance the delivery of healthcare by providing a technologically advanced, safe and reliable healthcare environment. They are responsible for the planning, organizing, directing, evaluating and management process for service line programs, which include setting qualitative and quantitative standards. They develop and provide the Executive Leadership Team and the clinical staff information on the methods, techniques and procedures necessary to integrate the engineering, maintenance, biomedical, capital management and other engineering programs into the mission of the medical center. They oversee the TJC, Environment of Care Programs for Utility Systems Management, Safety, Life Safety and Medical Equipment Management for both the assigned medical center and all CBOCs.

(1) Experience. One year of experience equivalent to the next lower grade.

(2) Knowledge, Skills and Abilities (KSAs). In addition to meeting the experience requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Knowledge related to the management of healthcare system resources, (i.e., finances, space, equipment, supplies, schedules and staffing) across a national portfolio of interrelated healthcare facilities that vary in size and complexity.
(b) Knowledge of mechanical, electrical, structural, civil and other engineering/architectural principles, practices and their applications as related to healthcare facilities.

(c) Knowledge of a range of specialized areas in general engineering sufficient to originate concepts and effect new developments applicable to emerging functions of a national magnitude and with long-term purposes.

(d) Skill in using effective communication in managing interpersonal relationships with internal and external customers, stakeholders, executive leadership, labor representatives and managers.

(e) Ability to balance multiple responsibilities, set priorities, delegate tasks and projects, meet multiple deadlines, analyze complex organizational problems and develop and implement effective solutions that result in efficient operations across a national healthcare system.

(f) Ability to anticipate, develop and implement strategies in meeting national healthcare system's short term and long-term strategic goals in a highly fluid environment.

(g) Ability to develop national policy and adapt/apply across the national healthcare system.

(h) Ability to recognize and assess evolving scenarios, utilizing initiative, self-direction and assigned resources to affect resolutions.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time. The Healthcare Engineers (National Program Coordinators), GS-15, serve as a National Program Coordinator, Program Director or Senior Program Manager within the VHA Healthcare Environment and Facilities Program (HEFP) Office. These Healthcare Engineers (National Program Coordinators) have programmatic responsibility (oversight, review, budget, planning, policy, guidance, compliance, etc.) over all facility healthcare engineering programs nationally. Healthcare Engineers (National Program Coordinators) are recognized authorities in the analysis of national or regional program related issues and are delegated program level authority on overall project priorities and authority to plan, schedule and manage major projects/studies. Results of work are considered authoritative and are normally accepted without change. They use judgment and ingenuity and exercise broad latitude to determine intent of guidelines; and develop policy/guidance and formulate interpretations which take the form of policy statements and guidance.
(a) Healthcare Engineers (National Program Coordinators) generate new concepts and methodologies; plan and direct financial or budgeting systems for broad, emerging or similarly critical large-scale department/agency-wide programs of national or international scope where no precedents exist; and establish education/training in concepts and theories of the occupation gained only through completion of a specified curriculum at a recognized college or university (positive education requirement).

(b) Healthcare Engineers (National Program Coordinators) plan, organize and carry through to completion analytical studies involving or supporting key agency healthcare programs. Studies are of such breadth they require input and assistance from other analysts and subject matter expert specialists in the field appropriate to the subject of study. Programs of study may be cross-functional and strongly influence multiple national healthcare programs within VA and/or other federal agencies, standards organizations and national code authorities.

(c) Healthcare Engineers (National Program Coordinators) manage VHA’s Healthcare Engineering program or its significant segment of the broad scoped national program, which supports and directly affects the multi-billion-dollar operation and investments of the administration’s healthcare and non-healthcare facilities. Decisions and actions made by Healthcare Engineers (National Program Coordinators) influence and guide industry policies and practices. They serve as policy and technical experts not only within VHA and VA but also educate and advise other governmental agencies (OGAs), industry, professional societies and other national organizations in enhancing the accomplishment of VHA and community healthcare missions. They counsel and advise senior and executive leadership on policies, healthcare facility operations, emerging/available technologies, programmatic impacts (initiatives, regulatory and statutory) and management of human capital (professional engineering and trades and crafts).

(d) Healthcare Engineers (National Program Coordinators) are a recognized authority in the analysis of national or regional program related issues and are delegated program level authority on overall project priorities and authority to plan, schedule and manage major projects/studies.
(e) They review and concur on congressional, media and general business correspondence from facilities, VISNs, other Program Offices (within VHA and VA), Office of the Under Secretary for Health and the Office of the Secretary addressing healthcare facility policies, operations or associated capital investments.

(f) Healthcare Engineers (National Program Coordinators) direct comprehensive policy and technical (code, regulations and standards) compliance reviews and investigations of field facilities by subordinate or other national program staff. They lead site reviews and investigations in instances of technical complexity, extreme sensitivity or national interest. They evaluate operational effectiveness and efficiencies.

(g) Healthcare Engineers (National Program Coordinators) oversee workload analyses and determine national, regional and VISN program support needs to ensure current and future mission directives and work product expectations are met. They establish contract scopes and contract budgets. They designate contract managers and review subordinate staff developed work requirements and performance assessment criteria. In many cases contracts are complex, multi-million dollar, provide a broad range of work products and services and are of national scope. They direct contractor work assignments on non-delegated contracts and review subordinates on management of delegated contracts VA, VHA, OGAs and other corporate boards, councils and committees.

(h) Healthcare Engineers (National Program Coordinators) are key healthcare engineering and associated technology integrations representatives within VHA and VA. They chair or provide management oversight to VHA national committees and task groups (e.g., Healthcare Engineering Oversight Committee on Physical Security and Resiliency, VHA Facility Design and Oversight Committee, etc.). They appoint members, representatives of VHA headquarters and field operations to select committees and task groups. They authorize national level distribution and implementation of committee developed guides, standards or recommendations. They serve as VHA representatives on various interagency, OGA, national code, corporate and industry based national organizations (e.g., Federal Facilities Council, Whole Building Design Council, American Society of Healthcare Engineering, National Institute of Building Sciences, Facility Guidelines Institute, etc.).
k. **Supervisory Healthcare Engineer, GS-15.**

(1) **Experience.** One year of experience equivalent to the next lower grade.

(2) **Knowledge, Skills and Abilities (KSAs).** In addition to meeting the experience requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Knowledge related to the management of healthcare system resources, (i.e., finances, space, equipment, supplies, schedules and staffing) across a national portfolio of interrelated healthcare facilities that vary in size and complexity.

(b) Knowledge of mechanical, electrical, structural, civil and other engineering/architectural principles, practices and their applications as related to healthcare facilities.

(c) Knowledge of a range of specialized areas in general engineering sufficient to originate concepts and effect new developments applicable to emerging functions of a national magnitude and with long-term purposes.

(d) Skill in using effective communication in managing interpersonal relationships with internal and external customers, stakeholders, executive leadership, labor representatives and managers.

(e) Ability to effectively supervise a wide variety of subordinates to include interview candidates for positions; recommend appointments, advancements, or when appropriate, disciplinary actions; evaluate performance and identify continuing education and training needs.

(f) Ability to balance multiple responsibilities, set priorities, delegate tasks and projects, meet multiple deadlines, analyze complex organizational problems and develop and implement effective solutions that result in efficient operations across a national healthcare organization.

(g) Ability to anticipate, develop and implement strategies in meeting a national healthcare system's short term and long-term strategic goals in a highly fluid environment.

(h) Ability to develop national policy and adapt/apply across a national healthcare system.

(i) Ability to recognize and assess evolving scenarios, utilizing initiative, self-direction and assigned resources to affect resolutions.
(3) **Assignment.** For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, range of variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must supervise staff for at least 25% of the time, administratively and technically at the full performance grade level or below. This position serves as a Program Director or Senior Program Manager within the VHA HEFP Office or as the Engineering and Capital Program Manager at the regional/VISN level. These Supervisory Healthcare Engineers have full programmatic responsibility (staffing management, budget, planning, policy, guidance, compliance, etc.) over all facility healthcare engineering programs nationally, regionally or within their VISN.

(a) Supervisory Healthcare Engineers manage VHA’s Healthcare Engineering program or its significant segment of the broad scoped national program, which supports and directly affects the multi-billion-dollar operation and investments of the administration’s healthcare and non-healthcare facilities. Decisions and actions made by them influence and guide industry policies and practices. They serve as a policy and technical expert not only within VHA and VA but also educate and advise OGAs, industry, professional societies and other national organizations in enhancing the accomplishment of VHA and community healthcare missions. They counsel and advise senior and executive leadership on policies, healthcare facility operations, emerging/available technologies, programmatic impacts (initiatives, regulatory and statutory) and management of human capital (professional engineering and trades and crafts).

(b) Supervisory Healthcare Engineers provide authoritative technical interpretations of policies, regulations, codes and standards. They formulate operational and multi-year strategic budgets and staffing requirements. They establish technical competency requirements and oversee national level educational program initiatives which include commercial-off-the shelf course assessments, custom course development and negotiation of intra-departmental agreements. They serve as technical and administrative policy subject matter experts and as instructors/educators.

(c) They review and concur on congressional, media and general business correspondence from facilities, VISNs, other Program Offices (within VHA and VA), Office of the Under Secretary for Health and the Office of the Secretary addressing healthcare facility policies, operations or associated capital investments.
(d) Supervisory Healthcare Engineers direct comprehensive policy and technical (code, regulations and standards) compliance reviews and investigations of field facilities by subordinate or other national program staff. They lead site reviews and investigations in instances of technical complexity, extreme sensitivity or national interest. They evaluate operational effectiveness and efficiencies.

(e) They oversee workload analyses and determine national program support needs to assure current and future mission directives and work product expectations are met. They establish contract scopes, contract budgets, designate contract managers and review subordinate staff developed work requirements and performance assessment criteria. In many cases contracts are complex, multi-million dollar, provide a broad range of work products and services and are of national scope. The incumbent directs contractor work assignments on non-delegated contracts and reviews subordinates on management of delegated contracts for VA, VHA, OGAs and other corporate boards, councils and committees.

(f) Supervisory Healthcare Engineers are key healthcare engineering and associated technology integrations representatives within VHA and VA. They chair or provide management oversight to VHA national committees and task groups (e.g., Healthcare Engineering Oversight Committee on Physical Security and Resiliency, VHA Facility Design and Oversight Committee, etc.). They appoint members, representatives of VHA headquarters and field operations to select committees and task groups. They authorize national level distribution and implementation of committee developed guides, standards or recommendations. They serve as VHA representatives on various interagency, OGA, national code, corporate and industry based national organizations (e.g., Federal Facilities Council, Whole Building Design Council, American Society of Healthcare Engineering, National Institute of Building Sciences, Facility Guidelines Institute, etc.).

(g) Supervisory Healthcare Engineers exercise the full range of supervisory and personnel management authorities and responsibilities in planning, directing and assessing work of subordinate staff comprised of advanced engineers, staff engineers and administrative support staff. They establish performance standards and evaluate overall performance of employees. They define competency requirements, identify developmental and training needs and take necessary actions to assure subordinate personnel maintain and enhance technical expertise. They formulate budget and staffing requirements in managing organizational changes and
ensuring multi-year and long-range national mission directives and program goals/objectives are met.

5. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade and/or assignment.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health in VHA Central Office prior to placement in the position.

c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement or when specific credentials are identified as necessary to meet minimum requirements, unless an exception is annotated in the qualification standard.

Authority: Pub. L. 111-163, Caregivers and Veterans Omnibus Health Services Act of 2010, 38 U.S.C. §§ 7401, Appointments in Veterans Health Administration; 7402, Qualifications of appointees; 7403, Period of appointments; promotions; 7405, Temporary full-time appointments, part-time appointments, and without-compensation appointments; 7407, Administrative provisions for section 7405 and 7406 appointments.]
[APPENDIX G73. HEALTH TECHNICIAN (HEARING INSTRUMENT SPECIALIST)
QUALIFICATION STANDARD

GS-0640

Veterans Health Administration

1. **COVERAGE.** The following are requirements for appointment or placement as a Health Technician (Hearing Instrument Specialist) (HIS) in the Veterans Health Administration (VHA). These requirements apply to all VHA Health Technician (HIS) in the General Schedule (GS)-0640 series. As members of the audiology service and hearing health care team, the Health Technician (HIS) possesses knowledge of basic ear anatomy and a broad knowledge of hearing aids and hearing assistive technology. The Health Technician (HIS) possesses the skills necessary to assist patients with concerns related to their hearing aids and/or hearing assistive technology, consistent with the treatment plan of the audiologist. This work may include the provision of a wide array of clinical rehabilitation services to support Veterans with disabilities reintegrate into community, employment and independent living.

2. **DEFINITIONS.**

   a. **Appointing Official.** The Human Resources Officer is delegated appointing authority, to process and authenticate notifications of personnel actions and authority to effect management approved employment actions on behalf of officials, employees and facilities for which service is provided.

   b. **Approving Official.** The Veterans Integrated Service Network (VISN) Director, facility Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

   c. **Journey Level.** The full performance level for this qualification standard is the GS-06 grade level.

   d. **Creditable Experience.** To be creditable, the experience must have required the use of knowledge, skills and abilities associated with current Health Technician (HIS) practice. Experience satisfying this requirement may be paid or non-paid employment as Health Technician (HIS) in the health care field.

   e. **Quality of Experience.** Qualifying experience must be at a level comparable to Health Technician (HIS) experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.
f. **Part-Time Experience.** Part-time experience is creditable according to its relationship to a full-time workweek. For example, an individual employed 20 hours per week, or on a half time basis, would receive one full-time work week of credit for each two weeks of service.

3. **BASIC REQUIREMENTS.** To qualify for appointment to this position, all applicants must possess the following:

a. **Citizenship.** Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

b. **Experience and Education.**

   (1) **Experience.** Completion of the Department of Labor Apprenticeship Program for Hearing Aid Specialists;

   OR

   (2) **Education.** Successful completion of two academic years above high school that includes coursework related to the field: hearing science, human anatomy and physiology, hearing instrument science, gerontology, psychology or other general healthcare areas.

   NOTE: There is no combination of education and experience which can be substituted for the basic requirements.

c. **Licensure or Registration.** Individuals must hold a full, current and unrestricted license or registration to practice as a HIS in a state, territory, commonwealth or the District of Columbia.

   (1) **Loss of Licensure or Registration.** A Health Technician (HIS) who fails to maintain the required licensure or registration must be removed from the occupation, which may also result in termination of employment.

d. **Board Certification.** Individuals must hold active board certification from the National Board for Certification in Hearing Instrument Sciences (NBC-HIS).

   (1) **Exception for Non-Board Certified Health Technician (HIS).**

      (a) Non-board certified applicants who otherwise meet the eligibility requirements for appointment, may be given a temporary appointment as a graduate Health Technician (HIS) under the authority of 38 U.S.C. § 7405(c)(2)(B).

      (b) Non-board certified individuals shall only provide care under the supervision of a licensed audiologist.
(c) Non-board certified individuals may only be appointed at the entry level and may not be promoted/converted until board certification is obtained.

(d) Temporary appointments of non-board certified Health Technician (HIS) may not be extended beyond two years or converted to a new temporary appointment.

(2) **Failure to Obtain Certification.** In all cases, Health Technician (HIS) must actively pursue meeting requirements for board certification starting from the date of their appointment. At the time of appointment, the supervisor will provide the Health Technician (HIS) with the written requirements for board certification, including the time (i.e., two years) by which the board certification must be obtained and the consequences for not becoming board certified by the deadline. Failure to obtain board certification during the two-year period may result in termination of employment.

(3) **Loss of Certification.** A Health Technician (HIS) who fails to maintain the required board certification must be removed from the occupation, which may also result in termination of employment.

e. **Foreign Education.** To be creditable, education completed outside the U.S. must be deemed at least equivalent to that gained in a conventional U.S. program by a private organization specializing in the interpretation of foreign educational credentials.

f. **Physical Requirements.** See VA Directive and Handbook 5019, Employee Occupational Health Service for requirements.

g. **English Language Proficiency.** Health Technician (HIS) candidates must be proficient in spoken and written English in accordance with 38 U.S.C. § 7403(f).

4. **GRADE DETERMINATIONS.** In addition to the basic requirements outlined in paragraph 3, the following criteria must be met when determining the grade of candidates.

a. **Health Technician (HIS), GS-05.**

   (1) **Experience.** None beyond the basic requirements.

   (2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

       (a) Knowledge of basic anatomy of the head and neck.

       (b) Knowledge of basic infection control procedures and guidelines.
(c) Skill in using basic computer software to complete tasks such as using email, creating spreadsheets and word processing.

(d) Ability to communicate orally and in writing.

(e) Ability to follow verbal and written instructions.

(f) Ability to maintain stock and supply level inventories.

(3) **Assignment.** Employees at this grade level serve in a Health Technician (HIS) entry level developmental position and work under the supervision and direction of a licensed audiologist. Assignments associated with this level include, but are not limited to: performing non-diagnostic otoscopy including proper bracing techniques and making appropriate referrals for abnormalities and cerumen management; rechecking air-conduction pure tone threshold testing to assist the audiologist in modifying the treatment plan during hearing aid repair appointments; providing patient care in hearing aid repair appointments, consistent with the audiologist’s treatment plan; completing visual and auditory checks with listening stethoscope of hearing aids prior to and following repair of device (troubleshoots performance); processing incoming devices from patients with concerns related to their hearing aids or hearing assistive technology; preparing and charging (if required) hearing aids and assistive devices for delivery; receiving devices and restoring settings of hearing aid/hearing assistive technology after repair or replacement from manufacturer, such as Denver Logistics Center (DLC); and maintaining proper levels of mailing/shipping supplies. The Health Technician (HIS) adheres to the audiology clinic policy and standard operating procedures for infection control and cleaning, sterilization and disposition of reusable medical equipment (RME). The Health Technician (HIS) completes documentation per medical center policy for timeliness for each episode of care and codes procedures as appropriate in the patient record in preparation for co-signature by the audiologist. The Health Technician (HIS) provides instruction to patients, family and staff on device topics including but not limited to hearing aid and hearing assistive technology care, maintenance, use and operation. The Health Technician (HIS) receives and completes incoming communications from Veterans (electronic and telephone), and facilitates follow-up based on audiologist’s treatment plan to include ordering supplies through DLC.

b. **Health Technician (HIS), GS-06.**

(1) **Experience.** One year of experience equivalent to the next lower grade.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:
(a) Knowledge of normal and abnormal ear anatomy.

(b) Knowledge of hearing aids, hearing assistive technology, hearing aid manufacturers and manufacturer software.

(c) Skill in documenting patient procedures and patient devices.

(d) Skill in providing patient education for hearing aid use, to include assisting patient with hearing aid insertion, removal and hygiene (cleaning and disinfection).

(e) Ability to provide patient education and training regarding hearing loss and communication strategies for various listening situations.

(f) Ability to solve problems or make decisions regarding hearing aids, hearing assistive technology and patient care that is consistent with the documented and co-signed plan of care under the supervision of an audiologist.

(g) Ability to prepare patient, equipment, and/or environment for audiology procedures.

(h) Ability to provide triage of patient telephone calls or audiology requests.

(3) Assignment. Employees at this level are at the full performance level and work under the supervision and direction of a licensed audiologist. Assignments associated with this level include, but are not limited to: completing visual and auditory checks of hearing aids and hearing assistive technology-including all hearing aid accessories, as well as, alerting devices (troubleshoots performance); registering, certifying and tracking prosthetic devices (hearing aids, hearing aid accessories and assistive devices); and assisting in set up and delivery of face-to-face and telehealth visits by preparing the equipment for patient evaluation and other audiology procedures, including, but not limited to daily biologic listening calibration of audiometric equipment and calibration of real-ear equipment. The Health Technician (HIS) fabricates earmold impressions with proper otoscopy, orders earmolds based on plan of care through prosthetics or DLC and fits and modifies earmolds, if necessary. The Health Technician (HIS) provides patient care in hearing aid repair appointments consistent with the audiologist's treatment plan and provides counselling including, but not limited to realistic expectations, communication strategies and/or aural rehabilitation. The Health Technician (HIS) maintains a comprehensive supply and equipment tracking systems to include: monitoring stock of RME and consumable items; ensuring proper inventory levels to complete the daily tasks;
prioritizing the acquisition of all supplies and equipment with regard to date of expiration; and may maintain a loaner hearing aid inventory. The Health Technician (HIS) assists patients with hearing aid connectivity including, but not limited to downloading applications (or apps), pairing devices in the app, Bluetooth® pairing and pairing hearing aid accessories. The Health Technician (HIS) assists patients through triaging phone calls and audiology requests with regards to priority and urgency following the audiologist’s plan of care.

5. DEVIATIONS.

   a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade and/or assignment.

   b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health in VHA Central Office prior to placement in the position.

   c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement or when specific credentials are identified as necessary to meet minimum requirements, unless an exception is annotated in the qualification standard.

Appendix G76. ADDICTION THERAPIST (BACHELOR’S LEVEL) AND ADDICTION THERAPIST (LICENSED MASTER’S) QUALIFICATION STANDARD, GS-0101

Veterans Health Administration

1. COVERAGE. The following are requirements for appointment or placement, as an Addiction Therapist (AT) in the Veterans Health Administration (VHA). These requirements apply to all VHA Addiction Therapists in the General Schedule (GS)-0101 series. Addiction Therapists, both Addiction Therapist (Bachelor’s Level) and Addiction Therapists (Licensed Master’s), work with individuals, couples, families and groups providing psychosocial treatment for substance use disorders (SUD) and addressing the effects of SUD on interpersonal relationships using individual, couples, families and group-oriented therapies. VHA Addiction Therapists (Bachelor’s Level and Licensed Master’s) can be assigned to VA Medical Centers, Community-Based Outpatient Clinics, Readjustment Counseling Service / Vet Centers, Veterans Integrated Service Network (VISN) offices and VHA Central Office.

2. DEFINITIONS.

   a. Addiction Therapy. Addiction therapy is a broad range of interventions for the treatment of SUD built on an understanding of, appreciation of, and ability to appropriately use the contributions of evidence-based addiction and behavioral health counseling models as they apply to modalities of care for individuals, groups, families and significant others. This includes using methods that are sensitive to the individual client characteristics and the influence of significant others, as well as the client’s cultural and social context.

   b. Addiction Therapist (Bachelor's Level) (AT). The AT level is designated for those who possess a bachelor’s degree and hold a state, territory, commonwealth or the District of Columbia’s (referred to throughout as the jurisdiction) highest-level recognition for practice (i.e., license or certification) in the field of Alcohol and Drug Treatment. ATs in this level assignment are dependent providers and perform work under guidance of Addiction Therapists (Licensed Master’s) in designated assignments. Although some jurisdictions may recognize ATs with a bachelor’s degree as an independent provider, VHA only recognizes a professional with possession of a bachelor’s degree as a dependent provider.

   c. Addiction Therapist (Licensed Master’s) (LMAT). The LMAT level is designated for AT's who possess a master’s degree and hold a state, territory, commonwealth or the District of Columbia’s highest-level recognition for independent practice (i.e., license or certification) in the field of Alcohol and Drug Treatment.
d. **Appointing Official.** The Human Resources (HR) Officer is delegated appointing authority to process and authenticate notifications of personnel actions and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

e. **Approving Official.** The VISN Director or Facility Director is the authorized approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

f. **Licensure and Certification.** The highest level of recognition in the field of Alcohol and Drug Treatment may be titled differently in each jurisdiction. For example, a state may title the highest-level of recognition in the field of Alcohol and Drug treatment as either “license” or “certification.” When “license/licensed,” “licensure,” “certified/certification,” or “non-licensed” is referenced throughout the appendix and sub appendices it is implied and intended to mean the certification or license granted by a jurisdiction depending on the highest level of recognition for professional ATs in the field of Alcohol and Drug Treatment. An individual in an AT or LMAT position must hold a state’s highest level of recognition for the specified level/position being filled in the field of Alcohol and Drug Treatment. The required license and certification must be full, current and unrestricted.

g. **Journey Level.** A full performance level is set in each sub-appendix for the AT and the LMAT. The full performance level for the AT is a GS-09 and the LMAT is GS-11.

h. **Clinical Supervision.** Clinical supervision is between an LMAT who is in a specified assignment and an entry level and/or unlicensed AT in which the entry level and/or unlicensed AT clinical work is reviewed. Work is reviewed to improve the AT’s work with clients; ensuring client welfare; supporting the AT in relation to their work and supporting the AT’s professional development. This includes co-signing clinical notes and supervising an individual as they are working towards licensure. Management officials should refer to the specific jurisdiction licensing regulations to determine the requirements for providing clinical supervision.

i. **Administrative Supervision.** Supervisory responsibilities include, but are not limited to, assigning and evaluating the work of subordinate staff; resolving complex problems to ensure Veteran services are met; evaluating performance and taking disciplinary action when necessary. The supervisor has full administrative and professional responsibility for planning and directing the work of others.

j. **State Approved Supervisor.** The requirements to become an approved supervisor vary by jurisdiction. Some jurisdictions have specific standards to allow LMATs to provide clinical supervision. An approved supervisor may clinically supervise ATs or unlicensed LMATs if permitted under their
jurisdiction’s licensing laws or regulations. Management officials will refer to specific jurisdiction's licensing regulations to determine the requirements for providing supervision. Specific assignments in the LMAT sub-appendix are designated.

k. **Program Coordinator.** The Program Coordinator is an LMAT who implements, directs and coordinates the work and functions of a SUD program. Depending on the structure of the service/facility, the program coordinator may work independently or report directly to the program manager who has overall responsibility for the program.

l. **Program Manager.** This is the organizational title for the supervisory LMAT who manages the overall SUD program. This role is often referred to as the SUD director.

m. **Creditable Experience.** To be creditable, the experience must have required the use of knowledge, skills, and abilities (KSAs) associated with current professional alcohol and drug counseling treatment practices. The experience also includes the ability to treat substance use disorders, including working with individuals, couples, families and/or groups. Experience satisfying this requirement must be active professional practice (post-degree), which is paid/non-paid employment as an alcohol and drug counselor, as defined by the appropriate state licensing or certifying boards.

n. **Quality of Experience.** Qualifying experience is only creditable if it is obtained following graduation for the specific level (bachelor’s degree or master’s degree) in alcohol and drug studies or comparable degree in a behavioral health field (i.e., social work, psychology, counseling) and includes work as an Alcohol and Drug Counselor directly related to the position to be filled. The experience must be comparable to AT/LMAT experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

o. **Part-Time Experience.** Part-time experience is creditable according to its relationship to a full-time workweek. For example, an individual employed 20 hours per week, or on a half-time basis, would receive one full-time work week of credit for every two weeks of service.
3. **BASIC REQUIREMENTS.** To qualify for appointment or placement to these occupational assignments, all applicants must possess the following:

a. **Citizenship.** Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

b. **Physical Standards.** See VA Directive and Handbook 5019, Employee Occupational Health Service for requirements.

c. **English Language Proficiency.** AT/LMAT candidates must be proficient in spoken and written English as required by 38 U.S.C. § 7403(f).

d. **Education.** AT and LMAT candidates must meet the education requirements defined in the specific sub-appendix for the position being filled.

e. **Foreign Education.** There is no substitution for foreign education for this occupation; therefore, foreign education evaluation is not applicable.

f. **Licensure/Certification.** Reference to “license,” “licensure,” “certification,” or “non-licensed” throughout the appendix and sub-appendices is implied and intended for different levels of certification and license granted by level in a United States state, territory, commonwealth, or the District of Columbia depending on the highest level of recognition for practice in the field of Alcohol and Drug Treatment in a jurisdiction based upon the specific level of degree obtained (bachelor’s degree or master’s degree). AT and LMAT candidates must meet the licensure requirements defined in the specific sub-appendix for the position being filled.

g. **Grandfathering Provision.**

h. All persons employed in VHA in this occupational series or another occupational series and performing the duties as described in the qualification standard on the effective date of this qualification standard are considered to have met all qualification requirements for the grade held, including positive education, credential or certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees in an occupation that does not require a licensure, certification or registration, may be reassigned, promoted or demoted within the occupation.

(2) Employees in an occupation that requires licensure, certification, or registration may be reassigned, promoted up to and including the full
performance level, or demoted within the occupation but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

(3) Employees in an occupation that require a licensure, certification or registration only at higher grade levels must meet the licensure, certification or registration requirement before being promoted to those higher grade levels.

(4) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(5) Employees initially grandfathered into this occupation who subsequently obtain additional education and/or licensure, certification, or registration that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

(6) Employees retained in an occupation listed in 38 U.S.C. § 7401(3) under this provision who leave that occupation or employment with the VA, lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation and/or VA.

4. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade and/or assignment.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health in VHA Central Office prior to placement in the position.

c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement or when specific credentials are identified as necessary to meet minimum requirements.

5. AUTHORITY:

b. 38 U.S.C. §§ 7401, Appointments in Veterans Health Administration;
c. 7402, Qualifications of appointees;
d. 7403, Period of appointments; promotions;
e. 7405, Temporary full-time appointments, part-time appointments, and without-compensation appointments; and
f. 7407, Administrative provisions for section 7405 and 7406 appointments.
APPENDIX A. ADDICTION THERAPIST (BACHELOR’S LEVEL)

1. BASIC REQUIREMENT. In addition to meeting the basic requirements outlined in Appendix G76, paragraph 3, Basic Requirements, the following additional requirements must also be met to qualify and hold a position as an AT:

   a. **Education.** Hold a bachelor’s degree in drug and alcohol studies or a related behavioral health field from an accredited college or university. In some jurisdictions, individuals may not be required to hold a bachelor’s degree to be licensed in Alcohol and Drug Treatment. VHA will not waive education requirements even if the candidate has a license that does not require a bachelor’s degree.

   b. **Licensure.**

      (1) **Licensure Requirements:** Individuals appointed or reassigned to an AT position in the GS-0101 series must:

          (a) Hold a full, current, and unrestricted license in a state, territory, commonwealth, or the District of Columbia to practice in the field of Alcohol and Drug Treatment; AND

          (b) Complete one of the following:

             i  International Certification and Reciprocity Consortium, Credential for Alcoholism and Substance Abuse Counselor Certification; or

             ii National Association for Alcoholism and Drug Abuse Counselors, National Certified Addiction Counselor Level 1.

      (2) **Loss of License or certification.** In collaboration with HR Office staff, management officials must immediately relieve employees of the duties and responsibilities associated with the occupation who fail to maintain the required licensure or certification, which may also result in separation from employment.

2. GRADE REQUIREMENTS AND DETERMINATIONS. In addition to the basic requirements outlined in paragraph 3 of Appendix G76 and paragraph 1 of this sub-appendix, the following criteria must be met when determining the qualification of candidates for the specified assignment:

   a. Addiction Therapist (Bachelor’s Level) GS-05.

      (1) **Experience.** The entry level assignment is used for ATs who are licensed with less than one year of experience. There is no experience outside of the basic requirements.
(2) **Knowledge, Skills and Abilities (KSAs).** None

(3) **Assignment.** Employees at this grade level serve in an entry-level developmental position. ATs in the entry-level assignment will receive close clinical supervision and guidance from an LMAT and meet weekly with an assigned clinical supervisor. Duties include, but are not limited to, assisting with intake/assessments, facilitating program orientation or educational sessions and treatment planning. ATs identify patients experiencing psychological distress and engage licensed clinicians as necessary to provide crisis intervention. They maintain appropriate records and chart accurate information. They develop and maintain appropriate communication, rapport and positive working relationship with various institutions, organizations and service providers.

b. **Addiction Therapist (Bachelor’s Level) GS-07.**

(1) **Experience.** In addition to the basic requirements, at least one year of creditable experience equivalent to the next lower grade; OR

(2) **Education (Advanced Entry Level Placement).** Applicants who meet the GS-05 grade level may be appointed at the GS-07 grade level if they possess a bachelor's degree from an accredited college or university in a major field of study in a drug and alcohol studies or a related behavioral health field with an exemplary academic record as demonstrated by:

   (a) 3.0 or higher out of a possible 4.0 ("B" or better) as recorded on their official transcript, or as computed based on four years of education or as computed based on courses completed during the final two years of the curriculum; OR

   (b) 3.5 or higher out of a possible 4.0 ("B+" or better) based on the average of the required courses completed in the major field or the required courses in the major field completed during the final two years of the curriculum; OR

   (c) Class Standing: Applicants must be in the upper third of the graduating class in the college, university or major subdivision based on completed courses.

(3) **Knowledge, Skills and Abilities (KSAs).** In addition to the experience/education requirements, the candidate must demonstrate the following KSAs.

   (a) Knowledge of principles, concepts and methods of counseling and therapies used in treatment of individuals with SUDs.
(b) Knowledge of appropriate documentation of substance use history and treatment.

(c) Ability to identify patients who are in psychological distress.

4. Assignment. ATs in this level assignment will receive clinical supervision and guidance from designated LMAT. ATs assist with addiction screening, assessments, orientation, education, treatment planning and counseling. They identify patients experiencing psychological distress and engage licensed clinicians as necessary to provide crisis intervention. ATs assist in developing an evaluation/summary of the client’s substance use and any co-occurring conditions based on the results of assessments to provide an integrated approach to treatment planning based on the client’s strengths, preferences and identified problems and needs. ATs participate with a multidisciplinary team regarding treatment planning. They communicate with a variety of institutions, organizations and service providers.

c. Addiction Therapist (Bachelor’s Level) GS-09.

1. Experience. One year of creditable experience equivalent to the next lower grade.

2. Knowledge, Skills and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Knowledge of coexisting medical or other mental health disorders as interrelated to SUDs.

(b) Ability to complete assessments of substance use disorders, treatment planning and continued care planning.

(c) Ability to develop and maintain effective working or therapeutic relationships with multidisciplinary staff, Veterans and their families, from various backgrounds and community resources to ensure appropriate referrals.

3. Assignment. This is the full performance-level assignment for ATs. Although the ATs are dependent providers and perform work under guidance of LMATs, ATs at this level perform intake/assessments using a biopsychosocial history which could include urine toxicology/breathalyzer data and/or collateral information. They provide case management and counseling on issues that involve substance use. ATs conduct and utilize designated measurement tools for baseline and follow-up care. They assist with the utilization of the assessment and in collaboration with the patient, create an individualized treatment plan and continuing care plans. ATs provide addiction-related psychoeducation for individuals/groups/couples.
and evidence-based psychosocial interventions. They provide crisis intervention to patients in psychological distress consistent with VA national policy and within the scope of practice to include engaging licensed mental health clinicians when clinically indicated. ATs are part of the treatment team that includes licensed independent practitioners that formulate plans during the continuum of care and, at discharge, and arrange referrals to agencies and organizations as needed.
APPENDIX B. ADDICTION THERAPIST (LICENSED MASTER’S)

1. BASIC REQUIREMENT. In addition to meeting the basic requirements outlined in Appendix G76, paragraph 3, Basic Requirements, the following additional requirements must also be met to qualify and hold a position as an LMAT:

   a. Education.

      (1) Hold a master’s degree or higher in drug and alcohol studies or related behavioral health field from an accredited college or university.

   b. Licensure. Individuals appointed or reassigned to an LMAT position must possess a full, current, and unrestricted license in a jurisdiction for independent practice in the field of Alcohol and Drug Treatment.

      (1) Exception. The Secretary or designee may waive the licensure requirement for selectees who are otherwise qualified, pending state acceptance of completion of state prerequisites at the master’s level. Licensures can be waived for three years from the date of employment. This exception is allowed on the condition that non-licensed LMATs appointed on this basis provide care only under the clinical supervision of an LMAT from the designated assignments to provide clinical supervision. Non-licensed LMAT applicants who otherwise meet the eligibility requirements may be appointed as LMATs under the authority of 38 U.S.C.§ 7401(3). This exception applies only at the GS-09 entry grade level and individuals may not be promoted/converted until they obtain the required license. For grades/assignments at or above the full performance level, candidates must be licensed at the master’s level.

      (2) Failure to Obtain Licensure. Prior to the time of appointment, HR Office staff will provide uncertified or unlicensed LMATs, the written requirement to obtain licensure, the date by which the license must be acquired and the consequences for not becoming licensed by the deadline. In all cases, LMATs must actively pursue meeting requirements for licensure starting from the date of their appointment. If LMATs fail to obtain licensure during this time period, their employment may be terminated.

      (3) Loss of License. In collaboration with HR Office staff, management officials must immediately relieve employees of the duties and responsibilities associated with the occupation who fail to maintain the required licensure or certification, which may also result in separation from employment.

2. GRADE REQUIREMENTS AND DETERMINATIONS. In addition to the basic requirements outlined in paragraph 1 of this sub-appendix and paragraph 3 of
Appendix G76, the following criteria must be met when determining the grade of the candidates:

c. Addiction Therapist (Licensed Master’s) GS-09.

(1) **Education, License and Experience.** The GS-09 grade level is the entry grade level for LMATs who have:

(a) Less than one year of experience post licensure; **OR,**

(b) LMATs at the master’s level who are graduates not yet licensed at the independent practice (Journey) level. Unlicensed LMATs at the GS-09 grade level must have completed the required education listed in paragraph 1.a. above and are working toward obtaining a full, current, and unrestricted license in a jurisdiction for independent practice in the field of Alcohol and Drug Treatment.

(2) **Knowledge, Skills and Abilities (KSAs).** In addition to the basic requirements, the candidate must demonstrate the following KSAs.

(a) Knowledge of coexisting medical or other mental health disorders and the interrelationship of SUDs.

(b) Knowledge of basic recovery programs and resources.

(c) Skill in providing individual and group therapy, including using certain SUD Evidenced-Based Therapy (EBTs).

(d) Skill in developing and maintaining effective working or therapeutic relationships with multidisciplinary staff, Veterans and their families, and community resources to ensure appropriate referrals.

(e) Ability to complete the assessment of substance use disorders, treatment/recovery planning and continuing care planning.

(f) Ability to identify patients who are in psychological distress consistent with VA national policy and within scope of certification and secure appropriate interventions.

(3) **Assignment.** Employees at this grade level serve in an entry-level developmental LMAT positions. At the entry-level, close clinical supervision is provided by higher-level LMATs. Duties may include but are not limited to counseling and providing psychoeducation, including EBT for individuals, groups, families and couples. Services are offered by LMATs either individually or as co-leader. LMATs assist in the caseload management of all patients in the program. LMATs assist in developing treatment plans (reviews and updates) and contribute to team decisions,
including the necessary determination of readiness for discharge. LMATs, at this level, assist in monitoring medication compliance as appropriate to assigned programs. They help maintain compliance with VA standards of care, accreditation bodies such as the Joint Commission, Commission on Accreditation of Rehabilitation Facilities, and other compliance agencies as appropriate to assigned programs and best practices of care (i.e., Opioid Treatment Program, Drug Enforcement Agency, Center for Substance Abuse Treatment and Substance Abuse Mental Health Service Administration). They conduct intake and needs assessments of Veterans with their significant others, extended family and others in the psychosocial network and support systems under supervision. LMATs ascertain the employment history and difficulties encountered in employment through assessment for vocational services planning to assist Veterans in meeting their vocational goals. LMATs use their knowledge of community-based resources to assist with recovery, including housing support. They review outside records as they become available and prepare correspondence related to the patient's rehabilitation, such as letters for courts, letters for an employer and other agencies upon the request of the patient. Under close supervision, LMATs may provide crisis intervention to patients in psychological distress. LMATs develop and maintain appropriate communication, rapport and positive working relationship with various institutions, organizations and service providers.

d. Addiction Therapist (Licensed Master's) GS-11.

(1) **Experience.** One year of creditable experience comparable to the next lower grade.

(2) **Licensure.** Candidates must possess a full, current and unrestricted license in a State for independent practice in the field of Alcohol and Drug Treatment.

(3) **NOTE:** Applicants who meet the qualifications requirements for an AT at the full performance level, who have a minimum of one year experience at that level and who have obtained the master's degree and license will be qualified at the GS-11 level.

(4) **Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill to independently complete assessments of substance use disorders, treatment planning and continued care planning.

(b) Skill to apply the principles, concepts and methods of counseling and therapies used in the treatment of individuals with SUDs.
(c) Skill to collaborate and consult on medical or other psychiatric disorders as interrelated to SUDs.

(d) Ability to apply various community-based recovery programs and resources in a treatment plan.

(5) **Assignment.** This assignment is the full performance level, for LMATs. At the full performance level LMATs independently provide addiction screening/assessments, orientation/education, treatment planning and counseling in person or via telehealth. They analyze problems and interpret and adapt guidelines such as policies, regulations, precedents, etc. for application to specific problems and recommend changes. LMATs provide evidenced-based practices in programming and recovery plan development. They provide psychoeducation for individuals, groups, families and couples either as leaders or co-leader. LMATs administer crisis intervention to patients in psychological distress handling emergencies within the scope of practice. They perform clinical supervision and oversight of patient care. They handle the coordination of treatment, and management of acute and chronic substance use and mental health issues. LMATs manage a caseload of patients with complex addictions, and mental and related physical problems. LMATs involve participants and their identified support systems in the treatment via education, treatment and planning. They develop a diagnostic evaluation/summary of the client’s substance abuse and coexisting conditions. LMATs utilize assessment and diagnostic evaluations to develop an individualized treatment plan; and incorporate assessments and psychological testing results from physical exams and urine toxicology data for use by a multidisciplinary treatment team to develop a treatment plan. They make recommendations to the treatment team regarding readiness for discharge. LMATs are part of the team that formulates discharge plans and arranges referrals to community agencies and organizations. They ascertain the employment history to include employment difficulties; and conduct an assessment for vocational services planning and housing support and provide community-based resources that assist with recovery. LMATs collaborate with other disciplines to compile data to ensure quality patient care and compliance with Joint Commission Standards and ensure current information is available.

e. **Addiction Therapist (Licensed Master's) Program Coordinator, GS-12.**

(1) **Experience and Licensure.** One year of creditable experience comparable to the next lower grade level. Some jurisdictions’ licenses do not license an individual to provide clinical supervision to trainees or unlicensed ATs. HR Staff will refer to specific jurisdiction’s licensing laws regarding the requirements for providing clinical supervision.
Knowledge, Skills and Abilities (KSAs). In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill in analyzing organizational issues to develop and implement solutions that result in the sound operation of a SUD program.

(b) Skill to effectively manage quality and productivity in the SUD program.

(c) Skill in program planning for the continual development of policies and procedures of a SUD program, including staff training.

Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Program coordinators implement, direct and coordinate the work and functions of SUD programs. Depending on the structure of the service/facility, program coordinators may work independently or report directly to the program manager who has overall responsibility for the program. Program coordinators are administratively responsible for a clinical SUD program (e.g., Residential Treatment, Intensive Outpatient Treatment, Opioid Replacement Therapy and Outpatient Treatment, etc.). They manage the programs daily operations and prepare reports and statistics for facility, VISN and national use. They orient and provide on-the-job training for new and current ATs/ LMATs within their program, ensuring all ATs/ LMATs training requirements are met. Program coordinators instruct and coordinate care with multidisciplinary staff. They may provide clinical supervision over unlicensed and licensed AT or LMAT trainees. They also may administratively manage any employees assigned to their program if the structure of the Department does not support a program manager level assignment.

f. Lead Addiction Therapist (Licensed Master’s) GS-12.

Experience and Licensure. One year of creditable experience equivalent to the next lower grade. HR Staff will refer to specific jurisdictions’ licensing laws regarding the requirements for providing clinical supervision. Some jurisdictions’ licenses require an additional credential (for example, State Approved Supervisor) to provide clinical supervision to trainees or unlicensed ATs.

Knowledge, Skills and Abilities (KSA). In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill in interpersonal relationships in dealing with employees, team leaders and managers.
(b) Ability to provide staff training and development.

(c) Ability to independently set priorities in order to meet multiple deadlines.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), variety and be performed by the incumbent at least 25% of the time. Lead LMATs report directly to SUD Directors. Lead LMATs assist with managing SUD treatment services of at least three AT staff. They provide recommendations to supervisors (SUD Director) of any clinical changes to policy and procedure. Lead LMATs communicate assignments with milestones, priorities, expected outcomes, deadlines and time frames for completing assignments. They make adjustments to assignments to distribute and balance workload and tasks among staff to accomplish the workload in accordance with the established priorities of the SUD Director or designee. Lead LMATs are experts in addiction therapy and are the points of contact to answer questions pertaining to the program providing consultation in the care and management of patients to other addiction therapists. They monitor and report on the status and progress of work completed for AT and LMAT staff to ensure the supervisors’ instructions on work priorities, methods, deadlines and quality have been met. They address program issues under review and problems to be resolved by providing advice on work methods, practices and procedures. Lead LMATs ensure AT and LMAT staff comply with clinical procedures, treatment goals and standards of practice. Lead LMATs provide leadership, direction, orientation, coaching, in-service training, staff development and continuing education programs for assigned social work staff. They assist in communicating the organizations’ strategic plan, mission, vision and values to the clinical staff and ensure integration into the work plans, products and services. Lead LMATs maintain reference materials, project files and documentation of policies, procedures and written instructions to ensure staff is kept up to date and well informed. Lead LMATs assist with the oversight of EBT provided by other LMATs. They analyze and provide oversight of core quality and performance improvement projects and reports. Leads participate actively in quality assurance programs within their facility, reporting accomplishments, issues within the program, need for resources, training, equipment and the status or completion of tasks to appropriate management. They assist SUD Directors or designees in collaborating with other disciplines in compiling data for quality management to ensure quality patient care and compliance with accreditation organizations and VA standards and ensure current information is available. Lead LMATs provide input to the SUD Director or designee on performance reviews for ATs and LMATs.
g. Supervisory Addiction Therapist (Licensed Master's) GS-13.

(1) **Experience and Licensure.** One year of creditable experience comparable to the next lower level. HR Office staff will refer to specific jurisdiction’s licensing laws regarding the requirements for providing clinical supervision. Some jurisdictions’ licenses do not license an individual to provide clinical supervision to trainees or unlicensed ATs.

(2) **Knowledge, Skills and Abilities (KSA).** In addition to meeting the experience above, the candidate must demonstrate the following KSAs:

(a) Knowledge of supervisory duties, including clinical supervision, consultation, negotiation with other departments and quality improvement.

(b) Skill in interpersonal relationships with individuals at various levels.

(c) Skill in managing budget and staff allocations in the facility.

(d) Ability to independently set priorities to meet multiple deadlines.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must be of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. Supervisory LMATs are the program managers and directors of SUD programs. They manage the overall daily operations of SUD programs and administrative supervision of staff within programs. They ensure compliance with accrediting body standards. SUD directors develop and implement program policies and procedures and serve as principal counselors to addiction staff at varying levels and assignments. SUD directors oversee the program budget and staffing requirements. They develop and implement program goal setting, design, conduct and report the result of research relevant to mental health as a body of knowledge. SUD directors monitor and make work assignments, complete performance reviews, resolve daily workplace issues and maintain efficient workflow (e.g., monitor and report on the status and progress of work completed for all AT and LMAT staff to ensure the supervisor’s instructions on work priorities, methods, deadlines and quality have been met). They interview candidates for positions, and recommend appointments, advancements, or disciplinary actions when appropriate. They develop functional statements and are responsible for the professional and administrative management of an assigned area. They assign personnel and serve as a mentor to help employees develop their full potential. SUD directors establish performance standards and evaluate the overall performance of employees; define competency requirements and identify
the developmental and training needs of their staff. They clinically supervise LMAT staff in crisis intervention, psychodiagnostic and management of mental health outpatients. Management officials should refer to specific state licensing/certification requirements regarding clinical supervision. SUD directors also serve as consultants for internal and external departments and treatment organizations.]
APPENDIX H1. PROCEDURES FOR APPOINTING PHYSICIANS TO SERVICE CHIEF AND COMPARABLE POSITIONS

1. SCOPE. This appendix covers appointments of physicians to service chief or comparable positions. (For information on comparable positions, see VA Handbook 5007, Pay Administration.) It does not apply to those in an “acting” capacity.

2. PROCEDURES

   a. The facility initiates recruitment and contacts the appropriate VA Central Office program office, which may recommend additional candidates for consideration.

   b. Candidates are screened, interviewed and tentatively selected at the facility.

   c. If the candidate is board certified in an appropriate specialty or specialties, the Chief of Staff or designee discusses the proposed selection with the appropriate VA Central Office program official who may provide comments or recommendations concerning the proposed selection within 5 working days. For candidates who are not board certified or who are certified in a specialty or specialties not appropriate to the proposed assignment, the Chief of Staff or designee will forward the candidate’s curriculum vitae, employment application and credentialing/privileging information to the Office of Patient Care Services (11), which will provide comments concerning the proposed selection within 15 working days.

   d. The Chief of Staff recommends a candidate to the facility Director (for new appointments the Director must consider the recommendation of the Professional Standards Board). The recommendation shall include any comments made by the VA Central Office program official.

   e. The facility obtains the concurrence of the Dean’s or Medical Advisory Committee, where appropriate.

   f. The facility Director approves or disapproves the appointment.

   g. The facility advises the program official and the Network Director that the selection has been approved.

NOTE 1: Special pay agreements must be approved in VA Central Office if the candidate’s total pay (basic, special pay and bonus or allowance) would exceed $190,000. See VA Directive and Handbook 5007.

NOTE 2: Communications with VA Central Office officials need not be in a formal written format.

NOTE 3: Facility officials are to maintain documentation regarding their recruitment process. This documentation is to include: (1) A summary of any comments from Department of Veterans Affairs Central Office program officials regarding the recommended candidate; and, (2) If the position is advertised and a non-citizen candidate is selected, the names of all citizen applicants and the reason(s) why the citizen applicants were not qualified for the position.
APPENDIX H2. PROCEDURES FOR APPOINTING DENTISTS AND EFDAs

1. SCOPE. This appendix covers appointments of dentists to position of Chief, Dental Service and comparable positions. It does not apply to those “acting” in such positions. It also covers the appointment of staff dentists and EFDAs (Expanded Function Dental Auxiliaries).

2. APPOINTMENT TO POSITION OF CHIEF, DENTAL SERVICE AND COMPARABLE POSITIONS

   a. The facility initiates recruitment and contacts the Office of Dentistry (112D) which may recommend additional candidates for the position. Vacancy announcements are to be accomplished by the facility. These announcements need to reach all potential VA candidates and allow employees the opportunity to be informed of, and compete for, vacancies.

   b. Candidates are screened, interviewed and tentatively selected at the facility.

   c. The Chief of Staff or designee discusses the proposed selection with the Office of Dentistry which has 5 working days to make comments or recommendations concerning the proposed selection.

   d. The Chief of Staff recommends a selection to the facility Director. Recommendations related to advancements and assignments shall include any comments made by the Office of Dentistry. New appointments must also consider the recommendations of the Dental Professional Standards Board.

   e. The facility obtains the concurrence of the Dean’s or Medical Advisory Committee, if appropriate.

   f. The facility Director approves or disapproves the appointment or assignment.

   g. The Office of Dentistry and the network directors are notified.

3. APPOINTMENT TO STAFF DENTIST POSITIONS

   a. The facility initiates recruitment and contacts the Office of Dentistry (112D), which may recommend additional candidates for the position. Vacancy announcements are to be accomplished by the facility. These announcements need to reach all potential VA candidates and allow employees the opportunity to be informed of and compete for vacancies.

   b. On notification of a dentist vacancy by a facility, the VA Health Care Staff Development and Retention Office will forward to the facility HRMO the applications and related materials of qualified candidates who have indicated availability for that facility or geographical area.

   c. Candidates are screened, interviewed and tentatively selected at the facility.

   d. The Chief of Dental Service or designee is to discuss the proposed selection with the Office of Dentistry, which has 5 working days to make comments or recommendations concerning the proposed selection.
e. The recommendation is forwarded through channels to the facility Director for consideration. (For new appointments, the Director must consider the recommendation of a Dental Professional Standards Board). The recommending official shall include any comments made by the Office of Dentistry.

f. The facility obtains the concurrence of the Dean’s or Medical Advisory Committee, if appropriate.

g. The facility Director approves or disapproves the appointment or assignment.

h. The facility advises the Office of Dentistry of the selection.

4. APPOINTMENT OF EFDAS

a. When an EFDA vacancy occurs, the facility initiates recruitment and contacts the Office of Dentistry, which may recommend additional candidates for the position.

b. The service Chief screens, interviews and tentatively selects a candidate.

c. A recommendation is forwarded through channels to the facility Director (for new appointments the facility Director must consider the recommendation of the Dentist Professional Standards Board).

d. The facility Director approves or disapproves the appointment or assignment.

e. The facility advises the Office of Dentistry of the selection.

5. PROFESSIONAL STANDARDS BOARDS

a. Facility directors are to establish Dental Professional Standards Boards for the purpose of making recommendations on advancements. Any facility with the appropriate number of professionals may form a Board.

b. Facilities unable to constitute a Board are to make arrangements to have their board actions reviewed at another location.

NOTE 1: Facility communications with the Office of Dentistry in Central Office need not be in a formal written format.

NOTE 2: Facility officials are to maintain documentation regarding the process of recruiting dentists and EFDAs. This documentation is to include:
• A summary of any comments from Central Office program officials regarding the recommended candidate; and

• If the position is advertised and a noncitizen candidate is selected, the names of all citizen applicants and the reason(s) why the citizen applicants were not qualified for the position.
APPENDIX H3. PROCEDURES FOR APPOINTING PODIATRISTS

1. SCOPE. This appendix establishes the procedures for the appointment of all podiatrists in VHA.

2. PROCEDURES

   a. The facility initiates recruitment and contacts the Director of Podiatry Service who may recommend additional candidates for the position.

   b. The appropriate official screens, interviews, and tentatively selects a candidate for the position.

   c. If the proposed selection does not require a board action, the Chief of Staff or designee discusses the proposed selection with the Director of Podiatry who has 5 working days to make comments or recommendations concerning the proposed selection.

   d. The recommendation is forwarded through channels to the facility Director for consideration. Recommendations are to include the comments of the Director of Podiatry Service. New appointments require referral to the Podiatry Professional Standards Board for review.

   e. The facility obtains the concurrence of the Dean’s or Medical Advisory Committee, if appropriate.

   f. The facility Director approves or disapproves the appointment or assignment.

   g. The facility advises the Director of Podiatry Service of the selection.

NOTE 1: The Director of Podiatry Service and the Podiatry Professional Standards Board may be contacted through the VA Medical Center, Cleveland, OH. Communications should be directed to:

Director, VA Podiatry Service(112 (W))
VA Medical Center
Wade Park Division
10701 East Blvd
Cleveland, OH  44106
Telephone:  216-231-3286
Fax:  216-231-3446

NOTE 2: Facility communications with VA Podiatry Service officials need not be in a formal written format.

NOTE 3: Facility officials are to maintain documentation regarding their recruitment process. This documentation will include:

- A summary of any comments from Central Office program officials regarding the recommended candidate; and
• If the position is advertised and a noncitizen candidate is selected, the names of all citizen applicants and the reason(s) why the citizen applicants were not qualified for the position.

**NOTE 4:** Submissions to the Podiatry Professional Standards Board shall include the application form, curriculum vitae, and proof of current licensure and registration, board certification, faculty appointment, and residency training.

**NOTE 5:** The Human Resources Management Officer, VA Medical Center, Cleveland, OH, or designee, shall serve as the technical representative to the Podiatry Professional Standards Board.
APPENDIX H4. PROCEDURES FOR APPOINTING OPTOMETRISTS

1. SCOPE. This appendix establishes the procedures for the appointment of all optometrists in VHA.

2. PROCEDURES

   a. The facility initiates recruitment and contacts the Director of Optometry Service who may recommend additional candidates for the position.

   b. The appropriate official screens, interviews, and tentatively selects a candidate for the position.

   c. If the proposed selection does not require a board action, the Chief of Staff or designee discusses the proposed selection with the Director of Optometry who has 5 working days to make comments or recommendations concerning the proposed selection.

   d. The recommendation is forwarded through channels (including the Dean’s or Medical Advisory Committee, where appropriate) to the facility Director for consideration. Recommendations are to include the comments of the Director of Optometry Service. New appointments require referral to the [VA Central Office] Optometry Professional Standards Board for review.

   e. The facility Director approves or disapproves the appointment or assignment.

   f. The facility advises the Director of Optometry Service of the selection.

NOTE 1: The Director of Optometry Service and the [VA Central Office] Optometry Professional Standards Board may be contacted [at and c]ommunications should be directed to:

[Director, VA Optometry Service (111E1)
Veterans Health Administration
103 South Gay Street
Room 714
Baltimore, MD 21202-4061
Telephone: 1-410-779-1576
Fax: 1-410-779-1581]

NOTE 2: Facility communications with VA [Central Office] Optometry Service[program] officials need not be in a formal written format [for selection of an optometrist that does not require a board action].

NOTE 3: Facility officials are to maintain documentation regarding their recruitment process. This documentation will include:

• A summary of any comments from [VA] Central Office [Optometry Service] program officials regarding the recommended candidate; and

• If the position is advertised and a noncitizen candidate is selected, the names of all citizen applicants and the reason(s) why the citizen applicants were not qualified for the position.
NOTE 4: Submissions to the VA Central Office Optometry Professional Standards Board for initial appointment shall include a cover letter with grade and step request information; type of appointment such as full-time permanent probationary, full-time temporary, or part-time; Application for Physicians, Dentists, Podiatrists, and Optometrists (VA Form 10-2850); curriculum vitae; evidence of current licensure; faculty appointment; proposed clinical privileges; evidence of successful completion of National Board of Examiners in Optometry examinations and Accreditation Council on Optometric Education residency; and Human Resources point of contact. An Optometry Professional Standards Board checklist to assist with this process can be accessed at the following Office of Human Resources Management [and Labor Relations] Web site link: http://vaww1.va.gov/ohrm/Staffing/Title38Appts.htm.

NOTE 5: The Human Resources Management Officer, VA Maryland Healthcare System, or designee, shall serve as the technical representative to the VA Central Office Optometry Professional Standards Board.

NOTE 6: Information concerning promotion of optometrists can be found in part III, appendix M, this handbook.

NOTE 7: Additional program information covering optometrists can be obtained through the Director of Optometry Service or the VHA Optometry Service website via the following link: http://vaww1.va.gov/optometry/.
APPENDIX H5. RECRUITMENT, APPOINTMENT, ADVANCEMENT,
CHANGE IN ASSIGNMENT AND REASSIGNMENT OF REGISTERED NURSES (RNS)
IN GRADES IV AND V

1. SCOPE. This appendix covers recruitment, appointments, advancements, changes in assignment, and reassignments of RNs in Nurse IV and Nurse V. This includes facility Nurse Executives (i.e., Chiefs of Nursing Service, Associate Directors for Nursing or Associate Directors for Patient Care Services), and other key nursing personnel (i.e., RNs in Nurse IV or above who are not Nurse Executives). This appendix does not apply to nurse anesthetists, RNs “acting” in positions that would otherwise be covered by this appendix, and personnel other than RNs in Associate Director for Patient Care Services positions.

2. RECRUITMENT, APPOINTMENT, ADVANCEMENT, CHANGE IN ASSIGNMENT AND REASSIGNMENT OF KEY NURSING PERSONNEL

   a. Recruitment for Nurse Executives. The following actions must be taken when Nurse Executive positions are being filled.

      (1) Establish Search Committee. Search committee responsibilities might include assessing the facility’s needs, identifying job related skill(s) which need to be emphasized in the selection process (e.g., organizational leadership, management skills, education/staff development, resource utilization, quality management, expertise in a specific nursing discipline, research, exceptional labor-management relations skills), identifying recruitment sources, and screening applicants.

      (2) Notify VHA Central Office. Notify VHA Central Office [(108)] of the vacancy, of any skills to be emphasized in evaluating candidates, and of the proposed closing date of the announcement. VHA Central Office will announce the position and its location, the skills to be emphasized, if any, the closing date, and required materials (curriculum vitae and last two proficiency reports or equivalent) in the Weekly Summary Bulletin. The announcement will also include a statement that applicants should apply directly to the employing facility.

      NOTE: Closing dates should be far enough in advance to conduct a comprehensive recruitment effort and give applicants sufficient time to submit required material to the facility.

   b. Recruitment for Key Nursing Positions Other than Nurse Executive. When positions other than Nurse Executive are being filled, the actions in subparagraphs 2a(1) and (2) must be taken when local officials determine that a formal recruitment effort is necessary.

      NOTE: Local officials may decide that in order to fill certain key nursing positions (other than Nurse Executive) it is not necessary to establish a search committee.

   c. Appointment To Nurse IV or V

      (1) After the recruitment process has been completed, the Human Resources Management Officer (HRMO), or designee, will evaluate all applicants against minimum qualification requirements and
forward applications of all qualified applicants to the Search Committee or other group designated to review the applications.

(2) The Search Committee, or other group, will rate applicants “Qualified” or “Highly Qualified” and forward all applications to the approving official for a tentative selection.

(3) The approving official will forward the tentative selection to the appropriate Nurse Professional Standards Board (NPSB). The NPSB will review the scope of the position and the candidate’s qualifications to determine if assignment of Nurse IV or V is warranted and will make a recommendation to the approving official.

NOTE: Except as specified in subparagraph 3a of this appendix, VA Central Office NPSB is appropriate for VA Central Office employees, Veterans Integrated Service Network (VISN) staff, and on all appointments to Nurse Executive and Nurse V positions. The NPSB for the VISN (see paragraph 4) acts on other appointments to Nurse IV 

(4) The facility Director or designee [approves or disapproves] the selection. All candidates will be advised of their selection or non-selection for the position.

d. Promotions to Nurse IV or Nurse V

(1) The recommending official forwards the proposed functional description, employee’s curriculum vitae and the latest two proficiency reports (or their equivalent) to the appropriate NPSB for review.

NOTE: VHA Central Office NPSB is appropriate for VHA Central Office employees, VISN staff, all Nurse Executives, Nurse V positions. All other promotions and advancements to or within Nurse IV 

(2) The NPSB reviews the employee’s qualifications and the scope of the position to determine whether the proposed grade is warranted and makes a recommendation regarding the employee’s promotion to the approving official (facility Director or designee).

(3) The approving official approves or disapproves the promotion [of all Nurse IV and Nurse V positions except Nurse Executive positions. The approving official or designee will process the recommended action for promotion of the Nurse Executive through the Executive Resources Board (ERB) for approval].

[ ]

e. [Reassignments and Changes in Assignment]

NOTE: A reassignment is a change from one position to another. A change in assignment is a change in the duties and responsibilities of a specific position.
(1) **Reassignment.** If a nurse is reassigned and the reassignment does not involve a change in grade, an NPSB review and recommendation are not required. If a change in grade is involved, the procedures in paragraph 2d will be used.

(2) **Change in Assignment.** If the duties and responsibilities of a position are significantly changed, the procedures in paragraph 2d will be used to determine whether the employee should be advanced to a higher grade. Minor changes in duties and responsibilities may be accomplished by revising or amending the employee’s functional statement.

**[NOTE: The VA Central Office NPSB is appropriate for review of consideration in reduction in grade for all Nurse IV and Nurse V positions.]**

3. **APPOINTMENT, ADVANCEMENT, REASSIGNMENT, AND CHANGE IN ASSIGNMENT OF NURSE EXECUTIVES.** Procedures for the recruitment, appointment, advancement, change in assignment and reassignment of Nurse Executives are the same as in paragraph 2. However, when a selection is made for one of these positions, facility officials will notify the appropriate Network Director and the Office of Nursing Services (108) in VA Central Office.

4. **NPSBs FOR VISNs**

   a. **[VISN Board Membership.** The Office of Nursing Services (ONS) will appoint one Nurse Executive from the designated facilities in the covered VISN’s to serve as the VISN NPSB Chairperson. The VISN NPSB Chair will designate members from Nurse IVs and Vs at facilities serviced by the VISN NPSB to serve as board members.]

   b. **[Technical Advisor.** The technical advisor to the VISN NPSB will be the HRMO, or designee, at the facility where the Chairperson is assigned].

   c. **[VISN NPSB Assignments.] Each VISN is assigned to an NPSB as follows:

      (1) VISNs 1, 2, 3
      (2) VISNs 4, 5, 6
      (3) VISNs 7, 8, 9
      (4) VISNs 10, 11, 12, 13, 14
      (5) VISNs 15, 19
      (6) VISNs 16, 17, 18
      (7) VISNs 20, 21
      (8) VISN 22
5. REQUIRED DOCUMENTATION

a. With each request for action, the requesting facility will forward to the servicing NPSB the following items:

(1) A memorandum from the recommending official supporting the action and indicating a proposed effective date;

(2) VA Form 10-2543, Board Action, with items 1, 2, 3, and 5 on the front side completed. Item 5 should document the candidate’s educational preparation, the dates of and adjectival ratings for the latest three proficiency reports, a summary of professional experience, and expiration date of the candidate’s license; and

(3) Copies of the last two proficiency reports, plus any other significant documentation concerning the nurse’s performance.

b. Additional documentation which individual NPSBs might require should be kept to a minimum.

6. VHA CENTRAL OFFICE MAINTENANCE OF BOARD ACTION FOLDERS. The [Office of Nursing Services (108)] does not maintain board action folders for actions covered by this appendix.

7. CRITERIA FOR GRADING NURSE LEADERSHIP POSITIONS AT NURSE IV AND NURSE V

a. Assignment of the Nurse IV and Nurse V grade levels is based on the complexity and responsibility of the assignment and the individual’s qualifications. See VA Handbook 5007, Part II, Chapter 2, paragraph 1a(7), and VA Handbook 5005, Part III, Chapter 4, Section A, paragraph 1f(1)(b). Key nursing personnel are assigned to Nurse IV or Nurse V if the scope and complexity of their assignment is comparable to the scope and complexity of a facility Nurse Executive.

b. The VA Central Office (VACO) NPSB will review and make recommendations on all appointments and advancements to Nurse Executive positions, Veterans Integrated Service Network and VA Central Office positions at either Nurse IV or Nurse V. The VACO NPSB will also act on all other Nurse V positions. Recommendations of the VACO NPSB are approved by the Chief Nursing Officer or designee. All other appointments and advancements to Nurse IV are based on recommendations of the VISN NPSB and are approved by the facility Director.

c. Criteria for determining whether the complexity of an assignment warrants placement at the Nurse IV and Nurse V grades are outlined in paragraph 8 below.
8. COMPLEXITY OF ASSIGNMENT REQUIRED FOR PLACEMENT AT NURSE IV AND NURSE V

a. General. Registered nurses are appointed and promoted to Nurse IV and Nurse V based on the scope and complexity of their assignment and qualifications. Assignments of Nurse IV and Nurse V grades are position-specific. This appendix provides guidance for determining whether facility, VISN or Central Office registered nurse positions meet the criteria for placement at Nurse IV or Nurse V.

b. Nurse Executive Positions. The term “Nurse Executive” refers to the top nursing management position at a VHA healthcare facility/system. Nurse Executives are members of the senior management team. The organizational title of the Nurse Executive position will vary (e.g.: Chief Nurse, Nurse Executive, Associate Director for Nursing Services, Associate Director for Patient Care Services) but must be consistent with senior management titles recognized by VA Central Office. Appointment or advancement to a Nurse Executive position is based on the complexity of the position and the recommendation of the Central Office NPSB (see paragraph 2 above). Generally, Nurse Executives are appointed at the Nurse V grade, however they may be appointed at the Nurse IV grade in positions with responsibility for programs that are less comprehensive and less complex.

c. Key Nursing Personnel

(1) Comparability to Nurse Executive Positions. VA policy provides that registered nurses in assignments other than Nurse Executive may be appointed or advanced to Nurse IV or V if the scope and responsibility of their assignment is comparable to a Nurse Executive position. The Scope and Complexity Criteria Table in paragraph 9 of this appendix will be used to determine the appropriate grade for key nursing positions.

(2) Establishing Positions. The facility, VISN or VACO Program Office should establish a formal process for approving the design and implementation of such positions. Responsibilities in new positions should not duplicate or otherwise reduce responsibilities of other positions if the grades of those other positions are based the responsibilities involved.

(3) Key Nursing Assignments Warranting Nurse IV or Nurse V. Positions at these grades are typically located in organizational settings where there is a high rate of activity and a broad mission involving a full range of complex programs and/or services. Program responsibility includes full responsibility for program design, integrating the program with other related programs and organizational goals, monitoring, as well as responsibility for evaluating and administering the program. Positions at Nurse IV and V grades also have full accountability for program outcomes.
(a) Examples of Nurse IV Positions

1. Managers for Service Lines;

2. Positions in VISN offices that have broad program responsibility for a single program that covers all facilities within the network; and

3. Positions at facilities with full program responsibilities that meet criteria listed in the Scope and Complexity Criteria Table in paragraph 9 of this appendix.

(b) Examples of Nurse V Positions

1. VISN positions with broad program responsibility for multiple programs covering all facilities within the network;

2. Positions with substantial sphere of influence across multiple sites or programs and across the full continuum of care;

3. Positions with substantial involvement in multi-site, regional, and/or national professional and health related issues; and

4. Positions at tertiary facilities that have full program responsibility for more than one of the following programs: clinical, education, research, or quality management.

(4) Consideration Procedures. Nurse Executives and facility Directors must initially determine that a position meets the scope and complexity requirements before an individual can be considered for appointment or promotion by the appropriate NPSB. Procedures for such determinations and employee consideration are outlined in VA Handbook 5005, Part III, chapter 4, paragraph 6f(3). Nurses must have demonstrated mastery of the High Performance Development Model Core Competencies and must also demonstrate a potential for performance at the Nurse IV/V grades of the Nurse Qualification Standards.

d. Vacancies and Reassignments. Since the Nurse IV and Nurse V grades are based on a combination of assignment characteristics and individual qualifications, the placement of individuals in vacated positions at these grades is to be based on the recommendation of the appropriate NPSB. Positions of individuals at the Nurse IV or Nurse V grade should not be significantly modified, nor should individuals in these positions be assigned to other positions or duties, which may not warrant Nurse IV or Nurse V without having the action reviewed by the appropriate NPSB.

NOTE: VISN offices may be organized in a manner that warrants more than 1 Nurse V position, and may have up to four Nurse IV positions. Although uncommon, highly complex facilities may also be organized in a manner that warrants a Nurse V position, in addition to the Nurse Executive position, and may have up to six Nurse IV positions.
9. SCOPE AND COMPLEXITY CRITERIA TABLE FOR KEY NURSING PERSONNEL AT NURSE IV AND NURSE V

<table>
<thead>
<tr>
<th>CRITERIA</th>
<th>NURSE IV</th>
<th>NURSE V</th>

APPENDIX H6. PROCEEDURES FOR APPOINTING NURSE ANESTHETISTS TO SECTION CHIEF POSITIONS

1. SCOPE. This appendix covers the appointment of nurse anesthetists as Chief of the Nurse Anesthesiology Section. It does not apply to those in an “acting” capacity.

2. PROCEDURES

   a. When a position becomes vacant, the facility will initiate recruitment (where appropriate) and contact the Deputy Director for Nurse Anesthetists, VA Anesthesiology Service, who may recommend additional candidates for consideration.

   b. Candidates are screened, interviewed and tentatively selected by the appropriate facility official.

   c. The Chief of Staff or designee is to discuss the proposed selection with the Deputy Director for Nurse Anesthetists who has 5 working days to make comments or recommendations concerning the proposed selection.

   d. The recommendation is forwarded through channels to the facility Director for consideration. Recommendations are to include the comments of the Deputy Director for Nurse Anesthetists. New appointments require referral to the Physician Professional Standards Board for review.

NOTE 1: The Deputy Director for Nurse Anesthetists is currently located at the VA Medical Center, Augusta, GA, and may be contacted as follows:

Deputy Director for Nurse Anesthetists
VA Anesthesiology Service (222)
VA Medical Center
Augusta, GA 30904
Phone: (706) 733-0188, ext. 2666
Fax: (706) 823-1752

NOTE 2: Communications with program officials need not be in a formal written format.

NOTE 3: Facility officials are to maintain documentation regarding their recruitment process. Documentation will include:

- A summary of any comments from Central Office program officials regarding the recommended candidate; and

- If the position is advertised and a noncitizen candidate is selected, the names of all citizen applicants and the reason(s) why the citizen applicants were not qualified for the position.
APPENDIX H7. PROCEDURES FOR APPOINTING PHYSICIAN ASSISTANTS (PAs) at CHIEF GRADE

1. If appropriate, local recruitment efforts are initiated.

2. Once a candidate is identified, the recommendation is sent through the appropriate Physician Assistant Professional Standards Board to the facility Director for approval or disapproval.

NOTE: Any movement to another assignment requires a determination that the new assignment warrants Chief grade. Such determinations shall consider the recommendation of the appropriate Physician Assistant Professional Standards Board.
APPENDIX H8. PROCEDURES FOR APPOINTING
CHIEFS OF PHARMACY SERVICE (ALL GRADES),
CLINICAL PHARMACISTS/PHARMACY SPECIALISTS, AND PROGRAM SPECIALISTS
AT GRADES GS-13 AND ABOVE

1. SCOPE. This appendix covers appointment of all Chiefs of Pharmacy Service, as well as clinical pharmacists/pharmacy specialists and program specialists in grades GS-13 and above. It does not apply to those in any of these positions in an “acting” capacity.

2. PROCEDURES

   a. Clinical Pharmacists/Pharmacy Specialists and Program Specialists (GS-13 and GS-14)

      (1) Local recruitment efforts are initiated.

      (2) Candidates are interviewed and credentialed, as appropriate.

      (3) Service chief forwards the recommended candidate through channels to the facility Director for consideration. For new appointments, the facility Director must consider the recommendation of the local or VISN Standards Board.

      (4) The facility Director approves or disapproves the action.

   b. Chiefs of Pharmacy Service

      (1) Recruitment efforts are initiated. As a minimum, this must include posting the vacancy in the Weekly Summary Bulletin and contacting Central Office program officials who may recommend additional candidates for the position.

      (2) Candidates submit applications (including responses to the knowledges, skills, abilities and other characteristics contained in the Weekly Summary Bulletin) to the local facility. Candidates are interviewed, screened and tentatively selected at the facility.

      (3) The Chief of Staff or designee discusses the proposed selection with Pharmacy Benefits Management Strategic Health Group (119), which has 5 working days to comment or make recommendations concerning the proposed selection.

      (4) The appropriate facility official recommends the selection to the facility Director. New appointments at the GS-12 through GS-14 level must include the recommendation of the VISN Pharmacy Professional Standards Board and any comments made by the Pharmacy Benefits Management Strategic Health Group. New appointments at the GS-15 level are to include the recommendations of the [National] Pharmacy Professional Standards Board.

      (5) The facility Director approves or disapproves the action.
(6) The facility notifies the Pharmacy Benefits Management Strategic Health Group and the Network Director of the selection.
APPENDIX H9. PROCEDURES FOR APPOINTING OCCUPATIONAL AND PHYSICAL THERAPISTS AS SECTION CHIEF

1. SCOPE. This appendix covers the appointment of occupational and physical therapists to section chief positions. It does not apply to those in an acting capacity.

2. PROCEDURES

   a. Local recruitment efforts are initiated by the facility.

   b. The service chief or equivalent screens and interviews candidates.

   c. The service chief or equivalent forwards the recommended candidate through channels to the facility Director for consideration. For new appointments, the facility Director shall consider the recommendation of the VISN Professional Standards Board.

   d. The facility Director approves or disapproves the action.

NOTE: Material submitted to the VISN Professional Standards Board shall include, for appointments, an application form and/or curriculum vitae and evidence of current licensure or certification.
APPENDIX H10. PROCEDURES FOR APPOINTING AND ADVANCING DOCTORS OF CHIROPRACTIC

SCOPE. This appendix establishes procedures for the appointment and advancement of all doctors of chiropractic in VHA.

1. APPOINTMENT PROCEDURES

   a. The facility initiates recruitment procedures [and contacts the VHA Director of Chiropractic Service, who may recommend additional candidates for the position.]

   b. The appropriate facility officials screen, interview, and tentatively select a candidate for the position.

   c. [If the proposed selection does not require a board action, the facility Chief of Staff or designee discusses the proposed selection with the VHA Director of Chiropractic Service who has 5 working days to make comments or recommendations concerning the proposed selection.

   d. If a board action is required, the recommendation is forwarded to the facility Director for consideration. Recommendations are to include the comments of the VHA Director of Chiropractic Service. New appointments require an application package and a board action request to be sent through the VISN Office to the VA Central Office Chiropractor Professional Standards Board for review. This Board] will evaluate qualifications and recommend a grade level [and step rate for new appointments] based on the VA qualifications standard for doctors of chiropractic.

   [e. After consideration by the Board, a recommendation will be recorded on the board action form, which will be returned to the facility along with the board action package. The facility Director will approve or disapprove the recommendation for appointment.

   f. The facility advises the VHA Director of Chiropractic Service of the selection.

NOTE 1: The Director of Chiropractic Service may be contacted through the VA Connecticut Healthcare System as follows:

Director, VHA Chiropractic Service
VA Connecticut Healthcare System
950 Campbell Avenue
Mail Stop 111D
West Haven, CT 06516]

NOTE [2]: Submissions to the VA Central Office Chiropractor Professional Standards Board shall include the application form, proof of current licensure, specialty board certification, faculty appointment if any, residency training if any, and proposed clinical privileges for the proposed selectee.
The VA Central Office Chiropractor Professional Standards Board may be contacted through Rehabilitation Services as follows:

Rehabilitation Services (10P4R)
Department of Veterans Affairs
810 Vermont Avenue NW
Washington, DC 20420

NOTE 3: The facility must maintain documentation regarding the recruitment process that was used to solicit applications. This documentation will include:

- A summary of any comments from VHA Central Office Director of Chiropractic Service regarding the recommended candidate;
- Copies of any paid advertisement that may have been done; and
- If the position is advertised and a noncitizen candidate is selected, the names of all citizen applicants and the reason(s) why the citizen applicants were not qualified for the position.

NOTE 4: Additional program information covering chiropractors may be obtained through the Director of Chiropractic Service or the VHA Chiropractic Service.

2. ADVANCEMENT PROCEDURES

   a. Chiropractors who are eligible for promotion consideration will be submitted to the VA Central Office Chiropractor Professional Standards Board for review.

   b. Facility recommendations for Chiropractors to receive special advancements for performance or special advancements for achievement will be reviewed by the VA Central Office Chiropractor Professional Standards Board. Guidance for special advancements can be found in VA Handbook 5017, Employee Recognition and Awards.

   c. Board action packages and supporting documentation (current proficiency report and board action folder) will be prepared and sent by the facility Director through the VISN office to the VA Central Office Chiropractor Professional Standards Board. Detailed justifications must accompany requests for special advancements. Board action packages and supporting documentation will be addressed to [Rehabilitation Services (10P4R)].

   d. After consideration by the Board, a recommendation will be recorded on the board action form, which will be returned to the facility along with the board action package. The facility Director will approve or disapprove the recommendation for promotion or advancement.
APPENDIX I. ENGLISH LANGUAGE PROFICIENCY

1. GENERAL

- No person will be appointed under authority of 38 U.S.C. chapter 73 or 74, to serve in a direct patient-care capacity in VHA who is not proficient in written and spoken English. This includes all full-time, part-time, intermittent, without compensation, consultant, attending, and on-facility fee-basis appointments.

- The facility Director is responsible for identifying all positions involving direct patient-care responsibilities and for determining which applicants are proficient in English. The Director may delegate responsibility for carrying out the administrative functions required to make the language proficiency determinations to the HRM Officer or designee.

- When a VA facility serves a substantial number of veterans with limited English-speaking ability, the Director must ensure the identification of sufficient numbers of staff members who are fluent in both the language most appropriate to these veterans and in English.

- The General Counsel has determined that, in making language proficiency determinations and assessments, the Uniform Guidelines on Employee Selection Procedures (41 CFR 60-3) do not apply. However, the facility Director should try to minimize, if possible, any disproportionate adverse impact on members of groups whose primary and native written and spoken language is not English.

2. DEFINITIONS

- **Required English Language Proficiency.** Ability to communicate in spoken and written English with patients and other health care personnel with sufficient fluency to satisfactorily carry out assigned responsibilities.

- **Direct Patient-Care Capacity.** Face-to-face contacts with a patient for the purpose of providing care, diagnosis, counseling, or treatment. This does not include personnel in nondirect patient-care capacities who may come in contact with patients incidental to their primary job responsibilities. This does include trainees in all health care occupations. This may include, but is not limited to:

  1. Any person technically and/or professionally responsible for supervising the performance of direct patient-care activities such as the Chief of Staff, service or section chief, clinical service supervisors, etc;

  2. Any person responsible for contributing diagnostic, treatment, or counseling information for the patient’s medical record;

  3. Any physician or dentist (including residents), podiatrist, optometrist, [chiropractor,] nurse, nurse anesthetist, physician assistant (PA) or expanded-function dental auxiliary (EFDA), except those appointed under authority of 38 U.S.C. 7405 solely for the purpose of carrying on activities other than direct patient care, such as purely academic or research activities;
(4) [Appropriate occupation/position listed as Hybrid Title 38 under 7401(3)]; and

(5) Any person appointed under 38 U.S.C. 7405 to serve in an allied health capacity in support of the total treatment team effort, such as clinical psychologists, social workers, rehabilitation medicine therapists, nursing assistants, and laboratory and radiology personnel, dietitians, etc., who are in direct contact with patients in a diagnostic, treatment, counseling, or care capacity.

c. **Appointment.** Any action to assign an individual to a direct patient-care capacity is considered an appointment for the purpose of this appendix. This includes initial appointment and any initial assignment to a direct patient-care position, such as transfer, reassignment or promotion.

3. **DETERMINATION OF PROFICIENCY.** One of the following criteria will be used to determine English language proficiency:

a. The candidate’s primary and native written and spoken language is English.

b. The candidate has completed a combination of 4 or more years of education and/or experience as follows:

   (1) Education in this country or in any school in which the basic curriculum is conducted in English, which may include any time spent in graduate and postgraduate training.

   (2) Successful work experience in a health care facility in which the primary written and spoken language is English and in which the individual is required to communicate in English.

   c. For physicians, any of the following additional criteria may be considered as qualifying for English language proficiency:

      (1) Graduation from a medical school accredited by the LCME (Liaison Committee on Medical Education), as listed in the current Association of American Medical Colleges’ Directory.

      (2) Graduation from a foreign medical school whose curriculum was taught and examined in English.

      (3) United States citizenship by birth and graduation from a foreign medical school.

      (4) Certification by the ECFMG (Educational Council for Foreign Medical Graduates) with a certificate dated 1976 or later.

      (5) Successful completion of the VQE (Visa Qualifying Examination).

      (6) Certification by an American Specialty Board.
(7) For residents appointed to an integrated graduate training program (i.e., accredited in the name of an affiliated institution), certification by the Deans Committee or Medical Advisory Committee of having met the written and spoken English proficiency requirements.

4. TOEFL (TEST OF ENGLISH AS A FOREIGN LANGUAGE)

   a. If a physician, dentist, podiatrist, optometrist, chiropractor, nurse, nurse anesthetist, [EFDA,] or PA does not meet the above criteria or if proficiency is questionable even though one or more criteria are met, the candidate must successfully complete the TOEFL before a determination of proficiency is made. Successful completion of the paper-based version of this test is the achievement of a minimum converted total score of 550 and a minimum converted total score of 213 on the computer-based version. Where the three-part test is taken, a minimum unconverted score of 55 on each of the three parts of the paper-based version, or an unconverted score of 21 on the computer-based version is required.

   b. The TOEFL is administered by Educational Testing Services, Inc., of Princeton, NJ, several times each year in centers around the country. For application materials and information about tests (including testing center locations, filing, deadlines, and test dates), facilities or applicants should call 609-771-7100, or access the website. Payment for testing and training of applicants for employment will not be made by VA.

5. QUESTIONABLE PROFICIENCY

   a. If an individual in any occupation not listed in paragraph 4a [ ], [ ] does not meet the proficiency criteria or if proficiency is questionable even though one or more criteria are met, the facility Director will determine on an individual basis whether the individual is sufficiently proficient for the assignment involved. Although English language proficiency tests are not required, extreme caution should be exercised in assessing written and spoken English proficiency. This can normally be accomplished through personal interview, reference checks, etc., conducted by the appointing official. In doubtful cases, a final determination should be made only after review and interview by a second management official whose native language is English.

   b. If any person, at a facility where the primary written and spoken language of the predominant number of patients is other than English, has not demonstrated proficiency as indicated above, or if proficiency is questionable, the facility Director will determine on an individual basis whether the individual is sufficiently proficient for the assignment involved. This determination will be made as described above.

6. DOCUMENTATION. The determination that an employee is proficient in English will be documented on the appointment SF 52, Request for Personnel Action, which will be retained for the duration of VA employment.

7. TEMPORARY APPOINTMENT PENDING PROFICIENCY DETERMINATION

   a. A physician, dentist, podiatrist, optometrist, chiropractor, nurse, nurse anesthetist, [EFDA,] or PA may be appointed under 38 U.S.C. 7405(a)(1)(A) pending successful completion of the TOEFL. The
facility Director or designee will determine on an individual basis, through personal interview, reference checks, etc., that the candidate is sufficiently proficient to have a reasonable assurance of successfully completing the examination.

b. A written statement will be provided to any candidate thus appointed explaining the requirement for the TOEFL and that continued employment is contingent upon its successful completion.

c. The TOEFL must be successfully completed during the first year of VHA employment in a direct patient-care assignment. An employee whose test scores fail to qualify for successful completion of the exam will be terminated from the service on 2-weeks’ notice. If the employee’s temporary appointment expires in less than 2 weeks, the employee may not be retained beyond this date.
APPENDIX J. REQUESTS FOR APPROVAL TO PETITION THE UNITED STATES DEPARTMENT OF STATE (DOS) FOR SUPPORT OF A WAIVER OF THE 2-YEAR HOME RESIDENCE REQUIREMENT OF THE UNITED STATES EXCHANGE VISITOR PROGRAM [ ]

1. SCOPE. This appendix [concerns policy and] criteria for requesting [ ] approval to petition [the Department of State (DOS)] for support [on] behalf of an individual on a J-1, Exchange Visitor, visa for a waiver of the 2-year home residence requirement by [United States Citizenship and Immigration Services, a bureau of the Department of Homeland Security].

2. BACKGROUND. The Immigration and Nationality Act requires that certain foreign nationals, who are in the United States (U.S.) as participants in the Exchange Visitor Program, leave the U.S. for 2 years to apply newly acquired training and skills in their home countries. This 2-year home residence requirement also prevents circumvention of the usual methods of immigration to the U.S. Under unusual circumstances, the head of an interested Federal agency may request a waiver of this requirement when that agency determines that such a waiver is in the interest of a program of the U.S. and in the public interest. (Title 22 CFR, part [62], and the Immigration and Nationality Act, section 212(e), as amended.)

3. POLICY. The Department of Veterans Affairs (VA) supports the Exchange Visitor Program and the 2-year home residence requirement and will seek waivers only when it is clearly in the interest of the Department and its programs. For VHA, the Secretary has delegated to the Under Secretary for Health, or designee, authority to approve such requests and to determine when submission of requests for waivers are appropriate. [For VA organizations other than Veterans Health Administration (VHA), waiver requests will only be considered on a case-by-case basis for approval by the Secretary. Inquiries concerning such waiver requests may be directed to the Office of the Deputy Assistant Secretary for Human Resources Management and Labor Relations (059).]

4. [VHA POLICY AND CRITERIA CONCERNING WAIVER REQUEST SUBMISSIONS. VHA Handbook 5005.1, “Requests to Petition the United States Department of State for a Waiver of the Two-Year Home Residency Requirement on Behalf of an Exchange Visitor,” dated January 26, 2005, revises instructions and submission procedures related to facility requests for VHA Central Office to petition DOS for waivers of the 2-year home residency requirement on behalf of Exchange Visitors (J-1 visa holders). This VHA Handbook serves as a supplement to this Appendix. The VHA Handbook can be found at the following Web link: http://www1.va.gov/vhapublications/ViewPublication.asp?pub_ID=1219].
APPENDIX K.  RCVL (RESIDENT/TRAINEE CREDENTIALS VERIFICATION LETTER)

Department or Program
Medical School
Date ______________

Director (00)
VA Medical Center
(Address)_________

Dear

I certify that the residents/trainees listed on the enclosed sheet, to be appointed to the Department of Veterans Affairs ____ (Medical Center)_____, to work at varying times during the period of July 1, 20__ through June 30, 20__, are physically and mentally fit to perform the duties assigned to them. They meet, in full, the education, credential, and program requirements established by ___(medical school or VA medical center)___ in this ___ACGME (Accreditation Council for Graduate Medical Education) or nationally accredited___ training program. Their credentials (diplomas, letters of reference, certificates of advanced training, all State professional licenses held prior to entry into the program or obtained during residency training, and, where applicable, DEA (Drug Enforcement Administration) certification and ECFMG (Educational Council for Foreign Medical Graduates) certification, have been verified, and you have been advised of any problems relating to the credentials of these residents/trainees, where appropriate.

I also certify that the process of privileging of residents for clinical procedures will be completed and appropriately updated by me as program director (or by the appropriate VA service chief), in accordance with ACGME-established criteria for the essentials and special requirements for residency training programs. If you have any questions or require additional information, let me know.

Date Appointed: ________________
APPENDIX M. SAMPLE CONSULTANT CERTIFICATE

“In approving the filling of this consultant position without regard to the laws and regulations governing appointments in the competitive civil service, and in approving the rate of pay set for this position without regard to the classification and pay laws, I have considered the requirements of law (5 U.S.C. 3109), and relevant Comptroller General decisions that spell out the conditions under which consultants may be appointed.

“More specifically, I have satisfied myself that:

“(a) The position is necessary;
“(b) The position is a ‘consultant position’ as defined in 5 CFR 304.102(b);
“(c) The work is temporary in nature, that is, will not exceed 1 year or, as appropriate ‘. . . requires services only irregularly (that is, with no regular tour of duty) or occasionally,’ requires a high level of expertness not available in the regular workforce, is of a purely advisory nature, and does not include the performance or supervision of operating functions;
“(d) This authority is the most appropriate appointing authority for meeting VA’s needs;
“(e) The proposed appointee meets OPM’s definition of ‘consultant’ in 5 CFR 304.102(b) and does, in fact, possess the kind and level of expertness that will permit him/her to render the services VA seeks;
“(f) The daily rate intended to be paid the proposed appointee is commensurate with the level of the work he/she is to perform and his/her qualifications for the work; and
“(g) Required documentation is in order.”

In some situations, it will be necessary to modify the sample certificate as, for example, when the appointment is made under an authority other than 5 U.S.C. 3109, the pay is set under the General Schedule (primarily if an appointment is under Schedule A), or the appointee will serve without compensation. Slight modification will also have to be made if the position is that of an expert rather than a consultant, although all the basic elements of the consultant sample must be included.
APPENDIX N: PATHWAYS PROGRAMS

1. PURPOSE. This section outlines the policy and procedures for the use of the Pathways Programs, which consists of the Internship, Recent Graduates and Presidential Management Fellows (PMF) Programs.

2. GENERAL REQUIREMENTS APPLICABLE TO ALL PATHWAYS PROGRAMS APPOINTMENTS.

   a. Core Principles. The Pathways Programs are intended to be limited in scope, transparent, and fair to Veterans. The Programs also require an investment from hiring officials in the training, mentoring, and career development of the individuals who are brought into these Programs. HR offices play a critical role in ensuring that hiring officials comply with the intended use of these Programs as a supplement to, rather than a substitute for, the competitive hiring process.

   b. Merit System Principles and Equal Employment Opportunity. In all actions related to the Pathways Programs, HR Offices must adhere to the merit system principles in 5 U.S.C. 2301(b), avoid prohibited personnel practices in 5 U.S.C. 2302, and provide equal employment opportunity without regard to race, ethnicity, color, religion, sex (including pregnancy and gender identity), national origin, age, disability, sexual orientation, genetic information, or any other non-merit-based factor, as stated in 5 CFR 362.101(c).

   c. Pathways Memorandum of Understanding (MOU). The VA Pathways Program Officer coordinates the reestablishment of the MOU with OPM at least every two years and coordinates modifications to the MOU, as requests for changes are received. The Assistant Secretary for OHRA (006) is delegated authority to enter into agreement on behalf of VA. An approved and current MOU must be in place prior to HR Offices making appointments in the Pathways Programs. In accordance with the MOU and 5 CFR 362.104(c), VA will:

      (1) Provide to OPM any information it requests on VA’s Pathways Programs;

      (2) Adhere to any caps on the Pathways Programs imposed by the OPM Director;

      (3) Provide information to OPM about VA job opportunities for individuals interested in participating in the Pathways Programs;

      (4) Ensure adherence to the requirements for accepting applications, assessing applicants, rating and ranking qualified candidates, and affording Veterans’ preference in accordance with the provisions of 5 CFR, part 302; and

      (5) Provide a meaningful, consistent on-boarding process for each Pathways Programs Participant.

   d. OPM Pathways Programs Oversight. The OPM Director may establish caps on the number of Pathways Participants whom VA or the entire Federal Government may appoint or convert in any Pathways Program. In the event the OPM Director determines that any caps would be appropriate, OPM will publish notice of such caps in a manner chosen by the OPM Director. The OPM Director may
establish such caps based on VA or Government-wide use of the Pathways Programs, input from the Executive agencies, and consideration of the following:

(1) Department MOU compliance;

(2) Department approach to entry-level hiring;

(3) Department engagement in sound workforce planning to ensure that an adequate number of permanent positions will be available to which hiring facilities can convert Pathways Participants who successfully complete their Programs;

(4) Department record in using the Pathways Programs as a supplement to competitive examining, rather than as a substitute for it;

(5) Department record of publicizing positions in the Pathways Programs, and recruiting and selecting from a broad array of sources; and

(6) Any other information the OPM Director deems relevant.

e. Workforce Planning and Budgetary Impact.

(1) As key members of the position management team, Human Resources Officials should work with other key players responsible for fiscal functions. Before filling any position under these Programs, hiring officials must determine if the use of the Pathways Programs will help meet the long-term and short-term workforce needs of the facility. The need must be included in their workforce planning to ensure that an adequate number of permanent positions will be available to convert Participants who successfully complete their programs to the title 5 competitive service. This step must occur before a Pathways position is advertised or filled. Facilities must ensure this information is accounted in their workforce plans. Hiring officials must consider the future availability, career path and grade level of target positions when determining to employ a Participant with the expectation of conversion to a permanent position in the competitive service upon completion of the Program. However, under extenuating circumstances it may be appropriate to convert a Participant to a term position and later convert the Participant to a permanent position.

(2) The HR Officer/Director or designee should advise the facility’s leadership and other key players of the structure, impact and intent of each Pathways Program. This information may have considerable impact for workforce planning in determining and allocating funding needs, the facility structure, and full-time equivalents (FTE). VA facilities that hire individuals in the Pathways Programs must use available facility funds and FTE allocations.

(3) A Recent Graduate and PMF position funded by the facility is a full-time position and counts toward the maximum number of FTE that an organization may employ. A Recent Graduates and PMFs count against personnel ceilings and their salaries are paid by the employing organization. In some cases, these salaries may be paid or reimbursed by an outside organization (i.e., Administration-level organization). In these cases, the employing facility may determine it unnecessary to account for the
funded position; however, consideration should be given when the facility is planning to convert the Participant to a term or permanent position upon completion of the Pathways program.

(4) Facilities should determine the best approach for accounting for funded and non-funded indefinite Internship (without time limitation) and temporary Internship (not to exceed one year) positions. An Intern whose work assignment is indefinite is appointed without time limits and should be converted permanently to the competitive service upon successful completion of the program.

g. **Bargaining Unit Coverage.** The HR Officer/Director or designee must consult with their designated Labor Management Relations Specialist and/or Classification Specialist to determine if Pathways positions are included or excluded from provisions in applicable labor agreements.

h. **Outreach and Recruitment.**

(1) Facilities are encouraged to conduct outreach and to build partnerships with local colleges, universities, trade schools, etc. to promote the Pathways Programs. This may occur through on-line and/or on-campus informational events and liaison activities.

(2) When actual Pathways opportunities are available and the organization facility is actively recruiting, the recruitment strategy should target individuals from various locations, colleges/universities, and backgrounds helping to create a diverse applicant pool. For Pathways positions, recruitment efforts should not be exclusive to only one institution, but should be a part of comprehensive recruitment strategy that includes a variety of outreach resources.

(3) HR Offices must ensure that public notification requirements are met in accordance with 5 CFR 362.105(b). The public notification requirements are met by posting a job opportunity announcement (JOA) as described in paragraph 2(i) of this appendix. An advertisement or a notice of recruiting event/job fair on OPM’s USAJOBS Web site will also assist with marketing upcoming recruitment events and Pathways opportunities. If the recruiting office has Pathways Programs opportunities and attends a recruitment event (i.e., job fair), a JOA should be opened to allow interested individuals to apply to the opportunities available to attendees of the recruitment event. This ensures that all applications are recorded properly in USA Staffing®, 5 CFR, part 302 procedures are followed, Veterans’ preference rules are applied with regard to referral and selection. Policy regarding JOAs are found in paragraph 2(i) of this appendix. Policy regarding job advertisements and notices are in paragraph 2(j) of this appendix.

i. **Job Opportunity Announcement (JOA).**

(1) Posting of JOAs ensures that Pathways opportunities meet public notification requirements. JOAs must be posted for at least 5 calendar days and comply with any labor obligations. Hiring offices cannot limit a Pathways JOA to a specific educational institution or geographic area. Opportunities, except for PMF JOAs, are posted on OPM’s USAJOBS web site using the USA Staffing® system.

(2) Pathways JOAs must include the following OPM-mandated requirements:

(a) Position title, series, and grade of the position(s) being filled;
(b) Geographic location(s) of the position(s) being filled;

(c) Information about How to Apply;

(d) Reasonable Accommodation statement;

(e) Information about how to claim Veterans’ preference; and

(f) OPM standardized language for fair employment opportunities.

(3) Pathways JOAs must include the following VA-mandated requirements:

(a) Special employment Consideration statement;

(b) Brief description of duties of the job(s) to be filled;

(c) Available work schedules for the job(s) to be filled;

(d) Information about the possibility of conversion to permanent appointment (if applicable);

(e) Promotion potential (i.e., career ladder) and target grade while serving in the Program (if applicable);

(f) Availability of relocation expenses or recruitment/relocation incentives (if applicable);

(g) Eligibility for placement, upon conversion, in a position with promotion potential (i.e., career ladder) (if applicable);

(h) Any strategies utilized by a facility to limit the number of applicants (if applicable);

(i) For Internship Program JOAs, eligibility for conversion based on Superior Academic Achievement (S.A.A.) (if applicable);

(j) Any other special requirements and/or agreements (i.e., mobility agreement or continued service agreement);

(k) For Recent Graduate Program JOAs, any positive education requirement from the OPM qualification standard (if applicable);

(l) For Internship Program JOAs, the required current academic program for a position that are expected (through workforce planning) to convert to a position with positive education requirement (if applicable); and

(m) For Recent Graduate Program JOAs, a note stating an applicant within 9 months of completing qualifying education may apply, but he/she must successfully complete academic requirements prior to appointment. The HR office may use this flexibility at its discretion based on hiring needs and the
timing of the recruitment. See the OPM Operating Manual for Qualification Standards for General Schedule Positions.

NOTE: Internship and Recent Graduate JOAs posted prior to the issuance of this policy may not comply with these mandated requirements. To convert a Participant into a position with a career ladder that was not communicated in the original JOA, the servicing HR Office must initiate a new JOA as outlined in paragraph (2)(i)(4)(b). The facility also has the option to convert the Participant to the competitive service at the appropriate grade for which he or she qualifies and later initiate recruitment for a career ladder position under competitive promotion procedures.

(4) Public Notification Methods. For Internship and Recent Graduate positions, HR Offices must announce positions using the Group Rating procedure described in paragraph 3 of this appendix. To meet public notification requirements, facilities may use the following methods for posting Internship and Recent Graduate JOAs:

(a) Positions announced to facility and/or all VA Employees. When the hiring facility chooses to limit the JOA of an Internship or Recent Graduate position to all facility and/or VA employees, the facility must use the option in USA Staffing® to post the JOA to “Agency Employees Only – Intranet Posting Only.” In this case “Intranet” is the VA Careers Web site. Applicants must meet the program eligibility criteria to be considered for the program and be serving in an appointment in the competitive or excepted service. If more than one individual is interested, the agency must apply the selection procedures under 5 CFR, part 302. (Reference: Announcement Work Area of the Desk Guide for Merit Promotion Purposes Using USA Staffing.)

(b) Positions limited to VA Employees in a specific Pathways Program. When the hiring facility chooses to limit the JOA of a Pathways Internship or Recent Graduate opportunity to all of facility and/or VA employees currently in a specific Pathways Program, the facility will use the option in USA Staffing® to post the vacancy to “Exclusive Posting – Will Not Appear on USAJOBS Web site or VA Intranet.” The facility will then provide information about the JOA and its web link via an e-mail to the targeted employee population or on a shared network drive accessible to that employee population. Applicants must meet the program eligibility criteria to be considered for the program and be serving in a Pathways appointment in excepted service. If more than one individual is interested, the agency must apply the selection procedures under 5 CFR, part 302. (Reference: Announcement Work Area of the Desk Guide for Merit Promotion Purposes Using USA Staffing.)

(c) Positions announced to Candidates outside of VA.

1. When any Pathways Internship or Recent Graduate position will be open to applicants outside VA, the hiring facility will use USA Staffing® to post the vacancy on USAJOBS Web site open to the general public who meet the eligibility requirements for the program. When Internship or Recent Graduate Program opportunities announced to potential candidates outside of the Department’s current workforce are likely to yield an overwhelming high number of applicants. To mitigate the impact, HR Offices should consult with hiring officials to tailor the job analysis and other assessment tools to obtain the desired candidate pool.
2. The consultation with the hiring official should consider various factors that include, but are not limited to the following: shortening or extending the length of the announcement period; limiting the number of applications on midnight of the day on which applications reach a specified number, e.g., 75 or 100; and using specific eligibility requirements for entrance into the Pathways Internship Programs, e.g., ability to work a specified number of hours each week or at a specific location or maintenance of a minimum grade point average as an eligibility criteria. Any strategies utilized by a facility must be defensible and included in the job opportunity announcement so that all potential applicants are informed.

NOTE: Current Internship Participants from other agencies may apply to VA Internship public notices announced to candidates outside of VA. Paragraph 2(i) does not cover conversions of Interns from other agencies into VA competitive service positions which are covered in Paragraph 4(p) of this appendix.

(d) Presidential Management Fellows (PMF) Program. OPM administers the announcement for PMF positions and determines the open period for interested individuals to apply for the Pathways PMF Program. This process also includes an assessment. OPM then publishes a list of PMF finalists. To meet public notice requirements for PMF positions, the facility-level Pathways Program Coordinator (PPC) must work with their respective Administration Pathways Programs Officer (PPO) who will coordinate the posting of the vacancy on the PMF Program web site. For specific job openings, for which PMF finalists may apply, VA will place job postings on an OPM-maintained PMF Program web site.

(j) Publication of Job Advertisements and Notices of Recruiting Event/Job Fairs.

(1) When hosting or attending recruitment events or job fairs HR Offices must post Internship and Recent Graduate JOAs on OPM’s USAJOBS web site and use the system to allow applicants to apply online. This practice builds consistency within the Department and ensures that all applications are recorded in USA Staffing®. HR Offices may consider using USA Staffing® to post a job advertisement or a notice of a recruiting event/job fair on the USAJOBS web site to publicize Pathways Internship and Recent Graduate opportunities in addition to hosting or attending a recruitment event or job fair.

(2) A job advertisement or notice of a recruiting event or job fair is posted similarly to a JOA, but does not include the “apply online” feature. The job advertisement and notice is used to specifically direct interested applicants to a VA intranet site, i.e., VA Careers, which contains information about the event and how to apply if an interested person is unable to attend the actual event.

(k) Appointments.

(1) Facilities must fill all positions under the Pathways Programs using the excepted service appointing authority provided by 5 CFR 213.3402 (a), (b), or (c); and will be documented with the appropriate codes and remarks from OPM’s Guide to Processing Personnel Actions. OPM’s Guide to Processing Personnel Actions contains Nature of Action and Legal Authority Codes and required remarks to be used when documenting the Pathways appointment and the conversion actions to the competitive service on the Standard Form 50.
(2) Facilities must follow the procedures of 5 CFR, part 302 as described in VA Handbook 5005, Staffing, Part II, Chapter 2 when filling a position under a Pathways Program. Appointments are subject to all the requirements and conditions governing term, career-conditional, or career employment, including the investigation to establish an appointee's qualifications, eligibility, and suitability. Hiring documentation should be properly filed in the electronic Official Personnel Folder (e-OPF) in accordance with OPM’s Guide to Recordkeeping and guidance issued by OHRM’s Human Resources Information Service (056).

l. Qualification Standards. To ensure consistency in the Department, Internship Program applicants are to be evaluated using the VA Pathways Internship Program qualification standard in Appendix II-F4. Recent Graduates and PMF Programs positions are evaluated using the appropriate OPM qualification standards for the specific occupational series.

m. Selective Factor.

(1) For Internship and Recent Graduate positions, a hiring facility may use a selective factor, sometimes referred to as a screen-out factor, to identify special requirements that are absolutely needed to perform the work of an individual position. A selective factor can include a requirement for a specific knowledge, skill, and ability (KSA) or competency or Federal or State requirement for licensure or certification. A selective factor becomes part of the minimum requirements for a position, and individuals who do not meet it are ineligible for further consideration. A selective factor can be used for a position at any grade level where specialized experience is used to meet the minimum qualification requirements.

(2) It is essential that any selective factor used in filling a particular vacancy be included in the JOA and is established during the job analysis process. Hiring facilities cannot require applicants to meet selective factors that were not established prior to advertising a position, nor can they require selective factors that were not made known to applicants. Selective factors cannot be so narrow that they preclude from consideration applicants who could perform the duties of the position; require KSAs/competencies that could be learned readily during the normal period of orientation to the position; be so specific as to exclude from consideration applicants without prior Federal experience; be so restrictive that they run counter to the goal of placing applicants from priority placement lists established to assist in the placement of employees affected by reductions in force; or require the completion of educational requirements for specific coursework for occupations that do not have a positive education requirement.

n. Quality Ranking Factor.

(1) A quality ranking factor (QRF) is a knowledge, skill, or ability (KSA) that could be expected to enhance performance in a position, but are not essential for satisfactory performance. QRFs focus on the level of proficiency the applicant brings to the position. A QRF can be used for a position at any grade level where specialized experience is used to meet the minimum qualification requirements.

(2) QRFs are determined and recorded during the job analysis process. Applicants with higher proficiency levels should perform better in the position. Applicants who possess such QRFs may be ranked above those who do not, but no applicant may be rated ineligible (i.e., screened out) for failure to
possess a QRF. QRFs are based on the work of the position and must comply with the OPM Operating Manual for Qualification Standards for General Schedule Positions.

o. **Citizenship.** Facilities may appoint a non-citizen provided that the Pathways Participant is lawfully admitted to the United States as a permanent resident or is otherwise authorized to be employed. A Pathways Participant must be a United States citizen or national to be eligible for noncompetitive conversion to the competitive service.

p. **Compensation.** Pay setting policies are covered in VA Handbook 5007, Pay Administration. The rules for setting pay upon the initial appointment and conversion of a Participant are governed by the pay administration rules of the pay system or pay plan of the Participant's position under the Pathways program. In determining the Participant's compensation, facilities may also use any applicable pay flexibilities, within guidelines, available under the title 5 pay system for General Schedule (GS) and Federal Wage Grade (WG) pay plans (e.g., recruitment, relocation, and retention incentives GS schedule positions, special rates under 5 CFR, part 530, subpart C; pay retention eligibility under 5 CFR, part 536, subpart C; and the superior qualifications and special needs pay setting authority and the maximum payable rate rule under 5 CFR, part 531, subpart B).

q. **Employment of relatives.** Appointments and conversions of Pathways Programs Participants must comply with 5 CFR, part 310. A Pathways Participant may work in the same facility with a relative when there is no direct reporting relationship and the relative is not in a position to influence or control the Participant's appointment, employment, promotion, advancement, performance rating or training opportunities.

r. **Performance and Progress Evaluation.** Each Participant serving more than 90 calendar days in a 12 month period must be placed on a performance plan, as prescribed by 5 CFR, part 430 or other applicable law, regulation or VA policy, establishing performance elements and standards that are directly related to acquiring and demonstrating the various leadership, technical, and/or general competencies expected of the Participant, as well as the elements and standards established for the duties assigned. VA Handbook 5013, Performance Management Systems, Part I - Title 5 Performance Appraisal Program, does not require a formally established performance plan for temporary title 5 excepted service employees expected to work 90 calendar days or less in a 12-month period, e.g., a Pathways Intern hired for the summer with a corresponding not-to-exceed date. However, performance expectations must still be communicated to the Intern in writing in accordance with the Participant Agreement.

s. **Separations.**

   (1) A Hiring official or supervisor, in consultation with the servicing HR Office, may terminate a Pathways Participant for reasons including misconduct, poor performance, failure to meet the requirements set forth in the Participant Agreement, or for a suitability issue under the provisions of this chapter and in accordance with VA Handbook 5021, Employee/Management Relations.

   (2) A Pathways Participant may resign at any time during the Program by submitting a notice of resignation. The notice should include the effective date of resignation, forwarding contact information...
(e.g., address, phone number and email) and, if desired, a reason for the resignation. This information should be documented in accordance with Chapter 31 of OPM’s Guide to Processing Personnel Actions, and properly filed in the e-OPF in accordance with OPM’s Guide to Recordkeeping and guidance issued by OHRM’s Human Resources Information Service (056).

**t. Tenure or Career Tenure.** Time spent serving as a Pathways Participant counts towards career tenure when the individual is noncompetitively converted to a permanent position in the competitive service upon completion of the Program, with or without an intervening term appointment, and without a break in service of one day. Though Pathways Participants are eligible for noncompetitive conversion to the competitive service upon successful completion of their Program and any other applicable conversion requirements, service in a Pathways Program confers no right to further employment in either the competitive or excepted service. Facilities wishing to convert Pathways Participants must execute the required actions to do so.

**u. Trial Period.**

(1) Policy concerning trial periods for title 5 Excepted Service appointments is covered in Part II, Chapter 2, Section C, Paragraph 6h of this handbook. Individuals selected for Pathways excepted appointments lasting more than 1 year (indefinite) are required to serve a 1-year trial period. This means that all Pathways Participants, with the exception of those appointed to temporary Internship appointments (not to exceed 1 year), serve or the time served is creditable towards meeting a trial period.

(2) The entire period served under an Internship Program (appointed indefinitely) will count toward the 1-year trial period if the appointment is initially established with an ending date of more than 1 year. VA Handbook 5005, Staffing, Part II, Chapter 2, Section C, Paragraph 6h, requires a 1-year trial period for excepted indefinite appointments lasting more than 1 year. If the Intern has served at least 1 year in the Pathways Program, upon conversion to the competitive service from these programs, the Intern is not required to serve a probationary period in accordance with 5 CFR 315.802. If a full year is not served prior to conversion, the prior Federal civilian and creditable Pathways program service is credited toward the completion of the trial period in the same manner as prescribed in 5 CFR 315.802.

(3) The entire period served under the Recent Graduates and Presidential Management Fellows Programs is a trial period. Upon conversion to the competitive service from these programs, the employee is not required to serve a probationary period in accordance with 5 CFR 315.802. Furthermore, prior Federal civilian service is credited toward the completion of the required trial period in the same manner as prescribed in 5 CFR 315.802.

**v. Requirement for Considering Excepted Service Priority Referral Eligibles.** Pathways appointments, which are in the title 5 excepted service, are subject to the regulatory provisions governing any facility-established Priority Reemployment List (PRL) and/or Reemployment List (RL) under 5 CFR, part 302, subpart C. Pathways appointments and related noncompetitive conversions to the competitive service are not subject to the regulatory provisions in the competitive service for the Reemployment Priority List (RPL), the Career Transition Assistance Plan (CTAP), or the Interagency Career Transition Assistance Plan (ICTAP), as stated in 5 CFR 330.211(f)(3), 5 CFR 330.609(e)(3), and 5 CFR 330.707(h)(3), respectively.
w. Reporting. On an annual basis the VA PPO will collect from each Administration PPO, at a minimum, the following information:

(1) For the coming year:
   (a) The occupations for which the Pathways Programs will be used to fill entry-level positions.
   (b) The percentage of positions to be filled under the Internship, Recent Graduates, and PMF Programs.

(2) For the previous year:
   (a) The number of participants initially appointed under each Pathways Program.
   (b) The percentage of the agency’s overall hires made from each Pathways Program.
   (c) The number of Pathways Program participants converted to the competitive service for each Pathways Program.
   (d) The number of Pathways Program participants who were separated for each Pathways Program.

x. Applicability of VA Time-in-Grade Restrictions for Pathways Programs.

(1) VA Handbook 5005, Staffing, Part III, Chapter 2, paragraph 5b, and Appendix III-B, extends time-in-grade (TIG) restrictions to VA title 5 excepted service GS positions; however, TIG restrictions do not apply to promotions or appointments of a Pathways Programs Participant.

(2) If otherwise eligible, Internship and Recent Graduate Participants serving in career-ladder Pathways positions may be promoted upon successfully meeting educational requirements.

(3) TIG restrictions do not apply to a conversion of a Pathways Participant to a position in the competitive service. This means that upon meeting the eligibility requirements for noncompetitive conversion the Participant may be converted to a higher grade level in the competitive service if the qualification requirement is met as long as the job opportunity announcement included the target position for conversion. After conversion to the competitive service, TIG restrictions apply to movements in accordance with TIG provisions in 5 CFR, part 300, subpart F.

(4) A current and former competitive service federal employee is not required to meet TIG requirements to be appointed into any Pathways positions in the excepted service. In addition, current Pathways Participants selected for and converting to a new Pathways Programs appointment (i.e., Intern NTE converting to Internship (without time limitation) are not required to meet TIG restrictions).

(5) Time-in-grade restrictions are not applicable to Federal Wage Grade (WG) System positions. However, promotions to WG positions must follow merit system principles even in the absence of specific controls or restrictions.
y. **Veterans’ Preference.** For any Pathways position, the hiring facility must ensure that Veterans’ preference provisions in 5 CFR, part 302, subpart C, are applied for applicants for all Pathways Program positions regardless of the area of consideration.

**NOTE:** Regarding a referral for PMF candidates, the VA PMF Coordinator must adjudicate Veterans’ preference prior to issuing the list to the hiring official.

z. **Voluntary Reassignments and Demotions for Pathways Participants.** The HR Officer/Director or designee, should consult with the hiring official to determine the best recruitment and hiring strategy. An organization is permitted, at its discretion, to process a voluntary reassignment or voluntary demotion when the following conditions are met:

1. The Participant is eligible to remain in the specific Pathways Programs.

2. The new position is in the same type of Pathways Program (i.e., Intern NTE to Intern NTE).

**NOTE:** Movements to a different program (i.e., Internship to Recent Graduate) or a different appointment type (i.e., Internship NTE to Internship without time limitation) must meet public notification and Veterans’ preference requirements.

3. The new position is in the same organizational entity (i.e., service or division) as indicated by an approved organizational chart or position listing.

4. The Participant is qualified for the new position.

5. The movement results in a reassignment or demotion to a position without any known promotion potential.

6. No more than one employee requests a reassignment or demotion for a certain position. If more than one request is received and/or there are other potentially eligible Participants in the facility, a public notification must be issued at a minimum to all current Program Participants in the facility. The selection procedures in 5 CFR, part 302 will apply.

7. The selection does not violate any prohibited personnel practice and/or merit system principle.

8. Noncompetitive movement of an Internship Program Participant from another organization or VA facility is prohibited unless the move is a condition of employment (i.e., mobility agreement) and it was included in the original JOA. A selection of a Participant from another federal agency requires public notice as described in paragraph 2(i) of this appendix.

aa. **Participant Agreement.** Each VA Pathways Programs Participant must be issued a Participant Agreement. The appropriate officials must sign the agreement within 10 calendar days of the appointment. A change to the Participant Agreement warrants a new agreement with new signatures each signing party. The PPMO office provides the Participant Agreements.
bb. **Movement from the Competitive to the Excepted Service.** If selected for a Pathways Position, a current civilian employee serving under a non-temporary appointment in the competitive service may not be moved to the excepted service unless the employee has been informed in writing how his/her rights, tenure, and benefits are affected by the change. The employee must also submit a written statement acknowledging that he/she is leaving the competitive service voluntarily to accept a new appointment in the excepted service.

cc. **Records.** An electronic recruitment case file must be established and maintained for every new Pathways appointment. The file should include a copy of the JOA, all applications with supporting documentation, referral certificates, and the selecting official’s decision.

3. **REFERRAL AND SELECTION PROCEDURES.**

   a. **Introduction.** Applicants for VA Pathways Internship and Recent Graduate Programs positions are to be rated, referred, and selected using a category-rating like process called Group Rating. Group Rating is similar to category rating for competitive service positions. The group rating system provides eligible Veterans and priority eligibles the same referral advantage as traditional methods described in 5 CFR, part 302. The recruitment procedures covered in this section apply to internal and external job opportunity announcements (JOAs) for Pathways positions.

   b. **Exclusion.** Luevano Consent Decree covered positions that fall under Administrative Careers with America (ACWA) testing requirements in the Recent Graduate Program are not covered by the procedures in this section. An appropriately assigned VA Delegated Examining Unit (DEU) conducts recruitment for these positions as rating and ranking is based on ACWA numerical scores, as applicable. ACWA applies to certain two-grade interval administrative positions that are being recruited for at the GS-5 and/or GS-7 grade levels. Any alternative testing tool (i.e., other valid assessment) used in the place of the ACWA test must be approved for use by Recruitment and Placement Policy Service (059).

   c. **Application of Group Rating Procedure for Internship and Recent Graduate positions.** Group Rating is a category-rating like process designed for VA Pathways Programs and allows for selection from a large, high quality group of candidates. The hiring official must make a selection from among all of the eligibles in the highest quality group. A hiring official may not select a non preference eligible over a preference eligible unless an objection or pass over request is sustained. A selection must be made from within the highest quality group regardless of the number of candidates. Preference eligibles receive absolute preference within each group.

   d. **Occupational Assessments.** It is imperative that the hiring official (or other subject matter expert), in consultation with the servicing HR Office, develop a strong job analysis. This helps differentiate between candidates. The hiring official and servicing HRO must establish and define the quality groups in the job analysis prior to issuing the JOA. In Group Rating, numerical scores are not assigned to applicants; however, the job analysis is used to create the occupational assessment which is used, along with the other application materials, to place applicants in the appropriate quality group.

   e. **Quality Groups.** In Group Rating there must be defined quality groups. Quality groups are defined to reflect the requirements to perform the job successfully and to distinguish differences in the quality of each applicant’s job-related competencies or knowledge, skills, and abilities (KSAs).
(1) **Internship Positions.** Under the Group Rating procedure, eligible applicants who meet basic minimum qualification requirements established for the position and whose job-related competencies or KSAs have been assessed are ranked by being placed in one of three quality groups: (1) Best Qualified (2) Well Qualified and (3) Qualified.

(2) **Recent Graduate Positions.** Under the Group Rating procedure, eligible applicants who meet basic minimum qualification requirements established for the position and whose job-related competencies or KSAs have been assessed are ranked by being placed in one of four quality groups: (1) Highly Qualified (2) Best Qualified (3) Well Qualified and (4) Qualified.

**NOTE:** Due to the type of positions filled using the Recent Graduates authority, it is appropriate to assess Recent Graduates positions in the same manner as VA competitive service positions subject to Category Rating.

(3) **PMF Positions.** The Office of Personnel (OPM) administers the application process for the PMF Program and conducts a competition for the selection of Finalists based on 5 CFR, part 302. OPM determines the qualifications for PMF finalists at the GS-9 grade level.

f. **Job Opportunity Announcement (JOA) Requirements.** Servicing HR Offices must describe each quality group in the JOA. The JOA must clearly state how applicants will be rated, ranked, and selected with the pre-defined quality groups (i.e., “Highly Qualified and Qualified” or “Highly-Qualified, Well-Qualified, and Qualified”). The JOA must clearly describe how Veterans’ preference is applied under group rating procedures.

g. **Veterans’ Preference.**

(1) After the appropriate quality group is identified for each qualified applicant, Veterans’ preference is adjudicated for each applicant based on his/her supporting documentation submitted with their application materials. In Group Rating, certified preference eligible Veterans are listed ahead of non preference eligibles within each quality group. In Group Rating, Veterans’ preference order is as follows:

(a) 30% Compensable Disability Preference (CPS)/Compensable Disability Preference (CP) Eligibles
(b) Disability Preference (XP) Eligibles
(c) Tentative Preference (TP) Eligibles
(d) Sole Survivorship Preference (SSP) Eligibles
(e) Non Preference (NV) Eligibles

(2) For Professional and Scientific positions at the GS-9 grade level and above, CPS and CP eligibles do not automatically float to the top of the highest quality group. Applicants are placed in the appropriate quality groups, preference eligibles are then listed ahead of non preference eligibles within
each group. Professional and scientific positions are identified in the OPM Handbook of Occupational Groups and Families. For all other positions, eligible and qualified CPS and CP eligibles automatically float to the top of the highest quality group followed by other preference eligibles and last non preference eligibles.

h. Issuing Referral Certificates. To issue a referral certificate, certified eligibles are placed in the appropriate quality groups using a score-based group rating method. As described in VA Handbook 5005, Staffing, Part I, Appendix B, test scores may be used as part of the job-related criteria to place eligible candidates into quality categories, as long as the test assesses job-related competencies/KSAs. If using test scores, HR Offices may rank applicants using this score-based method. USA Staffing will assign each applicant a score based on his/her occupational assessment responses. The HR Office assesses each applicant for minimum qualifications. For those applicants that meet the minimum qualifications, they are placed in predetermined groups based on the following score ranges:

(a) The Internship Program, certificates have three (3) groups:

1. Best Qualified Group - Applicants who have a score between 97 and 100.

2. Well Qualified Group - Applicants who have a score between 85 and 96.99.

3. Qualified Group - Applicants who have a score between 70 and 84.99.

(b) The Recent Graduate Program, certificates have four (4) groups:

1. Highly Qualified Group - Applicants who have a score between 97 and 100.

2. Best Qualified Group - Applicants who have a score between 90 and 96.99.

3. Well Qualified Group - Applicants who have a score between 80 and 89.99.

4. Qualified Group - Applicants who have a score between 70 and 79.99.

NOTE: Scores are not listed on referral certificates and should not be used to order the applicants. In addition, Veterans’ preference points are not added to the scores. Veterans’ preference, once adjudicated, is used to place preference eligibles at the top of the appropriate category as described below.

i. Selection.

(1) Requirement for Considering Excepted Service Priority Referral Eligibles. Pathways appointments, which are in the title 5 excepted service, are subject to the regulatory provisions governing any facility-established Priority Reemployment List (PRL) and/or Reemployment List (RL) under 5 CFR, part 302, subpart C. Pathways appointments and related noncompetitive conversions to the competitive service are not subject to the regulatory provisions in the competitive service for the Reemployment Priority List (RPL), the Career Transition Assistance Plan (CTAP), or the Interagency Career Transition Assistance Plan (ICTAP), as stated in 5 CFR 330.211(f)(3), 5 CFR 330.707(e)(3), and 5 CFR 330.707(h)(3), respectively. The order of selection under group rating is as follows:
(2) **Order of Selection for Professional and Scientific Positions at the GS-9 Grade Level and Above.** Within each of the quality groups, preference eligibles are listed ahead of non preference eligibles with Veterans’ preference status annotated in alphabetical order (by first or last name). Non preference eligibles are placed in alphabetical order (by first or last name) following preference eligibles. CPS and CP preference eligibles are not automatically placed at the top of the highest quality group. The certificate of eligibles must identify certified eligibles in the following order within each quality group:

(a) Persons entitled to priority consideration as defined in 5 CFR 302.103.

(b) Eligible candidates in the highest quality group.

(c) Eligible in the next lower quality group.

(3) **Order of Selection for All other positions.** Within each of the quality groups, preference eligibles are listed ahead of non preference eligibles with Veterans’ preference type noted in alphabetical order (by first or last name). The remaining eligibles are placed in alphabetical order (by first or last name). CPS and CP preference eligibles are automatically placed at the top of the highest quality group. The certificate of eligibles must identify eligibles in the following order:

(a) Persons entitled to priority consideration as defined in 5 CFR 302.103.

(b) Eligibles in highest quality group by Veterans’ preference status.

(c) Eligibles in the next lower quality group (if the top two groups are merged).

(4) **Pass over and Objection Procedures.** Veterans’ preference is absolute within each quality group. A hiring official is only permitted to select a non preference eligible over a preference eligible if an appropriate objection and/or pass over request, as applicable is sustained. A request to object to or pass over a preference eligible with a compensable service-connected disability of 30 percent or more must be adjudicated by OPM. A request to object to or pass over a non preference eligible or a preference eligible with a compensable service-connected disability of less than 30 percent must be adjudicated by the servicing Human Resources Officer/Director. Objection and pass over procedures based on medical and suitability reasons are described in paragraphs (7) and (8) of this section.

(5) **Objection or Pass over of a preference eligible with a compensable service-connected disability of 30 percent or more.**

(a) The objection to or pass over request must include written justification from the hiring official that fully documents the reason(s) for the objection to or pass over request. Appropriate documentation may include interview notes, questions, reference checks, police reports, qualification standard, etc. and must include Standard Form 62 (SF-62), Agency Request to Pass over a Preference Eligible or Object to an Eligible. The objection to or pass over request, signed by the facility Director, must be sent by the servicing HRO to Director, Recruitment and Placement Policy Service (RPPS) (059).
(b) Upon completing a review of the request, RPPS/059 will forward the request to OPM for adjudication or return the objection to or pass over request to the servicing HR Office without approval. OPM will issue a decision letter that states whether the request is approved or denied. If OPM does not sustain the objection to or pass over request, the hiring official may challenge the decision by submitting additional information to support a favorable decision; or consider/select the preference eligible for a job.

(6) **Objection or pass over of a preference eligible rated less than 30 percent.**

(a) The hiring official must fully document and submit the reason(s) for the objection to or pass over request. It is important to prepare and treat local requests similarly to those submitted to OPM. Appropriate documentation may include interview notes, questions, reference checks, police reports, qualification standard, etc. and must include the SF-62.

(b) The HR Officer/Director is required to document a decision in a formal memorandum for the record that states whether the request is approved or denied and the basis for the approval or denial. The justification documentation should be the same as the documentation submitted for a 30 percent disabled Veteran objection to or pass over request and uploaded and maintained in the recruitment case file in USA Staffing.

(7) **Objection or Pass over Request for Physical or Medical Conditions.**

(a) Requests to object to or pass over any preference eligible based on a physical or medical condition must be adjudicated by OPM. A hiring official may submit a request to object to or pass over a preference eligible when it is believed the applicant may have a physical or medical (including mental) condition that will prevent him or her from performing the full range of essential duties and responsibilities of the position safely and efficiently.

(b) The hiring official must assess whether reasonable accommodation can be provided to permit performance of the job despite the condition when considering whether a physical or medical condition will have an impact on an eligible’s capacity to perform the job efficiently and safely. The servicing HR Office must submit the request, signed by the facility Director, along with thorough supporting documentation to the Office of Personnel Management, Human Capital Leadership and Merit System Accountability Division, Employment Division – Medical Pass overs.

(c) If OPM sustains the objection to or pass over request, the preference eligible must be removed from consideration for the vacant position and the hiring official may select the next available certified preference or non preference eligible on the referral. If OPM does not sustain the objection to or pass over request, the hiring official may challenge the decision by submitting additional information to support a favorable decision; or consider/select the preference eligible for a job.

(8) **Objection or Pass over of a Preference Eligible based on Suitability.**

(a) The servicing HR Office must consult with the VA Office of Operations, Security and Preparedness; Personnel Security and Suitability Service (07C) to determine if an objection to or pass
over is warranted locally for a preference eligible rated less than 30 percent, based on potentially disqualifying suitability information.

(b) A request to object to or pass over a preference eligible with a compensable service-connected disability of 30 percent or more based on suitability must be adjudicated by OPM. The servicing HR Office must submit the request, signed by the facility Director, along with thorough supporting documentation to the VA Office of Operations, Security and Preparedness; Personnel Security and Suitability Service (07C). VA Office of Operations, Security and Preparedness; Personnel Security and Suitability Service (07C) will forward the request to OPM for adjudication or return the request to the servicing HR Office without action, if the request is incomplete. Requests for suitability based actions must be sent to the Department of Veterans Affairs, Director, Personnel Security and Suitability Service (07C), 810 Vermont Avenue, NW, Washington, DC 20420.

4. INTERNSHIP PROGRAM. The Pathways Internship Program provides the opportunity for students to explore Federal careers as paid employees while completing their education in high schools, colleges, trade schools, and other qualifying educational institutions.

   a. Eligibility. Participant must be a student that is accepted for enrollment or enrolled and seeking a degree diploma, certificate, etc. in a qualifying educational institution, on a full or half-time basis (as defined by the institution in which the student is enrolled), including awardees of the Harry S. Truman Foundation Scholarship Program under Public Law 93-842.

      (1) A student need not be in actual physical attendance, so long as all other requirements are met;

      (2) An individual who needs to complete less than the equivalent of half an academic/vocational or technical course-load immediately prior to graduating is still considered a student for purposes of this Program; and

      (3) A student accepted for enrollment who then does not actually enroll for that educational term loses eligibility to receive a Pathways Internship appointment or to remain in one if already appointed unless it falls under the definition of a break in the program as identified in paragraph 4n.

   b. Classification and Qualification Requirements.

      (1) Intern positions under Pathways Programs may only be classified using OPM classification standards for title 5 positions. Intern positions under the G.S. or appropriate pay plan must be classified to the -99 series of the appropriate occupational group. Intern positions under the Federal Wage System must be classified to the -01 series of the appropriate occupational group. The -99 series and -01 series may be classified as one and two grade intervals positions.

      (2) All positions classified to student trainee series, including -99 series and -01 series, must be titled Student Trainee followed by a parenthetical title consistent with the occupational field involved. For example: Student Trainee (Human Resources Management), Student Trainee (Accounting), or Student Trainee (Civil Engineering).
(3) Individuals’ qualifications must be evaluated using the VA Pathways Internship Program Qualification Standard in Appendix II-F4. Interns may be appointed at the highest grade level of the position advertised in which they are qualified.

c. Grade Point Average (G.P.A.). Students must possess an acceptable average G.P.A. as defined by the educational institution to be eligible for appointment and to remain eligible for participation in the Program. As applicable, at the time of appointment and upon request, students must demonstrate an overall Grade-Point Average (G.P.A.) of 2.0 or above on a 4.0 scale as recorded on the official transcript. This equates to “C” or better. G.P.A.’s should be rounded to one decimal place. For example, 1.95 will round to 2.0 making a student eligible for appointment and continuation in the program. A 1.94 will round to 1.9 making a student ineligible for appointment in the Internship Program. For students in educational institutions that do not use a G.P.A. system, the HR Officer/Director or designee should request that the student provide verification of achieving an average or above standing with the institution.

NOTE: Interns appointed prior to the release date of this policy are not required to meet the G.P.A. requirement; however, they must be deemed by their education institution as academically in “good standing” to remain eligible for participation in the Program. If an Internship Program Participant is promoted, demoted, or reassigned into a new Pathways Programs position, he/she must meet the G.P.A requirement.

d. Appointments. Appointments must be pursuant to the VA Pathways MOU using the Schedule D excepted service appointing authority 5 CFR 213.3402(a) and comply with workforce planning efforts. Facilities may make initial appointments of Interns at any grade level consistent with the VA Pathways Internship Program Qualification Standard in Appendix II-F4, depending on the candidates' qualifications and the facility’s needs. The duties of the position to which the individual is appointed must be related to either the Intern's academic or career goals. If the public notice included the option for possible noncompetitive conversion to the competitive service, the Intern should possess and must be working towards meeting the minimum qualifications for the expected position of conversion.

e. Types of Appointments.

(1) Prior to announcing an Internship position, the facility must initially determine the needs of the organization based on documented workforce planning efforts. The Internship Program may be used to meet long term and temporary staffing needs.

(2) Facilities may appoint an Intern without time limitation for an initial period expected to last more than 1 year. Intern appointments are not required to have an end date (i.e., not to exceed (NTE) date). However, facilities are required to specify an end date of the appointment in the Participant Agreement with the Intern.

(3) Facilities may appoint an Intern on a temporary basis, not to exceed (NTE) 1 year, to complete temporary projects, to perform labor-intensive tasks not requiring subject-matter expertise, or to fill traditional summer jobs. Interns appointed on a temporary basis, not to exceed 1 year, must be coded with a not to exceed date which is the ending date. Facilities may fill these temporary appointments and extend them without regard to service limits and restrictions in 5 CFR 213.104.
f. Appointments into Internship Program Positions with Positive Education Requirements.

(1) A positive education requirement is minimum educational requirement in a qualification standard that is established when the work cannot be performed by a person who does not possess the prescribed minimum education.

(2) An Internship JOA may include educational eligibility criteria if the position is targeted for conversion to a position that has a positive education requirement. This means that the facility may indicate that only applicants who have completed and those who are currently completing certain required course work are eligible for the Pathways appointment. The JOA should clearly state that the positive education requirement is not a minimum qualification requirement, but that possession of the coursework (completed and/or in progress) is based on the targeted position’s occupational qualification standard. The JOA must identify the targeted position and a statement about the possibility of conversion to the competitive service.

(3) For positions that do not have positive education requirements, agencies may not impose education degree requirements or require that specific courses have been, or will be, taken as an eligibility requirement. The agency may indicate in the Pathways job opportunity announcement that they seek or prefer candidates who are pursuing specific degree paths or courses. However, agencies must follow the selection procedures in 5 CFR, part 302, before making a selection.

g. Compensation. Pay setting policies are covered in VA Handbook 5007, Pay Administration. Since education is the primary basis for qualifications for the Pathways Internship Program, it is not appropriate to use superior qualifications or special needs pay setting authority in 5 U.S.C. 5333 to set the basic pay for the initial appointment of an individual to the Intern Program. Pay for initial appointments for Interns as a civilian employee of the Federal Government must be set using the payable rate of basic pay (regardless of tenure) at the minimum rate of the highest applicable rate range for the Intern’s position of record.

h. Eligibility for Within-Grade Increases. Participants in temporary Internship Program positions limited to 1 year or less are not eligible for within-grade increases. See VA Handbook 5007, Pay Administration, Part III, Chapter 5.

i. Promotion.

(1) Advancement to a position at a higher grade level (except for a career ladder promotion) or to a position with higher known promotion potential requires public notification and selection procedures under which 5 CFR, part 302 rules apply.

(2) Temporary Interns on appointments not to exceed 1 year are not eligible for promotion, but may be eligible for a new appointment in a position at a higher grade.

j. Career Ladder Promotion. Interns without time limits may be noncompetitively promoted to a higher graded Intern position, prior to conversion, upon meeting the qualification and performance requirements. The target grade level and eligibility of promotion potential must have been
communicated in the JOA in order for an Intern to receive consideration for a noncompetitive promotion while serving in the program. Career ladder promotion is strictly at the supervisor’s discretion. To qualify for promotion, the Intern must meet the experience and/or education requirements and must be performing at a fully satisfactory level.

k. **Reassignment and Demotion.** See paragraph 2(z) of this appendix.

l. **Extensions of Interns Appointed on a Temporary Basis (Not to Exceed 1 year).** Facilities must use discretion in extending temporary Interns past the original not-to-exceed date considering the basis for the appointment. It is not appropriate to affect extensions to circumvent public notice requirements meaning that temporary appointments may be extended as long as the facility can document that the justification of the original appointment remains (i.e., temporary project has not been completed, to perform labor-intensive tasks not requiring subject-matter expertise, or to fill traditional summer jobs). Within 10 calendar days of affecting the extension, the Pathways Participant Agreement must be updated and signed by all parties. HR Offices may not extend the not-to-exceed date of any Intern that has completed his/her academic program unless the Intern meets the definition of the student in accordance with 5 CFR 362.202.

m. **Work Schedules.** There are no limitations on the number of hours an Intern can work per week as long as any applicable laws and regulations governing overtime and hours of work are adhered to. Hiring officials/supervisors and students must agree on a formally-arranged schedule of school and work so that:

1. Work responsibilities do not interfere with academic schedule.

2. Completion of the educational program (awarding of diploma/certificate/degree) and the Internship Program is accomplished in a reasonable and appropriate timeframe.

3. The facility-level Pathways Programs Coordinator and hiring official are informed of and prepared for the student's periods of employment.

4. Requirements for noncompetitive conversion to a term or permanent position in the competitive service are understood by all parties.

n. **Break in the Program.**

1. A break in the program is defined as a period of time when an Intern is working, but is unable to go to school. It also includes a period of time when the Intern is neither attending classes nor working for the Department. With the exception of the traditional summer break or similar holiday breaks, an Intern must submit a request for break in the program to his/her supervisor for approval/disapproval. The supervisor must document the approval/disapproval and sign the request. If the supervisor grants the request, the Intern will be placed in an approved Leave without Pay (LWOP) status. If the request for LWOP is denied the Intern may choose to resign; the facility may end the Intern appointment; or the Intern may make a request with the supervisor to arrange a new work schedule.
(2) The supervisor is advised to consult with the facility-level Pathways Program Coordinator (PPC) for a technical review of the request. This will assist in ensuring that the break in program does not result in the student becoming ineligible for the Internship Program. The facility-level PPC may consult with the Administration PPO to advise on the technical implications of granting or denying the request.

o. **Training and Development.** Pathways regulations do not require a minimum number of training hours for Interns appointed without time limits (i.e., not serving on a not-to-exceed appointment). However, for these Interns, supervisors are not required, but highly encouraged, to establish individual development plans (especially for those serving in career ladders) and must identify training requirements in the Participant Agreements. Supervisors must ensure that training requirements can be completed during the Intern’s scheduled work hours and during the Intern’s appointment.

p. **Conversion to the Competitive Service.**

(1) Hiring facilities may noncompetitively convert an Intern (indefinite or temporary) who is a U.S. citizen or national, to a term or permanent appointment in the competitive service. If the Intern is initially converted to a term position, the facility may later convert the Participant to a permanent position.

(2) In order to offer a noncompetitive conversion, the JOA must have communicated the possibility of noncompetitive conversion and other pertinent information about the permanent placement position. This pertinent information includes the occupational series, initial grade(s) of the position targeted for conversion; and any career ladder eligibility of the targeted position. Pathways positions do not lead to permanent placement to positions in the Excepted Service.

**NOTE:** Conversions of temporary Interns should be rare as Interns appointed with not to exceed dates are appointed for the purpose of completing temporary projects, perform labor-intensive tasks not requiring subject matter expertise, or to fill traditional summer jobs. As with any time-limited appointment the not-to-exceed date should coincide with the anticipated ending date of the project or with the expected date of completion of the academic program. In the case that an Intern is eligible to receive a noncompetitive conversion to the competitive service, the Intern may serve up to 120 calendar days beyond the date of completion of the designated academic program. However, the not-to-exceed date may not be extended after the academic program is completed and the HR Office must plan to convert the Intern prior to the expiration date of the appointment. The appointment expires on the not-to-exceed date. If the Intern is not converted before or on the not-to-exceed date, then the appointment expires on the not-to-exceed date.

(3) An Intern may be converted to a position within VA or another federal agency. If a VA Intern is converted in another agency, the parameters for the conversion are based on the gaining agency’s policies and procedures. Facility-level PPC should consult with their respective Administration PPO prior to noncompetitively converting an Intern from another agency. Although it may not be available or provided, the facility must request the following documentation from the losing facility or agency:

(a) The original JOA to confirm if conversion eligibility was offered and to confirm targeted grade, and targeted occupation for conversion,
(b) The Participant Agreement,

(c) The Individual Development Plan (if applicable), and

(d) Performance Appraisal (if applicable)

(4) In general, to be eligible for conversion to the competitive service, the Intern must:

(a) Complete at least 640 hours of work experience acquired through the Internship Program while enrolled as a full-time or part-time, degree- or certificate-seeking student.

NOTE: Up to 320 hours may be waived or credited as outlined in paragraphs 4r and 4s.

(b) For Interns appointed without time limits, complete academic requirements (as determined by the educational institution), within the 120-day period preceding the appointment, at a qualifying educational institution conferring a diploma, certificate, or degree.

NOTE: Temporary Internship appointments (i.e., with a not-to-exceed date) do not provide the 120-day conversion period. These appointments expire on the date the appointment expires.

(c) Receive a favorable recommendation for appointment by the first line or second line supervisor for which the Intern served.

(d) Fully meet the VA or OPM qualification standards for the position to which the Intern will be converted.

(e) Fully meet any VA-specific requirements as specified in the Participant Agreement with the Intern.

(5) An Intern may be converted to a position with an established career ladder as long as the public notification identified the selectee’s eligibility for noncompetitive for conversion and identified the targeted grade career ladder.

q. Conversion to the Competitive Service based on Superior Academic Achievement (S.A.A.).

(1) Upon completion of all of the requirements of the Program and a bachelor's degree from an accredited college or university, an Intern may be converted to a term or permanent GS-7 grade level position using the Superior Academic Achievement (S.A.A.) provision. This does not prohibit conversion at a higher grade for which the Intern is qualified for, but provides an opportunity to convert Interns at the grade level that is most advantageous for the Intern and VA. This provision is outlined in its entirety in the OPM Operating Manual for Qualification Standards for General Schedule Positions and covers advanced trainee positions that provide opportunities for advancement upon attaining required job skills and knowledge, require no prior experience, and have work classified at two-grade intervals. The S.A.A. provision recognizes students who have achieved superior academic standing as evidenced by one of the three methods described below. In order to be creditable under this provision, S.A.A. must have been gained in a curriculum that is qualifying for the position to be filled. S.A.A. is
based on (1) class standing, (2) Grade Point Average (G.P.A.), or (3) honor society membership. They are described as follows:

(a) **Class standing.** Individuals must be in the upper third of the graduating class in the college, university, or major subdivision, such as the College of Liberal Arts or the School of Business Administration, based on completed courses.

(b) **G.P.A.** Individuals must have a G.P.A. of:

1. **3.0 or higher out of a possible 4.0 ("B" or better)** as recorded on their official transcript, or as computed based on 4 years of education, or as computed based on courses completed during the final 2 years of the curriculum; or

2. **3.5 or higher out of a possible 4.0 ("B+" or better)** based on the average of the required courses completed in the major field or the required courses in the major field completed during the final 2 years of the curriculum.

**NOTE:** The G.P.A. is to be rounded to one decimal place. For example, 2.95 will round to 3.0 and 2.94 will round to 2.9. In addition, some institutions may use a pass/fail grading system for some or all courses, these provisions are outlined in *OPM Operating Manual for Qualification Standards for General Schedule Positions*.

(c) **Election to membership in a national scholastic honor society.** Individuals may be considered eligible based on membership in one of the national scholastic honor societies listed below. These honor societies are listed in *OPM Operating Manual for Qualification Standards for General Schedule Positions*.

r. **Waiver of Service Requirement.**

1. VA facilities may noncompetitively convert an Intern to a term or permanent appointment by waiving up to one-half (i.e., 320 hours) of the 640-hour minimum service requirement when an Intern completes 320 hours of career-related work experience under an Internship Program appointment and demonstrates high potential by outstanding academic achievement and exceptional job performance as provided in 5 CFR 362.204(d).

2. VA facilities may not be granted a credit or waiver (or a combination of a credit and waiver) totaling more than 320 hours of the 640-hour service requirement. VA facilities must submit a request for a waiver of up to one-half of the minimum service requirement to the headquarters VA PPO.

s. **Credit for Non-Federal Internship Experience.** VA facilities may evaluate, consider, and grant credit for up to one-half (320 hours) of the 640-hour Pathway’s Intern Program requirement for comparable non-Federal internship experience in a field or functional area directly related to the student's target position and experience acquired while the student met at least one of the following requirements:
(1) Worked in, but not for, a Federal agency, pursuant to a formal internship agreement, comparable to the Pathway’s Internship Program, between the agency and an accredited educational institution.

(2) Worked in, but not for, a Federal agency, pursuant to a written contract with a third-party internship provider officially established to provide internship experiences to students that are comparable to the VA Internship Program.

(3) Served as an active duty member of the armed forces (including the National Guard and Reserves), as defined in 5 U.S.C. 2101, provided the Veteran’s discharge or release is under honorable conditions.

(4) Participated in student volunteer service, as defined in 5 CFR, part 308 and/or other Federal programs designed to give internship experience to students (e.g., fellowships and similar programs), may be evaluated, considered, and credited service when it is determined the experience is comparable to experience gained in the Pathway’s Internship Program.

(5) Hiring facilities must submit requests for determination of credit for comparable experience acquired by an Intern in a non-Federal or student volunteer service program to the headquarters VA PPO for determination of credit.

t. Treatment of Third-party Interns. VA facilities may enter into arrangements with third-party Intern providers as part of their overall Intern Program recruiting strategy to have diverse pipelines by drawing candidates from all segments of society. E.O. 13562 encourages agencies to allow third-party provided Interns to participate in their Internship programs to the same extent as the Interns the agency hires itself. This means that third-party provided Interns must get the same access to training, career development, and mentoring as other VA Interns.

u. Setting Pay Upon Conversion.

(1) After completion of the Program requirements and upon conversion, the payable rate of basic pay should be set at the minimum rate of the highest applicable rate range of the position. However, the payable rate of basic pay of a newly converted Intern may be set above the minimum rate of the grade, if the Intern meets one of the following criteria:

(a) The Intern has superior qualifications based on the level, type, or quality of the Intern's skills or competencies demonstrated or obtained through experience and/or education, the quality of the candidate's accomplishments compared to others in the field, or other factors that support a superior qualifications determination. The Intern's skills, competencies, experience, education, and/or accomplishments must be relevant to the requirements of the position to be filled. These qualities must be significantly higher than that needed to be minimally required for the position for which being converted to.

(b) The Intern fills a special agency need if the type, level, or quality of skills and competencies or other qualities and experiences possessed are relevant to the requirements of the position. An Intern may also meet the special needs criteria by meeting the VA mission, goal, program activity or workforce needs, as documented in the VA's strategic human capital plan.
(2) The decision to use the superior qualifications and special needs pay-setting authority must be made prior to the conversion and approved in writing prior to the conversion date. Decisions must be made in accordance with and the manner as prescribed in VA Handbook 5007, Pay Administration, Part II, Chapter 3, paragraph 4.

v. **Reduction in Force.** Interns are covered by 5 CFR, part 351 for purposes of RIF.

(1) An Intern serving under an appointment for an initial period expected to last more than 1 year is in excepted service Tenure Group II.

(2) A temporary Intern, serving under an appointment not to exceed 1 year, who has not completed 1 year of service, is in excepted service Tenure Group 0.

(3) A temporary Intern serving under an appointment not to exceed 1 year, who has completed 1 year of current, continuous service, is in excepted service Tenure Group III.

w. **Termination in Appointment.** As a condition of employment, an Intern appointment expires when one of the following circumstances occur:

(1) For an Intern appointed without limitations, the appointment ends 120 calendar days after completion of the designated academic course of study, unless the Participant is selected for noncompetitive conversion under 5 CFR 362.204.

(2) For a temporary Intern appointed with a not to exceed date, the appointment ends upon expiration of the temporary Internship appointment or when the justification of the temporary appointment is no longer supported.

(3) The date an Internship Program Participant fails to meet the eligibility requirements for the Internship Program.

5. **RECENT GRADUATES PROGRAM.**

a. **Program Eligibility.** A Recent Graduate is an individual who obtained a qualifying associates, bachelors, master's, professional, doctorate, vocational or technical degree or certificate from an accredited, qualifying educational institution, within the previous 2 years or other applicable period. An individual must meet one of the following criteria to receive consideration for eligibility requirements:

(1) Except as provided in paragraph 5(a)(2), an individual may apply for a position in the Recent Graduates Program only if the individual's application is received not later than 2 years after the date the individual completed all requirements of an academic course of study leading to a qualifying associates, bachelor's, master's, professional, doctorate, vocational or technical degree or certificate from an accredited, qualifying educational institution.

(2) A Veteran, as defined in 5 U.S.C. 2108, who, due to a military service obligation, was precluded from applying to the Recent Graduates Program during any portion of the 2-year eligibility period described in paragraph 5(a)(1) shall have a full 2-year period of eligibility upon his or her release or
discharge from active duty. In no event, may the individual's eligibility period extend beyond 6 years from the date on which the individual completed the requirements of an academic course of study.

b. **Classification and Qualification.** Facilities must evaluate individuals using only OPM title 5 Qualification Standards for the occupation and grade level of the position being filled. The position must provide a career ladder with progressively more responsible duties that provide career advancement opportunities. HR Offices may not adopt or develop their own qualification standards for positions filled through the Pathways Recent Graduates Program. Candidates must fully meet the qualification requirements of the grade level and occupation for appointment.

c. **Administrative Careers With America (ACWA).**

(1) Recent Graduate positions at the GS-5 and/or GS-7 grade levels subject to the *Luevano Consent Decree* must be filled using Decree-permitted rating schedules and assessment tools. The Decree requires that Federal hiring offices use such alternate examining procedures when filling those positions, whether in the title 5 competitive or excepted service.

(2) Though it is generally not mandatory for a VA hiring facility to work through a VA Delegated Examining Unit (DEU) to fill title 5 excepted service positions, due to Administrative Careers With America (ACWA) test security requirements, a hiring facility must arrange with a VA DEU to use the Decree-permitted ACWA examinations for any Decree-covered positions. The [OPM Operating Manual for Qualification Standards for General Schedule Positions](https://www.opm.gov/recruitment/qualifications/) lists the Decree-covered occupations for which the ACWA examinations (or other valid assessment) are mandatory. Any other proposed assessment tool must be reviewed and approved by the Director, Recruitment and Placement Policy Service and the VA Office of General Counsel.

(3) An appropriately assigned VA Delegated Examining Unit (DEU) must administer the ACWA assessment. The process for announcing one of these positions is as follows:

(a) If the grade recruited for is at the GS-5 or GS-7 grade level and the position is targeted to the GS-9 or above, the HR Office will prepare the DEU request to indicate Recent Graduate.

(b) Job analysis and category rating definitions are not required as the ACWA assessment serves as the job analysis.

(c) The DEU Office will review the applications for qualifications and eligibility and will issue a referral certificate based on numerical scores.

(d) When making a selection using numerical scores, the facility must comply with 5 CFR 302.401, to make a selection from the three applicants with the highest scores, as long as the three applicants are still interested and available.

d. **Appointment.**

(1) Facilities may appoint a Recent Graduate for 1 year using the excepted service appointing authority provided by 5 CFR 213.3402(b). An appointment to the Recent Graduate program may be
extended for a period up to an additional 120 calendar days to cover rare or unusual circumstances or situations: failure to complete the IDP in the time allotted due to administrative difficulties or other necessities of the service; or documented personal issues dealing with family death or medical obligations that would hinder program completion.

(2) OPM may approve an agency’s Recent Graduate programs to have a duration up to 2 years in length, if a longer program is justified and warranted. Requests to OPM for Recent Graduate programs that extend up to 2 years must be submitted to the VA PPO.

(3) Facilities may make appointments to the Recent Graduates Program, pursuant to the Pathways MOU executed with the OPM, under Schedule D of the excepted service in accordance with 5 CFR, part 302.

(4) Facilities may make an initial appointment of a Recent Graduate to any position filled under this authority for which the Recent Graduate qualifies, up to the GS-9 grade level (or equivalent under another pay and classification system, such as the Federal Wage Grade System).

(5) Initial appointments to positions for science, technology, engineering, or mathematics (STEM) occupations may be made at the GS-11 level, if the candidate possesses a Ph.D. or equivalent degree directly related to the STEM position the HR Office is seeking to fill.

(6) Initial appointments to scientific and professional research positions at the GS-11 level for which the classification and qualification criteria for research positions apply, if the candidate possesses a master's degree or equivalent graduate degree directly related to the position the agency is seeking to fill.

(7) Initial appointments to scientific and professional research positions at the GS-12 level for which the classification and qualification criteria for research positions apply, if the candidate possesses a Ph.D. or equivalent degree directly related to the position the agency is seeking to fill.

(8) The duration of the Recent Graduate’s appointment in the excepted service is a trial period.

(1) If a selectee is currently employed as a civilian in the Federal Government and his/her current rate of basic pay would otherwise be reduced as a result of placement in the Recent Graduate position, pay retention provisions under 5 CFR, part 536, subpart C, may apply in setting the pay. Pay retention applies to any employee whose rate of basic pay would otherwise be reduced (after application of any applicable geographic conversion under 5 CFR 536.303(a)) as a result of a management action that places an employee in a formal employee development program generally utilized governmentwide. The Recent Graduates Program meets the definition of a formal employee development program.

(2) An “employee” means an individual whose employment immediately prior to the appointment was on other than a temporary or term appointment. According to 5 CFR 536.103, a management action includes an employee’s placement in or transfer to a position under a formal employee development program established by an agency for recruitment and employee advancement purposes is considered a
management action even though the employee initiates or requests such placement or transfer. See VA Handbook 5007, Pay Administration, Part III, Chapter 6, for pay retention guidance.

f. Individual Development Plan (IDP), Mentorship, and Formal Training Requirements.

(1) The supervisor must ensure, within 45 calendar days of appointment, that an IDP has been developed, approved, and issued to the Recent Graduate.

(2) Within 90 calendar days of a Recent Graduate’s appointment, the supervisor will assist in the assignment of a mentor, who is an appropriate employee, outside the Recent Graduate’s chain of command. The mentor relationship is a formal, structured relationship and should comply with any Administration or local policies regarding mentors.

(3) The supervisor must arrange and provide for at least 40 hours of formal interactive training per year during the Recent Graduate’s appointment that advances the goals and competencies outlined in her/his IDP and are related to the position. Mandatory annual training, such as information security and ethics training, does not count towards the 40-hour requirement. Interactive training includes communication between the participants and/or the instructor and this training may be provided on-line or in-person.

g. Work Schedules. Recent Graduate positions are full-time positions. Recent Graduate appointments are designed to last 1 year unless an extended program or extension is approved. A part-time work schedule or extensive leave without pay would impact a Recent Graduate Participant’s ability to complete the required work and developmental assignments. Requests for part-time work schedules must be reviewed and approved by the VA PPO. In the event a part-time schedule is approved, the servicing HR Office must require the Participant to sign a statement of understanding that outlines the negative implications of changing to a part-time work schedule.

h. Movements During the Recent Graduate Program.

(1) Separation of a Recent Graduates participant to a new VA facility/station or Federal Agency.

(a) During the program, a current Recent Graduate participant may be selected for a different Recent Graduate position with another VA facility/station or another Federal agency. It is the responsibility of the Recent Graduate to ensure that the new Federal agency/department meets all the requirements (i.e., current MOU, opportunities for permanent placement, etc.) as described in 5 CFR, part 362 for participating in the Recent Graduates Program.

(b) To move to a new VA facility/station or Federal agency, an appropriate personnel action must be processed to separate the Recent Graduate from the current VA facility.

(c) The new employing VA facility/station or Federal agency must convert or appoint the Recent Graduate on a Pathways excepted appointment without a break in service. The time served under the previous Recent Graduates Program is creditable towards the new Program requirements for noncompetitive conversion eligibility to the competitive service. Because there is no break in service,
the Recent Graduate will not begin a new period in the Program upon moving to the new VA facility/station or Federal agency.

(d) The new employing VA facility/station must identify and explain to the Recent Graduate the requirements for Program completion and eligibility for noncompetitive conversion and execute a new Pathways Participant Agreement.

i. Accession of a Recent Graduate from another VA facility/station or Federal Agency.

(1) When a VA facility hires a current Recent Graduate program participant from another VA facility/station or Federal agency for a new Recent Graduate appointment, the gaining facility must convert or appoint the Recent Graduate under a Pathways excepted appointment. The gaining facility must request and verify all documentation required to appoint the Recent Graduate (i.e., transcripts); request a copy of the current appointment SF-50 (placing the Recent Graduate); and request a copy of the current Participant Agreement and IDP.

(2) The gaining VA facility/station must appoint the Recent Graduate on a Pathways excepted appointment without a break in service. The time served under the previous VA facility/station or Federal agency’s Recent Graduates Program is credited toward the new Program requirements for noncompetitive conversion eligibility to the competitive service. Because there is no break in service, the Recent Graduate will not begin a new period in the Program upon moving to the gaining facility.

(3) The gaining VA facility must identify and explain to the Recent Graduate participant the requirements for Program completion and eligibility for noncompetitive conversion and execute a new Pathways Participant Agreement.

j. Conversion to the Competitive Service.

(1) Facilities may noncompetitively convert a Recent Graduate who is a U.S. citizen or national to a competitive service term or permanent position when the Recent Graduate meets all of the following requirements:

(a) Successfully completes at least 1-year of continuous service in addition to all the requirements of the Recent Graduates Program. The 1-year period allows the completion of the trial period upon conversion; therefore, no further probationary and/or trial period following conversion is required.

(b) Demonstrates successful job performance consistent with the performance appraisal program that results in a rating of record (or summary rating) of at least Fully Successful or equivalent and a recommendation for conversion by the first-level supervisor.

(c) Meets the OPM Qualification Standard for the competitive service position to which the Recent Graduate will be converted.

(2) Hiring facilities must make the noncompetitive conversion effective on the date the service requirement is met, or at the end of an approved extension, if applicable. Extensions of the program are approved by the headquarters VA PPO.
(3) Recent Graduates may be converted to a career ladder position as long as the career ladder eligibility (i.e., target grade) was included in the original JOA.

(4) If the Recent Graduate is initially converted to a term position, the facility may later convert the Participant to a permanent position.

NOTE: Hiring facilities may convert a Recent Graduate within VA, but may not convert a Recent Graduate from another Federal agency. In addition, converting an individual to a term position is intended to cover instances where budgets and other workforce requirements preclude a hiring official from converting an individual to a permanent position.

k. Reduction in Force.

(1) Recent Graduates are in excepted service Tenure Group II in accordance with 5 CFR 351.502.

(2) Recent Graduate’s appointment expires at the end of the Program period prescribed by the facility, plus any approved extensions, unless the Participant is selected for noncompetitive conversion under 5 CFR 362.306.

l. Termination of Appointment.

(1) As a condition of employment, a Recent Graduate appointment expires at the end of the 1-year or 2-year Program period as applicable, plus any approved extension, unless the Recent Graduate is selected for noncompetitive conversion under 5 CFR 362.306. Extensions of the program are approved by the headquarters VA PPO.

(2) A Recent Graduate who held a career-conditional or career appointment in VA immediately before entering the Program, and fails to complete the Program for reasons that are not related to misconduct, poor performance, or suitability, may, at the request of the of the Recent Graduate or supervisor, be placed noncompetitively in a permanent competitive service position, as appropriate, within VA. The position identified for noncompetitive placement must be at a grade no higher than a position the employee has held on a permanent basis in the competitive service and must not have higher known promotion potential.

6. PRESIDENTIAL MANAGEMENT FELLOWS (PMF) PROGRAM. The PMF Program is a prestigious Federal program designed to attract outstanding men and women from a variety of academic disciplines and career paths who have a clear interest in, and commitment to, excellence in the leadership and management of public policies and programs in the Federal service. PMF positions are considered entry-level positions for individuals with advanced degrees. OPM administers the application process for the PMF Program. The VA PMF Coordinator and Administration PPOs oversee PMF hires in VA.

a. Establishing a Need for a PMF.

(1) PMF appointments are designed to meet workforce planning needs for leadership and management in the public service.

II-N-30
(2) When establishing the need for a PMF appointment, supervisors and management officials in collaboration with human resources officials, will determine the following:

(a) Determine if the use of a PMF appointment will help meet the long-term and short-term workforce needs of the organization.

(b) Determine if the facility has the resources to hire, support and fund the professional development requirements of the program.

(c) Design formal training and development plans and performance plans for PMF positions that comply with 5 CFR 362.405.

b. Eligibility. A person is eligible for consideration for the PMF if he/she meets the following criteria:

(1) An individual who, within the previous 2 years, completed an advanced degree (i.e., masters, professional, or doctorate) from a qualifying educational institution is eligible to apply for the PMF program.

(2) An individual may also apply for the PMF Program, if the individual is still a student attending a qualifying educational institution, and he/she expects to meet the advanced degree requirements (even though he/she has not graduated), including the completion or successful defense of any required thesis or dissertation, are eligible to apply. Eligibility is based on completion of degree requirements by August 31 of the following year of the annual application.

(3) An individual may apply for the PMF Program more than once as long as he/she meets the eligibility criteria. However, if an individual becomes a finalist and subsequently applies for the Program during the next open PMF announcement, the individual will forfeit his or her status as a finalist upon accessing the on-line assessment.

c. Classification. A qualified PMF may be appointed in an administrative, technical or professional two-grade interval position in the General Schedule (GS) System or the Federal Wage Grade (WG) System, at the GS-9, GS-11, or GS-12 grade level, as appropriate.

d. Announcement.

(1) OPM administers the application process for the PMF Program and conducts a competition for the selection of Finalists. OPM will make the qualification determination for PMF finalists at the GS-9 grade level.

(2) OPM selects PMF finalists based on an OPM evaluation of each candidate's experience and accomplishments according to his/her application and the results of a rigorous structured assessment process. OPM publishes and provides the PMF finalists list for appointment consideration to the VA PMF Coordinator.
(3) Hiring facilities who service organizational entities wishing to recruit PMFs that have been certified by OPM will work with their designated facility-level PPC to arrange with the VA PMF Coordinator for the posting of a job description for PMF openings that include the grade levels for hiring and promotion potential in OPM’s Talent Acquisition System.

e. Selection.

(1) OPM will send VA an unranked alphabetical list of Finalists for consideration. The list will include individual resumes and any supporting documentation of all PMF Finalists.

(2) The VA PMF Coordinator is responsible for advising selecting officials and HR Specialists on Veterans’ preference in accordance with 5 CFR, part 302 to the unranked alphabetical Finalists’ list to ensure that the core principles of the Program are upheld.

(3) The VA PMF Coordinator will annotate the adjudicated Veterans’ preference status on the list of Finalists given to hiring officials. The following annotations will be used to indicate the Veterans’ preference status of Finalists:

(a) CPS: 10-point compensable preference based on a service-connected disability of 30% or more;

(b) CP: 10-point compensable preference based on a service-connected disability of 10% or more, but less than 30%;

(c) XP: 10-point (other) preference; granted to recipients of the Purple Heart, persons with a non-compensable service-connected disability (less than 10%), widow/widower or parent of a deceased Veteran, or spouse or parent of a disabled Veteran; and

(d) TP: 5-point preference.

NOTE: Although a sole survivorship preference (SSP) Veteran does not receive preference points, he/she is listed ahead of non-preference eligibles with the same score on an examination or ahead of non-preference eligibles under category rating procedures.

(4) If a PMF who is a preference eligible expresses an interest in a specific PMF position, he/she must receive consideration. “Expresses an interest” means the Finalist has initiated contact with a facility or the VA PMF Coordinator and requests consideration for appointment to a specific position in VA. All contacts from interested Finalists should be directed to the VA PMF Coordinator.

(5) When multiple candidates are being considered for the same position, consideration must be given as follows: first, to preference eligibles having a service-connected disability of 10% or more; second, to other 10-point preference eligibles; third, to 5-point preference eligibles; and then to non-preference eligibles. When fewer than three candidates remain in the highest category, consideration may be expanded to include the next category.

(6) A preference eligible may only be removed from consideration if it can be demonstrated that the preference eligible is not qualified for the position or declines further consideration. When a preference.
eligible is removed from consideration for this reason, that decision must be documented in writing and provided to the VA PMF Coordinator.

(7) When a Finalist list contains preference and non-preference eligibles, the hiring official must only be provided the name(s) of the preference eligible PMF finalists for consideration. The VA PMF Coordinator may provide the names of the non-preference PMF finalists after the list with the preference eligible PMF Finalists has been exhausted following proper pass over and objection requests.

(8) A hiring official is only permitted to select a non-preference eligible over a preference eligible if an appropriate objection and/or pass over request, as applicable is sustained. A request to object to or pass over a preference eligible with a compensable service-connected disability of 30 percent or more must be adjudicated by OPM. A request to object to or pass over a non-preference eligible or a preference eligible with a compensable service-connected disability of less than 30 percent must be adjudicated by the servicing Human Resources Officer/Director. Objection and pass over procedures based on medical and suitability reasons are described Referral and Selection Procedures, Paragraphs 3(7) and 3(8) of this appendix.

(9) Selection of a PMF for any position that is centralized to the Secretary of Veterans Affairs, the Under Secretary for Health, Under Secretary for Benefits, or the Under Secretary for Memorial Affairs requires the respective official’s prior approval. (Current lists of centralized positions are available in VA Handbook 5001, General Introduction and Administration, Part II).

f. Appointment.

(1) PMFs are given 2-year appointments at the GS-9, GS-11, or GS-12 level (or equivalent under the WG), in the title 5 excepted service under 5 CFR 213.3402(c). The grade level depends on the PMF’s qualifications. Hiring facilities may extend a PMF’s appointment for up to 120 calendar days to cover rare or unusual circumstances or situations. Extensions of the program are approved by the headquarters VA PPO.

(2) Attorney positions, GS-905, in the excepted service, are outside the PMF Program's hiring authority; therefore, PMF finalists cannot be appointed or converted into attorney positions.

g. Work Schedule. PMF positions are full-time positions. A part-time work schedule or extensive leave without pay would impact a PMF’s ability to complete the required work and developmental assignments. Requests for part-time work schedules, with concurrence of the VA PMF Coordinator, may be approved under certain and/or rare circumstances.

h. Individual Development Plan (IDP), Mentorship, and Formal Training Requirements.

(1) In consultation with the VA PMF Coordinator, the supervisor must ensure, within 45 calendar days of a PMF’s appointment, that he/she has developed with the PMF, an approved IDP stating the specific developmental activities on which the PMF and her/his supervisor have mutually agreed upon.

(2) Within 90 calendar days of a PMF’s appointment, the supervisor will assist in the assignment of a mentor, who is an appropriate employee, outside the PMF’s chain of command. The mentor relationship...
is a formal, structured relationship and should comply with any Administration or local policies regarding mentors.

(3) The supervisor must arrange and provide for at least 80 hours of formal interactive training per year during the PMF’s 2-year appointment that advances the goals and competencies outlined in her/his IDP. Mandatory annual training, such as information security and ethics training, does not count towards the 80-hour requirement. Interactive training includes communication between the participants and/or the instructor and this training may be provided on-line or in-person.

(4) The hiring facility must provide each PMF with at least one rotational or developmental assignment with respect to these requirements:

(a) Each PMF must receive at least one rotational or developmental assignment of 4 to 6 months in duration, with management and/or technical responsibilities consistent with the PMF's IDP. As an alternative, a PMF may choose to participate in a VA-wide initiative or other Presidential or Administration initiative that will provide the PMF with the experience he/she would have gained through the 4-to-6-month developmental assignment; and

(b) The rotational or developmental assignment may be within the PMF’s organization, in another VA component, or in another Federal department/agency. In advance of making the appointment, a VA facility that hires a PMF should discuss with the PMF the anticipated range of organizational locations where the Finalist may expect to complete a developmental rotation.

(5) The PMF may receive other short-term rotational assignments of 1 to 6 months in duration, at the facility's discretion.

(6) Upon the request of OPM, the appointing facility must make a PMF available to assist in the assessment process for subsequent PMF classes. Any interactive training provided to a PMF in connection with assisting OPM in the assessment process may count toward the minimum 80-hour training requirement.

(7) Guidance on the professional development requirements of the PMF Program will be made available to hiring facilities by the VA PMF Coordinator.

i. **Promotion.** Any PMF serving on a career ladder who meets promotion requirements in VA Handbook 5005, Staffing, Part III, may be promoted. However, this provision does not confer an entitlement to a promotion.

j. **Certification of Completion of Program.**

(1) Upon completion of the PMF Program, the facility-level PPC should notify the Administration PPO. The VA PMF Coordinator will review and facilitate the certification request to the VA Executive Resources Board (ERB). In addition, the PMF must be evaluated by the VA ERB to determine whether it can certify in writing that the PMF has met all of the requirements of the Program, including the performance and developmental expectations set forth in the performance plan and IDP. The VA ERB may consult the PMF’s mentor in reaching its determination.
(2) The VA ERB must notify the PMF of its decision regarding certification of successful completion and the ERB certification must be forwarded to OPM.

(3) If the VA ERB decides not to certify a PMF, the PMF may request reconsideration of that determination from the OPM Director. Such reconsideration must be requested in writing, with appropriate documentation and justification, within 15 calendar days of the date of the decision by the VA ERB.

(4) The final decision on reconsideration by the OPM Director is not subject to appeal.

(5) The PMF may continue in the Program pending the outcome of the request for reconsideration. The agency must continue to provide appropriate developmental activities during this period.

k. **Extension of Program.** A PMF must complete the Program within the 2-year time limit prescribed, including any approved extensions. VA may extend a PMF's appointment for up to 120 calendar days to cover rare or unusual circumstances or situations, such as the PMF being unable to complete the IDP in the time allotted due to administrative difficulties or other necessities of the service, or officially documented personal issues dealing with family death or medical obligations that would hinder program completion. Extensions of the program are approved by the headquarters VA PPO.

l. **Conversion to the Competitive Service.** A PMF must complete the Program within the time limits prescribed 5 CFR 362.409, including any approved extensions. At the conclusion of that period, an ERB-certified PMF that did not have a break in service may be converted to a competitive service term or permanent appointment. Converting a PMF to a term position is intended to cover instances where budgets and other workforce requirements preclude a hiring official from converting an individual to a permanent position. PMF’s initially converted to a term position, the facility may later convert the Participant to a permanent position. VA HR Offices may not convert PMF’s from other Federal agencies.

m. **Reduction in Force.** PMFs are in the excepted service Tenure Group II for purposes of the order of retention for excepted service. (See 5 CFR 351.502).

n. **Termination of Appointment.**

(1) A PMF may be terminated for reasons related to misconduct, poor performance, or suitability.

(2) As a condition of employment, a PMF's appointment expires at the end of the 2-year Program period, plus any approved extension, unless the PMF is selected for noncompetitive conversion. If a facility does not convert a PMF at the end of the Program, as provided in 5 CFR 362.409, or extend the individual's initial appointment under 5 CFR 362.404, the appointment expires when certification (or appeal) for Program completion is denied by the OPM Director. Extensions of the program are approved by the headquarters VA PPO.
(3) A PMF who held a career-conditional or career appointment in VA immediately before entering the Program, and fails to complete the Program for reasons that are not related to misconduct, poor performance, or suitability, may, at the request of the PMF or supervisor, be placed noncompetitively in a permanent competitive service position, as appropriate, within VA. The position identified for noncompetitive placement must be at a grade no higher than a position the employee has held on a permanent basis in the competitive service and must not have higher known promotion potential.

(4) HR Offices must provide written notification to OPM through the headquarters VA PPO and the VA PMF Coordinator when a PMF is terminated for any reason.
[APPENDIX R1. SELECTIVE SERVICE DECISION AND APPEAL PROCEDURES]

1. GENERAL. This appendix covers Selective Service decision and appeal procedures for VA applicants and employees who are ineligible for appointment or continued employment due to their failure to register with the Selective Service System (SSS).

2. DEFINITIONS

   a. **Appointment.** Any personnel action that brings onto the rolls of an executive agency as a civil service officer or employee as defined in 5 U.S.C. 2104 or 2105, respectively, a person who is not currently employed in that agency. It includes initial employment as well as transfer between agencies and subsequent employment after a break in service. Personnel actions that move an employee within an agency without a break in service are not covered. A break in service is a period of 4 or more calendar days during which an individual is no longer on the rolls of an executive agency.

   b. **Covered Individual.** A male:

      (1) Whose application for appointment is under consideration by an executive agency or who is an employee of an executive agency;

      (2) Who was born after December 31, 1959, and is at least 18 years of age or becomes 18 following appointment;

      (3) Who is either a United States citizen or an alien (including parolees and refugees and those who are lawfully admitted to the United States for permanent residence and for asylum) residing in the United States; and

      (4) Is or was required to register under section 3 of the Military Selective Service Act (50 U.S.C. App. 453).

   d. **Exempt.** Those individuals determined by the SSS to be excluded from the requirement to register under sections 3 and 6(a) of the Military Selective Service Act (50 U.S.C. App. 453 and 456(a)) or Presidential proclamation. Nonimmigrant aliens admitted under section 101(a)(15) of the Immigration and Nationality Act (8 U.S.C. 1101), such as those admitted on visitor or student visas, and lawfully remaining in the United States, are exempt from registration.

   e. **Preponderance of the Evidence.** That degree of relevant evidence that a reasonable person, considering the record as a whole, would accept as sufficient to support a conclusion that the matter asserted is more likely to be true than not true.

   f. **Registrant.** An individual registered under Selective Service law.
g. **Selective Service Law.** The Military Selective Service Act, rules and regulations issued thereunder, and proclamations of the President under that Act.

h. **Selective Service System.** The agency responsible for administering the registration system and for determining who is required to register and who is exempt.

3. **STATUTORY REQUIREMENT.** The Military Selective Service Act requires that all male U.S. citizens and other males residing in the U.S. born after December 31, 1959, register with the SSS between the ages of 18 and 26, unless they are exempt from registration. Individuals who failed to register within the prescribed period are not eligible to obtain or continue VA employment, except under the following conditions:

   a. The applicant/employee provides documentation from SSS, such as a Status Information letter (SIL) which shows that he is exempt from the SSS registration requirement.

   b. The applicant/employee requests an official decision and the adjudicating authority finds that his failure to register was not [knowing and willful].

4. **REGISTRATION STATUS.** HR offices must check the [SSS website](http://www.sss.gov) to determine the registration status of covered individuals prior to selection or when notified of an omission. Covered individuals who failed to register must complete and submit a *Request for Status Information Letter* (SIL) as instructed on the [SSS website](http://www.sss.gov). A copy of the SIL or other SSS-issued documentation such as the SSS acknowledgement card validates registration status and must accompany decision requests. Appendix II-R8 identifies conditions that require registration and the criteria for exemptions.

   a. **Qualifying Exemptions.** Individuals in any of the following categories are exempt from registration:

      (1) Males born on or **before** December 31, 1959;

      (2) Non-citizens who first entered the U.S. after the age of 26;

      (3) Citizens of [American Samoa, unless the individual habitually resides in the United States or resides in the United States for at least one year;

      (4) Citizens and nationals of] the Republic of Palau, [the Republic of the] Marshall Islands, or the Federated States of Micronesia[, unless the individual resides in the United States for more than one year in any status, except as a full-time student or employee of the government of his homeland;

      (5)] Non-immigrant aliens on visas such as student, visitor, tourist, or diplomatic visas;

      (6) [" Individuals who were incarcerated, hospitalized or institutionalized during required registration period due to medical reasons or physical/mental incapacitation;

      (7) [*] Cadets and Midshipmen at Service [Academies] or Coast Guard [Academy];
(8) [*] Students enrolled in any officer procurement program at the Citadel, North Georgia College and State University, Norwich University, Virginia Military Institute, Texas A&M University or Virginia Polytechnic and State University; [ ]

(9) [*] Members of the Armed Forces on active duty. Active duty for training does not constitute [“active duty”] for registration purposes;[

[(10) Seasonal agricultural workers on an H-2A visa; and

(11) Individuals who are born female and have a sex change.

*Must register within 30 days of release unless already age 26.]

b. Documentation of Status. Covered individuals who present SSS-issued documentation which shows that they are registered or exempt are eligible for appointment/employment. Human Resources (HR) offices must maintain a copy of this documentation in the applicant case file or in the permanent section of the employee’s electronic official personnel folder (e-OPF). HR offices may appoint/retain a covered individual who provides other official proof of exempt status pending receipt of actual SSS-issued documentation. Examples of acceptable non-SSS issued official documents include, but are not limited to a DD 214, or hospital/institutional records which reflect military service or confinement periods that occurred during the entire span of the required registration period, or other official documentation that prove exempt status.

5. CONFLICTING STATUS INFORMATION. HR offices may cease to consider applicants or terminate the employment of individuals who fail to clarify conflicting status information.

a. HR offices may request an amended SIL or other updated documentation as evidence. HR offices may ask for other supporting documents such as passports, official arrival-departure records, education transcripts, or driver’s license information, when necessary to verify/resolve questionable issues.

b. HR offices will cease to consider an individual for appointment if he fails to provide valid proof of his registration status or supporting verification documents.

c. HR offices must request that applicants/employees disclose prior decisions on selective service cases in the event an individual already received an unfavorable decision.

6. NOTICE. The HR office must provide written notice to inform an individual that he is not eligible to obtain or continue employment with VA due to non-compliance with SSS registration requirements. The notice must contain contact information for the servicing HR office to which the individual may submit a request for an official decision. Appendices II-R2 and II-R3 contain sample notices.

a. Notice to Applicants

(1) The Human Resources Officer (HRO) or designee must take the following actions when applicants under age 26 fail to meet the registration requirement:
(a) Notify the applicant that he must register with SSS prior to his 26th birthday and provide proof of registration status within 30 [calendar] days after the date of notice to become eligible for VA employment;

NOTE: An applicant may register and request proof of registration on the SSS website.

(b) Inform the applicant that VA is not required to keep vacancies open pending adjudication or receipt of registration status; and

(c) Provide instructions on how to request a decision in the event the individual is unable to register prior to his 26th birthday. The applicant may provide the SIL upon receipt at a later date, but must still submit the request for decision to the HR office within 30 [calendar] days after the date of notice or the HR office may remove him from employment consideration.

(2) The HRO or designee must take the following actions when an applicant is age 26 and over, but failed to register before age 26:

(a) Notify the applicant that due to his failure to register with SSS prior to age 26, he is ineligible for appointment, unless the adjudicating official determines that his failure to register was not knowing and willful;

(b) Provide instructions for the process to request a decision and advise the applicant that he must submit the request within 30 [calendar] days after the date of notice; and

(c) Advise the applicant that processing times to obtain a status letter may vary; however, the facility is not required to keep vacancies open pending adjudication or receipt of registration status. The applicant may provide the SIL upon receipt at a later date, but must still submit the request for decision to the HR office within 30 [calendar] days after the date of notice.

b. Notice to Employees

(1) The HRO or designee must take the following actions when an employee is under age 26, required to register, but has not done so:

(a) Provide written notice stating that the employee must register with the SSS immediately and show proof of such registration not later than 30 [calendar] days from the date of notice in order to avoid termination due to failure to meet a requirement for employment;

(b) Refer the employee to the SSS website to register and/or request proof of registration. Timeframes to obtain status documentation from SSS may vary; therefore, it is extremely important that employees contact the SSS immediately; and

(c) Notify the employee that termination of his employment must be initiated if he does not provide proof of SSS registration within 30 calendar days from the date of the notice or if he fails to show proof of exemption within 30 calendar days after the date of notice. See paragraph 10 in this appendix

II-R1-4
regarding termination. Termination of employment will be initiated only after being afforded appropriate due process and appeal rights applicable to his appointment and status.

(d) If the employee fails to provide proof of SSS registration or proof of exemption to register with the SSS within 30 calendar days, as provided for in paragraph 6b(1)(c), action will be taken to terminate the employee. Such action will commence within 15 calendar days after the employee response to the notice in paragraph 6b(1)(c) was due. Refer to VA Handbook 5021 for the applicable separation procedures.

(2) The HRO or a designee must take the following actions when an employee is age 26 and over, required to register, but has not done so:

(a) Provide written notice to the employee stating that he is ineligible to retain his current position due to his failure to register with SSS prior to age 26; and

(b) Provide instructions to request an official decision and notify the employee that the [termination of his employment must be initiated if he fails to request a waiver within 30 calendar days after the date of notice or if he is denied a waiver of the Selective Service registration requirement by the appropriate authority. See paragraph 10 of this appendix regarding termination. Termination of employment cannot occur until the employee is afforded appropriate due process and appeal rights applicable to his appointment and status.]

7. REQUEST FOR OFFICIAL DECISION. The HRO or designee must forward all initial decision requests [within seven calendar days of receipt from the applicant or employee] to the Director, Recruitment and Placement Policy Service (RPPS) (059), Office of Human Resources Management (OHRM), VA Central Office, Washington, DC 20420.

NOTE: The Office of Inspector General (OIG), Office of Administration makes decisions involving OIG applicants and employees.

a. HR offices may refer to Appendices R2-R8, this part, to assist with preparation of official decision requests. HR offices may submit requests for official decisions to RPPS (059) without the SIL (provided they include a copy of the individual’s application for the SIL in lieu of the actual SIL) while SSS processes the individual’s application. However, RPPS (059) will not complete adjudication of title 38 (full/hybrid) decision requests or forward title 5 decision requests to the Office of Personnel Management (OPM) until the HR office has submitted the SIL. A completed decision request packet consists of the following documents:

(1) Copy of Applicant/Employee notice from the servicing HR office;

(2) [Request for decision from the facility Director, HRO or designee to Director, RPPS (059)];

(3) SIL issued by SSS or copy of application for SIL if the SIL application is pending SSS processing; (see paragraph 7a above)

(4) Complete employment application;
b. Employees who request an official decision will remain on VA rolls while their cases are processed. [ ]

c. HR offices are not required to keep vacancies open pending decisions on Selective Service cases. Applicants will be considered until the HR office fills the position for which he applied or the adjudicating official makes a decision; whichever comes first. If an applicant fails to request an official decision within 30 [calendar] days of notice, the HR office will cease considering him for employment.

8. ADJUDICATION PROCESS. Selective Service law prohibits denying a Federal benefit that an individual may otherwise receive if he can demonstrate that his failure to register was not knowing and willful. The adjudicating official will make decisions based on a preponderance of evidence presented in each case. OPM will adjudicate cases involving proposed/existing title 5 appointments. The Associate Deputy Assistant Secretary for Human Resources Policy and Planning or designee is the adjudicating official for cases involving proposed/existing title 38 (full/hybrid) appointments, with Office of the General Counsel’s concurrence.

a. If the adjudicator determines that the individual’s failure to register was not [knowing and willful], the employee retains his position and the applicant remains under consideration for employment.

b. If the adjudicator renders an unfavorable decision, the applicant/employee is no longer eligible for appointment or continued employment.

c. RPPS (059) forwards all initial decisions to the servicing HRO. HR offices must maintain this documentation in the applicant case file or the employee’s e-OPF.

d. HR Offices may refer to the samples in this appendix to provide the applicant or employee instructions for preparing appeal requests, when necessary.

[NOTE FOR ADJUDICATION OFFICE: A Veteran or part-time National Guard or Reservist who can show proof of past active duty military service, such as a form DD 214, or current military identification card if still on active duty, should not be found to have knowingly and willfully failed to register for the SSS.]
9. [REQUEST FOR RECONSIDERATION (APPEAL) OF INITIAL DECISION].

Applicants/employees must submit [ ] requests to their servicing HR office or the office to which they applied for employment not later than [14 calendar] days after the date of [notice of] the initial decision. [HR offices must forward the request to the adjudicating office no later than 7 calendar days after receipt of the request for reconsideration.] Appendix R5, this part, is a sample which HR offices may use to notify applicants/employees of [the appeal procedures.]

a. Content of Appeal Request. An appeal request must include written notification of the individual’s intent to appeal, the unfavorable decision letter, the original supporting documentation, a statement indicating the reason for the appeal, and any new or additional documentation to support the individual’s case.

(1) The servicing HR office will not terminate employees during the appeal process.

(2) Applicants are not considered for employment during the appeal process.

b. Appeal Procedures. The Director of OPM is the approving official for appeals involving proposed and existing title 5 appointments. The Deputy Assistant Secretary for OHRM or designee is the approving official for appeals involving proposed/existing title 38 (full/hybrid) appointments with VA Office of the General Counsel’s concurrence. [The decision for reconsideration is final and binding, and there is no further right for review of the waiver decision by OPM or VA.]

(1) If the approving official renders a favorable decision, the HR office will resume considering the applicant for future VA employment opportunities, or keep the employee on VA rolls. Individuals who receive favorable decisions must maintain a copy of the official decision as proof of eligibility for employment/appointment.

(2) If the adjudicating official denies the appeal request (i.e., renders an unfavorable decision), the HR office will no longer consider the applicant for employment and [in the case of an employee, must initiate separation procedures within 15 calendar days after receiving notification of the adjudicating official’s unfavorable] appeal decision.

c. Distinction Between the Title 5 and Title 38 (Full/Hybrid) SSS Adjudication and Appeal Process. Procedures for processing title 5 and title 38 (full/hybrid) cases are generally the same with a few exceptions. Appendices R2 to R8 are samples and reference documents which HR offices may use to prepare requests under both title 5 and title 38 (full/hybrid) procedures.

(1) OPM makes official decisions and adjudicates appeals on proposed and existing Title 5 appointments. VA makes official decisions and adjudicates appeals on proposed and existing Title 38 (full/hybrid) appointments.

(2) With the exception of title 5 appeal requests, HR offices must send all [ ] requests [to] the Director, Recruitment and Placement Policy Service (RPPS) (059), Office of Human Resources Management (OHRM), VA Central Office, Washington, DC 20420. [ ]
(3) HR offices must forward title 5 appeal requests directly to the Office of General Counsel, U.S. Office of Personnel Management, 1900 E Street NW, Washington, DC 20415. HR offices must provide RPPS (059) a courtesy copy of the appeal request at the time of submission, and a copy of the final OPM decision upon receiving it from OPM.

(4) OHRM will provide written notice of appeal decisions on title 38 (full/hybrid) cases to the appellant and the servicing HR office after each case has been processed.

10. **TERMINATION.** HR offices will initiate the applicable separation procedures for those employees serving under an appointment made on or after November 1985, within 15 calendar days from the date of notice, after the employee: fails to register (if under age 26) within the prescribed 30 calendar days; fails to request an initial waiver within the prescribed 30 calendar days; receives an unfavorable initial waiver decision without requesting reconsideration within the prescribed 14 calendar days from the date of notice of the initial decision; or receives an unfavorable reconsideration decision.

**NOTE:** Those employees who fail to register (if under age 26), fail to request a waiver, or are ultimately denied a waiver of the Selective Service registration requirements by OPM or VA, must be separated after being afforded appropriate due process and appeal rights applicable to their appointment and status. Refer to VA Handbook 5021 for the applicable separation procedures.]
APPENDIX R2. CHECKLIST FOR SELECTIVE SERVICE DECISION REQUEST

Applicant/Employee Name: __________________________
Facility Name: _____________________________________
Date: _____________________________________________

Package must contain the following documentation:

☐ Selective Service Status Information Letter (SIL)
To obtain this letter, contact the Selective Service System (SSS) or visit the SSS website to complete the application for the SIL. Processing times may vary.

☐ Written notice from facility Human Resources Officer (HRO) to applicant or employee
Notifies individual of ineligibility for appointment/continued employment unless an authorized adjudicating official determines that his failure to register was not knowing and willful.

☐ [Sworn statement] from employee or applicant to adjudicating official
This letter/memo provides a personal explanation of why the individual failed to register and indicates his desire to request an official decision. The burden of proof rests with the applicant[ ] Therefore, the HR Specialist must not create or sign this document. [NOTE: To make it a sworn statement, the applicant/employee must add a sentence at the bottom of his explanation stating “I declare, under penalty of perjury, that the facts stated in this statement are true and correct,” followed by his signature and date. Alternatively, the applicant/employee may have his statement notarized by a notary public.]

☐ Written request from facility Director, HRO or designee to adjudicating official
The designated official will request adjudication of the applicant or employee’s case. OPM adjudicates title 5 and VA adjudicates title 38 (full/hybrid) cases. However, the servicing HR office must submit all decision requests to Director, Recruitment and Placement Policy Service (059), Office of Human Resources Management, VA Central Office, Washington, DC 20420. [This request letter should state the specific appointing authority for the position and specify if it is full-time, part-time, without compensation, time limited, etc., as applicable.]

☐ Complete copy of the employment application

☐ Copy of the appointment SF 50 – Notification of Personnel Actions (employees only)

☐ DD Form 214 – Certificate of Release or Discharge from Active Duty
(former military)

☐ OF 306 - Declaration for Federal Employment

☐ Supporting Documentation. (Examples: passports, official arrival/departure documents, education transcripts, driver license information, copies of [all applicable] visas, etc). Review supporting documents to verify the individual’s date of birth. If he was born before December 31, 1959, a selective service waiver is not required.
APPENDIX R3. SAMPLE APPLICANT NOTICE AND REQUEST FOR OFFICIAL DECISION

Date:

From: Human Resources Officer (HRO) or Designee (05)
To: (name of applicant)
(address, city, state, zip code)

Subj: Notice of Ineligibility for Appointment due to Failure to Register with the Selective Service System (SSS)

1. You recently applied for the position of (title of position) with the (name of facility). However, you are not eligible for this appointment because you were born after December 31, 1959, and failed to register with the SSS by age 26. To obtain eligibility for an appointment with the Department of Veterans Affairs (VA), you must either show proof that you are registered with SSS or the appropriate adjudicating official must determine that your failure to register was not [knowing and willful].

2. Should you wish to request an official decision as to whether or not your non-registration was [knowing and willful], please sign this memo and return it to this office along with your Status Information Letter (SIL) and a letter explaining your failure to comply with registration requirements not later than 30 [calendar] days after the date of this notice. VA is not required to keep vacancies open pending an official decision on your case. However, if you elect to request an official decision, we will continue considering you for appointment until the position for which you applied is filled or the adjudicator makes a decision on your case, whichever comes first.

3. Before you submit this request, you must immediately contact SSS and complete the application to obtain an SIL via the SSS website. Since SSS processing times vary, you may include a copy of your application for the SIL with your official decision request in lieu of the actual SIL while SSS processes your SIL application. We will not process your case if you: (1) fail to submit your request packet within 30 [calendar] days after the date of this notice; and, (2) fail to submit the SIL immediately after the SSS has issued it.

4. If you do not request an official decision within 30 [calendar] days after the date of this notice or the adjudicating official determines that your failure to register was [knowing and willful], we will no longer consider you for employment as a result of your non-compliance with the Selective Service registration requirement.

5. You may contact (HR specialist name and phone number) if you have any questions regarding this notice.

Please print your name on the line which indicates your choice and sign and date below.

I _______________________ request an official decision regarding my failure to register with SSS.

I _______________________ do not request a decision regarding my failure to register with SSS, and as a result, I understand that I will not be considered for an appointment with VA.

Applicant Name and Signature: ______________________________ Date ______________________

HRO Name and Signature: __________________________________ Date ______________________
APPENDIX R4. SAMPLE EMPLOYEE NOTICE AND REQUEST FOR OFFICIAL DECISION

Date:  
From: Human Resources Officer (HRO) or Designee (05)  
To: (name of employee)  
(address, city, state, zip code)

Subj: Notice of Ineligibility for Appointment due to Failure to Register with the Selective Service System (SSS)

1. You are currently employed as a (title of position) with the (name of facility). However, we have learned that you are not eligible for this appointment because you were born after December 31, 1959, and failed to register with the SSS by age 26. To remain employed, you must show proof that you are actually registered with SSS [(or show proof that you were exempt from the requirement)] or the appropriate adjudicating official must determine that your failure to register was not [knowing and willful].

2. Should you wish to request an official decision as to whether or not your non-registration was [knowing and willful], please sign this memo and return it to this office along with your Status Information Letter (SIL), [which will be issued by SSS,] and a letter explaining your failure to comply with the registration requirements not later than 30 [calendar] days after the date of this notice. Before you submit this request, you must immediately contact SSS and complete the application to obtain an SIL via the SSS website. Since SSS processing times vary, you may include a copy of your application for the SIL with your official decision request in lieu of the actual SIL while SSS processes your SIL application. We will not process your case if you: (1) fail to submit a complete request packet within 30 [calendar] days after the date of this notice; [or], (2) fail to submit the SIL[, which contains the SSS’s status determination, within 14 calendar days after the date of its issuance].

3. You will remain employed during the adjudication/decision process. However, if you do not [provide proof of registration status or] request an official decision [from the appropriate adjudicating office (including all appropriate documentation), action will be taken to separate you from Federal service].

4. If the adjudicating official determines that your failure to register was not [knowing and willful], we will retain you on Department of Veterans Affairs (VA) employment rolls. If the adjudicating official determines that your failure to register was [knowing and willful, you will be given an opportunity to request reconsideration of the initial decision.]

5. [Those individuals who fail to request a waiver or are denied a waiver of the SSS registration requirements by OPM or VA must be terminated after being afforded appropriate due process and appeal rights applicable to their appointment and status. You will be issued notice of intent to terminate your employment after: (1) you fail to request an initial waiver within the prescribed 30 calendar days; (2) your request for an initial waiver is denied by the adjudicating authority and you do not appeal the decision; or, (3) your appeal of an unfavorable decision is denied.

6.] You may contact (HR specialist name and phone number) if you have any questions about this notice.

Please print your name on the line which indicates your choice and sign and date below.

I _______________________ request an official decision regarding my failure to register with SSS.

I _______________________ do not request a decision regarding my failure to register with SSS, and as a result, I understand that I am not eligible to remain employed with VA.

Employee Name and Signature: ________________________________ Date _____________________

HRO Name and Signature: ________________________________ Date _____________________
APPENDIX R5. SAMPLE NOTICE OF APPEAL RIGHTS AND REQUEST PROCEDURES

Date:

From: Human Resources Officer (HRO) or Designee (05)
To: (name of employee or applicant)
(address, city, state, zip code)

Subj: Notice of Right to Appeal Selective Service Adjudication Decision

1. Based on the documentation you submitted in support of your case, the adjudicating official determined that your failure to register with the Selective Service System (SSS) was [knowing and willful]. You have the right to request an appeal of the initial decision. To do so, you must complete this form and return it to this office within [14 calendar] days of the [date of this notice] along with a copy of the decision letter, a brief personal statement indicating the reason for your appeal request, a signed and dated copy of this notice, and any additional documentation that supports your case.

2. If the adjudicating official determines that your failure to register was not [knowing and willful] based on evidence in your supporting documentation, the HR office will (insert applicable statement as indicated below)

   For applicants, insert: consider you for current/future Department of Veterans Affairs (VA) employment opportunities for which you may apply.
   For employees, insert: retain you as a VA employee.

3. If the adjudicating official determines that your failure to register was [knowing and willful] based on the evidence in your supporting documentation, you are not eligible for appointment and the HR office will (insert applicable statement as indicated below)

   For applicants, insert: not consider you for any current/future VA employment opportunities.
   For employees, insert: [take action to initiate the separation process after you are afforded appropriate due process and appeal rights applicable to your appointment and status.]

4. You may contact (HR Specialist name and phone number) if you have questions about this notice.

HRO Name and Signature: ___________________________ Date __________________

Applicant/Employee Certification:

I certify that I have read and understand the appeal procedures outlined above. I further understand that appeal decisions are final and I will be ineligible for an appointment with VA if the adjudicating official determines that my failure to register was [knowing and willful].

Applicant/Employee Signature: ___________________________ Date __________________

NOTE: The servicing HR office must submit the appeal request to the appropriate adjudicating official based on the type of appointment within [7 calendar] days of receipt from the applicant [or] employee:

Title 5: U.S. Office of Personnel Management, Office of General Counsel, 1900 E Street, NW, Washington, DC 20415. [Provide RPPS (059) a courtesy copy of the reconsideration request and the OPM decision.]

Date:

From: Human Resources Officer (HRO) or Designee (05)
To: Director, Recruitment and Placement Policy Service (059)
Office of Human Resources Management
VA Central Office
Washington, D.C. 20420

Subj: Request for Official Selective Service Decision (name of applicant)

Enclosed is a request for a decision of whether (name of applicant)’s failure to register with the Selective Service System was [knowing and willful]. (name of applicant) applied for a position as a (title of position, series and grade) in a (title 5 or title 38(full/hybrid)) appointment under (appointing authority) at (name of VA facility).

Attached is a request for decision and the supporting documentation. If you have any questions, you may contact (Human Resources Specialist name) at (phone number).

Chart Information Continued:

* Must register within 30 days of release unless already age 26, or already registered when released, or unless exempt during entire period age 18 through 25.

**Residents of Puerto Rico, Guam, Virgin Islands, and Northern Mariana Islands are U.S. Citizens. Citizens of American Samoa are nationals and must register when they are habitual residents in the United States. Habitual residence is presumed whenever a national or citizen of the Republic of the Marshall Islands or the Federated States of Micronesia resides in the United States for more than one year in any status, except as a student or employee of the government of his homeland.

NOTE: Immigrants who did not enter the United States or maintained their lawful non-immigrant status by continually remaining on a valid visa until after they were 26 years old were never required to register. Also, immigrants born before 1960 who did not enter the United States or maintained their lawful non-immigrant status by continually remaining on a valid visa until after March 29, 1975, were never required to register.
[APPENDIX S - IMPLEMENTATION OF HYBRID TITLE 38 QUALIFICATION STANDARD]

1. **Purpose.** This appendix provides guidance on the implementation of Hybrid Title 38 (HT38) qualification standards (new and revised) and identification of positions performing the duties defined in the draft qualification standard prior to publication.

2. **Background.** The “Caregivers and Veterans Omnibus Health Services Act of 2010,” Public Law (PL) 111-163, was signed by the President on May 5, 2010. This Act authorizes the Secretary, Department of Veterans Affairs, to extend HT38 status to additional occupations which are considered necessary for the recruitment and retention needs of the Department. When an occupational series is approved for conversion to HT38 status the authority is granted under 38 U.S.C. 7401(3) for appointments made under 38 U.S.C. 7401(3) or those applicable under 38 U.S.C. 7405.

3. **Conversion of Title 5 to New Hybrid Title 38 Qualification Standard.**
   a. The method which an occupation will be reviewed and converted from Title 5 (T5) to HT38 will be as follows unless otherwise advised:

   (1) Workforce Management and Consulting (WMC) will develop a Hybrid Implementation SharePoint for the collection of information and data on employees and positions that are affected by the conversion of the specified occupation from T5 to HT38. Human Resources Information Service (HRIS) will initially populate the SharePoint with data pulled from the current human resources information system. This SharePoint will be utilized to facilitate the pre-conversion review, and for HR Offices to track the conversion progress as outlined in VA Handbook 5005, Part II Appendix T, Conversion of T5 Occupation to HT38.

   (2) Instructions for accessing, reviewing and populating additional data and information into the SharePoint will be created by WMC. WMC will distribute the instructions with the draft qualification standard to the VISN and Facility Human Resource Officers (HROs). HRO’s are responsible in assigning staff to complete the process as instructed and within the timeframes provided. Access to the SharePoint will be limited to specific individual(s) designated by each VISN and/or Facility. Individuals granted access to the SharePoint will serve as the Human Resources points of contact (POC) for the conversion of the occupation to HT38 status.

   **NOTE:** A copy of the draft qualification standard that will be attached to the instructions is for use in conducting the review ONLY. The draft has not been approved and CANNOT be used for any purpose other than conducting the position review described below.

4. **Pre-Conversion Position Review.**
   a. Human Resources Officers or designees in collaboration with Human Resources Classification and Staffing Specialists as well as the responsible service(s) must review all positions in their facilities that are responsible for performing the work described in the draft qualification standard for consistency with assignments. The work may currently be found to be classified in the designated occupational series in the draft qualification standard, or possibly other occupational series. Any positions that are determined to be covered by the new draft qualification standard should have the respective
position description reviewed by the appropriate supervisor to ensure it is accurate and up to date. Any position descriptions not found to be up to date or accurate must be updated immediately to ensure review is based upon accurate information. Supervisors are required to comply with union contracts as applicable. Once position descriptions have been updated they must be submitted for review to determine whether or not the position will be covered by the qualification standard.

b. Each position (encumbered or vacant) determined to be performing the duties defined in the draft qualification standard must be evaluated to ensure the series is correct. Information for all employees performing duties covered by the draft qualification standard, regardless of the current occupational series of the position will be uploaded into the SharePoint. If it is determined that the duties support the occupational series the SharePoint will be populated as positive for conversion. If it is determined that a position currently classified in the occupational series does not meet the coverage definition in the draft qualification standard the SharePoint will be annotated as a negative for conversion.

c. In no case will any actions be taken as a result of this review beyond indicating in the SharePoint whether or not an employee is subject to conversion to hybrid title 38. If any actions are required at a later date, additional guidance will be issued.

NOTE: This policy does not typically apply when a revision to an existing HT38 qualification standard is published and implemented.

5. Pre-Conversion Personnel Action.

a. The pre-conversion position review will identify those positions/employees that will be converted to HT38 and covered by the draft qualification standard. The results of the pre-conversion position review will be used in processing the pre-conversion mass action. This mass action does not convert the employee from T5 to HT38.

b. HRIS will process an automated Notification of Personnel Action form (SF-50) for those employees identified in the SharePoint currently performing the duties in an occupational series other than the series defined in the qualification standard.  

NOTE 1: Final conversion including grade determination will be completed through the review process found in VA Handbook 5005, Part II Appendix T, “Conversion of Title 5 Occupation to Hybrid Title 38”.

NOTE 2: Employees in the occupational series that were specifically identified as not performing the duties under the position review will not be converted. These positions must be reviewed and reclassified immediately and placed in the appropriate occupational series. The change (series; classification) must be provided in writing to the employee.

NOTE 3: Positions assigned duties as described in the draft HT38 qualification standard must be converted from T5 to HT38 once the guidelines and instructions are issued. This is a requirement and there is no flexibility for facilities to choose whether or not a position will be converted. Conversions must be done within the designated timeframe.
6. **Positions/Employees Identified After Pre-Conversion Review.** Provisions for positions/employees not identified in the pre-conversion review (missed during pre-conversion review; placed in HT38 occupation after pre-conversion review; or missed after conversion review found in VA Handbook 5005, Part II Appendix T) are handled on a case by case basis as prescribed in VA Handbook 5005, Part II Appendix T.

7. **Revision of Published HT38 Qualification Standards.**

   a. Published HT38 qualification standards will be reviewed by the responsible national program office to ensure requirements are up to date and accurate at least once every 5 years or when it is determined that significant changes have occurred (e.g., education; license/certification; complexities; or in the assigned responsibilities). The Program Office will make a request for a revision to the current HT38 qualification standard, when necessary.

   b. Once a revision is implemented facilities may begin to use the standard effective on the dates provided in the VHA notification.

   c. A revision to a published HT38 qualification standard will not require the pre-conversion review process. In those rare situations where a SharePoint is used on a revision to a HT38 qualification standard, the same process as described above in paragraph 3 will be followed.]
APPENDIX T - CONVERSION OF TITLE 5 OCCUPATION TO HYBRID TITLE 38

1. PURPOSE. This policy provides guidance and instructions on requirements for conversion of a T5 occupation to HT38. The primary purpose of the conversion review is to apply the published VA HT38 qualification standard to each employee’s duties/assignment and personal qualifications to determine the proper grade level and occupational title upon conversion to HT38. This process should not result in a change to the employee’s duties and responsibilities. This policy is the second phase of the implementation of a new HT38 occupational standard (see VA Handbook 5005, Part II Appendix S, Implementation of Hybrid Title 38 Qualification Standard). Human Resources Offices will utilize the final list in the pre-conversion SharePoint to complete this part of the process.

2. POLICY. The method which a position will be converted from T5 to HT38 will be as follows unless otherwise advised:

   a. Positions assigned duties as described in the HT38 qualification standard must be converted from T5 to HT38 in the timeframe provided. This is a requirement with no flexibility for facilities to choose whether or not a position that falls under the coverage of a published HT38 qualification standard will be converted.

   b. The conversion review will be conducted by Human Resources (HR) for each employee identified as positive for conversion in the pre-conversion position review. Before the initial conversion review process can begin, HR staff must receive training on the new qualification standard.

   c. The conversion review process is not applicable to employees no longer assigned to the occupation (e.g., reassigned, promoted, resigned, retired, etc.) or no longer performing duties defined in the qualification standard at the point the HT38 qualification standard is implemented.

   d. HR will utilize the guidance in VA Handbooks 5005 and 5007, as well as the appropriate and applicable new VA HT38 qualification standard.

NOTE: This policy does not apply when a revision to an existing HT38 qualification standard is published and implemented.

3. GUIDELINES AND REQUIRED DOCUMENTATION. This part provides the guidelines to be followed for conversion and the required documentation to complete the process (unless otherwise directed).

   a. VISN and Medical Center Human Resources Officers (HRO). HRROs are responsible for the overall conversion review process and must complete the following:

      (1) Review the list and ensure all positions and employees identified in the pre-conversion review are updated and maintained. The HRO will maintain this list of positions and employees to assist with future tracking and the outcome of the conversion for each employee.

      (2) Review and ensure that all employees placed in positions since the pre-conversion review that are currently performing duties that fall under the coverage of the new HT38 qualification standard are added to the list for conversion and tracking.
(3) The conversion review will identify those positions/employees that will be converted to HT38 and covered by the new qualification standard. The results of the conversion review will be used in processing the conversion action.

(4) Guidance on conversion actions will be submitted to facilities under separate instruction from WMC for each occupation as the standard is released.

(5) HR is responsible for performing a review to determine the employee’s grade and whether it remains the same; is outside of grades defined in the qualification standard or results in a promotion. If the grade is not defined in the qualification standard, employee should be covered by the grandfathering provision if provided in the specific occupational qualification standard. The employee will maintain their current grade and pay until such time the employee departs their position or the agency; however they will be placed against the appropriate assignment as designated in the qualification standard.

(6) Employees in the occupational series who were specifically identified as not performing the duties under the position review will not be converted. These positions must be reviewed and reclassified immediately and placed in the appropriate occupational series. Positions assigned duties as described in the new HT38 qualification standard must be converted from T5 to HT38 once the guidelines and instructions are issued. This is a requirement and there is no flexibility for facilities to choose whether or not a position will be converted. Conversions must be done within the designated timeframe.

(7) Provide a copy of the position/employee list to the supervisor(s) who have positions/employees impacted by the conversion process.

(8) Collaborates with supervisor(s) to:

(a) Ensure all positions/employees identified on the list are accurate and appropriately designated.

(b) Ensure that all positions covered by the new qualification standard are converted to HT38 status. Positions covered by the new HT38 qualification standard cannot be classified into another occupational series.

(9) Develop and establish a local implementation plan that includes the items listed below and meets the deadline established:

(a) Brief management regarding the facility conversion implementation plan; and

(b) HRO’s are required to prepare notifications to be issued to affected employee(s) using the template letters provided in this part; and

(c) Issue the notification letters to employees prior to briefing orientation; and

(d) Arrange, and conduct a meeting to provide general orientation and briefing for affected employee(s) on the conversion process and what these changes entail; and

(e) Provide manager/supervisor and employee(s) documents needed for conversion (copy of this policy; qualification update sheet; sample supervisor memos; and
(f) Notify and brief designated union representatives (if applicable) regarding facility implementation plans, discuss union participation in employee briefings and provide copy of briefing materials to the union.

(10) Assist employee(s) with accessing their electronic Official Personnel File (eOPF).

(11) Ensure that the supervisor(s) have submitted a request to include appropriate documentation and information to support the conversion action for all employees on the list.

(12) Review and verify all information and documents submitted for each employee to ensure conversion requests are complete, accurate and compliant with policy. The documentation is to support and justify the request and decision. The following documents may be included in the request:

(a) Approved functional statement for position (signed and dated).

(b) Current position description

(c) Supervisor memo

(d) Current Performance Appraisal

(e) Organizational chart or evidence of position approval (for positions above the full performance level only).

(13) Determine eligibility and qualifications in accordance with the new qualification standard and confirms the requested conversion action is compliant with policy and supported by documentation. If all requirements are met the package is sent to the HRO for final decision.

NOTE: This process should not result in a change to the employee’s duties, responsibilities, or result in a reduction in grade in accordance with grandfathering provision see VA Handbook5005, Part II, Appendix G-17, paragraph 10C and grandfathering provision in the appropriate qualification standard.

(14) After final decision is made the conversion determination is communicated to the employee(s).

(15) Ensure all necessary requests for personnel action(s) are prepared, completed, processed and approved.

(16) Ensure appropriate documents are filed in the eOPF.

b. EMPLOYEES. Employees are responsible for ensuring their eOPF is updated and relevant professional and personal information needed for the conversion is reflected, [i.e. updated resume with relevant experience, education, certification etc.).] Employees are also responsible for attending briefings and orientation meetings regarding the conversion and implementation process which are to be conducted on duty time.
c. **SUPERVISORS**

(1) Review the new HT38 qualification standards.

(2) Review the position/employee list received from the HRO for accuracy.

(3) Ensure that all positions covered by the new qualification standard are converted to HT38 status. Positions covered by the new HT38 qualification standard cannot be classified into another occupational series.

(4) If it is determined that the work being performed is not covered by the new qualification standard; the Supervisor must collaborate with HR to reclassify the position into the appropriate occupational series.

(5) Ensure they and all the impacted employees attend the briefing and orientation meetings on the conversion and implementation process.

(6) Prepare functional statement(s) for each employee and all current and proposed positions that will be established as a result of the conversion of the T5 occupation to HT38 status.

(7) Prepare a conversion request(s) with supporting documentation. If requesting a promotion for an employee, the supervisor must provide justification of how the assignment at a higher level has been met. Promotions must be supported by employees’ current duties and responsibilities and cannot be based on additional duties and responsibilities added to the position during the conversion process.

(8) Review documents submitted for accuracy. Clarify any documents as needed and evaluate the information.

(9) Submit functional statement to HR along with documents to support and justify the request and conversion decision. The following additional documents may be included in the request:

(a) Current position description.

(b) Supervisor memo.

(c) Current Performance Appraisal.

(d) Organizational chart or evidence of position approval (for positions above the full performance level only).

**NOTE:** There is no reconsideration (appeal) for a personnel action taken on a position/employee converted from title 5 to hybrid title 38. The conversion is solely for the purpose of applying the new qualification standard.
NOTE: An appropriate grade will be determined for each employee that may or may not result in a promotion. The promotion reconsideration and review guidance described in VA Handbook 5005, Part III, and Section B applies to promotion reconsideration requests, not to the conversion personnel action.

After the conversion, supervisors may request that an employee be considered for promotion on a date other than the anniversary date of grade if the employee is selected for a supervisory or managerial assignment that warrants consideration for higher grade and for assignments based on complexity.

5. Promotions Resulting From Conversion.

a. Employees who are found to be eligible and qualified for a promotion on the date the HT38 qualification standard is implemented will have their promotions effective the first day of the pay period after the date the qualification standard was implemented. At the election of the employee, a promotion may also be made effective at a future date set by the approving authority that does not violate law or negotiated agreement when doing so would benefit the employee (i.e. when an employee is due a within grade increase).

b. Employees who are eligible and qualified for a promotion up to the full performance level (FPL) after the effective date of the implementation of the HT38 qualification standard are to apply the policy found in VA Handbook 5005, Part III, Chapter 4, Section B paragraph 6(b) (unless otherwise instructed).

NOTE. The anniversary date of grade is the date of appointment or date of highest promotion grade for a hybrid employee. The automatic review for promotion consideration above the full performance level only occurs on the first anniversary for that grade level.

6. Conversion Not Completed. A position/employee that was identified as meeting the definition of the new HT38 qualification standard and was included in the pre-conversion process but not converted must be converted immediately once discovered following the provisions prescribed and in effect at the time of conversion.

7. Positions/Employees Not Identified During Reviews. Positions/employees not identified in the pre-conversion review or conversion process but are found to be performing the duties as defined in the qualification standard at a later date are covered by the grandfathering provisions found in the qualification standard. The facility/organization must prepare a written statement and justification that reconstructs the necessary information as of the date the individual should have been converted. Documentation must include evidence employee was performing the work described in the HT38 qualification standard at the time it was published (based on appropriately classified position description on the date the qualification standard was published) but was “missed” when the conversion(s) took place. Actions must be submitted and approved by the VISN Director for field positions and VHA Program Office Director for national level positions. HR will need to manually complete the personnel actions in accordance with the original implementation guidance. These actions are to be processed timely.
THIS LETTER MUST BE ISSUED PRIOR TO BRIEFING ORIENTATION MEETING.

TEMPLATE LETTER FOR CURRENT VA EMPLOYEES
IN NEW HYBRID OCCUPATION:

[Insert title of occupation (e.g., Dietitian)]
GS-(insert occupational series)

The “Caregivers and Veterans Omnibus Health Services Act of 2010” authorizes the Secretary, Department of Veterans Affairs, to extend hybrid Title 38 status to additional occupations. The (insert title of occupation), GS-(insert occupational series) occupational series has been identified for conversion from the title 5 Competitive Service to hybrid title 38 status in the Excepted Service. You occupy a position classified in the GS-(insert occupational series) occupational series or the duties and responsibilities of your position substantially meet the assignment definition of a (insert title of occupation). This conversion does not affect bargaining unit status. Your rights under a collective bargaining agreement (if applicable) are those of a hybrid title 38 employee. Orientation to the change of your position to hybrid title 38 will occur on (insert date). The following describes how this conversion will affect your position:

Full-Time, Part-Time and Intermittent Employees Appointed Without Time Limitation

Pay. The change to hybrid status does not affect your current grade, step, or salary rate. Also, you are now entitled to title 38 weekend premium pay at the rate of 25 percent of your basic hourly rate of pay for each hour of service, any part of which is between midnight Friday and midnight Sunday, instead of each hour of service on a tour of duty.

Staffing. Effective (insert date), you will be covered by the hybrid title 38 employment system. With this change your position will now be covered by the (insert qualification standard). Human Resources will conduct an initial review of your position based on current assigned duties. A functional statement will be developed and issued that replaces your current position description. You have the responsibility to submit information for this initial conversion review process by updating your employment history in your e-OPF as will be discussed in the briefing orientation.

Promotion. If you are in a career ladder position the process for promoting hybrid title 38 employees differs from the process for promoting title 5 employees. This process will be explained at the briefing orientation.

Adverse Action Rights. You remain covered by the same applicable agency and negotiated disciplinary and adverse action procedures and grievance procedures as prior to the conversion.
Employees Appointed on a Time-Limited Basis

Employees appointed on a time-limited basis will remain on a time-limited basis upon conversion to hybrid title 38. All of the information on Staffing and Pay described above for employees appointed without time limitation basis applies to employees appointed on a time-limited basis on the same type of work schedule, that is, full-time, part-time, or intermittent. There is no change in adverse action rights for employees appointed on a time-limited basis.

Department of Memoriandum
Veterans Affairs

Date:

From: Supervisor

Subj: Conversion Request

To: Human Resources Officer
Thru: Chief, Service and/or Care Line Manager

1. I recommend (insert name of employee(s)) for consideration for GS-(insert GS level), (insert title of occupation). The functional statement for this assignment is attached along with other supporting documentation for this employee/all employees listed below.

2. Your consideration for this request is appreciated.

Name of Supervisor

PART III. INTERNAL PLACEMENT[,] CHANGE IN ASSIGNMENT OR] AND PROMOTION

CHAPTER 1. GENERAL

1. SCOPE. This part contains the policies and procedures governing the placement of VA employees in another VA position, including the movement of the employee to another VA facility under a different appointing officer. Such position changes include demotion, reassignment or promotion of an employee while continuously employed in VA and authorized conversion to another appointment under certain circumstances.

2. ORGANIZATION

   a. Chapters 2 and 3 include requirements and procedures for internal placement and promotion actions for employees in the competitive service under title 5.

      (1) While the provisions in these chapters apply to the competitive service, there is no prohibition against using these or similar procedures to provide opportunities to certain excepted service employees, such as those appointed under the Veterans Recruitment [Appointment] (VRA) or severely handicapped individuals appointed under Schedule A.

      (2) In the interest of clarity, policy requirements are identified by the word "requirement." Requirements are mandatory provisions established in accordance with or consistent with Federal human resources policies issued by the Office of Personnel Management (OPM) or pertinent laws, rules and regulations.

      (3) Guidance, which is identified as such, is included to provide matters to be considered, information, clarification, examples, etc., to assist in the development of subordinate policies which will conform to VA and OPM policy requirements.

   b. Chapter[ ] 4 [ ] contain[s] internal placement[,] change in assignment] and advancement policies, procedures and requirements for employees appointed under 38 U.S.C., chapter 74.

   c. Chapter [5 contains] requirements a [for conversion or change of assignments for employees appointed under 38 U.S.C. 73 or 74].

   [d. Chapter 6 includes requirements and procedures related to military leave and restoration/reemployment. The provisions of this chapter apply to both title 5 and title 38 employees.]
CHAPTER 2. INTERNAL PLACEMENT (TITLE 5)

1. DEFINITIONS

NOTE: These definitions apply to chapter 2 and 3 and related appendices.

a. **Position Change.** A promotion, demotion, or reassignment made during an employee's continuous service within the same agency. Position changes may involve reorganization by management decision; reduction in force when employees are entitled to grade retention; or reclassification of positions to a lower grade when a new classification standard has been implemented.

b. **Demotion.** The change of an employee to a lower grade when both the old and new positions are under the General Schedule or under the same wage schedule, or to a position with a lower rate of pay when both the old and new positions are under the same type ungraded wage schedule or in different pay method categories. A position change from a supervisory position to a nonsupervisory position at the same grade is not a demotion.

c. **Reassignment.** The change of an employee from one position to another position without demotion or promotion. Non-competitive reassignments include: (1) a change from a supervisory position to a nonsupervisory position at the same grade; and (2) a position change at the same grade from a position with known potential to another position with no known potential or no higher known potential.

d. **Promotion.** A change to a position at a higher grade level within the same job classification system and pay schedule or to a position with a higher rate of pay in a different job classification system and pay schedule.

e. **Subject Matter Expert (SME).** Person with direct knowledge of what is done in the job, what knowledges, skills, abilities and other characteristics (KSAOs) are required, and the general background of persons who are able to do the job successfully. These may include those currently doing the job, recent incumbents, those who supervise others doing the job, and other acknowledged job experts. SMEs participate in the development of job analyses and crediting plans and serve on promotion panels.

f. **Area of Consideration.** Geographic or organizational areas from which high-quality VA employees are sought in actions requiring the use of competitive promotion procedures.

g. **Minimum Area of Consideration.** That geographic or organizational area, as specified in the applicable promotion plan, normally used in initial efforts to locate high-quality VA employees for actions requiring the use of competitive promotion procedures.

h. **Limited Area of Consideration.** Areas of consideration less than the minimum area which are used to locate high quality VA employees for actions requiring the use of competitive promotion procedures under specific circumstances as provided for in the applicable promotion plan.
i. **Qualified Applicants.** Individuals who meet the minimum qualification (including properly determined selective factors, if applicable), time-in-grade and time-after-competitive-appointment requirements, as well as any applicable statutory provisions.

j. **Best Qualified Candidates.** Those candidates competing under merit promotion procedures whose relative rankings indicate that they will perform the job to be filled with substantially equal success.

## 2. GENERAL REQUIREMENTS

**NOTE:** Actions defined below may or may not require competition. Such requirements are outlined in chapter 3.

a. **Demotion.** An employee must be given the required legal and regulatory notices before a demotion action is taken, except where the employee: (1) signed an agreement to return to a lower grade as a condition for a temporary promotion; or, (2) voluntarily makes a written request for change to lower grade. Demotions to positions with higher known promotion potential than the known potential of the current position held must be made competitively under the regulations in 5 CFR, part 335 and the policies and procedures contained in chapter 3 of this part.

b. **Reassignment.** Reassignments will be made in accordance with the policy contained in this handbook. Reassignments to positions with known promotion potential higher than the potential of the current position held must be made competitively under the regulations in 5 CFR, part 335 and the policies and procedures contained in chapter 3 of this part.

c. **Promotion.** Promotions and other personnel actions which are processed under competitive promotion procedures must be made under the policies in 5 CFR, part 335 and the policies and procedures contained in chapter 3 of this part.

d. **Position Change (General).** [ ] When reassignment or demotion candidates are required to be rated and ranked under competitive promotion procedures along with candidates for promotion, the best qualified group will consist of the top ranked candidates.

e. **Probationary or Trial Period (Appointment).** Employees who change positions before they complete a probationary or trial period must complete the remainder of the probationary or trial period in the new position. No new probationary or trial period is required if one is completed before the position change.

f. **Probationary Period (Supervisors and Managers).** The regulations in 5 CFR, part 315 subpart I and paragraph 13 of chapter 3 this part are applicable. See Appendix III-A.
3. CONVERTING FULL-TIME EMPLOYMENT TO PART-TIME EMPLOYMENT

a. Positions may be filled on a part-time basis by present full-time employees who wish to convert to part-time. This can be done by either considering those who apply for announced part-time vacancies or by converting employees’ present positions to part-time based on their requests. Criteria such as those listed in part I, chapter 3, section B, paragraph 3, “Reviewing Positions,” of this handbook can be used when considering whether to approve a full-time incumbent’s request to convert to part-time.

b. The personal circumstances of an employee who wishes to convert to part-time should also be considered. These may include the following:

1. The employee’s desire, or need, to spend more time with young children. In such cases, part-time work would augment family income and provide for childcare, yet retain a motivated and trained employee.

2. Part-time work may provide employees with an opportunity to continue or complete their education by providing the time as well as the income to do so.

3. Disabilities may hinder or prevent a person from working a full-time schedule but not a part-time one. Individuals with mobility problems may prefer part-time work so that they can utilize public transportation or avoid normal rush hours.

c. The authority to establish special tours of duty for severely physically disabled individuals when strict adherence to the normal tour of duty would cause hardships for such individuals may be found in VA Handbook 5011, Hours of Duty and Leave.

d. Employees should be advised that they may apply for part-time work at any time. VA Form 3497, Employee Request for Change to Part-Time Employment, has been developed for this purpose. If it is not feasible to convert their present positions to part-time, or if there are no part-time vacancies available, their applications should be retained for consideration when vacancies occur. Employees should be advised at least annually that they may submit voluntary applications for part-time work at any time.

e. Part-time employees with permanent appointments in the competitive service are eligible to compete for full-time and part-time vacancies under the local merit promotion plan.

f. Because of the requirements of the Federal Employees Part-Time Employment Act of 1978, employees who receive career part-time appointments, or former full-time employees converted to part-time, after April 7, 1979, receive only a prorated share of Government contribution toward the cost of the FEHB enrollment. This provision applies to employees in both the competitive and the excepted service, whose tour of duty is between 16 and 32 hours per week. If otherwise eligible, any part-time employee working less than 16 hours per week will receive a full Government contribution. All part-time employees serving continuously in a part-time employment status on or before April 7, 1979, who are covered by health insurance are unaffected by the pro-ration provisions of the Federal Employees Part-Time Employment Act of 1978.
4. EMPLOYMENT APPLICATIONS FROM INTERNAL APPLICANTS. VA employees will apply for VA title 5 vacancies by submitting a completed Optional Form 612, Optional Application for Federal Employment, to the VA Human Resources Management Office responsible for staffing the specific vacancy. This policy is modified by the following exceptions:

   a. The former SF-171 may be substituted for the OF 612 if the employee so chooses.

   b. For positions filled through the Centralized Staffing System (CSS), acceptable substitutes from employees for the OF-612 includes the former SF-171.

   c. VA Form 4078, Application for Promotion or Reassignment, may be substituted by local facility employees when acceptable at that VA facility.

   [d. Employees applying for vacancies announced through USA Staffing must submit a résumé or other application form, a completed assessment questionnaire, and any other documents required in the announcement for internal applicants.]

5. DETERMINING BASIC ELIGIBILITY

   a. Requirements. Qualification standards used to determine eligibility for position changes will be the minimum OPM requirements contained in the Operating Manual – Qualification Standards for General Schedule Positions and the X-118C Handbook or, when applicable, the minimum requirements established by VA under 38 U.S.C. ch. 74. The OPM supervisory qualification standard must be used in addition to the pertinent standard in determining basic eligibility for all General Schedule supervisory positions. Time-after-competitive appointment and time-in-grade requirements must be met prior to placement in the position. Selective placement factors are to be used only when they have been determined, through an appropriate job analysis, to be critical to the performance of the job. Licensure, registration, certification or organizational membership requirements not required by the appropriate qualification standards shall not be used as selective factors.

   b. Time-in-Grade Restrictions (5 CFR, part 300, Subpart F). OPM time-in-grade restrictions for filling General Schedule positions in the competitive service are also applicable to filling General Schedule positions in the excepted service in VA. These instructions are to be applied in conjunction with 5 CFR, part 300, subpart F restrictions.

NOTE: The Merit Systems Protection Board (MSPB) has ruled that OPM’s time-in-grade restrictions, 5 CFR, part 300, subpart F are not appealable as an employment practice to the Board and that the Board is without jurisdiction to hear such appeals. This ruling resulted from two MSPB decisions (Hellman vs. OPM, dated March 29, 1982; and Knowlden vs. OPM, dated March 30, 1982). In the ruling, the board upheld the validity of OPM’s time-in-grade restrictions by adopting OPM’s distinction between the time-in-grade restrictions covered by 5 CFR, part 300, subpart F and the employment practices covered by 5 CFR 300.101. That is, employment practices measure the qualifications of individual candidates for particular positions, whereas the time-in-grade restriction is an administrative device that applies to all competitive service positions for the purpose of preventing excessively rapid
promotions. Information concerning the application of these restrictions to VA positions is contained in Appendix III-B.

6. WRITTEN TESTS. Requirement - Written tests will not be used unless required by OPM or approved by the Director, Recruitment and Placement Policy Service, Office of Human Resources Management (OHRM), for inservice placement actions. Requests to use
written tests not required by OPM or not previously approved by the [Deputy Assistant Secretary (DAS) for Human Resources Management and Labor Relations (OHRM&LR)] will be submitted through channels to the [DAS OHRM&LR] (059). Individual facilities will not deal directly with OPM in requesting written test authorization. The provisions of 5 CFR 300.201 will be followed in the administration and security of written tests.

7. PHYSICAL REQUIREMENTS. All individuals selected for positions with established physical/mental requirements must satisfactorily pass a physical examination prior to entry on duty into the position. See VA Handbook 5019, Occupational Health Services.

8. EFFECTIVE DATES

   a. Effective Dates of Position Changes. Requirement - The effective date of a position change will be determined for each individual action consistent with technical and regulatory requirements and the needs of VA. Unless another date is required by technical or regulatory requirements or is considered to be in the interest of VA, the effective date of the position change will normally be the first day of the next pay period after the date of administrative approval. Guidance - While fiscal and records maintenance activities prefer effecting personnel actions at the beginning of a biweekly pay period, there is no prohibition against effecting actions on other dates.

   b. Effective Date for Release of Employees. Requirement - Employees selected for position changes will be released to their new assignments within a reasonable length of time. Guidance - Where unusual circumstances justify a period longer than 2 weeks prior to release, the employee should be either (1) informed in writing over the signature of the official responsible for the delay or the reasons for the delay and the expected release date, or (2) the position change action should be effected and the employee detailed back to the former position.

   c. Coordination. Requirement - The release date for an employee transferring to another VA facility will be arranged by the responsible officials. Unless circumstances dictate otherwise or both the releasing and receiving facilities otherwise agree, travel time will be accomplished on the receiving facility’s time.

   d. Nonmerit Factors. Requirement - An employee who meets qualification and time-in-grade requirements will not be denied a position change based on difficulty in obtaining a replacement.

9. KEEPING EMPLOYEES INFORMED

   a. Opportunities for Advancement. Guidance - Employees should be informed about the types of positions which may represent opportunities for reassignment and promotion, including those known to exist at other VA establishments. This may be accomplished by publicizing individual vacancies or by local open-continuous announcements, posting general notices of placement opportunities such as the [ ] Weekly Summary Bulletin, local and national [W]eb sites and career counseling. Care should be taken to ensure that all potentially qualified and interested employees have access to vacancy notices received from other facilities. Referral of vacancy notices from other facilities only to the corresponding local service or division may not be sufficient in some cases. Posting of positions in a centralized location is preferred, in addition to appropriate selective distribution.
b. **Employee Responsibilities. Guidance** - Employees should also be informed of their responsibility to tell supervisors about their job interests, individual needs and preferences, and qualifications and to submit updated qualification information for inclusion in personnel folders to the HRM office.

10. **ROTATION OF KEY PERSONNEL**

a. **Interchange of Employees. Requirement** - To the extent practical, the staffing needs of the Department and the career needs of employees will be met by movements and interchanges of line and staff officials and key supervisory employees, including tours of duty in Central Office. These placements will include, but are not limited to, positions for which employment matters are centralized to the Secretary, Administration Heads, Assistant Secretaries or Other Key Officials (e.g., General Counsel).

b. **Employee Mobility. Requirement** - Rotation will be used as necessary to ensure that key positions are filled by well-qualified candidates in a cost-effective manner. Employees selected by management for movement to key positions at other VA facilities will be expected to make themselves available. Any objections by the employee, however, should be given serious consideration.

11. **TRANSFERS WITHIN VA**

a. **Definitions.** For the purpose of this paragraph, a transfer within VA is a change in position while the employee is continuously serving VA and which involves a change in appointing officer.

b. **Selection of Transferee. Requirement** - Selection of an employee for transfer within VA is to be made in accordance with chapter 3 of this part.

c. **Requests for Transfer - Unsolicited Applications**

   (1) **Acceptance of Voluntary Applications. Guidance** - Unsolicited applications from VA employees at other facilities may be accepted. It may be appropriate to: (a) accept such applications only when an appropriate vacancy is likely to occur within a reasonable period of time (e.g., 6 months); (b) establish open seasons (certain months) for acceptance; and/or (c) establish a standardized suspense date for return to the applicant.

   (2) **Promotion. Requirement** - If voluntary applications for promotion are accepted, they may be considered in any area (limited, minimum, or extended) but must be considered along with other applicants for promotion when an extension of the area of promotion consideration includes the voluntary applicant's home facility (see chapter 3, par 7d(4)).

d. **Off-Station Applications Resulting From Extension of the Area of Consideration**

   (1) **Requirements** - Employees applying for vacancies at other facilities must submit a current employment application and/or any other information specified in the announcement to each facility having vacancies in which the employee is interested.

**NOTE:** See paragraph 13, this chapter, concerning relocation expenses and merit promotion transfers.
(2) **Requirement** - It is the employee's responsibility to secure appropriate supervisory evaluations of performance and annual performance appraisals and forward them, along with a completed employment application, in accordance with the due date specified in the announcement. The receiving facility will be informed by the applicant when its request for additional information requires extra time and the anticipated date of receipt. The local HRM staff will, when requested, provide information to applicants concerning the proper completion of the employment application and/or other forms or requests for information.

(3) **Requirement** - Referral of personnel folders to the facility having the vacancy will not be made routinely. Under unusual circumstances, however, when proper evaluation and ranking cannot be made based on the available information, requests for personnel folders by other facilities will be honored. Facilities receiving folders will ensure that all required actions are completed and the folders are released to the appropriate facility within 5 workdays after receipt.

### 12. USE OF VA FORM 3918, INTRA-AGENCY TRANSFER REQUEST

a. **General. Requirement** - VA Form 3918, Intra-Agency Transfer Request, will be completed for each VA employee who is selected for transfer. After the transfer has been effected, the VA Form 3918 will be filed on the left side of the employee's personnel folder for at least 1 year.

b. **Action by the Receiving HRM Office**

(1) **Guidance** - When an employee is selected for transfer, the receiving HRM office will normally initiate the VA Form 3918 by completing Part I of the form and sending it to the releasing HRM office.

(2) **Requirement** - If the proposed transfer is to a position in a different wage schedule or locality pay area, the pay rates of the grade will be indicated in item 9 on the form. This will enable the releasing facility to inform the employee of the rate of pay for the new position.

(3) **Requirement** - The criteria for determining whether relocation expenses may be authorized at Government expense are contained in MP-1, part II, chapter 2 and paragraph 13 of this chapter. Item 15 of VA Form 3918 will indicate whether or not relocation expenses will be authorized. If relocation expenses are not authorized by the appropriate approving official, the employee statement and signature cited in paragraph [14d], this chapter, are required and will be entered in item 34 on the reverse side of the VA Form 3918.

(4) **Guidance** - When time is short, it may be more practical for the releasing facility to initiate the VA Form 3918. **Requirement** - In these cases, the receiving facility must let the releasing facility know if travel and transportation costs are to be paid by VA so the employee can complete the appropriate sections of the form.

c. **Action by the Releasing HRM Office**

(1) **Requirement** - Upon receipt of the VA Form 3918, the releasing HRM office will have the employee complete the appropriate portions of Part II. Employees for whom travel and transportation
costs have been authorized will be referred to the servicing A&MM Office for assistance in completing item 29 on VA Form 3918 and for guidance related to procedures for shipment of household goods.

(2) **Requirement** - If payment of travel and transportation is authorized, the releasing HRM office will give the employee the latest copy of VA Central Office Finance Service Handbook H-047-3, "Guide on Permanent Change of Station." A statement that the employee has received a copy of this publication will be entered in item 34, the remarks section, of VA Form 3918. The releasing facility will also have the employee sign the agreement on the reverse side of the VA Form 3918 to remain in Government service for 12 months or to repay the Government for costs it incurs for travel and transportation.

(3) **Requirement** - The releasing HRM office will complete Part III of the VA Form 3918 in accordance with instructions contained in MP-6, part V, supplement No. 1.5, on processing inter-facility transfers.

d. **Enroute Time or Delays in Reporting. Requirement** - Any time required for travel, or a delay in route, will follow the effective date of transfer and be accomplished on the receiving facility’s time, unless other arrangements are mutually agreeable to both facilities concerned.

13. DETAILS (5 CFR, PART 300 and 5 USC 3341)

a. **General.** Details of employees will be made [when it is determined that such details will clearly be in the best interest of VA], and will be limited to the shortest period of time needed within the limits permitted by 5 USC 3341 and 5 CFR, part 300. Under these requirements, VA employees [ ] may be detailed to other positions at their facility, to other VA facilities, or to other agencies. Employees detailed will be given appropriate credit towards meeting the qualification requirements of the position in any subsequent personnel action. [ ] (For restrictions on details to higher graded positions, see 5 CFR, part 335 and paragraph 15 of chapter 3, this part.)

b. **Types and Criteria for Details**

(1) **Informal Detail.** A detail within VA of less than 30 days. Prior approval of the individual's supervisor is required.

(2) **Formal Detail.** A detail within VA of 30 days or longer. Prior approval at the service/division chief level or higher is required. Details within VA must conform to the requirements of 5 USC 3341 and 5 CFR, part 300. Additionally, to the extent practicable, selection for details must be consistent with policies and requirements for other placement actions (see 5 CFR, part 335).

(3) **Interagency Detail.** A detail between VA and another Federal agency in which the detailing agency is reimbursed for the cost of salary and other expenses as agreed upon prior to the detail. (See 7 Comp. Gen. 709 and 13 Comp. Gen. 234.) Interagency details will be made only where there is an emergency need or some unusual situation where the employee can better serve in the interest of the Government service. Such details will not be based on the employee's request unless it can be clearly shown that the experience and knowledge gained will benefit the agency.
(4) **Interagency Loan.** A detail between VA and another Federal agency in which the detailing agency is not reimbursed for the cost of the employee's salary but other expenses are usually borne by the agency to which detailed. (Reimbursable details are contrasted with loans in 13 Comp. Gen. 234 and 15 Comp. Gen. 32.) Loans are appropriate only in those unusual situations where VA has a duty to share responsibilities with other Government agencies or where it is in the interest or to the advantage of VA and there is no violation of Appropriation Act requirements.

(5) **Detail of Excepted Service Employees Serving Under a Schedule A, Schedule B, or Veterans Recruitment Appointment to a Position in the Competitive Service.** A detail within VA of an employee serving in the excepted service under a Schedule A, Schedule B, or Veterans Recruitment Appointment to a competitive service position. Central Office approval is required (administration/staff office head as appropriate) for details of Schedule A or B employees to centralized positions. This authority is to be used judiciously to meet bona fide management needs and generally should not result in extended details which give the appearance of circumventing merit system principles.

(6) **Details of Excepted Service Employees Appointed Under Schedule C or Other Title 5 Appointment Excepted by Statute to Competitive Service Positions (VA/OPM Master Delegation Agreement).** A detail within VA of an employee serving under a Schedule C excepted appointment or an appointment excepted by statute to a competitive service position. Prior approval of the Secretary is required for such details. Individual circumstances are to be carefully considered before such details are authorized. Details of these employees to competitive positions may be made only under the following conditions:

- (a) Pending the filling of a vacant competitive service position or during the temporary absence of the incumbent;
- (b) Temporary coverage pending abolishment of the position;
- (c) Short-term relief due to workload, organizational and/or mission changes;
- (d) Participation in time-limited projects or studies; or
- (e) Coverage in a position targeted for early placement in the excepted service.

Requests for prior approval, with justification, must be submitted, over the signature of the facility/staff official or Administration Head (as applicable), through channels, to the Deputy Assistant Secretary for Human Resources Management [ ] (05). Initial approvals are limited to a maximum of 120 days. Extensions beyond 120 days must be approved by the Secretary prior to the 120th day of the initial action. Complete justification must be submitted for extension in the same manner as required for initial approval. Such details must meet all requirements of 5 CFR, part 300, including the use of competitive promotion procedures for details exceeding 120 days to higher grades or to positions with known promotion potential.
c. Procedures for Detailing Employees

(1) Within VA. Informal details will be arranged by the officials concerned and the employee. Formal details will be initiated by an SF 52, Request for Personnel Action, and forwarded to the Human Resources Management office for action. Another SF 52 will be necessary to extend or to terminate the detail. An SF 50-B, Notification of Personnel Action, is required for certain details. The documentation requirements for details, extensions and terminations of details are contained in OPM’s Guide to Processing Personnel Actions. If the formal detail is from a classified position to an unclassified position, a brief explanation of the duties will be entered in the "Remarks” space of VA Form SF52 in lieu of the position identification in the "TO" column.

(2) Extension of Details Beyond 120 days. Employees may be detailed, in 120-day increments, to the same or lower grade positions for up to 1 year. Details to higher grade positions, may be made for up to 1 year during periods of major reorganization (as determined by the appropriate administration/staff office head in VA Central Office). Details of 120 days to higher graded positions in the absence of a major reorganization may be extended for an additional 120 days (maximum period of 240 days). If a detail of more than 120 days is made to a higher graded position, or to a position with known promotion potential, it must be made under competitive promotion procedures. Whenever possible, temporary promotions should be considered for employees serving in higher grade positions for other than brief periods (e.g., in lieu of details exceeding 120 days; or for Assistant Chiefs acting for their Chiefs, in lieu of details exceeding 240 days).

(3) Between Agencies. Reimbursable details between VA and other Federal agencies will be agreed upon in writing. Letters for this purpose will have the concurrence of the Fiscal and HRM Officers to ensure compliance with technical requirements. Such agreements must be clear as to the dates, employees, and agencies involved and describe the basis for reimbursement. A copy of the letter will be filed in the employee's personnel folder with a copy given to the employee. The approval of interagency details and loans will be made for facility heads for noncentralized positions under their control, by the administration or staff office heads for centralized positions in the field under their control or by the Secretary, for field positions centralized to the Secretary. For all actions involving centralized and noncentralized employees in Central Office, approval must be obtained from the Secretary in advance and the request must be routed through the Deputy Assistant Secretary for Human Resources Management [and Labor Relations] (05).

14. RELOCATION EXPENSES AND MERIT PROMOTION TRANSFERS

NOTE: The term "relocation expenses" is used herein as a shorthand reference to all transfer expenses authorized under 5 U.S.C., sections 5724 and 5724a.

a. Guidance - Generally, when an employee is selected pursuant to a merit promotion plan for transfer to a position at a higher grade level or to a position with known promotion potential, the transfer is considered to be for the benefit of the Government for the purpose of paying relocation expenses allowed under 5 U.S.C., sections 5724 and 5724a. However, all of the factors surrounding any particular merit promotion recruitment action may lead the approving official to the determination that any resulting transfer is not primarily in the interest of the Government for the purpose of paying relocation expenses. (Note that the Comptroller General in the David C. Goodyear decision, 56 Comp. Gen. 709 (1977), ruled
that budget constraints alone cannot form the basis for denying relocation expenses, if the transfer is otherwise in the Government's interest.)

b. **Requirement** - The approving official (see MP-1 pt. II, ch. 2, app. A) must determine if a merit promotion transfer is primarily for the benefit of the Government or if it is primarily for the convenience or benefit of the employee for the purpose of paying relocation expenses. This determination must be made for each vacancy announced under the provisions of a merit promotion plan. The determination must be based on consideration of all the pertinent factors in each action, including FEORP requirements that an applicant pool be representative of candidates from any underrepresented group. The criteria specified in MP-1, part II, chapter 2 and the factors and conditions cited below will be considered in making such determination in any particular merit promotion transfer. A decision that relocation expenses will or will not be paid in connection with filling a position under a merit promotion plan must be clearly communicated in advance to all prospective applicants by a statement on the vacancy announcement. (See Eugene R. Platt, 59 Comp. Gen. 699 (1980); Reconsideration of Platt, 61 Comp. Gen. 156 (1981); and Bruce E. Stewart, Unpublished Comp. Gen. B-201860, August 27, 1982.)

c. **General**

(1) **Requirement** - Conditions and factors which may warrant a determination that a transfer pursuant to a merit promotion plan action is not primarily for the benefit of the Government will include but are not limited to the following situations:

(a) The local labor market and recruiting area includes a sufficient supply of qualified individuals with appropriate skills;

(b) Generally, it is not cost effective to transfer employees at GS-6 and below or equivalent for wage grade employees at Government expenses; (movement of employees in VA-wide trainee programs under mobility agreements, however, will generally be at Government expense);

(c) A current executive, legislative, or agency imposed freeze on employment of outside candidates necessitates internal solicitation to the exclusion of other sources; or

(d) Voluntary applications for promotion are on file from employees outside the commuting area which were not submitted in response to a specific vacancy announcement but were considered as a result of an extension of an area of consideration.

(2) **Requirement** - Payment of relocation expenses is not generally considered appropriate in the following situations, unless there is a specific determination by the duly designated official that such a transfer is primarily in the best interest of the Government:

(a) Reassignment or demotion transfer (not under a merit promotion procedure) even when the applicant is responding to a promotion announcement;

(b) Transfer eligibles from outside the agency even though applications are rated and ranked under agency promotion procedures, since the VA promotion program applies to VA employees only; or
(c) Employee primarily motivated to transfer in order to accompany a spouse being transferred to the area.

(3) **Requirement** - Where a change of official duty station is directed by a duly designated VA official, relocation expenses will be paid.

d. **Records**

   (1) **Requirement** - A decision that relocation expenses will not be paid in connection with a particular merit promotion transfer must be documented and fully supported by the totality of circumstances in the case.

   (2) **Requirement** - When an approving official decides that relocation expenses will not be paid, the following statement along with the employee's signature must be entered on the reverse side of the VA Form 3918 in item 34, “Remarks of Releasing Station”:

   "I am fully aware of and understand the decision that my transfer is primarily for my convenience or benefit or at my request and is not in the interest of the Government (VA). I further understand and agree that all travel, transportation and other expenses incident to this move will be at my own personal expense."

   (3) **Requirement** - A record of the basis for a decision not to pay relocation expenses will be maintained in the applicable merit promotion folder file.
CHAPTER 3. PROMOTION (TITLE 5)

1. SCOPE. Contains categories of employees to be considered for promotion while absent from official duty.

   a. All VA Employees. The following categories of VA employees within the area of consideration must be given consideration for promotion as though they were present for duty.

      (1) Employees on Intergovernmental Personnel Act agreements;

      (2) Employees on leave;

      (3) Employees attending training courses;

      (4) Employees on detail, either internally or to other Federal agencies;

      (5) Employees serving in public international organizations, either through a transfer or detail;

      (6) Employees separated for military service with restoration rights;

      (7) Employees absent because of compensable injury (see 5 CFR, part 353, subpart C); and

      (8) A Veteran serving on a Veterans Recruitment Appointment (VRA) appointment.

   b. Concurrent Consideration of Certain Excepted Service Employees Under Competitive Merit Promotion Procedures. Generally, employees serving under excepted appointments (except Veterans [Recruitment] Appointments) are precluded from competing under competitive promotion procedures with competitive service employees. However, certain excepted service employees, e.g., title 38 and hybrid title 38 employees covered by VA/OPM Interchange Agreements (see appendix III-C), or, [persons with intellectual disabilities, severe physical disabilities, and psychiatric disabilities] appointed under Schedule A [ ] shall be included within the minimum area of consideration. Therefore, the same rating and ranking criteria will be used in evaluating employees in these groups and each group will be referred for promotion [ ]. Such an approach may significantly improve upward progression opportunities for [persons with intellectual disabilities, severe physical disabilities, and psychiatric disabilities]. See Appendix III-C.

   c. Veterans Employment Opportunities Act (VEOA). When facilities are accepting applications from outside VA, individuals who are eligible for consideration under the VEOA may apply. (See part II, chapter 2, section B, paragraph 2c of this handbook.)
2. RESPONSIBILITIES

a. **Office of Human Resources Management [and Labor Relations].** The Deputy Assistant Secretary for Human Resources Management [and Labor Relations] is responsible for:

   (1) Developing VA policies and guidelines for the implementation of the Federal merit promotion policy, including development of selection or evaluation procedures, their application, administration and security, and personnel measurement program review;

   (2) Providing technical guidance and staff advice in the administration of promotion plans for positions centralized to the Secretary and for plans established by other key officials or administrative heads for field positions centralized to them;

   (3) Administering promotion plans for Central Office positions; and

   (4) Providing technical guidance and advice to field facilities in the administration of their plans.

b. **Administrations and Other Key Offices.** Each administration and key office head is responsible for establishing and directing the administration of promotion plans for positions centralized to the administration or key office level, including the proper use of personnel measurement procedures and adherence to merit system principles.

c. **Field Facilities.** Each facility head is responsible for establishing and directing the administration of promotion plans for noncentralized positions for which appointing authority has been delegated, including the proper use of personnel measurement procedures and adherence to merit system principles.

d. **Human Resources Management Officers.** Each HRM Officer will:

   (1) Participate with line officials in carrying out the Federal merit promotion policy and the requirements of this chapter;

   (2) Determine applicants’ eligibility for promotion; and

   (3) Participate with line officials in establishing and applying evaluation methods in a manner consistent with proper personnel measurement procedures and merit system principles. These responsibilities include development or selection of evaluation procedures, their application, administration and security, and personnel measurement program review in the organization served.

e. **Operating Officials and Supervisors.** Operating officials and supervisors are responsible for assisting in the development of plans and for explaining the merit promotion program and applicable plans to employees. They participate in the evaluation process and select from among the best qualified persons available. As selecting officials they must familiarize themselves with the techniques and procedures used to identify and select the best qualified candidates. Both as a high public trust and a fundamental management responsibility, careful and objective judgment, consistent with merit principles, policy requirements and selection procedure requirements is required in each selection.
f. Employees. All employees have primary responsibility for furnishing accurate information to update their qualification records and making application for promotion opportunities in accordance with prescribed procedures in a timely manner.

3. GENERAL MERIT PROMOTION REQUIREMENTS

a. The policies in this handbook are fully applicable and binding. Statements will be included in every promotion plan to reflect the requirements in this handbook.

b. 5 CFR, Part 335 Requirements. The following five basic merit promotion requirements of 5 CFR 335.103(b) are fully applicable and binding:

   Requirement 1. Each agency must establish procedures for promoting employees which are based on merit and are available in writing to candidates. Agencies must list appropriate exceptions, including those required by law or regulation, as specified in 5 CFR 335.103(c). Actions under a promotion plan, whether identification, qualification, evaluation, or selection of candidates, shall be made without regard to political, religious, or labor organization affiliation or nonaffiliation, marital status, race, color, sex, national origin, nondisqualifying disability, or age, and shall be based solely on job-related criteria.

   Requirement 2. Areas of consideration must be sufficiently broad to ensure the availability of high quality candidates, taking into account the nature and level of the positions covered. Agencies must also ensure that employees within the area of consideration who are absent for legitimate reasons, e.g., on leave, at training courses, in the military service, or serving in public international organizations or on Intergovernmental Personnel Act assignments, receive appropriate consideration for promotion.

   Requirement 3. To be eligible for promotion or placement, candidates must meet the minimum qualification standards, to include any physical/mental requirements, prescribed by the Office of Personnel Management (OPM) or VA, as appropriate. Methods of evaluation for promotion and placement, and selection for training which leads to promotion, must be consistent with instructions in 5 CFR, part 300 subpart A. Due weight shall be given to performance appraisals and incentive awards.

   Requirement 4. Selection procedures will provide for management's right to select or not select from among a group of best qualified candidates. They will also provide for management's right to select from other appropriate sources, such as reemployment priority lists, reinstatement, transfer, disabled or Veterans [Recruitment] Act eligibles, or those within reach on an appropriate OPM certificate. In deciding which source or sources to use, agencies have an obligation to determine which is most likely to best meet the agency mission objectives, contribute fresh ideas and new viewpoints, and meet the agency's affirmative action goals.

   NOTE: For Career Transition Assistance Program (CTAP) and Interagency Career Transition Assistance Program (ICTAP) requirements, see part IV, section I, paragraph 5 of this handbook.

   Requirement 5. Administration of the promotion system will include recordkeeping and the provision of providing necessary information to employees and the public, ensuring that individuals' rights to privacy are protected. Each agency must maintain a temporary record of each promotion
sufficient to allow reconstruction of the promotion action, including documentation on how candidates were rated and ranked. These records may be destroyed after 2 years or after the program has been formally evaluated by the OPM (whichever comes first), if the time limit for grievance has lapsed before the anniversary date.

c. Promotion Plan. Requirements - Promotion plans will be in writing and will contain a statement identifying the positions covered, exceptions to competitive promotion procedures, the areas of consideration, the methods of locating candidates, the qualification standards to be used, the evaluation procedures and rating/ranking and selection procedures. Each promotion plan must contain a provision which will allow facilities to experiment with alternative selection procedures as part of the Department’s efforts to increase the validity of selection procedures. All proposed experiments outside the provisions of the applicable promotion plan must be forwarded through channels to the Director, Recruitment and Placement Policy Service (059) for approval. Guidance - Subject to proper coordination and/or negotiation, referrals for consideration may be those best qualified candidates identified in accordance with the provisions of the applicable promotion plan, those identified under the experimental alternative procedure or those identified in both. Requirement - If, however, the experimental procedure results in greater validity or less adverse impact, requirements to reevaluate the existing selection procedure in light of the findings must be imposed. Guidance – All candidates must be screened to determine which candidates are to be placed in the best qualified category. This process must take place regardless of the number of candidates, using an evaluation procedure that is job-related and applied fairly and consistently. This does not mean that best qualified determinations must be made prior to issuing a certificate when there are fewer than 10 candidates. An assessment tool (e.g., position description, crediting plan or structured interview process, etc.) should be used to assist the evaluator(s) in distinguishing between candidates. Selecting officials should uniformly consider each of the best qualified candidates and document on the certificate the basis for his/her selection. All processes used in making the selection determination must be job-related, appropriate to the position being filled, and consistent with merit principles.

d. Guidance. When considering candidates for promotion, all application materials should be evaluated on an equal basis. In particular, when references to outstanding performance or performance awards are included, these references should be given due consideration. As mentioned in 5 CFR 335.103(b)(3), evaluation materials should include acknowledgement of outstanding performance or performance awards. This may be accomplished by incorporating language in the crediting plan that gives credit for consistently outstanding performance and/or awards which are directly related to the work of the position to be filled.

NOTE: The merit promotion plan for competitive positions centralized to the Secretary may be found in appendix III-E.

4. COVERED PERSONNEL ACTIONS. Requirements - Competitive promotion procedures apply to all promotions under 5 CFR 335.102 and to the following actions:

a. Reassignment or demotion to a position with greater known promotion potential than a position previously held on a permanent basis in the competitive service (except as permitted by reduction-in-force (RIF) regulations) (5 CFR 335.103(c)(iv));
b. Selection for training which is given primarily to prepare an employee for advancement and is required by the qualification standard for promotion (i.e., when qualification standard minimum eligibility for promotion depends on whether an employee has completed training) (5 CFR 335.103(c)(iii));

c. Transfer of an employee from another Federal agency to a VA position at a higher grade or with more promotion potential than a position previously held on a permanent basis in the competitive service (5 CFR 335.103(c)(v));

d. Reinstatement, including those made from reemployment priority lists, to a permanent or temporary position at a higher grade or with more promotion potential than a position previously held on a permanent basis in the competitive service (5 CFR 335.103(c)(vi));

e. Selection for details for more than 120 days to a higher grade position or a position with higher known promotion potential in accordance with 5 CFR 335.103(c)(ii);

f. Temporary promotion under 5 CFR 335.102(f)(1) for more than 120 days (all prior service by detail to higher grade and temporary promotion during the preceding 12 months is to be counted toward the 120-day time limit) (5 CFR 335.103(c)(i)).

5. EXCEPTIONS TO COMPETITIVE PROMOTION PROCEDURES. Requirements - The following actions are exceptions to competitive promotion procedures and must be included in all VA promotion plans:

a. **Upgrading Without Significant Change in Duties and Responsibilities.** When the issuance of a new or revised classification standard or the correction of an earlier classification error results in the upgrading of a position, the incumbent must be promoted if minimum qualification standard requirements and regulatory requirements are met, unless the incumbent properly vacates the position.

b. **Promotion During Reduction in Force.** Position changes during reduction in force which are technically promotions because of pay fixing policies are to be made without competition. This does not mean that RIF sets aside other competitive promotion requirements, e.g., GS-7 to GS-8.

c. **Promotion After Failure to Receive Proper Consideration.** When it has been determined that an employee has failed to receive proper consideration in a promotion action and the original selectee is retained in the position, the employee who lost proper consideration must be given priority consideration for the next appropriate vacancy. This is a referral for selection consideration ahead of all others not entitled to a higher requirement for consideration. All employees due equal consideration and qualified for the vacancy are referred together, in competition with each other, for the priority consideration. A selection resulting from a priority referral is excepted from competitive promotion procedures. Although priority consideration is guaranteed, promotion is not guaranteed. An employee is to receive priority consideration only one time for each proper consideration lost.
NOTE: Close adherence to the applicable promotion plan’s requirements and procedures, laws, rules, regulations, and policies will greatly reduce the necessity for priority consideration. The importance of a full understanding of, and adherence to, the promotion plan’s requirements by all concerned cannot be overemphasized.

d. Repromotion to Grades from Which Demoted Without Personal Cause. Repromotion up to a grade previously held on a permanent basis from which an employee was demoted without personal cause. Guidance - Such repromotions may occur under the provisions of the VA Priority Placement Program, among others. See Appendix III-F.

6. DISCRETIONARY EXCEPTIONS TO COMPETITIVE PROMOTION PROCEDURES. Guidance - Promotion plans may or may not require competition for:

   a. Temporary promotions for 120 days or less;

   b. Details to higher grades or to positions with higher known promotion potential for 120 days or less;

   c. Selections for training which may significantly enhance chances for future promotion but which is not required for promotion;

   d. Promotion resulting from an employee's position being reclassified to a higher grade because of additional duties and responsibilities (see paragraph 12d of this chapter, referencing prohibited personnel practices);

   e. Competition for promotion to the next higher grade in a career ladder when the number of satisfactory employees at a grade level equals or exceeds the number of opportunities available at the next higher grade.

   f. Noncompetitive advancement to a higher grade of an employee who was selected at an earlier stage under competitive procedures (e.g., from a civil service register, under direct hire, or under an agency merit promotion program).

   g. Reassignment requested by employee from a position having known promotion potential to a position having no higher known potential.

7. AREAS OF PROMOTION CONSIDERATION

   a. Requirement - Areas of consideration, which are descriptions of the geographic or organizational areas from which high-quality VA employees are sought in actions requiring competitive procedures, must be clearly defined in promotion plans and must be broad enough to ensure the availability of high-quality candidates, taking into account the nature and level of the positions covered. Their establishment must be consistent with policy related to prohibited practices in this handbook.
b. **Use of Other Recruitment Sources.** [It is required that] the terms "area of consideration" and "minimum area of consideration," and references to limitation and extensions thereof, apply only to the use of competitive promotion procedures for VA employees. The organizational or geographic boundaries associated with area of promotion consideration do not apply to other methods of recruitment such as appointment, transfer, reinstatement, reassignment, etc. An area of promotion consideration does not restrict the use of alternative recruitment methods, a management right, or the geographic area from which applicants from other recruitment sources are considered.

c. **Minimum Area of Promotion Consideration**

(1) Usually, the minimum area of consideration should be at least facilitywide [and must include title 38 and hybrid title 38 employees covered by VA/OPM Interchange Agreements]. Not only does this provide for possible advancement opportunities for all facility employees, it also precludes overlooking well-qualified employees whose previous experience or education is directly related to a vacancy even though their present job is in an unrelated field.

(2) There are, however, circumstances when a minimum area less than facilitywide may be appropriate if the applicable promotion plan provides for its use. Promotion plans should specify procedures to be used to establish such areas. If such an area is used, the circumstances involved should be carefully documented to support the action, particularly in relation to prohibited practice policies and as a means to explain the necessity and logic to other employees. Some examples of lesser minimum areas which may be appropriate are:

(a) New equipment or machinery, technological changes, or additional workloads or responsibilities may require additional higher level duties, raising the grade of a position or establishing a new position in lieu of another position in a service or division which has no ceiling for an additional position. Announcement of the opportunity facilitywide would increase expectations of employees outside the service or division when, in fact, their selection is unlikely because of the ceiling restrictions.

(b) Restriction of the minimum area to a service or division may also be appropriate when VACO assigns additional program responsibility without a corresponding increase in ceiling, resulting in the need for a higher grade position in a division or service at full ceiling.

(c) When a reorganization occurs within a service or division at full ceiling and, as a result, an additional supervisory position is necessary, it may be appropriate to restrict the area of promotion consideration for the newly created supervisory position to that service or division.

(d) Over a period of time, higher grade duties may gradually accrue to an identical-additional (IA) position. It becomes evident that, in the interest of effective management, the additional duties should be consolidated in one position or a few positions rather than fragmented throughout all the IA positions. If there is no additional ceiling available to the service or division, it may be appropriate to restrict the area of promotion consideration to those employees on the IA position description.

(e) Field facilities with two divisions, or a main facility with one or more satellite facilities, may find it in the best interest of employees and management efficiency to establish separate minimum areas of promotion consideration for each. Careful consideration should be given to the effect such an action would have on upward mobility opportunities, the availability of high quality candidates for positions.
common to one or more of the organizational elements, and the need for interchange of new concepts and/or methods between organizational elements.

(f) It may be appropriate to restrict consideration to a service or division for competitive temporary promotions and/or competitive details. In many cases employees who are familiar with the day-to-day functions of a division or service are likely to fulfill the temporary need most effectively. In addition, the selection of an employee from another division or service may result in a disruption of that organization during the selectee's absence.

(3) **Centralized Positions. Requirement** - For positions centralized to the Secretary, Administration Heads, Assistant Secretaries or Other Key Officials, the applicable merit promotion plan will specify the area of promotion consideration.

d. **Extensions of the Area of Promotion Consideration**

   (1) **Requirement** - An extension of the area of promotion consideration is defined as the search for additional high quality VA employees in actions requiring competitive promotion procedures. Recruitment for appointment, reinstatement, transfer, reassignment, demotion or reemployment candidates which does not require merit promotion competition will not be considered as an extension of an area of promotion consideration.

   (2) **Guidance** - Promotion plans should provide for extensions of the minimum area of promotion consideration to the extent necessary to locate a sufficient number of high quality candidates. Either of the methods in subparagraphs (a) and (b) below may be used.

      (a) **Requirement** - The promotion panel, after initial rating and ranking reveals an inadequate number of best qualified candidates, may determine that the area of promotion consideration is to be extended before any candidates are certified under the plan; or

      (b) **Requirement** - The selecting official, after receipt of the certificate and a review of the records reveals an inadequate number of best qualified candidates and in coordination with human resources officials concerning the likelihood of locating additional promotion candidates, may decide (or recommend to the official who retains the authority to decide) to extend the area of promotion consideration.

      (c) **Requirement** - To preclude misunderstandings, misinterpretations, and employee dissatisfaction, and to ensure that all employees are adequately informed, each area of promotion consideration which may be used must be properly defined or explained in the plan, including the commuting area if it is used. The plan must clearly explain when and how different areas of promotion consideration are to be used.

      (3) **Guidance** - A commuting area may vary from facility to facility. The geographic distance may vary one direction to another depending on the location of the facility in relation to residential districts. One determinant may be the distance several employees commute daily to the facility. An excessive distance which only one employee commutes daily is not necessarily the normal commuting area.
(4) **Voluntary Applications. Requirement** - If unsolicited applications for promotion from VA employees at other facilities are accepted, they may be considered in any area of consideration (limited, minimum and extended) but they must be considered when the candidate's home facility is included within an extended area of promotion consideration. These candidates must indicate the specific type(s) and grade level(s) of positions for which they wish consideration. An indication of the title of the position (formal or informal) and grade level is sufficient.

(5) **Filling a Position Occupied by an Employee on Leave**

(a) If a replacement is required while the incumbent is on extended leave, an interim position may be established. Generally, interim positions will be terminated within 1 year or less, and may be extended only under extenuating circumstances. (See 5 CFR 335.103, and this part for information on temporary promotions.) Where an employee has occupied an interim position under a temporary promotion for more than 2 years, any action taken to place him in another position must observe adverse action procedures where applicable (5 CFR 752.301, and this part).

(b) When an interim position is filled by the reassignment or temporary promotion of an employee, the personnel action filling the position will normally be limited to the period covered by the absence of the regular incumbent. The employee selected to fill an interim position must be fully informed about the action. To make sure the employee understands, a signed statement such as the following may be entered on the reverse of the request for personnel action:

"I voluntarily accept (reassignment or temporary promotion) to the interim position of (title, grade, series, salary). I understand that this position will be canceled upon return of the incumbent. I also understand that at that time I will be returned to my position of (title, grade, series, salary), or, with my concurrence, placed without time limit in a different position in a grade no lower than my position of (title, grade, series, salary). The salary I will receive will be based on regulations in effect at that time and will not be less than what I would have earned had I remained in my position of (title, grade, series, salary)."

(c) If an interim position is filled from outside VA, the appointment will be limited to the period of time the interim position will be required unless it can be expected that another position of like status, grade, and pay will be available for the appointee when the interim position ends.

(6) **Central Office Referrals. Requirements** - Central Office referrals for noncentralized positions must be accepted and considered in limited, minimum and extended areas and ranked in accordance with the provisions of the applicable promotion plan. Program officials responsible for such referrals must assure they are made in accordance with merit principles.

e. **Limiting Extension of the Area of Promotion Consideration.** When and how far to extend the area of promotion consideration may be affected by several factors. There may be circumstances when an extended search for additional high quality promotion candidates would not be appropriate, such as:

(1) **Guidance** - Several recent extensions for the same type and grade position have not produced additional high quality candidates;
Guidance - The position is located in Alaska, Hawaii, Puerto Rico or the Philippines; and it would not be practical to search for promotion candidates beyond the particular geographic area;

Guidance - Funds to cover moving and travel expenses may not be available, or limited funds may dictate such payments only for higher priority positions. Under these circumstances, limitation to such geographic boundaries as the commuting area, facility groupings, statewide, or regionwide, may be appropriate;

Guidance - It may not be practical to extend the area of consideration for temporary promotions and details, although the option to extend should be retained in case unique circumstances develop in the future;

Guidance - In over-ceiling situations or at-ceiling situations, it may be appropriate to limit the area of consideration;

Guidance - When circumstances indicate an extension of the area of promotion consideration is inappropriate, and promotion continues to be a recruitment source, promotion consideration should be given only to high quality promotion candidates from the lesser area. In the interest of maximum efficiency and proper utilization of public funds, well-qualified candidates from other recruitment sources should be considered.

8. LOCATING CANDIDATES. Guidance - Several methods may be used to locate eligible candidates. Different methods or combinations of methods may be appropriate for different occupations or grades. Posting vacancy announcements for individual vacancies, open-continuous announcements for entry-level jobs, posting general notices of placement opportunities such as the [ ] Weekly Summary Bulletin, sending electronic notices to other VA facilities, Central Office referrals, and use of skills files are several methods. Requirement - To provide proper information to employees, each promotion plan must state which method or methods are used.

a. Vacancy Announcements

Guidance - Vacancies may be announced by posting notices on bulletin boards, through electronic transmission, and/or by circulating special notices to employees.

Requirement - Vacancy announcements must receive sufficient publicity and be open long enough so all eligible employees within the area of consideration have the opportunity to learn of the vacancy and apply. They must be clear and tell employees: the area of consideration; if the position is part-time, the number of hours per week; the pay range; the location of the position; summarized duties of the job; the summarized minimum qualifications, including selective placement factors (if appropriate); where the qualification standard requirements are available for review; a list of the rating factors or job elements; application procedures; the closing date; whether the position has known promotion potential; and that VA
policies on equal employment opportunity are fully applicable, including the reasonable accommodation statement. The announcement should state that preference eligibles or veterans who have been separated under honorable conditions from the armed forces after 3 or more years of continuous active service may compete for vacancies under merit promotion when an agency accepts applications from individuals outside its own workforce (VEOA).

(3) **Requirement** - Open-continuous announcements must be clear and tell employees: the area of consideration; target grade level; that VA policies on equal employment opportunity are fully applicable, including the reasonable accommodation statement; and what has to be done to apply. The other information in subparagraph (2) above must be available on request.

(4) **Requirement** - When a vacancy announcement does not yield a sufficient number of best qualified candidates and the area of consideration is extended, the original announcement closing date must also be extended to coincide with the closing date for candidates in the extended area. This new area of consideration and the new closing date must be conveyed to local employees in an appropriate manner.

(5) **Requirement** - When the target grade level is known, it (and any intervening grade levels) must be stated in the vacancy announcement. When there is potential but the anticipated grade has not yet been determined, the estimated grade level must be indicated. In such cases, it is extremely important that all possible applicants are fully aware that an estimated potential grade may or may not materialize. **Guidance** - Occasionally, a position may be announced at multiple grade levels. The announcement should clearly indicate when selection for any of the lower grades indicated carries with it the potential for the highest grade indicated. When this is not the case, the announcement should provide proper information to applicants.

(6) **Requirement** - All vacancy announcements of positions with identified target grade level must inform all potential applicants that:

(a) Selection does not guarantee promotion to the target grade (or any intervening grade, if appropriate);

(b) All legal and regulatory requirements for promotion to the next higher grade must be met; and

(c) Subsequent promotion to the next higher grade is dependent on the selectee's demonstration of the ability to perform the duties of that grade to the satisfaction of the supervisor and the availability of enough work at the next higher grade to support the target position.

(7) **Requirement** - When vacancy announcements are used to recruit for standing registers to fill the same type and grade position over an extended period (e.g., 90 days), the announcement must provide this information to potential candidates. Employees who apply for consideration during the life of the standing register must be provided information concerning how their applications will be treated and under what circumstances they will be considered (i.e., (a) applications will be accepted and consideration extended for the next vacancy filled from the register; (b) applications will be accepted and retained for consideration when a new register is established; or (c) applications will be accepted only when a new register is being established). When standing registers are used, all selective factors and all rating factors (or job elements for wage grade) for all positions covered must be listed in the vacancy announcement.
Typically, the rating factors (job elements for wage grade) for all the positions covered by the standing register should be similar. They do not, however, have to be identical.

b. **Vacancy Announcements to Other VA Facilities. Requirement** - When used, vacancy announcements to other VA facilities must identify the position and grade being offered, reference the appropriate OPM or VA qualification standard, vacancy announcement number, target grade level, the closing date, and specify any forms which should be submitted with the application. Vacancy announcements of extension of the area of promotion consideration must be made available to all potential applicants at the receiving facility(ies). Posting in a centralized location accessible to all employees is adequate. Referral only to the corresponding service or division at the receiving facility may not be satisfactory in some cases because qualified employees may be located in other services or divisions.

**NOTE:** See chapter 2, paragraph 11d of this part, for processing applications resulting from extension of the area of promotion consideration.

c. **Skills Files. Guidance** - Skills files, including sufficient information on all eligible employees in an area of consideration to rate them fairly, may be used to locate candidates for vacancies. All eligible employees are considered under this method. Extreme care should be exercised to ensure that information on each employee is accurate and up to date and that the system can be used economically and efficiently.

d. **Central Office Referrals. Requirement** - Central Office referrals to facilities for positions which are covered by the local promotion plan must be evaluated and ranked in accordance with the local plan along with other qualified applicants.

9. **JOB ANALYSIS AND EVALUATION CRITERIA**

a. **Requirement** - Job analysis and evaluation criteria must satisfy the requirements of 5 CFR, part 335, Handbook X-118C, and this chapter (see appendix III-G and III-H). Specific procedures to be used for crediting plan development must be established in writing. It should be noted that annual performance appraisals and awards must be considered to the extent that they are related to the job to be filled (see paragraph 3b, Requirement 3, of this chapter). Individuals and/or organizations involved in the development of selection procedures are responsible for compliance with OPM and VA policy requirements and the procedures' impact on applicants.

b. **Requirement** - Credit based on length of experience or length of service may not be granted unless it can be shown through a proper job analysis and accompanying documentation to be a valid, job-related factor for the position being filled.

c. **Requirement** - Selection procedures not approved for inservice use must be submitted through channels to the Director, [Recruitment and Placement Policy] Service (05[9]) with the required documentation to support acceptability. Field facilities will not deal directly with OPM in requesting selection procedure approval.

d. **Guidance** - Development of knowledges, skills, abilities and other characteristics (KSAOs) evaluation procedures for General Schedule positions which are not identical to those in this handbook is permissible as long as they are consistent with requirements of the Uniform Guidelines on Employee
Selection Procedures. The evaluation process should not include provisions for deducting points or for negative ranking credit for adverse information concerning a candidate (e.g., adverse and disciplinary actions). Information of this nature should be considered in the annual performance appraisal, the supervisory KSARO assessment, and/or the supervisory appraisal of performance for promotion. Deducting points for inservice placement purposes would constitute a double penalty.

e. **Requirement.** In the interest of fairness and equity to all candidates, crediting plans for GS positions are to be kept secure. Since they are the basis by which point credit is to be granted, they may not be reviewed by potential candidates prior to the announcement of a vacancy or prior to rating and ranking. To do so may give a candidate unfair advantage. This does not preclude:

1. A review of the crediting plan by the employee and/or a properly designated representative during the informal grievance stage or in conjunction with EEO investigations;

2. Review and release to authorized officials who have a need to know for the performance of their official duties;

3. Release for inclusion in EEO or grievance files; or,

4. Addition of assessment questionnaires (without scoring criteria) in announcements developed for USA Staffing use.

10. **PROMOTION PANELS**

a. **Guidance.** Either human resources staff members or promotion panels may evaluate candidates against the criteria contained in the crediting plan/assessment questionnaire for the position(s). Separate panels may be used for each position or panels may be established for specific categories of positions. Use of promotion panels is strongly encouraged because it provides a base for the justification of the rating and ranking in accordance with the Uniform Guidelines on Employee Selection Procedures. [In USA Staffing, subject matter experts (SMEs) are involved in the development of the assessment questionnaire; this ensures compliance with the Uniform Guidelines. Further review by a panel for rating and ranking is not required. However, labor agreement provisions must be followed. Also, for Federal Wage System vacancies, whenever possible agency employees with a thorough knowledge of the trade should be called upon either as raters or as consultants to provide technical advice to raters. As with other merit promotion recruitments, HR Staff may request additional SME assistance during the quality review process in USA Staffing.]

b. **Requirement.** Handbook X-118C requires a panel of one or more raters who know or can quickly learn about both the job and the employees' qualifications (Subject Matter Experts) and a reviewer (usually a HRM Specialist) for trades and labor promotion opportunities. (See subparagraphs c and d below.)

c. **Requirement.** If promotion panels are used to evaluate and rank candidates, the panel members (except the HRM representative) must be subject matter experts (see paragraph 1e of chapter 2, this part), one of which must be at least equal in grade to the job to be filled. All must have a clear understanding of the functions of promotion panel members and clearly understand the crediting plan, the selection procedure being used, and basic human resources management concepts related to qualification and rating
and ranking, preferably at the journeyman level. In performing their functions, panel members are official representatives of management. The selecting official will not serve as a panel member unless there are no other qualified SMEs available. Selecting officials who serve as panel members must understand clearly the difference between the two functions and carefully observe merit principles.

d. **Requirement.** If promotion panels are used, panel members, as part of their official responsibilities, must review certain personal information concerning candidates. Other employees who may be present as observers during the deliberations of the panel are not permitted access to such documents and written information concerning any candidate without the written consent of the subject of the record. All persons present at promotion panel meetings are precluded from revealing information of a confidential or personal
nature about any candidate which may be gained during the deliberation process and may be disciplined if they do so.

11. REFERRAL AND SELECTION

a. Referral of Internal Candidates. Requirement - The best qualified group referred to the selecting official for promotion or promotion potential consideration will consist of promotion candidates as well as reassignment and/or demotion candidates who are competing for a position with higher potential. In keeping with the goal of selecting from best qualified candidates, a group of best qualified candidates for selection consideration does not have to be limited to promotion candidates (see paragraph 11b below). Identification of best qualified candidates may be made through assessment questionnaires, determinations of selecting officials, or other assessment methods, so long as the method to be used and the resulting best qualified group is determined prior to selection and is documented in the recruitment record.

b. Referral of External Non-VA Candidates

(1) Requirement - If transfer, reinstatement, and VEOA eligibles are being considered for a higher-graded position than previously held, they must be evaluated and ranked along with competing VA employees to determine the cut-point. Once that has been established, all best qualified candidates will be referred. VEOA eligibles will be identified on the certificate by annotating VEOA after their names. In such cases, an inadequate number of best qualified VA promotion candidates is justification for extending the area of promotion consideration to other VA employees.

NOTE: Normally, the selection official determines if there is an adequate number of best qualified VA promotion candidates. An extension of the area of promotion consideration resulting in additional VA candidates for promotion under these circumstances may cause the cut-point to change and necessitate a redetermination of best qualified candidates for each recruitment source.

(2) If the competitive service position provides promotion or placement in a position with higher promotion potential, qualified excepted service employees covered by the interchange agreements will be rated and ranked, when a panel is required, to determine which applicants are best qualified for referral. When there are fewer than 10 applicants, no panel is required. However, screening to determine the best qualified applicants must take place before a selection is made. Excepted service and competitive service employees may be referred on the same certificate. (See part III, chapter 3.)

(3) Requirement - When a position is announced at multiple grade levels, a best qualified group for each grade level, if available, will be referred for consideration on separate certificates.

c. Referral Criteria

(1) Guidance - A best qualified group consists of candidates who are competing for promotion and/or for a position with higher promotion potential [(these individuals must be rated an ranked to be placed in the best qualified group);] VA employees who are candidates for reassignment [or] demotion to a position with no higher potential [or who have previously held the full performance level of the position; transfer applicants from other agencies;] and reinstatement eligibles for positions equal in grade to their current or former nontemporary, competitive service positions.
[2] **Guidance** - The number of [ ] candidates to be referred will vary depending on the cut-point (see Appendix III-G, paragraph 7c), the number of candidates being considered and other circumstances which prevail. The selecting official should receive an adequate number of [ ] candidates, if available, for consideration. Although rating and ranking is permitted when there are 10 or fewer qualified promotion candidates, referral of all candidates for consideration without rating and ranking is permissible (see Appendix III-G, par 7b(1)). Before making a selection, however, the best qualified candidates must be identified. Best qualified candidates may be referred by [ ] 1-2-3 rank order or in alphabetical order.

[3] **Guidance** - When the point credit difference between candidates is so small that a bona fide difference in predicted capability is not apparent, it may be desirable to obtain additional information from such candidates to determine whether there are, in fact, meaningful distinctions among them. The selecting official should not, however, be burdened with so many candidates that considering all candidates unduly delays the selection process; and an administrative limit may be necessary. Generally, 10 promotion candidates are considered sufficient.

[4] **Ties. Guidance** - All candidates with tied scores at the cut-point may be referred, if the plan so provides. If ties in total scores of candidates will result in a referral of more [ ] candidates than the selecting official can reasonably consider and additional information cannot be collected or results in no meaningful distinction, provisions may be made to break the ties to arrive at an appropriate number of referrals (see Appendix III-I).

[d]. **Selection**

1. **Requirement** - The responsibility for selection must be vested in one official. Promotion panels will not make final selections or recommendations.

2. **Requirement** - A selecting official has the right, which will not be negotiated, to select or non-select candidates from a properly constructed [ ] certificate. This includes the right to non-select all of the candidates and return the [ ] certificate unused. Additionally, when a [ ] certificate is issued to provide consideration for more than one vacancy and the selecting official selects for one vacancy, this action does not carry with it an obligation to select others from the [ ] certificate for the remaining vacancies or preclude the consideration and selection of an applicant from any other appropriate recruitment source.

3. **Requirement** - Once a final, properly constructed [ ] certificate resulting from the original announcement has been issued, another merit [staffing] certificate for the same vacancy will not be issued for 6 months. Selection must be made from the properly constructed [ ] certificate resulting from the original announcement if the position is filled by competitive promotion during that 6-month period. **Guidance** - The cancellation of an announcement and the resulting certificate after a best qualified group has been determined, for the purpose of improving or injuring the chances of any person, is in direct conflict with law. (See VA Directive 5005.) Such actions intended to alter the best qualified group because a particular employee is not included in it (such as providing time to meet basic qualification requirements, to meet other legal and regulatory requirements, to change supervisory appraisals to increase or decrease any employee's chances, etc.) are inconsistent with merit principles and law. The preceding requirement does not preclude the following actions:
(a) Adding high quality candidates if available from the rating and ranking process to replace best qualified candidates who decline consideration after the original [ ] certificate has been issued; or

(b) The addition of high quality candidates who rank above the cut-point located as a result of an extension of the area of [ ] consideration when an interim referral was made using a smaller area of [ ] consideration.

(4) **Guidance** - Selecting officials should act promptly when considering candidates referred on a [ ] certificate. It is not only in the interest of good management, but also of major concern to employees, that decisions concerning promotion opportunities be made expeditiously. Excessive delay often causes undue frustration on the part of candidates which may result in an erosion of trust and confidence. For these reasons, when there is excessive delay, it is entirely proper to require written justification from a selecting official to the HRM office. While some circumstances may require more time than usual, selecting officials normally should be able to make a decision within 5 workdays after receipt of a [ ] certificate consisting of best qualified local candidates and within 10 workdays after receipt of a [ ] certificate with best qualified candidates from an extended area of [ ] consideration.

(5) A placement follow-up will be used to evaluate the employee’s progress and adjustment following placement in a position.

12. **CAREER PROMOTIONS**

a. **General.** A career promotion is one without current competition when:

(1) An employee was appointed, or selected through the use of competitive promotion procedures, for an assignment intended to prepare the person for the position being filled (career ladder); or

(2) The employee's position is reclassified to a higher grade because of accretion of additional duties and responsibilities.

b. **Requirement** - All promotion plans must provide for career promotions, including career-ladder promotions in movements between VA facilities.

c. **Career-Ladder Promotions**

(1) **Requirement** - Career ladder promotions without current competition may be made only when the intent was a matter of record prior to the initial selection and all potential applicants were so informed. Career ladders must be documented and be available to employees. Career-ladder positions are those with known promotion potential; therefore, an announcement under competitive promotion procedures must inform possible applicants of the potential available to the selectee.

(2) **Guidance** - Career-ladders may consist of potential to the next higher grade or through several intermediate grades to a target several grades higher than the initial grade level. **Requirement** - Selection for the initial position provides only the opportunity for subsequent career-ladder promotion. Promotion to
the next higher grade is not guaranteed and depends on: (a) the selectee's demonstration of the ability to perform the duties of the next higher grade to the satisfaction of the supervisor; and (b) the availability of enough work at the next higher grade. Meeting the minimum qualification requirements and time-in-grade requirements for a higher grade in a career ladder is, of itself, only an indicator of eligibility, not an absolute guarantee for such a promotion.

(3) **Apprentice Position. Requirement** - When an employee has been properly selected for the initial grade level as described above, a career-ladder promotion of an apprentice in a trade or craft may be made through intermediate grades (if appropriate) to the target grade level.

(4) **Trainee Position. Requirement** - A properly selected trainee may receive career-ladder promotions through intermediate grades as each phase of training is satisfactorily completed and to the target grade level when the entire training program is satisfactorily completed.

(5) **Understudy Position. Requirement** - Occasionally, an understudy position is established to train a person for a position which is to be vacated at a future date. When properly selected for an understudy position, the selectee may receive a career-ladder promotion without additional competition to the target position when it is vacated. **Guidance** - Normally, the understudy position is established within 1 year or less of the anticipated vacancy.

(6) **Position Filled at a Grade Below the Established or Anticipated Grade. Requirement** - A career-ladder promotion may be made of an employee in a position which was properly filled at a grade below the established or anticipated grade.

(7) **Training or Executive Development Agreements. Requirement** - An employee, properly selected through competition as described previously, may receive a career-ladder promotion upon satisfactory completion of an approved training agreement or executive development agreement which specifically provides for the promotion.

(8) **Details for Training or Evaluation. Requirement** - An employee properly selected for a training or evaluation detail to a higher grade position or to one with known promotion potential may receive a career-ladder promotion if the fact that the detail could lead to promotion was made known to all potential candidates for the initial detail.

(9) **Veterans Recruitment Appointee. (5 CFR 307.103) Requirement** - When a Veterans Recruitment Appointment is made to a position with known promotion potential, subsequent career-ladder promotions may be made through intermediate grades (if appropriate) to the target grade level.

(10) **Others. Requirement** - When employees serving under the following types of appointments have satisfied the specified criteria of the appointment authority and are properly converted to career or career-conditional appointment in the competitive service in positions with known promotion potential, career-ladder promotions may be made through intermediate grades (if applicable) to the target grade level:

   (a) [Pathways Programs which includes the Internship Program, Recent Graduates Program and Presidential Management Fellows Program (5 CFR 213.3402 (a), (b), and (c));
(b) Service disabled Veterans (5 CFR 315.604);

(c) Service disabled Veterans (30 percent or more) (5 CFR 315.707); [and]

(d) Employees with intellectual disabilities, severe physical disabilities, and psychiatric disabilities (5 CFR 315.709);

[ ]

d. Career Promotion of an Employee Whose Position Is Reconstituted to a Higher Grade.

(1) **Requirement** - An employee whose position is reconstituted to a higher grade because of the accretion of additional duties and responsibilities may receive a career promotion.

**NOTE:** *The basic function of the original position must continue to be a part of the new one.*

(2) **Guidance** - Employees serving on identical-additional position descriptions are supposed to perform identical duties. It is the supervisor's responsibility to ensure that subordinates perform described duties. To single out one of several such employees for this type of career promotion may, therefore, be interpreted by others to be an act of personal favoritism. Any action of this nature should occur only after careful consideration and sufficient justification.

(3) **Guidance** - There may be times when circumstances require the assignment of additional duties and responsibilities to a position which will result in a promotion and competition is not practical. Some examples are:

(a) A higher-level management decision results in a change in workload, technology, procedures or organization and provides for no increase in ceiling. The decision results in a need for a higher grade job to accomplish the assigned tasks. Only one of the employees in the affected unit, which is at ceiling, can qualify for the job;

(b) An increase in technology results in the purchase of new equipment for a line of work requiring an increase in the level of duties and responsibilities for those who will operate it. The employees will continue to perform the same basic function but at a higher level required by the new equipment;

(c) Additional personnel are assigned to an organization which results in a supervisor's position being upgraded;

(d) Additional responsibilities are imposed by law, rule, regulation or policy. To carry out the mandate, new duties must be added to a position in a unit and only one position provides the knowledges, skills or abilities necessary for satisfactory performance in the new job; or

(e) An employee performs a job in such an exemplary manner that other key employees outside the unit gradually come to rely on that person to such an extent, and involving such complicated issues, that eventually the employee is performing duties which are properly classified at a higher grade.
(4) **Requirement** - The prohibited personnel practices contained in law (5 U.S.C. 2302(f)) preclude the granting of preference or advantage, not authorized by law, rule or regulation, to improve or injure the prospects of any person. Managers, supervisors, human resources officials and selecting officials are responsible for ensuring that actions resulting in a promotion because of additional duties and responsibilities are not the result of a prohibited practice.

13. **PROHIBITED PRACTICES.** The following provisions of law are fully applicable and binding:

a. **The Civil Service Reform Act of 1978 (5 U.S.C. 2302).** Employees who have authority to take, direct others to take, recommend or approve any personnel action are prohibited from:

   (1) Discrimination for or against any employee or applicant for employment;

   (2) Soliciting or considering any recommendation or statement, oral or written, about a person who requests or is being considered for a personnel action, unless the recommendation or statement is based on personal knowledge or records of the person furnishing it and consists of an evaluation of the person's work performance, ability, aptitude, general qualifications, character, loyalty, or suitability;

   (3) Using official authority to coerce political activity, including political contribution or service, or to retaliate against any employee or applicant for refusal to engage in such political activity;

   (4) Deceiving or willfully obstructing a person with respect to the right to compete for Federal employment;

   (5) Influencing anyone to withdraw from competition to injure or improve employment prospects for any other person;

   (6) Granting preference or advantage not authorized by law, rule, or regulation (including defining the scope or manner of competition or the requirements for any position) to any employee or applicant to improve or injure the prospects of any person;

   (7) Appointing, employing, promoting, advancing, or advocating for appointment, employment, promotion, or advancement, any relative (5 U.S.C. 3110a(3)) to or for any position in the VA;

   (8) Taking or failing to take a personnel action concerning an employee or applicant as a reprisal for:

      (a) Disclosure of information reasonably believed by the employee or applicant to evidence:

         1. a violation of any law, rule or regulation or

         2. mismanagement, gross waste of funds, abuse of authority, or substantial and specific danger to public health or safety, unless the disclosure is specifically prohibited by law or required by Executive order to be kept secret in the interest of national defense or the conduct of foreign affairs;

      (b) Disclosure to the Special Counsel of the Merit Systems Protection Board, or to the Inspector General, of information reasonably believed to evidence any of the preceding items;
(9) Taking or failing to take a personnel action against any person as a reprisal for exercising an appeal right granted by law, rule, or regulation;

(10) Discriminating for or against a person on the basis of conduct which does not adversely affect that person’s performance or the performance of others (convictions for crimes may be taken into account in fitness and suitability determinations); and,

(11) Taking or failing to take any personnel action if taking or failing to take that action violates law, rule, or regulation implementing or concerning merit system principles.

b. Competitive Service; Recommendations of Senators and Representatives (5 U.S.C. 3303). Individuals concerned with examination or appointment of applicants in the competitive service may not receive or consider a recommendation by a Senator or Representative, except as to character or residence.

c. Acceptance or Solicitation To Obtain Appointive Office (18 U.S.C. 211). No person may solicit or receive, either as a political contribution or for personal gain, any money or thing of value in consideration of the promise of support or influence in obtaining any appointive office.

d. Interference with Civil Service Examinations (18 U.S.C. 1917). No individual in the public service shall:

(1) Defeat, deceive or obstruct the right to examination for the competitive service;

(2) Falsely mark, grade, estimate or report on an examination or proper standing;

(3) Make false representation concerning a mark, grade, estimate, or report on the examination or proper standing, or concerning the person being examined; or

(4) Furnish any special or secret information to improve or injure prospects or chances of a person examined, to be examined, being appointed, employed or promoted.

14. SUPERVISORY POSITIONS

a. Requirement - The qualification standard for supervisory positions in OPM’s Operating Manual – Qualification Standards for General Schedule Positions will be used along with the specific qualification standard for that position for basic qualification determinations for supervisory positions. For wage grade jobs, the job-element system required for supervisory trades and labor jobs in Handbook X-118C will be used. Since supervisory positions require certain knowledges, skills, abilities and other characteristics related to the supervisory function, KSAOs for GS supervisory positions must be reflected in the crediting plan.

b. Training for First-Level Supervisors. Requirement - Suitable initial supervisory training will be provided for all newly selected first-level supervisors, either before they assume their new duties, or as soon after as possible. Guidance – VA Handbook 5015, Employee Development, and 5 CFR, part 410, contain policy related to this training, including time limits.
c. It is essential that these first-time supervisors/managers receive training, including Equal Employment Opportunity (EEO) training, which will equip them with those skills needed to help the organization accomplish its mission and allow them to discharge their individual responsibilities satisfactorily.

d. The general requirement is that an employee must serve a 1-year probationary period upon initial assignment to a supervisory and/or managerial position. Requirements for completion of the probationary period, exceptions and what to do if a supervisor and/or manager fail to successfully complete the period, are listed in detail in appendix III-A.

15. TEMPORARY PROMOTIONS

a. **Requirements** - Competitive promotion procedures must be used when a temporary promotion will exceed 120 days. When a temporary promotion of 120 days or less is made as an exception to competitive procedures, an extension beyond 120 days must comply with these procedures. Candidates for a temporary promotion must be informed in advance of the temporary nature of the action, including the expected length, and assured of return to a position for which qualified at the former grade level upon termination of the temporary services in the higher grade, whether or not the expected period is completed. An initial competitive temporary promotion may be made for a specified period of not more than 5 years in accordance with 5 CFR 335.102(f). In some instances after review of the circumstances and a determination that a temporary situation remains, extension may be justified. The initial promotion and such extension(s) will not exceed 5 years. If all potential candidates are properly informed in advance, a temporary promotion may be made permanent. Requests to OPM for extension beyond 5 years in accordance with 5 CFR 335.102(f) must be submitted via the [Recruitment and Placement Policy] Service (05[9]).

b. **Guidance** - Upward mobility opportunities, which result in the selectee being placed in a higher grade for training, should be processed as temporary promotions which may be made permanent. Upward mobility candidates who are unsuccessful must be returned to their former grade. (See VA Handbook 5015, Employee Development.) If a permanent promotion is utilized, and the selectee fails to meet the requirements expected, adverse action procedures would be required when the employee is returned to the previous position held.

16. EMPLOYEE AND LABOR RELATIONS

a. **Guidance** - While it is obvious that a monetary benefit accrues from promotion, the overall effect may involve many psychological and social aspects such as: peer group, community or social standing; satisfaction of personal needs; improved chances for further advancement; opening up a new career path; a feeling of success; a sense of equality; etc. For these reasons, true adherence to merit principles is of prime importance. Employee trust, understanding, participation and support are essential for an effective promotion program.

b. **Requirement** - Within the appropriate provisions of title 5, United States Code (e.g., sec. 7103(a)14, 7106 (a) and (b), 7117(a) and 7135), facilities must meet with exclusively recognized labor organizations representing employees covered by this chapter to consult and, as appropriate, negotiate concerning the development or modification of promotion plans under this chapter's provisions, including the procedures for its implementation and its impact on affected employees of the unit.
c. Keeping Employees Informed

(1) **Requirements** - The written promotion plan must be available to employees subject to its provisions. In addition, any employee who has an interest in, and inquires about, a specific promotion action will be given the following information by the HRM office or the selecting official:

(a) Whether the employee was considered for promotion and, if so, whether determined basically eligible in accordance with the applicable qualification standard;

(b) Whether the employee was in the best qualified group referred for selection consideration;

(c) Who was selected for promotion; and

(d) In what areas, if any, the employee should improve to increase future chances for promotion.

(2) **Requirement** - Employees must be permitted, upon request, to review or obtain, or both, copies of any record of production or supervisory appraisal which was used or may be used in considering them for promotion. **Guidance** - If the employee requests it, he or she should be permitted to have another person present when the record is reviewed.

(3) **Requirement** - Employees may see appraisal and records containing personal information about other employees only when dictated by their official responsibilities. Otherwise, employees are not permitted to see such information without the signed written consent of the subject of the record, unless the record has been properly sanitized for the protection of privacy.

(4) **Guidance** - Employees should be advised periodically of the various methods available for filling vacancies and the merit principle of selecting from among the best qualified candidates available. Information concerning recruitment and selection from various recruitment sources, exceptions to competitive promotion procedures, career promotions, selection by inservice placement actions other than promotion, selection by transfer from other agencies, appointments, etc., should be provided periodically.

17. GRIEVANCES

a. **Requirement** - Failure to be selected for promotion from a properly constructed promotion certificate (nonselection from a group of properly certified candidates) is not a basis for formal complaint.

b. **Requirement** - Dissatisfaction concerning the number of positions to be filled, or the grade level at which positions are advertised or filled, is not a basis for formal complaint.

c. **Requirement** - A grievance will be processed under a negotiated grievance procedure where applicable, or otherwise, under the provisions of the VA grievance procedure contained in VA Handbook 5021, Employee/Management Relations.
d. **Guidance.** In many instances, thorough and complete initial efforts to resolve dissatisfactions are successful. The time and effort involved at the beginning is to the benefit of both employees and management; increasing trust and understanding; providing for early, mutually satisfactory resolution; and reducing expenditure of time, effort and money. Comprehensive, good faith initial efforts cannot be overemphasized.

**18. PROMOTION RECORDS**

a. **Requirement.** A temporary record of each promotion action sufficient to allow reconstruction of the action, including documentation of how each candidate was rated and ranked, must be maintained for 2 years or until the local promotion program has been formally evaluated by OPM, whichever comes first. If the time limit for grievances or EEO complaints has not lapsed at the time the program is evaluated by OPM, the record must be maintained until it has lapsed. [For USA Staffing recruitment, system records are sufficient to meet the requirement for documentation. In addition, all job analysis records can be imported into USA Staffing to ensure a complete recruitment file is kept within the USA Staffing system.]

b. **Guidance.** To provide for reconstruction the following should be kept in a promotion file:

   1. A copy of the vacancy announcement;
   2. A copy of the crediting plan used;
   3. A copy of each employee's application for consideration;
   4. A record of each qualification determination, clearly indicating the reasons for any disqualifications;
   5. A copy of each basically qualified candidate's annual performance evaluation;
   6. A copy of each basically qualified candidate's supervisory appraisal for promotion;
   7. Supplemental qualification statements for each basically qualified applicant, if used;
   8. The identification of the selection procedures used;
   9. A work sheet for each basically qualified candidate documenting:
      
      a. The basis of basic qualification determination, including what was used to satisfy general experience, specialized experience, and quality level of experience requirements (if applicable);
      b. The education which was substituted for experience in determining basic qualification;
      c. The basis for determining quality level and the corresponding point credit for that level;
      d. Identification of awards, training or self-development which contributed to credit;
      e. The total point credit awarded the candidates (if applicable);
(f) A notation of whether the candidate is in the best qualified group; and,

(g) The signatures of any HRM staff member involved with determining best qualified or basic qualifications and those of promotion panel members (if applicable);

(10) The completed [ ] certificate showing the names certified for promotion, the decision, the selecting official's signature and date;

(11) A copy of the notices to applicants concerning the outcome of the action; and

(12) An explanation of any circumstances peculiar to the action which is needed for clarification.

19. SELECTION PROCEDURE DOCUMENTATION

a. **Requirements** - The following requirements are prescribed by the Uniform Guidelines on Employee Selection Procedures for documentation of a selection procedure supported by content validity. Good documentation provides a basis of support for the procedure should its validity be challenged. Lack of documentation increases the possibility of a finding of adverse impact and, therefore, discrimination, or may preclude establishing adequate job relatedness.

   (1) **Identifying Information.** The names, titles and other identifying information of all personnel involved in developing the selection procedure;

   (2) **Dates of Events.** Documents concerning each step of the selection procedure development, from the job analysis through the crediting plan, forms developed, supplemental experience statements etc., must contain the date;

   (3) **Job Analysis Information.** All notes and decisions related to the job analysis and subject matter expert panel decisions (including the list of tasks; the relationships of the KSAOs to the tasks; the determination of the important KSAOs; the quality level statements related to each KSAO or rating factor; supplemental experience statements; supervisory KSAO assessment if developed; the specialized supervisory appraisal, if developed; the crediting plan; etc.).

b. **Requirement** - The selection procedure documentation file must be maintained as long as it is used and for at least 2 years after the procedure has been discontinued.

c. **Guidance** - For wage grade jobs, the job elements have, in many instances, been provided. **Requirement** - Documentation for the crediting plan development must, however, be maintained. A record of the review of the individual position and the adequacy of Handbook X-118C job elements; documentation related to alterations, deletions, and additions of job elements; the crediting plan, including quality level statements; supplemental qualification statements; supervisory KSAO assessments; etc., are necessary for support of the procedure.

d. **Guidance** - The documentation for a procedure used for one job may be kept in the merit promotion file for that action. If, however, a procedure is used frequently for a number of actions, the documentation for the procedure should be maintained in a separate file.
NOTE: It is important, in such cases, that the merit promotion file for each action identify the selection procedure used, the documentation file for that procedure, and its location.

20. PERIODIC REVIEW

a. **Requirement** - Management at each organizational level responsible for the administration of a promotion plan will make a comprehensive review of their promotion plan periodically. **Guidance** – Service and division chiefs, supervisors, employees, and labor organizations should participate in such reviews which should occur at least once every 3 years.

b. **Requirement** - Periodically, the Deputy Assistant Secretary for Human Resources Management [and Labor Relations] (05) will review:

   (1) The overall operation of field facility, staff office and administration programs to determine the extent of conformance with requirements; and

   (2) The VA-wide merit promotion program to ensure that policy requirements are realistic and practical and to recommend improvement when needed.

21. CORRECTIVE ACTIONS. **Requirement** - Corrective action may be required by VA Central Office officials and other officials responsible for the establishment and administration of promotion plans, or by officials of the Office of Personnel Management, the Merit Systems Protection Board, or the Equal Employment Opportunity Commission. Corrective action may include appropriate disciplinary action when warranted.
CHAPTER 4. TITLE 38 AND HYBRID TITLE 38 PROMOTIONS AND INTERNAL PLACEMENTS

SECTION A. PROMOTION OR CHANGE IN ASSIGNMENT AND INTERNAL PLACEMENT OF TITLE 38 EMPLOYEES

1. GENERAL

a. This section contains instructions and procedures governing the advancement of podiatrists, optometrists, chiropractors, registered nurses (RNs), nurse anesthetists, physician assistants (PAs) and expanded-function dental auxiliaries (EFDAs) appointed under authority of 38 U.S.C. 7401(1) or 7405(a)(1)(A); and medical and dental residents appointed under authority of 38 U.S.C. 7406.

NOTE 1: Residents serving under a disbursement agreement are excluded from coverage under the provisions of this section.

NOTE 2: VHA physicians and dentists are excluded from coverage for promotion procedures as described in this section. See VA Handbook 5007, Pay Administration, Part IX, for guidance for pay regulations and procedures.

NOTE 3: [Promotions for occupations covered under 38 U.S.C. 7401(3) can be found in, Section B of this part.]

b. The promotion system shall provide advancement opportunities for employees, predicated upon the recognition of the quality of service rendered, additional experience and professional attainment as determined by a thorough review of the employee's individual record.

c. To meet the criteria for promotion, the individual must meet the criteria for the next higher-grade level in the applicable VA qualification standard. A review of the individual’s total record must show evidence that the contribution to VA medical service is of sufficient value to warrant promotion. Potential for continuously greater contribution is also a prerequisite. Reviews and recommendations of professional standards boards [for occupations under 38 U.S.C. 7401(1) and Human Resources for occupations under 38 U.S.C. 7401(3), whichever is applicable,] will be sufficient to ensure that promotion is fully merited and not recommended based on meeting administrative requirements alone. The individual’s total record and professional stature will be carefully evaluated and supported by documentary evidence as necessary.

d. Promotion actions will be taken without regard to age, race, color, religion, sex, national origin, lawful partisan political affiliation, marital status, physical or mental disability (when the employee is qualified to do the work), or membership or non-membership in a labor organization, or any other non-merit factor.

e. Promotion actions will conform to the restrictions governing the employment of relatives. (See VA Handbook 5025, Legal.)

f. Promotion and advancement opportunities shall include:

(1) Promotion
(a) Promotion to a higher grade in recognition of substantially greater service to the patient and VA.

(b) Promotion to Grade IV or Grade V of the Nurse Schedule, for assignment to positions of nurse anesthetist, Nurse Executive, or other key nursing positions. Key nursing positions refer to registered nurses (other than Nurse Executives) at Nurse IV and above whose grade is based on both their personal qualifications and responsibilities of their assignment. The grades of Nurse Executives are based on the assignment of the individuals. Advancement of other registered nurses and nurse anesthetists to these grades will be based on the VA Qualification Standards for Nurses and Nurse Anesthetists and promotion criteria which cover the complexity and responsibility involved in the specific assignment.

(2) Advancement

(a) Advancement of Nurses in Grade I to Level 2 or Level 3.

(b) Special Advancements for Achievement and Performance. (See VA Handbook 5017, Employee Recognition and Awards.)

(c) Change in assignments for physicians and dentists. (See VA Handbook 5007, Part IX, paragraph 15).

2. PERSONS AUTHORIZED TO ACT ON RECOMMENDATIONS OF BOARDS FOR PROMOTIONS, OR ADVANCEMENTS OR CHANGE IN ASSIGNMENTS

a. The Secretary shall approve all assignments of physicians and dentists to tier 4 assignments Director grade on the recommendation of the Under Secretary for Health or designee.

b. Officials authorized to approve promotions, or advancements or change in assignments other than those described in paragraph 2a are set forth in appendix K, this part.

3. PROFESSIONAL STANDARDS BOARDS

See part II, chapter 3, section C, this handbook. [ ]

4. PROMOTION - GENERAL

a. Consideration. Full-time, part-time, and intermittent employees, having attained eligibility for initial appointment on the basis of appropriate qualification standards, shall be considered periodically for promotion in their current occupation. Eligibility for such promotion considerations shall be based upon fully meeting prescribed administrative requirements.

b. Promotion to a Higher Grade. Promotion shall be based on the qualifications (experience, education, and competencies) of the employee and on the nature and complexity of the higher-level position. In addition, when an employee enters a special program where the grade of the employee is restricted by the program, appropriate grade adjustments may be made upon completion of the required period for the special program. The employee may be promoted to the grade and step for which qualified for appointment, provided the administrative requirements for promotion consideration have been met.
c. **Effective Date.** The effective date of a promotion or an advancement to a higher level within a grade is the 1st day of the pay period following approval by the approving official, but not earlier than the date on which all administrative requirements are met.

d. **Notification of Eligibility.** Human Resources Management Officers are responsible for assuring that appropriate officials are notified approximately 60 days in advance of the date employees meet the administrative requirements for promotion, except that for podiatrists, optometrists, and chiropractors in Associate or Full grade, physician assistants in Associate grade; and expanded-function dental auxiliaries in Junior grade, notification of consideration for promotion will be made approximately 60 days in advance of the anniversary date of grade. The employee shall also be notified. If the employee is not promoted, these notifications shall continue to be made annually approximately 60 days prior to the anniversary date of grade until a change in grade occurs. A longer period between promotion consideration, not to exceed 3 years, may be established by the approving official when a nurse or expanded-function dental auxiliary does not meet the education or experience requirements.

e. **Administrative Requirements for Consideration**

   (1) A current proficiency rating of Satisfactory or higher, or Executive Career Field Performance appraisal of Fully Successful or higher.

   (2) The experience and education requirements in the appropriate VA Qualification Standards.
5. PROMOTION OF PODIATRISTS, OPTOMETRISTS, CHIROPRACTORS, PHYSICIAN ASSISTANTS, AND EXPANDED-FUNCTION DENTAL AUXILIARIES

a. Requirements for Podiatrists, Optometrists, Chiropractors, Physician Assistants, and Expanded Function Dental Auxiliaries. Before they can be considered for promotion, employees in the above occupations must have a current proficiency rating of Satisfactory or higher. These employees must meet the same grade requirements, including the specified demonstrated accomplishments, as for appointment. Any deviation or exception to these requirements will be limited to those specified in the appropriate qualification standard. (See part II, appendix G.)

b. Processing Procedures (See appendix M, this part.)

(1) Notification of Eligibility

(a) Approximately 60 days prior to the date the employee meets the experience requirement for consideration for promotion, the health care facility will receive from the Austin Automation Center (AAC) VA Form 97, Notice of Pending Personnel Action, in duplicate, identifying the employee and stating that the employee meets the time requirements for promotion as of the date specified. In addition, VA Form 97 will indicate if there is a satisfactory or higher proficiency on record and the amount of
leave without pay (LWOP) since the beginning of the waiting period to the date VA Form 97 is issued. (VA Form 97 will be received approximately 60 days prior to the anniversary date of grade for podiatrists, optometrists, and chiropractors in Associate or Full grade, physician assistants in Associate grade, and for expanded-function dental auxiliaries in Junior grade.) The employee shall also be notified.

(b) If the employee is not promoted, the AAC will continue to send the VA Form 97 annually until a change in grade occurs. The VA Form 97 will be forwarded to the appropriate supervisory official. An employee who is not promoted will be reconsidered on the next anniversary date of grade. A longer period between considerations, not to exceed 3 years, may be established by the approving official when an expanded-function dental auxiliary does not meet the qualification standard education or experience requirements for the next grade. In these cases, the Human Resources Management Office will tab the service control file and will destroy the VA Form 97 for the year(s) when the employee is not to receive consideration.

6. PROMOTION [TO A HIGHER GRADE] AND ADVANCEMENT TO A HIGHER LEVEL WITHIN THE GRADE OF REGISTERED NURSES AND NURSE ANESTHETISTS

a. Administrative Requirements. Before they can be considered for promotion [to a higher grade level] or advancement to a higher level within the grade, registered nurses and nurse anesthetists must have a current proficiency rating of Satisfactory or higher and meet the experience requirements specified in the qualification standards. Registered nurses and nurse anesthetists considered for promotion [to a higher grade] or for advancement to a higher level within the grade based on possession of additional qualifications and/or placement in an enhanced assignment must meet the requirements in the applicable qualification standard. Any deviation or exception to these requirements will be limited to those specified in the qualification standard.

b. Criteria for Consideration of Registered Nurses. Registered nurses who meet the above administrative requirements become eligible for consideration for promotion [ ] to a higher [ ] grade and must meet the following criteria:

(1) Have improved the effectiveness of patient care through the use of more complex skills and application of scholarly knowledge to practice.

(2) Have assumed greater responsibility for the improvement of patient care.

(3) Have made steady progress toward professional goals for the improvement of patient care.

(4) Have demonstrated the ability to perform at the level of professional nursing practice as required in the qualification standard for appointment to the grade to which the registered nurse is being considered for promotion [to a higher grade level] or advancement to a higher level within the grade.

c. Criteria for Positions Other Than Nurse Executive Which May Warrant [Promotion] of a Registered Nurse to Nurse IV or Nurse V

(1) Assignments such as Associate or Assistant Chief, Nursing Service; Associate Chief Nursing Service for Research; Associate Chief Nursing Service for Education; Supervisor, Nursing Home Care
Unit; assignments in the Employee Education System; or Central Office nursing positions are examples of positions that may be appropriate] for these grades. Assignments are typically located in organizational settings where there is a high degree of activity, where there is a broad program mission involving a great variety of specialty/subspecialty care in a more complex settings, and other special programs. These assignments are usually found at medical centers where complex patient care is provided, and at VISN offices or Central Office. Assignments of the scope and complexity contemplated for these grade levels may occur, on a limited basis, at other medical facilities.

(2) In considering the scope and complexity of the assignment, reviewers should look at those factors which specifically relate to the administrative, clinical, educational or research functions of the position:

(a) **Administrative Assignments.** The individual’s responsibility for managing and supervising the total nursing program; planning, organizing, directing, controlling and evaluating programs and follow-up actions required by internal and external review organizations and/or accrediting bodies; giving daily attention to complex personnel management problems; participating in executive and decision making deliberations; and performing a full range of administrative duties.

(b) **Educational Assignments.** The individual’s responsibility for developing broad educational and training programs involving a variety of nurse specialties in widely diversified nursing activities; providing nursing personnel with the vital link between nursing education and nursing practice; coordinating and maintaining close relationships with affiliated schools of nursing, professional organizations, certifying bodies, and program directors of students of other disciplines who rotate through the medical facility; and serving on Education and Training Committees, and nursing advisory groups, and special task force teams concerned with managing education and career development activities.

(c) **Research Assignments.** The individual’s responsibility for (1) conducting merit-reviewed, approved research projects relative to nursing care and related specialty areas, performing independent research or serving as a primary contributing member of a research team, formulating the research proposal and protocol submission to Central Office for merit review, and publishing in appropriate nursing and related professional journals or speaking to peer groups; or (2) serving as a highly competent and productive researcher on problems of major scope, directing independent research of considerable interest and value to the nursing or related fields, where the research contributions can be reviewed as being highly productive and of such quality and originality as to have marked the nurse scientist as a significant contributor to advances in the practice of nursing.

(d) **Nursing Home Care Supervisor Assignments.** The individual’s responsibility for supervising a large Nursing Home Care Unit (NHCU) characterized by a high degree of interdisciplinary involvement, significant involvement in rehabilitation and outplacement efforts, and nursing home care program planning, organizing, directing, controlling, and evaluating activities. The assignment includes significant human resources responsibilities along with a full range of administrative duties.

(e) **Other Comparable Assignments.** The individual’s responsibility for assignments comparable to any one or combination of those described in subparagraphs (2)(a) through (2)(d).
d. **Criteria for Consideration of Nurse Anesthetists.** Nurse anesthetists who meet the administrative requirements in subparagraph 6a become eligible for promotion [to a higher grade level] and must meet the following criteria:

1. Supervisory evaluations clearly illustrate the significant contribution the candidate’s accomplishments have made directly or indirectly to services to the patient.

2. The candidate has demonstrated consistent and progressive professional and/or administrative growth.

3. The candidate has demonstrated increasing professional responsibility for patient welfare.

4. The candidate has displayed the ability to communicate and work effectively with others.

5. The candidate has demonstrated the potential for further development and professional attainment.

6. The candidate has demonstrated increasingly significant contributions to the service.

e. **Processing Promotions [to a Higher Grade Level] and Advancements to a Higher Level Within the Grade for Nurse Anesthetists.** Promotions [to a higher grade level] and advancements to a higher level within the grade for nurse anesthetists will be processed [according to instructions in appendix M, this part]. When possible, the physician chief of anesthesiology, physician consultant in anesthesiology or Chief, Surgical Service, shall be a member of the Physician Professional Standards Board in examining nurse anesthetists for promotion to [a] higher grade.

f. **Processing Promotions [to a Higher Grade Level] and Advancements to a Higher Level Within the Grade for Registered Nurses.** See appendix M, this part.

1. **General.** Approximately 60 days prior to the date the registered nurse meets the experience requirement for consideration for promotion or [to a higher grade level] advancement to a higher level within the grade, the facility will receive from the AAC, VA Form 5-97, Notice of Pending Personnel Action, in duplicate, identifying the employee and stating that the employee meets the experience requirement for promotion [to a higher grade level] or advancement to a higher level within the grade as of the date specified. In addition, VA Form 5-97 will indicate if there is a Satisfactory or higher proficiency rating on record and the amount of LWOP since the beginning of the waiting period to the date VA Form 5-97 is issued.

2. **Promotions for Facility Nurse Executives, VISN Nurses and Nurses in Central Office**

(a) The recommending official forwards the proposed functional description, employee’s curriculum vitae and the latest two proficiency reports (or their equivalent) to the appropriate Nurse Professional Standards Board (NPSB) for review. VHA Central Office NPSB is appropriate for VHA Central Office and VISN staff. All other promotions and advancements are to be reviewed by the NPSB designated for the VISN. (See appendix H5, part II of this handbook.)
(b) The NPSB reviews the employee’s qualifications and the scope of the position to determine whether the proposed grade is warranted and makes a recommendation regarding the employee’s promotion to the approving official (facility Director or designee for nurse executives, the Under Secretary for Health or designee for VISN and Central Office staff).

(c) The approving official approves or disapproves the promotion.

(d) Notification of VISN and VA Central Office. When a selection is made for one of these positions, approving officials will notify the appropriate Network Director and the Office of Nursing Services (108) in VA Central Office.

(3) Promotions to Nurse IV and Nurse V for Registered Nurses Other Than Those Cited in Subparagraph 6f(2).

(a) Procedures for advancement are the same as in subparagraph 6f(2), except subparagraph 6f(2)(d) does not apply to those covered by this paragraph.

(b) Approximately 120 days before the anniversary date of the registered nurse’s assignment to Nurse III or IV, the AAC will send to the facility a VA Form 5-97, Notice of Pending Personnel Action, in duplicate. The servicing Human Resources Management Office will retain the duplicate as a suspense copy and forward the original to the Nurse Executive. The Nurse Executive will review the registered nurse’s assignment and compare it with the criteria in the VA Nurse Qualification Standard for the grade for which the registered nurse is being considered and the criteria in paragraph 6c[]. If the Nurse Executive recommends advancement, the front of the VA Form 10-2543, Board Action, will be completed, and a special Proficiency Report shall be prepared if the most recent Proficiency Report does not accurately reflect the employee’s current performance. The recommendation, the Board Action, the registered nurse’s personnel folder, and a description of the assignment’s responsibilities will be forwarded to the facility Director. If the Director concurs, the Director will send the documents, along with the recommendations, to the appropriate NPSB. If the Nurse Executive does not recommend advancement, the facility Director does not concur, or the facility Director disapproves the advancement after review by the NPSB, the recommending, concurring, or approving official is to take the actions prescribed in subparagraph 6f3(d).

(c) Recommendations will address the individual’s personal qualifications as specified in the VA Nurse Qualification Standard and the scope and complexity of the assignment. To recommend an action covered by this paragraph, the NPSB must find that the individual meets the qualifications for the position and that the scope and complexity of the assignment are comparable to the corresponding Nurse Executive assignment. The corresponding Nurse Executive assignment means that:

1. A Nurse IV assignment must be comparable to a Nurse Executive assignment at a moderately complex facility; and,

2. A Nurse V assignment must be comparable to a Nurse Executive at a very complex facility.

(d) If advancement is not recommended, the facility Director does not concur, or the action is disapproved, a Board Action is to be completed and approved by the recommending, concurring, or
approving official. The Board Action is to be filed in the personnel folder, and the nurse will be informed of the decision.

(e) Once appropriate officials have determined that the scope and complexity level of the assignment do not warrant promotion to a higher grade, a review of the registered nurse’s qualifications and performance is required only when there has been a significant change in the nature of assignment or a reassignment.

(f) Registered nurses who are not recommended or approved for assignment to these grades are not entitled to higher level review, including promotion reconsideration.

(g) Grade assignments to Nurse IV or above are limited to the registered nurse’s current position. Registered nurses who are reassigned will not retain Nurse IV or above unless a determination is made by the appropriate NPSB that the duties of the new position meet the scope and complexity criteria for the contemplated grade. Also, the position vacated will not be filled at the Nurse IV level or above without prior review of the qualifications of the individual registered nurse to be assigned to the position. Such recommendations will be forwarded to the appropriate NPSB.

(4) Promotion Consideration to Nurse III and Below for the Positions of Associate Chief, Nursing Service for Education; Supervisor, Nursing Home Care Unit; Assistant Chief, Nursing Service; Associate Chief, Nursing Service; and Associate Chief, Nursing Service for Research

(a) Upon receipt of VA Form 5-97, the Human Resources Management office will retain the duplicate copy of the form as a suspense copy and forward the original to the Nurse Executive. This individual will complete the front of VA Form 10-2543, Board Action. If the most recent proficiency report on file was prepared more than 6 months before the date of promotion consideration, narrative performance evaluations will be prepared by the Nurse Executive and by the Chief of Staff. These evaluations may be in the form of a supplement to the latest proficiency report. The registered nurse’s file, including the personnel folder, will then be forwarded, through the facility Director, to the appropriate NPSB for consideration, after the Human Resources Management Officer has made an administrative review of the file.

(b) Following consideration by the appropriate Board, the file will be returned to the facility Director for approval or disapproval.

(5) Promotions and Advancements to a Higher Level Within the Grade to Nurse III and Below Other Than for Positions Identified in Subparagraph 6f(4). (Also see appendix M, this part, for processing instructions.)

(a) In considering a registered nurse for promotion or advancement to a higher level within the grade, the local NPSB determines whether or not the individual meets the VA Nurse Qualification Standard requirements. If the board determines that requirements are met, the registered nurse is eligible for promotion or advancement consideration. Following consideration by the board, the file will be referred to the facility Director for appropriate action.
(b) If the employee is not promoted, the AAC will continue to send the VA Form 5-97 annually until a change in grade occurs. The VA Form 5-97 will be forwarded to the appropriate supervisory official. An employee at Nurse II and below who is not promoted or advanced to a higher level within the grade will be considered for promotion or advancement to a higher level within the grade on the next anniversary date of grade. [A] A longer period between considerations, not to exceed 3 years, may be established by the NPSB when a registered nurse at Nurse II and below does not meet the qualification standard’s education or experience requirements. In these cases, the Human Resources Management Office will tab the service control file and will destroy the VA Form 5-97 for the year(s) when the employee is not to receive consideration.

(6) Waiver of Experience and/or Degree Requirements. The appointing official may authorize a waiver of experience and/or the degree requirements for individuals whose professional accomplishments, performance, and qualifications warrant such consideration based on demonstrated ability to meet the requirements for promotion to the next higher grade or advancement to a higher level within the grade. (See the VA Nurse Qualification Standard, appendix G6, Part II, this Handbook.) In considering a registered nurse for promotion to Nurse III or below, the appropriate NPSB will determine whether or not the individual should be recommended for promotion or advancement to a higher level within the grade with a waiver of the experience and/or degree requirements.

(7) Recommendations of Nurse Professional Standards Boards. If consideration of a registered nurse promotion or advancement to a higher level within the grade by the Under Secretary for Health or designee is requested, the Human Resources Management Officer will take necessary steps to ensure that the Nurse Executive is aware of the case and of the recommendation(s) of the appropriate Nurse Professional Standards Boards.

7. TIER DETERMINATION OR PROMOTION RECONSIDERATION AND REVIEW

a. Coverage. This paragraph applies to podiatrists, optometrists, chiropractors, registered nurses, nurse anesthetists, physician assistants, and expanded-function dental auxiliaries appointed under 38 U.S.C. 7401(1) or 7405(a)(1)(A). NOTE: VHA physicians and dentists appointed under 38 U.S.C. 7401(1) or 7405(a)(1)(A) can request reconsideration of tier determination. (See VA Handbook 5007, Part IX, paragraph 11).

b. Notice of Decision. Supervisors must advise employees of any decision not to promote them, of the reason(s) for the decision, and of their right to request reconsideration. The right to reconsideration does not extend to promotions to Nurse IV and Nurse V, which are based on complexity of assignment, nor does it extend to temporary promotions.

c. Informal Discussion. The employee must discuss his or her dissatisfaction with their immediate supervisor prior to submitting a request for reconsideration under subparagraph 7d.
d. Submission of Reconsideration Request or Request for Central Office Review

(1) Reconsideration Request.

(a) If the employee does not believe the supervisor’s explanation is satisfactory, the employee may submit a written request for reconsideration through the supervisor to the appropriate Professional Standards Board for review within [30] calendar days of the non-promotion decision. (See subparagraph 7e.) The approving official or designee may extend the [30]-day period at the written request of the employee if the employee is unable to submit the information for reasons beyond the employee’s control. The employee’s written request for reconsideration is to indicate when the informal discussion was held with the immediate supervisor and cite the specific reason(s) why the employee believes the decision was not proper. Supervisors are to review and comment on the employee’s request in writing, and provide copies of those comments to the employee.

(b) If on reconsideration the approving official disapproves the promotion under paragraph 7f(3), the employee may request Central Office review by submitting a written request through the supervisor to the approving official within [30] calendar days of receiving notice of the reconsideration decision. The approving official or designee may extend the [30]-day period at the written request of an employee if the employee is unable to submit the information timely for reasons beyond the employee’s control.

e. Professional Standards Board Review. The appropriate Professional Standards Board at the facility will review the information submitted by the employee and make a recommendation to the approving official. If the employee’s request does not include the information specified in paragraph 7d(1)(a), the technical representative to the Professional Standards Board is to return the request to the employee for completion. The additional information is to be returned to the Professional Standards Board within [30] calendar days; however, the appropriate management official may extend the [30]-day period if the employee is unable to submit the information for reasons beyond the employee’s control. Upon completing its review, the Board must forward its recommendation to the approving official for action under paragraph f.

f. Action by Approving Authority. Upon review of the reconsideration file, the approving official shall take one of the following actions:

(1) Request any additional information needed to make a decision. This includes, but is not limited to, meeting with representatives of the Professional Standards Board, the employee, or the employee’s supervisor prior to making a decision under paragraph f(2) or f(3).

(2) Approve the adjustment of the employee’s grade or level in accordance with paragraph 8a.

(3) Disapprove the promotion and notify the employee of the decision in writing. If the employee requests VA Central Office review under paragraph 7d(2), the approving official shall forward the reconsideration file [] and any comments to the appropriate VA Central Office Professional Standards Board for review.
g. Request for Central Office Review.

(1) **Review by the Central Office Professional Standards Board.** When a request for Central Office review is submitted to the appropriate VA Central Office Professional Standards Board under paragraph f(3), the Under Secretary for Health or a designee becomes the promotion approving authority. The appropriate Board is to review the information submitted by the facility and make a recommendation to the approving official. If necessary, the Central Office Board may request additional information. Upon completing its review, the Central Office Board is to forward its recommendation to the approving official for action under paragraph h.

(2) Employees may withdraw requests for reconsideration or for Central office review at any time.

h. **Action by Under Secretary for Health or Designee.** Upon receipt of the recommendation from the appropriate VA Central Office Professional Standards Board, the approving official or designee may:

(1) Authorize the adjustment in the employee’s grade or level in accordance with paragraph 8a.
(2) Request any additional information needed.

(3) Disapprove the promotion and advise the employee of the determination in writing. Such determinations are final.

i. **Exclusion from Coverage as Employee Grievance.** Requests for promotion reconsideration are excluded from the Agency Grievance Procedure. See VA Handbook 5021, Part IV, Chapter 3, paragraph 16. Promotion reconsideration is also excluded from negotiated grievance procedures under the provisions of 38 U.S.C. 7422(b).

8. EFFECTING ADVANCEMENT, AND PROMOTION ACTIONS AND CHANGE IN ASSIGNMENT

a. **Effective Date**

(1) An approved advancement resulting from an anniversary review will always be made effective by the Human Resources Management Officer at the beginning of the first full pay period after the employee’s anniversary date of grade. This includes actions approved by a reconsideration request. All other advancement and promotion actions will be made effective at the beginning of the first full pay period commencing after approval.

(2) If an employee becomes eligible for advancement or promotion while on LWOP for educational or other purposes, no action will be taken until the employee returns to duty. If the employee upon return to duty meets all other requirements for promotion, an appropriate recommendation will be made. However, if advanced or promoted, the advancement or promotion will not be effected retroactively.

**NOTE:** See chapter 6, this part, for effecting of promotion actions upon return from military service.
b. **Disposition of Forms.** On completion of an advancement, the promotion action or change in assignment, or disapproval of advancement, promotion or change in assignment, the original VA Form 10-2543, Board Action, and any accompanying documents will be filed in a separate envelope in the employee’s personnel folder. [The Compensation Panel Action form, VA form 10-0432a, will be used for physicians and dentists to document compensation determinations. These forms will be filed with the Board Action form on the right side of the employee’s personnel folder.]

9. **[CHANGE IN ASSIGNMENT OR] ADJUSTMENT OF PROMOTIONS [TO A HIGHER GRADE] OR ADVANCEMENTS TO A HIGHER LEVEL WITHIN THE GRADE.** Appointing officials may adjust an employee’s change in assignment, promotion to a higher grade or advancement to a higher level within the grade if it is determined that such action is consistent with applicable qualification requirements. Such decisions shall consider the recommendation of the appropriate Standards Board or Compensation Panel. Actions taken under this paragraph will be effected at the beginning of the next pay period following approval.

10. **ADVANCEMENT OF RESIDENTS.** Residents appointed under authority of 38 U.S.C. 7406 will be advanced in salary upon successful completion of each year of training provided the House Staff Review Committee recommends the increase and continuation of training. If the committee recommends the advancement, the effective date of promotion will be the first day following completion of each year of training. The required training may have been obtained in part from sources outside VA. (See M-8, pt. II, ch. 1.)

11. **TEMPORARY CHIEF OF STAFF ASSIGNMENTS [(CHANGE IN ASSIGNMENTS)]**

   a. **General.** When the position of Chief of Staff is vacant, the facility Director may request the temporary change in assignment of a physician as Chief of Staff. Change in assignments will be for a period not to exceed 1 year, and may be terminated prior to the expiration date.

   b. **Submission of Requests.** Facility officials will continue to forward chief of staff nominations to the Management Support Office (10A2B). The chief of staff program staff in the Management Support Office will provide a technical review of the nomination; arrange for appropriate approvals and/or reviews by VHA Central Office officials as necessary; and forward the completed nomination to the Network Director for approval. Requests for temporary change in assignments to chief of staff in a Chief of Staff Assignment tier are renewable for periods not to exceed 1 year require approval of the appropriate Network Director. Normally, change in assignments these reassignments will be approved only after an employee has served in an acting capacity for at least 90 days. In exceptional circumstances, the appropriate Network Director may approve a temporary change in assignment when an employee has served less than 90 days in an acting capacity.

   c. **Temporary [Change in Assignment].** An employee who is temporarily changed in assignment to a Chief of Staff position will be advanced to a Chief of Staff Assignment tier for the duration of the assignment. On expiration or termination of the assignment, the tier and salary of the employee will be adjusted in accordance with the provisions of VA Handbook 5007, Pay Administration, Part IX. In applying the provisions of this handbook, the salary will be adjusted to the salary held previously. On assignment, the following statement will be placed in the “Remarks” item of the SF 50-B, Notification of Personnel Action: “Employee informed of conditions of temporary [tier] assignment.”

(1) Details. When a title 38 or hybrid title 38 position is vacant, the facility Director may detail another title 38 or hybrid title 38 employee to the position. Generally, details will not exceed [1 year], and may be terminated prior to the expiration date. The facility Director may approve extensions of the detail [ ] when circumstances warrant.

NOTE: In accordance with VA Handbook 5005, Part III, Appendix N, the utilization of title 38 employees in competitive civil service positions is prohibited.

b. Registered Nurses and Nurse Anesthetists

(1) Details. When the position of Nurse Executive or a Nurse Anesthetist position at Nurse IV or Nurse V is vacant, the facility Director may detail another title 38 employee to the position. Generally, details will not exceed 90 days, and may be terminated prior to the expiration date. The facility Director may approve extensions of the detail when circumstances warrant.

(2) Temporary Reassignments. When a position at Nurse IV or V is vacant, the facility Director may approve the temporary reassignment of an individual into the position. Generally, temporary reassignments will be for a period not to exceed 1 year, and may be terminated prior to the expiration date. The facility Director may approve the extension of a temporary reassignment not to exceed 1 additional year when circumstances warrant. Normally, such temporary reassignments will be approved only after a registered nurse or nurse anesthetist has acted in the position for at least 90 days. When circumstances warrant, the approving official may approve a temporary reassignment when an employee has served less than 90 days in an acting capacity (e.g., when the position is expected to vacant for an extended period). On approval of the temporary reassignment, the following statement will be placed in the “Remarks” section of the SF 50-B: “Employee informed of conditions of temporary assignment.”

(3) Temporary Promotions. If a registered nurse is temporarily reassigned to a higher grade assignment under subparagraph 8b, the facility Director may temporarily promote the individual. Such action will be taken only after the facility Director considers the recommendation of the appropriate NPSB. The facility Director may similarly temporarily promote a nurse anesthetist to Nurse IV or V after considering the recommendation of the facility PSB for nurse anesthetists. On expiration or termination of the temporary promotion, the grade and salary of the employee will be adjusted in accordance with the provisions of VA Handbook 5007, Pay Administration. The employee will be advised in writing of the conditions of the temporary promotion or assignment. In applying the provisions of this handbook, the salary will be adjusted to the salary held previously, unless a higher step is warranted by reason of a periodic step increase, special advancement, or under the highest previous rate rule.
13. OTHER GRADE CHANGES OR CHANGE IN ASSIGNMENT

a. Change to Lower Grade or Changes in Assignment

(1) General. As provided by 38 U.S.C. 7403, where an employee’s grade or tier level and salary are based on both the nature of the assignment and the employee’s personal qualifications, and the assignment is subsequently changed, the grade and salary may be adjusted as appropriate.

(2) Key Nursing Personnel (Registered Nurses Other Than Nurse Executives) and Nurse Anesthetists in Nurse IV and Above Whose Grade is Based on Both Their Personal Qualifications and Responsibilities of Their Assignment.

(a) Placement in a Lower Grade for the Good of VA. Employees placed in a lower grade for reasons other than cause or at the employee’s request will have their pay set at the lowest step of the lower grade which equals or exceeds their existing rate of basic pay. If there is no such step, employees are entitled to pay retention.
(b) **Voluntary Changes to a Lower Grade.** Employees who take a voluntary change to a lower grade may have their pay set at any step of the grade that does not exceed their highest previous rate. However, the employee is not eligible for pay retention, and, if the employee changes facilities, the pay rates of the gaining facility shall be applicable. The employee must submit a written request, through channels, for the employment change. The employee’s signed request is to be filed on the right side of the employee’s personnel folder.

b. **Review of Assignments of Key Nursing Personnel (Registered Nurses Other Than Nurse Executives) and Nurse Anesthetists in Nurse IV and Above Whose Grade is Based on Both Their Personal Qualifications and Responsibilities of Their Assignment.**

(1) Facility [D]irectors or officials in Central Office may request review of an assignment if they believe it no longer warrants the current grade; the assignment cannot be restructured within the requesting official’s scope of responsibilities; and the employee will not voluntarily accept a change to a lower grade. [The responsible program official will initiate such a review] if there has been a significant change in the assignment or an accretion or erosion of responsibilities [suggests that] the assignment [would be more appropriately placed in] a different grade.

(2) Recommendations related to nurse assignments will be sent to the Central Office NPSB and the [Office of Nursing Services] (059/1[0]8). Those related to nurse anesthetist assignments will be sent to the Central Office Nurse Anesthetist PSB and the Office of Patient Care Services (059/11). If it is determined that the grade is inappropriate, the correct grade will be identified[,] and the following action will be taken:

(a) Any promotion or advancement will be effected on the first day of the first pay period following the approving official’s determination.

(b) If the Central Office program official determines that the current grade is no longer warranted:

1. The facility’s request is forwarded to the Assistant Deputy Under Secretary for Health (10N). This office will attempt voluntary or involuntary placement of the employee in a more appropriate assignment. If no placement opportunities are available, the request will be returned to the facility.

2. The requesting official shall reduce the employee to the appropriate grade. Such employees are eligible for pay retention.

**NOTE:** Directed transfers or reductions in grade approved under this paragraph will not be considered adverse actions under 38 U.S.C. 7461, provided they are not based on charges related to conduct or performance. The actions are, however, grievable under the provisions of VA Handbook 5021[,] Employee/Management Relations[ ].

**[NOTE: Paragraph 9 of proposed Section B, Other Grade Changes, Chapter 4, Part III, of VA Handbook 5005, follows. Section B’s paragraphs 1-8 are subject to the labor organization collaboration process and these are not included at this time.]**
SECTION B. PROMOTION AND INTERNAL PLACEMENT OF HYBRID TITLE 38 EMPLOYEES

[1. GENERAL. This section contains instructions and procedures governing promotions of those occupations under sections 7401(3) and 7405 (a)(1)(B) of title 38, United States Code. Promotion is advancement to a higher-grade level and recognizes that an employee is providing a higher level of service to VA.

2. POLICY.

a. Promotion actions will be taken without regard to race, color, religion, sex, national origin, disability, age, sexual orientation, or status as a parent, or any other non-merit factor, and shall be based solely on job-related criteria.

b. Promotion actions will conform to the restrictions governing the employment of relatives. (See VA Handbook 5025, Legal.)

c. All hiring actions will adhere to Veterans Preference requirements as prescribed in Part I, Chapter 4, Preference to Veterans in Making Hybrid Title 38 Appointments.

d. Nothing in this handbook shall be interpreted to diminish hybrid title 38 grievance rights negotiated under any collective bargaining agreement.

3. RESPONSIBILITIES.

a. Human Resources is responsible for:

(1) Before recruitment is initiated, Human Resources will work in collaboration with the supervisor to determine the eligibility and qualifications requirements that pertain to the assignment and grade level for the position to be filled in accordance with the qualification standards found in VA Handbook 5005, Part II Appendices found in appendix “G”. If the supervisor is not a subject matter expert in the profession, the supervisor must consult with the subject matter expert throughout the recruitment and onboarding process for the vacant position.

(2) Determining eligibility and qualifications in accordance with standards found in VA Handbook 5005, Part II found in Appendix “G” and recommend the appropriate grade to the selecting official for appointments, promotions, reassignments and change to lower grades.

(3) Documentation qualification determinations for each applicant by completing a separate VHA qualification form for each of the applicants.

(4) Consulting with the profession subject matter expert during the development of the assignment, recruitment and onboarding of the selected candidate.

(5) Human Resources will notify candidates who fail to meet the requirements and fail to qualify for appointment.

(6) Processing requests for reassignments/change to lower grades in compliance with VA Handbook 5005, Part III, Chapter 4 Section B.
b. The supervisor at the appropriate level is responsible for:

(1) Obtaining an approval to fill a vacant position in accordance with local procedures. Once approval is obtained the service will initiate recruitment action and contact the servicing Human Resources Office (HRO).

(2) The Supervisor will review applications referred for selections. Supervisors who are not subject matter experts must consult subject matter experts when evaluating applications. This may take the form of a panel, or consultation with the subject matter expert for the profession.

(3) Once a selection is made the Supervisor will consult with Human Resources and the profession subject matter expert (if applicable), and submit supporting documentation for utilization of pay setting flexibilities (if applicable) found in VA Handbook 5007, Part II, Chapters 2, 3 and 4, pertaining to hybrid title 38.

(4) Review requests or recommendations for promotions and make recommendations consistent with 5, 6 and 7 below.

c. The Medical Center Director/Network Director will (for personnel under their jurisdiction) review and serve as the deciding official on requests for additional steps above the minimum on appointments.

4. PROMOTION ]

a. This section contains instructions and procedures governing the promotion of employees who are appointed under sections 7401(3) and 7405 (a)(1)(B) of title 38, United States Code. Promotion is an advancement to a higher-grade level and recognizes that an employee is providing a higher level of service to VA.

b. The promotion system shall provide advancement opportunities for employees, predicated upon the recognition of the quality of service rendered, additional experience and professional attainment as determined by an examination of the employee’s individual record.

c. To meet the criteria for promotion, the individual must meet the criteria for the next higher-grade level in the qualification standard. Examination of the individual’s total record must reveal evidence that the contribution to VA medical service is of sufficient value to warrant promotion. Potential for continuously greater contribution is also a prerequisite. Reviews and recommendations of supervisors and Human Resources will be sufficient to ensure that promotion is fully merited and not recommended based on meeting administrative requirements alone.

[5.] PROMOTION – GENERAL

a. Administrative Requirements for Consideration

(1) A current performance rating of “Satisfactory” or higher.

(2) The experience, education, and performance requirements set forth in the qualification standard. Employees must meet the same grade requirements, including the specified
demonstrated accomplishments, as for appointment. Any deviation or exception to these requirements will be limited to those specified in the qualification standard.

b. **Promotions Based on Additional Experience and/or Education.** Promotions based solely on additional experience acquired by the employee shall be limited to advancements of one grade or grade interval at a time. If an employee has attained a higher level of education that, when combined with their additional experience, is qualifying for a grade higher than the next grade or grade interval, the employee may be promoted to whatever grade in the qualification standard the additional education warrants.

c. **Processing Procedures** (See appendix III-M, this part)

[6]. **PROMOTION CONSIDERATION**

a. [Eligibility.] Full-time, part-time, and intermittent employees shall be considered periodically, consistent with 7-b and 7-c below, for promotion in their current occupation. Eligibility for such promotion considerations shall be based upon fully meeting prescribed administrative requirements.

[(1)] Approximately 60 days prior to the date the employee meets the required period for promotion consideration, Human Resources Management Officers will notify the appropriate supervisory officials that the employee is eligible for promotion consideration to the next higher-grade level. The supervisor will notify the employee no later than 30 days prior to the employee’s anniversary date. The employee shall then be given 30 days to submit to their supervisor a self-assessment of their qualifications for promotion consideration. Employees may also notify their supervisor in writing that they are declining to submit a self-assessment during this 30-day period. If this is done, the supervisor will proceed with a recommendation. If a self-assessment or declination is not submitted the supervisor will proceed with the recommendation at the end of the 30-day period.

[(2)] The supervisory official will review the duties of the position. If the supervisor is not an occupational subject matter expert, the supervisor must consult with a subject matter expert when considering promotion eligibility. The supervisory official must determine whether the duties being performed meet the definition of a higher-level assignment with the qualification standard. The supervisory official must also take into consideration the information provided in the employee’s self-assessment, if provided. Supervisors are to apply position management and make sound management decisions. If the supervisor determines the additional duties were higher level duties that are above the full performance level, the supervisor must determine whether s/he gave other employees in the same position an opportunity to perform the additional duties. The supervisory official is responsible for requesting and obtaining an approval to establish and fill the position in accordance with local procedures. The process and actions taken is to be documented using VHA Form “Request for HT38 Promotion Up to Full Performance Level” or “Request for HT38 Promotion Above Full Performance Level” whichever is applicable.

[b.] **Promotion to Grades at or Below Full Performance Level.**
(1) Promotions to grades at or below the full performance level (see Appendix III-O, this part) will be based on the recommendation of the immediate supervisor, recommendation of approval by the second level supervisor and personnel action approved by Human Resources Officer. Upon receipt of the employee's self-assessment or written declination or expiration of the 30-day time period, the immediate supervisor will make a recommendation on promotion to the second level supervisor. The immediate supervisor’s recommendation is to be acted upon by the second level supervisor within 30 days of the submission of the self-assessment or written declination by the employee or expiration of the 30-day time whichever comes first.

(2) Employees who have demonstrated the capability to successfully perform at the next higher-grade level will be recommended for promotion. Promotions will become effective on the first day of the first full pay period following approval by the second level supervisor. In no case will the promotion be effected later than the employee’s anniversary date unless a future date set by the approving authority and at the election of the employee when doing so would benefit the employee (i.e. an employee is due a within grade increase), and that does not violate law or negotiated agreement.

(3) Employees who have not demonstrated such capability will be informed in writing by the immediate supervisor that they are not being recommended for promotion. The written notice will state the reason(s) why the employee does not meet the criteria for promotion. The immediate supervisor may recommend the employee for promotion at a later date if it is determined that the employee has met the appropriate criteria. If not promoted during the intervening period, the employee is entitled to promotion consideration on the next anniversary date of grade. Employees who are not promoted may request promotion reconsideration under paragraph 7 below.

[c.] Promotion to Grades above the Full Performance Level.

(1) Employees who are eligible for promotion consideration to a grade that requires a combination of personal qualifications and assignment characteristics are to be considered for promotion to such grades on the first anniversary date of their last promotion, provided they meet the administrative requirements. This automatic consideration only occurs on the first anniversary for each grade level. In addition, employees who are selected for supervisory or managerial assignments that warrant consideration for a higher grade and for assignments based on complexity will be considered for promotion on a date other than the anniversary date of last promotion.

(2) If after reviewing the employee's self-assessment, if submitted, and other relevant material, the appropriate management official (e.g., service chief) determines that the assignment does not meet the qualification standard for a higher grade, that official shall document the reasons for this determination in writing and provide a copy of the determination to the employee. Employees who do not agree with the determination may request promotion reconsideration under paragraph 7 below.

(3) If the appropriate management official believes the assignment meets the qualification standard requirements for promotion, a request for personnel action is to be prepared and submitted, along with all relevant information to Human Resources for consideration within 30 days. If applicable, the employee will be given a copy of the supervisor's comments relating to the self-assessment. Human Resources Staffing Specialist will review and forward its recommendation on qualifications to the Human Resources Officer, for approval.
of personnel action. Human Resources will have no more than 30 days to complete their review. Promotions will become effective on the first day of the first full pay period following approval by the approving official. In no case, will the promotion be effected later than the first day of the first full pay period commencing 60 days after the employee’s anniversary date.

(4) If, under paragraph (2) or (3) above, the appropriate management official or Human Resources Officer does not recommend the employee’s promotion, the employee will no longer receive an automatic annual promotion consideration. The appropriate management official may recommend such employee for promotion at any time in the future provided the employee’s duties and responsibilities change to the point that the criteria for promotion to the next grade may be warranted. Employees may request promotion consideration by the appropriate management official on subsequent anniversary dates if their duties have changed since they were last considered and the employee believes that these changes meet the criteria in the qualification standard for a higher grade. For the reconsideration process for a denial, see paragraph 7 below.

[7.] PROMOTION RECONSIDERATION AND REVIEW

a. **Coverage.** This paragraph applies to individuals appointed under 38 U.S.C. 7401(3) or 7405(a)(1)(B).

b. **Notice of Decision.** Employees are to be advised by their supervisors in writing of any decision not to promote them, of the reason(s) for the decision, of their right to request reconsideration, and that reconsideration must be preceded by an informal discussion with their supervisor.

c. **Informal Discussion.** Employees and their supervisor must meet to discuss the recommendation not to promote prior to the employee submitting a request for reconsideration under paragraph d below.

d. **Reconsideration Requests**

(1) **To Grades at or Below the Full Performance Level**

(a) If promotion to a grade at or below the full performance level (see Appendix III-O, this part) is involved, the employee may, within 30 days of being notified of the decision, submit a written request through the immediate supervisor to the second level supervisor for reconsideration. The employee’s written request for reconsideration must indicate when the informal discussion was held with the immediate supervisor and cite the specific reason(s) why the employee believes the decision was not proper. The Medical Center Director, Network Director, or appropriate higher-level designee (whichever is applicable) may extend the 30-day period at the written request of the employee if the employee is unable to submit the information for reasons beyond the employee’s control.

(b) Second level supervisors are to review the employee’s request within 30 days and determine whether to promote the employee. If the second level supervisor determines that a promotion is not warranted, that supervisor will provide the reasons for this decision to the employee in writing.
(c) If the employee is not satisfied with the explanation of the determination to not promote, the employee can request within 30 days to have the determination reviewed and recommendation made by the next higher-level manager. The employee’s request for reconsideration and the supervisor’s explanation will be forwarded to the next higher-level manager within 30 days.

(d) The next higher-level manager will make a recommendation within 30 days and submit through the servicing Human Resources Office to the Medical Center Director, Network Director, or appropriate higher level designee (whichever is applicable), who will make a final decision within 30 days.

(e) If the promotion is approved, the employee is to be promoted on the first day of the first pay period following a decision by the approving official. In no case, will the promotion be effected later than the first day of the first full pay period commencing 60 days after the employee submits a written request for reconsideration, unless the employee requested an extension to the 30-day period to submit a written request for reconsideration. In such cases, the number of additional days taken by the employee to submit a request will be added to the 60-day time limit. If the promotion is denied, the employee will be provided with a copy of the decision.

(2) For Promotions to Grades above the Full Performance Level

(a) Within 30 days of the non-promotion decision, an employee may submit a written request for reconsideration to their immediate supervisor. This 30-day period may be extended at the written request of the employee if the employee is unable to submit the information for reasons beyond the employee’s control.

i. The employee’s written request for reconsideration must indicate when the informal discussion (see Paragraph 7 c above) was held with the immediate supervisor and cite the specific reason(s) why the employee believes the decision was not proper.

ii. Immediate supervisors are to review and comment on the employee’s request in writing and provide copies of those comments to the employee within 15 days.

iii. The immediate supervisor will submit the written reconsideration request and any supervisory comments to the next higher-level supervisor.

(b) The next higher-level supervisor will review the information submitted by the employee, along with the immediate supervisor’s comments, and make a recommendation to Medical Center Director, Network Director, or appropriate higher level designee (whichever is applicable) through Human Resources within 15 days.

i. If Human Resources determines that the employee’s request does not include when the informal discussion was held or the specific reasons why the employee believes the decision was not proper, Human Resources will return the request to the employee for completion.

ii. The employee has 30 days from the date of receipt of the returned request to obtain the additional information and return it to Human Resources. The Medical Center Director, Network Director, or appropriate higher-level designee (whichever is applicable) may extend the 30-day period if the employee is unable to submit the information for good cause shown.
iii. The Medical Center Director, Network Director, or appropriate higher-level designee (whichever is applicable) has 15 days to make decision. This 15-day period may be extended up to the number of days it took the employee to provide the appropriate management official with the proper information.

iv. Upon making the decision, the Medical Center Director, Network Director, or appropriate management official (as the approving official) will forward the decision to the Human Resources for action under paragraph e. below.

e. **Action by Human Resources.** Upon receipt of the reconsideration file, Human Resources shall take one of the following actions within 15 days:

   (1) If approved, promotions will be made effective on the first day of the first full pay period following approval. In no case, will the promotion be effected later than the first day of the first full pay period commencing 60 days after the employee submits a written request for reconsideration, unless the employee requested an extension of the 30-day period to submit a written request for reconsideration. In such cases the number of additional days taken by the employee to submit a request will be added to the 60-day time limit.

   (2) If disapproved, Human Resources will notify the employee of the decision in writing.

[8.] **COVERAGE AS EMPLOYEE GRIEVANCE.** Requests for promotion reconsideration are excluded from the Agency Grievance Procedure. See VA Handbook 5021, Part IV, Chapter 3, paragraph 16. Promotion reconsideration decisions are excluded from the negotiated grievance procedure pursuant to 38 U.S.C. 7403(f)(1)(B). The decision of whether or not to promote a bargaining unit employee is not subject to the negotiated grievance procedure but a failure on the part of the agency to follow the promotion/reconsideration procedure in this policy may be.

[9.] **EFFECTING ADVANCEMENT AND PROMOTION ACTIONS**

a. **Effective Date**

   (1) The promotion will be made effective by the Human Resources Management Officer on the first day of the pay period following the date of approval of the promotion by the approving official, but in no case earlier than the date on which all administrative requirements are met. A promotion may also be made effective at a future date set by the approving authority and at the election of the employee, that does not violate law or negotiated agreement when doing so would benefit the employee (i.e. an employee is due a within grade increase). Promotion recommendations and actions that are administratively delayed beyond the time limits specified in paragraphs 6 and 7 above will be made retroactive.

   (2) If an employee becomes eligible for promotion while on LWOP for purposes for which they have a statutory entitlement to receive promotion consideration (e.g., military service, OWCP), no action will be taken until the employee returns to duty. If the employee on return to duty meets all the requirements for promotion consideration, he or she will be considered for promotion as if he or she had been continuously employed in the position.

   **NOTE:** See chapter 6, this part, for effecting promotion actions upon return from military service.
[10.] TEMPORARY PROMOTIONS

a. An employee may be temporarily promoted to a higher graded position where the grade of the position is based on the complexity of the assignment. The employee must meet the administrative and qualification requirements for promotion and such promotions are to be processed using the procedures in paragraphs 5, 6 and 7 above.

b. On expiration or termination of the assignment, the grade and salary of the employee will be adjusted in accordance with the provisions of VA Handbook 5007, Pay Administration. In applying the provisions of this handbook, the salary will be adjusted to the salary held previously, unless a higher rate is warranted by reason of periodic step increases. On assignment, the following statement will be placed in the “Remarks” item of the SF 50-B, Notification of Personnel Action: “Employee informed of conditions of temporary grade assignment.”

c. This temporary promotion no longer requires a professional standards board action and will occur without recourse to such board action. The absence of a board action shall not bar an employee from grieving a failure to temporarily promote pursuant to this section under the negotiated grievance procedure or agency grievance procedure as appropriate.

[11.] OTHER GRADE CHANGES

a. Change to Lower Grade

(1) General. As provided by 38 U.S.C. 7403, where an employee’s grade level and salary are based on both the nature of the assignment and the employee’s personal qualifications, and the assignment is subsequently changed, the grade and salary may be adjusted as appropriate. Such action may be taken by the Under Secretary for Health or designee for Hybrid Title 38 employees in centralized positions and for all Hybrid Title 38 employees in assignments at GS-13 and above; and by the facility Director for all Hybrid Title 38 employees in noncentralized assignments below GS-13. The facility Director may delegate the authority to the Chief of Staff, Associate Director, Nurse Executive, Pharmacy Chief for occupations under their respective purview.

(2) Hybrid Title 38 employees. Employees appointed under authority of 38 U.S.C. 7401(3) and permanent part-time employees appointed under 38 U.S.C. 7405 (a)(1)(B) are entitled to the following grade and pay retention provisions.

(a) Erroneously Graded Assignments. If an employee’s grade is based on both the nature of assignment and personal qualifications and the assignment does not meet the requirements for the employee’s grade, the employee shall be eligible for grade and pay retention if the employee has been in grade for at least 1 year. If the employee has been in grade for less than 1 year, the employee shall be eligible for pay retention, and pay shall be set in accordance with 5 CFR, part 536.

(b) Change in Assignment. If the duties and responsibilities of an employee’s assignment change sufficiently, either through gradual erosion or planned management action, so that it no longer warrants the grade level of the incumbent, the incumbent shall be eligible for grade and pay retention provided the incumbent has been in grade for at least 52 weeks. If the employee has been in grade for less than 52 weeks, the employee shall be eligible for pay retention, and pay shall be set in accordance with 5 CFR, part 536.
(c) **Assignment Change.** If an employee is voluntarily placed in a different assignment which does not warrant the employee’s current grade level, the employee will not be eligible for grade retention. The employee’s entitlement to pay retention will be determined in accordance with VA Handbook 5007, Pay Administration.

(d) **Assignment Change for Cause or at the Employee’s Request.** If an employee is changed to an assignment which does not warrant the employee’s current grade level for cause or at the employee’s request, the employee is not eligible for grade or pay retention.

**NOTE:** Directed transfers or reductions in grade approved under this paragraph will not be considered adverse actions under 38 U.S.C. 7461, provided they are not based on charges related to conduct or performance. The actions are, however, grievable under the provisions of VA Handbook 5021, (Employee/Management Relations).
CHAPTER 5. CONVERSIONS OR CHANGE IN ASSIGNMENTS (TITLE 38)

1. DEFINITION. Change in assignment for physicians and dentists will be processed by a Compensation Panel. (See VA Handbook 5007, Part IX.) All personnel actions changing an employee from one type of appointment to another under authority of 38 U.S.C., chapter 73 or 74 and not involving a break in service will be processed as conversions except changes from or to fee-basis appointments under authority of 38 U.S.C. 7405(a)(2) and lump-sum fee-basis appointments of consultants and attending’s under authority of 38 U.S.C. 7405(a)(2), and without compensation appointments under 38 U.S.C. 7405(a)(1). These actions will be processed as new appointments. Changes in grades or levels for employees on time limited appointments under 38 U.S.C. 7405(a)(1) will be processed as conversions.

NOTE: Conversion or change in assignment to another appointment giving the employee fewer rights and benefits will not be made until the employee has been advised in writing of the conditions of employment under the new appointment, and the employee has submitted a written resignation or other written evidence clearly indicating voluntary separation from the previous employment.

2. UTILIZATION ON A FEE BASIS
   a. Individuals who render service to VA on a fee basis, such as employees paid according to a schedule of fees or consultants or attending’s used by letter of appointment (see part II, section G, this handbook) may not be converted to appointments under the provisions of sections 7306, 7401(1), 7401(3), and 7405(a)(1). Fee-basis employees will be terminated prior to appointment under these authorities.
   b. Full-time, part-time or intermittent employees appointed under sections 7306, 7401(1), 7401(3), or 7405(a)(1), may not be converted to utilization on a fee basis. An employee must resign, or the appointment must be terminated prior to rendering service on a fee basis except for instances in which dual appointment has been approved. (See part II, chapter 3, section A).

3. ACTION BY PROFESSIONAL STANDARDS BOARD OR COMPENSATION PANEL
   a. A PSB will be responsible for making recommendations to the approving authority concerning any conversion action to a probationary appointment under 38 U.S.C. 7401(1) [or Human Resources for those under 38 U.S.C. 7401(3), whichever is applicable], as well as registered nurses appointed part-time or intermittent under 38 U.S.C. 7405(a)(1), and on any conversion involving a change in grade and/or step rate within the grade.
   b. No action by a PSB will be required on conversion from an appointment under 38 U.S.C. 7401(1) or 7401(3) as well as 38 U.S.C. 7405(a)(1) for individuals appointed as part time or intermittent registered nurses, provided the employee has previously acquired permanent status under 38 U.S.C. 7401(1) or 7401(3), or completed a probationary period under 38 U.S.C. 7405(a)(1) for individuals appointed as part time or intermittent registered
nurses, as appropriate, and has had continuous service under 38 U.S.C., chapter 73 or 74 since acquiring such status.

c. The Board will determine that the employee’s past and expected future performance and physical, mental and emotional ability warrants the change in employment status. VA Form 10-2543, Board Action, will be used to document the Board’s recommendation to the approving authority official.

d. The Compensation Panel will document any change in assignment on VA Form 10-0432a, Compensation Panel Action, along with a recommendation to the approving official.

4. APPROVAL AUTHORITY. All conversion actions or change in assignments may be approved by the facility Director except those involving a change in grade or step rate or tier level for which the approving authority is vested in Central Office or where Central Office approval is specifically required.

5. PROCESSING REQUIREMENTS

a. Personnel actions necessary to effect conversions to appointments or change in assignments under 38 U.S.C., chapter 73 or 74 generally will be effective the first day of the pay period following approval of the conversion or change in assignment except where otherwise specified. When necessary, in order to prevent a break in service caused by the expiration of an appointment prior to the first day of the next pay period, the action may be made effective the first day following the expiration of such appointment.

b. The nature of action will indicate conversion or change in assignment to an appropriate excepted appointment under the authority of 38 U.S.C., chapter 73 or 74. For individuals converted to an appointment under 38 U.S.C. 7401(1), as well as individuals converted to an appointment as a part time or intermittent registered nurse under 38 U.S.C. 7405(a)(1), the “Remarks” section of the SF 50-B will, when appropriate, state “Appointment subject to probationary period of 2 years.” When appropriate, it will also show the amount of any prior service which is creditable toward completion of the required probationary period or a remark that the probationary period was completed.

c. A new application is not required for conversions or change in assignments when one is already on file and VA Form 10-2850, 10-2850a, or 10-2850c is not specifically required.

6. CONVERSION OR CHANGE IN ASSIGNMENTS TO APPOINTMENT UNDER SECTION 7401(1) FROM APPOINTMENT UNDER SECTION 7306. Employees serving under section 7306 appointments will notify the Under Secretary for Health (10) if they desire full-time appointments under 7401(1). (See part II, chapter 3, section A, this handbook.) A Central Office Professional Standards Board will recommend to the Under Secretary for Health the grade and rate of pay and type of assignment which should be made on conversion. The Central Office Compensation Panel for physicians and dentists will recommend a tier determination to the Under Secretary for Health on changes in
assignment. On approval of the Board’s or panel’s recommendation by the Under Secretary for Health, personnel action will be taken to affect the conversion or change in assignment.

CONVERSION TO RESIDENCY APPOINTMENTS UNDER SECTION 7406. An employee who requests conversion to a residency appointment will apply using VA Form 10-2850b, Application for Residency. The application will be processed in accordance with provisions of M-8, part II, chapter SECTION B. PROMOTION AND INTERNAL PLACEMENT OF HYBRID TITLE 38 EMPLOYEES

[1. GENERAL. This section contains instructions and procedures governing promotions of those occupations under sections 7401(3) and 7405 (a)(1)(B) of title 38, United States Code. Promotion is advancement to a higher-grade level and recognizes that an employee is providing a higher level of service to VA.

3. POLICY.

a. Promotion actions will be taken without regard to race, color, religion, sex, national origin, disability, age, sexual orientation, or status as a parent, or any other non-merit factor, and shall be based solely on job-related criteria.

b. Promotion actions will conform to the restrictions governing the employment of relatives. (See VA Handbook 5025, Legal.)

c. All hiring actions will adhere to Veterans Preference requirements as prescribed in Part I, Chapter 4, Preference to Veterans in Making Hybrid Title 38 Appointments.

e. Nothing in this handbook shall be interpreted to diminish hybrid title 38 grievance rights negotiated under any collective bargaining agreement.

5. RESPONSIBILITIES.

a. Human Resources is responsible for:

(7) Before recruitment is initiated, Human Resources will work in collaboration with the supervisor to determine the eligibility and qualifications requirements that pertain to the assignment and grade level for the position to be filled in accordance with the qualification standards found in VA Handbook 5005, Part II Appendices found in appendix “G”. If the supervisor is not a subject matter expert in the profession, the supervisor must consult with the subject matter expert throughout the recruitment and onboarding process for the vacant position.

(8) Determining eligibility and qualifications in accordance with standards found in VA Handbook 5005, Part II found in Appendix “G” and recommend the appropriate grade to the selecting official for appointments, promotions, reassignments and change to lower grades.

(9) Documentation qualification determinations for each applicant by completing a separate VHA qualification form for each of the applicants.
(10) Consulting with the profession subject matter expert during the development of the assignment, recruitment and onboarding of the selected candidate.

(11) Human Resources will notify candidates who fail to meet the requirements and fail to qualify for appointment.

(12) Processing requests for reassignments/change to lower grades in compliance with VA Handbook 5005, Part III, Chapter 4 Section B.

b. The supervisor at the appropriate level is responsible for:

(5) Obtaining an approval to fill a vacant position in accordance with local procedures. Once approval is obtained the service will initiate recruitment action and contact the servicing Human Resources Office (HRO).

(6) The Supervisor will review applications referred for selections. Supervisors who are not subject matter experts must consult subject matter experts when evaluating applications. This may take the form of a panel, or consultation with the subject matter expert for the profession.

(7) Once a selection is made the Supervisor will consult with Human Resources and the profession subject matter expert (if applicable), and submit supporting documentation for utilization of pay setting flexibilities (if applicable) found in VA Handbook 5007, Part II, Chapters 2, 3 and 4, pertaining to hybrid title 38.

(8) Review requests or recommendations for promotions and make recommendations consistent with 5, 6 and 7 below.

c. The Medical Center Director/Network Director will (for personnel under their jurisdiction) review and serve as the deciding official on requests for additional steps above the minimum on appointments.

6. PROMOTION

a. This section contains instructions and procedures governing the promotion of employees who are appointed under sections 7401(3) and 7405 (a)(1)(B) of title 38, United States Code. Promotion is an advancement to a higher-grade level and recognizes that an employee is providing a higher level of service to VA.

b. The promotion system shall provide advancement opportunities for employees, predicated upon the recognition of the quality of service rendered, additional experience and professional attainment as determined by an examination of the employee’s individual record.

c. To meet the criteria for promotion, the individual must meet the criteria for the next higher-grade level in the qualification standard. Examination of the individual’s total record must reveal evidence that the contribution to VA medical service is of sufficient value to warrant promotion. Potential for continuously greater contribution is also a prerequisite. Reviews and recommendations of supervisors and Human Resources will be sufficient to ensure that promotion is fully merited and not recommended based on meeting administrative requirements alone.
[5.] PROMOTION – GENERAL

a. Administrative Requirements for Consideration

(3) A current performance rating of “Satisfactory” or higher.

(4) The experience, education, and performance requirements set forth in the qualification standard. Employees must meet the same grade requirements, including the specified demonstrated accomplishments, as for appointment. Any deviation or exception to these requirements will be limited to those specified in the qualification standard.

b. Promotions Based on Additional Experience and/or Education. Promotions based solely on additional experience acquired by the employee shall be limited to advancements of one grade or grade interval at a time. If an employee has attained a higher level of education that, when combined with their additional experience, is qualifying for a grade higher than the next grade or grade interval, the employee may be promoted to whatever grade in the qualification standard the additional education warrants.

d. Processing Procedures (See appendix III-M, this part)

[6]. PROMOTION CONSIDERATION

a. [Eligibility.] Full-time, part-time, and intermittent employees shall be considered periodically, consistent with 7-b and 7-c below, for promotion in their current occupation. Eligibility for such promotion considerations shall be based upon fully meeting prescribed administrative requirements.

[(1)] Approximately 60 days prior to the date the employee meets the required period for promotion consideration, Human Resources Management Officers will notify the appropriate supervisory officials that the employee is eligible for promotion consideration to the next higher-grade level. The supervisor will notify the employee no later than 30 days prior to the employee’s anniversary date. The employee shall then be given 30 days to submit to their supervisor a self-assessment of their qualifications for promotion consideration. Employees may also notify their supervisor in writing that they are declining to submit a self-assessment during this 30-day period. If this is done, the supervisor will proceed with a recommendation. If a self-assessment or declination is not submitted the supervisor will proceed with the recommendation at the end of the 30-day period.

[(2)] The supervisory official will review the duties of the position. If the supervisor is not an occupational subject matter expert, the supervisor must consult with a subject matter expert when considering promotion eligibility. The supervisory official must determine whether the duties being performed meet the definition of a higher-level assignment with the qualification standard. The supervisory official must also take into consideration the information provided in the employee’s self-assessment, if provided. Supervisors are to apply position management and make sound management decisions. If the supervisor determines the additional duties were higher level duties that are above the full performance level, the supervisor must determine whether s/he gave other employees in the same position an opportunity to
perform the additional duties. The supervisory official is responsible for requesting and obtaining an approval to establish and fill the position in accordance with local procedures. The process and actions taken is to be documented using VHA Form “Request for HT38 Promotion Up to Full Performance Level” or “Request for HT38 Promotion Above Full Performance Level” whichever is applicable.]

[b.] Promotion to Grades at or Below Full Performance Level.

(4) Promotions to grades at or below the full performance level (see Appendix III-O, this part) will be based on the recommendation of the immediate supervisor, recommendation of approval by the second level supervisor and personnel action approved by Human Resources Officer. Upon receipt of the employee's self-assessment or written declination or expiration of the 30-day time period, the immediate supervisor will make a recommendation on promotion to the second level supervisor. The immediate supervisor's recommendation] is to be acted upon by the second level supervisor within 30 days of the submission of the self-assessment or written declination by the employee or expiration of the 30-day time whichever comes first.

(5) Employees who have demonstrated the capability to successfully perform at the next higher-grade level will be recommended for promotion. Promotions will become effective on the first day of the first full pay period following approval by the second level supervisor. In no case will the promotion be effected later than the employee's anniversary date unless a future date set by the approving authority and at the election of the employee when doing so would benefit the employee (i.e. an employee is due a within grade increase), and that does not violate law or negotiated agreement.]

(6) Employees who have not demonstrated such capability will be informed in writing by the immediate supervisor that they are not being recommended for promotion. The written notice will state the reason(s) why the employee does not meet the criteria for promotion. The immediate supervisor may recommend the employee for promotion at a later date if it is determined that the employee has met the appropriate criteria. If not promoted during the intervening period, the employee is entitled to promotion consideration on the next anniversary date of grade. Employees who are not promoted may request promotion reconsideration under paragraph 7 below.

[c.] Promotion to Grades above the Full Performance Level.

(5) Employees who are eligible for promotion consideration to a grade that requires a combination of personal qualifications and assignment characteristics are to be considered for promotion to such grades on the first anniversary date of their last promotion, provided they meet the administrative requirements. This automatic consideration only occurs on the first anniversary for each grade level. In addition, employees who are selected for supervisory or managerial assignments that warrant consideration for a higher grade and for assignments based on complexity will be considered for promotion on a date other than the anniversary date of last promotion.

(6) If after reviewing the employee's self-assessment, if submitted, and other relevant material, the appropriate management official (e.g., service chief) determines that the assignment does not meet the qualification standard for a higher grade, that official shall document the reasons for this determination in writing and provide a copy of the determination to the
employee. Employees who do not agree with the determination may request promotion reconsideration under paragraph 7 below.

(7) If the appropriate management official believes the assignment meets the qualification standard requirements for promotion, a request for personnel action is to be prepared and submitted, along with all relevant information to Human Resources for consideration within 30 days. If applicable, the employee will be given a copy of the supervisor’s comments relating to the self-assessment. Human Resources Staffing Specialist will review and forward its recommendation on qualifications to the Human Resources Officer, for approval of personnel action. Human Resources will have no more than 30 days to complete their review. Promotions will become effective on the first day of the first full pay period following approval by the approving official. In no case, will the promotion be effected later than the first day of the first full pay period commencing 60 days after the employee’s anniversary date.

(8) If, under paragraph (2) or (3) above, the appropriate management official or Human Resources Officer does not recommend the employee’s promotion, the employee will no longer receive an automatic annual promotion consideration. The appropriate management official may recommend such employee for promotion at any time in the future provided the employee’s duties and responsibilities change to the point that the criteria for promotion to the next grade may be warranted. Employees may request promotion consideration by the appropriate management official on subsequent anniversary dates if their duties have changed since they were last considered and the employee believes that these changes meet the criteria in the qualification standard for a higher grade. For the reconsideration process for a denial, see paragraph 7 below.

[7.] PROMOTION RECONSIDERATION AND REVIEW

a. **Coverage.** This paragraph applies to individuals appointed under 38 U.S.C. 7401(3) or 7405(a)(1)(B).

b. **Notice of Decision.** Employees are to be advised by their supervisors in writing of any decision not to promote them, of the reason(s) for the decision, of their right to request reconsideration, and that reconsideration must be preceded by an informal discussion with their supervisor.

c. **Informal Discussion.** Employees and their supervisor must meet to discuss the recommendation not to promote prior to the employee submitting a request for reconsideration under paragraph d below.

f. **Reconsideration Requests**

(3) **To Grades at or Below the Full Performance Level**

(a) If promotion to a grade at or below the full performance level (see Appendix III-O, this part) is involved, the employee may, within 30 days of being notified of the decision, submit a written request through the immediate supervisor to the second level supervisor for reconsideration. The employee’s written request for reconsideration must indicate when the informal discussion was held with the immediate supervisor and cite the specific reason(s) why the employee believes the decision was not proper. The Medical Center Director, Network Director, or appropriate higher-level designee (whichever is
applicable) may extend the 30-day period at the written request of the employee if the employee is unable to submit the information for reasons beyond the employee's control.

(b) Second level supervisors are to review the employee's request within 30 days and determine whether to promote the employee. If the second level supervisor determines that a promotion is not warranted, that supervisor will provide the reasons for this decision to the employee in writing.

(c) If the employee is not satisfied with the explanation of the determination to not promote, the employee can request within 30 days to have the determination reviewed and recommendation made by the next higher-level manager. The employee's request for reconsideration and the supervisor's explanation will be forwarded to the next higher-level manager within 30 days.

(d) The next higher-level manager will make a recommendation within 30 days and submit through the servicing Human Resources Office to the Medical Center Director, Network Director, or appropriate higher level designee (whichever is applicable), who will make a final decision within 30 days.

(e) If the promotion is approved, the employee is to be promoted on the first day of the first pay period following a decision by the approving official. In no case, will the promotion be effected later than the first day of the first full pay period commencing 60 days after the employee submits a written request for reconsideration, unless the employee requested an extension to the 30-day period to submit a written request for reconsideration. In such cases, the number of additional days taken by the employee to submit a request will be added to the 60-day time limit. If the promotion is denied, the employee will be provided with a copy of the decision.

(4) For Promotions to Grades above the Full Performance Level

(c) Within 30 days of the non-promotion decision, an employee may submit a written request for reconsideration to their immediate supervisor. This 30-day period may be extended at the written request of the employee if the employee is unable to submit the information for reasons beyond the employee's control.

i. The employee's written request for reconsideration must indicate when the informal discussion (see Paragraph 7 c above) was held with the immediate supervisor and cite the specific reason(s) why the employee believes the decision was not proper.

ii. Immediate supervisors are to review and comment on the employee's request in writing and provide copies of those comments to the employee within 15 days.

iii. The immediate supervisor will submit the written reconsideration request and any supervisory comments to the next higher-level supervisor.

(d) The next higher-level supervisor will review the information submitted by the employee, along with the immediate supervisor's comments, and make a recommendation to Medical Center Director, Network Director, or appropriate higher level designee (whichever is applicable) through Human Resources within 15 days.

v. If Human Resources determines that the employee's request does not include when the informal discussion was held or the specific reasons why the employee believes
the decision was not proper, Human Resources will return the request to the employee for completion.

vi. The employee has 30 days from the date of receipt of the returned request to obtain the additional information and return it to Human Resources. The Medical Center Director, Network Director, or appropriate higher-level designee (whichever is applicable) may extend the 30-day period if the employee is unable to submit the information for good cause shown.

vii. The Medical Center Director, Network Director, or appropriate higher-level designee (whichever is applicable) has 15 days to make decision. This 15-day period may be extended up to the number of days it took the employee to provide the appropriate management official with the proper information.

viii. Upon making the decision, the Medical Center Director, Network Director, or appropriate management official (as the approving official) will forward the decision to the Human Resources for action under paragraph e. below.

g. **Action by Human Resources.** Upon receipt of the reconsideration file, Human Resources shall take one of the following actions within 15 days:

1. If approved, promotions will be made effective on the first day of the first full pay period following approval. In no case, will the promotion be effected later than the first day of the first full pay period commencing 60 days after the employee submits a written request for reconsideration, unless the employee requested an extension of the 30-day period to submit a written request for reconsideration. In such cases the number of additional days taken by the employee to submit a request will be added to the 60-day time limit.

2. If disapproved, Human Resources will notify the employee of the decision in writing.

[8.] **COVERAGE AS EMPLOYEE GRIEVANCE.** Requests for promotion reconsideration are excluded from the Agency Grievance Procedure. See VA Handbook 5021, Part IV, Chapter 3, paragraph 16. Promotion reconsideration decisions are excluded from the negotiated grievance procedure pursuant to 38 U.S.C. 7403(f)(1)(B). The decision of whether or not to promote a bargaining unit employee is not subject to the negotiated grievance procedure but a failure on the part of the agency to follow the promotion/reconsideration procedure in this policy may be.

[9.] **EFFECTING ADVANCEMENT AND PROMOTION ACTIONS**

a. **Effective Date**

3. The promotion will be made effective by the Human Resources Management Officer on the first day of the pay period following the date of approval of the promotion by the approving official, but in no case earlier than the date on which all administrative requirements are met. A promotion may also be made effective at a future date set by the approving authority and at the election of the employee, that does not violate law or negotiated agreement when doing so would benefit the employee (i.e. an employee is due a within grade increase). Promotion recommendations and actions that are administratively delayed beyond the time limits specified in paragraphs 6 and 7 above will be made retroactive.
(4) If an employee becomes eligible for promotion while on LWOP for purposes for which they have a statutory entitlement to receive promotion consideration (e.g., military service, OWCP), no action will be taken until the employee returns to duty. If the employee on return to duty meets all the requirements for promotion consideration, he or she will be considered for promotion as if he or she had been continuously employed in the position.

**NOTE:** See chapter 6, this part, for effecting promotion actions upon return from military service.

### [10.] TEMPORARY PROMOTIONS

a. An employee may be temporarily promoted to a higher graded position where the grade of the position is based on the complexity of the assignment. The employee must meet the administrative and qualification requirements for promotion and such promotions are to be processed using the procedures in paragraphs 5, 6 and 7 above.

b. On expiration or termination of the assignment, the grade and salary of the employee will be adjusted in accordance with the provisions of VA Handbook 5007, Pay Administration. In applying the provisions of this handbook, the salary will be adjusted to the salary held previously, unless a higher rate is warranted by reason of periodic step increases. On assignment, the following statement will be placed in the “Remarks” item of the SF 50-B, Notification of Personnel Action: “Employee informed of conditions of temporary grade assignment.”

c. This temporary promotion no longer requires a professional standards board action and will occur without recourse to such board action. The absence of a board action shall not bar an employee from grieving a failure to temporarily promote pursuant to this section under the negotiated grievance procedure or agency grievance procedure as appropriate.

### [11.] OTHER GRADE CHANGES

a. **Change to Lower Grade**

   (3) **General.** As provided by 38 U.S.C. 7403, where an employee’s grade level and salary are based on both the nature of the assignment and the employee’s personal qualifications, and the assignment is subsequently changed, the grade and salary may be adjusted as appropriate. Such action may be taken by the Under Secretary for Health or designee for Hybrid Title 38 employees in centralized positions and for all Hybrid Title 38 employees in assignments at GS-13 and above; and by the facility Director for all Hybrid Title 38 employees in noncentralized assignments below GS-13. The facility Director may delegate the authority to the Chief of Staff, Associate Director, Nurse Executive, Pharmacy Chief for occupations under their respective purview.

   (4) **Hybrid Title 38 employees.** Employees appointed under authority of 38 U.S.C. 7401(3) and permanent part-time employees appointed under 38 U.S.C. 7405 (a)(1)(B) are entitled to the following grade and pay retention provisions.

   (e) **Erroneously Graded Assignments.** If an employee’s grade is based on both the nature of assignment and personal qualifications and the assignment does not meet the requirements for the employee’s grade, the employee shall be eligible for grade and pay retention if the employee has been in grade for at least 1 year. If the employee has
been in grade for less than 1 year, the employee shall be eligible for pay retention, and pay shall be set in accordance with 5 CFR, part 536.

(f) **Change in Assignment.** If the duties and responsibilities of an employee’s assignment change sufficiently, either through gradual erosion or planned management action, so that it no longer warrants the grade level of the incumbent, the incumbent shall be eligible for grade and pay retention provided the incumbent has been in grade for at least 52 weeks. If the employee has been in grade for less than 52 weeks, the employee shall be eligible for pay retention, and pay shall be set in accordance with 5 CFR, part 536.

(g) **Assignment Change.** If an employee is voluntarily placed in a different assignment which does not warrant the employee’s current grade level, the employee will not be eligible for grade retention. The employee’s entitlement to pay retention will be determined in accordance with VA Handbook 5007, Pay Administration.

(h) **Assignment Change for Cause or at the Employee’s Request.** If an employee is changed to an assignment which does not warrant the employee’s current grade level for cause or at the employee’s request, the employee is not eligible for grade or pay retention.

**NOTE:** Directed transfers or reductions in grade approved under this paragraph will not be considered adverse actions under 38 U.S.C. 7461, provided they are not based on charges related to conduct or performance. The actions are, however, grievable under the provisions of VA Handbook 5021, (Employee/Management Relations).
CHAPTER 5. CONVERSIONS OR CHANGE IN ASSIGNMENTS (TITLE 38)

1. DEFINITION. Change in assignment for physicians and dentists will be processed by a Compensation Panel. (See VA Handbook 5007, Part IX.) All personnel actions changing an employee from one type of appointment to another under authority of 38 U.S.C., chapter 73 or 74 and not involving a break in service will be processed as conversions except changes from or to fee-basis appointments under authority of 38 U.S.C. 7405(a)(2) and lump-sum fee-basis appointments of consultants and attending's under authority of 38 U.S.C. 7405(a)(2), and without compensation appointments under 38 U.S.C. 7405(a)(1). These actions will be processed as new appointments. Changes in grades or levels for employees on time limited appointments under 38 U.S.C. 7405(a)(1) will be processed as conversions.

NOTE: Conversion or change in assignment to another appointment giving the employee fewer rights and benefits will not be made until the employee has been advised in writing of the conditions of employment under the new appointment, and the employee has submitted a written resignation or other written evidence clearly indicating voluntary separation from the previous employment.

2. UTILIZATION ON A FEE BASIS

a. Individuals who render service to VA on a fee basis, such as employees paid according to a schedule of fees or consultants or attending’s used by letter of appointment (see part II, section G, this handbook) may not be converted to appointments under the provisions of sections 7306, 7401(1), 7401(3), and 7405(a)(1). Fee-basis employees will be terminated prior to appointment under these authorities.

b. Full-time, part-time or intermittent employees appointed under sections 7306, 7401(1), 7401(3), or 7405(a)(1), may not be converted to utilization on a fee basis. An employee must resign, or the appointment must be terminated prior to rendering service on a fee basis except for instances in which dual appointment has been approved. (See part II, chapter 3, section A).

4. ACTION BY PROFESSIONAL STANDARDS BOARD OR COMPENSATION PANEL

a. A PSB will be responsible for making recommendations to the approving authority concerning any conversion action to a probationary appointment under 38 U.S.C. 7401(1) [or Human Resources for those under 38 U.S.C. 7401(3), whichever is applicable], as well as registered nurses appointed part-time or intermittent under 38 U.S.C. 7405(a)(1), and on any conversion involving a change in grade and/or step rate within the grade.

b. No action by a PSB will be required on conversion from an appointment under 38 U.S.C. 7401(1) or 7401(3) as well as 38 U.S.C. 7405(a)(1) for individuals appointed as part time or intermittent registered nurses, provided the employee has previously acquired permanent status under 38 U.S.C. 7401(1) or 7401(3), or completed a probationary period under 38 U.S.C. 7405(a)(1) for individuals appointed as part time or intermittent registered
nurses, as appropriate, and has had continuous service under 38 U.S.C., chapter 73 or 74 since acquiring such status.

c. The Board will determine that the employee’s past and expected future performance and physical, mental and emotional ability warrants the change in employment status. VA Form 10-2543, Board Action, will be used to document the Board’s recommendation to the approving authority official.

d. The Compensation Panel will document any change in assignment on VA Form 10-0432a, Compensation Panel Action, along with a recommendation to the approving official.

7. APPROVAL AUTHORITY. All conversion actions or change in assignments may be approved by the facility Director except those involving a change in grade or step rate or tier level for which the approving authority is vested in Central Office or where Central Office approval is specifically required.

8. PROCESSING REQUIREMENTS

a. Personnel actions necessary to effect conversions to appointments or change in assignments under 38 U.S.C., chapter 73 or 74 generally will be effective the first day of the pay period following approval of the conversion or change in assignment except where otherwise specified. When necessary, in order to prevent a break in service caused by the expiration of an appointment prior to the first day of the next pay period, the action may be made effective the first day following the expiration of such appointment.

b. The nature of action will indicate conversion or change in assignment to an appropriate excepted appointment under the authority of 38 U.S.C., chapter 73 or 74. For individuals converted to an appointment under 38 U.S.C. 7401(1), as well as individuals converted to an appointment as a part time or intermittent registered nurse under 38 U.S.C. 7405(a)(1), the “Remarks” section of the SF 50-B will, when appropriate, state “Appointment subject to probationary period of 2 years.” When appropriate, it will also show the amount of any prior service which is creditable toward completion of the required probationary period or a remark that the probationary period was completed.

c. A new application is not required for conversions or change in assignments when one is already on file and VA Form 10-2850, 10-2850a, or 10-2850c is not specifically required.

9. CONVERSION OR CHANGE IN ASSIGNMENTS TO APPOINTMENT UNDER SECTION 7401(1) FROM APPOINTMENT UNDER SECTION 7306. Employees serving under section 7306 appointments will notify the Under Secretary for Health (10) if they desire full-time appointments under 7401(1). (See part II, chapter 3, section A, this handbook.) A Central Office Professional Standards Board will recommend to the Under Secretary for Health the grade and rate of pay and type of assignment which should be made on conversion. The Central Office Compensation Panel for physicians and dentists will recommend a tier determination to the Under Secretary for Health.
on changes in assignment. On approval of the Board’s or panel’s recommendation by the Under Secretary for Health, personnel action will be taken to affect the conversion or change in assignment.

CONVERSION TO RESIDENCY APPOINTMENTS UNDER SECTION 7406. An employee who requests conversion to a residency appointment will apply using VA Form 10-2850b, Application for Residency. The application will be processed in accordance with provisions of M-8, part II, chapter 1.
[CHAPTER 6. REEMPLOYMENT PROCEDURES UNDER THE UNIFORMED SERVICES EMPLOYMENT AND REEMPLOYMENT RIGHTS ACT (USERRA) OF 1994]

1. PURPOSE. USERRA is a Federal statute that protects Servicemembers’ and Veterans’ civilian employment rights. Under certain conditions, USERRA requires employers to put individuals back to work in their civilian jobs after military service. USERRA also protects Servicemembers from discrimination in the workplace based on their military service. This chapter explains reemployment procedures, rights and benefits of Service members, and identifies employee, manager/supervisor, and human resources responsibilities under USERRA law.

2. COVERAGE. The provisions in this chapter cover VA employees who are former, current or future members of the uniformed services. Employees on time-limited appointments are covered and entitled to reemployment rights until their appointment expires. Facilities must reemploy employees for the period necessary to finish the unexpired portion of their appointment upon their return to duty.

3. DEFINITIONS

   a. **Benefit, Benefit of Employment, or Rights and Benefits.** Any advantage, profit, privilege, gain, status, account, or interest (including wages or salary for work performed) that accrues by reason of an employment contract or agreement or an employer policy, plan, or practice which is consistent with provisions in 38 U.S.C. 4303, that apply to Federal employees.

   b. **Escalator Principle.** The reemployment of returning Servicemembers in positions for which they qualify and would have otherwise attained had they remained continuously employed.

   c. **Injury.** A compensable injury sustained under the provisions of 5 U.S.C. chapter 81, subchapter 1, and includes, in addition to accidental injury, a disease most likely caused by the employment.

   d. **Military Leave.** Paid leave provided to reservists and members of the National Guard under 5 U.S.C. 6323.

   e. **Notice.** Any written or verbal notification of an obligation or intention to perform service in the uniformed services provided to an employer by the employee who will perform such service or by the uniformed service in which such service is to be performed.

   f. **Physically Disqualified.** The employee is unable to perform the duties of the position formerly held or an equivalent position due to medical reasons; there is a medical reason to restrict the individual from some or all essential duties because of possible incapacitation (for example, a seizure) or because of risk of health impairment (such as further exposure to a toxic substance for an individual who has already shown the effects of such exposure); or the health condition is considered permanent with little likelihood for improvement or recovery.

   g. **Qualified.** Having the ability to perform the essential tasks of the position.
h. **Reasonable Efforts.** Actions for a person returning from the uniformed service, including training required or provided by the Department, that does not place an undue hardship on the Department.

i. **Seniority.** Longevity in employment together with any benefits of employment that accrues with or is determined by longevity in employment.

j. **Service in the Uniformed Services.** Performance of duty on a voluntary or involuntary basis in a uniformed service under competent authority and includes active duty, active duty for training, initial active duty for training, inactive duty training, full-time National Guard, and a period for which a person is absent from employment for the purpose of examination to determine fitness for employment.

k. **Status.** The particular attributes of a specific position, which may include rank, responsibility, duties, working conditions, pay, tenure, and seniority.

l. **Undue Hardship.** Actions taken by an agency/department requiring significant difficulty or expense, when considered in light of the nature and cost of actions needed under 5 CFR, part 353, the overall financial resources of the facility involved in taking the action, the number of persons employed at the facility, the effect on expenses and resources, or the impact otherwise of the action on the operation of the facility, and the overall size of the department with respect to the number of employees, the number, type, and location of facilities and type of operations, including composition, structure, and functions of its workforce.

m. **Uniformed Services.** The Armed Forces, Army National Guard, and Air National Guard when engaged in active duty for training, inactive duty training, or full-time National Guard duty, approved training to prepare for such service, the commissioned corps of the Public Health Service, and any other category of persons designated by the President in time of war or national emergency.

4. **RESPONSIBILITIES**

a. **Employee/Servicemember Responsibilities**

   (1) Give advanced oral or written notice of upcoming service unless doing so is impossible or precluded by circumstances beyond the employee’s control;

   (2) Provide the supervisor and HR office an updated resume and a list of title 5 positions of interest or request consideration for hybrid/title 38 promotion opportunities, whichever is applicable, to ensure employees receive proper consideration if/when such positions are announced during their uniformed service-related absences;

   (3) Update official personnel folder;

   (4) As a courtesy, provide supervisor and servicing HR office an advanced copy of orders (if available), the military unit address, phone number, a point of contact, and a current mailing address;
NOTE: USERRA only requires that employees provide a copy of orders upon their return to duty to establish timeliness of reemployment, and length and character of service when absent more than 30 days, hospitalized, or convalescing from an injury aggravated or incurred during a uniformed service-related absence. USERRA does not prohibit an employer from requesting a courtesy copy of orders for record before the employee leaves. Employees may choose to provide a courtesy copy of orders at the facility’s request. However, a facility may not require such documentation from employees prior to reemployment.

(5) Meet eligibility requirements identified in 38 U.S.C. 4312; and

(6) Apply for reemployment and return to duty in accordance with time limits in 5 CFR 353.205.

b. Manager/Supervisor Responsibilities

(1) Notify employees of their USERRA rights and responsibilities;

(2) Request that employees provide an advanced schedule of military drills/assignments as early as possible or when notified of upcoming military service obligations.

(3) Request a courtesy copy of orders (if available), the military unit address, phone number, a point of contact, and an alternate mailing address. If orders are not available, employees absent more than 30 days must provide orders when reemployed;

(4) Determine if employees wish to receive consideration for positions or promotion opportunities during uniformed service-related absences. If so, request employees provide an updated resume and a list of such positions or written acknowledgement of interest in hybrid/title 38 promotion opportunities, whichever is applicable (see paragraphs 8b and c, this part);

(5) Notify the servicing Human Resources (HR) office, provide a courtesy copy of the orders (if provided) along with the updated employee contact information, and submit request to place employee on LWOP or other authorized leave;

(6) Complete required USERRA training in accordance with PL 110-389, and related Office of Personnel Management (OPM) requirements; and

(7) If employee is absent 91 days or more, provide performance expectations within the first 30 days of the employees return to duty and provide training to reintegrate the employee if necessary after 90 days.

c. HR Office Responsibilities

(1) Notify employees of their USERRA rights and responsibilities, reemployment procedures, time limits for reemployment;

(2) Display the “Your Rights Under USERRA” poster in visible areas throughout the facility;

(3) Inform employees that they may apply for jobs via USAJobs during their absence;

III-69
(4) Request employees provide a courtesy copy of orders (if available), documentation of their requests for consideration, an updated resume and a list of positions for which they request consideration. Ensure that employees receive consideration if/when such positions are announced during a uniformed service-related absence;

(5) Determine employee’s eligibility for reservist differential in accordance with 5 U.S.C. 5538, and take appropriate action.

(6) Advise employees regarding procedures for lump sum payment of annual leave in 5 CFR 550.1203(c) and VA Handbook 5007, part IV, chapter 3;

(7) Update employees’ official personnel folders accordingly. Maintain active files for employees who are currently on leave in conjunction with military service, but will return to duty. Transfer official personnel folders of separated employees to the National Personnel Records Center;

(8) Reemploy eligible employees with accrued seniority, status, and pay as soon as possible, but not later than 30 days after receiving their reemployment application;

(9) Provide Employee Assistance Program information in case the employee needs such services.

(10) Consider employees for any opportunity, incident or advantage of employment missed during periods of uniformed service in accordance with the provisions of 5 CFR 353.106. (See this part, paragraph 8, Promotion Consideration); and

(11) Complete required USERRA training in accordance with PL 110-389, and related OPM requirements.

5. FIVE-YEAR CUMULATIVE SERVICE LIMIT. Cumulative uniformed service-related absences must not exceed five years with each employer unless the excess service meets the criteria for exceptions in 5 CFR 353.203. Aside from these exceptions, individuals who exceed the five-year limit are not entitled to reemployment protection under USERRA. However, the five-year period starts over and USERRA protections resume each time an employee moves from one agency to another.

6. STAFF COVERAGE

a. Scheduling Conflicts. HR staff or supervisors may contact uniformed services authorities to request a scheduling adjustment if an employee’s service obligations repeatedly impact the efficiency of service. Department of Defense regulation, 32 CFR 104.4(d) directs military authorities to consider such requests to minimize coverage issues. However, employees are not required to obtain the employer’s permission to complete a uniformed service obligation if the unit official does not adjust the employee’s schedule.

b. Temporary Coverage. When justified, facilities may temporarily fill positions encumbered by employees on extended military leave. In such cases, the provisions in 5 CFR, part 316, subpart D and, part III, chapter 2 of this handbook apply. Facilities may also maintain staff coverage with details. Details in VA must conform to both the requirements of 5 U.S.C. 3341, 5 CFR, part 300, and the restrictions on details to higher graded positions in 5 CFR, part 335, subpart C, and paragraph 15 of chapter 3 in this part.
7. REEMPLOYMENT

a. Eligibility for Reemployment. Employees must meet the following criteria to be eligible for reemployment:

(1) Leave position of employment to perform in the uniformed services;

(2) Give notice of uniformed service obligation unless prevented by justifiable circumstances;

(3) Be released from the uniformed services under honorable conditions;

(4) Not exceed the 5-year cumulative service limit, unless service is an exception to the limit; and

(5) Apply for reemployment within appropriate time limits based on length of service.

b. Application for Reemployment. Employees absent more than 30 days must apply for reemployment by notifying the facility either verbally or in writing of their intent to return to work. Facilities must reemploy individuals who fail to apply for reemployment within the timeframes below, but absent appropriate justification, employees may be subject to disciplinary action for failure to report to work in a timely manner.

(1) Employees absent 30 days or less or for a period necessary to complete a fitness for duty exam must report back to work on the first regularly scheduled work day after release from service, safe travel home, and 8 hours of rest;

(2) Employees absent 31 to 180 days must submit reemployment application no later than 14 days after completion of service;

(3) Employees absent more than 180 days must submit reemployment application no later than 90 days after completion of service;

(4) Employees who are hospitalized or recovering from illness or injury aggravated or incurred during military service, must report for duty at the end of a recovery period based on their length of service as described above consistent with 5 CFR 353.205.

NOTE: When warranted, facilities may extend an injured/ill employee’s (described under b (4)) report date by the minimum time necessary for his/her full recovery, not to exceed a maximum of 2 years.

c. Reemployment Position. Facilities must reemploy returning Servicemembers/employees under the following circumstances consistent with the provisions in 5 CFR 353.207:

(1) If absent 90 days or less, reemploy employees in the position for which they qualify and would have attained if they remained continuously employed, (the position obtained as a result of applying the escalator principle), or in their former position, if employees are unqualified after putting forth reasonable efforts to help them become qualified.
NOTE: Applying the escalator principle could have a positive or an adverse impact on an employee’s reemployment position. Facilities will determine an individual’s reemployment position on a case-by-case basis subject to circumstances specific to the employee’s position of record. Examples of events that could affect an employee’s position are workforce restructuring, classification decisions or other actions that impacted the employee’s position of record and occurred during his/her military service-related absence.

(2) If absent more than 90 days, USERRA permits placing returning employees in positions of like seniority, status, and pay. However, in VA, facility HR offices must make every effort to reemploy all returning employees in their former position, and put forth reasonable efforts to qualify them prior to placing them in positions of like seniority, status, and pay.

(3) In either case, if employees are not disabled, but are unqualified (for reasons other than service-connected disabilities) after exhaustive efforts to qualify them, reemploy them in any position for which they qualify that is of lesser status and pay, with full seniority.

(4) Exhaust efforts to provide reasonable accommodations for employees with service-connected disabilities. Otherwise, reemploy them in other positions for which they qualify that are of like seniority, status, and pay, or the nearest approximation thereof, unless reemployment would impose undue hardship.

d. **Compensably Injured or Physically Disqualified.** Employees who suffer compensable injuries and, become physically disqualified for their former position due to those injuries are subject to the reemployment provisions in CFR 353.301.

e. **Documentation Upon Return.** Employees who were absent more than 30 days must provide one of the following documents to validate length and character of service and timeliness of application for reemployment. Employees may be subject to termination if they are ineligible for reemployment.

   (1) Military orders, or a letter from unit official that provides the dates of service;

   (2) DD Form 214 displaying dates and character of service (honorable service required);

   (3) Certificate of completion from the military training school; or

   (4) Copy of payroll documents that display periods of service.

8. **SENIORITY BENEFITS AND PROMOTION CONSIDERATION**

   a. **Seniority Benefits.** USERRA requires that agencies/departments reemploy returning employees in the job they would have attained had they remained continuously employed, with the same seniority, status and pay. These employees must automatically receive credit for seniority-based benefits such as within grade increases, career tenure, probation, leave accrual rate and severance pay.

   b. **Promotion Consideration.** USERRA requires that agencies/departments consider returning employees for any incident or advantage of employment missed during a uniformed service-related absence. Facilities may consider and promote during a service-related absence, a title 5 employee who meets the qualifications for promotion. However, consistent with part III, chapter 4 of this handbook,
facilities must consider eligible hybrid/title 38 employees for promotion or advancements within grade and, take appropriate action upon their return to duty. When considering employees for missed promotion opportunities, the following provisions apply:

(1) 5 CFR, 300, subpart F;

(2) 5 CFR, 335;

(3) VA Handbook 5005 – Part III, Chapters 2, 3, and 4; and

(4) Applicable OPM or VA Occupational Qualification Standard.

c. **Promotion and Retroactive Pay.** A promotion effective during a uniformed service-related absence does not infer an entitlement to retroactive pay. If promoted during or after a uniform service-related absence, the employee’s date of grade for time in grade purposes is the date the promotion would have occurred had he/she never left. Pay at the new grade is effective the date the employee returns to duty.

### 9. RESIGNATION IN LIEU OF SEPARATION-MILITARY

a. **Voluntary Resignation.** Facilities must advise employees of their reemployment rights immediately when notified of their intent to resign to serve in the uniformed services. Employees are entitled to reemployment upon completion of service and need not resign for this purpose. However, employees who wish to resign are entitled to do so. Facilities must take the following actions prior to separating employees that wish to serve in the uniformed services:

(1) Request employees provide a resignation letter, a copy of orders (if available), the military unit address, phone number, a point of contact, and an alternate mailing address;

**NOTE:** *Employees who resign to serve in the uniformed services remain entitled to reemployment upon completion of service. However, separation affects seniority benefits. (5 CFR 353.106)*

(2) Advise employees regarding procedures for lump sum payment of annual leave in 5 CFR 550.1203(c) and VA Handbook 5007, part IV, chapter 3; and

(3) Advise employees of their responsibility to notify the servicing HR office of any change in circumstances as soon as possible.

b. **Unqualified for Military Service.** Employees who resign to serve in the uniformed services, but are deemed unqualified due to their failure to pass the fitness for duty entrance exam are entitled to reemployment in accordance with 5 CFR 353, parts 205 and 207.

---

III-73
10. DISPLACED EMPLOYEES

a. **Transfer of Function.** The HR office at the gaining facility or agency/department must place in a position of like seniority, status and pay, any returning employee who encumbers a position in which the function transferred during a uniformed service-related absence or a period of recovery from a compensable injury, unless that employee would not have otherwise transferred with the function.

b. **Position Abolished.** The HR office at the losing facility must place in a position of like seniority, status, and pay, any returning employee who encumbers a position that it abolished during a uniformed service-related absence or period of recovery from a compensable injury. If the employee is willing to relocate, the losing facility may place the individual at another VA facility. Consistent with provisions in 5 U.S.C. 5724, employees transferred in the interest of the Government from one official station to another station or agency, may receive paid travel expenses with discretionary approval.

c. **Option to Request Voluntary Early Retirement Authority (VERA) and Voluntary Separation Incentive Payment (VSIP).** An employee, who met eligibility criteria for VERA, VSIP, or both, may request these incentives within 30 days of returning to duty if he/she was eligible, but unable to do so during a uniformed service-related absence. An employee may not otherwise request VERA or VSIP after expiration of the OPM-approved period for each authority.

d. **Reduction in Force.** An employee who encumbers a position abolished during a uniformed service-related absence (in excess of 30 days) is not subject to a reduction in force (RIF) while in service. However, if a RIF occurs after the employee returns to duty, he/she may be subject to RIF after the applicable period of protection from separation under 5 CFR 353.209 (6 months if period of service was 31 to 180 days or 1 year if period of service was 181 days or more). USERRA does not establish a period of protection from separation for uniformed service-related absences less than 30 days. In accordance with 5 CFR 353.302, an injured employee is not entitled to retention protection in a RIF and has no restoration rights if separated by RIF or for cause while on compensation.

e. **OPM Placement Assistance.** Upon request, OPM will assist with placement of VA employees under circumstances consistent with those described in 5 CFR 353.110. The servicing HR office must submit placement requests through appropriate channels to the Recruitment and Placement Policy Service (RPPS/059), Office of Human Resources Management. HR offices must exhaust placement options prior to submitting such requests to RPPS. RPPS will process formal requests for OPM approval, when warranted.

11. TRAINING. Public Law 110-389 requires that agencies and departments train their human resources personnel on the provisions of USERRA in consultation with OPM. Consistent with this requirement, OPM has developed USERRA training and requires HR personnel to complete it or other approved USERRA training on an annual basis. The term human resources personnel is defined as HR specialists, HR assistants, individuals with HR liaison responsibilities, and supervisory/management officials, as well as those delegated to act on their behalf. VA Talent Management System (TMS) currently documents this mandatory training in the learning plans of all designated VA staff.
12. **EMPLOYER SUPPORT OF THE GUARD AND RESERVE (ESGR) ASSISTANCE.** ESGR is a Department of Defense agency, which provides education, outreach, and mediation services to Servicemembers and their non-military employers. This agency acts as a neutral liaison between employees, their employers, and the Department of Labor (DOL). Employees may contact the ESGR for assistance with resolving USERRA issues as an alternative to filing a formal complaint with DOL, or seek direct DOL assistance.

13. **USERRA ENFORCEMENT.** Employees who feel that their USERRA rights have been violated may file a complaint with DOL’s local Veterans Employment and Training Service (VETS) Office. Employees also have the option of appealing directly to the Merit Systems Protection Board (MSPB) should they choose not to file with DOL.

14. **RELATED GUIDANCE.** Facility HR Offices may contact Work Life and Benefits Service to obtain specific guidance on military leave, Compensation and Classification Service regarding reservist differential pay, and Employee Relations and Performance Management Service for information pertaining to the employment termination process.

APPENDIX A. PROBATIONARY PERIOD FOR FIRST-TIME SUPERVISORS/MANAGERS

1. SCOPE

a. This appendix contains policies and procedures pertaining to the probationary period required of all first-time supervisors and managers in the competitive service.

b. It does not apply to excepted service employment in the Veterans Health Administration under 38 U.S.C., chapter 73, 74 or 78 authorities. Also excluded are those positions excepted when filled by a particular group of persons such as those [with intellectual disabilities, severe physical disabilities, or psychiatric disabilities], and those positions excepted under 5 CFR 302.101(c).

2. POLICY. The success or failure of VA's mission of providing high quality health care and benefits programs for veterans is dependent, to a large extent, on the caliber of our supervisors and managers. Incumbents of these positions must possess unique skills and abilities [that] cannot readily be taught or developed in other kinds of positions. A probationary period provides the opportunity for assessing the new supervisor's or manager's performance on the job, and includes procedures for the return of such employees to nonsupervisory or nonmanagerial positions in instances where they fail to successfully complete the required probationary period. Generally, this probationary period is required for all those individuals whose initial assignment to a supervisory/managerial position occurred on or after August 11, 1979.

3. AUTHORITY. This requirement is established by section 5 U.S.C. 3321 and 5 CFR, part 315, subpart I.

4. DEFINITIONS

a. "Supervisory" and "managerial" positions have the meaning given them in OPM's General Schedule Supervisory Guide.

b. For wage system positions, "supervisory positions" have the meaning given them in the OPM's Federal Wage System Job Grading Standard for Supervisors.

c. A supervisory/managerial probationary period under 5 U.S.C. 3321 and 5 CFR, part 315, subpart I means: The first year of service as a newly appointed supervisor or manager in the competitive service.

d. A probationary period under 5 CFR, part 315, subpart H, and Civil Service Rule 2.4 means: The first year of service following appointment of an employee who has been given a career-conditional (or career, if applicable) appointment in the competitive service before competitive status is acquired.

5. BASIC REQUIREMENTS AND LENGTH OF PROBATIONARY PERIOD

a. The general requirement is that an employee must serve a 1-year probationary period upon initial assignment to a supervisory and/or managerial position. Exemptions and exceptions to this requirement are as follows:
(1) Employees who, as of August 11, 1979, were serving or had served in Federal civilian supervisory or managerial positions are exempt from this requirement. This means that a present or former supervisor is not subject to a probationary period for supervisors, and a present or former manager is not subject to a probationary period for either managers or supervisors. However, a present or former supervisor who is assigned to a managerial position on or after August 11, 1979, is subject to a probationary period for managers unless an exception is made under the following provisions.

(2) The exemption from serving a probationary period in a supervisory or managerial position also applies to employees who, prior to August 11, 1979, served on a temporary assignment in a supervisory or managerial position, provided (a) they were officially assigned to the position (service while on a detail does not count) and (b) the temporary assignment was in excess of 120 days. Such individuals who served as supervisors, however, will be required to serve a probationary period upon initial assignment to a managerial position unless an exception is made under the following provisions.

(3) Supervisors who have fulfilled a subpart I (5 CFR, part 315) probationary period requirement and are later placed in managerial positions without interruption of the period may be excepted from serving a probationary period of managers when justified on the basis of demonstrated performance and experience. When the subpart I requirement has not been completed at the time a supervisor is placed in a managerial position without a break in service, the employee must serve a full probationary period in the managerial position, unless service as a supervisor is credited, as an exception, towards completion of the managerial probationary period. A recommendation for an exception from the appropriate immediate higher level supervisor will be forwarded to the next higher managerial official for approval. The managerial candidate's composite qualifications must indicate possession of the necessary knowledges, skills, and abilities and that the employee has received supervisory and other appropriate training which will enable the employee to perform the duties successfully.

NOTE: Where a supervisor has not completed the subpart I supervisory probationary period at the time of placement in a managerial position without interruption of the period, the time spent in the supervisory probationary period may be credited towards completion of the managerial probationary period requirements under the criteria and procedures for exceptions described above.

(4) Requests for such exceptions will be approved by the facility Director for decentralized positions. Exceptions for occupants of centralized positions and noncentralized positions in VA Central Office will be approved by the appropriate Administration or Staff Office Head or designee, based on recommendations and certifications by appropriate program officials.

(5) Where an administration/staff office head directly supervises subordinate managers, the administration/staff office head may approve such exceptions without higher level concurrence.

b. An employee whose initial appointment is to a position which is both supervisory and managerial is required to complete a single probationary period for a supervisor or manager.
c. If, upon appointment, a supervisory or managerial employee is required to serve concurrent probationary periods under subpart H and I, 5 CFR, part 315, of the regulations, then the subpart H probationary period takes precedence and the satisfactory completion of this probationary period fulfills the requirements.

d. An employee serving a probationary period under subpart H and subsequently assigned as a supervisor or manager must complete the remaining part of the subpart H probationary period as well as the full 1-year probationary period established under the provisions of subpart I for supervisors and managers.

e. An employee serving a managerial or supervisory probationary period under subpart I who is reassigned to another managerial or supervisory position before the completion of the probationary period will have the time spent in the prior position credited toward meeting the 1-year probationary period requirement.

f. An employee who has completed a managerial probationary period and is later assigned to a supervisory position is not required to complete a new probationary period (5 CFR 315.904). However, when an employee serving in a managerial probationary period is assigned to a supervisory position before completing the managerial probationary period, the time spent in a managerial probationary period is creditable towards completion of the probationary period in the new supervisory position.

g. The following types of service are applicable towards meeting the probationary period requirements:

(1) Service by an employee on a temporary appointment, promotion or reassignment to a supervisory/managerial position on or after August 11, 1979 (except where exempt under the provisions in paragraph d(1)(b) above), whose assignment later becomes permanent is creditable towards completion of the required probationary period in that position, provided:

(a) The temporary service is immediately prior to the permanent assignment and there is no break in service, and

(b) The individual was officially assigned to the position (time spent on detail to a position is not creditable).

(2) Absence in a nonpay status while on the rolls (other than absence because of compensable injury or military duty) is creditable up to a total of 22 workdays. Any nonpay time in excess of the total 22 workdays extends the probationary period by an equal amount.

(3) Absence (whether on or off the rolls) due to compensable injury or military duty from which the employee is entitled to restoration rights or priority consideration under 5 CFR, part 353 is creditable in full.
(4) A probationary period which is interrupted by intervening service in a nonmanagerial or nonsupervisory position or a break in service is not creditable toward completion of that or any subsequent probationary period. Following such an interruption or break in service, the individual must serve a completely new probationary period.

h. Completion of the probationary period is documented in the employee's personnel folder. VA Form 4645a, Request for Review of a Supervisory/Managerial Employee's Probationary Period, will be used for obtaining the supervisor's certification.

i. PAID reporting procedures for the supervisory/managerial probationary period are contained in VA Manual, MP-6, part V, supplement No. 1.5.

6. EVALUATION DURING PROBATIONARY PERIOD

a. Performance of first-time supervisors/managers will be evaluated against written performance standards in effect at the time of entry into a position. These requirements will be developed using the principle of critical elements in conjunction with the performance appraisal system contained in VA Directive and Handbook 5013, Performance Management Systems, and will include specific performance expected relating to equal employment opportunity responsibility. Written critical element identification and performance standards must be developed within 60 days following the assignment. After the employee has completed at least 4 months but not more than 6 months in the assignment, a placement follow-up will be conducted. In order to assess the employee's performance and adjustment in the job, the facility HRM office will ensure that a placement follow-up is conducted. Where significant deficiencies are noted, the employee will be counseled and appropriate courses of action leading to desired improvement considered. The follow-up form, VA Form 5-97, Notice of Pending Personnel Action, normally will be annotated to show that the follow-up was made, and only significant results will be recorded. Employees will be kept informed by their immediate supervisors on a regular basis about their performance, their strengths, and areas in which improvement is needed or is a realistic goal for both the employee and the organization.

b. The immediate supervisor of first-level supervisors/managers must forward through channels to the appropriate higher level supervisor (i.e., service/division chief, Director, administration or staff office head), normally no later than the end of the 10th month, a signed statement certifying that the performance of supervisory or managerial responsibilities of the individual has been found to be either satisfactory or unsatisfactory. Each certification must contain a recommendation as to whether the individual should be retained in the position beyond the probationary period. The appropriate higher level supervisor will either approve or disapprove the immediate supervisor's recommendation. Where disapproval is indicated, the basis for the decision must also be stated.

c. If it is determined that the employee should not be retained in the position beyond the probationary period, the determination must indicate the specific performance standards not met which make the person unsuited for continued employment in the supervisory or managerial position. (See VA Handbook 5013, Performance Management Systems.)

d. Satisfactory certifications will be filed on the left side of the employee's personnel folder.
APPENDIX B. TIME-IN-GRADE RESTRICTIONS
(TITLE 5 – 5 CFR, PART 300, SUBPART F)

1. PURPOSE. This appendix contains current VA policy on time-in-grade (TIG) restrictions for promotions to General Schedule positions in both the competitive and excepted service.

2. APPLICABILITY OF TIME-IN-GRADE RESTRICTIONS. The provisions of the TIG restrictions as set forth in 5 CFR, part 300, subpart F, govern advancement to General Schedule positions in the competitive service only. In VA, however, these regulations have been extended to advancement to excepted service positions that are subject to the General Schedule. Although the TIG restrictions are not applicable to positions outside the General Schedule (e.g., wage system jobs); noncompetitive actions in wage system jobs or between wage system jobs and General Schedule positions must be consistent with competitive merit principles even in the absence of specific controls or restrictions on excessively rapid promotions. 5 CFR 330.501 provides instructions on the Office of Personnel Management's separate but related time-after-competitive appointment requirement.

3. GENERAL RESTRICTIONS. The application of the general restrictions will be as outlined in 5 CFR 300.602 and 300.604.

4. VA EXCEPTIONS TO TIME-IN-GRADE RESTRICTIONS. In addition to TIG exceptions listed in 5 CFR 300.603, the following conditions are applied in VA:

   a. Persons Within Reach on a Register. The TIG restrictions do not apply to persons who are within reach on an appropriate register maintained by a VA Excepted Board of Examiners for an excepted service position provided that all other statutory and regulatory requirements are met.

   b. Promotions in Accordance With a Training Agreement. Employees who are being promoted under the terms of a training agreement which provides for an exception to normal TIG restrictions because of an accelerated rate of training are not subject to the TIG restrictions. Such agreements will be approved by the Administration or Staff Office Head subject to concurrence by the Office of Human Resources Management and Labor Relations, Recruitment and Placement Policy Service (059). However, an employee may not be promoted more than two grades in 1 year solely on the basis of a training agreement or a series of training agreements.

   c. [Pathways Programs. Employees serving in Pathways Programs appointments are not subject to normal TIG restrictions, as permitted by 5 CFR 362.204. Promotions must be made using the procedures of VA Handbook 5005, Part II, Appendix N.]

5. AUTHORITY TO WAIVE TIME-IN-GRADE RESTRICTIONS. The Secretary may waive TIG restrictions for competitive and excepted service positions for advancements of not more than three grades during any 1 service year to avoid undue hardship or inequity in an individual case of a meritorious nature. Requests for such waivers should be submitted as outlined in paragraph 6[.]
6. SUBMITTING REQUESTS

a. Requests for waivers of TIG restrictions must be submitted over the signature of a field facility director, or Administration Head, as appropriate. Such requests must contain documentation fully supporting the request and will be forwarded through channels to the Office of Human Resources Management and Labor Relations, Recruitment and Placement Policy Service (059) for technical review, recommendations, processing and maintenance of records. Before forwarding requests to VA Central Office for consideration, signatory officials will carefully review them to ensure that all other requirements for promotion, including quality and length of experience requirements contained in the appropriate qualification standard, are met.

b. The following minimum records will be maintained by the Recruitment and Placement Policy Service (059), Office of Human Resources Management and Labor Relations, for each action taken under this authority: (1) type of action taken; (2) processing time for taking the action; (3) name of person authorizing the final action; (4) date of the decision on the action; and (5) a brief statement of the rationale for the decision. These records will be kept and available for audit by OPM for at least 2 years. Additionally, the monitoring process may require information concerning problems and/or benefits which may result from use of this authority.

7. INAPPROPRIATE USE OF TIG WAIVER. A TIG waiver is not to be used to provide early promotions in recognition of an employee's outstanding performance of official duties. Outstanding performance should be recognized through such measures as quality step increases, superior performance awards or other appropriate special achievement awards. A justification citing high level performance, dedication and/or demonstrated potential to work at a higher grade will not normally support a TIG waiver.

8. CLARIFICATION OF APPLICABLE TERMS. In applying TIG restrictions, the following principles will be used in VA for both competitive and excepted service employees:

a. Excessively Rapid Promotion. The basic intent of the TIG restrictions is to prevent "excessively rapid promotion." Excessive in these instances refers to any proposed advancement which outstrips reasonable expectations of growth in job demands or employee competence. For example, any promotion of more than two grades or any request involving a second TIG waiver for the same person would normally be considered excessive.

b. Hardship or Inequity. In interpreting these terms, hardship basically refers to the effect on the Department's mission while inequity refers to a burden on the employee.

c. Undue Hardship or Inequity. The excessiveness or unreasonableness of the hardship to the agency and/or inequity to the employee must be fully documented. Typically, an undue hardship or inequity must be one that is unusual or extraordinary and not one which other employees in the same or similar situation and/or grade level are normally required or expected to undergo on a regular basis. Such an undue hardship or inequity must be both unavoidable and uncorrectable through valid actions other than a TIG waiver. If the situation the facility wishes to have redressed resulted from planned management action or from failure to exercise proper position management, or if it can be corrected by job restructuring or redistribution of work, consistent with classification requirements, then no undue hardship or inequity exists. Moreover, undue hardship or inequity normally occurs only when all other requirements for promotion other than TIG have been met.
d. **Individual Case of Meritorious Nature.** Each request for a waiver is considered on its own merits. Although waiver requests resulting from a reclassification or a reorganization may cover a number of employees whose situation is identical, approval of such requests covers only the employees specified and does not confer blanket authorization to grant exceptions to other employees in similar positions. In the case of a promotion action, an approved waiver applies only to the specific promotion action for which it is authorized and may not be used to cover subsequent promotion of another employee to the same position. Approval for a particular position or situation does not set a precedent for approval of requests involving similar positions or situations.
APPENDIX C. INTERCHANGE AGREEMENTS

1. PURPOSE. This appendix outlines changes resulting from [two] interchange agreements between VA and Office of Personnel Management (OPM) negotiated under provisions contained in Executive Orders 9830 and 10577, Civil Service Rule 6.7. Two agreements allow for movement of personnel employed under 38 U.S.C. 7401(1) and 7401(3) in Veterans Health Administration (VHA) and the competitive civil service. Employees must have at least 1 year of continuous service in order to be covered by the terms of these agreements.

2. INSTRUCTIONS. Following are implementing instructions regarding program areas affected by the agreements:

   a. Coverage

      (1) Appointments under 38 U.S.C. 7401(1) are limited to physicians, dentists, nurses, nurse anesthetists, podiatrists, optometrists, chiropractors, physician assistants and expanded-function dental auxiliaries employed on a full-time basis. Appointments under 38 U.S.C. 7401(3) are limited to those occupations specifically listed under Section 7401(3) or approved for hybrid status by the Assistant Secretary for Human Resources and Administration in accordance with the provisions of part II, chapter 3, section A, paragraph 2 of this handbook.

      (2) Employees involuntarily separated without cause from qualifying positions (described in subparagraph a(1) above) may be appointed non-competitively within 1 year of the separation period.

   b. Consideration for Conversion to a Competitive Service Appointment. Title 38 and Hybrid Title 38 employees who are eligible for conversion to competitive service positions under VA interchange agreements and are in the area of consideration for posted vacancies shall be allowed to apply. The following procedures will be used:

      (1) If the competitive service position does not provide promotion or placement in a position with promotion potential, qualified excepted service employees covered by the interchange agreements may be selected and converted to the competitive service position without competition. If an increase in pay will result, it is considered a promotion and competition under the appropriate merit promotion plan for competitive service positions will take place as described in the next paragraph.

      (2) If the competitive service position provides promotion or placement in a position with higher promotion potential, qualified excepted service employees covered by the interchange agreements will be rated and ranked along with competitive service employees. Excepted service and competitive service employees will be referred on [the same] certificate. (See chapter 3 of this part.)

NOTE: For VHA policy regarding the utilization of title 38 employees (appointment/assignment to non-clinical duties), see appendix III-N.
c. Appointment to Positions Under 38 U.S.C. 7401(1) 7401(3) and 7802

(1) Civil Service Rule 6.7 allows OPM and any Federal agency having an independent merit system (e.g., title 38, United States Code), to enter into an agreement providing for the movement of persons between the competitive civil service and the independent system. Under provisions of the agreements between VA and OPM, personnel employed under 38 U.S.C. 7401(1) and 7401(3) and in the Canteen Management program may apply for competitive service positions. However, the "interchange" agreements also include procedures which competitive service employees should follow in applying for positions in the independent merit system (in this case, positions in the Canteen Management program and those filled under 38 U.S.C. 7401(1) and 7401(3)).

(2) Competitive service employees applying for positions filled under 38 U.S.C. 7401(1) or 7401(3) will be appointed in accordance with the provisions of chapter 4 of this part. Employees will be appointed at the grade and step for which they qualify based on the recommendation of a Professional Standards Board for 7401(1) appointees or 7401(3) appointees, and approval by the appropriate authority. Competitive service employees must have completed the 1-year probationary period required in connection with their career-conditional or career appointment before they may be appointed to title 38, United States Code positions under the authority of these interchange agreements. However, the agreements do not preclude the appointment under 38 U.S.C. 7401(1) or 7401(3) of qualified competitive service employees at any time, outside the terms of these agreements, using appropriate procedures specified in part II, chapter 3, this handbook.

[ ]

d. **PAID Instructions.** SF 52, Request for Personnel Action, for conversions under the interchange agreements, will be prepared in accordance with instructions in VA Manual MP-6, part V, supplement No. 1.5.
APPENDIX E. MERIT PROMOTION PLAN FOR COMPETITIVE POSITIONS CENTRALIZED TO THE SECRETARY

1. SCOPE

   a. This section contains the merit promotion plan for all competitive service positions centralized to the Secretary except for those positions in the Secretary's office below grade GS-15 which are covered by Central Office promotion plans. This section also includes those positions specifically designed to train or develop employees for placement into such positions. There may be instances, when simultaneous consideration for promotion or for assignment to positions with higher known promotion potential of certain excepted service employees (e.g., Schedule A, title 38, etc.) is desirable. When such concurrent consideration occurs, the same rating and ranking criteria will apply to both types of appointees. (For Senior Executive Service positions, refer to VA Directive and Handbook 5027.)

   b. The procedures of this plan apply to the following actions:

      (1) Promotion;

      (2) Reassignment or change-to-lower grade to a position with greater known promotion potential than the current position (except as permitted by reduction-in-force regulations);

      (3) Selection for training which is part of an authorized training program or required before an employee may be considered for a promotion;

      (4) Transfer of an employee from another Federal agency to a higher grade VA position, or to a VA position with higher known promotion potential than his/her current position;

      (5) Reinstatement, including those made from reemployment priority lists, to a permanent or temporary position at a higher grade than the last grade held in a non-temporary position in the competitive service, or to a position with higher known promotion potential than the last non-temporary competitive service position held;

      (6) Selection for details of more than 120 days to a higher grade position or a position with higher known promotion potential (5 CFR 335.103(c)(ii), and chapter 3 of this part);

      (7) Temporary promotion for more than 120 days (all prior service by detail to higher grade and by temporary promotion, whether competitive or noncompetitive, during the preceding 12 months is to be counted toward the 120-day time limit);

      (8) Promotion resulting from a position being upgraded due to the addition of duties and responsibilities; when a career promotion is determined not to be appropriate. (See paragraph 11 of this appendix for a discussion of career promotions under these circumstances.)
c. This merit promotion plan applies to the actions specified in subparagraph b above. Management retains the right to fill positions by any appropriate recruitment method, such as reassignment, appointment, promotion, transfer, reemployment, reinstatement or change-to-lower grade. The decision as to which method(s) to use (singly, in any sequence, or concurrently in any combination, or to change at any time from one method to another) will be made by management for each vacancy. Management also retains the right to determine the number of positions to be filled and the grade levels at which positions will be announced or filled.

2. REFERENCES

a. VA Handbook 5005

3. POLICY

a. Selections under the competitive procedures of this plan will be made from among the best qualified candidates available.

b. All actions under this plan will be based on job-related selection criteria and will be made without discrimination for such reasons as race, color, religion, national origin, sex, lawful political affiliation, marital status, non-disqualifying physical or mental handicap, age, or membership or non-membership in a labor organization.

c. It is the policy of the Secretary to identify, develop and advance employees who demonstrate the potential to assume positions of increased responsibility. However, the Secretary recognizes the need to assimilate high quality talent which may become available from other sources and the need to meet the goals of the Federal Equal Opportunity Recruitment Program. Thus, persons outside VA may be considered and selected for positions covered by this plan when a determination is made that the best interests of VA will be served.

d. Officials at any level who are involved in the promotion process will not commit acts of personal favoritism, nepotism, unlawful reprisal, or any other practice which violates merit system principles as described in VA Directive 5005. Actions taken under this plan will conform to requirements governing employment of relatives (5 CFR, part 310 and VA Directive and Handbook 5025, Legal).

e. Employees will not be denied a position change covered by this plan by reason of difficulty in replacing them.

4. RESPONSIBILITIES

a. All staff and line officials who participate in the identification, evaluation, ranking, referral, and selection of candidates will become familiar with the provisions of this section, and will strive not only to comply with its literal provisions but also to achieve its objectives.

III-E-2
b. The Secretary retains the authority to make final selections for positions under this plan.

c. Appropriate Central Office officials are responsible for ensuring the completion of the job analyses for positions covered by this plan in a timely manner.

d. Management officials are responsible for nominating candidates for the approval of the Secretary in accordance with the provisions of this plan and the procedures for submitting nominations of candidates for the Secretary's approval contained in Central Office Operating Instructions, OI-1 part V, chapter 6.

e. Top management officials at facility and Central Office levels are responsible for providing guidance and counseling to employees about development and career advancement. This is an important responsibility and challenge for all line and staff officials.

f. Employees who expect to advance their careers must apply themselves diligently, produce qualitative results, and recognize that preparation for more responsible assignments is to a large degree a matter of self-development. Employees who desire consideration for specific announcements are responsible for furnishing accurate information reflecting their pertinent qualifications.

g. Employees on official absence for an extended period who desire consideration for centralized vacancies advertised in their absence are responsible for: (1) identifying such positions by titles (organizational/classification), series, grade and geographic location on a written request submitted directly by employees, or given to their supervisor if they wish their names to be submitted for them; and (2) timely submission to the appropriate office of their application and/or other background information required for consideration. Official absence includes detail, leave, training, military service with restoration rights, absence due to compensable injury, Intergovernmental Personal Act assignments, etc. (See chapter 3 of this part.)

h. Supervisors are responsible for the timely submission of the names of employees from whom they have received written requests in accordance with subparagraph g above.

5. AREA OF PROMOTION CONSIDERATION

a. Normally, the area of promotion consideration for the positions covered by this plan will be VA-wide.

b. If determined necessary by the appropriate Administration Head, Assistant Secretary or Other Key Official (e.g., General Counsel) for substantive reasons comparable to those cited in chapter 3, paragraph 7c of this part, the area of promotion consideration for individual centralized vacancies may be smaller than VA-wide. Reasons for restricting the area of consideration will be documented and submitted with the nomination records for approval by the Secretary.

6. QUALIFICATION AND ELIGIBILITY REQUIREMENTS

a. To be promoted, candidates must meet the minimum qualification requirements established for the position by VA or the Office of Personnel Management (OPM’s Operating Manual – Qualification Standards for General Schedule Positions), including any selective placement factors (see paragraph 6b
below), as well as any applicable statutory and regulatory requirements such as those covering time-in-grade.

b. When there are special placement factors which are not adequately covered by the minimum qualification standard and which were identified by a job analysis as essential to successful performance in the position to be filled, they become selective placement factors and, as such, constitute a part of the minimum requirements for the particular position. Licensure, registration, certification or organization membership which is not required by the appropriate qualification standard will not be used as selective placement factors.

c. Written tests will not be used in evaluating the qualifications of any applicant unless required by the OPM or approved for use by the Director, [Recruitment and Placement Policy] Service (05[9]).

7. LOCATING CANDIDATES. Specific information for candidates on application procedures will be contained in VA-wide publicity. Candidates may be located by several different methods. Normally, vacancies will be publicized individually by announcements issued in the Weekly Summary Bulletin. Other sources of candidates may include reinstatement eligibles and employees from other agencies. Information regarding other methods for locating candidates, when used, will be communicated through appropriate channels.

8. EVALUATION AND RANKING PROCEDURES

a. Evaluation procedures will meet the requirements of 5 CFR, part 335. See chapter 3 of this part and appendix III-G and III-I. Evaluation criteria used to rate candidates will be expressed in a crediting plan[assessment questionnaire] resulting from a job analysis of the position, or class of positions, to be filled.

b. When there are 10 or fewer qualified promotion candidates, they may be referred to the selecting official for final consideration without rating or ranking. Before making a selection, however, the best qualified candidates must be identified. The provisions of chapter 3, paragraph 11 of this part must be adhered to.

c. An HRM Office representative will conduct the job analysis using available informational material on the position(s), normally with the assistance of a panel, which will usually consist of at least two subject matter experts (SMEs). [(NOTE: The panel of experts may meet electronically or respond individually with comments and suggestions.)] In those few instances in which appropriate SME participation cannot be obtained, the circumstances will be documented as part of the background records for the crediting plan[assessment questionnaire]. SMEs are persons with direct knowledge of what is done in the job, what KSAOs are required to perform the job, and the general background of persons who are able to do the job successfully. This may include those currently doing the job, recent incumbents, those who supervise or have recently supervised others doing the job, and other acknowledged job experts. SMEs must be (or have been) at least equal in grade to the position being analyzed, or equal to the highest grade if a class of positions is being analyzed. Assignment of SMEs for positions within their organization will be determined by the appropriate Administration Head, Assistant Secretary or Other Key Official.
d. The crediting plan/assessment questionnaire will consist of several rating factors on which applicants are evaluated to distinguish superior or high quality candidates from acceptable ones. The rating factors will consist of knowledge, skills, abilities, and other characteristics (KSAOs) which: (1) are relevant to successful performance upon entry into the job; (2) are measurable; and (3) are observable.

**NOTE:** See paragraph 8k(2) below for guidance on the term "high quality."

e. Unless dictated otherwise by the results of the job analysis, the rating factors will be supported by three quality level descriptions. These quality levels will further define the rating factor by giving concrete examples of various proficiency levels in terms of observable behaviors, past experiences, quality of performance, pertinent education and training, etc. Point credit for each rating factor will be awarded as follows:

- Level A (Superior) 5 Points
- Level B (Average) 3 Points
- Level C (Acceptable) 1 Point

However, the above [5-3-1] crediting system does not preclude the weighting of certain rating factors when justified by the job analysis (or other pertinent job-related information), or crediting four (4) points or two (2) points when the promotion panel determines that a candidate falls between two (2) levels on a particular rating factor. **[NOTE: In the assessment questionnaire in USA Staffing, levels of expertise are identified for KSA criteria, ranging in points from the lowest rating to points for the highest rating. Other scales may be used for qualifications, eligibility, and screen-out factors.]**

f. Rating factors or quality level descriptions will not prescribe point credit based on a certain number of points or a certain percentage of points for each source of information, such as supervisory appraisal, experience, education, training, awards, etc. Rating factors or quality level descriptions will not refer to length of service, length of education, licensure, registration, certification or organization membership, unless the job analysis and accompanying documentation show the item to be a valid, job-related factor which enhances a candidate's ability to perform the duties of the job to be filled.

g. Crediting plans/assessment questionnaires will be periodically reviewed for both (1) currency of the tasks and KSAOs and (2) effectiveness in distinguishing superior or high quality candidates from acceptable ones for the subject positions. If necessary, based on such job-related review and any needed supplemental SME information, officials of the Central Office Human Resources Service (035) and the appropriate Administration Head, Assistant Secretary or Other Key Official may revise the crediting plans/assessment questionnaires accordingly for future application to better achieve the above two objectives.

h. [Provisions of Part III, Chapter 3, paragraph 10 will be followed when rating and ranking applicants for referral.]
i. A member of the Central Office Human Resources Service will be available to provide technical
guidance and assistance to each promotion panel or may participate in the rating process.

j. All present at promotion panel meetings are prohibited from revealing information of a confidential
or personal nature about any candidate which may be gained during the deliberation process, and may be
subject to disciplinary action if such information is improperly divulged.

k. Candidates will be evaluated on the extent to which their experience, education, appraisals, training,
awards, and outside activities taken as a whole show possession of the KSAOs in the rating factors used.
Ratings will be based on all relevant information which a candidate has submitted, and when appropriate,
such other tools as job-related interviews, reference checks, and work samples. This combined
information will be evaluated against the quality level descriptions for each of the rating factors used.
Each candidate's total point credit will be the sum of points awarded for each of the rating factors. Since
the number of rating factors used for different jobs may vary, the maximum possible points which may be
credited may vary from job to job.

(1) After all candidates have been assigned points under the crediting plan, they will be listed in
descending order of their point scores. The promotion panel will establish a "cut-score" in accordance
with the following paragraphs to identify the best qualified candidates for referral to the selecting official
for final consideration. The cut-score will not be set arbitrarily at a particular point score or at a particular
percentage of the total possible points. An overall objective of applying the crediting plan and establishing
the cut-score is to enable high quality candidates to be identified and referred for selection consideration.
Technical guidance will be provided by a representative of the Central Office Human Resources Service.

(2) For the purposes of this plan, high quality candidates are those who in the promotion panel's
judgment possess a total background which reflects the capability to perform the position being filled in a
highly competent and effective manner. A pre-set numerical score to uniformly indicate high quality
candidates is not proper as this does not allow for the relevant differences among positions and available
candidates. Nonetheless, it is generally anticipated that high quality candidates will possess the KSAOs
required for positions sufficiently to warrant a middle range of total possible points, or higher, under an
appropriate crediting plan.

(3) When a natural gap among the high quality candidates is present, those above the gap will
normally be considered best qualified. However, an adequate number of promotion candidates, if
available, should be referred for consideration.

(4) When there is no natural gap or when the number of candidates above the natural gap is so large as
to cause an undue administrative burden, the promotion panel will decide the number of high quality
candidates to be referred as best qualified. Generally, a referral of 10 candidates will be considered
sufficient; for each additional vacancy an additional candidate may be referred.

(5) In the absence of any high quality candidates, candidates ranked as qualified may be referred as
best qualified in accordance with the principles in paragraphs (3) or (4) above.
9. REFERRAL AND SELECTION PROCEDURES

   a. Following completion of the rating and ranking process, or as vacancies occur, a [ ] certificate containing the names of the best qualified VA candidates (listed in alphabetical order) will be prepared.

       (1) If transfer and/or reinstatement eligibles and/or certain excepted service employees are being considered for higher grade positions, or for positions with higher known potential, they will be evaluated and ranked along with competing competitive service VA employees to determine the cut-score. After the cut-score has been established, those who rank at or above the cut-score will be referred on [the same certificate].

       (2) If a position is announced at multiple grade levels, separate certificates will be referred for each grade level.

   b. The signed certificates will be forwarded to the nominating official. [(In USA Staffing recruitment actions, referrals are transmitted electronically and final selections are made electronically via the USA Staffing document viewer.)] This official will recommend a selection to the Secretary in accordance with procedures in Central Office Operating Instructions, OI-1, part V, chapter 6. When nominating a candidate who must relocate to accept an assignment, information should be provided regarding cost considerations. Additionally, if the candidate has been in his or her current VA assignment less than 36 months, a justification of the move will be included.

   c. Until selections for positions centralized to the Secretary have been approved by the Secretary, candidates nominated for these positions should not be informed of their nominations, and no personnel action will be taken.

   d. The Secretary has the right to select or non-select from a [ ] certificate or from any other appropriate source of candidates. This includes the right to non-select all the [ ] candidates and return the [ ] certificate unused. Where multiple vacancies or multiple grade levels are involved, this includes the right to select for one or more vacancies at the same or other grade levels (if applicable) and to return the certificates without selecting for remaining vacancies.

   e. The Secretary's final approval will be communicated by the appropriate Administration Head, Assistant Secretary or Other Key Official.

10. EFFECTIVE DATES. Employees will be released to their new assignments within a reasonable length of time.

   a. Normally, the effective date of a position change at the same facility will be the first day of the next pay period after the date of administrative approval. Where unusual circumstances justify a period longer than 2 weeks prior to release, either (1) the employee should be informed in writing over the signature of the official responsible for the delay of the reasons for the delay and the expected release date, or (2) the position change action should be effected and the employee detailed back to the former position.
b. The release date for an employee transferring to another VA facility will be arranged by the responsible officials. Unless circumstances dictate otherwise or both the releasing and receiving facilities otherwise agree, travel time will be accomplished on the receiving facility's time.

11. EXCEPTIONS TO COMPETITIVE PROMOTION PROCEDURES. The following actions are exceptions to the competitive promotion procedures of this plan:

   a. Career promotions (see paragraph 12 below);

   b. Promotion after failure to receive proper consideration;

   c. Position change from a position having known promotion potential to a position having no higher known potential (see paragraph 12d, below);

   d. Position changes in reduction-in-force situations: (1) which are technically promotions due to pay fixing policies, or (2) which result in placement in positions having higher known promotion potential due to exercise of RIF assignment rights;

   e. Selection of a Federal employee who is within reach on an OPM register for a higher graded position;

   f. Repromotion to grades from which demoted without personal cause;

   g. Repromotion to grades held prior to initial entry by demotion into supervisory or managerial positions when return to the former grade is required because of failure to complete the supervisory/managerial probationary period;

   h. Temporary promotions for 120 days or less;

   i. Details to higher grades or positions with higher known promotion potential for 120 days or less;

   j. Selections for training which may significantly enhance chances for future promotion but which is not required for promotion.

12. CAREER PROMOTIONS

   a. Career promotions are those made without current competition when the employee was previously appointed to, or selected through earlier competitive promotion procedures for an assignment which was intended to prepare the person for progression to the target grade level (career-ladder), or the position is reclassified at a higher grade level because of additional duties and responsibilities. Career promotions under this plan include career-ladder promotions involving movements between VA facilities.

   b. Career-ladder promotions may be made only when the intent has been made a matter of record prior to the initial selection and all potential candidates informed. Career-ladder promotions, such as the following, are included among covered career promotion opportunities:
(1) Trainee or developmental positions;

(2) Understudy positions;

(3) Positions filled at a grade below the established or anticipated grade;

(4) Positions filled under a training agreement which provides for career-ladder promotions;

(5) Positions filled after employees were detailed to them, provided initial selection for detail was under a competitive action which provided for future promotion;

(6) Positions filled by permanent promotion of employees who were temporarily promoted to them, provided initial selection for temporary promotion was under a competitive action which provided for permanent promotion.

c. Where employees appointed under special appointment authorities have been properly converted to career-conditional (or career, if applicable) appointments to positions covered by this plan which have known promotion potential, career-ladder promotions may be made to the target grade level of the position.

d. Upgrading without significant change in duties and responsibilities due to the issuance of a new or revised classification standard or the correction of an earlier classification error is a career promotion.

e. Employees whose positions are reclassified at a higher grade because of additional duties and responsibilities where the basic function of the original position continues to be a part of the new one, may be promoted without competition, but are subject to the following considerations:

(1) The prohibited personnel practices contained in law preclude the granting of preference or advantage, not authorized by law, rule or regulation, to improve or injure the prospects of any person. Managers, supervisors, selecting officials and Human Resources Management officials are responsible for ensuring that actions resulting in a promotion because of additional duties and responsibilities are not the result of a prohibited practice.

(2) In making decisions regarding the appropriateness of such a career promotion, managers, supervisors, selecting officials and Human Resources Management officials should be guided by the examples of circumstances which would warrant such a promotion discussed in chapter 3, paragraph 12d(3) of this part.

13. ALTERNATIVE RATING AND RANKING PROCEDURES. When approved by the Director, [Recruitment and Placement Policy] Service (05[9]), alternative rating and ranking procedures may be developed on an experimental basis and utilized to determine the appropriateness of the basic procedure required under this plan.
14. KEEPING EMPLOYEES INFORMED

a. While movement among the several specific career fields is possible, a typical career path closely follows a particular career field. Career counseling is available to employees and may be sought at any time. (See paragraph 4e of this merit promotion plan.)

b. Copies of this plan will be posted at each VA facility. In addition, a copy of this plan will be made available on an employee's request.

c. Each candidate who individually applies to indicate interest in and availability for a particular position will be subsequently notified of the action taken by the Central Office Human Resources Service.

d. Selections made under this plan will be publicized at least quarterly by the Central Office Human Resources Service.

e. Employees who apply for and inquire about the results of a specific promotion action will be given the following information:

(1) By the Central Office Human Resources Service:

(a) Whether they met the minimum qualification requirements;

(b) Whether they were in the group from which selection was made;

(c) Who was selected; and

(2) By the appropriate Administration Head, Assistant Secretary or Other Key Official or their designee, upon request, in what areas, if any, they should improve to increase their chances for future promotion.

f. Upon request, employees will be shown any record of production, or any supervisory appraisal of past performance which has been used in considering them for promotion. An employee is not entitled to see the records of another employee unless they are the selecting official, a member of the promotion panel, or otherwise performing official duties which involve reviewing records of that specific promotion file, or he/she has the written consent of the subject of the record.

15. GRIEVANCES / DISCRIMINATION / COMPLAINTS

a. Failure to be selected for promotion from a properly constructed [ ] certificate (nonselection from a group of properly certified candidates) is not a basis for formal grievance, nor is dissatisfaction concerning the number of positions to be filled, or the grade level at which positions are advertised or filled. Grievances will be processed under the provisions of the VA grievance procedure contained in VA Handbook 5021, Employee/Management Relations.
b. Any complaints that action(s) taken under this plan were based on the non-merit factors of race, color, religion, sex, national origin, age or disability, will be processed under the provisions of 29 CFR § 1614.
APPENDIX F.  PRIORITY PLACEMENT PROGRAM
FOR EMPLOYEES IN RETAINED GRADE OR PAY STATUS

1. PURPOSE. Revises and updates the Priority Placement Program for VA employees entitled to grade or pay retention benefits. The program anticipates positive action by management to place employees in properly classified positions and provides a system for first consideration of these employees for General Schedule or Federal Wage System positions equal to their retained grade or pay, or any intervening grade, in an area of sufficient size to ensure reasonable opportunity for placement of most affected employees.

2. SCOPE. The following provisions apply to employees under or moving into positions under the General Schedule and the Federal Wage System, including Nonappropriated Fund employees in the Veterans Canteen Service (VCS) who are subject to the Federal Wage System.

3. EXCLUSIONS

   a. Veterans Health Administration employees appointed or compensated under 38 U.S.C. ch. 73 or 74.

   b. Employees compensated under the Executive Schedule (5 U.S.C. ch. 53).

   c. Employees in the Senior Executive Service (5 U.S.C. ch. 21).

   d. Nonappropriated Fund VCS employees appointed under 38 U.S.C. 7802(5), except those employed in a recognized trade or craft, as indicated in paragraph 2 above.

   NOTE: All Nonappropriated Fund VCS employees moving into positions covered by paragraph 2 are covered provided they meet the criteria for grade and pay retention benefits contained in 5 CFR, part 536.

   e. Purchase and hire employees appointed under Schedule A, section 213.3127(a)(1).

   f. Employees whose appointments have a definite time limitation or are designated as temporary or term.

4. REFERENCES

   a. 5 U.S.C., chapter 53, subchapter VI, Grade and Pay Retention.

   b. 5 CFR, part 536.

5. POLICY. Every effort will be made to place employees receiving grade or pay retention benefits in positions or grade levels equal to their retained grade or pay, as appropriate. Participation in the Priority Placement Program is voluntary for those employees whose eligibility for grade retention is based on a reclassification or as the result of a reduction in force (5 CFR 536.103(a)). Participation in the program is mandatory for those employees whose eligibility for grade retention is based on actions other than reclassification and reduction in force pursuant to 5 CFR 536.103(b). In applying the provisions of this program, effort will be made to assure to the maximum extent possible that affirmative action goals are
not adversely affected. Each VA facility will adopt local procedures which will assure that the Priority Placement Program is carried out in a timely and systematic manner.

6. RESPONSIBILITIES

   a. Administration and staff office heads or their designees shall apply the provisions of this appendix to centralized positions and to employees within their immediate jurisdiction.

   b. Facility directors and HRM Officers shall apply the provisions of this appendix to positions and employees at their installations. Directors are also to assure that the Priority Placement Program procedures at the local level are reviewed annually.

   c. Supervisors and others responsible for assigning duties and responsibilities to positions are directly responsible for application of the Priority Placement Program within their immediate jurisdiction.

7. EVALUATION. Records concerning the implementation and application of the Priority Placement Program will be maintained and are subject to review by VA and Office of Personnel Management (OPM) officials conducting personnel management evaluations, as well as other VA Central Office officials visiting field facilities. Necessary corrective actions may be directed by VA Central Office or OPM.

8. ELIGIBILITY. The following employees in retained grade or pay status are eligible for consideration under the provisions of this Priority Placement Program:

   a. Those who are in such status as a result of a reduction-in-force action and those who are in pay retention status as a result of a demotion in lieu of a reduction in force.

   b. Those who are in such status as a result of a reclassification action.

   c. Those who are in such status because of a declination to transfer with their function, provided the provisions of 5 CFR 536.103 are fully met.

   d. Those who are in such status because of acceptance of a position with grade retention in lieu of transferring with their function, provided the provisions of 5 CFR 536.103 are fully met.

9. PRIORITY PLACEMENT PROGRAM

   a. Subject to the exceptions listed in paragraph 11 below, eligible employees will receive first consideration for vacancies in the manner described in this paragraph. Employees must meet all qualification standards and legal and regulatory requirements for positions for which they are considered. Qualifications for eligible employees will be evaluated in accordance with 5 CFR 337.102.

NOTE: For the remainder of this appendix, “eligible employee(s)” and “employee(s)” refer to employees whose eligibility for grade retention is based on 5 CFR 536.103(a) and who wish to take part in this program and employees whose eligibility for grade retention is based on 5 CFR 536.103(b).
b. First consideration means that eligible employees must be referred (certified separately) and fully considered for an appropriate vacancy before recruitment action is initiated to fill the vacancy by any other method. If there are qualified persons on a reemployment priority list, a selection may be made either from among qualified employees eligible under the Priority Placement Program or from among qualified persons on the reemployment priority list. Employees eligible for first consideration under the Priority Placement Program will be referred prior to individuals eligible for placement in lieu of disability retirement.

c. Written notice of eligibility for grade and/or pay retention which includes the requirements of the Priority Placement Program is to be issued to affected individuals at least ten workdays prior to the effective date of a proposed action which would entitle the individual to grade or pay retention benefits. Employees whose eligibility for grade retention is not based on a reclassification or as the result of a reduction in force (i.e., their eligibility for grade retention is based on 5 CFR 536.103(b)) will be informed that failure to enroll in or comply with the requirements of the Priority Placement Program will result in loss of eligibility for grade retention. The employee may appeal such termination of benefits through the VA grievance procedure or through the negotiated grievance procedure, as appropriate. All eligible employees will designate five position categories (broken down by classification title and series) for which they qualify. Employees who do not qualify for five position categories will designate the position categories for which they do qualify.

d. Eligible employees in retained grade status (including those in Alaska, Hawaii, Puerto Rico and Manila) who occupy noncentralized positions will receive first consideration for vacancies in their designated position categories, equal to their retained grade or any intervening grade between the retained grade and the grade to which reduced, on the following basis:

1. All eligible employees will receive first consideration for all appropriate positions (including centralized positions) at their current duty station.

2. Eligible employees whose retained grade or whose grade from which demoted is GS-11 or above will receive first consideration for all appropriate positions (including centralized positions) at any VA facility, within the 48 contiguous States, for which they request referral. No employee, however, is entitled to first consideration at a facility in Alaska, Hawaii, Puerto Rico or Manila unless presently an employee at one of these facilities.

3. All eligible Federal Wage System employees and all eligible employees whose retained grade or grade from which demoted is below GS-11 will receive first consideration for all appropriate positions (including centralized positions) at all VA facilities within the commuting area of their current duty facility. In cases where the number of VA facilities within the commuting area is below five, employees may request referral to the VA facilities closest to their current duty station. The total number of VA facilities, other than the current duty facility, to which an employee receives referral is limited to five (including facilities within and outside the commuting area, if applicable). For this purpose, facilities serviced by the same HRM office will count as one facility. (See subparagraphs h and i below for referral requirements.)
e. Eligible employees who are in retained grade status as a result of an action taken while occupying a centralized position will receive first consideration for vacancies in their designated position categories equal to their retained grade or any intervening grade between the retained grade and the grade to which reduced, on the following basis:

1. All eligible centralized employees will receive first consideration for all appropriate centralized positions in their designated position categories on a department-wide basis, if centralized to the Secretary, or on a staff office or administration-wide basis, if centralized to a staff office or Administration Head.

2. All eligible centralized employees will receive first consideration for all appropriate noncentralized positions in their designated position categories at their current duty station and at all facilities for which they request referral through their HRM office.

NOTE: See chapter 2 of this part; 5 CFR 335.102; VA Handbook 5021; and Comberiate v. The United States, 203 Ct. Cl. 285, (1973), for guidance in applying these requirements to eligible employees who are in retained grade status as a result of an action taken while occupying a centralized position.

f. Eligible centralized and noncentralized employees in retained pay status will receive first consideration for repromotion to all vacant positions, equal in grade to the position from which they were demoted, or to any intervening grade, on the same basis (as outlined in subparagraphs d and e above) as employees in retained grade status. Employees repromoted to their retained grade will be placed in the step to which they would have been entitled had they remained in that grade and not been demoted. The step rate for employees on retained pay, who are repromoted to an intervening grade or their former grade, shall be set in accordance with VA Handbook 5007, Pay Administration.

g. After 2 years of eligibility under the provisions of the Priority Placement Program, noncentralized employees will be eligible for first consideration only at their current duty station; centralized employees will continue to be eligible for first consideration on an agency, administration or staff office basis as long as they are on retained pay status.

h. Position category designations must be made in writing by the employee and be received by the HRM Officer or designee at the employee's current duty station no later than the effective date of the proposed action entitling the employee to priority placement. In situations where it is determined that an employee cannot make the required designations by the effective date of the proposed action (e.g., in cases of hospitalization, military reserve or National Guard training, etc.) facility directors or designees (in Central Office, the second-line supervisor) may authorize an extension to this time limit. The HRM Officer or designee will make an initial qualification determination within 15 workdays of receipt of position designations from the employee. An employee who is found not eligible for a chosen position category may choose another category as a substitute. Once the position categories for which the employee is eligible have been designated, these are the only position categories for which the employee may be considered at any facility under the Priority Placement Program. HRM Officers will forward the choices of position categories for centralized employees through channels to the appropriate Central Office administration or staff office head.
i. Eligible noncentralized employees who want to be considered for appropriate positions (both centralized and noncentralized) at other VA facilities, and centralized employees who want to be considered for appropriate noncentralized positions at other VA facilities, must apply through the HRM office at their current duty station. Employees will not apply directly to another facility on their own. HRM Officers will be responsible for maintaining a record of the facilities for which each employee has applied and for forwarding applications to the facilities the employee selects or to the facilities where the employee is to receive consideration, as applicable. When forwarding applications, the HRM Officer will identify the applicant as an employee who is eligible for consideration under the Priority Placement Program. Facilities which receive these applications will consider them, along with local priority placement eligibles, in accordance with the provisions of this program. No employee is entitled to receive consideration, under the provisions of this program, for vacancies for which recruitment action has already been initiated at the time the HRM office (or appropriate official, in the case of Central Office) at the recruiting facility is notified of the employee's enrollment in the Priority Placement Program. A local log should be maintained which identifies employees eligible for priority placement consideration. The log will help assure priority placement consideration of eligible employees, assist in recovering information concerning priority placement actions and facilitate the evaluation of the Priority Placement Program by Central Office officials.

j. As indicated in subparagraph d above, noncentralized employees may receive first consideration for appropriate centralized positions at their current duty station, at other VA facilities within the commuting area, and at other VA facilities for which they request referral in accordance with the provisions contained in subparagraph d above, as applicable. In such cases, the HRM office at the receiving facility will not notify appropriate Central Office officials of the employee's interest until such time as an appropriate centralized vacancy occurs. When such a vacancy occurs, the HRM office will notify the appropriate staff office or Administration Head of the employee's interest and eligibility at the same time Central Office recruitment action is requested, and will forward a copy of the employee's application to the appropriate Central Office official.

k. Generally, an employee will not receive first consideration for vacant positions at the same grade level to which demoted (e.g., an employee demoted from GS-11 to a GS-9 continuing position is not entitled to first consideration for another GS-9 position). However, if a vacancy occurs at the same grade as that to which the employee is demoted and this vacancy has promotion potential back to the retained grade or the grade from which a retained pay employee was demoted or to an intervening grade level, the employee is entitled to first consideration for such a position. An employee is not entitled to first consideration for vacant positions which have promotion potential to a grade that is higher than an employee's retained grade or the grade from which a retained pay employee was demoted. An employee must compete under regular merit promotion procedures for these positions.

l. Once an employee accepts or declines an offer to an intervening grade, the employee is no longer entitled to first consideration for positions at the same or lower grade level (e.g., an employee demoted from GS-11 to a GS-9 position accepts or declines an offer to a GS-10 position. The employee is no longer entitled to first consideration for any position at or below the GS-10 level). However, the employee does continue to receive consideration for positions at higher grade levels for which eligible under this program. As outlined in subparagraph k above, the employee will also receive first consideration for positions with promotion potential back to the retained grade or to an intervening grade.
m. Travel, transportation and other moving expenses will be paid for all employees selected under this program in accordance with the provisions of MP-1, part II, chapter 2. In the case of employees moving to centralized positions, expenses will be paid by the receiving facility. In the case of employees moving to noncentralized positions, expenses will be paid by the losing facility.

n. When an eligible employee receives first consideration under any of the circumstances described in this paragraph and is not selected, the reasons for the nonselection must be justified and documented. Such documentation must be approved by the Secretary or administration or staff office head, as appropriate, for employees considered for centralized positions or by the field facility Director (in Central Office, the second-line supervisor) for employees considered for noncentralized positions. In the Veterans Health Administration, such documentation must be approved by the Assistant Deputy Under Secretary for Health for those positions for which the Veterans Integrated Service Network (VISN) Directors have selecting authority.

o. All eligible employees will be referred in situations where more than one eligible employee is available for consideration for a vacancy. Local employees entitled to first consideration may be considered for noncentralized positions before those from other facilities.

p. If facility directors (in Central Office, second-line supervisors) determine that placement opportunities for a noncentralized employee under their jurisdiction are nonexistent or very limited, they should authorize special training or a developmental assignment which will help the employee qualify for other positions. The Secretary or Administration or Staff Office Head, as appropriate, should make such determinations and authorizations for centralized employees.

10. TERMINATION OF ELIGIBILITY

a. An employee is no longer eligible for consideration under this Priority Placement Program when:

   (1) The employee's position is reclassified at or above the retained grade or the grade from which the employee was demoted.

   (2) The employee is reassigned or promoted to a position equal to or higher than the employee's retained grade or the grade from which a retained pay employee was demoted. If such a placement is in a different pay schedule, a comparison of representative rates will be made to determine if the employee has been placed in an equal or higher grade.

   (3) The employee's grade and/or pay retention benefits are terminated for any reason.

   (4) The employee declines a reasonable offer to a continuing position made in accordance with the provisions of the Priority Placement Program.

b. For the purpose of this program, a position offer must fulfill the following conditions in order to be considered a reasonable offer:
(1) The offer must be in writing, and must include an official position description of the offered position;

(2) The offer must inform the employee that an entitlement to grade or pay retention will be terminated if the offer is declined and that the employee may appeal the reasonableness of the offer as provided in 5 CFR 536.302;

(3) The offered position must be equal in grade to the employee's retained grade or the grade from which the employee was demoted;

(4) The offered position must be of tenure equal to or greater than that of the position creating the grade or pay retention entitlement;

(5) The offered position must be full time, unless the employee's position immediately before the change creating entitlement to grade or pay retention was less than full time, in which case the offered position must have a work schedule of no less time than that of the position held before the change. (The work schedule of the offered position for part-time employees need not exactly match the work schedule previously held by the employee.) The offered position cannot have less hours scheduled than that of the position held before the change and the offered position cannot have a full-time schedule. (See part II, chapter 2 for hour limitations on part-time schedules.);

(6) In the case of employees in centralized positions, the offered position must be a centralized position unless the employee has requested concurrent consideration for noncentralized positions in accordance with paragraph 9e and f above. Declination of a placement offer to a centralized position or a designated noncentralized position, whichever is offered first, will result in the employee losing eligibility for consideration in the Priority Placement Program;

(7) In the case of employees in noncentralized positions, the offered position (including an offer of a centralized position if the employee requests consideration for centralized positions) must be in the same commuting area as the employee's current position. If an employee declines an offer from a facility outside the commuting area of his or her current duty station to which he or she has requested referral for first consideration, the employee will be removed from consideration under this program at all facilities other than those within the commuting area of his or her own facility; and

(8) An employee who declines an offer of a position outside his or her designated position categories has not received a "reasonable offer" for purposes of the Priority Placement Program.

c. Entitlement of priority placement consideration will be established as the effective date of the action which entitles the employee to grade or pay retention benefits. (For effect of subsequent wage increases on representative rates, see 5 CFR, part 536).

11. EXCEPTIONS. The following personnel actions are excepted from the requirements of this program:

a. Actions required to comply with regulatory or statutory provisions such as those covering reemployment rights;
b. Career promotions and promotions which are exceptions to competitive promotion procedures;

c. Consideration of candidates not given proper consideration in a competitive promotion action;

d. Consideration of employees previously demoted without personal cause and not at their own request (special consideration);

e. Filling of vacancies as a result of a decision in a discrimination complaint case or of any other legal or procedural ruling; or

f. Filling of vacancies which a facility may wish to fill in order to minimize the impact of a reduction in force.
APPENDIX G. DEVELOPMENT OF RATING AND RANKING PROCEDURES

1. PURPOSE. This appendix is designed to provide assistance in developing merit promotion rating and ranking procedures which meet the criteria established by the Office of Personnel Management, the Uniform Guidelines on Employee Selection Procedures, and the courts. This appendix is not intended to provide complete information on validity studies and the development of valid selection procedures. It should be supplemented by formal training and by reading current professional human resources literature.

2. PRINCIPLES OF CONTENT VALIDITY

a. Three types of validity studies for demonstrating the job-relatedness of a selection procedure have been defined by Federal equal employment opportunity enforcement agencies, professional organizations, and the courts. They are criterion-related, content, and construct validity studies. These types of validity studies are described in the Uniform Guidelines on Employee Selection Procedures. Because the content validity approach is the most practical option currently open to most employers, all VA selection procedures must meet content validity standards.

b. Basically, the degree of content validity depends on how well and how consistently the selection procedure measures each applicant's ability to do the job. This means each applicant must be evaluated on the knowledges, skills, abilities and other characteristics (KSAOs) which are required by the important duties or responsibilities of the job being filled. The steps required in the development of a content valid selection procedure are briefly outlined here and discussed in greater detail later in this appendix.

Step 1 - Conduct a job analysis. This is the important first step in developing a content valid selection procedure. The job must be thoroughly studied and analyzed to identify its important duties and tasks and to identify the KSAOs necessary for successful performance of those duties and tasks.

Step 2 - Decide which KSAOs will be used in predicting job success. For example, the importance of each KSAO, whether it can be measured, and whether it distinguishes between superior and barely acceptable applicants must be determined.

NOTE: A KSAO which can be learned during the first few months on the job usually should not be used as a factor in the selection procedures.

Step 3 - Develop a crediting plan which will measure the degree to which applicants possess the KSAOs identified in step 2. The sources and types of information which will be used in evaluating applicants on the KSAOs must be determined. Quality level examples must be established which define levels of competency in each KSAO in terms of observable tasks, activities and behaviors available in the sources and types of information to be used. A point crediting system based on these quality levels must be developed.

Step 4 - Review the adequacy of the final crediting plan. Are there any additional KSAOs which should be measured? Will the best qualified applicants be identified? Are only important KSAOs being measured? Can each KSAO be measured?
Step 5 - Measure each qualified applicant's capabilities against the crediting plan/assessment questionnaire.

c. Content validity can only be used when selection procedures measure directly observable KSAOs. When KSAOs are stated in terms of unobservable characteristics or personality traits, such as dependability or leadership ability, the selection procedure cannot be validated by means of a content validity study. Characteristics and personality traits, however, may often be broken down into directly observable behaviors which may be measured using a content valid selection procedure. For example, dependability might be demonstrated by the ability to complete work assignments within a specified timeframe, or leadership ability might be shown by the ability to delegate work assignments to subordinates. Content validity can then be used to demonstrate the job-relatedness of the selection procedures.

d. OPM requires that promotion procedures meet formal validation requirements. In the past, typically, separate point credit has been given for each of the various sources of information about applicants, such as experience (based on the application, personnel folder, etc.), supervisory evaluation, training, education, and awards. To have valid merit promotion selection procedures, rating and ranking methods which combine the information gathered from these various sources must be used to rate applicants on each KSAO which a job analysis has shown to be important to the job. Figure 1 provides a graphic comparison of past rating and ranking procedures and those procedures which should be used to meet requirements for validity and merit selection. [For USA Staffing, VA Forms 0938a, 0938b, and 0938c should be used to document input from subject matter experts that the crediting plan/assessment questionnaire content is valid.]

e. The following paragraphs of this appendix discuss in detail the steps which must be followed for devising proper content valid merit promotion crediting plans/assessment questionnaires. These procedures will require training of human resources staff, supervisors, subject matter experts and selecting officials. (See Figure 1[ below.])

3. DEFINITIONS

a. KSAO. An acronym standing for the words, "knowledge, skill, ability and other characteristic."

(1) Knowledge. A body of learned information used directly on the job.

(2) Skill. A present competence to perform a learned psychomotor act. A skill, unlike an ability, typically involves observable, quantifiable, and measurable performance parameters, (e.g., typing, pipefitting, etc.)

(3) Ability. The competence to perform an activity at the present time.

NOTE: Ability should not be confused with aptitude, which implies a likelihood of being able to learn to perform an activity.
(4) **Other Characteristics.** Other competencies required of individuals doing the job. Remember that for content validity purposes, personality traits or aptitudes must be directly observable and measurable. This may require further definition of the trait in terms of its directly observable manifestations (see paragraph 2c).
NOTE: While knowledges, skills, abilities and other characteristics are separately defined, they often overlap and can be combined into one evaluation factor. Many of these factors may contain elements of all four.

Under the old method, each source of information was considered individually, and points – the lines labeled “a” – were assigned. For example, in this type of system, 30 points may have been assigned to the supervisory evaluation, 25 points to experience, etc. In theory, the points assigned to each source of information were awarded based on an applicant’s capabilities to do the job (i.e., the KSAOs) as indicated by that source. Unfortunately, the theory was not always true in practice. Often irrelevant KSAOs were considered, a single KSAO strength would be credited several times, or an important job requirement not
evaluated. Under the new method the evaluation is based on the applicant’s capabilities on each KSAO required in the job. All available sources of information, in combination, are used to arrive at a score – the lines labeled “b” – on each KSAO, not by awarding points for each separate source and then totaling those points. The individual KSAO scores are then added to arrive at an estimation of an applicant’s capability to do the whole job.

b. Rating Factors. The KSAOs or groups of KSAOs identified in the job analysis and selected for use in the crediting plan (see paragraph 4e, this appendix).

c. Quality Levels. Examples of elements in the background of individuals which demonstrate the level of possession of a particular KSAO or rating factor. Many crediting plans show three quality levels for each rating factor. [In USA Staffing, each KSA is typically associated with task statements, and each task statement is measured using quality levels.]

d. Selection Procedure. Any measure or combination of measures used as a basis for an employment decision (e.g., hiring, promotion, demotion, selection for training if the training leads to an employment decision, etc.). Selection procedures include the full range of assessment methods such as written tests, qualification standards, scored and unscored application forms, crediting plans/assessment questionnaires, and formal and informal interviews.

e. Selective Factors. A KSAO or group of KSAOs identified in the job analysis as being critical to the job. Selective factors are used in addition to the appropriate qualification standard requirements to determine the basic qualifications of applicants. The minimum level of proficiency required to do the job must be described for each selective factor and applied in basic qualification determinations. The use of a KSAO as a selective factor does not preclude its use as a rating factor when it meets the criteria in paragraph 4e, this appendix.

f. Subject Matter Experts (SMEs). Person with direct knowledge of what is done in the job and what KSAOs are required to do the job successfully. Included may be recent incumbents who supervise others doing the job. For job analysis/crediting plan/assessment questionnaire development panels, one SME must be at least equal in grade to the job to be filled. Since the selecting official often has the most knowledge about the job, that person should ordinarily be included on the SME job analysis/crediting plan/assessment questionnaire development panel.

4. JOB ANALYSIS

a. General. The first step in developing a content valid selection procedure is the job analysis. The purpose of a job analysis for selection procedure development is to find out what is required of the person who does the job. The duties of the job and the capabilities an individual must have in order to do it are both objectives. In job analysis terminology, identify the tasks performed in the job and the KSAOs (knowledges, skills, abilities and other characteristics) a person must possess to do those tasks.

b. Approaches to Job Analysis. There are several approaches to analyzing jobs for the purpose of developing selection procedures: an entire class of positions which are common to a number of VA installations and which do not vary much from location to location can be analyzed; the analysis can focus on a group; or the analysis can zero in on a single job. In the group or class study, emphasis is on
gathering a broad base of job information from which KSAOs required in all the jobs in the group or class are derived. In the single job study, emphasis is on determining the KSAOs required in the specific position with less effort devoted to obtaining background information.

1. **Class Analysis.** A class of positions, such as Veterans [Claims Examiner] or [Nursing Assistant] which is common to a large number of VA installations can be centrally analyzed on a grade-by-grade basis and the results shared among VA users. Such class analyses will be done only under the direction of the Deputy Assistant Secretary for Human Resources Management and Labor Relations (059). Since no two jobs are exactly alike, there is a need to identify many more tasks and many more KSAOs than are likely to appear in any one position. As part of the class analysis, quality level examples are prepared for each KSAO. When an individual position is to be filled, responsible officials will decide which of the KSAOs identified in the class study are applicable to that particular job and whether there are any unidentified KSAOs unique to it. Using the predefined KSAOs and their corresponding quality levels (plus locally defined quality levels for KSAOs unique to that particular job, if any), a local rating and ranking procedure may be developed.

**NOTE:** The local job must be closely surveyed and the KSAOs carefully selected to ensure job relatedness. If an important KSAO required in the local job has not been identified in the class study, it must be defined, documented and developed locally, including quality level descriptions, inclusion in supplemental experience statements, specialized appraisals, etc.

2. **Local Analysis of a Group of Jobs.** Often several jobs at an installation are enough alike in tasks performed and level of responsibility and difficulty to be grouped and analyzed together. Usually, those jobs will have the same grade and title. For example, there are a number of tasks which are performed by all GS-4 Nursing Assistants in a medical center even though they may be assigned to medical, surgical or psychiatric units. By using appropriate sources of information and input from a panel of SMEs representing each of the areas where GS-4 Nursing Assistants work, a list of tasks, KSAOs and quality level examples for the whole job group can be developed. When an individual job is being filled, the KSAOs required in that job are selected from the pool of GS-4 Nursing Assistant KSAOs and used to rate and rank applicants.

**NOTE:** Care must be taken to ensure that all the KSAOs which are needed to identify the best qualified applicants for the individual job have been included in the rating and ranking procedure.

3. **Single Job Analysis.** Many jobs may not lend themselves to a group or class job analysis, or such an analysis may not yet be available. These jobs may be few-of-a-kind jobs or those which, even though they share a common title and grade, have duties and responsibilities which require different KSAOs. The procedures followed in a single position study are similar but not identical to those followed in a group or class study. In the single job study the sources of job analysis data do not have to be as wide and varied as those used in a larger study; however, the input from the SMEs must be more specific, and the KSAOs must relate directly to the individual job.

   c. **Common Elements in Any Job Analysis.** While the job analysis approaches discussed above vary in their focus and scope, there are a number of elements which must be included in any job analysis.
(1) The review of job information material may include position descriptions, position evaluation reports, classification and qualification standards, organization manuals, organization charts, functional statements, previous job analyses, professional literature and any other relevant source of information about the job. The judgments and conclusions influenced by these materials directly affect all other aspects of a selection procedure. It is, therefore, of prime importance that their accuracy, currency, appropriateness, etc., be verified at the outset.

(2) Direct input from SMEs.

(3) Determination of the functions, duties and tasks of the position(s).

(4) Identification of the KSAOs an individual needs to do the tasks.

(5) Determination of which KSAOs to measure.

(6) Definition of the various quality levels of individual capabilities on a KSAO that describe superior, above average, average, etc., possession. These quality level definitions must be based on observable behaviors and are dealt with in paragraph 5c, this appendix.

d. Who Conducts the Job Analysis. The HRM Officer or a designated HRM specialist performing at least at the first full performance level (usually GS-9) is responsible for conducting the job analysis. The assistance of a position classification specialist in determining major functions and duties of properly described and classified positions is usually beneficial. The HRM representative should first review available sources of information on the job such as those mentioned in subparagraph c(1) above. After becoming more familiar with the job, the HRM representative should convene a panel of SMEs (See paragraph 3f, this appendix) who will give direct input on the tasks and KSAOs involved in the job. The size of the SME panel may vary depending on the scope of the analysis. The panel should be large enough to ensure that input is received on all important aspects of the job or class of jobs and small enough to allow for free and easy discussion. If a single position is being analyzed, three or four SMEs should be sufficient.

e. Steps in a Job Analysis. The steps in the job analysis must be carefully documented. This documentation must be retained as part of the validity evidence required by the Uniform Guidelines (See paragraph 9, chapter 3 of this part).

Step 1 - Identify the major functions or tasks performed on the job. HRM Officers or Specialists conducting a job analysis may find the following questions useful in obtaining information from SMEs. What duties or tasks does an incumbent of the position perform? What duties or tasks take most of a worker's time? What do the best workers do? What do the just acceptable workers do? What is the most important/critical duty of the job?

Step 2 - Identify the KSAOs needed to do the tasks identified in Step 1. Questions which might be asked of SMEs to obtain a list of KSAOs are: What KSAOs should a good employee possess? What KSAOs does the superior worker have that the average worker doesn't? Think of the best employees - what makes them the best? Some people didn't work out in the job - why didn't they?
Step 3 - Relate each KSAO to a task or duty.

Step 4 - Study each KSAO and decide if it is critical to successful performance of the job. If an applicant is not competent in this KSAO, can that person do the job? If not, the KSAO is critical and is used as a selective factor when making minimum qualification determinations. The minimum level of proficiency required to do the job must be described for each selective factor.

Step 5 - Decide which KSAOs will distinguish superior applicants from the acceptable. Is there a difference in individual levels of competency in the KSAO? Will someone with a higher level of competency do a better job? KSAOs that differentiate between applicants may be used as rating factors.

Step 6 - Decide which KSAOs are measurable. Can information be collected on each applicant which will make it possible to determine the individual's level of competency on the KSAO? If the information can be collected, what is the most practical and cost effective way to do so? Sources of information on applicants are discussed in detail in paragraph 6 below.

Step 7 - Decide which KSAOs will be used in rating and ranking applicants. Five is generally considered the ideal number of rating and ranking KSAOs. This number will usually obtain meaningful distinctions among applicants and will allow for rating and ranking within a reasonable period of time. If there are more than five KSAOs which differentiate among applicants and can be measured, it may be possible to combine two or more of them. To be combined, KSAOs need not be identical; but the sources of information used to determine the appropriate quality level on each of the combined KSAOs should be the same or similar. Also an applicant's level of ability on each of the combined KSAOs should be about the same.

Step 8 - Describe the quality levels for each KSAO to be used. This step is defined in more detail in the following paragraph on crediting plans.

5. CREDITING PLAN

a. General. When the job analysis has been completed, a crediting plan must be developed which can be used to rate and rank applicants for the position. To provide continuity, the crediting plan should be developed, under the general direction of the responsible HRM Specialist, by the same SMEs who analyzed the job. If this is not possible, it may be developed by another group of SMEs or by the HRM Specialist. Just as the job analysis may be conducted on an individual job or on a class of jobs, the crediting plan can be developed for a single job or a group or class of jobs. In all cases, before a crediting plan is used to rate applicants for a particular job, it should be reviewed by the selecting official. If the plan is developed by the HRM Specialist, it should also be reviewed by the job analysis SMEs, or at least one SME, to ensure that the job analysis information has been correctly translated into the crediting plan. Before the crediting plan can be used, it should be approved and signed by the HRM Officer or other appropriate official who is responsible for its application.

b. Rating Factors. The final crediting plan should consist of four to eight KSAOs or rating factors which satisfy the criteria in paragraph 4e above. Remember that rating factors may be combinations of KSAOs.
c. Quality Levels

(1) Each rating factor must be defined in terms of observable behaviors, past experiences, quality of performance, pertinent education and training, etc., which describe several levels of proficiency for the factor. These descriptive quality levels further define the rating factor by giving concrete examples of performance at various proficiency levels.

(2) For critical KSAOs used as selective factors in basic qualification determinations, the minimum level of acceptable competency must be defined as discussed in paragraphs 3e and 4e, above. Quality levels above the minimum level are also developed for a critical KSAO when it is also used for rating and ranking.

(3) Three quality levels should be described for each rating factor, whether critical or important, which is used to distinguish superior applicants. Three is not an absolute requirement but is generally the easiest number to work with. It is important to distinguish between levels of ability that are required as soon as a person begins working in the job (these may be used in the crediting plan) and those which can be acquired after a reasonable time on the job (these generally should not be used). [In USA Staffing, quality levels are used for each task statement.]

(4) Developing quality level descriptions becomes easier as persons become more familiar with it. Valuable information on quality level improvement can be obtained from the promotion panel members who have used the crediting plan. Their observations and suggestions may also help in developing quality levels for similar positions.

[d. Task Statements

(1) In the crediting plans/assessment questionnaires used for USA Staffing, task statements are used to describe each KSAO. The task statements reflect specific assignments and performance of work.

(2) Subject Matter Experts are used to develop, devise, and/or review task statements. Their participation is documented in USA Staffing and in VA Forms 0938a, 0938b, and 0938c.

e.] Point Assignment. There are a number of ways in which points can be assigned to rating factors and quality levels. One simple method is to give each rating factor a maximum value of five points. Assuming that three quality levels have been defined, assign values of 1, 3 and 5 points to the quality levels. Applicants whose background is judged to equate to the top quality level would receive 5 points, those rated in the middle would get 3 points, and those rated at the lowest quality level would get 1 point. The 1-3-5 pattern allows raters to assign 2 or 4 points to applicants whose background is judged to fall between two quality levels. There are also other acceptable methods and procedures. [In USA Staffing, points are assigned to a level of proficiency in performing the task.]
f. Review of Crediting Plan/[Assessment Questionnaire]. The final crediting plan/[assessment questionnaire] should be reviewed by the SMEs and HRM specialist along with information gathered in the job analysis to ensure that all the critical and important KSAOs are covered by the rating factors. Quality levels should be reviewed to make sure they are as definitive as possible and describe elements of employee background and performance which are reflected in available sources of information on applicants.

[g.] Approval of Crediting Plan/[Assessment Questionnaire]. The completed crediting plan should be signed by each member of the crediting plan/[assessment questionnaire] development panel and by the HRM Specialist before being forwarded for final approval. If the selecting official was not a member of the crediting panel, he or she should also review the plan.

6. SOURCES OF INFORMATION

   a. General. Applicants are evaluated by comparing the total information on each applicant's capabilities against the quality levels for each rating factor or KSAO in the crediting plan/[assessment questionnaire]. This information can be obtained from a number of sources, discussed in detail in the following paragraphs. The best way to obtain information on the applicants must be determined for each vacancy. The consideration of what sources of information are available and will be used is important at each stage in the development of the selection procedure. In the job analysis stage, it is important in determining which KSAOs can be measured and will become rating factors. In the development of crediting plan/[assessment questionnaire], it is important in determining how the quality level examples are defined. In the evaluation process, the sources of information are the tools used by the promotion panel to arrive at scores for applicants.

   NOTE: Annual performance appraisals and awards must be considered to the extent they are related to the job to be filled. (See paragraph 3d, chapter 3 of this part.)

   b. Supervisory Appraisals. This can be a very valuable source of information since it allows someone with firsthand experience in supervising the applicant to give an assessment of the person's capabilities. However, remember that for rating and ranking purposes, the supervisory appraisal is only valuable to the extent that it gives information related to the applicant's capabilities on the KSAOs needed in the job being filled. There are several different styles and forms of supervisory appraisals. They may be designed for a specific job, or they may be more general in nature and used in evaluating applicants for a variety of jobs. They may simply require a supervisor to check a statement which most nearly defines an employee's capabilities. Several styles and forms can be combined in a variety of ways depending on how the appraisal is to be used.

      (1) Forms of Appraisals

      (a) Standard Appraisal. If other sources of information will yield enough information on applicants to enable raters to arrive at an appropriate rating, a general or standard appraisal which can be used for a number of jobs may be sufficient. In this case, only the items on the standard form which relate directly to the [KSAOs] of the job in question [ ] would be used. If the standard appraisal does not give direct information on a particular rating factor, then it cannot be used in evaluating an applicant on that factor.
Major advantages of the standard appraisal are that it does not have to be individually developed by the HRM Specialist, and it requires little time for the supervisor to complete. The major disadvantage is that it gives little specific information on an applicant's capabilities relative to the requirements of the job being filled; consequently, its value as an evaluation tool is diminished.

(b) **Specialized Appraisal.** A specialized appraisal is developed specifically to evaluate applicants for a particular job or group of jobs. It is keyed to the KSAOs or rating factors established in the job analysis and used in the crediting plan. This form allows the supervisor to address each of the [ ] KSAOs directly and increases the value of the information that the supervisor provides the promotion panel. Its principal disadvantages are the time required for its development and the additional time required for the supervisor to complete a separate appraisal for each job for which an employee applies.

(2) **Appraisal Styles**

(a) **Category Rating.** This style consists of a description of the KSAO to be appraised (e.g., ability to present ideas orally), followed by either adjective descriptions (outstanding, average, etc.) or descriptions of performance levels, and provides for relatively easy comparison of appraisals for several applicants. The supervisor simply selects the category which best describes the employee's capabilities. The pitfall is
that supervisors may have varying ideas about what constitutes a high rating, a low rating, etc. An applicant's rating is dependent on the supervisor's individual concepts.

(b) **Narrative Rating.** This style of rating requires supervisors to write about the applicant's capabilities and, therefore, depends to some degree on the supervisor's writing skills. The narrative often discourages supervisors from rating very high or very low because they must explain their rating in terms of what the employee has actually done. It may, however, be used beneficially with the category rating by requiring supervisors to support their choice of category by citing specific examples of employee performance. Because of its weaknesses, this style may not be appropriate for some jobs, particularly when used alone.

(3) **VA Forms 4667 and 4668.** VA Form 4667, Appraisal of Employee for Promotion to Non-supervisory or First Level Supervisory Position, and VA Form 4668, Appraisal of Employee for Promotion to Supervisory Position Above First Level, are examples of standard appraisals in the category style. These forms may continue to be used for merit promotion purposes. Their use, however, is no longer required.

**NOTE:** Any form or combination of forms of supervisory appraisals may be used (see paragraph 6c, this appendix, and paragraph 2b, chapter 3 of this part). It is recommended that merit promotion plans not be restrictive as to the type appraisal which will be used. This should vary depending on the job being filled.

c. **Annual Performance Appraisal.** Annual performance appraisals, which must be considered to the extent they are relevant to the position to be filled (see paragraph 3b, chapter 3 of this part) are based on performance in the current position. This appraisal is useful in rating and ranking to the extent that elements evaluated in it correspond to the requirements of the job being filled. The annual performance appraisal can be a useful tool for promotion panels, particularly when it is combined with a specially developed supervisory appraisal for promotion. This would allow the panel to get the greatest amount of relevant information from the supervisor. Because the supervisor only has to complete the performance appraisal once a year and it is not necessarily involved with selection and placement at that time, it may be more reliable than a supervisory appraisal required in a particular selection action. The annual performance appraisal, however, very often does not contain the information needed to evaluate an individual's anticipated performance in a new position; and there is the possibility that the employee's performance has changed during the time between the date of the annual performance appraisal and the date of the promotion opportunity.

d. **Federal Employment Application.** A Federal employment application may be used as the primary source of information about an individual's education, experience, training, etc. For some types of information, e.g., outside activities, a Federal employment application may not be a good tool. Use of a Federal employment application is not required in merit promotion actions if it is possible to get the same or better information from other sources.

e. **Supplemental Qualifications Statement.** This form is specially designed for use in filling a particular job. It solicits the same type of information as a Federal employment application but requires applicants to give more detailed information on education, experience, training, awards, etc., as they relate to the KSAOs or rating factors being used.
f. **Education.** Educational attainments often provide very useful information about capabilities. Education may be used as one element in combination with others to make determinations of applicants' capabilities. When considering education, the specific courses taken, as opposed to an academic degree, should be evaluated. For example, if someone has a degree in a particular field of study but did not work very long in that field, the degree may be less relevant than several courses taken in a field in which the person has stayed active.

g. **Awards.** Awards, which must be given consideration (see paragraph 3d, chapter 3 of this part) should only be used as indicators of an individual's capabilities to the extent that they indicate high interest, incentive, or performance in one or more of the rating factors (KSAOs) being evaluated.

h. **Training.** While training is frequently distinguished from education on formal vs. informal grounds, relevant training should be evaluated just as any other educational experience.

i. **Outside Activities.** Unpaid experience may be just as relevant as any other experience and should be evaluated in the same manner as paid experience.

j. **Other Tools.** There are many other ways to collect information concerning an applicant's capabilities. Some of these are:

1. a performance-based interview, either by a rating panel or the selecting official (both must deal only with job-related information);
2. an assessment center in which a model of the job activities is used;
3. written test or demonstration;
4. work samples;
5. reference checks;
6. background investigations; etc.

### 7. EVALUATION OF APPLICANTS

a. **General.** Once the crediting plan is developed, it must be applied equally to all applicants. Using the sources of information available, candidates must be evaluated against the crediting plan and a list of the best qualified applicants developed. Generally, the same sources of information should be used for all applicants. If there is information available on some applicants that is impossible to obtain on others, that information should be used in evaluating the applicants for whom it is available.

b. **Evaluation of Qualified Applicants**

1. When there is no rating and ranking of applicants (see chapter 3, paragraph 11a(5) of this part), the selecting official is the key element in the entire process. All applicants must be screened to determine which applicants are to be distinguished as best qualified. This does not mean that best qualified
determinations need to be made prior to issuance of the certificate. The selecting official should decide by whom and when the best qualified determinations should be made.

(2) Applicants are usually evaluated by promotion panels which are discussed in chapter 3, paragraph 10, of this part. Promotion panel members should note any problems arising from the use of the crediting plan and report them, with recommendations for correction, to the HRM Officer. This information can be extremely beneficial in crediting plan or procedure refinement and in development of crediting plans for other positions. The HRM Officer should coordinate with crediting plan development panel SMEs and the selecting official when a re-analysis is appropriate.

(3) Using an evaluation worksheet for each applicant, promotion panel members should first rate each applicant without consulting one another. They should review all of the sources of information (Federal employment application, supervisory appraisals, awards, etc.) on an applicant and determine for each rating factor (KSAO) the quality level which best matches the applicant's total background for that factor. Panel members should be cautioned that the quality level descriptions are only examples of background patterns which can be credited at each level. There may be information from sources not explicitly described in the quality level, or other configurations of an individual's experience, training, etc., which indicate the level of performance anticipated in the quality level. (See paragraph 5d, this appendix, concerning suggested point credit.)

(4) After each panel member has rated all the applicants and ranked them to determine a best qualified group (see subparagraph c below), the panel should meet to compare ratings. When their ratings differ to the point that an applicant appears to be in the best qualified group according to one rater but not another, the panel should discuss the relevant information available on the applicant and come to a consensus. The raters who change their ratings should document the reasons for the change on the evaluation worksheet for that applicant. If no consensus can be reached, this should also be documented. When no consensus can be reached, as an alternative, final total scores can be obtained by adding together the scores awarded to each applicant by each panel member. These aggregate scores would then be used to determine which applicants to refer to the selecting official.

NOTE: The evaluation worksheets of the panel must be signed and kept as part of the promotion file.

c. Cut-Scores

(1) After a score for each applicant has been determined, a "cut-score" must be established to determine which applicants to refer to the selecting official for final consideration. Like all other components of the selection process, the cut-score must be based on valid concerns and be justifiable. Cut-scores, in many instances, will reflect a natural break between assigned points. Cut-scores will not be set arbitrarily at a particular point score or at a particular percentage of the total possible points. Applicant scores are placed in numerical order and the point determined at which a meaningful distinction can be made between those applicants who will probably perform the job with substantially equal success and those likely to perform with a lesser degree of success.
(2) The following questions should be considered in establishing the cut-score:

(a) Is there a natural gap?

(b) Is the lowest ranking individual who will receive further consideration clearly superior to the highest ranking person receiving no further consideration?

(c) Is it possible for the lowest ranking person receiving further consideration to be equally successful as all others in the group referred?

(3) The following examples illustrate where cut-scores might be set:

**EXAMPLE A**

<table>
<thead>
<tr>
<th>Score</th>
<th>Number of applicants at this score</th>
</tr>
</thead>
<tbody>
<tr>
<td>20</td>
<td>3</td>
</tr>
<tr>
<td>19</td>
<td>2</td>
</tr>
<tr>
<td>18</td>
<td>0</td>
</tr>
<tr>
<td>17</td>
<td>0</td>
</tr>
<tr>
<td>16</td>
<td>5</td>
</tr>
</tbody>
</table>

In this case the natural break is 19 and those scoring 18 and above would be referred.

**EXAMPLE B**

Even though there were five applicants who received 20 points, the two who received 19 are so close that not referring them would be difficult to justify. The cut-score would be 19.

(4) In some cases there will not be a natural break or other readily justifiable point at which to set the cut-score. If possible, additional information should be collected on applicants which will further distinguish among them and allow a meaningful distinction to be made. Unfortunately, this may not always be possible or practical and other procedures for setting cut-scores will have to be used. Each merit promotion plan should describe what procedure will be used if it is not possible to set a meaningful cut-score. When there are several applicants who have the same score and additional information which would allow for a meaningful distinction is not available, it may be necessary to use a tie-breaking procedure such as that described in Appendix III-I.
APPENDIX H. JOB-ELEMENT APPROACH FOR WAGE GRADE JOBS

1. GENERAL. The job-element qualification system and evaluation and ranking procedures for in-service placement for trades and labor occupations are mandatory for use in VA. An in-depth discussion of this procedure is located in Office of Personnel Management Handbook X-118C. In addition, the information in Appendix III-G of this Handbook should be carefully reviewed since it provides valuable information concerning job analyses, crediting plans, sources of information, etc., which should be considered in the job-element approach.

2. PURPOSE. This appendix is intended to provide an overview of the system and focus attention on certain procedures in Handbook X-118C which are critical to successful implementation.

3. BACKGROUND

   a. Job Elements. Job elements in Handbook X-118C were developed through an analysis of wage grade job families which yielded job elements (abilities) directly related to successful performance. The approved job elements for specific wage grade job families are located in appendix A of Handbook X-118C. Under certain circumstances, explained in the Handbook, additional job elements may be developed for a specific position, some of the predetermined job elements may be combined, or some may be deleted. The screen out element, however, may not be deleted.

   b. Crediting Plans[Assessment Questionnaires]. The job-element procedure requires development of a crediting plan[assessment questionnaire] which is used to determine the relevancy of applicants' background to the job being filled. These crediting plans must be developed and used, both for basic qualification determinations and for rating and ranking purposes.

   NOTE: Chapter V of the Handbook X-118C stipulates that crediting plans are not made available to employees since the guides contain information that might give them unfair advantage in applying for the job. [Crediting plans] may, however, be reviewed and/or released for grievance and EEO complaint purposes as discussed in paragraph 9e, chapter 3 of this part. [In USA Staffing recruitment, assessment questionnaires request information from the applicant and must be made available to all applicants through the merit promotion announcement. Scoring criteria for that assessment are not disclosed.]

   c. Supplemental Experience Statements. VA Form 4676, Supplemental Experience Statement for Inservice Placement, and the continuation sheet, VA Form 4676a, are available for securing information from applicants concerning their qualifications for each job element. Statements used on the VA Form 4676 to generate employee responses are extremely important and must be carefully constructed to ensure they are clear, request relevant information and provide for determining the level of experience the employee possesses. Development and use of supplemental experience statements are discussed in the
d. **Other Sources of Information.** Paragraph 6, Sources of Information, of appendix III-G in this part should be reviewed. Its provisions are applicable concerning supervisory appraisals and options for their use. This includes the option, no longer a requirement, to use current, standardized VA supervisory appraisal forms with a proper rating pattern for the position to be filled. Other information, geared to the KSAO approach for General Schedule positions, is equally valuable for filling wage grade jobs.

e. **Rating Sheet.** VA Form 4677, Job Element Rating Sheet for Inservice Placement, is available for documenting basic qualification determinations and rating and ranking point credit determinations for applicants for trades and labor occupations. A crediting plan must be used in conjunction with this form. [In USA Staffing, use of this form is not required. If a panel wants to use this form to document their findings, they can, but if the panel doesn’t want to, or if there is no panel, the form does not have to be used.]

**4. RATING AND RANKING CANDIDATES FOR PROMOTION**

a. **Supervisor's Appraisal of Performance for Promotion.** To rate and rank basically eligible candidates for promotion, a supervisory appraisal of performance for promotion based on the requirements of the specific job being filled may be useful in addition to those factors in paragraph 3 above. Various supervisory appraisals like those described in appendix III-G, paragraph 6, for the KSAO approach are, however, acceptable.

b. **Annual Performance Evaluation.** Each candidate's annual performance evaluation must also be taken into consideration in the rating and ranking process. (See paragraph 3d, chapter 3 of this part.)

c. **Awards, Training, Self-Development and Outside Activities.** Information concerning these items, which may be secured from the employee responses on VA Form 4676 and/or from the employee's personnel folder, Federal employment application, or other appropriate source, must also be available for consideration in the point crediting process.

d. **Basis for Awarding Points for Promotion.** When rating and ranking for promotion, the panel, which must include a subject matter expert for the job, reviews each piece of relevant information required by the applicable promotion plan (i.e., the employee's supplemental experience statement, the annual performance evaluation, the supervisor's appraisal of performance for promotion and information related to awards, training, self-development and outside activities). Judgment is used to determine how closely the candidate's total background (as indicated by the combination of all the sources of information required by the applicable plan) matches a quality level for each job element. This process is repeated for each separate job element and points awarded accordingly. The result will not only provide for a basic qualification determination but will also yield the relative rank of candidates for promotion.
c. Documentation

(1) Promotion File. It is essential that thorough documentation of the panel's decisions include the evidence and rationale used to place the candidate in a certain quality level for each job element. The documentation must be such that a reviewer may easily determine the rationale and judgment used in point credit determinations from the information in the promotion file (see paragraph 18 of chapter 3, this part).

(2) Selection Procedure. The documentation requirements of the Uniform Guidelines on Employee Selection Procedures apply to procedures developed for wage grade jobs. Those documentation requirements of paragraph 19, chapter 3, this part, which are applicable to wage grade selection procedure development, must be observed.

5. DETERMINING BASIC QUALIFICATION FOR REASSIGNMENT, DEMOTION, ETC.
Rating and ranking to determine a best qualified group are not necessary for certain actions such as reassignment or demotion to positions with no higher potential, or reinstatement to positions at the same grade with no greater promotion potential than previously held. When only basic qualification determination is necessary, use of the appropriate job elements, a crediting plan, a supplemental experience statement and VA Form 4677 is sufficient. Additional guidance concerning basic qualification determinations and point credit may be found in Handbook X-118C, chapter IV, and in the instructions on VA Form 4677. [In USA Staffing, a résumé, or equivalent documentation, and completion of the assessment questionnaire are normally sufficient.]
APPENDIX I. PROCEDURES FOR BREAKING TIES

1. GENERAL. When ties occur, it is preferable to collect additional information on each of the tied candidates for further evaluation to determine whether a distinction among them can be made. Unfortunately, in some cases further differentiation is not possible. Facilities may elect to use Service Computation Dates (SCD), however, the following method may be preferable, since certain factors influencing the SCD may result in adverse impact against certain groups of employees.

2. PROCEDURE. This is a random procedure which does not contain factors which provide advantage or disadvantage to any particular group. The following example is based on vacancy announcements numbered in sequence during each calendar year such as: Announcement 01-1, Announcement 01-2, etc. This system may have to be altered to conform to local announcement numbering procedures.

<table>
<thead>
<tr>
<th>LAST DIGIT IN SOCIAL SECURITY NUMBER</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
</tr>
<tr>
<td>---</td>
</tr>
<tr>
<td>1</td>
</tr>
<tr>
<td>2</td>
</tr>
<tr>
<td>3</td>
</tr>
<tr>
<td>4</td>
</tr>
<tr>
<td>5</td>
</tr>
<tr>
<td>6</td>
</tr>
<tr>
<td>7</td>
</tr>
<tr>
<td>8</td>
</tr>
<tr>
<td>9</td>
</tr>
<tr>
<td>0</td>
</tr>
</tbody>
</table>

- a. The last digit of the vacancy announcement determines the row to use (e.g., for Announcement 01-47, use row 7 of the chart).
- b. The last digit of each tied candidate's SSN (social security number) determines the column to use.
- c. The number in the block at the intersection of the row and column is the tie-breaking order digit.
- d. The tie-breaking digit "1" is certified first, "2" second and "0" last.

EXAMPLE: Vacancy Announcement 01-47

<table>
<thead>
<tr>
<th>Candidate</th>
<th>SSN</th>
<th>Tie-Breaking Digit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>123-45-6789</td>
<td>8</td>
</tr>
<tr>
<td>B</td>
<td>123-45-9876</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>123-45-8945</td>
<td>9</td>
</tr>
</tbody>
</table>

Candidate B would be certified before A or C.
e. If ties still exist after the first round, break secondary ties by repeating the steps using the next-to-last digit of the social security number.

APPENDIX K. PROMOTIONS, ADVANCEMENT TO A HIGHER LEVEL WITHIN THE GRADE, OR CHANGE IN ASSIGNMENTS APPROVED BY THE UNDER SECRETARY FOR HEALTH OR A DESIGNEE, NETWORK DIRECTORS AND FACILITY DIRECTORS

NOTE: The term advancement in this appendix refers to advancement to a higher level within the grade for nurses, not special advancements for achievement or performance.

1. Under Secretary for Health or designee

NOTE: All actions affecting Directors of medical and regional office centers requiring approval of the Under Secretary for Health, or designee, will also require the concurrence of the Under Secretary for Benefits.

   a. Promotion of [of employees to positions centralized to the Under Secretary for Health as outlined in VA Handbook 5005, Appendix G15] Chiefs of Pharmacy Service to GS-15

   b. Promotion of VHA Central Office employees

   c. Promotion reconsideration requests from [ ] VHA Central Office employees.

   [d. Promotion reconsideration requests from registered nurses will be processed in accordance with VA Handbook 5005, Part III, Chapter 4, Section A, paragraph 7d.

   e. Promotion reconsideration for VISN employees.]

2. Network Directors

   a. Promotion of VISN employees.

   b. Reconsideration requests for promotion or change in assignment from employees at field facilities within the respective VISNs. This applies to all occupations except registered nurse.

   c. Temporary change in assignments to Chief of Staff or comparable positions in tier 4 for renewable periods not to exceed 1 year.

3. Facility Directors

   a. Promotion of [employees to grades GS-13 and below and to GS-14 grade levels as delegated by the Network Director].

   b. Promotion of Pharmacists. Facility directors may delegate to the Chief of Pharmacy Service the promotion of pharmacists in noncentralized assignments below GS-13, Assistant Chiefs of Pharmacy Service at GS-13.
c. Promotion of all other hybrids, which may be delegated to the Chief of Staff, the Associate Director, or Nurse Executive, as appropriate

d. Promotion of Optometrists.

e. Promotion of Chiropractors.

f. Promotion of Podiatrists.

g. Change in assignment of Dentists (staff dentists, service chiefs and positions comparable to service chief).

h. Promotion of Expanded-Function Dental Auxiliaries.

i. Promotion of Physician Assistants.

j. Change in assignments of Physicians.

k. Promotion or advancement to a higher level within the grade of Nurse Anesthetists

l. Promotion of Registered Nurses at Nurse III and below, which may be delegated to the [Associate Director for Patient Care Services or] Nurse Executive.

m. Promotion of Registered Nurses at Nurse IV and Nurse V, which may not be delegated to the [Associate Director for Patient Care Services or] Nurse Executive.

[n. Reconsideration requests for promotion up to the full performance level from employees appointed under 38 U.S.C. 7401(3) or 38 U.S.C. 7405(a)(1)(B) at field facilities.

**NOTE:** When an employee on a time limited appointment is advanced in grade or level within the grade (Nurse I), those actions must be processed as a conversion action after consideration by the appropriate professional standards board. Refer to VA Handbook 5005, Part III, Chapter 5, paragraph 5.]
## APPENDIX M. PROCESSING TITLE 38 PROMOTIONS AND ADVANCEMENTS

### HOW TO PROCESS A PROMOTION FOR PODIATRISTS, CHIROPRACTORS, NURSE ANESTHETISTS, PHYSICIAN ASSISTANTS, EXPANDED-FUNCTION DENTAL AUXILIARIES, AND TITLE 38 HYBRID OCCUPATIONS

<table>
<thead>
<tr>
<th></th>

## HOW TO PROCESS A PROMOTION FOR OPTOMETRIST

<table>
<thead>
<tr>
<th>A</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>If full-time, part-time or intermittent employee is an optometrist, then take these steps.</td>
<td></td>
</tr>
<tr>
<td>Upon receipt of VA Form 5-97, Notice of Pending Personnel Action, the HRM Office will forward the original copy to the employee’s service chief. The duplicate copy will be retained in the HRM office as a suspense copy.</td>
<td></td>
</tr>
<tr>
<td>The service chief will make appropriate recommendation to the VA Central Office Optometry Professional Standards Board through the facility HRM office, including a concise evaluation based on the criteria in paragraph 5 of chapter 4, this part (as appropriate). The Chief of Staff will make recommendations similarly for service chiefs. Significant changes in recent proficiency/performance ratings or unusually high or low performance in any elements will be evaluated in terms of promotion consideration. Each of these officials will indicate concurrence or non-concurrence, including specific reasons for such recommendation.</td>
<td></td>
</tr>
<tr>
<td>The VA Central Office Optometry Professional Standards Board will examine required documentation as specified in Note 2 and the Central Office Optometry Professional Standards Board checklist. Additional information may be obtained at the direction of the board. The Board will report their findings and recommendations on VA Form 10-2543, Board Action. All members will sign the form. The board action and all related papers will then be returned to the facility HRM office which will be responsible for forwarding to the appropriate promotion approving authority listed in appendix III-K. Action by the approving authority is required even though a promotion is not recommended.</td>
<td></td>
</tr>
</tbody>
</table>
The approving authority will note the final decision on the Board’s recommendation, sign and date VA Form 10-2543, and return to the facility HRM office which will ensure completion of the promotion or other appropriate action.

NOTE 1: The Director of Optometry Service and the VA Central Office Optometry Professional Standards Board may be contacted at and communications should be directed to:
APPENDIX N. UTILIZATION OF TITLE 38 EMPLOYEES
(APPOINTMENT/ASSIGNMENT TO NON-CLINICAL DUTIES)

1. SCOPE. This appendix contains VHA policy on the assignment of non-patient care duties to title 38 employees and when placement of title 38 employees in competitive civil service positions is required; it establishes procedures for ongoing review of these assignments; and it provides information on the conversion of title 38 employees to appointments under title 5 United States Code (U.S.C.). This appendix sets forth VHA policy that title 38 employees are to be appropriately utilized.

2. POLICY. It is VHA policy that responsible officials assign title 38 employees duties requiring clinical skills; that the utilization of title 38 employees in competitive civil service positions is prohibited; and that positions which do not require clinical skills be placed in the competitive civil service.

3. ACTION

a. Network directors, facility directors, and officials in VA Central Office are responsible for:

   (1) Ensuring that positions that require clinical knowledge, skills, and abilities of an occupation covered by title 38 are not placed under title 5.

   (2) Ensuring that positions that do not require the knowledge, skills and abilities of a health care professional are not removed from the competitive civil service by placing a title 38 employee in the position. NOTE: Such actions are contrary to title 5 U.S.C.§ 3302 and title 5 Code of Federal Regulations (CFR), Part 1 (Civil Service Rule 1), and, in certain instances, are considered a prohibited personnel practice as defined by title 5 U.S.C. § 2302(b)(6).

   (3) Controlling the degree to which title 38 employees are assigned duties that do not require clinical skills. However, when such action is necessary, these officials must ensure that:

      (a) Staffing is sufficient to provide patient care, continuous quality improvement, health care education, research, etc.

      (b) The assignment of the non-clinical duties is consistent with good position management principles. The provision of administrative support services needs to be evaluated in a comprehensive manner at the organization and position levels. For example, would putting employees performing related non-clinical duties under the control of clinical managers result in improved services? Positions can also be reengineered so non-clinical responsibilities can be assigned to competitive service employees, making more clinical staff available for patient care services. Positions that involve a mixture of clinical and non-clinical duties are to be evaluated to determine if title 38 employees might be used on a part-time, consultative, collateral or rotational basis. Also, non-clinical duties assigned to title 38 employees are to be reduced to a minimum and assigned to title 5 employees.

      (c) Staffing patterns are established so that title 38 employees are not routinely required to perform administrative or support functions that do not require the services of a health care professional. This includes title 38 employees assigned to evening, night, weekend, and holiday tours of duty.
(4) Working with the Chief of Staff, Nurse Executive, Chief of Human Resources, and other appropriate officials to apply the policies in this appendix consistently throughout the organization. This includes reviewing and bringing into conformance appointments or assignments inconsistent with this appendix.

(5) Converting positions that do not require clinical skills to the competitive civil service, and either reassigning the incumbent title 38 employee or offering the employee the opportunity to voluntarily convert to the competitive civil service using the Interchange Agreement in appendix III-C. However, such conversion actions must be based upon a Professional Standards Board finding that the position does not require the services of a health care professional. Employees requesting conversion must be advised, in writing, of the implications of the decision on their pay and benefits (e.g., differences in leave accrual rates and, since conversion is voluntary, these employees would not be eligible for pay retention). In addition, new, current, or converting title 5 employees who are licensed in a title 38 occupation (e.g., M.D., R.N.) are to be advised in writing that they are prohibited from engaging in professional practice in their VA position. Copies of these statements are to be placed on the left-hand side of the employee’s Merged Records Personnel Folder. When employees are reassigned to patient care positions, management must ensure that the employee’s competencies and credentials (e.g., license) are current. Reasonable measures must also be taken to reduce or eliminate potential adverse effects on employees being reassigned. There may be labor relations responsibilities to fulfill when an employee is involuntarily reassigned from one bargaining unit position to another. Managers are to consult with their labor relations advisor to determine whether an obligation exists. NOTE: If the Professional Standards Board finds the position requires a title 38 employee, responsible officials are to evaluate the position to ensure it is consistent with the criteria in preceding subparagraphs a(1) and a(2).

b. Network directors, facility directors, and officials in VHA Central Office can not:

(1) Assign title 5 employees, or former title 38 employees who have converted to title 5 positions, any clinical responsibilities associated with a title 38 occupation. Such responsibilities can only be assigned to employees appointed under title 38.

(2) Convert title 38 employees to title 5 positions to avoid pay limitations, required waivers of qualification standards, competitive civil service procedures, credentialing requirements, or to circumvent provider-patient ratios.

(3) Establish title 5 positions in the occupations listed in 38 U.S.C. 7401(1) or (3).

4. FOLLOW-UP RESPONSIBILITY. The Director, Management Support Office (10A2), is responsible for the contents of this appendix.
APPENDIX O. FULL PERFORMANCE LEVELS FOR HYBRID TITLE 38 POSITIONS

1. SCOPE. This appendix contains the full performance levels for hybrid title 38 positions listed under section 7401(3) of title 38, United States Code, or approved for hybrid status under part II, chapter 3, section A, paragraph 2 of this handbook and applies to Veteran Health Administration employees appointed under 38 U.S.C. 7401(3) or 7405(a)(1)(B). This appendix is to be used in conjunction with the promotion procedures in section B of Chapter 4, this part.

2. LIST OF POSITIONS AND FULL PERFORMANCE LEVELS

[See the Office of the Chief Human Capital Officer, Recruitment, Placement and Policy Service website for a complete list of hybrid title 38 occupations and full performance levels.]
APPENDIX P. PROCEDURES FOR REPORTING QUESTIONABLE BEHAVIOR AND JUDGMENT EXHIBITED BY HYBRID TITLE 38 PROFESSIONAL STANDARDS BOARDS MEMBERS

1. SCOPE. This appendix covers the procedures to be followed when a hybrid Board member (Chair, Member, or Secretary) believes a hybrid Board co-member (Chair, Member, or Secretary) is exhibiting questionable behavior or judgment during deliberations or when determining recommendations for the approving official. Examples of questionable behavior and judgment that may be displayed include, but is not limited to:

   a. Incorrectly interpreting qualification standards criteria, employee self-assessments, supervisory recommendations, or performance evaluations to the advantage or disadvantage of the PSB subject;

   b. Failing to recuse themselves when it would be appropriate to do so or recusing themselves when there is no reason to;

   c. Failing to respect the privacy of the Board subject;

   d. Violating Board confidentiality; or

   d. Displaying a lack of integrity

2. PROCEDURES. The member should raise their concern with the Chair of the next higher level hybrid Board using the following procedures:

   a. Discuss the issue with the Chair of the next higher level Board, either in person or via telephone, within 15 days of the last Board at which the questionable behavior or judgment was displayed.

   b. If the issue remains unresolved and the member wishes to pursue the matter further, the member must express her/his concerns to the Chair of the next higher level Board in writing or via email within 15 days of the discussion.

   c. The Chair of the next higher level Board will conduct an inquiry within 30 days by whatever means the Chair deems appropriate. This may include, but is not limited to, discussions with members of the lower level Board, including the Chair and the subject of the Board, discussions with the HR technical advisor to the lower level Board, and discussions with the approving official for the lower level Board.

   d. Within 30 days of completion of the inquiry, the Chair must discuss the issue and recommendations for resolution with the approving official for the higher level Board and must submit the recommendations in writing to the lower level Board’s approving official. The recommendations may include, but are not limited to, additional training for the member or removal from the Board.

   e. The approving official may take whatever action is deemed appropriate.]
APPENDIX Q. PROCEDURES FOR APPOINTING AND ADVANCING MEDICAL SUPPORT ASSISTANTS

1. SCOPE. This appendix contains the policy and requirements that apply to the employment of Medical Support Assistants (MSAs). This appendix also establishes the procedures for appointments (see VA Handbook 5005, Part II, Chapter 3, paragraph F1), promotions, and compensation of MSAs in Veterans Health Administration (VHA) appointed under sections 7401(3) and 7405 (a) (1) (B) of title 38, United States Code. This appendix is incorporated to Part III of Handbook 5005 through Chapter 4.

2. POLICY.

   a. Promotion actions will be taken without regard to race, color, religion, sex, national origin, disability, age, sexual orientation, or status as a parent, or any other non-merit factor, and shall be based solely on job-related criteria.

   b. Promotion actions will conform to the restrictions governing the employment of relatives. (See VA Handbook 5025, Legal.)

   c. All hiring actions will adhere to Veterans Preference requirements in VA Handbook 5005, Part I, Chapter 4.

   d. Employees may also be advanced in steps within a grade. (For Special Advancements for Achievement and Special Advancements for Performance see Handbook 5017, Employee Recognition and Awards and paragraph 3 of this appendix.)

   e. Nothing in this Appendix shall be interpreted to diminish MSAs’ grievance rights negotiated prior to the implementation of this Appendix under any collective bargaining agreement in effect during the implementation of this Appendix.

3. RESPONSIBILITIES.

   a. Human Resource Offices are responsible for:

      (1) Determining eligibility and qualifications in accordance with VA Handbook 5005, Part II, Appendix G45 and recommend the appropriate grade to the selecting official.

      (2) Recommending appropriate pay to hiring official using pay setting flexibilities in VA Handbook 5007 pertaining to hybrid title 38.

      (3) Determining eligibility, qualifications and recommend the appropriate grade for promotions.

      (4) Process requests for reassignments/change to lower grades in compliance with VA Handbook 5005, Part III, Chapter 4, Section B, paragraph 9 and review and make recommendations to the Medical Center Director on Special Advancements for Achievements (SAAs).
b. The Supervisor at the appropriate level is responsible for:

(1) Obtaining an approval to fill a vacant position in accordance with local procedures. Once approval is obtained the service will initiate recruitment action and contact the servicing Human Resources Office (HRO).

(2) Review applications referred for selections.

(3) Submit supporting documentation for utilization of pay setting flexibilities found in VA Handbook 5007 pertaining to hybrid title 38.

(4) Review requests or recommendations for promotions and make recommendations consistent with 6b and 6c below.

(5) Submit recommendations and documentation for SAAs consistent with VA Handbook 5017, Part V, Paragraph 4e (local facilities are encouraged to develop criteria to ensure consistent application of SAAs).

c. Medical Center Director/Network Director will (for personnel under their jurisdiction): 1) review and serve as the deciding official on requests for additional steps above the minimum on appointments; 2) review and serve as the deciding official on reconsideration requests; and 3) review and serve as the deciding official on SAAs.

4. PROMOTION.

a. This section contains instructions and procedures governing the promotion of employees who are appointed under the occupational series GS-679 and titled Medical Support Assistant and appointed under sections 7401(3) and 7405 (a)(1)(B) of title 38, United States Code. Promotion is advancement to a higher grade level and recognizes that an employee is providing a higher level of service to VA.

b. The promotion system shall provide advancement opportunities for employees, predicated upon the recognition of the quality of service rendered, additional experience and professional attainment as determined by an examination of the employee’s individual record.

c. To meet the criteria for promotion, the individual must meet the criteria for the next higher grade level in the MSA qualification standard. Examination of the individual’s total record must reveal evidence that the contribution to VA medical service is of sufficient value to warrant promotion. Potential for continuously greater contribution is also a prerequisite. Reviews and recommendations of supervisors and Human Resources will be sufficient to ensure that promotion is fully merited and not recommended based on meeting administrative requirements alone.
5. PROMOTION – GENERAL

a. Administrative Requirements for Consideration

(1) A current performance rating of “Satisfactory” or higher.

(2) The experience, education, and performance requirements set forth in the MSA qualification standard. Employees must meet the same grade requirements, including the specified demonstrated accomplishments, as for appointment. Any deviation or exception to these requirements will be limited to those specified in the qualification standard. (See part II, appendix G45).

b. Promotions Based on Additional Experience and/or Education. Promotions based solely on additional experience acquired by the employee shall be limited to advancements of one grade or grade interval at a time. If an employee has attained a higher level of education that, when combined with their additional experience, is qualifying for a grade higher than the next grade or grade interval, the employee may be promoted to whatever grade in the qualification standard the additional education warrants.

c. Processing Procedures (See appendix III-M, this part)

6. PROMOTION CONSIDERATION

a. Eligibility. Full-time, part-time, and intermittent employees shall be considered periodically, consistent with 6b and 6c below, for promotion in their current occupation. Eligibility for such promotion considerations shall be based upon fully meeting prescribed administrative requirements. Approximately 60 days prior to the date the employee meets the required period for promotion consideration, Human Resources Management Officers will notify the appropriate supervisory officials that the employee is eligible for promotion consideration to the next higher grade level up to the full performance level. The supervisor will notify the employee, who shall then be given 30 days to submit to their supervisor a self-assessment of their qualifications for promotion consideration. Employees may also notify their supervisor in writing that they are declining to submit a self-assessment during this 30 day period. If this is done, the supervisor will proceed with a recommendation.

b. Promotion to Grades at or Below Full Performance Level.

(1) Promotions to grades at or below the full performance level (see Appendix III-O, this part) will be based on the recommendation of the immediate supervisor, recommendation of approval by the second level supervisor and personnel action approved by Human Resources Officer. Upon receipt of the employee's self-assessment or written declination, the immediate supervisor will make a recommendation on promotion that is to be acted upon by the second level supervisor within 30 days of the self-assessment being received.
(2) Employees who have demonstrated the capability to successfully perform at the next higher grade level will be recommended for promotion. Promotions will become effective on the first day of the first full pay period following approval by the second level supervisor. In no case will the promotion be effected later than the first day of the first full pay period commencing 60 days after the employee’s anniversary date.

(3) Employees who have not demonstrated such capability will be informed in writing by the immediate supervisor that they are not being recommended for promotion. The written notice will state the reason(s) why the employee does not meet the criteria for promotion. The immediate supervisor may recommend the employee for promotion at a later date if it is determined that the employee has met the appropriate criteria. If not promoted during the intervening period, the employee is entitled to promotion consideration on the next anniversary date of grade. Employees who are not promoted may request promotion reconsideration under paragraph 7 below.

c. Promotion to Grades above the Full Performance Level.

(1) Employees who are eligible for promotion consideration to a grade that requires a combination of personal qualifications and assignment characteristics are to be considered for promotion to such grades on the first anniversary date of their last promotion, provided they meet the administrative requirements. This automatic consideration only occurs on the first anniversary for each grade level. In addition, employees who are selected for supervisory or managerial assignments that warrant consideration for a higher grade and for assignments based on complexity will be considered for promotion on a date other than the anniversary date of last promotion.

(2) If after reviewing the employee's self-assessment, if submitted, and other relevant material, the appropriate management official (e.g., service chief) determines that the assignment does not meet the qualification standard for a higher grade, that official shall document the reasons for this determination in writing and provide a copy of the determination to the employee. Employees who do not agree with the determination may request promotion reconsideration under paragraph 7 below.

(3) If the appropriate management official believes the assignment meets the qualification standard requirements for promotion, a request for personnel action is to be prepared and submitted, along with all relevant information to Human Resources for consideration within 30 days. If applicable, the employee will be given a copy of the supervisor’s comments relating to the self-assessment. The Human Resources Staffing Specialist will review and forward its recommendation on qualifications to the Human Resources Officer, for approval of personnel action. Human Resources will have no more than 30 days to complete their review. Promotions will become effective on the first day of the first full pay period following approval by the approving official. In no case will the promotion be effected later than the first day of the first full pay period commencing 120 days after the employee’s anniversary date.

(4) If, under paragraph (2) or (3) above, the appropriate management official or Human Resources Officer does not recommend the employee’s promotion, the employee will no longer receive an automatic annual promotion consideration. The appropriate management official may recommend such employee for promotion at any time in the future provided the employee’s duties and responsibilities change to the point that the criteria for promotion to the next grade may be warranted. Employees may request
promotion consideration by the appropriate management official on subsequent anniversary dates if their duties have changed since they were last considered and the employee believes that these changes meet the criteria in the qualification standard for a higher grade. For the reconsideration process for a denial, see paragraph 7 below.

7. PROMOTION RECONSIDERATION AND REVIEW

a. Coverage. This paragraph applies to MSAs appointed under 38 U.S.C. 7401(3) or 7405(a)(1)(B).

b. Notice of Decision. Employees are to be advised by their supervisors in writing of any decision not to promote them, of the reason(s) for the decision, of their right to request reconsideration, and that reconsideration must be preceded by an informal discussion with their supervisor.

c. Informal Discussion. Employees and their supervisor must meet to discuss the recommendation not to promote prior to the employee submitting a request for reconsideration under paragraph d below.

d. Reconsideration Requests

1) To Grades at or Below the Full Performance Level

(a) If promotion to a grade at or below the full performance level (see Appendix III-O, this part) is involved, the employee may, within 30 days of being notified of the decision, submit a written request through the immediate supervisor to the second level supervisor for reconsideration. The employee’s written request for reconsideration must indicate when the informal discussion was held with the immediate supervisor and cite the specific reason(s) why the employee believes the decision was not proper. The Medical Center Director, Network Director, or appropriate higher level designee (whichever is applicable) may extend the 30-day period at the written request of the employee if the employee is unable to submit the information for reasons beyond the employee’s control.

(b) Second level supervisors are to review the employee’s request within 30 days and determine whether to promote the employee. If the second level supervisor determines that a promotion is not warranted, that supervisor will provide the reasons for this decision to the employee in writing.

(c) If the employee is not satisfied with the explanation of the determination to not promote, the employee can request within 30 days to have the determination reviewed and recommendation made by the next higher level manager. The employee’s request for reconsideration and the supervisor’s explanation will be forwarded to the next higher level manager within 30 days.

(d) The next higher level manager will make a recommendation within 30 days and submit through the servicing Human Resources Office to the Medical Center Director, Network Director, or appropriate higher level designee (whichever is applicable), who will make a final decision within 30 days.
(e) If the promotion is approved, the employee is to be promoted on the first day of the first pay period following a decision by the approving official. In no case will the promotion be effected later than the first day of the first full pay period commencing 180 days after the employee submits a written request for reconsideration, unless the employee requested an extension to the 30-day period to submit a written request for reconsideration. In such cases, the number of additional days taken by the employee to submit a request will be added to the 180-day time limit. If the promotion is denied, the employee will be provided with a copy of the decision.

(2) For Promotions to Grades above the Full Performance Level

(a) Within 30 days of the non-promotion decision, an employee may submit a written request for reconsideration to their immediate supervisor. This 30 day period may be extended at the written request of the employee if the employee is unable to submit the information for reasons beyond the employee’s control.

1. The employee’s written request for reconsideration must indicate when the informal discussion (see Paragraph 7c above) was held with the immediate supervisor and cite the specific reason(s) why the employee believes the decision was not proper.

2. Immediate supervisors are to review and comment on the employee’s request in writing, and provide copies of those comments to the employee within 30 days.

3. The immediate supervisor will submit the written reconsideration request and any supervisory comments to the next higher level supervisor.

(b) The next higher level supervisor will review the information submitted by the employee, along with the immediate supervisor’s comments, and make a recommendation to Medical Center Director, Network Director, or appropriate higher level designee (whichever is applicable) through Human Resources within 30 days.

1. If Human Resources determines that the employee’s request does not include when the informal discussion was held or the specific reasons why the employee believes the decision was not proper, Human Resources will return the request to the employee for completion.

2. The employee has 30 days from the date of receipt of the returned request to obtain the additional information and return it to Human Resources. The Medical Center Director, Network Director, or appropriate higher level designee (whichever is applicable) may extend the 30-day period if the employee is unable to submit the information for good cause shown.

3. The Medical Center Director, Network Director, or appropriate higher level designee (whichever is applicable) has 30 days to make decision. This 30 day period may be extended up to the number of days it took the employee to provide the appropriate management official with the proper information.
4. Upon making the decision, the Medical Center Director, Network Director, or appropriate management official (as the approving official) will forward the decision to the Human Resources for action under paragraph e. below.

e. Action by Human Resources. Upon receipt of the reconsideration file, Human Resources shall take one of the following actions within 30 days:

(1) If approved, promotions will be made effective on the first day of the first full pay period following approval. In no case will the promotion be effected later than the first day of the first full pay period commencing 120 days after the employee submits a written request for reconsideration, unless the employee requested an extension of the 30-day period to submit a written request for reconsideration. In such cases the number of additional days taken by the employee to submit a request will be added to the 120-day time limit.

(2) If disapproved, Human Resources will notify the employee of the decision in writing.

8. COVERAGE AS EMPLOYEE GRIEVANCE. Requests for promotion reconsideration are excluded from the Agency Grievance Procedure. See VA Handbook 5021, Part IV, Chapter 3, paragraph 16. Promotion reconsideration decisions are excluded from the negotiated grievance procedure pursuant to 38 U.S.C. 7403(f)(1)(B).

9. EFFECTING ADVANCEMENT AND PROMOTION ACTIONS

a. Effective Date

(1) The promotion will be made effective by the Human Resources Management Officer on the first day of the pay period following the date of approval of the promotion by the approving official, but in no case earlier than the date on which all administrative requirements are met. A promotion may also be made effective at a future date set by the approving authority that does not violate law or negotiated agreement when doing so would benefit the employee. Promotion recommendations and actions that are administratively delayed beyond the time limits specified in paragraph 6 above will be made retroactive.

(2) If an employee becomes eligible for promotion while on LWOP for purposes for which they have a statutory entitlement to receive promotion consideration (e.g., military service, OWCP), no action will be taken until the employee returns to duty. If the employee on return to duty meets all of the requirements for promotion consideration, he or she will be considered for promotion as if he or she had been continuously employed in the position.

NOTE: See chapter 6, this part, for effecting promotion actions upon return from military service.
10. TEMPORARY PROMOTIONS

a. An employee may be temporarily promoted to a higher graded position where the grade of the position is based on the complexity of the assignment. The employee must meet the administrative and qualification requirements for promotion and such promotions are to be processed using the procedures in paragraphs 4, 5, and 6 above.

b. On expiration or termination of the assignment, the grade and salary of the employee will be adjusted in accordance with the provisions of VA Handbook 5007, Pay Administration. In applying the provisions of this handbook, the salary will be adjusted to the salary held previously, unless a higher rate is warranted by reason of periodic step increases. On assignment, the following statement will be placed in the “Remarks” item of the SF 50-B, Notification of Personnel Action: “Employee informed of conditions of temporary grade assignment.”

c. This temporary promotion no longer requires a professional standards board action and will occur without recourse to such board action. The absence of a board action shall not bar an employee from grieving a failure to temporarily promote pursuant to this section under the negotiated grievance procedure or agency grievance procedure as appropriate.

PART IV. [STAFF] REDUCTIONS [ ]

[(THIS PART IS TO BE USED IN CONJUNCTION WITH 5 CFR, PART 351 AND OFFICE OF PERSONNEL MANAGEMENT RESTRUCTURING INFORMATION HANDBOOK)]

CHAPTER 1. GENERAL

1. SCOPE. This part covers activities and actions at facilities associated with effecting employment reductions and changes based on such factors as change in mission, reorganization of work, changes in workload, a lack of funds and other matters that are unrelated to individual employee conduct and performance issues. Included in this part are [] title 5 reduction in force[, transfer of function, furlough, and] career transition [policies] and title 38 staff [reduction, assignment, reassignment, and furlough policies].

2. RESPONSIBILITY. Managers will ensure requirements associated with this part are met, and will otherwise attempt to minimize the adverse impact of necessary changes within their organizations by assisting employees [in understanding] the reasons for changes, assisting employees [with] career transitions, and treating employees in a fair and equitable manner.

3. REPORTING STAFF REDUCTIONS TO THE OFFICE OF MANAGEMENT AND BUDGET. VA will provide the Office of Management and Budget (OMB) with information concerning planned reductions in staff and furloughs. See the OHRM[] Web site for the requirements for submitting information to VA Central Office (VACO) prior to conducting [staff reductions] or furloughs.

4. RECORDS. Human Resources Managers are responsible for maintaining records that are used to determine an employee’s [ ] retention standing and for ensuring that access to such records is consistent with 5 CFR 351.505 (b) and VA Handbook 5025. VA will make available for review by the Union and employees those records which they are permitted to inspect, and[, when requested,] will provide copies to the extent possible and reasonable. Records must be maintained for [6] years after completion of the staff reduction activity. Records must be maintained for a longer period if there are pending third-party actions (e.g., grievance, appeal, EEO, court).

[5. DEFINITIONS. The following terms are frequently used in the staff reduction process.

   a. Adjusted Service Computation Date. An employee's service computation date plus credit for her/his three most recent annual performance ratings of record. The adjusted SCD is only used for reduction in force purposes.

   b. Assignment Right. An employee's entitlement to displace another employee with lower retention standing.

   c. AutoRIF/RIFRunner. Automated software programs that assist human resources specialists in conducting round 1 and round 2 of a reduction in force by tracking possible assignment rights.]
d. **Best Offer.** The highest graded position that can be offered to an employee who has been displaced, but no higher than the employee's current grade.

e. **Bump.** The displacing of an employee in the same competitive area who is in a lower tenure group or subgroup. The bumping employee must be qualified for the position.

f. **Competing Employee.** An employee in tenure group I, II, or III in either the competitive or excepted service.

g. **Competitive Area.** The geographic and organizational boundaries within which employees compete for retention. The competitive area is usually made up of facilities within the commuting area AND under a single management authority.

h. **Competitive Level.** A group of positions with the same title, grade, occupational series, qualifications, duties, responsibilities and work schedule.

i. **Competitive Service.** Civil service positions in the executive branch except SES, positions filled by Senate confirmation, and those specifically excepted by statute.

j. **Criteria and Privilege Request Form.** Form used by employees to request privileges which are then recommended by the service chief, the Professional Standards Board, and the Executive Committee of the Medical Staff. The recommendations are then approved by the Chief of Staff. Approved privileges define the limits of the employee’s ability to function independently based upon education, training, and experience.

k. **Days.** Calendar days unless otherwise noted.

l. **Discontinued Service Retirement.** Employees whose jobs are abolished and who face involuntary separation may retire if they meet early retirement eligibility requirements.

m. **Displace.** The moving of an employee from her/his position by bumping or retreating.

n. **Excepted Service.** Civil service positions not in the competitive service or SES.

o. **Functional Statement.** A description of the position that usually includes the title, a broad description of assignments, and a listing of the functions of the position, i.e., clinical, education, administrative/supervisory, program/management, and research.

p. **Furlough.** The placement of an employee in a temporary non-duty and non-pay status when the action is based on a reduction in force reason.

q. **Grade Retention.** When an employee is placed in a lower-graded position as a result of a reduction in force action, the employee remains at their current grade as if the demotion never occurred, for two years.

r. **Hybrid Title 38.** Employees appointed in the title 38 excepted service under 38 U.S.C. 7401(3) but covered by title 5 regulations for RIF and other purposes.
s. **Local Commuting Area.** A geographic area determined by the agency that includes any population center and the surrounding communities in which people may reasonably be expected to travel to and from work. There is no mileage standard.

t. **Mock RIF.** Rough approximations of RIF outcomes, usually performed before all data is verified. Mock RIFs are conducted to identify and correct problems.

u. **Notice.** A written communication to an employee stating that the employee will be reached for a RIF action

v. **Official Personnel Folder.** A file for each employee that documents the individual's federal employment history. The folder contains notifications of personnel actions, benefits elections, performance appraisals, awards, disciplinary actions, employment applications and other documents.

w. **Pay Retention.** Pay retention applies when an employee's previous rate of pay cannot be accommodated within the pay range of the new, lower pay grade. The employee keeps her/his salary, as long as it does not exceed 150% of the 10th step of the new grade. The employee receives only 50% of the annual comparability pay increases until the salary falls within the pay range of the new grade.

x. **Performance Appraisal System.** A means by which supervisors evaluate an employee's work performance.

y. **Rating of Record.** The performance rating prepared at the end of the period and the subsequent issuance of a summary rating level.

z. **Reduction in Force (RIF).** A process through which the federal government may involuntarily separate, demote, and reassign title 5, title 38, and hybrid title 38 employees.

aa. **Reorganization.** The planned elimination, addition, or redistribution of functions or duties.

bb. **Representative Rate.** The fourth step of the grade for GS positions and the second step of the grade for WG/WL/WS positions.

c. **Retention Factors.** Tenure, veterans’ preference, length of service and performance.

d. **Retention Register.** A listing of employees in order of their "seniority" based on their four retention factors.

ee. **Retention Standing.** An employee’s relative standing on a retention register.

ff. **Retreat.** The displacing of an employee in the same competitive area who has a lower service computation date within the same tenure group and subgroup. The position into which the employee is retreating must be the same, or an essentially identical, position as previously held in any federal agency on a permanent basis.
gg. **RIF Appeal.** An employee who believes her/his assignment rights were violated or that the process was not correctly followed may file a formal complaint with the Merit Systems Protection Board.

hh. **Round of Competition.** The different stages of competing for retention. In round one employees compete to stay in the competitive level. In round two bumping and retreating occurs and employees compete for assignment to positions in other competitive levels.

ii. **Scope of Practice.** Employees function autonomously within a defined scope of practice. The scope defines the nature of practice/patient population/setting, assessments and diagnoses authorized, recordkeeping methodology, and prescriptive privileges. The scope may also list routine duties, emergency duties, non-routine/non-emergency duties, and other duties.

jj. **Service Computation Date (SCD).** Generally the date an employee started their current period of federal employment plus any creditable military service and any creditable prior federal civilian service.

kk. **Severance Pay.** Biweekly payments made to an employee who is involuntarily separated and who is not eligible for an immediate retirement annuity. The amount of severance pay is based on the employee's salary, number of years of federal service and age.

ll. **Staff Adjustment.** A process formerly used to involuntarily separate or reassign title 38 employees.

mm. **Subgroup.** After employees are divided into appropriate tenure groups (I, II, or III), they are further divided into one of three subgroups: AD- veterans with a service-connected disability of 30% or more, A- other veterans, or B- non-veterans.

nn. **Surplus Employee.** A current employee serving under an appointment in the competitive service as well as an excepted service employee in Schedule A or B in tenure group I or II, and a title 38 employee serving on an appointment under 38 U.S.C. 7401(1) who has received a CES or other certification issued by the agency which identifies the employee as being in an excess organization or occupation.

oo. **Tenure.** An employee's status based on length of service and type of appointment. Tenure group I is employees designated as "career" based on at least three years of continuous, permanent federal civilian service. Tenure group II is employees designated as "career conditional" based on having less than three years of service or who are serving a probationary period. Tenure group III is employees who have temporary appointments of more than one year.

pp. **Title 5.** The law under which most federal employees are appointed and from which most federal personnel administration regulations derive.

qq. **Title 38.** The law under which many VA employees are appointed.

rr. **Transfer of Function.** The transfer of a continuing function from one competitive area to one or more other competitive areas where the function was not being performed, or the movement of the entire competitive area to another commuting area.
ss. **Undue Interruption.** A degree of interruption that would prevent the completion of required work by the employee 90 days after the employee has been placed in a different position in first or second round RIF competition. The 90 day standard should be considered within the allowable limits of time and quality, taking into account the pressures of priorities, deadlines, and other demands.

tt. **Veterans Preference Act.** The law from which veterans receive much of their preferred status and from which the RIF regulations derive.

uu. **Voluntary Early Retirement Authority (early out).** Employees may retire at age 50 with 20 years of service or at any age with 25 years of service.

vv. **Voluntary Separation Incentive Payment (buyout).** A lump sum cash payment offered to encourage employees to retire or resign.]
CHAPTER 2. [STAFF REDUCTIONS], TRANSFER OF FUNCTION, FURLOUGH, AND TRANSITION ASSISTANCE

SECTION A. GENERAL

1. SCOPE. This chapter contains Department of Veterans Affairs (VA) policies and procedures for RIF, transfers of function, furloughs, and career transition assistance. They apply to competing title 5 employees [and] to title 38 hybrid employees appointed under 38 U.S.C. 7401(3). These procedures [also apply to employees appointed under 38 U.S.C. 7401(1), except furloughs (for furloughs of employees appointed under 38 U.S.C. 7401(1), see Chapter 3, Section C of this part). These procedures] do not apply to employees serving in the Senior Executive Service or appointed under 38 U.S.C. 7306[. This chapter, [5] CFR part 351, and OPM’s Restructuring Information Handbook must be used together when planning and effecting covered actions. Prior to making a determination to initiate a RIF action, labor organizations should be given the opportunity to participate in pre-decisional discussions. If a decision is made to initiate a RIF, labor organizations will be notified before any affected bargaining unit employees are notified. Applicable master or locally negotiated agreement provisions also must be used in administering actions affecting bargaining unit employees.

2. FILLING VACANCIES

a. Reduction-in-Force Planning

(1) Although management is not obligated to fill vacancies prior to or during a RIF, to the extent possible, necessary and continuing vacancies will be used to provide placement opportunities for employees who will be adversely impacted by a RIF. When management chooses to offer vacancies using RIF procedures, qualifications may be waived in accordance with 5 CFR 351.703. [Qualifications may not be waived for title 38 and hybrid title 38 vacancies.] The Union will be given a written list of current vacancies prior to employees being informed of a reorganization.

(2) After a reorganization is announced in writing and prior to a RIF, eligible employees may be allowed to volunteer to accept lower-graded positions. Employees taking such positions will be granted grade and pay retention if eligible. (See Pay Administration Directive and Handbook 5007 and 5 CFR, part 536, for guidance on grade and pay retention eligibility.)

(3) Promotions or other placements into vacant title 5 positions prior to a RIF which have greater promotion potential than employees' current positions must be made under competitive merit promotion procedures.

b. Offering Vacancies to Employees

(1) During a RIF, to the extent possible, vacancies may be used to satisfy employees' assignment rights in accordance with 5 CFR 351.201.

(2) Employees without assignment rights who have received specific RIF separation notices may be offered vacant, lower-grade positions without regard to the three-grade level limit which applies to bump
and retreat. These offers may be made so long as the position would not constitute a better RIF offer to other competing employees. Eligible employees who voluntarily accept lower-graded positions will be entitled to grade and pay retention benefits.

[c. Reassignments

(1) To avoid displacing an employee during a RIF, management may reassign a surplus employee to a continuing position at the same grade as long as there is a legitimate need for the employee in the position. Such reassignments help avoid involuntary separations and demotions. An employee may be reassigned without regard to reduction in force regulations when the vacant position is at the same grade or rate of pay as the employee’s present position.

(2) The position to which the employee is reassigned may be located in the same or a different competitive level, competitive area, or commuting area.

(3) An employee may not be reassigned to a position with greater promotion potential unless the position is filled following merit promotion procedures.

(4) Reassignment to a position in a different commuting area does not provide the employee with the right to compete for a position in his or her present competitive area under reduction in force regulations even if the employee declines the reassignment and is subsequently separated under adverse action procedures. (See VA Handbook 5021, Part VI, paragraph 13.)

(5) An employee separated for declining reassignment to a position in a different commuting area qualifies for most of the benefits available to an employee who is separated by reduction in force, including severance pay, discontinued service retirement, and the Interagency Career Transition Assistance Plan. The employee is not eligible to be placed on the reemployment priority list.]

3. DELEGATIONS OF AUTHORITY

a. The Secretary, or designee(s), will approve RIF actions involving positions centralized to the Secretary and all furloughs.

b. Under Secretaries, Assistant Secretaries, Other Key Officials, or their designee(s), with the advice and assistance of the Office of Human Resources Management [(OHRM), will authorize RIFs], within VACO elements under their jurisdiction, and within field facilities under their jurisdiction requiring VACO approval.

[NOTE: Other Key Officials are defined as the General Counsel, Inspector General, Chairman Board of Veteran Appeals, etc. This does not include positions below Under Secretaries, Assistant Secretaries, or Staff Office Heads.]

c. Field facility directors will [conduct] RIF actions within their respective jurisdictions. [when authorized and approve resulting actions, except for actions involving centralized positions and all furloughs].
4. REQUESTS TO TAKE ACTION

a. **Reduction in Force.** Field facility directors will submit a request, through channels and the Office of Human Resources Management, to the appropriate official listed in VA Directive 5005 before proceeding with RIFs that involve a centralized position or [when anticipating a RIF that would result in the separation of an employee]. This authority may be redelegated by officials listed in paragraph 3. The Under Secretary for Health has delegated RIF authority as specified in appendix IV-B. Information regarding submitting proposed RIFs is provided on the OHRM Web site. The request will include the following information.

1. The reasons(s), among those in 5 CFR 351.201(a)(2), for the action;
2. The titles, series, grades, and numbers of all involved positions;
3. If the RIF occurs in a research project, the name of the project and principal investigator.

b. **Transfer of Function.** Field facility directors will submit a request, through channels and the Office of Human Resources Management, to the appropriate official listed in VA Directive 5005 before they separate or include in a concurrent RIF employees who decline to transfer with their functions. The request will include the information in subparagraph 4a(2).

c. **Furlough.** Under Secretaries, Assistant Secretaries, Other Key Officials, and field facility directors will submit a request, through channels and the Office of Human Resources Management, to the Secretary before proceeding with a furlough, whether under adverse action [procedures outlined in VA Handbook 5021] or RIF procedures. The request will include a description of the temporary conditions warranting a furlough, the information in paragraph 4a, the proposed length of the furlough, including the beginning and ending dates, and any alternatives to furloughs that were considered. Requests for adverse action furloughs also will identify the method used to select employees for furlough.

d. **Voluntary Early Retirement Authority (VERA).** The Deputy Assistant Secretary for Human Resources Management is authorized to request VERA from OPM. The request must meet the criteria and include the information required by OPM. Under Secretaries, Assistant Secretaries, and Other Key Officials will submit conforming plans, through channels, to the Office of Human Resources Management. Each facility [and VA staff office] authorized and utilizing VERA will establish and maintain a local VERA plan consistent with [overall VA plans and OPM requirements].

[ ]
SECTION B. COMPETITIVE AREAS

1. STANDARD COMPETITIVE AREAS

a. Field Positions

(1) Normally, each VA facility under separate managerial authority, e.g., medical center, independent outpatient clinic, regional office, cemetery, and data processing center and its satellite positions and activities within the commuting area, constitutes a competitive area.

(2) Satellite positions and activities outside the commuting area of their parent facilities, e.g., Veteran Representatives on campus, satellite outpatient clinics, "vet centers," also constitute separate competitive areas for each commuting area.

(3) When two or more installations in the same administration or staff office in a local commuting area have a single organizational unit which provides "common service" functions, such as Human Resources, finance, or supply, the servicing office is included in the competitive area of the installation that has administrative authority over the servicing office.

(4) A field element of an administration or staff office which is located at and serviced by a VA facility, but under separate managerial and appointing authority, constitutes a separate competitive area. An example would be Regional Counsel offices at regional offices and medical centers.

(5) Positions in the field for which employment matters are centralized to VACO, such as associate directors and division chiefs, are included in the competitive area of the local facility.

(6) Different funding sources alone is no basis for establishing separate competitive areas.

b. Central Office Positions

(1) The Office of the Secretary and each office of an Under Secretary, Assistant Secretary, or Other Key Official, constitute separate competitive areas.

(2) VACO employees with a duty station outside of the Washington, DC, metropolitan area, such as information specialists in the Office of Public Affairs and resident engineers in the Office of Facilities, are in separate competitive areas for each administration or staff office and each commuting area. They are not included in the Washington, DC, competitive areas or in any other competitive areas in their commuting areas.

(3) Positions in the Office of Inspector General (OIG) may not be placed in the same competitive area as positions outside the OIG.
2. AUTHORITY TO REDEFINE COMPETITIVE AREAS. Under Secretaries, Assistant Secretaries, and Other Key Officials, with the advice and assistance of the Office of Human Resources Management [], may redefine competitive areas for organizations under their jurisdictions, provided such redefinitions are in accordance with 5 CFR, part 351, fully justified and documented to ensure that such action is clearly in the best interest of VA. The Under Secretary for Health has delegated authority to redefine competitive areas as specified in appendix IV-C.
SECTION C. COMPETITIVE LEVELS AND RETENTION STANDING

1. ESTABLISHMENT OF COMPETITIVE LEVELS. Human Resources Management Officers (HRMOs) are responsible for assigning competitive levels.

   a. Within each competitive area, the HRMO, or designee, groups interchangeable positions into competitive levels. A competitive level includes positions with the same grade, series, qualification requirements, duties, and work schedule. Competitive [service positions (title 5)] and excepted service positions [(title 5, title 38, and hybrid title 38)] are placed on separate competitive levels. Separate competitive levels are also established for positions that are full-time, part-time, intermittent, seasonal, on-call, or filled as part of a formally designated trainee or developmental program. The competitive level is based on each employee’s position description, [ ] functional statement[, privileges, and scope of practice]. Positions that are similar (for example, same grade, series, qualifications, and work schedule) but are not identical (for example, slightly different duties [and responsibilities]), may be placed in the same competitive level if the employee of one position could satisfactorily perform the critical tasks of the other position [without undue interruption within allowable limits of time and quality in patient care. Generally, the employee should to be able to successfully perform the critical tasks of the position within 90 days after entering the position (further guidance regarding the determination of appropriate time frames can be found in OPM’s Restructuring Handbook). Positions should not be placed in the same competitive level if the privileges, scopes of practice, and clinical responsibilities are different. Guidance on establishing competitive levels for title 38 positions is located in Appendix IV-D].

   b. Competitive service employees with time-limited appointments of 1 year or less and temporary excepted service employees who have served 1 year or less [are not competing employees in a RIF and] are not listed in a competitive level. These employees are terminated before any employee covered by OPM retention regulations is reached for a RIF action. Temporary excepted service employees who are employed under a temporary appointment limited to 1 year or less, but who have completed 1 year of current continuous service under a [previous] temporary appointment with no break in service of 1 workday or more, [are competing employees in a RIF and] are placed in a competitive level.

2. CREDIT FOR PERFORMANCE

   a. The annual summary performance [and proficiency] ratings of record are the official ratings used for crediting performance during a RIF. Guidance on processing annual performance [and proficiency] ratings of record is contained in VA Directive and Handbook 5013, Performance Management Systems. Additional guidance on the annual performance rating crediting procedures to be used for retention service credit is contained in 5 CFR 351.504 and subparagraphs 2b through 2g of this section.

   b. VA is required to treat all employees within a RIF competitive area in a uniform and consistent manner. Any competing employee receiving a Satisfactory or equivalent performance rating, [e.g., Fully Successful or Successful,] will receive 12 years of additional service credit; any competing employee receiving an Excellent [ ]or equivalent[ ] rating, [e.g., High Satisfactory or Highly Successful,] will receive 16 years of additional service credit; and any employee receiving an Outstanding [ ]or equivalent[ ] rating will receive 20 years of additional service credit. The same service credit is granted regardless of the agency or organization that issued the rating.
c. In crediting performance for RIF purposes, the “look-back” period of 4 years applies. The [most recent] three ratings [received within the last four years prior to the RIF] will be used to determine performance credit. [The performance credit assigned to each of the] three ratings of record will be added together [ ] and divided by 3 [(in the case of a fraction the number is rounded to the next higher whole number)] to determine additional service credit, which will then be added to the employee’s service computation date.

d. Under provisions of 5 CFR 351.504(c)(2), an employee who has received only one or two ratings during the 4-year period shall receive credit for performance on the basis of the ratings of record received divided by 1 or 2. For example, when only two ratings of record are available to be credited, these two ratings will be added together and divided by 2 (and rounded in the case of a fraction to the next higher whole number) to determine additional service credit. If there is only one rating of record available, use the value assigned to that rating for service crediting purposes.

e. OPM has determined that an employee who has no rating of record during the 4-year period will receive the “modal” rating, i.e., the [summary rating level assigned most frequently within the competitive area and on record for the most recently completed appraisal period prior to the cutoff date specified (5 CFR 351.203 & 504(c)(1))]. However, in most instances, every employee in the competitive area [should] have at least one rating of record during the last 4 years. If at least one rating exists, a “modal” rating will not be required. [The modal rating for title 5 and hybrid employees will be determined separately from the modal rating for title 38 employees because of the differing performance systems.]

f. Some agencies and organizations within the Federal government are not covered by the performance appraisal provisions in the law and regulations. Employees who have received ratings from such Federal organizations will be granted additional retention service credit in a RIF only when it is determined that those performance ratings are equivalent ratings of record under the provisions of 5 CFR 430.201(c). The Human Resources Officer or the RIF Team Leader will make the final determination on applicability. If the performance evaluation qualifies as an equivalent rating of record, the employee will be granted the appropriate service credit for each applicable rating of record [accordance with subparagraphs c and d above].

g. [The cutoff date for performance ratings of record will be between 30 and 45 days prior to the date of the specific RIF notice. After the cutoff date, no new ratings will be put on record for RIF service credit purposes].

3. ORDER OF RELEASE FROM COMPETITIVE LEVELS. No competing employee will be released from a competitive level while retaining in that level an employee with a specifically limited temporary appointment, a specifically limited temporary or term promotion, or a written decision of a performance-based removal or demotion from the competitive level. Once such employees have been released, competing employees will be released in inverse order of retention standing except as provided in this section, paragraphs 4 and 5 of this section.

4. TIES. As permitted by 5 CFR 351.601(b), the [ ]official who would normally make the selection for the position [from which the employee is being released] will determine, on the basis of qualifications [and competencies] for the specific position, which employee(s) will be retained when two or more employees
on a retention register [have identical retention standing service dates. The tied employees who will be released from the competitive level] will be notified in writing of the tie and the decision that they will not be retained [in the competitive level].

5. EXCEPTIONS TO RETENTION ORDER

a. Holders of the Congressional Medal of Honor employed as Contact Representatives (Veterans Benefits Counselors) under authority of Executive Order 9628 are exempted from RIF.

b. An employee who is being assigned to a position which will not be vacated until after the end of the 60-day notice period may be retained in his/her current position until the position becomes available but not to exceed 60 additional calendar days.

c. As permitted in 5 CFR 351.608, employees who have been reached for a RIF (separation) will be retained as a temporary exception to the retention order under the following conditions:

(1) An employee whose disability retirement has been approved by OPM will be separated when the person's earned sick leave is exhausted or on the date OPM approval is received, whichever is later.

(2) An employee who applies for disability retirement (or for whom VA has made such application) will be granted sick leave provided the responsible VA official agrees, on the basis of acceptable medical evidence, that the employee is incapacitated for duty in his/her present position. If OPM disapproves the request for disability retirement, the employee will be separated on the day VA is notified of the disapproval or on the scheduled effective date of the RIF, whichever is later. If OPM has not approved or disapproved the application for disability retirement by the time the employee's earned sick leave has been exhausted, the employee will be separated at that time or on the scheduled effective date of the RIF, whichever is later.

d. Field facility directors may approve temporary exceptions in the normal retention order for employees under their jurisdiction in other cases involving sickness, disability, or other issues covered by 5 CFR 351.608, such as near-term retirement eligibility. The Secretary, Under Secretaries, Assistant Secretaries, Other Key Officials, or their designee(s), may approve such exceptions for VACO employees and for employees located at field facilities who are not under the managerial authority of a field facility Director.

e. These officials are also authorized to approve temporary exceptions in the normal retention order for 90 days or less to continue an activity without undue interruption as described in 5 CFR 351.203. "Undue interruption" does not mean mere inconvenience. Serious inconvenience and even severe interruption of the work program are often the unavoidable results of a RIF. A work program probably would not be unduly interrupted if an employee needed more than 90 days after the RIF to successfully perform the critical elements of a position. Lower priority programs might tolerate a longer interruption.

f. If an exception is approved in one case in a particular RIF, it must be applied to all other employees reached for separation in that RIF who meet the same criteria.
SECTION D. ASSIGNMENT RIGHTS

1. QUALIFICATIONS DETERMINATIONS. Human Resources Management Officers determine whether employees are qualified for specific positions to which they can be assigned in a RIF. Qualification requirements may be waived to the extent permitted by 5 CFR 351.703, when filling a vacant [title 5] position during a RIF. [Basic qualification requirements may not be waived for title 38 and hybrid title 38 vacancies. Grade requirements for title 38 and hybrid title 38 vacancies may be waived only to the extent permitted in each occupations applicable qualification standard. Basic qualification standard] waivers are not permitted for RIF displacements.

2. ADMINISTRATIVE ASSIGNMENTS. The following administrative assignment rights are granted to affected VA employees consistent with 5 CFR 351.705:
   a. Other Competitive Areas. Group III employees in other competitive areas in the local commuting area [(e.g., at stations where management has the same authority or jurisdiction at more than one campus or division)] will be displaced to provide assignment opportunities for VA employees who (1) are in Group I or Group II; (2) have received a notice of impending RIF separation or who have declined an offer to transfer with their current competitive area; and (3) meet the qualification standards and are available for positions held by Group III employees at grade levels not higher than the grade levels held at the time of receipt of RIF notices.
   b. Attorneys. Attorneys appointed under Schedule A, 5 CFR 213.3102(d) who are reached for release from their competitive area are entitled to other positions in the same competitive area which are encumbered by Schedule A, 5 CFR 213.3102(d) appointees whom they can displace by "bump" or "retreat" as defined by 5 CFR 351.701.
   c. [Employees Appointed under 38 U.S.C. 7401(1). Employees appointed under 38 U.S.C. 7401(1) who are reached for release from their competitive levels are not entitled to displace by bump or retreat other employees appointed under these authorities].
   [d.] Employees Appointed under 38 U.S.C. 7401(3) [ ]. Employees appointed under 38 U.S.C. 7401(3) [ ] who are reached for release from their competitive levels are entitled to other positions in the same competitive area which are encumbered by 7401(3) appointees [ ], whom they can displace by "bump" or "retreat."
   [e.] Veterans Canteen Service Employees. Employees of the Veterans Canteen Service appointed under 38 U.S.C. 7802 who are reached for release from their competitive levels are entitled to other positions in the same competitive area which are encumbered by 38 U.S.C. 7802 appointees whom they can displace by "bump" or "retreat."
SECTION E. EMPLOYEE NOTICES

1. GENERAL. Employees will be given advance official [notification] information concerning decisions which may result in their being affected by a RIF. This [notification will be in writing] and will include: the reasons for the required adjustments, such as lack of work or funds, reorganization, or a realignment of functions; the competitive area; where the employee may inspect the pertinent regulations; and whom] to contact about assistance available for affected employees.

2. SPECIFIC NOTICES. Whether or not other notices are used, each affected employee must be given a specific notice of the [ ] action. [Notices must comply with applicable labor-management agreement notice provisions.] Notice periods and contents are described in 5 CFR, part 351.
SECTION F. [TITLE 5 AND HYBRID TITLE 38] FURLOUGHS

1. GENERAL. [This section applies to title 5 employees and to title 38 hybrid employees appointed under 38 U.S.C. 7401(3). This section does not apply to full title 38 employees.] Furloughs are appropriate to address temporary conditions when it is intended to recall employees to duty. The determination as to which employees are furloughed will be based on an assessment of which assignments are critical to the continuing operation of the organization during the furlough. When feasible, furloughs will be spread out among employees in affected competitive levels to minimize the impact on each employee and the disruption of VA activities. All employees shall be accorded fair and equitable treatment consistent with this policy. [(For furloughs of employees appointed under 38 U.S.C. 7401(1), see Chapter 3, Section C of this part.]]

2. USE OF ADVERSE ACTION PROCEDURES. Furloughs of 30 days (22 workdays) or less are adverse actions and should be processed in accordance with VA Directive and Handbook 5021, Employee Management Relations. The guidance in this chapter on requests for furlough authority, appropriate uses of furlough, and identification of employees for furloughs will apply to these actions.

3. USE OF RIF PROCEDURES. RIF procedures must be followed to furlough an employee for more than 30 consecutive days [ ].

4. WRITTEN NOTICE TO EMPLOYEES. Ordinarily, employees will be given 30 or 60 calendar days advance written notice of a furlough depending on the length of furlough (whether the furlough is an adverse action or a RIF-based action). However, employees may be furloughed during emergencies [and other unforeseen situations, e.g. lapse of appropriations,] without the usual advance notice and opportunity to reply. Emergency situations are restricted to very narrow circumstances such as furloughs to avoid violating the Anti-deficiency Act, which prohibits using funds when appropriations have not been enacted. The written notice shall advise the employee of:

a. The reason(s) for the furlough;

b. The effective date(s) and expected duration of the furlough;

c. The process used - either adverse action or RIF (see requirements for RIF notices as well);

d. If applicable, the circumstances which warrant waiver of the notice period;

e. When only some of the employees in an organizational unit are to be furloughed, the basis for identifying the employees to be furloughed;

f. The place where the employee may inspect the applicable regulations and records;

g. The employee's right to reply in writing and time allowed for reply;

h. The employee's right to gripe or appeal, as appropriate; and
i. Any effects of the furlough on the employee's entitlement to retirement, life and health insurance, and other benefits.

5. EMPLOYEE PREFERENCES. For furloughs of 30 days or less, management will consider employee preference, e.g., to work a shorter prorated week or to be furloughed for a certain number of consecutive days, in scheduling the furlough.

6. FURLOUGH DURATION LIMITATIONS. Competing employees may not be furloughed for more than 1 year. If employees must be released for more than 1 year, RIF procedures must be used.
SECTION G. TRANSFER[ ] OF FUNCTION

1 GENERAL. A transfer of function occurs when the function wholly leaves one competitive area and moves to another competitive area that does not already perform that same function. When the number of employees who are willing to transfer and who are in a competitive level within a transferring function exceeds the needs of the gaining competitive area and RIF procedures are used to relieve the surplus, these procedures will normally be applied at the gaining location. Any use of RIF procedures in the losing competitive area (except for actions unrelated to the transfer of function) will require the prior authorization of the appropriate Under Secretaries, Assistant Secretaries, and/or Other Key Officials.

NOTE: For a more complete explanation of procedures and employee rights in transfer of function, see 5 CFR, part 351, subpart C and OPM Restructuring Information Handbook, Module 4.

2. PROCEDURES

   a. For planning purposes, employees occupying positions in a transferring function will be asked in writing if they are interested in transferring, and will be given one (1) full pay period to respond.

   b. If a RIF is necessary at the gaining facility as a result of the transfer of function, employees occupying positions in the transferring function will be considered to be employees of the receiving organization and will be placed in appropriate consolidated competitive levels. They will not be physically moved to the new commuting area until a specific assignment is determined.

   c. Appropriate notices will be issued by the losing facility and will include information on specific assignments, pay and grade retention, and payment for travel and transportation costs. If there is a RIF involved in the transfer of function, the gaining facility will issue the notices. Separation actions that may result will be processed by the losing facility.

   d. Career or career-conditional employees who are separated are eligible for placement assistance under the programs described in 5 CFR, part 330, and this handbook. Also, those meeting the requirements will be entered on the reemployment priority lists in the commuting area of the office that issued the notice resulting in the separation.
SECTION H. APPEALS AND GRIEVANCES

1. NOTIFICATION TO EMPLOYEES. Affected employees will be advised in writing of their grievance and appeal rights at the time specific actions are communicated, consistent with regulatory requirements.

2. PETITIONS FOR REVIEW BY THE MERIT SYSTEMS PROTECTION BOARD. [A title 5 title 38, or title 38 hybrid employee appointed under 38 U.S.C. 7401(3)] , the Department, or the Director of OPM may file a petition for review of an MSPB Regional Office decision with the MSPB. Department petitions for review will be coordinated through the [appropriate Regional Counsel Office with consultation from the] Office of General Counsel and [HRM as needed]. Field facilities will [ ] assure that Department petitions [for review], if appropriate, are submitted on a timely basis.
SECTION I. PLACEMENT ASSISTANCE AND CAREER TRANSITION

1. EMPLOYMENT RESTRICTIONS. The Federal government has established a regulatory framework in 5 CFR 330, [sub]parts [Fand] G [ ], regarding both placement assistance and reemployment consideration of employees subject to RIFs and related activities. This section addresses Federal and VA policies on placement assistance and career transition.

[NOTE: Where practicable, the provisions of this section are extended to include title 38 employees, as well as title 5 and hybrid title 38 employees.]

a. Under Secretaries, Assistant Secretaries, and Other Key Officials will determine, with the advice and assistance of the Deputy Assistant Secretary for Human Resources Management, whether additional employment restrictions beyond those described herein should be imposed on other facilities or areas to provide placement opportunities for employees likely to be affected adversely by a RIF, transfer of function, or other reorganizations. If it is determined that employment restrictions across organizational lines are needed to provide sufficient placement assistance opportunities, the Under Secretaries, Assistant Secretaries, or Other Key Officials of the potentially affected facility or organization, or the Secretary, will approve the extension of employment restrictions.

b. Efforts should be made to identify the specific grades and series of positions for which affected employees qualify, and to apply employment restrictions only to those specific vacancies.

2. OPERATIONAL REQUIREMENTS FOR CAREER TRANSITION ASSISTANCE

a. The facility Director shall:

   (1) Establish and implement [a] local Career Transition Assistance Plan[ ] (CTAP), [ensuring] local labor organizations [are met;] and

   (2) Ensure that [ ] affected employees receive required and other appropriate and timely notification of the availability of local career transition assistance ([Refer to the guidance in] 5 CFR, parts 330 and 351[, and OPM’s Reconstruction Information Handbook, Module 7, to supplement the guidance in this handbook.])

b. The Human Resources Management Officer shall:

   (1) Ensure that all displaced and surplus employees in the local commuting area have the opportunity to apply for vacancies lasting 121 days or more;

   (2) Where there is more than one [ ]HRMO[ ] in the local commuting area, these HRMOs will establish local procedures for exchange of pertinent information, including the existence of any VA displaced and surplus employees;

   (3) Determine, in consultation with subject matter experts as appropriate, whether displaced and surplus applicants/employees are “well-qualified” for vacancies to which they have applied, and provide documented “qualification reviews” to such persons who are otherwise “eligible” but have been determined to be “not well-qualified”;
(4) Ensure that eligible "well-qualified" VA displaced and surplus applicants/employees receive appropriate special selection priority when they are referred to selecting officials;

(5) [Maintain] the Reemployment Priority List (RPL) for eligible separated VA employees;

(6) Maintain records of VA CTAP and Interagency Career Transition Assistance Plan (ICTAP) activities; and

(7) Ensure that each impacted employee receives information on career transition.

3. DEFINITIONS FOR CTAP

b. Bargaining Unit. A group of employees recognized by the employer and designated by the Federal Labor Relations Authority as appropriate to be represented by a labor organization for purposes of collective bargaining.

c. Certification of Expected Separation (CES). A memorandum which identifies an employee as being in an excess organization or occupation and therefore subject to possible separation [through RIF procedures]. An employee in receipt of such a memorandum is considered a surplus employee. A CES would most appropriately be used in cases when entire units are expected to be abolished and can be issued up to 6 months prior to separation. This makes such employees eligible for the full range of VA CTAP services and assistance under this directive and handbook.

d. Displaced Employee

(1) Under CTAP. A current agency employee who has received a RIF separation notice or notice of proposed removal for declining a directed reassignment or transfer of function outside of the local commuting area, if serving \emph{either} on an appointment in the competitive service in tenure group I or II, \emph{or} on an appointment in the excepted service without time limit and who has been given statutory noncompetitive appointment eligibility and selection priority for competitive service positions.

(2) Under the ICTAP

(a) A current or former career or career-conditional competitive service employee, in tenure group I or II who has received a specific RIF separation notice [or a notice of proposed removal for declining a directed reassignment or transfer of function outside of the local commuting area];

(b) A former career or career-conditional employee who was separated because of a compensable injury, as provided under the provisions of subchapter I of chapter 81 of title 5, U.S.Code, whose compensation has been terminated and whose former agency is unable to place the individual as required by 5 CFR [353.110(b)]:

IV-28
(c) A former career or career-conditional competitive service employee, in tenure group I or II, who retired with a disability under sections 8337 or 8451 of title 5, U.S. Code, whose disability annuity has been or is being terminated;

(d) A former career or career-conditional competitive service employee in tenure group I or II, in receipt of a RIF separation notice who retired on the effective date of the RIF or under the discontinued service retirement option;

[(e)] A former Military Reserve Technician or National Guard Technician who is receiving a special disability retirement annuity from OPM under section 8337(h) or 8456 of title 5, U.S. Code, as described in 5 CFR, part 330, subpart H;

[(f)] A current agency employee who is in receipt of a RIF separation notice or notice of proposed removal for declining a transfer of function or directed reassignment outside of the local commuting area, if serving on an appointment in the excepted service without time limit and has been given statutory noncompetitive appointment eligibility and selection priority for competitive service positions; and

[(g)] A former agency employee who has been separated through RIF or removed for declining a transfer of function or directed reassignment outside of the local commuting area, who served on an appointment in the excepted service without time limit and has been given statutory noncompetitive appointment eligibility and selection priority for competitive service positions.

e. **Eligible Employee.** To be eligible for special selection priority under these procedures, an individual must meet all of the following conditions:

1. Is a surplus or displaced employee as defined in 5 CFR 330.604(c) or (i), or 5 CFR 330.703(b);

2. Has a current performance rating of record of at least fully successful or equivalent;

3. Applies for a vacancy that is at or below the grade level from which the employee may be or is being separated, that does not have a greater promotion potential than the position from which the employee may be or is being separated. **NOTE:** For hybrids and full title 38 employees in grades above the full performance level, their grades must be reviewed by an appropriate professional standards board. Their grades may be impacted by the level of responsibility and assignments in the new position. If an appropriate professional standards board determines that the new assignment is at or below the employee’s current grade level, this eligibility requirement is met. This provision does not apply to physicians and dentists since they are in single grade positions.]

4. Occupies a position in the same local commuting area of the vacancy;

5. Files an application for a specific vacancy within the established timeframe and provides proof of eligibility as required under 5 CFR 330.608(a)(2) or 330.708(a)(2); [and]

6. Is determined by the [hiring] agency to be well-qualified for the specific vacancy.
f. **Facility.** A single medical center, regional office, automation center, other Department field establishment under the direction of local management officials or VACO. The facility includes any operation (e.g., a satellite) or complex of organizations that is under the control of the same facility Director.

g. **ICTAP.** The OPM program which provides special selection priority to other displaced Federal employees when filling vacancies from outside of VA.

h. **Labor Union.** An organization composed, in whole or in part, of employees in which these employees participate and pay dues, and which has as a purpose the dealing with an agency concerning grievances and conditions of employment.

i. **Local Commuting Area.** The geographic area that usually constitutes one area for employment purposes[, in accordance with Federal Travel Regulations on Permanent Change of Station (PCS) moves]. It includes any population center (or two or more neighboring ones) and the surrounding localities in which people live and can reasonably be expected to travel back and forth daily to their usual employment.

j. **Qualification Review.** The documented analysis by the responsible HRMO of the rationale for [determining if] an otherwise eligible [candidate is well-qualified or not well-qualified for the position being filled].

k. **Selecting Official.** Th[e] individual with the authority to choose from among candidates for a vacancy.

l. **Special Selection Priority.** The precedence over any other candidates that eligible employees have for being chosen for vacancies for which they apply. [Eligible surplus and displaced employees must be selected over any other candidate for vacancies in the local commuting area for which they apply and are found well-qualified.] **Exception** - No VA CTAP special selection priority can be made which would cause another VA employee to be separated by RIF. See Appendix IV-A of this handbook for those staffing actions not covered by the VA CTAP.

m. **Suitability.** Determinations based on an individual’s character or conduct that may impact the efficiency of the service by jeopardizing an agency’s accomplishments of its duties or responsibilities, or by interfering with or preventing effective service in the competitive, excepted, [or] SES position applied for or employed in, and determinations that there is a statutory or regulatory bar to employment.

n. **Surplus Employee.** A current employee serving under an appointment in the competitive service as well as [an] excepted [service] employee[ ] in [S]chedule[ ] A [or] B[ ] in tenure group I or II, [and a title 38 employee serving on an appointment under 38 U.S.C. 7401(1)] who has received a CES or other certification issued by the agency which identifies the employee as being in an excess organization or occupation.

o. **Vacancy.** A competitive service position lasting 121 days or more including extensions, which is being filled, regardless of whether a specific vacancy announcement is issued.
p. **Vacancy Announcement.** The [notification to] eligible displaced and surplus employees in the local commuting area [that a facility is accepting applications. The announcement must] convey[ ] what is required to be [rated] "well-qualified."

q. **Well-Qualified Employee.** An eligible applicant who:

1. Meets the qualification standard and eligibility requirements for the position, including any medical qualifications, suitability, and minimum educational and experience requirements;

2. Meets all selective factors, where applicable, and appropriate quality [rating] factor levels. Selective and quality ranking factors cannot be so restrictive that they run counter to the goal of placing displaced employees. In the absence of selective and quality ranking factors, HRMOs, with appropriate consultation, will document the job-related reason(s) the eligible employee is or is not considered to be well-qualified;

3. Is physically qualified, with reasonable accommodation where necessary, to perform the essential duties of the position;

4. Meets any special qualifying condition(s) that OPM has approved for the position, and;

5. Is able to satisfactorily perform the duties of the vacancy upon entry.

**Note:** The qualification level required for placement under CTAP and ICTAP, well-qualified, is greater than the qualification level required for placement under reduction in force procedures, minimally qualified.

4. **CAREER TRANSITION ASSISTANCE SERVICES.** These services are to be provided to VA employees who either have been or are likely to be separated from Federal service due to downsizing. The goal of such services is to assist VA employees in taking charge of their own careers by providing them with the support they need to find other job opportunities, either with government or in the private sector. In VA, under these procedures, transition assistance services will be available to impacted permanent title 5 competitive and excepted service employees as well as [to permanent] title 38 hybrid [and full title 38] employees. [ ] Special selection priority, when filling competitive service vacancies, will be available to displaced and surplus competitive service employees. A key feature of the CTAP is that employees must exercise individual initiative in pursuing other employment, both within and outside of the Federal government. Therefore, managers and supervisors, in their administration of the VA CTAP, should be sensitive to the needs of impacted employees and should approve requests for reasonable excused absence to use career transition services.

5. **SPECIFIC VA CAREER TRANSITION ASSISTANCE SERVICES.** Such services will be offered by facilities to all permanent competitive and non-time limited excepted service and Senior Executive Service employees affected by downsizing. These resources will assist employees in pursuing employment [either] within or outside the Federal government and in managing the change process.

   a. **Required Services.** The following must be offered to impacted employees:
(1) Resume writing;

(2) Interviewing skills/techniques;

(3) Training in preparing applications that address vacancy announcement rating factors;

(4) Skills assessment/counseling;

(5) Retirement counseling/training;

(6) Employee benefits counseling/training;

(7) Financial planning/training;

(8) Job search skills;

(9) Stress management;

(10) Basic library of job search materials;

(11) Access to the OPM’s USAJOBS [and VA’s vacancy databases];

(12) Training in the use of career transition services for employees, managers, supervisors and union representatives; and

(13) Basic computer training beyond that needed to facilitate use of transition services.

b. **Other Requirements**

(1) Employees will be allowed [a] reasonable [amount of] excused absence to use transition services and facilities.

(2) Separated employees will be allowed reasonable access and time to use transition services and facilities.

(3) Access to services will be provided to employees in field offices and remote sites and [to] those [employees] with disabilities.

(4) Facilities will make full use of Employee Assistance Programs.

(5) Facilities will provide employees with resource information on other forms of Federal, state, and local assistance which are available to support career transition[, including services] for employees with disabilities.

(c. **Highly Desirable Services.** In addition to services which must be offered to affected employees are services which, although not required, [a facility may choose to offer to affected employees].

IV-32
(1) "Survivor training," and/or counseling, for those who will remain in the new organization to help them adjust to changes brought about by downsizing;

(2) Team building;

(3) Counseling for families of impacted employees;

(4) [Orientation to] the new organizational structure, and;

(5) Job retraining where time and resources permit. This [may be] appropriate in [reorganizations where the total number of employees has reduced but staff] in some occupations will be increasing.

d. **Methods of Providing Services.** Career transition assistance services may be delivered in a variety of ways. Facilities may, for example, wish to pool resources for particular services. Facilities should contact organizations, both government and private sector, to learn what techniques and options are effective in the local area.

6. **SPECIAL SELECTION PRIORITY FOR VA EMPLOYEES**

a. Special selection priority means that an eligible “well-qualified” applicant (one who applies and meets [the] criteria under the VA CTAP) must be selected. Since [ ] displaced and surplus [VA] employees must apply for specific vacancies, it is therefore necessary that vacancy announcements be distributed so that they have an opportunity to apply. The VA CTAP is designed to maximize employment opportunities for displaced and surplus VA employees who, through no fault of their own, are adversely affected by VA restructuring and downsizing.

b. Surplus and displaced VA employees who apply for VA vacancies in their local commuting area at their current grade or a lower grade with no higher promotion potential than their current grade, and who are [ ] well-qualified for such position, must be selected. These employees are the first selection priority for VA vacancies. (See Order of Selection and Consideration in appendix IV-A.) [NOTE: For hybrids and full title 38 employees in grades above the full performance level, their grades must be reviewed by an appropriate professional standards board. Their grades may be impacted by the level of responsibility and assignments in the new position. If an appropriate professional standards board determines that the new assignment is at or below the employee’s current grade level, this eligibility requirement is met. This provision does not apply to physicians and dentists since they are in single grade positions.]

(1) **Announcement of Vacancies.** The Plan depends on the announcement of vacancies in order that VA CTAP eligibles have the opportunity to apply. Vacancy announcements should be forwarded for appropriate distribution by HRMOs at other VA facilities in the local commuting area. In those instances where vacancies are not announced, e.g., in anticipation of a reassignment within the facility, if well-qualified eligibles apply in a timely manner, they must receive special selection priority. (See Appendix IV-A.)

(2) **Determining Well-Qualified.** The responsible HRMO, in consultation with subject matter experts, as required, will approve the determination of "well-qualified" for each eligible applicant under
this program, using the criteria defined in paragraph 3. This official will also notify eligibles of a
determination of "not well-qualified," and maintain documentation [in the record justifying] this
determination.

(3) Notification Procedures. Employees will receive notification of their eligibility for special
selection priority under this program with their specific notice of RIF separation, or in their CES or other
certification issued by the agency which identifies the employee as being in an excess organization or
occupation.

7. REEMPLOYMENT PRIORITY CONSIDERATION FOR SEPARATED VA EMPLOYEES.
VA employees who receive a specific RIF notice of separation will be notified that they may register for
the RPL. Registrants receive reemployment priority consideration for positions in the local commuting
area at the same grade or lower than the position held at the time of separation. Registrants do not have
to re-apply for specific vacancies as [is] the case with current surplus and displaced employees. Neither
must they meet the test of "well-qualified" [for reemployment]. Where there is more than one HRM
office in the commuting area, the HRMOs will establish local procedures for [the] exchange of
information and the maintenance of a consolidated RPL. All facilities in the commuting area are,
consistent with 5 CFR, part 330, responsible for assuring RPL registrants receive reemployment priority
consideration for all appropriate vacancies. If the selecting official tentatively nonselects appropriately
referred RPL registrants, that official must obtain approval of the next higher level supervisor before
considering candidates from outside the facility. [Title 5 registrants who were [] career-conditional
[employees at the time of separation, and title 38 and hybrid employees who had not completed their
probationary period at the time of separation] have 1 year of eligibility [on] under the RPL[. Title 5
registrants] who were [ ] career [employees at the time of separation, and title 38 and hybrid employees
who had completed their probationary period at the time of separation] have 2 years of eligibility [on the
RPL].

8. SPECIAL SELECTION PRIORITY FOR DISPLACED CURRENT OR FORMER
EMPLOYEES FROM OTHER FEDERAL AGENCIES. Displaced current or former employees
from other Federal agencies are entitled to have special selection priority under the ICTAP when they
apply through [] OPM USAJOBS for VA vacancies at their current or former grade level or with no
higher potential, and [are] within the local commuting area. VA facilities must place vacancies lasting
121 days or more on [] USAJOBS whenever they decide to recruit outside VA. These employees or
former employees who are determined to be well-qualified must be selected prior to the selection of
reinstatement eligibles, transfer eligibles, [eligibles] from a civil service certificate [ ] or [eligibles] from
other competitive sources. Such employees or former employees have eligibility for 1 year following
separation under reduction-in-force procedures. They will be informed of the [ICTAP] procedures [ ]
and their eligibility for [the program] when they receive their specific notices of separation.

9. LABOR RELATIONS RESPONSIBILITY. Career transition procedures have been developed in
partnership with VA unions. These policies and procedures are not intended to affect existing collective
bargaining agreements until such time as they are up for renegotiation. The parties to such agreements,
however, are free to negotiate those provisions that may be affected. Local management shall meet its
labor-management obligations at the local level prior to implementation of local CTAPs.

10. EMPLOYEE RELATIONS RESPONSIBILITIES AND RIGHTS. Employees must exercise
individual initiative in pursuing other employment both within or outside the Federal government. In
order to exercise special selection priority, eligible individuals must apply for specific vacancies in which they are interested [and provide] proof of their eligibility. A determination of [“well-qualified” or] "not well-qualified" is subject to a qualification review by the responsible HRMO[, as follows:

a. Surplus and displaced employees who apply for specific vacancies within the local commuting area, through CTAP or ICTAP procedures, must be advised in writing whether or not they were found well-qualified. When a surplus or displaced employee applying for a specific position is not found well-qualified the responsible HRMO must ensure that a documented, independent second review is conducted. If the employee is still found to be not well qualified after the second review, the responsible HRMO must notify the employee and include information on the results of the independent, second review.

b. If an applicant is found well-qualified, and another well-qualified surplus or displaced employee is selected, the applicant must be so advised by the responsible HRMO.]
CHAPTER 3. TITLE 38 ASSIGNMENTS, STAFF ADJUSTMENTS, AND FURLOUGHS

SECTION A. GENERAL

1. SCOPE

a. [Except as provided in subparagraph 1b, this chapter establishes procedures on:]

   [(1)] Assignments, reassignments, [details] and furloughs of employees appointed under title 38, U.S.C. 7306 [and] 7401(1) [ ]; and

   [(2)] Assignments of hybrid title 38 employees appointed under 38 U.S.C. 7401(3).

[b.] This chapter does not apply to:

   (1) Transfers for performance or conduct under 38 U.S.C. 7461. (See VA Directive and Handbook 5021.)

   (2) Separation of employees who fail to accept a properly directed transfer or reassignment based on disciplinary or performance reasons. (See VA Directive and Handbook 5021.)

   (3) Furlough and RIF (including incident reassignments) of hybrid employees appointed under 38 U.S.C. 7401(3) [and RIFs of title 38 employees appointed under 7401(1)]. (See chapter 2, this part.)

2. REFERENCES

   b. Title 38 U.S.C., Chapters 73 and 74.

   c. VA Directive 5005.

3. DEFINITIONS

   a. Assignment. An assignment is a specified set of duties and responsibilities.

   b. Detail. A detail is the temporary assignment of an employee to a different set of duties for a specified period of time. There is no formal position change; officially, employees continue to hold the position from which they were detailed and keep the same status and pay.

   c. Employee. Unless otherwise specified, the term refers to employees covered by this handbook.
d. **Furlough.** Placement of an employee in a temporary status without duties or pay because of a lack of work, funds, or other nondisciplinary reasons. Furloughs may be consecutive or non-consecutive days.

e. **Reassignment.** Reassignment is the temporary or permanent change:

   (1) From one assignment to another under the same facility management involving an official personnel action (the reassignment need not be in the same commuting area); or

   (2) From one assignment to another for reasons other than performance or conduct and involving different facilities.

   

[f.] **Transfer.** The movement of an employee from one facility to another for performance or conduct reasons pursuant to 38 U.S.C. 7461.

[NOTE: See Appendix IV-E for additional definitions.]

4. **POLICY**

   a. The authorities covered by this handbook are management tools which are to be used to assist in providing quality health care services in a cost efficient manner.

   b. Efforts will be made to mitigate the adverse effects of the authorities covered by this handbook. However, primary consideration will be given to the efficient and effective accomplishment of the VA mission.

   c. Approving officials will make maximum use of an employee’s skills and capabilities, provide employees with opportunities for growth and development, and consider any personal problems of affected employees.

   d. Employees will only be assigned duties and responsibilities for which they have appropriate credentials and there is a reasonable expectation that they will be able to perform satisfactorily.

   e. Reassignments or changes of assignments requested by employees for their own convenience will normally be given favorable consideration when consistent with the needs of VHA.

   f. Management officials are responsible for meeting their labor relations obligations. This includes, but is not limited to, developing and implementing local policies and procedures]
SECTION B. ASSIGNMENTS, REASSIGNMENTS AND DETAILS

1. CHANGES OF ASSIGNMENTS OTHER THAN REASSIGNMENTS. Bargaining unit employees dissatisfied with changes in assignments may grieve the assignment under the negotiated grievance procedure. [Title 38 employees are permitted to grieve the assignment only to the extent consistent with 38 U.S.C. 7422.] Other employees may grieve using the following procedures:

   a. The employee may discuss the dissatisfaction with the official who approved the change.

   b. If the employee feels that the explanation given is not satisfactory, the employee may discuss the change of duty assignment with the next level supervisor, or their designee.

   c. After giving full consideration to the employee's reasons for dissatisfaction, the second level supervisor will advise the employee of the final decision.

   [NOTE: Bargaining unit and non-bargaining unit employees may not grieve changes in assignments under the agency grievance procedure. See VA Handbook 5021, Part IV, Chapter 3, Paragraph 16x which excludes from coverage “all matters for which review procedures are already established in VA policy.”]

2. REASSIGNMENTS

   a. Approval. Officials are authorized to effect the reassignment of employees in positions over which they have personnel management approval authority. Reassignments are to be processed in accordance with VA Manual MP-6, Part V, Supplement No. 1.5.

   b. Reassignments [Related to Staff Reductions]

      (1) Reassignments Within a Facility (and the Same Commuting Area). Employees dissatisfied with reassignments within a facility (and the same commuting area), may express their dissatisfaction using the procedures in paragraph 1 above. If multiple labor agreements are involved, employees are to grieve under the procedures covering the position from which the employee is being reassigned.

      (2) Involuntary Reassignments Outside the Commuting Area or to Another VA Facility. Employees shall be given a minimum of 30 days advance written notice. The notice should include:

         (a) The reason for the reassignment.

         (b) Information about the specific assignment, location and proposed effective date.

         (c) A statement that employees may express their dissatisfaction through their negotiated grievance procedures or the grievance procedures in VA Directive and Handbook 5021. [Title 38 employees are permitted to grieve the reassignment only to the extent consistent with 38 U.S.C. 7422.]

   [NOTE: If a grievance is filed, the approving official may delay the reassignment until the grievance is resolved.]

IV-39
(d) Notice that employees have an opportunity to accept or decline the reassignment. This includes advising employees when and where their decision is to be submitted.

(e) Notice that a declination or failure to make an election may result in separation.

(3) Declination of Reassignment or Failure to Make Election. Separations for declination of reassignment or failure to make an election will be effected in accordance with the notice procedures in VA Directive and Handbook 5021.

NOTE: The specific advance notice in this chapter meets the 30 day notice requirement in VA Directive and Handbook 5021. Employees are not entitled to another 30 days notice prior to separation.

3. DETAILS

a. Details will be limited to the shortest amount of time possible.

b. Employees may be detailed to other assignments at their facility and to other VA facilities.

c. If a temporary reassignment rather than detail could benefit an employee (e.g., recomputation of basic or other pay), consideration should be given to temporarily reassigning an employee to the position.

NOTE: For instructions concerning interagency details and interagency loans and for temporary assignments under the Intergovernmental Personnel Act of 1970, see part III of this handbook.

d. Any detail in excess of 30 days will be documented in accordance with the provisions of OPM’s Processing Personnel Actions Handbook and MP-6, Part V, Supplement 1.5, [Chapter 3 and Appendix C].

e. Employees dissatisfied with a detail may express their dissatisfaction using the procedures outlined in paragraph 1 of this section.
SECTION [C]. TITLE 38 FURLOUGHS

1. FURLOUGHS OF 30 DAYS OR LESS. Employees may be furloughed for 30 calendar days or less based on an assessment of which assignments will be most critical to the continuing operations of the organization during the period of furlough. [(For furloughs of 30 days or less for title 5 and hybrid title 38 employees see Chapter 2, Section F of this part.]

2. FURLOUGHS OF MORE THAN 30 DAYS. [Title 38 employees appointed under the authority of 38 U.S.C. 7401(1),] shall be identified for furloughs for more than 30 calendar days in accordance with the procedures for identifying employees for [reduction in force]. (See chapter 2, section F, paragraph 3 [this part]. [(For furloughs of more than 30 days for title 5 and hybrid title 38 employees see Chapter 2, Section F of this part.]

3. LENGTH OF NOTICE PERIOD
   a. Whenever possible, employees will be given 30 calendar days advance written notice.
   b. This notice period may be shortened or waived only in the event of circumstances not controllable by Department officials, such as sudden emergencies requiring immediate curtailment of activities.

4. CONTENTS OF NOTICE. The written notice shall advise the employee of:
   a. The reason(s) for the furlough.
   b. The effective date(s) and expected duration of the furlough.
   c. The basis for identifying the employees to be furloughed when only some of the employees in an organizational unit are to be furloughed.
   d. The circumstances which warrant waiver of the 30 day notice requirement, if applicable.
   e. The place where the employee may inspect the applicable regulations and records.
   f. The employee's right to appeal. (See paragraph 5.)
   g. Any effects of the furlough on the employee's entitlement to retirement, life and health insurance, or any other benefits.

5. APPEALS. Bargaining unit employees whose furloughs are approved by the Under Secretary for Health may express their dissatisfaction through applicable negotiated grievance procedures. [Title 38 employees are permitted to grieve the furlough only to the extent consistent with 38 U.S.C. 7422.]

Employees not in a bargaining unit may express their dissatisfaction using the procedures in VA Directive and Handbook 5021, except that employees appointed under 38 U.S.C. 7401(1) may request a hearing and the scope of the grievance shall be limited to application of the appropriate procedures.
6. RECORDS OF FURLOUGH ACTIONS. All records of furlough actions shall be retained at least [6] years from the effective date or until any appeal has been resolved, whichever is later.
APPENDIX A.
TITLE 5 SELECTION REQUIREMENTS IMPOSED BY THE REEMPLOYMENT PRIORITY LIST, VA CAREER TRANSITION ASSISTANCE PLAN AND INTERAGENCY CAREER TRANSITION ASSISTANCE PLAN

1. ORDER OF SELECTION AND CONSIDERATION. The following is to be used when filling a competitive service vacancy under the [RPL, (5 CFR, part 330, subpart B), CTAP, (5 CFR, part 330, subpart F), and the ICTAP, (5 CFR, part 330, subpart G)].

   a. Selection of a displaced or surplus VA employee in the local commuting area, who applies within the prescribed timeframe for a vacancy at the same or lower grade with the same promotion potential and is determined to be well-qualified, then;

   b. Consideration of a qualified employee from within the facility under the Priority Placement Program (PPP) For Employees in Retained Grade or Pay Status (see appendix III-F of this handbook) and any facility-wide special placement programs, then;

   c. Consideration of qualified RPL registrants in the local commuting area, then;

   d. Selection of any qualified current VA employee from within or outside of the facility, then;

   e. Selection of a current or former well-qualified displaced Federal employee from another agency in the local commuting area who applies within the prescribed timeframe under the ICTAP, then;

   f. Selection of any other candidate from outside of the agency, including selection from a Federal certificate of eligibles, a reinstatement eligible, a transfer from another agency, a noncompetitive appointment, or any other routine competitive staffing action.

2. SELECTION ACTIONS OF VA EMPLOYEES NOT RESTRICTED BY 5 CFR, PART 330, SUBPART F.

   a. Placement of an agency employee through reassignment, change to lower grade, or promotion when no employees eligible under 5 CFR, part 330, subpart F apply;

   b. Reemployment of a former agency employee exercising regulatory or statutory reemployment rights;

   c. Position changes resulting from disciplinary actions;

   d. Temporary appointments of under 121 days (including extensions);

   e. Exchange of positions between or among agency employees, when the actions involve no increase in grade or promotion potential.
f. Conversion of an employee on an excepted appointment which confers eligibility for noncompetitive conversion into the competitive service;

g. Placement activities under 5 CFR, part 351;

h. Placement of an employee into a new position as a result of a reorganization, when the former position ceases to exist, and no actual vacancy results;

i. Placements made under the Intergovernmental Personnel Act (IPA) as provided in 5 CFR, part 334, where they are for critical situations and where the failure to make the assignment would substantially harm Federal interests, such as providing training for State takeover of a Federal program;

j. The filling of a position through an excepted appointment;

k. Details;

l. Time-limited promotions of under [121] days;

m. Noncompetitive movement of surplus [or] displaced employees;

n. Movement of excepted service employees within an agency;

o. A placement under 5 U.S.C. 8337 or 8451 to allow continued employment of an employee who has become unable to provide useful and efficient service in his or her current position because of a medical condition;

p. A placement that is a "reasonable offer" as defined in 5 U.S.C. 8336(d) and 8414(b);

q. Career-ladder promotions; [

r. Recall of seasonal employees from non[-]pay status[; and]

s. Other exclusions listed in 5 CFR 330.606(d).]

3. SELECTION ACTIONS OF NON-VA APPLICANTS NOT RESTRICTED BY 5 CFR, PART 330, SUBPART G

a. Selections from VA’s CTAP or RPL as described in 5 CFR, part 330, subparts F and B, or any other internal movement of current VA employees;

b. Appointments of [10 point veteran preference eligibles (CP, CPS, and XP), if reached through an appropriate appointing authority];

c. Reemployment of former VA employees who have regulatory or statutory reemployment rights;

d. Temporary appointments of under [121] days;
e. An action taken under 5 CFR, part 351;

f. The filling of a position by an excepted appointment;

g. Conversions of employees on excepted appointments that confer eligibility for noncompetitive conversion into the competitive service;

h. Noncompetitive movement of displaced employees between agencies [ ] as a result of [interagency] reorganization[, or transfer of function[, or mass transfer;]

i. Placement of injured workers receiving workers compensation benefits[; and

j. Other exclusions listed in 5 CFR 330.705(c).]
APPENDIX B.
VHA RIF DELEGATION OF AUTHORITY (RCN 10-96-1)

1. BACKGROUND. VHA is committed to maintaining a stable workforce through such measures as forecasting workload accurately, estimating turnover and attrition rates, and analyzing local labor markets. It remains VHA’s goal to manage the size and composition of its workforce pro-actively, utilizing reduction-in-force (RIF) procedures where alternative approaches do not reasonably appear to be able to achieve management goals or ensure effective use of scarce resources.

2. DELEGATION. In order to enable local management to utilize their human and financial resources most effectively, and to take advantage of opportunities to re-engineer and streamline work processes and organizational structures, the Under Secretary for Health has delegated to network directors and to facility directors the authority to conduct reduction-in-force RIF procedures and effect reassignment, change-to-lower grade, and separation actions for title 5 employees in non-centralized positions. Network and facility directors will exercise this delegation consistent with the procedures set forth in 5 CFR, part 351, and part IV of this handbook. RIF actions demoting, separating, or adversely affecting employees in centralized positions [and in title 38 and hybrid positions] will be approved in VHA.

3. RESPONSIBILITIES

   a. Labor-Management. Directors should work with their [local labor organizations] in planning and executing RIF procedures.

   b. Procedures. Facilities wishing to conduct a RIF should identify the universe of positions to be eliminated by position title, occupational series and grade level, together with a brief explanation of the basis for the action. This could include such bases as elimination of services, consolidation of services or functions between two or more facilities, re-allocation of workload, review of staffing or staffing mixes, etc. This listing should be forwarded to the Assistant Deputy Under Secretary for Health, [(ADUSH)] through the Network Director as early as possible, but not less than 14 days before specific notices are given to individual employees.

   c. Career Transition Assistance. Facilities planning to effect downsizing or streamlining through the use of RIF procedures must establish career transition assistance services consistent with VA and Federal government policies, as soon as possible. An outline of the plans for such services should be forwarded to the [(ADUSH)] as they are developed.

   d. Title 38 Personnel. The RIF procedures defined in this appendix [also] do not apply to the title 38 personnel appointed under sections 7401(1) [and to hybrid personnel appointed under 7401(3)]. If facility directors wish to implement [staff reductions] involving title 38 [and hybrid] employees appointed under [ ] these authorities, they may do so [only after consulting with the ADUSH before any actions are taken].

4. REPORT. OMB has required that VHA track several specific items related to the RIF process [ ] for future budget submissions. Facility directors must ensure that they develop systems which will identify, track, and report the information required on a one-time basis, within 90 days following completion of
RIF procedures. This information should be submitted through the Network office. It will be aggregated in VHA Central Office, and reported to OMB. Reports Control Number (RCN) 10-96-1 is assigned to this report. The categories required are:

(1) Full cost of implementation of the RIF including cost of:

(a) Grade and pay retention;

(b) Severance pay;

(c) Lump-sum terminal annual leave;

(d) Unemployment compensation;

(e) Out-placement services;

(f) Personnel processing; and

(g) Grievances and appeals.

(2) Projected costs associated with the changes to the mix of occupations and personnel, and actual costs based on average salary once RIFs have been fully implemented.

(3) Projected long-term savings associated with the final structure of the organizations affected by the RIF, including measures for efficiencies realized under the new structure.
APPENDIX C. VHA DELEGATION OF AUTHORITY
TO REDEFINE COMPETITIVE AREAS

1. DELEGATION. The Under Secretary for Health has delegated the authority to redefine competitive areas for organizations under their jurisdiction to network directors, with the advice and assistance of the office of the Deputy Assistant Secretary for Human Resources Management [059]. Such redefinitions must be fully justified and documented to ensure that such action is clearly in the best interest of VA.

2. RESTRICTIONS. When management establishes or changes competitive areas:

   a. Descriptions of the areas must be readily available for review by employees and OPM.

   b. Such actions must be taken at least 90 days prior to [the effective date of the] RIF.

   c. If such actions are contemplated within 90 days of [the effective date of the] RIF, OPM must approve.

   **NOTE:** Guidance concerning establishment of new competitive areas may be found [in Section B, Chapter 2, this part].

3. REDELEGATION. This authority may not be re[-]delegated.
1. GENERAL. The guidance in this appendix should be reviewed by the Human Resources (HR) staff and other appropriate subject-matter-experts (SME) when establishing competitive levels (CL) for physicians, dentists, expanded function dental auxiliaries, registered nurses, nurse anesthetists, podiatrists, optometrists, and chiropractors.

2. FACILITY RESPONSIBILITY. As with title 5 and hybrid title 38 positions, each facility shall establish competitive levels for title 38 positions following the basic criteria found in 5 CFR 351.403 and Chapter 2, Section C, paragraph 1, this part.

3. COMPETITIVE LEVELS. A competitive level will consist of all positions in a competitive area which are in the same grade and occupational series, and which are similar in duties, responsibilities, and working conditions so that the facility may reassign the incumbent of one position to any of the other positions in the CL without undue interruption.

4. UNDUE INTERRUPTION. Undue interruption is defined as a degree of interruption that would prevent the completion of required work by the employee, generally 90 days after the employee has been placed in a different position. However, the appropriateness of measuring undue interruption in a 90-day time frame should be considered in the context of the pressures, priorities, deadlines, and other demands made on individual health care provider positions in the provision of health care to Veteran patients, and the privileges, scopes of practice, competencies, skills, training, education, and experience required by the position to provide uncompromised health care to patients presenting with specific health care needs. Positions should not be placed in a competitive level on the basis of any employee’s personal qualifications, conduct, or performance levels but rather on the requirements of the position.

5. CONSULTING WITH SUBJECT MATTER EXPERTS. In addition to reviewing the documents that describe the assignments, responsibilities, qualifications, and competencies required of the position, HR staff should consult with SMEs when establishing and describing competitive levels as well as before placing employees on the appropriate levels.

6. ESTABLISHING COMPETITIVE LEVELS FOR TITLE 38 STAFF

   a. Registered Nurses. Competitive levels for Registered Nurses (RN) should be established considering the basic CL criteria, including RN pay levels: Nurse I, II, III, IV, and V. RNs have functional statements (FS) rather than more detailed position descriptions (PD). The position information included in the FS may or may not be sufficient to determine whether similarly titled and graded positions should be placed on the same or a different CL.

Example 1. A facility has two RNs, both Nurse III, working in Ambulatory Care. According to the functional statement, one RN, A, coordinates clinical projects; supports occupational health and employee health programs; supports clinical programs in an outpatient setting; assesses the physical and psychosocial health and illness status of individuals; and acts as a case manager. The FS of the other
RN, B, states that the RN is an Eye Clinic nurse who assists in evaluating and treating macular degeneration patients; makes appointments for medical clearance; performs intravenous injections; administers ophthalmic and general medications; and conducts diagnostic procedures such as basic visual screening, field measurement, and medical photography.

These two positions have the same title, occupational series, and grade, and are located in the same service. But the duties and the responsibilities of the positions appear different enough to warrant placement in different CLs. An argument could be made, however, that if Nurse A and B changed positions, one could learn the job of the other within 90 days and there would not be any undue interruption in patient care. Thus both positions would be on the same CL. It might also be possible that Nurse A could perform the duties of Nurse B within 90 days but Nurse B might not be able to perform the duties of Nurse A within 90 days. This scenario would require placement on different CLs. Communication with immediate supervisors, second level supervisors and/or the Ambulatory Care Chief is critical for the correct CL determination to be made.

Example 2. Two Nurse Managers both work in Patient Care Services. The FS for each position states that both RNs manage a nursing clinical area, demonstrate leadership through collaborative strategies with others, and evaluate the care delivered by nursing and other allied staff. However, RN A is a Nurse II and RN B is a Nurse III. Even though A and B have the same title, occupational series, and duties, they must be placed on different CLs because their pay grades are different.

Example 3. Two RNs, both Nurse II, are organizationally located in the surgical department and are assigned to the Surgical Intensive Care Unit. According to their FSs, they both care for patients who have had vascular, orthopedic, abdominal, or urological surgery. The geriatric patients may present with chronic medical conditions, changes in mental status, or functional decline. Given the identical titles, occupational series, pay levels, organizational location and work assignments as described in the functional statements, the two RNs should be placed on the same competitive level.

b. Advanced Practice Nurses. Nurse Practitioners and Clinical Nurse Specialists are Advanced Practice Nurses (APN) who are masters degree-prepared registered nurses who also possess advanced clinical certification. They function within a scope of practice (SOP), rather than a position description, commensurate with their training, experience, and licensure. An APN functions autonomously within her or his own defined SOP in a variety of settings, such as hospital inpatient, outpatient clinics, nursing home, domiciliary, or patient’s home. Competitive levels should be established using the basic CL criteria, including APN pay levels: Nurse I, II, III, IV, and V.

Example 1. APNs A and B are assigned to the Primary Practice Group (PPG) clinics within Ambulatory Care, functioning as Adult Nurse Practitioners. Their scopes of practice indicate they perform identical assignments and have identical responsibilities. If they are both Nurse III, they should be placed on the same CL; if A is Nurse III and B is Nurse IV, they should be on separate CLs.

APN C is also an Adult Nurse Practitioner assigned to an outpatient clinic in Ambulatory Care. The SOP indicates that C’s assignments and responsibilities are identical to A’s and B’s, with one exception: C is not responsible for drawing venous blood specimens for testing, as are A and B. Considering that C’s 16 functions are identical to A’s and B’s, is the omission of drawing blood from C’s scope an...
oversight? If so, depending on C’s pay level, C should be placed on the same CL as A and/or B. If the function of drawing blood is not an oversight from C’s SOP, could C perform the function of drawing blood without undue interruption in patient care? If yes, C should be placed on the same CL as A or B. If no, C should be on a CL separate from A and B. The HR Specialist should discuss the performance of the function with C’s first or second level supervisor or the chief of Ambulatory Care to assure C’s placement on the proper CL.

Ambulatory Care has another APN, D, functioning as an Adult Nurse Practitioner. D is assigned to the Occupational Health Clinic and is responsible for providing care to facility employees. Although APN D’s patients are employees rather than inpatients or outpatients, D’s SOP lists assignments almost identical to A’s, B’s, and C’s, with two exceptions. D also conducts pulmonary function tests and irrigates eyes to remove foreign bodies. To determine if D should be placed on the same CL as A or B or C, or on a different CL, information should be obtained from the supervisor or Ambulatory Care chief whose judgment is needed to determine if there would be undue interruption in patient care if A or B or C were placed on the same CL as D.

Example 2. The facility has three APNs: A, a Gerontology Nurse Practitioner assigned to Primary Care and Cardiology clinics in Medical Service; B, an Adult Nurse Practitioner assigned to a clinic in Radiation Oncology Service; and C, a Clinical Nurse Specialist assigned to the Adult Psychiatric & Mental Health clinic in the Mental Health & Behavioral Sciences Service. All are Nurse III.

The scope of practice for the three APNs list 20 functions an APN may perform. A, B, and C have five functions in common: documenting diagnoses and plans of care, initiating medication orders, initiating consults and referrals, ordering laboratory tests, and ordering other procedures as required. A and B also take and document histories; interpret test results; and order diet, oxygen, and non-pharmaceutical therapies. Additionally, A serves as a primary care provider; writes admission orders and discharge summaries; orders and administers Mantoux tests; obtains informed consents; and conducts exercise stress tests; while B also prescribes controlled substances; diagnoses and assesses patients on radiation therapy; and designs and conducts research projects.

After reviewing the three SOPs, it would seem that APN C should be on a CL separate from A and B because C’s assignments are significantly different from those of A and B. While A and B perform many similar functions, the different functions they each perform may lead to a determination that A and B should also be on separate competitive levels. Supervisory input is needed to determine if interchanging A and B would cause undue interruption in patient care and also if different skills and competencies are sought when recruiting.

c. Physician Assistants. Physician Assistants (PA) provide diagnostic and therapeutic care and services under the guidance of a physician. Competitive levels should be established using the basic CL criteria, including PA pay levels: associate grade, full grade, intermediate grade, senior grade, and chief grade. A PA does not have a position description; the assignment is based on a Scope of Practice. The scope usually divides the PA’s assignments into four categories: routine, emergency, non-routine/non-emergency, and additional duties. Scopes should be carefully reviewed before establishing competitive levels and placing incumbents on those levels.
Example 1. Physician Assistant A is a full grade PA assigned to the Nursing Home Care Unit in the Extended Care Service. PA B is also assigned to the Nursing Home Care Unit but is an intermediate grade. PA C is an intermediate grade but assigned to the General Internal Medicine Unit in Medical Service.

Included in PA A’s scope are such functions as initiating consultations, ordering laboratory tests, incision drainage, wound care, suturing, urethral catheterization, nasogastric intubation, administration of oxygen, start IV line, participate in case conferences and data gathering, precept training of PA students, and develop and implement patient education programs.

PA B performs many of the same functions as A but does not initiate consults, order lab tests, suture or intubate. B’s scope and overall assignments may not appear to be significantly different from A’s, but a better understanding of these functions should be obtained from a supervisor or service chief to determine the degree of undue interruption that could occur should A and B be interchanged. However, because A is a full grade and B is an intermediate grade requiring placement on separate competitive levels, there is no need to determine the degree of undue interruption.

PA C more routinely performs many of the same functions as A and B, including ordering diagnostic tests, inserting nasogastric tubes and urinary catheters, ordering medications and starting IV’s, initiating consults and making daily rounds, educating patients and teaching healthcare students, and participating in case conferences. C also carries out such assignments as ordering arterial blood gases, writing discharge orders, ordering restraints, and participating in research.

Being assigned to Medical Service would not preclude C from being placed on the same CL as B, who is in Extended Care, as long as their pay grades were the same, which they are, and as long as their duties and the qualifications for their positions were sufficiently similar so as not to cause undue interruption were B and C to be interchanged. Since B and C are in different services additional information would have to be obtained from supervisors and chiefs from each of the two services involved.

Example 2. Physician Assistants A, B, and C are all assigned to the Healthy Aging Recovery Program (HARP) in Mental Health and Behavioral Sciences. Their SOPs indicate all three perform identical routine, non-routine/non-emergency, emergency, and additional duties. Additionally, A spends one day a week assigned to the Acute Inpatient Psychiatry Unit, B spends one day a week assigned to the Center for Outreach and Empowerment Residential Program, and C spends one day a week assigned to the unit for the Seriously Mentally Ill. Although these PAs spend 20% of their time assigned to different units, their SOPs do not indicate they perform any different duties. It, therefore, appears that A, B, and C should be on the same competitive level. Even if A, B, or C, or their supervisor or service chief proposed to make a case that the three PAs were not interchangeable because of their different additional assignments, the written documentation, the SOP, does not support such an argument.

Example 3. Physician Assistant A is assigned to the Orthopaedic Section of Surgical Service. PA B, also in Surgical Service, is assigned to the Urology Section. Both A and B perform identical routine duties but their non-routine/non-emergency duties are different. According to the SOP, A performs knee, ankle, and shoulder arthrocentesis, and applies casts and skeletal and skin traction. B does not;
B’s SOP indicates that the PA dilates urethral structures and residuals, inserts and removes Foley catheters, assists in patient lithotripter services, performs microscopic urine screens, draws blood for arterial blood gases, and performs bladder irrigations.

Based on the differences in the SOP, it appears that one PA probably would not perform the duties of the other PA without undue interruption in patient care. But, unless the HR Specialist is knowledgeable about the performance of, and time frame required to learn, the different non-routine/non-emergency functions, input from an SME must be sought to insure the placement of the positions on the correct CL.

d. Physicians. Like other title 38 employees, physicians do not have position descriptions, nor are their assignments outlined in a functional statement or a scope of practice. Physicians instead provide information which shows the specialty/subspecialty in which the employee is certified, experienced, or trained, the employee’s core clinical privileges, and the special privileges and procedures requested by the employee and granted by the approving official. Each facility uses locally-developed formats for requesting this information, but regardless of the format, this privileging document, along with the basic criteria for establishing competitive levels, should be reviewed thoroughly before placing a physician on a CL.

The base pay grades for physicians (associate through director grades) have been eliminated and replaced with a single physician grade. Within the physician grade, physicians may be placed in one of four tiers which recognize different levels of responsibility. These responsibilities must be considered when establishing competitive levels.

Example 1. Four physicians, A, B, C, and D, have been granted core clinical privileges in Internal Medicine (IM). Physician A’s privileging form shows he also specializes in Rheumatology and is authorized to perform Arthrocentesis, but does not have core clinical privileges in Rheumatology. In addition to IM, B is specialized in Geriatrics, is authorized to perform hyperalimentation and to insert internal jugular and subclavian venous catheters, but does not have Geriatric core clinical privileges. Physician C does not have additional core clinical privileges but is authorized to work in the Emergency Room, which requires advanced certification in life support (ACLS). D has additional core clinical privileges in Gynecological Family Practice.

Because D is the only physician with additional core clinical privileges, he probably should be placed on a CL separate from A, B, and C. Although they do not have additional specialty core privileges, A, B, and C each have one or two additional privileges or procedures. Are these differences sufficient to warrant the placement of each on a separate CL? Could the competencies needed to perform these additional privileges be learned, and authority to perform them obtained, without any undue interruption in patient care?

A fifth Physician, E, also lists specialties of Internal Medicine and Geriatrics but does not have core privileges in either, but instead has core clinical privileges in Long Term Care which authorizes her to treat general medical problems. She is not authorized any additional privileges or procedures. Based on a review of the privileging forms, A, B, C, and D may be able to perform E’s assignments without undue interruption, but the reverse may not be true, thus requiring E to be placed on a separate CL.
HR staff should consult with the appropriate service chiefs to clarify the additional privileges and procedures possessed by A, B, and C, and to determine if one, two, or three additional CLs must be established. The competitive level(s) established must be clearly defined and documented in terms of assignments and qualifications required to perform those assignments in order to justify why an employee was placed on one level and not another.

Example 2. Physicians A, B, C and D are all board certified in Internal Medicine, yet none of the four have core clinical privileges in IM. They have core privileges in Endocrinology, Cardiology, Gastroenterology, and Hematology, respectively. Although consultation with their service chief should never be discounted, each of the four should be placed on separate competitive levels. It is unlikely that one could perform the assignment of the other without undue interruption in patient care.

Example 3. Physician A is board certified in General Surgery and Surgical Critical Care, has General Surgery core clinical privileges, and is authorized to perform the special procedures of laparoscopic surgery, bronchoscopy, and conscious sedation. B is board certified in Surgery and Thoracic Surgery and has Cardiothoracic core clinical privileges. C is also board certified in Surgery and is authorized to perform Vascular Surgery clinical procedures as well as transluminal angioplasty, endovascular aneurysm surgery, and carotid angioplasty and stenting. D, who is a Podiatrist, has Podiatry core clinical privileges which include performing ankle and foot surgery as well as ankle arthroscopy. Physician E is a board certified Plastic Surgeon with an Otolaryngology subspecialty who has Plastic Surgery clinical procedures and is authorized to perform liposuction.

Although A, B, and C are board certified in Surgery, all three have core clinical privileges in different specialties, including different special procedures. Based on the information included in the privilege form, the three surgeons should be placed on different competitive levels, considering their different assignments and the different qualifications required to perform those assignments. The same is true of the Podiatrist, D, and the Plastic Surgeon, E. They both perform surgery but are certified in different specialties from each other and from A, B, and C, and have different core clinical procedures. Unless the chief of Surgery can justify that the surgical procedures performed by these five employees are interchangeable and would not cause undue interruption in patient care, all five should be placed on separate competitive levels, which must be described to clearly distinguish one level from another.

Example 4. Psychiatrists A, B, and C are all board certified in General Psychiatry and have Psychiatry core clinical privileges. Psychiatrist A is also certified in Clinical Psychopharmacology and has additional privileges in Long Term Care. Psychiatrist B has additional certifications in Addiction and Geriatric Psychiatry. Psychiatrist C does not have any additional certifications or privileges.

Although both A and B have additional certifications, and C does not, B and C have the same privileges, indicating the possibility of placing them on the same competitive level, and placing A on a separate CL because of her additional privileges. If, however, B and C are, in fact, given different patient assignments, and if one performs functions that the other cannot perform because one possesses competencies and skills that the other does not have, and placing them on different CLs because of undue interruption is being considered, the differences in B’s and C’s assignments should be documented for the record and the CL definitions clearly distinguishable from each other.
e. **Dentists.** Like physicians, dentists do not have position descriptions, functional statements or scopes of practice. They are granted privileges after completing the Criteria & Privilege Request Form which delineates their certifications and training. The privileging form, the basic competitive level criteria, and input from supervisors should be considered before establishing CLs and placing employees on the levels.

The base pay grades for dentists (associate through director grades) have been eliminated and replaced with a single dentist grade. Within the dentist grade, dentists may be placed in one of four tiers which recognize different levels of responsibility. These responsibilities must be considered when establishing competitive levels.

**Example.** Dentist A has General Practice Dentistry core clinical privileges and Periodontics privileges, as well as authority to perform additional Periodontal special procedures. Dentist B has Oral Surgery core privileges including authority to perform additional Oral Surgery special procedures. Dentists C and D both have General Practice Dentistry core clinical privileges.

Three competitive levels should be established. One for the Oral Surgeon, one for the General Practice Dentist with Periodontics privileges, and one for the two General Practice Dentists, unless the Chief Dentist can document that C and D care for patients who present with significantly different problems, have acquired different skills and competencies, and therefore, cannot be interchanged without undue interruption in patient care.]
[APPENDIX E. CHECKLIST FOR VERA REQUESTS]

This checklist provides VA organizations with a framework for submitting requests to Office of Human Resources Management (OHRM) for Voluntary Early Retirement Authority (VERA). All of the information covered in this VERA template is required by statute or regulation.

Organization(s): ________________________________________________

Date of Request: ________________________________________________

_____ 1. Request is signed by the appropriate Under Secretary, Assistant Secretary or Other Key Official or a specific designee with delegated authority.

_____ 2. Identifies the organizational unit(s) for which a determination is requested.

_____ 3. Clearly states reason(s) why the authority is needed:

*The reason(s) must describe the circumstances leading to the request and explain why the organization believes that VERA will be an appropriate strategy for making the required adjustments in the workforce. This must also include a detailed summary of the organization’s personnel and/or budgetary situation that will result in an excess of personnel because of a substantial delayering, reorganization, reduction in force, transfer of function, or other workforce restructuring or reshaping.*

_____ 4. Identifies the date which the organization expects to effect the substantial delayering, etc.

*The date provided must not be earlier than the ending date provided in number 5 below.*

_____ 5. Show the time period during which the organization plans to offer VERA.

_____ 6. Provides the total number of non-temporary employees in the organization undergoing change.

*If you are requesting VERA for only a part of your organization, provide the data for that portion of the organization only. Do not provide the number of permanent employees for the entire organization.*

_____ 7. Provides the total number of non-temporary employees in the organization who may be involuntary separated, downgraded, transferred, or reassigned as a result of the organization’s situation.

*If you are requesting VERA for only a part of your organization, provide the data for that portion of the organization only. Do not provide the number of permanent employees for the entire organization.*
8. Provides the total number of employees in the organization who are eligible for early retirement.

*If you are requesting VERA for only a part of your organization, provide the data for that portion of the organization only. For this purpose, you should exclude all employees who are eligible for optional retirement.*

9. Includes an estimate of the total number of employees in the organization who are expected to retire early during the period covered by the request for VERA.

*If you are requesting VERA for only a part of your organization, provide the data for that portion of the organization only.*

10. Provide a description of the types of personnel actions anticipated as a result of the organization’s need for VERA.

*This information need not be comprehensive. It should, however, be detailed enough to show how VERA will assist you in accomplishing your restructuring, reshaping, and/or downsizing plans—and the personnel actions you expect to take in concert with VERA to accomplish your goals.*
APPENDIX F. VOLUNTARY SEPARATION INCENTIVE PAYMENT FACT SHEET

1. GENERAL. Upon approval from the U.S. Office of Personnel Management, VA and other departments/agencies may offer voluntary separation incentive payments (VSIPs or buyouts) to employees who are in surplus positions or have skills that are no longer needed in the workforce, as an incentive to separate. A VSIP is a lump-sum payment of up to $25,000 or an amount equal to the amount of severance pay an employee would be entitled to receive, whichever is less. Employees may separate by resignation, optional retirement, or by voluntary early retirement if authorized.

2. EMPLOYEE ELIGIBILITY. An employee is eligible to receive an offer for a VSIP provided he/she meets ALL of the following conditions:

   a. Serving under an appointment without time limitations;

   [ ]

   [b.]. Currently employed by the Federal Government for a continuous period of 3 years;

   [c.] Serving in a position covered by an agency VSIP offer;

   [d.] Applied for and received approval for a VSIP under an agency VSIP plan; and

   [e.] Not included in any of the ineligibility categories identified in paragraph 3 below.

3. INELIGIBILITY. Employees in the following categories are not eligible for VSIP. Employees who:

   a. Are reemployed annuitants;

   b. Have a disability such that the individual is or would be eligible for disability retirement;

   c. Are in receipt of a decision notice of involuntary separation for misconduct or unacceptable performance;

   d. Previously received any VSIP from the Federal Government;

   e. During the 36-month period preceding the date of separation, performed service for which a student loan repayment benefit was paid or is to be paid;

   f. During the 24-month period preceding the date of separation, performed service for which a recruitment or relocation incentive was paid or

   g. During the 12-month period preceding the date of separation, performed service for which a retention incentive was paid or is to be paid.
4. VSIP REPAYMENT REQUIREMENT

   a. An employee who receives a VSIP and later accepts employment for compensation with the Government of the United States within 5 years of the date of the separation on which the VSIP is based, including work under a personal services contract or other direct contract, must repay the entire amount of the VSIP to the agency that paid it - before the individual's first day of reemployment.

   b. The Director of the Office of Personnel Management may, at the request of the Secretary, waive the repayment upon reemployment in VA if:

      (1) The individual involved possesses unique abilities and is the only qualified applicant available for the position; or

      (2) In case of emergency involving a direct threat to life or property, the individual:

         (a) Has skills directly related to resolving the emergency; and

         (b) Will serve on a temporary basis only as long as the individual's services are made necessary by the emergency.]
[APPENDIX G. CHECKLIST FOR VSIP REQUESTS]

This checklist provides VA organizations with a framework for submitting requests to Office of Human Resources Management (OHRM) for Voluntary Separation Incentive Payment (VSIP) authority. All of the information covered in this VSIP template is required by statute or regulation.

Organization(s): ____________________________________________________________

Date of Request: ____________________________________________________________

1. Request is signed by the appropriate Under Secretary, Assistant Secretary or Other Key Official or a specific designee with delegated authority.

2. Request identifies the organizational unit(s) for which a determination is requested.

3. Request identifies the intended use of the VSIP authority and includes a VSIP Implementation Plan and Human Capital Plan.

4. The VSIP Implementation Plan includes:

   a. Identification of specific positions and functions to be reduced or eliminated (identified by organization unit, geographical location, occupational category, grade level and any other factors related to the position);

   b. A description of the categories of employees who will be offered incentives (identified by the organizational unit, geographical location, occupational category, grade level and any other factors such as skills and knowledge, or retirement eligibility);

   c. The time period during which incentives will be paid;

   d. The number and maximum amounts of voluntary separation incentive payments to be offered;

   e. A description of how the organization will operate without the eliminated/restructured positions;

   f. A proposed organizational chart displaying the expected changes in the organizational structure after the organization has completed the incentive payments;

   g. If the organization has requested VERA, an explanation of how that authority will be used in conjunction with VSIP; and

   h. If the organization is offering separation incentives under other statutory authority, a description of how that authority is being used.]
