STAFFING

1. REASON FOR ISSUE:  To issue Department of Veterans Affairs (VA) policy regarding staffing and recruitment.

2. SUMMARY OF CONTENTS/MAJOR CHANGES:  This directive sets forth policies previously contained in numerous other issuances.  No substantive changes have been made.

5. RESCISSIONS:  Refer to the Transmittal Sheet for VA Directive 5001, “General Introduction and Administration.”

CERTIFIED BY:  

BY DIRECTION OF THE SECRETARY OF VETERANS AFFAIRS:

John A. Gauss  
Assistant Secretary for Information and Technology  

Jacob Lozada, Ph.D.  
Assistant Secretary for Human Resources and Administration

I-H. SAMPLE NOTIFICATION LETTER ..................................................................................................................I-H-1]
1. THE RECRUITMENT PROCESS. Recruitment, or more specifically, positive recruitment, is the proper application of the elements that comprise the planned process of identifying general and specific staffing needs and of locating, attracting, and employing the best qualified available individuals. This is achieved by properly identifying and publicizing VA needs and opportunities, by developing and cultivating general and specific sources of candidate supply, and by identifying individual prospects and accomplishing the preliminaries necessary to appoint appropriate individuals. The process requires a continuous awareness of current and projected employment market conditions in order to capitalize on the availability of persons who are best qualified to perform the work of VA. It is the proper blending of publicity; employment market contacts, including schools, colleges, universities, minority group organizations and professional placement associations; knowledge of applicant supply; and aggressive efforts to seek out the best possible applicants that characterize the positive effort, rather than the routine recruitment procedure. It also requires determining and applying the proper mix of these elements in direct response to the staffing needs of VA. Some of the more common sources of candidates, and available recruitment aids, are discussed in paragraphs 4 and 5.

2. COORDINATION OF RECRUITMENT ACTIVITIES

   a. Recruitment Activities within VA. For recruitment purposes, there are no clear-cut boundaries between field facilities and recruitment efforts overlap in areas where two or more field facilities are each conducting recruitment activities. Coordinated efforts, therefore, should be a common goal to facilitate certain recruitment relationships among VA field facilities in proximity to each other, as well as with educational institutions and other organizations. For example, Veterans Health Administration field facilities should coordinate their efforts within the Veterans Integrated Service Network (VISN) so that a cohesive, unified and economical recruitment effort is maintained.

   b. Recruitment Activities Sponsored by Non-VA Organizations. VA Human Resources Management (HRM) and other officials will participate, as appropriate, in recruitment activities sponsored by such organizations as the U.S. Office of Personnel Management (OPM), Federal Executive Boards, chambers of commerce, educational institutions, and professional organizations. This participation should normally be in proportion to expected benefits to VA. VA officials who are in a position to influence the content of such efforts should ensure that VA recruitment needs are adequately represented.

3. RECRUITMENT PLANNING

   a. General. An important responsibility of the HRM Officer is to anticipate the staffing needs of the installation and, in conjunction with other field facility officials, to develop plans for meeting those needs. This requires:

      (1) Understanding the nature of the work done in each segment of the installation and of its relationship to the work of other segments;
(2) Understanding the knowledges, skills, abilities, and personal attributes required to do the work of the segment most effectively;

(3) Awareness of situations, conditions, and developments which indicate future personnel needs in each program; and

(4) Active participation in committees whose actions affect staffing decisions, e.g., budget, position management, equal employment opportunity, and employment of disabled veterans and handicapped individuals.

b. Prior Determinations. Before recruiting for a specific position, the HRM staff must determine:

(1) That an authorized position vacancy exists, or will exist, and that appropriate approval for filling the position has been given;

(2) For title 5 positions, that the position is properly classified and if any limitation exists as to the number of employees that can be supported at a given grade level;

(3) For title 38 positions, that the functional statement and credential requirements are reviewed and are current;

(4) The type of appointment and any special conditions of employment such as hours of duty, shift arrangements, time limitations, and alternate grade levels;

(5) The appropriate qualification standard and any selective certification or quality ranking factors which may be appropriate;

(6) The appropriate recruitment sources and techniques to use and whether to use them singularly or in combination. In this regard a determination must be made as to whether there exists any applicable negotiated agreement provisions which would govern the sources and techniques to be used or the sequence of their use; and

(7) That all requirements under the VA Career Transition Assistance Program (CTAP), Interagency Career Transition Assistance Program (ICTAP), and other priority consideration programs have been met. See parts III and IV of this handbook.

c. Selection and Training of Recruitment Officials. An important part of the recruitment planning process is the selection and training of recruitment officials. VA personnel who contact candidates for employment or officials of recruitment sources should be those best qualified for this purpose. A favorable image presented by the recruiter can be the first step in bridging the gap between interest and employment. The selection and training of recruitment officials is, therefore, of paramount importance.
d. Recruitment Strategies

(1) Intensive cultivation of newspaper, radio, and television outlets for news about VA job opportunities. This includes public service announcements, cable television advertising, advertisement in professional journals and on organizational and professional web sites.

(2) Use of mailing lists of professionals in the community, schools, vocational counseling offices, and particularly of professional or other occupational associations. Such organizations may be willing to circulate information to their members about VA career opportunities.

(3) Inviting students and others to indicate their vocational interests for possible future employment. When vacancies occur, facility officials will have a ready list of candidates to contact about VA employment.

(4) Careful development of institutional relationships with teachers, editors, influential professionals, etc.

(5) Preparation and strategic distribution of well-illustrated pamphlets on specific occupations or professions, medical center fact sheets, and local Chamber of Commerce brochures, etc.

(6) Periodic visits and programs directed to college/university campuses to interest students in working for VA.

(7) Maintaining impressive and informative exhibits of VA careers at conventions, state fairs, and similar events where large numbers of persons are in attendance.

(8) Sponsoring an “open house” or “job fair.”

(9) Personalized letters to applicants who are interested in employment instead of patterned or photocopied letters.

(10) Telephone contacts, particularly by officials from those facilities actively seeking candidates, demonstrate a genuine interest in the prospect and provide for an expeditious exchange of pertinent information.

(11) Paying travel expenses for pre-employment interviews and for reporting to the first duty facility, if such actions may be authorized.

(12) Maintaining contacts with branches of the military that may be discharging persons with needed skills.

(13) Regularly informing veterans service organizations about VA staffing needs and career opportunities.
(14) Encouraging follow-up contacts when recruiting for VHA mission critical positions by using promotional items of nominal value, in accordance with the provisions of paragraph 5b(1)(h) of this chapter, and MP-4, pt. V, chap. 3, paragraph 3A.13.1a.

4. RECRUITMENT SOURCES

   a. General. Recruitment sources are varied and numerous. The extent to which the sources will be utilized will depend on local recruiting needs and resources. The sources described below, plus any developed locally, may be used singularly or in combination as circumstances indicate.

   b. Standard Sources. When labor market conditions are favorable, the following recruitment sources will normally produce a sufficient number of highly qualified candidates.

(1) Vacancy Databases

   (a) Under 5 CFR 330.707, facilities must post on OPM’s USAJOBS vacancy database all VA title 5 competitive service vacancies for positions which last over 120 days and for which applicants outside VA will be accepted, unless the position is filled by an ICTAP eligible. The USAJOBS posting requirement does not apply to appointments under title 5 excepted service authorities (e.g., 5 CFR, parts 213 and 307), but does cover positions of 121 days and up filled under 5 CFR, part 316 time-limited hiring authorities, even if based on excepted appointment eligibility such as VRA under 5 CFR, part 307. Facilities have the option of posting other vacancies on USAJOBS such as those in the excepted service of title 5 or any in the title 38 excepted service.

   (b) VHA’s [Healthcare Retention and Recruitment Office (HRRO/10A2D) operates the VACareers Web site which links interested applicants to USAJOBS postings of VHA title 38 and title 5 vacancies, as well as other VA vacancies.]

(2) Civil Service Certificates of Eligibles. [Along with consideration of candidates identified through in-service placement activities] the primary recruitment sources for filling competitive service positions are certificates of eligibles obtained from a VA or other Federal delegated examining unit or an OPM services office. (Ref: 5 U.S.C. § 1104 and VA-OPM Interagency Agreement # [D]VA-1 on delegated examining) [See Appendix B of this part.]

(3) Reemployment Priority List. Former VA employees on the facility’s reemployment priority list will be given consideration as required by 5 CFR 330.201 – 330.209 and 5 CFR 351.803 and part IV of this handbook.

(4) Surplus and Displaced Employees. Surplus and [d]isplaced employees of VA and other Federal agencies will be given employment consideration as required by 5 CFR, part 330 [subparts F and G] and part IV of this handbook.
[[5]] Applicant Supply System. An applicant supply system may also be used to maintain applications from persons having eligibility for excepted or noncompetitive appointment. Any applicable vacancy announcement requirements must be met.

c. Other Sources. When the above recruitment sources fail to supply a sufficient number of well-qualified candidates, other sources such as the following should be explored. Candidates identified through outside recruiting sources, such as the following, must be considered for Federal employment in accordance with applicable VA and civil service regulations, requirements and procedures, including veteran preference.

(1) Colleges and Universities. Through its close ties with medical and other schools, VA is associated on a day-to-day basis with these potentially productive recruitment sources. From a recruitment standpoint, professional contacts by line and staff officials with their academic counterparts are invaluable and should be cultivated and maintained. Such contacts, however, do not assure that these recruitment sources are being fully utilized. Therefore, VA field facilities will conduct a long range, general VA employment information program at local colleges and universities. Positive recruitment efforts are necessary to fully capitalize on these sources. HRM Officers should assume a leadership role in coordinating these efforts. Central Office staff officials who develop similar programs for specific positions pertinent to their functions will attempt to maintain the same alignment of local schools and field facilities. General instructions to field facilities concerning such separate programs will be coordinated with the Deputy Assistant Secretary for HRM[&LR] prior to issuance. Similarly, VA field facility officials participating in local, State, or regional college recruitment programs will, if feasible, do so in affiliation with the local schools.

(2) Other Educational Institutions. Appropriate efforts should be conducted at educational institutions below the bachelor’s degree level. Junior colleges, trade and technical schools, and high schools may prove to be productive sources of candidates for specific local recruitment needs. To some extent, the value of these efforts must be judged in terms of long-range objectives attained through career orientation and motivation of students.

(3) VA Employees. One of the most productive recruitment sources for a field facility is its own employees. To capitalize on this source, responsible officials need to keep employees informed about VA recruitment needs. This may be accomplished by the use of e-mail and other electronic communication systems such as the internet and/or VA intranet (e.g., the VA Vacancy Database referred to in paragraph 4b(1)(b) of this chapter; conspicuous posting of local and VA-wide employment opportunities on employee bulletin boards; publicity in facility newsletters; and staff meeting announcements). For positions which are included in exclusively recognized units, facility management may consider seeking the assistance of the labor organization which holds exclusive recognition for that unit in the facility’s recruiting effort. Employee assistance in recruitment can be encouraged by granting appropriate incentive awards, including cash awards, to those employees whose efforts result in the appointment of a candidate to a hard-to-fill position. (See VA Handbook 5017, Employee Recognition and Awards.)
(4) State Employment Services. Local offices of the various State employment services are equipped to give advice regarding labor market conditions, publicize position vacancies, and screen and refer applicants. Many of these offices are organized to provide recruitment assistance for professional occupations, as well as for skilled and unskilled workers.

(5) Outside Recruiting Assistance from Commercial Recruiting Firms and Non-profit Employment Services. Profit-making commercial recruiting firms and professionally sponsored non-profit employment services are legitimate sources in recruiting for hard-to-fill positions. The services are provided via written contract and typically include publicizing an employer's vacancies and referring resumes of any interested applicants who appear to meet the basic qualification requirements. See 5 CFR 300.401 – 300.408 and Appendix I-A for applicable regulatory and procedural requirements. Participation in professional associations' conventions and meetings, many of which feature on-site placement operations, also often pays recruitment dividends. In addition to these formal approaches, informal contacts with professional associations at the national, regional, State, and local levels are often productive. Line and staff officials can play an important role in recruitment activities of this type.

(6) Competing Organizations. Contacts with other Federal, State, county and municipal agencies and private institutions employing the same types of personnel as VA are sometimes productive — not to recruit their staff but to invite referrals of personnel who may have declined their offers or are surplus to their staffing needs.

(7) Career Days. Career days, job fairs, and other similar events can serve as productive sources. Such events are sponsored by educational institutions, chambers of commerce, civic groups, and other organizations.

(8) [Pathways Programs for Students and Recent Graduates]. This source yields [employees] who tend to be more immediately productive as they are already familiar with the working environment of VA or another Federal agency [, as applicable]. (See 5 CFR 213.[3402] (a) and (b) and section C of chapter 2, this part.)

(9) Allied Health Training. This source includes VA-funded allied health trainees, such as those established in social work, dietetic and psychology disciplines.

(10) Normally Unemployed Persons. Workers in seasonal industries within the local area may be available for off-season work in VA. Also, the possibility may be explored of obtaining services from members of the local population who normally are not employed, such as students, homemakers, and retired persons. Appropriate consideration should be given to establishing part-time positions to capitalize on the skills and motivation of such individuals.

(11) State Licensing Bodies. State licensing organizations will often furnish names and addresses of newly licensed individuals who may consider employment with VA.

(12) Special Interest Groups. Community action groups, women's organizations, fraternal societies, welfare groups, rehabilitation organizations concerned with training and placement of persons with disabilities, and similar organizations will often provide placement assistance.
(13) **Organizations Representing Minorities or Applicants With Disabling Conditions**

(a) **Minority Applicants.** A program to recruit minority applicants should include ongoing relationships with historically black colleges and universities, the Hispanic Association of Colleges and Universities, alumni associations, and other organizations involved in the placement of minority applicants [(HACU)].

(b) **Applicants With Disabling Conditions.** Efforts to recruit applicants with disabling conditions should include contacts with the local Equal Employment Opportunity specialists; rehabilitation agencies connected with State, county, municipal or private health care facilities; local, State or national offices of professional, veterans or other associations furthering employment opportunities for people with disabilities; and colleges, universities and other schools with candidates for employment in occupations found in VA.

(14) **Veterans Organizations and U.S. Military Services.** In addition to other sources listed, to reach the work-ready veteran population, including disabled veterans, information about vacancies may be communicated to Veterans Benefit[s] Administration vocational rehabilitation counselors, VA Vet Centers and veterans organizations. When feasible, recruitment contacts may also be made with military separation centers.

(15) **VA Placement Service.** [VHA’s] Health Care Staff Development and Retention Office (HCSDRO/10A2D), 1555 Poydras Street, Suite 1971, New Orleans, LA  70112, maintains placement and referral services for [Title 38 full excepted service occupations and Title 38 hybrid occupations]. Those filing application forms with the VA Placement Service are referred, based on their geographic preference and specialty, to medical centers requesting lists of candidates. Applicants may obtain registration materials or additional information by calling the HCSDRO toll-free on 1-800-949-0002. VA facilities may request Placement Service referrals for a vacancy via the same toll-free number.

(16) **VA Central Office Program Officials.** When health care facilities have been unsuccessful in recruiting for vacancies, they may request informal advice and assistance from the appropriate Service Director or other appropriate program official on VA Central Office staff. Contacts should reference all pertinent information on the assignment involved. For physicians, the contact should identify the specialty, required qualifications, and intended assignment.

(17) **Supplemental Sources.** Potentially productive sources also include the public interest programs for such individuals as enrollees of Federally funded economic opportunity programs, people with disabilities, rehabilitated public offenders, and others.

(18) **VA Central Office Assistance.** The Office of Human Resources Management and Labor Relations (057) and the Office of Diversity Management and Equal Employment Opportunity (06) are available to assist in the development of recruitment programs.
5. AIDS TO RECRUITMENT

a. Recruitment Incentives. Several incentives are available for use in enhancing VA's ability to recruit, particularly for hard-to-fill positions. Plans for recruitment should capitalize on these provisions to the maximum extent necessary. Among these incentives are:

(1) Higher Salary Rates

(a) Special Salary Rates for Recruitment and Retention. Special salary rates and ranges are established under the provisions of 5 U.S.C. 5305 for certain occupations and grade levels for which there are significant recruitment or retention hindrances. (See 5 CFR 530.301 – 530.307, and VA Handbook 5007, Pay Administration.) Recruitment officials must be aware of these rates in order to conduct effective recruitment and be alert to situations which might justify requesting approval of these rates for other occupations on either a local or nationwide basis.

(b) Above Minimum Rates for Candidates With Superior Qualifications. Under the provisions of 5 U.S.C. 5333, certain persons may be appointed to positions at a salary rate above the minimum rate for the particular grade level on the basis of the candidate’s superior qualifications. (See 5 CFR 531.203(b) and part II, chapter 3, paragraph 4 of VA Handbook 5007, Pay Administration.)

(c) Above Minimum Rates for Occupations Involving Direct Patient-Care Services. Under the provisions of 38 U.S.C. 7408(b), individual appointments above the minimum rate of the grade may be made in General Schedule and title 38 occupations which provide direct patient-care services or services incident to patient-care services. (See part II, chapter 3, paragraph 3 of VA Handbook 5007, Pay Administration.)

(2) Travel and Transportation to First Post of Duty. Authority exists for the payment of travel and transportation expenses for appointees to report to their first post of duty. (See 5 CFR, part 572 and MP-1, pt. II, ch. 2.) Where such expenses may be paid, this possibility should be communicated to prospective employees so that it will have the maximum favorable effect on recruitment.

NOTE: Travel expenses that can be paid for new employees are limited in scope. Refer to MP-1, part II, chapter 2 before informing prospective employees. (There is a related service obligation agreement requirement.)

(3) Travel Expenses for Visits of College Officials. VA field facilities may pay travel expenses of educational institution officials for the purposes of consulting with them on VA employment opportunities and on recruitment problems and techniques. VA officials should consider capitalizing on these provisions in instances where they sponsor or participate in career day programs, host open house events, or host student groups for tours of field facilities for long-range recruitment purposes. (See MP-1, pt. II, ch. 2.)

(4) Travel Expenses for Pre-employment Interviews. Payment of travel expenses for pre-employment interviews may be a useful and necessary approach for ascertaining an applicant's qualifications for a position. (See 5 CFR, part 572, and MP-1, pt. II, ch. 2.)
(5) **Recruitment Bonuses.** Authority exists for the payment of a recruitment bonus as a lump-sum payment of up to 25% of basic pay to an employee newly appointed to a position that would otherwise be difficult to fill. In return, the employee must sign an agreement to fulfill a period of service with VA. (See 5 CFR, part 575, subpart A and VA Handbook 5007.) Where such a bonus may be paid, this possibility should be communicated to prospective employees so that it will have the maximum favorable effect on recruitment.

(6) **Relocation Bonuses.** Authority exists for the payment of a relocation bonus as a lump-sum payment of up to 25% of basic pay to a current employee who must relocate to a position in a different commuting area that would otherwise be difficult to fill. In return, the employee must sign an agreement to fulfill a period of service with VA. (See 5 CFR, part 575, subpart B, and VA Handbook 5007.) Where such a bonus may be paid, this possibility should be communicated to prospective employees so that it will have the maximum favorable effect on recruitment.

**NOTE:** Information on retention allowances can be found in 5 CFR, part 575, subpart C and VA Handbook 5007.

b. **Recruitment Techniques**

(1) **Publicizing VA Recruitment Needs.** Publicizing VA recruitment needs will normally be initiated by HRM officials in collaboration with line and staff officials. When non-HRM officials take such initiative, their activities will have the prior concurrence of the HRM Officer for the field facility or of the Deputy Assistant Secretary for HRM in Central Office, as appropriate. To supplement the vacancy databases covered in paragraph 4b(1) of this chapter, there are several added means of making VA employment opportunities known to recruitment sources. Among these are:

(a) **Advertising**

1. VA regulation in 38 CFR 2.4 delegates authority to the following officials to order paid advertising for recruitment purposes: Administration Heads; Assistant Secretaries; Other Key Officials (the General Counsel, the Inspector General, the Chairman, Board of Veterans’ Appeals, the Chairman, Board of Contract Appeals, and the Director, Office of Small and Disadvantaged Business Utilization); Deputy Assistant Secretaries; the Deputies of such Officials; the Deputy Assistant Secretary for HRM; Associate Deputy Assistant Secretary for HRM; and field facility directors.

2. Prior Central Office approval is not required in placing recruitment advertisements having a local or State-wide audience or for advertising regarding title 38 positions; and there are no restrictions on the type of advertising media used, e.g., newspapers, periodicals, radio, or television. Paid advertisements for positions in the competitive service having a nation-wide audience or area of publicity will require the prior approval of the Deputy Assistant Secretary for HRM (05). When a number of field facilities request approval to advertise nationwide for a particular position, consideration will be given to utilizing a larger VA-wide advertisement placed by the Office of HRM or other central office component in lieu of the smaller advertisements requested by the field facilities. All advertisements should be in good taste and appear in media that are appropriate in terms of the type and location of the positions involved.
3. A file for each advertisement will be established and maintained for 2 years. The file will include such pertinent information as a copy of the advertisement, media used, cost, and a concise assessment of the results achieved. This information will be evaluated to determine the effectiveness of advertisements and to plan any needed improvements in future advertising efforts. Upon request, this information will be forwarded through channels to the Deputy Assistant Secretary for HRM&LR (05) for review and analysis.

[(b)] Recruitment of Minorities and Women. Recruitment activities will be designed to reach and attract job candidates from all segments of society. Where appropriate, these activities should be tailored to improve their effectiveness among members of special groups. The following techniques may be helpful in this respect:

1. Participation in recruitment activities and outreach contacts of program coordinators for employment of Hispanics, women, disabled veterans and other people with disabilities, and students/graduates of the HACU and of Historically Black Colleges and Universities, or other EEO representatives;

2. Spanish translation of job announcements, fact sheets, pamphlets, and other recruitment literature;

3. Use of the Spanish language to reach the Hispanic public via the various media (radio, television, newspapers, and magazines);

4. Pictures of Hispanic and other minority employees and women in recruitment literature and exhibits; and

5. Identification of specific positions in which the employment of bilingual, bicultural persons would enhance VA's responsiveness to the unique needs of a large segment of the population which it serves.

[(c)] Recruitment Literature. Recruitment literature developed by VA Central Office or by OPM is usually designed to support recruitment efforts on a VA-wide basis. This literature may be supplemented by additional material identified or developed by field facilities.

[(d)] Recruitment Exhibits. Several professionally prepared recruitment exhibits are available from Central Office for use by field facilities on special occasions. Requests for these exhibits should be made through channels to the [Director, Office of Administration] or [ ] for some [health care] occupation portable exhibits, to the Under Secretary for Health, HCSDRO (10A2D). These exhibits may be supplemented by ones developed locally.

[(e)] VA Fact Sheets. These are descriptive summaries of VA field facilities, their mission and special programs, and the community and surrounding areas, which are used to inform and interest prospective applicants in employment. Photographs are used to show facility features and activities, as well as historical and recreational items of interest. Fact Sheets are developed by the field facility with the advice and assistance of the Deputy Assistant Secretary for HRM&LR (059).
Open House Activities. An effective means of publicizing VA recruitment needs is through local open house activities. Such activities are usually held in conjunction with Veterans Day, National Hospital Week, or similar observances; and they present excellent opportunities to publicize local, as well as VA-wide employment possibilities. Presentation of exhibits, distribution of recruitment literature, showing of film and similar recruitment messages can often be used effectively during activities of this type.

Promotional Items of Nominal Value in Recruiting for VHA Positions. Under 38 U.S.C. 7423(f), VA organizations and facilities may expend appropriated funds to purchase items of nominal value for use in recruiting individuals for employment in positions filled under 38 U.S.C. chapter 74 in the Veterans Health Administration (VHA). Promotional item use will be limited to recruitment for occupation(s) considered mission critical based on the need to interest qualified applicants given current and anticipated job market conditions. (The companion Finance policy is in MP-4, pt. V, chap. 3, paragraph 3A.13.1a, dated June 18, 1993.)

1. An item whose total cost (including any taxes and related fees) amounts to no more than $5.00 per individual recipient is considered to be of nominal value. Note that suitable items are usually available for a small fraction of the $5.00 maximum. Purchase requests for such items will document the justification for the expenditure level in keeping with the criticality of the recruitment need.

2. The item’s purpose of serving as a recruitment aid must be evident on the item itself. To serve as a recruitment aid, the item will include a permanent display of:

   a. The Department’s VA logo and/or the name of either the Department of Veterans Affairs or the VHA facility purchasing the item.

   b. A telephone number and/or address (e-mail, mailing, and/or [W]eb site) to provide potential applicants with a VA point of contact for recruitment follow-up.

   c. Space permitting, a recruitment slogan or message.

3. The entire item’s design is to be professional and tasteful, and to reflect favorably on VA as a preferred employer.

Recruitment on an Individual Basis. The approach to be used in recruiting for a specific position should be tailored to fit local needs and circumstances existing at the time. There are some fundamental principles, however, that apply across-the-board in all recruitment activities. Some of these principles are discussed below.
(a) **Communicating With Prospects.** One of the most important stages in the recruitment process is the initial contact with a potential applicant. Whether by telephone, written communication, or otherwise, the initial contact represents the point in the recruitment process at which an individual either loses interest in VA employment or becomes an interested candidate.

(b) **Interviews.** An equally important stage in the recruitment process is the employment interview, whether at the initial contact stage or at the selection consideration stage. Officials with responsibilities in this area should be thoroughly trained in the techniques of conducting successful interviews. In tight labor market situations, consideration should be given to publicizing and conducting interviews after normal working hours and during weekends, either on-site or at locations more convenient to prospective candidates. Other field facilities located closer to an applicant's home should be utilized to the maximum extent possible to conduct personal interviews.

(c) **Administrative Requirements.** Application procedures and subsequent processing requirements should be accomplished with the prospect's convenience in mind at all times. The objective should be to make it as easy as possible for a prospect to make application, be interviewed, have a physical examination conducted if required, and be appointed.

6. **EVALUATING THE RECRUITMENT PROGRAM.** The effectiveness of the recruitment program must be reviewed and evaluated on a continuous basis. The objectives and evaluation standards and procedures outlined in VA Handbook 5001 will be followed.
CHAPTER 2. SPECIAL RECRUITMENT PROGRAMS

SECTION A. VETERANS EMPLOYMENT PROGRAMS

1. EMPLOYMENT OF DISABLED VETERANS, VIETNAM ERA VETERANS AND OTHER QUALIFIED VETERANS. Field facilities are to make on-going efforts to employ and advance disabled veterans and Vietnam era veterans. All facilities should use these key techniques:

   a. Demonstrated support from each facility’s top management.

   b. Productive recruitment outreach activities, including liaison with VA Counseling Psychologists and/or Vocational Rehabilitation Counselors, State employment service offices, State rehabilitation agencies, OPM service[s office]s, veterans organization representatives, etc.

   c. Effective use of available special appointing and training authorities.

   d. Full implementation of the field facility affirmative action program plans for employment of disabled veterans and other persons with disabilities.

   e. Assurance that these veterans have full access along with other employees to promotion, training, and advancement opportunities.

   f. Periodic evaluation of facility progress. A report which should provide some basis for these internal reviews is the quarterly statistical Disabled Veteran and Vietnam Era Veteran Employment Report (computer-generated COIN PAI 204 Report).

2. SPECIAL APPOINTING AND TRAINING AUTHORITIES

   a. Authorities for Appointment and Training of Veterans. There are a number of title 5 authorities specifically covering appointment and training of veterans and/or preference eligibles. These authorities cover: appointment under the amended Veterans Employment Opportunities Act (VEOA); Veterans [Recruitment] Appointments (VRAs); time-limited appointment of VRA eligibles; noncompetitive appointment of disabled veterans with a service-connected disability of 30 percent or more; unpaid training/work experience and possible subsequent noncompetitive appointment of service-disabled veterans (see subparagraph b [ ]); and appointment of Congressional Medal of Honor recipients. Additional details on these authorities are located in part II, chapter 2 of this handbook.

   b. Unpaid Training/Work Experience for Service-Disabled Veterans. VA policy is to promote maximum use of authority granted by 38 U.S.C., chapter 31 to provide unpaid training for certain service-disabled veterans and by 5 CFR 3.1 and 315.604 to noncompetitively appoint such veterans to continuing positions and then convert them to career-conditional (or career). Facility heads will assess areas appropriate for chapter 31 training and advise the rehabilitation and employments staffs of servicing VA regional offices of these opportunities so that trainees may be referred.
(1) **Utilization and Training.** There are two means through which Federal agencies may provide on-the-job training for disabled Veterans under Chapter 31 authority—as paid employees via a regular appointment and as Chapter 31 unpaid trainees. Chapter 31 unpaid trainees will not replace or be used in lieu of regular employees for whom funds and ceiling have been provided. This training is to be provided on a host-enrollee basis for which an agreement, VA Form 22-1904, Agreement to Train On-the-Job Disabled Veterans, is required. WOC (without compensation) appointments are inappropriate.

(2) **[Noncompetitive] Appointments.** Special emphasis will be directed toward full utilization of the 5 CFR 315.604 [noncompetitive] appointment authority to enhance employment opportunities for disabled Veterans who complete training. Every effort will be made to place Chapter 31 unpaid trainees who successfully complete training. This should include close coordination with Veterans Benefits Administration (VBA) rehabilitation and education staffs, referral for employment consideration to other VA facilities, and referral to other Federal agencies if employment opportunities are not available within VA.

c. **General.** Authorities specifically covering appointment and training of Veterans are referred to above. Numerous other hiring or training authorities, while not specifically aimed at the Veteran population, also often prove useful for those Veterans who meet the applicable eligibility requirements. Examples include: the various authorities for appointing persons with disabilities (see 5 CFR, part 213 and part II, chapter 2, section C, this handbook); the time-limited appointment authorities (see 5 CFR, part 316), and part II, chapter 2, section B, this handbook); and such programs as [Pathways Programs] (see 5 CFR, part 213 and part II, chapter 2, section C, this handbook) and VA Alcohol and Drug Abuse Rehabilitation Counseling (see part II, chapter 2, section C, this handbook). See also 5 CFR, part 330, subpart D for information on positions restricted to preference eligibles (custodian; guard; messenger; and elevator operator). In addition, 38 U.S.C. 4214(g) authorizes the Secretary to accord preference for employment in VA of qualified Vietnam era Veterans and certain disabled Veterans as Veterans benefits and psychological readjustment counselors, Veterans claims examiners, outreach personnel, and Veterans' representatives at educational institutions. See also, paragraph 5 of part II, chapter 2.

3. EMPLOYMENT OF VETERANS WITH MEDICAL MILITARY OCCUPATION SPECIALTIES

a. **Statutory Basis.** Section 201 of the Veterans Health Care Expansion Act of 1973 (Public Law 93-82) amended section 7302 of title 38, United States Code, which now requires VA to "... carry out a major program for the recruitment, training, and employment of Veterans with medical military occupation specialties as (A) physician assistants; (B) expanded-function dental auxiliaries; and (C) other medical technicians ... [including] measures to advise all such qualified Veterans ... and members of the armed forces about to be discharged or released from active duty ... of employment opportunities with the Veterans Health Administration ..." The phrase "other medical technicians" includes all the positions associated with the direct [healthcare] of patients, as well as research and other medical related professional, technical, and assistant or aid type career fields.

b. **Employment Information.** Recruiting materials for specific occupations are sent to U.S. military discharge centers as part of the initial distribution process, and are also available upon request.
c. Field Facility Actions

(1) VA HRM offices and veterans assistance offices will use [VA recruitment information] with veterans having medical military occupation specialties. Veterans who request information as a result of computer generated letters (FL 20-680) will be provided the [ ] appropriate recruitment literature.

(2) When outside recruitment is appropriate, the recruitment process will include notification of the vacancy, with a summary of the qualifications needed, to be furnished to the appropriate VA Vet Center and State Employment Service office. Positive efforts will be made to employ applicants referred by these offices.

(3) VA HRM officers will review the monthly Specialty Discharge Listing furnished by the VA Automation Center, Austin, Texas. Those veterans identified as possible applicants for present and anticipated vacancies will be contacted promptly to explore their interests in VA employment.

(4) Chiefs, HRM at VHA facilities will maintain liaison with appropriate offices of military installations to the extent feasible in meeting the objectives of the law.

d. Reports. Periodic reports are generated through the PAID system to provide information to Central Office officials on VA progress in employing veterans with medical military occupation specialties. To identify such employees for reporting purposes through the PAID system, the Special Identifier Code "1" for Medical MOS must be entered on OLDE screens A120/A220, as indicated on page 6D-141 of MP-6, Part V, Supplement No. 1.5.
SECTION B. SELECTIVE PLACEMENT PROGRAMS

1. AFFIRMATIVE EMPLOYMENT PROGRAM PLANS

[a.] Affirmative employment program plans for people with disabilities and disabled Veterans are required by section 501 of the Rehabilitation Act of 1973, as amended, and the Vietnam Era Veterans’ Readjustment Assistance Act of 1974. These plans are developed in accordance with instructions issued by the Equal Employment Opportunity Commission (EEOC) and the Office of Personnel Management. Internal VA instructions for plan preparation and submission are issued by the Office of Diversity [and Inclusion].

2. PLACEMENT REQUIREMENTS

a. General

[(1)] In many instances, a specific disability bears no relationship to the actual abilities, skills, and knowledges required for successful performance of a specific job. It is essential[,] therefore, that each appointing officer and selecting official consider the individual capabilities of each disabled Veteran or other person with [a] disability[ ] in relation to the actual physical [and other] requirements of the position. Particular attention will be given to the degree to which the applicant or employee with [a disability can perform the essential job functions of the position with appropriate reasonable accommodation.] In addition, sound job redesign techniques should be employed to facilitate the placement[,] retention[,] and advancement of [ ] qualified people with disabilities. Reasonable accommodation [ ] will often enable people with disabilities to function effectively in positions for which they otherwise might appear to be unsuitable.

[(2)] Appointing officers and selecting officials should [familiarize themselves with diversity management and EEO policies contained in VA Directive 5975 maintained on the Office of Diversity and Inclusion Web site. Additionally, they should] explore the full range of placement flexibilities available in efforts to make effective placements of disabled Veterans and people with disabilities. This should include seeking professional advice and assistance from appropriate resources, including [Selective Placement Coordinators and other VA experts, such as Human Resources staff], when necessary in making sound placement decisions. In particular[,] and as needed[,] the guidance of counseling and rehabilitation specialists at VA regional offices and medical care facilities should be fully considered.
People with [intellectual disabilities, severe physical disabilities, and psychiatric disabilities] appointed under 5 CFR 213.3102(u) in Schedule A may be afforded concurrent consideration with competitive service employees under merit promotion procedures. Such an approach may significantly improve upward progression opportunities for employees with [intellectual disabilities, severe physical disabilities, and psychiatric disabilities]. (See paragraph 12 of part III, chapter 3, this handbook.)

b. **Physical Examinations.** Physical standards for title 5 positions are covered in part II, chapter 2, section D, this handbook. For title 38 positions, see part II, chapter 3, section A, this handbook. [Pre-placement physical examinations to determine fitness for employment are required for all full-time, part-time, and intermittent employees in designated positions (see VA Handbook 5019, Occupational Health Services). Fitness determinations for initial assignments and position changes to designated positions will be documented using Optional Form 178 (OF 178), Certificate of Medical Examination.] Only those functional requirements and environmental factors applicable to the specific job are to be [listed on the OF 178]. The Occupational Health Physician/Occupational Health Care Provider (VA Handbook 5019, Occupational Health Services) will review the health qualification findings [and recommend] employment where the abilities of the individual are predictive of successful performance in the position without hazard to the individual or others.

c. **Proof of Disability.** Proof of an applicant’s disability is required prior to making an appointment under Schedule A. Acceptable proof of an individual’s intellectual disability, severe physical disability, or psychiatric disability includes records, statements, or other appropriate information issued from a licensed medical professional (e.g., a physician or other medical professional duly certified by a State, the District of Columbia, or a U.S. territory, to practice medicine); a licensed vocational rehabilitation specialist (i.e., State or private); or any Federal agency, State agency, or an agency of the District of Columbia or a U.S. territory that issues or provides disability benefits.]
[d.] Written Tests. Where written tests are required by the Office of Personnel Management or approved for use by the Deputy Assistant Secretary for HRM[(05)] appropriate arrangements will be made for applicants with physical impairments to demonstrate pertinent knowledges, skills, and abilities by testing methods adapted to their special needs and circumstances. This includes those who are blind, deaf, and all others who may have difficulties in taking an examination in the normal manner.

[e.] Placement Evaluations. Special attention will be given to the 90-day placement follow-up and the probationary (trial) period certification as one means of ensuring that [an] employee with [a] disability[ ] is properly placed and has full opportunity to succeed. Should another assignment be indicated or if termination cannot be justifiably avoided, appropriate personnel action will be taken. (Title 5 references: In this handbook, part II, chapter 2, see requirements in section A, paragraph 10 on placement follow-up, and in section C, paragraph 5h on trial period. In VA Handbook 5021, Employee/Management Relations, see part III, chapter 2 for separations during trial period.)

3. SPECIAL TITLE 5 APPOINTING AUTHORITIES. In addition to the special appointing authorities specifically for disabled Veterans listed in paragraph 2, section A, this chapter, there are a number of title 5 excepted appointment authorities which may be used to facilitate employment of either disabled Veterans or [ ] persons with disabilities. These authorities cover appointment of: [people with intellectual disabilities;] people with severe physical disabilities; people with psychiatric disabilities; [ ] readers for employees who are blind; interpreters for employees who are deaf; and personal assistants for employees with disabilities. Details on these authorities are located in part II, chapter 2 of this handbook.

4. [DISABILITY] SELF-IDENTIFICATION PROCEDURE. HRM Officers will ensure that new appointees have the opportunity to [privately] self-identify any [disability] they may have by completing an SF 256, Self-Identification of [Disability, during new employee orientation. Completion of an SF 256 is voluntary for all employees except those appointed under Schedule A, 5 CFR 213.3102(u). Employees appointed under 5 CFR 213.3102(u) will be requested to identify their disability status and, if they decline to do so, their disability code will be obtained from medical documentation used to support their appointment. Since an employee’s [disability] status may change, facilities will annually encourage employees to keep their [disability] identification code current [electronically by accessing https://secure.vssc.med.va.gov/SF256 or manually] by visiting [their local] HRM office [ ]. Appointees and employees alike should be assured that the privacy of their [disability] identification will be preserved. [Disability data codes do] not appear on [ ] personnel records [within an employee’s Official Personnel Folder.] VA's affirmative employment program for people with disabilities [uses the resulting data only for statistical reports to reflect the level of program support and effectiveness].
SECTION C. [STUDENT EMPLOYMENT AND HEALTHCARE ADMINISTRATIVE RESIDENTS, INTERNS AND TRAINEES]

1. POLICY

   a. All VA establishments are encouraged to participate in the employment of students under the title 5 [Pathways Programs] and under title 38 authorities, especially when such participation will contribute to VA-wide employment objectives or facilitate recruitment for shortage category positions at individual field facilities. Facility use of such student employment features as the title 5 [Pathways Internship Program], which allows [noncompetitive] conversion to competitive positions, is an effective means of furthering equal employment opportunity objectives. Particular attention will be given to providing opportunities for Vietnam era Veterans, disabled Veterans, and students with disabilities. Details on student employment authorities are in part II of this handbook in chapter 2 for title 5 and chapter 3 for title 38.

   b. Healthcare facilities will take full advantage of the staffing flexibility offered by VA training programs in healthcare administration by appointing trainees in such programs under the [Pathways Internship Program]. Upon successful completion of the Internship Program, these trainees may be converted to [term,] career-conditional or career appointments, as appropriate.

   c. [5 CFR, part 362]
CHAPTER 3. GENERAL EMPLOYMENT

SECTION A. APPLICATION FORMS

1. TITLE 5 EMPLOYMENT APPLICATIONS

   a. General

      (1) Individuals not currently employed by VA may choose the written format for presenting their qualification and general eligibility data when applying for VA title 5 positions. Applicants will provide information needed to make suitability determinations separately on a form for that purpose. For positions whose qualification standard requires a credential (i.e., certification, licensure or registration (CLR)), the Federal Government-wide suitability questions may be supplemented by additional VA questions regarding required credential(s). [For USA Staffing recruitments, applicants should submit a résumé. Applicants are responsible for providing the information needed to determine their qualifications for the vacancy. This includes information such as: the vacancy announcement number, position title and grade; how to contact the applicant; descriptions of jobs held, including the name and address of employer, job title, description of duties, beginning and ending date (month/year) of employment, average hours worked per week, and supervisor’s name and phone number; education, including name and location of college, dates attended, and type and date of any degree earned; and other information, such as possession of licenses, certificates, etc. Descriptions of duties must be sufficiently detailed to document the applicant’s level of experience. Although not mandatory, if the position is (was) with the Federal government (military or civilian), applicants should state the series and grade or pay grade (rank) and the date of last promotion.]

      (2) To facilitate compliance with Veterans Health Administration (VHA) credentialing and privileging and other similar requirements, applicants for CLR occupations and other positions in VHA for which clinical privileges may be granted, will be required to respond to related supplementary questions.

      (3) VA employees will apply for VA positions using specified application forms.

   b. Employment Applications From Outside Applicants

      (1) Employment Applications. The Standard Form 171, Application for Federal Employment, [and the Optional Form 612 , Optional Application for Federal Employment, no longer serve as Federal Government-wide standard employment application forms]. Applicants from outside VA may provide their qualifications and general eligibility background data for title 5 VA positions in a written format of their choosing. Among the acceptable formats are resumes and existing copies of the expired SF 171 [and OF 612. For USA Staffing recruitments, a résumé is preferred. Applicants for USA Staffing recruitments apply online or fax their applications to the USA Staffing Processing Center. Exceptions may be provided for applicants with disabilities and applicants for title 38 and hybrid-title 38 vacancies, when applying outside the system.]

      (2) Federal Employment Declarations. In developing new application procedures for Federal employment, the Office of Personnel Management has separated qualification information from
suitability data. Suitability and various other questions previously on the SF 171 are now contained on
the Optional Form 306 [(OF 306)], Declaration for Federal Employment. In VA, the following time
frames have been established for an applicant's submission of the OF 306:

(a) Applicants for the following occupations/positions will submit a completed OF 306 with their
initial application, except as provided in paragraph 1b(2)(c) below. (An occupation/position may be
covered in multiple categories.)

1. All current Testing Designated Positions in VA (see VA Handbook 5021).
2. All positions whose qualification standard requires a credential, i.e., certification, licensure, or registration (CLR). (See also paragraph 1b(2)(d).) Current CLR positions as of this handbook's issuance are:

- Chaplain, GS-060 Diagnostic Radiologic Technician/Technologist, GS-647
- Psychologist, GS-180 (VHA only) Therapeutic Radiologic Technician/Technologist, GS-648
- Social Worker, GS-185 Dental Assistant, GS-681
- Nuclear Medicine Technologist, GS-601 Dental Hygienist, GS-682
- Dietitian and Nutritionist, GS-630 General Attorney, GS-905
- Motor Vehicle Operator, WG –5703 Air Conditioning Equipment Mechanic, WG -5306

3. Veterans Health Administration (VHA) positions for which clinical privileges may be granted consistent with medical facility by-laws, such as Audiologist/Speech Pathologist, GS-665, and Orthotist/Prosthetist, GS-667. (See also paragraph 1b(2)(d).)

4. All positions filled by VA delegated examining units.

5. Additional occupations/positions which local officials determine control significant VA funds and/or materiel resources, e.g., Accountant, GS-510; Agent Cashier, GS-530; and positions in other General Schedule series such as 1101, 1102, and 2001.

6. Positions determined to warrant initial receipt of the OF 306 for early review at the documented discretion of a Central Office Administration/Staff Office Head or designee, or the local facility Director or designee, for those positions within their respective jurisdictions.

   (b) Other outside applicants are to submit a completed OF 306 in time to allow for review of the OF 306 and final eligibility determinations prior to referral of a list of candidates to the selecting official.

   (c) Exception to early OF 306 Declaration submission as provided in paragraph 1b(2)(a): At the discretion of a Central Office administration/staff office head or designee, or the facility Director or designee, for those positions within their respective jurisdictions, the OF 306 submission can be required from all applicants for a given position vacancy or occupation subsequent to the initial application, if determined beneficial to attracting sufficient applicants and provided the requirements of paragraph 1b(2)(b) are met.

   (d) A supplemental credentials questionnaire will be submitted with the OF 306 by applicants for CLR positions in VHA and any other VHA positions for which clinical privileges may be granted.

c. Employment Applications From Internal Applicants

   (1) Employment Applications. [The SF 171 and the OF 612 no longer serve as Federal Government-wide standard employment application forms. Instead of using these application forms, applicants from outside VA may provide their qualifications and general eligibility background data for title 5 VA positions in a written format of their choosing] to the VA Human Resources Management Office responsible for staffing the specific vacancy. [Among the acceptable formats are resumes and...]

1-22
existing copies of the expired SF 171 and OF 612. For USA Staffing recruitments, a résumé is preferred. Applicants for USA Staffing recruitments apply online or fax their applications to the USA Staffing Processing Center. Exceptions may be provided for applicants with disabilities and applicants for title 38 and hybrid-title 38 vacancies, when applying outside the system.] This policy is modified by the following exceptions:

(a) An SF 171 [or OF 612] may [also be submitted] if the employee so chooses.

(b) VAF 4078, Application for Promotion or Reassignment, may be substituted by local facility employees when acceptable at that VA facility. [This form is not required for USA Staffing recruitments.]

(c) Until national union contracts citing the SF 171 are amended, those contract provisions continue in effect for positions of the appropriate bargaining unit(s).

(2) Federal Employment Declarations. Upon applying for initial entry into positions covered by paragraph 2, employees will be required to submit the OF 306 and the supplemental VHA credentials questionnaire, as applicable.

d. References

(2) 5 CFR, chapter 1, parts 110, 210-4, 250, 293-4, 297, and all 300's.

(3) 5 U.S.C. 1104, 1302, 3301, 3304, 3320, 3361, 3393, 3394 and 8716.

(4) 38 U.S.C., chapters 73 and 74.

2. TITLE 38 EMPLOYMENT APPLICATIONS

a. Application Forms. Candidates seeking employment under 38 U.S.C., chapter 73 or 74, must complete one of the following application forms:

(1) VA Form 10-2850, Application for Physicians, Dentists, Podiatrists, Optometrists, and Chiropractors;

(2) VA Form 10-2850a, Application for Nurses and Nurse Anesthetists;

(3) VA Form 10-2850b, Application for Residency;

(4) VA Form 10-2850c, Application for Associated Health Occupations;
(5) Standard Form 171 and 171A, Application for Federal Employment, or Optional Form 612, Optional Application for Federal Employment, and Optional Form 306, Declaration for Federal Employment. These forms are to be used by applicants for whom [ ] the above forms [are not] appropriate; primarily, this includes applicants for medical support or nonmedical consultant appointments. [The SF 171, 171A, and OF 612 forms are not required for USA Staffing recruitments. In USA Staffing, a résumé is preferred. Applicants for USA Staffing recruitments apply online or fax their applications to the USA Staffing Processing Center. However, exceptions may be provided for applicants with disabilities and applicants for title 38 and hybrid-title 38 vacancies, when applying outside the system.]
b. Application Review

(1) The HRM Officer or designee will thoroughly review each employment application to assure that all questions are answered and that additional information is provided where required. Applicants are to be asked to account for any gaps in their work history. This information shall be documented on the employment application, and, along with reference checks and other information obtained in the credentialing process, considered in the selection process. Incomplete applications are to be returned and applicants notified that they will not be considered for employment until their application has been fully completed. The HRMO will review applications for compliance with administrative and regulatory requirements. Applicants who do not meet appointment requirements should be so notified.

(2) For designated occupations, the appropriate officials at VHA’s Health Care Staff Development and Retention Office (HCSD&RO/10A2D) will review each employment application to assure all questions are answered and that additional information is provided where required. This does not abrogate the HRMO’s responsibility for review of the applicant’s application prior to appointment as indicated in subparagraph 2b(1).
SECTION B. PART-TIME CAREER EMPLOYMENT PROGRAM

1. GENERAL. The Federal Employees Part-Time Career Employment Act of 1978 (PL 95-437, approved October 10, 1978) requires each agency to establish by regulation a program of part-time career employment. The Act expanded on the President's memorandum of September 16, 1977, which called for an increase of permanent part-time employment opportunities in the Federal Government. 38 CFR 1.891 through 1.897 form the basis for this program and provide the general guidelines for operating a part-time career program in VA.

2. PROGRAM DESCRIPTION

   a. The Act defines part-time career employment as permanent employment with a scheduled tour of duty of between 16 and 32 hours per week. The Office of Personnel Management (OPM) regulations further define this type of part-time employment as that performed by individuals in tenure groups I and II. Thus, this program covers employees who have permanent-type appointments, in either title 5 competitive or excepted service, whose regularly scheduled tour of duty is between 16 and 32 hours per week.

   b. The Act permits each agency head to make certain exceptions as necessary to carry out the agency's mission. OPM has determined that this exception permits an agency to employ individuals for 1 to 15 hours per week, but does not permit such employment in excess of 32 hours per week.

   c. OPM regulations prohibit an agency from employing someone under a permanent-type appointment on a regularly scheduled tour of more than 32 hours per week. Consequently, anyone employed on a part-time basis under title 5 authority for more than 32 hours per week can be given only a nonpermanent, time-limited appointment (such as temporary, NTE 1 year), or be utilized on an intermittent basis.

   d. A part-time employee on the rolls prior to April 8, 1979, may continue to work the same regular tour of duty, regardless of length. A part-time employee on the rolls prior to April 8, 1979, may also have a tour of duty adjusted, including adjustments to tours in excess of 32 hours per week. On or after April 8, 1979, however, no one can be appointed under title 5 authority on a permanent part-time basis, nor can an employee change from full to part-time, if, in either case, the employee's tour of duty will exceed 32 hours per week.

   e. Individuals employed under the authority of 38 U.S.C., ch. 74 are not subject to the 32 hour per week OPM regulatory limitation described above. According to the Veterans Canteen Service Policy Letter #94-25 (HR) regarding VCS-1, Pt. III, Chapter 522.02, paragraph 03, an intermittent appointment is to be used for 38 U.S.C., ch. 78 positions of less than 16 hours per week.

   f. The Act did not change appointment authorities or procedures for filling part-time positions. Except as otherwise restricted by the provisions of this chapter, existing appointment and placement policies and procedures continue to apply.
g. 38 CFR 1.897 permits the Secretary, or designees, to except positions from inclusion in this program as necessary to accomplish the Department's mission. Accordingly, field facility heads may except any position, or group of positions, over which they have appointment authority. Centralized positions may be excepted by the appropriate administration or staff office head. They will also exercise this authority for central office positions, except for positions centralized to the Secretary. This exception provision may also be used in a similar manner to appoint individuals for less than 16 hours per week.

h. An employee's hours may be extended beyond the 32-hour limitation for short periods of time to accommodate unexpected workloads or to provide necessary training. Generally, an employee should not be assigned extra hours for more than 4 pay periods. If it appears necessary to provide full-time coverage for an extended period, management should consider establishing a temporary or permanent full-time position.

3. REVIEWING POSITIONS

a. VA regulation 38 CFR 1.892 requires that full-time positions be reviewed when they become vacant to determine whether they can be converted to part-time. Along with considering whether a vacant position should be filled at all and its proper classification, and reviewing appropriate methods by which to fill it, management should also consider whether the duties of a position could be performed on a less-than-full-time basis. If the duties of a position require full-time coverage, consideration should also be given to restructuring the job. Job restructuring techniques include:

(1) **Dividing the Duties of a Position Into Distinct Parts When the Duties Are at the Same Grade Level.** Part-time workers would be responsible for only those duties that are assigned to their part. For example, a mail and file clerk job could become two part-time jobs: a mail clerk and a file clerk. If a job is divided in this manner, separate position descriptions are required, and each position must be separately classified according to the appropriate classification standard.

(2) **Dividing the Workload of a Position.** Part-time workers would perform all the duties of a position, but only for that portion of the time they actually worked. This technique is more commonly known as job-sharing.

(3) **Dividing the Duties of a Job Into Different Levels.** One part-time employee would handle that portion of a job which covers the more technical or difficult duties, while another would handle the less difficult duties. As with jobs that are split as described in paragraph 3a(1) above, separate position descriptions are required. The duties must also be appropriately classified.

b. In addition to reviewing them when they become vacant, positions should also be reviewed for possible conversion to part-time as part of the normal position management review. Positions need not be reviewed, however, if:

(1) A position or group of similar positions has been reviewed for any reason within the previous 6 months.
(2) A determination has been made that the present mix of full-time and part-time positions within a group of positions is most appropriate for accomplishing the facility’s mission.

c. The following should be considered when reviewing positions:

(1) The duties of a supervisory position are generally more difficult to perform effectively on a part-time basis.

(2) Reduced staffing levels may inhibit establishing additional part-time positions. On the other hand, reduced employment ceilings may increase the need for additional part-time workers to make the most effective use of available resources.

(3) There may or may not be an adequate supply of qualified candidates willing to work part-time.

(4) Jobs with routine duties are often easier to fill on a part-time basis. However, some higher level professional, technical, and administrative positions at entry, middle, and upper grades can be effectively utilized as part-time as well.

(5) Part-time employees can be used effectively to cover peak work periods during the day.

(6) Part-time employees may enable a facility to extend its hours of service to beneficiaries who may be unavailable during normal duty hours. Part-time staff, for example, might be used to keep an activity open 1 to 2 nights per week and on Saturday mornings where there is a demonstrated need for such extended services.

d. The grade level of a position should not be the principal determinant of whether it can be converted to part-time. Its relationship to the organization, the actual workload of the position, and the availability of interested candidates are more important considerations.

4. PUBLICIZING VACANCIES

a. Part-time vacancies should be publicized in the same manner as full-time vacancies.

b. One objective of the program is to increase employment opportunities for older people, students, parents, and individuals with disabilities. Organizations which serve or represent these groups should be provided information on part-time vacancies when the need is indicated. Information on part-time vacancies should also be provided to groups representing or serving disabled and other veterans, women, and minorities, as appropriate.

c. Hard-to-fill part-time vacancies, particularly for technical, professional or administrative positions, should be included in the VA Recruitment Bulletin. (See paragraph 5b(1)(b) of chapter 1, this part.)
SECTION C. TEMPORARY ASSIGNMENT OF EMPLOYEES UNDER THE INTERGOVERNMENTAL PERSONNEL ACT (IPA)

1. GENERAL

   a. This section contains VA policies to be followed in implementing the Intergovernmental Personnel Act (IPA) Mobility Program. Office of Personnel Management (OPM) regulations and instructions are contained in title 5 Code of Federal Regulations (CFR), part 334, “Temporary Assignment of Employees Between Federal Agencies and State, Local, and Indian Tribal Governments, Institutions of Higher Education, and other Eligible Organizations.” Additional information and guidance on interpretation may be found in OPM’s A Handbook on the Intergovernmental Personnel Act Mobility Program.

   b. Only permanent, full-time title 5 and title 38 employees will be considered for temporary assignments. Employees serving on time-limited, temporary or term, non-career (SES), excepted service, or noncompetitive appointments are excluded from participation in the IPA Mobility Program. Additionally, students employed in research, graduate, or teaching assistant positions are not eligible to participate in the IPA Mobility Program.

   c. IPA assignments are intended to strengthen Federal, State, and local government management capabilities and should involve issues of mutual concern and benefit. The goal of the IPA Mobility Program is best served when employees with unique skills and knowledge participate. In general, the IPA Mobility Program is intended for persons holding appointments without limitations. Therefore, it is inappropriate to consider VA employees serving on Schedule C appointments, non-career executive appointments, or time-limited appointments (e.g., term appointments). In order to appoint to a limited term non-VA IPA-assignee to a career SES position, VA Central Office must first obtain authority from OPM.

   d. No individual or organization may participate in the IPA program if they are listed on the Department of Health and Human Services (HHS) Inspector General’s Exclusionary List. This restriction ensures compliance with the Balanced Budget Act of 1997 (Public Law 105-33) which specifies that no excluded individual or entity may receive payments from any Federal health care program for services furnished. (For additional information on the HHS Exclusionary List, see part II, chapter 1, section B of this handbook.)

2. POLICY

   a. VA will cooperate with State and local governments, institutions of higher education, Indian tribal governments, and other outside organizations in carrying out the provisions of the Act. Indian tribal governments and organizations are included in the term “State and local governments” when used in this directive. Before a VA or State/local government employee enters into a temporary assignment, a determination must be made that such action will contribute to more effective intergovernmental relations and programs. There must also be assurance that such assignments are filled by highly qualified employees. The temporary assignment of a VA employee must not impair VA services to veterans and their beneficiaries.
b. Assignments may be made on an intermittent, part-time, or full-time basis. No assignment should be made for more than 2 years initially. A single assignment may not exceed 4 years. An employee may not participate in additional assignments without a 12-month break in service. VA employees would return to their respective VA position and non-VA employees would return to their non-Federal organization. Successive assignments without a break of at least 60 calendar days are regarded as continuous service. Federal employees may not serve more than 6 years on IPA assignments during their career. This limitation does not apply to private sector employees.

c. Within VA, the majority of IPA agreements are approved to support VHA research projects through the use of affiliated university staff. Under no circumstances should IPA agreements be used as a mechanism for hiring clinical staff or as a substitute for scarce medical specialist, sharing, commercial item, or other clinical services contracts. Nor is it appropriate to use IPA agreements for administrative and support positions. In general, IPA agreements should not be used to circumvent restrictions on hiring due to budget constraints, reductions-in-force, freezes on grade levels, or ceiling allocations. Temporary assignment agreements for employees of State and local governments, institutions of higher education, and other outside organizations, who are detailed or appointed to VA, will be made in accordance with guidance provided in 5 CFR 334.106. Non-VA employees may exercise supervision over VA employees. Non-VA employees must be employed in a permanent position by their organization for at least 90 days to be eligible for an IPA assignment. Details of these employees may be made on a reimbursable, nonreimbursable, or a shared cost basis. VA employees may be detailed or placed in leave without pay status, to a State or local government or institution of higher education. In either case, non-VA and VA employees remain employed by their original organization and retain the rights, benefits, and obligations associated with their original appointment.

NOTE: A non-VA employee assigned by detail to a CLASSIFIED position in VA is entitled to earn the basic rate of pay, including any locality payment, which the duties of the assignment position would warrant under the applicable classification and pay provisions of VA. If the assignee’s non-Federal salary is less than the minimum rate of pay for the VA position, VA must supplement the salary to make up the difference. Supplemental pay may vary because of changes in the rate of pay of the VA position. Supplemental pay cannot be paid in advance or in a lump sum and is not conditional on the completion of the full period of the assignment. Supplemental pay may be paid directly to the employee or reimbursed to the non-Federal organization.

d. If an agreement involves nonprofit organizations, certification must be obtained before the assignment agreement can be approved. Authority for certification of VA nonprofit research corporations, who are members of the National Association of Veterans’ Research and Education Foundations (NAVREF), has been delegated to the Chief Research and Development Officer (12). All other requests for certification must be approved by the Secretary (see appendix I-C for submitting requests for Secretarial approval). A centralized list of Federally-approved certifications of nonprofit organizations is maintained by the Office of the Deputy Assistant Secretary for Human Resources Management [and Labor Relations], Human Resources Management [Recruitment and Placement Policy] Service (05[9]). If an organization has been certified by another Federal agency, that certification may be accepted or the VA facility requesting the agreement can choose to recertify through VA's certification process.
NOTE: This policy does not change any relationships that VA has or may establish with medical, professional, and other schools affiliated with VA for training purposes.

e. Cost-sharing arrangements for mobility assignments are negotiated between participating organizations. Normally, the larger share of the costs should be absorbed by the organization benefiting most from the assignment. Exceptions might occur if an organization’s resources do not permit costs to be shared on a relative benefit basis.

f. A VA employee given a temporary assignment of 90 days or less may be placed on leave without pay status or detailed, with the assignment being made on a reimbursable, or shared-cost basis. (However, because of the VA Appropriation Act limitations, any detail of VHA employees involved in the examination of other than VA beneficiaries, must be on a reimbursable basis.) For a temporary assignment over 90 days, an employee may be placed on a leave without pay status or he/she may be detailed. Any VA expenditures for assignments over 90 days may be fully reimbursable and credited to the VA appropriation from which payment is made. Exceptions to this policy may be approved by the person having approval authority for filling the position.

g. A non-VA employee may be detailed or appointed on a reimbursable, nonreimbursable, or shared-cost basis. If appointed for more than 1 year on a continuing appointment, the appointee is eligible for within-grade increases. Usually, an IPA-assignee is appointed at the minimum rate of the grade. However, if desired and properly negotiated, an advanced step rate for a position at GS-1 through GS-15 may be conferred, based upon superior qualifications.

h. Non-VA detailees are not eligible to enroll in the Federal Employees Health Benefits program, group life insurance, or the Federal Employee Retirement System. Non-VA appointees are not covered by any Federal retirement system or by the Federal Employees Group Life Insurance Program. They are not eligible for enrollment in the Federal Employees Health Benefits program unless their appointment with VA results in loss of health coverage from their non-Federal health benefits system.

i. Costs associated with an IPA assignment must include pay provisions with specific salary rate(s), any provisions for cost-of-living adjustments (COLA), fringe benefits, travel and relocation expenses, and income derived from certain private consulting work (usually considered as part of the pay of university employees).

j. The hours of duty must be cited, along with any additional requirements for additional work hours anticipated. Non-Federal detailees usually have the same workweek and hours of duty as other employees of the organization assigned. If the detailee is a non-Federal employee, they are eligible to participate in alternative work schedule arrangements. It is important to note which organization will be responsible for maintaining time and attendance records. All deviations from the standard tour of duty must be reported. It is important to maintain accurate timekeeping records for audit and review purposes.

k. Details are covered under the policy of the permanent employer’s leave system. The assignment agreement should specify which organization will be responsible for approving and reporting leave. The agreement should also spell out what holidays will be observed by the assignee.
1. Indirect administrative costs associated with preparing and maintaining payroll records, developing reports, negotiating the IPA agreement, office space, furnishings, supplies, staff support, and computer time are prohibited.

m. If a VA employee fails to fulfill an agreement before the expiration of the agreement or fails to complete one year of service under the agreement, whichever is less, applicable travel and transportation expenses are recoverable from the employee unless the assignment is terminated for reasons which are beyond the employee's control and are acceptable to VA. Recoveries will be returned to the paying office where VA was initially reimbursed for such expenses. The approving authority will be guided by the criteria for waiving such recovery as described in MP-1, Part II, Chapter 2, Appendix H, Employee’s Agreement To Remain In The Government Service for Twenty-Four (24) Months Or To Repay The Costs Of Travel And/Or Transportation Advanced.

n. If a non-VA employee terminates an assignment before the entire period or 1 year, whichever is shorter, he/she is liable for paid travel, relocation, and per diem expenses.

o. If an organization terminates the assignment, a 30-day notice to all parties involved is advised. This notification should be in writing and include the reasons for termination. Mobility assignments must be terminated immediately whenever an assignee is no longer employed by his/her original employer.

p. VA facilities are encouraged to admit State and local government employees to training programs established for facility employees. In many instances, the training can be provided with little or no additional cost. In such cases, reimbursement from the State or local government will not be requested. As a general guide, reimbursement will usually be required only in instances where the additional costs involved in providing the training exceed $100.

q. Training shall be provided only upon written request of a State or local government. The request shall normally be made by the chief executive or other responsible official of these entities. The appropriate level of the requesting official will depend on the training requested. For example, a request from the top official of a State office in the same locality as a VA installation to add one person or a few persons to a particular course would meet the requirement. Adding a number of persons over a period of time might require a higher requesting level. In any event, appropriateness of the level of the requesting official is left to facility determination.

r. Annual reports may be required by OPM at the beginning of each calendar year. As the reporting requirements may differ from year to year, facilities will receive instructions on what information must be submitted and by what mechanism (e.g., electronic, etc.) the information should be transmitted. Generally, information on both VA and non-VA IPA-assignees will be requested.

3. RESPONSIBILITIES

a. **Facility IPA Mobility Program Coordinators.** Human Resources Management Officers will serve as IPA mobility program coordinators for their respective facilities. They will be the principal points of contact for mobility assignment matters.
b. **VA IPA Mobility Program Coordinator.** The Director, Human Resources Management [Recruitment and Placement Policy] Service (05[9]), Office of Human Resources Management [and Labor Relations], is the VA IPA Mobility Program Coordinator, and is the principal agency point of contact for matters relating to mobility assignments. Any inquiries or requests, which cannot be promptly acted on at the local level, should be expeditiously referred through channels to this coordinator and staff.

### 4. PROCEDURES

a. Initial IPA mobility assignments are requested by the facility program official with responsibility for the IPA-related project/program or affected VA employee. The following steps should be followed to secure approvals of IPA assignments.

1. The Optional Form 69, Assignment Agreement, issued by OPM, should be completed by the requesting official and signed by the employee. All information pertinent to the agreement including such issues as special pay conditions, who will administer leave requests and other benefits outside of the standard package should be included on the form. Cost-sharing arrangements should be negotiated between both involved organizations (lending and receiving). Reimbursement may include salary and income derived from any job-related outside consulting work and should be specified on the form.

2. Authorizing Officials from both the lending and receiving organizations should sign the form before referring to the facility HR office (HRO) for final administrative review. The HRO will review all IPA agreements for administrative accuracy (e.g., do they meet legal requirements such as purpose, timeframes, etc.). The VA approving official may wish to designate a management representative to review and concur on the technical aspects of the request (e.g., is this a bona fide research assignment).

3. Authority is delegated to Administration Heads, Assistant Secretaries, and Other Key Officials to initiate and approve IPA assignments under their jurisdiction. Approval authority covers the start date of the initial assignment through a period exactly 2 years later (e.g., 01-01-00 through 12-31-02). The official approving any extension beyond 2 years must be at a level higher than the official who approved the original IPA agreement. Extensions may be requested for any period of time not to exceed 2 years. No agreement may be approved for more than a total of 4 years.

4. Once an initial or extension of assignment agreement has been approved, copies should be provided to the facility HRO, facility fiscal office, the employee, and the office that generated the request.

5. Modifications to either the original or extended agreements should be recorded and approved in the same manner as mentioned in subparagraphs a, b, and c. Modifications include significant changes in an employee’s duties, responsibilities, salary, work assignment location or schedule (e.g., part-time to full-time) or supervisory relationships.

b. Most research assignments are filled by employees of the National Association of Veterans’ Research and Education Foundations. These Foundations have been previously approved by the Chief,
Research and Development Officer (12). Assignment requests involving these approved organizations should be processed as noted in subparagraphs 4a(1)-(3).

c. If an assignment request involves "other" nonprofit organizations (e.g., national, regional, statewide, area-wide, or metropolitan organizations representing State or local governments; or a nonprofit organization whose primary function is to offer professional advisory, research, education, or development services to governments or universities), such organizations must be certified by the Secretary. This certification process must be completed before any assignment agreements can be approved.

(1) The Office of Human Resources Management [and Labor Relations] (OHRM[&LR]), Human Resources Management [Recruitment and Placement Policy] Service (05[9]), serves as coordinator and clearinghouse on behalf of the Secretary for requests for IPA certifications submitted by non-Federal organizations who are not members of the National Association of Veterans’ Research and Education Foundations (NAVREF).

(2) The procedures for requesting certification are as follows:

(a) All requests for certification packages must contain a cover letter describing why the organization wishes to participate with VA in the IPA Mobility Program and how its participation would benefit VA, copies of the organization’s Articles of Incorporation, Bylaws, Internal Revenue Service Nonprofit Statement, and any other information which describes the organizations function (such as offering professional advisory, research, educational or developmental services, or related services to governments or universities concerned with the public management). All requests for certification should be sent to VACO Human Resources Management [Recruitment and Placement Policy] Service (05[9]).

(b) OHRM[&LR] will review certification requests and route the packages to the appropriate program office for further review and concurrence. If the program office concurs, they will route the package to the Office of General Counsel (OGC) for legal review and concurrence. Once OGC concurs, the package is returned to OHRM for action. OHRM[&LR] will then prepare the final package for the Secretary’s approval.

(c) Upon receipt of the Secretary’s approval, OHRM[&LR] will implement the Secretary’s decision by notifying OGC, the program office, and the requesting office. If the Secretary disapproves the request, OHRM[&LR] will notify the organization directly.
1. GENERAL. Veterans’ preference is administered in accordance with applicable laws and regulations under 5 CFR, part 211 and 5 U.S.C. 2108. Veterans who are disabled or served on active duty for specific time periods or who have received a campaign badge or medal are entitled to preference over others in the hiring process. Veterans may be considered for competitive appointments as well as special non-competitive appointments as described in Part II, Chapter 2, Section B of this handbook. In accordance with 5 U.S.C. 3309, preference eligibles other than those who received a sole survivorship discharge are entitled to have 5 or 10 points added to their passing score on a civil service examination under traditional ranking and selection procedures. In accordance with 5 U.S.C. 3319, preference eligibles are listed ahead of non-preference eligibles within each quality category under alternative ranking and selection procedures, i.e., category rating. Although a sole survivorship preference (SSP) Veteran does not receive preference points, he/she is listed ahead of non-preference eligibles with the same score on an examination, or ahead of non-preference eligibles under category rating procedures, and is entitled to a higher retention standing in a reduction in force (RIF).

2. DEFINITIONS

   a. Active Duty or Active Military Duty

      (1) Active duty or active military duty for Veterans defined in paragraphs 2(i)(1) through (3) below and disabled Veterans defined in paragraph 2d below means active duty with military pay and allowances in the armed forces, including training or for determining physical fitness and including service in the Reserves or National Guard.

      (2) Active duty or active military duty for Veterans defined in paragraph 2(i)(4) through (6) below means fulltime duty with military pay and allowances in the armed forces, except for training or for determining physical fitness and except for service in the Reserves or National Guard.

   b. Armed Forces. The United States Army, Navy, Air Force, Marine Corps, and Coast Guard.

   c. Certification. Any written document from the armed forces that certifies the individual will separate from active duty service under honorable conditions no later than 120 days after the certification is submittted for consideration in the hiring process, at the time and in the manner prescribed in the applicable job opportunity announcement.

   d. Disabled Veteran. A person who has been discharged or released from active duty in the armed forces under honorable conditions performed at any time, or who has a certification as defined in 5 CFR 211.102 (also referenced in para 2c and 4) and who has established the present existence of a service-connected disability or is receiving compensation, disability retirement benefits, or a pension because of a statute administered by the Department of Veterans Affairs (VA) or a military department.

   e. Discharged or Released from Active Duty. Formal separation from active duty in the armed forces under honorable or general conditions. The Department of Defense is responsible for administering and defining military discharges.
f. Preference Eligible. A SSP Veteran, spouse, widow, widower, mother, disabled Veteran, or
Veteran as defined in paragraph 2i of this section. For the purposes of this section, “preference eligible”
does not include a retired member of the armed forces unless the individual is a disabled Veteran or the
individual retired below the rank of major (or equivalent).

g. Retired Member of the Armed Forces. A member or former member of the armed forces who is
entitled to, under statute, retired, retirement, or retainer pay due to service as a member.

h. Sole Survivorship Discharge. The early separation of a member from the armed forces (granted
after August 29, 2008), at the request of the member, who is the only surviving child in a family in
which the father or mother or one or more siblings:

(1) Served in the armed forces;

(2) Was killed, died as a result of wounds, accident, or disease, is in a captured or missing in action
status, or is permanently 100 percent disabled or hospitalized on a continuing basis (and is not gainfully
employed because of the disability or hospitalization); and

(3) The death or disability did not result from the intentional misconduct or willful neglect of the
parent or sibling and was not incurred during a period of unauthorized absence.

NOTE: An individual released after August 29, 2008, who does not meet the minimum continuous 181
day active duty service requirement under 5 U.S.C. 2108(1)(D) and paragraph 2i(6) below, but meets
remaining preference eligibility criteria, is still entitled to preference eligibility though active duty
service which was cut short by a sole survivorship discharge.

i. Veteran. A person who has been discharged or released from active duty in the armed forces
under honorable conditions, or who has certification as defined in paragraph 5 CFR 211.102 (also
referenced in par 2c and 4) of this section, if active duty service was performed:

(1) In a war; or

(2) In a campaign or expedition for which a badge has been authorized; or
(3) During the period beginning April 28, 1952, and ending July 1, 1955; or

(4) For more than 180 consecutive days, other than for training, any part of which occurred during
the period beginning February 1, 1955, and ending October 14, 1976; or

(5) During the period beginning August 2, 1990, and ending January 2, 1992; or

(6) For more than 180 consecutive days, other than for training, any part of which occurred during
the period beginning September 11, 2001, and ending on August 31, 2010, the last day of Operation
Iraqi Freedom.

NOTE: Campaign medal holders and/or Gulf War Veterans (specifically 5 point preference eligibles)
who originally enlisted (regular Armed Forces) after September 7, 1980 or began active duty on or after
October 14, 1982, must have served continuously for 24 months or the full period called or ordered to active duty. The 24 month service requirement does not apply to 10 point preference eligibles separated for disability aggravated or incurred in the line of duty, or to Veterans separated for hardship or other reasons under 10 U.S.C 1171 or 1173.

3. TYPES OF PREFERENCE. The preference categories and points listed below are based on 5 U.S.C. 2108 and 3309. In order to receive preference, the Veteran must have been discharged or released from active duty under honorable conditions.

a. **5 Point Preference (TP).** Five points are added to the passing examination score or rating of a Veteran as defined under paragraph 2i above.

b. **10 Point Compensable Disability Preference (CP).** Ten points are added to the passing examination score or rating of a disabled Veteran who served at any time and has a compensable service-connected disability rating of at least 10 percent but less than 30 percent.

c. **10 Point 30 Percent Compensable Disability Preference (CPS).** Ten points are added to the passing examination score or rating of a disabled Veteran who served at any time and has a compensable service-connected disability rating of 30 percent or more.

d. **10 Point Disability Preference (XP).** Ten points are added to the passing examination score or rating of a disabled Veteran serving at any time who has established the present existence of a service-connected disability or is receiving compensation, disability retirement benefits, or a pension from the VA or the military but does not qualify for CP or CPS preference; or a Veteran who received a Purple Heart.

e. **10 Point Derived Preference (XP Other).** Ten points are added to the passing examination score or rating of spouses, widows, widowers, or mothers of disabled or deceased Veterans. Both a mother and a spouse (including widow or widower) may be entitled to preference on the basis of the same Veteran's service if they both meet the requirements. However, neither may receive preference if the Veteran is living and is qualified for Federal employment.

(1) **Spouse.** Ten points are added to the passing examination score or rating of the spouse of a disabled Veteran who is unable to qualify for a Federal position along the general lines of his or her usual occupation because of a service-connected disability. Such a disqualification may be presumed when the Veteran is unemployed; and

(a) Is rated by appropriate military or VA authorities to be 100 percent disabled and/or unemployable; or

(b) Has retired, been separated, or resigned from a civil service position on the basis of a disability that is service-connected in origin; or

(c) Has attempted to obtain a civil service position or other position along the lines of his or her usual occupation and has failed to qualify because of a service-connected disability.
(2) **Widow/Widower.** Ten points are added to the passing examination score or rating of the widow or widower of a Veteran who was not divorced from the Veteran, has not remarried, or the remarriage was annulled, and the Veteran either served during a war or during the period April 28, 1952, through July 1, 1955, or in a campaign or expedition for which a campaign medal has been authorized; or died while on active duty that included service described immediately above under conditions that would not have been the basis for other than an honorable or general discharge.

(3) **Mother of a Deceased Veteran.** Ten points are added to the passing examination score or rating of the mother of a Veteran who died under honorable conditions while on active duty during a war or during the period April 28, 1952, through July 1, 1955, or in a campaign or expedition for which a campaign medal has been authorized; and

   a. She is or was married to the father of the Veteran; and

   b. She lives with her totally and permanently disabled husband (either the Veteran's father or her husband through remarriage); or

   c. She is widowed, divorced, or separated from the Veteran's father and has not remarried; or

   d. She remarried but is widowed, divorced, or legally separated from her husband when she claims preference.

(4) **Mother of a Disabled Veteran.** Ten points are added to the passing examination score or rating of a mother of a living disabled Veteran if the Veteran was separated with an honorable or general discharge from active duty, including training service in the Reserves or National Guard, performed at any time and is permanently and totally disabled from a service-connected injury or illness; and

   a. She is or was married to the father of the Veteran; and

   b. She lives with her totally and permanently disabled husband (either the Veteran's father or her husband through remarriage); or

   c. She is widowed, divorced, or separated from the Veteran's father and has not remarried; or

   d. She remarried but is widowed, divorced, or legally separated from her husband when she claims preference.

4. **DOCUMENTATION.** The following documents are required to adjudicate Veterans’ preference.

   a. **Certificate of Release or Discharge from Active Duty (DD Form 214).** VA accepts the Member 4 or the Service 2 copy of the DD form 214 to adjudicate Veterans’ preference. The copy must show the character of service and the dates of service.

   b. **Certification.** In lieu of a DD Form 214, a service member may submit a letter on official letterhead from his/her respective branch of service which provides the military service dates including the date of expected discharge or release from active duty and character of service. The anticipated
discharge or release date must be within 120 days after the certification is submitted and must also be under honorable conditions. If the Veteran submits a certification, his/her preference must be verified before the effective date of the appointment unless the service member is appointed under the provisions of 5 U.S.C. 5534a regarding dual employment and pay during terminal leave from the uniformed service.

c. Application for 10-Point Veterans’ Preference (SF 15). In order to receive 10-point preference, the Veteran or Veteran’s family member must provide a completed SF 15 and any supporting documentation listed on page 2 of the SF 15. Disabled Veterans who have not been discharged or released from active duty can submit any documentation listed in sections B or C of page 2 of the SF 15 to establish 10-point preference when applying to Federal positions.

5. RESTRICTIONS. Veterans preference may not apply in every scenario and may be subject to certain restrictions.

a. Hiring. Veterans preference does not apply to inservice placements such as promotion, reassignment, change to lower grade, transfer or reinstatement actions. Military retirees at the rank of major (or equivalent) or above are not entitled to preference unless they are disabled. However, Veterans who meet eligibility criteria in 5 CFR 307 may still be appointed under Veterans Recruitment Authority (VRA). VRA is a separate and distinct non-competitive appointment authority that is not always subject to this limitation, since certain VRA eligibles may or may not be preference eligibles. VRA appointments provisions are covered in 5 CFR 307 and Part II, Chapter 2 of this handbook.

b. Application of Preference Points. Preference points described in paragraph 3, are not assigned under merit promotion procedures. Preference points also do not apply when the category rating selection process is applied under delegated examining procedures.

c. Veterans Preference in RIF. Preference eligibles are entitled to a higher retention standing in the event of a RIF. Veterans Opportunity to Work Act (VOW) requires that certain Veterans be treated as preference eligibles for appointment purposes, but does not afford preference to those Veterans who are not yet released from active duty in the event of a RIF.}
CHAPTER 4. PREFERENCE TO VETERANS IN MAKING HYBRID TITLE 38 APPOINTMENTS

1. GENERAL. This chapter contains administrative requirements and procedures relating to the application of Veterans preference in making new appointments to hybrid title 38 occupations identified in 38 U.S.C. § 7401(3) or approved for hybrid status by the Assistant Secretary for Human Resources and Administration. This section applies both to full-time permanent appointments under 38 U.S.C. § 7401(3) and part-time, intermittent or time-limited appointments under 38 U.S.C. § 7405. This does not apply to the application of Veterans preference in making appointments to full title 38 positions under 38 U.S.C. § 7401(1).

2. BACKGROUND
   a. It is Department of Veterans Affairs (VA) policy that qualified preference eligibles and other Veterans receive appropriate VA employment preference. In April 2012, the Merit Systems Protection Board (MSPB) affirmed its earlier 2010 opinion that held that VA is required to follow title 5 Veterans’ preference rules when hiring individuals for hybrid title 38 positions (Graves v. VA, 117 M.S.P.R. 697 (2012)). In its 2010 ruling, MSPB clarified that VA is required to “comply with the competitive service Veterans’ preference requirements set forth in title 5 of the United States Code in filling positions under 38 U.S.C. § 7401(3)”. Graves v. VA, 2010 MSPB 118, at 6 (June 22, 2010); Graves v. VA, 2010 MSPB 123, at 9 (June 30, 2010).
   b. MSPB’s ruling is based upon its interpretation of 38 U.S.C. § 7403(f)(2) and f(3). Section 7403(f)(2) states that when VA appoints individuals to hybrid positions, it “shall apply the principles of preference for the hiring of Veterans and other persons established in subchapter I of chapter 33 of title 5”. Section 7403(f)(3) states that the “applicability of the principles of preference referred to in paragraph (2) . . . shall be resolved under the provisions of title 5 as though such individuals had been appointed under that title.” MSPB interpreted these provisions to require VA to follow title 5 Veterans preference requirements when hiring individuals into hybrid occupations.

3. DEFINITIONS
   a. Appointing Official. The Human Resources Officer (HRO)/Manager.
   b. External Applicants. All United States Citizens who are not Federal employees.
      NOTE: Federal employees who apply to an external announcement with an area of consideration of U.S Citizens only will be considered an external applicant and Veterans preference will apply.
   c. Federal Applicants. All current permanent Federal employees who apply for a vacant position.
   d. Internal Applicants. VA applicants located at the facility and/or Community Based Outpatient Clinic (CBOC) where the vacant position exists.
e. **VA Nationwide Applicants.** All other VA applicants employed by VA, Veterans Health Administration (VHA), Veterans Benefits Administration (VBA), or National Cemetery Administration (NCA) but not located at the facility and/or CBOC where the vacant position exists.

f. **Objection.** A request to remove an eligible applicant from consideration on a particular referral list. An objection may only be sustained if it is based on proper and adequate reasons (see Appendix E).

g. **Pass Over.** A request to pass over a preference eligible that results in the selection of a non-preference eligible.

h. **Referral List.** A list of eligible, qualified applicants for a hybrid title 38 vacancy.

i. **Selecting Official.** The supervisor/manager who is responsible for making selections of employees in subordinate positions.

j. **Unranked Order.** When numerical scores are not assigned to hybrid title 38 applicants as part of the referral process, all qualified applicants will be referred in preference order.

k. **VA Residents/Trainee Candidates.** Any candidate that has successfully completed or is expected to successfully complete a formal VA sponsored training program specific to hybrid title 38 occupations identified in 38 U.S.C. § 7401(3).

l. **Functional Statements (FS).** An official statement of the major duties and responsibilities of a position that are in alignment with the qualification standards. Functional statements should be in alignment with the qualification standards of the position and include the specialty area where work is performed and the specialized experience that is required for the assignment.

m. **Basic Requirements.** Basic requirements are defined as: citizenship, English language proficiency, experience and/or education, licensure/certification, and physical requirements as described in VA qualification standard for the occupation. **Note:** Basic requirements could also include, specialized experience, which should be reflected in the qualification standards for the position, and may include the following: one year of specialized experience for assignments at the next lower grade level for those assignments above the entry level, and any specialized experience required for the specific assignment.

4. **FUNCTIONAL STATEMENTS**

FS must be established and utilized for the purpose of recruitment, evaluation, and organizational design for all covered hybrid title 38 positions and employees. A FS must be in writing and prepared before a position can be recruited and filled. Management is responsible for creating a FS for each position with the assistance of HR. The duties reflected in the FS must be the actual duties performed. For a position that will be recruited or filled at grade levels below the full performance level (FPL), FS must be developed for each grade level up to and including the FPL. Managers and HR are responsible for ensuring the duties reflected in the FS are in alignment with those defined in the qualification standards for the assignment and grade level and resolving any issues before the position is recruited and filled.
The FS must include: general description of assigned duties; functions or scope of assigned duties to include specialized duties as defined in the assignment within the qualification standard consistent with the definition of basic qualifications outlined in paragraph 3m above; supervisor controls; citation of qualification requirements; customer service requirements; age, development and cultural needs of patient’s requirements; and computer security. Functional statements are required to include specialty areas where work is performed and the specialized experience that is required for the assignment in alignment with the qualification standards (i.e. LPN for ICU).

5. HIRING VA RESIDENTS/TRAINEE CANDIDATES

a. VA residency and trainee programs are a critical part of VA’s succession plan and a key source of candidates for critical hybrid title 38 occupations.

b. Similar to other external hybrid title 38 hiring practices, external announcements are not required in order to recruit upcoming graduates and/or to appoint a candidate that has completed a VA residency/trainee program. Pools of upcoming or current graduates may be targeted for recruitment either locally or nationwide prior to graduation and subsequent to graduation, and individuals selected for these positions may be appointed into the occupation without further competition. Facilities may establish local procedures for referral of and selection of candidates from VA residency/trainee programs. These procedures should take into account any internal recruitment and/or bargaining unit agreements which must be satisfied prior to consideration of VA residency/trainee program candidates.

c. Qualified preference eligible candidates who have completed a VA residency/trainee program for a hybrid title 38 occupation who are being considered along with other qualified VA residency/trainee candidates must receive consideration in accordance with the provisions set forth in this chapter for external hiring practices and Veterans’ preference.

6. JOB OPPORTUNITY ANNOUNCEMENTS (JOA)

a. Facilities must consult and follow local and national bargaining agreements to determine the area of consideration.

b. Hybrid title 38 vacancies can be filled without posting a JOA. If there are Veterans’ preference eligible applications on file that were not solicited via an external JOA, the qualified Veterans’ preference eligible applicants must be considered before an external non-preference eligible applicant may be selected.

c. JOA processes are at the discretion of the servicing HR Officer and selecting official who may choose to utilize USA JOBS or other avenues of recruitment such as local newspaper advertisements, journal advertisements, etc. To announce on USA JOBS, hybrid title 38 vacancies must be posted using the USA Staffing system.

d. JOAs must include the duties reflected in the FS and any requirements of specialized experience consistent with the definition of basic requirements outlined in paragraph 3m above.
e. JOAs may be posted internally, externally or both. The area of consideration should be considered before posting a JOA in order to attract a sufficient number of well-qualified applicants. The following guidance should be followed when posting announcements on USA Staffing:

(1) Internal Announcement Requirements

(a) Announcement of hybrid title 38 vacancies is not required by law or VA policy; however, hiring facilities must abide by the terms of their local/national labor master agreements.

(b) Area of consideration includes internal facility employees and/or all VA nationwide applicants and may include current permanent Federal applicants of other agencies. Veterans’ preference does not apply to promotions, reassignment, a change to lower grade or transfer for internal announcements.

(c) Hybrid title 38 internal announcements must be announced at all grade levels up to the full performance level.

(d) When hybrid title 38 positions above the full performance level are filled, the position can only be established for that specific grade level and may not be targeted to a higher grade. Additionally, the selectee MUST qualify for that specific grade level and cannot be placed in the position at a lower grade level and then targeted to higher grade.

(2) External Announcement Requirements

(a) Area of Consideration includes all U.S. Citizens or all U.S. Citizens and other current permanent Federal employees of other agencies. If the area of consideration is all U.S. Citizens, Veterans’ preference applies and should be specified in the JOA. Veterans’ preference does not apply for other current permanent Federal agency employees as long as they are listed as part of the area of consideration.

(b) External Announcements for positions at or below the full performance level may be announced on USA JOBS using the USA Staffing system at all grades from the entry level to the full performance level (if this option is used, all grades must be listed on the JOA) or only at the full performance level.

(c) When hybrid title 38 positions above the full performance level are filled, the position can only be established for that specific grade level and may not be targeted to a higher grade. Additionally, the selectee MUST qualify for that specific grade level and cannot be placed in the position at a lower grade level and then targeted to higher grade.

7. APPLICATION REVIEW AND QUALIFICATION DETERMINATIONS

HR is responsible for performing a review of the basic requirements consistent with paragraph 3m above on each application submitted for the position. The review of basic requirements must be completed prior to applying veteran’s preference and referral to the selecting official. The basic requirements include citizenship, English language proficiency, experience and/or education, licensure/certification, and physical requirements. Note: Basic requirements could also include specialized experience, which
should be reflected in the qualification standards for the position, and may include the following: one year of specialized experience for assignments at the next lower grade level for those assignments above the entry level, and any specialized experience required for the specific assignment.

8. REFERRAL LIST

a. Internal Referral List

(1) When hybrid title 38 vacancies up to the full performance level are announced, all applicants must be evaluated by the servicing Human Resources (HR) office for basic requirements consistent with paragraph 3m above; HR is responsible for ensuring that applicants meet all the qualification requirements in the VA qualification standard for the occupation/assignment. The review of basic requirements must be completed prior to referral to the selecting official.

(2) For positions above the full performance level of the occupation, applicants must meet the basic requirements consistent with paragraph 3m above; HR is responsible for ensuring that applicants meet all the qualification requirements in the VA qualification standard for the occupation/assignment. The review of basic requirements must be completed prior to referral to the selecting official.

(3) Once all eligible and qualified applicants have been determined, internal applicants must be referred to the selecting official/hiring manager in the following order without regard to Veterans’ preference.

(a) Internal applicants

(b) VA Nationwide applicants

(c) Other permanent Federal agency applicants (if applicable)

b. External Referral List

(1) For positions at the full performance level or below, applicants must meet the basic requirements, consistent with paragraph 3m above; HR is responsible for ensuring that applicants meet all the qualification requirements in the VA qualification standard for the occupation/assignment. The review of basic requirements must be completed prior to applying veteran’s preference and referral to the selecting official.

(a) If announced below the full performance level all external qualified applicants will be referred by grade levels up to and including the full performance level. HR will identify qualified candidates that meet the basic requirements for the occupation as well as the requirements for each individual grade level.

(b) If announced only at the full performance level all external qualified applicants will be referred at that grade level. HR will identify candidates that meet the requirements for the occupation as well as requirements for the full performance level.
(2) For positions above the full performance level of the occupation, applicants must meet the basic requirements consistent with paragraph 3m above; HR is responsible for ensuring that applicants meet all the qualification requirements in the VA qualification standard for the occupation/assignment. HR will identify candidates that meet the requirements for the occupation as well as requirements for the specific grade level. The review of basic requirements must be completed prior to applying veteran’s preference and referral to the selecting official.

(3) Other current permanent Federal agency applicants must be referred on a separate referral list as long as they are listed as part of the area of consideration. Veterans’ preference does not apply to promotions, reassignment, change to lower grade or transfer if the external area of consideration includes other current permanent Federal agency employees.

(4) When making appointments to any hybrid title 38 occupations identified in 38 U.S.C § 7401(3) or approved for hybrid status by the Assistant Secretary for Human Resources and Administration, under the authority of 38 U.S.C. § 7401(3) or 7405, external applicants for new appointments must be referred in accordance with the provisions of 5 CFR 302.304(b)(4) and/or 5 CFR 302.304(b)(5) as listed below:

(a) In accordance with 5 CFR 302.304(b)(4), professional and scientific positions at the GS-9 level and above, or equivalent, must be referred with no numerical scores (unranked order). All preference eligibles will be considered together, regardless of the type of preference, followed by all other applicants. (See Appendix F)

(b) In accordance with 5 CFR 302.304(b)(5) unranked order should be used when no numerical scores are assigned to external applicants. Applicants who have received eligible ratings for positions (other than professional and scientific positions at the GS-9 level and above addressed in subparagraph (a)) will be considered in the following order:

1. CPS/CP. Preference eligible having a compensable service-connected disability of 10 percent or more.

2. XP. A Veteran who served at any time and has a present service-connected disability or is receiving compensation, disability retirement benefits, or pension from the military or the VA but does not qualify as a CP or CPS; or a Veteran who received a Purple Heart. Both a mother and a spouse (including widow or widower) may be entitled to preference on the basis of the same Veteran’s service if they both meet the requirements. However, neither may receive preference if the Veteran is living and is qualified for Federal employment. This is called “derived preference” because it is based on service of a Veteran who is not able to use the preference.

3. TP. 5-point preference

4. SSP (Sole Survivorship Preference, Public Law 110-317). Under SSP the individual does not receive Veterans’ preference points. The individual is listed ahead of non-preference eligibles. SSPs are entitled to receive the same pass over rights as other preference eligibles and are entitled to credit experience in the armed forces to meet the qualification requirements for Federal jobs. The SSP is a
preference eligible category for Veterans released or discharged from a period of active duty from the
armed forces, after August 29, 2008, by reason of a “sole survivorship discharge.” A sole survivorship
discharge is a separation of a member from the armed forces, at the request of the member, pursuant to
Department of Defense policy permitting the early separation of a member who is the only surviving
child in a family in which the father or mother or one or more siblings (1) served in the armed forces and
(2) was killed, died as a result of wounds, accident, or disease, is in a captured or missing in action
status, or is permanently 100 percent disabled or hospitalized on a continuing basis (and is not employed
gainfully because of the disability or hospitalization) where (3) the death, status, or disability did not
result from the intentional misconduct or willful neglect of the parent or sibling and was not incurred
during a period of unauthorized absence.

5. All Other Applicants

9. SELECTIONS

a. Qualified preference eligibles are an important source of external applicants and must receive full
consideration when making external hiring decisions. Whether or not the vacancy was announced
externally, when qualified preference eligible Veterans are referred for vacancies, the provisions of this
chapter must be followed and documented.

(1) Selecting officials may make a selection from any referral list at any grade level.

(2) Veterans’ preference applies at the grade level from which the selection is made.

b. According to provisions contained in 5 CFR 302.401, when making a selection from a list of
applicants in unranked order a selection must be made from the highest available preference category (as
long as at least three (3) applicants remain in that group). When fewer than 3 applicants remain in the
highest category, consideration may be expanded to include the next category. Professional and
scientific positions at the GS-9 level and above are considered to be a single category as all preference
eligibles are considered together regardless of the type of preference.

c. 5 CFR 302.401(a)(2) states that an agency is not required to consider an applicant that has been
previously considered three times. The following criteria pertain to three considerations: excepted
service employees must be considered three times for the same announcement; and if three selections
are made from the same announcement, then the applicant has been considered three times. An
objection or pass over request must be submitted for thirty (30) percent or more preference eligibles.

d. 5 CFR 302.401(a)(2) also states that a preference eligible that has been discontinued for a position
based on an objection to or pass over request being sustained does not have to be considered.

e. When making an external selection, a non-preference eligible applicant may not be selected over a
qualified preference eligible applicant without first receiving approval to object to or pass over the
preference eligible.
f. Recruitment case files must be retained and available as proof that preference eligibles have been afforded the opportunity to apply for and receive consideration for any appropriate hybrid title 38 vacancy for which facilities conduct external recruitment.

g. When unfavorable information is received during the pre-employment process (i.e., VetPro, background, physicals, etc.), an objection to or pass over request must be submitted in order to select from the next preference category or a non-preference eligible.

10. OBJECTION OR PASS OVER REQUESTS FOR HYBRID TITLE 38 POSITIONS

a. A request to object to or pass over a preference eligible with a compensable service-connected disability of 30 percent or more must be adjudicated by OPM. A request to object to or pass over a preference eligible with a compensable service-connected disability of less than 30 percent must be adjudicated by the servicing Human Resources Officer. **NOTE:** See paragraph 11 to object to or pass over a preference eligible based on physical/medical conditions and paragraph 12 to object to or pass over a preference eligible based on suitability.

b. The due date of the referral list must be extended if the request to object to or pass over is pending adjudication. When a JOA contains multiple vacancies, other selections may be made; however, one vacancy must be held for the Veteran while the request to object to or pass over is pending adjudication approval/disapproval. If the JOA only has one vacancy, then no selection can be made until a decision has been made.

c. The procedures listed below must be used to request OPM approval to object to or pass over a preference eligible with a compensable service-connected disability of 30 percent or more.

(1) If the preference eligible applicant has a compensable service connected disability of 30 percent or more, an objection to or pass over request, signed by the facility Director, must be sent by the servicing HRO to the address below for review. Upon completing a review of the request, OHRM will forward the request to OPM for adjudication or return the objection to or pass over request to the facility HRO without approval.

  Director, Recruitment and Placement Policy Service (RPPS/059)
  Office of Human Resources Management (OHRM)
  810 Vermont Avenue, N.W., Washington, DC 20420

(2) The objection to or pass over request must include written justification from the selecting official that fully documents the reason(s) for the objection to or pass over request. Appropriate documentation may include interview notes, questions, reference checks, police reports, qualification standard, etc. **(NOTE: See appendix E for adequate reasons to sustain an objection to or pass over request and SF62, Agency Request to Pass Over a Preference Eligible or Object to an Eligible.)**

(3) If the pass over request directly related to patient care, an assessment related to the clinical competencies of the preference eligible applicant and the applicant selected should be included. The
selecting official must include written justification on how the Veteran does not have the skills, knowledge or clinical requirements for the position.

(4) Submit the OHRM/VACO objection to or pass over checklist (see appendix G) along with all of the completed documents listed on the checklist. **NOTE:** See appendix H for the sample letter of notification to the Veteran referenced on the checklist.

(5) OPM will issue a decision letter that states whether the request is approved or denied. If OPM denies the objection to or pass over, the facility has the following options:

1. Challenge OPM’s decision by submitting additional information to support a favorable decision within 30 days from the date of the OPM letter.

2. Consider/select the preference eligible for the position.

d. The procedures listed below must be used to object to or pass over a preference eligible rated less than 30 percent. Such requests must be adjudicated by the HRO.

   (1) The selecting official must fully document and submit the reason(s) for the objection to or pass over request. It is important to treat every request as if it is going to be adjudicated by OPM. Appropriate documentation may include interview notes, questions, reference checks, police reports, qualification standard, etc. **NOTE:** See appendix E for criteria to sustain an objection to or pass over request.

   (2) If the objection to or pass over is directly related to patient care, a clinical assessment of the competencies of the preference eligible applicant and the applicant selected must be included.

   (3) The HRO is required to document a decision in a formal memorandum for the record that states whether the request is approved or denied and the basis for the approval or denial. The justification documentation should be the same as the documentation submitted for a 30 percent disabled Veteran objection to or pass over request and maintained in the facility case file. (See Appendix G).

11. OBJECTION OR PASS OVER REQUEST FOR PHYSICAL OR MEDICAL CONDITIONS

   a. Requests to object to or pass over any preference eligible based on a physical or medical condition must be adjudicated by OPM. A selecting official may submit a request to object to or pass over a preference eligible when it is believed the applicant may have a physical or medical (including mental) condition that will prevent him or her from performing the full range of essential duties and responsibilities of the position safely and efficiently.

   b. The selecting official must assess whether reasonable accommodation can be provided to permit performance of the job despite the condition when considering whether a physical or medical condition will have an impact on an eligible’s capacity to perform the job efficiently and safely. The servicing HRO must submit the request, signed by the facility Director, along with thorough supporting documentation to OPM at the following address:
Office of Personnel Management  
Human Capital Leadership and Merit System Accountability Division  
Employment Division – Medical Passovers  
1900 E. Street NW, Room 6500  
Washington, D C 20415-0001

c. If OPM sustains the objection to or pass over request, the preference eligible must be removed from consideration for the vacant position and the selecting official may select the next available certified preference or non-preference eligible on the referral.

d. If OPM does not sustain the objection to or pass over request, the selecting official may challenge the decision by submitting additional information to support a favorable decision; or consider/select the preference eligible for a job.

12. OBJECTION OR PASS OVER OF A PREFERENCE ELIGIBLE BASED ON SUITABILITY

   a. The servicing HR Office must consult with the VA Office of Operations, Personnel Security and Suitability Service (07C) to determine if an objection to or pass over is warranted locally for a preference eligible rated less than 30 percent, based on potentially disqualifying suitability information.

   b. A request to object to or pass over a preference eligible with a compensable service-connected disability of 30 percent or more based on suitability must be adjudicated by OPM. The servicing HRO must submit the request, signed by the facility Director, along with thorough supporting documentation to the VA Office of Operations, Security and Preparedness; Personnel Security and Suitability Service (07C). VA Office of Operations, Security and Preparedness; Personnel Security and Suitability Service (07C) will forward the request to OPM for adjudication or return the request to the facility HRO without action. Requests for suitability based actions must be sent to:

       Department of Veterans Affairs  
       Director, Personnel Security and Suitability Service (07C)  
       810 Vermont Avenue, N.W.  
       Washington, D.C. 20420

13. OVERSIGHT. The local facility Director and HRO must make selecting officials aware of their responsibilities and hold them accountable for supporting the hiring of qualified preference eligibles and other Veterans. Training and advisory services should be available to supervisors and managers through means such as HR:

   a. Providing individual advice and assistance to recommending/selecting officials;

   b. Providing recommending/selecting officials with checklists, guidelines, and instructions along with a listing of eligibles (as applicable);
c. Conducting periodic supervisory training as well as new supervisor training; and

d. Providing guidance via the facility’s web site, supervisor’s manual, internal guidance, newsletter, senior management meetings, etc.]}
APPENDIX A

OUTSIDE RECRUITING ASSISTANCE FROM COMMERCIAL RECRUITING FIRMS AND NONPROFIT EMPLOYMENT SERVICES

1. PURPOSE. This appendix provides policy and guidance on contracting with commercial recruiting firms and nonprofit employment services to locate an additional source of applicants.

2. BACKGROUND. The Government use of commercial and nonprofit employment services is authorized in 5 CFR, part 300, subpart D. Use of commercial recruiting firms is a supplement to, not a substitute for, a VA organization’s own recruiting efforts. Candidates identified through outside recruiting sources must be evaluated, considered and appointed through regular VA and Federal civil service rules and employment procedures including veteran preference.

3. POLICY

   a. VA will comply with the requirements in subpart D of 5 CFR, part 300, the Federal Acquisition Regulation (FAR), and the Veterans Affairs Acquisition Regulation (VAAR) when contracting for outside recruiting assistance.

   b. These regulations apply to filling positions: in the title 5 competitive service; in the title 5 excepted service under Schedules A, B, and C; in the title 5 Senior Executive Service; and in the title 38 excepted service of the Veterans Health Administration (VHA).

   c. Equal Employment Opportunity (EEO) principles will be observed in the administration of this authority.

4. DELEGATIONS OF AUTHORITY

   a. The authority to determine the need to contract for outside recruiting assistance is delegated to Administration Heads, Assistant Secretaries, Other Key Officials, and Deputy Assistant Secretaries. This authority is further delegated as the following indicates and shall not be delegated below the facility Director.

   b. In accordance with 38 U.S.C. 8110, contracting authority in VHA is delegated to the field facility Director.

   c. In VA Central Office, the authority to determine the need to contract is delegated to Administration Heads, Assistant Secretaries, Other Key Officials, and Deputy Assistant Secretaries with the concurrence of the Director, Central Office Human Resources Service (035).

   d. The authority to determine the need to contract is delegated to all other facility directors.
5. PROCUREMENT. Contracts for use of outside recruiting assistance must be acquired in accordance with contract types and procedures stipulated in FAR. In order to expedite the urgent requirement for such services, establishing indefinite delivery/indefinite quantity contracts may be appropriate. Contracting activities may elect to submit solicitations to Acquisition Program Management (95A) in VA Central Office for technical/legal review if the estimated value is less than the threshold specified in VAAR 801.602-70.

6. RECORDS MAINTENANCE INSTRUCTIONS. In all instances of contracting for use of outside recruiting assistance, the basis for the determination of the need for recruiting assistance shall be documented and records pertaining to the procurement action maintained by the Human Resources Management (HRM) office in an auditable form. The records to be maintained are those necessary to determine that using commercial recruiting firms or nonprofit employment services is cost effective and has not resulted in the violation of merit system principles or the commission of any prohibited personnel practice. Upon request from the Office of Personnel Management (OPM) or VA Central Office, facilities will provide reports on the use of outside recruiting assistance.

7. RESPONSIBILITIES

   a. The Deputy Assistant Secretary for Human Resources Management [and Labor Relations], Human Resources Management [Recruitment and Placement Policy] Service (05[9]) is responsible for providing assistance to VA HRM officials to ensure that the use of the authority is consistent with OPM regulations, and is also responsible for providing any Department-level reports to OPM.

   b. The Deputy Assistant Secretary for Acquisitiion and Materiel Management (90) is responsible for providing assistance to VA officials concerning the procurement and contract administration processes.
APPENDIX B. DELEGATED EXAMINING (DE)

1. PURPOSE. This appendix provides VA procedures and guidance on the filling of competitive service positions under case examining from certificates of eligibles obtained from a VA delegated examining unit (DEU) or other DEU or Office of Personnel Management (OPM) services office. It ensures proper use of VA’s authority to examine for title 5 competitive service positions as authorized by the Interagency Delegated Examining Agreement between VA and OPM. This guidance should be used in conjunction with OPM’s Delegated Examining Operations Handbook (DEOH), specific authorities cited in the Department’s delegation agreement and applicable laws in title 5 of the United States Code, and regulations published in the Code of Federal Regulations. While the information in this appendix is current as of the date of issue, any changes in regulation or law will supersede the information in this appendix or the DEOH.

2. BACKGROUND

   a. Historically, VA DEUs have: examined for selected occupations on a nationwide basis; provided facility-specific, regional, or organizational coverage; provided examining services to some VA facilities on a reimbursable basis; and/or provided examining services to another Federal agency.

   b. The Interagency Delegated Examining Agreement between VA and OPM authorizes VA to examine for all title 5 occupational series and grade levels nationwide except Administrative Law Judge positions.

3. RESPONSIBILITIES. All VA officials engaging in actions concerning delegated examining will do so in full compliance with the requirements of the merit system principles in the 5 U.S.C 2301 and the prohibited personnel practices in 5 U.S.C. § 2302.

   a. Deputy Assistant Secretary for Human Resources Management. Approves the establishment of a DEU.

   b. Recruitment and Placement Policy Service (059), Office of Human Resources Management (OHRM)

      (1) Makes recommendation to the Deputy Assistant Secretary for Human Resources Management on the establishment of a DEU.

      (2) Prepares all requests to OPM to request Delegated Examining (DE) authority for additional VA components, notification of termination of VA components and changes of DE programs.

      (3) Monitors DEU’s submission of completed quarterly workload reports to OPM in the Delegated Examining Information System (DEIS).
(4) Monitors training and certification of individuals responsible for conducting DE activities and audits.

(5) Provides guidance and review for variation requests due to erroneous appointments.

(6) Prepares annual reports to Congress and OPM after each of the first 3 years of category rating use.

c. **Oversight and Effectiveness Service (054), OHRM**

(1) Coordinates and conducts annual VA DEU evaluations.

(2) Evaluates DEUs for adherence to merit systems principles.

d. **Human Resources Officers (HROs)**

(1) Ensure the locally established Reemployment Priority List (RPL) and the Career Transition Assistance Plan (CTAP) listing have been cleared before requesting DEU certificates of eligibles for vacancies.

(2) Submit complete requests for delegated examining to include job analysis and proposed crediting plan. See Appendix G of the DEOH for procedures on conducting job analysis and developing a crediting plan.

(3) Collaborate with the selecting official to determine the adequacy of the justification for any requested pass over or objection and to develop and submit any warranted request to OPM.

(4) Perform initial audit of used DEU certificate of eligibles before it is returned to DEU.

e. **Delegated Examining Units (DEUs)**

(1) Ensure VA’s selecting officials have a sufficient pool of well-qualified eligibles from which to fill vacant competitive service positions.

(2) Uphold the laws, regulations and policies of merit system principles.

(3) Prepare and publish accurate, clear and concise recruitment announcements and public notices.

(4) Develop assessment instruments.

(5) Acquire and maintain adequate supplies of needed standard and optional forms.

(6) Screen applications for minimum qualifications.

(7) Rate applications.
(8) Rank eligibles based on their ratings.

(9) Apply/adjudicate Veterans preference in accordance with Chapter 4, Section B of the DEOH.

(10) Notify applicants of the status of their applications in a timely fashion beginning with the receipt of the application, eligibility results, notice of rating and/or referral or non-referral, and finally the selection or non selection. Record the date of each of the four applicant notifications in the automated systems: USA Staffing and/or USAJOBS.

(11) Administer and score written tests, if applicable.

(12) Approve selective and quality ranking factors identified and documented through the job analysis process.

(13) Screen applications for potential suitability concerns.

(14) Determine that applicants have met time-after-competitive-appointment requirements.

(15) Recruit, examine and refer eligibles in compliance with VA’s Career Transition Assistance Plan (CTAP) and the Interagency Career Transition Assistance Plan (ICTAP).

(16) Implement VA’s procedures through which applicants may request reconsideration of their ratings. (Administrative grievance or ADR procedures)

(17) Issue certificates of eligibles, audit certificates, and implement objection/pass over procedures.

(18) Ensure certification of individuals responsible for conducting delegated examining activities.

(19) Comply with reporting and record-keeping requirements by thoroughly documenting all methods and processes used for each case in the event reconstruction is necessary.

(20) Submit information into the Delegated Examining Information System (DEIS) on a timely basis.

4. DEFINITIONS

a. Amended Certificate. A modification of the original certificate with additional name(s) which were not on the original.

b. Appointing Official. The person having the authority, by law, or by duly delegated authority, to appoint, employ, or promote individuals to positions in an agency. The human resources officer/manager holds this authority.
c. **Category Rating.** An alternative rating, ranking and selection method which has a minimum of two quality categories.

d. **Certified Eligible.** An applicant whose application package is assessed as qualified and meeting eligibility requirements whose name is placed on the certificate of eligibles.

e. **Objection.** A request to remove an eligible from consideration on a particular certificate.

f. **Pass Over Request.** An objection filed against a certified preference eligible which may result in the selection of a certified non-preference eligible.

g. **Priority Consideration.** A special order of consideration for placement given to an eligible who was previously denied consideration due to an administrative error, law or regulatory violation.

h. **Selecting Official.** The supervisor/manager who is responsible for making selections of employees in subordinate positions.

5. **ESTABLISHMENT OF A DEU.** A VA organization interested in requesting approval to establish a DEU should submit a written request through the channels appropriate to that organization to the Recruitment and Placement Policy Service (059), OHRM. For example, all three VA administrations have existing DEUs and the respective head of the Administration-level human resources organization is the appropriate official to initiate a request for additional DEUs. Similarly, the executive in charge of the human resources issues for a VA Staff Office would initiate a request to establish a DEU for the respective Staff Office. The request to establish a DEU must include the following:

   a. Name of the Federal organizational entities, VA or non VA, for which competitive examining will be provided;

   b. The geographic area to be covered;

   c. The classification and organizational titles, pay plans, series, and grades for the positions for which the DEU will examine;

   d. The address, room number and mailing address, of the proposed DEU;

   e. The name, title, phone number, fax number, and email address of the proposed DEU Manager. The DEU Manager must be a human resources (HR) specialist possessing a thorough knowledge of title 5 staffing, at no less than a GS-11 level or equivalent;

   f. The names and titles of all HR specialists that will be performing competitive examining work, including administrative assistance. HR specialists assigned to a DEU must have acquired demonstrated and necessary work experience and skill in staffing and placement using title 5 procedures at a functional level of competency prior to taking the required OPM DEU certification training;
6. BEGINNING THE COMPETITIVE EXAMINING PROCESS. The HRO must submit a complete recruitment package to the designated servicing DEU to fill a position using competitive examining procedures. The recruitment package includes the position description, job analysis and crediting plan, copy of the completed SF-52 Request for Personnel Action, and a copy of the merit promotion announcement, if applicable.

a. The DEU is responsible for assuring a suitable number of well-qualified candidates are available for consideration on the certificate of eligibles. The process begins when the DEU receives the recruitment package.

b. All DEU announcements must be posted on USAJOBS. USAJOBS is the official jobsite for the Federal government. The DEU must use the USA Staffing recruitment system to accept and assess applications.

c. The DEU job opportunity announcement must include the following content in accordance with 5 CFR 330.707:

(1) Title, series, pay plan, and grade (or pay rate);

(2) Duty location;

(3) Open and closing dates, plus any other information dealing with how the receipt of applications will be controlled, such as the use of early cut-off dates;

(4) Name of issuing agency and announcement number;

(5) Qualification requirements, including knowledge, skills, and abilities, and a specialized experience definition;

(6) Entrance pay;

(7) Brief description of duties;

(8) Basis of rating;

(9) What to file;

(10) Instructions on how to apply;
(11) Information on how to claim Veterans' preference, if applicable;

(12) The agency's definition of well-qualified;

(13) Information on how CTAP and/or ICTAP candidates may apply, including proof of eligibility required;

(14) Equal employment opportunity statement; and

(15) Reasonable accommodation statement.

d. Assessment tools must be job related and used in accordance with 5 CFR, part 300. Examples of assessment tools are: job knowledge tests, rating schedules, ability tests, work samples, situational judgment tests, and structured interviews.

e. The DEU HR specialist must review the applications for: age, citizenship, selective service requirements, and minimum qualifications. Next, the DEU HR specialist adjudicates Veterans preference, rates and ranks the applications. The DEU HR specialist must assess applicant’s suitability before appointment into the position for which selected.

7. TYPES OF RATING PROCEDURES. Numerical rating and category rating are the two types of rating procedures available to DEU HR specialists to assess applicants and develop the list of eligible candidates.

a. Numerical Rating. Under numerical rating procedures, a maximum score of 100 points is produced or 110 points for some certified Veterans preference eligibles. There are three procedures used to attain the numerical scores:

(1) Rank and select using numerical test scores. When using this procedure the test assesses the applicant’s job-related KSAs/competencies;

(2) Rank and select using quality level rating (A-C-E). When using this procedure the applicant’s total qualifying experience is combined with the education/training into a single quality level rating. It also provides for assigning additional points, on the basis of an evaluation of the applicant in terms of specific competencies/knowledge, skills and abilities (KSAs) that are important for successful performance of the duties of the position. This procedure uses three quality levels; and

(3) Rank and select using a generic rating (education/training and experience). When using this procedure a position has the same basic minimum qualifications and general competency/KSA requirements but the specialty or specialized experience required varies by series, e.g., Electronic Engineering or Mechanical Engineering.
b. **Category Rating.** Under the category rating procedure, applicants who meet basic minimum qualification requirements established for the position and whose job-related competencies or KSAs have been assessed are ranked by being placed in one of two or more quality categories, e.g., Highly Qualified and Qualified; Best Qualified, Well Qualified, and Qualified; or Excellent, Highly Satisfactory, and Satisfactory, etc., instead of being ranked in numeric score order. Quality categories should be written to reflect the requirements to perform the job successfully and to distinguish differences in the quality of candidates’ job-related competencies/KSAs. Test scores may be used as part of the job-related criteria to place eligible candidates into quality categories, as long as the test assesses job-related competencies/KSAs. The selecting official and servicing HRO must establish and define the quality categories in the job analysis prior to issuing the job opportunity announcement. Preference eligibles are listed ahead of non-preference eligibles within each quality category. Veterans’ preference is absolute within each quality category. Information on how to establish quality categories can be found in Chapter 5 of the DEOH.

8. **ORDER OF SELECTION ON THE CERTIFICATE OF ELIGIBLES.** After completing the rating procedure process, each eligible must be ranked by score in his or her entitlement group to establish the “order of selection”. Within each entitlement group, eligibles must be ranked in the order of their numerical rating, including Veterans’ preference points (under numerical rating). If there is a tie in the numerical scores between eligibles in different preference categories, the order of ranking is: 30% Compensable Disability Preference (CPS)/Compensable Disability Preference (CP), Disability Preference (XP), tentative preference (TP) and then non preference (NV). In the 3rd category listed below (subparagraph a(1)(c)), CPS and CP go to the top of the certificate of eligibles, regardless of numerical rating. If there is more than one CPS or CP eligible, they are listed in score order. For this purpose there is no difference between CPS and CP Veterans. If tied scores occur, one of the tie-breaking procedures identified in paragraph 10 must be applied.

a. **Numerical Rating.** The order of selection for numerical rating procedures is as follows:

(1) **Order of Selection for Most Positions and Grade Levels Under Numerical Rating Procedures.** The order of selection on a certificate of eligibles for most positions and grade levels (excluding Professional and Scientific positions at the GS-9 grade level and above and positions restricted to preference eligibles) is as follows:

(a) Interagency Career Transition Assistance Program (ICTAP) Eligibles;

(b) Eligibles that lost consideration due to erroneous certification;

(c) All 10-point preference eligibles with a service-connected disability of 10 percent or more (CPS and CP); and

(d) All remaining eligibles in score order.
(2) **Order of Selection for Positions Restricted to Preference Eligibles Under Numerical Rating Procedures.** Non preference eligibles may only be certified if the supply of preference eligibles has been exhausted. When non preference eligibles are certified, they are listed below the last preference eligible. The order of selection on a certificate of eligibles for positions restricted to preference eligibles is as follows:

(a) ICTAP eligibles entitled to Veterans' preference;

(b) Preference eligibles that lost consideration due to erroneous certification;

(c) All 10-point preference eligibles with a service-connected disability of 10 percent or more;

(d) All remaining preference eligibles;

(e) Non-preference ICTAP eligibles;

(f) Non-preference eligibles that lost consideration due to erroneous certification; and

(g) All remaining eligibles (if non-Veterans were allowed to compete).

**NOTE:** See part II, chapter 2, paragraph 5 for procedures regarding appointment to positions restricted to preference eligibles.

(3) **Order of Selection for Professional and Scientific Positions at the GS-9 Grade Level and Above Under Numerical Rating Procedures.** Within each entitlement group, eligibles must be ranked in the order of their numerical rating, including Veterans’ preference points. Professional and scientific positions are identified in the OPM publication *Handbook of Occupational groups and Families.* It is very important to verify whether the series is in a professional occupation, since a misidentification could lead to a violation of veterans’ preference law and the invalidation of an appointment. The order of selection on a certificate of eligibles for Professional and Scientific positions at the GS-9 grade level and above is as follows:

(a) ICTAP eligibles;

(b) Eligibles that lost consideration due to erroneous certification; and

(c) All other eligibles in score order.

b. **Category Rating.** The order of selection for category rating procedures is as follows:

(1) **Order of Selection for Most Positions and Grade Levels Under Category Rating Procedures.** The certificate of eligibles list certified eligibles in the following order:

(a) ICTAP eligibles;

(b) Eligibles who lost consideration due to erroneous certification;
(c) Eligibles in highest quality category; and

(d) Eligibles in the next lower quality categories, as needed.

(2) **Order of Selection for Professional and Scientific Positions at the GS-9 Grade Level and Above Under Category Rating Procedures.** Within each of the groups, eligibles are ranked in the order of their numerical ratings. Compensable disabled preference eligibles (CPS/CP) are not automatically placed at the top of the certificate of eligibles. Professional and scientific positions are identified in the OPM publication, *Handbook of Occupational Groups and Families*. It is very important to verify whether the series is in a professional occupation, since a misidentification could lead to a violation of veterans’ preference law and the invalidation of an appointment. The certificate of eligibles list certified eligibles in the following order:

(a) ICTAP eligibles;

(b) Eligible candidates who lost consideration due to erroneous certification (eligibles entitled to priority consideration); then

(c) Eligible candidates in numerical order, highest numbers first (under traditional numerical rating) or eligibles in the highest quality category (under category rating).

9. **PLACEMENT OF QUALIFIED ELIGIBLES ON THE CERTIFICATE OF ELIGIBLES**

a. **Application of the “Rule of Three” Using Traditional Numeric Rating Procedures.** When selecting from a certificate of eligibles under the “rule of three” procedures, each eligible is afforded his or her right to receive a bona fide employment consideration. This can only occur if a valid selection is made. An eligible who is among the top three eligibles does not receive a "consideration" if no one is selected. Additionally, the “rule of three” allows a selecting official to eliminate an eligible that has been considered for three separate appointments from the same or different certificates for the same position. After arranging all the eligibles in score order by their entitlement, the number of names of certified eligibles referred to the selecting official for consideration is determined. The general rule for referring the appropriate number of eligibles per vacancy is that there must be enough names certified from the highest ranking eligibles to permit the selecting official to consider at least three names for appointment to each vacancy in the competitive service. This means the appointing official is entitled to consider three eligibles for each vacancy. There may not always be three eligible names to refer to the selecting official. If there are less than three eligibles for a particular position on a certificate of eligibles, you may refer the names to the selecting official or readvertise the position to attract additional candidates for consideration. At the discretion of the appointing official, additional names may be certified to compensate for eligibles that are within reach for consideration but will decline or fail to respond to an inquiry of availability or interview.

(1) When using traditional numerical rating procedures for most positions and grade levels, if there are less than three eligibles and they are either all preference eligibles or all non preference eligibles, the eligibles do not need to be rated and ranked. The eligibles may be simply listed randomly on the certificate with a notation "Eligible" in lieu of a rating and referred to the selecting official or the
position may be re-advertised to attract additional candidates for consideration. However, if there are three or more eligibles or if the group of eligibles is a mix of preference eligibles and non-preference eligibles, you must assign a numerical score and place the eligibles on the certificate in descending score order, including Veterans preference points, with ties broken within their entitlement category, e.g., 30% or more compensable disabled Veteran (CPS), tentative Veterans preference (TP), non-Veteran (NV), etc. On the certificate, the preference eligible Veterans rise to the top, with the exceptions of ICTAP eligibles and eligibles that lost consideration due to erroneous certification. The certificate of eligibles must be documented and annotated for any action taken on a certified eligible.

(a) Filling One Vacancy. The selecting official may select from any of the first three available certified eligibles if all available certified eligibles are preference Veterans or all the available certified eligibles are non-preference eligibles. The selecting official may only select the certified preference eligible at the top of the certificate if the other available certified eligibles are non-preference eligibles.

(b) Filling Multiple Vacancies. The selecting official may select from all available certified Veterans preference eligibles at the top of the certificate. If there are still vacant positions to be filled after the top certified Veterans preference eligibles have been selected, the selecting official may select from any of the next three available certified eligibles.

(c) Three Considerations. An appointing officer is not required to consider an eligible who has been considered by the appointing officer for three separate appointments from the same or different certificates for the same position.

(2) When using traditional numerical rating procedures for Professional and Scientific positions at the GS-9 grade level and above, the eligibles must be placed on the certificate of eligibles in rank order according to his or her numerical rating in descending order, including Veterans preference points, with ties broken. On these types of certificates the preference eligible does not rise to the top. All certified eligibles stay in rank order. The selecting official is entitled to consider a minimum of three certified eligibles for each vacant position and the action taken for each certified eligible must be documented and annotated on the certificate of eligibles.

(a) Filling One Vacancy. The selecting official may select from the first three available certified eligibles when using a professional/scientific certificate at the GS-9 grade level or above. However, if the first available certified eligible is a preference eligible, the selecting official may only select the certified preference eligible.

(b) Filling Multiple Vacancies. The selecting official may select from the first three available certified eligibles when using a professional/scientific certificate at the GS-9 grade level or above. For each additional vacancy, the selecting official may select from any of the next three available certified eligibles available.

b. Application of Category Rating Using Alternative Rating Procedure. When selecting from a certificate of eligibles under category rating procedures, a selecting official makes a selection from among all of the eligibles in the highest quality category. A selecting official may not select a non-
preference eligible over a preference eligible. A selection must be made from within the highest quality category regardless of the number of candidates (i.e., the rule of three does not apply). Preference eligibles receive absolute preference within each category. If a preference eligible is in the category, you may not select a non-preference eligible unless a request to pass over the preference eligible in accordance with 5 U.S.C. § 3318, is submitted and the request is approved.

(1) When using category rating procedures for most positions and grade levels, the certified eligible must be placed in his/her appropriate quality categories. Certified compensable service-connected eligibles of at least 10% are placed ahead of all the other certified eligibles in the highest quality category. All other certified eligibles are kept within their appropriate quality categories in any order e.g., alphabetical order (by first or last name). There must be a sufficient pool of candidates from which to select. Therefore, if there are less than three certified eligibles in the highest quality category, the DEU HR specialist in conjunction with the selecting official may decide to merge the top two quality categories. The newly merged category becomes the new highest quality category. The certified compensable service-connected preference eligibles must be kept above the non-preference eligibles in the newly merged category.

(a) Filling One Vacancy. The selecting official must make selections from the certified available eligibles in the highest quality category. Veterans receive absolute preference within each category; therefore, the selecting official may not select a certified non-preference eligible unless the DEU obtains approval to pass over the certified preference eligible from OPM. To fill one vacancy, the selecting official selects from any of the certified preference eligibles in the highest quality category. If there are no certified preference eligibles, the selecting official may select from any of the certified eligibles in that quality category.

(b) Filling Multiple Vacancies. The selecting official must select from any of the certified preference eligibles in the highest quality category until there are only two candidates left in the highest quality category. If there are still vacant positions to be filled, the DEU HR specialist in conjunction with the selecting official may decide to merge the top two quality categories; thereby making the newly merged category the new highest quality category. After merging the categories, the DEU HR specialist must place the certified preference eligibles above the non-preference eligibles in the newly merged highest quality category. The selecting official may continue to make selections in the new highest quality category, selecting first from among the certified preference eligibles. A non preference eligible may only be selected after the certified preference eligibles have been exhausted.

(2) When using category rating procedures for Professional and Scientific positions at the GS-9 grade level and above, the certified eligibles are placed in the appropriate quality categories in alphabetical order (by first or last name)or some other random number order with the applicant’s Veterans preference noted.

(a) Filling One Vacancy. The selecting official may select from the first three available certified eligibles when using a professional/scientific certificate at the GS-9 grade level or above. For each additional vacancy, the selecting official may select from any of the next three available certified eligibles.
(b) **Filling Multiple Vacancies.** The selecting official must first select from among the certified preference eligible Veterans in the highest quality category. A non-preference eligible may only be selected after the certified preference eligibles have been exhausted. If there are less than three certified available eligibles in the highest quality category, the DEU HR specialist in conjunction with the selecting official may decide to merge the top two quality categories; thereby making the newly merged category the new highest quality category. After merging the categories, the DEU HR specialist must place the certified preference eligibles above the non-preference eligibles in the newly merged highest quality category. The selecting official may continue to make selections in the new highest quality category, selecting from among the certified preference eligibles.

**NOTE:** *The three valid considerations rule for each certified eligible does not apply when using category rating.*

**10. METHODS OF BREAKING TIED RATINGS.** You may use any of the following types of tie breaking methods. Listing eligibles alphabetically when breaking a tie is not acceptable. Whichever tie-breaking procedure is used must be recorded and kept with the certificate of eligibles documentation records.

a. **Job-Related Factor.** A job-related factor may be used to break tied scores provided that you did not use these factors in the ranking process;

b. **Name Request.** The selecting official may submit a name request within the tied range; you may place the name request ahead of other eligibles with the same rating within the sub-group;

c. **Name Request Based on Job-Related Factor.** A name request may also be identified after a certificate of eligibles is issued to the selecting official. If a certificate of eligibles includes eligibles with tied scores and the selecting official determines that he or she would like to identify an eligible as a name request from among the eligibles with tied scores, you must apply the tied score procedures identified for name requests when the certificate is returned to the DEU. The identification of the eligible should be based on a job related factor; or

d. **Random Number or Random Referral.** The random referral procedure is used when all job-related methods for breaking ties have been exhausted. It is used to rank tied eligibles by matching the last digit of the identification number such as the Social Security Number, against a randomly chosen number sequence from a table of random numbers which is changed daily.

**11. REQUIRED SELECTION AND PRIORITY CONSIDERATION**

a. The special selection priority of a well-qualified eligible in the Interagency Career Transition Assistance Plan (ICTAP) is the only situation where an eligible must be selected.

b. Priority consideration is provided to an eligible that was previously denied consideration due to an administrative error, law or regulatory violation.
12. IMPROPER SELECTION DURING THE SELECTION PROCESS

a. If an improper selection is discovered during the audit of a certificate but before the selectee has entered on duty, the selecting official and the appointing officer must be notified immediately. Any further selections from the certificate of eligibles for which the selectee was selected must be placed “on hold” until after a correction is made (before the selectee enters on duty, if possible).

b. If improper selection is discovered during an audit of a certificate and the selectee that was erroneously selected has entered on duty, the DEU must notify the servicing HR office immediately. The servicing HR office in consultation with the selecting official must immediately pursue regularization of the appointment of the individual erroneously appointed. The individual who should have been selected will be notified by the DEU and the DEU will advise the individual of her or his eligibility for priority consideration for the next vacant position in the same occupational series, grade and geographical location. The case file must be thoroughly documented with all facts of the case and follow-up actions must be taken to preclude any recurrence of the error.

c. If the erroneous appointment is regularized, the servicing HRO must submit a variation request [for service credit for the period of time the employee served in the position erroneously]. If the erroneous appointment is not regularized, the servicing HRO must submit a variation request to retain the employee as a result of an administrative error [and for service credit for the period of time the employee served in the position erroneously]. Both types of variation requests must be submitted to OPM via the Recruitment and Placement Policy Service (059), OHRM. The request should include:

   (1) A cover memo that includes the name(s) of the affected employee(s); the name of the HR specialist that posted the job opportunity announcement, evaluated the applicants, and certified the certificate of eligibles; explains how and when the erroneous appointment was made; explains how the erroneous appointment was regularized; and explains what steps have been taken to ensure no recurrence of such error; and

   (2) All documentation used to support the erroneous appointment and used to regularize the appointment, i.e., application, job opportunity announcement, certificate of eligibles, DD 214, SF 15, SF 50, transcript, passport, driver’s license, required letters of eligibility, PCS orders, licenses, certifications, etc.

[NOTE: For additional guidance on regularizing erroneous appointments and submitting staffing variation requests, see VA Handbook 5005, Part I, Appendices C and D.]

13. OBJECTIONS AND PASS OVERS

a. Objection of a Non Preference Eligible. Occasionally, an appointing official may have adequate and proper reasons to remove one or more of the highest ranking eligibles from consideration and may wish to select a certified eligible who is not among the highest ranking eligibles.

   (1) The appointing official must evaluate each objection on its own merit and may sustain the objection if it is based on proper and adequate reasons, some examples are: age, education, intentional
fraudulent statements discovered upon examination, habitual use of alcohol or narcotics, unsatisfactory performance rating, etc.

(2) The selecting official must submit an objection using the SF 62 form, *Agency Request to Pass Over a Preference Eligible or Object to an Eligible*, along with thorough supporting documentation justifying the objection to the servicing Human Resources Office (HRO). The servicing HRO must review the package for completeness before forwarding it to the originating DEU.

(3) The DEU must review the content of the objection package and make a decision.

(4) The DEU must notify the selecting official of its decision in writing through the servicing HRO. If the DEU sustains the objection, the DEU HR specialist must remove the certified eligible’s name from the certificate of eligibles.

(5) If the DEU does not sustain the objection, the DEU must notify the selecting official of its decision in writing through the servicing HRO and the certified eligible’s name must remain on the certificate of eligibles for consideration.

(6) When an objection is not sustained, the selecting official may select the eligible candidate for the vacancy or challenge the decision by submitting additional information to support a favorable decision from the DEU. The additional information must not be frivolous and must give weight to the non selection.

b. **Pass Over of a Preference Eligible.** Requests to pass over certified preference eligible Veterans are not acceptable without proper and thorough documentation to warrant approval. The procedures used to pass over a preference eligible under category rating are the same as those used in the traditional numerical “rule of three” process.

(1) **Pass Over of a Preference Eligible Based on a Proper and Adequate Reason.** A selecting official may submit a request to pass over any certified preference eligible Veteran (except a 30% or more compensable service-connected disabled Veteran) on the SF 62 form, *Agency Request to Pass Over a Preference Eligible or Object to an Eligible*, along with thorough documentation to the designated DEU via the servicing HRO.

(a) A pass over request may be sustained by the DEU only if the request is based on a proper and adequate reason. If the DEU sustains the pass over request, the certified preference eligible Veteran is removed from consideration. The servicing HR specialist must document the SF 39 form, *Request for Referral of Eligibles*, with the appropriate action code. The servicing HR specialist must attach all documentation and applications to the SF 39 form and return the certificate of eligibles to the DEU.

(b) If the DEU does not sustain the pass over request, the certified preference eligible may be selected.
(2) Pass Over of a 30% or More Compensable Service-Connected Disabled Veteran. A selecting official may submit a request to pass over a certified 30% or more compensable service-connected disabled Veteran. The selecting official must submit the request on the SF 62 form, Agency Request to Pass Over a Preference Eligible or Object to an Eligible, along with supporting documentation that justifies the pass over to the servicing HRO. The servicing HRO must send a notice to the certified 30% or more compensable service-connected disabled Veteran of a proposed pass over explaining the reasons. The notice must include the OPM address and must inform the Veteran of his or her right to respond to the reasons identified in the notice within 15 days of the postmark. At the same time, the servicing HRO must submit the SF 62 form, Agency Request to Pass Over a Preference Eligible or Object to an Eligible, and the supporting documentation sent from the selecting official to OPM for adjudication. In addition, the servicing HRO must provide evidence to OPM that the notice was sent to the disabled Veteran’s last known address no more than a period of 1-2 days prior to submitting the package to OPM for adjudication.

(a) If OPM sustains the pass over request, the servicing HRO must remove the certified 30% or more compensable service-connected disabled Veteran from consideration by annotating the certificate of eligibles appropriately. The selecting official may select the next available certified eligible on the certificate of eligibles.

(b) If OPM does not sustain the pass over request, the selecting official may select the certified 30% or more compensable service-connected disabled Veteran or challenge the decision by submitting more information to support a favorable adjudication.

(3) Pass Over of a Preference Eligible Based on a Physical or Medical Condition. A selecting official may submit a request to disqualify or pass over a preference eligible when it is believed the applicant may have a physical or medical (including mental) condition that will prevent him or her from performing the full range of essential duties and responsibilities of the position safely and efficiently. The selecting official must assess whether reasonable accommodation can be provided to permit performance of the job despite the condition when considering whether a physical or medical condition will have an impact on an eligible’s capacity to perform the job efficiently and safely. The servicing HRO must submit the request along with thorough supporting documentation to OPM.

(a) If OPM sustains the pass over request, the DEU must remove the preference eligible from consideration for the vacant position and the selecting official may select the next available certified preference or non preference on the certificate.

(b) If OPM does not sustain the pass over request, the selecting official may challenge the decision by submitting additional information to support a favorable decision; or consider/select the preference eligible for a job.

(4) Pass Over of a Preference Eligible Based on Suitability. A selecting official may submit a request to pass over a preference eligible based on possible adverse suitability for the position. The selecting official must submit the request in writing along with thorough supporting documentation via
the servicing HRO to the VA Office of Operations, Security and Preparedness (007) for final determination.

14. RECONSIDERATION OF RATINGS. A reconsideration of a rating may be provided upon reasonable demonstration that a review is necessary. Applicants who believe their rating is in error and warrants review must make their request for reconsideration in writing to the DEU that made the original rating decision and indicate why they believe the original rating was not proper.

   a. The reconsideration procedures for applicants that are non VA employees are as follows:

      (1) Upon the DEU receiving the applicant’s request for reconsideration, a VA DEU HR specialist who did not make the original rating decision must conduct the review in consultation with the team lead or first line supervisor;

      (2) The DEU’s response to the reconsideration of the original rating decision must contain a full explanation of the reasons for the decision without unduly compromising the rating schedule;

      (3) If the reconsideration prompts a rating change, the applicant’s record and the certificate of eligibles, providing it has not been issued, must reflect the change. If the certificate of eligibles has been issued, it should not be amended unless:

         (a) The new rating is “ineligible”;

         (b) Veterans preference points were improperly awarded; or

         (c) The rating error was erroneous certification.

      (4) If an applicant submits an appeal of the 1st reconsideration decision, a second level review must be conducted by the Director of the DEU. The 2nd reconsideration decision is final and there is no further appeal to OPM.

   b. VA employees who are applicants and who are in a bargaining unit and dissatisfied with their rating from a VA DEU may follow either:

      (1) Administrative grievance procedures in VA Handbook 5021; or

      (2) The negotiated grievance procedure that applies to their bargaining unit e.g., AFGE, SEIU, NAGE, etc.

   c. VA employees who are applicants who are not in a bargaining unit and are dissatisfied with their rating from a VA DEU may follow the administrative grievance procedures in VA Handbook 5021.
15. EXTENSIONS OF CERTIFICATE OF ELIGIBLES AND LATE APPLICATIONS

a. Extensions Certificate of Eligibles. Issued certificates of eligibles expire on the 30th day after the date of issuance. A selecting official may request the DEU to extend a certificate of eligibles. Extensions may be made in 30 day increments up to a total of 90 days from the first date of issuance.

b. Late applications. As a general rule, applications received after the closing date are late and should not be considered. However, late applications from persons who are entitled to file late must be accepted and processed until the time that a certificate is issued. Once a certificate of eligibles is issued, it should not be amended to include late applications unless you are requested to do so by the selecting official. If you amend the certificate based on the selecting official's request, then you must refer the applications of all qualified applicants received on the same date and earlier. Individuals with entitlement to file late applications are:

(1) Applicants who are preference eligibles that applied within 90 days after resignation without delinquency or misconduct from a career or career-conditional appointment;

(2) Applicants that are 10-point preference eligible applying to a position for which a non-temporary appointment has been made in the preceding three years; list of eligibles currently exists but is closed to new applicants; or list of eligibles is about to be established;

(3) Applicants unable to file for an open competitive examination or to appear for a test due to service in the armed forces or hospitalization continuing for up to one year following discharge from the armed services;

(4) Applicants unable to file an application or to appear for a written test due to overseas service with a Federal agency or international organization in which the U.S. Government participates (e.g., Peace Corps);

(5) Applicants on an inventory of eligibles but who lost eligibility for appointment due to active duty in the Armed Forces; and

(6) Applicants who are Federal employees and who are unable to file for an open competitive examination or to appear for a test due to active Reserve duty continuing beyond 15 days.

16. RETENTION MATERIALS FOR DOCUMENTING THE CASE FILE. All records documenting the job opportunity announcement should be kept in an examination file. The examination file must show that the 10-point point preference eligible file was checked for any eligible candidates and include the names of any 10-point preference eligibles whose applications were pulled from the file and to whom additional material was sent. In addition, the file should include the following information:

a. Position descriptions or any other material gathered to identify the task and competency requirements of the position.
b. The job analysis results (i.e., tasks, competencies/KSAs, and task-competency linkages), the quality level definitions, any selective factors identified, and other criteria used to distinguish qualifications through the assessment process. If any other rating, ranking, or weighting of competencies/KSAs is made, you should maintain this information and its basis;

c. A copy of the actual rating procedure;

d. The reference to the OPM occupational qualification standard applied or a copy of the OPM-approved standard if it is different from the OPM qualification standard. Raters’ initials and dates of qualification determinations for each applicant;

e. A copy of the supplemental application form, if developed. (OMB must approve supplemental forms and the forms must contain Privacy Act Information if the information is being collected from the general public;

f. The tie-breaking method developed from job-related criteria, if used; and

g. The identification of the subject matter experts and human resource professionals who participated in the development and application of the examining plan (i.e., name, title, series, and grade).

17. SPECIAL HANDLING OF APPLICATIONS FOR 10-POINT PREFERENCE ELIGIBLES

a. A 10-point preference eligible is entitled to file an application at anytime for an examination for any position to which an appointment was made within the preceding three years.

b. When a 10-point preference eligible’s application is received, the DEU should review the DEUs records to identify if any non-temporary appointments were made in the preceding three years; and compare the 10-point preference eligible’s application against the title, series, grade, and duty location of the position identified. If the records are inconclusive as to the similarity of the positions, the 10-point preference eligible must be given the benefit of the doubt, and the application must be accepted.

c. If the 10-point preference eligible applies for a specific position, meets the qualifications of the position, and is within reach for referral for the position, the DEU must ensure that the preference eligible is referred on the certificate as soon as possible.

d. If no job announcement is open and a 10-point preference eligible’s application is received, the DEU must retain the 10-point preference eligible’s application in a special file for referral on certificates for future vacancies for up to three years.

e. The 10-point preference eligible should be informed in writing of these procedures, as well as the status of his or her application.
18. MATERIAL TO BE MADE AVAILABLE BY AUTHORITY OF THE PRIVACY ACT. An applicant has the right under the Freedom of Information Act (FOIA) and Privacy Act (PA) to request certain materials for review or photocopying.

a. The following materials must be made available for review or photocopying by applicants who are the subject of the materials, or to their designated representative, when requested under the Privacy Act. In addition, this information may be made available to a third party only with written authorization from the person who is the subject of the information requested.

   (1) Application materials submitted by the requesting individual. Notations made by raters or reviewers showing earned rating, Veterans’ preference, and final rating may remain, as well as notations on experience blocks showing qualifying experience or quality level;

   (2) Inventory (register) cards or other documentation;

   (3) Certification history – identification of dates, jobs, and organization for which the eligible's name was certified;

   (4) Certificates of eligibles, with the names, addresses, social security numbers, phone numbers and any other personal information pertaining to all other eligibles marked out. **NOTE:** The names of appointed individuals - but not other personal information about them - are matters of public record, and therefore may remain unmasked on the certificate. However, care should be taken to determine that the individual shown as selected actually entered on duty. The names of applicants selected for law enforcement related positions may be withheld;

   (5) Availability inquiry responses and position descriptions in the certification file; and

   (6) Reasons, submitted by the appointing authority, in support of a proposed pass over of a preference eligible must be furnished to the preference eligible, or his or her representative, upon request (Reference 5 U.S.C. § 3318(b)).

b. The following material is exempt and should not be made available or disclosed to members of the public, including the applicant:

   (1) Answer keys;

   (2) Rating schedules or crediting plans;

   (3) Rating sheets;

   (4) Test booklets or items;

   (5) Transmutation tables; and
(6) Names of raters or reviewers.

c. Confidential disclosure of exempt and privacy materials should only be made on a need-to-know basis.

(1) Equal employment opportunity (EEO) counselors, investigators and other individuals often request to see confidential information, while observing agency rules and procedures, for such things as applications and rating schedules/crediting plans. Discretion should be used in deciding what information to disclose and under what conditions.

(2) EEO officials are usually allowed to review all documentation, the DEU and the servicing HRO should control that review. The DEU or the servicing HRO must arrange for the review to take place in the presence of a DE office representative or servicing HRO representative and prohibit photocopying of documents.

19. IMPROPER PARTICPATION IN DELEGATED EXAMINING PROCEDURES

a. If any DEU HR specialist intends to apply for a vacancy or knows that a relative or member of his or her household intends to apply for a vacancy which is handled by the DEU section in which he or she is employed, the DEU HR specialist must notify the supervisor in writing of his or her intent to apply and must not participate in the development and administration of the vacancy announcement or the assessment of candidates for the vacancy. Also, similar notice must be given if any DEU staff member intends or knows a relative or household member intends to apply for such a vacancy.

b. Subject matter experts who participate in assessments or ranking of applicants must notify the selecting official and their supervisor in writing if they know a relative or household member intends to apply for a vacancy for which they are assessing applicants. A person that has been asked to serve as a subject matter expert in the assessment or ranking of applicants of a job opportunity announcement must remove himself/herself from the assessment process.

c. Cases of alleged misconduct in a DEU should be forwarded to the Office of Special Counsel to determine if a prohibited personnel practice has been committed.

20. REPORTING AND ACCOUNTABILITY REQUIREMENTS

a. Each DEU must conduct annual internal audits of their delegated examining operations; submit to periodic reviews by OPM’s Human Capital Leadership and Merit System Accountability Division (HCLMSA) and annual audits by the Oversight and Effectiveness Service, OHRM; and submit quarterly workload data using the OPM Delegated Examining Information System (DEIS). The quarterly workload data must be entered into DEIS by the 1st day of the month following the end of the reporting quarter (i.e., January 1, April 1, July 1, and October 1). Required data includes the following information:

(1) Number of applications processed;
(2) Number of selections made;

(3) Number of preference eligibles selected;

(4) Number of certificates audited;

(5) Number of audited certificates that had preference eligibles at the top;

(6) Number of audited certificates that did not have preference eligibles at the top;

(7) Number of audited certificates that were used;

(8) Number of audited certificates that were unused;

(9) Number of certificates that were unused due to CTAP/ICTAP referral;

(10) Certification that the annual self-review required in paragraph 20 has been completed; and

(11) Other certification as required by a specific delegation agreement.

b. Each DEU is responsible for supplying the following information related to the use of category rating to the Recruitment and Placement Policy Service (059), OHRM. OHRM will use this data to prepare a report to Congress and to OPM annually for the 3 years following the establishment of policy and procedures beginning in 2011. The DEUs must submit the information no later than January 30th of each year through 2013.

(1) Number of employees hired under category rating;

(2) Impact category rating has had on the hiring of Veterans and minorities, including those who are Native Americans or Alaska Natives, Asian, Black or African American, and native Hawaiian or other Pacific Islanders; and

(3) An explanation of methods used to train managers in the administration of category rating.

21. ANNUAL SELF-AUDITS

a. A DEU must conduct annual “self-audits” of its delegated examining operations as prescribed by the Interagency Agreement for Delegated Examining Authority. The DEU must use VA staff not involved in the delegated examining activities of the office being audited to conduct the annual self-audit. These self-audits may only be conducted by persons who have received delegated examining training and are currently certified.
b. The DEU may substitute its annual self-audit review when OPM’s Human Capital Leadership and Merit System Accountability Division (HCLMSA), Merit Systems Compliance Group conducts a review of the delegated examining operation.

c. The DEU must certify annually that the required self-audit has been completed and submit the certification to the local OPM Services Branch as specified on the Delegated Examining Quarterly Workload Report Form.

22. TERMINATION, SUSPENSION OR REVOCATION OF A DEU. A DEU’s delegated examining authority may be terminated by either OPM or the Deputy Assistant Secretary for Human Resources Management with 90 days advance notice. OPM may suspend or revoke certification of a delegated examining office at any time, with or without advance notice. Termination, suspension, or revocation may be as a result of negligence or non compliance of a DEU’s responsibility as identified in the Interagency Delegated Examining Agreement. In such cases, the DEU is not able to fill positions using competitive examining procedures. DEU’s that wish to terminate its delegated examining authority must submit a written explanation to the Recruitment and Placement Policy Service, OHRM and must include the following:

a. The address, room number and mailing address, if different than the DEU; and

b. The reason for termination of the DEU.

v. Guide to Processing Personnel Actions
APPENDIX C. REGULARIZING ERRONEOUS TITLE 5 APPOINTMENTS

In accordance with Appendix B, paragraph 12 of this part, if an illegal appointment of an employee (e.g., reinstated improperly; appointed noncompetitively when ineligible for noncompetitive appointment, etc.) is discovered, the servicing Human Resources (HR) office must attempt to place the erroneously appointed employee on a legal appointment. To regularize (correct/legalize) an erroneous appointment, follow the steps below:

**Step 1** – If the employee is in a bargaining unit, notify the union and employee, in writing, of the erroneous appointment. The notice must include: (1) a summarized description of the erroneous appointment; (2) what steps the servicing HR office will take to regularize the appointment; (3) what the ramifications are if the servicing HR office is unable to regularize the appointment; and (4) MSPB rights.

**Step 2** – HR officer/manager should meet with the employee to explain: (1) that her/his placement into the position was erroneous; (2) what steps the servicing HR office will take to regularize the appointment; and (3) what role the employee will play in regularizing the appointment. The servicing HR office should also advise the employee that if the servicing HR office cannot regularize the appointment and OPM does not grant a variation to retain the employee, the servicing HR office must then terminate the employee.

**Step 3** – The HR officer/manager should discuss with the employee and research all the employee’s documents (in eOPF) to determine whether the employee has any special noncompetitive appointment eligibilities, such as VRA, 30% service-connected disabled veteran, Schedule A - 5 CFR 213.3102(u), etc.

**Step 4** – If the employee had special noncompetitive appointment eligibility at the time of the erroneous appointment, the servicing HR office may place the employee in the position using the appropriate appointment authority. If so, the servicing HR office must correct the appointment SF 50 to reflect the appropriate appointment authority along with the appropriate remarks.

**Step 5** – If the employee does not have special noncompetitive appointment eligibility, the HR officer/manager must make further efforts to give the employee a legal appointment via competitive examining through a Delegated Examining Unit (DEU).

**Step 6** – The HR officer/manager should ask its designated DEU if any certificates existed from the date of the erroneous appointment to the present that mirror the occupational series and grade of the position to which the employee was erroneously appointed. If any have existed, the DEU may be able to reconstruct the certificate and amend it to add the employee.

**Step 7** – If the employee is within reach on the reconstructed DEU certificate of eligibles, the facility should select the employee and use that action to regularize the appointment.

**Step 8** – If the employee is not within reach on the **RECONSTRUCTED** Delegated Examining (DE) certificate of eligibles, the DEU should publish a new vacancy announcement to allow the employee to apply. The HR officer/manager should notify the employee of the vacancy announcement, its opening and closing dates, and qualification requirements. The HR officer/manager should also consult with the employee to answer any questions regarding the vacancy announcement and/or the application process.
This would be the **FIRST ATTEMPT** to regularize the erroneous appointment by publishing a competitive examining vacancy announcement.

**NOTE:** *The servicing HR office is strongly encouraged to make only two attempts to reach the employee on a DE certificate of eligibles.*

**Step 9** – If the **FIRST ATTEMPT** results in the employee being within reach on the DE certificate of eligibles, the facility should select the employee and use that action to regularize the appointment. After regularizing the appointment, the HR officer/manager must prepare a staffing variation request for service credit for the period of time the employee served in the position erroneously. Follow the steps in Appendix D, *Title 5 Staffing Variation Requests*, to submit a staffing variation request.

**Step 10** – If the employee is not within reach on the DE certificate of eligibles after the **FIRST ATTEMPT**, the servicing HR officer/manager should have the DEU advertise a vacancy announcement a second time after the required amount of time has passed (confer with your designated DEU). If the employee is within reach on the certificate of eligible after the **SECOND ATTEMPT**, the facility should select the employee and use that action to regularize the appointment. Then, the servicing HR office should follow the steps in Appendix D, *Title 5 Staffing Variation Requests*, to submit a staffing variation request.

**Step 11** – If the employee is not within reach on the DE certificate of eligibles after the **SECOND ATTEMPT**, the servicing HR office should prepare a staffing variation request to retain the employee and for service credit for the period of time the employee served in the position erroneously. The servicing HR office should follow the steps in Appendix D, *Title 5 Staffing Variation Requests*, to submit a staffing variation request.]
APPENDIX D. TITLE 5 STAFFING VARIATION REQUESTS

The Office of Personnel Management (OPM) has authority under 5 CFR 5.1 to permit variation (i.e., an exception) from the strict letter of the regulations whenever precise compliance with them would impose practical difficulties and unnecessary hardship and when no other remedy exists within the regulations.

OPM may grant a variation if it is within the spirit of the regulations and adequately meets the objectives of and accomplishes the purpose of the regulation as far as the Government and the competitive service are concerned. Staffing variation requests may only be submitted to OPM through the Office of Human Resources Management (OHRM) Recruitment & Placement Policy Service (R&PPS) (059). R&PPS will submit appropriately documented requests to OPM and communicate outcomes to facility officials.

OPM may approve Title 5 staffing variations (1) to alleviate hardship to individuals resulting from department/agency errors in effecting personnel actions, e.g., erroneous appointments; or, (2) to permit a department/agency to take action in unusual situations which the letter of the regulation cannot accommodate, e.g., extension of term appointments, beyond 4 years.

While 5 CFR 5.1 authorizes variations that affect requirements established by personnel regulations, OPM has no legal authority to modify requirements established by law, Executive order, or court decision, e.g., citizenship or Veterans Recruitment Appointment (VRA). A variation cannot regularize an action that violated such requirements (e.g., appointment of a noncitizen in the competitive service and the employee is still a noncitizen or a VRA appointment of someone who did not meet the eligibility requirements). In these cases, if the servicing HR office cannot identify a proper appointment authority, termination is the only recourse. For such an OPM-instructed termination, per Rule 55, Table 31-B, Chapter 31, Guide to Processing Personnel Actions, use NOAC 357, Termination, with Authority Code A3M, CS Rule V.

To prepare a staffing variation request for submission and consideration, follow the steps below:

**Step 1** - Gather copies of documents that confirm events (i.e., SF 50s showing error and corrections, vacancy announcements, Merit Promotion referral certificates, Delegated Examining Certificates of Eligibles, Defense Department 214s, transcripts, licenses/certifications, etc.). If a promotion, change in position, transfer, etc., has occurred since the initial error, include the documentation for that personnel action, too.

**Step 2** - Prepare a memorandum to the Director, R&PPS (059) from the facility Director which explains the chain of events, in chronological order, that relate to the specific request. Be sure to include the name of the impacted employee; the title, series, and grade of the impacted position; and, an explanation of corrective action management has taken to ensure such an error does not occur in the future.

**Step 3** - Packages should be assembled and labeled to correlate with the chronological order of events. Once assembled, the package (i.e., memorandum and supporting documents) must be forwarded from the facility through its respective Administration/Staff Office-level Human Resources program office to confirm proper package construction (i.e., completeness and appropriate documentation) before forwarding to: Director, Recruitment and Placement Policy Service (R&PPS) (059), OHRM, VA Central Office, 810 Vermont Avenue, N.W., Washington, DC 20420.
# TITLE 5 STAFFING VARIATION REQUEST PACKAGE CHECKLIST

<table>
<thead>
<tr>
<th>ITEM NEEDED</th>
<th>ITEM DESCRIPTION</th>
</tr>
</thead>
</table>
| Memo requesting variation (1 memo per case) | Memo must:  
1. Clearly state what is being requested, i.e., service credit, retention, or both.  
2. Explain chain of events from erroneous appointment to present, in chronological order.  
3. Include what steps have been taken to ensure that errors in making appointments do not occur again.  |
| Erroneous Appointment Documents | 1. Vacancy announcement used in the initial erroneous appointment.  
2. Certificate(s) that resulted from the initial announcement.  
**NOTE:** Certificates should be complete with the documented action taken on each of the eligibles as well as the printed name, signature, address, and phone number of the selecting and appointing officials.  
3. SF 50 for erroneous appointment.  |
| Documents for Other Actions | If a promotion, change in position, transfer, etc., has occurred since the initial error, include the documentation for that personnel action also.  
1. Vacancy announcement used, if applicable.  
2. Certificate(s) that resulted, if applicable.  
**NOTE:** Certificates should be complete with the documented action taken on each of the eligibles as well as the printed name, signature, address, and phone number of the selecting and appointing officials.  
3. SF 50 for any change.  |
| Documentation for Regularization Attempts | 1. Vacancy announcement(s) used in attempt to regularize the erroneous appointment.  
2. Certificate(s) that resulted from announcement(s) used in attempt to regularize the erroneous appointment.  
**NOTE:** Certificates should be complete with the documented action taken on each of the eligibles as well as the printed name, signature, address, and phone number of the selecting and appointing officials.  |
| Regularized Appointment Documents | 1. Vacancy announcement(s) used to regularize the erroneous appointment.  
2. Certificate(s) that resulted from announcement(s) used to regularize the erroneous appointment.  
**NOTE:** Certificates should be complete with the documented action taken on each of the eligibles as well as the printed name, signature, address, and phone number of the selecting and appointing officials.  
3. SF 50 for the regularized appointment.  |
Bargaining Unit Status | If employee(s) included in bargaining unit, you must:
--- | ---
1. Notify union official(s); and,
2. Include copy of such notification with request.

<table>
<thead>
<tr>
<th>ITEM NEEDED</th>
<th>ITEM DESCRIPTION</th>
</tr>
</thead>
</table>
| Discovery of Erroneous Appointment | Include copy of the written notice given to each affected employee at initial stage of discovery, informing each employee of:
1. The identified error;
2. Steps to be taken to regularize the appointment, and request a variation to waive the error;
3. Implications of not being able to regularize the appointment or acquire a variation waiver; and,
4. MSPB rights. |

**NOTE:** OPM is not able to grant a variation to waive compensation/salary received by the employee while in the position erroneously; therefore, you will need to work with your finance office to submit a bill of collection to the employee on behalf of the Department. So that the employee is not adversely impacted, it is recommended that the servicing HR office submit a request to the finance office stating that the error(s) were caused by the servicing HR office and asking for a waiver of the debt.]
APPENDIX E. GROUNDS FOR OBJECTION OR PASS OVER REQUESTS

The following specific reasons for objections are provided for guidance on how to proceed with an objection. There may also be other grounds on which an objection may be based. This guidance expresses the principles to follow, but, unless specifically indicated to the contrary, each case must be adjudicated on its own merits. In all cases, the written record used to support such decisions must be complete and maintained for review.

1. Affiliations. Any affiliations the applicant may have which could clearly be expected to present a conflict of interest may constitute a valid objection. The need to consider the applicant’s affiliations must be demonstrated in writing and concurred by the appointing office. Ordinarily, objections of this type may not be sustained.

2. Availability

   a. The employing office must determine the applicant’s availability for a specific position, at a certain salary and at a specific duty location. Objections will not be sustained on the basis of a presumption that an applicant is unavailable, e.g., does not indicate availability, geographic location etc.

   b. Objections on the basis of unavailability and the effect on patient care to Veterans will be sustained only if there is evidence that the selecting official was unable to communicate with the applicant.

   c. Objections based on unavailability for positions with specialized or unusual requirements must show what the requirements are and that they were made known to all applicants. They should, therefore, be included in the announcement. Such requirements include, but are not limited to, frequent travel, geographic location, and drug testing.

3. Experience. Objections based on lack of experience (minimum qualifying experience, either general or specialized) may be sustained only when that experience is part of the minimum requirements for the position. Experience requirements for grade levels should be evident in the Job Opportunity Announcement (JOA) and/or functional statements for a particular specialty and/or assignment in accordance with the VA Qualification Standard requirements for the occupation. (NOTE: Generic functional statements which do not clearly identify specialized experience requirements for the grade level in question will not be sufficient evidence to support or sustain an objection based on lack of experience.)

4. Fraud or False Statements. A selecting official may object to an eligible on the basis of material, intentional false statements or deception or fraud on appointment.

5. Gender. Consideration may be restricted to one gender only in unusual circumstances and only upon specific approval of OPM. The determination as to whether a position should be restricted in this way should always be made before an announcement is issued and included in the announcement.

6. Habitual Use of Alcohol. A selecting official may object to an eligible on the basis of alcohol abuse of a nature and duration which suggests that the applicant would be prevented from performing the duties of the position or would constitute a direct threat to the property or safety of others.
7. **Illegal use of Narcotics.** A selecting official may object to an eligible on the basis of illegal use of narcotics, drugs, or other controlled substances, without evidence of substantial rehabilitation.

8. **Medical.** An applicant may be medically disqualified when he/she has a physical or medical (including mental health) condition that will prevent him/her from performing the full range of essential duties and responsibilities of the position safely and efficiently.

9. **Performance Rating.** An objection can be based on an unsatisfactory performance rating assigned in some previous period of Federal employment. The service resulting in the performance rating is the significant factor as it relates to the position to be filled, not the rating itself.

10. **Personal Characteristics**

   a. Personal characteristics are the most difficult requirements to measure and evaluate in the referral process. They are usually identified and assessed during a pre-selection interview or reference check. An objection may be based on the absence of desirable or the presence of undesirable, personal qualities (i.e., mature judgment, tact, objectivity, flexibility, temperament, lack of initiative, unreliability, etc.), if they are essential for satisfactory job performance.

   b. In objecting to an applicant based on personality traits, the selecting official should:

      (1) Identify which elements of a position require the possession of certain personal characteristics, and

      (2) Demonstrate, through specific examples, how a particular eligible lacks these desired traits or exhibits undesirable trait.

11. **Previous Service.** A selecting official may object to an eligible on the basis of negligence or misconduct in previous service/employment with the same or another agency/employer.

12. **Religion.** A selecting official may object to an eligible whose religion prevents working on a day included in the regular tour of duty.

13. **Security Clearance.** An objection may be based on the inability to grant a security clearance to an applicant for any reason.]
APPENDIX F. PROFESSIONAL AND SCIENTIFIC POSITIONS WITH POSITIVE EDUCATION REQUIREMENTS

Candidates for the following professional and scientific positions at the GS-9 and above, or equivalent, should be referred in unranked order. This list is not inclusive.

APPENDIX G. OHRM/VACO OBJECTION OR PASS OVER CHECKLIST
30 PERCENT OR MORE VETERANS PREFERENCE

FACILITY NAME: _______________________________
FACILITY ADDRESS: ____________________________
NAME OF VETERAN: ______________________________
POSITION TITLE/SERIES/GRADE: ____________________________
VACANCY ANNOUNCEMENT NUMBER: ________________

Please note that you must retain a vacancy in the event that the objection or pass over request is not approved in order to place the Veteran.

☐ Memo from the selecting official to HRO indicating the reasons or justification for objecting to or passing over the preference eligible. The objection to or pass over justification should be detailed, clear, and supportable.

☐ Signed memo from the HRO recommending the objection to or pass over to include the facility Director’s signature approving the request to be forwarded to OHRM for review prior to submission to OPM for adjudication.

☐ A copy of the proposed objection to or pass over notification letter sent to the preference eligible with a compensable service-connected disability of 30 percent or more (CPS) (5 U.S.C. 3318(b)(2)). The notification letter must include:
  ☐ the facility name and address, title/series/grade of the job, duty location, and referral list number;
  ☐ an explanation of the reasons for the proposed objection to or pass over; and
  ☐ the right to respond to those reasons to the appropriate office within 15 calendar days of the notice.

☐ A copy of the CPS preference eligible’s response to the agency notification, if any.

☐ Referral list of eligibles.

☐ Resume or an application for Federal employment claiming Veterans preference.

☐ College transcripts, if used to qualify based on education.
☐ Functional statement(s) (FS) and position risk and sensitivity level designation.

☐ Qualification standard used for this position.

☐ Vacancy announcement for the position.

☐ SF15, Application for 10-Point Veteran Preference and other preference supporting documents; i.e., service connected disability letter and DD214.

☐ Any other documentation to include reference checks or emails pertaining to the selection process.

☐ Interview: If the objection to or pass over is based on an interview, a copy of the interview questions with panel comments and final outcomes must be submitted.

☐ Selectee’s application package.

**NOTE:** OHRM/VACO will review the entire package to ensure that the information supports an objection to or pass over request prior to forwarding the request to OPM. If the package does not support an objection to or pass over request, OHRM/VACO will return the package to the medical center director with no action taken.

APPENDIX H. SAMPLE NOTIFICATION LETTER

Mr. John A. Doe  
123 Main Street  
Nashville, Tennessee 73695

Dear Mr. Doe:

Your name was referred for consideration for the position of (title, pay plan, series, and grade of position) located in (organization and duty location). This is to notify you that the selecting official has submitted a request to object to or pass over your name to select a non-preference eligible. The basis for this objection to or pass over is (cite reason for pass over). This objection or pass over request will be submitted to the Recruitment and Placement Policy Service (RPPS/059), Office of Human Resources (OHRM) for review and submission to OPM for adjudication.

You have 15 days from the date of this notice to respond to the reasons listed above for the objection to or pass over request. The response should be sent to the Office of Personnel Management (OPM) at the address below:

U.S. Office of Personnel Management  
Employee Services  
1900 E Street, NW, Room 6500  
Washington, DC 20415

You will be notified of the adjudication results as soon as possible.

Sincerely,

Name  
Title]
# STAFFING

PART II. APPOINTMENTS

CHAPTER 1. GENERAL APPOINTMENT PROVISIONS

SECTION A. GENERAL

1. SCOPE

   a. This chapter contains appointment provisions and requirements that apply to appointments made under both title 5 and title 38.

   b. The contents of this chapter are to be used in conjunction with the policies and procedures contained in chapters 2 and 3 of this part.

2. EMPLOYEE ORIENTATION

   a. All newly appointed employees must be oriented to the mission, policies, and functions of VA and their particular facility. They are also to receive information concerning human resources policies, employment benefits, performance expectations, customer service standards, conduct requirements, and, where appropriate, a copy of their collective bargaining agreement.

   b. Facilities are to establish systems for orienting employees that meet the requirements of the Joint Commission on the Accreditation of Health Care Organizations (JCAHO).
SECTION B. APPOINTMENT REQUIREMENTS AND DETERMINATIONS

1. VA DRUG-FREE WORKPLACE PROGRAM

   a. Certain position titles and categories have been designated as jobs that will be subject to random drug testing under the VA Drug-Free Workplace Program. Additional individual positions may also be designated for drug testing based upon the specific duties assigned.

   b. Applicants tentatively selected for employment in a testing designated position may be subject to testing prior to appointment. Applicants with a verified positive test result, and those who refuse to be tested, will be denied employment with VA and may not reapply to VA for employment for a period of six months.

   c. The policies and procedures for the VA’s Drug-Free Workplace, including the list of jobs designated for testing, are contained in VA Directive 5383, VA Handbook 5383.1 and VA Handbook 5383.2

2. DEPARTMENT OF HEALTH AND HUMAN SERVICES (HHS) EXCLUSIONARY LIST

   a. Section 4331(c) of the Balanced Budget Act of 1997, Public Law 105-33, amended sections 1128(a) and (b) of the Social Security Act to significantly expand the authority of the HHS Office of Inspector General (OIG) to exclude certain individuals and entities from all Federal healthcare programs. The law requires that all Federal healthcare programs ensure that no excluded individual or entity is receiving payments (including salary and wages) from any Federal healthcare program for services furnished on or after the date of the OIG exclusion.

   b. In accordance with the requirements in paragraph a above, VA’s healthcare program funds may not be used to make payments to excluded individuals and entities. Relevant funding sources for VA’s healthcare programs include those funds provided in the Medical Care and Medical Administration and Miscellaneous Operating Expenses (MAMOE) appropriations, and any other fund programs, such as Medical Facilities Revolving Fund, General Post Fund, Supply Fund, Construction (Major and Minor) and the Parking Revolving Fund.

   c. Persons and entities affected include all persons appointed to title 5 and title 38 positions and contracts that will be funded with Federal healthcare program funds. This includes all accessions to VHA, including competitive transfers or assignments between VHA facilities. It includes, but is not limited to appointments to positions as full time, part time, intermittent, permanent, temporary, term and fee basis. However, it does not apply to individuals appointed on a without compensation basis or other employment situations where there will be no payment to the individual from VHA funds. All individuals with appointing authority such as Human Resource Management Officers will be responsible for assuring that excluded individuals are not appointed.
d. Every transaction as indicated above will require that the appointment authority screen the HHS OIG List of Excluded Individuals/Entities before obligating the Agency in any binding agreement. This HHS exclusionary list can be accessed electronically at the http://oig.hhs.gov/fraud/exclusions.html. Information can be retrieved by searching the database on an individual’s or an entity’s name.

e. Where a reviewer can determine with certainty that a match exists, then no query to HHS is required. However, in the event that the individual or entity in question appears to be listed on the exclusionary list, but there is inadequate information to certify a match, the apparent match must be verified with HHS OIG prior to proceeding with the appointment/accession.

f. The validation inquiry may be forwarded to HHS OIG by e-mail to SANCTION@OS.DHHS.GOV. This query requires the individual/entity name, specialty, DOB, SSN, tax ID number (if different from SSN), and address. The reply from the HHS OIG will become a part of the appropriate recruitment/merit promotion file and will be maintained as long as the file itself is maintained.

g. In the event that the individual or entity withdraws their application, a report of contact documenting the apparent match and any subsequent conversation will be entered into the file for that transaction and maintained as a part of the file as long as the file itself is maintained.

h. It is prohibited to hire or contract with individuals or entities during the validation process. If a match is confirmed, the applicant may not be paid from Federal healthcare program funds.

i. Regulatory information is contained in 42 CFR, parts 1000, 1001, 1002, 1003, and 1005.

3. SUITABILITY

a. Suitability determinations will be made in accordance with the provisions of 5 CFR, part 731, and applicable instructions in chapters 2 and 3, this part.

b. If there is any question about an applicant’s suitability, no appointment action will be taken, nor will an employment commitment be made, until the matter has been resolved.

c. Questions concerning the use of adverse information in making suitability determinations should be directed to the Regional Counsel or to the Office of Human Resources Management [ ] (05), as appropriate. Questions concerning the legality of adverse determinations and personal liability involvement will also be referred to the Regional Counsel.

[4. STATUTORY BAR TO APPOINTMENT OF PERSONS WHO FAIL TO REGISTER WITH SELECTIVE SERVICE SYSTEM (SSS). VA facilities must comply with Selective Service requirements and procedures in 5 CFR 300, subpart G with respect to title 5 applicants and employees. VA facilities must also comply with VA Handbook 5005, Part II, Appendix R, which provides policies and procedures appropriate to title 5 and title 38 (full/hybrid) applicants and employees.]
SECTION C. EMPLOYMENT OUTSIDE THE CONTINENTAL UNITED STATES

1. GENERAL

a. This section contains the policies and procedures governing the employment of U.S. citizens at VA facilities in Manila, Republic of the Philippines; the States of Alaska and Hawaii; and the Commonwealth of Puerto Rico. It applies to all employees in the competitive and excepted civil service, including employees in the Veterans Health Administration employed under 38 U.S.C. chs. 73 and 74, (except as provided below) and also to employees in the Senior Executive Service. It does not apply to the appointment of non-U.S. citizens at the VA Regional Office Outpatient Clinic in Manila, Republic of the Philippines under 38 U.S.C. ch. 74 (see chapter 3, section G, paragraph 8, this part). It also does not apply to Veterans Canteen Service employees whose employment is authorized by 38 U.S.C. ch. 78.

b. For the purpose of this section, "continental United States" means the [48 contiguous] States and the District of Columbia, but does not include Alaska or Hawaii. The term "tours of duty" as used in this section encompasses and is synonymous with the term "period of service" as used interchangeably in 5 U.S.C. 5728(a) and in FPMR 302-1 in 41 CFR ch. 302. The term "vacation leave" as used in this section refers to annual leave granted to eligible employees in Alaska and Honolulu, between tours of duty, in connection with a Government authorized round trip back to their actual place of residence and return to Alaska or Honolulu. To be approved for an additional tour of duty and home leave or vacation leave, an employee must sign a transportation agreement (MP-1, pt. II, ch. 2) to remain in the service of VA at the present facility for the required additional tour. The term "home leave" has the meaning given in 5 U.S.C. 6305(a) and 5 CFR 630, subpart F. The place of "actual residence" as used in this section means the employee's actual residence at the time of appointment or transfer to the post of duty outside the continental United States (Unpublished Comp. Gen. B136029, June 24, 1958; 5 U.S.C. 5728(a) and FPMR 302-1, paragraph 302-1.12(c)(3)(ii)). In connection with the same appointment, FPMR 302-1, paragraph 302-1.12(c)(3)(iii) states, "After an employee has been transferred or appointed to a post of duty outside the continental United States, the location of the place of actual residence incorporated in the official records of such employment shall be changed only to correct an error in the designation of residence."

c. This section also applies to any VA facilities that may be established in the future in foreign countries or in areas controlled by the United States that are outside the continental United States.

2. POLICY

a. All positions at Manila which are filled by U.S. citizens are centralized to the Secretary or Administration Head, as appropriate.

b. The selection of employees for positions centralized to the Secretary or to an Administration Head will be approved in accordance with the Department delegations of authority described in VA Handbook 5001, General Introduction and Administration, part II, chapter 2, paragraph 8 for title 5 and title 38 positions. For title 38 positions, also see chapter 3, this part.
c. Whenever possible, highly qualified VA employees will be selected for key positions outside the continental United States to be filled by U.S. citizens. Consideration of candidates may be limited, however, to those who apply when vacancies are announced or those who have officially indicated a willingness to accept these assignments.

d. Key positions at VA facilities outside the continental United States may be filled by appointment, or by the promotion, reassignment, or demotion of highly qualified VA employees. Appointments to these key positions from outside the Department, however, will be rare.

e. Merit principles will be followed in filling positions in the competitive service and the excepted service. Promotion actions in the competitive service will be taken under appropriate promotion plans, i.e., promotion plans for positions centralized to the Secretary or the Administration Head, or facility promotion plans.

3. RESPONSIBILITIES

a. Appointments and other employment actions involving positions centralized to the Secretary will be approved by the Secretary. Exceptions to established policies determined to be in the best interest of the service will also be approved by the Secretary or an appropriate designee.

b. Administration or staff office heads approve appointments and other employment actions for positions centralized to them; make recommendations on actions requiring the Secretary's approval; and, as appropriate, authorize additional tours of duty and extensions of tours of duty which are determined to be in the best interest of VA (see paragraph 4 [ ]).

c. Facility directors recommend second tours of duty or extensions thereof at Manila (see paragraph 4a and d); approve additional tours of duty in Alaska, Honolulu, and San Juan (see paragraph 4b [ ]); grant home leave or vacation leave (see paragraphs 5 and 6 [ ]); and separate employees who do not exercise their administrative reassignment rights, in accordance with the provisions of VA Directive and Handbook 5021, Employee/Management Relations.

d. For personnel actions involving centralized positions, the Deputy Assistant Secretary for Human Resources Management and Labor Relations advises on and assists with the recruitment of personnel for assignment to such positions; coordinates movements between releasing and receiving facilities; initiates requests for security clearance, when applicable; and takes other actions necessary for assignment to, or return of the employee from, facilities outside the continental United States.

e. The Director, Office of Human Resources in the Veterans Benefits Administration, or designee, and appropriate Central Office program officials are responsible for providing necessary orientation to employees selected for assignment outside the continental United States.

4. TOURS OF DUTY

a. Assignment of VA employees recruited from the continental United States to Manila will be for a minimum of one initial 2- or 3-year tour of duty, as determined in advance by the Administration Head, and for a second tour of duty of an additional 2 or 3 years, when recommended by the facility Director
and approved by the Administration Head, not to exceed two consecutive tours of duty and a maximum of 5 years. Administration Heads are delegated authority to make exceptions to this policy concerning tours of duty except for positions centralized to the Secretary. Exceptions, however, will be approved only when clearly justified as being in the best interest of VA.

(1) Approximately 5 to 6 months prior to completion of the first tour of duty at Manila, and subject to satisfactory completion of a physical examination of the employee and family members residing with the employee, a request for an additional tour of duty may be initiated by the employee in accordance with the provisions of paragraph 4a above. If the facility Director concurs, the recommendation will be forwarded to the appropriate Administration Head for approval.

(2) Employees at Manila will not be permitted to remain beyond two consecutive tours of duty unless an exception is granted in accordance with paragraph 4a above. Employees at Manila who elect not to exercise their administrative reassignment rights will be separated in accordance with the provisions of VA Directive and Handbook 5021.

b. Assignment of VA employees recruited from the continental United States to Alaska, Honolulu, or San Juan will be for an initial tour of 3 years with subsequent tours of 2 years duration when approved by the facility Director for noncentralized positions or by the Administration Head, staff office head, or Secretary, as appropriate, for centralized positions. Administration or staff office heads are delegated authority to make exceptions to this policy concerning tours of duty except for positions centralized to the Secretary. Exceptions, however, will be approved only when clearly justified as being in the best interest of VA.

c. Employees eligible for reassignment rights (see paragraph 10) assigned to a VA facility outside the continental United States are required to complete VA Form 8207, Agreement for Assignment After Tour(s) of Duty Outside Continental United States, prior to departure from the continental United States for their post of duty.

d. Time spent in the continental United States on leave and time spent in travel to and from the United States are excluded in computing the maximum period of service outside the continental United States. Any extension after completion of the first tour of duty and the beginning of travel for home leave, vacation leave, or for reassignment, which is administratively determined to be necessary, is also excluded. Such extensions will not exceed 6 months and must be approved by the Administration Head for Manila and by the facility Director for Alaska, Honolulu, or San Juan.

5. HOME LEAVE

a. Employees assigned outside the continental United States who meet the criteria of Office of Personnel Management regulations issued pursuant to 5 U.S.C. 6305 earn home leave as a matter of law. This right to earn home leave vests even in employees transferred to Puerto Rico from the continental United States for their own convenience and at their own expense.

b. In accordance with the provisions of VA Directive and Handbook 5011, Hours of Duty and Leave, home leave is granted under the circumstances cited in 5 CFR 630, subpart F.
c. The right to earn home leave under 5 U.S.C. 6305 is separate and distinct from the right to Government paid round trip travel for the purpose of taking home leave under the provisions of 5 U.S.C. 5728(a) (see paragraph 6 below).

d. Employees transferred to Alaska or Hawaii from the continental United States are not entitled to earn home leave.

e. Employees who are residents of Puerto Rico who transfer to VA facilities in the continental United States do not earn home leave.

f. Employees serving under overseas limited appointments are not eligible for home leave or vacation leave. They are, however, eligible for regular annual leave.

g. Certain employees appointed under 38 U.S.C. ch. 73 and 74 earn and are granted leave on the same basis as employees subject to the provisions of 5 U.S.C. ch 63. (See VA Directive and Handbook 5011, Hours of Duty and Leave.)

6. TRAVEL AND TRANSPORTATION EXPENSES FOR PURPOSE OF TAKING HOME LEAVE AND VACATION (ANNUAL) LEAVE

a. Under the authority of 5 U.S.C. 5728(a), round trip travel and transportation expenses from the post of duty outside the continental United States to the place of actual residence and return, for the purpose of taking home leave or vacation leave, are payable only in those cases where transfer outside the continental United States was for the convenience of the Government, moving expenses were paid by the Government under 5 U.S.C. 5724(a), there has been an actual completion of the initial or any subsequent agreed period of service and the employee agrees to serve an additional tour of duty at the same or another post of duty outside the continental United States under a new written agreement completed before departing from the post of duty to take leave.

b. Round trip travel and transportation expenses for eligible employees covered by 5 U.S.C. ch. 63, in connection with the granting of home leave or vacation leave for the purpose of returning to their place of actual residence in the continental United States, will be approved by authorizing officials, subject to the determination that the employee's services are to be continued for an additional tour of duty in accordance with the provisions of paragraph 4a or b, as appropriate. Prior to departure for home leave or vacation leave, employees must complete a new written agreement to remain in the service of VA at the assigned facility for an additional tour of duty as prescribed in paragraph 6a above. Employees and their dependents at Manila must satisfactorily complete the required medical examination (see paragraph 4a (1)) prior to departure for home leave purpose. (See 5 U.S.C. 6305; 5 CFR 630 subpart F, for regulations pertaining to home leave; also see 5 U.S.C. 5728(a) and MP-1, pt. II, ch. 2, for regulations governing round trip travel for home leave or vacation leave purposes.)

c. Employees who are residents of Alaska, Hawaii, or Puerto Rico who transfer to VA facilities in the continental United States are not entitled to Government paid travel expenses for the purpose of returning to their place of residence on leave.
7. REQUIREMENTS AND SELECTION FACTORS

a. **Qualification Standards.** The same qualification standards used for assignment to positions in the United States will be used to determine basic eligibility for employment at facilities outside the continental United States.

b. **Personal Characteristics.** U.S. citizens assigned to Manila are considered to be representatives of the United States Government. Employees who are well regarded for competence, stability, and decorum should be encouraged to apply when vacancies are announced.

c. **Medical Requirements.** U.S. citizen employees and their dependents who will accompany them to Manila must undergo an appropriate medical examination as specified below:

   (1) Dependents, for this purpose, are the employee's spouse and children, including stepchildren and adopted children who are unmarried and under 21 years of age, or regardless of age if incapable of self-support and such incapacity existed on the 21st birthday of the child.

   (2) Medical examinations are mandatory upon initial assignment to Manila. Such examinations will normally be conducted by medical facilities of VA for the employee and dependents age 12 and over. Children under 12 years of age will normally be examined by the family's physician. In accordance with Department of State regulations (DOS Foreign Affairs Manual FAM 3), for each eligible person examined by a private physician, the employee is entitled to be reimbursed a reasonable cost for the examination based upon presentation of the receipted bill from the examining physician.

   (3) Employees and their dependents may be required to undergo medical examinations and tests as ordered by appropriate officials at the Manila regional office when such examinations are considered pertinent to questions concerning the employee's retention in a position, eligibility for retirement, or return to duty after absence due to illness or injury. Dependents may, based on religious convictions, refuse to take medical examinations at these times, but if they do not take them they will not be eligible for the medical care provided at Government expense under the medical and health program administered by the Department of State.

d. **Security Clearance.** Certain positions at Manila filled by U.S. citizens are designated "critical-sensitive" and thus require full security clearance; the remaining positions are deemed to be "noncritical-sensitive."

**NOTE:** See appendix II-A for additional instructions related to employment procedures for positions in Manila.

8. ORIENTATION

a. Before departing from the United States for assignment to Manila, an employee will be given orientation by VA Central Office concerning employment and living conditions in that area. Further orientation may be given by the Department of State. Additional orientation will be provided for each employee upon arrival at Manila.
b. As deemed necessary, employees selected for assignment to other VA facilities outside the continental United States may be given orientation by the appropriate Administration Head and program officials.

9. U.S. CITIZENS RECRUITED IN MANILA

a. Positions in the Competitive Service

   (1) Authority to Appoint. U.S. citizens recruited in Manila will be given overseas limited term appointments. The facility Director will appoint the employee after the Administration Head has approved the selection. The initial overseas limited term appointment will be for a period not to exceed 3 years and may be extended, upon approval of the Administration Head, for an additional 2 years, for a maximum period of 5 years.

   (2) Qualifications. Each applicant must meet the qualification requirements for the position to which appointed.

   (3) Medical Requirements. Medical requirements for those employees and their dependents are the same as those required for employees recruited in the United States (see paragraph 7 above).

   (4) Security Clearance. These employees are subject to the same security requirements as employees recruited in the continental United States, except appointment may be authorized on the basis of an interim security clearance subject to completion of satisfactory field investigation.

b. Positions Excepted Under 38 U.S.C. Chs. 73 and 74. The requirements and procedures in chapter 3 of this part apply when filling these positions.

10. ADMINISTRATIVE REASSIGNMENT RIGHTS

a. General. The term "administrative reassignment rights," as used in this chapter, means an employee's entitlement to another continuing assignment in VA following a period of employment outside the continental United States. This right differs from statutory reemployment rights in that it is granted administratively by VA. The placement of the employee may involve promotion or demotion, as well as reassignment.

b. Eligibility Requirements. Administrative reassignment rights are applicable to VA employees recruited in the continental United States for employment outside the continental United States and who were transferred outside the continental United States under the conditions stated in paragraph 6a above. The employee must have completed at least one tour of duty unless ill health of the employee or a family member makes it necessary for the employee to return to the United States, or unless it is determined by VA that the employee's return would be in the best interest of VA.

c. Competitive Service Employees. An employee eligible for administrative reassignment will be given placement consideration as indicated in subparagraphs (1) through (4) below, as appropriate. Placement consideration will be accorded on a step-by-step priority sequence as set forth in these subparagraphs (e.g., all efforts for placement under subparagraph (1) must be exhausted before initiating
procedures under subparagraph (2); subparagraph (2) procedures completed before initiating procedures under subparagraph (3)).

(1) The returning employee will be placed in their former position if vacant, unless the employee requests another available assignment. VA approval for such an alternative assignment is required. (Every effort, however, will be made to place the employee in a vacant position, if one exists at any VA facility at the grade presently held, or with a minimum grade reduction, if the employee's present grade is higher than the one relinquished when the employee accepted employment outside the continental United States.)

(2) If the returning employee's former position is not vacant or no longer exists, the employee will be assigned to a position (existing or otherwise available) at any VA facility where there is an appropriate assignment available, at a grade not lower than the one relinquished when the employee accepted employment outside the continental United States.

(3) When management determines that there is no position available in which the returning employee can be placed, then as a last resort, if the employee is at the same or a higher grade than that held at the time of assignment outside the continental United States, the employee will be returned to the facility and position formerly held, provided the position is occupied by an employee who can be displaced under reduction-in-force regulations by the returning employee. If the incumbent of such a position formerly held by the returning employee cannot be displaced in this manner, the returning employee will be considered to be assigned to this former position for the purpose of making the "best offer" possible under reduction-in-force regulations.

(4) If the employee presently occupies a position at a lower grade than that relinquished at the time of assignment outside the continental United States, efforts consistent with appropriate merit promotion requirements will be made to place the employee in a vacant position at any VA facility at the grade level formerly held. If this is not possible, efforts will be made to place the employee in a vacant position at any VA facility at the grade level currently held. When management determines that there are no appropriate positions available, then, as a last resort, the employee will be considered to be returned to the facility to which formerly assigned in the continental United States at the grade currently held for the purpose of making the "best offer" possible under reduction-in-force regulations.

d. **Excepted Service Employees (Other Than Title 38).** Excepted service employees (other than those employed under 38 U.S.C. ch. 73 or 74) will have the same administrative reassignment rights given to competitive service employees as explained above except for assignment through reduction in force. When reduction in force is necessary, the assignment rights for the excepted service employee will be those described in part IV of this handbook.

e. **Title 38, United States Code, chapter 73 or 74 Employees.** U.S. citizen employees recruited in the United States and serving under 38 U.S.C. ch. 73 or 74 authority are entitled to return to an assignment at the same grade level currently held. The position may be at the facility from which recruited or at another VA facility.
f. **SES (Senior Executive Service) Employees.** After satisfactorily completing their agreed tour(s) of duty outside the continental United States, employees in the Senior Executive Service will be reassigned to another Senior Executive Service position in VA.

g. **Employees Recruited in Manila.** Employees recruited in Manila do not have administrative reassignment rights to positions in the United States. U.S. citizen employees serving under overseas limited term appointments may, however, be considered for such assignments. To be considered, they must be eligible for competitive appointment and the facility Director must certify that their work and conduct have been satisfactory. These employees will be considered only for vacant positions, and, where possible, should be considered for positions equivalent in grade to that held under the overseas limited term appointment.

h. **Employees Recruited in Alaska, Honolulu, and San Juan.** Local residents hired by these facilities do not have administrative reassignment rights to positions in the continental United States. They may, however, apply for employment consideration to other VA facilities under the same procedures that apply to employees within the continental United States (part III of this handbook).

i. **Limitation on Reassignment Rights.** An employee who has exercised administrative assignment rights is not eligible for another assignment outside the continental United States with such rights for a period of 2 years after such rights were last exercised. Exceptions to this policy may be approved by the appropriate administration or staff office head, except for positions centralized to the Secretary. Such exceptions must be clearly justified as being in the best interest of VA.

11. **APPLICATION FOR RETURN TO THE CONTINENTAL UNITED STATES**

   a. At the request of an employee who is eligible for administrative reassignment, the facility Director will forward the employee's completed application (OF 612, Optional Application for Federal Employment or authorized equivalent form) in duplicate, reduction-in-force data (except for title 38 employees), supervisory evaluations, and information needed to prepare SF 50-B, Notification of Personnel Action. This information will be forwarded to the appropriate administration or staff office head at least 120 days before the employee's intended departure. The administration or staff office head, with the advice and assistance of the Deputy Assistant Secretary for Human Resources Management [and Labor Relations], is responsible for making the necessary administrative arrangements with the releasing and receiving facilities for the employee's return. Employees and their dependents at Manila must also take the prescribed medical examination prior to returning to the United States for assignment or separation.

   b. Similar action will be taken for employees serving under overseas limited term appointments who desire a VA position in the United States, except that reduction-in-force data are not required.

   c. If an employee eligible for administrative reassignment rights elects not to exercise those rights and resigns or retires, the resignation or retirement is processed by the Human Resources Management Officer for the employee's current duty facility. In establishing the effective date, travel time (actual or constructive) will be allowed to the employee's place of residence in the United States without charge to leave. If the employee remains in the facility area, travel time is not considered in establishing the effective date.
PART II. APPOINTMENTS

CHAPTER 2. TITLE 5 APPOINTMENTS

SECTION A. GENERAL

1. SCOPE. This chapter contains the policies and requirements which apply to employment actions in the competitive and excepted civil service under title 5, U.S. Code. It does not apply to excepted service positions in the Veterans Health Administration filled under 38 U.S.C. ch. 73 and 74 or to excepted positions in the Veterans Canteen Service filled under 38 U.S.C. ch. 78. The scope of this chapter is expanded for “Priority Placement Program for Employees in Retained Grade or Pay Status,” appendix III-F of part III, this handbook only, to include Nonappropriated Fund employees in the Veterans Canteen Service who are subject to the Federal Wage System.

2. EMPLOYMENT PROGRAM MANAGEMENT

   a. To the maximum extent possible, employment will be accomplished in accordance with a planned program, rather than resorting to emergency measures to fill vacancies as they occur. Employment requirements and estimates will be based on projected staffing needs, including such considerations as employee turnover, workload and budgetary forecasts, work technology, and organization and functional changes. The complexity of such plans depends upon the scope and nature of projected needs. This will involve planning and coordinating such functions as job analysis, equal employment opportunity, position management, recruitment, internal placement, cost considerations, and training and development to assure the availability of new and replacement staff in the number and quality required to meet current and future needs.

   b. VA positions will be filled by selection from among those well-qualified individuals available through the recruitment method(s) used. Such persons will be placed in positions where their education, experience, training, aptitudes, abilities, interests, and personal traits best fit them for successful performance.

   c. It is VA policy to provide maximum opportunities for career advancement of VA employees and optimum utilization of their skills. To this end, VA employees will be fully considered for vacancies for which they qualify, especially those which offer advancement opportunities. This policy, however, does not preclude the selection of a qualified candidate from outside VA whenever in the judgment of the selecting official, such selection would be in the best interest of VA. Outside sources of candidates may include employees of other Federal facilities who wish to transfer, former Federal employees who are eligible for reinstatement, eligibles on civil service certificates, and those eligible for excepted appointments. VA employees and applicants from outside sources may be considered concurrently for a vacant position; or, at the option of the selecting official, consideration may be given first to applicants from one source and then to those from another. One source may also be used exclusively. The decision as to which source of candidates or combination thereof will be used may be made at the time it is decided to fill a position, or at any point during the action to fill it, or it may be made as a part of the overall staffing plan for groups or categories of positions.
d. Standards for selection will be applied systematically, equitably, and impartially to all interested candidates who meet the requirements for consideration. Employment actions will be taken without discrimination for such reasons as race, color, religion, national origin, sex, lawful political affiliation, marital status, physical or mental disability when the individual with disability(ies) is qualified to do the work, age, or membership or nonmembership in a labor organization.

e. The principle of broad areas of consideration will be applied to the maximum practicable extent in order to recruit an adequate number of qualified candidates and to enhance the diversity of the candidate pool.

f. In relating employment actions to other personnel considerations, attention will be given to providing assignments which will permit the development of employees and full utilization of their potential for advancement through realigning duties, establishing trainee and understudy positions, conducting special training programs, and detailing employees, as appropriate.

g. A special effort will be made to retain qualified employees who become disabled or whose positions are surplus to current needs, and to minimize the adverse effect of management decisions on employees, by assignment to other continuing positions.

h. Employment actions will conform to the requirements governing the employment of relatives (5 CFR, part 310 and paragraph 50 below).

i. Periodic studies will, to the extent necessary and feasible, be made by the facility and by Central Office to evaluate the effectiveness of the various employment practices in achieving management objectives.

3. FILLING POSITIONS

a. Responsibilities of Selecting Officials. Officials authorized to recommend or to approve the selection of a person for a position are responsible for being familiar with and following the policies and principles expressed in this chapter.

b. Priority Consideration. Priority in selection for assignment to a position must be given to persons with statutory entitlement. This includes employees applying for restoration after active military service or after recovery from a compensable work-related injury (5 CFR, part 353, and chapter 6 of part III, this handbook), and others entitled to a position under law. Then, priority consideration will be given to other persons having rights under civil service regulations or specific VA policy, as appropriate. Priority placement under VA’s Priority Placement Program will be in accordance with OPM and VA policies.

c. Basis for Selection. Selections for positions will be based on the objective evaluation of the candidates’ total qualifications for the position. “Qualifications” means the combination of experience, training, education, skills, knowledges, abilities, personal characteristics, and merit factors deemed to be pertinent to successful performance.
4. TYPES OF APPOINTMENTS

a. Competitive Service Appointments (5 CFR 315 and 316). Subject to meeting the requirements of law, Office of Personnel Management (OPM) regulations, and VA policies, appointing officers may use any applicable civil service authority to make competitive and noncompetitive appointments in the competitive service. Also see 5 CFR, parts 300, 330, and 332, and section B, this chapter for related information.

b. Excepted Service Appointments. For information on these appointments, see section C of this chapter and 5 CFR, parts 213, 300, 302, 304, 307 and 308. Other relevant statutory references may be found in 5 U.S.C. chapter 31, subchapter I.

(1) As a general rule, voluntary or gratuitous services furnished on the initiative of a person, without a written agreement with VA, will not be accepted, neither will such services be used in lieu of the regular employment of employees under the competitive or excepted service procedures. When such services are used, they must be supplementary to the employment of essential personnel.

(2) Voluntary or gratuitous services may be accepted under an agreement (See 7 Comp. Gen. 810. Also see VHA [Handbook 1620.1], for information on the VA Voluntary Service program, and chapter 3, this part, for information on WOC appointments made under 38 U.S.C. ch 74. See 5 CFR, part 308, for information concerning voluntary performance by students in connection with educational programs under authority of 5 U.S.C. 3111.) VA is specifically authorized by 38 U.S.C. 513 to accept uncompensated services for the purpose of carrying out all laws administered by VA. To perform such services the person must meet legal and regulatory requirements and enter into a written agreement containing the following points as a minimum:

(a) The identity of the person.

(b) The identity of the VA establishment, the organizational segment where the service is to be performed, and the nature of the service.

(c) The inclusive dates of the agreement or in lieu of a terminal date, a statement such as “for an indefinite period.”

(d) A waiver of all claims to monetary remuneration.

(e) A provision to cancel the agreement by either party upon written notification.

(f) Authority under which the agreement is made (38 U.S.C. 513).

(g) Signature of the person and the VA appointing official. [(Reference: VA Handbook 5001, Part II, paragraph 8c.)]
NOTE: Unpaid work experience may be provided for service-disabled veterans who are participating in training programs under chapter 31, title 38, U.S.C. and for clients of State vocational rehabilitation facilities. These trainees are not WOC employees. They receive on-the-job training through written agreements between the employing Federal facility and the Counseling and Rehabilitation Section at the appropriate VA regional office or the State vocational rehabilitation facility. (See 5 CFR 213.3102(k) for additional information.)

5. EMPLOYMENT REQUIREMENTS AND DETERMINATIONS. Detailed information on the legal and regulatory requirements for employment in VA is contained in OPM’s Guide to Processing Personnel Actions and this chapter. In addition, appointing officers will observe the following:

a. Effective Date of Personnel Actions

   (1) General. Unless specifically authorized by law or regulation based on law, personnel actions filling positions through any method cannot be effective before the date the approving authority determines that requirements have been met and approves the action. In those rare instances, however, where the required administrative approval was inadvertently overlooked, the approving official may subsequently confirm the action and allow the original effective date to stand. Requirements include determinations that a position has been established and that appropriate legal, regulatory, and administrative approvals have been obtained.

   (2) Appointments (OPM Guide to Processing Personnel Actions). Appointments must be approved by the appointing authority on or before the date the employee enters on duty. When an employee is to enter on duty on the first Monday of a pay period, the effective date of the appointment will be the first day of the pay period (Sunday). When an employee enters on duty on any day other than the first Monday of the pay period, the effective date of appointment will be the date of entrance on duty unless an earlier date is required to satisfy statutory or regulatory provisions, e.g., restoration after military service. When the first Monday of the pay period is a holiday, the appointment will be effective on the entrance on duty day.

c. Qualifications Requirements. Prior to appointment, a determination will be made that the candidate meets established minimum qualification standards requirements. Procedures and policies relating to the use of qualifications standards, as well as the standards for specific occupations, are found in the OPM Operating Manual – Qualification Standards for General Schedule Positions, OPM’s X-118C Handbook, section D of this chapter, and appendix II-F [] of this handbook.

d. Verification of Qualifications and Suitability Data (5 CFR, part 731)

   (1) General. In the case of appointments from civil service certificates, qualification and suitability requirements can reasonably be assumed to have been met where the examination included “vouchering” or other verification of the information in the application. This does not necessarily apply to the examination of applicants for VA police officer positions (see subparagraph [5d](5) []). In all other
appointments, human resources management officials will review the application and reconcile any discrepancies or incomplete entries.

(2) **Verification of Federal Employment.** In all appointments where the applicant has been or is now employed in the Federal Government, appointing officials will obtain verification of employment and satisfy themselves that employment of the applicant is consistent with VA requirements. Whenever necessary and available, an applicant’s personnel folder should also be obtained and all actions reviewed. In reemployment actions, current eligibility for reinstatement must be verified and appointing officials should not be misled by terminology which may be similar in both the competitive and excepted service.

(3) **Methods of Verification (OPM Guide to Processing Personnel Actions).** Verification of employment and suitability can be made by FL 5-127, Inquiry Concerning Applicant for Employment, letter, telephone, or personal visit. Documents generated will become a part of the employment investigation records with telephone calls and personal visits summarized for the record. Upon employment, such records will accompany the SF 85, Questionnaire for Non-Sensitive Positions (or SF 86, Questionnaire for National Security Positions) and SF 87, OPM Fingerprinting Chart, when they are submitted to OPM.

(4) **Timing of Verification.** Normally verification will be accomplished prior to employment of the applicant. Where local conditions in individual cases prevent completion prior to appointment, the verification may (except for inquiry to last Federal employer) be accomplished on a post-appointment basis. Preemployment inquiries will not be sent to persons or firms who have previously replied to similar inquiries where the replies are available for review. Neither should they be sent where an appointment must be made promptly without regard to the reply. OPM will, however, voucher such sources after appointment as a part of the investigative program covered in 5 CFR, part 736. In any event, the data on any inquiries and the application will be compared with OF 306, Declaration for Federal Employment, on the date of appointment.

(5) **Preemployment Screening Procedures for VA Police Officer Candidates**

(a) **Screening Process.** All applicants being considered for appointment to VA police officer positions will be vouchered to the extent possible prior to entrance on duty. This will include, as a minimum, conducting telephonic interviews of former employers and former supervisors to verify listed qualifying experiences and work habits of tentatively selected applicants, and will include contacts with police officials in the applicant’s State or former State(s) of residence. For each applicant the Human Resources Management (HRM) office should review experience and education against the qualification standard and appropriate knowledges, skills, abilities, and other characteristics. Applicants must provide official supporting documentation as needed to verify military service or other experience. The HRM Officer will refer each qualified applicant under definite consideration to the supervisory police officer for interview. For tentatively selected candidates, supervisory police officers will: complete SF 87, Fingerprint Charts; conduct arrest record checks through Federal and state agencies; complete parts I and II of VA Form 0120, VA Police Officer Pre-Employment Screening Checklist; and otherwise comply with the pre-employment screening requirements in VA Directive 0730, Security and Law Enforcement, and VA Handbook 0730’s paragraph 3a(2). If no adverse information is received from the arrest record checks, supervisory police officers will return the VA Form 0120 to the HRM office for vouchering of the
applicant’s qualifying experience and most recent 5 years of experience and completion of parts III and IV of VA Form 0120[VA Police Officer Pre-employment Screening Checklist]. The HRM office is responsible for scheduling medical examination[s for] selected applicants. See [VA] Handbook 0730 [Security and Law Enforcement,] appendix A, Specific Medical Standards for VA Police Officer Applicants and Incumbents.

(b) Use of Adverse Information as Basis for Nonselection. When facility officials become aware of adverse information during pre-employment screening, it should be reviewed against suitability and/or security criteria and adjudicated or referred to OPM, as appropriate, in accordance with 5 CFR, parts 731 and 732. When facility officials determine that, based on adverse information obtained in the above screening process, an objection to an eligible on a civil service certificate is warranted or when a preliminary decision is made to nonselect an individual based on information obtained in this pre-employment screening process, the Regional Counsel and [Deputy Assistant Secretary (DAS) for] Human Resources Management [ ] and [Labor Relations (OHRM&LR)] (05[ ]) should be contacted for advice and assistance related to the use and disposition of such adverse information. Questions concerning the legality of adverse determinations and personal liability involvement will also be referred to the Regional Counsel.

c (c) Disposition of Documents and Records. After a police officer applicant has accepted an offer of employment, Human Resources Management (HRM) officials should promptly contact the Security Officer (07C), VA Office of Security and Law Enforcement, about initiating the required Minimum Background Investigation, using the SF 86, Questionnaire for National Security Positions. HRM officials will tell police officer applicants that the investigation is a requirement of employment and that the completed investigation must be favorably adjudicated. The applicant will be told that the investigation will be conducted after appointment. To provide a record of satisfactory vouchering, Copy 1 of the VA Form 0120 is filed in the locked and restricted access VA Police Investigative Records File in the facility Director’s office. This file shall be subject to the provisions of the Privacy Act system of records titled “OPM/CENTRAL 9.” Facility copies of VA Form 0120 on hired police applicants will be kept on file until the employees have been separated or reassigned from serving in a Police Officer position. Copy 2 is mailed or faxed directly to the Director, VA Law Enforcement Training Center, Building 101, 2200 Ft. Roots Drive, North Little Rock, AR 72114. Documents obtained during the pre-employment screening process for those applicants not selected for VA police officer positions will be destroyed.

e. Appointment Documents SF 61 and OF 306

(1) All appointees in competitive and excepted service including WOC employees will complete the appointment documents as described in OPM’s Guide to Processing Personnel Actions. In addition to appointment actions, the OF 306, Declaration for Federal Employment, must be executed for certain conversion actions in the competitive service (OPM Guide to Processing Personnel Actions).

(2) The SF 61 Oath of Office (part A) should be administered in a dignified manner to impress the appointee with the seriousness of taking an oath and the significance of entering Federal employment.

(3) The Oath of Office will normally be administered on or before the date of entrance on duty. When an appointee enters on duty on a day, e.g., Sunday, when the authorized person is not available to
administer the oath, taking of the oath may be delayed and administered at the earliest opportunity. No right to compensation accrues until the oath is taken (OPM Guide to Processing Personnel Actions).

f. **Physical Requirements and Examinations.** See VA Directive and Handbook 5019, Occupational Health Services, for policy and procedures on determining physical fitness for appointment and placement actions.

g. **Pay Determinations.** For determination concerning applicable pay rates in appointment and placement actions, see Directive and Handbook 5007, Pay Administration.

h. **Citizenship**

(1) General appropriation acts permit the employment by VA of noncitizens of the United States under certain conditions. For example, a Treasury and General Government Appropriation Act providing funds for VA in a recent fiscal year stated that: “Unless otherwise specified during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in the continental United States unless such person: (1) is a citizen of the United States; (2) is a person in the service of the United States on the date of the enactment of this Act who, being eligible for citizenship, has filed a declaration of intention to become a citizen of the United States prior to such date and is actually residing in the United States; (3) is a person who owes allegiance to the United States; (4) is an alien from Cuba, Poland, South Vietnam, the countries of the former Soviet Union, or the Baltic countries lawfully admitted to the United States for permanent residence; (5) is a South Vietnamese, Cambodian, or Laotian refugee paroled in the United States after January 1, 1975; or (6) is a national of the People’s Republic of China who qualifies for adjustment of status pursuant to the Chinese Student Protection Act of 1992 . . . This section shall not apply to citizens of Ireland, Israel, or the Republic of the Philippines, or to nationals of those countries allied with the United States in a current defense effort, or to international broadcasters employed by the United States Information Agency, or to temporary employment of translators, or to temporary employment in the field service (not to exceed 60 days) as a result of emergencies.”

(2) Generally, all positions in VA are subject to the citizenship requirement outlined in subparagraph [h](1) [.]. Citizenship requirements for certain positions in the Veterans Health Administration are contained in sections 7402(c) and 7407 to title 38, U.S.C. For competitive service positions under title 5, U.S.C., citizenship requirements are contained in 5 CFR 338.101.

(3) Noncitizens who have been accorded permanent resident alien status in the United States may be considered for appointment to certain positions in the excepted service of title 5, U.S.C. (e.g., Attorney, Chaplain, Rehabilitation Technician, etc.) unless otherwise precluded by law, Executive Order, or regulation. Generally, however, certain excepted service positions, of a policymaking or confidential nature, such as division/service chief or equivalent or higher at field facilities and equivalent positions in Central Office, or sensitive positions (as defined in MP-1, pt. I, ch. 5, paragraph 5) will be filled by United States citizens. Prior approval by the appropriate administration or staff office head is required before noncitizens can be appointed to these positions. Requests should be forwarded through channels to Central Office (ATTN: [DAS for OHRM&LR] 05]).
NOTE: Any questions on employing noncitizens, e.g., nationals of those countries allied with the United States in the current defense effort, may be referred by telephone, e-mail or letter to the DAS for OHRM (05).

i. Age Limits

(1) General. Age limits for both competitive and excepted service positions will be consistent with the requirements contained in 5 CFR 338.601 unless specified otherwise in a qualification standard. In addition, field facility directors will conform to any State or local laws relating to employment of minors and women.

(2) Firefighters. Maximum entry age for firefighters is established as provided for in section 3307(d) of title 5, United States Code.

(a) For initial appointments, applicants can not have reached their 37th birthday by the day of appointment.

(b) Applicants who have passed the designated entry age limit noted, but who have previously served in a covered position may be eligible to re-enter the fire service provided that they:

1. Meet all applicable qualifications for the position; and

2. Will be able to complete a total of 20 years of covered and creditable Federal firefighter service by the time the Federal firefighter reaches the age of 57. Prior service in covered positions and creditable towards retirement may be subtracted from the applicant's age to determine if the Federal firefighter meets the maximum entry age.

j. Licensure, Registration, or Bar Membership

(1) The qualification standards for certain occupations require that applicants have current State licenses, registration or certification to be considered for employment. Likewise, attorneys must have bar membership. It follows that these employees must maintain their licensure, registration, certification, or bar membership on a current basis to continue their employment in such positions.

(2) Appointing officers will [verify] Licensure, Registration, or Bar Membership [by primary source verification from State Licensing Boards (SLB). Information obtained through the verification process must be documented in writing, either by letter, memo, report of contact, or appropriate web verification. Documentation of verification will be filed on the right side of the employee’s personnel folder. For VHA health care professionals, the documentation will also be maintained in the VHA credentialing file.] Thereafter, an expiration date follow-up will be coded as provided for on page App C - 8 of VA Manual MP-6, part V, supplement No. 1.5 (PAID). The facility Director will designate the official(s) who will be responsible for the follow-up verification of the employee’s current license, registration, [certification] or bar membership. [ ]
(3) Employees who do not maintain their current license, registration, or bar membership, must be removed from their positions and assigned to other positions for which they qualify or be separated under appropriate procedures.

k. **Applicant Drug Testing.** See VA Directive 5383 and VA Handbooks 5383, 5383.1 and 5383.2.

l. **HHS Exclusionary List.** See chapter 1 of this part.

m. **National Practitioner Data Bank Screening.** See VHA Handbook 1100.19, Credentialing and Privileging.

n. **Employment of Retired Military Officers.** Effective October 1, 1999, PL 106-65 repealed 5 U.S.C. 5532, titled “Employment of retired members of the uniformed services; reduction in retired or retainer pay.”

o. **Dual Pay.** Section 5533 of title 5, U.S.C., authorizes the appointment of persons to more than one civilian office under certain conditions. Appointment officers wishing to use this authority will be guided by the regulations and requirements in 5 CFR 550.501, and VA Handbook 5007, Pay Administration, part II.

6. **CONTROL OF VA EMPLOYEE-VETERAN RECORDS.** HRM offices for facilities listed in M21-1, part II, chapter 4, para. 4.07, must complete and forward VA Form 20-0344, Annual Certification of Veteran Status and Veteran-Relatives, formerly VA Form 4535, Notice of Employment, Transfer, or Separation of Veteran, as provided in the M21-1 manual, whenever they appoint or take an action which results in a change of appointing authority of an employee who is a veteran. The M21-1 citation is available on the VA Intranet at [http://vaww.va.gov](http://vaww.va.gov).

7. **PART-TIME AND INTERMITTENT EMPLOYMENT.** Employment on a part-time and/or intermittent basis may be appropriate when: the position to be filled requires less than full-time service; it is the only way the services of a well-qualified employee can be obtained; or circumstances are such that the part-time or intermittent appointment would be in the best interest of management and/or the employee. Provisions of the Federal Employees Part-Time Career Employment Act of 1978 (PL 95-437) are contained in 5 CFR, part 340 and part I, chapter 3, section B, this handbook.

8. **FILLING A POSITION OCCUPIED BY AN EMPLOYEE ON LEAVE.** If a replacement is required while the incumbent employee is on extended leave, an interim position may be established. Generally, interim positions will be terminated within 1 year or less, and may be extended only under extenuating circumstances. If an interim position is filled from outside VA, the appointment will be limited to the period of time the interim position will be required unless it can be expected that another position of like status, grade, and pay will be available for the appointee when the interim position ends. (See part III, this handbook for provisions related to placement of an employee in an interim position.)
9. PROBATIONARY PERIOD/TRIAL PERIOD

a. Employees [appointed] in [ ] the competitive service will serve a 1-year probationary period as explained in 5 CFR, part 315, subpart H, and part III, this handbook. An employee given a career-conditional or career appointment by selection from a certificate of eligibles is required to serve a probationary period. This applies not only to the first appointment of this kind, but to any subsequent career-conditional or career appointment by selection from a certificate of eligibles, regardless of whether the appointee had previously completed a probationary period.

b. Employees who are placed in a supervisory or managerial position in the competitive service are required to serve a 1-year probationary period subject to the exemptions and exceptions contained in 5 CFR, part 315, subpart I, and appendix III-A of part III, this handbook.

c. Employees in excepted service positions will serve a 1-year trial period as explained in paragraph 6h of section C, this chapter.

d. Employees appointed to Hybrid occupations on either a permanent full-time (38 U.S.C. 7401(3)) or part-time (38 U.S.C. 7405 (a)(1)(B)) basis must also serve a 1-year probationary period.

10. PLACEMENT FOLLOW-UP. A placement follow-up will be used to evaluate the employee’s progress and adjustment during the probationary or trial period. The placement follow-up will also be used, as appropriate, following position changes for employees who have completed the probationary or trial period. Follow-ups will be made for all initial appointments and significant position changes. After the employee has completed at least 90 days in the assignment, a human resources management office staff member will interview the supervisor to obtain information about the employee’s performance and adjustment to the job, and any training or other needs or outstanding work that warrants attention for further placement consideration. Where deficiencies are reported, the employee should also be interviewed to further explore the courses of action that may be taken to overcome them. The follow-up form, VA Form 5-97, Notice of Pending Personnel Action, will be annotated to show that the follow-up was made, and only significant results will be recorded. These procedures are minimum requirements and where possible, extension of the follow-up interview for all placement actions is encouraged. For example, a follow-up of all promotions can be a valuable aid in assessing the results of the facility’s promotion plan and the validity of the evaluation and selection process. Also, separate placement follow-ups with employees can be a valuable source of placement information as well as being an effective employee relations technique. (See MP-6, pt. V, supp. No. 1.5, Appx. C, sec. II.)

11. ECONOMIC OPPORTUNITY AND EDUCATIONAL ASSISTANCE PROGRAMS

a. The special economic opportunity and educational assistance programs described in 42 U.S.C. 2751-2756a, 3056 et seq., 5001; 20 U.S.C. 2301; and part I of this handbook are designed to help those who are unemployed or underemployed and those in need of educational assistance to develop the skills necessary for regular employment. To the extent feasible, VA will participate in these programs as an employer, or most often, as a host, by providing work training and experience opportunities.
b. Since a frequent objective of these programs is the employment of enrollees in permanent full-time positions upon completion of their work-training and experience status, facility management will look at the host-enrollee relationship as an important initial step which may lead to regular employment. Enrollees will be encouraged to compete in entrance level and other Federal civil service examinations so that they may share in the greater opportunities for permanent employment in or outside VA.

c. An agreement between VA and the sponsoring organization will usually be made for each group to be assigned for work-training and experience purposes. Generally, such agreements have a standard format developed by the parent organization of the sponsor which describes the relationships and responsibilities of the organizations involved as well as those relating to the participants. If necessary, such agreements will be modified to meet VA needs and requirements at the time they are negotiated.

d. As new programs develop or changes are made in existing ones, any additional VA instructions needed to implement the OPM issuance will be issued.

12. USE OF PRIVATE SECTOR TEMPORARIES. VA will comply with the requirements identified in 5 CFR, part 300, subpart E on Use of Private Sector Temporaries, Federal Acquisition Regulation (FAR) and Veterans Affairs Acquisition Regulation (VAAR) when contracting for private sector temporaries. See appendix II-B for specific instructions on use of temporary help services in VA.
SECTION B. EMPLOYMENT IN THE COMPETITIVE SERVICE

1. GENERAL. Employment in the competitive service in the Department of Veterans Affairs will be administered in accordance with applicable laws and regulations, including title 5 of the U.S. Code and the Code of Federal Regulations.

   a. Job Announcement Posting Requirements. To meet VA’s Interagency Career Transition Assistance Plan (ICTAP) obligations, all title 5 competitive service vacancies lasting over 120 days must be posted on OPM’s USAJOBS system when applicants from outside VA are accepted. This includes jobs being filled under most direct appointment authorities. (See 5 CFR 330.102(a) and (b); 5 CFR 330.707.)

   b. Employment from Federal Civil Service Certificates Under 5 CFR, Part 332. Under Interagency Agreement # VA-1 between VA and the Office of Personnel Management (OPM), Federal civil service certificates can be obtained from a VA delegated examining unit (DEU), another Federal agency DEU, or an OPM examining office. OPM publishes its Employment Service Pricing Guide on a fiscal year basis. VA and other Federal DEUs each have their own procedures and requirements for providing services. Some may issue certificates for VA facilities, but charge a fee or require other forms of resource exchange for doing so. A VA organization interested in requesting approval to establish or disband a DEU should contact OHRM&LR’s Recruitment and Placement Policy Service (059). The DEU Chief should also notify (059) of changes in the roster of OPM-trained staff as they occur. Information on the Federal delegated examining process is available on OPM’s [W]eb site [at www.opm.gov/deu/index.asp].

   [c. Nonselection of Eligibles from Federal Civil Service Certificates. Selections from competitive Federal civil service certificates should be made from among the best qualified candidates. If VA wishes not to appoint an individual on a certificate, there are two options from which to choose. First, VA may object or request to pass over a candidate pursuant to 5 CFR 332.406. Alternatively, VA may make a suitability determination under 5 CFR 731.202. While either route is permissible, the standards applicable to the chosen procedure must be satisfied.

   (1) Objection and Pass Over

      (a) If there is a nonselection of an eligible candidate, an objection request is required. An objection request is a request to remove a candidate from consideration on a particular certificate. Objections are based on factors such as lack of required experience, fraud or false statements, misconduct in previous employment, and other suitability issues (see 5 CFR Part 731 and OPM’s Delegated Examining Operations Handbook).

      (b) If there is a nonselection of a preference eligible, then a pass over request is required. A pass over request is an objection filed against a preference eligible that results in the selection of a non-preference eligible. Pass over objections are based on factors such as physical or medical conditions that would prevent performance of the full range of essential duties of the position or suitability issues to select a non-preference eligible (see 5 CFR Part 339).
(c) VA DEUs have delegated examining authority from OPM to adjudicate most objection and pass
over requests. However, OPM retains exclusive authority to make medical qualification determinations
pertaining to preference eligibles or disabled veterans in certain circumstances (see 5 CFR, part 339),
and grant or deny pass over requests of preference eligibles who are 30% or more compensably
disabled. VA must refer any objection, including pass over request, that is based on material, intentional
false statement or deception in examination or appointment to OPM for a suitability action where
warranted under 5 CFR, part 731.

(d) Objection and pass over requests described in 5 CFR, part 332 are processed through OPM using
the form SF-62, Agency Request to Pass Over a Preference Eligible or Object to an Eligible. For DEU-
adjudicated objection and pass over requests, the HR Officer must submit a written justification with a
reason(s) for the objection or pass over of an individual to the DEU that issued the certificate. For
OPM-adjudicated pass over requests of a preference eligible or disabled veteran, the request must be
submitted directly to OPM. Passover requests should include the following documentation: vacancy
announcement, certificate of eligibles, application of the selectee, application of the preference eligible
or disabled veteran not selected, and written justification supporting the reason(s) for non-selection.
DEU or OPM- sustained objections and pass overs are not appealable to MSPB.

(2) Suitability. Suitability refers to a person’s identifiable character traits and conduct sufficient to
decide whether an individual’s employment or continued employment would or would not protect the
integrity or promote the efficiency of the service. Guidance on the process of non-selection of a
candidate based on suitability can be found at 5 CFR, part 731 subpart D, in the OPM Delegated

(a) Definitions

1. Suitability Determination. A decision by OPM or an agency with delegated authority that states
a person’s suitability for employment in covered positions in the Federal Government or a specific
Federal agency.

2. Suitability Action. An action described in 5 CFR 731.203 (cancellation of eligibility, removal,
cancellation of reinstatement eligibility, debarment) that may be taken by OPM or an agency with
delegated authority under the procedures in 5 CFR, part 731, subparts C and D after a person is
determined to be unsuitable. These actions are appealable to MSPB.

(b) Procedural Options. The procedure used to take an action determines the standards applicable
and whether that action may be appealed. Non-selection, or cancelation of eligibility for a specific
position based on an objection to an eligible under 5 CFR 332.406, is not a suitability action even if it is
based on reasons set forth in 5 CFR 731.202. An individual has no right of appeal to MSPB from an
OPM or VA DEU decision to sustain an objection or grant a pass over request, regardless of the reason
for the decision.]
2. CAREER-CONDITIONAL AND CAREER EMPLOYMENT

a. **Purpose.** Permanent employment in the competitive service is governed by the career-conditional employment system. The system is designed to permit adjustment of the career service to necessary fluctuations in Federal employment, and to provide equitable and orderly principles and practices for stabilizing the Federal workforce.

b. **Basic Elements.** Under the career-conditional employment system, employees are generally brought into the service under a career-conditional appointment. A career-conditional employee must prove an interest in a career in the Federal service by completing three years of substantially continuous service before becoming a full career employee. It is during this same 3-year period that the ability and desire of the Government to retain the employee is demonstrated. Career employees have superior tenure to that of career-conditional employees. Certain employees are appointed directly as career employees or are otherwise exempt from the 3-year length of service requirement for career tenure. (See 5 CFR, part 315, subpart B.)

c. **Career-Conditional or Career Appointment of Persons Eligible Under the Veterans Affairs Choice and Quality Employment Act of 2017.**
Under Public Law 115–46, § 204, VA may appoint, via transfer or reinstatement, a qualified former VA career or career conditional employee to any position within the competitive service without regard to Veteran’s preference or competitive examining rating and ranking procedures. The appointment may be up to one grade (or equivalent) higher than the grade (or equivalent) of the VA position previously occupied by the employee. When filling positions under this authority, facilities must adhere to agency Career Transition Assistance Plan (CTAP) and Interagency Career Transition Assistance Plan (ICTAP) provisions in 5 CFR, part 330, subparts F-G.

(1) Qualified former employees must have:

   (a) formerly occupied any career or career conditional position at the VA within two years before applying for reemployment at VA;

   (b) voluntarily departed such position, or was subject to a reduction in force, and had a satisfactory performance record while occupying such position; and

   (c) since departing VA has maintained licensing requirements, related to the position, if any, and gained skills, knowledge, or other factors related to the position.

(2) Additionally, the former employee must have at least one year of specialized experience equivalent to the next lower grade level.]
[d]. Career-Conditional (or Career) Appointment of Persons Eligible Under the Amended Veterans Employment Opportunities Act (VEOA). Under 5 CFR 315.611, (a) preference eligibles, or (b) Veterans whose most recent military separation was under honorable conditions after substantially completing at least 3 years of continuous active military service: may receive a career-conditional (or, if appropriate, career) appointment if selected from among the best qualified under a merit promotion competition that was announced to candidates outside VA’s workforce. As it is customary for the military to release individuals a few days before completing 3-year tours “for the convenience of the Government,” a facility should normally consider these individuals eligible. Reasonable and consistent use of the “few days” criteria by an operating HRM office is expected.
[e]. **Noncompetitive Appointment of 30 Percent Service-Connected [Disabled] Veterans.** Under 5 CFR 315.707, a disabled Veteran with a service-connected disability of 30 percent or more, who is serving under a time-limited appointment not limited to 60 days or less, may be converted noncompetitively to a career-conditional appointment (or career, if otherwise eligible), provided the Veteran meets the applicable qualification requirements. [S]pecial time-limited authorities for these 30-percent disabled Veterans allow temporary appointments up to 1 year under 5 CFR 316.402(b)(4) and provisional appointments under 5 CFR 316.403(b)(1). However, conversions may also be made from any time-limited appointment with a not-to-exceed time of 61 days or more, regardless of whether it is in the competitive or excepted service. Conversions may occur after 1 day of service on such a time-limited appointment.

[f]. **Conversion to Career-Conditional (or Career) Appointment of Disabled Veterans and Other Persons with Intellectual Disabilities, Severe Physical Disabilities, or Psychiatric Disabilities Serving Under Schedule A Appointments.** Under 5 CFR 315.709, after 2 or more years of satisfactory service the subject employees serving under 5 CFR 213.3102(u) in a nontemporary appointment may be converted to competitive status, at the facility’s discretion.

[g]. **Status Quo Appointment and Conversion to Career-Conditional (or Career) Appointment of Disabled Veterans who Complete 38 U.S.C, Chapter 31 Training.** A facility may give a status quo appointment under 5 CFR 3.1 and 315.604(a) to a service-connected disabled Veteran who satisfactorily completed training under 38 U.S.C. chapter 31 for that position, or class of positions in a Federal agency. A facility may subsequently noncompetitively convert the Veteran so appointed at any time to a career-conditional (or, if appropriate, career) appointment under 5 CFR 315.604(b). A probationary period is not required.

[h]. **Congressional Medal of Honor-Recipient Appointments.** Executive Order 9268 provides that upon recommendation of the Secretary of Veterans Affairs to the Director, Office of Personnel Management, Veterans who have been awarded the Congressional Medal of Honor may be appointed as Contact Representatives in VA. HR Offices may obtain advice on individual cases from the Recruitment and Placement Policy Service (059).

[i]. **Noncompetitive Career-Conditional (or Career) Appointment of Student Trainees in Associated Health Care Disciplines**

(1) In accordance with 38 U.S.C. 7403(g), VA facilities are authorized to appoint under title 5, without regard to competitive Federal civil service announcement, examining and certification procedures, eligible graduates who have a degree, diploma, or certificate in an associated health care discipline from an accredited institution of post-secondary education, and who have successfully completed an affiliated clinical education training program in a VA health care facility. See appendix II-C for specific instructions on use of this noncompetitive appointment authority and a general list of covered associated health care disciplines.
(2) This employment authority does not apply to individuals in training programs that will result in post-training appointments under 38 U.S.C. 7401(1) or (3) or under 38 U.S.C. 7405 to an occupation listed under those paragraphs.

(3) For provisions for appointing students in associated health care disciplines before graduation, see paragraphs 5 and 6, section G, chapter 3 of this part.

[] Noncompetitive Appointment of Certain Military Spouses

(1) General. In accordance with eligibility criteria in 5 CFR 315.612, certain spouses of members of the armed forces may receive noncompetitive, career-conditional (or, if appropriate, career) appointments in the competitive service. Eligibility for appointment does not confer hiring preference or special selection priority. When filling positions under this authority, facilities must adhere to agency Career Transition Assistance Plan (CTAP) and Interagency Career Transition Assistance Plan (ICTAP) provisions in 5 CFR, part 330, subparts F-G.

(2) Definitions

(a) Active Duty. Full-time duty in the armed forces, including full-time National Guard duty, except that for Reserve Component members the term “active duty” does not include training duties or attendance at service schools.

(b) Armed Forces. The Army, Navy, Air Force, Marine Corps, and Coast Guard.

(c) Duty Station. Permanent location to which a member of the armed forces is assigned for duty as specified on the individual's permanent change of station (PCS) orders.

(d) Member of the Armed Forces or Service member. An individual who:

i. Is serving on active duty in the armed forces under orders specifying that he or she is called or ordered to active duty for more than 180 consecutive days, has been issued orders for a permanent change of station, and is authorized for dependent travel (i.e., the travel of the service member's family members) as part of the orders specifying the individual's permanent change of station;

ii. Retired from active duty in the armed forces with a service-connected disability rating of 100 percent as documented by a branch of the armed forces, or retired or was released or discharged from active duty in the armed forces and has a disability rating of 100 percent as documented by the Department of Veterans Affairs; or

iii. Was killed while serving on active duty in the armed forces.

(e) Permanent Change of Station. The assignment, reassignment, or transfer of a member of the armed forces from his or her present duty station or location without return to the previous duty station or location.
(f) **Spouse.** The husband or wife of a member of the armed forces.

(3) **Coverage and Eligibility.** Consistent with regulatory guidance in 5 CFR 315.612, facility HR offices may appoint qualified military spouses who meet the following eligibility criteria:

(a) A spouse who married a service member on, or prior to, the date of his or her PCS orders, and relocated with the service member to the designated duty station on his/her PCS orders;

(b) A spouse of a service member released from active duty; or a retiree, who incurred a 100 percent service-connected disability on active duty in the armed forces; or

(c) A widow or widower of a service member who was killed while serving on active duty in the armed forces. The time served on active duty is not limited to combat service. The widow or widower is eligible for appointment under this authority until he/she remarries.

(4) **Eligibility Period.** With the exception of spouses of deceased or 100 percent disabled Veterans, covered individuals may receive a permanent appointment or multiple temporary or term appointments within 2 years of the date on the PCS orders. However, spouses of deceased or 100 percent disabled Veterans have unlimited eligibility under this authority.

(5) **Eligibility Documentation.** Prior to appointment, facility HR staff must obtain the following documentation from the spouse to verify eligibility.

(a) A spouse of a current service member must provide a copy of the marriage license and the service member’s PCS orders specifying: the effective date of the PCS, the duty location, and a statement authorizing the dependent/spouse to accompany the service member to the duty station.

(b) A spouse of a former service member released from active duty, or a retiree, who incurred a 100 percent service-connected disability while serving on active duty in the armed forces must provide: a copy of the marriage license, a DD Form 214, and VA or DoD documentation of the 100 percent service-connected disability.

(c) A widow/widower of a service member who was killed while serving on active duty in the armed forces must provide: a copy of the marriage license, a DD Form 214, documentation of the deceased service member’s service-connected death, and a statement validating that the widow/widower is the un-remarried widow/widower of the deceased service member.

(6) **Exclusions.** A spouse who does not accompany the service member to the new duty station, marries the service member after he/she relocates; or a spouse of a service member on deployment, temporary duty (TDY), or other non-PCS orders, is not eligible for appointment under this authority. However, a spouse is eligible if the service member’s orders indicate that the service member will proceed to a TDY assignment en route to a new duty station.
(7) **Geographic Restriction.** With the exception of spouses of Servicemembers with 100 percent service-connected disabilities or spouses of Servicemembers killed on active duty, facilities may not appoint eligible spouses to positions outside the geographic area of the permanent duty station designated in the Servicemember’s PCS orders. The geographic area is not mile-radius specific. [The geographic area] encompasses the Servicemember’s duty station and the surrounding area from which individuals may reasonably commute daily. In accordance with 5 CFR 315.612, the Assistant Secretary for Human Resources and Administration may waive this limit if there are no Federal agencies or departments within the geographic area of the Servicemember’s duty station.

(a) Facility Directors may submit requests to waive the geographic restriction. Requests must include a copy of the vacancy announcement, the Servicemember’s PCS orders, a brief statement from the spouse indicating her/his desire to waive the geographic restriction, and a statement from the facility that there are no Federal agencies or departments within the local commuting area of the Servicemember’s duty station.

(b) Requests to waive the geographic restriction must be submitted to: Director, Recruitment and Placement Policy Service (059), Office of Human Resources Management (OHRM), VA Central Office, Washington, DC 20420.

[k]. **Noncompetitive Conversion to Career or Career-Conditional Appointments of Students and Recent Graduates Employed through the VA Choice and Quality Employment Act of 2017**

(1) In accordance with the VA Choice and Quality Employment Act of 2017, Public Law 115-46, VA facilities are authorized to make excepted appointments of students and recent graduates of qualifying educational institutions in title 5 occupations that lead to noncompetitive conversion to career or career-conditional appointments. The conversions, under title 5, are made without regard to competitive Federal civil service announcement, examining, and certification procedures, or Veterans’ preference requirements. See Appendix II-D for specific instructions on the use of the excepted appointment authority and the noncompetitive conversion action.

(2) This excepted appointment and conversion authority does not apply to individuals in training programs that result in post-training appointments to an occupation listed in 38 U.S.C. § 7401(1) or (3), or 38 U.S.C. § 7405.

[l]. **Administrative Protections for Career-Conditional and Career Employees**

(1) **Retention Priority in Reduction in Force.** Employees who have career-conditional appointments are in group II for reduction in force purposes. Employees who have career appointments have group I tenure for reduction in force purposes, unless they are serving a probationary period, in which case they are in group II. (See 5 CFR, part 351, and part IV, this handbook.)

3. **NON-PERMANENT EMPLOYMENT**

   a. **Scope**

      (1) This paragraph supplements regulations contained in 5 CFR, part 316, and should be used in conjunction with that reference and other applicable portions of this chapter.

      (2) Regulations for temporary appointments in the excepted service of title 5, U.S. Code are contained in 5 CFR, part 213. (This includes the 30-day critical needs appointment authority.) (See [ ] section C of this chapter.)

      (3) This paragraph does not apply to excepted service positions in the Veterans Health Administration filled under 38 U.S.C., chapter 73 and 74 or to excepted positions in the Veterans Canteen Service filled under 38 U.S.C., chapter 78. These positions are covered in chapter 3 of this part.

   b. **Policy.** Temporary and term appointment authorities will be used only under conditions authorized by the Office of Personnel Management. To meet VA’s ICTAP obligations, all title 5 competitive service vacancies lasting over 120 days, must be posted on OPM’s USAJOBS system when applicants from outside VA are accepted. (See paragraph 1a of this section.)

   c. **Temporary Limited Appointments.** Temporary limited appointments may be used to fill short-term employment needs expected not to exceed 1 year, and continuing positions expected to be needed for placement of the organization’s permanent employees who would otherwise be displaced. (See 5 CFR, part 316, subpart D.)
(1) Facilities have the authority to make temporary limited appointments of 1 year or less to positions in the General Schedule and the Federal Wage System. Supervisory certification of the temporary nature of the employment need is to be documented in accordance with 5 CFR 316.401(b).

(2) While temporary limited appointments may generally be extended up to 2 years from the date of initial appointment in increments of 1-year or less, appointments to seasonal and intermittent work are specifically governed by the criteria specified in 5 CFR 316.401(d)(1). OPM will authorize exceptions to the regulatory time limits only when necessitated by major reorganization, restructuring, facility closing or other unusual circumstances. Requests for agency-wide exceptions must be made to OPM by VA Central Office. Requests of an agency-wide nature may be sent to [OHRM&LR] (05[ ]). A facility may submit a request for extending an appointment to a specific position or project based on other unusual circumstances to the appropriate OPM Service Center.

d. Term Appointments. Term appointments may be for a period of more than 1 year but not more than 4 years to positions where the need for an employee’s services is not permanent. Term appointments are often appropriate for persons employed to work on medical research projects. This authority, however, is not limited to research situations and may be used for other appropriate needs as indicated in 5 CFR, part 316, subpart C.

(1) Facilities are delegated the authority for determining whether term appointments are appropriate for particular positions. Selections for term employment, however, must be made under applicable competitive or noncompetitive procedures. Outside-the-register procedures in 5 CFR, part 333 may no longer be used for competitive term appointments. (See 5 CFR 316.302 (a).) If an exception to the 4-year limit is clearly justified, a facility may submit a request to make and/or extend a term appointment beyond 4 years to the appropriate OPM Service Center.

(2) Use of this authority will be carefully reviewed during VA and OPM personnel management evaluation visits. Documentation of the reasons for authorizing a term appointment should be maintained in accordance with VA records disposal schedules.

e. Time-Limited Appointment of VRA Eligibles. A VRA eligible may be given a noncompetitive temporary appointment of up to 1 year under 5 CFR 316.402(b)(2) or a term appointment under 5 CFR 316.302 not to exceed 4 years to any position in the competitive service at or below GS-11 or equivalent for which the VRA eligible is qualified. Appointment under these authorities does not give the privilege of conversion to competitive status. Because these appointments are not in the title 5 excepted service like the VRA appointment, those over 120 days must be posted on OPM’s USAJOBS vacancy announcement system. (See 5 CFR, parts 307 and 316.)

[ ]

4. SCIENTIFIC AND PROFESSIONAL (ST) POSITION APPOINTMENTS. ST system positions may be established and filled in the competitive service under 5 U.S.C. 3104 and 5 CFR, part 319 outside the General Schedule (and above grade GS-15) to carry out research and development functions requiring the services of specially qualified individuals. A facility wishing to appoint an individual in an
ST position would follow the same procedure to establish an ST position as is used to establish a Senior Executive Service (SES) position. (See VA Handbook 5027, Senior Executive Service.)

5. APPOINTMENT TO POSITIONS RESTRICTED TO PREFERENCE ELIGIBLES.  
5 U.S.C. § 3310 and 5 C.F.R. § 330.401 prohibit competitive examination and the placement of a non-preference eligible into a restricted position when a preference eligible is available. Covered occupations include guards, elevator operators, messengers and custodians. [Effective August 10, 2022, Section 905 of the Sergeant First Class Heath Robinson Honoring Our Promise to Address Comprehensive Toxics (PACT) Act of 2022, Expansion of Opportunities for Housekeeping Aids, amended 5 U.S.C § 3310 to exempt Housekeeping Aids, 3566 occupational series, positions in VA from the preference eligible recruitment restriction. This also exempts Housekeeping Aids, 3566 series, positions from the provisions and requirements of 5 C.F.R. § 330.401 and this paragraph. The exception is specific only to Housekeeping Aids in VA and the restriction remains in effect for the recruitment of other covered occupations.]

a. Recruitment Methods. VA Human Resources (HR) offices may use any of the following methods to announce and fill restricted positions with preference and nonpreference eligibles consistent with the governing rules for each process.

(1) Delegated Examining Procedures. The recommended and primary recruitment method which yields the widest candidate pool and greatest potential for placing a preference eligible is delegated examining. The restriction on competing and filling a covered occupation with a non-preference eligible applies under this process. When using this method, the delegated examining unit must certify that the supply of preference eligible applicants has been exhausted prior to filling a restricted position with a non-preference eligible. If this [criterion] is met, Office of Personnel Management (OPM) approval is not required. If there are additional vacancies in restricted positions, the servicing HR office may request to extend the associated referral certificate in accordance with the procedures outlined in VA Handbook 5005, Part I, Appendix B, Delegated Examining (DE).

(2) Position Change Procedures (Internal to the Organizational Entity).  
Title 5 C.F.R. § 330.402(a)(2) outlines an exception that permits the reassignment, promotion or demotion (i.e., change to lower grade) of a current permanent non-preference eligible employee from [one] restricted position [] to another [ ] position within the organizational entity [] without prior OPM approval. [An organizational entity in this context is a VA service or business line (or its equivalent) that employs individuals in restricted positions, but it is not limited to a specific facility or work location.] This exception permits movement within the organizational entity of individuals
who were properly appointed to their current restricted position, but do not have preference. Essentially, when a nonpreference eligible’s initial appointment meets regulatory requirements facilitating [their] proper placement in a restricted position, no further approval is required for subsequent movement to other restricted positions within the organizational entity. However, if a non-preference eligible moves outside of the organizational entity into a non-restricted position, the HR office must ensure any subsequent hiring actions are excepted by [law,] regulation or approved by OPM (subparagraph a(3) of this paragraph).

NOTE: Internal movements must follow the guidance in VA Handbook 5005, Part III, Internal Placement and Merit Promotion.

(3) Recruiting Candidates External to the Organizational Entity and VA.

(a) Consistent with 5 C.F.R. § 330.402(b), VA HR offices are prohibited from noncompetitively filling a restricted position with a non-preference eligible without obtaining approval from the Director, Recruitment and Placement Policy Service (RPPS) (059) and OPM prior to appointment (see subparagraph b of this paragraph). This applies to any hiring or selection action of a nonpreference candidate outside of the organizational entity or an action that yields a new competitive service appointment, e.g., conversion of a current employee, reinstatement, transfer, interchange agreement, appointments under 5 C.F.R. § 315 authorities of a nonpreference eligible into a restricted position.

(b) Under certain circumstances, OPM approval is not required when filling restricted positions with a former nonpreference eligible employee by reemployment, reinstatement or reappointment of certain temporary employees as outlined in 5 C.F.R. § 330.402(a)(3)-(5).

b. Requests for OPM Approval to Fill a Restricted Position with a Nonpreference Eligible Applicant under 5 C.F.R. § 330.402(b). In general, competitive examination and merit promotion (internal to the organizational entity) recruitment efforts produce a sufficient pool of preference and nonpreference eligible applicants. When recruitment efforts do not produce a sufficient number of applicants, it may be necessary to solicit applications from other candidates external to the organizational entity and/or VA, including those described in a(3) of this part. When this occurs, servicing HR offices must send requests for OPM approval to the Director, RPPS (059), for review. The request must include a justification memorandum outlining the need to fill the position with a nonpreference eligible, a copy of the job opportunity announcement(s), a corresponding referral certificate(s), and additional documentation validating the unavailability of preference eligible applicants,
through competitive examination and merit promotion procedures as described
in subparagraphs a(1) and a(2), respectively.

Documenting the Standard Form 50 (SF-50), Notification of Personnel Action. It is
imperative that VA properly document and track the appointments of nonpreference eligibles into restricted positions. When a servicing HR office places a nonpreference eligible in a position that is restricted to a preference eligible, the HR office must annotate the SF-50 with a second VA-specific legal authority code and an appropriate remarks code. The legal authority code is 601, which prints on the SF 50-B as “5 C.F.R. § 330.402.” In addition, a remark code on the SF-50 must state that the nonpreference eligible was appropriately selected and identify the exception from 5 C.F.R. § 330.402(a) or (b). If the appointment was based on an exception other than those listed in 5 C.F.R. §330.402(a) that required OPM approval prior to appointment, the date of the OPM approval letter must also be included.
SECTION C. EMPLOYMENT IN THE EXCEPTED SERVICE

1. VETERANS [RECRUITMENT] APPOINTMENT (VRA). Under 38 U.S.C. 4214, certain Vietnam era and other veterans may be given excepted VRA appointments under 5 CFR 307.103 to positions otherwise in the competitive service at GS-11 or below (or the equivalent in another pay system). For any VRA appointee who has less than 15 years of education, the facility must establish a training or education program, which should meet the needs of both the employee and VA. In VA, a VRA appointee must serve a 1-year trial period (see paragraph 6h of this section), and termination during this year is handled as provided in VA Handbook 5021. Merit promotion provisions cover VRA employees (see part III of this handbook), and they may be promoted above GS-11 level if other requirements are met. Other appointment and conversion requirements are in 5 CFR, part 307.

2. APPOINTMENT OF EXPERTS AND CONSULTANTS

   a. General

      (1) This paragraph contains the VA policies and procedures that apply to the employment of experts and consultants when there is an employer-employee relationship as explained in 5 CFR, part 304, and such employment is in positions excepted from the competitive service by statute or by the Office of Personnel Management. The employee’s services may be obtained by contract or appointment under an appropriate appointing authority (e.g., 5 U.S.C. 3109) and be in a pay or, when appropriate, a non-pay basis. This paragraph does not apply to the employment of consultants and VHA consulting attendings under title 38, U.S.C. ch. 74 authority. See chapter 3 of this part for appointment of [employees to] the[s]e positions.

      (2) Experts and consultants will be employed only when their services are proper, legitimate, and the most practical way for VA to accomplish its management, operational, and service responsibilities. They will be employed on a temporary or intermittent basis but not-to-exceed 1 year unless specifically provided otherwise by law or for a lesser period of time when the need for their services will be completed earlier. They will not be employed to do a job that regular employees can do as well or to perform the duties of a continuing full-time position; neither will experts and consultants be employed where their appointments circumvent competitive employment procedures or General Schedule pay limitations.

      (3) In accordance with 5 CFR 304.103(a)(2), experts and consultants who work on strictly an intermittent basis may be appointed without time limit and all others must receive temporary appointments. However, the above VA policy limits intermittent appointments to not-to-exceed 1 year. Also, the 5 CFR definition for temporary employment clarifies that the appointment may have a full-time, part-time, seasonal, or intermittent work schedule.

      (4) The appointment of experts and consultants employed on an intermittent basis can be renewed from year to year; those serving under temporary appointments cannot, except as provided for by 5 CFR 304.103(c).
b. Authorities and Responsibilities

(1) Office of the Secretary

(a) The Secretary will determine the need for experts and consultants to be appointed to the Office of the Secretary. This includes responsibility to review and certify each proposed appointment or its extension, when applicable. (See paragraph 3c [ ].)

(b) All final selections of experts and consultants must be approved by the Secretary or other appropriate official, with the advice and assistance of the Deputy Assistant Secretary for [O]HRM[&LR]. Field facility heads will forward their recommendations for the appointment and employment of experts and consultants through channels to Central Office for approval. OHRM&LR (05[ ]) will review staff office/administration requests prior to (00) approval.

(2) Line Management. The authority to perform pre-appointment certifications for requests to appoint experts and consultants and for any extensions of such appointments is delegated to [Under Secretaries], Assistant Secretaries, and Other Key Officials for requests under their jurisdiction. (See paragraph 3c [ ].)

(3) Human Resources Management Officers

(a) Human Resources Management Officers (HRMOs) (including the Director, Central Office Human Resources Service (05HRS), in Central Office) will ensure that all procedures and requirements (e.g., dual employment, dual pay, conflict of interest, leave administration, and records documentation) for the appointment and employment of experts and consultants are followed (see 5 CFR 304.103-107).

(b) HRMOs will conduct the quarterly review of the employment of experts and consultants to assure that their utilization is proper. The reviews will be documented, maintained, and signed by the HRMO as explained in paragraph c, which follows.

c. Review and Certification

(1) General. With the advice and assistance of OHRM[&LR], the responsible selecting official will review and certify each proposed appointment, or the extension of an appointment, on the basis of the following considerations:

(a) Necessity for the position;

(b) Correctness of the judgment that the position requires the services of an expert or consultant;

(c) Propriety of the designation of the position as temporary or intermittent;

(d) Soundness of the decision that this is the most appropriate appointing authority to use;

(e) Qualifications of the proposed appointee;
(f) Appropriateness of the intended level of pay in relation to both the work to be performed and the qualifications of the proposed appointee; and

(g) Completeness of documentation.

(2) **Documentation.** The selecting official will sign an individually prepared certification attesting that all the requirements in preceding subparagraph (1) have been met for each appointee. The certification will be filed with the permanent records in each appointee’s personnel folder and be worded along the lines of the sample in appendix II-M.

d. **Review During Employment**

(1) **General.** The responsible HRMO will review the utilization of each expert or consultant on a quarterly basis (i.e., March 31, June 30, September 30, and December 31). The HRMO will obtain documentation from the appropriate selecting officials as is deemed necessary to facilitate the review and certification to assure that in each case the:

(a) Circumstances requiring the initial employment of the expert or consultant are substantially the same;

(b) Duties performed are still those of an expert or consultant;

(c) Time limits are being observed;

(d) Documentation is kept current; and

(e) Duties of record are actually being performed.

(2) **Exclusions.** The quarterly review may be omitted for those experts or consultants who worked for 10 days or less during the quarter.

(3) **Documentation**

(a) Each review will be documented and signed by the HRMO. The review report will cover all experts and consultants and describe how the review was made, summarize the findings, and describe the actions taken to correct any deficiencies noted in the review. Where exclusions in subparagraph [2d](2) [ ] have been made, a statement describing the extent of the exclusion will be included in the report. Records of reviews will be retained for examination by OPM.

(b) Field facilities will forward a copy of each quarterly review, through channels, to the [OHRM&LR] (05[ ]). Negative reports are not required.

e. **Annual Reviews.** Selecting officials (see paragraph 2b(1) [ ]) will be notified by OHRM[&LR] at the close of each fiscal year of their responsibilities and obligations for the proper employment and utilization of experts and consultants. (See [VA] Handbook 5001 for Annual Report on Expert and Consultant Appointments.)
3. SPECIAL NEEDS APPOINTMENTS 5 CFR 213.3102(i)(2)

   a. **General.** Facilities may make excepted temporary limited appointments of not to exceed 30 days duration to meet any legitimate special need that cannot be met by another appointment authority. These appointments may be made without regard to the general eligibility requirement in instances when a facility determines there is a critical need to fill a position on an interim basis pending completion of competitive examining, clearances or other procedures required for a longer appointment. Temporary limited appointments of longer duration are not authorized for this purpose.

   b. **Extensions.**

      (1) Facilities may extend the service of an employee serving under a special needs appointment for up to 30 additional days provided that:

      (a) Continued employment is essential to facility operations;

      (b) The initial appointment was properly made; and

      (c) The conditions which justified the original appointment still exist.

      (2) This authority may not be used to exceed a service limitation imposed by some other appointing authority. A facility may not employ an individual under this type of appointment for more than 60 days in any 12-month period.

      (3) The action extending a special needs employee’s service is processed as a conversion.

4. **PATHWAYS PROGRAMS**

   a. **Purpose.** This paragraph establishes VA policy for implementing the selection, appointment, and movement of Pathways Programs participants in the Internship, Recent Graduate, and Presidential Management Fellows (PMF) Programs. On December 27, 2010, Executive Order (E.O.) 13562 established the Internship Program and the Recent Graduates Program and revised and reinvigorated the PMF Program. These two new programs, along with the PMF Program, collectively form the Pathways Programs. The Office of Personnel Management (OPM) issued the final rule for the Pathways Programs on May 11, 2012 (77 FR 28194), with an effective date of July 10, 2012. The Pathways Program requirements are found in part 362 of title 5, Code of Federal Regulations (CFR). The appointing authorities for the Pathways Programs are found in 5 CFR 213.3402(a), (b), and (c).

   b. **Scope.**

      (1) **Coverage.** This policy applies to appointments of students and recent graduates in the title 5 excepted service using the Pathways Programs, Schedule D hiring authority. Appointing authorities for the Pathways Programs are found in 5 CFR 213.3402(a), (b), and (c) and part 362. This section replaces Human Resources Management Letter 05-13-01, Implementing the Title 5 Excepted Service Pathways Programs in VA dated January 3, 2013. The Pathways Programs regulations replace the former Student Career Experience Program (SCEP) and Student Temporary Employment Program (STEP) formerly
covered under 5 CFR 213.3202 and PMF program formerly covered in 5 CFR 213.3102(ii) and (jj) and 5 CFR, part 362.

(2) **Exclusions.** This paragraph does not apply to: enrollees in manpower or education programs hosted at no cost to VA or on a cost reimbursable basis, volunteers, WOC (without compensation) employees, or students enrolled in baccalaureate curricula appointed under authorities other than 5 CFR 213.3402(a), (b) and (c), direct patient care student positions (i.e., interns, residents, and trainees) [appointed under the authority of 38 U.S.C. 7405], or positions in the title 38 (full or hybrid) excepted service.

c. **Policy.**

(1) Any programs established under the auspices of this paragraph must comply with the criteria as outlined in the referenced authorities.

(2) Guidance for establishing programs under this authority may be found in Appendix II-N of this part.

d. **Responsibilities.**

(1) **Assistant Secretary for the Office of Human Resources and Administration (OHRA) (006).** Serves as the designated agency official, as VA’s Chief Human Capital Officer, making the decision to enter into a Pathways Memorandum of Understanding (MOU) with the Office of Personnel Management (OPM).

(2) **Dean of VA Learning University (VALU).** Serves as the designated official for administering and managing the Pathways Programs in VA. The Dean of VALU is responsible for designating the Department’s VA Pathways Programs Officer (VA PPO) and the VA PMF Coordinator.

(3) **Pathways Program Management Office (PPMO).** Provides governance, administration, management, marketing and support for all Pathways Programs within the National Cemetery Administration (NCA), Veterans Benefits Administration (VBA), Veterans Health Administration (VHA), and VA Central Office (VACO). The PPMO serves as the centralized Pathways resource for best practices, standard operating procedures, tools, templates, data analysis, tracking, reporting and systems, and supporting Participants, hiring officials, HR Offices, and other key stakeholders. The PPMO provides support for other stakeholders involved in the Pathways Program.

(4) **VA Pathways Programs Officer (PPO).** The VA PPO is organizationally aligned in the VA Pathways Program Management Office (PPMO) in VALU. The headquarters VA PPO’s duties and responsibilities include:

(a) Administers VA’s Pathways Programs hiring plan, recruitment, and on-boarding process for VA Pathways Programs Participants, which includes coordinating with VA stakeholder officials, such as the PPOs for the three Administrations and VA Central Office;
(b) Serves as a liaison with the Office of Personnel Management (OPM) by providing updates and reports on VA's implementation of the Pathways Programs and the number of individuals hired and converted; clarifying technical or programmatic issues, sharing VA best practices; and conducting periodic audits to ensure program compliance;

(c) Provides technical guidance and advice to Administration PPOs, hiring officials, supervisors, and operating human resources officials on the provisions of the Pathways Programs;

(d) Coordinates and submits the Departmental Pathways MOU to OPM no less frequently than every 2 years;

(e) Coordinates and submits reports and other updates to OPM and VA senior officials, as requested;

(f) Coordinates and submits requests for Recent Graduates programs lasting more than one year to OPM for approval;

(g) Designs and implements guidance for an on-boarding process for each Pathways Program;

(h) Develops approval criteria for granting extensions and approving/denying requests for extension of appointment of Recent Graduate and PMF Programs Participants up to an additional 120 day to cover rare and unusual circumstances or situations other than a major reorganization, base closing, or an agency wide restructuring;

(i) Adjudicates requests for credit or waiver of service hours for Internship Program Participants;

(j) Works with the VA PMF Coordinator, Administration PPOs, and Administration PMF Coordinators, and other VA Key Stakeholders to plan program budgets and to project the number of PMF hires in the Department; and

(k) Monitors and tracks outreach activities to determine their overall effectiveness in recruiting quality applicants.

(5) VA PMF Coordinator. The VA PMF Coordinator is organizationally aligned in VALU. The VA PMF Coordinator’s duties and responsibilities include:

(a) Administers the VA PMF Program and serving as the VA PMF Program liaison with OPM;

(b) Manages the placement of PMFs within VA, which includes: recruitment (posting job opportunity announcements to the OPM PMF portal); ensuring that Veterans’ preference is applied before providing eligible PMF candidates to the hiring official; and developing other Program-related activities of PMFs appointed in VA staff offices;

(c) Works with the Administration PPOs and Administration PMF Coordinators designated for NCA, VBA, VHA and VACO to ensure accomplishment of comparable matters for those Administrations, including required assignment of mentors and creation of approved IDPs, and required developmental assignment;
(d) Collaborates with the hiring official or supervisor to ensure a mentor is assigned to the PMF, to ensure 80 hours of formal interactive training per year are completed by the PMF that fully addresses the competencies outline in the PMF’s IDP, and to ensure that the PMF completes the 4-6 month developmental assignment;

(e) Reviews and recommends approval/disapproval to the Dean of VALU petitions for readmission and reappointment of a PMF who withdrew from the program; and

(f) Coordinates the submission of each Fellow’s certification of completion through VA’s Executive Resources Board (ERB).

6 Office of Human Resources Management (OHRM) (05).

(a) Establishes and maintains VA policy and guidelines for the implementation and utilization of the Pathways Programs;

(b) Provides technical guidance and advice to the VA HR community regarding the policy related to the Pathways Programs; and

(c) Reviews and submits, to OPM, facility requests for pass over of 30% or more service connected disabled Veterans in relation to Pathways recruitment actions for Internship Program positions and non-Luevano Consent Decree covered Recent Graduates Program positions.

7 Administration Pathways Program Officers (PPO). Administration PPOs provide program guidance on all Pathways Program-related decisions at the administration level including VHA, VBA, NCA and VACO. The Administrations PPOs duties and responsibilities include:

(a) Coordinates the Pathways Programs hiring plan and Pathways-related reporting input for their designated Administration;

(b) Oversees the recruitment and on-boarding process for Participants within the Administration;

(c) Provides technical guidance and advice to hiring officials, supervisors, facility-level Pathways Program Coordinators and operating human resources officials within the respective Administration regarding the Pathways Programs;

(d) In concert with the headquarters VA PPO and VA PMF Coordinator, ensures the assignment of mentors and creation of approved IDPs for Recent Graduates and PMFs assigned to the respective Administration;

(e) Reviews and makes determinations for crediting comparable experience acquired by an Intern in a non-Federal or student volunteer service program;

(f) Advises on requests for breaks in program for Internship Program Participants during periods of absences; and
(g) As applicable, provides copies of Administration-wide programs (i.e., VHA’s Technical Career Field Program), incorporating the use of Pathways Programs, to OHRM (05) prior to implementation. Any programs implemented under this authority must comply with the provisions of this part.

(8) Human Resources (HR) Officer/Director.

(a) HR Officer/Director, or designee, have responsibilities that run parallel to those of the Administration’s PPO in the organizations for which her/his staff provides HR services. The HR Officer/Director may designate technical responsibility of the Pathways Programs to a HR Specialist with extensive knowledge of federal staffing regulations and procedures. However, the HR Officer/Director is ultimately responsible for oversight of the designee and overall compliance of the Program at the facility. The HR Officer’s/Director’s duties and responsibilities include:

(b) Serves as the facility-level Pathways Programs Coordinator and ensures the Pathways Programs complies with the provisions in this section, 5 CFR 213.3402 and part 362;

(c) Participates in local workforce planning efforts to ensure permanent placement opportunities are available for Pathways Participants converting to the competitive service;

(d) Provides technical guidance and advice to hiring officials, supervisors, and operating human resources staff within the respective facility regarding the Pathways Programs;

(e) Advises hiring officials and supervisors in the design and development of formal training plans, individual development plans (IDPs), Participant Agreements, performance plans, mentoring, and the on-boarding requirements;

(f) Ensures proper application of Veterans’ preference when filling Pathways positions, excluding PMF Program positions. PMF Program positions are adjudicated for Veterans’ preference by the VA PPO prior to providing the certificate of eligibles to the HR office or hiring manager;

(g) Makes qualification determinations for appointments in the VA Pathway Internship and Recent Graduates Programs and for PMF appointments at the GS-11 or GS-12 grade level. OPM makes qualification determinations for PMF Finalists at the GS-9 grade level;

(h) Serves as a liaison with participating schools on matters pertaining to student employment programs in VA and stays informed of developments in the area of student employment both in the public and private sectors;

(i) Ensures hiring officials and supervisors comply timely to the mandatory requirements of each Pathways Program, including but not limited to, issuing performance standards, executing Pathways Participant Agreements, creating individual development plans (IDPs), assigning mentors, etc. Identifies expectations and other mandatory requirements in accordance with 5 CFR 362.106;

(j) Obtains certification of enrollment and recurring transcripts from Interns as proof of satisfactorily seeking a degree (diploma, certificate, etc.) in a qualifying educational institution, on a full or half-time basis (as defined by the institution in which the student is enrolled);
(k) Submits reports and other updates regarding the hiring and conversion upon request to the headquarters VA PPO through the respective Administration’s PPO;

(l) Adheres to Pathways Programs hiring projections reported for the respective facility and reports deviations to the headquarters VA PPO through the respective Administration PPO;

(m) For consideration of crediting waiver of service credit for conversion to the competitive service, makes the determination that Intern’s work experience demonstrates high potential by outstanding academic achievement and exceptional job performance under an Internship Program appointment; and

(n) Advises hiring officials and supervisors of their duties and responsibilities as defined in paragraph 9 of this chapter.

(9) **Hiring Officials and Supervisors.** The Hiring Official and Supervisor’s duties and responsibilities include:

(a) Supervises daily work activities of the Pathways Participant and serves as the Pathways Participant’s primary point of contact for any questions related to the program;

(b) Adheres to all requirements of the applicable Pathways Program for each Pathways Participant, including all of the provisions in the governing Participant Agreement, along with providing a meaningful on-boarding process. The hiring official and/or supervisor is responsible for orienting the Participant to VA’s mission and the Participant’s role in that specific facility and ensuring access to all necessary technological and program resources; providing ample work; career guidance; and regular performance feedback throughout the Program;

(c) Establishes performance elements and standards directly related to acquiring and demonstrating the various leadership, technical, and/or general competencies expected of the Participant, as well as, the elements and standards established for the assigned duties. VA Handbook 5013, Performance Management Systems, Part I - Title 5 Performance Appraisal Program, does not require a formally established performance plan for temporary title 5 excepted service employees expected to work 90 calendar days or less in a 12-month period, e.g., a Pathways Intern hired for the summer with a corresponding not-to-exceed date. Participant Agreements must include performance expectations;

(d) Designs and develops formal training plans, Participant Agreements, and performance plans for Participants with advice from the HR Officer/Director or designee;

(e) Assigns duties and responsibilities to Internship Participants that are consistent with their educational background and career interests and purpose of appointment;

(f) In coordination with workforce planners, ensures that an adequate number of permanent positions will be available to convert Pathways Participants who successfully complete their Program;

(g) Ensures Recent Graduate and PMF Participants are assigned an appropriate mentor;
(h) Ensures Participant Agreement is established within 10 calendar days of the appointment date and a copy is provided to the Participant and the servicing Human Resources Office;

(i) Verifies enrollment and eligibility of a Participant for continued participation in the Internship Program;

(j) Communicates to Participants all program requirements as related to conversion eligibility, special training requirements, and establishes a mutually agreeable work schedule; and

(k) Review, for approval or denial, an Internship Program Participant’s request for a break in program.

(10) Internship Program Participant.

(a) Adhere to the Internship Program requirements required by Federal regulation and VA policy.

(b) Meet the definition of a “student” as defined in 5 CFR 362.202 as an individual accepted for enrollment or enrolled and seeking a degree (diploma, certificate, etc.) in a qualifying educational institution, on a full or half-time basis (as defined by the institution in which the student is enrolled), including awardees of the Harry S. Truman Foundation Scholarship Program under Public Law 93–842. Students need not be in actual physical attendance, so long as all other requirements are met. An individual who needs to complete less than the equivalent of half an academic vocational or technical course-load immediately prior to graduating is still considered a student for purposes of this Program.

(c) Provide proof of enrollment in a qualifying educational institution and academic transcripts at the end of each academic period and upon request.

(d) As applicable, at the time of appointment and upon request, demonstrate an acceptable overall Grade Point Average (G.P.A.) of at least a 2.0 or above on a 4.0 scale, as recorded on the official transcript.

(e) Adhere to an established work schedule approved by the supervisor.

(f) Perform, successfully, the duties and responsibilities in the assigned position description.

(g) Observe all workplace rules, such as dress code, office conduct and behavior.

(h) Participate in all VA mandatory training programs (either on-line or in the classroom).

(i) For individuals appointed in Intern positions (without time limit) expected to last 1 year or longer, establish an IDP with the assistance of the supervisor. The IDP must be executed within 45 calendar days from the appointment date, and must be established in concert with the assignment of performance requirements, as applicable.
(j) Notify the supervisor of any changes in the completion of the educational program, such as graduation date, changes in the major degree requirements, or changes in the educational institution’s accreditation.

(k) Submit requests for breaks in program to the supervisor within a timely manner.

(11) **Recent Graduates Participant.**

(a) Adhere to the Recent Graduate Program requirements required by Federal regulation and the VA policy.

(b) Adhere to an established work schedule approved by the supervisor.

(c) Perform, successfully, the duties and responsibilities in the assigned position description.

(d) Observe all workplace rules, such as dress code, office conduct and behavior.

(e) Establish an IDP with the assistance of the supervisor. The IDP must be completed within 45 calendar days of appointment and include a plan to obtain at least 40 hours of formal interactive training per year, and must be established each year in concert with the assignment of performance requirements.

(f) Collaborate with the supervisor to identify a mentor within 90 calendar days of the appointment date.

(g) Participate in all VA mandatory training programs (either on-line or in the classroom).

(h) Attend regularly scheduled meetings with designated mentor.

(12) **Presidential Management Fellows Program Participant.**

(a) Adhere to the PMF Program requirements required by Federal regulation and the VA policy.

(b) Adhere to an established work schedule approved by the supervisor.

(c) Perform, successfully, the duties and responsibilities in the assigned position description.

(d) Observe all workplace rules, such as dress code and office conduct and behavior.

(e) Establish an IDP with assistance of the supervisor. The IDP must be completed within 45 calendar days of appointment and include a plan to obtain at least 80 hours of formal interactive training per year, and must be established each year in concert with the establishment of the performance requirements.

(f) Collaborate with the supervisor to identify a mentor within 90 calendar days from the appointment date and attend regularly scheduled meetings with designated mentor.

(g) Participate in a VA mandatory training programs (on-line and classroom).
(h) Complete a 4-6 month developmental assignment as described in 5 CFR 362.405(b)(4).

f. Definitions. For the purposes of this policy, definitions are as follows:

(1) Academic Year of Undergraduate Education. Thirty (30) semester hours, 45 quarter hours, or the equivalent in an accredited college or university.

(2) Advanced Degree. A professional or graduate degree, e.g., master's, MBA, Ph.D., J.D.

(3) Agency. An Executive department. For the purpose of this policy agency means Department of Veterans Affairs (VA).

(4) Break In the Program. A period of time when an Intern is working but is unable to go to school, or is neither attending classes nor working for the Department.

(5) Certificate Program. A post-secondary education, in a qualifying educational institution, equivalent to at least one academic year of full-time study that is part of an accredited college-level, technical, trade, vocational, or business school curriculum. Certificate programs may not be used to
appoint individuals enrolled in short term “certificate programs” that are not required for the position employed or which lack sufficient academic rigor.

(6) **Exceptional Job Performance.** A formal evaluation conducted by the student's Internship supervisor, consistent with the applicable performance appraisal program that results in a rating of record (or summary rating) of higher than fully successful or equivalent.

(7) **Executive Resources Board (ERB)** (applies to PMFs). Senior officials who have been given responsibility for executive resources management and oversight by the agency head. The individual(s) review PMF Fellows’ conversion packages and certify whether PMF Fellows have successfully completed Program requirements. These senior officials have been given responsibility for executive resources management, merit staffing and oversight by the Secretary of VA.

(8) **Extension of Program.** An agency may extend the Recent Graduate or PMF Program for a Participant for a period for up to an additional 120 calendar days to cover rare, unusual circumstances or situations. These circumstances and situations are outlined in the VA-OPM Pathways Memorandum of Understanding (MOU). Also, see the definition of Memorandum of Understanding. Extensions of the program are approved by the headquarters VA PPO.

(9) **Individual Development Plan (IDP).** A formal written document (sometimes called a professional development plan) that outlines how a Participant will improve current performance and/or meet future anticipated performance requirements and career aspirations. An IDP is a tool that guides development through formal training, education or certification from a college or university, on-the-job experiences, or coaching and mentoring. Participants in the Recent Graduates and PMF Programs are required to be assigned IDPs within 45 calendar days of appointment. Supervisors of participants appointed in Internship Program positions (without time limits) expected to last more than 1 year should assign Participants an IDP within 45 calendar days of appointment.

(10) **Initial Appointment.** An individual’s first Pathways appointment in any particular agency/department.

(11) **Internship Program Participant or Intern.** An Internship Program Participant or Intern is an eligible student, as defined in 5 CFR 362.202, who is participating in the Internship Program. Interns may serve on temporary appointments not to exceed 1 year and are referred to as temporary Interns. Those students serving on appointments without a not-to-exceed date are referred to as indefinite Interns.

(12) **Memorandum of Understanding (MOU).** A formal bilateral or multilateral agreement between two or more parties that expresses a convergence of will between the parties, indicating an intended common line of action. The Pathways Programs MOU is established between OPM and the Assistant Secretary of the Office of Human Resources and Administration (006) in VA Central Office.

(13) **Outstanding Academic Achievement.** A student in the Internship Program who possesses an overall grade point average (G.P.A.) of 3.5 or better, on a 4.0 scale; standing in the top 10 percent of the student's graduating class; and/or induction into a nationally-recognized scholastic honor society.
(14) **Participant Agreement.** A written agreement between VA and each Pathways Participant. The agreement must clearly identify expectations, including but not limited to: responsibilities of Pathways Participant and the Supervisor; a general description of duties; work schedules; the length of the appointment and termination date; mentorship opportunities; training requirements, as applicable; evaluation procedures that will be used for the Participant; requirements for continuation and successful completion of the Program; and the minimum eligibility requirements for noncompetitive conversion to term or permanent competitive service employment according to the requirements of the applicable Pathways Program; and the option to convert the Participant to position that has promotion potential (i.e., a career ladder). The agreement is signed by the Participant, Supervisor, and HR Officer/Director or designee.

(15) **Presidential Management Fellow (PMF) or Fellow.** An individual appointed, at the GS-9, GS-11, or GS-12 level (or equivalent), in the excepted service under 5 CFR 213.3402(c).

(16) **Program Participant or Pathways Participant.** An individual appointed under a Pathways Program.

(17) **Qualifying Educational Institution.** A public high school whose curriculum has been approved by a State or local governing body, a private school that provides secondary education as determined under State law, or a homeschool that is allowed to operate in a State; and any of the following educational institutions or curricula that have been accredited by an accrediting body recognized by the Secretary of the U.S. Department of Education: a technical or vocational school; a 2-year or 4-year college or university; a graduate or professional school (e.g., law school, medical school); or a post-secondary homeschool curriculum.

(18) **Quality Ranking Factors.** Knowledge, skills, and abilities (KSAs) or competencies that could be expected to enhance significantly the performance in a position, but are not essential for satisfactory performance. Applicants who possess such knowledge, skills, and abilities or competencies may be ranked above those who do not, but no one may be rated ineligible solely for failure to possess such KSAs or competencies. Quality ranking factors must be based on the work of the position and must comply with the OPM Operating Manual for Qualification Standards for General Schedule Positions.

(19) **Selective Factor or Selective Placement Factor.** Knowledge, skills, abilities, or special qualifications that are in addition to the minimum requirements in a qualification standard, but are determined to be essential to perform the duties and responsibilities of a particular position. Applicants who do not meet a selective factor are ineligible for further consideration. Selective Factors must be based on the work of the position and must comply with the OPM Operating Manual for Qualification Standards for General Schedule Positions.

(20) **Student.** An individual accepted for enrollment or enrolled and seeking a degree (diploma, certificate, etc.) in a qualifying educational institution, on a full or half-time basis (as defined by the institution in which the student is enrolled), including awardees of the Harry S. Truman Foundation Scholarship Program under Public Law 93-842. Students need not be in actual physical attendance (i.e., taking online courses), so long as all other requirements are met. An individual who needs to complete less than the equivalent of half an academic/vocational or technical course-load immediately prior to graduating is still considered a student for purposes of this Program.
(21) **Third-party Internship Provider.** A non-Federal entity that contractually provides internship experiences to students that are comparable to the Pathway’s Internship Program.
5. EMPLOYMENT OF HEALTHCARE ADMINISTRATION RESIDENTS, INTERNS AND TRAINEES. To be used with 5 CFR 213.3402(a), 5 CFR, part 362, and Appendix II-N. When using the Pathways Programs authorities to appoint healthcare administration residents, interns and trainees, HR Offices must consider all eligible and qualifying individuals and must not screen candidates who are not pursuing or have completed education from a preferred program accrediting body.

   a. Healthcare Administration Residents.

      (1) Healthcare administration residents are graduate students pursuing a master's degree in a program approved by the Commission on Accreditation of Healthcare Management Education (CAHME). Practical experience is for 1 year and is usually performed following the completion of 1 academic year of graduate study.

      (2) Residents will be appointed in the Pathways Internship Program under 5 CFR 213.3402(a). The Office of Personnel Management has authorized VA to employ residents for a period of 12 months as an exception to the requirements of 5 CFR, part 308.

      (3) Compensation for residents is locally established by facility Directors at appropriate levels within maximums prescribed by Federal civil service regulations and part II, chapter 2, paragraph 3 of VA Handbook 5007, Pay Administration.

      (4) Residents appointed under 5 CFR 213.3402(a) may be noncompetitively converted to term, career-conditional or career appointments, as appropriate, provided all requirements of 5 CFR 362.204 are met.

   b. Healthcare Administration Interns.

      (1) Healthcare administration interns are graduate students pursuing a master's degree in a program approved by the CAHME. Practical experience is typically available during the summer between 2 years of graduate level academic study and is for a period of 2 to 4 months.

      (2) Interns whose work assignments are anticipated to equal or exceed 640 hours necessary for noncompetitive conversion must be appointed [in an indefinite appointment (i.e., without time limitation) in the Pathways Internship Program under 5 CFR 213.3402(a). Those interns whose work assignments are not anticipated to meet the 640 hours requirement in the Internship Program will be appointed under the authority of 38 U.S.C. 7405.

      (3) Compensation for interns appointed under 5 CFR 213.3402(a) is locally established by facility Directors at appropriate levels within maximums prescribed by Federal civil service regulations and part II, chapter 2, paragraph 3 of VA Handbook 5007, Pay Administration. Compensation for those interns who are appointed under the authority of 38 U.S.C. 7405 will also be in accordance with the provisions of VA Handbook 5007, Pay Administration.

      (4) Interns appointed under 5 CFR 213.3402(a) may be noncompetitively converted to term, career-conditional or career appointments, as appropriate, provided all requirements of 5 CFR 362.204 are met.
c. Healthcare Administration Trainees.

(1) Healthcare administration trainees are undergraduate students pursuing a bachelor's degree in healthcare administration or a closely related field. Practical experience is usually from 2 to 4 months during the summer between the junior and senior years.

(2) Trainees whose work assignments are anticipated to equal or exceed 640 hours must be appointed in the Pathways Internship Program under 5 CFR 213.3402(a)]. Appointment will be at the GS-3 grade level if the trainee has completed 1 year of college and at the GS-4 grade level if the trainee has completed 2 years of college. Those trainees whose work assignments are not anticipated to meet the 640 hours requirement necessary in the Pathways Internship Program under 5 CFR 213.3402(a) for noncompetitive conversion to term, career-conditional or career appointments, as appropriate, will be appointed under 38 U.S.C. 7405.

(3) Compensation for trainees appointed under 5 CFR 213.3402(a) will be at the pay levels for GS-3 or GS-4, as appropriate. Compensation for those trainees who are appointed under authority of 38 U.S.C. 7405 will be in accordance with the provisions of VA Handbook 5007, Pay Administration.

(4) Trainees appointed under in the Pathways Internship Program under 5 CFR 213.3402(a) may be noncompetitively converted to term, career-conditional or career appointments, as appropriate, provided all requirements of 5 CFR 362.204 are met.

d. Conversion to Term, Career-Conditional and Career Appointments. Students meeting all the requirements specified in the Pathways Internship Program under 5 CFR 213.3402(a) may be converted to term, career-conditional or career positions, as appropriate, at the employing medical facility. Those appointed under the authority of 38 U.S.C. 7405 are not eligible for noncompetitive appointment to the competitive service under 5 CFR 362.204. If there is no appropriate position available locally for a student who is considered a good candidate for conversion, the medical facility or the student may check lists of vacancies published by VA Headquarters and contact other VA installations at which the student is interested in being employed.]
6. OTHER EXCEPTED SERVICE APPOINTMENTS.

a. General.

(1) This paragraph contains the requirements and procedures to be followed in making appointments and position changes to positions through grade GS-15 or equivalent in the excepted civil service under 5 CFR, part 302, other than those covered by paragraphs 1 and 2 of this section. It does not apply to excepted service employment in the Veterans Health Administration under 38 U.S.C. ch. 73 and 74, or to employment in the Veterans Canteen Service under 38 U.S.C. ch. 78.

(2) The requirements of 5 CFR, part 302, and the provisions of this paragraph do not apply to the examination and selection of attorneys in VA. Administration and staff office heads, including the Chairman, Board of Veterans’ Appeals, have complete responsibility for accepting attorney applications, evaluating relative qualifications of these candidates, according [V]eterans’ preference as appropriate, and except for positions centralized to the Secretary, making final selections.

(3) The Office of Personnel Management excepts positions from the competitive civil service under authority of 5 CFR 213.101. These positions are identified as Schedule A, Schedule B, [Schedule C or Schedule D]. Those excepted positions which are common to more than one agency are listed in 5 CFR, part 213. Those specific to one agency are published annually in the Federal Register under 5 CFR, part 213.

(4) Except where specific VA limitations are otherwise imposed, appointing officers may use any applicable Schedule A or Schedule B authority listed in 5 CFR, part 213 to meet employment needs.

(5) Schedule C positions in VA are of a policy-determining or confidential character and may be made without an OPM or other civil service examination. Schedule C positions are normally located in Central Office. Therefore, the processing of appointments under Schedule C, section 213.3301 or 213.3302 authority is the responsibility of the Central Office Human Resources Service [(05B)].

b. Qualification Standards. Except where the qualification standards of the Office of Personnel Management are appropriate, e.g., Handbook X-118C for purchase and hire employees, necessary VA qualification standards for positions in the excepted service will be developed by the Office of Human Resources Management [and Labor Relations] (05) in conjunction with interested department, administration and staff officials. Appointing officers wishing to modify or waive requirements of a qualification standard will be guided by the policies and principles stated in section D of this chapter.

c. Accepting Applications

(1) All applications solicited and accepted for employment consideration for positions in the excepted civil service must be complete, dated, and signed by the applicant. Applications for chaplain positions are to be forwarded through channels to the Director, Chaplain Service. All other official applications accepted for employment will be maintained by VA Boards of Excepted Service Examiners in applicant supply files.
(2) Verification of qualifications and suitability will be made as described in this handbook and 5 CFR, part 731. Where verification or subsequent investigation following employment discloses disqualifying factors to such a degree that a satisfactory explanation or resolution is not possible, the responsible official may disqualify the applicant, or separate the employee under appropriate trial period or adverse action procedures. The disqualifying factors may be:

(a) Dismissal from employment for delinquency or misconduct;

(b) Criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct;

(c) Intentional false statement or deception or fraud in examination or appointment;

(d) Habitual use of intoxicating beverages to excess;

(e) Reasonable doubt as to the loyalty of the person involved to the Government of the United States.

(f) Any legal or other disqualification which makes the individual unfit for service; or

(g) Lack of United States citizenship.

(3) Applicants will be contacted at approximately yearly intervals to determine whether they are still available and wish continued consideration for employment. Where the applicant fails to reply or declines further consideration, the application will be filed in the inactive section of the applicant supply file and then be disposed of in accordance with VA records disposal procedures.

d. **Examining for Excepted Positions**

(1) **VA Boards of Excepted Service Examiners.** Examination and certification of applicants for excepted service positions will be accomplished by VA Boards of Excepted Service Examiners.
(a) **Field Facilities.** Field facility HRM offices having positions to fill in the excepted service, except positions centralized for appointment and placement purposes to the Secretary or an administration or staff office head, will establish a Board. The Human Resources Management Officer is designated as the chairperson of the Board, with an appropriate staff employee, grade GS-7 or above, as the executive secretary. When the staff employee does not meet this requirement, the Human Resources Management Officer will serve both as the chairperson and the executive secretary. Each organizational element having excepted positions for which the Board examines will be represented on the Board by one or more examining members. The members will serve on examining panels when called for such service by the chairperson. While assigned to rating duties, the members will report to the chairperson.

(b) **Central Office.** The Director, Chaplain Service, or designee will establish a Board which examines and certifies candidates for chaplain positions in accordance with the provisions of this paragraph, 5 CFR 6.3 and part 302. The Deputy Assistant Secretary (DAS)/HRM will establish a Board to examine and certify eligibles to Central Office positions and to excepted positions centralized for employment purposes to the Secretary or an administration or staff office head. The DAS/HRM will designate the chairperson of the Board and he/she in turn will designate the executive secretary. Each organizational element having excepted positions for which the Board examines will be represented on the Board by one or more examining members. The members will serve on examining panels, as needed, when called for such service by the chairperson. While assigned to rating duties, the members will report to the chairperson.

(2) **Rating Applications.** Applicants will be rated against the appropriate qualification standard and assigned numerical ratings on a scale of 100, with 70 the minimum eligible rating. Such ratings will be augmented by 10 or 5 points, as appropriate, for applicants entitled to [Veterans’] preference. When the number of applicants, following the “rule of three” described in subparagraph (3) below, does not exceed the number of positions to be filled, a rating of “eligible” may be assigned in lieu of a numerical rating. In either case, a notice of the rating must be given to the applicant upon request.

[NOTE: See Appendix II-N for specific procedures for rating certain Pathways Programs positions.]

(3) **Certifying Eligibles.** In response to a request (SF 39) from the appointing officer, eligible candidates will be certified (VA Form 4681) by the Board for employment consideration. Generally, the Board will refer sufficient available candidates to permit selection consideration within the “rule of three.” The preference order for referring candidates for professional and scientific positions at GS-9 and higher will follow the pattern described in 5 CFR 302, subpart C. For other positions, either Order A, B, or C described in the above CFR reference, may be selected to refer candidates. Once the order has been selected, it will be consistently used to certify candidates for employment considerations.

NOTE: The VA Form 4681 is superseded by the referral format in USA Staffing, when USA Staffing is used.

(4) **Records.** Applications, examination records, register cards, and records of certification will be maintained in Board files in such a manner that inspection by VA or Office of Personnel Management representatives is possible. VA Form 3959, Application Roster Sheet, may be used in lieu of register cards to show the status of and actions taken on applications. For USA Staffing recruitment, system records are sufficient to meet the requirement for documentation. Job analysis records can be imported directly into USA Staffing.

II-40
e. Modification of Examining Procedure

(1) Schedule C Positions. Modification of the examining procedure above may be made for qualified candidates for Schedule C positions. Such candidates may be given an “eligible” rating by the appointing officer, or representative, and be selected for appointment without regard to the “rule of three.” The
principles of [V]eteran preference must be followed, as far as administratively feasible. At the discretion of the Secretary, the evaluation and rating process resulting in a numerical rating by the Board may be applied in filling Schedule C positions.

(2) [Schedule D Positions. Modifications to examining procedures for Pathways Programs positions are outlined in Appendix II-N of this handbook.]

(3) Former Federal Employee Applicants. Any [V]eteran preference applicant meeting the qualification requirements of the excepted position may be given an “eligible” rating by the appointing officer, or representative, provided the applicant had prior civilian service in the executive branch of the Federal Government. Such an applicant may be referred by the appointing officer and be selected without regard to the “rule of three.”

(4) Purchase and Hire Employees. Modification of the examining procedure above may be made for purchase and hire employees when the number of qualified applicants does not exceed the number of jobs to be filled. In this case the applicants may be given an “eligible” rating by the appointing officer, or representative, and be considered for appointment in order of their preference, i.e., 10 percent or more compensably service-connected disabled [V]eterans, other 10-point preference eligibles, 5-point preference eligibles, and non-preference eligibles, in keeping with 5 CFR 302.304(b)(5)(i).

f. Reasons for Nonselection. When requesting passover of a preference eligible with a compensable service-connected disability of 30 percent or more in favor of lower ranking preference or non-preference eligibles, appointing officers must follow the procedures contained in 5 U.S.C. 3312 and 3318; and, 5 CFR 332.406 and 339.306(b). The Office of Personnel Management (OPM) retains exclusive authority to approve a request to pass over a preference eligible with a compensable service-connected disability of 30 percent or more. HR Offices must send these pass over requests to OPM for adjudication. Requests must include a completed SF 62 form and all required supporting documentation.

g. Placement Follow-up. A placement follow-up will be used to evaluate the appropriateness of specific placement and employment actions in excepted service positions. Follow-ups will be made for all initial appointments and significant position changes. After the employee has completed at least 90 days in the assignment, a human resources management office staff member will forward a placement follow-up form to the supervisor to obtain information about the employee’s performance, his/her adjustment to the job, and any training or other needs or outstanding work that warrants attention for further placement consideration. Where deficiencies are reported, the employee should also be interviewed to further explore the courses of action that may be taken to overcome them. The follow-up form, VA Form 5-97, Notice of Pending Personnel Action, will be annotated to show that the follow-up was made, and only significant results will be recorded. These procedures are minimum requirements and where possible, extension of the follow-up interview for all placement actions is encouraged. For example, a follow-up of all promotions can be a valuable aid in assessing the results of the facility’s promotion plan and the validity of the evaluation and selection process. Also, separate placement follow-ups with employees can be a valuable source of placement information as well as being an effective employee relations technique.
h. **Trial Period Certification.** Excepted service employees appointed to positions lasting more than 1 year (indefinite) are required to serve a trial period of 1 year. The trial period is a most important part of the examining procedure. This is the period when new employees are tested on the job for qualities and characteristics essential for satisfactory performance. To meet this responsibility supervisors must:

1. Establish reasonable standards of performance and conduct for trial period employees to meet.
2. Inform trial period employees about the standards and requirements.
3. Help trial period employees to meet standards through necessary training and guidance.
(4) Promptly take steps to terminate trial period employees who, after a fair and reasonable trial, do not meet and keep the standards.

(5) Make the formal 10-month evaluation of each trial period employee a realistic and well-reasoned appraisal and base each recommendation for retention on a positive determination that the trial period employee has lived up to expectations and can reasonably be expected to continue to meet acceptable standards. [ ]

i. VA Single-Agency Schedule A, B, and C Excepted Appointment Authorities. [OPM publishes notice of the following VA-specific Schedule A, B, and C excepted appointment authorities annually in the Federal Register instead of title 5 of the Code of Federal Regulations].

(1) Schedule A - Section 213.3127

(a) Purchase and hire [(P&H)] appointees are temporary workers in trades, crafts, or manual labor occupations [supporting construction or major repair projects. P&H appointments are subject to service limitations in 5 CFR, part 213. Servicing Human Resources (HR) offices must consider the use of competitive procedures when filling positions that do not meet the definition a temporary appointment as described in 5 CFR 213.104(a)(1). To ensure appropriate use of the P&H appointment authority, the following procedures apply:

1. Recruit to fill P&H vacancies only when the preferred method of contracting services to a private sector construction firm is impractical or disruptive to patient care activities. Announce P&H vacancies in a manner expected to yield a sufficient number of qualified candidates consistent with provisions in part I, chapter 1, paragraph 4 of this handbook.

2. P&H appointments are subject to Veterans preference and excepted service appointment procedures referenced in 5 CFR, part 302 and part II, chapter 2, section C, paragraphs 6e(3) and 6f of this handbook.

3. Use the Schedule A, section 213.3127(a)(1) appointment authority to fill P&H vacancies not-to-exceed (NTE) a prescribed period of up to one year (consistent with the duration of the project).

4. When requesting to fill a P&H position via initial recruitment action or extension of appointment, selecting officials must submit written justification to the servicing HR office certifying the temporary nature of the work required for the appointment, a description of the work/project, its objectives and a definitive timeframe/remaining timeframe to complete the required work. The related SF-52 must identify the project, worksite, and duration of each appointment.

5. The remark codes on the appointment SF-50 must identify the project, the designated work site, and the start and completion date. Servicing HR offices must monitor NTE dates via automated payroll system reminders to prevent exceeding the prescribed NTE dates. HR offices must also terminate appointments upon expiration or at the completion of each project, whichever occurs first.
6. P&H appointees must only perform work on an intermittent (when-actually-employed) basis under the project for which they are hired. P&H appointees may not perform work on a current project beyond the expiration of their appointment or move non-competitively from one project to another under any circumstances.

7. Consistent with 5 CFR 213.104(b), servicing HR officers may renew P&H appointments for the time required to complete any unfinished project work. This renewal is NTE one additional year. When necessary, the selecting official may submit a written request for extension to the servicing HR Officer for review and approval/disapproval. The extension request must be submitted at least 30 days prior to the appointment expiration date and should contain the documents described in part II, chapter 2, paragraph 6i(1)(a)4 of this handbook. Restrictions on refilling positions under temporary appointments in 5 CFR 213.104(b)(2) apply.

NOTE: In accordance with 5 CFR 213.104(b)(3)(i), service limits and restrictions on refilling P&H positions do not apply if employment in the same or successor position totals less than 6 months (1,040 hours), excluding overtime, in a service year. The service year is the calendar year that begins on the date of the employee’s initial appointment. Should employment in the position be 6 months or more in any service year, the general limits set out in 5 CFR 213.104 would apply to subsequent extensions or reappointments. An individual may be employed for training purposes up to 120 days following the initial appointment and up to 2 weeks a year thereafter without regard to the service year limitation.

8. Notwithstanding provisions in 5 CFR 213.104(b)(3)(iii), VA-specific P&H appointments are not renewable beyond 2 years.

9. P&H appointees receive fringe benefits under the local Davis-Bacon wage schedule. In accordance with OPM benefits guidance, employees who work on an intermittent basis are typically ineligible for Federal benefits due to their irregular work schedules. Refer to the OPM website and VA Handbook 5007, part VIII, chapter 13 for guidance on benefits, wage rates and compensation entitlements available to P&H appointees.

10. Should any change in work schedule occur, process applicable personnel action to reflect change from intermittent to part-time or full-time employment and ensure that employees receive applicable service credit and notice of benefits eligibility criteria.]

(b) Not to exceed 400 positions of rehabilitation counselors GS-3 through GS-11, in Alcoholism Treatment Units and Drug Dependence Treatment Centers, when filled by former patients. These employees will be appointed under Schedule A, section 213.3127(b).

1. Employees appointed under this authority must be former VA or non-VA drug dependent or alcoholic patients who have been rehabilitated through a prescribed treatment program. Former patients, including those that are continuing to receive outpatient maintenance therapy, may be appointed under this authority. In-hospital patients will not be appointed to these positions.

2. Prior approval by VA Central Office must be obtained before any appointment commitment is made. The application, showing pertinent experience, the name and location of the applicant’s rehabilitation program, and letters or statements attesting to candidate’s rehabilitation will be forwarded to the Assistant
Deputy Under Secretary for Health [for Workforce Services (10A2)] for approval. Once the appointment has been approved, these letters and/or statements will be disposed of in accordance with VHA Records Control Schedule 10-1. Facility directors will ensure that copies of letters or statements concerning an applicant’s drug or alcohol dependence rehabilitation are not retained in personnel files nor made a part of the employee’s medical records.

3. Applicants for Rehabilitation Technician positions must meet the qualification requirements contained in the VA qualification standard for Rehabilitation Technician, GS-181.

4. This Schedule A authority may be used in addition to, rather than in lieu of, the regular competitive civil service employment procedures. Continuing efforts should be made to convert employees holding excepted appointments to competitive status when warranted by their performance. This will give these employees the greater benefits of competitive status such as reinstatement and transfer rights and eligibility for in-service placement to other lines of work.
5. The number of Rehabilitation Technicians employed under Schedule A authority will be controlled to ensure that the OPM employee limitation is not exceeded. To accomplish this, Directors will notify the Assistant Deputy Under Secretary for Health (10N/05[ ]) of each appointment, giving the following information:

a. Name of employee.

b. Position title, series, and grade.

c. Date of appointment.

d. Veteran preference (5 or 10 point) and whether the employee is a Vietnam era veteran (military service between Aug. 5, 1964, and May 7, 1975).

e. Agency (VA or non-VA) in which employee completed rehabilitation treatment.

6. Directors will likewise notify Central Office whenever a Rehabilitation Technician leaves excepted service (including conversion to competitive status), giving:

a. Name of employee.

b. Date and reason for leaving.

(2) **Schedule B - Section 213.3227(a).** Not to exceed 400 principal investigatory, and 400 scientific, professional and technical positions at grade GS-11 and above in the medical research program. Although the authority does not require a time-limitation, the authority remains project oriented. All appointments should be made in association with a specific research project. Thus, appointments should be made with not-to-exceed dates consistent with the funding time frames, and extended if necessary to complete a project.

(a) **Appointments**

1. The Schedule B authority is not intended to replace other available appointment authorities. One example of an appropriate use of the authority would be the appointment of a new principal investigator just completing Ph.D. requirements and having no experience as the lead investigator in a major medical research project.

2. VHA facilities using this authority for scientific, professional and technical positions at GS-11 and above, and principal investigator positions at the GS-12 level are required to follow 5 CFR, part 302 and VA Excepted Board procedures in paragraph [6]d [ ] in filling these positions.

3. VHA facilities using this authority for principal investigator positions at GS-13 and above are **not** required to follow 5 CFR, part 302 and VA Excepted Board procedures. Veteran preference, however, must still be applied, to the extent administratively feasible, in filling these positions.
4. Applicants for these positions must meet the appropriate VA or OPM Operating Manual - Qualification Standards for General Schedule Positions qualification requirements for the specific position to which appointed.

5. The citizenship requirements contained in paragraph 5g of section A of this chapter, are applicable.

(b) Use of Other Appointing Authorities

1. Many research positions are continuing in nature and are filled by career-conditional or career appointment. The career-conditional or career appointment should be used whenever it is appropriate.

2. Projects which are expected to last no more than 4 years may continue to be staffed through the use of the 4-year term appointment authority.

(c) Employee Rights, Privileges and Benefits

1. Position Changes. Employees may be demoted, promoted or reassigned to positions under the same excepted authority.

2. RIF (Reduction in Force). In instances where a project is terminated prior to the time the appointment of Schedule B employees expired, RIF procedures must be used to remove such employees. Schedule B employees are in group III for RIF. As excepted service employees, they have no assignment rights when released from their competitive levels.

3. Disciplinary and Adverse Actions. Employees may have entitlements to due process and certain appeal or grievance rights, depending on the length of current continuous service, veterans preference and bargaining unit status. When contemplating disciplinary or adverse actions, the provisions of VA Handbook 5021, Employee/Management Relations, parts I and IV, as well as the terms of any applicable collective bargaining agreement, should be reviewed.

4. Leave. Excepted employees are covered by the same time and leave regulations applicable to employees in the competitive service.

5. Retirement. Generally, excepted employees whose appointments are for more than 1 year are covered by the OPM retirement system. Excepted employees whose appointments are for 1 year or less are generally covered under Social Security. Exclusions in regulations or law will be observed, e.g., any applicable to certain visa categories, such as F and J visas.

6. Life Insurance and Health Benefits. Excepted employees whose appointments are for more than 1 year are entitled to life insurance and health benefits.

(3) Schedule C - Sections 213.3301 and 2. Schedule C positions are of a confidential or policy determining character and may be made without an OPM examination. Schedule C positions are normally located in Central Office. Therefore, the processing of Schedule C appointments is the responsibility of Central Office Human Resources Service.
SECTION D. QUALIFICATION STANDARDS

1. SCOPE. This section supplements and is to be used in conjunction with related parts of the 5 CFR, e.g., 338, and 339, and the instructions contained in the Office of Personnel Management (OPM) Operating Manual for Qualification Standards for General Schedule Positions and OPM’s X-118C Handbook. The section provides VA policies and procedures for the development and use of qualification standards and examining guides for VA positions except:

   b. Positions filled by WOC (without compensation) employees. (See section A, paragraph 4c, this chapter.)

   c. Positions filled by physicians, dentists, optometrists, podiatrists, chiropractors, nurses, nurse anesthetists, physician assistants, expanded function dental auxiliaries, [and all Hybrid Title 38 occupations] under 38 U.S.C., chapters 73 and 74.

   d. Positions filled by purchase and hire employees under VA’s single-agency Schedule A appointment authority. (See paras. 5e(3) and 5i(1)(a) of section C, this chapter.) Qualification standards of comparable positions, however, will apply. (See OPM X-118C Handbook.)

2. POLICY

   a. Qualification standards establish minimum requirements which are predictive of successful performance. These standards will be applied uniformly for like positions throughout VA, unless labor market conditions or atypical positions within an occupational group or other meritorious reasons warrant modifications or waivers of the standard to meet management objectives. Unless stated otherwise in the standard or other applicable instruction, the standards for noncompetitive actions will be the same as those for competitive appointments.

   b. In the interest of sound human resources management, VA standards for positions not requiring formal technical or professional education or training will permit latitude for rotating and shifting employees in career development programs and other training and placement plans. Where feasible, standards will be developed or appropriately changed to permit the employment of persons who are economically disadvantaged or for persons with disabilities.

   c. The application of qualification standards in VA is an integral part of the facility’s overall human resources program. In that context, it includes, unless stated otherwise in an individual standard, application of those related policies and procedures in the following parts of the Code of Federal Regulations:

      (1) 5 CFR, part 337, “Examining System,” including the provision for giving appropriate credit to applicants for experience gained in religious, civic, welfare, service, and organizational activities, regardless of whether pay was received therefor.
(2) 5 CFR, part 412, “Executive, Management, and Supervisory Development.”

(4) 5 CFR, part 930, “Programs for Specific Positions and Examinations (Miscellaneous).”

3. GENERAL GUIDELINES

a. **Definition.** As used in this section, a qualification standard is a statement of the minimum requirements that an individual must meet to be qualified for appointment or assignment to a position. These requirements include such considerations as experience, education, training, personal characteristics, physical ability, minimum age, citizenship, and licensure or certification. In a broad sense, a qualification standard includes the examining guides, rating schedules, rating scales and other standardized measuring devices and techniques through which the qualifications of candidates are evaluated. A qualification standard does not include the more general requirements such as restrictions on employment of relatives, security, or time-in-grade requirements.

b. **Minimum Standards.** Qualification standards issued by OPM and VA establish minimum requirements. They usually cover an entire occupation and apply throughout the Federal Government or VA. The title, series codes, and grades stated in the standards serve the dual purpose of identifying the standard and its scope in terms of position coverage. Some standards, usually those concerning more than one class or series, may have a general title that is descriptive of all the positions covered.

c. **Interpreting Standards.** The determination as to whether an individual meets qualification requirements is made through an analysis of personal data or experience records, as well as interviews, approved tests (oral, written, or performance), and qualification investigations. In applying VA and OPM standards, VA appointing and examining officials are expected to make decisions on the interpretation of standards. When such matters cannot be reconciled, interpretations or decisions will be obtained from the servicing OPM office or from the Deputy Assistant Secretary for [O]HRM[&LR] (05), as appropriate.

d. **Selective Certification (5 CFR 332.403).** These procedures may be used as appropriate.

e. **Selective Placement Factors (5 CFR, part 335).** These factors may be used in applying qualification standards. See OPM Operating Manual - Qualification Standards for General Schedule Positions, Section II, General Policies and Instructions, E. Application of Qualification Standards, 6. Using Selective Factors.

f. **Relationship of “Classification Qualification Statements” to Qualification Standards (OPM Operating Manual – Qualification Standards for General Schedule Positions).** The minimum nature of qualification standards distinguishes them from the “qualification statements” contained in classification or wage position evaluation standards. The latter often describe levels of skills or abilities which are normally acquired through performance in a position.
g. Progressively Responsible Experience (OPM Operating Manual - Qualification Standards for General Schedule Positions, Section II, General Policies and Instructions, E. Application of Qualification Standards, 3. Experience Requirements). In qualification standards requiring progressively responsible experience, where that term is not specifically defined, candidates must show pertinent experience of increasing importance and responsibility, at successively higher levels, with a substantial portion having been performed at a level comparable to the grade normally below the grade in the line of work for which they are candidates.

h. Training and Promotion Agreements (5 CFR 410.307). Special training agreements negotiated with OPM are, in effect, changes in qualification standards. These are, by nature of the agreement, conditional and limited in nature, but constitute an approved exception to the normal application of a standard.

(1) Agreement for Training-Promotion of Service Disabled Veterans

(a) A master agreement has been negotiated with OPM which delegates to VA the authority to develop and implement training plans that result in successful training being used as a substitute for normal qualifications, including time-in-grade requirements. For unpaid training, when noncompetitive appointment to a position or class of positions is the goal of the training, the initial training plan will be reviewed in Central Office (05[ ]) prior to approval by the field facility Director. Field facilities will forward a copy of the locally approved training plan to their servicing OPM service center.

(b) VBA rehabilitation and education staff may determine that training is necessary for disabled veterans who technically meet requirements of the qualification standard. Such cases should be processed in the same manner as others with a detailed justification of the training submitted for review with the training plan. Detailed justification should be developed by the rehabilitation staff.

(c) For positions subject to OPM qualification standards, 1 month of intensive, carefully planned training may be considered the equivalent of 2 months of experience when it has been determined that the training halves the time usually required to qualify for the position. Requests for such modification of OPM qualification standards should be submitted through channels to the DAS for [O]HRM&LR (05[ ]) for approval. Similarly, for positions subject to VA qualification standards, this determination may be made by VA officials authorized to modify VA qualification standards. Local approval of modifications permitting experience credit for positions grade 5 and below should be documented in writing and a copy of the approved modification forwarded to Central Office (see paragraph 8c of this chapter).

(2) Training Plan Qualification Modification Requests. Requests for modification of OPM and VA qualification standards which must be approved in VA Central Office should be accompanied by a copy of the training plan, VA Form 22-1905a (Training Program and Progress Record), OF 612 (Optional Application for Federal Employment) or resume, and a copy of the VA rehabilitation and education approval, VA Form 28-8871 (Certification of Eligibility and Feasibility).

i. Physical Standards (see 5 CFR, part 339 and VA Handbook 5019). The Office of Personnel Management is responsible for establishing physical requirements, including mental and emotional stability, for all positions in the competitive service. These requirements are issued as a part of the
qualifications standards, including those issued by VA. (See also appendices II-F[ ].) A general physical requirements paragraph applies to all General Schedule qualification standards covering occupations in which the positions typically involve sedentary, light, or moderate duties. A more detailed physical requirements paragraph applies to qualification standards for occupations in which the positions typically involve arduous or hazardous duties. Excepted civil service qualification standards established by appointing officers will be governed by these same physical requirements paragraphs, as appropriate.

4. VA QUALIFICATION STANDARDS

a. General. VA develops its own qualification standards or approves the use of OPM qualification standards for the following:

   (1) Classified positions through grade GS-15 excepted from the competitive service under 5 CFR, part 213, Schedule A or C and 5 CFR, part 6 (Rule VI).

   (2) Medical support positions in the Veterans Health Administration as authorized in 38 U.S.C. 7402. As a matter of general policy, VA will not use this authority for clerical, administrative, crafts and unskilled positions except where the needs of VA clearly require different standards from those issued by OPM for similar positions. This policy recognizes the desirability of having the same requirements for like positions in all Federal facilities.

b. Authority to Approve VA Standards. The Deputy Assistant Secretary for [O]HRM[&LR] is authorized to approve for the Secretary qualification standards and examining guides which are established within the Department. OPM will be furnished copies when they relate to positions in the competitive civil service.

c. Issuance of Standards. VA qualification standards are usually issued in an appendix to this part. They are also issued by OPM in the Operating Manual - Qualification Standards for General Schedule Positions, noted as approved for use in the Veterans Health Administration or as a VA Single Agency Qualification Standard, when applicable.

d. Maintenance of Standards. VA qualification standards (appendices II-F[ ]) may be maintained in occupational series order with this handbook, and/or they may be interfiled in occupational series order in the OPM Operating Manual - Qualification Standards for General Schedule Positions.

e. Selective Certification. Through agreement with OPM, VA standards will be used to request certification from any Federal examining office. Any misunderstandings concerning this agreement are to be reported, through channels, to the Deputy Assistant Secretary for [O]HRM&LR (05[ ]).

5. ENGLISH LANGUAGE PROFICIENCY FOR VHA POSITIONS

a. [No person will be appointed under authority of 38 U.S.C. chapter 73 or 74, to serve in a direct patient-care capacity in VHA who is not proficient in written and spoken English].
b. Provisions of appendix II-I of chapter 3, this part will be used, as applicable, to determine that title 5 employees in direct patient-care positions meet the English language proficiency requirements of 38 U.S.C. 7402(d).

c. When vacancies for direct patient-care positions are announced (including promotion opportunities and open-continuous announcements), the announcement, citing 38 U.S.C. 7402(d), must include the English language proficiency requirement as a selective factor.

d. When appointing officials determine that eligibles on a Federal civil service certificate do not possess the required proficiency, they may object to those eligibles citing 38 U.S.C. 7402(d). Similarly, when candidates who are not proficient in English have previously been certified by OPM or a VA or other Federal delegated examining unit, the appointing official may request selective certification based on English proficiency.

6. OPM QUALIFICATION STANDARDS

a. **Issuance of Standards.** OPM develops and issues qualification standards in its Operating Manual - Qualification Standards for General Schedule Positions and Handbook X-118-C. These are supplemented by examining guides for (1) the preparation of examination announcements and (2) the development of rating schedules and procedures. OPM may amend OPM qualification standards for the positions involved for both competitive and noncompetitive actions. Facilities may do so only to the extent provided in the OPM Operating Manual’s section II, General Policies and Instructions.

b. **Exceptions to OPM Qualification Standards.** Facility directors and the Director, Central Office Human Resources Service, may negotiate with and obtain the prior approval of the servicing OPM office for exceptions to OPM qualification standards, except for the positions below, which require the prior approval of the Under Secretary for Benefits:

   (1) All positions in adjudication functions of the Veterans Benefits Administration in the GS-101 and 996 series, grade 5 and above.

   (2) All Counseling Psychologist positions in the GS-180 series. Recommendations for these positions will be forwarded to the Deputy Assistant Secretary for [O]HRM&LR (05[ ]) through channels.

c. **Coordinating and Approving Standards.** The Deputy Assistant Secretary for [O]HRM[&LR] is responsible for coordinating all qualification standards matters within VA and with other agencies. This includes coordinating the approval of standards to be issued as Single Agency Qualification Standards and the adoption of OPM standards for use in the Veterans Health Administration.

7. DEVELOPING QUALIFICATION STANDARDS

a. **General.** Qualification standards (VA or OPM) and examining guides will be developed by the Deputy Assistant Secretary for [O]HRM[&LR] in cooperation with interested administration, Central Office, and field facility officials. VA established standards and guides will be approved by the Deputy Assistant Secretary for [O]HRM[&LR], with proposed OPM standards and guides forwarded to OPM for necessary action.
b. **Field Facilities.** Field facilities, including the Central Office Human Resources Service, are encouraged to make recommendations for new or revised standards or examining guides to the Deputy Assistant Secretary for [O]HRM&LR (05[ ]) through channels. Submissions will follow the standards format of OPM’s Operating Manual - Qualifications Standards for General Schedule Positions or qualification standard appendices to this section. Explanatory background material, organizational and position coverage data, along with other pertinent supporting information will be included.

c. **Reviewing Proposed Qualification Standards.** From time to time, field facilities will be requested to review and comment on tentative drafts of VA as well as OPM qualification standards. The letter of transmittal will establish a due date for return of the comments. At times, arrangements will be made for OPM to send drafts directly to selected field facilities. When this occurs, field facilities will forward their comments to the Deputy Assistant Secretary for [O]HRM[&LR] (05), through channels, no later than the midpoint date between the receipt of the draft and its due date as established by OPM.

8. **MODIFICATION OF VA QUALIFICATION STANDARDS--GENERAL**

a. **Definition.** Modification of a VA qualification standard is the changing of the requirements of a standard used to evaluate the qualifications of all candidates for a position. A standard may be changed only in the absence of fully qualified eligibles for both competitive and noncompetitive actions, e.g., appointments, reassignments, and promotions.

b. **Effect on Later Actions.** When an action has been taken on a modification of a standard, employees will be considered as having met the full requirements of the position when determining eligibility for subsequent placement actions, unless the applicable standard or other instructions specifically exclude this. (OPM Operating Manual - Qualification Standards for General Schedule Positions, par. IIE8, Special Inservice Placement Provisions.)

c. **Documenting Modifications.** Modifications of VA qualification standards will be appropriately documented for the approving official and the record. The record will be supported by the following, as applicable:

(1) A summary of the recruitment and placement efforts made to locate qualified candidates.

(2) OF 612, SF 171 or comparable document or a summary of the pertinent qualifications of the candidate(s).

(3) A summary of how the candidate(s) fails to meet the standards.

(4) Recommendations for the proposed modification by appropriate operating officials including any implications which should be known by the approving official.

9. **MODIFICATION OF VA QUALIFICATION STANDARDS FOR COMPETITIVE EXAMINATIONS**
a. **Field Facilities**

(1) Facility directors and the Director, Central Office Human Resources Service, may make agreements with the servicing OPM office to modify *only* experience requirements of VA qualification standards for local examining purposes for noncentralized positions. If more than one VA facility is in the area to be serviced by an announcement or an established register, the agreement will be coordinated with all concerned facilities. The initiating facility will report such modifications, through channels, to the [OHRM&LR] (05[ ] and, if appropriate, include any specific recommendation for revision of the standard.

(2) Where modification of the training or education requirements of a standard is needed, or a centralized position is involved, the facility Director will forward his/her recommendation, through channels, to the [OHRM&LR] (05[ ]).

b. **Central Office.** The Deputy Assistant Secretary for [O]HRM&LR may make agreements with OPM to modify training and education requirements and to modify standards for which examinations are conducted on a centralized basis and coordinate such agreements for positions centralized to the Secretary or the [Under Secretaries].

10. **MODIFICATION OF VA QUALIFICATION STANDARDS FOR TEMPORARY EMPLOYMENT**

a. **General.** In the absence of qualified eligibles, modification of a VA standard for temporary employment (time-limited [ ]) is appropriate in accordance with the following criteria:

(1) Where reasonable positive staffing efforts have not located acceptable candidates who meet the qualification standard, modification of the length or type of experience, the amount of training, or education may be approved for temporary employment to enable the appointment of the candidate who most nearly meets the existing standard. Statutory or other requirements not shown above such as citizenship, licensure, and registration will not be modified.

(2) “Reasonable positive staffing efforts” means that thorough attempts have been made to locate fully qualified eligibles within the normal labor market area including VA, other agencies, appropriate registers, the applicant supply file, the local office of the Employment Service, and any other sources that are used in intensified recruitment.

(3) In determining whether to modify a standard, consideration must include the likelihood of the person meeting the requirements for career appointment during his/her employment under the temporary appointment.

b. **Field Facilities**

(1) Facility directors and the Director, Central Office Human Resources Service, may modify *only* experience requirements of a VA qualification standard for positions at their facility, except those centralized to the administration or to the Secretary. The modified standard is applicable to all like positions at the location and is to be uniformly applied in all actions affecting the positions involved for
the duration of the circumstances which justify the modification. The initiating facility will report such modifications, through channels, to the Deputy Assistant Secretary for [O]HRM&LR (05[ ]).

(2) Where modification of the education or training requirements of a standard is needed, or a centralized position is involved, the facility Director will forward his/her recommendation, through channels, to the [OHRM&LR] (05[ ]).

11. MODIFICATION OF VA QUALIFICATION STANDARDS FOR NONCOMPETITIVE ACTIONS

a. **Scope.** Certain requirements of VA qualification standards may be modified in noncompetitive actions as explained below. Those requirements which are prescribed by statute, e.g., the licensing, degree, and registration requirements of 38 U.S.C. 7402, however, will not be modified.

b. **Criteria.** Among the criteria which may form the basis for modifying a standard are:

   (1) The absence of acceptable candidates who meet the standard. This contemplates that “reasonable positive staffing efforts” have been made and that the candidates for whom the modification is proposed represent those prospects who most nearly meet the qualification standard, in the judgment of the appointing officer concerned.

   (2) Availability of candidates whose type or degree of qualification would probably have been included in the standard had they been considered when the standard was developed. In this instance, action will concurrently be initiated to recommend revision of the standard.

   (3) Adequate consideration could not otherwise be given employees in terms of local merit promotion, placement, or employee development programs, in which valid evaluation and selection techniques are used.

c. **Approving Modifications (Statutory Requirements Excluded)**

   (1) Facility [D]irectors and the Director, Central Office Human Resources Service, may modify only experience requirements of a VA qualification standard for noncompetitive actions. This authority is limited to noncentralized General Schedule positions GS-5 and below. For modification of the experience requirements for positions GS-6 and above, or when modification of the education or training requirements is needed, or a centralized position is involved, the facility Director will forward his/her recommendation, through channels, to the Deputy Assistant Secretary for [O]HRM&LR (05[ ]). A notice of each approved modification will similarly be forwarded.

   (2) [Under Secretaries], Veterans Integrated Service Network (VISN) Directors, [ ] Deputy Under Secretary[ ] for [Health for Operations and Management,] or VAMC Directors, after considering the recommendation of the Program Director, will approve modification of length of experience, training, and education requirements for their field positions except those delegated in [subparagraph] (1) [ ] and those centralized to the Secretary.
(3) The Deputy Assistant Secretary for [O]HRM[& LR] will approve modifications of qualification requirements for Central Office positions except those delegated in subparagraph (1) [ ] and those centralized to the Secretary.

(4) The Secretary or his/her designee approves modifications of qualification requirements for positions centralized to him/her.

12. WAIVER OF VA QUALIFICATION STANDARDS

a. **General.** A waiver is an exception to the qualification requirements of a standard applied to an individual in a noncompetitive action.

   (1) A waiver may be made when it can be justified as the most appropriate means of filling the position. This means that consideration should be given first to alternate methods of filling the position such as developing a training program, modifying the qualification standards, making use of detail provisions or recruiting from the outside. Generally, waivers are more appropriate for shortage category positions than in situations where qualified persons are available. A shortage category position is one where “positive recruitment effort” fails to produce qualified persons or where past experience has demonstrated that acceptable candidates are not available.

   (2) In approving waivers there should be reasonable assurance that the employee’s potential and demonstrated ability gives evidence of satisfactory performance in the new position and that necessary on-the-job or other required training will be available.

   (3) Waivers are not proper where there is competition for the position such as a promotion made under a merit promotion plan.

b. **Effect on Later Actions.** When an employee is placed in a position through the waiver of the requirements of a standard, a correct application of a valid standard has not been made. To be considered for subsequent placement actions, the employee must make up the waived requirements when pertinent to the standard unless action is taken to again waive or modify the requirements.

c. **Documenting Waivers.** Waivers of VA qualification standards will be documented as described for modifications in paragraph 8c [ ].

d. **Approving Waivers (Statutory Requirements Excluded).**

   (1) Facility [D]irectors and the Director, Central Office Human Resources Service, may waive only experience requirements of a VA qualification standard in a noncompetitive action to a noncentralized position. Where waiver of the training or education requirements of a standard is needed, or a centralized position is involved, the facility Director will forward his/her recommendation, through channels, to the [OHRM & LR] (05[ ]). A notice of each approved waiver will similarly be forwarded.

   (2) [Under Secretaries], Network Directors, or [ ] Deputy Under Secretar[y] for [Health for Operations and Management], after considering the recommendation of the Program Director, will approve waivers of
length of experience, training, and education requirements for their field positions except those delegated in subparagraph (1) [], and those centralized to the Secretary.

(3) The Deputy Assistant Secretary for [O]HRM&LR will approve waivers of qualification requirements for Central Office positions except those delegated in subparagraph [12d](1) [] and those centralized to the Secretary.

(4) The Secretary or his/her designee approves waivers of qualification requirements for positions centralized to him/her.

13. INTERIM STANDARDS

a. General. When a position is not covered by a qualification standard or rating schedule, field facilities, including the Central Office Human Resources Service, will develop “interim” standards and related instructions as explained below. Such standards, examining guides, and rating schedules will follow the format and procedures of the applicable VA or OPM standards program. They will be identified as “interim” and will be superseded by a regular standard at the earliest practicable date.

b. VA Qualification Standards

(1) Facility directors approve “interim” VA standards, guides, or schedules for their positions except those positions centralized to the Administration Head or the Secretary.

(2) The Director, Central Office Human Resources Service, approves “interim” VA standards and related instructions for Central Office positions except those centralized to the Secretary.

(3) Proposed “interim” VA standards and instructions for centralized positions will be forwarded to the Deputy Assistant Secretary for [O]HRM&LR (05[ ]), through channels, for necessary approval action by the Administration Head or the Secretary.

c. OPM Qualification Standards. The official having appointing authority over the position (see subparagraph b (1) and (2) []) will recommend “interim” standards and related instructions to the servicing OPM office for those positions subject to OPM qualification standards. For positions centralized to the Administration Head or the Secretary, the proposed “interim” standard will be forwarded to the Deputy Assistant Secretary for [O]HRM&LR (05[ ]), through channels, for processing.

d. Distribution. Two copies of each approved and recommended “interim” standard and related instructions will be forwarded to the Deputy Assistant Secretary for [O]HRM&LR (05[ ]), through channels. In addition, two copies of “interim” standards proposed for positions subject to the VA qualification standards program will be forwarded by the approving authority to the appropriate OPM office.
PART II. APPOINTMENTS

CHAPTER 3. TITLE 38 APPOINTMENTS

SECTION A. GENERAL

1. SCOPE.

a. **General.** This chapter contains administrative requirements and procedures relating to the appointment of individuals to occupations identified in 38 U.S.C. § 7306, 7401(1), and 7401(3); and employees in those occupations who are appointed under 38 U.S.C. § 7405. This section also applies to medical support personnel appointed under authority of 38 U.S.C., chapter 73 or 74.

   **NOTE:** All references throughout this handbook to occupations identified in 38 U.S.C. § 7401(3) includes those occupations not specifically listed in Section 7401(3) but approved for hybrid status by the Assistant Secretary for Human Resources and Administration/Operations, Security and Preparedness in accordance with the provisions of paragraph 2 below. See appendix III-O for a complete list of hybrid occupations. [ ] [Requirements for professional standards boards throughout this handbook do not include hybrid title 38 occupations.]

b. **VHA Central Office Appointments.** Provisions of this section apply to Central Office employees in the occupations indicated in subparagraph a. who are appointed under 38 U.S.C. § 7306, 7401(1), 7401(3), or 7405. The terms “medical center officials” and “facility director or designee” refer in Central Office to the Under Secretary for Health or designee.

c. **Residents.** Medical and dental residents appointed under 38 U.S.C. § 7406, and podiatry, optometry, and chiropractic residents and trainees appointed under 38 U.S.C. 7405 are included within the scope of this section. The term resident as used in this chapter includes interns.

d. **Exception from the Competitive Service and the Provisions of 5 U.S.C. Chapter 51.** The appointments of persons under the authority of sections 7306, 7401(1), and 7401(3), and under sections 7405 and 7406 to occupations identified in those sections, are excepted from the competitive service and from 5 U.S.C. chapter 51.

2. AUTHORITY AND RESPONSIBILITY.

a. **Designation of Title 38 Hybrid Status for Health Care Occupations**

   (1) The Assistant Secretary for Human Resources and Administration/Operations, Security and Preparedness, subject to the concurrence of the Under Secretary for Health, is delegated the authority to approve health care occupations for conversion to title 38 hybrid status under 38 U.S.C. § 7401(3) provided such health care occupations:

   (a) Are not occupations relating to administrative, clerical, or physical plant maintenance and protective services;
(b) Would otherwise receive basic pay in accordance with the General Schedule under section 5332 of title 5;

(c) Provide direct patient care services or services incident to direct patient care services; and

(d) Would not otherwise be available to provide medical care or treatment for Veterans.

(2) Not later than 45 days before the effective date of an appointment or conversion to a hybrid occupation established under subparagraph (1) above, the Secretary must submit notice of the new hybrid occupation to Congress under the provisions of 38 U.S.C. § 7401(3)(B). The Recruitment and Placement Policy Service (059) is responsible for preparing this notice for approval of the Secretary.

(3) Prior to submitting notice under subparagraph (2) above, comments shall be solicited from applicable labor organizations and such comments will be included in the notice.

b. **Effecting Appointments.** Appointments will be effected only by appointing officers (responsible Human Resources Management Officer). These appointing officers will effect appointments after the approval of the qualifications and the selection for appointment has been made by the approving official designated below.

c. **Approval of Qualification and Selection for Appointment.** The approving authorities for appointment of certain research personnel, residents, and associated health trainees are contained in M-3 and M-8. The approving officials for appointment to positions in VHA under 38 U.S.C., chapter 73 or 74, will be as follows:

1. **The Secretary**

   (a) On advice of the Under Secretary for Health, the approval of the qualifications and selection of all persons to be appointed under the authority of section 7306.

   (b) The approval of all network and facility directors appointed under the authority of 38 U.S.C., § 7401(1).

   (c) The approval of network directors appointed under 38 U.S.C., § 7306 (for network directors appointed in the Senior Executive Service, see 5 U.S.C. § 3393 and VA Handbook 5027, Senior Executive Service).

   (d) The approval of VISN Chief Medical Officers appointed under the authority of 38 U.S.C., § 7401(1).

2. **Under Secretary for Health or Designee in Central Office.** Except as limited by subparagraph (1), the Under Secretary for Health or designee is the approving official for the appointment of all individuals who are appointed in Central Office under 38 U.S.C., chapter 74, irrespective of the type of appointment, title, or grade.
(3) **Network Directors.** Network directors have the authority to appoint chiefs of staff. However, facility officials will continue to forward chief of staff nominations to the VHA Workforce Management and Consulting Office (10A2B). The Workforce Management and Consulting Office will provide a technical review of the nomination, arrange for appropriate approvals and/or reviews with VHA Central Office officials as necessary, and forward the completed nomination to the Network Director for approval.

(4) **Facility Directors.** Except as limited by subparagraphs (2) and (3), the facility Director is the approval authority for the following appointment and assignments.

(a) **Physicians.** The approval of the qualifications and selection of physicians appointed under the authority of sections 7401(1) and 7405, including Associate Chiefs of Staff and physicians in service chief or comparable positions. See appendices II-G2 and II-H1 for procedures for qualifying and appointing physicians to service chief and comparable positions.

(b) **Dentists.** The approval of the qualifications and selection of dentists appointed under the authority of sections 7401(1) and 7405, including chiefs of dental service or comparable positions and staff dentists. See appendices II-G3 and II-H2 for procedures for qualifying and appointing dentists.

(c) **Nurses.** The approval of the qualifications and selection of nurses appointed under the authority of sections 7401(1) and 7405. See appendices II-G6 and II-H5 for procedures for qualifying and appointing registered nurses. In addition, the Director may delegate authority to the Nurse Executive to approve the appointment of nurses up to and including Nurse III.

(d) **Podiatrists.** The approval of the qualifications and selection of all podiatrists appointed under authority of sections 7401(1) and 7405. Refer to appendices II-G4 and II-H3 for procedures for qualifying and appointing podiatrists.

(e) **Optometrists.** The approval of the qualifications and selection of all optometrists appointed under authority of sections 7401(1) and 7405. Refer to appendices II-G5 and II-H4 for procedures for qualifying and appointing optometrists.

(f) **Nurse Anesthetists.** The approval of the qualifications and selection of nurse anesthetists, including Chiefs of Nurse Anesthesiology under authority of sections 7401(1) and 7405. Refer to appendices II-G7 and II-H6 for procedures for qualifying and making appointments to Chief, Nurse Anesthesiology positions.

(g) **Physician Assistants (PA).** The approval of the qualifications and selection of all PAs, including those in Chief Grade under authority of sections 7401(1) and 7405. Refer to appendices II-G8 and II-H7 for procedures for qualifying and making appointments of PAs to Chief Grade.

(h) **Expanded-Function Dental Auxiliary (EFDA).** The approval of the qualifications and selection of all EFDAs appointed under the authorities of 7401(1) or 7405. Refer to appendices II-G9 and II-H2 for procedures for qualifying and appointing EFDAs.
Director may delegate approval authority for appointments of EFDAs to the Facility Chief of Staff.

(i) **Pharmacists.** The approval of the qualifications and selection of all pharmacists, including Chiefs of Pharmacy Service (all grades), clinical pharmacists/pharmacy specialists and program specialists in grades GS-13 appointed under the authorities of 7401(3) and 7405. Refer to appendices II-G15 and II-H8 for procedures for qualifying and appointing chiefs of pharmacy service, clinical pharmacy/pharmacy specialists, and program specialists at grades GS-13 and above. In addition, the Director may delegate authority to the Facility Chief of Staff or to the Chief, Pharmacy Service, to approve the appointment of pharmacists at GS-12 and below, and of Assistant Chiefs, Pharmacy Service at GS-13.

(j) **PTs and OTs.** The approval of the qualifications and selection of PTs and OTs for section chief positions and positions at GS-12 appointed under the authorities of 7401(3) and 7405. The Director may delegate approval authority for appointments of other PTs and OTs to the Facility Chief of Staff. Refer to appendices II-G12, II-H14 and II-H9 for procedures for qualifying and making appointments to section chief positions.

(k) **Respiratory Therapists.** The approval of the qualifications and selection of all RTs. The Director may delegate approval authority for appointments of RTs to the Facility Chief of Staff appointed under the authorities of 7401(3) and 7405. Refer to appendix II-G11 for qualifying RTs.

(l) **LPNs/LVNs.** The approval of the qualifications and selection of all LPNs/LVNs appointed under the authorities of 7401(3) or 7405. The Director may delegate approval authority for appointments of LPNs to Nurse Executive Refer to appendix II-G13 for qualifications.

(m) **Chiropractors.** The approval of the qualifications and selection of all chiropractors appointed under authority of sections 7401(1) and 7405. The Director may delegate approval authority for appointments of Chiropractors to the Facility Chief of Staff. Refer to appendices II-G16 and II-H10 for procedures for qualifying and appointing chiropractors.

(n) **Other occupations appointed under the authority of 38 U.S.C § 7401(3) or 7405.** The approval of the qualifications and selection of all individuals appointed in occupations listed in 38 U.S.C. § 7401(3) or approved for 38 U.S.C. § 7401(3) hybrid status by the Assistant Secretary for Human Resources and Administration in accordance with the provisions in paragraph 2a of this section. The facility Director may delegate approval authority for appointment of employees in the hybrid occupations (see chapter 3, section A, this part).

b. **Professional Standards Boards.** See section C of this chapter for provisions relating to the establishment, membership, and functions of Professional Standards Boards.

c. **Human Resources Management Officer Responsibilities.** The Human Resources Management Officer will be responsible for:

   (1) Adherence to administrative and regulatory requirements;
(2) Review of each case for completeness before forwarding to VHA Central Office;

(3) Advising boards on administrative and regulatory requirements pertaining to appointments, advancements and probationary reviews;

(4) Notifying prospective appointees of their selection.

3. APPOINTMENT REQUIREMENTS AND DETERMINATIONS

a. Preference to Veterans

(1) The primary consideration in making appointments of physicians, dentists, podiatrists, optometrists, chiropractors, nurses, nurse anesthetists, PAs and EFDAs under 38 U.S.C., chapter 73 or 74, will be the professional needs of VHA. Consistent with this policy, however, veterans will be given preference when qualifications of candidates are approximately equal. This includes qualified disabled veterans and preference eligible as defined in 5 U.S.C. § 2108.

(2) When candidates for positions identified in 38 U.S.C. 7401(3), are determined to be approximately equally qualified for a particular opening, hiring preference will be given to veterans and preference eligible as defined in 5 U.S.C. 2108. Selections from candidates determined to be approximately equal will be made in the following order:

(a) Disabled Veterans who have a service-connected disability of 10 percent or more.

(b) Preference eligible under 5 U.S.C. § 2108(3) (C) through (H) other than those above (e.g. disabled Veteran; unmarried widow or widower of a veteran who served on active duty in wartime or other designated service period; spouse of a service-connected disabled Veteran not qualified for civil service employment; mother of a veteran who lost his/her life in wartime or other designated service period; mother of a service-connected permanently and totally disabled veteran.)

(c) Preference eligible under 5 U.S.C. § 2108(3)(A) and (B) (i.e., Veterans who served on active duty in wartime or other designated service period.)

(d) All other candidates.

(3) When qualified Veterans apply for appropriate vacancies, it is important that VA health care facilities establish and maintain documentation within HR files to demonstrate that qualified preference eligible and other Veteran applicants received appropriate consideration for positions being filled, and to address the relative qualifications of preference eligible and other Veteran applicants. At a minimum, facilities must be able to demonstrate from the written record why the qualifications of non-selected preference eligible and other Veterans are not approximately equal to those of selected candidates who either lack preference or are non-Veterans, respectively.
NOTE: The VA is required to follow title 5 Veterans’ preference rules when hiring individuals for Hybrid Title 38 position (Graves v. VA 117 M.S.P.R. 697 (2012). See VA Handbook 5005 Part I, Chapter 4.

b. Dual Employment and Dual Compensation Restrictions

(1) Except as provided in the subparagraphs below, no full-time employee appointed under authority of 38 U.S.C., chapter 73 or 74, will concurrently hold any other type of paid appointment in VA.

(2) The following personnel may hold more than one appointment provided it is not contrary to 5 U.S.C. § 5533 and VA Directive and Handbook 5007, Appendix F, Paragraph 3, Pay Administration: full-time personnel appointed under 38 U.S.C. § 7401(3), personnel in occupations listed in 38 U.S.C. § 7401(3) who are appointed on a full-time or part-time basis under 38 U.S.C. § 7405(a)(1)(B), and medical support personnel appointed on a full-time or part-time basis under 38 U.S.C. § 7405(a)(1)(D). A medical resident may serve as an admitting physician on a fee basis in accordance with the criteria in VA Handbook 5007, Pay Administration. Paid trainees in medical support programs funded through the Office of the Chief Academic Affiliations may simultaneously hold part-time, intermittent, or fee basis appointments provided there is no violation of dual compensation restrictions, the trainee is determined to be the best qualified applicant, and the utilization as a trainee is consistent with the provisions of VHA Manual M-8, Academic Affairs. All other personnel appointed under authority of 38 U.S.C., chapter 73 or 74 are covered by the provisions of subparagraph b (2) through b (4). Pharmacy residents appointed under 38 U.S.C. § 7405(a)(1)(D) may be appointed to another position under 38 U.S.C. § 7405 without regard to the restrictions in 5 U.S.C. § 5533.

(3) Facility directors may appoint, on a lump-sum fee basis, full-time employees from other VA facilities employed in occupations listed under 38 U.S.C. § 7401(1), provided the criteria in paragraph b (4) are met and such an appointment would not be contrary to Department conflict of interest regulations (38 CFR, part 0). Such appointments permit the use of full-time employees on a fee basis at a second VA facility, provided management officials at both facilities agree that the arrangement permits them to meet staffing needs; fees are paid on other than a time basis; and the arrangement results in an employer-employee relationship. (5 CFR, part 304.) Facilities wishing to use this authority should identify the task they need accomplished and compensate the employee on a fee basis for the completion of that task. Appointment of full-time employees covered by 38 U.S.C. § 7401(1) on a fee basis at the same VA facility is not permitted. No consultant, attending, fee-basis, part-time, or intermittent employee will simultaneously hold more than one compensable appointment in VHA unless the outlined criteria are met. The restriction in the preceding sentence applies to appointment at the same facility or at more than one facility.
(4) For individuals identified in subparagraph b (2), dual appointments may be approved by the facility Director, subject to the following conditions and restrictions:

(a) Services are essential to the health care needs of patients.

(b) No other equally qualified individual in the specific specialty is available in the locality.

(c) There is no violation of dual compensation statutes or VA policies.

(5) For individuals identified in subparagraph b (2), the following dual appointments will be approved by the facility Director only in exceptional circumstances and if requirements in subparagraph b (4) are met. Officials will ensure that these appointments will not present or lead to a conflict of interest or the appearance thereof. Questions concerning conflict of interest matters may be directed to the Regional Counsel.

(a) Utilization as a consultant or attending in combination with employment on a part-time or intermittent basis at the same facility;

(b) On-facility fee-basis appointment under the schedule of fees in combination with utilization as a consultant or attending at the same facility. (This subparagraph does not apply to outpatient services of off-facility fee-basis personnel in a private office or private clinic, even though consultant or attending services may be performed on the same day.)

(c) Part-time or intermittent employees, or currently employed consultants and attendings, in combination with an on-facility fee-basis appointment to perform an operation, give treatment, or perform special duty nursing.

(6) Recommendations to approving officials should include sufficient information to indicate that dual employment is justified.

c. **Equal Opportunity for Employment.** Employment actions will be taken on the basis of merit and without discrimination for such reasons as age, race, color, religion, national origin, sex, lawful partisan political affiliation, marital status, physical or mental disability (when the individual is qualified to do the work), or membership or non-membership in a labor organization.

d. **Member of Family Restrictions.** Employment actions will conform to the restrictions governing the employment of family members as provided in 5 CFR, part 310. (For further guidance, refer to chapter 2, this part).

e. **Restrictions Regarding Political Activity.** Employees appointed under authority of 38 U.S.C., chapter 73 or 74, are subject to the political activity restrictions in 5 U.S.C., chapter 73 and VA Handbook 5025, Legal.
f. Qualification Standards

(1) General. The basic qualification requirements for individuals appointed under 38 U.S.C., chapters 73 and 74, in occupations identified in sections 7401(1) and 7401(3), are contained in VA Qualification Standards approved by the Secretary of Veterans Affairs upon recommendations of the Under Secretary for Health. These standards apply to all appointments in these occupations under authority of 38 U.S.C., chapter 73 or 74, regardless of the nature or tenure of the appointment.

(2) Qualification Standards for Occupations. The qualification standards for individual occupations are contained in appendix II-G of this chapter.

(3) Education

(a) Approved schools and satisfactory internships or their equivalents for the purpose of 38 U.S.C. § 7402, will be those designated in the appropriate qualification standards. The accrediting agency or body for verifying education of applicants is also identified in the qualification standards.

(b) Provisions of 38 U.S.C., chapter 73 or 74, require that individuals have education and licensure, registration or certification as specified in the appropriate qualification standard in order to qualify for assignment of patient care responsibility. Unless otherwise indicated in the qualification standard, an unlicensed candidate may not use professional education as a substitute for the accredited education and/or training required by the qualification standards of another occupation. For example, an unlicensed physician may not be appointed as a PA by using graduation from medical school as a substitute for completion of an approved PA training program. Likewise, an unlicensed dentist may not be appointed as an EFDA by using graduation from dental school as a substitute for completion of approved dental assistant or hygienist training.

(4) Grade Level Determinations. The grade to which an applicant is appointed will be determined by the individual's qualifications and assignment. Under the Title 38 “rank-in-person” system, candidates are to be appointed at the highest grade or level within the grade for which they are fully qualified up to the full performance level. For positions above the full performance (journey level) the complexity of the assignment and scope of responsibility are considered in determining grades.

g. Citizenship

(1) To be eligible for appointment in VHA, an applicant must be a citizen of the United States (U.S.), except as provided in 38 U.S.C. § 7407(a) and subparagraph (2). The acquisition of “first papers” or the “owing of allegiance to the United States” does not satisfy the basic requirement of citizenship. Naturalized citizens must furnish evidence of citizenship.
(2) After a determination is made that it is not possible to recruit qualified citizens, necessary personnel may be appointed on a temporary basis under authority of 38 U.S.C. § 7405 without regard to the citizenship requirements of 38 U.S.C. § 7402 or any other law prohibiting the employment of or payment of compensation to a person who is not a citizen of the United States. Candidates must meet all other requirements for the grade and position concerned.

(3) Requests to petition the U.S. Department of State (DOS) for waiver of the 2-year home residence requirement under 22 CFR, part 514 must be approved VHA Workforce Management and Consulting Office (10A2A). Requests to petition DOS will be submitted in accordance with instructions contained in appendix II-J of this chapter and VHA Handbook 5005.1, “Requests to Petition the United States Department of State for a Waiver of the Two-Year Home Residency Requirement on Behalf of an Exchange Visitor”. No appointment may be effected or commitment made until the required approval is received from the U.S. Citizenship and Immigration Service’s (USCIS), formerly the Immigration and Naturalization Service.

(4) Officials of VHA will not commit positions to noncitizens not legally entitled to reside in this country.

(5) Consistent with provisions in this paragraph, the appointment of noncitizens may be approved by the following officials:

(a) The facility Director is the approval authority for appointment of:

i. All noncitizens as residents (see M-8, Pt. II);

ii. Immigrants (aliens who have been admitted for permanent residence.) As of September 20, 1994, all immigrants are required to have an Alien Registration Receipt Card, Form I-551. Form I-551 has the lawful holder’s photograph, fingerprint and signature on a white background; it is commonly known as the "green card."

NOTE: The Form I-151 and all previous forms are no longer valid after September 19, 1994.

iii. All nonimmigrants (e.g., exchange visitors, alien students, visiting professors), provided employment is authorized by the USCIS. This includes authority to sponsor an individual for a nonimmigrant visa or an extension of such visa. The authorization for employment may be cited on the nonimmigrant’s visa, or the nonimmigrant may possess an Employment Authorization Form (I-688B). In cases where the authority to accept compensated or non-compensated employment by the nonimmigrant is not clearly evident, a report of contact with USCIS officials verifying the employment authorization must be made.
copy of the document used to verify the employment authorization of the nonimmigrant is to be filed in the appointee’s personnel folder.

(b) The Under Secretary for Health or designee is the approval authority for the appointment of noncitizens to centralized positions.

(c) The paid appointment of noncitizen associated health trainees is not generally permitted. Any exception requires the approval of the Under Secretary for Health, or designee. (See section G, paragraph 6, this chapter.)

h. Credentialing Requirements (Including License Registration or Certification). See section B of this chapter.

i. LEIE and HIPDB Sanction List. See chapter 1, section B, paragraph 2 of this part.

j. English Language Proficiency. No person will be appointed under authority of 38 U.S.C., chapter 73 or 74, to serve in a direct patient-care capacity in VHA who is not proficient in written and spoken English. (See appendix II-I of this chapter).

k. Physical Requirements

(1) General

(a) Guidelines for physical and mental fitness for appointment and retention in VHA shall be established by the Under Secretary for Health. (See VA Directive and Handbook 5019, Part II, Occupational Health.)

(b) Only those persons who are physically and mentally capable of satisfactorily performing the duties of their assignments are to be employed and retained in VHA.

(c) Determinations of physical and mental fitness will be made without discrimination for such reasons as age, race, color, religion, national origin, sex, lawful partisan political affiliation, marital status, physical or mental disability (when the individual is qualified to do the work), or membership or non-membership in a labor organization.

(2) Pre-employment Physical Examinations

(a) General. A pre-employment physical examination is required of all full-time, part-time and intermittent employees. It is not required of residents and interns who furnish evidence of satisfactory physical condition based on a physical examination within the past 12 months. An examination is required in any conversion action from a status not requiring a physical examination to one requiring such procedures.

I. Oath, Affidavit, and Declaration of Appointee

(1) All employees of VHA appointed under authority of 38 U.S.C., chapter 73 or 74 (except those utilized on a fee basis) are required to take the oath of office and execute the affidavit (subversive activity), affidavit (striking against the Federal Government), and the declaration of appointee. Noncitizens shall be required to execute only those affidavits on Standard Form (SF) 61, Appointment Affidavit, outlined in the OPM Guide to Processing Personnel Actions. The SF 61 shall be executed in accordance with the requirements set forth in chapter 2, section A, paragraph 5e of this part.

(2) Only employees delegated the authority will administer the oaths necessary for effecting appointments in VHA.

n. Effective Date of Appointment. Appointments will be effective on the entrance-on-duty day, except as follows:

(1) Full-Time Physicians, Dentists, Podiatrists, Optometrists, Chiropractors, and Other Personnel Appointed Under 38 U.S.C. § 7306. When an appointee is to enter on duty on Monday, the appointment will be effective on the preceding Sunday provided the employee is available for duty on that day. Sunday will be considered an administrative non-duty day. If Monday is a holiday, the appointment will be effective on the entrance-on-duty-day.

(2) Nurses, Nurse Anesthetists, PAs, EFDAs, and Hybrid Title 38 occupations. When the appointee is to enter on duty on the first Monday in a pay period, the appointment will be effective on the first Sunday of the pay period. If Monday is a holiday, the appointment will be effective on the entrance-on-duty-day.

(3) Restoration After Military Service or Compensable Injury. An exception to these effective dates may be made if required to satisfy statutory or regulatory provisions such as restoration after military service or compensable injury.

o. Overseas Employment. See chapter 1, section C of this part.

p. Grade and/or Step Adjustments. If, on review of board actions by the appropriate Professional Standards Board, it is determined that an employee has been appointed at a grade and step rate within the grade which is not commensurate with qualifications, the approving authority for initial appointment may approve an adjustment in the grade and/or step rate within the grade. (See section E, paragraph 2, this chapter, for limitations on adjusting step rates within the grade for this purpose.) These adjustments in grade and/or step rate will be effected as of the beginning of the next pay period following approval. The nature of action on SF 50-B will be “Promotion” or “Change to Lower Grade,” as appropriate. In the case of step rate
adjustments, the nature of action on SF 50-B will be “Administrative Pay Increase” or “Administrative Pay Decrease,” as appropriate. The authority for such actions will be “38 U.S.C. § 7403.” The following statement will be placed in “Remarks” on SF 50B for such actions: “Adjustment for consistency with standardized qualification requirements.”

NOTE: Service in a lower step rate prior to adjustment of step(s) within the grade will not be credited toward meeting the required waiting period for periodic step increase.

4. PROBATIONARY PERIOD

a. Requirement to Serve a Probationary Period

(1) Full time permanent appointments of physicians, dentists, podiatrists, optometrists, chiropractors, nurses, nurse anesthetists, PAs, and EFDAs made under authority of section 7401(1) are subject to a two-year probationary period requirement as specified in 38 U.S.C. 7403(b)(1). NOTE: Full time temporary appointments under 38 U.S.C. 7405(a)(1) are excluded from the requirement to serve a probationary period, and service in this time-limited capacity is not creditable towards a probationary period as specified in 38 U.S.C. 7403(b)(1).

(2) Individuals appointed as of May 5, 2010, as part time or intermittent Registered Nurses (RN) under 38 U.S.C. 7405(a)(1), are subject to a two-year probationary period requirement, except as provided below. Upon completion of the probationary period, the appointments are no longer considered temporary. The following appointments are considered temporary, thus are not subject to a probationary period. These appointments are on a time limited basis of three years or less:

(a) Part time or intermittent appointments resulting from an academic affiliation or teaching position in a nursing academy of the Department;

(b) Appointments as a result of a specific research proposal or grant; or

(c) Appointments of non-United States citizens under 38 U.S.C. 7407(a).

(3) Full time permanent appointments of hybrid title 38 employees made under authority of section 7401(3) are subject to the one-year title 5 probationary period requirements (see chapter 2, section A, paragraph 9, of this part).

(4) Employees who satisfactorily completed the probationary period required by 38 U.S.C. 7403(b) will not serve a new probationary period upon reappointment unless their separation was for cause.

a. Purpose of Probationary Period
(1) The probationary period is an extension of the appointment process. It provides the final test of the appointee's qualifications, i.e., actual performance on the job. During the probationary period, the employee's conduct and performance will be closely observed. The employee may be separated from the service if not found fully qualified and satisfactory. Thus, the probationary period provides a safeguard against retention of any person who, despite having met legal and regulatory requirements for appointment, is found in actual practice to be unsuited for retention in the Veterans Health Administration (VHA). Retention of employees during the probationary period shall be contingent upon demonstrating that they are fully qualified and satisfactory. Only those employees who satisfactorily complete the probationary period shall acquire status as permanent employees in VHA.

(2) The probationary period also affords an opportunity for fostering the interest of the employee in a VA career. Thoughtful and considerate treatment during the probationary period will have a lasting effect on the employee's career.

b. Length of Probationary Period

(1) The probationary period for employees appointed under 38 USC 7401(1), as well as employees appointed as part time or intermittent RNs under 38 U.S.C. 7405(a)(1), on or after May 5, 2010, is two years. The probationary period for part time RNs is computed based on calendar time, in the same manner as for full time employees.

(2) The probationary period for intermittent RNs is computed based on 1 day of credit for each day or part of a day in pay status. Individuals appointed as intermittent RNs must
serve 520 days in a pay status to complete the required 2-year probationary period. The probationary period, however, cannot be completed in less than 2 calendar years.

(3) Probationary requirements for hybrid employees appointed under 38 USC 7401(3) is the same as those for title 5 employees and can be found in chapter 2, section A, this part. The calculation for part time and intermittent creditable service is the same as above.

d. Last Day of Probationary Period

(1) For full time employees paid on a daily basis (physicians, dentists, podiatrists, optometrists, and chiropractors), the probationary period ends at midnight on the last calendar day before the employee’s anniversary date, whether or not the employee is in a duty status that day. For example, a probationary period beginning November 1, 2011 would normally end at midnight on October 31, 2013.

(2) For full time and part time employees paid on an hourly basis (RNs, nurse anesthetists, physician assistants, and expanded-function dental auxiliaries,) the probationary period is completed at the end of the last scheduled tour of duty before the employee's anniversary date. For the purposes of this paragraph, scheduled duty includes normal and overtime duty, leave, excused absence, including holidays, and absence without leave. For example, an employee subject to a two-year probationary period beginning November 1, 2011, is completed as follows:

(a) For an employee, whose last tour of duty prior to November 1, 2013, occurs at 4:30 p.m. on October 31, 2013, the probationary period is completed at 4:30 p.m. on October 31, 2013.

(b) For an employee, whose last tour of duty prior to November 1, 2013, is from 11:00 p.m., October 31, 2013 to 7:00 a.m., November 1, 2013, the probationary period is completed at midnight on October 31, 2013.

(c) For an employee, whose last tour of duty prior to November 1, 2013, (because of days off) is 29, 2013.

(d) For an employee, whose last tour of duty prior to November 1, 2013, is 4:30 p.m. on October 29, 2013, but he/she calls in sick for scheduled tours of duty on October 30 and October 31, 2013, the probationary period is completed at 4:30 p.m. on October 31, 2013.

(e) If completed satisfactorily, the employee will automatically complete the required probationary period at the end of the last tour of duty worked or scheduled to work.

a. Creditable Service. The following service is creditable toward completion of the probationary period:
(1) Continuous service in an appointment under 38 U.S.C. 7401(1), 7306, or part time or intermittent (including temporary) service for RNs appointed under 38 U.S.C. 7405(a)(1).

(2) Prior satisfactory probationary service of at least 6 months' duration followed by a break(s) in service totaling 1 year or less if the break was not due to separation for cause. A break in service is defined for the purpose of this subparagraph as a period during which no service is rendered under 38 U.S.C. 7306, 7401(1), or 7405(a)(1) for part time or intermittent RNs.

(3) Time spent in a probationary period served under 38 U.S.C. 7403(b) prior to holding some other type of appointment in VHA, if the employee is subsequently appointed under 38 U.S.C. 7401(1), provided all other conditions of subparagraph d are met. Example: A full time RN appointed under 38 U.S.C. 7401(1) in July 2011 accepts a position of Supervisory Health System Specialist (Domiciliary Administrator) under title 5 in December 2012. The individual returns to an RN position under 38 U.S.C. 7401(1) in October 2014. The previous time served as an RN from July 2011 through December 2012 is not creditable towards the completion of the probationary period, because the time served under the title 5 appointment was longer than one year.

(4) All leave with pay during creditable service.

(5) Leave without pay during the probationary period is considered creditable service when it does not exceed a total of 40 calendar days for physicians, dentists, podiatrists, optometrists, or chiropractors, or 235 hours for RNs, nurse anesthetists, physician assistants, and expanded-function dental auxiliaries and 110 hours for part time RNs. **NOTE:** When determining this total, each hour of leave without pay taken by an RN or nurse anesthetist on the Baylor Plan is to be multiplied by 1.667.

(6) Time before restoration during which a probationary employee received work injury compensation from the Office of Workers' Compensation Programs.

e. **Periodic Reviews**

(1) **Informal Reviews**

(a) Supervisors will review the services of employees through observation and evaluation of their performance and conduct during the probationary period. When the employee has had an opportunity to understand performance expectations, the supervisor should consider any inadequacies in performance. The employee's weaknesses should be discussed objectively with the employee and suggestions made for improvement. If the employee's performance is considered good or outstanding in some aspect, this fact should be made known to the employee.

(b) If the employee's performance or conduct are not satisfactory, the employee's immediate or higher-level supervisor will submit a written request for formal or
summary review in accordance with VA Handbook 5021, Part III, Chapter 1. This request will describe the employee's performance and/or conduct deficiencies, and the supervisor's efforts to address the deficiencies, such as counseling, training, modification of assignments, use of preceptors, etc., to assist the employee. The request may be initiated any time during the probationary period and may be made notwithstanding past or pending proficiency ratings or the results of any previous probationary review.

(c) There may be occasions when conduct or performance issues are so egregious such that patient safety or other conditions warrant a request for formal review absent any discussion or suggestions made for improvement.

(2) Formal Reviews

(a) Mid Probationary Periodic Review. Appropriate supervisory officials and Professional Standards Boards have responsibility for periodically reviewing the services of probationary employees for those hired in occupations under 38 USC 7401(1). At a minimum, at least one formal periodic review during the probationary period will be done (typically, following completion of the employee's first Proficiency Report or Performance Appraisal, as appropriate for some title 38 employees).

i. The Human Resources Management Office will establish monitors to ensure completion of mid probationary periodic reviews.

ii. The Professional Standards Board will have access to pertinent employment records including performance evaluations, proficiency reports, counseling reports, or supervisory evaluations. The Board will consider all aspects of the employee’s service.

iii. If the employee is determined to be performing satisfactorily at the time with no concerns that may warrant referral for a summary review by the Board in accordance with VA Handbook 5021, Part III, Chapter 1, the Chairperson of the Board will record that finding by endorsing the current Proficiency Report or by preparing a separate memorandum report, and the employee will be advised of the finding by the immediate supervisor.

iv. If the Board questions whether the employee is fully qualified and satisfactory, the Board is to return the case to the appropriate authorizing official with a recommendation that a summary review of the employee's services be initiated.

SECTION B. CREDENTIALING AND LICENSURE

1. GENERAL

a. Scope

(1) This section contains administrative requirements and procedures relating to the credentialing and licensure of applicants and employees appointed to occupations identified in 38 U.S.C. 7306, 7401(1), and 7401(3); and employees in those occupations who are appointed under 38 U.S.C. 7405, including individuals utilized on an on-facility fee basis, on-facility contract or on-facility sharing agreement basis. This includes such employees as physicians, dentists, podiatrists, optometrists, chiropractors, nurses, nurse anesthetists, physician assistants (PAs), expanded-function dental auxiliaries (EFDAs), and Hybrid Title 38 occupations. Provisions of this section apply to Central Office employees who are employed in the occupations indicated above under 38 U.S.C. 7306, 7401(1), 7401(3), or 7405. Individuals appointed under 38 U.S.C. 7405, whether paid or without compensation, on an intermittent or fee basis, including consultants and attendings, must be fully credentialed in accordance with provisions of this section, although they are considered employees only during periods when actually engaged in VA service.

(2) The provisions of this section should be used in conjunction with VHA Handbook 1100.19, “Credentialing and Privileging” [for licensed independent practitioners and VHA Directive 2006-067, “Credentialing of Health Care Professionals” for dependent practitioners].

b. Residents. Medical, dental, podiatry, chiropractic, and optometry residents and trainees appointed under 38 U.S.C. 7405 or 7406 are included within the scope of this section. As indicated in paragraph 21 of this section, the appropriate program director is responsible for certifying that the credentials and licensure of residents and trainees have been verified prior to their appointment. Specific procedures described in paragraph 3 through 14 are not applicable to residents functioning within the scope of their training program, but program directors, where possible, should use verification procedures which are generally consistent with those described.

c. Definitions

(1) The terms “medical center officials” and “facility Director or designee” refer in Central Office to the Under Secretary for Health or designee.

(2) The term “credentialing” refers to the systematic process of screening and evaluating qualifications and other credentials, including licensure, required education, relevant training and experience, current competence and health status.

(3) The term “licensure” refers to the official or legal permission to practice in an occupation, as evidenced by documentation issued by a State in the form of a license and/or registration.

NOTE: The term “state” means any of the states, territories, and possessions of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.
(4) The terms “registration” or “certification” refer to the official attestation by a professional organization that one has fulfilled the requirements or met a standard skill to practice the profession.

(5) The term “primary source verification” is documentation from the original source of a specific credential that verifies the accuracy of a qualification reported by an individual health care practitioner. This can be documented in the form of a letter, telephone contact, or secure electronic communication with the original source.

(6) An active, current, full and unrestricted license or registration in a State is one which authorizes the licensee to practice outside VA without any change being needed in the status of the license. An employee is responsible for paying any fees necessary to maintain a full and active license in a State. If a State waives fees for any reason, such as for an out-of-state practice or for employment in a Federal facility, the employee may not accept the waiver if this will place the license in an inactive or other restricted status.

(7) VetPro is VHA’s electronic credentialing system which must be used for credentialing all providers. The system is used by applicants and practitioners to provide evidence of licensure, registration, certification, and/or other relevant credentials for verification prior to appointment, throughout the appointment process and upon transfer from another medical facility. The system provides an electronic file for continued maintenance of accurate, complete and timely credentials for all VHA health care providers who claim licensure, certification, or registration, and are permitted by the facility to provide patient care services or oversee the delivery of those services.

d. Responsibilities of VA Officials

(1) The Under Secretary for Health or designee will establish additional credentialing, licensure and/or registration requirements and procedures to assure that only fully qualified and suitable candidates are appointed and retained in VHA. Procedures will be established to thoroughly evaluate applicant credentials, licensure and/or registration status, and to monitor these on a continuing basis for health care employees appointed under 38 U.S.C., chapter 73 or 74.

(2) Facility Directors are responsible for implementing policy and procedures outlined in this section and for providing necessary resources to ensure that the verification of credentials and licensure is effectively and efficiently managed. So that only fully qualified and suitable individuals are appointed and retained under 38 U.S.C., chapter 73 or 74, [Clinical Executives (Chiefs of Staff, Chiefs of Patient Care Services, Nurse Executives), Service Chiefs,] selecting officials, PSBs and HRM officials will ensure that the qualifications of candidates for appointment are thoroughly screened and evaluated. The credentialing process includes verifying the individual’s licensure and/or registration, relevant training and/or experience, current competence and physical and mental fitness. (See appendix II-L of this chapter for a credentialing checklist.) Officials described in this paragraph will ensure that all applicants and employees covered by this policy are made aware of their responsibilities with respect to credentialing and licensure.

(3) The credentialing and licensure verification process is a shared responsibility, requiring extensive interchange and continuing communication between the Chief of Staff and HRMO. Facility Directors will establish local policies and procedures delineating functions to be accomplished by each of these officials to assure that responsibilities are clearly understood and can be effectively carried out.
(4) Compliance with credentialing and licensure provisions of this section does not obviate the responsibility to determine suitability for employment following guidelines in 5 CFR, part 731 or to initiate background investigations of employees using procedures specified in 5 CFR, part 736.

e. Documentation. Information obtained through the verification process must be documented in writing, either by letter, [memo,] report of contact or [secure electronic verification], as appropriate. [Documentation will be filed permanently in the in the VHA credentialing file, VetPro. Facsimile copy may be used with appropriate authentication of the source providing the information via facsimile. This needs to be independently authenticated and the authentication needs to be documented, e.g. entry into comments section of VetPro. A coversheet by itself is not considered independent authentication, but may be scanned as the last page of the document, not the first, as well as documentation of the independent verification of the sender’s source. If independent authentication of the source cannot be made, the facsimile copy must be followed up with an original document.

NOTE: Authentication of the source of the facsimile requires the recipient to document knowledge that the appropriate source that owned the verification information transmitted the facsimile. For example, if the recipient of the facsimile confirmed with the verifying entity that the facsimile was indeed transmitted by the verifying entity then this confirmation should be documented on the facsimile coversheet, signed and dated by the individual completing the independent authentication, to include name and title of both transmitting and confirming individuals and date of confirmation.]

f. Action Prior to Credentialing

(1) No appointment action will be taken, nor will an employment commitment be made, in any case where officials have reason to question a candidate’s suitability for VA employment. All information obtained through the credentialing process will be carefully considered before an employment decision is made. An RN, nurse anesthetist, PA, EFDA, or candidate for appointment to an occupation identified in 38 U.S.C. 7401(3), may be appointed under 38 U.S.C. 7405(a)(1) pending [completion of the full credentialing process referenced in VHA Directive 2006-067] and action by a board. However, a physician, dentist, podiatrist optometrist, or chiropractor will be appointed only after credentialing information is received and action has been taken by a Professional Standards Board (PSB) [except as noted in paragraph 2 below].

(2) In exceptional circumstances and where required to meet an emergent patient care situation, the facility Director may approve the temporary appointment of a physician, dentist, podiatrist, optometrist, or chiropractor under 38 U.S.C. 7405 without prior action by a PSB[, following the procedures in VHA Handbook 1100.19]. The Director will document for the record the specific circumstances and patient care situation which warranted such an appointment. The appointment will be made only after evidence of current, full and unrestricted licensure has been obtained and a judgment has been made that the individual is fully qualified for the assignment.
g. **Applicant and Employee Responsibilities.** Applicants and employees will provide evidence of licensure, registration, certification, and/or other relevant credentials, for verification prior to appointment and throughout VA employment as requested. They are responsible for keeping VA apprised of anything that would adversely affect or limit the credentials discussed in this section, and for advising VA of anything that would adversely affect or otherwise limit their clinical privileges. Failure to keep VA fully informed on these matters may result in administrative or disciplinary action.

h. **Verification of Credentials After Short Breaks in Service.** An applicant who has had a break in VA service of no more than 15 workdays may be reappointed in the same occupation without the full credentialing process required for initial appointment (i.e., verification of education background, licensure status, certifications by professional organizations, references, etc.). The applicant must complete a new employment application form and be recommended by the appropriate board, if action by a board is normally required for the type of appointment being considered. Facility officials will verify any licensure or qualification information that has not previously been documented in the personnel folder or the Credentialing and Privileging Folder, as appropriate. The official designated by the facility Director will note in the appropriate folder the reason that credentials were not reverified. Typically, the reason will be that the break in service was for less than 15 workdays. Reverification of credentials is not required for residents or trainees who rotate for training during the academic year between a VA facility and its affiliate(s). (See paragraph 22 for resident credentialing procedures.)

**NOTE:** For those subject to the credentialing and privileging provisions of VHA Handbook 1100.19, any break in service requires the verification of those credentials (time limited) which could have changed since last verified (State licensure, Drug Enforcement Administration (DEA) certification, board certification, etc.).

2. **APPLICATION**

   a. **Application Forms.** Candidates seeking employment under 38 U.S.C., chapter 73 or 74, must complete one of the following application forms:

   1. VA Form 10-2850, Application for Physicians, Dentists, Podiatrists, Optometrists, and Chiropractors;
   2. VA Form 10-2850a, Application for Nurses and Nurse Anesthetists, nurse practitioners, and graduate nurse technicians;
   3. VA Form 10-2850b, Application for Residency;
   4. VA Form 10-2850c, Application for Associated Health Occupations;
   5. Optional Form 612, Optional Application for Federal Employment, and Optional Form 306, Declaration for Federal Employment, are to be used by applicants for whom none of the above forms is appropriate; primarily, this includes applicants for medical support, students, trainees, or nonmedical consultant appointments. [The OF 612 is not required for USA Staffing recruitments. In USA Staffing, a résumé is preferred.]
b. Application Review. The HRM Officer or designee will thoroughly review each employment application to assure that all questions are answered and that additional information is provided where required. Applicants are to be asked to account for any gaps in their work history. This information shall be documented on the employment application, and, along with reference checks and other information obtained in the credentialing process, considered in the selection process. Incomplete applications are to be returned and applicants notified that they will not be considered for employment until their application has been fully completed. The HRMO or designee will review applications for compliance with administrative and regulatory requirements. Applicants who do not meet appointment requirements should be so notified.

3. EDUCATIONAL CREDENTIALS

a. Verification of Educational Credentials

(1) [For independent practitioners,] educational credentials relating to qualifications for employment are to be verified through primary source(s) whenever feasible. This includes education used to qualify for appointment, advancement or which is otherwise related to an individual’s employment. This verification should also include a comparison of the educational institution(s) cited on the application against existing lists of accredited institutions on the Department of Education web site to guard against institutions or “diploma mills” which sell fictitious college degrees and other professional credentials. The accrediting agency or body for verifying the accreditation status of schools is identified in the appropriate VA qualification standard.

(2) [For dependent practitioners, educational credentials relating to qualifications for employment are to be verified as follows:

(a) If most recent licensure for the occupation was issued in 1990 or later: Only education used to qualify for an appointment (i.e. first nursing degree) is required to be verified and this verification may be accomplished by a secondary source (i.e. copy of diploma or transcript is acceptable). Advanced education credentials above the initial qualifying degree are to be primary source verified. This verification also needs to include a comparison of the educational institution(s) cited on the application against existing lists of institutions or “diploma mills” which sell fictitious college degrees and other professional credentials. The accrediting agency or body for verifying the accreditation status of schools is identified in the appropriate VA qualification standard.

(b) If most recent licensure for the occupation was issued prior to 1990: Educational credentials relating to qualifications for employment are to be verified through the primary source(s), whenever feasible. This includes education used to qualify for appointment or advancement. This verification also needs to include a comparison of the educational institution(s) cited on the application against existing lists of institutions or “diploma mills” which sell fictitious college degrees and other professional credentials. The accrediting agency or body for verifying the accreditation status of schools is identified in the appropriate VA qualification standard. The appropriate document from the primary source must be used for the actual verification of the credential but could include a transcript.

(3)] For individuals who will have clinical privileges, written verification of internships, residencies, fellowships, advanced education, clinical practice programs, etc., from the appropriate program director or school is required. For foreign medical graduates, facility officials must verify with the Educational
Commission for Foreign Medical Graduates (ECFMG) that the applicant has met requirements for certification, and must obtain a copy of the ECFMG certificate, if claimed by the applicant.

(4) In cases of graduates of foreign schools of professional nursing, possession of current, full, active, and unrestricted registration will meet the requirement of graduation from an approved school of professional nursing. Documentation from the Commission on Graduates of Foreign Nursing Schools (CGFNS) will serve as primary source verification of education, if applicable.

(5) For Physical Therapists, documentation from the Foreign Credentialing Commission on Physical Therapists (FCCPT) will meet the requirement of graduation from an approved school.

(6) For Occupational Therapists, documentation from the National Board for Certification in Occupational Therapy (NBCOT) will meet the requirement of graduation from an approved school.

(7) If education cannot be verified because the school has been closed, because a school is in a foreign country and no response can be obtained, or for other similar reasons, all efforts to verify the applicant’s education will be documented. In any case, facility officials must verify that candidates meet appropriate VA qualification standard educational requirements prior to appointment.

b. Transcript of Higher Education

(1) Applicants may be asked to provide a transcript of their qualifying education for evaluation by the appropriate PSB prior to appointment. If an individual has a degree in a related field, consideration should be given to obtaining a transcript of this program as well. Transcripts may be requested from other applicants, including nurse anesthetists, PAs, EFDAs, and candidates selected for appointment to an occupation identified in 38 U.S.C. 7401(3).

(2) Transcripts should be evaluated to consider the specific course work completed, grades received, and overall level of difficulty of the program.

c. Educational Profile for Physicians. Facilities may obtain, from the American Medical Association, a profile listing all medical education a physician candidate has received in this country and available licensure information for follow-up as necessary. It should be noted, however, that this is a secondary source and, by itself, is not considered sufficient for verification purposes.

4. EMPLOYMENT [RECORD] AND PREEMPLOYMENT REFERENCES

a. References. Due diligence should be exercised in checking references before making an offer of employment. Facilities at the local level have the discretion to decide how many references are required prior to appointment. VA will still require a total of three, but only one reference (preferably from the applicant’s current or most recent employer(s)) is required prior to appointment and the remaining 2 within 90 days after appointment. The references should be obtained from employer(s) or other individuals who are knowledgeable about the applicant’s work [record (i.e., performance, aptitude, conduct, etc.)].
(1) For any candidate whose most recent employment has been private practice, facility officials will contact institution(s) where clinical privileges are and/or were held, professional organizations, references listed on the application form, and/or other agencies, institutions or persons who would have reason to know the individual’s professional qualifications.

(2) The VA Form Letter 10-341a, Appraisal of Applicant, may be used to obtain references on applicants. However, supplemental information may be required to fully evaluate the educational background and/or prior experiences of an applicant (see subparagraph (3)). Initial and/or follow-up telephone or personal contact with those having knowledge of an applicant’s qualifications and suitability are encouraged as a means of obtaining a complete understanding of the composite employment record. All references must be documented in writing. Written records of telephone or personal contacts must report who was spoken to, that person’s position, the date of the contact, a summary of the information provided, and the reason why a telephone or personal contact was made in lieu of a written communication. Reports of contact are to be filed with other references in the personnel folder and, as appropriate, in the Credentialing and Privileging Folder.

(3) Ideally, references should be from authoritative sources, which may require that facility officials obtain information from sources other than the references listed by the applicant. As appropriate to the occupation for which the applicant is being considered, references should contain specific information about the individual’s scope of practice and level of performance. For example, information on:

(a) The number and types of procedures performed, range of cases managed, appropriateness of care offered, outcomes of care provided, etc.

(b) The applicant’s clinical judgment and technical skills as reflected in results of quality assurance activities and peer review, where appropriate.

(c) The applicant’s health status in relation to proposed duties of the position and, if applicable, to areas where clinical privileges are being sought.

b. Former Federal Employees. For an applicant with prior Federal service, the personnel folder should be obtained before the individual is given a probationary or permanent appointment. If an applicant has prior VA service, [ ] a reference [must be obtained from the last two assignments or all VA assignments in the last 5 years, whichever is longer].

5. PREEMPLOYMENT INTERVIEW. A personal interview is recommended prior to the appointment of any candidate under 38 U.S.C., chapter 73 or 74. The interview should normally be conducted at the VA facility where the individual is to be employed. Arrangements may be made for the interview to be conducted at another VA facility convenient to the applicant. The interview will be conducted by the appropriate official(s) designated by the facility Director. An interview report will be completed and filed with the application. Travel expenses for preemployment interviews may be paid only under provisions of 5 CFR, part 572. The appropriate chief consultant in Central Office may require that a personal interview be conducted for individuals in any occupation included within the scope of this section. All RNs and LPNs will be interviewed prior to appointment.
6. VERIFYING LICENSURE, REGISTRATION AND CERTIFICATION. As part of the credentialing process, the status of the applicant’s licensure and/or registration and that of any required or claimed certifications will be thoroughly reviewed and verified. Specific requirements for these verifications are contained in paragraphs 13 through 17. [for independent practitioners and VHA policy for the credentialing of health care professionals].

7. VERIFYING SPECIALTY CERTIFICATION

a. Definition. For the purposes of this paragraph, specialty certification means having fully completed the requirements of a recognized specialty board or other certifying organization, including the successful passing of the board or certifying examination, as appropriate.

b. Applicants. Prior to appointment, specialty certification will be verified from the primary source. The Chief of Staff will confirm evidence of specialty certification claimed by a physician, dentist, podiatrist, or chiropractor, and certify that verification in the VHA credentialing folder, VetPro. At the request of the Chief of Staff, the facility Director may delegate responsibility for obtaining information about a candidate’s board certification. However, the Chief of Staff must personally certify in the VHA credentialing file that the documentation is of record. For other applicants, the official designated by the facility Director will document verification of specialty certification where required in the VHA credentialing file. See paragraph d for procedures on documenting specialty certification.

c. On-Duty Employees. On-duty employees attaining specialty certification will have their certification verified under paragraph d.

d. Verification Procedures. If listings of specialists are used to verify specialty certification, these listings must be maintained by the primary source with a disclaimer regarding authenticity and be from current or recently issued copies of the publications as follows:

(1) Physicians. Board certification may be verified through the Compendium of Medical Specialists, published by the American Board of Medical Specialists, or the Directory of American Medical Specialists, published by Marquis’ Who’s Who, or by direct communication with officials of the appropriate board. A letter from the board is acceptable for those recently certified. (The address and telephone number of the board may be obtained from the latest Directory of Approved Residency Programs published by the Accreditation Council for Graduate Medical Education.) Copies of documents used to verify certification are to be filed in the VHA credentialing file.

(2) Dentists. Board certification may be verified by the listings in the American Dental Directory published annually by the American Dental Association or by contacting the appropriate Dental Specialty Board. Addresses of these boards may be obtained from the American Dental Association, 211 East Chicago Avenue, Chicago, Illinois 60611.

(3) Podiatrists. Three specialties are currently recognized by the House of Delegates, American Podiatric Medical Association and VA: the American Board of Podiatric Surgery, American Board of Podiatric Orthopedics, and American Board of Podiatric Public Health. Addresses of these boards may be obtained from the latest American Podiatric Directory.
(4) **Other Occupations.** Board certification and other specialty certificates will be verified by contacting the appropriate specialty board or certifying organization.

e. **Evidence of Continuing Certification.** For professions or occupations in which current certification is required, employees must present evidence of such certification upon request throughout VA employment.

**8. DRUG ENFORCEMENT ADMINISTRATION CERTIFICATION**

a. **Background.** Physicians, dentists, podiatrists and certain other professional persons may apply for and be granted renewable certification by the Drug Enforcement Administration (DEA)/[Controlled Dangerous Substance (CDS), Federal and/or State] to prescribe controlled substances as a part of their practice. Certification by DEA/[CDS] certificate. However, certification will be verified as indicated below for individuals who claim on the employment application form to currently hold or to have held DEA/[CDS] certification in the past.

b. **Application Form.** Each applicant in these occupations must provide, on the appropriate VA employment application form, information about his or her current or most recent DEA/[CDS] certificate, if applicable. Any applicant whose DEA/[CDS] certificate has ever been revoked, suspended, limited, restricted in any way, or voluntarily relinquished shall be required to provide a detailed explanation of such action at the time of application for employment.

c. **Restricted Certificates.** A State licensing board may obtain a voluntary agreement from an individual not to apply for renewal of certification or may decide not to approve the individual’s application for renewal as a part of a disciplinary action taken in connection with the individual’s professional practice. While there are a number of reasons a license may be restricted which are unrelated to DEA/[CDS] certification, an individual’s State license is considered restricted or impaired for purposes of VA employment if a State licensing board has suspended the person’s authority to prescribe controlled substances or other drugs; selectively limited the individual’s authority to prescribe a particular type or schedule of drugs; or accepted an individual’s offer or voluntary agreement to limit authority to prescribe. (See paragraphs 13 and 17.)

d. **Verification.** Current DEA/[CDS] certification will be [verified] prior to appointment, and [documented in the VHA credentialing file. Automatic verification of Federal DEA/CDS certification can be performed in VetPro when a match can be made against the current Federal DEA certification information maintained and electronically updated monthly. If verification cannot be made automatically, an authenticated copy of the DEA/CDS certificate must be entered into VetPro.] Current DEA certification will also be sighted during VA employment at the same time as State licensure. (See paragraphs 13 and 17.) The employee will be asked to fully explain in writing if DEA certification has been revoked, suspended, limited, restricted, or voluntarily relinquished since last verified. Upon receipt of such explanation, the Chief of Staff will initiate a review of the employee’s clinical privileges, if appropriate.
Required Action by VA Officials

(1) If action taken on an employee’s DEA/[CDS] certificate has the effect of restricting the individual’s only State license, immediate action will be initiated to separate the employee under provision of VA Directive and Handbook 5021, Part VI, Employee/Management Relations.

(2) If, as a result of the review of clinical privileges, a decision is made to propose revocation of an employee’s clinical privileges, separation action will be initiated using procedures in VA Directive and Handbook 5021, Part II, Employee/Management Relations.

9. CLINICAL PRIVILEGES

a. Review of Clinical Privileges. Applicants completing VA application forms will be required to respond to questions concerning clinical privileges at VA and non-VA facilities. If possible, copies of clinical privileges will be obtained for review from the applicant or from the institutions where privileges are or were most recently held.

b. Evaluation of Privileges. As part of the credentialing process, information on clinical privileges will be evaluated by appropriate facility officials. Details concerning any limitation(s) on privileges will be carefully considered prior to appointment.

c. On-Going Review. Clinical privileges will be established and reviewed throughout the individual’s employment following standards and guidelines issued by VHA and established in the VA facility’s medical staff bylaws. The clinical privileging process must be completed prior to initial appointment.

NOTE: Additional VHA policy concerning clinical privileges is contained in VHA Handbook 1100.19, Credentialing and Privileging.

10. MALPRACTICE CONSIDERATIONS

a. Applicants. VA employment applications forms require applicants to give detailed written explanations of any involvement in administrative, professional or judicial proceedings, including Federal torts claims proceedings, in which malpractice is or was alleged. If an applicant has been involved in such proceedings, a full evaluation of the circumstances will be made by officials participating in the credentialing, selection and approval processes prior to making any recommendation or decision on the candidate’s suitability for VA employment.

b. Employees. Each employee will be asked to indicate at the time of licensure verification any involvement in proceedings described in subparagraph a, and to provide a written explanation of the circumstances, if appropriate. A review of clinical privileges, as appropriate, will be initiated if clinical competence issues are involved.

c. Evaluation of Circumstances. Facility evaluating officials will consider VA’s obligation as a health care provider to exercise reasonable care in determining that individuals are properly qualified, recognizing that many allegations of malpractice are proved groundless. Facility officials will evaluate employee to provide copies of documents pertaining to the case. Reasonable efforts will be made to.
assure that only individuals who are well-qualified to provide patient care are permitted to do so. [Facility officials should direct questions concerning legal aspects of a particular case to the District Counsel].

11. DEANS COMMITTEE, MEDICAL ADVISORY COMMITTEES AND OTHER ADVISORY BODIES. At [healthcare] facilities [with] teaching programs, the Under Secretary for Health will approve the establishment of a Deans Committee, Medical Advisory Committees and other advisory bodies [(See VHA Handbook 1400.03, Veterans Health Administration Educational Relationship for more information)]. The Deans Committee may nominate, for consideration by the [facility] director, physicians and dentists for appointment to the professional staff of the facility, including chiefs of service. [Nominees may include individuals] appointed on a paid or without compensation [assignment on a] full-time, part-time or intermittent [basis]; to those appointed on an on-facility fee-basis; and to consultants and attendings. The [facility] director should consider the [Deans Committee’s] recommendations, but the [facility director has the final appointment] decision.

12. SUITABILITY.
   a. General. If [facility officials obtain adverse information during the credentialing process, they will review this against suitability criteria and make a determination in accordance with 5 CFR 731. The District Counsel can answer] questions concerning the use of adverse information in making suitability determinations or the legality of adverse determinations and personal liability involvement.

   b. Applicants. If there is any question about an applicant’s suitability, no appointment action will be taken, nor will an employment commitment be made, until the matter [is] resolved.

   c. Employees. Conclusive evidence of preemployment unsuitability (character traits, past work performance, etc.) may arise after an individual’s appointment under 38 U.S.C., chapter 73 or 74. If continued employment is not in the best interest of the service, the employee’s appointment will be terminated under VA Handbook 5021, [Employee/Management Relations, Part VI, Employee Title 38 Separations Not Covered by Parts II and III of this handbook].

13. GENERAL LICENSURE AND REGISTRATION REQUIREMENTS.
   a. General. Specific licensure, registration and certification requirements for individuals appointed under 38 U.S.C., chapter 73 or 74 are included in paragraphs which follow and in the appropriate qualification standard for the occupation. This paragraph contains definitions and general provisions which apply to all occupations for which licensure and/or registration are required. Applicants must possess at least one active, current, full and unrestricted license, registration or certification which must be verified by primary source verification from the [state] licensing board (SLB), to be eligible for appointment, if required for the occupation in the appropriate qualification standard. If all licenses, registrations or certifications are impaired, the individual is ineligible for appointment in VA. Additionally, if the applicant’s sole license is considered to be inactive by the [state] issuing the license (e.g., the [state] considers the license to be “inactive” because the individual is not
practicing in the [state] where the license is held), the individual is ineligible for appointment in VA.

b. **Definitions.**

(1) **Active Licensure.** An active, current, full and unrestricted license, registration or certification in a state is one which authorizes the licensee to practice outside VA without any change needed in the status of the license. Employees are responsible for paying fees necessary to maintain a full and active license in a state. If a state waives fees for any reason, such as for an out-of-state practice or for employment in a Federal facility, the employee may not accept the waiver if this will place the license in an inactive or other restricted status.

(2) **Primary Source Verification.** Primary source verification is documentation from the original source of a specific credential verifying the accuracy of a qualification.

(3) **State.** The term “state” means any of the states, territories and possessions of the United States, the District of Columbia and the Commonwealth of Puerto Rico.

c. **Qualification Requirements [Pursuant to] 38 U.S.C. § 7402(f).** Covered licensure actions are based on the date the credential was required by statute or [VA qualification standard for the occupation.

(1) For the purposes of 38 U.S.C. § 7402(f), “for cause” means professional misconduct, professional incompetence, substandard care or any issue requiring VA to report a provider to a SLB under 38 C.F.R. § 47.2. The District Counsel will address questions concerning interpretation of “for cause” or an assessment of whether a matter constitutes “for cause.” The following are examples of reasons a license may be revoked, terminated or voluntarily relinquished that would be considered “for cause.” This is not a comprehensive, exhaustive or exclusive list and a “for cause” assessment should be reviewed on a case-by-case basis.

(a) Higher than expected radiology misinterpretations;

(b) Higher than expected surgical complication rates;

(c) Failure to address critical alerts in a timely manner;

(d) Failure to adequately document patient care;

(e) Diversion of drugs;

(f) Providing, or intending to provide, patient care while under the influence of drugs or alcohol;

(g) Inappropriate relationship with patient;

(h) Patient abuse;
(i) Intentional harm of a patient;

(j) Research malfeasance;

(k) Exhibiting a pattern of poor professional judgment and skill; and/or

(l) Egregious instances of unacceptable actions related to patient care (inadvertently leaving a clamp in a patient after a surgical procedure).

(2) Applicants seeking appointment on or after November 30, 1999, (see Veterans Millennium Health Care and Benefits Act, P.L. 106-117), who have been licensed, registered or certified, as applicable to the occupation for which they are seeking employment, in more than one state and who are being credentialed for a position identified in 38 U.S.C. § 7402(b), other than a facility director, are not eligible for appointment in that occupation if:

(a) The applicant’s license, registration or certification has ever been revoked or terminated “for cause” by any of those states; or

(b) The applicant has voluntarily relinquished a license, registration or certification in any of those states, after being notified in writing by that state of potential revocation or termination for cause.

i. Such individuals may only be eligible for appointment in the occupation if their revoked, terminated or voluntarily relinquished license, registration or certification is restored to a full and unrestricted status.

ii. Covered licensure actions are based on the date the credential was required by statute or the [VA qualification standards for the occupation]. [ ] For example, if VA first required the credential in 1972, [the credential was terminated or voluntarily relinquished in 1983], and the individual applies, or was appointed, to VA after November 30, 1999, the individual is not eligible for VA employment in the covered [occupation] unless the [terminated or voluntarily relinquished] credential is restored to an active, current, full and unrestricted status. However, if the [credential was terminated or voluntarily relinquished] in 1970, before it was a VA requirement, eligibility for VA employment would not be affected. [For guidance regarding eligibility for employees with an impaired license, registration or certification, and for those employees appointed before November 30, 1999, with an impaired license refer to paragraph 17 below-Continuing Licensure, Registration and/or Certification Requirements for Employees.]

(3) [If an individual has voluntarily surrendered their license, registration or certification, applicable to the position, VA must confirm from the primary source that the individual was notified in writing of the potential for termination for cause. If the entity verifies written notification was provided, the applicant is not eligible for employment unless the surrendered credential is fully restored to an active, current, full and unrestricted status.]
(4) Where the [state] licensing, registration or certifying entity fully restores the revoked, [terminated or voluntarily relinquished credential], the provider’s eligibility for employment is restored. These individuals are subject to the same employment process that applies to all individuals in the same job category who are entering the VA employment process. In addition to the credentialing requirements for the position, [facility officials must conduct] a complete review of the facts and circumstances concerning the action taken against the [state] license, registration or certification and the impact of the action on the professional conduct of the applicant. [Facility officials must document] this review in the licensure section of the credentials file.

(5) This [guidance] applies to licensure, registration or certification required as applicable to the position subsequent to the publication of this policy and required by statute or VA qualification standards, effective with the date the credential is required.

d. **Primary Source Verification.** [ ] Information obtained through the verification must be documented in writing, either by letter, memo, report of contact or secure electronic verification (e.g., website) in the VHA credentialing file. [Facility officials must verify licensure] from a primary source at the time of initial appointment, reappointment and expiration in accordance with [policy in VHA Handbook 1100.19, “Credentialing and Privileging” and VHA Directive 2006-067, “Credentialing of Health Care Professionals.”]

[ ]

e. **Changes in Authority to Prescribe.** [ ] The license of an individual in an occupation authorized to prescribe is considered to be restricted or impaired if the SLB has suspended the individual’s authority to independently prescribe controlled substances or other drugs; selectively limited the individual’s authority to prescribe a particular type or schedule of drugs; or accepted an individual’s offer or voluntary agreement to limit the authority to prescribe.] The [state’s] action may be taken in connection with the individual’s [Drug Enforcement Administration (DEA)] certification and/or with a separately issued [state] authorization to prescribe. [(See paragraph 8 of this section.)] This is only one example of a situation in which an individual’s license may be restricted or impaired.

f. **Changes in State Licensure Requirements.** [Employees are] responsible for complying with any changes in licensure and/or registration requirements which may be imposed by the [state(s)] of licensure. If employees show they were not notified of the new requirement and proceeded in good faith under the assumption that the license remained full and unrestricted, this is accepted as prima facie evidence of licensure up until discovery of the change in requirements. When employees are notified through any source of a change in requirements, they must act immediately to make the license whole at the earliest possible date, normally no more than 15 workdays after notification. If employees are unable to make the license whole and, as a result, holds no full unrestricted license in a [state], actions to separate for failure to meet qualification requirements must be taken under VA Handbook 5021.

g. **Administrative Delay by State Licensing Board [(SLB)].**
(1) Facility officials who learn that a SLB has declared a system-wide delay in processing renewal applications of registration prior to the expiration date, and has granted a special grace period as a result of the delay, should notify [Office of the Chief Human Capital Officer (OCHCO), Recruitment and Placement Policy Service (RPPS)] so a general notice to all VHA facilities can be issued. The delay must be general rather than personal in scope and impact. If no such notice has been issued by [OCHCO, RPPS], facility officials should verify with the [state] board that VA employees are considered to be fully licensed,[ registered or certified] during the delay period. Verification of current licensure, [registration or certification] may be obtained through telephone contact with the [state] board pending receipt of the renewal. Typically, this will involve a large amount of license renewals and would not pertain to the individual renewal license.

(2) Under these unique circumstances, if [employees are] unable to present evidence of current licensures, [registrations or certifications] prior to the expiration date, facility officials [must] verify through written or telephone contact with the SLB that the employees’ applications for renewal [are] received and the [employees are] considered to be fully licensed, [registered or certified]. If officials are unable to verify this with the SLB prior to the expiration date of licensure, [employees] will be required to provide evidence that the application for renewal was made in a timely manner (e.g., 30 days) in order to be permitted to continue in a work status. Where possible, [a facility official must sight] evidence of the employees’ application for licensure, [registration or certification] renewal and appropriately document in the VHA credentialing file until primary source verification of renewal is received. Employees are notified in writing that separation actions may be initiated under provisions of VA Handbook 5021, Part VI, if evidence of renewal is not received within 30 workdays of the expiration date. Some states authorize a “grace period” after the licensure,[ registration and/or certification] expiration date, during which an individual is considered to be fully licensed, [registered and/or certified] whether or not the individual has applied for renewal on a timely basis. Facility officials [must not] initiate separation procedures for failure to maintain licensure, [registration or certification] on a practitioner whose only license, [registration and/or certification] has expired if the [state] has such a grace period and considers the practitioner to be fully and currently licensed, [registered or certified].

h. **Questionable Licensure Status.** [Facility officials must consult with District Counsel if circumstances cause them to question the status of an employee’s license, registration or certification or if it meets statutory or regulatory requirements. See subparagraph 17c of this section for additional information.]

i. **Payment of Licensure or Registration Renewal Fees.** VA employees are responsible for [paying] any required fees [in] a timely basis to [ensure] their [licensures, registrations or registrations are] maintained [in] a current, active [status]. If an affiliated institution normally pays [the] fees for VA employees who work part-time or have teaching agreements at that institution, [employees] [are still responsible] for assuring that [licensures, registrations, or certifications are] maintained in an active, current status.
14. LICENSURE FOR PHYSICIANS, DENTISTS, PODIATRISTS, OPTOMETRISTS AND CHIROPRACTORS.

a. General. Any physician, dentist, podiatrist, optometrist or chiropractor appointed under 38 U.S.C., chapter 73 or 74 is required to possess an active, current, full and unrestricted license to practice medicine, surgery, osteopathy, dentistry, podiatry or optometry, as appropriate, in a [state], and must furnish evidence of this prior to appointment. Current registration will be maintained in accordance with the requirements of the [state] of licensure and evidence of such licensure and registration must be presented by the employee for verification periodically as requested throughout VA employment. A limited license or any other license less than a full, unrestricted [state] license; however, denominated (e.g., temporary, limited or institutional), will not meet the licensure requirement for appointment under 38 U.S.C., chapter 73 or 74.

b. Exceptions. The only exceptions to the licensure requirements are [ ]:

1. [Individuals meeting] all the professional requirements for admission to the [state] licensure examination and passed the examination, but [possess] a [state] license [ ] limited on the basis of non-citizenship or not meeting the residence requirements of the [state].

2. [Individuals granted] an institutional license by the [state] which permits faculty appointment[s] and full, unrestricted clinical practice at a specified educational institution and its affiliates, including the VA [healthcare] facility; or, an institutional license [permitting] full, unrestricted clinical practice at the VA [healthcare] facility. This exception [is] used only to appoint individual[s] who [are] well-qualified, recognized expert[s] in [their] fields, such as visiting scholars, clinicians and/or research scientist[s] and only under authority of 38 U.S.C. § 7405. It may not be used to appoint individual[s] whose institutional [licenses are] based on action[s] taken by SLBs as described in paragraph 13c above.

3. [Individuals meeting] all the professional requirements for admission to the [state] licensure examination and [have] passed the examination[s], but who [have] been issued time-limited or temporary [state] license[s] or permit[s] pending a meeting of the [state] licensure board to give final approval to the [candidates’] request for licensure. The license[s] must be active, current and permit a full, unrestricted practice. Appointments of individuals with such licenses must be made under authority of 38 U.S.C. § 7405 and will be time-limited not to exceed the expiration date of licensure.

4. [Residents holding licenses] which geographically limit the area [ ] which practice is permitted or which limits [residents] to practice only in specific [healthcare] facilities, but [ ] authorizes [them] to independently exercise all the professional and therapeutic prerogatives of the occupation. In some states, such licenses may be issued to residents to permit them to engage in outside professional employment during the period of residency training. This exception does not permit the employment of a resident who holds a license which is issued solely to allow the individual to participate in residency training.
c. **Verification.** The [facility] chief of staff will ensure physicians, dentists, podiatrists, optometrists and chiropractors [licensure and registrations] are verified prior to their appointment under 38 U.S.C. §§ 7306, 7401 or 7405. This includes all individuals serving on a full-time, part-time, intermittent or on-facility fee basis (including consultants and attendings), whether paid or without compensation.

(1) **Licensure Verification with State Boards.** The [facility] chief of staff will confirm in the VHA credentialing file, VetPro,[ ]the status of all licenses claimed by physicians, dentists, podiatrists, optometrists and chiropractors, [are] verified with the appropriate SLB for all [states] in which the applicant lists having ever held a license. This includes licenses which the applicant lists as active, current, full and unrestricted as well as licenses the applicant lists which were held at any time in the past and which have been allowed to lapse or which are no longer current for any reason. Although professional standards boards for initial appointments of dentists, podiatrists, optometrists and chiropractors are normally held in VA Central Office (VACO) or at a designated field facility, the [facility] chief of staff or designee is responsible for sighting verification of the licensure of these individuals.

(2) **Review of Employment Application.** [Facility officials must contact the state board to ensure that no restriction or revocation action has occurred for candidates with recent employment in a state in which no licensure is indicated on the application form.]

(3) **Physician Screening with Federation of State Medical Boards (FSMB).** [Facility officials must conduct a mandatory FSMB query and document the results in] the VHA credentialing file, VetPro.

d. **Licensure History.** [For guidance on appointments, refer to paragraph 13c, Qualification Requirements Pursuant to of 38 U.S.C. § 7402(f).]

e. **Waiver of Licensure Requirement.**

(1) The appointing official may waive the licensure requirement of [ ]physician, dentist, podiatrist, optometrist or chiropractor [occupations if the candidates are being appointed to a] research, academic or administrative position [when they have] no direct responsibility for patient care.

(2) The facility director may waive the licensure requirement if the individual is serving in a country other than the United States and licensure is in that country (i.e., Philippines).

**15. REGISTRATION FOR NURSES AND NURSE ANESTHETISTS.**

a. **General.** Any nurse or nurse anesthetist appointed under 38 U.S.C., chapter 73 or 74 is required to possess active, current, full and unrestricted registration as a graduate professional nurse in a [state], which must be verified by primary source verification from the SLB prior to appointment. Information obtained through the verification process must be documented in writing, either by letter, memo, report of contact or secure electronic verification. Documentation will be filed permanently in the official personnel folder. A
limited registration or any other registration less than a full, unrestricted [state] registration does not meet the registration requirement for appointment.

b. **Verification.** The [HR Officer] or nurse executive or designee, must obtain primary source verification from the SLB of the registration of all nurses and nurse anesthetists prior to their appointment under 38 U.S.C., chapter 73 or 74. This includes full-time, part-time, intermittent and on-facility fee basis nurses and nurse anesthetists (including consultants), whether they are paid or serving without compensation. Nurses utilized on an on-facility contract or on-facility sharing agreement basis are also covered by provisions of this paragraph.

(1) Except as provided in subparagraph d, every VHA nurse and nurse anesthetist must have at least one active, current, full and unrestricted registration as a graduate professional nurse in a [state].

(2) The appropriate official will certify in the VHA credentialing file, VetPro [ ], that the status of all registration(s) has been verified with the appropriate [state] board(s) for all [state(s)] in which the applicant lists having ever held registration. This includes registration(s) which the applicant lists as active, current, full and unrestricted as well as registration(s) the applicant lists which were held at any time in the past and which have been allowed to lapse or which are no longer current for any reason.

(3) For nurses and nurse anesthetists with recent employment in a [state] in which no registration is indicated on the application form, the [state] board will be contacted to assure that no restriction or revocation action has occurred.

c. **Impaired Registration.** Appointing officials may approve the appointment or reappointment of a registered nurse or nurse anesthetist who has previously had impaired registration, provided the candidate currently has full and unrestricted registration (refer to paragraph 17c of this section).

d. **Waiver of Registration Requirement.** The facility director may waive the registration requirement of a nurse or nurse anesthetist if the individual is [serving] in a country other than the United States and the registration is in that country (i.e., Philippines).

### 16. LICENSURE, REGISTRATION AND/OR CERTIFICATION FOR TITLE 38 ASSOCIATED HEALTH PERSONNEL.

a. **General.** Any [employee in a physician assistant (PA) or expanded-function dental auxiliaries position] appointed under 38 U.S.C. §§ 7401(1) or 7405(a)(1)(A) must meet licensure, [registration] or certification requirements as specified in the appropriate qualification standard. Individuals appointed under 38 U.S.C. § 7401(3) or under 38 U.S.C. §§ 7405( a)(1)(B) or 7306 to occupations listed in [38 U.S.C.] § 7401 must meet licensure, registration and/or certification requirements in the appropriate qualification standard for the occupation. Applicants will provide evidence of current licensure, registration and/or certification and other relevant credentials for verification prior to appointment and throughout the appointment process as requested. [Using the VHA credential process, facility officials will verify credentials] from a primary source prior to
appointment. Once appointed, employees [must] maintain multiple licenses, registrations and/or certifications in good standing and keep VA [officials] apprised of anything that would adversely affect or otherwise limit their appointment, e.g., health issues, proposed and final actions against a claimed credential, etc. A limited license, registration or certification or any status of these which is less than full and unrestricted will not meet the qualification standard requirement for the occupation.

b. **Verification.** Prior to appointment, each applicant’s credentials will be checked as follows and verified [in accordance with applicable VHA credentialing policy] for dependent practitioners and documented in the VHA credentialing folder, VetPro, by officials designated by the facility director as follows:

1. [The facility director designates the official(s) responsible for documenting the status of all licenses, registrations or certifications with the appropriate state boards for all states the applicant lists ever having licensure, registration or certification on VA Form 10-2850C, Application for Associated Health Occupations.] This includes licenses [registrations or certifications] which the applicant lists as active, current, full and unrestricted as well as license(s), registration(s) or certification(s) the applicant lists which were held at any time in the past and which have been allowed to lapse or which are no longer current for any reason.

2. Candidates for appointment under 38 U.S.C. § 7401(3) or 38 U.S.C. § 7405(a)(1)(B) and [expanded-function dental auxiliaries (EFDAs)] appointed under 38 U.S.C. §§ 7401(1) or 7405(a)(1)(A) must present evidence of [license, ] registration or certification by the appropriate national certifying body prior to appointment. [The official(s) designated by the facility director documents the verification in the VHA credentialing file, VetPro.]

3. PAs must present evidence of certification by the appropriate national certifying body prior to appointment for verification by the official(s) designated by the facility director in the VHA credentialing file, VetPro. Licensure is required for PAs to practice outside VA in some [states], although it is not required for VHA employment. If a PA claims licensure in any [state(s)], the official(s) designated by the facility director [verifies] licensure status with the SLBs as a part of the credentials review and documents the verification in the VHA credentialing file.

4. [The appropriate official(s) must contact state boards to ensure that no restriction or revocation has occurred for candidates with recent employment in a state in which no licensures, registrations or certifications are indicated on the application form.] Such verification must be documented in the VHA credentialing file.

c. **Impaired Licensure.** Appointing officials may approve the appointment or reappointment of an individual covered by this paragraph who has previously had an impaired license, registration or certification, provided the candidate currently has full/unrestricted [license, registration or certification] (refer to paragraph 17c of this section).
17. CONTINUING LICENSURE, REGISTRATION AND/OR CERTIFICATION REQUIREMENTS FOR EMPLOYEES.

a. Verification of Primary License.

(1) The expiration date of an appointee’s primary license, registration and/or certification, [is] coded for follow-up purposes as provided in VA Manual MP-6, part V, supplement No. 1.5 (PAID [Coding Manual]). For coding purposes, the appointee will specify the state in which primary licensure is claimed. The facility director will designate the official(s) who [is] responsible for the follow-up verification of these credentials. Facility designees will verify licensure, certification and registration by primary source verification from SLB. Information obtained through the verification process must be documented in writing, either by letter, memo, report of contact or secure electronic verification (e.g., website). Documentation is filed permanently in the employee’s VHA credentialing file.

(2) Only the initial and latest verification [must be maintained in the VHA credentialing file. HR office staff are not required to code follow-up expiration dates for employees whose registration or certification is issued on a one-time basis for whom there is no continuing requirement to maintain currency.] [ ]

b. Other Verification.

(1) Individuals with multiple licenses, registrations and/or certifications are responsible for maintaining these credentials in good standing and of informing the [facility] director or designee of any changes in the status of these credentials.

(2) [Employees must provide] confirmation for any active license that is not renewed at the time of expiration or at the time of reappraisal that such license expired in good standing.

(3) [Facility directors are] responsible for establishing a mechanism for assuring that such multiple licenses, registrations and/or certifications are consistently held in good standing or, if allowed to lapse, are relinquished in good standing. For any such credentials which were held previously, but which are no longer held or no longer full and unrestricted, the employee will be asked to provide a written explanation of the reason(s). The verifying official will contact the [state] board(s) or issuing organization(s) to verify the reason(s) for any change.

c. Impaired Licensure.

(1) [When facility officials learn] an employee with an active, current, full and unrestricted license, registration or certification in a [state] has had any other license or registration [or certification] to practice, as applicable to their current occupation, revoked or terminated for cause, or such license, registration or certification was voluntarily relinquished after being notified in writing by that [state] of the potential termination for cause, they must determine if the employee is eligible to maintain [their] appointment. See paragraph 2 below and 38 U.S.C. § 7402(f).
(2) In those cases where the license, registration or certification has been revoked, terminated or the employee has voluntarily relinquished such license, registration or certification after being notified in writing by that [state] of the potential termination for reasons other than “for cause,” facility officials will investigate to ascertain the full circumstances and, if appropriate, will initiate a review of clinical privileges, take disciplinary action and/or separation procedures.

(3) If the findings of the investigation determine the employee did not violate 38 U.S.C. § 7402(f), then the employee may be retained. In cases where the license, registration or certification has been suspended, denied, restricted, limited, issued/placed on probationary basis, facility officials will engage in the same process identified in paragraph (2).

(4) The following individuals are not eligible for continued appointment:

(a) Individuals who were appointed before November 30, 1999, to a position identified in 38 U.S.C. § 7402(b) (other than a facility director) who have maintained continuous appointment since that date and are identified as having been licensed, registered or certified (applicable to their current position) in more than one [state] and, on or after November 30, 1999, have had such license, registration or certification revoked or terminated for cause by any of those [states]; or

(b) Individuals who were appointed before November 30, 1999, to a position identified in 38 U.S.C. § 7402(b) (other than a facility director) who have maintained continuous appointment since that date and are identified as having been licensed, registered or certified (as applicable to their current position) in more than one [state] and, on or after November 30, 1999, voluntarily relinquished a license, registration or certification in any of those [states] after being notified in writing by that [state] of potential termination for cause.

(5) Individuals who were appointed prior to November 30, 1999, and have been on a continuous appointment since that date are not disqualified for employment by any license, registration or certification revocations or terminations for cause, or voluntary relinquishment after being notified in writing by that [state] of potential termination for cause that predate November 30, 1999, provided they possess one full and unrestricted license applicable to the position. See 38 U.S.C. § 7402(f).]

d. **Failure to Maintain Current Licensure, Registration or Certification.**

(1) An employee who does not maintain an active, current, licensure, registration and/or certification (if required), or who fails to show evidence of such when requested [ ], must be separated under appropriate procedures in VA Handbook 5021, Part VI. The District Counsel will answer questions about whether to separate an employee based on failure to maintain current licensure, registration or certification.

(2) Some states authorize a grace period after the licensure, [registration and/or certification] expiration date, during which an individual is considered to be fully licensed, [registered and/or certified] whether or not the individual has applied for
renewal on a timely basis. Facility officials will not initiate separation procedures for failure to maintain licensure,[ registration or certified] on an employee whose only license,[ registration and/or certification] has expired if the [state] has such a grace period and considers the employee to be fully and currently licensed/registered/certified.

18. REPORTING TO STATE LICENSING BOARDS. Licensed, [registered and/or certified] employees and former employees will be reported to [state] licensing, [registration or certifying] boards and/or to other monitoring bodies in accordance with provisions VHA Handbook 1100.18, Reporting and Responding to SLBs. This requirement applies to all licensed, [registered and/or certified] employees included within the scope of this chapter, including residents.

19. HEALTH STATUS OF APPLICANTS AND EMPLOYEES.

a. General. The credentialing process includes an evaluation of the health status of applicants as well as employees. Policies and procedures related to physical requirements for applicants and employees are contained in VA Handbook 5019, [Employee Occupational Health Service], Part II, [Examinations and Evaluations].

b. Preemployment Physical Examination. All full-time, part-time and intermittent employees are required to satisfactorily complete a preemployment physical examination prior to appointment as required for positions with positive physical and mental requirements outlined in VA Handbook 5019.

c. Certification of Physical and Mental Fitness. All applicants and employees, whether paid or appointed on a without compensation basis, who request clinical privileges, including those utilized on a full-time, part-time or intermittent basis, as consultants or attendings or on a fee-basis, and including those utilized on an on-facility contract or on-facility sharing agreement basis, [are] required to certify that they are physically and mentally capable of performing the requested privileges. Service chiefs will be required to certify that, to the best of their knowledge, the applicant or employee is physically and mentally capable of satisfactorily performing the requested clinical privileges. In cases where the service chief is a nonphysician, certification of satisfactory health status must also be obtained from a physician who is familiar with the duties the individual is privileged to perform [ ].

20. CREDENTIALS OF RESIDENTS AND TRAINEES.

a. General. Medical, dental, podiatry, optometry and chiropractic residents and trainees appointed under 38 U.S.C. §§ 7405 or 7406 must meet the licensure requirements for residents and trainees specified in the appropriate qualification standard for the occupation. If licensure is required, evidence of licensure must be furnished prior to appointment and periodically throughout VHA employment as requested.

NOTE: [ ]See VHA Handbook 1400.01, Resident Supervision.
b. Verification.

(1) [The program director for an integrated program must send the Trainee Qualifications and Credentials Verification Letter (TQCVL) (formerly the Residents/Trainees Credentials Verification Letter or RCVL) through the facility chief of staff to the facility director for approval prior to the facility director’s approval of the appointment of any resident or trainee, whether paid or without compensation.] If the residency or training program is not integrated with an affiliate, the VA facility program director must verify all credentials of residents or trainees and sign the [TQCVL]. A new [TQCVL] is required for each academic year that the resident or trainee is appointed to a VA facility.

(2) The [TQCVL contains certification] that all the documents needed for the appointment of that particular individual into the program are in order. For medical residents, these documents must be in compliance with the requirements of the Accreditation Council for Graduate Medical Education (ACGME) and must also meet all requirements of the program. The program director must verify all credentials (diplomas, letters of reference, certificates of advanced training and, where applicable, Educational Council for Foreign Medical Graduates (ECFMG) certification, DEA certification and all [state] professional licenses held prior to entry into the program or obtained during residency training) and affirm the resident or trainee is physically and mentally fit to take care of patients. (See appendix II-I of this chapter for sample [TQCVL] letter.)

(3) The program director will notify the facility director if a resident or trainee has had any [credentialing problems]. Specifically, this will include any problems relating to diplomas, references, previous residency or other training, licensure, clinical privileges, DEA certification and/or professional liability insurance as indicated on the employment applications. (VA Form 10-2850b[, Application for Residency,] for medical and dental residents and VA Form 10-2850c [ ] for other residents and trainees.)

(4) Residents functioning within the scope of their training program must meet clinical practice requirements as specified in VHA Handbook 1400.01, Resident Supervision. [The program director, or in certain cases, by the appropriate VA service chief must provide the TQCVL that confirms that ACGME-established criteria for the essentials and special requirements for residency training programs have been followed.] Such residents are generally excluded from clinical privileging requirements required for VHA staff physicians, except as provided for in subparagraph d [of this paragraph.]

(5) [Appendix II-I of this chapter contains a sample format for the TQCVL.] It must include a list of all the paid or without compensation residents or trainees to be rotated at any time during the academic year to the VA facility.

(6) [The facility chief of staff will retain the] original [TQCVL] from each program director for the academic year [ ] in a Resident/Trainee Credentials Verification File [for five years].
(7) Until the facility director countersigns the program director’s [TQCVL], a resident or trainee [will not] be allowed to participate in any of the patient care activities at the VA facility. There will be no exceptions to this policy.

c. **Application Form.** Prior to [appointing] any resident or trainee, the [facility] chief of staff or the facility director’s designee will document in the VHA credentialing file [ ] evidence of current, full and unrestricted licensure, [registration and/or certification] has been verified by primary source from the SLB in which the applicant claims to have ever been licensed. The [TQCVL] may be cited as evidence of licensure verification and as evidence of verification of other required credentials. If the [TQCVL] is cited as evidence of credentials verification, this will be noted on the VA Form 10-2850b [and] 10-2850c or on VA Form 4682, Certification of Licensure, Registration, or Bar Membership.

d. **Employment of Residents as Admitting Physicians.** [Medical residents] functioning outside the scope of [their] training program who [are] appointed as [ ] admitting physician[s] must meet VA physician qualification standard requirements, including licensure in a [state], be fully credentialed in accordance with provisions of this section, and be privileged in accordance with provisions applicable to VHA staff physicians.
SECTION C. PROFESSIONAL STANDARDS BOARDS

1. ESTABLISHMENT

a. Professional Standards Boards (PSBs) act for, are responsible to, and are agents of the Under Secretary for Health for occupations listed in 38 U.S.C. 7401(1), [[with the exception of those occupations under 38 USC 7401(3); See Section F of this part]] and part time or intermittent registered nurses (RNs) in the following matters.

(1) **Podiatrists, Optometrists, Chiropractors, RNs, Nurse Anesthetists, PAs and EFDAs.** In matters concerning appointments, advancements, and probationary reviews for these occupations, PSBs will determine eligibility and recommend the appropriate grade and step for appointment, recommend candidates for advancement, and conduct probationary reviews, when applicable. This includes part time or intermittent (including temporary service) for RNs appointed under 38 U.S.C. 7405(a)(1) since May 5, 2010.

(2) **Physicians and Dentists.** In matters concerning appointments and probationary reviews, PSBs will determine eligibility for appointment and conduct probationary reviews. See VA Handbook 5007, Part IX, Physician and Dentist Pay regarding the role and responsibilities of compensation panels in determining physician and dentist pay for appointments.

b. Members of boards serve in a dual capacity. They deal with matters in which they must divest themselves of their identity with the particular facility at which they are employed and must become representatives of and primarily concerned with the needs and problems of the entire VHA.

c. VHA management officials are responsible for ensuring the effective functioning of boards under their jurisdiction.

2. APPROVING AUTHORITIES FOR BOARD MEMBERSHIP. The following officials may approve or terminate board membership. A second Chair or Co-Chair may be appointed to a Board when the approving authority determines it is necessary and appropriate to do so. (For composition of boards, see paragraph 5.)

a. **National Boards.** The Under Secretary for Health, or designee, may approve or terminate membership on National boards, including appointment of the board Chair.

b. **Regional Boards.** The Under Secretary for Health, or designee, may approve or terminate membership on Regional boards, including appointment of the board Chair.

c. **VISN Boards.** Except as provided in paragraph 3a, the Network Director will establish VISN boards. The Network Director or designee may approve or terminate membership on VISN boards, including appointment of the board Chair.
d. **Facility Boards.** The facility Director may approve or terminate membership on facility boards, including appointment of the board Chair. The appropriate service chief or equivalent position will nominate board members and recommend a board Chair.

e. **Termination of Board Membership.** Appointments to the board under paragraphs 2a through 2d above may be terminated whenever an individual's performance, conduct, or position is incompatible with board membership. Examples include receipt of performance rating of below the fully successful level (or equivalent), breach of confidentiality, failure to attend meetings or to complete assignments in a timely manner, expiration of term as Board member, and election or appointment as a union official.

3. **BOARD MEMBERSHIP**

a. Persons selected to serve on boards will be chosen from the most capable, experienced and responsible personnel. Board members must be at a grade and level that is equal to or higher than that of the candidate being considered. Board membership should also be sufficiently broad to cover the range of practice within an occupation and where possible include all grades and levels within an occupation.

b. Recommending officials will not serve on boards considering their recommendations. Employees will not serve on boards for which they serve as the approving official.

c. Boards may be composed of three or five voting members who were appointed under 38 U.S.C. chapters 73 or 74. However, when necessary, the Under Secretary for Health or designee may appoint other qualified individuals to National boards. One of the members will be appointed as Chairperson of the board. Board membership will also include a Secretary, who may or may not be one of the voting members. The role of the Secretary is to record, prepare and submit notes of the Board proceedings and relevant discussion to the PSB Chair. The Secretary is also responsible for completing page two of VA Form 10-2543 and obtaining Board members' signatures. The signatures of the board members and the approving official may be original, facsimile, or digital.

d. The Human Resources Management Officer or designee will serve as technical advisor on all board actions. Attendance at Board meetings by the Human Resources technical advisor is required.

e. Upon initial and all subsequent appointments to a Board, whether a facility, VISN, or national Board, all appointees, including the Chair, members, and the Secretary, must take the Professional Standards Board training.

4. **COMPOSITION OF BOARDS.** Whenever possible, PSBs will be composed of three or five employees from the same occupation as the individual being considered. When three or five members from the same occupation are not available, appropriately qualified individuals from other occupations may be appointed, provided the board is composed of a majority of the
employees from the occupation involved (see note below). When the appropriate minimum number of employees in the occupation is not available or the number of employees is too small to provide for an independent review, an alternate board must be used.

5. **BOARD FUNCTIONS.** The primary functions of boards are to:

   a. Review and act on employment applications and determine whether the applicant meets the requirements set forth in VA qualification standards. Sound professional and administrative judgment will be exercised in reviewing applications to ensure that VA obtains the best qualified personnel.

   b. Review completely an individual’s qualifications for advancement by an examination of the personnel folder, proficiency reports or performance appraisals, supervisory evaluations, and other pertinent records; and to make recommendations based on their findings.

   c. Conduct probationary reviews for individuals appointed under 38 U.S.C. 7401(1), or as part time or intermittent RNs under 38 U.S.C. 7405(a)(1).

   d. Execute VA Form 10-2543, Board Action.

   e. National boards make recommendations to the Under Secretary for Health or designee on appointments and advancements, and on probationary reviews of individuals appointed under 38 U.S.C. 7401(1), or as part time or intermittent RNs under 38 U.S.C. 7405(a)(1), which require approval in Central Office. This includes recommendations on requests for promotion reconsideration by registered nurses.

6. **EXCEPTIONS.** The Under Secretary for Health or designee may establish procedures for appointing employees without action by a Professional Standards Board in instances such as:

   b. Temporary appointment of part time or intermittent RNs pending processing by a Professional Standards Board for a probationary appointment as a part time or intermittent RN under 38 U.S.C 7405(a)(1)(A). As of May 5, 2010, the time spent under the temporary appointment and prior to Professional Standards Board review for a part time or intermittent RN is creditable towards the completion of the probationary period.

   c. Conversion of an employee appointed under 38 U.S.C. 7401(1) to an appointment under 38 U.S.C. 7405(a)(1), 7405(a)(2) or 7306.

   d. Conversion of an employee from an appointment under 38 U.S.C. 7405(a)(1)(A) or 7306 to an appointment under 38 U.S.C. 7401(1) provided the employee had previously completed a probationary period under 38 U.S.C. 7401(1) or 7306 in the same occupation and has had continuous service under 38 U.S.C., chapter 73 or 74 since acquiring such status.

7. **APPROVING OFFICIAL’S DECISIONS.** The approving official’s decision is final. This does not preclude employees from requesting promotion reconsideration under the provisions of part III, chapter 4, Sections A or B (whichever is appropriate), of this handbook.
8. ORGANIZATIONAL STRUCTURE OF BOARDS.

a. National Boards. National boards are established to act on appointments, advancements, and probationary reviews for Central Office employees, Regional and VISN PSB members, and for VISN and facility employees where those boards do not exist. National boards also act on promotion reconsideration requests submitted under part III, chapter 4, sections A and B, of this handbook.

(1) The National Physician and Dentist Professional Standards Boards also act on appointments and probationary reviews.

(2) The National Nurse PSB acts on all promotion reconsideration requests from registered nurses and licensed practical/vocational nurses, all appointments, advancements, probationary reviews, and reassignments involving Nurse Executive and Nurse V positions.

(3) The National Research Board will consider all appointments and advancements for research employees in accordance with VHA Handbook 1200.03.

(4) Other National Boards may be constituted as needed by the Under Secretary for Health.

b. Regional Boards. Whenever necessary, the Under Secretary for Health, or designee, may designate a Regional Board to serve one or more VISNs for designated occupations.

c. VISN Boards. For employees assigned at the VISN level, VISN boards shall consider appointments, advancements, probationary reviews, and reassignments where there are additional basic qualification requirements for the new assignment. For nurses and hybrids, see below.

(1) Nurses. A VISN NPSB shall consider the appointment, advancement, and reassignment (where there are additional basic qualification requirements for the new assignment) for Nurse IV. The appropriate VISN NPSB is identified in appendix II-H5.

d. Facility Boards. Facility boards will be established to act on all appointments and advancements and as delineated in Appendix II-O, this part. For employees occupying positions identified in 38 U.S.C. 7401(1) and for part time or intermittent registered nurses under 38 U.S.C 7405(a)(1), facility PSBs will conduct probationary reviews. For physicians and dentists, PSBs will determine eligibility for appointment and conduct probationary reviews when applicable.
SECTION E. GENERAL APPOINTMENT PROVISIONS UNDER 38 U.S.C. CHAPTER 74

1. APPOINTMENT PROCESSING REQUIREMENTS

a. Applications Received by Facilities. Applications received by facilities will be referred promptly to Human Resources Management Service. The Human Resources Management Officer will review applications for compliance with administrative and regulatory requirements. Candidates who fail to meet these requirements and thus fail to qualify for appointment will be notified by the Human Resources Management Officer. Applications from selectees who meet [VA] requirements for appointment [under 38 U.S.C 7401(1)] will be referred to the appropriate Professional Standards Board (PSB) [for necessary action as follows:

NOTE: See Section F of this part for those occupations under 38 U.S.C. 7401(3):]

(1) Selection and Appointment Action

(a) The PSB will evaluate qualifications and recommend a grade level and step based on VA qualification standard requirements. Except for physicians, dentists, and podiatrists the board will also recommend a rate of pay with due consideration being given to prior service and professional achievement. (See VA Directive and Handbook 5007, Part II, Pay Administration.) The board will complete the VA Form 10-2543, Board Action, and forward all documents through the approving authority to the Human Resources Management Officer, who will affect the appointment action. For actions, which require the approval of the Under Secretary for Health or designee, the facility board will enter its recommendations on VA Form 10-2543, and forward all documents through channels for approval. On approval, the originals will be returned to the facility or VISN as appropriate.

(b) For physician service chiefs and comparable positions, see appendix II-H1.

(c) For podiatrists, see appendix II-H3.

(d) For optometrists, see appendix II-H4.

(e) For chiefs of nurse anesthesiology sections, see appendix II-H6.

(f) For physician assistants (PAs) at Chief Grade, see appendix II-H7.

(g) For chiefs of pharmacy service (all grades), clinical pharmacy/pharmacy specialists, and program specialists at Grades GS-13 and above, see appendix II-H8.

(h) For occupational and physical therapists as section chief, see appendix II-H9.

(i) For registered nurses at grades IV and V, see appendices II-H5.

(j) For Dentists and EFDAs, see appendix II-H2.

(k) For doctors of chiropractic, see appendix II-H10.
NOTE: See section B, paragraph 11 of this chapter for provisions relating to Deans Committee recommendations. See M-3 for selection of Medical Investigators and Clinical Investigators appointed under this authority.

(2) **Action When No Facility Vacancy Exists.** When a facility receives an application and no appropriate vacancy exists at that facility, and the applicant wishes employment elsewhere, the HRM Officer will advise the applicant to consult the VHA vacancy database [www.vacareers.com](http://www.vacareers.com) for the location of current vacancies. At the applicant’s request, the application will be referred for employment consideration to the VA facility of the applicant’s choice which has a suitable vacancy.

b. **Applications Received by Central Office.** If the applicant is to be considered for facility assignment, the application will be referred to the facility of the applicant’s choice and processed as provided in subparagraph (1). If the applicant is to be considered for Central Office assignment, an interview may be conducted in Central Office or at a VA facility determined to be more convenient. The appropriate National Central Office PSB will consider the applicant’s professional qualifications, enter its recommendations on VA Form 10-2543, and forward all forms to the appropriate approving authority. The Central Office Human Resources Service (05HR3) in Central Office will take the necessary appointment action.

c. **Applicants Not Recommended for Appointment.** When an applicant is not recommended for appointment, the standards board shall record its findings on VA Form 10-2543, Board Action, and send this form to the approving official. After approval of the Board Action, the applicant will be notified in a letter over the signature of the Facility Chief of Staff or appropriate approving authority that the individual’s appointment has not been recommended. The letter will briefly state the basis for the action. The letter should be reviewed by the Human Resources Management Officer for adherence to technical requirements.

2. **APPOINTMENT ABOVE THE MINIMUM FOR SUPERIOR QUALIFICATIONS**

a. Full-time, part-time, or intermittent podiatrists, optometrists, chiropractors, nurses, nurse anesthetists, PAs and EFDAs, who meet the qualification requirements for appointment, may have their initial rate of pay fixed at a step rate above the minimum of the appropriate grade in recognition of superior qualifications, experience, and/or achievement exceeding the expected standards for the grade. The initial rate of pay may be set at any step rate within the grade (See VA Directive and Handbook 5007, Part II, Pay Administration.)

NOTE: Physicians and dentists are not eligible for appointment above the minimum rate of the grade. The step rate for a physician or dentist is determined by the number of total years of service the individual has worked in the VHA as reflected by his/her VA service date. However, superior qualifications for physicians and dentists can be addressed through the use of market pay. See part IX of VA Handbook 5007.
b. Individuals appointed under authority of 38 U.S.C. 7401(3), or under authority of 38 U.S.C. 7405 to occupations identified in section 7401(3), may be appointed above the minimum step of the grade under provision of VA Directive and Handbook 5007. This includes Hybrid Title 38 occupations. The step rate for occupations under 38 USC 7401(3) cannot be based on the number of years of experience alone. The specific criteria for steps above the minimum rate in VA Handbook 5007 Part II, Chapter 3, Paragraph 3b must be justified.

c. Appointment at a step rate above the minimum shall be based on conclusive evidence of superior qualifications which equates to the step rate assigned. Qualifications used to meet minimum grade level requirements in the qualification standard will not be used to also justify appointment at a step rate above the minimum of the grade. Determinations as to whether an individual should be appointed at a step rate above the minimum will be made fairly, consistently, and according to Agency criteria. The following are examples of appropriate criteria:

1. Significant and distinguished contribution in some phase of the appropriate occupation as evidenced by difficult and original research, writing and publications in professional media of stature, or special recognition in teaching or professional practice.

2. Special competence in the occupation as evidenced by service with professionally recognized committees, groups or responsible offices in professional societies above the local level, or consultative services within the occupation. The competence attained must be supported by achievement of renown on a regional or wider basis.

3. Educational preparation that clearly exceeds requirements for the grade, expertise in specialized treatment modalities, outstanding competence as a clinical practitioner, or significant contributions concerning some aspect of the occupation.

4. Eligibility for certification or certification by an American Specialty Board.

5. Certification by the appropriate national certifying body to formally recognize a level of excellence based on demonstrated superior performance in clinical practice, assessment of knowledge, and colleague endorsement.

6. Other appropriate evidence of professional stature.

NOTE: Prior to recommending approval or approving actions based on certification, Professional Standards Boards will verify the possession of such recognition by the individual.

d. Processing. The approval of step rates above the minimum is subject to the following requirements:

1. Nurses. The facility Director (or Nurse Executive if so delegated), on recommendation, justification, and documentation by the appropriate PSB, may approve the appointment of nurses at any step above the minimum of the grade.

2. Nurse Anesthetists. The facility Director, on recommendation, justification, and documentation by the facility PSB, may approve the appointment of nurse anesthetists to any step above the minimum of the grade. Nurse anesthetists appointed on or after May 4,
1993, may not be appointed at a step rate above the minimum for the grade based on certification by the Council on Certification of Nurse Anesthetists. Certification is a condition of employment and may not be used as a basis for appointment above the minimum step of the grade on initial appointment or reappointment.

(3) **PAs.** The facility Director, on recommendation, justification, and documentation by the facility PSB, may approve the appointment of PAs to any step above the minimum of Chief grade or below.
SECTION F. APPOINTMENTS UNDER 38 U.S.C. 7401

1. GENERAL. The primary consideration, prior to making selections and appointments under this authority, is to evaluate qualifications and personal characteristics as they relate to what is essential to successful performance of assigned responsibilities. Prior to effecting appointments under this authority, Professional Standards Boards and/or Human Resources for 38 USC 7401(3) occupations, [whichever is applicable], and selecting officials are required to determine that the candidate’s professional qualifications, physical and mental capacity, emotional stability, and any other pertinent qualifying factors, warrant a permanent appointment. The use of this appointment authority should essentially provide tenure for the employee and ensure the continuation of quality service for VHA. (See section G for procedures concerning full time temporary, part time, intermittent or fee basis appointments under 38 U.S.C. 7405.)

2. APPOINTMENTS UNDER 38 U.S.C. 7401(1). Only full-time permanent appointments of physicians, dentists, podiatrists, optometrists, chiropractors, nurses, nurse anesthetists, PAs, and EFDAs are made under authority of section 7401(1). These appointments are subject to a two-year probationary period requirement as specified in 38 U.S.C. 7403(b)(1). See Sections A and G of this chapter for probationary period requirements for individuals appointed as part time or intermittent registered nurses under 38 U.S.C. 7405(a)(1).

3. APPOINTMENTS UNDER 38 U.S.C. 7401(3). Only full-time permanent appointments of hybrid title 38 employees are made under authority of section 7401(3). These appointments are subject to title 5 probationary period requirements (see chapter 2, section A, paragraph 9, this part).

   a. The Supervisor at the appropriate level will obtain an approval to fill a vacant position in accordance with local procedures. Once approval is obtained the service will initiate recruitment action and contact the servicing Human Resources Office (HRO).

   b. Before recruitment is initiated, Human Resources will work in collaboration with the Supervisor to determine the eligibility and qualifications requirements that pertain to the assignment and grade level for the position to be filled in accordance with the qualification standards found in VA Handbook 5005, Part II Appendices found in appendix “G”. If the supervisor is not a subject matter expert in the profession, the supervisor must consult with the profession’s subject matter expert throughout the recruitment and onboarding process for the vacant position.

   c. Human Resources will determine eligibility and qualifications in accordance with standards found in VA Handbook 5005, Part II found in Appendix “G”, document the determination as instructed by VHA national policy office and recommend the appropriate grade to the selecting official for appointments, promotions, reassignments and change to lower grades. The qualification determination for each applicant must be documented by HR completing a separate VHA qualification form for each of the applicants.

   d. Human Resources will notify candidates who fail to meet the requirements and fail to qualify for appointment.

   e. Processing requests for promotions, reassignments and change to lower grades in compliance with VA Handbook 5005, Part III, Chapter 4, paragraph 9.
f. [Supervisors who are not subject matter experts are required to consult an occupational subject matter expert (SME) when evaluating applications.] The Supervisor and the occupational SME will review applicant(s) referred for selection. This may take the form of a panel.

g. Once a selection is made the Supervisor will consult with Human Resources and the profession subject matter expert (if applicable), and submit supporting documentation for utilization of pay setting flexibilities (if applicable) found in VA Handbook 5007, Part II, Chapters 2, 3 and 4, pertaining to hybrid title 38.

h. Medical Center Director/Network Director will (for personnel under their jurisdiction) review and serve as the deciding official on requests for additional steps above the minimum on appointments.

NOTE: For more information on probationary periods, see section A, paragraph 4 of this chapter and VA Directive and Handbook 5021, Part III.
SECTION G. APPOINTMENTS UNDER 38 U.S.C. 7405

1. TEMPORARY FULL TIME APPOINTMENTS UNDER 38 U.S.C. 7405(a)(1)

   a. General. Temporary full time appointments are made under authority of section 7405(a)(1). These appointments may be made when they are in the best interest of the service, such as under the following circumstances:

   (1) To employ individuals in occupations identified in sections 7401(1) and 7401(3) when the work to be performed by the employee is of a temporary nature and can be completed within a 3-year or shorter period.

   (2) To employ [temporary full time registered nurses], nurse anesthetists, PAs, EFDAs, or hybrid title 38 employees pending processing of probationary appointments when the applicants meet the basic requirements for appointment. Such appointments may be effected without board action. This includes appointments above the minimum step of the grade for [temporary full time] registered nurses, nurse anesthetists, PAs and EFDAs provided the application and related documentation show evidence of superior qualifications as described in section E, paragraph 2 of this chapter.

   (3) To employ physicians pending processing of probationary appointments when probationary appointments require the approval of the Under Secretary for Health or designee.

   (4) To employ residents who have just completed their formal VA residency training and are awaiting probationary appointment.

   (5) To reemploy annuitants.

   (6) To employ noncitizens when it is not possible to recruit qualified citizens for necessary services.

   (7) To employ nonlicensed physicians, dentists, podiatrists, optometrists, and chiropractors for utilization in research or academic positions or in positions where there is no direct responsibility for the care of patients. (See section B, paragraph 14.)

   (8) To employ nonlicensed physicians, dentists, podiatrists, optometrists, chiropractors, or unregistered nurses and nurse anesthetists when the individual is to serve in a country other than the United States and the individual is licensed or registered in the country in which the individual is to serve. (See section B, paragraphs 14 & 15.)

   (9) To employ physicians in the Research and Development Program as research associates who have been selected in accordance with procedures in M-3.

   (10) To employ physicians in the Distinguished Physician Program who have been selected in accordance with procedures in M-2, part I.
b. **Duration of Appointments.** Temporary full-time appointments may be made for any period up to 3 years depending on the needs of the service. Such appointments may be renewed, but the aggregate period of temporary service normally will not exceed 6 years. The facility Director may grant exceptions to permit renewals (in increments of up to 3 years) beyond 6 years when this type of appointment best meets the needs of the VA medical program.

c. **Consideration for Probationary or Permanent Appointment.** Individuals serving under this type of appointment who meet requirements in 38 U.S.C. 7402 and in the appropriate VA qualification standard may be considered at any time by a board for an appointment under 38 U.S.C. 7401(1) or 7401(3), as appropriate, on recommendation of the appropriate service chief or equivalent position. If their services are needed for an indefinite period, they should be considered for such an appointment in connection with any consideration for an additional 3-year appointment.

d. **Processing.** Applicants for temporary full-time appointments will be processed in the same manner as regular full-time appointees, except the qualifications of nurse, nurse anesthetist, PA, and Hybrid Title 38 applicants being considered for temporary full-time appointments pending processing of a probationary appointment will be reviewed by the appropriate service chief or equivalent position. The service chief will make a recommendation for appointment to the facility Director. Action by a board is not required for renewal of a temporary appointment.

2. **PART-TIME AND INTERMITTENT APPOINTMENTS UNDER 38 U.S.C. 7405(a)(1)**

a. **Use of Part-Time and Intermittent Personnel**

(1) It is VHA policy to use the services of qualified individuals on a part-time or intermittent basis when necessary to alleviate recruitment difficulties and in all cases where VHA work requirements do not support employment on a full-time basis. Decisions concerning utilization of part-time or intermittent employees must be related to patient care and other VA work requirements and supported by relevant staffing guidelines. Part-time physicians on adjustable work hours are also to be held accountable for providing the expected level of patient care and other services to VA as outlined in the Worksheet for Determining Percentages on Memorandum of Service Level Expectations, Appendix B VA Handbook 5011.

(2) A part-time appointment shall be utilized when an employee’s services are required on less than a full-time basis. An intermittent appointment shall be used when the need for services is of such a nature that it is not possible or desirable to establish a regular and prearranged schedule.

(3) Part-time or intermittent appointments may be made either on a time-limited basis or without time limit depending on the needs of the facility.

(4) Part-time and intermittent appointments shall be reviewed on a regular periodical basis and when vacancies occur and when there are significant workload changes to ascertain whether the utilization specified is realistic and meets the objectives of the organizational unit’s staffing plan. Network and medical center directors must document each review assessing whether or not the position meets VA’s needs. When actual utilization does not meet original expectations, the appointment action shall be amended to show the new conditions of utilization. For part-time physicians on adjustable work service level agreement.]
b. **Special Provisions for Part-Time Physicians on Adjustable Work Hours.** Part-time physicians on adjustable work hours must sign a memorandum related to service level expectations as outlined in VA Handbook 5011, Hours of Duty and Leave. Physicians may decide to discontinue complying with the Memorandum of Service Level Expectations at any time. However, this must be done in writing as a current, signed memorandum related to service level expectations is required to participate in adjustable work hours. In addition, a memorandum related to service level expectations does not alter the applicability of VHA regulations and procedures concerning terms, conditions, and duration of employment, nor does this memorandum constitute an employment contract.

c. **Processing Appointments**

   (1) Part-time and intermittent appointments made under authority of 38 U.S.C. 7405(a)(1) will be processed (including board action [for occupations under 38 U.S.C. 7401(1)]) in the same manner as regular full-time appointments. Appointees must meet the basic requirements for appointment in VHA.

   (2) For part-time employees, the expected number of hours to be performed during the service year will be determined before an appointment is affected. The expected number of hours will also be recorded on SF 50-B and will not be exceeded unless the facility Director authorizes the excess. The appointment will be effected in accordance with MP-6, part V, supplement No. 1.5.

   (3) A part-time or intermittent employee may not be scheduled for employment which will exceed 1820 hours or seven-eighths of full-time employment during a service year. Generally, for employees who hold more than one type of appointment (i.e., fee basis and part-time or intermittent), the combination of basic pay and fees may not exceed the basic salary of a seven-eighths part-time employee in the same grade and step in a fiscal year. (See VA Directive and Handbook 5007, Pay Administration.)

3. **UTILIZATION OF CONSULTANTS AND ATTENDINGS**

   a. **General.** This paragraph contains procedures for the employment of consultants and attendings on an individual basis under the authority of 38 U.S.C. 7405(a)(1) or (2).

   b. **Definitions**

      (1) **Consultant.** A well-qualified specialist in an occupation identified in 38 U.S.C. 7401(1) or (3) who is capable of giving authoritative views and opinions on subjects in the consultant’s particular field. A consultant’s expertness may consist of broad administrative or professional experience enabling the consultant to give advice of distinctive value.

      (2) **Attending.** An individual in an occupation identified in 38 U.S.C. 7401(1) or (3) of demonstrated ability in the field who is employed to perform or supervise the performance of duties related to various professional activities such as teaching, patient treatment, etc.

      (3) **Nonmedical Consultant.** An individual, not in one of the occupations indicated in subparagraphs (1) and (2), who has excellent qualifications and a high degree of attainment in the
consultant’s field. Because of superior knowledge and mastery of principles and practices, the consultant is regarded as an authority or practitioner of unusual competence.

(4) **Lump-Sum Fee.** A method of paying consultants and attendings by the payment of a flat sum for each visit or period of service rendered. (It consists of the fee for services to be rendered, plus the cost of transportation if required, and per diem at the applicable rate if travel is involved. The service fee is that portion of the fee exclusive of travel and per diem allowances.

(5) **Per Annum Salary.** A method of paying consultants and attendings on a per annum basis. The salary is computed by multiplying the number of projected visits to be made during the year by the fee authorized per visit.

(6) **Salary Limitation.** A ceiling placed on the amount of compensation a consultant or attending may receive from VA during the fiscal year.

(7) **Visit.** Attendance at a VA facility for consultation or conference work of a continuing nature dealing with one or more cases or matters of a professional nature. If a visit is interrupted by an overnight break, services performed on subsequent days are counted as additional visits.

c. **Appointment and Reappointment Approving Authorities**

(1) The Under Secretary for Health or Designee is the approval authority for appointments and reappointments of Central Office consultants.

(2) The facility Director is the approval authority for appointments and reappointments not requiring approval of the Under Secretary for Health or designee.

d. **Types of Utilization**

(1) **Authority.** Consultants and attendings, including nonmedical consultants, are normally employed under the authority of 38 U.S.C. 7405(a)(1) and 7405 (a)(2). Section 7405(a)(1) will be used for all consultants and attendings paid on a per annum basis and section 7405(a)(2) for those paid on a lump-sum fee basis.

(2) **Methods of Pay**

(a) **Per annum.** Employment of consultants and attendings on this basis is predicated on general availability for recurring and regularly scheduled duty to meet the anticipated needs of VA.

1. When a consultant or attending is available for duty but is not called to render service on a particular day of the scheduled tour, no recovery proceedings for payment will be instituted.

2. When a consultant or attending is unavailable for a particular period, the individual will be in a nonpay status and the salary reduced for the number of projected visits missed. If the individual is frequently unavailable for call, a change to lump sum fee-basis utilization should be considered.
3. Normally, the number of visits made during the fiscal year will equal or exceed the projected number used in computing the per annum salary. The exception would be those cases of reducing salary for unavailability as outlined in subparagraph 2. However, if experience during the fiscal year shows that the original projection of the need for services was too high or too low, the Chief of Staff will notify the HRM Officer to modify the appointment to reflect the new conditions of utilization. The action will be effective at the beginning of the next pay period.

(b) **Lump-Sum Fee Basis.** This type of utilization is required for intermittent services. In addition, it is required in the employment of consultants and attendings who have been authorized to perform services at other than VA facilities; and when travel is performed on a day immediately before and/or
after service is rendered. At the option of local management, lump-sum fee basis may also be used for regularly scheduled services.

(c) **Without Compensation Basis.** Services of consultants and attendings may be accepted on a WOC basis under the same conditions applying to other WOC individuals covered in paragraph 7 of this section.

e. **Employment Requirements and Determinations**

(1) **Qualification Requirements.** Consultants, attendings and nonmedical consultants must meet the basic requirement of 38 U.S.C. 7402 and/or appropriate qualification standards, in addition to having outstanding professional ability in their respective fields. Action by a board is not necessary.

(2) **Duration of Employment.** Consultants and attendings will be employed for a fiscal year or fraction thereof, depending on the need. All appointment and reappointment actions will be made to terminate not later than September 30 of each year. Past appointments will be reviewed annually by the HRM Officer and reappointments effected only for those consultants and attendings the facility expects to use during the upcoming fiscal year.

(3) **Dual Employment.** The dual employment of consultants or attendings may be approved in accordance with the provisions of section A, paragraph 3b, this chapter. It is the responsibility of facility officials to ascertain whether or not a consultant or attending serves another VA facility or another Federal agency; and to make sure that the individual is not paid by VA for more than one visit a day. The apportionment of the maximum annual pay limitation for each type of employment should be furnished by the facility requesting dual employment.

f. **Appointment and Reappointment Procedures**

(1) **Recommendations for Approval.** See section B of this chapter for application, interview, and credentialing requirements relating to the appointment of consultants and attendings.

(2) **Processing**

(a) **Central Office Consultants.** For Central Office consultants, FL 10-332, Standardized Letter of Appointment - Consultants and Attendings on a Lump-Sum Fee Basis, will be used for appointments and reappointments and will be prepared for the signature of the Under Secretary for Health. Reappointment letters will be automatically produced by the Austin Automation Center (AAC).

(b) **Security Forms - Dual Employment**

1. The HRM Officer will ascertain whether the required security forms have been processed in order to avoid duplication of effort. It generally should be possible to determine this by review of the application form or contacting the individual to find out whether the person is being utilized by another VA facility or another Government agency. In that case the necessary information may be secured from the particular VA facility or the Government agency, and a copy of any correspondence placed in the employee’s file folder to obviate further processing of security forms.
2. When processing of security forms is required, the HRM Officer located nearest the residence of the consultant or attending, or as agreed on locally by the HRM Officers of the applicable facilities, will prepare the necessary security forms. The HRM Officer, after processing the forms, will notify the HRM Officer(s) of the other facilities where the individual is being utilized. Evidence of such notification will be filed by each facility in the employee’s file folder.

(c) Appointments. The HRM Officer is responsible for processing appointments of consultants and attendings.

1. Per Annum. Appointment actions for consultants and attendings on a per annum basis under authority of 38 U.S.C. 7405(a)(1) will be effected using SF 50 B, Notification of Personnel Action. SF 50-B will reflect the following information:

a. The nature of action will be “Excepted appointment NTE 9/30/(YR) __________.”

b. Indicate under item 20 the per annum salary.

c. In the “Remarks” section show “Computation of annual salary of $______ is based on an estimated ________ visits at $ ________ per visit during the fiscal year 20(YR)__. Entitlement to salary is based on availability for duty.”

d. In some cases it may be necessary to modify an appointment to reflect new conditions of utilization. The “Remarks” section will show the revised basis of computation of the per annum salary.

2. Lump-Sum Fee Basis. FL 10-332, Standardized Letter of Appointment - Consultants and Attendings on a Lump-Sum Fee Basis, will be issued to appoint consultants and attendings on a lump-sum under authority of 38 U.S.C. 7405(a)(2), including nonmedical consultants. A new letter will be issued if needs of the service and conditions of utilization change during the first year of appointment.

(d) Reappointments

1. Per Annum. Per annum consultants and attendings will be processed for reappointment as described in subparagraph (c) 1, except that the nature of action will be “Conversion to excepted appointment NTE 9/30(YR) __________.”

2. Lump-Sum Fee Basis. Fee-basis consultants and attendings will be reappointed using VA Form 10-2418b, Consultant/Attending Appointment Renewal Card, in accordance with current VHA instructions. The form will be signed by the Director, Chief of Staff, or HRM Officer.

(e) Disposition of Forms

1. Applications and other forms for consultants and attendings will be placed in a file folder with a tab listing the individual’s name, date of birth, and Social Security number.
2. Folders will be maintained alphabetically by appointment category and filed in a location designated by the facility.

4. APPOINTMENT OF PROFESSIONAL AND TECHNICAL PERSONNEL ON A FEE BASIS UNDER 38 U.S.C. 7405(a)(2)

   a. General. On recommendation of the Chief of Staff, the facility Director may appoint professional and technical personnel on an on-facility fee basis under authority of 38 U.S.C. 7405(a)(2). The Chief, Dental Service, will recommend appointments of dentists and EFDAs. Appointments may be made for an indefinite period of time.

   b. Application. Applicants will submit an appropriate application form to the facility where they seek employment. Forms to be used are VA Form 10-2850, Application for Physicians, Dentists, Podiatrists, [ ] Optometrists [ , and Chiropractors]; VA Form 10-2850a, Application for Nurses and Nurse Anesthetist; VA Form 10-2850c, Application for Associated Health Occupations; OF 612 and OF 306; or former SF 171, Application for Federal Employment. All items will be completed in sufficient detail to enable the responsible official to make determinations concerning citizenship, licensure or registration, and other qualifications. In emergency situations, the facility Director may approve appointments of individuals who have not completed an application if applicants meet appropriate qualification requirements. (See section B, this chapter, for credentialing requirements, including those related to emergency appointments.)

   c. Selection

      (1) The Chief of Staff will determine qualifications, select and recommend physicians, podiatrists, [chiropractors ,] optometrists, nurses, nurse anesthetist and PAs. The Chief, Dental Service will do this for dentists and EFDAs.

      (2) The HRM Officer will determine qualifications for other professional and technical personnel consistent with VA or Office of Personnel Management requirements. The appropriate program officials will select and recommend employment for these individuals.

   d. Appointment

      (1) Approval Authority. The facility Director will approve appointments.

      (2) Letter of Appointment. The facility Director or Human Resources Management Officer (HRM) will sign a letter of appointment giving all pertinent details. The original of the letter will be given to the appointee, with copies to Human Resources Management Service, Fiscal Service, and the utilizing service.

      (3) Special Duty Nurses. These nurses will normally be appointed not to exceed 1 year under 38 U.S.C. 7405(a)(2). They are subject to Social Security coverage and are processed for security purposes under Executive Order 10450, unless the period of employment is specifically limited to 6 months or less.
(4) **Disposition of Forms.** Records of personnel appointed under this paragraph will be placed in a file folder (not personnel folder) with a tab listing the individual’s name, date-of-birth and Social Security Number. These records will be maintained alphabetically by appointment category and filed in a location designated by the facility.

e. **Pay.** See VA Directive and Handbook 5007[,] Part II.

**NOTE:** Persons authorized to provide outpatient services at VA expense on an off-facility fee basis in professional offices, clinics or other non-VA facilities are not considered employees for the purposes of this chapter. Instructions for their utilization are contained in VHA Manual M-1, part I, chapter 18.

a. **General**

(1) **Student Technicians**

(a) A student enrolled in an approved nursing school, an approved school of nurse anesthesia, or enrolled in an approved training or educational program for an occupation identified in 38 U.S.C. 7405(a)(1)(A) or (B), [ ] may be appointed on a temporary full-time, part-time or intermittent basis under the provisions of 38 U.S.C. 7405(a)(1)(D) for a period not to exceed the duration of the individual’s program.

(b) The appointment of student technicians can help meet patient care needs and also enhance the recruitment of promising students for career service with VA. With the proper orientation to the assignment and under appropriate professional supervision, students can perform duties consistent with the courses they have successfully completed. For example, a student nurse technician could give medications under supervision of the registered nurse, give baths, check vital signs, provide tracheotomy care, and detect signs and symptoms of bleeding and respiratory problems.

(2) **Other Student Employment**

(a) **General.** Directors of health care facilities may approve appointments of students in occupations other than those cited in paragraph (1) [ ] under authority of 38 U.S.C. 7405(a)(1)(D).

(b) **Selection**

1. Candidates normally will be selected from among students whose interests or career objectives are in health care areas.

2. Normally, a panel will be established for the purpose of screening qualifications and ranking student applicants for selection consideration. Preference will be given to students whose qualifications, personal traits, and career motivation appear to offer the best potential for service in VHA and for future
contributions to the career field in general. The selecting official will choose applicants for employment from the listing developed by the qualification-screening panel.

3. VA student volunteer workers who have demonstrated interest in a health-related career should be encouraged to apply for student employment. Selection of qualified students from this group encourages continued volunteer youth participation and acts as an incentive to other students to serve as volunteers.

4. The Human Resources Management Officer is responsible for the administration of this program, including determining the extent to which the program is publicized and the selection process to be used by the facility. This official is also responsible for documenting all such determinations once they are made.

(c) Funds

1. Available facility funds must be used. If research funds are used, appointments of students for medical research activities will be approved by the facility’s Research and Development Committee. Education funds are not to be used for the employment of students.

2. This employment has no relation to authorized training programs or clinical clerkships under which paid or WOC (without compensation) students receive credits from affiliated universities.

(3) Nurse Technician Pending Graduation

(a) In a limited number of states, students who have completed a designated segment of their nursing studies but have not yet graduated are permitted to obtain registration as a graduate professional nurse.

(b) A student enrolled in an approved nursing school who possesses active, current registration to practice nursing in a State may be appointed on a temporary full-time, part-time or intermittent basis under the provision of 38 U.S.C. 7405(a)(1)(D) for a period not to exceed the duration of the individual’s academic program.

(4) Graduate Technicians

(a) A graduate nurse who has successfully completed a full course of nursing in an approved nursing school; a graduate physician assistant who has completed a full course of training as a physician assistant in an approved program; or a graduate of an approved training or educational program in an occupation identified in 38 U.S.C. 7405(a)(1)(B), whose licensure or registration in a state, or certification by the appropriate national certifying organization, is pending may be appointed on a temporary full-time, part-time or intermittent basis under the provisions of 38 U.S.C. 7405(a)(1)(D) for a period not to exceed 2 years (e.g., graduate nurse technician, graduate physical therapy technician, graduate pharmacy technician, etc.). Appointment[s] may not be extended.

(b) A graduate nurse or LPN who fails to qualify for registration will be separated from the service on 2 weeks’ notice regardless of the termination date of the temporary appointment. In no instance will an individual be retained pending the results of reexamination.
(c) A graduate PA, [or other Hybrid Title 38 employees] who fails to qualify for licensure, registration or certification [when required] will be permitted to remain on VA rolls pending results of reexamination provided reexamination occurs prior to the expiration date of the temporary appointment.

(d) Graduate technician experience can be credited as successful nursing practice or as successful experience which may be used in meeting grade level requirements as indicated in the appropriate qualification standard.

b. Approved Training or Educational Programs. Approved programs must be in schools or educational institutions approved by the Secretary as indicated in the appropriate qualification standard.

c. Approval Authority. On recommendation of the appropriate service chief or equivalent, the facility Director may approve technician appointments. The Director may delegate approval authority for [Hybrid Title 38 employees] as indicated in paragraph 2 of section A, this chapter.

d. Processing

(1) Student technicians will submit OF 612 and OF 306 [ ]. Nurse technicians pending graduation and graduate nurse technicians will submit VA Form 10-2850a. Other graduate technicians will submit VA Form 10-2850c.

(2) After determining that the applicant meets qualification requirements, the appropriate service chief or equivalent will forward SF 52, Request for Personnel Action, to the HRM Officer. Following approval by the Director, the HRM Officer will effect the appointment. Action by a board is not required.

f. Conversions. Processing technicians for conversion should be initiated prior to their eligibility dates whenever possible, including consideration by a board. Conversions will be effected the first day of the pay period following administrative approval.

(1) Student Technicians. A student technician who graduates from an approved school and is pending licensure or registration in a State, or certification by the appropriate national certifying organization, may be converted to a graduate technician appointment. Action by a board is not required.

(2) Nurse Technicians Pending Graduation. Following graduation from an approved nursing school, a nurse technician selected for continued VA employment will be converted to a registered nurse appointment under 38 U.S.C. 7401(1) or 7405(a)(1)(A) at the grade and step rate for which qualified, without regard to [ ] any other restrictions. A board action is required, unless a temporary appointment is made pending further processing under provisions of section C, paragraph 7a of this chapter.
6. APPOINTMENT OF MEDICAL SUPPORT PERSONNEL UNDER 38 U.S.C. 7405(a)(1)

a. General

(1) [38 U.S.C. §] 7405(a)(1) is primarily used to obtain the services of physicians, dentists, nurses and other individuals in occupations identified in 38 U.S.C. [§] 7401(1) and 7401(3). However, it may be used under certain conditions to obtain the services of medical support personnel in occupations other than those identified in 38 U.S.C. [§] 7401(1) and 7401(3). Appointments of medical support personnel, other than trainees and students, may be made on a temporary full-time basis for a period not-to-exceed 3 years, or on a part-time or intermittent basis for a period not to exceed 1 year. Full-time appointments under this authority may be renewed for one or more additional periods not in excess of 3 years each. Part-time and intermittent appointments are non-renewable. Appointments of associated health trainees and students in occupations other than those identified in 38 U.S.C. [§] 7401(1) and 7401(3) may be made on a temporary full-time basis not to exceed 3 years, or on a part-time or intermittent basis for a period of time consistent with individual training program requirements. (See subparagraph b.)

(2) The use of this authority is desirable and appropriate for the employment of trainees accepted in VA associated health training programs; high school graduates and college students participating in the VHA summer employment program; students and others, particularly those engaged in the medical research programs, when it is determined impracticable to obtain the necessary services through regular competitive employment procedures. Under no circumstances may this authority be used to circumvent the competitive employment procedures, the competitive system pay limitations and the qualification requirements for competitive appointments.

b. Appointment of Associated Health Trainees

(1) Type of Appointment. Appointments of trainees in VA associated health training programs are made by the facility Director under the authority of 38 U.S.C. [§] 7405(a)(1) on a full-time basis, not to exceed 3 years, or on a part-time or intermittent basis for a period consistent with individual training program requirements. (See [VHA Handbook 1400.08, Education of Associated Health Professions]) (See Section H for discussion of limited circumstances when associated health trainees may be appointed under 38 U.S.C. [§] 7406.).

(2) Qualification Requirements. Trainees must meet citizenship requirements and shall be qualified as prescribed in appendices II-D of this part. Requests for approval to
appoint paid noncitizen trainees will be forwarded to the Assistant Deputy Under Secretary for Health (10N_/143). Without compensation (WOC) appointments of noncitizen trainees may be approved by the facility Director.

(3) **Selection and Appointment of Candidates.** [Handbook 1400.08, Education of Associated Health Professions] sets forth the selection process and the approval authority for appointment of trainees.
(4) **Appointment Action.** The HRM Officer, with the approval of the facility Director, will affect the appointment on SF 50-B. The type of action will be “Excepted Appointment NTE (date)”.

c. **Appointments of Other Medical Support Personnel**

(1) **Criteria for Approval of Appointments**

(a) Full-time appointments must be temporary not to exceed 3 years and are renewable for like periods. Part-time and intermittent appointments must be temporary not-to-exceed 1 year and are non-renewable.

(b) Qualifications of appointees must be comparable to those required for competitive service employees performing similar duties.

(c) Compensation must be commensurate with that paid to competitive service employees occupying similar positions which are subject to the requirements of 5 U.S.C., chapter 51. (See VA Directive and Handbook 5007.)

(2) **Approval Authority.** Facility directors are authorized to approve appointments of medical support personnel, except for paid noncitizen associated health trainees. (see paragraph 3.b.(2) above).

(3) **Documentation.** All appointments effected under the provisions of this paragraph will be properly documented to support the action.

(4) **Processing.** Applicants will submit the OF 612 and OF 306 or the former SF 171 and will be processed for appointment in the same manner as other similar appointees.

7. **ACCEPTANCE OF SERVICES ON A WITHOUT COMPENSATION BASIS UNDER 38 U.S.C. [§] 7405(a)(1)**

a. **General.** The acceptance of the services of qualified individuals who may be directly or indirectly involved in patient care activities on a WOC basis is permissible. It is not intended that the services of individuals utilized on a WOC basis be accepted in place of those which are usually expected to be performed by personnel for whom funds are provided on a continuing basis.

b. **Occupations Identified in 38 U.S.C. [§] 7401(1) and (3)**

(1) **Authority for Appointment.** Services will be accepted under the authority of 38 U.S.C. [§] 7405(a)(1), except that [any resident requiring a disbursement agreement will be appointed under authority of 38 U.S.C. § 7406]. Appointments will be recommended by the Chief of Staff and approved by the facility Director. (See section B of this chapter for credentialing requirements).
(2) Processing

(a) VA Forms 10-2850, 10-2850a, 10-2850b, 10-2850c, [or 10-2850d (for trainees)] as appropriate, will be submitted by individuals who desire to participate in the VA medical program on an uncompensated basis.
(b) VA Form Letter 10-294, Letter of Authorization, will be issued setting forth the terms of utilization. Following approval of the appointment by the facility Director, the letter will be signed by the individual attesting to agreement to the conditions specified, and countersigned by the HRM Officer. The form letter will be prepared in duplicate, with the original given to the employee and the duplicate filed in a location designated by the facility and later disposed of in accordance with existing VHA instructions.

c. Student Trainees, [Residents,] Research Personnel, and All Others.

(1) Classes. The classes of personnel who may be utilized on a WOC basis are:

(a) Medical and dental students who serve as clinical clerks.

(b) Nursing students who are enrolled in hospital, college or university schools of nursing and who are assigned for clinical experience and instruction.

(c) Students [and residents] from affiliated institutions who are in associated health care occupations, such as all physical medicine and rehabilitation therapists and coordinators, orientation and mobility specialists, social workers, psychologists, medical technicians or technologists, medical radiology technicians, hospital librarians, pharmacists, medical record librarians, dietitians, dental hygienists, dental assistants, dental laboratory technicians, and other occupations listed in [38 U.S.C. §] 7401(1) and 7401(3).

NOTE: Students in associated health care occupations who successfully complete an affiliated clinical education training program in a VA health care facility may be eligible for noncompetitive appointment under title 5 following graduation from an accredited institution of post-secondary education in accordance with 38 U.S.C. [§] 7403(g). (See appendix II-C, this part).

(d) Scientific and technical personnel and laboratory assistants who are utilized in a medical research program. Usually individuals utilized on this basis are employed by associated medical or dental schools or universities to engage in medical or dental research for which a grant has been made under [auspices of the VHA Office of Research and Development and their policies and procedures.]

(e) The facility Director is the approving authority for WOC appointments at facilities.

(2) **Full or Part-Time Utilization.** WOC appointments may be made on a temporary full-time or part-time basis, depending on the objective of the program.
(3) **Processing.** Employees should be processed and appointed as outlined in subparagraph b.(2). When a large group of students is to be appointed, facility directors may adapt the FL 10-294 to a mass action type document for appointment purposes provided they retain its basic content. Applications for employment need not be solicited unless they are needed to comply with the requirements of section A, paragraph 3, and/or credentialing requirements of section B, this chapter.
(4) Payments in Kind. When facilities are available, students in certain designated programs approved by the Under Secretary for Health or designee, in return for services rendered, may be furnished quarters and subsistence during the whole or any part of the training period. Uniforms also may be laundered by VA if facilities are available. Instructions for making such payments “in kind” are contained in M-1. If a payment “in kind” is authorized, additional copies of VA Form Letter 10-294 will be prepared and submitted to appropriate services at the facility.

d. Noncitizens. Noncitizens may be utilized on a WOC basis when no qualified citizens are available and it is deemed to be in the interest of the facility.

8. OVERSEAS EMPLOYMENT OF NON-U.S. CITIZENS UNDER TITLE 38 U.S.C. 7405 (a)(1)

a. Scope. This paragraph contains basic policies and procedures for appointing non-U.S. citizens at the VA Regional Office Outpatient Clinic, Manila, Republic of the Philippines in the following occupations:

(1) Physicians, dentists, podiatrists, optometrists, chiropractors, RNs, nurse anesthetists, PAs, and EFDAs appointed under 38 U.S.C. 7405 (a)(1).

(2) Individuals appointed under 38 U.S.C. 7405(a)(1) to occupations listed in 38 U.S.C. 7401(3) [ ].

(3) Medical support personnel.

(4) Trainees in health care or associated health care occupations appointed under 38 U.S.C. 7405(a)(1).

b. Appointment Authority. The Regional Office Director may appoint the following personnel:

(1) The categories of personnel listed in paragraph a(1) and (2) [ ] may be appointed on a temporary full-time, part-time, intermittent, without compensation, or fee basis.

(2) Medical support personnel may be appointed on a temporary full-time basis not to exceed 3 years, or on a temporary part-time or intermittent basis not to exceed one year.

(3) Trainees in health care or associated health care occupations may be appointed on a full-time, part-time or intermittent basis with or without a time limit.

c. Qualification and Licensure Requirements

(1) VA Qualification Standards will be used to determine the appropriate grade levels for applicants appointed under provisions of this paragraph. The Regional Office Director may, under unusual circumstances, approve a deviation from the grade requirements when the composite record of qualifications justifies the action.
(2) The Regional Office Director may waive the licensure, registration or certification requirements for the occupation, provided the individual is properly credentialed in the Philippines.

d. Professional Standards Board

(1) The Regional Office Director approves appointments and advancements on the recommendation of the Professional Standards Board (PSB).

(2) The PSB for the personnel listed in paragraph a(1) and (2) above, will consist of the Chief Medical Officer, and 2 senior clinic physicians.

(3) A representative of the Human Resources Management office will serve as a technical advisor to the PSB.

(4) When it is not possible to constitute a board, or when a PSB is required for the Chief Medical Officer, the Network Director will forward the personnel folder, Board action and a letter with the Network Director’s comments to the Central Office or VISN board for review and recommendation. The personnel folder and related documents will be returned to the Network Director for approval.

e. Physical Requirements. The physical requirements and procedures for determining fitness for duty are governed by the provisions of VA Directive and Handbook 5019.

[9. APPOINTMENT OF STUDENTS AND RECENT GRADUATES THROUGH THE VA CHOICE AND QUALITY EMPLOYMENT ACT OF 2017]

a. Policy. This paragraph establishes policy for appointing additional categories of students and recent graduates of qualifying educational institutions through the VA Choice and Quality Employment Act of 2017 (the Act). The Act, established through Public Law 115-46, gives the Secretary of VA the authority to make excepted service appointments for students and recent graduates that lead to career or career conditional appointments, as applicable. This authority applies to title 5 occupations and extends appointment eligibility to students and recent graduates who fall in one of the following categories:

(1) Those employed in a qualifying internship or fellowship program at the Department;

(2) Those employed in the Department in a volunteer capacity and who are performing substantive duties comparable to those of individuals in internship or fellowship programs and who meet the required number of hours for conversion;

(3) Those employed in the Department under a contract or agreement with an external nonprofit organization and who are performing substantive duties comparable to those of individuals in internship or fellowship programs;
(4) Those who have received Post 9/11 Educational Assistance under chapter 33 of title 38, United States Code (U.S.C.).

b. **Guidance.** Specific guidance for making excepted appointments and subsequent noncompetitive conversions using this authority are in Appendix II-D, Noncompetitive Appointment of Students and Recent Graduates through the VA Choice and Quality Employment Act of 2017, of this part.]
SECTION H.
APPOINTMENT OF MEDICAL, DENTAL, [AND OTHER] RESIDENTS
UNDER 38 U.S.C. [§] 7406

1. GENERAL. Medical and dental residents are appointed under authority of 38 U.S.C. § 7406 for graduate training leading to qualification in a specialty. (See [VHA Handbook 1400.09 Education of Physicians and Dentists] for policies relating to the establishment and maintenance of medical and dental residency programs in VA.). [Year-long associated health trainees such as podiatry, optometry, psychology, and others may be appointed as residents under 38 U.S.C. § 7406 if their program would benefit from utilization of a disbursement agreement as a payment mechanism.]

2. METHODS OF APPOINTMENT AND COMPENSATION. Medical and dental residents may be given full-time appointments and paid directly by VA through a direct stipend mechanism. (As indicated in [VHA Handbook 1400.09 Education of Physicians and Dentists], part-time appointments may not be used.) Residents may also be utilized on a WOC [ ] basis. Alternatively, when authorized pursuant to the [requirements in VHA Handbook 1400.05 Disbursement Agreements], they may be appointed and paid through a disbursement agreement with a medical school or other appropriate third party [disbursing agent]. [Appointments of trainees in associated health programs may be made under the authority of 38 U.S.C. § 7406 (a)(1) on a full-time basis. These specific training programs and facilities must be authorized by written approval of the Office of Academic Affiliations (contact information may be found on the (Office of Academic Affiliation’s Website.) to pay [associated health] trainees via the disbursement agreement mechanism.]

3. APPOINTMENT DOCUMENTATION

a. For residents paid directly by VA, the nature of action on the SF-50-B is [ ]“170 Excepted Appointment” [ ] with the following statement in “Remarks:” “This appointment is for the duration of this training unless sooner terminated and is subject to periodic review [by the VHA Associate Chief of Education/Designated Education Officer].

b. Residents paid from disbursement agreements must have without compensation VA appointments. A sample appointment letter has been created for this purpose that can be downloaded from the Office of Academic Affiliation’s Website. A copy of this letter, [a completed 10-2850d form], and a completed Standard Form (SF) 61, Appointment Affidavit, will serve as the appointment documentation for residents with no prior federal service. These documents may be filed per local facility policy consistent with Privacy Act and Freedom of Information Act (FOIA) requirements. Residents with prior Federal service should be directed to the servicing Human Resources Management Office for any additional processing that might be necessary. Do not establish a personnel folder for, or process into the [HR Smart] system, residents covered by a full disbursement agreement unless the individual has prior Federal service and Civil Service Retirement System (CSRS) retirement coverage.
4. COMPENSATION

a. Conditions of Direct Compensation. The VA medical center may [pay residents directly via stipend continuously during their residency program. VA does not recommend using intermittent appointment authorities to take residents on and off the payroll. Residents who are paid via direct stipend mechanisms must be replaced by a Without Compensation exchange resident if they rotate to other non-VA facilities.] The second option is to pay a resident under a without compensation
exchange mechanism. Under this option, the resident continues to receive pay from VA while on training rotations to non-VA facilities based on the presence of exchange residents who hold VA WOC appointments.

b. **Without Compensation.** Residents may be utilized on a WOC basis. They will be processed for appointment as indicated in paragraph 5 below and appointed in accordance with section G, paragraph 7, this chapter.

c. **Disbursement Agreements.** When VA medical centers are authorized to appoint and pay residents through disbursement agreements, the instructions in VHA Directive 98-031 are to be followed.

5. **PROCESSING**

a. VA Form 10-2850b, Application for Residency, and, when requested by the facility Director, SF-88, Report of Medical Examination, will be submitted. (See VA Directive and Handbook 5019.)

b. Ordinarily, applications will be submitted to the Resident Review Board and to the Deans Committee for review and recommendation as to appointment and grade. Recommendations will be documented on VA Form 10-2850b.

c. On approval by the facility Director, the HRM Officer will effect the resident’s appointment. On rejection by the Resident Review Board or the Deans Committee, the Chairman, Resident Review Board, will notify the applicant and explain the reasons. The SF 88 and VA Form 10-2850b will be returned to the applicant.

6. **DETAILS.** Details are documented and controlled by the office responsible for supervising the resident’s training. The documentation includes the resident’s name, length and location of detail, and salary.

7. **HUMAN RESOURCES MANAGEMENT (HRM) OFFICER’S RESPONSIBILITIES.** As part of the HRM Officer’s overall staff responsibilities to provide advice and assistance on personnel matters, the HRM Officer will:

a. Advise and assist the Resident Review Board, Deans Committee and appropriate professional personnel in all aspects of the administrative processes.

b. Review resident appointments in relation to scheduling at the end of each 6-month interval. (It is the continuing responsibility of the appropriate service chief or equivalent to schedule residents in accordance with the resident’s appointment and pay plan.)
8. CHIEF RESIDENT

a. Purpose. Facility directors may approve, with the concurrence of the Resident Review Board and Deans Committee or Medical Advisory Committee, the designation of medical and dental Chief Residents where required for the successful linkage of quality medical care with effective residency training.

b. Responsibilities. As the first level representative of the service chief or equivalent, the Chief Resident will be assigned specific responsibility for administration, consultation and education in the total program area. Typical assignments would be: duty scheduling, liaison officer with other facility services including the referrals for consultations, serving as a junior consultant, conducting the morning report and chart review conferences with service chiefs or equivalent, serving as a junior member of the facility, scheduling conferences and other educational activities, teaching students and house staff in formal and informal rounds, and consulting with house staff on the performance and progress of medical and dental residents assigned to the service.

c. Selection. The Chief Resident will be in at least the second year of residency training, and will have demonstrated exceptional ability in the specialty as well as teaching and administrative talents. The resident should have tact, understanding, maturity, and the respect of contemporaries. On recommendation of the concerned service chiefs or equivalent, the Chief of Staff will nominate candidates for Chief Resident. Nominations will be reviewed for concurrence by the Resident Review Board and Deans Committee or Medical Advisory Committee. Final approval of Chief Resident nominees rests with the facility Director.

d. Service as Chief Resident. Following approval by the Director, the Chief Resident will be paid the approved Chief Resident stipend rate on the date such duties are assumed. The duration of service as Chief Resident will be for any period approved by the Director during the remaining portion of the resident’s approved residency training, except that the period may not exceed 1 year beyond the time the resident completes board requirements. Except for receiving the Chief Resident stipend rate in lieu of the rate otherwise payable, the Chief Resident will continue to serve in the same manner as other residents, in the position of “Physician (Resident)” or “Dentist (Resident)” at the grade appropriate to the year of training in accordance with the provisions of this manual.

NOTE: See VA Directive and Handbook 5007 for information on Chief Resident stipends and MP-6, part V, supplement No. 1.5, for information on PAID processing requirements.
APPENDIX A. EMPLOYMENT PROCEDURES FOR POSITIONS IN MANILA

1. ANNOUNCEMENT OF VACANCIES. Vacancies for which applicants are desired will usually be announced to all field facilities, or field facilities of the administration concerned, depending on whether such positions are usually filled through agency-wide consideration of candidates or limited to applicants within a single department. Vacancy announcements should be called to the attention of all eligible employees.

2. SUBMITTING AND PROCESSING APPLICATIONS

   a. The names of employees who apply and meet qualification standards and legal requirements will be transmitted to the appropriate administration.

   b. Employees who are within 3 months of meeting experience or time-in-grade requirements may be considered qualified.

   c. The following data will be forwarded to the appropriate administration by the date specified in the vacancy announcement:

      (1) Personnel folder;

      (2) Current Federal employment application, in duplicate;

      (3) Appropriate supervisory appraisals.

      (4) Full name, date and place of birth, and relationship of dependents who would accompany employee; and

      (5) Recommendation by facility Director as to suitability of the employee for the assignment.

   d. When an employee is tentatively selected for assignment, the facility will be notified and requested to forward the following:

      (1) SF 86, Questionnaire for National Security Positions, when required, in triplicate;

      (2) SF 87, Office of Personnel Management (OPM) Fingerprint Chart;

      (3) Reports of medical examination for employee and members of the family who will accompany the employee;

      (4) VA Form 8207, Agreement for Assignment After Tour(s) of Duty Outside Continental United States, in triplicate;

      (5) Transportation Agreement, in triplicate. (See MP-1, part II, chapter 2, appendix I.)
3. TRAVEL ARRANGEMENTS

a. An employee should not make arrangements for departure until notified that the selection is approved.

b. Upon approval of the employee's selection, the appropriate administration will notify the employee's current duty facility and the Manila regional office. Officials at the employee's current facility will ascertain from the employee the anticipated date of departure from the current duty facility, the mode of stateside travel, the expected date of departure from the port of embarkation, estimated weight of household goods and personal effects and whether an automobile will be included in the shipment. This information will be sent by the employee's current duty facility to the Manila regional office for preparation of travel orders.

c. The employee's current facility will initiate the requests for passports for the employee and appropriate family members. Requests will be forwarded through channels to the Director, Office of Human Resources, Veterans Benefits Administration in VA Central Office, at least 30 days prior to scheduled departure.

d. Arrangements for packing and shipping of household goods will be made by the transferee's current duty facility. The acquisition and materiel management officer at the transferee's current facility will counsel the transferee and request routing instructions in accordance with the provisions of VA Directive and Handbook 7240, Transportation and Traffic Management.
APPENDIX B. USE OF PRIVATE SECTOR TEMPORARIES

1. PURPOSE. This appendix provides requirements and guidance on contracting with temporary help service firms for private sector temporaries to meet short-term needs in VA.

2. BACKGROUND. The Government use of private sector temporaries is authorized in 5 CFR, part 300, subpart E. The authority is intended as an option which officials may consider in meeting short-term needs after good faith attempts to locate employees have been unsuccessful. Organizations are required to maintain basic records to establish that use of temporary help services is consistent with OPM requirements.

3. POLICY

   a. VA will comply with the requirements identified in 5 CFR, part 300, subpart E, on Use of Private Sector Temporaries, Federal Acquisition Regulation (FAR) and Veterans Affairs Acquisition Regulation (VAAR) when contracting for private sector temporaries.

   b. These regulations apply to VA positions under title 5, U.S. Code, in the competitive service as well as Schedules A and B in the excepted service. Temporary help services may not be used for the Senior Executive Service or for the work of managerial or supervisory positions. These regulations also do not apply to occupations covered by title 38, U.S.Code. Established procedures for scarce medical specialist contracts under 38 U.S.C. 7409 remain in effect.

   c. Temporary help services shall not be used:

      (1) In lieu of the regular recruitment and hiring procedures for permanent appointment in the competitive civil service;

      (2) To displace a Federal employee;

      (3) To circumvent controls on employment levels; or

      (4) In lieu of appointing a surplus or displaced Federal employee as required by: the VA Career Transition Assistance Plan (VA CTAP) under 5 CFR, part 330, subpart F; and the Interagency Career Transition Assistance Plan (ICTAP) under 5 CFR, part 330, subpart G.

4. EQUAL OPPORTUNITY. Equal opportunity principles will be observed in the administration of this authority.

5. RESPONSIBILITIES

   a. The Deputy Assistant Secretary for Human Resources Management and Labor Relations (05[ ]) is responsible for providing assistance to VA officials to ensure that the use of the authority is consistent with OPM regulations.
b. The Deputy Assistant Secretary for Acquisition and Materiel Management (90) is responsible for providing assistance to VA officials concerning the procurement and contract administration processes.

6. DELEGATIONS OF AUTHORITY

a. The authority to determine the need to contract for use of private sector temporaries is delegated to [Under Secretaries], Assistant Secretaries, Other Key Officials, and Deputy Assistant Secretaries. This authority is further delegated as indicated below and shall not be delegated below the facility Director.

b. Pursuant to 38 U.S.C. 8110, the decision to contract in VHA is delegated to the facility Director.

c. In VA Central Office, the authority to determine the need to contract is delegated to [Under Secretaries], Assistant Secretaries, Other Key officials, and Deputy Assistant Secretaries with the concurrence of the Director, Central Office Human Resources Service (0[5HRS]).

d. The authority to determine the need to contract is delegated to all other facility directors.

7. PROCUREMENT. Contracts for use of temporary help services must be acquired in accordance with contract types and procedures stipulated in the FAR. In order to expedite the urgent acquisition of such services, establishing indefinite delivery/indefinite quantity contracts may be appropriate. Contracting activities may elect to submit solicitations to Acquisition Policy Team [049A5A] for technical/legal review if the estimated value is less than the threshold specified in VAAR 801.602-70.

8. REQUEST DOCUMENTATION. The checklist which is included in this appendix is to be used to ensure that work needs are communicated accurately, regulations are followed, and operating relationships among the using office, the Human Resources Management (HRM) office, and the procurement office are reflected. The HRM office should ensure VA’s competitive service recruitment obligations are fulfilled before a requesting organization is given part I of the checklist to complete.

9. RECORDS MAINTENANCE INSTRUCTIONS. In all instances of contracting for private sector temporaries, the basis for the determination of the need for private sector temporaries shall be documented, and records pertaining to the procurement action maintained by the HRM office in an auditable form for possible VA or OPM review of individual actions. Facilities may dispose of checklists, justification statements and initial/extension request authorizations after the completion of an OPM compliance and evaluation review or after 3 calendar years have passed, whichever occurs first. Facility records will include the following:

a. Facility name, location, and host organizational element(s);

b. Name and telephone number of facility contact for information about the contract;

c. Request checklist, justification statements, and initial/extension authorization(s);

d. Total amount of money the facility paid to temporary help service firms;
e. Total number of hours worked at the facility by temporary help service firm employees (as reflected on firms’ bills or employees’ weekly work report);

f. Type of temporary help service performed; e.g., secretarial, typing assistance, accounting, computer support, engineering, medical, technical, other (specify); and

g. Procurement procedure used; e.g., purchase orders, negotiated contracts, blanket purchasing agreements, other (specify).
CHECKLIST FOR USE OF PRIVATE SECTOR TEMPORARIES

PART I. To be completed by requesting/using office.

Private sector temporaries may be used in accordance with requirements in 5 CFR 300, subpart E. At such time as you may wish to use private sector temporaries, please provide the following information for your Human Resources Management (HRM) office. Some of that information will be furnished to temporary help firms to secure outside temporary(ies) to match your particular needs.

1. OPM regulations authorize use of private sector temporaries in the two short-term situations described below. Check the one that exists in your work unit:

   a. An employee is absent - for a temporary period because of a personal need, including emergency, accident, illness, parental or family responsibilities, or mandatory jury service. This does not include vacations or other circumstances which are not shown to be compelling in the judgment of the authorizing organization.

   b. The organization must carry out work for a temporary period which cannot be delayed in the judgment of the authorizing organization because of a critical need. A critical need is a sudden or unexpected occurrence, an emergency, a pressing necessity, or an exigency. Such occasions are characterized by additional work or deadlines required by statute, Executive order, court order, regulation or formal directive from the agency head or subordinate official authorized to act for the agency head. A recurring, cyclical peak workload, by itself, is not a critical need.

2. Starting date needed: ________ Ending date: ________ If work is other than full-time continuing, also show workdays and/or hours needed.

   NOTE: An organization may use temporary help service firm(s) in a single situation for no more than 120 workdays. Provided that situation continues beyond the initial 120 workdays, an organization may extend its use of those temporary help services up to the maximum limit of 240 workdays. Also, an individual employee of any temporary help firm may work at a major headquarters or field organizational element for up to 120 workdays in a 24-month period. The authorizing organization may make an exception for an individual to work up to a maximum of 240 workdays only after determining that using the same individual’s services will prevent significant delay. Otherwise, if an appropriate need still exists, a different outside temporary may be secured.

3. Identify the exact work to be performed: typist, word processor, secretary, mail or file clerk, data entry clerk, receptionist, accountant, computer programmer, etc.

4. List the specific knowledges, skills, and abilities needed to do the job. (Position descriptions usually are too general for this purpose.)

5. What equipment will be used? Show make and model of personal computer, word processor, typewriter, mail sorter, etc.
6. If a specific computer program is required, show name.

7. Describe the work environment. In what setting will the temporary be working: general office, front office, typing pool, information desk, mailroom, warehouse, etc.

8. List any applicable physical abilities required, such as: a significant amount of walking (mail clerk), bending and lifting (warehousing), standing (clerk-photocopying).

9. List any other special conditions of the work, for example, security clearance requirements.

10. List administrative information such as location or work place, building and room number; daily starting and ending times; and lunch times.

11. Name, room, and telephone number of the person to whom the temporary should report.

12. I certify that no employee can be reassigned or detailed to that work without causing undue delay in the employee’s regular work. (In addition, the HRM office must check whether it has any applications from job candidates who are qualified and available for short-term appointment.)

13. Signature and title of requesting official. Date.

PART II. To be completed by Human Resources Management Office.

14. Review part I for compliance with regulatory requirements and for appropriate information to place an order. (As in other procurement actions, procurement specialists usually place orders with firms; when authorized, HRM specialists or other designated personnel also may place orders.)

15. Were the 30 percent or more disabled veteran list, applicant supply file, and reemployment priority list, checked for candidates? If any were available and qualified, list names and disposition. [5 CFR 300.503(b)]

16. For needs exceeding the initial 120-workday authorization, was a vacancy announcement posted to allow VA Career Transition Assistance Plan (VA CTAP) and Interagency CTAP eligibles an opportunity to apply? If any were available and qualified, list names and disposition. [5 CFR 300.503(c)(4)]

17. Signature and title of HRM specialist and date.

PART III. Optional. (The procurement office, at its option, may wish to add as part III of the checklist any procurement steps or information it considers significant for its operations; e.g., firms contacted, price quotes.)
APPENDIX C.
NONCOMPETITIVE CAREER-CONDITIONAL (OR CAREER) APPOINTMENT OF STUDENT TRAINEES IN ASSOCIATED HEALTH CARE DISCIPLINES

1. PURPOSE. This appendix contains requirements and information which supplement paragraphs 2h(1) and (2) of section B, chapter 2, part II of this handbook.

2. BACKGROUND. Under its statutory mission to develop and carry out a program of education and training of health care personnel for the Nation, VA annually trains thousands of affiliated students in associated health care disciplines. In order to provide maximum flexibility in hiring graduates of these programs, Public Law 101-237, dated December 18, 1989, authorized VA to appoint under title 5, without regard to competitive Federal civil service examining and certification procedures, eligible graduates who have a degree, diploma or certificate in an associated health care discipline from an accredited institution of post-secondary education, and who have successfully completed an affiliated clinical education training program in a VA health care facility. The citation for this authority is 38 U.S.C. 7403(g).

3. AUTHORITY
   a. General. In accordance with 38 U.S.C. 7403(g), VA facilities are authorized to appoint under title 5, without regard to competitive Federal civil service examining and certification procedures, eligible graduates who have a degree, diploma or certificate in an associated health care discipline from an accredited institution of post-secondary education, and who have successfully completed an affiliated clinical education training program in a VA health care facility.
   
   b. Exclusions. This employment authority does not apply to individuals in training programs that will result in post-training appointments under 38 U.S.C. 7401(1) or (3) or under 38 U.S.C. 7405 to an occupation listed under those paragraphs.

4. EQUAL OPPORTUNITY. Consideration for appointment will be made without regard to race, color, religion, sex, national origin, or disability. As part of VA affirmative employment efforts relating to disabled veterans, minorities, persons with disabilities, and women, health care officials need to ensure that appointments fully reflect VA’s commitment to equal opportunity.

5. DEFINITIONS
   a. Associated Health Care Disciplines. Affiliated nationally recognized health care professions with entry level training at the post-secondary level, other than medicine and dentistry (except for exclusions in the preceding subparagraph 3b). A general list of the major associated health care disciplines is provided in appendix C1 of this part. (Reference: VHA Manual M-8, part II, chapter 2)

   b. Clinical Education. The portion of education or training that takes place at the site of VA clinical care rather than the affiliated institution. Clinical education does not include activities which are: shorter than 40 hours per year; only observational with no patient contact; for laboratory research purposes only; and on-the-job training only.
c. Undergraduate and Graduate Educational Programs. Educational activities which take place following secondary education for which a recognized degree or certificate is awarded.

d. Students. Persons enrolled in undergraduate and graduate educational programs who participate in clinical education activities at the VA health care facility for 40 hours or more per year and who are appointed on either a paid or without-compensation (WOC) basis.

e. Affiliated. Linked by a formal Memorandum of Affiliation (see M-8, part I, chapter 2). Affiliations shall exist only with accredited institutions of post-secondary education.

6. REQUIRED DOCUMENTATION. A personnel folder will be established for eligible student trainees whose appointments are documented on an SF 50-B, Notification of Personnel Action. For those students on WOC appointments, a file folder will be established, and a VHA Form Letter (FL) 10-294, Authorization (WOC Personnel) will be completed. All documents, including the SF 50-B or FL 10-294, relating to a student’s VA training must be maintained in these files. These documents are necessary for verification of completion of clinical education, which is one of the eligibility requirements for employment under 38 U.S.C. 7403(g). Although the student is responsible for producing this verification, the file for each student on a WOC appointment will be maintained in the Human Resources Management (HRM) office for at least 1 year after completion of all eligibility requirements.

a. Initial Associated Health Student Trainee Appointment (Temporary or WOC). VA automated personnel system remark code #T is to be included on the student trainee’s appointment SF 50-B or FL 10-294. Remark code #T reads: “UPON SATISFACTORY COMPLETION OF THE ASSOCIATED HEALTH CARE TRAINING PROGRAM, AND WITHIN 1 YEAR AFTER GRADUATION, YOU ARE ELIGIBLE FOR A NONCOMPETITIVE CAREER-CONDITIONAL (OR, IF APPROPRIATE, CAREER) APPOINTMENT TO A VA POSITION IN THE HEALTH CARE DISCIPLINE FOR WHICH TRAINED. COMPLETION OF THESE REQUIREMENTS DOES NOT, HOWEVER, GUARANTEE APPOINTMENT.” HRM officials will ensure that students, clinical educators, and other VA officials responsible for administering VA’s clinical education programs are thoroughly briefed on the eligibility requirements for appointment under this authority, including the importance of maintaining all employment forms required to verify successful completion of training. A recommended sample information letter is located at the end of this appendix.

b. Upon Completion of the Associated Health Student Trainee Appointment (Temporary or WOC). Upon completion of training, an SF 50-B will be issued for employees on whom a personnel folder has been maintained. For the SF 50-B, use VA automated personnel system remark code T – “Reason for Termination: Training completed at this station.” The following statement is also to be placed on the SF 50-B or the FL 10-294: “Clinical education successfully completed, which satisfies one of the requirements for basic eligibility for noncompetitive appointment under the provisions of 38 USC 7403(g).”

7. APPLICATION PROCEDURES. Openings for which student trainees may qualify will be publicized as widely as possible within each VA facility as well as in affiliated institutions. Upon request, the HRM office will assist applicants in obtaining the necessary forms.
a. Each application package must include:

   (1) Completed Optional Form (OF) 612 - Optional Application for Federal Employment, or resume. A Standard Form (SF) 171 – Application for Federal Employment is also acceptable. (The HRM office should have blank OF 612’s available.) [The SF 171, 171A, and OF 612 forms are not required for USA Staffing recruitments. In USA Staffing, a résumé is preferred.]

   (2) Copy of degree, diploma, license (if appropriate), or certificate documenting graduation in a health care discipline covered under the provisions of 38 USC 7403(g).

   (3) Copy of SF 50-B or FL 10-294 documenting completion of VA affiliated clinical education. (The HRM office would assist with, or advise on, requests for the individual’s SF 50-B or FL10-294.)

b. Applications may be accepted from students who will meet all eligibility requirements within 6 months. These applications may be processed and employment commitments made subject to completion of all requirements. The HRM office is responsible for ensuring that selectees meet minimum qualification requirements, including training, education, and necessary credentials, prior to entry on duty.

c. Applicants who wish to be considered for employment at a VA facility other than the one in which they trained may contact the facility of their choice to inquire about prospective openings about 2 months before they are available for appointment. Facility officials may assist applicants by checking the VA Vacancy Database on the VA intranet for appropriate openings for which these individuals are eligible.

8. SELECTION PROCEDURES. The HRM office will forward a certificate of candidates qualified for this noncompetitive appointment to the selecting official. Preference will be given to disabled veterans and other preference eligibles as follows.

   a. All eligible, qualified candidates will be assigned a basic score of 70. Extra points will be added to this score for preference eligibles. For all positions, candidates will be referred in the following priority group order:

      (1) Disabled veterans who have a service-connected disability of 10 percent or more, who have 10 points added under 5 U.S.C. 3309;

      (2) Preference eligibles as defined under 5 U.S.C. 2108(3)(C) through [(H)], other than those in the preceding paragraph 8a (1), who receive 10 points;

      (3) Preference eligibles as defined under 5 U.S.C. 2108 (3)(A) and (B), who receive 5points;

      (4) All other candidates.

   b. Regardless of preference category, any preference eligible may be selected. However, a preference eligible may not be passed over for selection of a nonpreference eligible.

   c. If there are no disabled veterans or other preference eligibles, any candidate may be selected.
9. RECORDS. A case file will be established for every new appointment made under this authority. Include in the file a copy of the announcement, all applications with supporting documentation, the register of applicants, the certificate of candidates referred, and the selecting official’s decision. This file will be maintained in accordance with General Records Schedule (GRS) 1, item 15.

10. APPOINTMENTS. Appointments under this authority are subject to all competitive service appointment requirements, except for those concerning use of competitive Federal civil service examining and certification procedures. HRM officials will ensure that academic, training, and qualification requirements are met before making appointments. Appointees are subject to the provisions of title 5, U.S.Code. in all other employment matters such as performance appraisal, leave, hours of duty, and adverse actions.

a. Conditions for Eligibility. Individuals are eligible for a noncompetitive appointment upon completion of the following:

(1) Successful completion of a course of study in an accredited institution of post-secondary education. Associate’s, Bachelor’s, Master’s or Doctoral degrees or certificates or diplomas in a major field of study which satisfy requirements in the qualification standard for the entry position are acceptable. Completion must be verified by diploma or certificate, degree, or other official school document. The institution must be accredited by a nationally recognized agency that has been identified by the U.S. Department of Education. Information on accredited institutions is contained in either: the reference Accredited Institutions of Postsecondary Education, published annually by the American Council on Education (ACE) and distributed for ACE by Oryx Press, P.O. Box 33889, Phoenix, AZ 85067-3889, phone: 800-279-6799 or 602-265-2651; or the Higher Education Directory on colleges or universities, published annually by Higher Education Publications, Inc., 6400 Arlington Boulevard, Suite 648, Falls Church, VA 22042, phone: 888-349-7715 or 703-532-2300.

(2) Satisfactory completion of an affiliated associated health clinical education training program, as required by the institution’s curriculum, in a VA health care facility. Completion of the training program is to be verified by a copy of the SF 50-B or FL 10-294.

(3) Meet all qualification standard requirements, including certification/licensure, if required.

(4) Are applying for an appointment to a position in a health care occupation for which they trained.

(5) Meet United States citizenship requirements (5 CFR 338.101).

(6) As required by law, registration with the Selective Service System (5 U.S.C. 3328; 5 CFR, part 300, subpart G).

b. Time Limit on Appointment Eligibility. Qualified individuals are eligible for this noncompetitive appointment within 1 year after graduation, with date to be verified by diploma or certificate, degree, or official school document. [ ]

c. Grade Level. Students may be noncompetitively appointed to a position for which they trained at any grade level for which they qualify.
d. **Tenure and Status.** An individual appointed under this authority becomes a career-conditional employee (or a career employee if the service requirement has been met (5 CFR 315.201)).

e. **Probationary Period.** An individual appointed under this authority must serve a 1-year probationary period. Time in the student trainee position is not creditable toward completion of the probationary period (5 CFR 315.801-2).

f. **Service Computation Date (SCD).** Time served under the temporary student trainee appointment in a paid status is counted toward the SCD and is considered creditable service for leave purposes only. Time served under a WOC appointment is not counted toward the SCD and, therefore, is not creditable for leave. Student trainee appointments are excluded by law from retirement coverage under the Civil Service Retirement System (CSRS) and the Federal Employees Retirement System (FERS) (5 U.S.C. chapters 83 and 84; 5 U.S.C. 5351).

h. **Appointment Authority.** Appointments will be effected in accordance with instructions in OPM’s Guide to Processing Personnel Actions, chapter 9, Career and Career-Conditional Appointments, Table 9-G. Use Nature of Action Code 101 for career-conditional (or, if appropriate, 100 for career) for individuals no longer on VA rolls, and 501 (or 500) to convert those currently on VA rolls. Although OPM’s Guide indicates that the proper authority code is ZLM, that code is generic and without definition in VA’s automated personnel system. In its place, use VA legal authority code Z41, which prints properly on the SF 50-B as “ZLM 38 U.S.C. 7403(g)(1)(B).”

h. **Movement after Noncompetitive Appointment.** The time-after-competitive appointment restriction does not apply to this noncompetitive appointment (5 CFR 330.501).

11. **WAIVERS.** The Under Secretary for Health or designee may approve justifiable waivers of the 1-year time limit for noncompetitive appointment of a student trainee. Facility directors must send to VA Central Office (10NA/05[ ]), through their Network Director, requests for such waivers for individuals who, because of unusual circumstances, were not able to accept an appointment within the 1-year period after graduation. Requests will be evaluated on a case-by-case basis.
APPENDIX C1. LIST OF MAJOR ASSOCIATED HEALTH CARE DISCIPLINES

Public Law 101-237, section 203, authorized noncompetitive title 5 appointments under 38 U.S.C. 7403(g) of graduates in certain associated health-care disciplines who have successfully completed a course of study in an accredited institution of post-secondary education that is affiliated with the Department of Veterans Affairs (VA). As part of a course of study, students must have successfully completed a required clinical education training program in a VA health care facility.

A general list follows of the associated health care disciplines for which VA training is currently being provided. To assist in determining which disciplines may be appropriate for appointment under this authority, classification series representing the predominant General Schedule occupations for each educational program are provided. Questions concerning any series (listed or not) may be directed to the [Office of O]HRM[&LR] (05[ ]) in VA Central Office.

APPENDIX C2. EMPLOYMENT INFORMATION - RECOMMENDED SAMPLE LETTER

Dear Student:

Upon satisfactory completion of your Department of Veterans Affairs (VA) affiliated clinical education training program, and within 1 year after graduation [ ] or certification from an accredited institution of post-secondary education, you will be eligible for a direct appointment with VA. Employment opportunities will depend on vacancies at each health-care facility. Openings are publicized within each VA facility and copies of announcements, as well as all forms, are available in the Human Resources Management (HRM) office.

To apply, forward the following information to the HRM office: a completed Optional Form (OF) 612, Optional Application for Federal Employment, or a resume also acceptable: a completed Standard Form (SF) 171, Application for Federal Employment; a copy of your diploma, license (if appropriate), certificate, or degree documenting completion of course study in the affiliated educational program; and a copy of any SF 50B, Notification of Personnel Action, or VA Form Letter 10-294, Authorization (Without-Compensation Personnel) documenting completion of your VA clinical education.

If you wish to be considered for employment at a VA facility other than the one in which you trained, you may contact the facility of your choice to inquire about prospective openings about 2 months before you are available for appointment. Facility officials may assist you by checking the VA Vacancy Database on the VA intranet for appropriate openings for which you are eligible. You should follow application instructions in vacancy announcements in which you are interested.

Sincerely yours,
APPENDIX D. NONCOMPETITIVE APPOINTMENT OF STUDENTS AND RECENT GRADUATES THROUGH THE VA CHOICE AND QUALITY EMPLOYMENT ACT OF 2017

1. PURPOSE. This appendix outlines hiring guidance for section 206 of Public Law 115-46, VA Choice and Quality Employment Act of 2017 (or the Act). Section 206 of the Act authorizes VA to appoint students and recent graduates into excepted service appointments that lead to noncompetitive conversion to career or career-conditional appointments, as applicable. The policy for the Act is established in chapter 3, section G, paragraph 9, Appointment of Students and Recent Graduates through the VA Choice and Quality Employment Act of 2017, of this part.

2. COVERAGE. This appendix applies to appointments for students and recent graduates in title 5 occupations, and subsequent conversion to the title 5 competitive service, as permitted under the Act. Student trainees appointed under the provisions of noncompetitive career-conditional (or career) appointment of student trainees in associated health care disciplines, as outlined in Part II, Appendix C., of this handbook are not covered by the provisions in this paragraph. In addition, this authority is not intended to employ individuals in direct patient care positions that lead to employment in the title 38 (full or hybrid) excepted service. Those provisions are covered under chapter 3, title 38 appointments, of this part.

3. REFERENCES.
   b. 5 U.S.C. § 2108, Veteran; Disabled Veteran; Preference Eligible
   c. 5 C.F.R. § 302, Employment in the Excepted Service
   d. 38 U.S.C. § 7405, Temporary full-time appointments, part-time appointments, and without-compensation appointments

4. RESPONSIBILITIES.
   a. Assistant Secretary for the Office of Human Resources and Administration (HRA) (006). Serves as the designated agency official, as VA’s Chief Human Capital Officer, implementing policy for the Act.
   b. Deputy Assistant Secretary for Office of Human Resources Management (OHRM) (05). Establishes and maintains VA policy and guidelines for the implementation and utilization of this excepted authority. Provides technical guidance and advice to the VA HR community regarding the policy.
   c. Human Resources (HR) Officer/Director. The HR Officer/HR Director’s duties and responsibilities include:
(1) Provides oversight of the designee and overall compliance of this authority at the facility;

(2) Provides technical guidance and advice to hiring officials, supervisors, and operating human resources staff within the respective facility regarding this authority;

(3) Ensures proper application of Veterans’ preference when filling excepted service positions, as required;

(4) Makes qualification determinations for excepted appointments;

(5) Serves as a liaison with participating schools on matters pertaining to student employment programs in VA and stays informed of developments in the area regarding student employment in the public and private sectors;

(6) Ensures hiring officials and supervisors comply with the mandatory requirements of the authority;

(7) Obtains certification of enrollment and recurring transcripts from students and recent graduates; and

(8) Advises hiring officials and supervisors of their duties and responsibilities.

d. Hiring Officials and Supervisors. Oversee and assign the daily work activities of the student or recent graduate and serves as the primary point of contact for any questions related to the excepted appointment.

5. DEFINITIONS. For the purposes of this paragraph, definitions are as follows:

a. Contractor. A student or recent graduate employed in VA under a contract or agreement with an external nonprofit organization.

b. Eligibility Category. A group of students and/or recent graduates identified in the Act that are eligible for consideration for an excepted service appointment in VA that lead to noncompetitive conversion to a career or career-conditional appointment. Noncompetitive conversion to the competitive service is not guaranteed, but is at the facility’s discretion.

c. Fellowship Program. Any formal program used in the Department to employ recent graduates from qualifying educational programs.

d. Good Standing. Specific criteria for meeting “good standing” is defined under each eligibility category under paragraph 5 below, “Eligibility Categories for Excepted Appointments.” In addition, all students and recent graduates must furnish evidence of “good standing” by providing a transcript documenting a minimum 2.0 on a 4.0 grade point average (G.P.A.) scale. Facilities can use the most recent semester’s G.P.A. or
the overall G.P.A., whichever is most advantageous to the applicant, to document "good standing." For individuals who are attending or have graduated from educational institutions that do not use a G.P.A. system, the HR Officer/HR Director or designee must request verification of achieving an average or above average standing from the educational institution.

e. **Internship Program.** Any formal program used in the Department to employ current students from qualifying educational institutions.

f. **Qualifying Educational Institution.** A public high school whose curriculum has been approved by a State or local governing body, a private school that provides secondary education as determined under State law, or a homeschool that is allowed to operate in a State; and any of the following educational institutions or curricula that have been accredited by an accrediting body recognized by the Secretary of the U.S. Department of Education: a technical or vocational school; a 2-year or 4-year college or university; a graduate or professional school (e.g., law school, medical school); or a post-secondary homeschool curriculum.

g. **Recent Graduate.** An individual who obtained a qualifying diploma, associate, bachelors, master’s, professional, doctorate, vocational or technical degree, or certificate from an accredited, qualifying educational institution within the preceding 3 years.

   **NOTE:** Veterans, as defined in section 2108 of title 5, United States Code (U.S.C.), who furnish evidence of intervening military service must be afforded 3 years of eligibility of consideration for an excepted appointment under the Act.

h. **Student.** An individual accepted for enrollment or enrolled and seeking a degree, diploma, certificate, etc. in a qualifying educational institution, on a full or half-time basis (as defined by the institution in which the student is enrolled). An individual who needs to complete less than the equivalent of half an academic/vocational or technical course-load immediately prior to graduating is still considered a student for purposes of this program.

i. **Substantive Duties.** Meaningful and considerable work responsibilities that are like those of individuals in VA internship and fellowship programs who are assigned formal structured and/or classified duties. These duties are typically duties that are outlined in classified position descriptions.

j. **Volunteer.** A student in volunteer service as described in 5 CFR, part 308. A volunteer is also a student or recent graduate serving on a Without Compensation (WOC) appointment under 38 U.S.C. § 7405 (a)(1)(D).

6. **ELIGIBILITY CATEGORIES FOR EXCEPTED APPOINTMENTS.** The Act gives VA flexibility to broaden the applicant pool to certain categories of students and recent
graduates. These applicants can be quickly appointed to support the mission of VA and to fill the Department’s growing workforce and succession planning needs. A student or recent graduate in “good standing,” (as described in the eligibility categories in sections a through d of this paragraph) may be considered for a title 38 excepted appointment in a title 5 occupation that may result in conversion to the competitive service. These excepted appointments are made under 38 U.S.C. § 7405 (a)(1)(D) and may not exceed one year unless an exception is approved by the Director of Recruitment and Placement Policy Service (059). Individuals can serve on a full-time or part-time work schedule based on the needs of the facility. The positions may have a career promotion (i.e., career ladder opportunity) but must be permanently funded and properly classified. There is no grade level limitation for the initial appointment. Applicants must meet the applicable qualification requirements. After meeting the minimum service requirements of 640 hours in the excepted appointment, a student or recent graduate may be considered for noncompetitive conversion to a career or career-conditional appointment as outlined in paragraph 7 of this appendix. Students and recent graduates in the following eligibility categories that meet the minimum qualification requirements and the definition of “good standing” for that category can be considered for an excepted appointment in VA:

a. **Internship or Fellowship Program.** Students and recent graduates employed in a qualifying internship or fellowship program at the Department are eligible for an excepted service appointment. In addition to the definition of “good standing” in paragraph 5.d. above, for this eligibility category, “good standing” is evidenced by a performance plan with a rating of fully successful (or higher) or a letter of good standing from the current supervisor, program manager, or equivalent.

b. **Volunteer Program.** Students and recent graduates in a volunteer capacity in the Department performing substantive duties comparable to those of individuals in internship or fellowship programs and who are in good standing are eligible for an excepted service appointment. In addition to the definition of “good standing” in paragraph 5.d. above, for this eligibility category, “good standing” is evidenced by a performance plan with a rating of fully successful (or higher) or a letter of good standing from the current supervisor, program manager, or equivalent. The student or recent graduate must be a current, active volunteer in the Department and provide proof of completing 20 hours of volunteer or without compensation service within the preceding one year.

c. **External Nonprofit Organization Contract or Agreement.** Students and recent graduates employed in the Department under a contract or agreement with an external nonprofit organization and performing substantive duties comparable to those of individuals in internship or fellowship programs and who are in good standing are eligible for an excepted appointment. In addition to the definition of “good standing” in paragraph 5.d. above, for this eligibility category, “good standing” is evidenced by a performance plan with a rating of fully successful (or higher) or a letter of good standing from the current supervisor, program manager, or equivalent. The student or recent graduate must provide proof of completing 20 hours of service under the agreement.
d. **Educational Assistance Programs.** Students and recent graduates who have received Post 9/11 Educational Assistance under chapter 33 of title 38 U.S.C. and meet the definition of “good standing” in paragraph 5.d. above are eligible for an excepted appointment.

7. **REQUIREMENTS FOR EXCEPTED APPOINTMENT.** Before making excepted service appointments, facilities must ensure compliance with the following identified requirements:

a. **Public Notification Methods.** When filling positions under this authority, public notice must be provided to afford applicants an open and fair opportunity to be hired. Facilities may post an internal and/or external job posting to solicit applications. HR Offices must announce positions for a minimum of three (3) business days or for a minimum number of days defined by any applicable labor contract.

b. **Internal Job Posting.** Students and recent graduates currently serving in VA may apply to internal job opportunity announcements (JOA). At a minimum, the facility may limit the area of consideration to those serving in VA in a specific eligibility category. The facility must use the option in USA Staffing® to post the JOA to “Agency Employees Only – Intranet Posting Only” or “Internal Only.” If more than one individual is interested, the agency must apply the selection procedures for employment in the excepted service under 5 CFR, part 302.

c. **External Job Posting.** Students and recent graduates not currently serving in VA must apply for posted job opportunities. When a posting is open to applicants outside of VA, the hiring facility will use USA Staffing® to post the vacancy on the USAJOBS Web site, to ensure the vacancy is open to those in the general public who meet the eligibility category requirements for the program. To mitigate the likelihood of a high volume of applications, HR Offices should consult with hiring officials to tailor the job analysis and other assessment tools to obtain the desired candidate pool. If more than one individual is interested, the agency must apply the selection procedures for employment in the excepted service under 5 CFR, part 302.

d. **Priority Consideration.** Appointments and related noncompetitive conversions to the competitive service are not subject to the regulatory provisions in the competitive service for the Reemployment Priority List (RPL), the Career Transition Assistance Plan (CTAP), or the Interagency Career Transition Assistance Plan (ICTAP), as stated in 5 CFR 330.211(f)(3), 5 CFR 330.609(e)(3), and 5 CFR 330.707(h)(3), respectively.

e. **Applicability of Veterans’ Preference.** In general, excepted appointments are exempt from competitive service principles; however, positions exempt from appointment procedures as indicated in 5 CFR 302.101(c) requires the principle of Veteran’s preference be followed to the extent possible. VA HR Offices must apply Veteran’s preference when students and recent graduates are considered for excepted appointments. Subsequent conversions to the competitive service are not subject to Veterans’ Preference requirements. HR Offices must follow pass over procedures outlined in 5 CFR, part 302, subpart D, § 302.401 (b).
f. **Appointment Requirements.** Excepted appointments and subsequent conversions to the competitive service are coded in accordance with OPM’s Guide to Processing Personnel Actions. The legal authority for excepted appointments is 38 U.S.C. § 7405 (a)(1)(D), and for subsequent conversion to the competitive service is Public Law 115-46.

8. **NONCOMPETITIVE CONVERSION TO THE COMPETITIVE SERVICE.** Noncompetitive conversion to the competitive service (i.e., career or career-conditional employment) is not guaranteed or required. The facility may convert a student or recent graduate noncompetitively to a career or career-conditional appointment in the competitive service after the student or recent graduate (serving on the excepted appointment) obtains a minimum of 640 hours on the excepted appointment. A facility may use previous education and/or experience as the basis to qualify a student or recent graduate for conversion into the targeted position.

a. **Crediting Time Served under a Volunteer Program or External Nonprofit Organization Contract or Agreement.** When students and recent graduates have served as volunteers or contractors, hours served performing substantive duties are creditable for meeting the 640 hours required for conversion to the competitive service. The servicing HR Office may review the employee’s employment records and other documents to justify crediting up to 320 hours performed under a Volunteer Program or External Nonprofit Organization Contract or Agreement.

b. **Crediting Service for Probation.** Time spent in the excepted appointment is time-limited and is not creditable towards completion of the probationary period required in 5 CFR 315, subpart H.

c. **Crediting Service for Career Tenure.** Time spent in the excepted appointment is time-limited and is not creditable towards meeting the service requirement for career tenure as outlined in 5 CFR 315, subpart A.]
APPENDIX E.
HEALTHCARE SYSTEM MANAGEMENT
ADMINISTRATION RESIDENTS, INTERNS AND TRAINEES

1. HEALTHCARE SYSTEM MANAGEMENT ADMINISTRATION RESIDENTS.

a. Healthcare system management administration residents are graduate students pursuing a master's
degree in a program approved by the Commission on Accreditation of Healthcare Management
Education (CAHME). Practical experience is for 1 year and is usually performed following the
completion of 1 academic year of graduate study.

b. Residents will be appointed under [the Pathways Internship Program under 5 CFR 213.[3402(a)].

c. Compensation for residents is locally established by facility Directors at appropriate levels within
maximums prescribed by Federal civil service regulations and VA. (See VA Handbook 5007, Pay
Administration.)

d. Residents appointed under 5 CFR 213.[3402(a)] may be noncompetitively converted to career-
conditional, term, or career appointments, as appropriate, provided all requirements of 5 CFR [362.204]
are met.

NOTE: When using the Pathways Programs authorities to appoint healthcare administration residents,
HR Offices must consider all eligible and qualifying individuals and must not screen candidates who are
not pursuing or have completed education from CAHME or other similar accrediting body.

2. HEALTHCARE SYSTEM MANAGEMENT ADMINISTRATION INTERNS.

a. Healthcare system management administration interns are graduate students pursuing a master's
degree in a program approved by the CAHME. Practical experience is typically available during the
summer between 2 years of graduate level academic study and is for a period of 2 to 4 months.

b. Interns whose work assignments are anticipated to equal or exceed 640 hours necessary for
noncompetitive conversion must be appointed under [the Pathways Internship Program under 5 CFR
213.3402(a)]. Those interns whose work assignments are not anticipated to meet the 640 hours
requirement under 5 CFR 213.[3402(a)] will be appointed under the authority of 38 U.S.C. 7405.

c. Compensation for interns appointed under 5 CFR 213.[3402(a)] is locally established by facility
Directors at appropriate levels within maximums prescribed by Federal civil service regulations and VA.
(See VA Handbook 5007) Compensation for those interns who are appointed under the authority of 38
U.S.C. 7405 will be in accordance with the provisions of VA Handbook 5007.

d. Interns appointed under 5 CFR 213.[3402(a)] may be noncompetitively converted to career-
conditional, term, or career appointments, as appropriate, provided all requirements of 5 CFR [362.204]
are met.
NOTE: When using the Pathways Programs authorities to appoint healthcare administration interns, HR Offices must consider all eligible and qualifying individuals and must not screen candidates who are not pursuing or have completed education from CAHME or other similar accrediting body.

3. HEALTHCARE SYSTEM MANAGEMENT ADMINISTRATION TRAINEES.
   
   a. Healthcare system management administration trainees are undergraduate students pursuing a bachelor's degree in healthcare administration or a closely related field. Practical experience is usually from 2 to 4 months during the summer between the junior and senior years.
   
   b. Trainees whose work assignments are anticipated to equal or exceed 640 hours must be appointed in [the Pathways Internship Program under 5 CFR 213.3402(a)]. Appointment will be at the GS-3 grade level if the trainee has completed [1] year of college and at the GS-4 grade level if the trainee has completed [2] years of college. Those trainees whose work assignments are not anticipated to meet the 640 hours requirement necessary under 5 CFR 213.3402(a) for noncompetitive conversion to[ term,] career-conditional or career appointments, as appropriate, will be appointed under 38 U.S.C. 7405.
   
   c. Compensation for trainees appointed under 5 CFR 213.3402(a) will be at the pay levels for GS-3 or GS-4, as appropriate. Compensation for those trainees who are appointed under authority of 38 U.S.C. 7405 will be in accordance with the provisions of VA Handbook 5007.
   
   d. Trainees appointed under 5 CFR 213.3402(a) may be noncompetitively converted to career-conditional, term, or career appointments, as appropriate, provided all requirements of 5 CFR [362.204] are met.

4. CONVERSION TO [TERM,] CAREER-CONDITIONAL AND CAREER APPOINTMENTS.
   Students meeting all the requirements specified in 5 CFR [362.204] may be converted to [term,] career-conditional or career positions, as appropriate, at the employing medical facility. If there is no appropriate position available locally for a student who is considered a good candidate for conversion, the medical facility or the student may check lists of vacancies published by VA Central Office and contact other VA installations at which the student is interested in being employed.
[APPENDIX F1. HUMAN RESOURCES SPECIALIST QUALIFICATION STANDARDS

GS-0201

Department of Veterans Affairs

AUTHORITY: This is a qualification standard developed by the Department of Veterans Affairs (VA) under The Sergeant First Class Heath Robinson Honoring our Promise to Address Comprehensive Toxics Act of 2022 (PACT Act), P.L. 117–168, that applies to positions in VA. For VA, this qualification standard is mandated for use for all Human Resources (HR) Specialists, GS-0201 positions and replaces VA’s use of the U.S. Office of Personnel Management’s (OPM) General Schedule Administrative and Management qualification standard for this occupation. The effective date for implementation of the standard is February 26, 2023.

1. BACKGROUND. VA is the second largest Federal agency and is comprised of VA Central Office, three Administrations (Veterans Health Administrations (VHA), Veterans Benefits Administration (VBA) and National Cemetery Administration (NCA)) and various Staff Offices. VA employs over 400,000 individuals who collectively and collaboratively provide medical, benefit and burial services and assistance to our Nation’s Veterans and their beneficiaries.

a. HR Specialists serve within the human capital framework of VA. They are appointed in the title 5 competitive or title 5 excepted service, depending on the type of appointment. HR Specialists help organizations achieve their goals by providing a lifecycle of administrative, strategic and consultative services to organizations. HR Specialists support employees throughout their employment journey, from recruitment to separation. HR Specialists also provide managers with the tools needed to oversee their workforce. Services provided include technical guidance and support with staffing, pay, benefits, leave, retirement, employee relations, labor relations, development, compliance and other functional areas of work. HR Specialists also provide services to potential candidates (applicants) and the work they do ultimately impacts the level of care and services that our employees provide to Veterans and their beneficiaries.

b. VA is unique as it encompasses a comprehensive Federal health care system. VA’s health care system requires the services of clinicians, professionals and other support workers to meet the needs of customers. VA HR Specialists differ from other Federal HR professionals because they must possess a working knowledge and understanding of three distinct personnel systems (title 5, hybrid title 38 and title 38) to appoint or effect other actions for employees serving in clinical, professional and support occupations. VA HR Specialists must also navigate multiple and complex labor agreements to ensure activities and personnel actions comply with applicable contracts.
c. This qualification standard is required by Section 903(a) of The Sergeant First Class Heath Robinson Honoring our Promise to Address Comprehensive Toxics Act of 2022, or The PACT Act, signed on August 10, 2022. Section 903 ensures the most qualified and effective HR Specialists are hired, developed and retained to provide the best service to VA employees, potential employees, supervisors, managers and executives to maximize the quality of service to our Nation’s Veterans and their beneficiaries.

2. DUTIES. HR plays a critical role in the strategic planning of VA. HR Specialists combine customer centric approaches with the interdisciplinary functions of an HR Office to provide various administrative services to the Department’s internal and external customers. HR Specialists possess the qualifications, HR knowledge and technical skills essential to consult, advise and provide management with guidance, recommendations and solutions to support VA’s workforce. HR’s internal customers include employees, managers, HR professionals and other organizational leaders. External customers include candidates (or applicants), other agencies/departments, businesses, contractors, universities, etc. These services include drafting and interpreting policy and procedures, as well as properly utilizing various HR systems to their fullest capabilities. The exact work performed depends on the general or specialty functional area to which the HR Specialist is assigned. All assignments require the ability to communicate with customers and skill to provide customer service, research and consultation/advisory services.

a. Required competencies for HR Specialists include strong problem-solving skills and creative thinking to resolve employee issues; ability to effectively communicate with people at all levels of an organization; excellent verbal and written communication skills; outstanding interpersonal relationship skills; strong analytical skills; good judgement and decision-making abilities; attention to detail and organization skills; an ability to handle confidential information discreetly and with sensitivity; a thorough working knowledge of HR laws, regulations and policies; knowledge of and ability to use computers and HR information systems platforms; ability to multitask and prioritize effectively; and flexibility and adaptability skills to adjust to workplace changes.

b. The HR Specialist works within their appropriate specialty (or functional) area to research matters and apply problem-solving skills and creative thinking when appropriate. This standard covers non-supervisory, lead and supervisory HR positions in various specialty areas (to include any combinations) as follows: classification, position management (manpower), compensation (pay), employee relations, human resources information systems (HRIS), labor relations, worklife and benefits, performance management, recruitment and placement (staffing), workers’ compensation, reasonable accommodation, technical review (oversight), quality assurance and HR development.
3. **COVERAGE.** The requirements in this standard are for appointment and position changes for the HR Specialist occupation in VA. These requirements apply to all HR Specialists in the GS-0201 series.

4. **EXCLUSIONS.**

   a. HR liaison positions, personnel psychologists, equal employment opportunity specialists and other positions that include HR-related work that are not classified in the HR Specialist, GS-0201 series are excluded from this qualification standard.

   b. HR Assistant, GS-0203, positions are excluded from this qualification standard.

   c. This standard does not cover positions in the Senior Leader (SL) or Senior Executive Service (SES) who have specialized qualification standards and are responsible for the oversight and direction of human resources management and human capital functions.

5. **BASIC REQUIREMENT.** To qualify for the HR Specialist position, candidates must meet the following basic requirements as described in one of the following methods:

   a. Merit-Based Method, b. Education-Based Method or c. Training-Based Method:

   a. **Method 1: Merit-Based Method.** The Merit-Based Method allows for a candidate to meet the basic requirement by possession of the following specialized experience:

<table>
<thead>
<tr>
<th>Method 1: Merit-Based Method</th>
</tr>
</thead>
<tbody>
<tr>
<td>The candidate must possess one year of specialized experience requiring knowledge of and/or skill in applying basic HR concepts, laws, principles, policies, methods, practices and/or HR systems. Such experience may be gained in administrative, professional, technical or other responsible work positions in the public (i.e., Government or military) or private sector. This experience must be equivalent to at least the GS-4 level of the Federal Government.</td>
</tr>
</tbody>
</table>

   OR

   b. **Method 2: Education-Based Method.** The Education-Based Method allows for a candidate to meet the basic requirement by possession of the following:

<table>
<thead>
<tr>
<th>Method 2: Education-Based Method</th>
</tr>
</thead>
<tbody>
<tr>
<td>Successful completion of bachelor’s degree (or higher).</td>
</tr>
</tbody>
</table>

   OR
c. **Method 3: Training-Based Method.** The Training-Based Method allows for a candidate to meet the basic requirement by possession of the following: Six months of general experience, equivalent to at least the GS-4 level of the Federal Government, requiring knowledge of and/or skill in applying laws, regulations, rules, principles, policies, methods, practices, supporting customers, communicating in writing and/or verbally and using various computer systems and office equipment in administrative, professional, technical or other responsible work positions, plus the possession of one of the four training criteria.

<table>
<thead>
<tr>
<th>Method 3: Training-Based Method</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Training 1:</strong> Successful completion of at least 12 credit hours of college-level (associate degree or higher level) course work in any of the following types of fields, majors or programs or those closely related as evidenced by the course or programs: HR (general), HR development, HR management, business, business management/administration, industrial relations, labor relations, industrial psychology, organizational psychology, organizational development, management, organizational behavior, pre-law/law, legal studies, health care management/administration, public administration, public policy, human services, leadership and humanities.</td>
</tr>
<tr>
<td><strong>Training 2:</strong> Successful completion of at least four formal training courses in HR. The focus of these HR courses will be in areas or those closely related to general HR, Federal HR, private sector/corporate HR or HR management. These courses must be offered through VA (i.e., Talent Management System courses), Federal agencies/departments (i.e., OPM Federal Human Resources Institute) or through external organizations (i.e., HR Certification Institute (HRCI®) Learning, HR University or Management Concepts). For the purpose of this standard, formal means interactive (online or in-person) training that includes communication between the participants and/or the instructor. Successful completion is evidenced by documentation of successful completion by the training organization.</td>
</tr>
<tr>
<td><strong>Training 3:</strong> Successful completion of a formal certificate program in any of the areas (or related areas) listed in <strong>Training 1 (above)</strong> or those closely related as evidenced by the course or programs. A formal certificate program for the purposes of this standard means a series or set of courses that provide a foundational or advanced knowledge. The courses must have been provided by an accredited college, university, organization or company and must have required assignments and/or other course work. Examples of providers include, but are not limited to, Purdue University, Global Cornell University (i.e., eCornell) or Wharton School. Successful completion is evidenced by documentation of completion by the training organization.</td>
</tr>
<tr>
<td><strong>Training 4:</strong> Current professional HR certification through the Society of Human Resource Management (SHRM), HRCI®, International Public Management Association (IPMA) (or Public Sector HR Association (PSHRA)), American Society for Health Care Human Resources Administration (ASHHRA) or an organization or company that has a formal structure and is nationally recognized by the profession.</td>
</tr>
</tbody>
</table>
6. GRANDFATHERING PROVISION. HR Specialists, GS-0201, employed in VA on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

a. HR Specialists who are grandfathered into the GS-0201 occupational series may be reassigned, promoted up to and including the full performance level of a career ladder, promoted to a higher grade or changed to a lower grade within the occupation.

b. HR Specialists who are grandfathered into the GS-0201 occupational series can be placed in a lead, supervisory or managerial position through an appropriate position change without meeting the basic requirements required in this standard but must meet the grade level requirements.

c. HR Specialists who are appointed on a temporary basis prior to the effective date of this qualification standard may not be extended or reappointed on a temporary or permanent basis until they fully meet the basic requirements of this standard.

d. HR Specialists serving on an appointment that leads to noncompetitive conversion to the competitive service may be extended on that appointment or converted to the competitive service without meeting the basic requirements of this standard, but they must meet the grade level requirements.

e. HR Specialists who are grandfathered under this provision that leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

7. GRADE LEVEL QUALIFICATION REQUIREMENTS. In addition to meeting the basic requirement of this standard in paragraph 5, an applicant’s background must demonstrate that the applicant can successfully perform the duties of the position. Creditable education and specialized experience are described in paragraph 8, Evaluating Creditable Education and Specialized Experience. For more information, use this with supplemental occupational information described in paragraph 9, Supplemental Occupational Information for the HR Specialist, GS-0201, Qualification Standard.

a. Positions at the GS-05 through GS-11 grade levels. For the GS-05 through GS-11 grade levels, candidates must possess the creditable education, specialized experience or a combination of creditable education and specialized experience to qualify for the specific grade level. When an applicant possesses partial amounts of creditable education and specialized experience, follow the instructions on combining education and experience in the OPM General Schedule Operating Manual to determine if the candidate meets the grade level.

**a. Positions at the GS-12 through GS-15 grade levels.** For the GS-12 through GS-15 grade levels, candidates must possess either Criteria 1 - graduate degree and specialized experience or Criteria 2 - specialized experience to qualify for the specific grade level. At these grade levels, candidates must fully meet or exceed either Criteria 1 or Criteria 2 meaning it is not appropriate to combine Criteria 1 and Criteria 2 to qualify candidates. At these grade levels, applicants cannot qualify on the basis of education only. Education may be considered along with experience to determine if the applicant meets the knowledge, skills or abilities (KSAs)/competencies required for the position as described in Criteria 1. Creditable education and specialized experience are described in paragraphs 8., Evaluating Creditable Education and Specialized Experience.

(1) **Impact of Time-in-Grade Restrictions.** Unless excluded from coverage under 5 C.F.R. Part 300, Subpart F, current (and some former) Federal
employees must meet time-in-grade requirements to qualify for the grade level through Criteria 1: graduate degree and specialized experience.

8. EVALUATING CREDITABLE EDUCATION AND SPECIALIZED EXPERIENCE.

To evaluate a candidate’s education and specialized experience for determining grade level use the following guidance:

a. Creditable Education. Creditable education for the GS-07 through GS-15 grade levels must be at the level described in paragraph 7. Grade Level Qualifications Requirements. Creditable education, as defined by OPM, is education above the high school level completed in a U.S. college, university or other educational institution that has been accredited by one of the accrediting agencies or associations recognized by the Secretary, U.S. Department of Education. Foreign education is applied in the same manner as outlined in the OPM General Schedule Operating Manual.

(1) Superior Academic Achievement (S.A.A.). The S.A.A. provision is an educational achievement based on class standing, grade-point average or honor society membership. The full provision is described in the OPM General Schedule Operating Manual.
(2) **Educational Courses and Programs.** Successfully completed courses and programs (bachelors level or higher) in HR, HR development, HR management, business, business management/administration, industrial relations, labor relations, industrial psychology, organizational psychology, organizational development, management, organizational behavior, pre-law/law, legal studies, health care management/administration, public administration, public policy, human services, leadership and/or humanities are qualifying programs for the GS-07 through GS-15 grade level requirements. When recruiting for HR positions, HR Offices can credit other educational courses and programs for meeting the grade level qualification requirements through the job analysis process.

b. **Creditable Experience.** Creditable experience is specialized experience that demonstrates the application of HR management knowledge, concepts and principles and the performance of work in one or more of the HR specialty areas. This experience may be obtained in the public sector, private sector or military (see Quality of Experience section below). This experience must be equivalent to Federal service in terms of difficulty and complexity of duties. Skills obtained from these experiences are cumulative, which means that as an employee progresses in their career, skills acquired at lower levels remain applicable as new skills are added.

(1) **Quality of Experience.**

(a) **Public Sector.**

i. **Federal Government.** Federal Government public sector experience is specialized experience gained in the Federal Government. It is the application of human capital and HR management principles and practices to ensure compliance with Federal statutes and in implementing regulations. This experience includes, but is not limited to, the recruitment of employees, training of employees, developing and maintaining HR management policies and strategies, renumeration of employees and the ongoing evaluation of employees in alignment to all Federal employment laws.

ii. **Non-Federal Government.** Non-Federal Government public sector experience is specialized experience gained in state Government, local Government, public universities, etc. It is the application of human capital and HR management principles and practices that ensure compliance with Federal, state and local statutes and implementing regulations, as appropriate. This experience includes, but is not limited to, the recruitment of employees, training of employees, developing and maintaining HR management policies and strategies, renumeration of employees
and the ongoing evaluation of employees. Non-Federal Government public sector entities must follow appropriate Federal, state and local employment laws.

iii Military. Military public sector experience is specialized experience gained in the Department of Defense (DoD). It is the application of human capital and HR management principles and practices that ensure compliance with Federal statutes and implementing regulations. This experience includes, but is not limited to, assisting active-duty military personnel or armed service members in developing their DoD careers, providing promotion and future training information and including personnel support and assistance with regards to transfers, travel orders and salary details.

(b) Private Sector. Private sector experience is specialized experience gained in for-profit companies, non-profit organizations, private universities, and other non-Governmental industries. Private sector HR professionals focus primarily on financial performance and employee productivity for the purpose of increasing the company’s profit margin. They establish HR management strategies and goals. Some professionals serve as strategic business partners or HR generalists providing a wide range of support and services in multiple HR specialty areas. Private sector entities must follow appropriate Federal, state and local employment laws. In some cases, they ensure compliance with international employment laws.

9. SUPPLEMENTAL OCCUPATIONAL INFORMATION FOR THE HR SPECIALIST, GS-0201, QUALIFICATION STANDARD.

a. Introduction. The HR Specialist qualification standard is required by § 903(a) of The PACT Act, signed on August 10, 2022, by the President. Section 903 ensures the most qualified and effective HR Specialists are hired, developed and retained to provide the best service to VA employees, potential employees, supervisors, managers and executives to maximize the quality of service to our nation’s Veterans and their beneficiaries. This supplemental paragraph is provided to create consistency in the application of the standard and to support VA in hiring quality HR Specialist professionals.

b. Classification of HR Positions.

(1) The HR Specialist position is an administrative occupation and follows a two-grade interval pattern. The full performance level (or journey grade level) is the highest or target grade in a position’s career promotion track. The full performance level varies for each HR Specialist position and
depends on the specialty area(s), the organizational level and other factors.

(2) Refer to OPM's classification resources to understand and appropriately establish the grading, titling and assignment of work for each HR Specialist position description (PD).

b. **VA HR Specialist Occupational Information.** To establish consistency in the quality of candidates for appointment and placement, review the HR occupational information provided for the following areas: (1) HR Specialty Area Information, (2) Organizational Levels of VA, (3) Types of Positions in VA and (4) Description of VA Worked Performed. The basic official title for this occupation is Human Resources Specialist. Use the basic title without a parenthetical specialty title as the official position title for those positions that include two or more specialized HR functions when none predominates or when there is no established specialty.

(1) **HR Specialty Area Information.** HR Specialists are eligible for appointment to a position to perform work in one or in a combination of HR specialty areas as described. The parenthetical specialty areas in VA are defined as follows:

(a) **HR Specialist (Classification).** Knowledge of classification concepts, principles and practices related to structuring organizations, positions and determining the appropriate pay system, occupational grouping, title and pay level of positions.

(b) **HR Specialist (Employee Relations).** Knowledge of laws, rules, regulations, case law, principles and practices related to employee conduct, performance and dispute resolution and other areas such as reasonable accommodation.

(c) **HR Specialist (HR Development).** Knowledge of laws, rules, regulations, practices, employee development concepts, principles and practices related to planning, evaluating and administering organizational training, change management and career development initiatives.

(d) **HR Specialist (Information Systems).** Knowledge of HR management concepts, principles and practices related to identifying and analyzing HR processes, translating functional requirements into technical requirements and delivering and maintaining HR information systems.
(e) **HR Specialist (Labor Relations).** Knowledge of laws, rules, regulations, case law, principles and practices related to negotiating and administering labor agreements and providing guidance and consultation on a variety of labor relations matters.

(f) **HR Specialist (Compensation).** Knowledge of compensation concepts, principles and practices, including pay and compensation flexibilities.

(g) **HR Specialist (Performance Management).** Knowledge of performance management concepts, principles and practices related to planning, monitoring, rating and rewarding employee performance.

(h) **HR Specialist (Position Management)** Knowledge of organizational management concepts, principles and practices related to advising, establishing, planning and monitoring employee numbers and types and the work assigned to those employees.

(i) **HR Specialist (Employee Benefits).** The HR Specialist (Employee Benefits) work is described as follows:

   - Knowledge of HR concepts, principles and practices related to reasonable accommodation efforts supporting employees with appropriate physical or mental impairments to apply for positions and to perform essential job functions.

   - Knowledge of HR worklife and benefits concepts, principles and practices related to retirement, insurance and other employee benefits programs.

   - Knowledge of workers compensation concepts, principles and practices related to injury compensation program management, case management, reports and systems.

(j) **HR Specialist (Recruitment/Placement).** The HR Specialist (Recruitment/Placement) work is described as follows:

   - Knowledge of HR concepts, principles and practices related to staffing and talent management, identifying, attracting and selecting individuals and placing them into positions to address changing organizational needs.

   - Knowledge of HR workforce and strategic planning concepts, principles and practices related to determining workload projections and current and future competency gaps to align human capital with organizational goals.
(k) **HR Specialist.**

i Knowledge of HR concepts, principles and practices related to the systematic process of reviewing human capital management work products and determining if the products and services meet the specific quality assurance program requirements. This is what referred to as quality assurance.

ii Knowledge of HR concepts, principles and practices related to executing human capital management accountability and oversight programs; developing, monitoring and evaluating outcomes of human capital management strategies, policies, programs and activities; and conducting technical reviews of HR program assessments. This is referred to as technical review or oversight.

**NOTE:** Additional information on some of the above specialty areas can be found on OPM’s Assessment and Selection page and the OPM’s HR Career Path resources. These descriptions were used or adapted for VA’s use.

(2) **Organizational Levels of VA.** VA HR Specialists serve at various levels of the organization to include the (a) Field, (b) Regional, (c) National levels or (d) HR Support Organizations. These organizational levels are described as follows:

(a) **Field.** The organization’s local level. It encompasses those working at, in, or for a field facility, office or entity where the activities are reporting to and/or supporting the regional and national level including the sub-elements directly below the Department, including the Administrations. The field level carries out the operational functions and ensures consistency, quality and implementation of new initiatives for their assigned local organization. Organizational elements at the local level are responsible for complying with policy implementation. This level may include operational or transactional work that supports the local facility organization leadership and the employees assigned to carry out the work at the facility. HR Specialists in the field provide consultative support and carry out operational activities. These activities may include staffing (recruitment and placement), on-boarding, training (development), classification, pay administration, benefits, performance management and awards, employee relations and labor management administration.

(b) **Regional.** The organization’s intermediate level. It encompasses those activities reporting to and/or supporting the national level including the sub-elements directly below the agency, including the
Administrations. It also encompasses regional level consolidated units and supports facility level operations by providing guidance and advice on consistency, quality and implementation of new initiatives. Organizational elements at the regional level are responsible for policy implementation for regional level organizations and verifying compliance by the field-level organizations. This level may include operational or transactional work, but such work is performed for the entire region as a centralized role.

(c) National. The organization's highest level. It encompasses those activities reporting to and/or supporting the Secretary and/or Deputy Secretary including the sub-elements directly below the agency, including the Administrations. Organizational elements at the national-level are responsible for providing policy creation, interpretation and consultation for regional and field-level organizations. This level may include operational or transactional work, but such work is performed for the entire Agency as a centralized role. In practice, this level includes organizations headed by an Assistant Secretary or other Key Official or the headquarters functions for the Administrations (VHA, VBA and NCA). This level typically does not include operational or transactional work performed for a discrete customer, typically identified by servicing agreements or servicing assignments under which the work of the organizational element is limited to specific geographic or organizational sub-elements.

(d) HR Support Organizations. The organization’s HR support organizations and service centers. HR support organizations provide a specialized or unique HR service. Examples of a unique HR services include those provided by the delegated examining unit, HR Centers of Excellence, HR development and training centers, special recruitment teams and other special HR programs. These teams provide a specialized service for the entire Department, the sub-elements directly below the agency, including the Administrations or Staff Offices.

(3) Types of Positions in VA.

(a) Trainee. HR trainees serve in positions that prepare candidates with educational backgrounds or unrelated experience, but have little to no specialized experience, for careers in HR. These positions are in the title 5 (competitive or excepted) service and are typically classified in the -99 series or in entry level GS-0201 grades (i.e., GS-05 or GS-07). The positions may be appointed through special student or post graduate hiring programs such as the Pathways Programs or under other special authorities. Trainee assignments are purposely
designed to provide orientation, training and familiarization with the work processes of the occupational field and the specific job; reinforce and supplement previous experience and education; and allow the trainee to carry out progressively more difficult and responsible tasks. Through formal, on-the-job training and work assignments, trainees are developed to understand and apply personnel regulations and standard operating procedures to perform a wide variety of routine HR duties, relying on established guides. Trainee work assignments are subject to close supervision and review. They receive mentorship and assistance from higher level HR professionals (co-workers and supervisors) to complete assignments and to develop competencies. Trainees are not covered by this qualification standard.

(b) **Specialist.** A HR Specialist is a HR professional who performs specialized HR duties within the HR Office and performs daily functions working closely with internal divisions such as payroll, benefits, training, compliance and others. Specific duties of a HR Specialist will vary from organization to organization and are related to the organizational scope and environment. The majority of HR Specialists have a broad knowledge of the majority or all HR specialty areas.

(c) **Generalist.** A Generalist is a HR Specialist who is a HR professional that performs a variety of functional HR duties within the HR Office in multiple specialty areas and performs daily functions and works closely with internal divisions such as payroll, benefits, training, compliance and others. Specific duties of a HR Specialist will vary from organization to organization and are related to the organizational scope and environment. The majority of HR Specialists have a broad knowledge of the majority or all HR specialty areas.

(d) **Lead.** The Lead is a HR professional who, on a regular and recurring basis, leads a team of HR employees in accomplishing work. Leads also participate in the work of the team by performing work that is of the same kind and level as the highest level of work accomplished by the team led. Leads coach, facilitate and mentor team members. They ensure the organization's strategic plan, mission, vision and values are communicated to the team. They articulate and communicate team assignments, projects and problems to be solved. They lead the team in identifying, distributing and balancing workload and tasks among employees. They train or arrange training. They monitor and report on status of work progress. They serve as a coach, facilitator and negotiator in coordinating team initiatives. They represent the team in dealing with the supervisor(s) and other leaders. They approve emergency leave. They resolve informal
complaints and refer formal grievances and appeals to the proper parties. They communicate the team consensus and recommendations to the supervisor on actions affecting team. They provide input on individual awards, rewards and recognition. Leads perform this work at least 25% of their duty time.

(e) **Supervisor.** The HR Supervisor is a HR professional that exercises delegated supervisory and managerial authority on a recurring basis. HR Supervisors plan work to be accomplished by subordinates, set and adjust short-term priorities and prepare schedules for completion of work; assign work to subordinates based on priorities, selective consideration of the difficulty and requirements of assignments and the capabilities of employees. They evaluate work performance of subordinates and give advice, counsel or instruction on both work and administrative matters. HR Supervisors interview candidates for positions and recommend appointment, promotions, or reassignments. They resolve complaints and grievances and effect disciplinary measures, as appropriate, for their staff. They identify developmental and training needs and arrange training. They develop performance standards and find ways to improve production and increase quality of work. HR Supervisors accomplish work through technical and administrative direction of other subordinate positions and constitute a major duty occupying at least 25% of position's time.

(4) **Description of VA Work Performed.**

(a) **Operations.** HR Specialists that perform work in the operational setting provide services on a wide range of personnel matters and issues. The operational function of HR consists of providing consultation and strategic recommendations to managers that include all or the majority of the various specialty areas. The operational structure of HR typically consists of an HR officer (HRO), assistant HRO (i.e., Deputy HRO), supervisors, team leaders, specialists and assistants. These HR Specialists support collaborative efforts with employee/labor partners. Operational functions ensure the implementation of policy, legislation and other regulatory guidance. Operational functions of HR also include any research, analysis, consultative and transactional work associated with these operational areas.

(b) **Policy.** HR Specialists that serve in policy organizations perform work that requires comprehensive competencies in applying principles, laws and regulations to develop, research, interpret and apply standardized legal, regulatory and policy guidance. These HR Specialists provide authoritative advisory and consultative service on the full spectrum of HR functions or in a particular specialty area of
focus, depending on the role. HR Specialists performing this type of work are subject matter experts. They review and provide input on proposed legislative and regulatory changes. They also determine policy impact on the organization and interpret policy in relation to its operational impact. They draft legislative proposals, HR policies, interpretative guidance and other policy-related guidance.

(c) **Consultants.** HR Specialists that are consultants provide advice, strategies and insight to leaders and customers on various aspects of HR to include policy implications, workforce implications and other labor-market impact. Consultants utilize knowledge of the business in which their customers work to provide relevant, quality HR advisory services. This work requires comprehensive competencies to successfully perform the analysis and consultative duties of the position providing strategic and operational technical HR advice and guidance to appropriate levels of managers, employees and other customers within and outside the organization. Consultants act as liaisons and strategic advisors between hiring managers, employees and leadership. This work provides leaders and customers with guidance in regard to management activity that requires labor partner collaboration, bargaining, notification, etc. HR Specialists also provide resources and other efficient methods to align customers and leaders with servicing HR teams (i.e., Shared Service Unit services) such as employee/labor relations, recruitment and staffing, HRIS, etc. They attend strategic and informational meetings to ensure human capital functions align with leadership and VA goals.

(d) **Leadership.** HR Specialists that serve in leadership perform work that requires the knowledge, skills and abilities to provide senior-level direction on HR management concepts, practices and innovation. HR Specialists performing this work serve as executive advisors and consultants to managers and high-level leaders. This work aligns human capital policies and practices with the overall mission of VA and its Administrations and Staff Offices. HR Specialists may have full delegated authority to lead an office of experts across a variety of functional areas. They work with integrated teams of professionals attending meetings, participating in projects and advising committees (comprised of professional experts, clinical leaders, fiscal leaders, etc.) to align human capital practices accordingly. They research and review reports, trends, etc. They establish and redirect methods of measurement of success for programs. This description does not fully encompass the roles of SL and SES positions.

(e) **Program Management.** HR Specialists that are program managers lead, direct and administer a specific or multiple HR programs. The program(s) typically have a wide or broad impact (i.e., regional or
These HR Specialists seek to execute effective programming by providing creative solutions to program planning and problem solving. They manage resources (i.e., financial) and activities related to the program. These HR Specialists may or may not have supervisory responsibilities. They may lead teams. They serve on workgroup teams and work with individuals internal and external to the organization to plan, schedule and execute program activities. They monitor program effectiveness and maintain appropriate reports. These HR Specialists serve as the primary point of contact or subject matter experts for the program they manage.

(f) **Strategic Business Partner (SBP).** HR Specialists that are SBPs (also referred to as Business Partners) perform a full range of HR assignments that include, but are not limited to, resolving employee conflicts, analyzing and benchmarking data, implementing HR policy and other HR specialty functions such as recruitment, employee relations and benefits. Also referred to as HR Business Partners or People Partners, SBPs typically pertain to small teams or individuals who all work collaboratively with managers of the organizations to carry out strategic management and key initiatives.

i SBPs serve as thought partners and sounding boards, providing advice and guidance to programs/departments on HR best practices. With a keen ability to navigate the organization and collaborate effectively, SBPs consult with employees of all levels coaching and guiding managers/leaders in a variety of people-oriented concerns. SBPs will have experience influencing leaders in a fast-paced environment and have the interpersonal savvy required to drive HR strategies in a complex workforce.

ii There are also levels of SBPs in the public and private sector which define levels of expertise such as SBP II or Senior SBP. SBPs work similarly to HR Specialists who are generalists but have some leadership aspects such as leading HR-related projects and deployments and provide change management leadership where needed.

c. **Qualification Tools.**

(1) Qualification Tools Established Before Assessing Candidates for Basic Requirements and Grade Level Requirements.

(a) **Job Analysis.** The job analysis process is mandatory for all recruitment actions. The job analysis is the initial step of the recruitment process and serves as the foundation for all assessment and selection processes. The job analysis provides a full
understanding of the nature of the job, by examining the tasks performed in a job (i.e., position description), the KSAs or competencies required to perform those tasks and the linkage between the tasks and competencies. The job analysis is created by HR staff that works closely with the hiring official and/or subject matter expert to prepare a list of tasks and competencies required to perform the job successfully. Once the tasks and competencies are identified, the HR staff documents the job analysis process for future use.

(b) **Using Competency Models.** Competency modeling enables HR staff to describe jobs in the same way, eliminating inconsistencies across agencies and HR functions (e.g., staffing, performance appraisal, training). As it pertains to employees, competency modeling identifies gaps between existing skills and required skills and tailors training programs to support bridging the gap. These competencies are identified through the job analysis process. When using competency modeling, HR Specialists must fully meet competencies and proficiencies identified at each grade level for promotion to that level and for advancement within the career ladder. To facilitate the career promotion process, employees being considered for promotion to the next level may be asked to describe specific duties and projects that helped them achieve the competencies required for promotion. All promotions are based on achievement of required competencies of training requirements and meeting individual performance expectations and objectives.

(2) **Qualification Tools Used in Conjunction with the Qualification Standard.**

(a) **Quality Ranking Factors (QRFs).** QRFs are KSAs or competencies that may be expected to significantly enhance performance in a position, but unlike selective factors (SFs), are not essential for satisfactory performance. Candidates who possess quality ranking factors can be ranked above those who do not, but no one can be rated ineligible solely for failure to possess a QRF. QRFs must be clearly supported by the position description and job analysis.

QRFs are not screen out elements. This means that candidates who meet the QRFs may only be ranked (scored) higher in the quality category/candidate list of eligibles than those who meet them. Candidates who meet the minimum qualification requirements, but do not meet the identified QRFs, will continued to be considered for the position.
ii Education can be used as a QRF consistent with title 5 U.S.C. § 3308 because the beneficial proficiencies identified can be attained either through education or experience. HR Specialists, in coordination with the hiring manager, should define in plain language the elements of a QRF in the job opportunity announcement (JOA) and specify that QRFs will be used to rank candidates.

(b) **Selective Factors (SFs).** Selective Factors (or selective placement factors) are KSAs or competencies in addition to the minimum requirements identified in the occupation’s qualification standard that are necessary to successfully perform the duties of the job. SFs must be clearly supported by the position description and job analysis. SFs are screen out elements and as a result, are required to be held by the selectee at the start of a job. Candidates who do not possess the competencies within the SF will not meet minimum qualifications and will not be considered further for the position.

i Generally, SFs identify specialized knowledge or background that cannot be learned during the position’s initial acclimatization period. SFs are often related to proficiencies essential for performing the job. However, SF should not be narrowly tailored in scope to the point that it blocks competition and the eligibility of talented candidates (e.g., requiring certification granted by one VA Administration or other experience requirements so specific that only employees of that organization could meet it). SFs should not be used to screen candidates for a competency or level of proficiency that is wanted but not required. A preferred competency may only be used to sort candidates, not disqualify them.

ii Additionally, SFs should not be used to establish an education requirement or used as a substitute for adequate assessment. Further, SF should not be used by organizations to avoid training new employees in competencies that can be easily learned as one starts the job.

iii SFs that are required to meet minimum qualification requirements are distinguishable from QRFs in that QRFs identify beneficial competencies for performing the job but are not required to be successful.

iv SFs, consistent with the PD, must be identified through the job analysis process before the position is advertised and the JOA must adequately communicate
the SF, associated KSAs and the evaluation criteria to potential candidates. HR Specialists should clearly define the essential competencies in a SF and properly articulate why they are necessary on the JOA.

(c) **Using Specialized Experience Gained in a Health Care Setting.** HR experience gained in a health care setting can be used as qualifying specialized experience or, through proper job analysis, used to establish a QRF or SF. This may be especially beneficial for positions filled in the VHA or VA Central Office. HR work experience gained in a health care setting addresses many areas of concern in the health care industry, including ensuring that health care regulations are being met. The work supports administrative staff, clinicians and patients. Generally, this experience equips the applicant with the particular KSAs to perform HR-related duties of the position in a complex health care setting for customers and units delivering critical, comprehensive and varying health care services to a diverse or unique patient population.

(3) **Assessment Tools Used Concurrently or After Assessing Candidates for Basic Requirements and Grade Level Requirements.**

(a) **Roles of Assessment Tools.** Assessment tools are any tests or procedures administered to candidates to evaluate their job-related competencies, interests or fitness for employment. The accuracy with which applicant assessment scores can be used to forecast performance on the job is the tool's most important characteristic, referred to as predictive validity. Assessment tools must be firmly grounded in the duties of the position and allows candidates to identify their relevant experience.

(b) Executive Order 13932, *Modernizing and Reforming the Assessment and Hiring of Federal Job Candidates*, dated July 1, 2020, mandates the use of improved assessment practices for the purpose of evaluating relevant knowledge, skills, abilities and competencies. Examples of assessment tools that are utilized to meet this mandate are cognitive ability, emotional intelligence, reference checking, tests (i.e., job knowledge, situational judgement), structured interviews and work samples. There are advantages to using multiple assessments through a multiple hurdle or progressive hurdle approach. VA’s recruitment system, USA Staffing ®, can also be used to administer assessments. More information about the assessment process can be found at [www.opm.gov](http://www.opm.gov).

b. Executive Order 13932, Modernizing and Reforming the Assessment and Hiring of Federal Job Candidates, July 1, 2020]
APPENDIX F2. QUALIFICATION STANDARD

VOCATIONAL REHABILITATION COUNSELOR

AUTHORITY: 38 U.S.C. 3118(c) (for VBA); 38 U.S.C. 7402 (for VHA)

This standard applies to all Vocational Rehabilitation Counselor positions in VA.

DUTIES: Provides a wide range of rehabilitation and personal adjustment counseling and case management services, including coordination of rehabilitation, training, and employment services to disabled veterans. Vocational Rehabilitation Counselors assess data received from medical, psychological and vocational evaluations, and develop individualized rehabilitation plans. In the Veterans Benefits Administration (VBA), they also make eligibility and entitlement determinations.

BASIC REQUIREMENT FOR ALL GRADES: Satisfactory completion in an accredited college or university of all the requirements for a master’s degree in rehabilitation counseling, including an internship; or a master’s degree in counseling psychology or a related field, including at least 30 semester hours of course work in such areas as foundations of rehabilitation counseling, human growth and development, counseling theories and techniques, vocational assessment, career development, job placement, case management, and medical/psycho-social aspects of disability. Total graduate study must have included or been supplemented by a supervised internship. [For master’s degree programs without a supervised internship/practicum, substitution is allowed for successful professional experience following completion of the master’s degree. Experience suitable for substitution must be one full year in direct delivery of vocational rehabilitation services to adults with disabilities in rehabilitation programs, other than those in correctional facilities. The experience or internship/practicum must have been supervised by a professional in vocational rehabilitation or a closely related professional field that typically has oversight for vocational rehabilitation programs.]

EDUCATION AND EXPERIENCE REQUIREMENTS

GS-9: Must meet the basic requirements.

GS-11: In addition to meeting the basic requirements, 1 year of professional vocational rehabilitation counseling experience, equivalent to the next lower grade level. NONQUALIFYING EXPERIENCE: Vocational rehabilitation experience obtained prior to completion of the requirements for the master’s degree is not qualifying.

OR

In addition to meeting the basic requirements, successful completion of 3 full years of progressively higher level graduate education or a Ph.D. or equivalent doctoral degree in rehabilitation counseling or counseling psychology.

[NOTE: If one year of work experience is credited for determining minimum qualifications, that year cannot also be used for determining grade level. For example, for candidates with two years of]
qualifying work experience, but no internship/practicum, the first year of experience is used to meet the basic requirement and the second year of experience to qualify for GS-11.]

**GS-12:** In addition to meeting all basic requirements, applicants must have 1 year of professional vocational rehabilitation experience equivalent to the next lower grade level.
[APPENDIX F3. QUALIFICATION STANDARD

PEER SUPPORT APPRENTICE/PEER SPECIALIST GS-102-5/9

AUTHORITY: 38 U.S.C. 7402

BASIC REQUIREMENTS FOR ALL GRADES AND TITLES:

b. Physical and Medical Requirements. The applicant must be able to perform primarily light and sedentary duties with occasionally moderate physical demands, exercise patience, and control emotions, with reasonable accommodation if necessary, without endangering the health and safety of the applicant or others. (See also VA Directive and Handbook 5019.)

BASIC REQUIREMENTS FOR PEER SPECIALISTS, GS-102-6/9:

a. Statutory Requirements. Section 405 of Public Law 110-387, as codified in 38 U.S.C. 7402(b)(13), established that to be eligible to receive appointment to a Peer Specialist position, a person must:
   (1) be a veteran who has recovered or is recovering from a mental health condition; and
   (2) be certified by -
      (a) a not-for-profit entity engaged in peer specialist training as having met such criteria as the Secretary shall establish for a peer specialist position; or
      (b) a State as having satisfied relevant State requirements for a peer specialist position.

b. Length of Experience as a Consumer of Mental Health Recovery Services. Veterans eligible under 38 U.S.C. 7402(b)(13) must have spent a minimum of 1 year in personal recovery from a mental health condition.

BASIC REQUIREMENTS FOR PEER SUPPORT APPRENTICES, GS-102-5: As a Peer Support Apprentice hired to become a certified Peer Specialist, a Veteran must have spent a minimum of 1 year in recovery from a mental health condition. In all cases, Peer Support Apprentices must actively pursue becoming certified as required to serve as a Peer Specialist by 38 U.S.C. 7402(b)(13)(B). At the time of appointment, the supervisor will provide the Peer Support Apprentice with the written requirements for becoming certified, the date by which he or she must become certified, and the consequences for not becoming certified by the deadline. Failure to become certified by the prescribed date will result in removal from this GS-102 occupation and may result in termination of employment.

SPECIALIZED EXPERIENCE FOR PEER SPECIALISTS, GS-102-6/9: In addition to the basic requirements, candidates must have at least 1 year of specialized experience equivalent to the next lower grade level. Specialized experience is progressively responsible, post-personal mental health recovery experience as a mentor providing counseling to support peers in mental health and/or addiction recovery, a recovery advocate directly involved with consumers of mental health services, a psychiatric therapy aide, or equivalent work involving in-person communication to support others in mental health recovery.
SUBSTITUTION OF EDUCATION FOR PEER SPECIALISTS, GS-102-6/9: Graduate education or a post-bachelor’s degree internship meets the specialized experience required for GS-6/9 only in those instances where it is directly related to the work of the position. Six (6) months of graduate education or a 1-year post-bachelor’s degree internship meets the requirements for GS-6. One full year of graduate education meets the requirements for GS-7. One and one/half years of graduate education meets the requirements for GS-8. Two full years of graduate education or a master's degree meets the requirements for GS-9. One year of full-time graduate education is considered to be the number of credit hours that the school attended has determined to represent 1 year of full-time study. If that information cannot be obtained from the school, 18 semester hours should be considered as satisfying the 1 year of full-time study requirement. Part-time graduate education is creditable in accordance with its relationship to a year of full-time study at the school attended.

NOTE: In recruiting and examining for these positions, participation in community, social service, and similar volunteer activities that meets the definition of specialized experience is creditable applicant experience.
SAMPLE A.
CONDITION OF EMPLOYMENT

I, ______________________________, understand that I must produce evidence that I am certified in peer counseling as described in the VA qualification standard for Peer Support Apprentice/Peer Specialist, to officials of the Department of Veterans Affairs (facility), __________, __________, not later than ___(date)_____. I have received a copy of the criteria for being certified in peer counseling, and I understand that failure to become so certified and make available documentation of its receipt may result in the termination of my employment.

APPENDIX F4: QUALIFICATION STANDARD

PATHWAYS INTERNSHIP PROGRAM

AUTHORITY: Executive Order 13562, Recruiting and Hiring Students and Recent Graduates

1. COVERAGE. This appendix outlines the qualification requirements for Schedule D, Internship Program appointments under the Pathways Programs. This qualification standard is mandated for use by VA HR Offices when making appointments and executing in-service placement actions in the Pathways Internship Program. This qualification standard is to be used in conjunction with Appendix N of this part and is consistent with the policies outlined in the OPM Operating Manual for Qualification Standards for General Schedule Positions. Occupations covered by this standard may follow a one- or two-grade interval work pattern. This standard covers the following occupations:

- 0099 - General Intern (covers occupations in the 0006 through 0095 series)
- 0199 - Social Science, Psychology, and Welfare Intern
- 0299 - Human Resources Intern
- 0399 - General Administrative and Office Services Intern
- 0499 - Natural Resources Management and Biological Sciences Intern
- 0599 - Accounting and Budget Intern
- 0699 - Medical, Hospital, Dental and Public Health Intern
- 0799 - Veterinary Medical Science Intern
- 0899 - Engineering and Architecture Intern
- 0999 - Legal and Kindred Intern
- 1099 - Information and Arts Intern
- 1199 - Business and Industry Intern
- 1299 - Copyright, Patent, and Trade-Mark Intern
- 1399 - Physical Sciences Intern
- 1499 - Library and Archives Intern
- 1599 - Mathematics and Statistics Intern
- 1699 - Equipment, Facilities, and Service Intern
- 1799 - Education Intern
- 1899 - Inspection, Investigation, Enforcement, and Compliance Intern
- 1999 - Quality Assurance, Inspection, and Grading Intern
- 2099 - Supply Intern
- 2199 - Transportation Intern
- 2299 - Information Technology Intern

2. DUTIES. The duties of the Internship Program position should be related to either the Intern's academic or career goals. The appointment may be used to meet long term and temporary staffing needs. An indefinite Intern may be appointed without time limitation for an initial period expected to last more than 1 year. A temporary Intern may also be appointed on a temporary basis, not to exceed 1 year, to complete temporary projects, to perform labor-intensive tasks not requiring subject-matter expertise, or to fill traditional summer jobs.
3. GRADE LEVEL REQUIREMENTS.

a. An Internship Participant must meet the definition of a student as defined in 5 CFR 362.202 and may be appointed up to the highest grade level for which qualified. An applicant with no previous related education or experience may qualify based on the level of education. An applicant with previous education and or experience may be qualified at the appropriate grade level regardless of his or her current level of education. The basis of the qualification may be based on the level of education, general or specialized experience, or a combination of education and experience (as applicable).

   (1) **Level of Education.** One full academic year of undergraduate, graduate, vocational, trades, technical or high school education is the number of credit hours determined by the college, university or school to represent 1 year of full-time study. The high school curriculum must be approved by a State or local governing body and may include home-school course work. All education beyond high school must be accredited by an accrediting body or organization recognized by the U.S. Department of Education.

   (2) **General Experience.** General experience is experience creditable at grade levels GS-2 through GS-4 where the knowledge, skills and competencies needed to perform the duties of a position are not essential, but where an applicant can demonstrate in his or her past experience the ability to acquire the particular knowledge, skills and competencies. When determining general experience requirements, the requirements may vary based on the position, but in general the experience provides an applicant with or familiarity with certain knowledge, skills, and competencies related to the position.

   (3) **Specialized Experience.** In accordance with the OPM Operating Manual for Qualification Standards for General Schedule Positions, specialized experience is experience that has equipped the applicant with the particular knowledge, skills, and abilities to successfully perform the duties of the position and is typically in or related to the work of the position to be filled. When crediting specialized experience, the HR Office must determine the normal line of progression (i.e., one- or two- grade interval) in order to accurately describe the quality and level the required specialized experience. For grade levels that indicate general experience to meet minimum requirements, specialized experience may be substituted to meet general experience requirements. General experience may not be substituted for required specialized experience.

   (4) **Combining Education and Experience.** Consistent with the OPM Operating Manual for Qualification Standards for General Schedule Positions, HR Offices may combine combinations of education and experience that are qualifying for grade levels that indicate education or (general or specialized) experience are acceptable. When combining education and experience to meet the minimum requirements, first determine the applicant's total qualifying experience as a percentage of the experience required for the grade level. Next determine the applicant's education as a percentage of the education required for the grade level. To determine if the applicant has met the minimum requirement, add the education percentage and experience percentage. The total percentage must equal or exceed 100 percent.
b. The grade level requirements are described in the following table:

8. **GRANDFATHERING PROVISION.** All persons employed in VA in the Internship Program on the effective date of this qualification standard are considered to have met all qualification requirements for the specific title, series and grade. For employees who do not meet all of the requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

   a. Employees grandfathered into the applicable occupational series under the provision of this paragraph may be reassigned, promoted up to the full performance level of a career ladder position, or
changed to a lower grade within the applicable occupation, but may not be promoted beyond the full performance level or placed in a supervisory or managerial position.

b. Employees who are appointed on a temporary basis (i.e., Interns serving on an appointment with a not-to-exceed (NTE) date) prior to the effective date of the qualification standard may not have their appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the qualification requirements of this standard.

c. Employees initially grandfathered in the Internship Program who subsequently obtain additional education and/or licensure that meet all basic requirements of the position must maintain the required credentials as a condition of employment in the program.

d. If an employee who is retained under this provision leaves the Internship Program position in VA, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the Internship Program.]
APPENDIX F5. QUALIFICATION STANDARD

PSYCHOLOGY TECHNICIAN GS-181-5/9

AUTHORITY: 38 U.S.C. 7402

PART I

DUTIES: Performs one or more of a variety of technical tasks in a program of research or other professional services in psychology. Performance of these tasks requires a practical understanding of some of the general principles, theories, methods and techniques of psychology in order to carry out duties which are performed under the supervision of a professional psychologist. These duties may include one or more of the following: (1) assist in research as in systematic collection of psychology research data, recording and collecting of data, preparing tabular or graphic presentation of data, in accordance with a predetermined research plan; (2) assist counseling psychologist in contacting potential employers for purpose of making vocational placement, providing follow-up consultation, administering and scoring of interest, achievement and aptitude tests, securing work history and other relevant vocational information; (3) assist neuropsychologist in administering and scoring of selected tests of a neuropsychology battery in accordance with clearly defined procedures; (4) assist psychologists in completing behavior rating scales or in conducting behavior modification.

REQUIREMENTS

Education: Bachelor’s degree from an accredited college or university with a major in an appropriate social or biological science, which included or was supplemented by 12 semester hours in psychology.

Experience

GS-5: None.

GS-7: One year of technical work under the direction of a professional psychologist in a program of professional services, training or research.

GS-9: Two years as described for a GS-7.

SUBSTITUTION OF EDUCATION FOR EXPERIENCE

One full year of graduate study in psychology in an accredited college or university may be substituted for 1 year of experience and meets in full the requirements at the GS-7 level.

Two years of such study meet in full the requirements at the GS-9 level.

QUALITY OF EXPERIENCE: Except for those who qualify solely on the basis of education, candidates for grades GS-7 and GS-9 must have had at least 6 months of experience comparable in difficulty and responsibility to the next lower grade in the Federal service, or 1 year comparable to the second lower grade.

PERSONAL CHARACTERISTICS: Must be able to deal effectively with a variety of people, be tactful, and must have demonstrated ability to exercise good judgment.

BASIS OF RATING: No written test is required. Applicants will be rated on their experience, education, and training based upon information furnished in the application and other information which may be obtained by the Federal civil service examiners. Recency of experience, education, and training will be considered.

PHYSICAL REQUIREMENTS: Applicants must be physically and mentally able to efficiently perform the essential functions of the position without hazard to themselves or others. Depending on the essential duties of a specific position, usable vision, color vision, hearing, or speech may be required. However, in most cases, a specific physical condition or impairment will not automatically disqualify an applicant for appointment. The loss or impairment of a specific function may be compensated for by the satisfactory use of a prosthesis or mechanical aid. Reasonable accommodation may also be considered in determining an applicant’s ability to perform the duties of a position. Reasonable accommodation may include, but is not limited to: the use of assistive devices, job modification or restructuring, provision of readers and interpreters, or adjusted work schedules.

PART II

EXAMINING GUIDE (INTERNAL USE ONLY)

NOTE: In the announcement and in recruiting for these positions, applicants are to be informed that appropriate credit will be given for voluntary participation in community, social service, and similar activities.

BASIS OF RATING: Rating procedure III is suggested. Some positions may require special knowledges or skills attained through additional specialized education and/or training and experience. In these instances selective certification procedures should be provided.

RECENCY: Recency of education, training, and experience will be considered in the rating, but in no case will lack of recency be the sole basis of disqualification.

WAIVERS: If specific requirements of this standard are not met, but composite qualifications of an individual show superior potential or demonstrated ability to perform at the required level, requirements may be modified or waived by the Under Secretary for Health, or designees. (See chapter 2, section D, paragraphs 8-12 of this part.)
NOTE: The educational requirements are waived for VA employees performing at the technician level in these positions as of the date of this standard, March 14, 1969.
APPENDIX F6. QUALIFICATION STANDARD

REHABILITATION TECHNICIAN (ALCOHOLISM) GS-181-3/11
REHABILITATION TECHNICIAN (DRUG DEPENDENCE)
REHABILITATION TECHNICIAN (ALCOHOLISM AND DRUG DEPENDENCE)

AUTHORITY: 38 U.S.C. 7402

PART I

DUTIES: Performs a variety of therapeutic and supportive technician tasks in assisting physicians and other professional personnel in a rehabilitation treatment program for alcohol and/or drug-dependent patients. Under professional supervision, performs such duties as: interviewing alcohol or drug-dependent patients to develop information for medical histories; orienting patients to the treatment program; observing patients for symptoms, actions, reactions, indications, and contraindications to treatment; assisting in individual or group therapy sessions or in behavior therapy sessions; providing supportive assistance to patients placed on maintenance therapy; leading patient discussion groups; providing individual guidance to patients; providing liaison with other agencies or facilities concerned with the treatment and rehabilitation of alcohol or drug-dependent patients; and, establishing contacts with various rehabilitation and placement organizations to provide referral opportunities for employment, training, or retraining.

REQUIREMENTS: Except for the substitutions provided for below, applicants must have had the kind and amount of experience shown and described below:

<table>
<thead>
<tr>
<th>Grade</th>
<th>General (Years)</th>
<th>Specialized (Years)</th>
<th>Total (Years)</th>

<tr>
<td>GS-8 and above</td>
<td>2</td>
<td>4</td>
<td>6</td>
</tr>
</tbody>
</table>

General Experience: Experience involved in dealing with others which has demonstrated the applicant’s aptitude for acquiring the skills and knowledges needed for medical rehabilitation work. For example, experience that demonstrated ability to establish and maintain effective person-to-person relationships, skill in oral and written communication, ability to inspire confidence and motivate individuals, and capacity for leadership is qualifying as general experience. This experience may have been gained in positions concerned with health care, counseling, social service, teaching, business, or other similar fields.
Specialized Experience: This is experience which has demonstrated the knowledge, skill and ability: to assist professional personnel in effective operation of a rehabilitation treatment program for alcohol or drug-dependent patients; to act as a liaison and intermediary between patients and professional personnel; to understand and cope with the physical and psychological needs of these patients; and to guide and assist patients in following a prescribed treatment program. This experience must also have demonstrated that the applicant possesses knowledges, skills and abilities which enable the applicant to understand the problems, actions, reactions and symptoms of alcohol or drug-dependent persons and is able to relate to, empathize with, communicate with, motivate, and influence changes in behavior patterns of alcohol or drug-dependent patients.

SUBSTITUTION OF EDUCATION AND TRAINING FOR EXPERIENCE: Study in an accredited college or university, junior college, or similar institution may be substituted on the basis of 1 academic year of study for 1 year of general experience.

Two years of study in an accredited college or university, junior college, or similar institution, which included or was supplemented by at least 12 semester hours in such courses as health sciences, nursing, behavioral science, social science, premedicine, predentistry, prelaw, guidance, counseling, teaching, pharmacy, the biological sciences or related fields, may be substituted in full for the experience requirement at the GS-4 level.

Successful completion of all the requirements for the bachelor’s degree from an accredited college or university with a major study in health sciences, nursing, behavioral science, guidance, counseling, social science, pharmacy, education, the biological sciences or other fields related to rehabilitation of alcohol or drug-dependent persons may be substituted for 3 years of experience including 1 year of specialized experience and meets in full the requirements at the GS-5 level.

Successful completion of a training course for rehabilitation technicians, with major emphasis on the treatment and rehabilitation of alcohol or drug-dependent persons, may be substituted on a month-for-month basis for specialized experience. Completion of such a program of at least 12 months in duration will meet in full the requirements at the GS-4 level. Successful completion of other training programs in rehabilitation counseling may be substituted on a month-for-month basis for specialized experience up to a maximum of 1 year.

QUALITY AND LEVEL OF EXPERIENCE: For eligibility at grade GS-4, candidates must have had at least 6 months of specialized experience comparable in difficulty and responsibility to the GS-3 level in the Federal service.

For eligibility at grade GS-5, candidates must have had at least 1 year of experience comparable in difficulty and responsibility to the GS-4 level in the Federal service, of which at least 6 months must have been specialized experience.

For eligibility at grades GS-6 and above, at least 1 year of the required specialized experience must have been comparable in difficulty and responsibility to the next lower grade in the Federal service, or 2 years comparable to the second lower grade in the Federal service.
For any grade, the required amount of experience and education will not in itself be accepted as proof of qualification for a position. The candidate’s total record of experience and education must show that the candidate has the ability to perform the duties of the position to be filled.

PERSONAL CHARACTERISTICS: Must be able to interrelate and communicate effectively with a variety of people and to work as a member of a team; must have demonstrated ability to exercise good judgment and tact.

BASIS OF RATING: No written test is required. Applicants will be rated on their experience, education and training based on information furnished in the applications and other information which may be obtained by the Federal civil service examiners. Recency of experience, education, and training will be considered.

PHYSICAL REQUIREMENTS: Applicants must be physically and mentally able to efficiently perform the essential functions of the position without hazard to themselves or others. Depending on the essential duties of a specific position, usable vision, color vision, hearing, or speech may be required. However, in most cases, a specific physical condition or impairment will not automatically disqualify an applicant for appointment. The loss or impairment of a specific function may be compensated for by the satisfactory use of a prosthesis or mechanical aid. Reasonable accommodation may also be considered in determining an applicant’s ability to perform the duties of a position. Reasonable accommodation may include, but is not limited to: the use of assistive devices, job modification or restructuring, provision of readers and interpreters, or adjusted work schedules.

Medical examiners may require medical evidence to support a finding of successful rehabilitation for applicants who have been patients in an alcohol or drug treatment program.

PART II

INFORMATION FOR USE IN EXAMINING APPLICANTS

RATING: Rating procedure III is suggested. Successful experience which has provided a first-hand knowledge of the physical and psychological needs, symptoms, actions, and reactions of alcohol or drug-dependent patients and a knowledge of the rehabilitation techniques and procedures used with these patients will be evaluated at the highest quality level. Recency of education, training and experience may be considered in relative ranking, but will not be the sole basis of disqualification.

MODIFICATIONS AND WAIVERS: The requirements of this standard may be modified or waived in accordance with the appropriate provisions of chapter 2, section D, paras. 8-12, this part.

NOTE: In the announcement and in recruiting for these positions, applicants are to be informed that appropriate credit will be given for voluntary participation in community, social service, and similar activities.
APPENDIX F7. CLINICAL CHEMIST QUALIFICATION STANDARD

GS-1320

Veterans Health Administration

AUTHORITY. 38 U.S.C. § 7402

1. COVERAGE. The following are the Veterans Health Administration (VHA) qualification requirements for appointment and placement as a Clinical Chemist in the GS-1320 series in grades GS-13 through GS-15. VHA HR Office staff and management officials must use the Office of Personnel Management (OPM) qualification standard for the Chemistry Series, 1320, for other assignments to Chemist positions below the GS-13 level or those assignments not described in this standard, such as Research Chemist, etc.

2. DUTIES. Clinical Chemists are senior level technical experts in areas such as electrophoresis, mass spectrometry, gas and liquid chromatography, molecular biology, clinical endocrinology, toxicology and therapeutic drug monitoring. They oversee the daily operation of complex instrumentation within the clinical chemistry laboratory. Clinical Chemists maintain laboratories’ required accreditation and provide authoritative interpretation of laboratory tests, educational support and consultation for clinicians and other laboratory personnel. Clinical Chemists prepare impactful, and possibly controversial, proposals and defend their findings and recommendations in high-level (regional or national) forums. They serve as technical directors over all laboratory functions and are responsible for overseeing laboratory staff.

3. BASIC REQUIREMENTS. To qualify for appointment, all applicants for Clinical Chemist positions in VHA must meet the following:

a. Education.

   (1) Candidates must hold a doctoral degree (i.e., Ph.D.) in a chemical, physical, biological or clinical laboratory science.

   (2) Foreign Graduates. Foreign graduates of chemical, physical, biological or clinical laboratory science programs are considered to meet the requirements of subparagraph 3a if they have a current certification referred to in subparagraph 3c.

b. Training or Experience.

   (1) Fellowship Training. Candidates must have completed a two-year training program in clinical chemistry and/or toxicology from a Commission on Accreditation in Clinical Chemistry (COMACC) accredited program.
OR,

(2) **Relevant Experience.** Candidates may substitute five years of full-time (or equivalent part-time) diverse professional experience in a relevant discipline area (i.e., clinical chemistry and/or toxicological chemistry or molecular biology), which was gained subsequent to conferral of the doctoral degree and in laboratories or institutions maintaining standards as defined by regulatory agencies responsible for certifying laboratories in these disciplines for the Fellowship Training requirement in 3.b.(1) above.

c. **Certification.**

(1) Candidates must possess and maintain board certification in Clinical Chemistry and/or Toxicology from the American Board of Forensic Toxicology (ABFT), National Registry of Certified Chemists (NRCC), American Board of Clinical Chemistry (ABCC) or American Board of Bioanalysis (ABB).

(2) **Loss of Credential.** Clinical Chemists must maintain the required certification. If they fail to maintain the required certification, management officials must take the necessary actions, in coordination with HR Office staff, to remove them from the occupation, which may also result in termination of employment.

d. **Grandfathering Provision.** Clinical Chemists employed in VHA on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Clinical Chemist who are grandfathered into the GS-1320 occupational series may be reassigned, promoted up to and including the full performance level of a career ladder, or changed to a lower grade within the occupation or placed in a supervisory or managerial position.

(2) Clinical Chemists who are appointed on a temporary basis prior to the effective date of this qualification standard may not be extended or reappointed on a temporary or permanent basis until they fully meet the basic requirements of this standard.

(3) Clinical Chemists initially grandfathered into this occupation, who subsequently obtain certification, must meet all the basic requirements of this qualification standard and must maintain the required credential as a condition of employment in the occupation.
(4) If Clinical Chemists who are grandfathered under this provision leave the occupation, then the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

4. **GRADE REQUIREMENTS.**

a. **Creditable Experience.**

   (1) **Knowledge of Contemporary Professional Clinical Chemist Practice.** To be creditable, candidates must possess the required knowledges, skills and abilities (KSAs) associated with the scope of Clinical Chemist practice. The candidate’s experience must be evidenced by paid/non-paid employment as a professional Clinical Chemist.

   (2) **Quality of Experience.** Experience is only creditable if it is post-doctoral degree experience as a Clinical Chemist and is directly related to the duties to be performed at the specific grade level. Qualifying experience is specialized experience and must be at a level comparable to or exceeding the professional Clinical Chemist experience at the next lower grade level. Examples of specialized experience include:

   (a) Conducting complex evaluations processes in clinical chemistry sufficient to conduct specialized clinical laboratory testing for reliability, accuracy and cost effectiveness.

   (b) Providing clinical consultation to medical colleagues in the selection and interpretation of tests for the diagnosis of diseases.

   (c) Interpreting the results of new and complex analyses to determine validity and medical significance.

   (d) Managing or overseeing a high-volume automated clinical laboratory.

   (e) Applying regulatory standards required for maintaining certification of clinical laboratory.

   (f) Coordinating specialized areas of testing in the laboratory such as toxicology, immunology, molecular and protein biochemistry.

   (g) Implementing current laboratory advancements in the field of clinical chemistry/toxicology.

   (h) Revising standard methods to improve or extend test systems.
(i) Teaching clinical chemistry and toxicology to medical residents, Medical Technologists and other appropriate staff members.

b. **Grade Determination.** In addition to the basic requirements for appointment in paragraph 3, the following criteria applies when determining the appropriate qualifications of candidates:

(a) **Clinical Chemist, GS-13.** None beyond the basic requirements. GS-13 is considered the full performance level.

(b) **Clinical Chemist, GS-14.** One year of specialized experience equivalent to the GS-13 grade level.

(c) **Clinical Chemist, GS-15.** One year of specialized experience equivalent to the GS-14 grade level.

5. **MODIFICATIONS OR WAIVERS.** Management officials who are delegated the authority may modify or waive the specific requirements of this standard in accordance with chapter 2, section D, paragraphs 8-12 of this part.
APPENDIX F10. QUALIFICATION STANDARD

SOCIAL WORK ASSOCIATE

AUTHORITY: 38 U.S.C. 7402

PART I

DUTIES: Performs a wide variety of duties in support of professional social workers, providing assistance and services as prescribed for individual cases by social workers in conjunction with their professional treatment. Assignments include interviewing patients and others for informational or service purposes; handling selected referrals to social and health facilities; obtaining and compiling data and similar types of work. GS-5 is a trainee level. At the higher grades work is more complex and there is less close supervision.

REQUIREMENTS

Education: Bachelor’s degree from an accredited college or university in major fields of study such as: social welfare, sociology, psychology, public administration, philosophy, education, anthropology, history, economics and/or English.

Experience

GS-5: None.

GS-7: One year of experience as a social welfare worker or social work assistant in a voluntary, public, social, or health agency.

GS-8: Two years of such experience, which must have included 1 year in a medical setting.

QUALIFYING EXPERIENCE: Must have been of a quality and scope to enable applicants to perform assignments typical of the grade level for which considered. For GS-7/8, applicants must have had 1 year of experience at a level of difficulty and responsibility equivalent to the next lower grade in the Federal service.

BASIS OF RATING: Applicants are rated on a scale of 100 on the extent and quality of education and experience in relation to the requirements for these positions. Ratings based upon information furnished in application and any additional evidence available.

PERSONAL QUALITIES: Applicants must be suited in personality and temperament for this work and must have demonstrated ability to work well with others.

INTERVIEW: Before appointment, qualified candidates may be requested to appear for an interview.
DRIVER’S LICENSE REQUIREMENT: A driver’s license in the State or Territory in which assigned may be required. If required, candidates must pass a Federal service driving test.

PHYSICAL REQUIREMENTS: Applicants must be physically and mentally able to efficiently perform the essential functions of the position without hazard to themselves or others. Depending on the essential duties of a specific position, usable vision, color vision, hearing, or speech may be required. However, in most cases, a specific physical condition or impairment will not automatically disqualify an applicant for appointment. The loss or impairment of a specific function may be compensated for by the satisfactory use of a prosthesis or mechanical aid. Reasonable accommodation may also be considered in determining an applicant’s ability to perform the duties of a position. Reasonable accommodation may include, but is not limited to: the use of assistive devices, job modification or restructuring, provision of readers and interpreters, or adjusted work schedules.

All positions involving Federal motor vehicle operation carry the additional medical requirements specified in 5 CFR, part 930, subpart A.

PART II

EXAMINING GUIDE (INTERNAL USE ONLY)

BASIS OF RATING: Rating procedure III is suggested. Transcripts and evaluations from teachers should be obtained to determine quality of educational performance. Evaluations should also be obtained from supervisors of previous employment, including part-time and summer.

Relatedness, quality, and extent of education and experience should all receive consideration in the rating schedule established. Completion of the undergraduate curricula in social welfare in a college or university, which is a constituent member of the Council on Social Work Education, should be rated higher than other less related curricula.

RECENCY: Recency of education and/or experience may be considered in relative ranking, but will not be the sole basis of disqualification.

PERSONAL CHARACTERISTICS: Any evidence that an applicant lacks the ability to work well with others should reduce the applicant’s rating.
APPENDIX F11. QUALIFICATION STANDARD

RECREATION AID AND ASSISTANT SERIES

AUTHORITY: 38 U.S.C. 7402

The Qualification Standard for Recreation Aid and Assistant, GS-189, in OPM’s “Operating Manual for Qualification Standards for General Schedule Positions,” section IV-A and IV-B-36, has been approved for use in VA.

NOTE: In the announcement and in recruiting for these positions, applicants are to be informed that appropriate credit will be given for voluntary participation in community, social service, and similar activities.

WAIVERS: If specific requirements of this standard are not met, but composite qualifications of an individual show superior potential or demonstrated ability to perform at the required level, requirements may be modified or waived by the Under Secretary for Health, or designees. (See chapter 2, section D, paragraphs 8-12 of this part.)
APPENDIX F12. QUALIFICATION STANDARD

REHABILITATION MEDICINE COORDINATOR GS-301-9/15

AUTHORITY: 38 U.S.C. 7402

PART I

DUTIES: Supervises and coordinates the medical administrative activities of a Physical Medicine and Rehabilitation Service at a VA medical center, domiciliary, or clinic, including all or most of the following therapies: corrective, educational, manual arts, physical, occupational, recreation and blind rehabilitation. Responsible for rehabilitation counseling and for coordinating such functions with other medical services and rehabilitation activities.

REQUIREMENTS

Education: Bachelor’s degree from an accredited college or university with a major in one of the therapies under preceding paragraph “Duties;” or, study, which included an average of at least 6 semester hours per year in one or any combination of the following: education (general, physical, or health), industrial arts, industrial education or agriculture.

Experience

<table>
<thead>
<tr>
<th>GS</th>
<th>Total</th>
<th>General</th>
<th>Specialized *</th>
</tr>
</thead>
<tbody>
<tr>
<td>GS-9</td>
<td>2 years</td>
<td>1 year</td>

<tr>
<td>GS-10</td>
<td>2 ½ years</td>
<td>1 year</td>
<td>1 ½ years</td>
</tr>
<tr>
<td>GS-11/15</td>
<td>3 years</td>
<td>1 year</td>
<td>2 years</td>
</tr>
</tbody>
</table>

*3 months must have been of type A or B. (See the substitution list below.)

General: Experience as a therapist, or instructor-therapist, in a physical medicine and rehabilitation therapy activity of a hospital program of medical rehabilitation or reconditioning which included an organized group of therapy activities; or, experience in one or more of the following fields: hospital management; medical administration, supply or human resources management; medical or psychiatric social work; vocational counseling, guidance or placement for persons with physical disabilities or other disabilities; clinical psychology; teacher or supervisor of teachers of disabled individuals in a hospital, rehabilitation center, school for persons with disabilities, or homebound educational program.

Specialized

a. Medical administrative director, coordinator, or comparable official of a program of physical medicine and rehabilitation or reconditioning at a hospital in which the duties included medical administrative supervision and coordination of an organized group of therapy activities.
b. Assistant to, or trainee for, this position under the medical administrative director or coordinator of a program of physical medicine and rehabilitation or reconditioning at the hospital level.

c. Supervisor of a complete medical rehabilitation therapy specialty of a hospital or clinic program of physical medicine and rehabilitation or reconditioning.

**Level and Quality of Experience:** Applicants for positions at grades GS-11 and below must have had at least 6 months of experience at a level equivalent to the next lower grade in the Federal service, or 1 year equivalent to the second lower grade. Applicants for grades GS-12 and above must have had at least 1 year of experience equivalent to the next lower grade.

The required amount of experience will not in itself be acceptable as proof of qualification. The applicant’s record of experience and training must show the ability to perform all of the duties of the position.

**Substitution:** Master’s degree from an accredited college or university in one of the specified educational fields which included or was supplemented by clinical practice or equivalent experience in a therapy specialty for 1 year of general experience.

Doctoral degree from an accredited college or university with a concentration of study in one of the fields outlined under Education which included or was supplemented by clinical practice or equivalent experience, meets the requirements for grades GS-10/11 provided at least 3 months of A or B type specialized experience is shown.

**Basis of Rating:** Applicants are rated on a scale of 100, based on extent and quality of experience and training. Rating based upon application and any additional evidence secured. Recency of experience and training considered.

**Personal Characteristics:** Ability to work effectively as part of a team, to deal with people in a tactful manner, and to exercise good judgment.

**Physical Requirements:** Applicants must be physically and mentally able to efficiently perform the essential functions of the position without hazard to themselves or others. Depending on the essential duties of a specific position, usable vision, color vision, hearing, or speech may be required. However, in most cases, a specific physical condition or impairment will not automatically disqualify an applicant for appointment. The loss or impairment of a specific function may be compensated for by the satisfactory use of a prosthesis or mechanical aid. Reasonable accommodation may also be considered in determining an applicant’s ability to perform the duties of a position. Reasonable accommodation may include, but is not limited to: the use of assistive devices, job modification or restructuring, provision of readers and interpreters, or adjusted work schedules.
PART II

EXAMINING GUIDE (Internal Use Only)

BASIS OF RATING: This standard is primarily for use in noncompetitive actions. If competitive examinations are conducted, rating procedure III is suggested. Relatedness, quality and extent of education and experience should all receive consideration in the rating schedule established. Recency of education and experience will be considered in relative ranking, but will not be the sole basis for disqualification.

TRAINEE POSITIONS: This standard may be adapted for use with a “trainee” position by eliminating the requirement of 3 months A or B type specialized experience for noncompetitive actions.

WAIVERS: If specific requirements of this standard are not met, but composite qualifications of an individual show superior potential or demonstrated ability to perform at the required level, requirements may be modified or waived by the Under Secretary for Health. (See chapter 2, section D, paragraphs 8-12 of this part.)

NOTE: In recruiting and examining for these positions, there should be assurance that appropriate credit is given to applicants for participation in community, social service, and similar volunteer activities.
APPENDIX F13. QUALIFICATION STANDARD

MICROBIOLOGIST GS-403-5/15

AUTHORITY: 38 USC 7402

DUTIES: Microbiologists perform professional and scientific work in connection with the identification, culture, study, control, and use of microorganisms. Most of the work is performed in a laboratory environment and is generally concerned with research and development or medical activities. The nature of the work may vary considerably with the assignment, some dealing primarily with specific kinds of microorganisms, such as the protozoa, bacteria, microparasites, algae, fungi, viruses, rickettsiae, and similar microscopic and submicroscopic forms; some being concerned with a specific field or area of work, such as immunology, serology, physiology, genetics, taxonomy, and cytology, as these fields relate to microbiology; some placing emphasis on microorganisms as pathogenic and immunizing agents; and some relating to the development and use of specific kinds of methodologies and techniques or to the use of organisms in medical, sanitary, and similar fields where the science of microbiology is applied.

REQUIREMENTS

Education: All applicants must have successfully completed a full 4-year course of study in an accredited college or university leading to a bachelor’s or higher degree with major study in microbiology, bacteriology, biology or chemistry with at least 30 semester hours in biological science and 20 semester hours in the physical and mathematical sciences.

This course-work must have included:

a. At least 10 semester hours in microbiology in such subjects as bacteriology, microbiology, immunology, serology, algology, mycology, parasitology, protozoology, rickettsiology, tissue culture, or virology.

b. At least 10 semester hours in microbiology in such subjects as food, dairy, soil, industrial, public health, agricultural, applied bacteriology, or microbiology, genetics, physiology, metabolism, taxonomy, epidemiology, animal, or plant physiology or pathology, and similar courses, provided these courses were oriented toward the study of microorganism. (The remaining 10 semester hours may have been in other biological science courses.)

c. Course-work in qualitative and organic chemistry or biochemistry, physics and college algebra, or their equivalent.

The quality of this course-work must have been such that it would serve as a prerequisite for more advanced courses in the field of science to which it pertains.
Qualifying Course-Work in Microbiology and Bacteriology:  This standard considers microbiology to be a broad field of science encompassing a number of scientific disciplines or areas of science, the fields in which this science is applied, and related fields where the work is concerned with or involves microbiology.  The scientific disciplines or areas of this science include bacteriology, immunology, serology, algology, mycology, parasitology, protozoology, rickettsiology, tissue culture, virology and similar disciplines or areas of science.  The applied fields include food, dairy, public health, industrial, medical laboratories, and similar areas in which microbiology is applied.  Related fields include taxonomy and systematics, plant or animal physiology or pathology, epidemiology, ecology, and similar disciplines or areas of science where the work is directly related or applied to microbiology.  Except where the course-work deals with a limited and specific segment of the science, where it might be limited in usefulness, most of the work, including that dealing with the development and use of microbiological methods, procedures, and techniques, is qualifying.  In interpreting the substantive value of the course-work, partial or total credit may be given for courses in related fields, depending on the degree to which it is related to microbiological work.

Experience:  In addition to meeting the educational requirements stated in the preceding paragraphs, applicants must have had appropriate experience in (1) the general field of microbiology, (2) one of the specialized areas or applied fields of microbiology, or (3) a field of science directly related and applicable to microbiological work or microbiological research as follows:

GS-5:  No additional training or experience needed.

GS-7:  At least 1 year of professional experience in a microbiological science.

GS-9:  At least 2 years of professional experience in a microbiological science which shows that the applicant has (a) a general working knowledge of microbiology or of one or more areas of specialization, (b) a working knowledge of and ability to apply the methodology required, and (c) the ability to perform work independently.

The quality of the experience, graduate study or combination of graduate study and experience must be such that it shows the applicant possesses (1) a knowledge and understanding of the laboratory techniques applied in the type of work for which the applicant is being considered, and (2) the ability to exercise independent judgement in evaluating and interpreting the results of his/her work and/or an aptitude for research work.

GS-11:  At least 3 years of professional experience in microbiological science which shows that the applicant has (a) a thorough grasp and working knowledge of the science of microbiology, including an understanding of the biological and biochemical theories, laws, and principles underlying the work, (b) a working knowledge of and the ability to apply either general microbiological methodology or the specific methodology typical of the discipline or area of specialization in which the applicant is expected to work, and (c) the ability to perform difficult work with only general supervision.

GS-12:  At least 3 years of professional experience in a microbiological science, or comparable professional experience in a directly related area of science where the work is microbiological in nature, which shows that the applicant has (a) a comprehensive understanding of the scientific theories, laws, and principles underlying microbiology, as well as a thorough knowledge of microbiology or one of the
areas of specialization, (b) a sound working knowledge of, and ability to apply, adapt, and develop the specific methodology required for the work, (c) the ability to work independently and perform difficult, responsible, and highly specialized work, and (d) either the ability to direct microbiological work of a highly complex nature, or the ability to plan, organize, carry out, interpret, and report on the results of work of a difficult nature.

This experience must have been equivalent in difficulty to that of the GS-11 grade in this series of positions, and must show that the applicant has a broad knowledge and understanding of the scientific principles and procedures involved, the ability to plan, conduct, and report on research as an independent investigator, and the ability to prepare the results for publication.

**GS-13:** At least 3 years of professional experience in a microbiological science, or a comparable professional experience in a directly related area of science where the work is microbiological in nature or can be related directly to the specific area of specialization for which the applicant is being considered, which shows that the applicant has (a) a comprehensive knowledge and understanding of the sciences underlying microbiology and of how the theories, laws, principles, and practices of these sciences apply to microbiology or to the areas of specialization in which the applicant is expected to work, and (b) a comprehensive understanding and working knowledge of the methodology applied in the applicant’s work, and the ability to apply, adapt, and develop methods, procedures, and techniques to fit the needs of the applicant’s specific work situation. The quality of the applicant’s experience or combination of graduate study and experience should be such that it clearly shows that the applicant has (1) the ability to perform difficult, complex, and responsible microbiological work which requires the ability to plan, schedule, coordinate, and advise on special problems or phases of work, or (2) the ability to act as a consultant on work of a similar nature and difficulty. The applicant’s total experience must also have demonstrated, through accomplishment, the ability to initiate and pursue to a logical conclusion (1) original scientific research of considerable importance involving and requiring extensive knowledge of several disciplines or specialized areas of microbiology, or (2) advanced original research in a limited but highly specialized complex areas of microbiology.

**GS-14:** At least 3 years of professional experience in a microbiological science, or comparable professional experience in a directly related area of science where the work is microbiological in nature and can be applied directly to the specialization for which the applicant is being considered, which shows the applicant has (a) a comprehensive and authoritative knowledge of microbiology and the related sciences and the ability to plan, organize, and perform exceptionally difficult and responsible work of a nature which must meet high and exacting professional standards; (b) the ability to plan, schedule, coordinate, and advise on special phases of microbiological work, and the ability to perform exceptionally difficult microbiological work, or (c) the ability to act as a consultant on work of similar nature and difficulty.

The total experience must have demonstrated, through accomplishment, (1) the ability to plan, organize, initiate, and carry out very difficult and original scientific research which requires comprehensive knowledge of scientific principles and techniques and outstanding competence in their application, or (2) the ability to assume the responsibility for the technical direction of a group of scientists engaged in difficult and complex original scientific research.
GS-15: At least 3 years of professional experience which shows that the applicant has (a) an outstanding and comprehensive knowledge of microbiology and the related sciences; and the ability to plan, direct, and conduct extremely difficult microbiological work, where the work is of major significance and the incumbent must be recognized for the applicant’s outstanding professional competence and leadership in the field, or have received wide recognition for personal attainment in the field, or (b) the ability to act as a consultant on work of similar nature and difficulty. This experience must have afforded outstanding personal recognition in the field of biological research or have demonstrated the ability to plan, organize, and administer a major research program.

SUBSTITUTION OF EDUCATION FOR EXPERIENCE

For GS-7: Successful completion of 1 academic year consisting of a full program of graduate study creditable toward meeting the requirements of an advanced degree with major study in microbiology may be substituted for the 1 year of experience.

For GS-9: Successful completion of 2 academic years consisting of a full program of graduate study creditable toward meeting the requirements of an advanced degree with major study in microbiology may be substituted for the 2 years of experience.

For GS-11: Successful completion of all requirements, including the thesis, for a Ph.D. or equivalent degree in microbiology, or in a closely related field of science, where the total training can be applied directly to the type of microbiological work the applicant will be expected to perform may be substituted for the 3 years of experience.

At the GS-12 and Higher Grades: Except for applicants who qualify for the GS-12 grade on the basis of superior graduate study, graduate study may not be substituted for the required year of experience equivalent in difficulty to that of the next lower grade.

QUALITY GRADUATES: Persons who have either a bachelor’s degree, master’s degree, 2 years of graduate study, or a Ph.D. degree appropriate to microbiology work as described in this standard may be rated eligible for the next higher grade; i.e., GS-7, GS-9, GS-11, and GS-12, as the case may be, provided the superior graduate criteria prescribed in OPM’s “Operating Manual for Qualification Standards for General Schedule Positions,” section II.E.4.(f) are met.

STUDENT TRAINEE EXPERIENCE: Appropriate student trainee experience which meets the criteria prescribed in OPM’s “Operating Manual for Qualification Standards for General Schedule Positions,” section II.E.3.(j), may be credited toward the GS-7 experience requirements on a month-for-month basis up to a maximum of 12 months.

QUALITY OF EXPERIENCE REQUIRED: For positions at grades GS-11 and below, applicants must show 1 year of experience at a level of difficulty comparable to that of the second lower grade in the Federal service. For grades GS-12 and above, applicants must show 1 year of experience at a level of difficulty comparable to that of the next lower grade in the Federal service. This requirement is met when applicants qualify on the basis of education as outlined above under substitution of education for experience, quality graduates, and student trainee experience.

II-F13-4
For positions at GS-9 which involve a substantial amount of work in a specific specialized area or applied field of microbiology, at least 6 months of the experience at the second lower grade must have been in the appropriate area for which the applicant is being considered.

For the GS-11 and higher grades of such specialized positions, at least 1 year of experience must have been (1) sufficiently specialized to insure adequate familiarity with the area of specialization or applied field of microbiology involved and (2) equivalent in difficulty to that of the second lower grade in the Federal service.

For all grades and kinds of positions, in order to meet the minimum requirements, applicants must show that their total background of education, training, and experience has given them the specific knowledges, skills, and abilities needed to perform the duties of the position for which they are being considered, considering that they will be given a reasonable amount of orientation on the job.

QUALIFYING FIELDS OF GRADUATE STUDY: Graduate study used to meet the requirements of positions in grades GS-7 through GS-12 is generally considered to be fully qualifying if it placed major emphasis on such fields as microbiology or bacteriology, or on specific areas of study such as mycology, algology, protozooology, parasitology, immunology, serology, microbial genetics, or dealt with specific applied fields of microbiology, such as public health, epidemiology, etc. Graduate study in related fields, such as biochemistry, animal or plant physiology, genetics, plant pathology, insect disease control, etc., may also be pertinent, provided it involves or has direct application of microbiological work. The value of such study is judged on the basis of whether it was in a major or minor field of study, its contribution to the applicant’s total background of experience and training, and its value in relation to the specific requirements of the positions for which the applicant is being considered.

COMBINATIONS OF SUPERIOR COLLEGE OR GRADUATE WORK AND EXPERIENCE: Applicants whose records show that they either met, or would have met, the superior college or graduate student requirements for GS-7, GS-9, GS-11, or GS-12 within 2 years of the time they are rated, but who did not enter the Federal service, provided their subsequent experience has been progressive and responsible and has kept them up to date in their field, and provided at least 1 year of the experience has been of a level and difficulty equivalent of the college work, may be rated eligible for the next higher professional grade, i.e., GS-9, GS-11, GS-12, or GS-13. (See OPM’s “Operating Manual - Qualification Standards for General Schedule Positions.”)

CREATIVE OR OUTSTANDING RESEARCH: Where applicants show positive evidence that they have performed highly creative or outstanding research, which has led or can lead to major advances in a specific area of research, or to a major advance in the field of microbiology, they may be rated on this basis for highly demanding research positions which require similar abilities in order to perform the work. Applicants who meet this criterion may be rated eligible for the next higher grade above that for which they would normally be rated, provided they have not been rated at this grade on the basis of meeting one of the superior college study requirements described in the preceding paragraphs.

To receive this credit, the work must have been creative in the sense that it developed a basic principle, concept, method, approach, or technique (or provided a body of basic information) which opened the way for major advances in the field of microbiology by providing a method of solving other problems,
opening areas of research, or providing the means of exploiting the application of the science in a major area.

SUPERVISORY OR MANAGERIAL ABILITY: The duties of some microbiologist positions involve supervisory and managerial responsibilities related to the operation of laboratories or laboratory programs, especially at the GS-12 and higher grades. For these positions, applicants must show that their experience and training have equipped them to manage a laboratory or laboratory program.

QUALIFICATIONS INQUIRIES: For all grades of these positions, confidential inquiries, including contacts with the applicants’ supervisors and associates or with other persons familiar with their qualifications, may be made to obtain further information about their technical, professional, scientific, and personal qualifications, and their character and suitability for these positions.

SELECTIVE CERTIFICATION: As outlined under quality of experience, many positions in this series require highly specialized knowledges in one or more specific scientific areas or fields of microbiology, or the ability to apply highly specialized scientific techniques to problems peculiar to a specific type of research. Examining offices may restrict certification to eligibles meeting such specialized requirements or may establish registers of eligibles based upon such requirements.

BASIS OF RATING: No written test is required. Applicants’ qualifications will be rated on a scale of 100, and will be evaluated on the basis of their education, training, and experience as shown in the application and on corroborative evidence obtained by Federal civil service examiners.

PHYSICAL REQUIREMENTS: Applicants must be physically and mentally able to efficiently perform the essential functions of the position without hazard to themselves or others. Depending on the essential duties of a specific position, usable vision, color vision, hearing, or speech may be required. However, in most cases, a specific physical condition or impairment will not automatically disqualify an applicant for appointment. The loss or impairment of a specific function may be compensated for by the satisfactory use of a prosthesis or mechanical aid. Reasonable accommodation may also be considered in determining an applicant’s ability to perform the duties of a position. Reasonable accommodation may include, but is not limited to: the use of assistive devices, job modification or restructuring, provision of readers and interpreters, or adjusted work schedules.
APPENDIX F22. QUALIFICATION STANDARD

CLINICAL DIETETIC TECHNICIAN  

AUTHORITY: 38 U.S.C. 7402

DESCRIPTION OF WORK: Clinical Dietetic Technicians (CDTs) are paraprofessionals who assist and support professional Dietitians in providing nutrition care to patients. Under the guidance of a Clinical Dietitian, their duties include interviewing patients and using pre-established criteria to identify patients at nutritional risk; gathering information from, and documenting in, the medical record; developing nutritional care plans for patients not at nutritional risk; monitoring and assisting in the evaluation of food intake; adjusting meal patterns and nourishments for selected patients to accommodate preferences and tolerances; counseling selected patients about their prescribed diets; teaching selected classes for groups of patients.

GENERAL REQUIREMENTS: Candidates for CDT positions must possess the following knowledges, skills, abilities, and other characteristics (KSAOs):

1. **Knowledge of Human Nutrition Requirements In Health And Disease:** This includes knowledge of the nutrient needs and the indicators for nutritional care; ability to identify individuals at nutritional risk within the patient population using pre-established screening data; and ability to develop and/or adjust a nutritional care plan for patients not at nutritional risk.

2. **Ability to Gather Data from the Medical Record and Document Information Pertinent to Nutritional Care:** This requires knowledge of medical terminology, abbreviations, laboratory tests, clinical, social and anthropometric data sufficient to understand nutrition-related material in a medical record; ability to interpret a physician’s diet order; and ability to record accurate and understandable nutrition care plan information, for example, diet history, screening data, etc.

3. **Ability to Monitor and Influence the Patient’s Nutritional Intake:** This requires the ability to accurately observe and/or record dietary information from individual patients; knowledge of factors that influence or limit individual food choices, preferences and acceptance; knowledge of the psychological effect of food on the patient; ability to calculate the nutritional content of food intake; knowledge of the four basic food groups and the recommended amount of foods from each group; and knowledge of the principles and nutrient content of modified diets.

4. **Ability to Provide Nutrition Education for Selected Groups of Patients:** This includes the ability to identify basic nutrition education needs of individuals; ability to plan and present nutrition information for a pre-established patient outcome; ability to identify and use appropriate methods to determine a patient’s understanding, compliance and use of nutrition principles; knowledge of meal planning, preparation, sanitation and food safety principles and the ability to teach them to patients.

5. **Skill in Patient Interviewing and Nutrition Counseling:** This includes knowledge of the principles of effective communication and ability to evaluate information obtained in a patient interview.
6. Ability to Interact and Communicate Orally with People from a Variety of Backgrounds: This includes other members of the health care team.

7. Ability to Function Effectively in a Support Position within a Clinical Dietetic Section of a General Medical and Surgical and/or Psychiatric Hospital: This involves the ability to follow oral and/or written instructions, ability to accomplish work within established time frames; ability to work under pressure with constant interruptions; and ability to maintain composure under adverse conditions.

EDUCATION REQUIREMENTS: Candidates must have successfully completed a course of study in an accredited college leading to an associate’s degree in Dietetic Technology with an emphasis in Nutrition Care or the equivalent post-secondary education. In determining whether a candidate’s education is equivalent, close attention should be paid to the numbers and types of courses completed and their content. The education should provide the candidate with the KSAOs listed above, particularly numbers 1 through 5 (KSAOs 6 and 7 can generally be acquired through experience). To do this it must have included instruction in nutrition care/diet therapy, the natural sciences (e.g., anatomy, physiology, biochemistry), social sciences (e.g., psychology, sociology), food sciences, medical terminology, communications and education. Because course titles vary, it is important to carefully evaluate course content in order to determine that these subjects are covered. In addition, qualifying education must include supervised field experience in a hospital or similar clinical setting.

NOTE: Each permanent employee whose position description reflects the full range of CDT duties as of the issue date of this qualification standard and whose job is reclassified to that title is considered fully qualified. These employees may be promoted or reassigned within this occupation.

Employees qualified for CDT positions under this provision who subsequently leave the occupation must meet the new qualification requirements to re-enter the occupation.

GUIDANCE FOR EVALUATING EDUCATION: An associate’s degree in Dietetic Technology (Nutrition Care) from a program approved by the American Dietetic Association (ADA) is preferred. Because the occupational study on which this standard is based showed graduates of these programs to be better equipped to provide substantive assistance and support to Clinical Dietitians, they should be given preferential consideration in the applicant evaluation process.

Applicants with an associate’s degree in Dietetic Technology without a designated subspecialty which included instruction in the subjects described in the preceding section EDUCATION REQUIREMENTS also meet minimum requirements. Those programs approved by the American Dietetic Association provide such instruction.

Individuals holding a Bachelor’s degree in Dietetics also meet the requirements of this position. The role of CDTs, however, is to support and assist professional Dietitians. Because the focus of associate degree Dietetic Technician programs is specifically to train people for these support positions, it is the preferred degree and should be so credited in rating and ranking qualified applicants.

Candidates with an associate’s degree in Dietetic Technology with an emphasis in Food Service Management generally do not possess the KSAOs required in a CDT position unless their degree has
been supplemented by additional courses in nutrition care or by clinical experience which demonstrates possession of the required KSAOs.

EXPERIENCE REQUIREMENTS: Candidates who meet the education requirements described above are fully qualified for the GS-4 level. To qualify for higher grades, candidates must have had progressively responsible experience in the field of clinical dietetic technology in which they have demonstrated successful use of the KSAOs listed in the General Requirements section of this standard. Candidates for GS-5 positions must have at least six months of specialized experience equivalent to GS-4. Candidates for GS-6 and above must have at least 1 year of specialized experience equivalent to the next lower grade.

PHYSICAL REQUIREMENTS: Applicants must be physically and mentally able to efficiently perform the essential functions of the position without hazard to themselves or others. Depending on the essential duties of a specific position, usable vision, color vision, hearing, or speech may be required. However, in most cases, a specific physical condition or impairment will not automatically disqualify an applicant for appointment. The loss or impairment of a specific function may be compensated for by the satisfactory use of a prosthesis or mechanical aid. Reasonable accommodation may also be considered in determining an applicant’s ability to perform the duties of a position. Reasonable accommodation may include, but is not limited to: the use of assistive devices, job modification or restructuring, provision of readers and interpreters, or adjusted work schedules.

QUALIFICATIONS GUIDELINES FOR UPWARD MOBILITY PROGRAMS

Minimum Qualifications: Applicants for Upward Mobility Programs which involve enrollment in a course of study leading to an Associate’s degree in Clinical Dietetic Technology should meet all entrance requirements of the college in question.

KSAOs: The following KSAOs have been determined through a job analysis to be necessary for satisfactory performance as a CDT. Since these KSAOs, while they may be enhanced, are not necessarily acquired through college level coursework, applicants for the Upward Mobility Program should possess them to the degree needed to perform satisfactorily the duties of a CDT. Persons responsible for making minimum qualification determinations should use locally established criteria in ensuring that applicants have these KSAOs. The KSAOs are:

1. Ability to communicate orally and interact with people from a variety of backgrounds.
2. Ability to follow oral and written instructions.
3. Ability to work under pressure with constant interruptions.
4. Ability to maintain composure under adverse conditions.
Rating and Ranking Criteria

1. The following rating factors were shown by a job analysis to be useful in distinguishing superior from barely acceptable performance (They are provided for optional use in rating applicants for the Upward Mobility Program):
   
   a. Ability to follow oral and written instructions.

   b. Ability to accomplish work within established time frames.

   c. Ability to work under pressure with constant interruptions while maintaining composure.

2. Persons developing crediting plans for Upward Mobility selections should keep in mind the likely applicant pool and include examples of experience, training, education, etc., which these individuals are likely to cite and which will aid in identifying the best qualified applicants. Because many applicants may not have had extensive work experience, it is particularly important to consider outside or unpaid activities and to include examples of these in quality levels. Many applicants may have demonstrated a high degree of these KSAOs through parenting, running a household or volunteer work in a church or community organization. These types of examples should be included in quality levels, and raters should be cautioned to give them appropriate weight in the rating process.

3. If, after applying the crediting plan, further distinctions need to be made to identify the best applicants, an individual or panel interview may be useful. The interview should be structured so consistent, job-related information can be obtained from each applicant who scored highly using the crediting plan. Particular attention should be paid to those skills and abilities which were not measured or not fully measured using the crediting plan. For example, oral communication skills are important to the CDT and can be easily demonstrated and observed in an interview. Also, since the Upward Mobility Program consists of enrollment in, and completion of, a course of study leading to an associate degree, career goals and motivation might be explored in the interview. A method for assessing applicant performance during the interview should be devised and followed consistently in evaluating each applicant.
APPENDIX F23. QUALIFICATION STANDARD

NUCLEAR MEDICINE TECHNICIAN SERIES GS-642

AUTHORITY: 38 U.S.C. 7402

GENERAL REQUIREMENTS: The qualification requirements for Nuclear Medicine Technician, found in the Group Coverage Qualification Standard for Technical and Medical Support Positions, in OPM’s “Operating Manual - Qualification Standards for General Schedule Positions,” section IV-A-7 to IV-A-11, have been approved for use in VA with the following additional requirements:

1. Certification: All applicants must be certified in Nuclear Medicine by one of the following:
   a. The Nuclear Medicine Technology Certification Board (NMTCB), or
   b. The American Registry of Radiologic Technology (ARRT).

2. Exceptions for Applicants: Uncertified applicants who otherwise meet the eligibility requirements for NMTCB or ARRT certification (see section 4, Certification Eligibility) may be given a temporary appointment not to exceed 1 year; or they may be appointed subject to obtaining the required certification during the probationary period. Those who fail to obtain NMTCB or ARRT certification in nuclear medicine during that year must be removed from the GS-642 series, which may result in termination of employment. A statement citing this condition of employment must be signed by each Nuclear Medicine Technician appointed or assigned under these provisions and filed in the employee’s personnel folder. Requests for extending uncertified Nuclear Medicine Technicians beyond the probationary period are inappropriate.

   If, after positive recruitment activities, there are no acceptable applicants who meet these requirements, the Chief Patient Care Services Officer may authorize a medical center director to recruit otherwise qualified applicants, who show evidence of training, experience and competence to be equally protective of patient health and safety. Requests to initiate broad-based recruitment using a modified standard that meets the requirements of chapter 2, section B, paragraph 9, this part, may be submitted, through channels, to the Deputy Assistant Secretary for Human Resources Management [and Labor Relations] (05[9]).

3. Exceptions for Employees: Each uncertified Nuclear Medicine Technician who was permanently employed on June 21, 1986, and whose competence in the safe administration of radiopharmaceuticals was affirmed in writing by a licensed VA physician not later than January 1, 1987, and documented in the employee’s personnel folder, or any licensed Nuclear Medicine Technician hired before receipt of this standard, is considered fully qualified, and may be promoted, demoted or reassigned within the GS-642 occupation. Any employee initially retained in this manner who leaves this occupation in VA or transfers to another facility loses protected status and must meet the full requirements in effect at the time of reentry. A statement to this effect is to be signed and dated by the incumbent, the Chief, Nuclear Medicine Service and the Chief of Staff, and retained on the right side of the employee’s personnel folder.
4. **Certification Eligibility:** NMTCB or ARRT certification eligibility requirements are normally satisfied by the following:

   a. Graduation from an educational program in nuclear medicine technology accredited by the Committee on Allied Health Education and Accreditation;

   b. National certification as a registered medical technologist, registered radiologic technologist, registered nurse, or a bachelor’s or associate degree in one of the physical or biological sciences, and 4 years of clinical nuclear medicine technology experience.

**NOTE:** Candidates who have obtained ARRT or NMTCB certification in nuclear medicine through methods other than those listed above meet minimum requirements for GS-5.
APPENDIX F28. QUALIFICATION STANDARD

ASSOCIATE MEDICAL CENTER DIRECTOR (TRAINEE)  GS-670-12/13

NOTE: Normal entry level is GS-12/13; however, in those exceptional instances in which higher level positions (including Medical Center Director Trainee) may be established, the provisions of this standard will apply.

AUTHORITY: 38 U.S.C. 7402

PART I

DUTIES: Associate Medical Center Director Trainees serve in a preceptorship under a health care facility director for the purposes of orientation and indoctrination in the specialized functions peculiar to health care administration.

In accordance with a planned, comprehensive training schedule, trainees rotate among assigned services, both medical and administrative, to observe and perform a variety of functions and activities so as to become thoroughly familiar with administrative and management problems encountered by Associate Medical Center Directors and Medical Center Directors in day-to-day operations. This includes participation in budget preparation and control, operational planning, and assignment to various committees. Trainees may also be involved in the completion of special studies, projects, and assignments, as assigned by the preceptor; as a team member, in the Systematic External Review Program (SERP); and participation in appropriate management seminars.

Trainees may serve as Acting Associate Medical Center Director for designated periods with full responsibility and authority.

EXPERIENCE REQUIREMENTS

General: Candidates must have had 3 years of progressively responsible administrative experience which has provided a broad basic knowledge of methods, principles and practices of supervision, administration, and management.

Specialized Experience: Three years of progressively responsible administrative experience in a health care facility or in an office having supervisory, advisory, or directional authority over such facilities. This experience may be gained in administrative fields such as medical administration, human resources, fiscal, engineering, supply, building management, or management analysis; or in medical care and support fields such as nursing, social work, medical rehabilitation, dietetics, or psychology. The preceding list of functional areas is not intended to be all-inclusive, but rather is intended to illustrate some of the career fields in which an applicant could potentially gain the necessary specialized experience. Regardless of the functional area in which the experience is gained, it must have provided a general knowledge of the mission and organization of a health care facility and the procedures and attending administrative problems of such organizations.
SUBSTITUTION OF EDUCATION FOR EXPERIENCE: Undergraduate education successfully completed in an accredited college or university may be substituted for the required general experience at the rate of 1 academic year of education for 9 months of experience up to a maximum of 4 years of education for 3 years of general experience.

The completion of all the requirements for a master’s degree in health care administration or public health, or a master’s degree in business administration with major study in health care administration may be substituted for 1 year of the specialized experience. This master’s degree, coupled with the successful completion of a 1-year residency in health care administration, may be substituted for 2 years of specialized experience.

INSERVICE PLACEMENT PROVISIONS: In inservice placement actions, the experience described below may be accepted as meeting the specialized experience requirements:

1. Three years of high level, progressively responsible administrative, management, or professional experience in VA activities not directly involved in health care when such experience has provided a good knowledge of overall VA operations and the ability to plan, direct, and coordinate diverse activities. To be considered qualifying, there must be evidence that such experience, when considered in context of an applicant’s composite qualifications, has provided potential to advance to positions with top-level executive responsibilities.

2. Illustrative of the type of assignments which would normally provide the necessary experience on an inservice basis are:

   a. Division chief (or equivalent) or higher, level at VA field establishments.

   b. Management or responsible staff positions in VA Central Office administration programs or in staff office functions at a level of responsibility comparable to that described in subparagraph a above.

NOTE: These inservice provisions recognize the need to enhance career opportunities for VA career employees and, at the same time, provide reasonable assurance that those who qualify under these provisions have the potential to perform successfully in target assignments. It is also recognized that individual development plans for those who may be qualified and selected under these provisions will need to be adapted and adjusted to provide greater in-depth orientation and training in matters unique to health care delivery.

PERSONAL CHARACTERISTICS: Associate Medical Center Director (Trainee) positions require frequent contact with the public and with patients. Applicants should possess the ability to work effectively with all types of people; the ability to communicate clearly and effectively both in writing and in speaking; the ability to delegate authority; and the ability to exercise good judgment, to work effectively under, pressure and to work effectively with a minimum of supervision or guidance.

QUALITY OF EXPERIENCE: For any grade the required amount of experience will not in itself be accepted as proof of qualification for, any of these positions. The candidate’s record of experience and training must indicate ability to exercise sound judgment, the qualities of leadership, the ability to work harmoniously with other individuals and groups, and the ability to otherwise perform the duties of the
position. Candidates must show 1 year of qualifying experience at a level of difficulty comparable to that of the next lower grade in the Federal service.

**BASIS OF RATING:** No written test is required. Applicants will be rated on the extent and quality of their experience, education and training. Recency of experience, education and training will be considered.

**PHYSICAL REQUIREMENTS:** Applicants must be physically and mentally able to efficiently perform the essential functions of the position without hazard to themselves or others. Depending on the essential duties of a specific position, usable vision, color vision, hearing, or speech may be required. However, in most cases, a specific physical condition or impairment will not automatically disqualify an applicant for appointment. The loss or impairment of a specific function may be compensated for by the satisfactory use of a prosthesis or mechanical aid. Reasonable accommodation may also be considered in determining an applicant’s ability to perform the duties of a position. Reasonable accommodation may include, but is not limited to: the use of assistive devices, job modification or restructuring, provision of readers and interpreters, or adjusted work schedules.

**PART II**

**EXAMINING GUIDE**

**RATING:** Some positions may require special knowledges or skills attained through additional specialized education, training and/or experience. In these instances selective certification or quality ranking procedures will be provided, when appropriate. Recency of education, training and experience will be considered in relative ranking, but will not be the sole basis of the rating.
APPENDIX F29. QUALIFICATION STANDARD

RESIDENT IN HOSPITAL ADMINISTRATION (File as GS-670)

AUTHORITY: 38 U. S. C. 7402

DESCRIPTION OF RESIDENCY: Hospital administration residencies are provided at selected VA medical centers in collaboration with affiliated universities offering approved graduate degree programs in hospital administration. Their purpose is to complement the academic preparation of the graduate student by providing practical instruction and guided working experience in a hospital environment which is required by the university to satisfy the graduate degree requirements. The specific content of the resident’s training program is devised by the medical center preceptor, in consultation with the resident’s academic counselor, and in conformity with guidelines recommended by the American College of Health Care Administrators. Typically included are: orientation to the functions of all departments of the medical center; working assignments in selected administrative and professional activities or functions; participation in management activities, such as budgeting, staffing control, studies and investigations, reports and evaluations, and community relations. Residencies are normally of 12 months duration. However, additional training may be considered for the purpose of continuing research or for special development.

REQUIREMENTS: Applicants must have completed the academic work in a program of study in hospital administration leading to a graduate degree at an accredited college or university, which is required by that college or university for entrance into the residency. The program of study in hospital administration must be approved by: (1) the Accrediting Commission on Education for Health Services Administration, which has been accorded formal recognition by the National Commission on Accrediting and the U.S. Department of Education; or (2) the Council on Education for Public Health, an accrediting body of The Association of Schools of Public Health which is sanctioned by the Council on Post Secondary Education and the U.S. Department of Education. The education required for entrance into residency must be completed not later than the beginning date of the residency for which applicants are applying, and successful completion of a residency must be an essential curriculum requirement in order for the student to receive the graduate degree. Offer of appointment may be made prior to the completion of the required education; but, before their entrance on duty, applicants must submit to VA proof of completion of the academic requirements.

BASIS OF RATING: No written test is required. Eligibility will be based on the information shown in an individual’s application and other available information.

PHYSICAL REQUIREMENTS: The following requirements apply to employees occupying positions covered by this standard as well as to applicants for such positions. Applicants and employees must have the capacity to perform the essential functions of the position without risk to themselves or others. In most cases, a specific medical condition or impairment will not automatically disqualify an applicant or employee. A physical condition or impairment may be disqualifying only if the condition, for good medical reason, precludes assignment to or warrants restriction from, the duties of the specific position. The loss or impairment of a specific function may be compensated for by the satisfactory use of a prosthesis or mechanical aid. Reasonable accommodation may also be considered in determining a
candidate’s ability to perform the duties of a position. Reasonable accommodation may include, but is not limited to: the use of assistive devices, job modification or restructuring, provision of readers and interpreters, or adjusted work schedules.

In positions where there is exposure to environmental agents for which there are occupational/environmental standards which require protective measures or medical surveillance, applicants and employees shall undergo initial and periodic medical evaluation in accordance with the surveillance requirements.

All positions involving Federal motor vehicle operation carry the additional medical requirements specified in 5 CFR, part 930, subpart A.
APPENDIX F32. QUALIFICATION STANDARD

[VETERINARY MEDICAL OFFICER (LABORATORY ANIMAL MEDICINE) GS-701-11/15

AUTHORITY. 38 U.S.C. 7402

1. COVERAGE. This qualification standard outlines the requirements for appointment as a Veterinary Medical Officer (VMO) (Laboratory Animal Medicine) in the Veterans Health Administration (VHA). VMOs provide support to VHA Research and Development (R&D) programs for the advancement of healthcare programs. Laboratory animal medicine is a veterinary medical specialty recognized by the American Veterinary Medical Association (AVMA), and in which VMOs achieve specialty board certification through the American College of Laboratory Animal Medicine (ACLAM). VMOs concentrating in laboratory animal medicine have gained specialized training and experience uniquely suited to ensure an adequate standard of care and use for laboratory animals and to support the ethical conduct of biomedical research using animals. VMOs function primarily as laboratory animal medicine practitioners but may also perform biomedical research regarding the causes, treatments, and prevention of human diseases.

2. DUTIES. VMOs perform duties that may include, but are not limited to, the following:

a. Direct the operation of the animal facility to ensure local program compliance with current animal welfare laws, regulations and policies and to support R&D programs using animal subjects.

b. Provide professional guidance, services and technical support to investigators at VA medical centers in planning, executing and directing R&D activities using animal subjects. This includes guidance and consultation on comparative biology and medicine, zoonotic disease, technology, husbandry, medical and surgical care and the selection, procurement, preparation, and use of laboratory animals.

c. Conceive and conduct independent and collaborative research including studies designed to gain new knowledge about laboratory animals, which will improve the quality of animal care and promote humane aspects of research through the selection of proper and new biological models, research environments and techniques.

d. Establish and maintain programs of appropriate veterinary medical care that include the use of methods to prevent, control, diagnose and treat diseases and injury and that will ensure the provision of adequate pre-procedural and post-procedural care.

e. Provide education and training for scientists and technicians on humane methods of animal care and experimentation.

f. Serve as the Attending Veterinarian on the Institutional Animal Care and Use Committee.

g. Contribute to the promotion of favorable community relations and increased public appreciation of the importance of animal studies in improving patient care and the quality of Veterans' lives.
h. Serve as a subject matter expert by contributing to efforts by VA Central Office intended to improve animal research through the support of R&D programs throughout the VA health care system, by assisting in the development of policies and guidance that pertain to animal research, and by participating in activities that assess animal research activities within VA.

i. Provide policy and regulatory guidance and oversight to VA animal research programs.

3. BASIC REQUIREMENTS. To qualify for appointment, all applicants must meet the basic education and licensure requirements.

a. Education

(1) Possess a Doctor of Veterinary Medicine (DVM) or equivalent degree, i.e., Veterinary Medical Doctor (VMD), obtained at a college or school of veterinary medicine accredited by the AVMA Council on Education; or

(2) Graduate from a foreign veterinary medical school not accredited by the AVMA Council on Education possessing one of the following:

(a) Proof of certification of final transcript by the Educational Commission for Foreign Veterinary Graduates (ECFVG); or

(b) Current, permanent, full and unrestricted license to practice veterinary medicine in a State, District of Columbia, the Commonwealth of Puerto Rico or a territory of the United States that includes successful completion of the North American Veterinary Licensing Examination (NAVLE) or its predecessors, the National Board Examination (NBE) and the Clinical Competency Test (CCT); or

(c) Proof that the education obtained in a foreign veterinary medical program is equivalent to that gained in a veterinary medical program that is accredited by the AVMA Council on Education. Under this provision, equivalency is established only if an AVMA-accredited veterinary medical school or college accepts the graduate's final transcript from the foreign veterinary medical school at full value for placement into an advanced degree, postgraduate educational program or training program (e.g., residency or graduate program); and

(d) Graduates of foreign veterinary medical programs must also provide proof of proficiency in the English language by successfully completing one of the nationally and internationally recognized examinations that incorporate assessments of reading, writing, listening and speaking skills. Examples of examinations that assess mastery of the English language include:

   1. Test of English as a Foreign Language (TOEFL) — Minimum scores for the TOEFL are 560 for the paper-based version; 220 for the computer-based version; or overall score of 83 for the internet-based version (including 26 or higher in speaking, 26 or higher in listening, and 17 or higher in writing). For the computer-based and paper-based test versions, applicants must also complete the Test of Spoken English (TSE) and the Test of Written English (TWE). Minimum required scores are 55 for the TSE and 5.5 for the TWE; or
2. Academic tests (listening, writing and speaking) offered by the International English Language Testing System (IELTS). Applicants must achieve a minimum overall band score of 7.0, with at least 7.0 in speaking, 6.5 in listening, and 6.0 in writing; or

3. Canadian Academic English Language Assessment (CAEL). Applicants must achieve a minimum overall band score of 70, with at least 60 in speaking, 60 in listening, and 50 in writing.

b. Licensure

(1) Possess a current, permanent, full and unrestricted license to practice veterinary medicine in a State, District of Columbia, the Commonwealth of Puerto Rico or a territory of the United States that includes successful completion of the NAVLE or its predecessors, the NBE and the CCT.

(2) An employee who enters this occupation with the basic requirement for licensure, but fails to maintain licensure must be immediately removed from the occupation, which may also result in termination of employment. At the discretion of the appointing official, an employee who fails to maintain licensure may be reassigned to another occupation for which he/she qualifies if a placement opportunity exists.

4. GRADE LEVEL REQUIREMENTS. In addition to meeting the basic requirements, applicants must meet the grade level requirements for the position for which they wish to be considered. Applicants may qualify for each grade level through the attainment of specialized experience, advanced degree, residency or post-graduate training, or board certification as indicated below.

a. Specialized Experience. Specialized experience must demonstrate the ability of the applicant to independently perform the veterinary medical duties required for the position. Only experience gained after completing the basic education requirements described in paragraph 3 and in a biomedical research setting in which Public Health Service Policy and United States Department of Agriculture Animal Welfare Act Regulations were applied under the jurisdiction of the Institutional Animal Care and Use Committee is creditable. Experience gained at a pet veterinary clinic with species commonly used in research does not count towards meeting the specialized experience requirements. When calculating the length of specialized experience, applicants are considered to have gained 1 year of experience through the completion of either 12 months or 52 weeks of specialized experience, whichever comes first. Qualifying part-time specialized experience is credited according to its relation to the full-time workweek (i.e., 40 hours). The number of years of specialized experience required for each grade level is as follows:

(1) **GS-11.** No specialized experience required at the GS-11 grade level.

(2) **GS-12.** 1 year of specialized veterinary experience equivalent to the GS-11 grade level.

(3) **GS-13.** 1 year of specialized veterinary experience equivalent to the GS-12 grade level.

(4) **GS-14.** 1 year of specialized veterinary experience equivalent to the GS-13 grade level.

(5) **GS-15.** 1 year of specialized veterinary experience equivalent to the GS-14 grade level.
b. **Advanced Degrees.** Advanced degrees (i.e., graduate degrees) are creditable towards meeting the qualifications for the GS-12 and GS-13 grade levels. To be creditable, applicants must have earned the advanced degree at an accredited college or school in the area of specialization of laboratory animal medicine, laboratory animal science or in an area directly related to the practice of laboratory animal medicine. The advanced degree must have been earned in addition to the basic education described in paragraph 3 or earned in a dual DVM/graduate degree program. The type of qualifying advanced degrees creditable for each grade level is as follows:

(1) **GS-11.** No advanced degree required above the basic education requirement for the GS-11 grade level.

(2) **GS-12.** Master of Science in laboratory animal medicine, laboratory animal science or an area directly related to the practice of laboratory animal medicine.

(3) **GS-13.** Ph.D. degree in laboratory animal medicine, laboratory animal science or an area directly related to the practice of laboratory animal medicine.

(4) **GS-14.** None qualifying at the GS-14 grade level.

(5) **GS-15.** None qualifying at the GS-15 grade level.

c. **Residency and Post-Graduate Training.** Residency or post-graduate training in an ACLAM-approved program is creditable towards meeting the grade level requirements. The discipline or specialty of the residency or post-graduate training program must be laboratory animal medicine, laboratory animal science or in an area directly related to the practice of laboratory animal medicine. Applicants must demonstrate successful completion of a residency or post-graduate training program or a level of satisfactory progression in the residency or post-graduate training program. The number of years of residency or post-graduate training required is as follows:

(1) **GS-11.** 1 year of progressively responsible training in an ACLAM-approved internship, residency program or fellowship training program.

(2) **GS-12.** 2 years of progressively responsible training in an ACLAM-approved internship, residency program or fellowship training program.

(3) **GS-13.** 3 years of progressively responsible training in an ACLAM-approved internship, residency program or fellowship training program.

(4) **GS-14.** 4 years of progressively responsible training in an ACLAM-approved internship, residency program or fellowship training program.

(5) **GS-15.** 5 years of progressively responsible training in an ACLAM-approved internship, residency program or fellowship training program.
d. **Board Certification.** Board certification for the laboratory animal medicine specialty is demonstrated by ACLAM Diplomate status. ACLAM Diplomate status is creditable with specialized experience or residency and post-graduate training towards meeting the grade level requirements. ACLAM Diplomate status is awarded to individuals who have completed a rigorous post-graduate training or residency program or who have gained specialized laboratory animal experience. ACLAM Diplomates must also meet publication requirements and pass certifying exams. The certifying exams cover laboratory animal biology, laboratory animal resources management, clinical laboratory animal medicine and surgery, laboratory animal pathology and animal experimentation. **NOTE:** Specialized experience and residency and post-graduate training requirements listed below must meet the criteria described in the applicable qualifying category above. An applicant with ACLAM Diplomate status may immediately qualify for a position up to the GS-13 grade level. ACLAM Diplomate status is creditable for each grade level as follows:

1. **GS-11.** ACLAM Diplomate status.

2. **GS-12.** ACLAM Diplomate status and 1 year of specialized veterinary experience equivalent to the GS-11 grade level or ACLAM Diplomate status and 2 years of progressively responsible training in an ACLAM-approved internship, residency program or fellowship training program.

3. **GS-13.** ACLAM Diplomate status and 1 year of specialized veterinary experience equivalent to the GS-12 grade level or ACLAM Diplomate status and 3 years of progressively responsible training in an ACLAM-approved internship, residency program or fellowship training program.

4. **GS-14.** ACLAM Diplomate status and 1 year of specialized veterinary experience equivalent to the GS-13 grade level or ACLAM Diplomate status and 4 years of progressively responsible training in an ACLAM-approved internship, residency program or fellowship training program.

5. **GS-15.** ACLAM Diplomate status and 1 year of specialized veterinary experience equivalent to the GS-14 grade level or ACLAM Diplomate status and 5 years of progressively responsible training in an ACLAM-approved internship, residency program or fellowship training program.

5. **SUPERVISORY POSITIONS.** Use the Supervisory Qualification Guide in the OPM Operating Manual for Qualification Standards for General Schedule Positions in conjunction with the requirements of this standard for supervisory or managerial positions.

6. **GRANDFATHERING PROVISION.** All persons employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including education and licensure that are part of the basic requirements of the occupation. For employees who do not meet all of the requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

   a. Employees grandfathered into the GS-701 occupational series under the provision of this paragraph may be reassigned, promoted up to the full performance level of a career ladder or changed to lower grade within the GS-701 occupation, but *may not* be promoted beyond the full performance level or placed in a supervisory or managerial position.
b. Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the qualification requirements of the standard.

c. Employees initially grandfathered into this occupation who subsequently obtain additional education and/or licensure that meet all basic requirements of the qualification standard must maintain the required credentials as a condition of employment in the occupation.

d. If an employee who is retained under this provision leaves the GS-701 occupational series, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

7. FEE-BASIS UTILIZATION AND CONTRACT. Applicants seeking employment through a fee-basis appointment or contract must meet all of the requirements of the VMO qualification standard. Employees who were appointed through a fee-basis appointment or contract prior to the effective date of the qualification standard may not have their appointment or contract extended or be reappointed until they fully meet the requirements of the standard.

8. WAIVERS. If after positive recruitment activities there are no acceptable applicants who meet these requirements, the Chief, Research and Development Officer (109P), may authorize a medical center director to recruit otherwise qualified applicants who show evidence of training, experience, and competence to be equally protective of patient health and safety. Requests to initiate broad-based recruitment using a modified standard that meets the requirements of chapter 2, section D, paragraph 9 of this part must be submitted through channels to the Office of Human Resources Management, Recruitment and Placement Policy Service (059).

9. PHYSICAL REQUIREMENTS. Applicants must be physically and mentally able to safely and efficiently perform the full range of duties of the position without creating hazards to themselves or others. In most cases, a specific physical condition or impairment will not automatically disqualify an applicant for appointment. Reasonable accommodation may also be considered in determining an applicant’s ability to perform the duties of a position.

10. ADDITIONAL REQUIREMENTS. In addition to meeting the other requirements of this qualification standard, applicants must possess the writing, oral communication, and interpersonal skills necessary to perform the duties of the position to be filled. These personal competencies may be evaluated by means of an interview.}
APPENDIX F33. QUALIFICATION STANDARD

MEDICAL PHOTOGRAPHER GS-1060-4/12

AUTHORITY: 38 U.S.C. 7402

PART I

DUTIES: Photographers in a Medical Center make still and motion pictures of subjects of medical interest in which size, form, texture, color, and motion must be rendered with great accuracy through the use of a variety of photographic techniques and media. Medical photographers must use technical knowledge of the techniques and processes of photography, and must also exercise artistic ability in the course of their work. Many photographers carry out the laboratory work connected with developing and printing photographs. Medical photographers must have a knowledge and understanding of the problems involved in photographing severely ill or handicapped patients, physically and mentally.

Those in the higher grades perform medical photography relating to the development of comprehensive, concise and realistic sources of photographic reference used in medical research. Duties include constant improvisation and implementation of new photographic techniques and methods where no precedent exists in medical photographic literature or reference. They do photomicrography of pathology in organs and tissues, complicated laboratory setups, tests, and techniques. Those in the higher grades may also require technical supervision of the activities indicated above and supervision of subordinate photographers and technicians.

EXPERIENCE REQUIREMENTS: Applicants for these positions must show general and specialized experience of the types below and in the amounts indicated in the table following:

</table>

GENERAL EXPERIENCE: This is experience which has provided the applicant with knowledge in operating cameras and related equipment, performing developing and printing processes and techniques or a combination of both as required by the position. Experience gained in operating microfilming equipment or other kinds of photoduplicating equipment may be qualifying (up to 1 year of such experience) provided it demonstrates that the applicant has an understanding of the photographic
processes involved. Photographic experience gained in prevailing wage kinds of positions is considered qualifying provided it demonstrates the applicants’ understanding of the photographic processes.

**SPECIALIZED EXPERIENCE:** This is experience in medical photography that may have been gained by responsible activities in a still or motion-picture photographic laboratory, or by planning and completion of very difficult still or motion-picture photographic work of high quality. For grades GS-7 and above, this specialized experience must have included photomicrography or motion picture photography.

**QUALITY OF EXPERIENCE:** Possession of the length of experience required for a grade will not of itself be accepted as proof of possession of qualifications for that grade. The applicant’s record of experience and training must show that he has the ability to perform the work of the position. At all grade levels at least 6 months of the qualifying experience must be of a level comparable to the next lower grade of the Federal service, or 1 year of experience must have been at a level comparable to that of the second lower grade. For positions that involve supervisory duties, the applicant must have had appropriate supervisory experience or have demonstrated the aptitudes required to perform satisfactorily the duties of the position being filled.

**SUBSTITUTION OF EDUCATION FOR EXPERIENCE:** A successfully completed residence course in basic photography (either in high school or in the Armed Forces) consisting of at least 200 hours of instruction or supervised laboratory work may be substituted for 3 months of the required general experience in any grade.

Advanced photographic training in residence at a technical institute or trade school above high school level may be substituted year for year up to a maximum of 2 years for the required general experience in any grade.

**BASIS OF RATING:** No written test is required. Applicants will be rated on a scale of 100 on the extent and quality of their experience and training relevant to the duties of the position. The rating of experience will be based upon the applicants’ statements in their application, upon the quality of samples submitted, if required, and upon any additional evidence secured by Federal civil service examiners.

**PHYSICAL REQUIREMENTS:** Applicants must be physically and mentally able to efficiently perform the essential functions of the position without hazard to themselves or others. Depending on the essential duties of a specific position, usable vision, color vision, hearing, or speech may be required. However, in most cases, a specific physical condition or impairment will not automatically disqualify an applicant for appointment. The loss or impairment of a specific function may be compensated for by the satisfactory use of a prosthesis or mechanical aid. Reasonable accommodation may also be considered in determining an applicant’s ability to perform the duties of a position. Reasonable accommodation may include, but is not limited to: the use of assistive devices, job modification or restructuring, provision of readers and interpreters, or adjusted work schedules.
PART II

EVALUATING EXPERIENCE AND TRAINING: In rating applications, experience and training must be evaluated in terms of being progressively responsible from the lower to the higher grades.

Training courses for photography are very limited in number and scope. Some courses are given in vocational schools, technical institutes and in the Armed Forces. These courses may be substituted for the general experience only. Specialized experience or training will be gained in most of all cases on the job. For credit toward the specialized requirements the training or experience must have been gained in responsible medical photography activities.

For grades GS-7 and above, the specialized experience must have included photomicrography or motion-picture photography.

ARTISTIC ABILITY: Most medical photographer positions, and especially grades GS-7 and above, require a degree of artistic ability in the taking and developing of pictures. This artistic ability can best be judged through evaluating samples of the applicant’s work. If samples are required to properly evaluate the applicant’s work, the evaluation of the samples should be done by a panel of technically qualified individuals, on the basis of a uniform set of standards. If samples are not used to evaluate artistic ability, then vouchers should be used to obtain information about the applicant’s artistic ability from supervisors, clients, and teachers.

HOBBY EXPERIENCE: Hobby experience in photography is extremely common. At the same time it may be difficult to equate hobby experience for credit toward the required general experience required in the Qualification Standard. A hobbyist can submit samples showing kinds of photographic work done or may submit photographic awards of prizes as evidence of the applicant’s achievement. When such samples or awards are evaluated by professional standards and clearly represent a level of achievement usually attained as a result of full-time photographic experience, appropriate credit may be granted for general experience. Hobby experience also may be used to evaluate the quality of the applicant’s work even though it may not be feasible to consider it in meeting the time requirements.

SUGGESTED RATING FACTORS

1. Knowledge of equipment and processes.

2. Use of specialized camera and/or processing equipment.

3. Use of medical photographic equipment and processes.

4. Subject matter knowledge of medical photography including ability to deal with hospitalized patients.

5. Artistic ability.

6. Ability to operate independently.
APPENDIX F36. QUALIFICATION STANDARD

GENERAL ATTORNEY  GS-0905-11/15

AUTHORITY: 5 C.F.R., Part 6, Exceptions from the Competitive Service, (Rule VI)

1. COVERAGE. The requirements in this standard are for appointment as an Attorney in the Department of Veterans Affairs (VA). These requirements apply to all Attorneys in the General Schedule (GS)-0905 series. Attorneys within VA provide legal advice and services with respect to questions, regulations, practices, or other matters falling within the purview of VA; draft and review Department officials’ decisions to ensure compliance with the law, regulation, practices, etc., and legal sufficiency; issue written legal opinions and prepare final decisions in adjudications and appeals involving Veterans’ benefits under laws administered by VA; engage in judicial and administrative litigation on behalf of the Secretary at the Federal, state, and local levels; examine contracts; provide substantive recommendations to proposed legislation; prepare interpretive and administrative orders, rules, or regulations; negotiate on behalf of the Secretary with Federal, state, and local stakeholders and prepare final VA decisions and orders on the substantive merits of employment discrimination complaints filed by employees, former employees, or applicants for employment.

2. BASIC REQUIREMENTS.
   a. Citizenship. Be citizens of, or owe allegiance to, the United States.
   b. Bar Membership Requirements. All attorneys in the GS-0905 series must be active members in good standing of the bar of a state or territory of the United States or the District of Columbia and must hold a current, unrestricted license to practice law. Employees must maintain their compliance with this requirement. The duties of the position call for appearance in court. The applicant must be a member in good standing of the bar or be eligible for admission to the bar, of the state or territory of the United States or the District of Columbia where he/she will serve.
   c. Loss of Good Standing/Bar Membership. Employees must maintain good standing in a bar of a state or territory of the United States or the District of Columbia while employed as an attorney with VA. Failure to maintain good standing in a bar of a state or territory of the United States, or the District of Columbia provides grounds for removal and possible termination from employment with the VA.

3. QUALIFICATIONS. The applicant’s experience and training must demonstrate he/she can successfully perform the position’s duties. The Office of Personnel Management (OPM) Position Classification Standard for General Attorney Series, GS-0905, provides examples of duties performed at each grade level.
a. **Quality of Experience.** For each grade, applicants must have one or a combination of the following types of experience in the amounts indicated in paragraphs 3.c.(1) through (5):

1. Practice of law includes private, state, or Federal practice in any field of law.

2. Other legal experience of a responsible nature is experience in any one or a combination of the following performed in a law office, government office, or in the legal department of a business establishment, in the armed forces, or other Federal service:
   
   (a) Conducting legal research, analyzing statutes, writing legal opinions;
   
   (b) Writing authoritative or advisory legal opinions involving interpretation of state or Federal laws, regulations, and orders, or the drafting of such regulations or orders; or
   
   (c) Drafting, analyzing, and other legal activities with respect to bills, regulations, Executive Orders, proclamations, or statutory provisions.

3. Where the volume of legal work in one particular subject-matter field (such as administrative law, legislation, guardianship, loans, torts, or any of the several Veterans’ benefits, litigations, etc.) requires the appointee to be specifically qualified in that field, this requirement will be identified as a selective factor through job analysis. Such specific qualifications will be documented in the position description.

b. **Exceptions.**

1. **Law Clerk.** The occupational series, Law Clerk 0904, consists of employees who have completed the education and/or training required for admission to the bar and are pending admission. The entry grade level for an appointment is the GS-11 grade level. Employees serve in not-to-exceed positions and must earn admission to the bar of a state or territory of the United States or the District of Columbia within 14 months.

2. **Legal Intern.** Legal Intern positions must use the Pathways Internship Program for appointment in accordance with Appendix N, Pathways Program.

3. **Superior Law Student Program.**
   
   (a) GS-11 and GS-12 candidates applying under this option are required to furnish certification from the registrar of ranking and other attainments in law school. Candidates who meet the requirements may be eligible for appointment Above the Minimum Entry Rate of the grade under 5 U.S.C. § 5333 and VA Handbook 5007, Part II, Chapter 3, Paragraph 4.
(b) Candidates must graduate in the upper one-third of their law class and achieve one of the following accomplishments:

i. Work or achievement of significance on their school's Official Law Review;

ii. Special high-level honors for academic excellence in law school, such as election to the Order of the Coif;

iii. Winning a moot court competition or membership on the moot court team which represents the law school in competition with other law schools;

iv. Full-time or continuous participation in a legal aid program as opposed to intermittent or casual participation;

v. Significant summer law-office clerk experience; or

vi. Other equivalent evidence of superior achievement.

c. **Grade Determinations.** In addition to the basic requirements for employment identified in paragraph 2, the following criteria are the minimum qualifications for non-supervisory positions at each grade level.

(1) **GS-11.**

(a) One year of experience or less in the practice of law as described in paragraph 3a; or

(b) Meets qualification through the Superior Qualification Program.

(2) **GS-12.**

(a) Possession of a Master of Laws (LL.M.) degree;

(b) Possession of a Juris Doctor (JD) degree in a field of law directly pertinent to the work of the position to be filled as evidenced by transcripts and identified as a selective factor in the position description or subsequent position descriptions in a position ladder;

(c) Two years of progressively responsible experience as described in paragraph 3a of which a maximum of one year of the required experience may be acquired prior to admission to the bar, and that demonstrates experience performing similar legal work and responsibilities as described in Nature of Cases or Legal Problems, Type I, in the OPM Position Classification Standard for General Attorney Series, GS-0905; or
(d) Meets qualification through the Superior Qualification Program.

(3) GS-13. Three years of progressively responsible experience as described in paragraph 3a, of which a maximum of one year of the required experience may be acquired prior to admission to the bar, and that demonstrates experience performing similar work and responsibilities as described in Nature of Cases or Legal Problems, Type II, in the OPM Position Classification Standard for General Attorney Series, GS-0905.

(4) GS-14. Four years of progressively responsible experience as described in paragraph 3a, of which a maximum of one year of the required experience may be acquired prior to admission to the bar, and that demonstrates experience performing similar work and responsibilities as described in Nature of Cases or Legal Problems, Type III and Level of Responsibility D in the OPM Position Classification Standard for General Attorney Series, GS-0905.

(5) GS-15. Four years of progressively responsible experience as described in paragraph 3a, of which a maximum of one year of the required experience may be acquired prior to admission to the bar, and that demonstrates the professional and administrative abilities required to perform similar work and responsibilities as described in Nature of Cases or Legal Problems, Type III and Level of Responsibility E, in the OPM Position Classification Standard for General Attorney Series, GS-0905.

4. EXAMINING GUIDE.

a. In the absence of an occupational-wide examining guide, hiring officials must develop prescribed written rating and ranking methodologies, in consultation with Human Resources office staff, based on thorough job analyses if candidates are evaluated beyond minimum qualifications for vacancies.

b. In accordance with 5 C.F.R. § 302.101(c), Veterans’ preference applies as far as administratively feasible. When candidates are determined to be approximately equally qualified for a particular vacancy, hiring preference will be given to Veterans or preference eligibles as defined in 5 U.S.C. § 2108. At a minimum, facilities must demonstrate from the written record why the qualifications of non-selected preference eligibles and other Veterans are not approximately equal to those of selected candidates who either lack preference or are non-Veterans. Upon request, hiring managers must provide qualified Veterans or preference eligibles with the reasons for non-selection.]
PHYSICIAN QUALIFICATION STANDARD
Veterans Health Administration

1. **COVERAGE.** The following are the overall requirements for appointment as a physician in the Veterans Health Administration (VHA).

2. **BASIC REQUIREMENTS.**

   a. **Citizenship.** Be a Citizen of the United States. (Noncitizens may be appointed when it is not possible to recruit qualified citizens in accordance with [38 U.S.C. § 7407(a)].)

   b. **Education.** Degree of Doctor of Medicine or an equivalent degree resulting from a course of education in allopathic medicine or osteopathic medicine. The degree must have been obtained from an institution whose accreditation was in place for the year in which the course of study was completed. Approved schools are:

      (1) Schools of medicine accredited by the Liaison Committee on Medical Education (LCME) for the year in which the degree was granted, or

      (2) Schools of osteopathic medicine approved by the Commission on Osteopathic College Accreditation of the American Osteopathic Association for the year in which the degree was granted.

      (3) For foreign medical graduates not covered in (1) or (2) above, facility officials must verify with the Educational Commission for Foreign Medical Graduates (ECFMG) that the applicant has met requirements for certification, and must obtain a copy of the ECFMG certificate, if claimed by the applicant. [If the applicant does not claim an ECFMG certificate, facility officials must still confirm that the medical school meets (or met) ECFMG eligibility requirements for the year the candidate graduated.]

   NOTE: The Under Secretary of Health or designee in the VHA Central Office may approve the appointment under authority of 38 U.S.C. § 7405 of a physician graduate of a school of medicine not covered above if the candidate is to be assigned to a research, academic, or administrative position with no patient care responsibilities. The appointment will be made only in exceptional circumstances where the candidate’s credentials clearly demonstrate high professional attainment or expertise in the specialty area.

   c. **Licensure and Registration.** Physicians must possess a current, full and unrestricted license to practice medicine or surgery in a state, territory, or Commonwealth of the United States, or in the District of Columbia. The physician must maintain current registration in the state of licensure if this is a requirement for continuing active, current licensure.

      (1) **Impaired Licensure.** A physician who has, or has ever had, any license(s) revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions of this [Handbook 5005 part II,] chapter 3, section B, [paragraphs 13 and 14].
(2) Waiver of Licensure. Licensure requirements may be waived by the Under Secretary for Health or designee in the VHA Central Office for individuals in research, academic, or administrative assignments involving no direct patient care responsibilities in accordance with current regulations. In addition, the facility director may waive this licensure requirement if the physician is to serve in a country other than the United States and the physician has licensure in that country. (See [this Handbook 5005 part II.] chapter 3, section B, paragraph 14, on waiver of licensure provisions.)

NOTE: Individuals who have or have had multiple licenses and had any such license revoked for professional misconduct, professional incompetence or substandard care, or who surrendered such license after receiving written notice of potential termination of such license by the state for professional misconduct, professional incompetence, or substandard care, are not eligible for appointment to the position unless such revoked or surrendered license is fully restored (38 U.S.C. § 7402(f)). This requirement does not apply to licensed physicians on VA rolls as of November 30, 1999, provided they maintain continuous appointment and are not disqualified for employment by any subsequent revocations or voluntary surrenders of state license, registration or certification.

d. Residency Training. Physicians must have completed residency training, approved by the Secretary of Veterans Affairs in an accredited core specialty training program leading to eligibility for board certification. (NOTE: VA physicians involved in academic training programs may be required to be board certified for faculty status.) Approved residencies are:

(1) Those approved by the Accreditation Council for Graduate Medical Education (ACGME),

OR

(2) Those approved by the American Osteopathic Association (AOA),

OR

(3) Other residencies (non-US residency training programs followed by a minimum of five years of verified practice in the United States), which the local Medical Staff Executive Committee deems to have provided the applicant with appropriate professional training and believes has exposed the physician to an appropriate range of patient care experiences. NOTE: Residents currently enrolled in ACGME/AOA accredited residency training programs and who would otherwise meet the basic requirements for appointment are eligible to be appointed as “Physician Resident Providers” (PRPs). PRPs must be fully licensed physicians (i.e., not a training license) and may only be appointed on an intermittent or fee-basis. PRPs are not considered independent practitioners and will not be privileged; rather, they are to have a “scope of practice” that allows them to perform certain restricted duties under supervision. Additionally, surgery residents in gap years may also be appointed as PRPs. For more information, see Section 3a below.
e. **Board Certification:** Physicians are generally not required to be board certified for employment in VA; however, three circumstances in VA require physician board certification:

(1) If the position being filled is required to be a supervisor for medical students or physician residents (including fellows), the LCME, ACGME or AOA standards requiring a particular board certification credential will apply.

(2) If the position being filled will have faculty status with an affiliated medical school (for example, in joint recruitments with affiliated medical schools), then a medical school requirement for board certification will apply to the jointly recruited position.

(3) If the position being filled is required to be board certified by virtue of specific VHA policy (for example, as director of a cardiac catheterization laboratory or Director of Clinical Laboratory Medicine), then VHA policy requiring board certification will apply.

g. **English Language Proficiency.** Physicians appointed to direct patient-care positions must be proficient in spoken and written English as required by 38 U.S.C. § 7402(d) and 7407(d).

[h. **Grandfathering.** Currently employed physician(s) in VA who met the requirements for appointment under the previous qualification standard at the time of their initial appointment are deemed to have met the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the occupation at the time they were appointed, the following provisions apply:

(1) Such employees are considered to have met the basic qualification requirements for the purposes of transferring or reassignment to another physician position within VA.

(2) Employees who were appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) If a physician who was retained under this provision leaves the occupation or VA employment, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry or reemployment.

3. **PHYSICIAN STAFF REQUIREMENTS.**

[a. **Physician Resident Providers (PRPs).** PRPs are fully licensed physicians who are currently enrolled in approved residency training programs. They perform specific duties within a scope of practice under the supervision of licensed independent practitioners. Facilities should develop PRP scopes of practice that are approved through the local medical staff process, and identify the supervising physician(s).
Duties approved through the scope of practice should correspond with the individual’s postgraduate year level of responsibility and not exceed their level of training. For example, PRPs may be allowed to provide inpatient consultation, post-operative follow-ups, or weekend clinics, under the supervision of a privileged physician.

[b.] **Staff Physician.** None beyond the basic requirements. The individual must qualify to perform duties as a physician, have completed an accredited residency and/or possess experience which has qualified the individual to perform general duties and some specialized functions and procedures without supervision. Staff physicians may also include attendings who train physician residents assigned in facilities with residency training programs, and consultants who are capable of giving authoritative views and opinions on subjects in their field of medicine.

[c.] **Leadership/Manager Positions.** Physician leadership and manager positions may be facility chiefs of staff, directors (i.e., medical center and Veterans Integrated Service Network (VISN)); selected positions in VHA Central Office; and service chiefs or service line managers. Positions are approved for these levels based on the scope and complexity of the assignment and the level of responsibility.

1. **Chief of Staff.** A facility chief of staff must serve on a full-time basis. The chief of staff develops and maintains currently accepted management practices throughout the clinical services. The chief of staff develops and presents the budgetary requirements of the clinical services and assists in the formulation of the annual budget program. The chief of staff is fully responsible to the medical center director for programs of patient care and for the educational and research activities of the clinical services. To carry out these responsibilities, the chief of staff:

   a. Formulates and recommends plans for a comprehensive program of medical care,

   b. Develops the requirements of staff, facilities, equipment and supplies needed to support an integrated program, utilizing necessary reviews and controls, and

   c. Appraises the effectiveness of the various medical programs in meeting the needs of patient care.

2. **Medical Center Director/VISN Director.** Physicians appointed as directors of medical centers (including facility and regional office center directors, directors of outpatient clinics (Independent) and Domiciliaries) or VISNs must meet the requirements specified in 38 U.S.C. § 7306. The individual assigned at this level will be a qualified Doctor of Medicine with demonstrated leadership ability.

   a. The medical facility director (includes directors of outpatient clinics (independent) and domiciliaries) has overall responsibility for planning, organizing, directing, coordinating and controlling medical, administrative, and supporting operations of a medical facility which administers a variety of medical care and treatment for a large geographic area. The director is responsible for maintaining and improving the health care facility and VA relationships through active participation in the administrative, educational, community and social events of Federal, state, local and other affiliated organizations involved in health care delivery, Veterans
service organizations, and appropriate civic organizations. These duties are geared to the successful accomplishment of the basic patient care mission, and additional missions for teaching and research.

(b) The VISN or regional office center director has delegated line authority and responsibility for executive level management of a consolidated VA health care and Veterans benefits facility covering a large geographic area. The director has responsibility for planning, organizing, directing, coordinating and controlling administrative and supporting operations and for establishing policies and procedures. The director delegates authority as appropriate to subordinate staff for program administration (often statewide), directing program planning, and the formulation and presentation of the annual budget for the facility. The director is responsible for maintaining and improving the health care facility and VA relationships through active participation in the administrative, educational, community and social events of Federal, state, local and other affiliated organizations involved in health care delivery, Veterans service organizations, and appropriate civic organizations. These duties are geared to the successful accomplishment of the basic patient care and Veterans benefits missions.

Service Chief or Line Manager. A service chief or line manager physician must demonstrate the following:

(a) Outstanding professional ability in the practice of medicine or a medical specialty; and

(b) Ability to guide the development and implementation of programs within their respective domain. These programs would include, but are not limited to medical practice, professional standards, personnel issues, and quality and performance improvement.

Authority: 38 U.S.C. §§ 7402, 7403.]
1. **COVERAGE.** The following are requirements for appointment as a Dentist in the Veterans Health Administration (VHA).

2. **BASIC REQUIREMENTS**

   a. **Citizenship.** Citizen of the United States. (Noncitizens may be appointed when it is not possible to recruit qualified citizens in accordance with section A, chapter 3, paragraph 3g, this part.)

   b. **Education.** Degree of doctor of dental surgery or dental medicine resulting from a course of education in dentistry. The degree must have been obtained from one of the schools approved by the Secretary of Veterans Affairs for the year in which the course of study was completed. Approved schools are:

      (1) United States and Canadian schools of dentistry listed by the Commission on Dental Accreditation (CODA), in the list published for the year in which the course of study was completed.

      (2) Schools (including foreign schools) accepted by the licensing body of a State, Territory, or Commonwealth (i.e., Puerto Rico), or the District of Columbia as qualifying for full and unrestricted licensure provided the licensure requirements include a written examination measuring science achievement and a performance examination measuring clinical competence.

   **NOTE:** The Under Secretary for Health or designee in Central Office may approve the appointment under authority of 38 U.S.C. 7405 of a graduate of a school of dentistry not covered above if the candidate is to be assigned to a research or academic position with no patient care responsibilities. The appointment will be made only in exceptional circumstances where the candidate’s credentials clearly demonstrate high professional attainment or expertise in the specialty area. (Also see paragraph 2d(4) below on waiver of licensure provisions.) The Under Secretary for Health or designee may also approve the appointment of a graduate of a school of dentistry not covered above as a resident under 38 U.S.C. 7406.

   c. **Residency or Comparable Experience.** Completion of an approved residency program in general practice or specialty, or comparable experience as a dentist actively involved in treating medically compromised patients.

   **NOTE:** The appointing official may approve, under unusual circumstances, a waiver of Residency or Comparable Experience.

   d. **Licensure and Registration**

      (1) **Dentists (Except Residents).** Current, full, and unrestricted license to practice dentistry in a State, Territory, or Commonwealth of the United States (i.e., Puerto Rico), or in the District of
Columbia. The dentist must maintain current registration in the State of licensure if this is a requirement for continuing active, current licensure.

(2) Residents (Independent and Integrated Programs). Graduates of approved United States and Canadian schools of dentistry must have a current, full and unrestricted license to practice dentistry in a State, Territory or Commonwealth of the United States, or in the District of Columbia before the second year of VA residency, or, for integrated programs, meet any licensure, registration or other equivalent requirements established for residents of non-VA hospitals with which the VA facility is affiliated for training purposes. The resident must maintain current registration in the State of licensure if this is a requirement for continuing active current licensure.

(3) Impaired Licensure. A dentist who has, or has ever had, any license(s) revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions of section B, chapter 3, paragraphs 14 and 17c, of this part.

(4) Waiver of Licensure. Licensure may be waived by the Under Secretary for Health or designee in Central Office for individuals in research or academic assignments involving no direct patient care responsibilities in accordance with current regulations.

f. English Language Proficiency. Dentists, including residents, appointed to direct patient-care positions must be proficient in spoken and written English as required by 38 U.S.C. 7402(d) and 7407(d).

3. DENTAL STAFF REQUIREMENTS

a. General Practice Resident. None beyond the basic requirements.

b. Residents in Dental Specialties

(1) First-Year Residents. None beyond the basic requirements, however, paragraph 2c above does not apply to the appointment of general practice residents.

(2) Second and Third Year Residents. An individual at these levels must have the qualifications of the first-year resident, and in addition, the appropriate period of time (one to three years depending on specialty) of approved residency training in the specialty or its creditable equivalent.

c. Staff

(1) Staff Dentist. An individual that demonstrates the ability in the field of general dentistry or a dental specialty who is employed to perform the duties related to various professional activities of patient care and treatment without supervision. In addition to meeting the basic requirements, applicants must demonstrate ability in the general practice of dentistry; be capable of assisting in maintaining accepted standards of professional care in VA facilities; and be capable of accepting full responsibility for the proper care and treatment of assigned patients.
(2) **Attending.** A dentist who teaches and supervises fellows, residents, and students in the provision of dental treatment for Veterans. The attending dentist has primary responsibility for the care of the patient and provides direct patient care when not supervising trainees or performing other required duties. In addition to meeting the basic requirements, attendings must demonstrate the following:

(a) Ability in the field of dentistry and the ability to assist in maintaining accepted standards of professional care in VA facilities. Capable of accepting full responsibility for the proper care and treatment of assigned patients.

(b) Ability to train residents assigned to the service in facilities conducting residency training programs. An attending is a qualified dentist possessing privileges to perform all procedures being supervised. Attendings not holding a faculty appointment in an associated dental school must be recognized as an outstanding member of the profession of the caliber of a faculty member.

(3) **Consultant.** A dentist who is capable of giving authoritative views and opinions on subjects in dentistry. A consultant’s expertise may consist of broad administrative or professional experience enabling the consultant to give advice of distinctive value. In addition to meeting the basic requirements, consultants must demonstrate all of the following:

(a) Outstanding professional ability and professional experience in a dental specialty or advanced dentistry; and

(b) Ability to direct the educational training of residents in the appropriate specialty in facilities affiliated with approved dental schools. A consultant not holding a faculty appointment in an associated dental school should possess equivalent professional qualifications.

**NOTE 1:** A dentist who represents a specialty for which no specialty board exists may be appointed as a consultant if the individual possesses outstanding ability in the particular field of specialization.

**NOTE 2:** All dentists, including residents, consultants and attendings, will accomplish the numerous administrative requirements of medical staff members, including but not limited to: mandatory training, attendance on medical center committees, and computer and privacy compliance.

(4) **Leadership/Manager Positions.** Dentist leadership and management positions may be Section Chiefs, Assistant Chiefs, Service Chiefs, VISN Lead Dentists, Service Line Managers, Central Office Program Positions, Chiefs of Staff, or Directors (i.e., medical center and Veterans Integrated Service Network (VISN)). Dentists in leadership positions must demonstrate outstanding professional ability in the practice of dentistry or a dental specialty, and healthcare administration, as well as the ability to guide the development and implementation of programs within their respective domain. These would include, but are not limited to dental practice, professional standards, personnel issues, quality and performance improvement.

(a) **Service Chief/Service Line Manager/Lead Dentist.** In addition to the above, Dentists in these roles must demonstrate effectiveness coordinating and managing interdisciplinary collaboration with both internal and external stakeholders to optimize the care of patients under their purview. It is expected individuals in these roles serve on a full-time basis.
(b) **Chief of Staff.** A Chief of Staff must serve on a full-time basis. The Chief of Staff develops and maintains currently accepted management practices throughout the clinical services. The Chief of Staff develops and presents the budgetary requirements of the clinical services and assists in the formulation of the annual budget program. The Chief of Staff is fully responsible to the Medical Center Director for programs of patient care and for the educational and research activities of the clinical services. To carry out these responsibilities, the Chief of Staff:

(i) Formulates and recommends plans for a comprehensive program of medical care;

(ii) Develops the requirements of staff, facilities, equipment and supplies needed to carry forward such an integrated program, utilizing necessary reviews and controls; and

(iii) Appraises the effectiveness of the various medical programs in meeting the needs of patient care.

(c) **Medical Center Director/VISN Director.** Dentists appointed as Directors of Medical Centers (including facility and Regional Office Center Directors, Directors of Outpatient Clinics (Independent) and Domiciliaries) or VISNs must meet the requirements specified in 38 U.S.C. § 7306. The individual assigned at this level will be a qualified dentist with demonstrated leadership ability.

(i) **The Medical Facility Director** (includes Directors of outpatient clinics (independent) and domiciliaries) has overall responsibility for planning, organizing, directing, coordinating and controlling medical, administrative, and supporting operations of a medical facility which administers a variety of medical care and treatment for a large geographic area. The Director is responsible for maintaining and improving health care facility and VA relationships through personal, active participation in the administrative, educational, community and social events of Federal, State, local and other affiliated organizations involved in health care delivery, Veterans service organizations, and appropriate civic organizations. These duties are geared to successful accomplishment of the basic patient care mission, as well as such additional missions as teaching and research.

(ii) **The VISN or Regional Office Center Director** has fully delegated line authority and responsibility for executive level management of a consolidated VA health care and Veterans benefits facility covering a large geographic area. The Director has responsibility for planning, organizing, directing, coordinating and controlling administrative and supporting operations and for establishing policies and procedures, delegating authority as appropriate to subordinate staff for program administration (often statewide), directing program planning, and directing and participating in the organization, formulation and presentation of the annual budget for the facility. The Director is responsible for maintaining and improving health care facility and VA relationships through personal, active participation in the administrative, educational, community and social events of Federal, State, local and other affiliated organizations involved in health care delivery, Veterans service organizations, and appropriate civic organizations. These duties are geared to successful accomplishment of the basic patient care and Veterans benefits missions.

**Authority:** 38 U.S.C. 7304; 7402.]

II-G3-4
APPENDIX G4. PODIATRIST QUALIFICATION STANDARD

GS-0668

Veterans Health Administration

1. COVERAGE. The following are the overall requirements for appointment as a Podiatrist in the Veterans Health Administration.

2. BASIC REQUIREMENTS.

   a. Citizenship. Candidates must be a United States citizen. (Noncitizens may be appointed when it is not possible to recruit qualified citizens, in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. Education. Applicants must possess a doctor of podiatric medicine degree, or an equivalent degree resulting from a course of education in podiatric medicine and surgery. The degree must have been obtained from an institution whose accreditation was in place for the year in which the course of study was completed.

      (1) Approved schools are United States schools of podiatric medicine and surgery, approved by the Council on Podiatric Medical Education of the American Podiatry Medical Association in the year in which the degree was granted.

      NOTE: The Under Secretary of Health or designee in Central Office may approve the appointment under authority of 38 U.S.C. § 7405 for a podiatric graduate of a school of medicine not covered above if the candidate is to be assigned to a research, academic, or administrative position with no patient care responsibilities. The appointment will be made only in exceptional circumstances where the candidate’s credentials clearly demonstrate high professional attainment or expertise in the specialty area.

   c. Licensure or Registration. Applicants must possess a current, full, and unrestricted license to practice medicine or surgery in a state, territory, or commonwealth of the United States, or in the District of Columbia. The podiatrist must maintain current registration in the state of licensure if this is a requirement for continuing active, current licensure.

      (1) Impaired Licensure. A podiatrist who has, or has ever had any license(s) revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions of chapter 3, section B, paragraph 14 of this part.

      (2) Waiver of Licensure. Licensure requirements may be waived by the Under Secretary for Health, or designee in Central Office, for individuals in research, academic, or administrative assignments, involving no direct patient care responsibilities, in accordance with current regulations. In addition, the facility
director may waive this licensure requirement if the podiatrist is to serve in a country other than the United States, and the podiatrist has licensure in that country. (See section B, chapter 3, paragraph 14 of this part, for waiver of licensure provisions.)

NOTE: Individuals who have or had multiple licenses, and had any such license revoked for professional misconduct, professional incompetence, or substandard care, or who surrendered such license after receiving written notice of potential termination of such license by the state for professional misconduct, professional incompetence, or substandard care, are not eligible for appointment to the position, unless such revoked or surrendered license is fully restored (38 U.S.C. § 7402(f)). This requirement does not apply to licensed podiatrists on VA rolls as of November 30, 1999, provided they maintain a continuous appointment and are not disqualified for employment by any subsequent revocations or voluntary surrenders of state license, registration, or certification.

d. **Residency Training.** Podiatrists must have completed residency training, or its equivalent, approved by the Secretary of Veterans Affairs in an accredited core specialty training program leading to eligibility for board certification. VA Podiatrists involved in academic training programs may be required to be board certified for faculty status. Approved residencies are:

(1) Those approved by the accrediting bodies for graduate medical education, the Council on Podiatric Medical Education, in the list published for the year the residency was completed, or

(2) Other residencies and training experiences, or their equivalents, which the local Professional Standards Board determines to have provided an applicant with appropriate professional training.

e. **Physical Standards.** See VA Directive and Handbook 5019.

f. **English Language Proficiency.** Podiatrists appointed to direct patient-care positions must be proficient in spoken and written English as required by 38 U.S.C. § 7402(d), 7407(d).

3. **PODIATRIST STAFF REQUIREMENTS**

a. **Staff Podiatrist Medical.** None beyond the basic requirements. The individual must have completed an accredited residency, and/or possess experience to perform general podiatric duties and some specialized functions and procedures, without supervision. Staff podiatrists may also include attending podiatrists who train physician residents, assigned in facilities with residency training programs, and consultants who are capable of giving authoritative views and opinions on subjects in their field of medicine. These podiatrists perform office based procedures only and generally work a set 40-hour per-week schedule.
b. **Staff Podiatrist Surgical.** Should be board qualified or board certified by a Council on Podiatric Medical Education certification board, or other equivalent certification to grant surgical privileges. The individual must possess experience to perform duties as a podiatrist and surgeon, and have completed an accredited residency, and/or possess experience to perform general and surgical duties and some specialized functions and procedures, without supervision. Staff podiatrist surgeons also includes attending physicians who train podiatrist residents, assigned in facilities with residency training programs, and consultants who are capable of giving authoritative views and opinions on subjects in their field of medicine. These podiatrists will perform office based procedures and operating room procedures and are responsible for surgical patients 24 hours a day, seven days a week. Added work responsibilities may include seeing hospital patients daily and carrying a pager or be available by phone for emergency consultations.

c. **Chief of Staff.** A chief of staff must serve on a full-time basis and must be a Doctor of Medicine or podiatric medicine. The chief of staff develops and maintains currently accepted management practices throughout the clinical services. The chief of staff develops and presents budgetary requirements of the clinical services and assists in the formulation of the annual budget program. The chief of staff is fully responsible to the medical center director for programs of patient care and for the educational and research activities of clinical services. To carry out these responsibilities, the chief of staff:

   (1) Formulates and recommends plans for a comprehensive program of medical care;

   (2) Develops the requirements of staff, facilities, equipment, and supplies needed to carry forward such an integrated program, utilizing necessary reviews and controls; and

   (3) Appraises the effectiveness of the various medical programs in meeting the needs of patient care.

d. **Medical Center Director/VISN Director.** Podiatrists appointed as directors of medical centers (including facility and regional office center directors, directors of outpatient clinics (independent), and (domiciliaries) or VISNs must meet the requirements specified in 38 U.S.C. § 7306. The individual assigned at this level will be a qualified Doctor of Medicine or podiatric medicine with demonstrated leadership ability.

   (1) The medical facility director (includes directors of outpatient clinics (independent) and (domiciliaries) has overall responsibility for planning, organizing, directing, coordinating, and controlling medical, administrative, and supporting operations of a medical facility, which administers a variety of medical care and treatment for a large geographic area. The director is responsible for maintaining and improving the health care facility and VA relationships through personal, active participation in administrative, educational, community, and social events of federal, state, local,
and other affiliated organizations involved in health care delivery, Veterans service organizations, and appropriate civic organizations. These duties are critical to successfully accomplish the patient care mission, as well as teaching and research.

(2) The VISN or regional office center director has delegated authority and responsibility for executive level management of a consolidated VA healthcare and Veterans benefits facility, which covers a large geographic area. The director has responsibility for planning, organizing, directing, coordinating, and controlling administrative and supporting operations, and for establishing policies and procedures, delegating authority, as appropriate, to subordinate staff for program administration (often statewide), directing program planning, and directing and participating in the organization, formulation, and presentation of the annual budget. The director is responsible for maintaining and improving the healthcare facility and VA relationships through personal, active, participation in administrative, educational, community, and social events of federal, state, local, and other affiliated organizations involved in healthcare delivery, Veterans service organizations, and appropriate civic organizations. These duties are geared to successful accomplishment of the basic patient care and Veterans benefits missions.

e. **Distinguished Podiatrist.** A distinguished podiatrist will be nationally and internationally recognized for scientific, academic, and administrative medicine expertise.

f. **Service Chief, Section Chief or Line Manager.** A service chief or line manager podiatrist must demonstrate the following:

   (1) Outstanding professional ability in the practice of medicine or a medical specialty; and

   (2) Ability to guide the development and implementation of programs, within their respective domain. These programs would include, but are not limited to, medical practice, professional standards, personnel issues, and quality and performance improvement.

g. **Residency Director.** A residency director must demonstrate the following:

   (1) Outstanding professional ability in the academic practice of medicine or a medical specialty; and

   (2) Ability to guide the development and implementation of academic and training programs within their respective domain. These programs would include, but are not limited to, clinical training, didactic training, professional and ethical standards, personnel issues, and quality and performance improvement, and proper program administration, with regard to maintaining accreditation.

**Authority:** 38 U.S.C. § 7304, 7402.
APPENDIX G5. OPTOMETRIST QUALIFICATION STANDARD

Veterans Health Administration

1. COVERAGE. Following are the overall requirements for appointment as an optometrist in VHA.

2. SECTION A. BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Noncitizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. Education. Degree of doctor of optometry resulting from a course of education in optometry. The degree must have been obtained from one of the schools or colleges approved by the Secretary of Veterans Affairs for the year in which the course of study was completed. Approved schools are:

      (1) United States and Canadian schools or colleges of optometry listed as accredited by the Council on Optometric Education of the American Optometric Association, in the list published for the year in which the course of study was completed.

      (2) Schools (including foreign schools) accepted by the licensing body of a State, Territory, or Commonwealth of the United States, or in the District of Columbia as qualifying for full or unrestricted licensure.

   c. Licensure or Registration

      (1) Optometrist (Except Residents). Licensed to practice optometry in a State, Territory, or Commonwealth of the United States, or in the District of Columbia. Optometrists are required to possess full and unrestricted licensure and to maintain a current registration in their State of licensure if this is a requirement of the particular State. The facility Director may waive this requirement if the optometrist is to serve in a country other than the United States and the optometrist has licensure in that country.

      (2) Residents. Licensure in a State, Territory, or Commonwealth of the United States, or in the District of Columbia before completion of the first year of VA residency. Unlicensed residents must meet any registration or other equivalent requirements established for optometric residents of non-VA facilities or optometry clinics with which the VA facility is affiliated for training purposes during the first year of VA residency.

      (3) Impaired Licensure. An optometrist who has, or has ever had, any license(s) revoked, suspended, denied, restricted, limited, or issued/placed on a probationary status may be appointed only in accordance with the provisions of chapter 3, section B, paragraph 14, this part.

NOTE: Licensure may be waived by the Under Secretary for Health or designee in Central Office, for individuals in research or academic assignments involving no direct patient care in accordance with current regulations.

e. **English Language Proficiency.** Optometrists appointed to direct patient-care positions must be proficient in spoken and written English as required by 38 U.S.C. 7402(d), and 7407(d).

3. **SECTION B. GRADE REQUIREMENTS.** In addition to the basic requirements stated above, the following qualifications criteria must be met in determining the appropriate grade assignment of candidates.

a. **Associate Grade.** None beyond the basic requirements.

b. **Full Grade.** Two years of optometric practice or its equivalent. One year of approved residency training or its creditable equivalent acceptable to the Council on Optometric Education of the American Optometric Association is acceptable in lieu of the 2 years of practice. Candidate must have demonstrated the professional competence and performance necessary to provide independently the full range of clinical optometric diagnosis and treatment for all the most prevalent types of vision dysfunctions and the detection and referral of patients with ocular disease or ocular manifestations of systemic disease.

c. **Intermediate Grade.** Meets the requirements in paragraphs (1), (2), and (3) below:

   (1) Four years of optometric practice or its equivalent. One year of approved residency training or its creditable equivalent acceptable to the Council on Optometric Education of the American Optometric Association is acceptable in lieu of 2 years of practice.

   (2) The optometrist at this level has successfully passed the examinations of the National Board of Examiners in Optometry and has attained either of the following:

      (a) The stature that would warrant appointment at the clinical instructor or higher level at a school or college of optometry.

      (b) The professional ability and personal attributes which have merited significant recognition by a recognized professional organization, such as election to a Fellowship in the American Academy of Optometry.

   (3) Has achieved a high level of professional attainment as illustrated by one or more of the following examples:

      (a) Is a recognized expert in the diagnosis and treatment of unusual and complicated visual dysfunctions. Typically, in this capacity serves as a consultant to optometrist and other professionals in other health facilities or provides expert clinical services in such areas as the partially sighted or contact lenses for aphasics.

      (b) Has assumed responsibility for a multi-faceted optometric program including clinical research and/or training requiring a high degree of competence and skill in developing innovative and new and
advanced instrumentation and treatment techniques. Typically, the program is in an educationally affiliated health care facility having an optometric training program of moderate scope involving liaison with other medical services and affiliated schools.

(c) Has played a significant part in the conduct of vision research in a problem area of considerable scope and complexity which required novel approaches and which resulted in answers to important questions or important changes in existing methods and techniques. Publications authored by the optometrist are of considerable value to others in the individual’s field. Typically, overall contributions are recognized by serving on important committees or other bodies in the profession.

(d) Has had full responsibility for carrying out an optometric training program of significant size in which the optometrist has been responsible for maintaining liaison with the affiliated school and other educational institutions and professional or scientific organizations. Innovative approaches in development of curriculum and course content and in expanding and improving the educational program have been displayed by the individual.

d. **Senior Grade.** Meets the requirements for Intermediate grade and the requirements in paragraphs (1) and (2) below:

(1) The optometrist at this level possesses such academic stature as would warrant a faculty appointment of a professional level in an approved school or college of optometry.

(2) Has demonstrated recognized superior professional attainment as evidenced by one or more of the following examples:

(a) Has served as a team leader in attacking major optometric problems affecting the continued provision of quality care health services at a VISN, statewide, or national level. There is such confidence in the optometrist at this level that there is unusual support of the individual’s recommendations and conclusions.

(b) Has had responsibility for carrying out a major optometric program segment on a national level.

(c) Has conducted high level studies in a difficult area of vision research which has contributed to a substantial advance in the health field, with important professional publications.

e. **Chief Grade.** Meets the requirements for Senior grade and must demonstrate a sustained very high level of professional performance with evidence of exceptional professional and/or administrative development by the following:

(1) Has assumed substantial professional and/or administrative responsibilities in which the individual is expected to fully advise and make professional clinical and educational recommendations as to courses of action on problems and considerations of national scope in all areas of optometry. Typically, the optometrist at this level has had responsibility for a major optometric program segment on a nationwide basis and has been consistently called upon to represent the organization in an authoritative manner in matters dealing with development of new and/or revised concepts and programs having a major impact upon the academic, medical, and optometric communities.
(2) Outstanding professional attainment. Examples of such attainment are:

(a) Achievement of outstanding results in research which are regarded as having a major impact on advancing the field.

(b) Significant number of noteworthy publications in professional journals.

f. Optometric House Staff

(1) Residents (General Practice). Meet requirements specified in section A.

(2) Residents (Specialty). Meet requirements specified in section A. In addition, must have completed at least 1 year of graduate level training in the health or other clinically related sciences or a suitable equivalent period of training, or (2) a general practice residency approved by the Council on Optometric Education of the American Optometric Association.

g. Attendings

(1) Meet all basic requirements specified in section A of this appendix.

(2) Possess a demonstrated satisfactory ability in optometry; be capable of assisting in maintaining accepted standards of professional optometric care in VA facilities; and be capable of accepting full responsibility for such proper care and treatment of their assigned patients.

(3) Be an outstanding member of the local optometry community of the caliber of a faculty member. Where the attending does not hold a faculty appointment at an affiliated optometry or other appropriate affiliated school or college, this would be evidenced by recommendation of the Deans Committee or equivalent body. The attending is capable of giving adequate training to optometric residents or students in facilities conducting residency and/or training programs and be sufficiently qualified so as to be capable to appropriate review committees for the direction of training.

h. Consultants

(1) Meet all basic requirements specified in section A of this appendix.

(2) Possess truly outstanding professional clinical ability in optometry; be capable of affording the facility Director and appropriate Chief of Service the benefits of their professional experience and counsel; and be capable of rendering such professional optometric services as may be required in maintaining the highest possible level of medical care in VA facilities.

(3) Be capable, when applicable, to serve as the didactic representatives of optometric or other appropriate affiliated schools or colleges and to accept responsibility for, and direction of, the educational training of optometric residents or students (if present) in their specialty in which they serve as the consultant at facilities conducting residency and student training programs. Consultants not holding faculty appointments at an affiliated optometry or other appropriate school or college should
possess the equivalent professional qualifications as evidenced by an appropriate recommendation for appointment from the Deans Committee or equivalent body responsible for the recommendation of consultant appointments to the facility.

4. SECTION C. DEVIATION. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for optometrists whose composite record of accomplishments, performance, and qualifications warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

Authority: 38 U.S.C. 7304; 7402.
APPENDIX G6. NURSE QUALIFICATION STANDARD

Veterans Health Administration

1. SECTION A. COVERAGE

a. Appointments

   (1) Effective December 10, 1999, individuals appointed to VHA RN positions will be subject to all qualification requirements stated in section B of this Qualification Standard. These requirements apply to:

      (a) Individuals not on VA rolls;

      (b) VA employees in other positions who are appointed or reappointed as RNs; and

      (c) RNs who have had a break in service of more than one year who are subsequently considered for the same or different RN position.

   (2) RNs who are reappointed to VA after a break in service of one year or less, are not considered to have had a break in service for purposes of applying all the qualification requirements effective on and after October 1, 2005.

   (3) Employees separated due to work-related injuries, or restored based on military service are not considered to have had a break in service for purposes of applying all the qualification requirements in this Nurse Qualification Standard, provided the employee is reappointed within 1 year of becoming eligible for reappointment.

b. Promotions and Advancements

   (1) RNs covered by this Qualification Standard who are eligible for promotion consideration shall be considered for promotion and advancement under the procedures in chapter 4 of part III, this Handbook.

   [(2)] Effective October 1, 2005, all VA RNs will be considered for promotion and advancement based solely on the criteria in section B of this Standard.

   [(3)] RNs appointed before December 10, 1999, who maintain continuous employment in VHA as a RN will not be reduced in grade based on application of this Standard.

   [(4)] The Under Secretary for Health or designee is authorized to act upon requests for promotion reconsideration for RNs.

c. Periodic Step Increases. RNs appointed before December 10, 1999, will not be denied a periodic step increase on the basis of not meeting the educational requirements specified in section B of this Qualification Standard for their current grade.
2. SECTION B. NURSE QUALIFICATION STANDARD

   a. Basic Requirements

      (1) Citizenship. Citizen of the United States. (Noncitizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

      (2) Graduation from School of Nursing

         (a) Graduate of a school of professional nursing approved by the appropriate State agency, and accredited by one of the following accrediting bodies at the time the program was completed by the applicant. [NOTE: See exception in subparagraph (b) below for candidates who are enrolled in a MSN Bridge Program.]

            1. The National League for Nursing Accrediting Commission (NLNAC), an accrediting arm of the National League for Nursing located at 61 Broadway, 33rd Floor, New York, New York 10006 or call (800) 669-1656 extension 153. The NLNAC accredits all levels of nursing programs. Additional information may be obtained from the NLNAC web site; or

            2. The Commission on Collegiate Nursing Education (CCNE), an accrediting arm of the American Association of Colleges of Nursing (AACN). The CCNE accredits bachelors and masters degree programs, and is located at One Dupont Circle N.W., Suite 530, Washington, DC 20036 or call (202) 463-6930. Additional information may be obtained from the CCNE web site.

         (b) [The completion of coursework equivalent to a nursing degree in a MSN Bridge Program that qualifies for professional nursing registration constitutes the completion of an approved course of study of professional nursing. In these programs, students are given a certificate of professional nursing to sit for the NCLEX and should submit this certification to VA prior to appointment. Students do not earn a BSN, but receive a MSN degree upon completion of course work. A copy of the MSN transcript must be provided to VA. Bridge programs that confer a master’s degree also fully meet the education requirement, even though a Bachelor’s Degree is not awarded.]

         (c) In cases of graduates of foreign schools of professional nursing, possession of current, full, active, and unrestricted registration (see paragraph 2a(3)) will meet the requirement of graduation from an approved school of professional nursing.

NOTE: Most individuals admitted as permanent residents or adjusting to permanent resident status as registered nurses on or after December 14, 1998, for the purpose of working as a registered nurse, must meet the certification requirements in Section 343 of the Illegal Immigration Reform and Immigrant Responsibility Act (Pub. L. 104-208, September 30, 1996). This certification involves a review of the alien’s education, training, license(s), and experience, verification that the alien possess an acceptable level of competence in written and oral English, and a requirement that the individual has passed either the Commission on Graduates of Foreign Nursing Schools (CGFNS) Qualifying Examination or the National Council of State Boards of Nursing, Inc. examination, the NCLEX-RN. For additional information see Pub. L. 104-208, 63 Federal Register 55007-55012, dated October 14, 1998, and the CGFNS web site.
(3) **Registration**

(a) **Condition of Employment.** A registered nurse (RN) will have a current, full, active and unrestricted registration as a graduate professional nurse in a State, Territory, or Commonwealth (i.e., Puerto Rico) of the U.S. or in the District of Columbia. The appointing official may waive this registration if the RN is to serve in a country other than the U.S. and the RN has registration in that country (e.g., Philippines). *The RN must maintain a current, full, active and unrestricted registration to continue employment with VA.*

(b) **Impaired Registration.** An impaired registration is any registration(s) revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status. A registered nurse who has or ever had any such impairment to their registration as listed above may be appointed only in accordance with the provisions of chapter 3, section B, paragraph 15 of this part.

(4) **Physical Standards.** See VA Directive and Handbook 5019.

(5) **English Language Proficiency.** RNs appointed to direct patient care positions must be proficient in spoken and written English as required by 38 U.S.C. 7402(d) and 7407(d).

(6) **Nurse Practitioners and Clinical Nurse Specialists.** On and after [March 17, 2009], registered nurses appointed or otherwise moving into these assignments must meet and maintain the following additional qualifications. This includes employees appointed before [March 17, 2009], who obtain such qualifications on or after [March 17, 2009].

(a) **Nurse Practitioners.** A nurse practitioner must be licensed or otherwise recognized as a nurse practitioner in a State, possess a master’s degree from a program accredited by the NLNAC or CCNE, and maintain full and current certification as a nurse practitioner from the American Nurses Association or another nationally recognized certifying body. [The certification must be in the specialty to which the individual is being appointed or selected.]

(b) **Clinical Nurse Specialists.** A clinical nurse specialist must possess a Masters degree from an academic program accredited by the NLNAC or CCNE [and maintain full and current certification as a clinical nurse specialist from the American Nurses Association or another nationally recognized certifying body. The certification must be in the specialty to which the individual is being appointed or selected.]

(c) **Prescriptive Authority.** This handbook does not address any additional requirements that nurse practitioners and clinical nurse specialists must meet before they are granted prescriptive authority.

b. **Definitions**

(1) **Successful Nursing Practice.** Documented evidence of experience as an RN that is determined to be sustained and consistently at or above an acceptable level of quality. This may include experience as a Graduate Nurse Technician (GNT) provided the candidate was utilized as a professional nurse and passed the State licensing (board) examination on the first attempt, and experience as a Nurse Technician Pending Graduation provided the candidate possessed an active, current registration to
practice nursing in a State and was utilized as a professional nurse (See chapter 3, section G, paragraph 5, this part). It may also include performance as a VA registered nurse that is at or above the fully satisfactory level. Professional nursing experience should be documented on the Proficiency Report, VA Form 10-2623, the VA Form 10-2850a, Application for Employment – Nurses and Nurse Anesthetists, or on a candidate’s resume.

(2) **Length of Nursing Practice (Experience)**. The amount of time documented on VA Form 10-2850a or on a candidate’s resume. (A performance evaluation or reference covering the candidate’s most recent employment as a RN is essential.) Part-time experience as a RN is credited according to the relationship it bears to the full-time workweek. For example, a RN who worked 20 hours a week (i.e., on a half-time basis) would receive one full-time workweek of credit for each 2 weeks of such service.

(3) **Length of LPN Practice (Experience)**. LPN experience may be counted towards successful nursing practice for an RN at the rate of ½ credit as compared to full credit for RN experience. The amount of time that may be credited toward RN experience may not exceed 5 years. For example, LPN experience would be counted as one full-time workweek of credit for each 2 weeks of such service. (A performance evaluation or reference covering the candidate’s most recent employment as an LPN is essential.)

(4) **Degree in a Related Field**. Baccalaureate and graduate degrees in fields related to nursing from a college or university which was accredited by the state at the time the candidate completed the program. Information on accredited colleges and universities is contained in Accredited Institutions of Post-secondary Education, published annually by the American Council on Education, One Dupont Circle NW, Washington, DC 20036 or call (202) 939-9300. Information can be obtained from the [ACE web site](http://www.aceweb.org).

(5) **Level Within a Grade**. The Locality Pay System (LPS) recognizes that some employees at the Nurse I grade have higher qualifications assignments than other employees within the same grade. The qualification requirements for attainment of a higher level within the Nurse I grade are contained in [paragraph c], Grade Determinations, below.

(6) **Four Dimensions of Nursing**

**(a)** The Four Dimensions of Nursing are:

1. Practice
2. Professional Development
3. Collaboration
4. Scientific Inquiry

**(b)** Within the Four Dimensions of Nursing, nine criteria define the performance requirements for RNs at each grade and/or level in the Nurse Qualification Standard. These requirements listed below, are based on the American Nurses Association (ANA) Standards of Care and Standards of Professional Performance.
[1.] **Practice.** Extent to which the RN effectively uses the nursing process components of assessment, diagnosis, outcome identification, planning, implementation, and evaluation in varied practice settings.

[2.] **Quality of Care.** Extent to which the RN systematically evaluates and improves the quality and effectiveness of nursing practice and health care delivery.

[3.] **Performance.** Extent to which the RN evaluates his/her own nursing practice as well as the performance of others.

[4.] **Education/Career Development.** Extent to which the RN acquires and uses current knowledge for self and others.

[5.] **Collegiality.** Extent to which the RN contributes to the professional development of peers, colleagues, and others.

[6.] **Ethics.** Extent to which the RN makes decisions and takes action in an ethical manner.

[7.] **Collaboration.** Extent to which the RN collaborates with clients, significant others, and other health care and service providers.

[8.] **Research.** Extent to which the RN uses research in practice.

[9.] **Resource Utilization.** Extent to which the RN considers factors related to safety, effectiveness, and cost in planning and delivering care.

(c) The above criteria are conceptualized within the Four Dimensions of Nursing as follows:

1. Practice (Practice, Ethics, Resource Utilization)
2. Professional Development (Education/Career Development, Performance)
3. Collaboration (Collaboration, Collegiality)
4. Scientific Inquiry (Quality of Care, Research)

(d) Four career paths have been established to help guide the professional nurse toward a more comprehensive use of the qualification standards throughout their professional career. Nurses follow the career path that appropriately aligns with their functional statement. Opportunities exist to move between the career paths as the individual shifts among the diverse nursing roles. Movement among the career paths is a fluid and seamless transition as the individual assumes new roles during their career progression. The paths are as follows:

1. Clinical (Direct Care Nurse, Clinical Nurse Leader)
2. Advanced Practice (Clinical Nurse Specialist, Advanced Practice Nurse)
3. Consultant (Quality Manager, Recruiter, Educator, Researcher, Informatics, Infectious Disease)

4. Supervisory (Nurse Manager, Shift Supervisor)

c. **Grade Determinations.** In addition to the Basic Requirements specified in paragraph a above, the following criteria must be met in determining the grade assignment of candidates, and if appropriate, the level within a grade. With regard to the "dimension" requirements, the requirements for all "dimensions" at a particular grade/level must be met in order for a RN to be qualified at that particular grade/level.
(1) Nurse I Level 1

Scope: Delivers fundamental, knowledge-based care to assigned clients while developing technical competencies.

<table>
<thead>
<tr>
<th>EDUCATION</th>
<th>EXPERIENCE</th>

</tr>
</thead>
<tbody>
<tr>
<td>Associate Degree or Diploma in Nursing</td>
<td>None</td>
<td><strong>PRACTICE</strong></td>
</tr>
</tbody>
</table>

1. **Practice**: Uses the nursing process (assessment, diagnosis, outcome identification, planning, implementation, and evaluation). Accurately documents care of clients.

2. **Ethics**: Safeguards client privacy and confidentiality. Provides care in a non-judgmental, non-discriminatory manner, respecting the values and belief of members of all cultures.

3. **Resource Utilization**: Provides care in a safe and cost-effective manner.

**PROFESSIONAL DEVELOPMENT**

1. **Performance**: Participates in appraisal of own performance.

2. **Education/Career Development**: Seeks opportunities to acquire and develop basic skills.

**COLLABORATION**

1. **Collegiality**: Establishes professional relationships with peers. Seeks out colleagues for mutual information exchange.

2. **Collaboration**: Communicates with clients and other healthcare providers regarding client care.

**SCIENTIFIC INQUIRY**

1. **Quality of Care**: Describes the quality improvement process, roles and responsibilities, and identifies quality improvement activities on the unit.

2. **Research**: Assists in identifying problem areas in nursing practice.

**NOTE**: As used in this and subsequent tables, “Experience” refers to total years of successful nursing practice rather than experience at current grade level.
(2) Nurse I Level 2

Scope: Demonstrates integration of biopsychosocial concepts, cognitive skills, and technically competent practice in providing care to clients with basic or complex needs.

</table>
NOTE: Nurse III must demonstrate performance and leadership that is broad enough to improve the care for a group of patients. The Nurse III is responsible for the documented outcomes at the program or service level. Program or service level outcomes must be broad and complex and can be demonstrated at any organizational level within a facility, VISN, or VACO.

In order to be considered for appointment or promotion to Nurse III, outcomes must be documented. Meeting the Practice dimension involves incorporating and implementing the requirements of the other qualification standards, including:

(a) Leading and organizing delivery of care to assure continuity of care and peer accountability for practice, including access to care and discharge planning.

(b) Using advanced clinical knowledge/judgment to promote staff involvement in planning, decision-making and evaluating outcomes.

(c) Functioning as an expert in clinical practice and/or in areas related to the assigned roles and responsibilities.

(d) Systematically evaluating current practice, and formulating outcomes for groups of patients and/or organizational processes within area of expertise.

(e) Guiding, developing and supporting staff from a leadership perspective.

(f) Using professional standards of care, scientific evidence and practice to evaluate programs and/or service activities.
(6) **Nurse IV**

**Scope:** Executes leadership that is characterized by substantial and continuous responsibility and accountability for population groups or integrated programs that cross service and/or discipline lines and influence organizational mission and health care.

**PROFESSIONAL DEVELOPMENT**

1. **Education/Career Development:** Mentors others in executive leadership positions. Forecasts knowledge needs for complex multi-system change

2. **Performance:** Develops policy related to professional practice and relevant statutes and regulations on community, regional, and/or national levels.

**COLLABORATION**

1. **Collaboration:** Collaborates with other executives for strategic planning, decision-making, and problem solving about health care services and organizational priorities.

2. **Collegiality:** Serves as an expert to communicate nursing and health care trends and issues at the local, regional, state, and/or national level.

**SCIENTIFIC INQUIRY**

1. **Quality of Care:** Improves the quality and effectiveness of the facility’s overall health care program by providing leadership, coordinating, and facilitating the evaluation and improvement of a wide range of programs. Excellence is reflected in improved client outcomes and organizational performance.

2. **Research:** Promotes an environment that supports the conduct and utilization of research in practice and a spirit of inquiry.
d. Deviations

(1) **Waiver of NLNAC or CCNE Accreditation Requirement.** The approving official may authorize a waiver of the requirement for NLNAC or CCNE accreditation of any degree in nursing provided the college or university has regional accreditation or was State approved at the time of the candidate’s graduation and the composite qualifications of the applicant warrant such consideration. Waivers at the doctoral level are not required; however, the program must be regionally accredited at the time of the candidate’s graduation.

(2) **Waiver of Experience and/or Degree Requirements.** The approving official may authorize a waiver of experience and/or the degree requirements for individuals whose professional accomplishments, performance, and qualifications warrant such consideration based on demonstrated ability to meet the requirements for promotion to the next higher grade or advancement to a higher level within the grade. Waivers of degree requirements are not authorized for appointments. Waivers of degree requirements are also not authorized for Nurse IV and Nurse V.

**[NOTE: An RN is eligible for a waiver of one degree only. Waivers of two degrees are not authorized. Once an employee has obtained the degree that was initially waived they may be considered for waiver of another degree. For example: An Associate Degree prepared nurse receives an educational waiver of the bachelor’s degree for promotion to Nurse II. The nurse then earns a bachelor’s degree and is seeking promotion to Nurse III. If the nurse has met all of the dimension requirements as outlined in this qualification standard and all conditions for promotion are met in accordance with the qualification standard, an education waiver of the Master’s degree would be considered.]**

[ ]
APPENDIX G7. NURSE ANESTHETIST QUALIFICATION STANDARD
Veterans Health Administration

1. COVERAGE. Following are the overall requirements for appointment as a nurse anesthetist in the Veterans Health Administration (VHA).

2. SECTION A: BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit for qualified citizens in accordance with chapter 3, section A, paragraph 3g, of this part.)

   b. Education

      (1) A degree in nursing from a school of professional nursing approved by the appropriate state-accrediting agency and accredited by one of the following accrediting bodies at the time the program was completed by the applicant:

         (a) The National League for Nursing Accrediting Commission (NLNAC), an accrediting arm of the National League for Nursing located at 61 Broadway, 33rd Floor, New York, New York 10006. Additional information may be obtained from the NLNAC Web site; or

         (b) The Commission on Collegiate Nursing Education (CCNE), an accrediting arm of the American Association of Colleges of Nursing (AACN). The CCNE accredits bachelor’s and master’s degree programs and is located at One Dupont Circle, N.W., Suite 530, Washington, DC 20036. Additional information may be obtained from the CCNE Web site.

         (c) In cases of graduates of foreign schools of professional nursing, possession of a current, full, and unrestricted registration (see basic requirement in subparagraph c below) and the possession of a Certificate from the Commission on Graduates of Foreign Nursing Schools (CGFNS) will meet the requirement of graduation from an approved school of professional nursing.

      (2) Graduate of an accredited nurse anesthesia educational program approved by the American Association of Nurse Anesthetists (AANA) at the time the program was completed by the applicant. The AANA has compiled current listings of approved training institutions, which are published annually in the December issue of the American Association of Nurse Anesthetists Journal. The American Hospital Association in their “Guide to the Health Care Field” also publishes listings of approved training institutions annually in August.

   c. Registration

      (1) Condition of Employment. Current, full, active and unrestricted registration as a graduate professional nurse in a State, Territory or Commonwealth (i.e., Puerto Rico) of the United States or the District of Columbia. The nurse anesthetist must maintain a current, full, active and unrestricted registration to continue employment with VA. The appointing official may waive this requirement if the nurse anesthetist is to serve in a country other than the United States and has registration in that country (e.g. Philippines).
(2) **Impaired Registration.** A nurse anesthetist who has, or has ever had, any registration(s) revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions of chapter 3, section B, paragraph 15 of this part.

d. **Certification**

(1) On and after May 4, 1993, certification by the Council on Certification of Nurse Anesthetists is a requirement for employment. This requirement does not apply to non-certified nurse anesthetists employed by VA as a nurse anesthetist prior to May 4, 1993 and continuously thereafter. Any nurse anesthetist who leaves VA employment or vacates the nurse anesthetist occupation for another VA position, must meet the current requirement of certification for re-appointment as a nurse anesthetist. The CCNA and the Council on Recertification of Nurse Anesthetists have designated the AANA’s web site as a display agent for their information.

(2) Nurse Anesthetists will maintain recertification by meeting the Council on Recertification of Nurse Anesthetist’s requirements as a condition of employment.

e. **Loss of Credential.** An employee in this occupation who fails to maintain the required licensure/certification/registration must be removed from the occupation, which may also result in termination of employment (see VA Handbook 5005, part II, chapter 3, paragraph 17). An employee who fails to maintain the CCNA certification may, at the discretion of the appointing official, be reassigned to another occupation (i.e. staff RN) for which he/she qualifies, if a placement opportunity exists.

f. **Grandfathering Provision.** All nurse anesthetists employed in VHA on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. Nurse anesthetists who are grandfathered under the provisions of this subparagraph may be reassigned, promoted up to and including the full performance (journey) level (Nurse III), but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

g. **Recent Graduates**

(1) A graduate nurse anesthetist who has applied to take the national Certification Examination and has been declared Certification Eligible may be given a temporary appointment for a period not to exceed one year as a graduate nurse anesthetist under the authority of 38 U.S.C. § 7405(a)(1)(D). The graduate nurse anesthetist must take the national Certification Examination at the earliest schedulable date following the date of their temporary appointment. At the time of appointment as a graduate nurse anesthetist, the Chief, Anesthesia Section or Service Chief/Product Line Manager will provide the graduate nurse anesthetist a copy of this section of the qualification standard and make clear the consequences for not becoming certified during the 1-year temporary appointment. Upon certification by the CCNA, the graduate nurse anesthetist will be converted to an appointment under 38 U.S.C. § 7401(1).
(2) Failure to become certified within the one year period will result in removal as a nurse anesthetist and may result in termination from employment.

i. English Language Proficiency. Nurse Anesthetists must be proficient in spoken and written English in accordance with chapter 2, section D, paragraph 5a, this part.

3. SECTION B. GRADE REQUIREMENTS

a. General

(1) Recency and Quality of Experience. Recency or quality of training and experience in anesthetic techniques should be carefully reviewed when determining the appropriate grade. To be creditable, experience must demonstrate possession of knowledge, skills and abilities related to the current practice of nurse anesthesia. The importance of specific types of experience or training may vary according to the intended assignment.

(2) Grades. The level that nurse anesthesia practice may be performed is based on a combination of education and experience. Beyond the minimum education requirements, grade determination upon appointment and advancement is dependent more on acquired knowledge, skills, and abilities than baseline education. As the nurse anesthetist acquires the knowledge and judgment that accrues with experience, the privilege of increased authority for patient care is expanded.

(3) Research. At any grade, nurse anesthetists may assist in or conduct approved research projects relative to anesthesia care that enhances their knowledge and skills in the profession.

b. Part-Time Experience. Part-time experience as a nurse anesthetist is credited according to the relationship to a full work week. For example, a nurse anesthetist employed 20 hours per week on a half-time basis would receive 1 full-time work week credit for 2 weeks of such service.

c. Grade Determination. In addition to the basic requirements stated above, the following qualification criteria must be met in determining the appropriate grade assignment of candidates:

(1) Entry Level: (Nurse II)

(a) Experience and Education. None beyond the basic requirements.

(b) Demonstrated Knowledge, Skills and Abilities. The following list of knowledge, skills and abilities present the minimum skill set expected of an Entry Level Nurse Anesthetist. Entry level into nurse anesthesia practice may include but are not limited to the following:

1. Ability to translate the principles of professional nursing practice in the care of assigned patients in order to provide appropriate care.
2. Ability to do a pre-anesthetic patient history and physical, which includes collecting pre-operative consults and data.

3. Ability to formulate an anesthetic plan and describe the anesthetic risks, benefits and options to the patient.

4. Ability to administer inhalation, regional, intravenous, local, and topical anesthetics and to detect unfavorable reactions in order to continuously evaluate the patient’s physical status.

5. Ability to respond to emergency situations by providing airway management, administration of emergency fluids and drugs, and using appropriate resuscitation procedures for patient care.

6. Ability to provide patient care that is abreast of changing concepts and advancements in the profession.

7. Ability to work effectively in an interdisciplinary environment for improvement of services for patient care.

8. Ability to practice nurse anesthesia with colleagues and peers utilizing a collaborative team concept of anesthesia care.

(2) **Full Performance Level: (Nurse III)**

(a) **Experience and Education.** In addition to meeting the requirements for Entry Level, the CRNA has had progressively responsible experience in the administration of anesthetics as indicated in the knowledge, skills and abilities listed below. These individuals must demonstrate the ability to participate in a program for nurse anesthesia care and demonstrate knowledge of anesthetizing locations, methods, equipment and procedures. At this level, the CRNA has experience in the administration of anesthetics that has demonstrated the nurse anesthetist’s ability to participate in team programs that are technically challenging and/or complicated. Typically candidates can demonstrate the knowledge, skills and abilities of Full Performance Level within 2 years from entering the occupation.

(b) **Demonstrated Knowledge, Skills, and Abilities.** Full Performance Level practice in nurse anesthesia includes but is not limited to the following:

1. Skill in conducting and managing anesthesia for a broad range of complex surgical procedures. In addition, the CRNA must be able to adapt/modify anesthesia techniques in order to optimize patient care.

2. Ability to complete work assignments selected to add depth and breadth to their technical knowledge and skill competence. Work assignments will vary at each facility depending on the progressive acuity required for anesthesia care.

3. Ability to respond to emergency situations by providing airway management, administration of emergency fluids and drugs, and by the use of basic or advanced cardiac life support techniques in order to perform necessary resuscitation procedures.
4. Ability to effectively blend technology, skills, and competency for the advancement of anesthesia techniques, pharmacology, and equipment.

5. Ability to apply new developments and theories to develop and demonstrate the ability to recognize and solve various complex anesthesia situations.

6. Ability to practice nurse anesthesia with colleagues and peers in a team concept of anesthesia care and blend management skills with technical experience.

7. Ability to recognize clinical and technical aspects of anesthesia care and has in-depth knowledge of anesthesia methods and techniques for the practice of anesthesia.

8. Ability to perform as a mentor, preceptor, or nurse educator providing didactic and clinical instruction for graduate-level nurse anesthesia students and/or other anesthesia care providers.

9. Ability to participate in the development of anesthesia patient care audit processes involving in depth review and analysis of anesthesia records.

10. Ability to provide guidance and instruction in preparing others for positions of leadership and ethical practices which impact patient care.

(3) Chief/Educator Level: (Nurse IV)

(a) Specific Assignment: Chief Nurse Anesthetist/Administrative Nurse Anesthetist

1. Experience or Education. At this level, emphasis is placed on strategic planning and administrative/managerial responsibilities. The Chief Nurse Anesthetist/Administrative Nurse Anesthetist makes recommendations that may significantly affect the content, interpretation, or development of VA policies or programs concerning critical matters or major issues within the anesthesia arena. They are assigned positions/studies where limited guidance exists as to the method of evaluation for the potential experience identified or, where possible, new experiences need to be identified. Regularly provides anesthesia care in unusually extensive and complex surgical procedures that are of prolonged duration and involve high-risk patients, including development of individualized programs of post-op anesthesia care. A specific assigned Chief Nurse Anesthetist/Administrative Nurse Anesthetist may be a first line supervisor and/or have administrative responsibility for anesthesia staff. Individuals assigned to this level generally require approximately 5 years of progressively responsible leadership assignments in clinical, administrative, educational and/or research related to nurse anesthesia practice.

NOTE: The Deputy Director, National Anesthesia Service, is given the opportunity to comment on appointments of nurse anesthetists to Section Chief positions (see VA Handbook 5005, part II, appendix H6.)

2. Demonstrated Knowledge, Skills and Abilities. Nurse Anesthetists at this level must have the ability to perform long and short-term planning goals for their anesthesia department. Chief Nurse Anesthetist/Administrative Nurse Anesthetist functions may include, but are not limited to, the following:
a. Ability to perform scheduling and supervise staff, students, or ancillary personnel to include conducting performance evaluations in order to effectively execute responsibilities.

b. Knowledge to accept substantial and continuing responsibility and accountability for planning, organizing, directing, and controlling an integrated program.

c. Ability to serve on committee meetings, departmental reviews, problem-focused studies, problem solving, interventions, and process oversight in order to justify program goals and motivate assigned personnel.

d. Skill in design and management of budget and cost benefit analysis in order to ensure optimal stewardship of resources.

e. Ability to exercise independent judgment, perform tasks of unusual difficulty along special technical, supervisory, or administrative lines. These practitioners may develop protocols of anesthesia practice.

f. Ability to provide analytical techniques and problem solving related to drug interaction and pathological changes during the anesthesia course.

g. Ability to provide leadership in the application of the nursing process to patient care, organization processes and/or systems, improving outcomes at the program or service level.

h. Knowledge to participate in the audit of anesthesia care, recommending changes where indicated.

(b) Specific Assignment: Educator-Coordinator

1. General

a. The CRNA Educator-Coordinator coordinates an education program, Phase I (non-clinical) and/or Phase II (clinical), for nurse anesthesia students or health care trainees who rotate through the VA Healthcare System. This CRNA will have an academic appointment from an accredited school of nurse anesthesia.

b. Assignment to the Educator-Coordinator role must represent a significant commitment to the education of students, beyond the occasional preceptorship. The Educator-Coordinator must also demonstrate a commitment to in-service training for staff, and facility continuing education in order to provide accurate information to the population serviced.

c. The Educator-Coordinator must have administrative and technical responsibility for maintaining professional standards of practice in accordance with the Council on Accreditation of Nurse Anesthesia Educational Programs (COA). This may include development of the orientation programs for the students, journal club, scheduling, counseling and grading students, monitoring cases, assisting with research projects, coordinating with didactic instructors and clinical anesthesia staff for student progress.
d. The Educator-Coordinator must also assist and provide development opportunities for primary clinical instructors and other department members to maintain their skills and keep current with progressive technical knowledge.

2. Demonstrated Knowledge, Skills and Abilities

a. Ability to serve as interdepartmental liaison, interfacing with other departments such as nursing, surgery, PACU, outpatient surgery, admissions, administration, laboratory, pharmacy, etc., in order to incorporate the expertise of all disciplines in a comprehensive, integrated approach to care.

b. Knowledge to provide advice and assistance to other nurse anesthetists in unusually difficult or complex cases.

c. Ability to perform clinical and didactic teaching, commitment to in-service training for staff, and facility continuing education in order to provide accurate information to population serviced.

d. Ability to provide feedback to students, faculty and the Program Director in a timely fashion.

e. Skills for the development, implementation, evaluation and on-going updating of the clinical curriculum and evaluation.

f. Ability to administer, evaluate and provide sound statistical research, which may promote clinical and didactic evolution and expertise in the field of anesthesia.

g. Knowledge to implement educational strategies to meet changes, clinically, academically, and professionally, related to nurse anesthesia.

h. May chair or co-chair graduate level research in order to assist students in researching, reviewing/approving research proposal and finished product.

i. Knowledge to support and prepare for the program’s accreditation process by the COA of Nurse Anesthesia.

j. Ability to facilitate communication between students, faculty, and other site coordinators to oversee/manage the clinical education of students.

(4) Nurse V. For highly qualified candidates with program responsibilities which significantly exceed the minimum scope and complexity of those described for Nurse IV, the Under Secretary for Health or designee may approve assignment at Nurse V on a case-by-case basis. Typically, this assignment (i.e. Deputy Director, Anesthesia Service, VACO) will be restricted to individuals who are responsible for managing a national program.

4. DEVIATIONS

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for nurse anesthetists in VHA whose composite record of
accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the educational or credential requirements be waived.

c. The placement of individuals in assignments at the highest grade level described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. 7304; 7402]
APPENDIX G8. PHYSICIAN ASSISTANT QUALIFICATION STANDARD
[VN/AD]-0603
Veterans Health Administration

1. **COVERAGE.** The following are the requirements for appointment as a Physician Assistant (PA) in the Veterans Health Administration (VHA). [Within VHA, PAs practice with clinical oversight, consultation, and input by a designated collaborating physician.]

2. **BASIC REQUIREMENTS.**

   a. **Citizenship.** Citizen of the United States [in accordance with section 7402(c) to title 38, United States Code (U.S.C.). Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with 38 U.S.C. § 7407(a).]

   b. **Education.** [Graduate of a training program which is accredited by the Accreditation Review Commission on Education of PA (ARC-PA) or one of its predecessor organizations. Additionally, candidates must meet one of the following:

      (1) Master’s degree in any discipline;

      OR

      (2) Bachelor’s degree in any discipline with one year of experience as a PA.]

   c. **Certification.** [Must have successfully passed the PA National Certifying Exam (PANCE).

      NOTE: Current and continuous certification by the National Commission on Certification of Physician Assistants (NCCPA) is no longer required for employment in VHA. (See paragraph 3a in this standard for additional information regarding the certification requirement for employees grandfathered into the occupation.)

   d. **Licensure.** PAs must possess an active, current, full, and unrestricted license to practice in a State, Territory, or Commonwealth of the United States, or in the District of Columbia. PAs must maintain current registration in the State of licensure if this is a requirement for continuing active and current licensure in that State.

      (1) **Impaired Licensure.** A PA who has, or has ever had, any license(s) revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions of chapter 3, section B, paragraph 13 of this part.
(2) Exceptions for Graduate PAs.

(a) PAs who otherwise meet the basic requirements, but do not possess the required licensure, may be appointed, pending licensure, as a graduate PA on a temporary full-time appointment not-to-exceed two years under the authority of 38 U.S.C. § 7405(c)(2)(B).

(b) Graduate PAs may only be appointed at the entry grade level and may not be promoted/converted until certification is obtained.

(c) Temporary graduate PA appointments may not be extended beyond two years or converted to a new temporary appointment.

NOTE: Individuals who have or have had multiple licenses and had any such license revoked for professional misconduct, professional incompetence or substandard care, or who surrendered such license after receiving written notice of potential termination of such license by the State for professional misconduct, professional incompetence, or substandard care, are not eligible for appointment to the position unless such revoked or surrendered license is fully restored (38 U.S.C. § 7402(f)). This requirement does not apply to licensed PAs currently employed by VA as of November 30, 1999, provided they maintain continuous appointment and are not disqualified for employment by any subsequent revocations or voluntary surrenders of State license, registration or certification.

(3) Loss of Credentials. An employee in this occupation who fails to maintain the required licensure or NCCPA certification when required under paragraph 3a below must be removed from the occupation, which may result in termination of employment (VA Handbook 5005, part II, chapter 3, paragraph 17).

(4) Failure to Obtain Licensure. In all cases, graduate PAs must actively pursue and obtain required licensure from the date of their appointments. The human resources office will provide the unlicensed PA in writing the date by which the license must be acquired and the consequences for not becoming licensed by the deadline. The written notice must be provided prior to the first date of employment. Failure to obtain required credentials by the prescribed date will result in termination of employment.

f. English Language Proficiency. Candidates must be proficient in spoken and written English to be appointed as authorized by 38 U.S.C. § 7403(f).

3. GRANDFATHERING PROVISION. All persons employed in VHA in this occupational series that are also performing the duties as described in the qualification standard on the effective date of this qualification standard are considered to have met all qualification requirements for
the grade held including positive education and licensure/certification. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

a. If a PA is certified by the NCCPA, but not licensed on the effective date of the qualification standard, they are not required to obtain or maintain a license to remain employed in VHA. However, if they lose or fail to maintain their NCCPA certification after this qualification standard is effective and do not possess a full, valid, and unrestricted license, they are no longer qualified for employment as a PA in VHA.

b. PAs may be reassigned, promoted up to and including the full performance level, or demoted within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

c. If a PA who was retained under this provision leaves the occupation, the employee will lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

d. PAs initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification and meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

e. PAs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

4. DEFINITIONS.

a. Collaborating Physician. The collaborating physician is a designated (allopathic or osteopathic) physician who provides clinical oversight, consultation, and patient care management assistance to the assigned PA.

b. Part-Time Experience. Part-time experience as a PA is credited per the relationship to a full work week. For example, a PA is employed 20 hours per week on a half-time basis would receive one full-time work week credit for two weeks of such service.

5. GRADE REQUIREMENTS.

a. General.

(1) Recency and Quality of Experience. Recency or quality of training and experience as a PA should be carefully reviewed when determining the appropriate grade. To be creditable, experience must demonstrate possession of knowledge,
skills and abilities related to the current practice of a PA. The importance of specific types of experience or training may vary per the intended assignment.

(2) **Grades.** The level of PA practice may be performed based on a combination of education and experience. Beyond the minimum education requirements, grade determination upon appointment, and advancement is dependent more on acquired knowledge, skills, and abilities than baseline education. As the PA acquires the knowledge and judgment that accrues with experience, the privilege of increased authority for patient care maybe expanded.

(3) **Research.** At any grade, PAs may assist in or conduct approved research projects relative to PA care that enhances their knowledge and skills in the profession.

b. **Grade Determination.** In addition to the basic requirements stated above, the following qualification criteria must be met in determining the appropriate grade assignment of candidates:

(1) **Physician Assistant-I (PA-I)**

(a) **Experience and Education.** None beyond the basic requirements. This is the entry level for PAs.

(b) **Demonstrated Knowledge, Skills, and Abilities.** The following list of knowledge, skills, and abilities (KSA) present the minimum skill set expected of an Entry Level PA. This practice may include, but is not limited to:

i. Ability to utilize the principles of PA practice in the care of assigned patients to provide appropriate care.

ii. Ability to perform patient history and physical.

iii. Ability to formulate a plan and provide treatment to the patient.

iv. Ability to provide patient care that is abreast of changing concepts and advancements in the profession.

(2) **Physician Assistant-II (PA-II)**

(a) **Experience and Education.** The PA at this grade is at the intermediate grade level and has had progressively increasing responsibility and experiences as indicated in the KSAs listed below. Individuals will have demonstrated the ability to analyze and solve more complex medical problems than at the entry level grade and can utilize their training in the successful practice of patient care and participate in team problem solving. Individuals demonstrate the KSAs of PA-II intermediate level by:
(b) **Demonstrated Knowledge, Skills, and Abilities (KSAs).** PAs at this level are not required to meet each individual KSA listed below to qualify, but should be able to demonstrate, develop, or acquire those not met upon appointment for PA-II:

- **i.** Skills to analyze and solve complex medical problems.
- **ii.** Ability to function autonomously and make independent medical decisions.
- **iii.** Skill to incorporate training and experience into the successful practice of patient care including telehealth medical care.
- **iv.** Ability to work effectively in an interdisciplinary environment for improvement of services for patient care.
- **v.** Ability to practice with colleagues and peers collaboratively.

(3) **Physician Assistant-III (PA-III)**

(a) **Experience and Education.** PAs at the PA-III grade are at the full performance level and lead and organize patient care independently, practice within multi-disciplinary teams, and coordinate all aspects of patient care across the health care system. They utilize advanced clinical knowledge and judgment in decision-making and evaluating outcomes. They function as experts in clinical practice and/or in areas related to the assigned roles and responsibilities, may serve as mentors for transitioning PAs, and may provide training for health care students. Individuals can demonstrate the KSAs for the full performance level by:

- **i.** Three years of successful practice as a PA.

OR
ii. Successful completion of a PA post-graduate residency program sponsored by VHA Office of Academic Affiliations or other postgraduate residency programs accredited by VA, ARC-PA, U.S. Armed Forces, or another accrediting agency and one year of professional practice as a PA.

OR

iii. A doctoral degree in a health-related field from an accredited college or university recognized by the U.S. Department of Education and one year of professional practice as a PA.

(b) **Demonstrated Knowledge, Skills, and Abilities.** PAs at this level are not required to meet each individual KSA listed below to qualify, but should be able to demonstrate, develop, or acquire those not met upon appointment for PA-III:

i. Ability to clinically evaluate facility patient care delivery systems and validate or identify barriers to safe and effective patient care.

ii. Skill to consistently demonstrate an elevated level of expertise and autonomy in diagnosing and treating seriously ill, multi-symptomatic patients through facility Focused Professional Practice Evaluation (FPPE) and Ongoing Professional Practice Evaluation (OPPE).

iii. Ability to present clinical findings and recommendations to appropriate management officials.

iv. Ability to clinically facilitate the delivery of patient care in collaboration with health professionals, health managers, and other health care personnel.

v. Ability to implement and initiate clinical changes to established treatment protocols based upon new medical literature research findings to enhance patient delivery care for improved patient outcomes.

vi. Ability to participate clinically in the development of the PA patient care audit processes involving in-depth review and analysis of medical records.

(4) **Physician Assistant-IV (PA-IV).** Positions may include but are not limited to: Facility or Veterans Integrated Service Network (VISN) Lead PA, Facility PA Education Lead, PA Residency Program Director, or other Clinical and/or Administrative leadership assignments.

(a) **PA (Facility Lead).** Facility lead PAs have a thorough understanding of the various functions involved in the care of patients, and the ability to interact effectively with
different medical and surgical specialists, health care team members, and administrative staff. Facility lead PAs have the knowledge and expertise pertaining to PA employment, credentialing, clinical practice, and appropriate utilizations of PAs. A lead PA can monitor patient care operations, polices, and work performance of fellow PAs.

i. **Experience.** PA facility leads require five years of experience, which includes progressively responsible leadership assignments, such as serving on any local committees, workgroups, or taskforces. The PA may exhibit knowledge of PA VHA employment and utilization of PAs through demonstrative actions as a facility point of contact (POC) for PA issues, policies, and directives.

ii. **Demonstrated Knowledge, Skills, and Abilities.** PAs at this level are not required to meet each individual KSA listed below to qualify, but should be able to demonstrate, develop, or acquire those not met upon appointment for PA-IV:

   a. Ability to provide clinically and occupationally focused orientation to new PA appointees and mentoring other PA staff members.

   b. Knowledge of the FPPE and OPPE processes to evaluate and assess patient care services provided by PA staff.

   c. Knowledge of the educational needs of PAs.

   d. Ability to provide leadership and clinical oversight of PAs at the facility.

   e. Ability to exercise independent judgment, perform tasks involving special technical, supervisory, or administrative lines.

   f. Ability to communicate effectively with a diverse group of professional clinical staff.

(b) **PA (Facility Education Lead or Residency Program Director).** PA Facility Education Leads and PA Residency Program Directors are responsible for the management, structure, and administration of the PA clinical trainee program. They ensure programs comply with VA Office of Academic Affiliations standards and accrediting bodies of sponsoring affiliated institutions while activities are being held at VA facilities. PA Education Leads and PA Residency Program Directors develop, implement, and enhance PA clinical education training programs.

i. **Experience.** PA Facility Education Leads and PA Residency Program Directors require five years of experience, which include educational assignments, such as proctoring PAs or medical students, setting up continuing medical education for
local VHA PAs or participating in community health events; serving as a PA director or assistant in a VHA residency program or stipend program; or serving as a member or staff of an academic PA program.

ii. **Demonstrated Knowledge, Skills, and Abilities.** PAs at this level are not required to meet each individual KSA listed below to qualify, but should be able to demonstrate, develop, or acquire those not met upon appointment for PA-IV:

a. Ability to develop and update VA PA clinical rotation guidelines within each clinical specialty to ensure students and preceptors understand the responsibilities prior to and upon completion of each clinical rotation.

b. Skills to maintain student evaluations and oversee changes that facilitate continuous enhancements and improvements of PA trainee clinical experiences.

c. Ability to give quality systematic feedback to the practitioner within a broad range of medical and surgical experiences that meets ARC-PA and affiliated institutional standards.

d. Ability to support trainees to allow open and ongoing feedback regarding collaborating practitioner, the training program, and VA site as a method of continuous improvement.

e. Skill to properly record and maintain established affiliation agreements and subsequent supporting documents required for VA clinical training programs.

f. Skill to maintain close relationships and open and ongoing communication with academic affiliates PA program directors and clinical coordinators participating in the PA trainee program.

(c) **PA (Clinical Leader/Administrative Leader).** PAs at the PA-IV grade level may serve as clinical leader or administrative leader. Clinical PA Leaders may be assigned to positions/studies where limited guidance exists as physician oversight is not required. Administrative PA Leaders are involved with strategic planning and administrative/managerial responsibilities for integrated programs that cross service and/or discipline lines and influence organizational mission and health care. A PA clinical leader/administrative leader may monitor or evaluate services or programs with interaction of senior administration.

i. **Experience.** PA clinical leaders/administrative leaders require five years of experience which included leadership assignments that involved formulating program objectives and priorities, implementing plans and practices, and
interpreting regulatory and organizational guidance to develop and implement policies and/or procedures.

ii. **Demonstrated Knowledge, Skills, and Abilities.** PAs at this level are not required to meet each individual KSA listed below to qualify, but should be able to demonstrate, develop, or acquire those not met upon appointment for PA-IV:

a. Ability to assess information and make recommendations that may significantly affect the content, interpretation, or development of programs concerning critical matters or key issues within the health care system.

b. Ability to schedule and supervise staff, students, or ancillary personnel, to include conducting performance evaluations.

c. Skill in planning, organizing, directing, and controlling an integrated program.

d. Skill in design, management of budget, and cost benefit analysis to ensure optimal stewardship of resources.

e. Ability to analyze complex medical care, organizational processes and/or systems, and develop and implement solutions that improve outcomes at the program or service level.

f. Ability to develop and recommend new or revised policies or procedures to justify program goals and motivate assigned personnel.

(5) **Physician Assistant-V (PA-V).** PA positions at this grade may include but are not limited to: VISN or VHA Central Office (VHACO) leadership or administrative positions that involve a high level of strategic planning of programs that cross integrated service lines and/or disciplines.

(a) **PA (VISN).** VISN PAs manage one or more large, complex patient care or administrative programs across one or more VISNs. They have full responsibility for the program(s) and significantly influence overall functioning of the program(s) throughout the VISN(s). They provide leadership, direction, and guidance on all aspects of the program(s). They coordinate with network and facility executives in developing and establishing the long and short-range organizational goals for the program(s), ensuring organizational goals and policies are aligned with VISN and national goals. PAs provide direct oversight to program operations at multiple sites across the VISN(s). They evaluate, develop, coordinate, implement, and improve program operations within the VISN(s). They manage the overall budget for the program VISN-wide, to include determining resource needs, allocating resources, and ensuring proper utilization in productivity, efficiency and cost effectiveness of operations. PAs may manage and supervise a large number of employees in
different disciplines and areas at multiple locations/facilities. They have full responsibility for clinical practice, program management, education, and human resources management of the employees. They establish and maintain effective relationships with all levels of medical center/network personnel service leaders at the facility and network levels. They interpret and apply national policy, as well as, develop VISN-wide supplemental guidance regarding the program(s). PAs assist medical center/network staff to carry out the functions and activities expected of them. They assist in policy-making activities and the overall functioning of administrative and clinical programs. They collaborate with other staff to establish and maintain programs that cross service and/or discipline lines and influence organizational mission and health care, as well as, investigate and solve issues or situations impacting health care services. They conduct and analyze studies and projects fundamental to planning, programming, and budgeting. They utilize forecasts of technological changes, utilization patterns, future workloads, staffing projection and cost comparisons to provide feedback and recommendations to VISN Leadership that reflects current standards and expectations provided by VHACO.

i. **Experience.** VISN PAs at this level require six years of experience that included assignments that involved directing and evaluating complex patient care or administrative programs, services or operations for a healthcare system or at multiple sites. The assignments would have required planning, organizing and assessing healthcare services or programs; implementing national initiative and organizational targets; developing long and short-term program goals, and analyzing, developing options and implementing solutions to health care operational or administrative problems.

ii. **Demonstrated Knowledge, Skills, and Abilities.** VISN PAs at this level are not required to meet each individual KSA listed below to qualify, but should be able to demonstrate, develop, or acquire those not met upon appointment for PA-V:

   a. Ability to oversee specific regional level programs that cross service and/or discipline lines and influence organizational mission and health care operations.

   b. Skill to provide management and budgeting of regional level programs.

   c. Ability to analyze complex medical care systems and organizational needs of facilities within a region, other federal agencies and professional organizations and apply to healthcare programs within the region.

   d. Knowledge of strategic planning processes to translate national and regional goals and objectives into efficient program operations.
(b) **PA (Central Office).** Central Office PAs manage a national VHA program or programs and provide overall administration of all aspects of the program(s) throughout VHA, to include planning, directing, and executing the program(s). They analyze and develop program specific plans, programs, and budgets for a national program office. They provide leadership and direction for the assigned program(s) that significantly impacts on the overall functioning of the program(s) VHA-wide, to include ensuring the program(s) meet VA mission requirements. They develop succession plans, monitoring trending data and academic preparation for the program(s). They develop national policies, directives, informal letters, white papers, and other guidance regarding the program(s). They coordinate and collaborate with Federal and State regulatory agencies when developing national policies, procedures, and operations for the program(s). They work with VA Central Office (VACO) and collaborate with other national program offices such as Regulatory Affairs, Legislative Affairs, and General Counsel. They provide agency-level interpretation and clarification of national policies and directives. They write or provide technical reviews of proposed legislation regarding the program for the agency. They respond to Congressional offices and other high-level inquiries from internal and external organizations related to the program(s) and/or program office. They interpret policies promulgated by senior VACO and VHACO leadership.

i. **Experience.** Central Office PAs at this level require six years of experience that included assignments which involved directing and evaluating complex patient care or administrative programs, services or operations for a healthcare system or at multiple sites. The assignments would have required planning, organizing and assessing healthcare services or programs; implementing national initiative and organizational targets; developing long and short-term program goals; and analyzing, developing options and implementing solutions to health care operational or administrative problems.

ii. **Demonstrated Knowledge, Skills, and Abilities.** Central Office PAs at this level are not required to meet each individual KSA listed below to qualify, but should be able to demonstrate, develop, or acquire those not met upon appointment for PA-V:

   a. Ability to interpret, develop or revise VHA directives and handbooks pertinent to the national VHA program.

   b. Skill in the design and management of budget as well as cost benefit analysis, to ensure optimal stewardship of resources.

   c. Skill to collaborate with other VHA executives for strategic planning and problem-solving pertaining to national health care delivery systems and organizational priorities.
d. Ability to represent VHA in interacting with state, regional, and national professional, accrediting, and certifying bodies.

6. DEVIATIONS.

a. The approving official may, under unusual circumstances, approve reasonable deviations to the grade requirements at grade PA-III and below for PAs in VHA whose accomplishments, performance, and qualifications as well as current assignment warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances may the educational, certification, or licensure requirements be waived.

c. The placement of individuals in grade levels or assignments not described in this qualification standard must be approved by the Under Secretary for Health or designee in VHA Central Office.

Authority: 38 U.S.C. [7301(b), 7402]
APPENDIX G9. EXPANDED-FUNCTION DENTAL AUXILIARY
QUALIFICATION STANDARD
Veterans Health Administration

1. COVERAGE. Following are the overall requirements for appointment as an EFDA (Expanded-Function Dental Auxiliary) in VHA.

2. SECTION A. BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Noncitizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. Education. Graduate of a dental auxiliary education program that included education and training in expanded functions acceptable to the appropriate VA Professional Standards Board. The program, such as a dental assistant or dental hygiene education program, must be accredited by the Council on Dental Education of the ADA (American Dental Association) and approved by the appropriate State accrediting agency at the time the program was completed.

   c. Licensure or Certification. Individuals employed as EFDA's must possess active, current, full and unrestricted licensure as a dental hygienist from a State, Territory or Commonwealth, (i.e. Puerto Rico) of the United States or the District of Columbia; or evidence of certification from the American Dental Assistants Association as a CDA (Certified Dental Assistant). EFDA's who have, or have ever had, any license(s) revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions in paragraph 16 of chapter 3, section B, this part.

   e. English Language Proficiency. EFDA's appointed to direct patient-care positions must be proficient in spoken and written English as required by 38 U.S.C. 7402(d), and 7407(d).

3. SECTION B. GRADE REQUIREMENTS. In addition to the basic requirements specified above in section A, the following qualifications criteria must be met in determining the appropriate grade assignment of candidates.

   a. Junior Grade. The candidate must meet one of the following:

      (1) For candidates who are licensed dental hygienists, none beyond basic requirements.

      (2) Candidates who are CDAs (certified dental assistants) must possess one of the following:

      (a) One year of progressively responsible experience in expanded functions or 2 years of progressively responsible experience as a dental assistant that did not include expanded functions.

      (b) One year of experience as an instructor in an ADA-accredited dental auxiliary education program which included instruction in expanded functions.
(c). Two years of progressively responsible experience in a related health care occupation such as licensed practical nurse, health technician, independent medical corpsman, medical technician, or radiology technician.

(d) Bachelor’s degree in a related health care occupation such as nursing, physician assistant, medical technology, or physical therapy; or a bachelor’s degree in a related health science such as physiology, biology, or biochemistry.

b. **Associate Grade**

(1) The candidate must meet one of the following:

(a) Bachelor’s degree in dental hygiene, or its equivalent.

(b) Bachelor’s degree in a related health care occupation as defined above, or a bachelor’s degree in a related health science as defined above, and 1 year of progressively responsible experience in expanded functions or as an instructor in an ADA-accredited dental auxiliary education program which included instruction in expanded functions.

(c) Completion of an ADA-accredited 2-year dental hygiene education program and 2 years of progressively responsible experience in expanded functions.

(d) Completion of an ADA-accredited 1 year dental assistant education program and 3 years of progressively responsible experience in expanded functions.

(2) The required experience for Associate grade must have included:

(a) Demonstrated competence in performance of expanded functions which are exceptionally difficult or responsible, and

(b) Demonstrated skill in observing and identifying patients’ physical needs and in providing emotional support to patients, or

(c) Experience in a dental facility that delivers full comprehensive dental care including services in dental specialties.

c. **Full Grade.** See section C below.

4. **SECTION C. DEVIATIONS**

a. The appointing official may authorize a waiver of the grade requirements for Junior or Associate grade for EFDAs whose accomplishments, performance, and qualifications warrant such consideration based on demonstrated competence to meet the requirements of the proposed grade.
b. Under unusual circumstances, the appointing official may authorize appointment of an EFDA at Full grade when it is determined that the scope and complexity of the assignment and level of responsibility warrants this grade.

Authority: 38 U.S.C. 7304; 7402.
APPENDIX G10. CERTIFIED RESPIRATORY THERAPIST QUALIFICATION STANDARD, GS-0640

Veterans Health Administration (VHA)

1. **COVERAGE.** The following are the requirements for Certified Respiratory Therapists (CRT), GS-0640, who are employed in VHA as of the date of this publication and who perform technical work administering respiratory care and life support to patients with cardiopulmonary deficiencies and abnormalities.

   a. [As of the date of this qualification standard, new appointments or reassignments to this standard are prohibited. Employees currently employed in VHA as CRTs will remain CRTs in the GS-0640 occupational series and perform the duties defined in this qualification standard, unless “registration” credential is received. See Appendix G11, Registered Respiratory Therapist in this part.]

   b. 38 U.S.C. Chapters 73 and 74 refer to “certified or registered respiratory therapists.” Since the National Board for Respiratory Care (NBRC), the certifying body for respiratory therapists, distinguishes between “certified respiratory therapist” and “registered respiratory therapists,” VA is adopting “certified respiratory therapist” titling for this qualification standard.

2. **BACKGROUND.** P.L. 98-160, The Veterans’ Health Care Amendments of 1983. authorized full-time, permanent CRT appointments under the authority of 38 U.S.C. § 4104(3). Information and guidance on converting from title 5 to hybrid title 38 was provided in Circular 00-85-9, Employment of Certified or Registered Respiratory Therapist, Licensed Physical Therapist and Licensed Practical or Vocational Nurses under 38 U.S.C. Chapter 73, dated March 12, 1985 with amendments issued in 1987 and 1988 and supplemental circulars issued. A supplemental circular issued on April 26, 1988 provided notification that Respiratory Therapists would no longer be hired under title 5 and implemented the requirement for therapists to be certified and/or registered. As a result, respiratory therapists are no longer hired under the GS-0651 series since that series does not include the requirement to be certified or registered. The circulars and supplements provided guidance and processes for converting employees who provided evidence of certification and/or registration.

3. **DEFINITIONS.**

   a. **Journey Level.** The full performance level for this qualification standard is the GS-07 grade level.

   b. **Creditable Experience.** Experience is only creditable if credentialed as a CRT and the experience is in respiratory care and directly related to the position being filled. To be creditable, the candidate’s experience must demonstrate the use of
knowledge, skills and abilities associated with current practice in paid employment as a CRT.

c. **Part-Time Experience.** Part-time experience is credited according to the relationship it bears to the full-time workweek (e.g., a CRT who worked 20 hours a week would receive one full-time workweek of credit for each two weeks of service).

d. **Clinical Supervision.** Clinical supervision is between a credentialed and non-credentialed clinician or trainee in which the clinical work is reviewed and reflected upon with the aims of improving her/his work with clients, ensuring client welfare and supporting his/her work and professional development. This includes co-signing clinical notes and supervising an individual as she/he are working towards his/her credential.

e. **National Board for Respiratory Care (NBRC).** NBRC is the credentialing body to vet and administer tests and awards the credentials to become a CRT and Registered Respiratory Therapist (RRT).

f. **Certified Respiratory Therapist (CRT).** Upon graduation from an accredited program, Respiratory Therapists are eligible to take a national examination and, upon passing, are granted the CRT credential by the NBRC. CRTs are limited in duties and responsibilities and differ from those who hold an RRT credential.

4. **BASIC REQUIREMENTS.**

a. **Citizenship.** Individuals must be a citizen of the United States. Noncitizens may be appointed when it is not possible to recruit qualified citizens in accordance with Chapter 3, Section A, paragraph 3g of this part. See 38 U.S.C. § 7407(a) for more information.

b. **Certification.** Individuals must hold a certificate as a CRT by the NBRC or a certificate from another body which the NBRC recognizes as its credentialing equivalent. This includes certification based on either:

(1) [Successfully completing a 2-year degree in respiratory care];

OR

(2) Holding a certificate as a respiratory therapist [ ] based on passing an entrance examination administered by the NBRC. [ ]

c. **Physical Requirements.** See VA Directive and Handbook 5019, Employee Occupational Health Service for requirements.
d. **English Language Proficiency.** CRTs appointed to direct patient-care positions must be proficient in spoken and written English as required by 38 U.S.C. § 7403(f).

5. **GRANDFATHERING PROVISIONS.** There are no grandfathering provisions under this qualification standard.

6. **GRADE REQUIREMENTS.** In addition to meeting the basic requirements stated in paragraph 4, the following qualifications criteria must be met to determine the grade assignments.

a. **Certified Respiratory Therapist, GS-05.**

   (1) **Education, Licensure and Experience.** None beyond the basic requirements.

   (2) [Assignments. This is the developmental entry level position for this qualification standard. CRTs at this level perform basic therapeutic modalities in all areas of respiratory care environment under close clinical supervision by an RRT at the full performance level or higher. They deliver medication related to respiratory care; initiate and monitor oxygen therapy and assist with cardiopulmonary resuscitation, suctioning of artificial airway. They evaluate and perform aerosol humidification therapy. CRTs participate in care team rounds.]

b. **Certified Respiratory Therapist, GS-06.**

   (1) **Education, Licensure and Experience.** Candidates must have successfully completed one of the following:

   (a) A minimum two years accredited educational program of study in respiratory care;

   OR

   (b) At least one year of experience comparable to [ ] the GS-05 grade level in respiratory care.

   (2) [Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, the candidate must demonstrate all the following KSAs:

   (a) Knowledge of commonly used respiratory equipment, procedures and techniques.

   (b) Knowledge of basic medical sciences and how they relate to the respiratory and cardiovascular systems.
(c) Skill in the assessment of oxygenation.

(d) Ability to perform basic therapeutic modalities related to respiratory care.

(e) Ability to collaboratively consult with physicians and other healthcare professionals for respiratory care to help provide favorable patient outcomes.

(3) Assignment. CRTs at this developmental grade level perform basic therapeutic modalities in all areas of respiratory care environment under close clinical supervision by an RRT at the full performance level or higher. They deliver medication related to respiratory care. They initiate and monitor oxygen therapy. CRTs assist with cardiopulmonary resuscitation and suctioning of artificial airway. They evaluate and perform aerosol humidification therapy. CRTs participate in care team rounds.

c. Certified Respiratory Therapist, GS-07.

(1) Education, License and Experience. Candidates must have successfully completed at least one of the following:

(a) A four years or more accredited program of study leading to a bachelors or higher degree in respiratory care;

OR

(b) At least one year of experience comparable to [ ] the GS-06 grade level in respiratory care.

(2) Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, the candidate must demonstrate all the following KSAs:

(a) Knowledge of the full range of equipment, procedures and techniques used in respiratory care including the operating characteristics, capabilities and limitations of the complex equipment and anatomy, and physiology of the respiratory system.

(b) Skill in collaboratively consulting with physicians and other healthcare professionals for respiratory care to help provide favorable patient outcomes.

(c) Skill in management of oxygenation.

(d) Ability to perform therapeutic modalities related to respiratory care.

(3) Assignment. This assignment is the full performance level for CRTs. CRTs at this grade level are responsible for the majority of the following, dependent
on facility structure and facility complexity level, with minimal supervision from an RRT at the full performance level in both inpatient and/or outpatient. CRTs complete patient assessment through direct contact, chart review and other means, as appropriate, and share the information with health care team members. They place nasal and oropharyngeal airway; perform nasal and tracheal suctioning; and assist in placing artificial airways into patient’s trachea. They perform duties in the critical area with close clinical supervision to include in-line suctioning, re-positioning and securing Endo Tracheal tube, Bag Valve Mask ventilation and assisting in patient transport and performing patient ventilator assessment. CRTs provide outpatient services such as positive airway pressure therapy and oxygen therapy.

7. **DEVIATIONS.** There are no deviations under this qualification standard.

Appendix G11. REGISTERED RESPIRATORY THERAPIST, GS-0601

Veterans Health Administration

1. **COVERAGE.** The following are the requirements for appointment and advancement as a Registered Respiratory Therapist, GS-0601, in the Veterans Health Administration (VHA). RRTs in VHA perform or supervise work concerned with administering respiratory care and life support to patients with cardiopulmonary deficiencies, diseases and abnormalities.

2. **BACKGROUND.** P.L. 98-160, The Veterans’ Health Care Amendments of 1983, authorizes full-time, permanent appointments in three occupations under authority of 38 U.S.C. § 4104(3) which included RRTs. Prior to the enactment of this law, VA hired nonregistered or certified respiratory therapists and inhalation therapy technicians in the GS-0651 series. Information and guidance on the conversion and implementation from title 5 to title 38 was provided in Circular 00-85-9, Employment of Certified or Registered Respiratory Therapist, Licensed Physical Therapist and Licensed Practical or Vocational Nurse under 38 U.S.C. Chapter 73, dated March 12, 1985, with amendments issued in 1987 and 1988. Supplemental circular issued April 26, 1988, provided notification that Respiratory Therapists could no longer be hired under title 5 and implemented the requirement for a therapist to be certified and/or registered; therefore, Respiratory Therapists could no longer be hired under the GS-0651 series since it did not include the requirement to be certified or registered. The circulars and supplements provided guidance and processes for converting employees who provided evidence of certification and/or registration.

3. **DEFINITIONS.**
   a. **Journey Level.** The full performance level for this qualification standard is the GS-11 grade level.
   
   b. **Creditable Experience.** Experience is only creditable if credentialed as a Certified Respiratory Therapist (CRT) or RRT, the experience is in respiratory care, pulmonary function testing or polysomnography and directly related to the position being filled. To be creditable, the candidate’s experience must have demonstrated the use of knowledge, skills and abilities (KSA) associated with current practice in paid employment as a CRT or RRT.
   
   c. **Part-Time Experience.** Part-time experience is credited according to its relationship to the full-time workweek (e.g., an RRT who worked 20 hours a week would receive one full-time workweek of credit for each two weeks of service).
   
   d. **Clinical Supervision.** Clinical supervision is between a credentialed and non-credentialed clinician or trainee in which the clinical work is reviewed and reflected upon, with the aims of improving work with clients, ensuring client
welfare and supporting professional development. This includes co-signing clinical notes and supervising an individual as he/she is working towards the credential.

e. **Administrative Supervision.** Administrative supervision is supervisory responsibility including but not limited to assigning and evaluating the work of subordinate staff, resolving complex problems to ensure patient services are met, making final decisions on selections, evaluating performance and taking disciplinary action when necessary. The employee has full administrative and professional responsibility for planning and directing the work.

f. **American Association for Respiratory Care (AARC).** Professional organization responsible for oversight of the occupation/profession.

g. **Commission on Accreditation for Respiratory Care (CoARC).** The accrediting body for respiratory programs at colleges and universities.

h. **National Board for Respiratory Care (NBRC).** The credentialing body to vet and administer tests and award the credentials to become a CRT and RRT.

i. **Board of Registered Polysomnographic Technologists (BRPT).** An independent, nonprofit certification board that provides credential in sleep technology – the Registered Polysomnographic Technologist (RPSGT) credential. The RPSGT credential is accredited by the National Commission for Certifying Agencies (NCCA).

j. **Credential.** In the field of respiratory care there are two types of credentials granted in the credentialing process to becoming registered as defined below:

(1) **CRT.** Upon graduation from an accredited program, Respiratory Therapists (RT) are eligible to take a national examination and upon passing, the individual is granted the credential of CRT by the NBRC. RTs who hold a CRT credential are limited in duties and responsibilities and differ from those who hold an RRT credential.

(2) **RRT.** Upon graduation from an accredited program, RTs are eligible to take a national examination and upon passing, the individual is granted the credential of RRT by the NBRC.

k. **License.** Licensing within the respiratory occupation is outside of the credentialing process. Those who have obtained their degree from an accredited program in respiratory care and hold a CRT or RRT credential may be granted a license from a state.

l. **Certification.** Certifications are granted to RRTs who have successfully completed the appropriate requirements (e.g., education, training, examination)
in specialty areas (see certifications below). This examination goes above and beyond general respiratory care activities to focus specifically on competencies that are unique to diagnosing and treating sleep disorders.

(1) **Certified Pulmonary Function Technologist (CPFT).** A certification awarded by the NBRC after passing an examination which goes above and beyond general respiratory care activities to objectively measure the essential tasks required of pulmonary function technologists.

(2) **Registered Pulmonary Function Technologist (RPFT).** A certification awarded by the NBRC after passing an examination which goes above and beyond general respiratory care activities to objectively measure the essential tasks required of pulmonary function technologists.

(3) **Sleep Disorders Specialist (SDS).** A certification awarded by the NBRC after passing an examination which objectively measures the knowledge and skills of RRTs who perform sleep disorders testing and therapeutic intervention.

(4) **Registered Polysomnographic Technologists (RPSGT).** Certification awarded by the BRPT after passing an examination. The RPSGT certification is accredited by the NCCA.

(5) **Asthma Educator Certification (AE-C) Certification.** Certification awarded by the National Asthma Educator Certification Board (NAECB) following successful completion of an examination that assesses qualified health professionals' knowledge in asthma education.

(6) **Adult Critical Care Specialist.** A certification awarded by the NBRC after passing an examination which goes above and beyond general respiratory care activities to objectively measure the essential competencies that are unique to adult critical care.

(7) **Certified Tobacco Treatment Specialist.** A professional who has been awarded certification and possesses the knowledge, skills and training to assist individuals who want to stop using tobacco.

m. **Chronic Obstructive Pulmonary Disease (COPD) Educator Course.** A course recognized by the professional organization of AARC offered to those who are licensed and hold the credential of RRT is accepted for this qualification standard. The course focuses on diagnosis, assessment, treatment, oxygen therapy, medication and disease management as well as how to teach patients about COPD and how to motivate patients to control the disease.
n. **American Thoracic Society (ATS).** Professional organization focused on improving care for pulmonary care, critical illness and sleep-related breathing disorders.

4. **BASIC REQUIREMENTS.** To qualify for appointment as an RRT, all applicants must possess the following:

a. **Citizenship.** Citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, of this part. See 38 U.S.C. § 7407(a) for more information.

b. **Education.** Individuals must have successfully completed a respiratory care program accredited by the CoARC or its successor.

c. **Licensure.** Persons appointed or reassigned to RRT positions in the GS-0601 series must possess and maintain for the duration of employment a full, current and unrestricted license from a state to practice as an RRT.

d. **Credential.** Persons appointed or reassigned to RRT positions in the GS-0601 series must possess and maintain for the duration of employment a valid, current, unrestricted credential of RRT.

(1) **Exception.** RT positions will be designated only to individuals who are in the process of obtaining credentials to become an RRT. These individuals will only be hired on a temporary appointment as provided below.

   (a) VHA may waive the RRT credential requirement for persons who are otherwise qualified and pending completion of prerequisites for RRT credential. Individuals who have successfully completed a respiratory care program accredited by the CoARC or its successor, acquired the CRT credential, are fully licensed by their state and are working toward completion of their RRT credential may be given a temporary appointment as an RT. The temporary appointment is made under the authority of 38 U.S.C. § 7401(a)(1)(B) for a period not to exceed one year from date of employment. Candidates must hold an active, current, full and unrestricted RRT credential and be licensed to hold a position at or above the GS-07 level.

   (b) RTs may only be temporarily appointed at the GS-05 level and may not be promoted/converted to a higher-level position as an RRT until the RRT credential is received.

   (c) RTs must provide care only under the close supervision of an RRT.
(d) Temporary RT appointments may not be extended beyond one year or converted to a new temporary appointment.

(e) **Failure to Obtain Credential.** In all cases, RTs must actively pursue meeting national prerequisites for the RRT credential from the first day of their appointment. Failure to become credentialed within one year from date of appointment will result in removal from the GS-0601 RT series and may result in termination of employment. The Human Resources (HR) Office staff will provide RTs, in writing, the requirement to 1) obtain their RRT credential; 2) the date by which the RRT credential must be acquired; and 3) the consequences for not becoming RRT credentialed by the deadline. The HR Office staff must provide the written notice to selectees prior to entrance on duty date and maintain a copy in the electronic Official Personnel Folder.

(2) **Loss of Licensure, Certification or Credentials.** An employee in this occupation, who fails to maintain the required certifications, RRT credential or license must be removed from the occupation, which may also result in the termination of employment. Once credentialed, licensed or certified, RTs/RRTs must maintain a full, valid and unrestricted license, credential and certification to practice respiratory care.

e. **Physical Standards.** See VA Directive and Handbook 5019, Employee Occupational Health Service for requirements.

f. **English Language Proficiency.** RTs/RRTs appointed to direct patient-care positions must be proficient in spoken and written English as required by 38 U.S.C. § 7403(f).

g. **Grandfathering Provision.** The following is the standard grandfathering policy for all hybrid title 38 qualification standards. Some of these provisions may not apply to this occupation. Please carefully review the qualification standard to determine the specific education, credential or certification requirements that apply to this occupation.

All persons employed in VHA in this occupational series or in another occupational series and performing the duties as described in the qualification standard on the effective date of this qualification standard are considered to have met all qualification requirements for the grade held, including positive education, credential or certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees in an occupation that does not require a licensure, certification or registration, may be reassigned, promoted or demoted within the occupation.
(2) Employees in an occupation that requires a licensure, certification or registration, may be reassigned, promoted up to and including the full performance level or demoted within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

(3) Employees in an occupation that requires a licensure, certification or registration only at higher grade levels must meet the licensure, certification or registration requirement before they can be promoted to those higher-grade levels.

(4) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(5) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure, certification or registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

(6) If an employee who was retained in an occupation listed in 38 U.S.C. § 7401(3) under this provision leaves that occupation or employment with the VA, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation and/or VA.

5. GRADE REQUIREMENTS. All individuals assigned to this occupation must meet all the basic qualification requirements above in paragraph 4 a-g and all basic qualification requirements defined in the specific assignment. All positions must be designated in one of the approved title or parenthetical title, as described below and duties must meet the definition of the assignment:

a. Respiratory Therapist. Respiratory Therapist GS-05 positions designated in this qualification standard are developmental positions under the 0601 series and do not have the same requirements as Respiratory Therapists in the 0651 series. The Respiratory Therapist title in this standard may only be used at the GS-05 level while the incumbent is working towards obtaining the RRT registration.

b. Registered Respiratory Therapist. Working titles, such as program coordinator, assistant chief, national program manager, etc., may be used at the organizational level to designate the work of the position.

c. Registered Respiratory Therapist (Pulmonary)

d. Registered Respiratory Therapist (Polysomnography)
e. Registered Respiratory Therapist (Pulmonary/Polysomnography)

f. Lead Registered Respiratory Therapist

g. Supervisory Registered Respiratory Therapist

6. GRADE DETERMINATIONS.

a. Grade Determinations. In addition to the basic requirements for employment in paragraph 3 above, all individuals referred and assigned to this occupation must meet all the qualification requirements and KSAs defined in the specific assignment as follows:

(1) Respiratory Therapist, GS-05.

(a) Experience. None beyond the basic requirements.

(b) Education and Licensure. This level assignment is designated as temporary under paragraph 4d(1) above for individuals who have successfully completed a respiratory care program accredited by the CoARC or its successor, acquired the CRT credential, licensed by their state and are working towards obtaining RRT credential.

(c) Assignment. This is the entry level developmental position. RTs at this grade level perform basic therapeutic modalities in all areas of respiratory care environment under close clinical supervision by an RRT at the full performance level or higher. RTs are responsible for such assignments as medication delivery related to respiratory care, initiating and monitoring oxygen therapy, assisting with cardiopulmonary resuscitation suctioning of artificial airway, evaluating and performing aerosol humidification therapy and participating in care team rounds.

(2) Registered Respiratory Therapist, GS-07.

(a) Experience, Education, Licensure and Registration. In addition to the basic requirements, candidates must possess their RRT credential.

(b) Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Ability to perform therapeutic modalities related to respiratory care.

ii. Skill in analyzing physiological specimens obtained to include arterial blood gases, pulse oximetry, End tidal Co2 (ETCo2) monitoring, basic spirometry and other basic diagnostic procedures.
iii. Ability to collaboratively consult with physicians and other healthcare professionals for respiratory care to help provide favorable patient outcomes.

iv. Skill in assessing oxygenation and ventilation.

v. Ability to perform basic airway management to include artificial airways and mechanical ventilation.

(c) Assignment. This is a developmental position. RRTs at this grade level will be responsible for the following assignments with minimal clinical supervision from an RRT at the full performance level in both inpatient and/or outpatient settings. RRTs complete patient assessment through direct contact, chart review and other means as appropriate and share the information with health care team members. They use accepted measuring/monitoring tools for determining plan of care. They place nasal and oropharyngeal airway and perform nasal and tracheal suctioning. RRTs obtain, analyze and report arterial and venous blood gas samples. They perform duties in the critical area with close supervision to include in-line suctioning, re-positioning and securing Endo Tracheal tube, bag valve mask ventilation, assisting in patient transport and performing patient ventilator assessment. RRTs provide outpatient services, such as positive airway pressure (PAP) therapy, oxygen therapy and COPD care.

(3) Registered Respiratory Therapist, GS-09.

(a) Experience or Education, Licensure and Credential. Candidates must have:

i. One year of creditable experience equivalent to the GS-07 grade level demonstrating the clinical competencies described at that level;

OR

ii. A Master of Science degree in respiratory care AND a license AND an RRT credential.

(b) Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Skill in performing therapeutic modalities related to respiratory care.

ii. Ability to collaboratively consult with physicians and other healthcare professionals to help provide favorable patient outcomes.

iii. Skill in assessing oxygenation and ventilation.
iv. Ability to perform airway management to include artificial airways and mechanical ventilation.

(c) **Assignments.** This is a developmental position. RRTs at this grade level are responsible for the following under general guidance in both inpatient and/or outpatient settings. RRTs obtain, interpret and analyze physiological specimens and data. They consult with physicians and other healthcare professionals to ensure quality of patient care within area of specialty. They manage and maintain the airway and ventilation of the patient through the use of appropriate mechanical means. RRTs assess and evaluate patients to determine and recommend intervention to develop and implement a plan of care, such as, implementing protocols, intubation, monitoring critical systems and uses advanced modes of ventilation. They provide outpatient services such as home ventilators, PAP therapy, oxygen therapy and COPD care.

(4) Registered Respiratory Therapist, GS-11.

(a) **Experience, Licensure and Credential.** Candidates must have:

i. One year of creditable experience equivalent to the GS-09 grade level demonstrating the clinical competencies described at that level.

ii. Hold an active license and RRT credential.

(b) **Demonstrated Knowledge, Skills and Abilities.** In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Ability to collaboratively consult with physicians and other healthcare professionals for complex respiratory care to develop care plans to provide favorable patient outcomes.

ii. Skill in evaluating the efficacies of therapeutic modalities.

iii. Skill in performing advanced airway and ventilation management.

(c) **Assignments.** This assignment is the full performance level. RRTs at this grade level work independently providing respiratory care in both inpatient and/or outpatient settings. The specific assignments are dependent on facility structure and complexity levels. They use data and patient assessment to establish appropriate plan of care and determine if outcomes are being met. They consult with physicians and other healthcare professionals to ensure quality of patient care within area of specialty. They manage and maintain the airway and ventilation of the patient using appropriate mechanical means. RRTs determine and implement complex respiratory care such as protocols, respiratory modalities, bronchoscopy, medications or supplemental oxygen and intubation. They monitor critical systems. They use advanced modes of ventilation and outpatient services,
such as home ventilators and COPD case management. RRTs suggest alternate modes of treatment where indicated based on assessment and analysis of patient response to treatment. RRTs at this grade level may perform invasive procedures such as arterial line placement. They serve as a preceptor to lower graded staff. They may lead projects developing new policies, procedures or protocols.

(5) Registered Respiratory Therapist, GS-12.

(a) **Experience, Licensure and Credential.** Candidates must have:

i. One year of creditable experience equivalent to the GS-11 grade level demonstrating the clinical competencies described at that level.

ii. Hold an active license and RRT credential. The following certifications are desirable but not required:

a. CPFT,

b. RPFT or

c. RPSGT.

(b) **Demonstrated Knowledge, Skills and Abilities.** In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Knowledge of complex pulmonary function testing and stress/exercise testing.

ii. Ability to maintain a quality control program related to pulmonary function testing.

iii. Ability to treat acute complications for all pulmonary function testing.

iv. Skill in performing polysomnographic studies to include obtaining both physiologic and diagnostic data.

v. Skill in calibrating and troubleshooting polysomnographic equipment and physiologic and diagnostic monitoring.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. RRTs at this grade level in this position are designated for complexity level 3 facilities only. In addition to the assignments of the full performance
level position, incumbents are also responsible for performing home sleep testing, home oxygen evaluations and ordering, patient instruction on sleep disorders and use of therapeutic equipment along with a combination of the duties from the following assignments below as Registered Respiratory Therapist (Pulmonary), Registered Respiratory Therapist (Polysomnography) and Registered Respiratory Therapist (Pulmonary/Polysomnography) under paragraphs (6)(a)-(c) and (7). This assignment is not appropriate and cannot be used in facilities designated at complexity level 1 and 2 (see assignments below beginning in paragraphs (6)(a)-(c) and (7) for facilities designated as complexity level 1 and 2).

(6) Registered Respiratory Therapist, GS-12.

The following assignments are advanced assignments. These advanced specialty assignments are limited in number and cannot be used for all or the majority of the staff/employees in the service/unit. The designated specialized areas in respiratory care include pulmonary, polysomnography and a combination of pulmonary/polysomnography. These three advanced specialized assignments are established for facilities where the structure and patient care supports the need for the assignment(s). The duties and responsibilities assigned to these positions are the full scope of the duties defined under the RRT, GS-11 full performance level assignment in conjunction with the duties defined below for the specialty. These specialized assignments are completed under the general supervision of a physician medical director who is qualified to supervise the RRT. Individuals assigned to one of these positions will use the designated title as shown below.

(a) Registered Respiratory Therapist (Pulmonary).

i. Experience, Licensure and Credential. Candidates must have:

a. One year of creditable experience equivalent to the GS-11 grade level demonstrating the clinical competencies described at that level.

b. Hold an active license and RRT credential.

ii. Certification. Incumbent must hold a CPFT or RPFT.

iii. Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, candidates must demonstrate all the following KSAs:
a. Knowledge of complex pulmonary function testing to include but not limited to cardiopulmonary stress testing, exercise testing, metabolic testing, bronchoprovocation testing and shunt testing.

b. Ability to establish a quality control program related to pulmonary function lab.

c. Skill in analyzing physiologic specimen and information from basic diagnostic procedures.

d. Skill in assessing for signs and symptoms of adverse actions to medications and or testing procedures.

e. Skill in determining appropriate intervention for adverse actions to medications and or testing procedures.

f. Ability to provide training in advanced pulmonary function procedures.

g. Ability to provide clinical consultation in advanced pulmonary function procedures.

iv. Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. RRTs at this grade level in this position compare and evaluate indications and contraindications for complex pulmonary function testing (PFT) and recognizes normal/abnormal results. They perform bronchoprovocation testing utilizing a variety of medications or methodologies. They monitor patients and recognize and initiate interventions for complications of testing. They perform an initial quality review of test results and ready them for physician interpretation and determine whether the patient meets the criteria for termination of testing. RRTs conduct quality control reviews of all tests performed and all pulmonary diagnostic equipment. They maintain lab records. They train and assess staff competencies in performing simple spirometry.

(b) Registered Respiratory Therapist (Polysomnography).

i. Experience, Licensure and Credential. Candidates must have:

a. One year of creditable experience equivalent to the GS-11 grade level demonstrating the clinical competencies described at that level.

b. Hold an active license and RRT credential.
ii. **Certification.** Candidates must hold a RPSGT.

iii. **Demonstrated Knowledge, Skills and Abilities.** In addition to the requirements above, candidates must demonstrate the following KSAs:

   a. Skill in performing polysomnographic studies to include obtaining both physiologic and diagnostic data.

   b. Skill in calibrating and troubleshooting polysomnographic equipment.

   c. Skill in monitoring both physiologic and diagnostic parameters.

   d. Skill in scoring data both during and post diagnostic testing.

   e. Skill in analyzing data both during and post diagnostic testing.

   f. Skill in preparing output for physician interpretation of data obtained both during and post diagnostic testing.

   g. Skill in the assessment of oxygenation, ventilation and adverse responses.

iv. **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. RRTs at this grade level in this position perform polysomnographic testing and titration studies including activities such as applying electrodes and various monitors to multiple body sites per protocol. They evaluate the relationship of events, sleep stages and possible medical conditions which influence or result from events occurring during sleep. They anticipate problems likely to occur during the sleep study, prepares for such situations and makes changes in established procedures. They obtain data measuring wake, sleep and breathing states and records various signals from the brain and airways, cardiac rate, oxygen saturation and position to enable the physician to assess and diagnose sleep and breathing disorders. RRTs troubleshoot and calibrate polysomnography, computer, oximeters, movement monitors and patient electrodes prior to the onset of each recording. They analyze and score patient data and summarize on report for physician interpretation. They monitor and initiate interventions for complications of testing and determines whether patient meets criteria for termination of testing. They perform electroencephalogram and home sleep testing and evaluate results.
NOTE: Individuals who are hired to perform polysomnography only must be filled under VA Handbook 5005, Appendix G27, Appendix I, Medical Instrument Technician (Polysomnography), GS-0649.

(c) Registered Respiratory Therapist (Pulmonary/Polysomnography).

i. Experience, Licensure and Credential. Candidates must have:

   a. One year of creditable experience equivalent to the GS-11 grade level demonstrating the clinical competencies described at that level.

   b. Hold an active license and RRT credential.

ii. Certification. Candidates must hold a CPFT or RPFT and RPSGT.

iii. Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above candidates must demonstrate all the following KSAs:

   a. Knowledge of complex pulmonary function testing to include cardiopulmonary stress testing, metabolic testing and bronchoprovocation testing.

   b. Ability to maintain all equipment related to pulmonary function and polysomnography testing.

   c. Ability to maintain a quality control program related to pulmonary function and polysomnography testing.

   d. Knowledge of treatment for acute complications for all pulmonary function and polysomnography testing.

   e. Skill in scoring data during and post diagnostic testing.

   f. Skill in analyzing data during and post diagnostic testing.

   g. Skill in preparing output for physician interpretation of data obtained both during and post diagnostic testing.

   h. Skill in the calibrations and troubleshooting of polysomnographic equipment.

   i. Skill in monitoring both physiologic and diagnostic parameters.

iv. Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and
range of variety and must be performed by the incumbent at least 25% of the time. RRTs at this level compare and evaluate indications and contraindications for complex PFTs and recognizes normal/abnormal results. They administer a variety of medications or methods utilized for bronchoprovocation testing. They monitor and initiate interventions for complications of testing. They perform initial quality review of test results, ready them for physician interpretation and determine whether patient meets criteria for termination of testing. They conduct quality control expected by the ATS for all test performed and all pulmonary diagnostic equipment. They maintain lab records. RRTs perform polysomnographic testing and titration studies including activities such as applying electrodes and various monitors to multiple body sites. They evaluate the relationship of events, sleep stages and possible medical conditions which influence or result from events occurring during sleep. They anticipate problems likely to occur during the sleep study, prepare for such situations and make changes in established procedures. They obtain data measuring wake, sleep and breathing states and record various signals from the brain and airways, cardiac rate, oxygen saturation and position to enable the physician to assess and diagnose sleep and breathing disorders. RRTs troubleshoot and calibrate polysomnography, computer, oximeters, movement monitors and patient electrodes prior to the onset of each recording. They analyze and score patient data and summarize on report for physician interpretation. They monitor and initiate interventions for complications of testing and determines whether patient meets criteria for termination of testing. RRTs perform electroencephalogram and home sleep testing and evaluate results.

(7) Registered Respiratory Therapist, GS-12.

(a) Experience, Education, Licensure and Certification. Candidates must:

   i. Have one year of creditable experience equivalent to the GS-11 grade level demonstrating the clinical competencies described at that level, 

   ii. Hold a Bachelor of Science degree from a nationally accredited college or university in respiratory care, cardiopulmonary science or a health-related field and 

   iii. Hold one of the education certifications for pulmonary disease for Patient Educator OR a certification for adult critical care specialist for Staff Educator.

(b) Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, candidates must demonstrate all the following KSAs:
Knowledge of instructional techniques to educate respiratory therapists in proper performance of respiratory processes and procedures.

Ability to educate individuals of varying backgrounds.

Skill in training RRTs, other staff and/or patients/caregivers on existing and newly acquired equipment, therapies and medications.

Ability to determine the continuing education needs of staff to identify appropriate resources to meet those needs.

Ability to develop clinical policy, procedures, protocols, competencies and simulations relative to respiratory care.

**Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. This assignment is designated as an Educator and can be designated as a Patient Educator, Staff Educator or a combination of both areas. Educators are responsible for the overall educational program for the specific area (patient, staff or combination) in respiratory care. They participate in the department’s quality assurance program, especially with respect to identifying opportunities for improvement and developing quality and performance assessment tools. They represent the department at interdisciplinary meetings.

**Staff Educators.** Staff Educators provide staff orientation and education on a wide variety of topics, including but not limited to; evidence based respiratory practice, clinical guidelines, clinical procedures, protocols, equipment, research, emerging knowledge from publications, standards of care, regulatory standards and VHA directives. They plan comprehensive teaching and training programs. They develop formal curriculum and administer clinical training programs for staff working towards completion of credentials, lower level RRTs and other facility staff, including physicians. They are instructors for the overall facility education program. They develop and implement the respiratory education program, including new employee orientation, continuous education and ongoing competency assessment. They create education plans, develop training materials and tools, create competencies, provide training and ensure continuing education credits are available for staff. They may provide the education/training in a classroom setting, electronically, via simulation or using any other acceptable method. They evaluate employees’ progress and performance during orientation, provide feedback to supervisors and recommend interventions and remediation if needed. They keep abreast of current practice through literature review,
membership in professional organizations, participation in research and attending seminars. They perform regular needs assessments and recommend changes in content to promote proper orientation, maintain and improve clinical competence and facilitate professional growth. They are a resource and mentor to respiratory staff. They assist the supervisor by evaluating new medical practices and equipment.

ii. **Patient Educators.** Patient Educators educate patients, families and/or caregivers in all aspects of their cardiopulmonary disease and the care needed during and following hospitalization or a clinic visit. The education they provide includes, but is not limited to; underlying disease, medications, therapeutic modalities, disease management and action plans. Education may be provided one-on-one during a face-to-face visit, in a classroom setting or via telehealth or using any other acceptable method for providing patient education. They provide information on available education resources within VA and the community. They assess current levels of knowledge, identify attitudes toward and barriers to learning, develop patient-specific education plans and provide education in the most appropriate setting based on the patient’s needs. They assess level of retention and provide additional follow up education, when indicated. They develop education materials and identify strategies to promote optimal health. They may plan a set curriculum and deliver formal education either individually or in a group classroom environment. Patient Educators participate in discharge planning and collaborates with provider to ensure successful implementation of the home respiratory care plan. Education is provided on a continuum, beginning in the hospital or clinic and continuing into the home environment. They keep abreast of current practices through literature review, membership in professional organizations, participation in research and attending seminars. They serve as a content expert and participate in regular review of respiratory related patient education materials used by the respiratory department and/or facility and recommends changes based on emerging knowledge. They train other staff in respiratory related topics and strategies for patient education.

(8) **Lead Registered Respiratory Therapist, GS-12.**

(a) **Experience, Licensure and Credential.** Candidates must:

i. Have one year of creditable experience equivalent to the GS-11 grade level demonstrating the clinical competencies described at that level. RRTs at this grade level in this assignment have experience demonstrating advanced practice skills and clinical judgment across many areas of respiratory care both inpatient and outpatient.
ii. Hold an active license and RRT credential.

(b) **Demonstrated Knowledge, Skills and Abilities.** In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Ability to assign personnel and tasks to be accomplished in a manner that assures completion of the workload.

ii. Ability to oversee and direct clinical guidance in a manner that assures completion of the workload.

iii. Ability to communicate with individuals of varying backgrounds to solve problems and provide conflict resolution.

iv. Ability to recommend uncommon or atypical interventions.

v. Ability to recommend ways to improve patient care and operations through independent research and evaluation of new equipment and therapies.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and must be performed by the incumbent at least 25% of the time. Lead RRTs are found in higher complexity facilities (level 1 and 2) and the lead duties must be regular and reoccurring and must constitute at least 25% of the duty time. This assignment may be established as day/evening/night and/or inpatient/outpatient. They ensure work is distributed among employees in accordance with established workflow or job specialization. Lead RRTs assure timely accomplishment of the assigned workload, assess the status, quality and progress of work and make day-to-day adjustments in accordance with established priorities. They provide clinical practice guidance for other respiratory staff and assist with technical work problems not covered by precedents or established policies for non-routine or complex procedures. They assist RRTs in determining treatment options for complex patients. They study the quality and quantity of work and operating effectiveness and take or recommend needed actions. They represent the department at interdisciplinary meetings.

(9) **Registered Respiratory Therapist, GS-12.**

(a) **Experience, Licensure and Credential.** Candidates must:

i. Have one year of creditable experience equivalent to the GS-11 grade level demonstrating the clinical competencies described at that level.
ii. Hold an active license and RRT credential. The following certifications are preferred but not required:

a. Certified Tobacco Treatment Specialist
b. Pulmonary Rehabilitation Certificate issued AARC
c. AE-C awarded by the NAECB
d. COPD Educator course offered by the AARC

(b) **Demonstrated Knowledge, Skills and Abilities.** In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Ability to develop policies and guidelines regarding new and emerging procedures.

ii. Ability to implement policies and guidelines regarding new and emerging procedures.

iii. Ability to maintain policies and guidelines regarding new and emerging procedures.

iv. Ability to make recommendations regarding new and emerging procedures.

v. Ability to perform complex analytical studies of patient care.

vi. Ability to interpret results to coordinate the management and evaluation of patient care.

vii. Ability to coordinate the work of subordinate staff.

viii. Ability to manage all aspects of a complex patient care program including day-to-day operation, training program resources and fiscal management.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. This assignment is designated as an RRT Program Coordinator, who oversees the administrative and clinical aspects of a major specialty program at complexity level 1 and 2 facilities only. Programs managed may include, but are not limited to; home oxygen, home ventilators, amyotrophic lateral sclerosis (ALS) clinic, pulmonary procedure lab, sleep/positive airway pressure (PAP) clinic. RRTs may supervise and administratively manage employees assigned to their program(s) by providing leadership, direction,
orientation, in-service training and continuing education programs for assigned staff. They perform analytical studies and interpret results to improve operations. They conduct all phases of service delivery, program resources and fiscal management. RRTs coordinate daily operations, develops and maintains policies and procedures for program operation and prepares reports and statistics for facility and Veterans Integrated Service Network use. They conduct a variety of audits, including clinical practice audits to evaluate operations and productivity and to ensure appropriate documentation of therapy, procedure, clinical outcomes and patient safety. They assist in determining quality and compliance data to be collected and investigates problems related to quality and quantity of work and operating effectiveness and recommends needed action. They make recommendations for program improvement and expansion based on research and emerging knowledge. They represent the department at interdisciplinary meetings.

(10) **Supervisory Registered Respiratory Therapist, GS-13.**

(a) **Experience, Licensure and Credential.** Candidates must:

i. Have one year of creditable experience equivalent to the GS-12 grade level demonstrating the clinical competencies described at that level.

ii. Hold an active license and RRT credential.

(b) **Demonstrated Knowledge, Skills and Abilities.** In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Ability to plan and assist in the establishment of a completely integrated respiratory care program.

ii. Ability to recommend improvements based on evaluation of facility operations.

iii. Ability to supervise employees.

iv. Ability to manage the fiscal aspects of the functions supervised.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. Supervisory RRTs manage and supervise the respiratory department which includes, at a minimum, assigning and evaluating the work of subordinate staff, resolving problems which may interfere with patient examination or treatment, evaluating new procedures, products and equipment, reviewing
and recommending new and emerging procedures, providing instruction and training to new staff, interviewing candidates for positions, recommending selections, advancements and promotions, taking disciplinary action when necessary, providing guidance in more complex and non-standard cases and budget management. They represent the department at interdisciplinary meetings and on facility level committees. They conduct audits of inpatient and outpatient records to ensure appropriate documentation of plan of care, assessments, therapy, procedures, clinical outcomes and patient safety. They provide information to the Chief to ensure appropriate care and compliance with regulatory standards. Supervisory RRTs maintain established departmental policies and procedures, objectives and quality assurance programs. They assist in determining quality assurance and compliance data to be collected. They attend professional meetings and professional development events and monitor the technical and clinical competence of all personnel working in the department through appropriate training, review of results and quality control checks. They evaluate the effectiveness of new procedures and equipment. They investigate quality and quantity of work problems and operating effectiveness and take needed action.

(a) Experience, Licensure and Credential. Candidates must:

i. Have one year of creditable experience equivalent to the GS-12 grade level demonstrating the clinical competencies described at that level.

ii. Hold an active license and RRT credential.

(b) Certification. Candidates must hold a certification from one of the programs they are responsible for overseeing.

(c) Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Skill in complex respiratory care in all inpatient and outpatient settings.

ii. Skill in monitoring production and performance priorities and standards.

iii. Ability to develop policies and guidelines.

iv. Ability to manage patient care programs to make recommendations to improve patient care and operations.

(d) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range
of variety and must be performed by the incumbent at least 25% of the time. This position is designated as an RRT Program Manager. RRT Program Managers have broad program management responsibilities for a large program or multiple smaller programs located at one facility or multiple divisions of a facility. This assignment is appropriate for level 1 and 2 facilities only. They manage programs, which may include, but are not limited to home oxygen, home ventilators, ALS clinic, Sleep/PAP clinic, pulmonary procedure clinic, respiratory care in the Community Based Outpatient Clinics. They operate and manage key clinical, training, research or administrative programs, including the day-to-day activities, resource management and fiscal management of those programs. They oversee administrative and programmatic resources and deploy those resources in support of program needs. They may supervise staff less than 25% of the time, but this not required. They provide leadership, direction, orientation, coaching, mentoring, in-service training, staff development and continuing education programs for assigned staff. They provide strategic planning to ensure the provision of high-quality care and efficient use of program resources. They develop and implement short- and long-term goals and objectives consistent with the program and facility strategic plans. They develop and implement programs and establish policies and procedures to meet program goals and VHA policy. They initiate and conduct a variety of program and service audits to evaluate operations and productivity and to monitor outcomes using data-driven quality assurance processes. They determine quality and compliance data to be collected and investigate problems related to quality and quantity of work and operations effectiveness and takes needed action based on that data. They perform complex analytical studies. They interpret the results of these studies to develop and implement improvement strategies and prepare reports for facility, VISN and national use. They represent the department at interdisciplinary meetings and on facility level committees.

(a) Experience, Licensure and Credential. Candidates must:

i. Have one year of creditable experience equivalent to the GS-12 grade level demonstrating the clinical competencies described at that level.

ii. Hold an active license and RRT credential.

(b) Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Ability to assist in establishing a completely integrated patient care program.
ii. Ability to organize work, delegate tasks, evaluate performance, manage fiscal matters and meet multiple deadlines.

iii. Ability to supervise and manage subordinate employees.

iv. Skill in interpersonal relationships including conflict resolution.

v. Ability to establish and monitor standards and priorities for production and patient care.

vi. Skill in recommending improvements to operations based on evaluation of data.

(c) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. This Supervisory RRT assignment is designated as the Chief. They manage complexity level 3 facilities whose work involves providing respiratory and related care in the facility or at multiple sites. These facilities may offer specialty care and services and may be affiliated with academic institutions. Supervisory RRTs at this grade in this assignment manage and supervise all aspects of respiratory care including clinical practice, program management, education, human resources management and supervision of the service. They manage staff members, assess the needs of patients and delegate tasks appropriately. They advise leadership on policy implications, key issues and relationships to both internal and external interest groups and recommend courses of action. They maintain interdepartmental relations with other services to accomplish medical center goals. They coordinate and negotiate resolutions to complex problems. They participate in the audit of respiratory care, identify opportunities for performance improvement and recommends changes where indicated. Supervisory RRTs maintain established departmental policies and procedures, objectives and quality assurance programs. They participate, identify and develop opportunities for performance improvement. They ensure compliance with regulatory requirements (Centers for Medicare & Medicaid Services, Joint Commission, Core Measures). They participate in respiratory teaching and training. They assess and evaluate staff qualifications and competency upon employment and on an ongoing basis. They recommendation appointments, advancements and disciplinary actions, when appropriate. They represent the department at interdisciplinary meetings and on facility level committees and represent the facility to VISN-level leadership.

(13) Supervisory Registered Respiratory Therapist, GS-13.

(a) Experience, Licensure and Credential. Candidates must:
i. Have one year of creditable experience equivalent to the GS-12 grade level demonstrating the clinical competencies described at that level. It is highly desirable that the candidate possess certification in one or more functional specialties.

ii. Hold an active license and RRT credential.

(b) **Demonstrated Knowledge, Skills and Abilities.** In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Ability to supervise employees.

ii. Ability to assist in establishing a completely integrated program.

iii. Skill in recommending improvements to operations, including new and emerging procedures based on evaluation of data.

iv. Ability to forecast resource needs and to manage fiscal matters.

v. Skill in problem solving including conflict resolution.

vi. Ability to communicate effectively and professionally with employees at varying levels of background.

vii. Knowledge of complex and non-standard examinations, treatments, procedures and techniques.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. This assignment is designated as an RRT Assistant Chief. They serve as full assistant to a Service Chief in complexity level 1 and 2 facilities. These facilities may offer specialty care and services and may be affiliated with academic institutions. Individuals are typically assigned to this position at moderately to highly complex respiratory care services within the organization. Supervisory RRTs share the full scope of delegated managerial responsibilities and serve as the Acting Service Chief in the absence of the Chief. They support department functions at the direction of the Chief. They make decisions affecting staff and other resources with wide latitude of control and independent judgment. They independently provide respiratory services at all levels of complexity. They supervise staff members of different levels of assignments and/or occupation. They provide direction of the program services assigned to them including utilization of resources and budget. They may develop and initiate new programs, develop policies, protocols and procedures, assure compliance with regulatory requirements and monitor staff performance.
They assist in determining quality assurance and performance data to be collected. Supervisory RRTs maintain established policies, procedures, protocols and quality assurance programs. They participate in the development of a department level plan for financial and personnel resources. They encourage professional development, resolve conflicts which might interfere with the delivery of services, identify continuing education and training needs, create an environment of learning and serve as a mentor to staff. They attend professional meetings and take responsibility for professional development. They collaborate with other healthcare team members to generate new ideas for quality improvement with regards to administration and overall function of the department, patient care and accomplishment of facility goals. They represent the department at interdisciplinary meetings and on facility level committees.

(14) Supervisory Registered Respiratory Therapist, GS-14.

(a) Experience, Licensure and Credential. Candidates must:

i. Have one year of creditable experience equivalent to the GS-13 grade level demonstrating the clinical competencies described at that level. It is highly desirable that the candidate possess certification in one or more functional specialties such as critical care, pulmonary, education and sleep medicine.

ii. Hold an active license and RRT credential.

(b) Education. It is highly desirable that the candidate possess a Bachelor of Science degree from a nationally accredited college or university in respiratory care; cardiopulmonary science; or a health-related field.

(c) Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Skill in implementing patient care and operations change by recognizing opportunities for improvement and analyzing data.

ii. Skill in the development and implementation of appropriate standards of care for respiratory care.

iii. Ability establish a completely integrated program that emulates “best practice” and follows national policies.

iv. Ability to supervise employees.

v. Ability to forecast resource needs to manage fiscal matters.
(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. RRTs at this grade in this assignment are designated as Chiefs. They manage complexity level 1 and 2 respiratory care department. They manage all administrative and clinical aspects of the organizational unit. The organizational unit may be located at one facility or multiple divisions of a facility. Decisions are made exercising wide latitude and independent judgment. They have broad and overall responsibility for the service-level department and full responsibility for clinical practice, program management, education, human resources management, budget management and supervision for employees whose work involves providing high acuity care. They provide leadership with objective, independent assessments and recommendations for policy, operational and administrative issues and initiatives requiring decision and action. They plan, assess and evaluate programs to ensure coordination between care delivered by the program and overall delivery of health care within the facility. Supervisory RRTs initiate and conduct audits and analyze a wide variety of data related to program planning and the specialized needs of the Veteran, the service and the medical center. They advise leadership on policy implications, key issues, relationships to both internal and external interest groups and recommend courses of action. They maintain interdepartmental relations with other services to accomplish medical center goals. They coordinate and negotiate resolutions to complex problems and report progress and resolution of problems in achieving goals and objectives to higher levels of management. They prepare special reports and responses, Congressional responses, briefing papers, issue briefs and decision papers for the medical center leadership, VISN or central office, which may be highly sensitive, confidential and of a complex nature. They develop policies, procedures and protocols, performance and quality standards, position descriptions and functional statements. They represent the department at interdisciplinary meetings and on facility level committees. They represent the facility to VISN-level leadership.

(15) **Registered Respiratory Therapist, GS-14.**

(a) **Experience, Licensure and Credential.** Candidates must:

i. Have one year of creditable experience equivalent to the GS-13 grade level demonstrating the clinical competencies described at that level.

ii. Hold an active license and RRT credential.
(b) **Education.** It is highly desirable that the candidate possess a Bachelor of Science degree from a nationally accredited college or university in respiratory care; or cardiopulmonary science; or a health-related field.

(c) **Membership.** Candidates must be a member of the American Association for Respiratory Care (AARC).

(d) **Demonstrated Knowledge, Skills and Abilities.** In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Knowledge of advanced practice skills in all aspects of respiratory care.

ii. Ability to communicate orally and in writing at varying levels both internal and external to the organization.

iii. Skill in communicating data, policies and regulations.

iv. Ability to develop resource materials.

v. Skill in the development and implementation of appropriate standards of care for respiratory care.

vi. Ability to establish a completely integrated program that emulates "best practice" and follows national policies.

(e) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. RRTs at this grade level in this assignment are designated as the Network/VISN RRT Program Manager who are responsible for the respiratory care program at the Network/VISN-level with direction from the national program office for pulmonary, critical care and sleep medicine. They lead the development and implementation of appropriate standards of care for respiratory care across the network. They ensure the delivery of respiratory care emulates "best practices" and follows national policies. They lead network-wide respiratory care staff in the development of consistent policies, procedures and protocols for respiratory care services. They direct the formulation, collection and analysis of data and other information regarding respiratory care for the network and the national program office. They advise leadership regarding staffing levels and capacity, recruitment and retention initiatives and emerging practice(s). They assist in plans for relevant education and training programs as directed by the network and national program office. RRTs coordinate and work closely with other program offices (example: Logistics, Biomed, Prosthetics) to assist with network purchases. They develop and direct implementation
of strategic plan regarding opportunities for initiation, maintenance and expansion of service delivery. They conduct site visits within network independently or in association with the national program office to audit quality of care, conformance with best practices and national guidelines and assist with developing improvement plans. They lead network workgroups related to respiratory care and participates in national workgroups at the request of the national program office. They actively participate in field advisory committees. They develop or assist in developing clinical research throughout all clinical program initiatives. They are the subject matter experts in the recruitment and selection process for RRT staff when the selecting official is not in the RRT occupation.

(16) Registered Respiratory Therapist, GS-15.

(a) Experience, Licensure and Credential. Candidates must:

i. Have one year of creditable experience equivalent to the GS-14 grade level demonstrating the clinical competencies described at that level.

ii. Hold an active license and RRT credential.

(b) Education. It is highly desirable that the candidate possess a Bachelor of Science degree from a nationally accredited college or university in respiratory care; or cardiopulmonary science; or a health-related field.

(c) Membership. Candidates must be a member of the American Association for Respiratory Care (AARC).

(d) Demonstrated Knowledge, Skills and Abilities. In addition to the requirements above, candidates must demonstrate all the following KSAs:

i. Ability to lead a large, diverse group of clinical and administrative professionals to facilitate collaboration and individual and organizational development.

ii. Ability to communicate program specific information, including changes to regulations and policies to staff and community partners.

iii. Skill in advising high level officials in adopting, conforming and monitoring performance measures of national program(s).

iv. Skill in advising high level officials in other policy guidelines related to national program(s).

v. Skill in advising high level officials in setting policy for national program(s) and directing staff in the monitoring of national program(s).
vi. Skill in advising high level officials in assessment and implementation of national program(s).

vii. Ability to develop and sustain strategic partnerships with key internal and external stakeholders and community partners on a national level.

viii. Skill in providing technical consultation and support for various projects and special initiatives, including responses to Congressional inquiries; developing high level briefing papers to convey findings and program positions.

ix. Ability to develop national program databases to track program data and trends.

x. Ability to respond to inquiries from within the Department, the Administration, Congress, Office of Management and Budget, the Government Accountability Office and others as appropriate.

(e) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and must be performed by the incumbent at least 25% of the time. This assignment is designated as the National RRT Program Manager for the Office of National Program Director for Pulmonary, Critical Care and Sleep Medicine and reports to the National Program Director. This RRT assists in leading the development and implementation of appropriate standards of care and performance measures for respiratory care across VHA. S/he assists to ensure that the delivery of respiratory care emulates “best practices” and follows national policies. S/he leads VHA respiratory care staff in the development and implementation of consistency in policies and procedures for respiratory care services. S/he directs the formulation, collection and analysis of data and other information regarding respiratory care and develops reports for the national program office and Congress. S/he advises leadership regarding nationwide access to respiratory care expertise, i.e., staffing levels and capacity. S/he develops and directs implementation of strategic plan regarding opportunities for initiation, maintenance and expansion of service delivery. S/he keeps abreast of emerging practice(s) and represents the VHA at the national conference of American Association of Respiratory Care or their successor and other national conferences as deemed appropriate by the national program office. This RRT develops plans for relevant education and training programs to be utilized nationwide in respiratory care and associated work groups. S/he coordinates and works closely with other program offices (example: Logistics, Biomed, Prosthetics) to assist with national purchases and contracts. S/he evaluates and provides clinical expertise and guidance in the treatment of patients. S/he makes site visits independently or in
association with the national program office to audit quality of care, conformance with best practices and national guidelines and assist with developing improvement plans. S/he creates reports to convey findings to national program office, VHA Central Office or Congress. This RRT establishes, leads or participates in national workgroups related to respiratory care. S/he disseminates information regarding changes in regulations, performance measures and national policies to VISN and facility level respiratory care leadership. S/he serves as surrogate at meetings as designated by the national program office. S/he supports clinical research and education and helps to emphasize this throughout all clinical program initiatives. S/he provides subject matter expertise in the recruitment and selection process of RRT staff when the selecting official is not in the RRT occupation.

7. DEVIATIONS.

   a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

   b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health in VHA Central Office prior to placement in the position.

   c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement or when specific credentials are identified as necessary to meet minimum requirements, unless an exception is annotated in the qualification standard.

1. **COVERAGE.** The following standard lists the requirements for appointment as a Physical Therapist (PT) in the Veterans Health Administration (VHA). The requirements will apply to all VHA PTs employed in the GS-0633 series that provide clinical services to address a vast array of problems that impact the health and function of a wide range of diverse patients. As independent practitioners, licensed physical therapists embrace evidenced based practice standards in diagnosis, examination, management, intervention, treatment and outcome measurement. Licensed physical therapists collaborate across the continuum of care. They ensure that services are coordinated, including ordering studies of value and being consumer-centered by referring, co-managing, engaging consultants, and independently supervising care.

2. **DEFINITIONS**

   a. **Appointing Official.** The Human Resources Management Officer is delegated appointing authority to process and authenticate notifications of personnel actions, and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

   b. **Approving Official.** The Veterans Integrated Service Network (VISN) Director, facility Director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

   c. **Journey Level.** The full performance level for this qualification standard is the GS-12 grade level.

   d. **Creditable Experience.** To be creditable, the experience must have required the use of knowledge, skills, abilities, and other characteristics (KSAs), also referred to as core competencies, and associated with the scope of physical therapy practice.

   e. **Part-Time Experience.** Part-time experience is creditable according to its relationship to the full-time work week. For example, one week of full-time credit is equivalent to two weeks of part-time work.

   f. **Direct Access.** As of January 1, 2015, all 50 states, the District of Columbia, and the US Virgin Islands allow patients to seek treatment from a licensed physical therapist without a prescription or referral. Patients are able to self-refer to physical therapists without being referred by a physician or other healthcare practitioner. Advanced clinical roles include managing direct access patients, as well as performing highly specialized clinical procedures such as dry needling, prescribing and training on assistive technology devices and durable medical equipment, ordering imaging studies and regenerative rehabilitation.

   g. **Differential diagnosis.** This process provides the physical therapist with a consistent way to screen for systemic diseases and medical conditions that can mimic neuromuscular and musculoskeletal
problems. The model covers past medical history, risk factor assessment, clinical presentation, associated signs and symptoms, and review of bodily systems for each patient.

h. **Movement diagnosis.** The human movement system comprises the anatomic structures and physiologic functions that interact to move the body or its component parts. Physical therapists examine and evaluate the movement system (including diagnosis and prognosis) to provide a customized and integrated plan of care to achieve the individual's goal-directed outcomes.

i. **Content Specialty/Specialty area.** Specialized content areas of physical therapy include, but are not limited to, geriatrics, neurology, cardiopulmonary, orthopedics, spinal cord injury, amputee, wound care, chronic pain, pelvic health, polytrauma, brain injury, lymphedema, vestibular, assistive technology, seating and mobility. As health care evolves content specialty will change.

j. **Clinical Residency.** A clinical residency is a planned accredited program of post-professional clinical and didactic education for physical therapists that is designed to significantly advance a physical therapist resident's preparation as a provider of patient care services in a defined area of clinical practice. It combines opportunities for ongoing clinical supervision and mentoring with a theoretical basis for advanced practice and scientific inquiry.

k. **Board Certification.** Board certification means having successfully passed a Board Certification examination administered by the American Board of Physical Therapy Specialties (ABPTS).

l. **Post-graduate Fellowship.** A post-graduate fellowship is a planned program of post professional clinical and didactic education for a physical therapist who demonstrates clinical expertise in an area of clinical practice related to the practice focus of the fellowship. (Fellows are frequently post-residency prepared or board-certified specialists). A post-graduate fellowship program includes advanced clinical and didactic instruction within a subspecialty area of practice with mentored clinical experience and sufficient and appropriate patient population to create an environment for advanced clinical skill building.

3. **BASIC REQUIREMENTS.** The basic requirements for employment as a VHA physical therapist are prescribed by Public Law 96-151 codified in 38 U.S.C. § 7402. To qualify for appointment, all applicants for the position of physical therapist in VHA must meet the following:

   a. **Citizenship.** Candidates must be a citizen of the United States. After a determination is made that it is not possible to recruit qualified citizens, necessary personnel may be appointed on a temporary basis under authority of 38 U.S.C. 7405 without regard to the citizenship requirements of 38 U.S.C. 7402 or any other law prohibiting the employment of or payment of compensation to a person who is not a citizen of the United States. Candidates must meet all other requirements for the grade and position concerned.

   b. **Education and experience.** The individual must meet at least one of the requirements below:

      (1) Bachelor's degree in Physical Therapy AND five (5) years of progressively independent experience as a physical therapist.
(2) Master’s degree in Physical Therapy AND two (2) years of progressively independent experience as a physical therapist.

(3) Doctorate degree in physical therapy.

NOTE: Prior to 1995 the terminal degree for PT's was either a bachelors or master’s degree. In 1995 CAPTE accredited all baccalaureate, master’s, and Doctor of Physical Therapy terminal degree programs. Effective 2002, CAPTE changed its scope of accrediting activities of PT education programs to include only those programs that culminate in post-baccalaureate degrees(eliminating the baccalaureate degree). Effective 2015, professional physical therapy education programs have only offered the Doctor of Physical Therapy (DPT) degree to all new students.

NOTE: Individuals must be a graduate of a Commission on Accreditation in Physical Therapy Education (CAPTE) accredited college or university. The CAPTE is the only accreditation agency recognized by the United States Department of Education (USDE) and the Council for Higher Education Accreditation (CHEA) to accredit entry-level physical therapy programs. Verification of accredited programs may be obtained from the American Physical Therapy Association (APTA) at www.apta.org.

(4) Foreign Graduates. Graduates of foreign physical therapy programs meet the requirements in subparagraph 3b if they have a full unrestricted and current license to practice physical therapy in a State, Territory or Commonwealth of the United States, or in the District of Columbia. The Foreign Credentialing Commission on Physical Therapy (FCCPT) is a non-profit organization created to assist the United States (U.S.) Citizenship and Immigration Services (formerly INS) and U.S. state licensing authorities by evaluating the credentials of Foreign Educated Physical Therapists (FEPTs) who wish to immigrate and work in the U.S. Although the licensing of physical therapists in the U.S. is a right and responsibility of each jurisdiction, foreign educated individuals must undergo an educational credentials assessment for substantial equivalency to the first professional degree in the US. The Federation of State Boards of Physical Therapy (FSBPT) is committed to protect the public and to provide leadership within the field and practice of physical therapy. FSBPT's Foreign Educated Standards Committee has developed standards that represent “best practices” in evaluation services. The Credentials Evaluation Standards were developed with input from the physical therapy credentialing agencies that are licensed to use FSBPT’s Coursework Tool.

c. Licensure. Individuals hold a full, current, and unrestricted license to practice physical therapy in a State, Territory or Commonwealth of the United States, or in the District of Columbia. Non-licensed PTs, who otherwise meet the basic requirements in this standard, may be given a temporary appointment as a graduate PT at the GS-11 grade level under the authority of 38 U.S.C. 7405 (a)(1)(D) for a period not-to-exceed two years from the date of employment on the condition that such PT provide care only under the supervision of a PT who is licensed. Failure to obtain licensure during that period is justification for termination of the temporary appointment.

NOTE. Individuals who have or have had multiple licenses and had any such license revoked for professional misconduct, professional incompetency or substandard care, or who surrendered such license after receiving written notice of potential termination of such license by the state for professional misconduct, professional incompetence, or substandard care, are not eligible for appointment to the position unless such revoked or surrendered license is fully restored (38 U.S.C 7402(f)).
November 30, 1999, this is a requirement for employment. This requirement does not apply to licensed physical therapists on VA rolls as of November 30, 1999, provided the individual maintains a continuous appointment and is not disqualified for employment by any subsequent revocations or voluntary surrenders of State license, registration or certification.

d. **Loss of Credential.** A PT who fails to maintain the required license must be removed from the occupation, which may result in termination of employment. At the discretion of the appointing official, an employee may be reassigned to another occupation, if qualified, and if a placement opportunity exists.

e. **Grandfathering Provision.** All licensed PTs employed in VHA on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and licensure that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees grandfathered into the GS-0633 occupational series as PTs may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation.

(2) PTs who are appointed on a temporary basis prior to the effective date of this qualification standard may not have their temporary appointment extended or be reappointed on a temporary or permanent basis until they fully meet the basic requirements of this standard.

(3) PTs initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration, meet all the basic requirements of this qualification standard and must maintain the required credentials as a condition of employment in the occupation.

(4) If PTs who are grandfathered under this provision leave the occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

f. **Physical Requirements.** Pre-placement and periodic physical examinations are required for hybrid occupations to ensure workers are placed in positions where they can perform the essential functions of their job considering their physical, mental and emotional capacities, without endangering their health or the health of their co-workers. See VA Directive and Handbook 5019.

g. **English Language Proficiency.** Individuals appointed under authority of 38 U.S.C. chapters 73 or 74, to serve in a direct patient-care capacity in VHA must be proficient in written and spoken English. See Chapter 2, section D, paragraph 5a, this part.

4. **GRADE REQUIREMENTS**

a. **Creditable Experience**
(1) Knowledge of Contemporary Professional Physical Therapy Practice. To be creditable, a candidate must have demonstrated possession of the required knowledge, skills, and abilities associated with the scope of physical therapy practice. The candidate’s experience may be evidenced by one or more of the following:

(a) Active professional practice. Active professional practice means paid/non-paid employment as a professional PT as defined by APTA or the appropriate licensing board. Experience gained after graduation but prior to licensure is creditable provided the candidate was utilized as a graduate PT and subsequently passed the licensure examination.

(b) Completion of a post-graduate fellowship or a post-graduate residency program may be substituted for creditable experience on a year for year basis.

(2) Quality of Experience. Experience is only creditable if it was post degree experience as a professional PT and is directly related to the duties to be performed. Qualifying experience must also be at a level comparable to or exceeding the professional PT experience at the next lower grade level.

b. Grade Determination. In addition to the basic requirements for appointment in paragraph 2, the following criteria must be used when determining the appropriate grade assignment of candidates.

(1) GS-11 Physical Therapist (Entry)

(a) Education, Experience, and Licensure. None beyond the basic requirements. (NOTE: See exception to licensure requirement in subparagraph 3c above.)

(b) Assignment. PTs at this level are responsible for providing assessment and treatment intervention. PTs plan and modify treatment based on a patient's response to intervention and/or change in medical condition. PTs at this level may be given general assignments in any physical therapy program area where advanced specialized knowledge is not required or may serve as the sole PT such as in an outpatient clinic. Licensed PTs may provide oversight and delegate patient care responsibilities to a Physical Therapist Assistant, and/or delegate non-patient care duties to non-licensed staff. PTs that are not licensed must practice under the close supervision of a licensed PT

(2) GS-12 Physical Therapist (Full Performance Level)

(a) Education, Experience and Licensure. In addition to the basic requirements, candidates must possess one year of experience equivalent to the GS-11 grade level, hold a valid unrestricted state license and demonstrate all the KSAs below:

(b) Demonstrated Knowledge Skills and Abilities:

1. Ability to make autonomous clinical decisions in a Direct Access environment. This includes ability to independently evaluate and treat patients who seek physical therapy services.
2. Skill in performing examinations and evaluations of individuals who have or may develop impairments, activity limitations, and participation restrictions related to conditions of the musculoskeletal, neuromuscular, cardiovascular, pulmonary, and/or integumentary systems while considering the effects attributable to unique psychosocial and environmental factors.

3. Ability to interpret findings from examination and evaluation, select appropriate test and measures, and integrate findings into the physical therapy plan of care for the full range of patient populations.

4. Ability to establish a diagnosis within the scope of physical therapy and identify the appropriate rehabilitation intervention, including referral to another provider for further consultation as clinically indicated.

5. Ability to determine physical therapy prognosis by incorporating examination findings with the patient’s preferences in order to set clinically appropriate treatment goals, optimize outcomes and maximize functional independence.

6. Ability to independently provide clinical oversight of Physical Therapy Assistants as well as students on clinical affiliations who are in Doctoral PT Programs or PTA Programs.

(c) Assignment. At the full performance level, PTs are responsible for independently providing assessment and treatment interventions to inpatients and outpatients received through healthcare provider referrals and patient self-referrals. Guided by differential and movement diagnoses, PTs perform examinations and evaluations of individuals who have or may develop impairments, activity limitations, and participation restrictions related to conditions of the musculoskeletal, neuromuscular, cardiovascular, pulmonary, and/or integumentary systems while considering the effects attributable to unique personal and environmental factors. PTs interpret findings from examination, diagnostic studies/medical tests and, during evaluation, select appropriate clinical tests and measures, and then integrate findings into the physical therapy plan of care for the full range of patient populations. PTs establish a diagnosis within the scope of physical therapy and identify the appropriate intervention to treat and/or refer to another provider for further consultation when needed. They determine physical therapy prognosis by incorporating examination findings with the patient’s preferences for meaningful level of function in order to set clinically appropriate treatment goals and optimize outcomes. Physical therapists select appropriate equipment needed to substitute for loss of function or to substitute for limited function of individuals they treat. Staff PTs at this level practice autonomously, making recommendations and referrals to other medical specialties/services as clinically indicated during ongoing assessment of patients under their care. The staff PT may also develop and provide individualized clinical training experiences for physical therapy students in facilities with established clinical experience rotations. PTs at this level may be given general assignments in any/all areas where physical therapy services are deemed necessary, and/or may serve as the sole PT at a less complex facility. Individuals may perform ancillary assignments as deemed appropriate given the needs of a facility on an occasional basis, where the amount of work is not substantial (less than 25% of the duty time).
(3) **GS-12 Physical Therapist (Lead)**

(a) **Experience.** In addition to meeting the basic requirements, one year of progressively complex experience equivalent to the GS-11 grade level. In addition, the candidate must demonstrate all the following KSAs.

(b) **Demonstrated Knowledge, Skills, and Abilities.**

1. Ability to coordinate workflow and clinical activities as well as monitor data reports within physical therapy section to ensure optimal patient care.

2. Ability to articulate and communicate to the clinical team the assignment, project, problem to be solved, actionable events, and objectives, as well as to advise on work methods, practices and procedures.

3. Ability to provide new staff orientation, staff development, and training.

4. Demonstrates advanced skill to serve as mentor and coach of the clinical team.

5. Ability to manage staffing requirements and priorities, and coordinate work in order to complete duties in an accurate and timely manner. This includes the ability to follow-up on pending issues and demonstrating an understanding of the impact of incomplete work.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at least 25% of the time. The Lead PT reports directly to a Supervisory PT. He/she monitors and makes work assignments, provides input on performance, resolves daily workplace issues and maintains efficient workflow. PTs at this level have experience that demonstrates the possession of advanced practice skills and judgment across many areas of physical therapy for both inpatient and outpatient clinics. Lead PTs are responsible for providing clinical practice guidance for other staff PTs and assist with problem solving. He/she assists PTs in determining treatment options for complex patients with multiple conditions. Lead PTs are responsible for ensuring work is completed by distributing and balancing workload among employees in accordance with established work flow or job specialization; assuring timely accomplishment of the assigned workload; and assessing the status, quality and progress of work, and making day-to-day adjustments in accordance with established priorities. Lead PTs obtain assistance from supervisors or managers on problems that arise. Lead PTs are generally found in higher complexity facilities, or in facilities of lesser complexity levels where large physical therapy departments are found. Individuals may perform ancillary assignments, including program management duties on an occasional basis, where the complexity and amount of work is not substantial.

(4) **GS-13 Physical Therapist (Supervisory)**

(a) **Experience.** In addition to meeting the basic requirements, one year of progressively complex experience equivalent to the GS-12 grade level. In addition, the candidate must demonstrate all the following KSAs.
(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of contemporary physical therapy across multiple areas of practice, and the demonstrated ability to apply this knowledge to provide clinical guidance to Staff PTs within the department.

2. Knowledge of human resources administration, including such functions as the ability to interview and select qualified applicants, monitor and evaluate performance, and maintain effective labor management relations within scope of responsibility.

3. Ability to effectively supervise, direct, and manage a diverse physical therapy staff.

4. Skill in forging positive interpersonal relationships and conflict resolution.

5. Ability to analyze clinically appropriate data effectively to optimize quality, performance, and productivity within the section.

6. Ability to set priorities, delegate tasks, and solve problems in order to meet multiple deadlines and identify/address organizational problems.

7. Ability to manage advocacy roles and planning activities within the VA and the greater rehabilitation community.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at least 25% of the time. Supervisory PTs are responsible for the supervision, administrative management, and direction of the physical therapy program in a rehabilitation service or equivalent service-level department which consists of three or more PTs or other multi-discipline staff. The incumbent provides supervision of key clinical and training programs, including the overall technical oversight of the staff that He/she administratively supervise. Supervisors are responsible for the development and implementation of policies and procedures to address focused clinical needs and the overall services delivered and provided within the section. He/she demonstrates autonomy in performing supervisory responsibilities that include, but are not limited to, assigning work to employees, monitoring workload and clinical volume, reviewing work of employees to assure accuracy and validity of submissions, assuring adequate clinical staffing, imposing disciplinary measures, and monitoring clinical privileges. He/she is required to provide overall clinical supervision that assures the proper coordination and delivery of care within the section and the facility.

(5) GS-13 Physical Therapist (Clinical Specialist)

(a) Experience. In addition to meeting the basic requirements, one year of progressively complex experience equivalent to the GS-12 grade level and one of the following:

1. Evidence of a minimum of 2,000 hours of clinical practice directly in the specialty area. This time must be between the past two and five years; or
2. Board Certification in the specialty area recognized by the ABPTS; or

3. Completion of a fellowship program; or

4. An additional advanced degree in a related field. In addition, the candidate must demonstrate the all following KSAs.

(b) Demonstrated Knowledge, Skills, and Abilities

1. Advanced knowledge and expert skill in a range of specialized interventions and treatment modalities used in a specialized treatment area of physical therapy.

2. Ability to serve as a consultant and subject matter expert for health care providers regarding the delivery of care within a specialized content area of physical therapy (see paragraph 2i).

3. Ability to teach and mentor medical center staff in a specialized content area of physical therapy.

4. Ability to guide the work of a multi-disciplinary team in a specialized content area of physical therapy.

5. Advanced knowledge and expert skill to perform and interpret specialized procedures and tests in evaluating the treatment outcomes in the assigned specialty content area (see Definitions, paragraph 2i).

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety. Clinical Specialists spend at least 25% or greater of their time working with specialized population(s) within their department. Physical therapists at this level perform assignments in specialty areas such as geriatrics, neurology, cardiopulmonary, orthopedics, spinal cord injury, amputee, wound care, chronic pain, electromyography, women’s health or pelvic health, polytrauma, brain injury, lymphedema, vestibular, assistive technology, seating and mobility. The individual is assigned responsibility for serving as the subject matter expert in the content specialty area and as a consultant to physical therapy and other medical center staff in evaluating and treating patients in the specialty area. Clinical Specialists have advanced knowledge and demonstrate expert clinical practice skills in providing assessment and treatment interventions across the continuum of care. He/she utilizes advanced knowledge and expertise to modify treatment plans and to identify therapeutic activity interventions based on the changing needs, goals and performance of patients. Clinical Specialists have advanced training in specialized technology related to their area of practice. He/she establishes and maintains contact with other health care providers involved in patient care via written, telephone, and personal communication on a regular basis. He/she exercises expert professional judgment to establish appropriate discharge planning recommendations to ensure safe discharge from inpatient or outpatient rehabilitation programs. If the medical center has a PT residency program, the clinical specialist may be on faculty for the program.
(6) **GS-13 Physical Therapist (Program Coordinator)**

(a) **Experience.** In addition to meeting the basic requirements, one year of progressively complex experience equivalent to the GS-12 grade level. In addition, the candidate must demonstrate all the following KSAs.

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to apply advanced knowledge of contemporary physical therapy within specialty area to provide clinical guidance, training or education for internal and external stakeholders.

2. Ability to serve as a consultant within the assigned program area for intra-agency and interagency planning and to provide service coordination to optimize program continuity, efficiency and effectiveness.

3. Knowledge of and skill in management, administration and/or education methodologies. This includes the ability to monitor and track data, utilize available resources effectively, evaluate program quality, and generate reports for local, and/or VISN and/or VACO leadership.

4. Ability to develop and coordinate treatment and/or educational programs within a concentrated field or specialty area, such as, but not limited to, amputee, spinal cord injury, chronic pain, student clinical education/residency programming, polytrauma/traumatic brain injury.

5. Ability to establish and maintain collaborative relationships within department and with other departments or affiliated programs.

6. Ability to guide the work of a multi-disciplinary team.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at least 25% of the time. PTs at this level have experience that demonstrates advanced practice skills and judgment across one or more areas of physical therapy. The individual may be assigned broad administrative responsibility. The individual is assigned a major content specialty area to include assessing, planning, evaluating and delivering care within a special clinical program or component of a Rehabilitation Service, which usually involves multiple disciplines. See the definition for specialty areas in paragraph 2. i, that includes Polytrauma/Traumatic Brain Injury, Chronic Pain, Amputation, Spinal Cord Injury and clinical education programs. PTs provide administrative direction and decisions related to the program. The Physical Therapy Program Coordinator is responsible for the coordination of multiple professionals from a variety of disciplines for optimal clinical care and educational programming. He/she implements programs, policies, and procedures to meet program goals, policy and external accreditation requirements. He/she monitors outcomes, participates in strategic planning and implements strategies for program improvement particularly in assigned content specialty area. The Program Coordinator supports the rehabilitation service and serves as a point of contact providing guidance to facility leadership on matters related to specialty content area. He/she collaborates with Clinical Specialists and with Rehabilitation Service leaders to assist with administrative processes to
obtain resources and equipment for operations of content specialty area. He/she assists with developing
local policy for new or emerging practices and technologies.

(7) **GS-14 Physical Therapist (Supervisor, Service Care Line Manager or Service Chief)**

(a) **Experience.** In addition to meeting the basic requirements, one year of progressively complex
experience equivalent to the GS-13 grade level. In addition, the candidate must demonstrate all the
following KSAs.

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Advanced knowledge of evidence-based practices and clinical practice guidelines in multiple
   professional areas.

2. Skill in managing interpersonal relationships and conflict resolution in dealing with a diverse
   range of employees, discipline lead(s), and administrators.

3. Ability to translate extensive rehabilitation knowledge into local policy development.

4. Ability to effectively supervise staff by providing clinical and administrative oversight. This
   includes ability to manage resources, evaluate employees and assign work.

5. Ability to collaborate with strategic planning committees at local, VISN or national levels for new
   ventures addressing patient care delivery systems, facilities management, system reorganizations, etc.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must
consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at
least 25% of the time. Supervisory PTs at this level are responsible for the professional and
administrative management of an assigned area in a large physical therapy service or a rehabilitation
service with multiple therapy related disciplines, including but not limited to the Physical Therapy (PT),
Occupational Therapy, Kinesiotherapy, Speech & Language Pathology, Recreation Therapy, and Blind
Rehabilitation. Supervisors manage staff, maintain effective interdepartmental relations, and cooperate
with other services to accomplish the medical facility’s mission and goals. He/she develops
performance standards, assures the program area is compliant with all regulatory and accrediting body
requirements, designs and implements orientation and training programs for staff, and develops and
maintains systems to monitor the performance of staff activities. He/she develops local policies and
procedures relative to their assigned area. He/she is responsible for determining resource needs,
allocating resources, ensuring proper utilization in productivity, efficiency, and cost effectiveness of the
operation. He/she formulates objectives and priorities and implements plans consistent with the long
term interest of the service or facility, capitalizing on opportunities and managing risks. Individuals at
this level would generally be found at a highly complex facility.
(8) GS-14 Physical Therapist (VISN/National/Regional Program Coordinator)

(a) **Experience.** In addition to meeting the basic requirements, one year of progressively complex experience equivalent to the GS-13 grade level. In addition, the candidate must demonstrate all the following KSAs.

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of and skill in management/administration, consultation, negotiation and compliance.

2. Advanced knowledge in the specialty program with application to interdisciplinary team function, goals and outcomes across multiple areas of practice.

3. Ability to serve as a consultant and liaison to local, regional or national coordinators and/or national program offices as well as other providers regarding the delivery of rehabilitation care within the specialty program area.

4. Demonstrates ability to serve as facilitator and/or negotiator in coordinating program initiatives among local, regional or national coordinators and interdisciplinary teams to improve quality of care for patients. Ability to evaluate, monitor and report on the status and progress of the specialty programs within the region.

5. Ability to develop and coordinate treatment programs within the specialty field nationally or within the region.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at least 25% of the time. PTs at this level manage all aspects of a distinct rehabilitation program or service at the VISN, national and/or region level and are generally found at regional centers or assigned to the national program office in VA Central Office. This position would include but not be specifically limited to programs such as amputee, spinal cord injury, chronic pain, Prevention of Amputation for Veterans Everywhere (PAVE), Polytrauma/TBI. This includes policy development, quality resources and specialty functions unique to the program to optimize program and patient outcomes. The program coordinator is knowledgeable about facility, regional and national policies to ensure compliance. This assignment requires administrative direction and decision making skills, but does not necessarily require formal supervisory responsibility for personnel. Physical Therapists in this role are responsible for strategic planning to ensure the provision of high quality services meet the needs of the Veterans being served. They are also responsible for developing and implementing short and long term goals and objectives consistent with the program’s strategic plan. Responsibilities include operation and management of key clinical, training, research, or administrative programs. He/she develops and implements programs, policies, and procedures to meet program goals, policy and external accreditation requirements at the VISN, national and/or regional level. He/she monitors outcomes and implements strategies for program improvement.

(9) GS-15 Physical Therapist (National PT Executive)
(a) **Experience.** In addition to meeting the basic requirements, one year of progressively complex experience equivalent to the GS-14 grade level. In addition, the candidate must demonstrate all the following KSAs.

(b) **Demonstrated Knowledge, Skills, and Abilities.**

1. Demonstrates advanced knowledge of health care organization operations and systems to resolve policy implementation issues with medical center directors/chiefs of staff, regional management, and various professional service representatives.

2. Ability to oversee national or large scale development of specialized clinical programs, recommending solutions to implementation problems.

3. Demonstrates advanced knowledge of the inter-relationships between the health care organization and subgroups within the system. This includes the ability to communicate effectively orally and in writing with a diverse group of professional staff and management officials who are often at the highest management levels.

4. Ability to influence high level officials in adoption of and conformance to performance measures, monitors, and other policy guidelines.

5. Skill in leading senior management officials in policy development.

(c) **Assignment.** The PT assigned to this position is responsible for providing national VA policy guidance in the overall administration of a system-wide physical therapy health care service. The Executive Lead is responsible for establishing over-arching VA physical therapy policy, providing guidance and clarification, establishing scopes of practice and credentialing, and suggesting staffing levels and appropriate utilization of PTs and PTAs throughout the VHA System of Care. He/she collaborates with other discipline executive leads within VA, American Physical Therapy Association, regulatory agencies outside VA to develop national policies and procedures for the advancement of physical therapy throughout the entire VA system. Responsibilities include overall planning, direction, and execution of the area of responsibility. Consultation is provided to high level officials in the field, at the VISN, and at VA Central Office (VACO) as it relates to establishing policy. He/she may author and coordinate white papers, issue briefs, and similar official documents and is responsible for responding to a variety of high level inquiries such as congressional, General Accounting Office as well as others.

5. **DEVIATIONS.**

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the education requirements be waived.
c. The placement of individuals in grade levels or assignments not described in this standard may only be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

Authority: 38 U.S.C. 7304; 7402]
APPENDIX G13. LICENSED PRACTICAL OR VOCATIONAL NURSE QUALIFICATION STANDARD  
Veterans Health Administration

1. COVERAGE. Following are the overall requirements for appointment as an LPN or LVN (licensed practical or vocational nurse) in VHA [. Such individuals engage] in nursing care [ ] which [requires] the [knowledge] and skills represented by licensure as an LPN or LVN [in a State, Territory, Commonwealth (i.e., Puerto Rico) of the United States, or District of Columbia. In their role as members of the discipline of nursing, LPNs/LVNs actively participate in and subscribe to the legal and ethical tenets of the nursing profession.]

2. SECTION A. BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Noncitizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. Education. Graduate of a school of practical or vocational nursing approved by the appropriate State [ ] agency and/or [accredited by] the National League for Nursing [Accrediting Commission (NLNAC)] at the time the program was completed by the applicant. Verification can be obtained from the State approving agency [or] the National League for Nursing [Accrediting Commission], 61 Broadway, 33rd Floor, New York, NY 10006. [Additional information may also be obtained from the NLNAC Website. Exceptions include:]

      (1) Health care education in the military service or training in the military service which is accepted by the licensing body in the jurisdiction in which the individual is licensed as qualifying for full LPN/LVN licensure will be accepted as meeting the education requirements for VHA employment.

      (2) [ ] VHA employees who were converted to appointments under 38 U.S.C. 7401(3) in implementation of Public Law 98-160, enacted November 21, 1983, and for VHA employees converted to appointments under 38 U.S.C. 7405 in implementation of Public Law 99-576, enacted October 28, 1986; and for their future personnel actions under this authority. The waiver will not apply to persons appointed under 38 U.S.C. 7401(3) or 7405 after these conversions.

      [(3) Individuals granted a license by a jurisdiction that does not require graduation from an approved school. See paragraph 4, section C.]

   c. Licensure. Full, active, current and unrestricted licensure as a [ ] licensed practical or vocational nurse in a State, Territory or Commonwealth (i.e., Puerto Rico) of the United States, or District of Columbia. An LPN[/LVN] who has or has ever had, any license(s) revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions in chapter 3, section B, paragraph 16 of this part.

e. **English Language Proficiency.** Licensed practical or vocational nurses appointed to direct patient care positions must be proficient in [both] spoken and written English as required by 38 U.S.C. 7402(d), and 7407(d).

3. **SECTION B. GRADE REQUIREMENTS**

a. **Definitions**

   (1) Qualifying experience is successful nursing practice [as an LPN/LVN,] maintaining acceptable standards within a health care setting under the direction of a registered nurse [(RN)] or physician [(MD/DO)]. This may include experience as a GPN [or GVN] (graduate practical [or vocational] nurse) provided the candidate was utilized as a practical or vocational nurse and passed the State licensure examination on the first attempt.

   (2) To be creditable, practical nursing experience (as an LPN or LVN) must be documented on the application and verified in an employment reference or through other [independent] means.

   (3) Part-time experience is credited according to the relationship it bears to the full-time workweek (e.g., an LPN[/LVN] who worked 20 hours per week, i.e., half-time, would receive 1 full-time workweek of credit for each 2 weeks of such service.)

   (4) The only exception to paragraphs 3a(1) through (3) would be qualifying experience for GS-4. See paragraph 3b(2)(b) below.

   (5) For the purposes of this Handbook, the term “State” includes States, Territories of the United States, the Commonwealth of Puerto Rico, and the District of Columbia.

b. **Grade Determination.** In addition to the basic requirements stated in section A, the following qualification criteria must be met for each grade. The candidate’s qualifications must clearly demonstrate the level of competence required for the grade.

   (1) **GS-3.** None beyond the basic requirements. [LPNs at this grade level are expected to perform all duties within the scope of their license (e.g., medication administration); however, completed work may require routine or detailed higher level review depending upon the complexity of the duties involved.]

   (2) **GS-4.** [Employees may be appointed at or advanced to GS-4 if they meet any of the criteria in paragraphs 3b(2)(a) through (c) below:

   a) Six months of qualifying experience as an LPN or LVN; or

   b) Graduation from an approved school (which may be waived as provided in paragraph 4 of Section C) and one year of experience that involved nursing care work in a hospital, outpatient clinic, nursing home, or other supervised medical, nursing, or patient care facility that provided a practical knowledge of human body structure and sterile techniques and procedures; or
(c) Graduation from an approved school of at least 24 months duration.

(d) LPNs at the GS-4 grade level perform all duties expected of employees at the GS-3 grade level; however, they are expected to exercise greater judgment, require less supervision, and to operate in accordance with all established policies, procedure, and techniques.]

(3) GS-5

(a) Completion of at least 1 year of qualifying experience at the GS-4 level or equivalent.

(b) Demonstrated knowledge and ability to provide a full range of practical nursing care to patients with a variety of physical and/or behavioral problems. [Works with the RN and/or MD/DO to appropriately orient/train less experienced LPNs/LVN and/or Nursing Assistants (NAs)/Health Technicians (HTs) in relation to acceptable standards of practice in promoting optimal patient care delivery. Provides effective education to patients and/or family members in relation to common disease processes, medication, and/or prescribed treatment regimes.]

(c) Demonstrated ability to serve as a responsible member of the nursing team and interact [in an appropriate manner] with patients, family members, professional and [other] supportive personnel [involved in the delivery of] patient care, [incorporating acceptable, established customer service standards into practice.

(d) Knowledge and skill sufficient to prepare, administer, and appropriately document actions taken specific to commonly prescribed oral, topical, subcutaneous, intramuscular, and/or intravenous medications as permitted by approved local facility policies and procedures. Observation and documentation will include patient’s response to medication administered and the reporting of any noted change in patient’s condition to RN or MD/DO.

(e) Knowledge and ability to recognize the need for and to institute emergency measures when indicated, promptly seek the assistance of the RN or MD/DO, and assist in resuscitation procedures in cardiac and/or pulmonary arrest.

(f) Recognizes and appropriately responds to breakage/malfunction or loss of equipment, safety hazards, and supply deficiencies, promptly reporting to appropriate personnel for corrective action.

(g) Completed work is under the general supervision of an RN or MD/DO. Individuals at this grade level are expected to have a broad working knowledge of practical nursing procedures. However, completion of more complex practices or procedures may be subject to closer higher-level review.]

(4) GS-6

[(a) Completion of at least [one (1)] year of [additional] qualifying experience at the GS-5 level or equivalent [, fully meeting all performance requirements for the GS-5 LPN/LVN.

(b) Technically proficient in initiating, performing and completing assigned duties in providing care to variable patient populations.
(c) Knowledge and ability to appropriately carry out assigned patient care based on the patients’ conditions; to use judgment in selecting the appropriate order and sequence of procedures and treatments; and to accurately recognize, report and record relevant patient information. Completed work only a general review by a registered nurse [(RN) or physician (MD/DO)] for appropriateness and conformity with established policies/procedures.

(d) Ability to observe, identify and respond to the patient’s needs for care, including medication, equipment-assisted care and patient/family education. In organizing and delivering care, the LPN/LVN recognizes and considers emotional, cultural, spiritual, socio-economic, and age-related factors.

(e) Prepares and administers prescribed medications (oral, topical, subcutaneous, intramuscular and/or intravenous) and performs treatments according to established policies/procedures. Observes for physical and/or emotional changes in patient’s condition from prescribed medications/treatments, promptly and accurately documenting noted changes, and reporting any deviations from normal to RN or MD/DO.

(f) Knowledge and ability to recognize urgent or emergent patient care situations, seek assistance of the RN and/or MD/DO, and initiate appropriate emergency interventions as directed.

(g) Knowledge and understanding of human behavior, patient motivations and reactions to situations, and ability to appropriately utilize this knowledge in working effectively with patients, family members, and other staff.

(h) Establishes constructive relationships with individual patients and their families to elicit feelings and attitudes, and to promote positive relationships, communication and socialization skills. Fosters an environment of respect for individual patient and family rights to privacy and dignity in all aspects of care delivery. Effectively incorporates knowledge and understanding of established customer service standards in all interactions with patients, family members, and/or other internal/external customers.

(i) Knowledge and skill in performing support duties for complex diagnostic tests and/or specialized practices or procedures, which include preparing the patient, assisting in the diagnostic examination, preparing and handling specialized instruments or other specialized equipment, and monitoring the patient’s condition before, during, and following the procedure. Serves as a preceptor in orienting, educating, and training less experienced LPNs/LVNs or NAs/HTs related to support duties for these more complex, specialized tests/procedures.

(j) Actively seeks out educational opportunities to enhance nursing knowledge and skills, sharing new knowledge gained with other staff to improve and advance nursing practice.

(5) GS-7. The GS-7 grade level is for select, complex LPN/LVN positions, as established by each health care facility. To be advanced, employees must meet all of the following standards, provided the standard is part of their assignment.

**NOTE:** Determinations concerning placement of positions at this grade level shall take into consideration the skill mix and the availability of supervision in the work unit. Although these positions
are under the supervision of an RN and/or MD/DO, employees in such settings successfully and consistently demonstrate the exercise of independent technical judgment (without the need for readily available supervision), as well as a comprehensive and thorough working knowledge of the most complex or difficult practices and procedures. Such individuals may also serve as leaders or co-leaders in a nursing unit or for a specifically identified group of patients.

(a) Completion of at least one (1) year of additional qualifying experience at the GS-6 level or equivalent, fully meeting all of the performance requirements for the GS-6 LPN/LVN.

(b) Knowledge and skills necessary to carry out more specialized patient care duties, including assignments in selected, more complex inpatient and/or outpatient care settings. Knowledge base promotes the incorporation of current patient care data in actively contributing to the development of the patient’s overall health plan and in carrying out assigned nursing interventions. Positions at this grade level require broader knowledge and skills because supervision is more general and employees are expected to be involved to a greater degree in the development and modification of treatment plans.

(c) Ability to assist RN and/or MD/DO to appropriately prioritize overall patient care needs and adjust plans for care delivery. Makes astute observations of subtle, less obvious changes, both physical and emotional, in patient’s condition, and accurately and thoroughly documents care delivered and patient’s response to care that could require immediate modification of the patient’s care plan. Appropriately seeks assistance and guidance by informing RN or MD/DO of changes in patient’s condition requiring higher-level intervention. At this grade level, the LPN/LVN is expected to participate to a greater degree in prioritizing, and, as appropriate, modifying patient care treatment. They must also possess the ability to observe more subtle physical and emotional changes in patients and demonstrate taking appropriate action based on those observations.

(d) Ability to proactively assist the RN or MD/DO in addressing patient’s needs for medication/treatments, accurately administering prescribed medications/treatments according to established policies/procedures and appropriately recording administration and patient’s response to medications/treatments received. (This may include restricted medication locally authorized for administration by employees at this grade level.) Demonstrates the knowledge and ability to readily recognize the more subtle signs and symptoms of potential or actual drug reactions, promptly inform the RN or MD/DO of observed changes in patient’s condition and initiate appropriate, prescribed interventions. Employees at this grade level demonstrate broader knowledge and skill with respect to these responsibilities than employees at lower grade levels.

(e) Knowledge and skill to promptly recognize potential urgent or emergent patient care situations, seek assistance of the RN and/or MD/DO for appropriate team intervention and effectively intervene, as directed, to assure the continuation of optimal, safe and therapeutic patient care delivery. At this grade level, the LPN/LVN must have a broader knowledge of the patient treatment process and exercise judgment that demonstrates the ability to effectively intervene when appropriate.

(f) Assists individuals or groups of patients and their families to take an active role in promoting healthy lifestyles for more positive patient outcomes. Exercises skill in influencing and communicating with unusually difficult to care for or communicate with patients and/or family members who may exhibit problems with lack of self-control, resistant or abusive behaviors, or impediments in their ability...
to understand or follow instructions. This includes the ability to effectively deal with the above types of patients under very general supervision.

(g) Exhibits skill, creativity and initiative in contributing to the improvement of overall care delivery and patient and/or family satisfaction levels through active participation in committees/task forces, research projects or in developing educational materials/media. Actively promotes and effectively incorporates established customer service standards in all aspects of their practice.

(h) Possesses comprehensive practical nursing knowledge and skills in specialized procedures and practices to serve as a resource person for other staff in organizing and implementing more complex/specialized patient care. Serves as a role model and mentor to other nursing staff in the application of more complex technology, effectively guiding and directing their continuing practice in these areas.

(i) Supports the RN or MD/DO in monitoring the practice of unlicensed nursing or non-medical staff in patient care delivery. Promptly reports any deviations from normal practice patterns to the RN or MD/DO. In addition to responsibilities at the lower grade level, the LPN/LVN is responsible for monitoring the practice of non-licensed nursing and medical staff.

(j) Work of considerable difficulty and responsibility is performed under general supervision. Individuals in these positions are, to a considerable extent, expected to exercise independent technical judgments and to possess and apply a comprehensive working knowledge of the principles, art and science of practical nursing. The staff mix is such that employees at this grade level are expected to perform practical nursing duties of considerable difficulty and responsibility under very general supervision.

(k) Actively seeks out educational opportunities to enhance nursing knowledge and skills, and providing leadership in assisting other staff improve and advance their nursing practice.

4. SECTION C. DEVIATIONS

   a. In cases where the application of the grade requirements [in Section B] will result in an inappropriate grade assignment, the appointing official may authorize deviations from the established requirements. [However, the basic requirements in Section A may not be waived, nor may individuals be assigned to grade levels above the GS-7 level.]

   b. The appointing official may [waive] the education requirement in section A to permit [ ] appointment of [an attendee or] graduate of a school of professional (registered) nursing when the individual’s qualifications warrant such consideration [, provided that the applicant meets the basic requirements for licensure as an LPN/LVN as stated in Section A, paragraph 2c. Graduate nurses with no experience may be appointed at GS-4, provided they have successfully completed the amount of education required to take the licensing examination, successfully pass the examination, and are granted a license by the State.]
c. [Appointing officials may waive the education requirement in Section A, paragraph 2b, if an LPN/LVN was licensed in a jurisdiction that does not require graduation from an approved school, provided the individual has demonstrated successful practice as an LPN/LVN. One year of successful practice is considered the equivalent of graduation from an approved school of 12 months duration.

d.] In exceptional circumstances, the appointing official may waive the experience requirement for LPNs/LVNs whose accomplishments, performance and qualifications warrant such consideration based on demonstrated ability to meet the requirements of the proposed grade.

Authority: 38 U.S.C. 7304; 7402.
[APPENDIX G14. OCCUPATIONAL THERAPIST QUALIFICATION STANDARD
GS-0631
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as an occupational therapist (OT) in the Veterans Health Administration (VHA). These requirements apply to all OTs in the General Schedule (GS) GS-0631 series, including those assigned to VA medical centers, community-based outpatient clinics, [readjustment counseling service/Vet centers], Veterans Integrated Service Network (VISN) offices, the VHA National Center for Organizational Development, and VHA Central Office. This work may include any one, or a combination of the following: providing professional clinical services, conducting research, carrying out education and training activities, clinical consultation, supervision, and administration. In performing these duties, [ ] OTs demonstrate professional knowledge of and skill in applying a wide range of theories, principles, and methodologies for the practice of occupational therapy.

2. DEFINITIONS.

a. Appointing Official. The Human Resources Management Officer is delegated appointing official to process and authenticate notifications of personnel actions, and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

b. Approving Official. The VISN director, facility director, or designee is the approving official and will determine whether to approve or disapprove the appointment of employees in hybrid occupations.

c. Journey Level. The full performance level for this qualification standard is GS-12.

d. Creditable Experience. [ ] To be creditable, the experience must have required the use of knowledge, skills, and abilities associated with current professional occupational therapy practice. Creditable experience can be obtained through employment as an OT. This may be evidenced by one or both of the following:

(1) Active professional practice. Active professional practice includes paid/non-paid employment as a professional OT, and as defined by the American Occupational Therapy Association (AOTA). Experience gained after graduation but prior to licensure/certification is creditable, provided the candidate was utilized as a graduate OT and subsequently passed the National Board for Certification in Occupational Therapy (NBCOT) certification, and the required state regulatory requirements.

(2) Completion of a post-graduate fellowship or a post-graduate residency program can be substituted for creditable experience on a year for year basis. Fellowships or post-graduate training programs are typically in specialty areas such as advanced
practice, research, mental health, gerontology, enhanced education, health policy, leadership and therapeutic sciences.

(3) **Quality of Experience.** Experience is only creditable if it is post-graduate experience as a professional OT directly related to the duties to be performed. Qualifying experience must be at a level comparable to professional occupational therapy experience at the next lower level. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

e. **Part-Time Experience.** Part-time experience is creditable according to its relationship to a full-time workweek. For example, an OT employed 20 hours per week, or on a half time basis, would receive one (1) full-time workweek of credit for each two (2) weeks of service.

[f.] **Content Specialty/Specialty area.** Specialized content areas of occupational therapy include, but are not limited to, geriatrics, mental health, neurology, cardiopulmonary, spinal cord injury, amputee, low vision, chronic pain, polytrauma, brain injury, lymphedema, assistive technology, hand therapy, driving and community mobility, and seating and mobility. As health care evolves content specialty will change.

3. **BASIC REQUIREMENTS.** The authority to set requirements is provided by 38 U.S.C. § 7402(b)(14).

a. **Citizenship.** Be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a)).

b. **Education [and/or Experience.]**

[(1) The individual must meet at least one of the following requirements below:

(a) Bachelor's degree in occupational therapy and two (2) years of experience as an occupational therapist;

NOTE: The baccalaureate degree must be from an approved program prior to the AOTA January 1, 2005 decision that the Accreditation Council for Occupational Therapy Education (ACOTE) would only accredit master or doctoral degree programs in occupational therapy.

or

(b) Bachelor's degree in occupational therapy and two (2) full years of graduate education in a related field;
NOTE: The baccalaureate degree must be from an approved program prior to the AOTA January 1, 2005 decision that ACOTE would only accredit master or doctoral degree programs in occupational therapy.

or

(c) Master’s Degree or higher in occupational therapy.

(2) Individuals must be a graduate of a degree program in occupational therapy approved by the ACOTE or predecessor organizations. This is inclusive of an internship (supervised fieldwork experience required by the educational institution). ACOTE is the only accreditation agency recognized by the United States Department of Education and the Council for Higher Education Accreditation. Degree programs may be verified by contacting the American Occupational Therapy Association website or at their office address: American Occupational Therapy Association, P.O. Box 31220, Bethesda, MD 20824-1220.

[c. Foreign Graduates. Graduates] of foreign occupational therapy programs meet the requirements of subparagraph [3b(2)] if they have a current, full, active and unrestricted license referred to in subparagraph [3e] of this appendix.

[d. Certification. Candidates must possess a current NBCOT certification as an OT.]

[e. State Licensure. Candidates must possess] a full, current, and unrestricted state license [ ], to practice occupational therapy in a state, territory or Commonwealth of the United States (i.e., Puerto Rico), or in the District of Columbia.

f. Loss of Credential. An employee in this occupation who fails to maintain [the required state or territorial licensure and the NBCOT certification, both current and in good standing,] must be removed from the occupation, which may result in termination of employment.

g. Exceptions for the Graduate Occupational Therapist.

(1) OT graduates from an approved occupational therapy program [who otherwise meet the minimum qualification requirements,] but who do not possess NBCOT certification and/or [ ]state [licensure], may be [appointed, pending certification and/or licensure,] as a graduate OT [on a full-time temporary appointment] not-to-exceed two years under the authority of 38 U.S.C. § 7405(c)(2).

[(2) Graduate OTs may only be appointed at the GS-9 grade level and may not be promoted/converted to the GS-11 level until licensure and/or certification is obtained. For grades levels at or above the developmental GS-11 grade level, the OT must be certified and licensed.

(3) A graduate OT may provide care only under the direct supervision of a licensed] OT who meets all state regulatory requirements.
(4) Temporary graduate OT appointments may not be extended beyond two years, or converted to a new temporary appointment.

h. **Failure to Obtain Licensure/Certification.** In all cases, graduate OTs must actively pursue obtaining required credentials (i.e., NBCOT certification and/or state licensure) from the date of their appointment. The human resource office will notify the uncertified/unlicensed OT in writing of the requirement to obtain certification/licensure, the date by which the certification/license must be acquired, and the consequences for not becoming certified/licensed by the deadline date. The written notice must be provided prior to the entrance on duty date. Failure to obtain required credentials by the prescribed date will result in termination of employment.

i. **Grandfathering Provision.** All [persons] employed in VHA [in this occupational series or in another occupational series that are also performing the duties as described in the qualification standard on the effective date of this] qualification standard are considered to have met all qualification requirements for the [ ] grade held including positive education and [ ] licensure/certification/registration [that are part of the basic requirements of this occupation]. [ ] Employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

1. They may be reassigned, promoted up to and including the full performance level, or changed to lower grade within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

2. If an OT who was retained under this provision leaves the occupation, the employee will lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

3. OTs initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

4. OTs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

k. **English Proficiency.** [Candidates must be proficient in spoken and written English to be appointed as authorized by 38 U.S.C. § 7403(f).]
4. GRADE [DETERMINATIONS. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.]

a. Occupational Therapist, GS-9

   (1) Education, Experience, or Licensure. None beyond the basic requirements.

   (2) Assignments. Individuals assigned at the GS-9 grade level serve as OT practitioners in a career development position progressively expanding their ability to provide assessment and treatment interventions for a wide range of human function systems. The entry level therapist has a basic foundation of OT and generally practices independently. OTs at this level typically have guidance from more experienced therapists. OTs that are not licensed must practice under the supervision of a licensed OT.

b. Occupational Therapist, GS-11

   (1) Education, Experience, or Licensure.

      (a) Completion of one year of experience equivalent to at least the GS-9 grade level and directly related to the position being filled;

      or

      (b) Three years of progressively higher level graduate education leading to a degree in occupational therapy or a directly related field;

      [or

      (c) Doctorate in occupational therapy.]

   (2) Demonstrated [Knowledge, Skills, and Abilities (KSAs)]. In addition to the experience or education above, the candidate must demonstrate all of the following KSAs:

      [(a) Knowledge of occupational therapy practice.

      (b) Ability to administer/interpret evaluation findings to develop and coordinate intervention plans, including goals and methods of treatment.

      (c) Ability to implement intervention plans directly or in collaboration with others.

      (d) Skill in monitoring an individual’s response to interventions and modify treatment plans and reevaluating as indicated.]
(e) Ability to communicate and or collaborate with patients, family members, caregivers, interdisciplinary professionals and/or other individuals verbally and in writing.

(f) Knowledge of health and safety regulations to minimize risk in the provision of patient care and the environment of care.

(g) Knowledge of applicable regulations governing documentation, reimbursement and workload entry in accordance with established professional practice.

(3) Assignment. [OTs at this grade level practice independently and are responsible for the assessment of functional and occupational roles using standardized tools. The OT modifies standardized and non-standardized evaluation tools. OTs select and provide direct occupational therapy interventions and procedures with routine complexity to enhance safety, wellness, performance in activities of daily living (ADL); and instrumental activities of daily living (IADL), education, work, play, leisure, and social participation. Occupational therapists require guidance with higher complexity conditions. OTs demonstrate an understanding of the theories of treatment in occupational therapy and their proper application through the use of activity analysis, behavioral intervention, frame of references, and therapeutic procedures. They are assigned to all program areas within VHA and provide professional, independent occupational therapy services.]

c. Occupational Therapist, GS-12

(1) Education, Experience, and Licensure. [ ] Completion of one year of experience equivalent to at the [GS-11 grade level and directly related to the position being filled.]

(2) Demonstrated KSAs. In addition to the [experience above, the candidate] must demonstrate all of the following KSAs:

[(a) Knowledge of occupational therapy principles and techniques consistent with current clinical standards based on OT theory and evidence based practice. Knowledge is inclusive of physical, occupational, cognitive, and psychosocial functional deficits.

(b) Ability to collaborate and communicate orally and in writing with all internal and external stakeholders.

(c) Ability to use critical analysis, clinical reasoning, and creativity to independently solve complex problems related to adapting and modifying assessments, treatment plans, activities and procedures to meet the needs of patients.

(d) Skill in procuring, fabricating, adjusting, adapting, and modifying orthoses, splints, and adaptive equipment for activities of daily living (inclusive of durable medical equipment).]
(e) Ability to conduct OT related in-service and clinical training.]

(3) **Assignment.** [OTs at this level practice independently and are responsible for comprehensive assessment of functional and occupational roles using standardized and non-standardized evaluation tools. OTs select and provide direct occupational therapy interventions and procedures with varying degrees of complexity to enhance safety, wellness, and performance in ADL, instrumental IADL, education, work, play, leisure, and social participation. OTs demonstrate a full professional understanding of the theories of treatment in occupational therapy and their proper application through the use of activity analysis, behavioral intervention, frame of references, and therapeutic procedures. They are assigned to all program areas within VHA and provide professional, independent occupational therapy services. OTs at this level may be given assignments in any area where advanced specialized knowledge is not required on a recurring basis due to the patient population served and complexity of the facility and/or treatment area. Individuals may perform ancillary assignments, including program management duties on an occasional basis, where the complexity and amount of work is not substantial (less than 25% of the duty time).]

d. **Occupational Therapist [(Clinical Specialist)], GS-13**

(1) **Education, Experience, and Licensure.** Completion of one year of experience equivalent to at least the [GS-12 grade] level and directly related to the position being filled [and one of the following]:

[(a) A minimum of 2,000 hours of clinical practice directly in the advanced practice area. This time must be within the past five years;

(b) Certification in an area recognized by the AOTA;

(c) Completion of a fellowship/residency or advanced degree program in the advanced practice area; or

(d) An additional advanced degree in a related field.]

[(2) **Demonstrated KSAs.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of contemporary occupational therapy across multiple areas of practice[.]

(b) [Ability to provide clinical guidance in the advanced practice area to other OT practitioners.

(c) Knowledge of advanced specialized evaluation, interventions and services to independently develop treatment strategies for area of specialization.
(d) Skill in developing protocols and procedures for intervention programs based on current occupational therapy theory, recent research, and practice.

(e) Ability to provide consultation to other health care practitioners and outside groups about occupational therapy scope of practice for area of specialization.

(f) Ability to implement, revise/update evidence based occupational therapy services and programming in area of specialization.

(3) **Assignment.** [Clinical OT specialists at this grade level serve as subject matter experts and as consultants to occupational therapists and other medical center staff in evaluating and treating patients in the areas of occupational therapy that are beyond the general practice of occupational therapy. This individual must demonstrate skills and techniques for a specific patient population that has highly complex occupational and/or psychosocial impairments. Clinical OT specialist may initiate, lead, and support research projects related to clinical needs. This may include grant writing, guiding others in the process, and direct clinical participation in research.]

e. **[Lead] Occupational Therapist, GS-13**

[(1)] **[Education, Experience, and Licensure.** Completion of one year of experience equivalent to at least the GS-12 grade level and directly related to the position being filled.

(2) **Demonstrated KSAs.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of contemporary occupational therapy across multiple areas of practice.

(b) Ability to apply advanced occupational therapy knowledge to provide clinical guidance and mentorship to OT practitioners.

(c) Ability to independently monitor and evaluate clinically appropriate treatment programs.

(d) Ability to act as a liaison between OT practitioners and the supervisor by coordinating clinical activities, program development, outcome management, and strategic planning.

(e) Ability to assess, prioritize, and address interpersonal or programmatic conflicts at the lowest possible level.

(f) Ability to implement, revise and update evidence based protocols, procedures and approved competencies for occupational therapy services.]
(3) **Assignment.** [Lead OTs provide professional guidance and consultation for OT practitioners. They monitor and evaluate clinically appropriate treatment programs with great autonomy. Individuals assigned as a lead OT are responsible for completing complex evaluations and treatments. They are required to apply advanced evaluation methodologies and treatment theories in the provision of care to a vast array of functional impairments and patients. They provide clinical practice guidance for other OT practitioners. Lead OTs collaborate with staff throughout the medical center to coordinate care and triage operations for their assignment. Lead OTs generally would be found in more complex facilities or departments.]

f. **[Supervisory Occupational Therapist, GS-13]**

(1) **Education, Experience, and Licensure.** Completion of one year of experience equivalent to at least the GS-12 grade level and directly related to the position being filled.

(2) **Demonstrated KSAs.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to balance multiple responsibilities, set priorities, delegate tasks, meet multiple deadlines, analyze organizational problems, and develop and implement effective solutions.

(b) Ability to analyze organizational and operational problems to develop and implement solutions that result in efficient operations and use data effectively to manage workload, quality performance, and productivity within the service.

(c) Skill in dealing with employees, team leaders, and managers to include conflict resolution.

(d) Ability to utilize evidence-based practices and clinical practice guidelines in a professional area and to guide the staff in applying these tools.]

(3) **Assignment.** [Supervisory OTs at this level are generally found at complex facilities. The supervisory occupational therapist is responsible for the supervision, administrative management and direction of the occupational therapy program in an OT section or equivalent work group. They have oversight for planning and directing the staff assignments in a variety of clinical settings. The supervisory OT provides a Veteran/client centered environment while enhancing staff engagement. Typical duties include: assigning work; monitoring clinical performance; resolving staff conflicts; identifying continuing education and training needs; and preparing performance standards and ratings. They interview candidates for positions; recommend appointments, advancements, or when appropriate, disciplinary actions; administer leave; and coordinate staffing needs. Supervisory OTs may provide occupational therapy and have capacity to care for more complex patients. They develop/initiate new treatment programs which integrate outcomes and]
advancements in practice from current research findings. The supervisory OT serves as an instructor in the facility’s in-service clinical training program. They serve as an advocate and resource consultant to the therapy staff and facility-at-large through communication with other departments, physicians, external agencies and other groups regarding programs and operation of the occupational therapy section.]

g. [Occupational Therapist (Program Coordinator), GS-13

(1) Education, Experience, and Licensure. Completion of one year of experience equivalent to at least the GS-12 grade level and directly related to the position being filled.

(2) Demonstrated KSAs. In addition to the experience above, the candidate must demonstrate all the following KSAs:

(a) Knowledge of contemporary occupational therapy within specialty area to provide clinical guidance, training, or education for internal and external stakeholders.

(b) Ability to set priorities, delegate tasks, meet multiple deadlines, and balance responsibilities.

(c) Ability to articulate and communicate the assignment, project, problem to be solved, actionable events, and objectives; as well as provide direction on work methods, practices and procedures in administration and/or education methodologies.

(d) Ability to monitor and report on the status and progress of work, evaluate the program to ensure that methods, deadlines and quality have been met, and ensure adjustments to the work process are in accordance with priorities.

(e) Ability to develop and coordinate treatment and/or educational programs within a concentrated field or specialty area, such as amputee, spinal cord injury, chronic pain, student clinical education/residency programming, polytrauma/traumatic or brain injury.

(f) Ability to effectively motivate and manage a diverse clinical staff with widely divergent backgrounds, interests, and points of view.]

(3) Assignment. [Occupational therapy program coordinators in this assignment evaluate, plan and direct a program to ensure proper coordination of care within the local facility inclusive of regional/national stakeholders such as The Joint Commission and the Commission on Accreditation of Rehabilitation Facilities (CARF), Universities, AOTA, and the VHA, Office of Academic Affiliation as appropriate. The OT program coordinator has full responsibility for managing the day-to-day activities of the program. They may be responsible for the coordination of assignments for multiple professionals comprising of an interdisciplinary team.
These programs may include but are not limited to polytrauma/traumatic brain injury, chronic pain, amputation, caregiver support program, spinal cord injury and clinical education programs. The OT program coordinator successfully collaborates with leadership, supervisors and staff to facilitate efficient and effective delivery of patient-centered care. They develop and modify standard operating procedures and ensure procedures are applicable to the assigned program. This assignment requires administrative direction and decision making skills, but does not necessarily require formal supervisory responsibility. The OT program coordinator makes decisions that affect staff and other resources with a wide latitude of control and independent judgment. They assist with special administrative projects such as strategic planning, performance improvement, and coordination and training of interdisciplinary team members.]

h. **Supervisory Occupational Therapist, GS-14**

(1) **Education, Experience, and Licensure.** [ ]Completion of one year of experience equivalent to at least the GS-13 level and [directly related to the position being filled].

(2) [**Demonstrated KSAs.** In addition to the experience above, the candidate must demonstrate all the following KSAs:]

a. [ ] Knowledge of evidence-based practices and clinical practice guidelines in multiple professional areas [ ] to use these resources to guide the program staff in providing clinically appropriate treatment interventions.

b. Skill in interpersonal relationships and conflict resolution in dealing with a diverse range of employees, team leaders, and administrators.

c. Ability to manage [resources] for a large, integrated service including not only occupational therapy, but also other focused rehabilitation, ancillary, or other health care services.

d. Ability to communicate effectively orally and in writing with a diverse group of professional staff.

e. Ability to translate extensive rehabilitation knowledge into cogent and useful policy in complex facilities and/or across multiple sites.

f. [ ] Skill in providing clinical and administrative oversight [and supervision of] multidisciplinary rehabilitation programs in complex facilities and/or across multiple sites.

g. Ability to collaborate with strategic planning committees at local, VISN or national levels for new ventures addressing patient care delivery systems, facilities management, and system reorganizations.
(3) **Assignment.** [The supervisory OT, service care line manager or service chief is responsible for the supervision, administrative management, and direction of an occupational therapy program or equivalent service-level department which typically consists of a multi-discipline staff and/or multiple facilities that may be separated geographically. The incumbent provides supervision of clinical and training programs, including the overall technical oversight of the OT practitioners whom they supervise. They are responsible for the development and implementation of policies and procedures that address focused clinical needs and the overall services provided within the section or service. They provide a Veteran/client centered environment while enhancing staff engagement. OTs at this level demonstrate a great deal of autonomy in performing responsibilities that include, but are not limited to, assigning work to employees, monitoring workload and clinical volume, reviewing work of employees to assure accuracy and validity of submissions, assuring adequate clinical staffing, imposing disciplinary measures, and monitoring clinical privileges. The OT supervisor, service care line manager or service chief serves as an advocate and resource consultant to the therapy staff and facility-at-large through communication with other departments, physicians, and external agencies. They select and monitor quality and performance measures for process improvement and patient satisfaction; obtain data from national and local databases; review and analyze various reports and complex data, complete trend analysis relating to quality improvement to ensure desired outcomes; monitors clinical service's compliance with the standards of external bodies and accrediting agencies; and recommends and assures remedial action. This level of assignment is typically located at VA medical centers or healthcare systems that are complex in nature and are affiliated with local colleges and universities.]

i. **Occupational Therapist [ ] (Program Coordinator), GS-14**

(1) **Education, Experience, and Licensure.** Completion of one year of experience equivalent to at least the GS-13 grade level and directly related to the position being filled.

(2) **Demonstrated KSAs.** In addition to the experience above, the candidate must demonstrate all the following KSAs:

(a) Ability to plan, evaluate and coordinate the wide ranging programmatic elements for services provided in concert with internal and external stake holders.

(b) Ability to serve as a facilitator and/or negotiator in coordinating program initiatives among local, regional or national coordinators and interdisciplinary teams to improve quality of care for patients.

(c) Ability to set priorities, delegate tasks, meet multiple deadlines and balance responsibilities and work with great autonomy.
(d) Ability to articulate and communicate the assignment, project, problem to be solved, actionable events and objectives; as well as provide direction on work methods, practices and procedures.

(e) Knowledge of internal and external resources related to the program managed.

(3) Assignment. OTs at this level serve as a VISN/national/regional program coordinator and manage all aspects of a program or service at the VISN, national and/or region level and are generally found at regional centers or assigned to the national program office and function with great autonomy. The program coordinator is knowledgeable about local, regional and national policies to ensure compliance. OTs in this assignment are responsible for strategic planning to ensure the provision of high quality services that meet the needs of the Veterans being served. OTs in this assignment are responsible for developing and implementing short and long term goals and objectives consistent with the program’s strategic plan. They may supervise employees assigned to the program. The coordinator may be responsible for tracking and maintenance of program outcomes, providing information and pertinent data elements for continuous quality improvement and adherence to all applicable standards such as The Joint Commission, CARF or other pertinent stakeholders.

j. Occupational Therapist, GS-15

(1) Education, Experience, and Licensure. Completion of one year of experience equivalent to at least the GS-14 grade level and directly related to the position being filled.

(2) Demonstrated KSAs. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of operations and systems to resolve policy implementation issues with medical center directors/chefs of staff, VISN management, and various professional service representatives.

(b) Ability to oversee program development of assigned specialized national clinical programs.

(c) Advanced knowledge of health care organizations and inter-relationships of subgroups within health care and rehabilitation organizations.

(d) Advanced skill in managing advocacy roles and planning activities within the Rehabilitation and Prosthetics Service and the greater rehabilitation community.

(e) Ability to generate protocols, to write and coordinate directives, handbooks, program guides and other administrative products relevant to rehabilitation.

(f) Skill in data analysis and review from a national perspective.
(g) Ability to develop new programs in support of the field and coordinate with intra/inter agency stakeholders.

(3) Assignment. The OT is a key program official in the VHA program office and is aligned with physical medicine and rehabilitation services. The incumbent is responsible for the management of national initiatives having a high degree of visibility and a significant impact on health care across VHA. Provides direct consultation via telecommunications and onsite visits for the purpose of data management, performance compliance and policy implementation, and problem resolution from a national perspective. Examples include national initiatives in the care and treatment of patients, educational programs, program evaluation, quality assurance, etc. These programs typically include collaboration with other Federal and state agencies, professional organizations, and services within VHA. This position affects changes at VHA-level and has higher reaching impact than the GS-14 level. OTs in this assignment will administratively coordinate national contracts that have a significant financial impact and understand the budget process to assure appropriate funding for program development. OTs in this assignment may provide data and documents to congress and other legislative entities.

5. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will education be waived. Under no circumstances will certification/state licensure requirements be waived above the GS-9 level.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

Authority: 38 U.S.C. §§ 7402, 7403]
APPENDIX G15. LICENSED PHARMACIST QUALIFICATION STANDARD
GS-660
Veterans Health Administration

1. COVERAGE. Requirements for appointment as a Licensed Pharmacist in Veterans Health Administration (VHA) are as follows:

2. BASIC REQUIREMENTS

a. Citizenship. Citizen of the United States. (Noncitizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

b. Education

(1) Graduate of an Accreditation Council for Pharmacy Education (ACPE) accredited College or School of Pharmacy with a baccalaureate degree in pharmacy (BS Pharmacy) and/or a Doctor of Pharmacy (Pharm.D.) degree. Verification of approved degree programs may be obtained from the Accreditation Council for Pharmacy Education, 20 North Clark Street, Suite 2500, Chicago, Illinois 60602-5109; phone: (312) 664-3575, or through their Web site at: http://www.acpe-accredit.org/. (NOTE: Prior to 2005 ACPE accredited both baccalaureate and Doctor of Pharmacy terminal degree program. Today the sole degree is Doctor of Pharmacy.)

(2) Graduates of foreign pharmacy degree programs meet the educational requirement if the graduate is able to provide proof of achieving the Foreign Pharmacy Graduate Examination Commission (FPGEC) Certification, which includes passing the Foreign Pharmacy Graduate Equivalency Examination (FPGEE) and the Test of English as a Foreign Language Internet-Based Test (TOEFL iBT).

c. Licensure. Full, current and unrestricted license to practice pharmacy in a State, Territory, Commonwealth of the United States (i.e., Puerto Rico), or the District of Columbia. The pharmacist must maintain current registration if this is a requirement for maintaining full, current, and unrestricted licensure. A pharmacist who has, or has ever had, any license(s) revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions in VA Handbook 5005, Part II, Chapter 3, section B, paragraph 16.

NOTE: Individuals who have or have had multiple licenses and had any such license revoked for professional misconduct, professional incompetence or substandard care, or who surrendered such license after receiving written notice of potential termination of such license by the State for professional misconduct, professional incompetence, or substandard care, are not eligible for appointment to the position unless such revoked or surrendered license is fully restored (38 U.S.C. § 7402(f)). Effective November 30, 1999, this is a requirement for employment. This requirement does not apply to licensed pharmacists on VA rolls as of that date, provided they maintain continuous appointment and are not disqualified for employment by any subsequent revocations or voluntary surrenders of State license, registration or certification.

(1) Exception. Non-licensed pharmacists who otherwise meet the eligibility requirements may be given a temporary appointment at the entry level as a Graduate Pharmacist under the authority of
38 U.S.C. § 7405(c)(2)(B). The appointing official may waive the requirement of licensure for a period not to exceed 2 years for a pharmacist that provides care under the supervision of a licensed pharmacist. For grade levels above the GS-11, the candidate must be licensed.

(2) **Failure to Obtain License.** In all cases, pharmacists must actively pursue meeting state prerequisites for licensure starting from the date of their appointment. At the time of appointment, the supervisor will provide the unlicensed pharmacist with the written requirement to obtain licensure, the date by which the license must be acquired, and the consequences for not becoming licensed by the deadline. Failure to become licensed within 2 years from date of appointment will result in removal from the GS-0660 Pharmacist series and may result in termination of employment.

d. **Grandfathering Provision.** All licensed pharmacists employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

1. Employees grandfathered into the GS-660 occupational series may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

2. Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard. Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration, that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

3. If a licensed pharmacist who was retained under this provision leaves the occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. **Physical Requirements.** See VA Directive and Handbook 5019.

f. **English Language Proficiency.** Pharmacists must be proficient in spoken and written English as required by 38 U.S.C. 7402(d), and 7407(d).

3. **GRADE REQUIREMENTS**

a. **Creditable Experience**
(1) **Knowledge of Professional Pharmacy Practices.** To be creditable, the experience must have demonstrated the use of knowledge, skills, and abilities associated with professional pharmacy practice. Professional practice means paid/non-paid employment as a professional or unlicensed graduate pharmacist as defined by the appropriate licensing board.

(2) **Residency and Fellowship Training.** Residency and fellowship training programs in a specialized area of clinical pharmacy practice may be substituted for creditable experience on a year-for-year basis. The pharmacy residency program must be accredited by the American Society of Health-System Pharmacists (ASHP). A fellowship program that is not accredited by the American College of Clinical Pharmacy (ACCP) will need to have comparable standards for experience to be creditable (Professional Standards Board refers to the Deputy Chief Consultant for Professional Practice for the determination).

(3) **Quality of Experience.** Qualifying experience must be at a level comparable to pharmacy experience at the next lower level. Experience as a Graduate Pharmacist is creditable provided the candidate was used as a professional pharmacist (under supervision) and subsequently passed the appropriate licensure examination.

(4) **Part-time Experience.** Part-time experience as a professional pharmacist is credited according to its relationship to the full-time workweek. For example, a pharmacist employed 20 hours a week, or on a 1/2-time basis, would receive 1 full-time workweek of credit for each 2 weeks of service.

b. **Grade Determinations.** In addition to the basic requirements for employment in paragraph 2, the following criteria must be met when determining the grade of candidates.

(1) **GS-11 Pharmacist**

(a) **Experience, Education, and Licensure.** None beyond the basic requirements.  
(NOTE: See exception to licensure requirement in subparagraph 2c(1) above.)

(b) **Assignment.** Pharmacists at this grade level serve in a developmental capacity.

(2) **GS-12 Clinical Pharmacist (Full Performance Level)**

(a) **Experience or Education.** In addition to the basic requirements, candidates must meet one of the following:

1. 1 year of experience equivalent to the next lower grade level, or

2. Completion of an ACPE-accredited Pharm.D. program.

(b) **Assignment.** A pharmacist in this assignment handles routine medication-related activities in accordance with local, Veterans Integrated Service Network (VISN), and national policies and regulations. These include, but are not limited to: reviewing, interpreting, and verifying medication orders for appropriateness; processing and filling medication orders; interacting with and making
recommendations to other clinical staff regarding medication therapy ordered to ensure safe and effective care; reviewing the patient's medications, allergies, labs, and other pertinent information from the medical record to identify and solve medication-related problems; contacting providers as appropriate; documenting recommendations and interventions; providing refill extensions and partial medication supplies; taking health and medication histories; performing medication reconciliation; providing drug information; assisting in formulary management including therapeutic substitutions, nonformulary reviews and medication usage evaluations; documenting and assessing adverse drug events (ADEs); assisting in medical emergencies; providing oversight of technical staff in all aspects of medication distribution. Pharmacists assigned to this position must demonstrate the following knowledge, skills and abilities (KSAs):

1. Knowledge of professional pharmacy practice.

2. Ability to communicate orally and in writing to both patients and health care staff.

3. Knowledge of laws, regulations, and accreditation standards related to the distribution and control of scheduled and non-scheduled drugs and pharmacy security.

4. Skill in monitoring and assessing the outcome of drug therapies, including physical assessment and interpretation of laboratory and other diagnostic parameters.

(3) GS-13

(a) Experience. In addition to the GS-12 requirements, must have 1 year of experience equivalent to the next lower grade level.

(b) Assignments. Candidates at this grade level are to be in one of the assignments listed below. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

1. Clinical Pharmacy Specialist. The clinical pharmacy specialist (CPS) functions at the highest level of clinical practice, works independently under their scope of practice as defined by the individual medical center to directly care for patients. A CPS plays a defined role in budgetary execution and serves as a mid-level provider who functions to initiate, modify or discontinue medication therapy and as a consultant for intensive medication therapy management services. This includes, but is not limited to, the following: designing, implementing, assessing, monitoring and documenting therapeutic plans utilizing the most effective, least toxic and most economical medication treatments; helping achieve positive patient centric outcomes through direct and indirect interactions with patients, providers, and interdisciplinary teams in assigned areas; performing physical assessments; and ordering laboratory and other tests to help determine efficacy and toxicity of medication therapy. Pharmacists assigned to this position must demonstrate the following KSAs:

a. Ability to communicate orally and in writing to persuade and influence clinical and management decisions.
b. Expert understanding of regulatory and quality standards for their program area.

c. Ability to solve problems, coordinate and organize responsibilities to maximize outcomes in their program area or area of clinical expertise.

d. Expert knowledge of a specialized area of clinical pharmacy practice or specialty area of pharmacy.

e. Advanced skill in monitoring and assessing the outcome of drug therapies, including physical assessment and interpretation of laboratory and other diagnostic parameters.

2. **Facility Program Manager.** Manages all aspects of a distinct program to include policy development, quality resources and specialty functions unique to the program to optimize cost effectiveness (budget) and patient outcomes. Coordinates a single program area of a complex pharmacy operation, or multiple program areas within a facility to develop, organize, manage, and control complex pharmacy programs. Develops, organizes, coordinates and manages single or multiple program areas within the medical facility; this may include a single program area at multiple facilities. The Program Manager title is reserved for those individuals who have one or more of the following: supervisory responsibilities for various sections within Pharmacy Service; a complex program requiring coordination of multiple locations such as medical center care facilities, Community Based Outpatient Clinics (CBOCs), rural health, telemedicine, etc; specialized areas of a complex nature such as nuclear pharmacy, quality assurance, pharmacy informatics, clinical applications coordinator, Home Based Primary Care, pharmacoeconomist or liaison pharmacist duties requiring the coordination of processes with other medical facilities or VISNs. Pharmacists assigned to this position must demonstrate the KSAs identified in subparagraph 3b(3)(b)1 above.

3. **Pharmacy Supervisor.** Responsible for the professional and administrative management of an assigned area in pharmacy service, to include budgetary execution. Such individuals have responsibilities for supervising multiple pharmacists and technicians. Manages people, maintains effective interdepartmental relations, and cooperates with other services to accomplish the medical facility’s mission and goals. Develops performance standards, assures that the program area is compliant with all regulatory and accrediting body requirements, designs and implements orientation and training programs for staff, and develops and maintains systems to monitor the performance of staff activities. Develops policies and procedures relative to their assigned area. Pharmacists assigned to this position must demonstrate the following KSAs:

a. Ability to effectively supervise subordinate staff.

b. Ability to communicate orally and in writing to persuade and influence clinical and management decisions.

c. Expert understanding of regulatory and quality standards pertaining to pharmacy.

d. Skill in managing people or programs.
4. **Associate Service Chief/Associate Consolidated Mail Outpatient Pharmacy (CMOP) Director.** Responsible for coordinating multiple programs in pharmacy service in a medical facility. Serves as the Acting Service Chief in the absence of the Service Chief. Develops and maintains a system of internal reviews that ensure service programs operate at a satisfactory level of performance and in compliance with regulatory and accrediting bodies. Has extensive responsibility for pharmacy utilization of resources and budget. Makes selections, assigns personnel, and serves as a mentor to help employees develop their full potential. (**NOTE:** *Associate Service Chief/Associate CMOP Director positions should be graded one grade below the grade of the Chief of Pharmacy Service or CMOP Director.*)

Pharmacists assigned to this position must demonstrate the following KSAs:

- a. Ability to negotiate to influence clinical and management decisions.
- b. Ability to effectively communicate orally and in writing regarding complex clinical and technical issues.
- c. Skill in utilizing regulatory and quality standards to develop and implement operational programs.
- d. Skill in managing multiple and diverse people or programs.
- e. Skill in utilizing available resources to support the mission and goals of the organization.
- f. Ability to plan, organize, and direct the functions of the pharmacy staff.

4. **GS-14**

   (a) **Experience.** In addition to the GS-13 requirements, must have 1 year of experience equivalent to the next lower grade level.

   (b) **Assignments.** Candidates at this grade level are to be in one of the assignments listed below. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

1. **National or VISN Program Manager.** Responsible for the management of national or VISN level programs. These programs include collaboration with other Federal agencies (e.g., National Institutes of Health, Public Health Service, Department of Defense, Food and Drug Administration (FDA), Centers for Disease Control, etc.) or organizations outside the Federal health care system. Programs of this magnitude are directed by VA Central Office or a VISN. (**NOTE:** VISN Pharmacist Executives are not included in this category.)

2. **Associate Service Chief/ Associate CMOP Director.** Responsible for coordinating multiple programs in pharmacy service in a medical facility. Serves as the Acting Service Chief in the absence of the Service Chief. Develops and maintains a system of internal reviews that ensure service programs operate at a satisfactory level of performance and in compliance with regulatory and accrediting bodies. Responsible for pharmacy utilization of resources and budget. Makes selections, assigns personnel, and
serves as a mentor to help employees develop their full potential. (NOTE: Associate Service Chief/Associate CMOP Director positions should be graded one grade below the grade of the Chief of Pharmacy Service or CMOP Director.)

3. **Service Chief.** Individual is assigned as Chief at Facility Complexity Level 2 or 3 medical facility but assignment does not have the high level of complexity to support a GS-15 grade as defined in paragraph (5)(b) below. Responsible for all aspects of pharmacy services at a medical facility by maintaining effective interdepartmental relationships, demonstrating active problem resolution skills and close cooperation with other programs and services in accomplishing the medical facility mission and goals. Responsible for budget management, determining resource needs, allocating resources, ensuring proper utilization in productivity, efficiency, and cost effectiveness of the operation. Formulates objectives and priorities and implements plans consistent with the long term interest of the organization, capitalizing on opportunities and managing risks. Responsible for compliance with all safety, regulatory, and accrediting body requirements. Delegates authority to several supervisory and program levels to meet the goals of the service and staff. Ensures orientation and training programs are established to ensure staff development, oversees academic affiliations, and participates in medical facility, VISN, National, other external governmental agencies, and professional associations.

(c) **Demonstrated KSAs.** The KSAs shown below apply to all assignments at this grade level, and the specific KSA designated by an asterisk (*) applies to assignment 2 and 3.

1. Skill in persuading others and gaining cooperation to accomplish goals.

2. Ability to effectively communicate orally and in writing regarding complex clinical and technical issues.

3. Skill in utilizing regulatory and quality standards to develop and implement operational programs.

4. Skill in managing multiple and diverse people or programs.

5. Skill in utilizing available resources to support the mission and goals of the organization.

*6. Ability to plan, organize and direct the functions of the pharmacy staff.

(5) **GS-15**

(a) **Experience.** In addition to the GS-14 requirements, must have 1 year of experience equivalent to the next lower grade level.

(b) **Grade Level Criteria.** At the GS-15 level, Chiefs of Pharmacy must meet the following:

1. Individuals are assigned as Chiefs of Pharmacy at Complexity Level 1a, 1b or 1c VHA facilities; or

2. Individuals are assigned as Chief of Pharmacy at Complexity Levels 2 or 3 and must meet the criteria noted in 2a and b below.
a. Must meet all of the following requirements:

(1) Manages a complex medical center based pharmacy program that is defined as having multiple practice settings (e.g. hospital ambulatory care, long-term care, behavior health care) that require Joint Commission review as separate standards.

(2) In addition to the medical center pharmacy, has responsibility for pharmacy services at one or more of the following: CBOCs, Rural Health Program, domiciliary, or provides dispensing and/or clinical services to State Veterans Home.

(3) Presence of advanced clinical pharmacy programs that include pharmacist(s) that have approved scopes of practice with prescriptive privileges.

(4) Pharmacy provides clinical pharmacist services to three (3) or more specialty areas such as, but not limited to, hemodialysis, oncology, operating room or an emergency department.

b. In addition to the requirements listed in 2a above, must meet at least two of the following:

(1) An ASHP Accredited Pharmacy Residency Program.

(2) A Research Program that is accredited by the Association for the Accreditation of Human Research Protection Programs (AAHRPP).

(3) Actively involved in committees or advisory/work groups at the VISN and/or National level.

(4) An ongoing pharmacy student rotation in both the intermediate and advanced practice experience settings.

c. Assignments. Candidates at this grade level are to be in one of the assignments listed below. For all assignments above the full performance level, the higher level duties must consist of significant scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

1. Service Chief. Responsible for all aspects of pharmacy services at a medical facility by maintaining effective interdepartmental relationships demonstrating active problem resolution skills and close cooperation with other programs and services in accomplishing the medical facility mission and goals. Responsible for budget management, determining resource needs, allocating resources, ensuring proper utilization in productivity, efficiency, and cost effectiveness of the operation. Formulates objectives and priorities and implements plans consistent with the long term interest of the organization, capitalizing on opportunities and managing risks. Responsible for compliance with all safety, regulatory, and accrediting body requirements. Delegates authority to several supervisory and program levels to meet the goals of the service and staff. Ensures orientation and training programs are established to ensure staff development, oversees academic affiliations, and participates in medical facility, VISN, National, other external governmental agencies, and professional associations.
2. **CMOP Director.** Responsible for all programs and services provided by the CMOP. Provides prescription mail-out services to multiple VA facilities across geographic regions. Services include filling, labeling, shipping, and tracking shipment of prescription medications and medical supplies. Ensures all prescriptions transmitted from the medical centers are processed in a timely and cost-effective manner. Responsible for all resources that affect the outcome of the CMOP’s daily workload.

3. **Veterans Integrated Service Network (VISN) Pharmacist Executive (VPE).** VPEs are program managers responsible for the administration and management of Pharmacy Benefits Management (PBM) Services for an entire network. Serves on the National Formulary Committee and makes decisions on the structure and content of the National Formulary. Serves as an advisor to VACO for development of PBM policy. Assignment may be collateral duty or a separate position within the VISN. Serves as the network pharmacy lead on all aspects of facility pharmacy operations within a network, including new pharmacy construction, pharmacy physical requirements, inpatient, outpatient and controlled substance distribution models used, as well as all pharmacy processes including drug research, clinical pharmacy practice, pharmacy automation, adverse drug event reporting, drug recalls, and related pharmacy issues. Serves as the point of contact for VISN pharmacy contracts, including diabetes test strip selection, first/urgent fill pharmacy contract and Veteran State Home Contracts/Agreements. Responsible for oversight of the total network drug and CMOP budget. Reports to the Network Director or designee but works closely with the VISN Chief Financial Officer (CFO) and/or other VISN level clinical positions in areas involving pharmacy services.

4. **National Pharmacist Executive.** National Pharmacist Executives serve as national program managers for PBM. Responsible for multiple programs at the national level and interact with other government agencies and standards organizations.

(d) **Demonstrated KSAs.** The KSAs shown below apply to all assignments at this grade level, and the specific KSAs designated by an asterisk (*) apply to assignment 1 and 2.

1. Skill in persuading others and gaining cooperation to accomplish goals.

2. Ability to effectively communicate orally and in writing regarding complex clinical and technical issues.

3. Skill in utilizing regulatory and quality standards to develop and implement operational programs.

4. Skill in managing multiple and diverse people or programs.

*5. Skill in utilizing available resources to support the missions and goals of the organization.*

*6. Ability to plan, organize and direct the functions of the pharmacy staff.*

4. **DEVIATIONS**

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment warrants such action.
b. Under no circumstances will the educational requirement be waived. Under no circumstances will the licensure requirement be waived above the GS-11 level.

c. The placement of individuals in grade levels not described in the qualification standard must be approved by the Under Secretary for Health or designee in VHA Central Office.

Authority: 38 U.S.C. 7304; 7402]
1. **Coverage.** The following are the overall requirements for appointment as a doctor of chiropractic in the Veterans Health Administration (VHA).

2. **Section A. Basic Requirements**

   a. **Citizenship.** Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. **Education.** Degree of doctor of chiropractic, or its equivalent, resulting from a course of education in chiropractic. The degree must have been obtained from one of the schools or colleges approved by the Secretary of Veterans Affairs for the year in which the course of study was completed. Approved schools are:

      (1) United States schools or colleges of chiropractic listed as accredited by the Council on Chiropractic Education, at http://www.cce-usa.org/, or equivalent agency, in the list published for the year in which the course of study was completed.

      (2) Schools (including foreign schools) accepted by the licensing body of a State, Territory, or Commonwealth of the United States (i.e., Puerto Rico), or in the District of Columbia as qualifying for full or unrestricted licensure.

   c. **Licensure or Registration**

      (1) **Doctor of Chiropractic (Except Residents).** Current, full and unrestricted license to practice chiropractic in a State, Territory, or Commonwealth of the United States, or in the District of Columbia. The facility Director may waive this requirement if the doctor of chiropractic is to serve in a country other than the United States and the doctor of chiropractic has licensure in that country.

      (2) **Residents.** Licensure in a State, Territory, or Commonwealth of the United States, or in the District of Columbia before completion of the first year of a VA residency. Unlicensed residents must meet any registration or other equivalent requirements established for chiropractic residents of non-VA facilities or chiropractic clinics with which the VA facility is affiliated for training purposes during the first year of VA residency.

      (3) **Impaired Licensure.** A doctor of chiropractic who has, or has ever had, any license(s) revoked, suspended, denied, restricted, limited, or issued/placed on a probationary status may be appointed only in accordance with the existing VA provisions applicable to other independent licensed practitioners, in chapter 3, section B, paragraph 14, this part.

**Note:** Licensure may be waived by the Under Secretary for Health or designee in Central Office, for individuals in research or academic assignments involving no direct patient care in accordance with current regulations.

e. **English Language Proficiency.** Doctors of chiropractic appointed to direct patient-care positions must be proficient in spoken and written English as required by 38 U.S.C. 7402(d) and 7407(d).

3. **SECTION B. GRADING REQUIREMENTS.** In addition to the basic requirements stated above, the following qualifications criteria must be met in determining the appropriate grade assignment of candidates.

a. **Associate Grade.** None beyond the basic requirements.

b. **Full Grade.** Two years of full-time chiropractic practice or its equivalent. One year of full-time post-graduate residency specialty training from a chiropractic school or college accredited by the Council on Chiropractic Education, or equivalent agency approved by the Secretary of Veterans Affairs, is acceptable in lieu of the 2 years of practice. Candidate must have demonstrated the professional competence and performance necessary to provide independently the full range of clinical diagnosis and chiropractic treatment for the most prevalent neuro-musculoskeletal conditions including subluxation complex.

c. **Intermediate Grade.** A doctor of chiropractic at the Intermediate grade meets the requirements for Full grade and the requirements in subparagraphs 3c(1) and (2):

   (1) A total of 4 years of chiropractic practice or its equivalent. Acceptable in lieu of 4 years of practice is completion of a 3-year full-time post-graduate residency program from an accredited U.S. chiropractic college, as evidenced by documentation of completion (e.g., transcript), which renders the doctor of chiropractic eligible for certification by a specialty board recognized by the American Chiropractic Association, the International Chiropractors’ Association, or the American Board of Chiropractic Specialties to obtain Diplomate status.

   (2) Demonstrates a high level of professional attainment. Examples of such attainment are:

   (a) Is a recognized expert in dealing with a variety of unusually difficult chiropractic cases which are referred by other facilities for resolution and recommended courses of action to provide for maximum rehabilitation. Typically, in this capacity serves as a consultant to doctors of chiropractic or other professionals in other health care facilities.

   (b) Has assumed responsibility for a multi-faceted chiropractic program including clinical research and/or training requiring a high degree of competence and skill in developing innovative, new and advanced diagnostic and treatment techniques. Typically, the program is in an educationally affiliated health care facility having a chiropractic training program of moderate scope involving liaison with other medical services and affiliated schools.

   (c) Played a significant part in the conduct of research in a problem area of considerable scope and complexity that required novel approaches and which resulted in answers to important questions or important changes in existing methods and techniques. Publications authored by the doctor of
chiropractic are of considerable value to others in the individual’s field. Typically, overall contributions are recognized by serving on important committees or other bodies in the profession.

(d) Has full responsibility for carrying out a chiropractic training program of significant size in which the doctor of chiropractic is responsible for maintaining liaison with the affiliated school and other educational institutions and professional or scientific organizations. The individual has displayed innovative approaches in development of curriculum and course content and in expanding and improving the educational program.

d. **Senior Grade.** The Senior grade is restricted to selected leadership positions. The individual’s qualifications, as well as the scope and complexity of the assignment, are considered. A doctor of chiropractic at the Senior grade meets the requirements for Intermediate grade and the requirements in subparagraphs 3d(1) and (2):

(1) The doctor of chiropractic at this grade will meet one or more of the following:

(a) Possesses such academic stature as would warrant a faculty appointment of a professorial level (i.e., full professor) in a school or college of chiropractic or other appropriate affiliated school or college.

(b) Has been awarded Diplomate status by a specialty board recognized by the American Chiropractic Association, the International Chiropractors’ Association, or the American Board of Chiropractic Specialties and is currently in good standing with the specialty board.

(2) Demonstrates superior professional attainment. Examples of such attainment are:

(a) Serves as a team leader in addressing major chiropractic problems affecting the continued provision of quality care health services at a Veterans Integrated Service Network or national level. The recommendations and conclusions of the doctor of chiropractic are highly regarded.

(b) Has assumed responsibility for carrying out a major chiropractic program segment on a national level.

(c) Conducts research in a difficult area of major scientific interest that has contributed to a substantial advance in the chiropractic health field with important professional publications.

e. **Chief Grade.** The Chief grade is restricted to selected leadership positions. The Individual’s qualifications, as well as the scope and complexity of the assignment, are considered. A doctor of chiropractic at the Chief grade meets the requirements for Senior grade and must demonstrate a sustained very high level of professional performance with evidence of the exceptional professional and/or administrative development in subparagraphs 3e(1) and (2):

(1) Has assumed substantial professional and/or administrative responsibilities in which the individual is expected to fully advise and make professional clinical and educational recommendations as to courses of action on problems and considerations of national scope. The doctor of chiropractic at
this level has responsibility for a major chiropractic program segment on a nationwide basis and is consistently called upon to represent the organization in an authoritative manner in matters dealing with development of new and/or revised concepts and programs having a major impact upon the academic, medical, and chiropractic communities.

(2) Has demonstrated outstanding professional attainment. Examples of such attainment are:

(a) Achievement of outstanding results in research that is regarded as having a major impact on advancing the field.

(b) Significant number of noteworthy publications in nationally recognized professional journals.

f. Chiropractic House Staff.

(1) First-Year Residents. Meets requirements specified in section A of this Appendix. Obtain licensure to practice chiropractic in a State, Territory, or Commonwealth of the United States, or in the District of Columbia during the first year of VA residency.

(2) Second-Year Residents. Meet requirements specified in section A. In addition, must have competed 1 year of approved residency training or its credible equivalent from an accredited U.S. chiropractic college.

(3) Third-Year Residents (if applicable). Have the qualifications of the second-year resident. In addition, must have competed 2 years of approved residency training or its credible equivalent from an accredited U.S. chiropractic college.

g. Attendings.

(1) Meet all basic requirements specified in section A of this appendix.

(2) Possess a demonstrated satisfactory ability in chiropractic; be capable of assisting in maintaining accepted standards of professional chiropractic care in VA facilities; and be capable of accepting full responsibility for such proper care and treatment of their assigned patients.

(3) Be an outstanding member of the local chiropractic community of the caliber of a faculty member. Where the attending does not hold a faculty appointment at an affiliated chiropractic or other appropriate affiliated school or college, this would be evidenced by a recommendation of the Deans Committee or equivalent body. The attending is capable of giving adequate training to chiropractic residents or students in facilities conducting residency and/or training programs and be sufficiently qualified as to be acceptable to appropriate training review committees for the direction of training.

h. Consultants.

(1) Meet all basic requirements specified in section A of this appendix.
(2) Possess outstanding professional clinical ability in chiropractic; be capable of affording the facility Director and appropriate Chief of Service, the benefits of their professional experience and counsel; and be capable of rendering such professional chiropractic services as may be required in maintaining the highest possible level of chiropractic care and services in VA facilities.

(3) Be capable of accepting the responsibility for, and direction of, the educational training of residents in the program for which they serve as the consultant at facilities conducting residency training programs. Consultants not holding faculty appointments at an affiliated chiropractic or other appropriate school or college should possess the equivalent professional qualifications as evidenced by an appropriate recommendation for appointment from the Deans Committee or equivalent body responsible for the recommendation of consultant appointments to the VA facility.

4. SECTION C. DEVIATION. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements in section B for doctors of chiropractic whose composite record of accomplishments, performance, and qualifications warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

Authority: 38 U.S.C. 7304; 7402.]
DEVELOPMENT OF QUALIFICATION STANDARDS
FOR VETERANS HEALTH ADMINISTRATION (VHA) POSITIONS FILLED UNDER 38 U.S.C. § 7401(3)

1. SCOPE. This appendix provides VA procedures for the development of qualification standards by VHA Central Office program officials and occupation-specific subject matter experts, working with representatives of the Office of Human Resources Management and Labor Relations, for VHA positions under 38 U.S.C. § 7401(3). Authority is given to the Secretary under 38 U.S.C. § 7402 to prescribe qualifications for occupations identified in § 7401(3).

2. BACKGROUND. The following provides basic information about qualification standards and specific information about VA qualification standards.

   a. A qualification standard is a statement of the minimum requirements that an individual must meet to be qualified for entry into and promotion in the occupation. This includes education, experience, citizenship, credentialing requirements (licensure, registration, certification), physical requirements and specific competencies (knowledge, skills, abilities and personal characteristics).

   b. The basic qualification requirements for individuals appointed under 38 U.S.C. § 74 in occupations identified in section 7401(3), are contained in VA qualification standards approved by the Secretary of Veterans Affairs upon recommendation of the Under Secretary for Health.

   c. The Assistant Secretary for Human Resources and Administration is authorized to approve for the Secretary, qualification standards and examining guides that are established within the Department.

   d. Qualification standards for individuals appointed under 38 U.S.C. § 7401(3) are based primarily on the rank-in-person concept where the combination of individuals' accomplishments, performance and qualifications determine their grade level. This differs from the Title 5 rank-in-position concept where the grade level is based solely on the duties and responsibilities of the position held. For positions above the full-performance (journey level) the complexity of the assignment and scope of responsibility are considered in establishing grade levels.

   e. The qualification standards will be used extensively by members of the occupation who are not human resources professionals. Therefore, the language of Title 38 Hybrid qualification standards must be plain and clear without excessive use of human resources references.

   f. These standards apply to all appointments in Title 38 Hybrid occupations under authority of 38 U.S.C. § 7401(3) regardless of the nature or tenure of the appointment.

   g. Current VA qualification standards for Title 38 Hybrid positions are located in VA Handbook 5005, Part II, I-G1 through the last appendix.

3. IMPLICATION. Qualification standards are critically important documents necessary for the identification of candidates with the needed knowledge, skills, and abilities to perform VA’s work. Qualification standards establish basic requirements which are predictive of successful performance. The application of qualification standards in VHA is an integral part of ensuring a fully qualified workforce is available to care for our patients.
4. INTERPRETING QUALIFICATION STANDARDS. The following information is pertinent to the interpretation of VA qualification standards:

   a. VHA appointing officials, Professional Standards Boards, [and Human Resources Officers] act for the Under Secretary for Health in applying the qualification standards in a fair and consistent manner. Such decisions are made through an analysis of personal data and/or experience records. [Training will be provided to Human Resources Officers and management officials regarding the interpretation of qualification standards.]

   b. When there is disagreement on the interpretation of a qualification standard, the appropriate HRM Officer may request an interpretation or decision from the Deputy Assistant Secretary for Human Resources Management (059). A courtesy copy of such request will be sent to the appropriate VHA Program Official in VA Central Office, and representatives of union organizations at the national level.

5. RESPONSIBILITIES. The following is an explanation of responsibilities associated with the development of VA qualification standards:

   a. Qualification standards are developed by teams with representatives from the Office of Human Resources Management [ ] and subject matter experts from VHA. At least 25% of the VHA team membership will be non-managerial members who are performing the work as a full time practitioner.

   b. VHA Field facilities may be requested to review and comment on drafts of VA qualification standards.

6. GENERAL GUIDELINES

b. **Education and Grade Equivalents for one-grade interval positions.** The following table should be used as a guideline for determining appropriate grade levels based on education substitution alone. Specific education substitutions will be included in the individual occupation qualification standard.

**Appropriate Grade Levels and Qualifying Education**

<tr>
<td>GS-5</td>
<td>4 academic years above high school leading to a bachelor’s degree with courses related to the occupation, or Bachelor’s degree</td>
</tr>
<tr>
<td>GS-6 and above</td>
<td>Graduate education or an internship may be used to substitute for specialized experience only in those instances where it is directly related to the position being filled.</td>
</tr>
</tbody>
</table>

NOTE: Educational training programs, such as an internship, practicum, etc., that are included in, or supplemental to, an academic degree are not creditable for professional experience. Such programs are considered part of the basic requirements for professional practice in the field.

c. **Education and Grade Equivalents for two-grade interval positions.** The following table should be used as a guideline for determining appropriate grade levels based on education substitution alone. Specific education substitutions will be included in the individual occupation qualification standard. In some VHA occupations graduate education leading to a degree may not be substituted for the full degree.

**Appropriate Grade Levels and Qualifying Education**

<table>
<thead>
<tr>
<th>Grade</th>
<th>Qualifying Education</th>
</tr>
</thead>
<tbody>
<tr>
<td>GS-5</td>
<td>4 academic years above high school leading to a bachelor’s degree, or Bachelor’s degree</td>
</tr>
<tr>
<td>GS-7</td>
<td>See Advanced Entry-Level Placement Criteria (for two-grade interval work)</td>
</tr>
<tr>
<td>GS-9</td>
<td>Master’s degree (or equivalent graduate degree such as LL.B. or J.D.) or 2 academic years of progressively higher level graduate education in a related field</td>
</tr>
<tr>
<td>GS-11</td>
<td>Ph.D. or equivalent doctoral degree or 3 academic years of progressively higher level graduate education leading to a degree in a related field</td>
</tr>
</tbody>
</table>

NOTE: Educational training programs, such as an internship, practicum, etc., that are included in, or supplemental to, an academic degree are not creditable for professional experience. Such programs are considered part of the basic requirements for professional practice in the field.
d. **Criteria for Advanced Entry-Level Placement.** Applicants who meet all qualification requirements for the GS-5 grade level of two-grade interval occupations may be appointed at the GS-7 grade level if they possess one of the following:

1. Bachelor’s degree from an accredited college or university in a major field of study related to the Title 38 Hybrid occupation, including those occupations that have a positive education requirement.

2. Bachelor’s degree from an accredited college or university unrelated to the Title 38 Hybrid occupation that included or was supplemented by at least one of the following:

   a. At least 30 semester hours (or at least the same number of hours required by the educational institution for a major field) of directly related, upper level undergraduate courses (e.g., at least 200-course level or higher, or as identified by the college or university) for the hybrid occupation, or one full year of graduate level coursework (typically at least 15-18 semester hours) for the hybrid occupation; or

   b. Directly related practicum/internship in the hybrid occupation, either included in the degree or post-degree; or

   c. Directly related certification/licensure/registration for the hybrid occupation.

3. Bachelor’s degree from an accredited college or university, with an exemplary academic record as demonstrated by at least one of the following:

   a. Class Standing: Applicants must be in the upper third of the graduating class in the college, university, or major subdivision, such as the College of Liberal Arts or the School of Business Administration, based on completed courses.

   b. Grade-Point Average (GPA): Applicants must have a grade-point average of:

      1. 3.0 or higher out of a possible 4.0 ("B" or better) as recorded on their official transcript, or as computed based on 4 years of education, or as computed based on courses completed during the final 2 years of the curriculum; or

      2. 3.5 or higher out of a possible 4.0 ("B+" or better) based on the average of the required courses completed in the major field or the required courses in the major field completed during the final 2 years of the curriculum.

   c. Election to Membership in a National Scholastic Honor Society: Applicants can be considered eligible based on membership in one of the national scholastic honor societies. These honor societies are listed in the *Association of College Honor Societies: Booklet of Information* (1992-95) and/or Baird's *Manual of American College Fraternities* (1991). Membership in a freshman honor society cannot be used to meet the requirements of this provision.

e. **Intervening Grade Levels.** In general, standards for two-grade interval work (e.g., professional/scientific) are written in a two-grade interval progression whereas standards for technical/medical support work are written in a one-grade interval progression. In writing qualification standards, intervening grades in two-grade interval standards may be used to denote assignments of
unusual responsibility/complexity, such as the sole practitioner, team leader, or other special circumstance unique to the occupation. In addition, intervening grade levels may be included in grandfather clauses for current employees. VHA Program Officials in VA Central Office who wish to include intervening grade levels in the qualification standard for a particular occupation must submit such request, with supporting documentation, through the Under Secretary for Health (10) to Human Resources and Administration (006). Final determination on all grade levels will be made during the job analysis process.

f. **Full Performance Levels.** For occupations covered by these guidelines, the full performance (journey) level may vary depending on the complexities of the assignment or the competencies possessed by the individual and is not dependent on the entry level grade of the occupation. In this rank-in-person system, the promotion potential of positions may not be limited to grades below the full performance level as identified in the qualification standard.

g. **Pay Determinations.** Grade levels should not be used to address pay issues or problems. Recruitment or retention incentives (e.g., special salary rates, recruitment bonuses, relocation bonuses, retention bonuses, etc.) may be used to address pay-related recruitment or retention issues.

7. **EIGHT STEPS TO DEVELOPING A TITLE 38 HYBRID QUALIFICATION STANDARD**

a. For the development of a Title 38 Hybrid qualification standard for which there is little to no current occupational information or no current and usable job analysis, all eight steps will need to be completed.

b. For the development of a Title 38 Hybrid qualification standard for which there is current occupational information and/or a current and usable job analysis, but some significant changes to the basic requirements for the profession are anticipated, some steps may not need to be completed.

c. If an existing Title 5 qualification standard is being converted to the Title 38 Hybrid system and there are no changes to the basic requirements for the profession, only half the steps will be needed. Steps 1 through 3 will need to be completed in order to identify the appropriate knowledge, skills, and abilities at each grade level that will be listed in the qualification standard. The product of Step 8 is the actual qualification standard itself, and will need to be completed.

d. Subject-matter experts should review this guide and identify which steps to complete in consultation with their Human Resources Advisor and the Recruitment and Placement Policy Service (059) in the Office of Human Resources Management and Labor Relations. For each step, a required product is described.

(1) Step 1. Gather classified position descriptions (including signed OF-8) and/or task/job statements, as appropriate. These descriptions should represent the full range of assignments at different types and sizes of facilities, including outpatient clinics, small and large medical centers, etc. Identify representative assignments, duties, tasks, performance requirements/measurements, etc. for each grade level. Identify and describe special assignments at appropriate grade levels and the routine supervision/guidance received when performing these tasks.
Product: Representative critical duties/task statements and performance requirements/measurements for all grade levels and special assignments.

(2) Step 2. Compare representative critical duties/task statements and performance requirements/measurements to statutory descriptions for each grade level.

Product: Analysis demonstrating how the grade levels assigned to representative critical duties/task statements meet the statutory descriptions for each grade level.

(3) Step 3. Conduct analysis to identify knowledge, skills, abilities and other characteristics (KSAOs) required to perform the work of the position.

Product: A job analysis worksheet for each separate grade level that identifies the duties performed and the KSAOs required to perform each duty, and a list of the most important KSAOs required for each grade level.

(4) Step 4. Identify the source or means by which each KSAO is obtained, for example, through specific education, training, or experience.

Product: Itemized list of KSAOs and means by which they are obtained.

(5) Step 5. Gather information on private sector practices regarding licensure, certification, registration, and positive educational/training requirements.

Product: Summary of findings with supporting documents attached.

(6) Step 6. Compare findings of Step 5 with results of Step 4.

Product: List of duties with respective required KSAOs, and required certification, licensure, and registration, and positive education/training requirements identified.

(7) Step 7. Review product of Step 6 with statutory descriptions for grade levels.

Product: Analysis discussing results of comparison.

(8) Step 8. Write qualification standard in Title 38 Hybrid format.

Product: Qualification standard with all supporting documents from Steps 1 through 8.

8. NEW QUALIFICATION STANDARD PACKAGE SUBMISSIONS. VHA Program Officials must submit new qualification standard packages and supporting documentation through the Under Secretary for Health (10) to Human Resources and Administration (006). All qualification standard packages should contain:

a. The new qualification standard.
b. A copy of the old qualification standard.

c. Explanation of the need (if any) to tailor the standard grandfather provision set forth in paragraph 10.c.

d. Required products of the Eight Steps to Developing a Qualification Standard, including the following documentation of the Job Analysis:

(1) Date and location of the job analysis;

(2) Names, series, grade, job titles and duty stations of all SMEs and HR Advisor;

(3) SME participants and demographic data;

(4) Task Statement/Inventory List (VA Form 5-4771);

(5) Knowledge, Skills, Abilities, and Other Characteristics (KSAO) List (VA Form 5-4772);

(6) Task/KSAO linkage sheet (any data sheet in the VA Form 7051 series); and

(7) Certifications from all subject-matter experts (SMEs): SMEs must indicate by their signatures that they concur in the results of the job analysis. This may be done by having them sign in the spaces provided on the Task Statement List and KSAO List and on the data sheet used to align tasks and KSAOs.

e. OPM Issuances such as:

(1) Classification standards; and

(2) Qualification standards.

f. VA Issuances/Data such as:

(1) Copies of classified position descriptions or functional statements, as appropriate;

(2) Organizational charts;

(3) Distribution of incumbents in the series by grade and job title (if applicable);

(4) Minority representation within series by grade;

(5) VHA Directives relating to the occupation scope of practice and positions functioning in the field.

(6) VA Human Resource Letters (HRMLs) relating to the use and proper classification of the position; and
(7) Comparative data by grade level within VHA.

g. Published Materials such as:

(1) *Dictionary of Occupational Titles*; and

(2) Professional standards, ethics, and criteria for accreditation from professional associations.

h. Curricula review based on curricula and course catalogs from various colleges and universities around the country which offer degrees in the occupation

i. Employment Practices Survey derived from:

(1) Job descriptions and qualifications required by private sector facilities nationwide;

(2) Material from the occupation’s professional organizations (i.e., occupational studies or job analysis); and

(3) Survey information (if a qualification standard already exists)

9. **CHANGES TO EXISTING QUALIFICATION STANDARD PACKAGE SUBMISSIONS.**

VHA Program Officials requesting changes to existing qualification standards must submit such changes through the Under Secretary for Health (10) to Human Resources and Administration (006). Such packages should contain:

a. The new qualification standard.

b. A copy of the old qualification standard.

c. Explanation of the reason for the change to the existing standard.

d. Certifications from all subject-matter experts (SMEs) regarding the rationale for the change as well as products of any of the Eight Steps to Developing a Qualification Standard that were necessary to demonstrate and support the change.

e. Any additional material described in paragraph 8, e. through i., which demonstrates and supports the need for the change.

f. Justification and impact statement for changes to the grade structure and/or qualifications. Documentation should address fiscal impact, changes in industry/professional standards, impact on recruitment and diversity, and consistency with grades for similar, comparable occupations.

10. **MINIMUM ELEMENTS FOR QUALIFICATION STANDARDS**

a. **Coverage.** Include a brief description of the occupation.
**b. Basic Requirements.** Include U.S. citizenship requirements, education and/or experience required, required credentials (licensure, certification, registration), physical requirements, and English language proficiency requirement.

**c. Grandfathering Provision Clauses.** Include, if applicable, the following standard statement. If the statement is tailored for the specific occupation, a supporting explanation must be included in the package submission described in paragraph 8 of this appendix:

**Grandfathering Provision.** The following is the standard grandfathering policy for all Title 38 hybrid qualification standards. [The grandfathering provision does not apply to a newly established occupation and the related qualification standard that is implemented for that occupation in the VHA.] Some of these provisions may not apply to this occupation. Please carefully review the qualification standard to determine the specific education and/or licensure/certification/ registration requirements that apply to this occupation.

[All persons employed in VHA in this occupational series or in another occupational series that are also performing the duties as described in the qualification standard on the effective date of this qualification standard are considered to have met all qualification requirements for the grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:]

Such employees in an occupation that does not require a licensure/certification/registration, may be reassigned, promoted, or demoted within the occupation.

Such employees in an occupation that requires a licensure/certification/registration, may be reassigned, promoted up to and including the full performance level, or demoted within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

Such employees in an occupation that requires a licensure/certification/registration only at higher grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher grade levels.

Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

**d. Grade Requirements.** Include definitions and determinations (education and/or experience requirements; required KSAOs; and typical assignments). Identify all grade levels covered within the occupation to include the full performance level (FPL) and KSAOs at each grade level. Provide specific examples of all assignments above the FPL (both supervisory and/or non-supervisory) that are necessary at each of those grades, including the specific KSAOs appropriate to each assignment. For assignments
above the FPL, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

e. **Deviations.** Include, if applicable, the following standard statement. If the statement is tailored for the specific occupation, a supporting explanation must be included in the package submission.

“The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment warrants such action. The placement of individuals in grade levels not described in the qualification standard must be approved by the Under Secretary for Health or designee in VA Central Office, pursuant to delegated authority from the Secretary. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement, or when specific credentials are identified as necessary to meet minimum requirements.”

f. **Loss of Credential.** The qualification standard for an occupation that requires a license, certification, and/or registration must include the following statement regarding the loss of that credential:

“An employee in this occupation who fails to obtain licensure/certification/registration within the required time frame, or who fails to maintain the required licensure/certification/registration must be removed from the occupation, which may also result in termination of employment. For occupations which require an active credential (licensure/certification/registration) at all grade levels, at the discretion of the appointing official, an employee may be reassigned to another occupation for which he/she qualifies if a placement opportunity exists. For occupations which require an active credential (licensure/certification/registration) in assignments above the full-performance level only, at the discretion of the appointing official, an employee may remain at an appropriate lower grade level in the occupation when both of the following apply: the credential is not a requirement and a placement opportunity exists.”

11. GLOSSARY OF TERMS
<table>
<thead>
<tr>
<th>Accredited college or university</th>
<th>An educational institution, beyond the high school level, which has been accredited by an accrediting institution recognized by the U.S. Department of Education.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Certification</td>
<td>See Credentials</td>
</tr>
<tr>
<td>Complex¹</td>
<td>Complex may refer to a program within a service (such as Rehabilitation Medicine Service) that offers the full range of available services (for example, in regard to Audiology, hearing conservation, advanced audiologic and electrophysiologic assessment and interpretation, comprehensive tinnitus evaluation, treatment, and retraining therapies, advanced central auditory function assessment and treatment, assessment and treatment of patients with surgically-implanted bio-electric or cochlear implants, intraoperative (surgical) monitoring, advanced vestibular assessment and rehabilitation, and analysis and fitting of advanced amplification technology involving acoustic signal processing algorithms). This is compared to a program which offers a limited range of available services.</td>
</tr>
<tr>
<td>Complex²</td>
<td>Complex may refer to an individual assignment that has a range of variety and technical difficulty that covers at least the full range of professional practice of the occupation and may include assignments of greater difficulty, scope, and variety.</td>
</tr>
<tr>
<td>Credentials (Certification, Registration, Licensure)</td>
<td>Evidence of successful competence by an individual in a specific occupation which has been awarded by professional organizations with responsibility for establishing the guidelines necessary to acquire, and maintain, professional credentials appropriate to a career field. Licensure refers to a specific license which has been issued by a state to an individual to perform a specified function.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Full Performance Level</td>
<td>This is also called the journey level. The independent level of operation for a particular type of work. This is not necessarily the highest level of non-supervisory work, but does represent the typical level for an independent worker. All individuals who perform successfully and acquire the required competencies may progress without competition to the full performance level.</td>
</tr>
<tr>
<td>Grandfather clause</td>
<td>A provision which allows for individuals who are officially assigned to a given occupation at the time of an approved change in the qualification requirements for that occupation to remain in that occupation at their current grade whether or not they meet the revised/new qualification requirements.</td>
</tr>
<tr>
<td>Intervening grades</td>
<td>This term applies to occupations which normally progress in two grade intervals from GS-5 through GS-11. It means the even numbered grade levels (that is, GS-6, GS-8, GS-10) which are between the usual progression of grades, would generally not exist. However, specific exceptions to this general rule may appear in some two-grade interval standards to cover unique circumstances.</td>
</tr>
</tbody>
</table>
| Job Analysis | A job review to identify the tasks involved in any job and the associated knowledge, skill, ability, or other characteristics required to successfully perform the identified tasks and succeed in the job. Job analysis is conducted by Subject Matter Experts (SMEs) with a Human Resources advisor. Job analysis is done to guard against possible discrimination in employee selection.  
A systematic method for gathering, documenting, and analyzing information about the content, context, and requirements of a job. It demonstrates that there is a clear relationship between the tasks performed on the job and the competencies/KSAs required to perform the tasks. Job analysis information is used to develop employee selection procedures, identify training needs, define performance standards, and for other uses. |
| KSAs/Competencies | This acronym stands for Knowledge, Skill, and Ability. Sometimes the letter “O” is added to indicate other characteristics. |
Leadership and supervision may be thought of as points along a continuum from nonsupervisory to managerial work.

Team Leaders usually also perform work that is of the same kind and level as the highest level of work accomplished by the team led.

For occupations classified in one-grade intervals work leaders as a regular and recurring part of their assignment lead three or more employees in accomplishing work by performing a range of duties such as distributing workload, instructing employees in specific tasks and job techniques, giving on the job training to new employees, checking on work in progress, resolving simple informal complaints, monitoring working conditions, and amending or rejecting work.

For occupations classified in two-grade intervals leaders as a regular and recurring part of their assignment and at least 25% of their duty time lead a team of employees in accomplishing two-grade interval work. They work with team members to achieve specific tasks, produce work products and services, and meet program and production goals. Typically they assist the team through knowledge and application of leadership and team building skills and techniques such as group facilitation, coordination, coaching, problem solving, interpersonal communication, integration of work processes and products, obtaining resources, and liaison with the supervisor.

<table>
<thead>
<tr>
<th>Licensure</th>
<th>See Credentials</th>
</tr>
</thead>
<tbody>
<tr>
<td>Loss of Credential</td>
<td>A situation which exists when a specific certification, registration, or license is suspended or revoked by the issuing organization or when allowed to expire by the individual holding the credential.</td>
</tr>
<tr>
<td>One-grade interval positions</td>
<td>One grade interval occupations progress by single grade increments, for example, GS-4 to GS-5. These include technical occupations.</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>---------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Organizational Title</td>
<td>A title commonly given to a position by the employing organization which is not an official title established by the classification and/or qualification standard applicable to the position. For example the official title might be Supervisory Orthotist but the organizational title could be Chief, Orthotics Laboratory.</td>
</tr>
</tbody>
</table>
| Positive Educational Requirement | This generally refers to a professional occupation requiring education and training in the principles, concepts, and theories of the occupation that typically can only be gained through completion of a specified curriculum at a recognized college or university.  

A specific educational requirement that all individuals in a given occupation have completed in order to enter the occupation. This may be defined in terms of a specific degree (associate, bachelors, masters, or doctoral) or in terms of specific coursework. |
<p>| Post-doctoral experience      | This refers to any work experience in the occupation which is gained AFTER the Ph.D or similar doctoral degree has been awarded by a university. |
| Post-master’s experience      | This refers to any work experience in the occupation which is gained AFTER the master’s degree has been awarded by a university. |
| Program Coordinator/Program Manager | A supervisory or non-supervisory assignment that includes professional and highly technical work including responsibility for development, evaluation, and promotion of a program. Such programs may vary in scope and complexity. |</p>
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Progressively higher level graduate education</td>
<td>Education beyond the bachelor’s degree level which involves more difficult and specialized coursework. This education is generally leading to an advanced degree. For example, coursework for a second master’s degree in a different field would not be progressively higher level graduate coursework.</td>
</tr>
<tr>
<td>Qualification Standard</td>
<td>A statement of the minimum requirements that an individual must meet to be qualified for entry into and promotion in an occupation.</td>
</tr>
<tr>
<td>Registration</td>
<td>See Credentials</td>
</tr>
<tr>
<td>Signatory Authority</td>
<td>Delegated authority to sign documents obligating the VA to pay for provided services and products.</td>
</tr>
<tr>
<td>Statutory descriptions</td>
<td>Title 5, United States Code, governs the classification of positions in the Federal Service. This law provides that positions shall be classified based on the duties and responsibilities assigned and the qualifications required to do the work. Section 5104 of Title 5 provides definitions for the grade levels of the General Schedule. These grade levels are the foundation upon which the classification standards are built.</td>
</tr>
<tr>
<td>Subject Matter Expert (SME)</td>
<td>A person with bona fide expert knowledge about what it takes to do a particular job. First-level supervisors are normally good SMEs. Superior incumbents in the same or very similar positions and other individuals may also be used as SMEs if they have a current and thorough knowledge of the job’s requirements.</td>
</tr>
<tr>
<td>Substitution of education</td>
<td>A provision within a specific qualification standard which allows an individual to qualify for a grade level based on identified education rather than experience.</td>
</tr>
<tr>
<td>Supervisory position</td>
<td>Supervisory work, at a minimum, includes responsibility for planning and scheduling work; assigning work to employees; accepting, amending, or rejecting completed work; assuring that production and accuracy requirements are met; appraising performance and recommending performance standards and ratings; approving leave; and effecting disciplinary measures. Additionally, the duties of a supervisor typically include prioritizing and scheduling work and finding ways to improve the quality and/or quantity of the work directed.</td>
</tr>
<tr>
<td>----------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Two-grade interval positions</td>
<td>Two-grade interval occupations progress by two grade increments from GS-5 to GS-11 and include professional and administrative occupations defined by the Office of Personnel Management.</td>
</tr>
</tbody>
</table>
[APPENDIX G18. PSYCHOLOGIST QUALIFICATION STANDARD
GS-0180
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a psychologist in the Veterans Health Administration (VHA). Psychologists are Licensed Independent Providers who engage in professional and scientific work which relates to behavior, capacities, personality, interests, emotions and mental disorders. These requirements apply to all VHA psychologists in the GS-0180 series, including those assigned to VA medical centers, Community-Based Outpatient Clinics (CBOCs), free-standing VA Outpatient Clinics, Veterans Outreach Centers, Veterans Integrated Service Network (VISN) offices, the VHA National Center for Organization Development and VHA Central Office. This work may include any of the following: providing professional clinical services, conducting research, carrying out education and training activities, carrying out program evaluation activities, clinical consultation, supervision and administration.

2. BASIC REQUIREMENTS. The basic requirements for employment as a VHA psychologist are prescribed by Public Law 96-151 codified in 38 U.S.C. § 7402. To qualify for appointment, all applicants for the position of psychologist in VHA must meet the following:

   a. Citizenship. Be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3.g, this part.)

   b. Education

      (1) Have a doctoral degree in psychology from a graduate program in psychology accredited by the American Psychological Association (APA), the Psychological Clinical Science Accreditation System (PCSAS), or the Canadian Psychological Association (CPA) at the time the program was completed. The specialty area of the degree must be consistent with the assignment for which the applicant is to be employed. For the purpose of meeting this requirement, the term “specialty area” refers to the specific specialty areas recognized by the accrediting body and not to specific job duties that might require special skills. Currently, APA accredits doctoral programs in the specialty areas of clinical psychology, counseling psychology, school psychology, or combinations of two or more of those areas. PCSAS accredits doctoral programs in psychological clinical science. CPA accredits doctoral programs in clinical psychology, counseling psychology, clinical neuropsychology, and school psychology. There are no job assignments in VHA that require the skills of a school psychologist; therefore, an applicant with a degree in the specialty area of school psychology is not eligible for appointment. Strictly for the purpose of determining eligibility for appointment as a psychologist in VHA, there is no distinction between the specialty areas (with the exception of school psychology).

   OR

      (2) Have a doctoral degree in any area of psychology and, in addition, successfully complete a re-specialization program (including documentation of an approved internship completed as part of the re-specialization program) meeting both of the following conditions:

         (a) The re-specialization program must be completed in an APA or a CPA accredited doctoral program; and,
(b) the specialty in which the applicant is retrained must be consistent with the assignment for which the applicant is to be employed.

NOTE: The applicant must provide an official transcript and/or certificate documenting the completion of the re-specialization program, which includes completion of an APA or CPA internship. Psychologists who have successfully completed a re-specialization program as described above and who were employed by the Department of Veterans Affairs prior to the implementation of this standard are considered to have fully met the educational requirements of these qualification standards.

[OR]

(3) Have a doctoral degree awarded between 1951 and 1978 from a regionally-accredited institution, with a dissertation primarily psychological in nature.]

AND

(4) Internships

(a) Have successfully completed a professional psychology internship training program that was accredited by APA or CPA at the time the program was completed and that is consistent with the assignment for which the applicant is to be employed.

OR

(b) New VHA psychology internship programs that are in the process of applying for APA accreditation are acceptable in fulfillment of the internship requirement, provided that such programs were sanctioned by the VHA Central Office Program Director for Psychology and the VHA Office of Academic Affiliations at the time that the individual was an intern;

OR

(c) VHA facilities that offered full-time, one-year pre-doctoral internships prior to PL 96-151 (pre-1979) are considered to be acceptable in fulfillment of the internship requirement;

OR

(d) Applicants who completed an internship that was not accredited by APA or CPA at the time the program was completed may be considered eligible for hire only if they are currently board certified by the American Board of Professional Psychology in a specialty area that is consistent with the assignment for which the applicant is to be employed. (NOTE: Once board certified, the employee is required to maintain board certification.)

OR

(e) Applicants who have a doctoral degree awarded between 1951 and 1978 from a regionally-accredited institution with a dissertation primarily psychological in nature may fulfill this internship
requirement by having the equivalent of a one-year supervised internship experience in a site specifically acceptable to the candidate’s doctoral program. If the internship experience is not noted on the applicant’s official transcript, the applicant must provide a statement from the doctoral program verifying that the equivalent of a one-year supervised internship experience was completed in a site acceptable to the doctoral program.

NOTE: Psychologists who meet the requirements of this revision and who were employed by the Department of Veterans Affairs prior to the implementation of this standard are considered to have fully met the requirements of this qualification standard.

c. **Licensure.** Hold a full, current, and unrestricted license to practice psychology at the doctoral level in a State, Territory, or Commonwealth of the United States, or the District of Columbia.

   (1) **Exception.** Non-licensed applicants who otherwise meet the eligibility requirements may be given a temporary appointment as a “graduate psychologist” at the GS-11 or GS-12 grade under the authority of 38 U.S.C. § 7405 [(c)(2)(B)] for a period not to exceed two years from the date of employment on the condition that such a psychologist provide care only under the supervision of a psychologist who is licensed. Failure to obtain licensure during that period is justification for termination of the temporary appointment.

   (2) **Loss of Credential.** A psychologist who fails to maintain the required licensure must be removed from the occupation, which may result in termination of employment. At the discretion of the appointing official, an employee may be reassigned to another occupation if qualified and if a placement opportunity exists.

d. **Board Certification and Loss of Credential**

   (1) **Board Certification.** Persons hired to psychology positions in the VHA who completed an internship that was not accredited at the time the program was completed must be board certified by the American Board of Professional Psychology in a specialty area that is consistent with the assignment for which the applicant is to be employed. The board certificate must be current and the applicant must abide by the certifying body’s requirement for continuing education.

   (2) **Loss of Credential.** Once board certified, psychologist must maintain a full, valid and unrestricted board certification to remain qualified for employment. A psychologist who fails to maintain the required board certification must be removed from the occupation, which may result in termination of employment. At the discretion of the appointing official, an employee may be reassigned to another occupation if qualified and if a placement opportunity exists.

e. **Grandfathering Provision.** [All persons employed in VHA as a psychologist on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education (i.e., degree and internship requirements) and licensure/certification that are part of the basic requirements of the occupation.

   (1) Employees grandfathered under this provision for this revision may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation, but
may not be promoted beyond the journey level or placed in supervisory or managerial positions or beyond the assignment currently held for those being grandfathered to assignments above FPL.]

(2) Psychologists who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed on a temporary or permanent basis until they fully meet the basic requirements of the standard.

(3) Psychologists initially grandfathered into this occupation who subsequently obtain additional education and/or licensure that meet all of the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

[NOTE: If psychologists who are grandfathered under this provision leave the occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.]

g. English Language Proficiency. Psychologists must be proficient in spoken and written English in accordance with VA Handbook 5005, Part II, Chapter 3, section A, paragraph 3j.

3. GRADE REQUIREMENTS

a. Creditable Experience

(1) Current Professional Psychology Practice. To be creditable, psychological work experience can be obtained through paid or non-paid employment providing psychological work or through participating in a supervised postdoctoral psychology training program (i.e., fellowship or residency). Psychological work experience must have occurred after the doctoral degree was obtained and must have required the use of knowledge, skills, abilities, and other characteristics associated with current professional psychology practice. “Professional psychology practice” includes but is not limited to the following psychology-oriented job duties: providing professional clinical services, conducting research, carrying out education and training activities, carrying out program evaluation activities, clinical consultation, supervision and administration.

(2) Quality of Experience. Experience is only creditable if it is post-doctoral experience as a professional psychologist directly related to the duties to be performed. Qualifying experience must also be at a level comparable to or exceeding professional psychology experience at the next lower level.

(3) Part-time Experience. Part-time experience is creditable according to its relationship to a full-time workweek. For example, a psychologist employed 20 hours per week, or on a half time basis, would receive one full-time workweek of credit for each two weeks of service.

(4) Post-Doctoral Degree Fellowships. Postdoctoral fellowships or residencies are training programs in an advanced area of clinical practice. Training as a fellow or resident is considered to be creditable experience on a year-for-year basis.
b. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:

1. **Staff Psychologist, GS-11 (Entry Level)**
   
   (a) **Experience.** None beyond the basic requirements.
   
   (b) **Assignment.** Staff psychologists at this level diagnose mental disorders, conduct psychological or neuropsychological assessments, treat mental disorders through a variety of modalities, provide adjunctive interventions for treatment of medical disorders, and may conduct research. They may be assigned to any program area. Psychologists who are not licensed must practice under the close supervision of a licensed psychologist.

2. **Staff Psychologist, GS-12 (Developmental Level)**
   
   (a) **Experience.** At least one year of experience as a professional psychologist equivalent to the next lower grade level (GS-11). Psychologists who are not licensed must practice under the supervision of a licensed psychologist but with less intense supervision than at the GS-11 grade level.
   
   (b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

   1. Knowledge of and ability to apply a wide range of professional psychological treatments or assessment methods to a variety of patient populations.
   
   2. Ability to design and implement effective treatment strategies.
   
   3. Ability to incorporate new clinical procedures.
   
   4. Ability to conduct research activities, such as designing and implementing clinical research projects (staff psychologists with specified research job duties).
   
   5. Ability to perform basic research tasks of scholarship and research execution within the context of an established research team, including research participant relations, research documentation, data acquisition, maintenance, and collaboration.
   
   (c) **Assignment.** Staff psychologists at this level diagnose mental disorders, conduct psychological or neuropsychological assessments, treat mental disorders through a variety of modalities, provide adjunctive interventions for treatment of medical disorders, and may conduct research. They may be assigned to any program area.

3. **Staff Psychologist, GS-13 (Full Performance, Level)**
   
   (a) **Experience.** At least two years of experience as a professional psychologist, with at least one year equivalent to the GS-12 grade level.
(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of, and ability to apply, professional psychological treatments to the full range of patient populations.

2. Ability to provide professional advice and consultation in areas related to professional psychology and behavioral health.

(c) **Assignment.** This is the full performance level for staff psychologists. At this level, psychologists are licensed to practice independently in the provision of psychological services, consulting with peers and supervisors as appropriate. They may be assigned to any VHA program and setting, such as inpatient or outpatient medicine, primary care, surgery, mental health, neurology, rehabilitation medicine, geriatrics, Compensation and Pension, Vet Centers, and the VHA National Center for Organization Development. Psychologists diagnose mental disorders, conduct psychological or neuropsychological assessments, treat mental disorders through a variety of modalities, and provide adjunctive interventions for treatment of medical disorders. Among the modalities provided are individual, family, and group psychotherapies and other interventions such as behavioral health and community interventions. Psychologists consult with medical center staff on a wide variety of patient care issues. Staff psychologists may be involved in program evaluation, teaching, training, and research activities.

(4) **Psychologist Clinician Investigator, GS-13**

(a) **Experience.** At least two years of experience as a professional psychologist, with at least one year equivalent to the GS-12 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of and ability to apply advanced professional psychological treatments to the full range of patient populations.

2. Ability to provide professional advice and consultation in areas related to professional psychology and behavioral health.

3. Knowledge of clinical research literature and fluency in scientific information discovery.

4. Knowledge of and ability to apply structured scientific paradigms to research involving existing protocols and established scientific methods, including knowledge of research design and analysis as applied to their area of expertise, that has resulted in recognition at the local and regional level and that is developing into national recognition (e.g., speaking at national conferences and/or publishing in nationally-distributed scientific journals).
5. Ability to perform essential research tasks of scholarship and research execution, including research participant relations and management, research documentation, data acquisition and maintenance, human subjects protection, budget oversight, supervision of project staff, and collaboration.

6. Ability to formulate results within a scientific framework and organize scientific reporting.

7. Knowledge of methods and ability to increase the basic research skills of others via research mentoring.

(c) Assignment. The psychologist clinician investigator devotes a majority of the time allocated to his/her job duties to research responsibilities in addition to providing clinical services. These research responsibilities can include grant funded research as well as research development or program-related research that may or may not be grant funded. The psychologist clinician investigator may function as the principal investigator on grant(s) or assume significant supporting roles (e.g., co-investigator, study psychotherapy lead, lab management, and complex grant project management) within funded research programs. They publish articles in peer-reviewed professional literature, present findings at major regional or national scientific meetings, and may attain substantive, non-adjunctive academic appointments at the affiliated university (usually at the rank of Assistant Professor or its institutional equivalent). Other responsibilities may include membership on local research service committee and/or boards, such as Research and Development (R & D) Service, Health Services Research and Development (HSR & D) Service, or Institutional Review Boards (IRB), serving as reviewers for peer-reviewed journals, serving on VA scientifically-driven expert panels (e.g., consensus panels to develop care guidelines based on empirical data), and serving as grant reviewers for VA and non-VA research.

(5) Psychologist Clinician Investigator, GS-14

(a) Experience. At least three years of experience as a professional psychologist, with at least one year equivalent to the GS-13 grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of, and ability to apply, appropriate scientific methods in the design and execution of basic and applied research.

2. Ability to coordinate work across multiple settings.

3. Ability to convey scientific concepts and methodological principles to individuals with diverse levels of technical expertise.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Psychologist Clinician Investigators have achieved significant professional
recognition by making published scientific contributions to research projects with potential for substantial impact. In addition to active involvement in peer-reviewed research and other peer review activities as noted above, this recognition must be demonstrated by attainment of at least three of the following: multiple publications in peer-reviewed professional literature; a consistent record of presentation of findings at national scientific meetings; attainment of an academic appointment at an affiliated medical school or local university, usually at the rank of associate professor or equivalent; or responsibility for multiple funded research projects with evidence of sustainability. Examples include but are not limited to psychologists assigned to research programs at the local, VISN or National level, including Mental Illness Research, Education and Clinical Care programs (MIRECCs), Centers of Excellence (CoEs), the National Center for Posttraumatic Stress Disorder, or similar research-focused settings. Psychologist clinician investigators are actively involved as principal investigators or co-principal investigators in peer-reviewed VA, National Institutes of Health (NIH), or comparably rigorous intramural or extramurally funded research programs. Psychologist Clinician Investigator responsibilities include peer review activities for VA and non-VA research, such as grant review for VA or NIH proposals, local research service committees or boards (such as R&D Service, HSR&D Service, or IRB), and service as a consulting editor (i.e., on an editorial board) for peer-reviewed journals.

(6) Psychology Program Manager, GS-14

(a) Experience. At least three years of experience as a professional psychologist, with at least one year equivalent to the GS-13 grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to organize work, set priorities, delegate tasks, and meet multiple deadlines.

2. Knowledge of and ability to utilize evidence based practices and clinical practice guidelines appropriately and ability to guide staff in using these tools.

3. Ability to deal effectively with individuals or groups representing widely divergent backgrounds, interests, and points of view.

4. Skill in managing and directing the work of others to accomplish program goals and objectives.

5. Ability to translate management goals and objectives into well-coordinated and controlled work operations.

6. Ability to establish and monitor production and performance priorities and standards.

7. Ability to analyze organizational and operational problems and to develop and implement solutions that result in sound operation of the program.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at least 25% of the time. Psychologist program managers have broad program management
responsibilities for a specific program or programs that are designed to deliver specialized, complex, highly professional services that are important program components of the facility and that significantly impact the health care provided to Veterans. Programs include but are not limited to addiction, posttraumatic stress disorder (PTSD), mental health intensive case management (MHICM), mental health compensation and pension examination (C&P) programs, Psychosocial Rehabilitation and Recovery Centers, inpatient mental health, residential rehabilitation, domiciliary, palliative care, neuropsychology, and internship and postdoctoral fellowship training programs; management of an off-campus site; psychology program oversight and coordination throughout the facility and its affiliated clinics as a psychology executive, typically at lower complexity facilities. Decisions made by the Program Manager affect staff and other resources associated with the programs managed and are made while exercising wide latitude and independent judgment. The type of program managed and scope of responsibility are critical aspects of the assignment at this level. Responsibilities include operation and management of key clinical, training, research, or administrative programs to include full responsibility for managing the day to day activities of those programs. Responsibility may include supervision of staff but is not required. Psychologist Program Managers are responsible for strategic planning to ensure the provision of high quality services to meet the needs of the Veterans being served and planning, and developing and implementing short- and long-term goals and objectives consistent with the program’s strategic plan. They have oversight of administrative and programmatic resources and deploy those resources in support of the program needs. They develop and implement programs, policies, and procedures to meet program goals, VHA policy and external accreditation requirements, and monitor outcomes using data-driven quality assurance processes, and implement strategies for improvement based on data analysis.

(7) Psychologist, GS-14 (Assistant Chief)

(a) **Experience.** At least three years of experience as a professional psychologist, with at least one year equivalent to the GS-13 gradelevel.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Knowledge of and ability to utilize evidence based practices and clinical practice guidelines appropriately and ability to guide staff in using these tools.

2. Ability to provide professional advice and consultation in areas related to professional psychology and behavioral health.

3. Ability to organize work, set priorities, delegate tasks, and meets multiple deadlines.

4. Ability to supervise and manage subordinate employees effectively.

5. Skill in interpersonal relationships, including conflict resolution.

6. Ability to establish and monitor production and performance priorities and standards.
(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Psychologist Assistant Chiefs serve as full assistant to a Service Chief, share the full scope of delegated managerial responsibilities, and serve as the Acting Service Chief in the absence of the Service Chief. They make decisions that affect staff and other resources with wide latitude of control and independent judgment. They may be delegated full administrative and clinical responsibility for planning and directing the staff assignments in a variety of clinical settings. They encourage professional development, create an environment of learning, and serve as a mentor to staff. Examples include but are not limited to assignment to a clinical service, such as a Psychology Service, Mental Health Service, or other clinical or research service area. Within that service, they may be assigned to specific program areas and may be involved in program evaluation and research activities. Psychologist Assistant Chiefs are responsible for the supervision, administrative management, and direction of the program services assigned to them. The Psychologist Assistant Chief may assure compliance with accrediting agency and regulatory requirements, may monitor staff performance, and may develop and implement programs based upon Veterans’ needs and current research findings. Duties include but are not limited to resolving staff conflicts which might interfere with the delivery of services, identifying continuing education and training needs, and other clinical and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. They may interview candidates for positions, recommend appointments, advancements, or disciplinary actions when appropriate. They may develop position descriptions and functional statements and are responsible for professional and administrative management of an assigned area. They may make selections, assign personnel, and serve as a mentor to help employees develop their full potential. The Psychologist Assistant Chief maintains interdepartmental relations with other services to accomplish medical center goals and fosters and maintains community contacts. They may develop and initiate new treatment programs and may develop policies and procedures. Psychologist Assistant Chiefs independently provide psychological services at all levels of complexity and consult with peers and supervisors as appropriate.

(8) **Psychologist, GS-14 (Service Chief)**

(a) **Experience.** At least three years of experience as a professional psychologist, with at least one year equivalent to the GS-13 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to organize work, set priorities, delegate tasks, and meets multiple deadlines.

2. Knowledge of and ability to utilize evidence based practices and clinical practice guidelines appropriately and ability to guide staff in using these tools.

3. Ability to deal effectively with individuals or groups representing widely divergent backgrounds, interests, and points of view.

4. Skill in managing and directing the work of others to accomplish program goals and objectives.
5. Ability to translate management goals and objectives into well-coordinated and controlled work operations.

6. Ability to establish and monitor production and performance priorities and standards.

7. Ability to analyze organizational and operational problems and to develop and implement solutions that result in sound operation of the program.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The Psychologist Service Chief manages a stand-alone Service, Product Line or Service Line. They typically have line and staff authority for resource allocations within the area of responsibility, and ensure the efficient operation of the organizational unit. Decisions are made exercising wide latitude and independent judgment. They have broad and overall responsibility for the service-level department and full responsibility for clinical practice, program management, education, human resource management and supervision for the service, as appropriate. They autonomously manage substantive parts of specialized, complex, professional services which significantly impact the care provided to Veterans. They provide leadership with objective, independent assessments and recommendations for policy, operational and administrative issues and initiatives requiring decision and action. Examples include but are not limited to discipline-specific programs (typically in the role of Psychology Service Chief) or the overall system of mental health programs (typically in the role of Associate Chief of Staff for Mental Health), typically at lower level complexity facilities such as level 2 (medium complexity) or level 3 (low complexity). The Service Chief has overall responsibility for planning, assessing, and evaluating programs to ensure coordination between care delivered by the program and overall delivery of health care within the facility. They interpret a wide variety of data and process data related to program planning and the specialized needs of the Veteran, the service, and the medical center. They assure compliance with accrediting agency and regulatory requirements and assure corrective action is initiated as needed. Service Chiefs ensure policies or issues have been fully coordinated, vetted, and staffed. They advise leadership on policy implications, key issues, and relationships to both internal and external interest groups, and recommend courses of action. They maintain interdepartmental relations with other services to accomplish medical center goals. Service Chiefs coordinate and negotiate resolutions to complex problems. They may prepare special reports and responses, Congressional responses, briefing papers, issue briefs, and decision papers for the medical center leadership, which may be highly sensitive, confidential, and of a complex nature as requested. They are responsible for professional and administrative management of an assigned area which may include budget execution. Service Chiefs develop policies and procedures and may develop performance standards, position descriptions and functional statements. They conduct performance appraisals and perform other clinical and administrative responsibilities related to management of staff to ensure that the mission of the service and the medical center has been satisfied. They may set training objectives and delegate responsibilities to subordinate sections.

(9) Psychologist, GS-14 (VISN Manager)

(a) Experience. At least three years of experience as a professional psychologist, with at least one year equivalent to the GS-13 grade level.
(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of and ability to understand and communicate existing policies and regulations.

2. Knowledge of and ability to utilize resource materials as well as ability to develop new materials when needed.

3. Ability to relate to individuals at many different levels both within and external to the organization.

4. Ability to communicate effectively orally and in writing with a diverse group of professional staff.

5. Ability to provide information about policy to various stakeholders or audiences in a useable and understandable manner.

6. Ability to develop and recommend new or revised policies that are consistent with organizational goals and objectives.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The VISN Manager at this level directs program-specific mental health, behavioral health, or other patient care or administrative program or programs at the VISN level. The administrative or technical work is of substantial difficulty, and responsibilities are significant. Individuals at this level have delegated authority to determine long range work plans and assure that implementation of the goals and objectives is carried out for the programs. VISN Managers may be responsible for VISN level management and oversight of one or more mental health programs across the VISN. Examples include but are not limited to any of the range of specific specialty programs, such as addiction therapy or PTSD, within mental health services, organizational development programs, or system redesign programs. The Psychologist VISN Manager serves as the program official, advisor, and analyst for the programs for which they are responsible. They develop and implement the organizational vision for those programs and provide leadership, consultation, and operational guidance in compliance with established regulations, policies, and procedures. The incumbent applies specialized knowledge of health care and management for planning, organizing, and directing services. Duties include but are not limited to: responsibility for implementing national initiatives for the care and treatment of Veterans; educational programs; program evaluation; quality assurance; policy and procedure formulation for the programs; and providing guidance at the individual program level for facility implementation. They develop policy and procedures related to delivery of services and may provide reporting and data analysis of performance outcomes at the local and VISN level. Incumbent may provide field support through mentoring activities and tracking of outcome trends. They resolve policy implementation issues with appropriate field leaders and may serve as consultants to other management officials in the field or VISN. They coordinate and complete action items from VA Central Office and may author and coordinate white papers and issue briefs as clarification documents, providing technical expertise.
(a) **Experience.** At least three years of experience as a professional psychologist, with at least one year equivalent to the GS-13 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of and ability to understand and communicate existing policies and regulations.

2. Knowledge of and ability to utilize resource materials as well as ability to develop new materials when needed.

3. Ability to relate to individuals at many different levels both within and external to the organization.

4. Ability to communicate effectively orally and in writing with a diverse group of professional staff.

5. Ability to provide information about policy to various stakeholders or audiences in a useable and understandable manner.

6. Ability to develop and recommend new or revised policies that are consistent with organizational goals and objectives.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Psychologist National Managers at this level direct specific mental health, behavioral health, or other patient care, administrative or organizational development program or programs. The administrative or technical work is difficult in nature, and responsibilities are considerable. Responsibilities include but are not limited to: authority to determine long range work plans and assure that implementation of the goals and objectives are carried out; serve as consultants to other management officials at the field, VISN, or national level; serve as key program official, advisor and analyst for their programs of assignment; develop and implement their program’s vision across VHA. Psychologist National Managers provide leadership, consultation, and operational guidance in compliance with established external agencies and policies and procedures within psychology service. They are responsible for the management and planning of national initiatives having a high degree of visibility and a significant impact on healthcare services and delivery. Examples include but are not limited to mental health or other clinical or administrative programs at the national level (including managers within specific programs and Technical Assistance positions). The incumbent applies specialized knowledge of health care and management for planning, organizing and directing national initiatives in the care and treatment of Veterans, educational programs, program evaluation, quality assurance, and policy and procedure formulation. They develop national policy and procedures related to delivery of care including VHA directives, handbooks, and manuals, training guides, information letters, clinical practice guidelines, standards and criteria for the programs they are responsible for.
They provide field support through mentoring and consultative activities as a technical expert and monitor and track outcome trends. They may plan initiatives in a myriad of assignments that cross multiple organizational lines as well as federal and state agencies. They resolve policy implementation issues with appropriate VA Central Office, VISN, regional, and facility field leaders or external review organization representatives. They may collaborate and coordinate services with other Federal and State agencies, external professional organizations, program offices and services within VHA. Psychologist National Managers may provide consultation at the individual program level for facility implementation.

(11) Senior Psychologist Program Manager, GS-15

(a) Experience. At least four years of experience as a professional psychologist, with at least one year equivalent to the GS-14 grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Skill in managing and directing the work of large, complex organizational units and in applying effective management practices.

2. Skill in persuasion, negotiation, and motivation to negotiate multiple program policies.

3. Skill in interpersonal relationships in dealing with employees and other managers using advanced consultation and problem solving skills.

4. Skill in the application and analysis of measurement tools to systems issues.

5. Ability to balance responsibilities in a complex environment and to work with great autonomy; ability to set priorities and delegate tasks, meet multiple deadlines, analyze complex organizational problems; and ability to develop and implement effective solutions for those problems.

6. Ability to assess need for basic and complex services across multiple programmatic contexts.

7. Ability to coordinate the efforts of multiple program elements across a complex system.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Psychology Program Managers at the GS-15 level generally manage large, complex programs in Complexity Level 1 (High Complexity) facilities, or in facilities of lesser complexity levels that have large psychology or mental health services. Responsibilities may include supervision. Senior psychologist program managers have very broad responsibility for multiple programs or have responsibility for a large service organization that is of considerable scope, size, and complexity. Programs include but are not limited to addiction, posttraumatic stress disorder (PTSD), mental health intensive case management (MHICM), mental health compensation and pension examination (C&P) programs, Psychosocial Rehabilitation and Recovery Center, inpatient mental health, residential rehabilitation, domiciliary, palliative care, neuropsychology, and internship and
postdoctoral fellowship training programs; managers of an off-campus site; psychology program oversight and coordination as a psychology executive; and program oversight and coordination for education programs (typically seen in roles such as ACOS for Education) or research programs (typically seen in roles such as ACOS for Research). Responsibilities include strategic planning to ensure the provision of quality services to meet the needs of the Veterans being served, development of short- and long-range goals and plans; development and implementation of policies and procedures to ensure that plans are carried out and goals are met; management of administrative and programmatic resources; and monitoring outcomes using data-driven quality assurance processes. Decisions affect staff and other resources associated with the programs managed; decisions are made exercising very wide latitude and independent judgment. They have oversight of administrative and programmatic resources and deploy those resources in support of the program needs. The programs managed are substantial and deliver specialized, complex, highly professional services, significantly impacting the health care provided to Veterans. Senior Psychologist Program Managers have full responsibility for oversight of the professional practice of psychology in medical centers or health care systems and ensure the highest quality of psychological care provided to Veterans throughout the facility and its affiliated clinics.

(12) **Senior Psychologist Clinician Investigator, GS-15**

(a) **Experience.** At least four years of experience as a professional psychologist, with at least one year equivalent to the GS-14 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to translate national research goals or priorities into specific scientific project activities of significant complexity and sufficient sustainability.

2. Ability to create, organize, manage, and maintain high quality (e.g., funded, peer reviewed) research programs independently.

3. Knowledge of budget control procedures that include funding from multiple sources which may vary annually.

4. Skill in managing and directing the work of large, complex research projects and in applying effective management practices.

5. Skill in persuasion, negotiation, and motivation to negotiate multiple program requirements.

6. Skill in interpersonal relationships in dealing with employees and other managers using advanced consultation and problem solving skills.

7. Ability to balance responsibilities in a complex environment and to work with great autonomy; to set priorities and delegate tasks, meet multiple deadlines, analyze complex organizational problems; develop and implement effective solutions for those problems; and assess need for basic and complex services across multiple programmatic contexts.
(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and must be performed by the incumbent at least 25% of the time. Senior psychologist clinician investigators perform assignments at the highest level of investigative independence involving complex research programs or multi-site trials. Their contributions substantially advance the field of psychology and are often internationally recognized. They have a substantial number of peer-reviewed publications and have a consistent record of presenting their findings at national or international scientific meetings. Research Psychologists may be assigned to research programs at the local, VISN or National level, including Mental Illness Research, Education and Clinical Care programs (MIRECCs), Centers of Excellence (CoEs), the National Center for Posttraumatic Stress Disorder, or similar research-focused settings. Responsibilities include active involvement as principal investigators for peer reviewed VA, NIH, or comparably rigorous intramural or extramural funded research programs, high-level peer review activities for VA and non-VA research (e.g., membership on standing scientific review panels for VA or NIH proposals), service as editor, associate editor, or action editor of major peer-reviewed journals, and service on national scientific advisory boards for Federal funding agencies (e.g., VA, Department of Defense, NIH), Federally-funded scientific and translational research centers (e.g., NIH research centers, VA centers of excellence) and large-scale national research consortia in Federal or non-federal realms. Characteristic of the senior psychologist clinician investigator position is recognition at the national and international level for scientific excellence. In addition to high level involvement in peer-reviewed research and other peer review activities, this recognition must be demonstrated by attainment of at least four of the following: an extensive publication record in the nationally recognized peer-reviewed professional literature; a consistent record of presentation of findings at national and international scientific meetings; recognition by VA or NIH as a senior career scientist or its equivalent (e.g. Senior Research Career Scientist); an academic appointment at a VA-affiliated medical school or local university at the rank of Full Professor or equivalent; or full responsibility for direction of a complex research program, multi-site trial, or multiple funded research projects.

(13) **Senior Psychologist, GS-15 (Service Chief)**

(a) **Experience.** At least four years of experience as a professional psychologist, with at least one year equivalent to the GS-14 level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Ability to supervise and manage a large group of professional staff effectively.

2. Skill in interpersonal relationships, including conflict resolution and ability to work collaboratively with supervisors from other units.

3. Ability to accurately apply the qualification standards, assesses the potential of current and prospective employees, and promotes their professional development.
4. Ability to develop appropriate productivity standards for professional staff, often across multiple program lines.

5. Knowledge of the goals and objectives of the medical center and VISN and ability to communicate these to subordinates.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Senior Psychologist Service Chief at the GS-15 level generally manages programs in Complexity Level 1 (High Complexity) facilities or in facilities of lesser complexity levels that have large psychology or mental health programs. They are responsible for all professional, management, and administrative aspects of the service or organizational entity. Supervision and resource management involve major decisions, and work activities and supervision significantly affect the ability of staff to provide comprehensive services to Veterans. The service or organizational entity is a major component of the medical center and the services or programs supervised are highly professional, technical, and complex. Examples include but are not limited to discipline-specific programs (typically in the role of Psychology Service Chief), the overall system of mental health programs (typically in the role of Associate Chief of Staff for Mental Health), research programs (typically in the role of Associate Chief of Staff for Research), or education programs (typically in the role of Associate Chief of Staff for Education). Responsibilities include oversight of a large, complex organization that encompasses several component parts integral to the functioning of the medical center or, alternatively, one large service or organization. They have broad and overall responsibility for a service-level organizational unit and have full responsibility for clinical practice, program management, education, human resource management, and supervision for the service. They autonomously manage substantive parts of specialized, complex, professional services which significantly impact the care provided to Veterans. They provide leadership with objective, independent assessments and recommendations for policy, operational, and administrative issues and initiatives requiring decision and action. They monitor work performance to ensure that requirements are satisfied; interpret and process a wide variety of data related to program planning and specialized needs of the Veterans, the service, and the medical center; ensure policies or issues have been fully coordinated, vetted, and staffed; advise leadership on implications, key issues, and relationships to interest groups (both internal and external) and recommend courses of action. They coordinate and negotiate resolutions to complex problems. They assure compliance with accrediting agencies and regulatory requirements and assure corrective action is initiated as needed. They are responsible for professional and administrative management of an assigned area which may include budget execution. They maintain interdepartmental relations with other services to accomplish medical center goals. They may prepare special reports and responses, Congressional responses, briefing papers, issue briefs, and decision papers for the medical center leadership, which may be highly sensitive, confidential, and of a complex nature. They develop policies and procedures and may develop performance standards, position descriptions and functional statements. They monitor the clinical performance of staff, conduct performance appraisals, and perform other clinical and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. They may set training objectives for staff and delegate responsibilities to subordinate sections.
(14) **Senior Psychologist, GS-15 (VISN Manager)**

(a) **Experience.** At least 4 years of experience as a professional psychologist, with at least one year equivalent to the GS-14 grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

1. Knowledge of and ability to communicate existing policies and regulations effectively.

2. Knowledge of and ability to utilize resource materials and to develop new materials when needed.

3. Ability to communicate effectively orally and in writing with a diverse group of professional staff and management officials who are often at the highest management levels.

4. Ability to develop and recommend new or revised policies that are consistent with organizational goals and objectives.

5. Skill in leading senior management officials in policy development.

6. Ability to influence high level officials in adoption of and conformance to performance measures, monitors, and other policy guidelines.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The Senior Psychologist (VISN Manager) at this level direct a large, complex mental health, behavioral health, or other patient care or administrative program or may have responsibility for several large and complex programs at the VISN. The VISN Manager position is characterized by the scope and high level of complexity of their duties. They have the overall responsibility for implementing, planning, organizing, directing, coordinating, reviewing, evaluating, and improving the operations of their area of responsibility within the VISN. They provide overall leadership, guidance, and direction for their programs or services across the VISN. The Senior Psychologist VISN Manager exerts a major, significant, and VISN or VHA-wide impact on the overall functioning of the organizational entity. Assignments may include but are not limited to the system of mental health programs across the VISN (typically in the role of the VISN Chief Mental Health Officer); systems redesign programs, or organizational development programs. Responsibilities include overall planning, direction, and execution of the area of responsibility. Consultation is provided to high level officials in the field, at the VISN, and at VA Central Office (VACO). The incumbent applies specialized knowledge of health care and management for planning, organizing, and directing services. They provide guidance to the field regarding their area of responsibility and often act as a conduit of information between VACO and the field. They monitor and support VISN compliance with relevant VHA directives, handbooks, manuals, memoranda, policies, program guides, and information letters. They are responsible for implementing national policies and procedures, and they resolve policy
implementation issues as they arise. They develop, implement, and lead team management groups to effectively accomplish goals, focus on customer needs, ensure and maintains quality, and accomplish the mission and vision. They develop and expand their area’s capacities, responsiveness, and image within the VISN and community. They may author and coordinate white papers, issue briefs, and similar official documents. They provide leadership in their area of responsibility to the VISN management and to the field and develop or provide guidance in developing policies that are aligned with the network’s goals. They may supervise subordinate positions assigned to their area.

(15) Senior Psychologist, GS-15 (National Manager)

(a) Experience. At least 4 years of experience as a professional psychologist, with at least one year equivalent to the GS-14 grade level.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Knowledge of and ability to communicate existing policies and regulations effectively.

2. Knowledge of and ability to utilize resource materials and to develop new materials when needed.

3. Ability to communicate effectively orally and in writing with a diverse group of professional staff and management officials who are often at the highest management levels.

4. Ability to develop and recommend new or revised policies that are consistent with organizational goals and objectives.

5. Skill in leading senior management officials in policy development.

6. Ability to influence high level officials in adoption of and conformance to performance measures, monitors, and other policy guidelines.

(c) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety and be performed by the incumbent at least 25% of the time. Senior Psychologist National Managers at this level direct a large, complex mental health, behavioral health, or other patient care or administrative program at the VA Central Office (VACO) level or may have responsibility for several programs at the VACO level. The National Manager position is characterized by the scope and high level of complexity of their duties. The administrative or technical work is of substantial difficulty, and responsibilities are significant. They provide overall leadership, guidance, and direction for their programs or services across the VHA. The Senior Psychologist National Manager exerts a major and significant impact on the overall functioning of the organizational entity and the impact is VHA-wide. Assignments include but are not limited to mental health or other clinical or administrative programs at the national level (including National Mental Health Director and Deputy Director positions or Senior Consultant positions), or research or education programs (such as the Mental Illness, Research, and Education Clinical Center).
incumbent applies specialized knowledge of health care and management for planning, organizing, and
directing national initiatives in the care and treatment of Veterans, educational programs, program
evaluation, quality assurance, and policy and procedure formulation. They direct large programs of
substantial size and impact on VHA as a whole, and work cooperatively with other programs in VA in
support of their strategic goals and objectives. They secure the resources necessary to implement their
programs and to educate others. Responsibilities include overall planning, direction, and execution of
the area of responsibility. Consultation is provided to high level officials in the field, at the VISN, and
at VA Central Office (VACO). They provide guidance to the field regarding their area of responsibility
and often act as a conduit of information between VACO and the field. They are responsible for
developing and implementing national policies and procedures, and they resolve policy implementation
issues as they arise. They plan initiatives in a myriad of assignments that cross multiple organizational
lines as well as federal and state agencies. They may author and coordinate white papers, issue briefs,
and similar official documents. They provide leadership in their area of responsibility to VACO
management and to the field and develop or provide guidance in developing policies that are aligned
with VHA’s goals. They may develop performance standards, position descriptions and functional
statements. They conduct performance appraisals and perform other clinical and administrative
responsibilities related to management of staff to ensure that the mission of the program is
accomplished.

4. DEVIATIONS

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the
grade determination requirements for psychologists in VHA whose composite record of
accomplishments, performance, and qualifications, as well as current assignments, warrants such action
based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances may the educational or licensure requirements be waived.

c. The placement of individuals in grade levels not described in this standard must be approved by
the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. §§ 7402, 7403]
APPENDIX G19. NUCLEAR MEDICINE TECHNOLOGIST QUALIFICATION STANDARD
GS-[0]601
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as a [Nuclear Medicine Technologist (NMT)] in the Veterans Health Administration (VHA). [NMTs] perform a wide variety of functional studies of organs and/or systems involving static and dynamic imaging procedures, the injection of radionuclides and radiopharmaceuticals, and the use of such specialized equipment as integrated computer/imaging system[, single photon emission tomography, [positron emission tomography], etc., in combination with a variety of in vitro laboratory procedures. [Technologists also perform advanced therapeutic procedures and fusion imaging.] The work requires a professional knowledge of the field of nuclear medicine technology, and those aspects of chemistry, physics, mathematics, and the biomedical sciences that relate to nuclear medicine.

2. DEFINITIONS.

a. Journey Level. The full performance level for this qualification standard is the GS-9 grade level.

b. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills, and abilities (KSAs), and other characteristics, also referred to as core competencies, associated with the scope of NMT practice.

c. Quality of Experience. Experience is only creditable if it is earned after passing the Nuclear Medicine Technology Certification Board (NMTCB) or American Registry of Radiologic Technology (ARRT) (N) certification exams. Experience as a graduate NMT is creditable provided the candidate worked as a NMT and subsequently passed the certification examination.

d. Part-Time Experience. Part-time experience as a NMT is creditable according to its relationship to the full-time workweek. For example, a NMT would receive 1 week of full-time credit for each 2 weeks of half-time work.

3. BASIC REQUIREMENTS. The basic requirements for employment as a NMT are prescribed in 38 U.S.C. § 7402(b)(14). To qualify for appointment as a NMT, all applicants must possess the following:

a. Citizenship. Be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3.g., of this part.)

b. Certification. All applicants must be certified in nuclear medicine technology by the Nuclear Medicine Technology Certification Board (NMTCB) or the American Registry of Radiologic Technology (ARRT) (N). NMTCB or ARRT (N) certification eligibility requirements are normally satisfied by one of the following:
(1) Completion of a NMTCB-recognized nuclear medicine technology program, 

OR 

(2) Completion of a nuclear medicine technology program accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT), or other accrediting agencies as recognized by the U.S. Department of Education (DOE), culminating in a certificate, associate, baccalaureate, or master's degree. Educational programs must have structured clinical training sufficient to provide clinical competency in radiation safety, instrumentation, clinical procedures, and radio-pharmacy, as deemed acceptable by the NMTCB.

NOTE: Technologists functioning as multi-modality technologists require additional specific certifications as stated in assignment descriptions below.

c. Exceptions. Non-certified applicants, who otherwise meet the eligibility requirements for NMTCB or ARRT (N) certification, may be given a temporary appointment as a graduate NMT under the authority of 38 U.S.C. § 7405 (a)(1)(D). Failure to obtain certification [within 1 year from the date of appointment] is justification for termination of the temporary appointment. This may result in termination of employment.

((1) Failure to Obtain Credential. In all cases, NMTs must actively pursue meeting certification requirements starting from the date of their appointment. Failure to become certified within 1 year from date of appointment will result in removal from the GS-0601 NMT occupation and may result in termination of employment.)

(2) Loss of Credential. [Once certified, NMTs must maintain a full, valid, and unrestricted certification. Loss of credential will result in removal from the GS-0601 NMT occupation and may result in termination of employment.] For occupations which require an active certification at all grade levels, at the discretion of the appointing official, an employee may be reassigned to another occupation for which he/she qualifies if a placement opportunity exists. For occupations which require an active credential (licensure/certification/registration) in assignments above the journey level only, at the discretion of the appointing official, an employee may remain at an appropriate lower grade level in the occupation when both of the following apply: the credential is not a requirement and a placement opportunity exists.

d. Grandfathering Provision. [ ]All persons employed in VHA [as a NMT] on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:
(1) Such employees in an occupation that requires a certification, may be reassigned, promoted up to and including the journey (full performance) level, or changed to lower grade within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

(2) Such employees in an occupation that requires a certification only at higher grade levels must meet the certification requirement before they can be promoted to the higher-grade levels.

(3) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(4) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or certification that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

(5) If an employee who was in the NMT occupation listed in 38 U.S.C. § 7401(3) under this provision leaves that occupation, the employee loses protected status, and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. Physical Requirements. See VA Directive and Handbook 5019[, Employee Occupational Health Service.]

f. English Language Proficiency. [NMTs] must be proficient in spoken and written English in accordance with chapter 2, section D, paragraph 5a, of this part.

4. GRADE REQUIREMENTS.

a. [Nuclear Medicine Technologist]. All individuals assigned to this occupation must have an approved title or parenthetical title, as described below:

(1) Nuclear Medicine Technologist

(2) Nuclear Medicine Technologist (Fusion Imaging Technologist)

(3) Nuclear Medicine Technologist (Multi-Modality Technologist)

(4) Lead Nuclear Medicine Technologist

(5) Supervisory Nuclear Medicine Technologist
(6) Supervisory Nuclear Medicine Technologist (Chief)

(7) Nuclear Medicine Technologist (National or Regional Technologist)

(8) Supervisory Nuclear Medicine Technologist (Imaging Program Administrator)

GRADE DETERMINATIONS.

a. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:

(1) **[Nuclear Medicine Technologist, GS-5]**

   (a) **Experience or Education.** None beyond the basic requirements. [Certification as described in the basic requirements in paragraph 3.b. above is required.]

   [(b)] **Assignments.** Candidates at this grade level, serve as [entry level] NMTs [and] receive guidance from more experienced staff members for more complex patients and require daily direct [(i.e., immediate)] supervision.

(2) **[Nuclear Medicine Technologist, GS-7]**

   (a) **Experience [or Education]**

     i. **[Developmental Level].** Certification, as described in the basic requirements in paragraph [3.b.] above, [and for the developmental level assignment,] completion of 1 year of [creditable experience] equivalent to the next lower grade level, directly related to the position to be filled (i.e., experience that demonstrates possession of the knowledge, skills, abilities, and other characteristics needed to provide nuclear medicine technology services at that level) [is required.]

     OR

     ii. **Advanced Entry Level Placement.** See VA Handbook 5005, Part II, Appendix G17.

   (b) **Assignments.** Candidates at this grade level [may serve as advanced entry level or developmental level] NMTs. [They receive guidance from more experienced staff members for more complex patients and require general supervision.] At this grade, NMTs utilize the proper methods of receipt, use, storage, and disposal of radioactive material; perform and evaluate basic quality control on all imaging and non-imaging instrumentation and auxiliary equipment, and provide basic patient care, recognizing and responding to emergency conditions.
(c) **Demonstrated Knowledge, Skills, and Abilities.** [In addition, the candidate must demonstrate all of the following KSAs:]

i. Knowledge of Nuclear Regulatory Commission (NRC) regulations [that pertain to nuclear medicine technology practices.]

ii. Knowledge of the medical sciences such as anatomy, physiology, chemistry, and physics and how they relate to the cardiovascular, skeletal, endocrine, respiratory, gastrointestinal, and genitourinary systems of the human body.

iii. Knowledge of radioactive package types, package surveys, and radioactive materials record management.

[iv. Ability to independently use and interpret Geiger-Mueller meter.]

(3) **[Nuclear Medicine Technologist, GS-9]**

(a) **Experience.** Completion of 1 year of [creditable] experience equivalent to the next lower grade level directly related to the position to be filled (i.e., experience that demonstrates possession of the knowledge, skills, abilities, and other characteristics needed to provide nuclear medicine technology services at that level) [is required.]

(b) **Assignments.** Candidates at this grade level serve as staff NMTs [at the journey level. NMTs at this level have a full understanding of proper methods of receipt, use, storage, and disposal of radioactive material; properly and independently handle unusual circumstances; perform and evaluate daily, weekly, monthly, and quarterly quality control on all imaging and non-imaging instrumentation and auxiliary equipment, provide basic patient care, and can recognize and respond to emergency conditions. It is expected that they routinely and independently perform the full scope and complexity of these responsibilities and receive guidance from higher-level or supervisory staff members for only the most complex patients.]

(c) **Demonstrated Knowledge, Skills, and Abilities.** [In addition, the candidate must demonstrate all of the following KSAs:]

i. Ability to document excessive radiation exposure in the working environment.

ii. Knowledge of medical events requiring documentation and the ability to properly document them and make recommendations to the radiation safety officer (RSO).

iii. Ability to communicate orally and in writing post iodine-131 therapy radiation safety precautions.

iv. Ability to troubleshoot gamma camera and auxiliary equipment problems.

v. Ability to analyze computer generated data for technical quality and artifacts and initiate corrective measures.
(4) [Nuclear Medicine Technologist,] GS-11

(a) **Experience.** [For assignments above the journey level, the candidate must have 1 year of creditable experience equivalent to the next lower grade level directly related to the position being filled, and must fully meet the KSAs at that level.]

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. NMTs at this level are fully functional as an advanced NMT and carry out their assigned tasks independently. NMTs at this level serve in advanced assignments and will have varying assignments, including special and complex imaging procedures, advanced therapies, clinical instruction, and quality management duties within the program. Advanced therapies may include, but are not limited to, yttrium-90, radium, and palliative bone pain therapy. Regardless of the nature of the specific assignment, the work must be of sufficient scope and complexity to meet the knowledge, skills, and abilities to perform at this level.

(c) **Demonstrated Knowledge, Skills, and Abilities.** The candidate must demonstrate all of the following technical KSAs:

i. Ability to produce and assess high quality scans and quality control images using independent judgement to recognize abnormal or unacceptable results.

ii. Knowledge and skill in use of ancillary equipment with an understanding of how the results will affect the study outcome.

iii. Knowledge of physiologic processes as they relate to altered radiopharmaceutical uptake and/or artefactual findings.

iv. Ability to obtain, assess, and document pre-therapy patient preparation information and provide post-therapy patient education following proper administration of advanced therapy dose.

v. Ability to develop new protocols for imaging procedures.

vi. Ability to analyze instances of increased radiation exposure levels and recommend measures to reduce.

vii. Ability to analyze consequences of improper packaging of radioactive material and take appropriate actions.

(5) **Nuclear Medicine Technologist (Fusion Imaging Technologist), GS-11**

(a) **Experience.** For assignments above the journey level, the candidate must have 1 year of creditable experience equivalent to the next lower grade level directly related to the position being filled, and must fully meet the KSAs at that level.
(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. NMTs at this level are fully functional as an advanced NMT and carry out their assigned tasks independently. NMTs in this assignment perform fusion imaging such as positron emission tomography/computed tomography (PET/CT), single photon emission computed tomography/computed tomography (SPECT/CT) and/or **positron emission tomography (PET)** and **magnetic resonance (PET/MR)** procedures that include non-diagnostic low dose CT attenuation corrected or MR fused images. They carry out these complex assignments independently. Assignments may include advanced therapies. The work must be of sufficient scope and complexity to meet the knowledge, skills, and abilities to perform at this level.

(c) **Demonstrated Knowledge, Skills, and Abilities.** The candidate must demonstrate all of the following technical KSAs:

i. Ability to produce and assess high quality fusion and quality control images using independent judgement to recognize abnormal or unacceptable results.

ii. Practical knowledge and skill in the use of ancillary equipment with an understanding of how the results will affect the study outcome.

iii. Knowledge of physiologic processes as they relate to altered radiopharmaceutical uptake and/or artefactual findings.

iv. Knowledge of CT and/or MR radiographic techniques utilized in quality control and acquisition parameters.

v. Ability to recognize and correct fusion imaging system errors.

(6) **Nuclear Medicine Technologist (Multi-Modality Technologist), GS-11**

(a) **Experience.** For assignments above the journey level, the candidate must have 1 year of creditable experience equivalent to the next lower grade level directly related to the position being filled, and must fully meet the KSAs at that level.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. NMTs at this level are fully functional as an advanced NMT and carry out their assigned tasks independently. NMTs in this assignment perform fusion imaging such as PET/CT, SPECT/CT and/or PET/MR procedures that include diagnostic nuclear medicine, CT, and/or MR fused images. Multi-modality technologists must hold appropriate specific certifications in nuclear medicine (NMTCB or ARRT(N)), as well as CT (NMTCB(CT)) or ARRT (CT)), and/or MR (ARRT (MR)) applicable to independently perform the assignment duties. They carry out these complex assignments independently as part of nuclear medicine procedures. Assignments may include injection of contrast and recognition of allergic reaction, contraindication, and medication interactions. The work must be of sufficient
scope and complexity to meet the knowledge, skills, and abilities to perform at this level.

(c) **Demonstrated Knowledge, Skills, and Abilities.** The candidate must demonstrate all of the following technical KSAs:

1. Knowledge of contrast media, side effects, medication allergic reactions, drug interactions, and extravasation assessment.
2. Skill to differentiate multi-modality protocols and adjust protocols according to patient needs, body mass index, or area of interest.
3. Knowledge of unique scanning and processing parameters required of multi-modality imaging.
4. Ability to troubleshoot and make simple repairs to PET/CT and/or PET/MR imaging systems.
5. Ability to care for patients during all stages of the procedure and provide emergency response care when necessary.
6. Knowledge of all contraindications for performing CT and/or MR scans.

(7) **Lead Nuclear Medicine Technologist, GS-11**

(a) **Experience.** For assignments above the journey level, the candidate must have 1 year of creditable experience equivalent to the next lower grade level directly related to the position being filled, and must fully meet the KSAs at that level.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. NMTs at this level are fully functional as an advanced NMT and carry out their assigned tasks independently. The candidate functions as a lead technologist for a group of NMTs at and below the journey level (GS-9) and other unit staff. The lead technologist is responsible for assignment of work to ensure effective unit operation and maximizing use of unit resources. This position provides a full range of nuclear medicine procedures, has a broad knowledge of the different modalities within the diagnostic radiologic area, and is accountable to the next higher-level supervisor.

(c) **Demonstrated Knowledge, Skills, and Abilities.** The candidate must demonstrate all of the following technical KSAs:

1. Ability to motivate and mentor staff.
2. Ability to respond to decrease staffing levels or increase in workload involving all parties that restructure work assignments.
iii. Ability to communicate effectively with supervisor and staff.

(8) **Supervisory Nuclear Medicine Technologist, GS-11**

(a) **Experience.** For assignments above the journey level, the candidate must have 1 year of creditable experience equivalent to the next lower grade level directly related to the position being filled, and must fully meet the KSAs at that level.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. NMTs at this level are fully functional as an advanced NMT and carry out their assigned tasks independently. Individuals in this assignment assume full administrative and professional responsibility for planning and directing the nuclear medicine program at a medical center or independent outpatient clinic, to include budget, staffing, inventory, equipment, and safety. They also have full supervisory responsibility over NMTs at and below the journey level (GS-9), and may include clerical/administrative staff, for a unit, including staff evaluation, interviewing, selection, and disciplinary processes.

(c) **Demonstrated Knowledge, Skills, and Abilities.** The candidate must demonstrate the following technical KSAs and, as designated by an asterisk (*), demonstrate the potential to acquire the assignment specific KSAs:

   i. Ability to perform complex nuclear medicine studies.

   ii. Skill in motivating and mentoring technical and administrative staff.

   iii. Ability to develop continuing education standards for nuclear medicine staff.

   iv. *Ability to communicate orally and in writing with higher level authorities (i.e., National Health Physics Program (NHPP), The Joint Commission (TJC), NRC, Inspector General (IG), executive leadership).

   v. *Ability to interview candidates for subordinate positions in the section; recommend appointments, advancements, or, when appropriate, disciplinary actions; evaluate performance; and identify continuing education and training needs.

   vi. *Ability to forecast and plan for the effective operation of the unit, including staffing, advancing technology, equipment, and resource needs.

(9) **[Supervisory Nuclear Medicine Technologist (Chief),] GS-12**

(a) **Experience.** [At this level,] completion of 1 year of [creditable] experience equivalent to the next lower grade level directly related to the position to be filled, i.e., experience that demonstrates possession of the KSAs and other characteristics needed to provide nuclear medicine technology and administrative services [is required.] This experience must have provided the candidate with an in-depth knowledge of common and uncommon nuclear
medicine procedures, in-depth knowledge of radiation safety practices, and knowledge of staffing levels, financial management, personnel management, and supply management.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Individuals in this assignment assume full administrative and professional responsibility for planning and directing the nuclear medicine program and technologists above the journey level at a medical center or independent outpatient clinic.

(c) **Demonstrated Knowledge, Skills, and Abilities.** The candidate must demonstrate all the following technical KSAs and demonstrate the potential to acquire the assignment specific KSAs as designated by an asterisk (*):

   i. Ability to provide complex nuclear medicine patient procedures.

   ii. *Ability to develop and initiate new protocols which apply current research findings.

   iii. *Skill in providing [and interpreting] administrative reports to management orally and in writing.

(10) **Supervisory Nuclear Medicine Technologist, GS-12**

(a) **Experience.** [For assignments above the journey level, the candidate must have 1 year of creditable experience equivalent to the next lower grade level directly related to the position being filled, and must fully meet the KSAs at that level.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. NMTs at this level are fully functional as an advanced NMT and carry out their assigned tasks independently. Individuals in this assignment assume full administrative and professional responsibility for planning and directing the nuclear medicine program and technologists above the journey level at a medical center or independent outpatient clinic. They also have supervisory responsibility over a program.

[(c) **Demonstrated Knowledge, Skills, and Abilities.** The candidate must demonstrate all the following technical KSAs and demonstrate the potential to acquire the assignment specific KSAs as designated by an asterisk (*):

   i. *Ability to assign and evaluate work of subordinate staff as well as resolve problems that may interfere with the delivery of nuclear medicine services by staff members.

   ii. Skill in providing complex nuclear medicine patient procedures.

   iii. *Ability to develop and initiate new protocols which apply to current research findings.]
iv. *Skill in providing administrative reports both orally and in writing [with higher level authorities (i.e., NHPP, TJC, NRC, Inspector General, executive leadership)].

v. *Ability to interview candidates for positions in the section; recommend appointments, advancements, or, when appropriate, disciplinary actions; evaluate performance; and identify continuing education and training needs.

[(11) **Nuclear Medicine Technologist (National or Regional Technologist), GS-13**

(a) **Experience.** Completion of 1 year of experience equivalent to the next lower grade level directly related to the position to be filled, i.e., experience that demonstrates possession of the KSAs and other characteristics needed to provide nuclear medicine technology and administrative services is required.

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. NMTs at this level function as clinical program specialists responsible for the management of Veterans Integrated Systems Network (VISN) or national nuclear medicine initiatives having a high degree of visibility and a significant impact on VHA health care delivery. Examples include VISN or national initiatives in the care and treatment of patients, educational programs, program evaluation, quality assurance, etc. These programs typically include collaboration with other federal and state agencies, professional organizations, etc. Due to the scope of regional/national responsibilities, it is expected there may generally be one regional level technologist per VISN, if and where warranted, but no more than two.

(c) **Demonstrated Knowledge, Skills, and Abilities.** The candidate must demonstrate all of the following technical KSAs and demonstrate the potential to acquire the assignment specific KSAs as designated by an asterisk (*):

i. Extensive working knowledge of regional or national initiatives and/or intra-agency or similar workgroups or committees.

ii. Ability to develop and/or recommend national and/or regional policies and/or directives impacting program operations.

iii. *Ability to perform national and/or regional special projects, activities, and co-chair related national nuclear medicine committees.

iv. Skill in managing resources and work flow, i.e., space, equipment, supplies, personnel at a regional and/or national level.

v. Ability to provide expert consultation for national and/or regional nuclear medicine policies, program, and quality initiatives.

vi. Skill in developing and providing oversight of national or regional program requirements regarding continuing education for nuclear medicine technologists at facilities nationwide.
(12) **Supervisory Nuclear Medicine Technologist (Imaging Program Administrator), GS-13**

(a) **Experience.** [For assignments above the journey level, the candidate must have 1 year of creditable experience equivalent to the next lower grade level directly related to the position being filled and must fully meet all the KSAs at that level.]

(b) **Assignments.** For all assignments above the journey level, the higher-level duties must consist of significant scope, complexity (difficulty), range of variety, and be performed by the incumbent at least 25% of the time. NMTs at this level are fully functional as an advanced NMT and carry out their assigned tasks independently. The supervisory NMT (imaging program administrator) is responsible for the direction of a consolidated imaging program that includes nuclear medicine and one or both of diagnostic radiology and/or radiation oncology programs. The incumbent ensures professional competence and performance of clinical and clerical staff by establishing professional standards, protocols, and policies and procedures. This position has supervisory responsibility for a large staff of subordinate personnel in various disciplines and sections noted above and would likely include at least one subordinate supervisor at the next lower level, and may include various clerical and administrative support personnel. Responsibilities include oversight of business operations and planning for complex medical centers with strong academic affiliations that include both graduate medical education and medical imaging training programs. Responsibilities include oversight of multiple complex imaging services and providing annual budget information; monitoring expenditures; identifying variances and recommending corrective actions. In collaboration with the facility leadership, this position develops strategic short-term and long-term business, market, and operational plans focused on the growth of clinical, academic, and financial performance. The supervisory NMT (imaging program administrator) monitors and evaluates progress toward implementing strategic goals and objectives. This position is responsible for contributing information for strategic plans and reviews; implementing production, productivity, quality, and patient-service standards; resolving problems and identifying system improvements. The supervisory NMT (imaging program administrator) is accountable for outcomes and performance targets, including but not limited to, patient and staff satisfaction surveys, industry performance benchmarks, and quality outcomes. The supervisory NMT (imaging program administrator) works closely with departmental staff to improve quality results by evaluating accuracy and quality of services, and providing assistance with the implementation of new techniques, equipment, and procedures. This NMT oversees, supports, and makes contributions to patient safety, implementing systems to conduct root cause analysis and correction of errors, reporting of adverse occurrences, near misses, and safety concerns. This position develops, implements, maintains, and enforces departmental programs, policies, procedures, and protocols. The supervisory NMT (imaging program administrator) ensures and maintains required documentation for compliance with safety, environmental and infection control standards, and with local, state, and federal regulations. This position monitors compliance with standards, identifies variances or inability to meet established targets, and implements actions to ensure that targets are met.
(c) Demonstrated Knowledge, Skills, and Abilities. The candidate must demonstrate all the following technical KSAs and demonstrate the potential to acquire the assignment specific KSAs as designated by an asterisk (*):

i. Ability to provide the full range of supervisory duties, which includes responsibility for assignment of work, performance evaluations, selection of staff, and recommendation of awards, advancements, and disciplinary actions.

ii. *Skill in administrative management (e.g., budgeting, contracting, procurement, and property management) in accordance with regulations.

iii. *Ability to work collaboratively with other disciplines, upper management, regional, or headquarters level staff.

iv. Ability to plan and execute short-term and long range programs and/or goals using project management and tactical/strategic planning, as well as, developing and overseeing complex quality programs by addressing outcome and performance benchmarks.

v. Advanced knowledge of concepts, principles and methodologies of a significantly high level imaging program that includes complex subsections such as diagnostic radiology, nuclear medicine and/or radiation oncology operations in order to assess program effectiveness and provide authoritative guidance for operations, personnel, and management.

vi. Ability to develop, implement, maintain, and enforce departmental program policies, procedures, and protocols to maintain required documentation for compliance with safety, environmental and infection control standards, and with TJC, Food and Drug Administration, NRC-NHPP, American College of Radiation, Health Insurance Portability and Accountability Act, and other federal regulations. This includes the ability to monitor compliance with standards, identify variances or inabilities to meet established targets, and implement action to ensure that targets are met.

6. DEVIATIONS.

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for NMTs in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the certification requirements be waived.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

APPENDIX G20. DIETITIAN QUALIFICATION STANDARD

GS-0630

Veterans Health Administration

1. [COVERAGE. The following are requirements for appointment or placement as a Dietitian in the Veterans Health Administration (VHA). These requirements apply to all VHA Dietitians in the General Schedule (GS)-0630 occupational series. Dietitians are experts in the disciplines of nutrition and food. They translate the complex science of nutrition into healthy, real-world solutions for customers. Dietitians within VHA are fully integrated into a health care team and work within a variety of settings, including but not limited to inpatient, outpatient, long-term care, food operations and community clinics. Dietitians in a clinical setting are responsible for utilizing the Nutrition Care Process (NCP) framework to provide patient-centered care using evidenced-based guidelines to make decisions. Dietitians in the food service setting are responsible for the scientific preparation and service of high-quality food by selection, requisition, receipt, storage, issuance and transportation of food and supplies. They ensure robust and effective sanitation, safety, competency and training programs.

2. DEFINITIONS.

a. **Appointing Official.** The Human Resources Officer has appointing authority to process and authenticate notifications of personnel actions and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

b. **Approving Official.** The VISN Director, Facility Director or Under Secretary for Health or designee (for VHA central office appointments) is the approving official and will determine whether to approve or disapprove the appointment of employees in hybrid occupations.

c. **Journey Level.** The full performance level for this qualification standard is the GS-11 grade level.

d. **Creditable Experience.** To be creditable, the experience must have required the use of knowledge, skills and abilities (KSAs) associated with current professional dietetic practice and must have been gained post registration. This may be evidenced by one or more of the following:

   (1) The equivalent of 1 year of active professional practice. Active professional practice means paid/non-paid employment as a registered Dietitian.

   (2) Academic course work leading to an advanced graduate degree in nutrition or a related health care field.
e. **Quality of Experience.** Qualifying experience must be comparable to dietetic experience at the next lower grade level of the position being filled. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

f. **Part-Time Experience.** Part-time experience as a registered Dietitian is credited according to its relationship to the full-time workweek. For example, a registered Dietitian employed 20 hours per week, or on a half-time basis, would receive 1 full-time work week of credit for each 2 weeks of service.

g. **Accreditation Council for Education in Nutrition and Dietetics.** Accreditation Council for Education in Nutrition and Dietetics (ACEND®) is the Academy of Nutrition and Dietetics’ accrediting agency for education programs preparing students for careers as registered Dietitian Nutritionists (RDN).

h. **Registered Dietitian Nutritionist and Registered Dietitian.** RDN and Registered Dietitian (RD) credentials are the same and both are qualifying. The difference between RDN and RD is in name only due to a change by the professional academy in 2014. In this standard, the term RDN will be used.

3. **BASIC REQUIREMENTS.**

a. **Citizenship.** Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

b. **Registration.**

   (1) All applicants must hold the RDN credential from the Commission on Dietetic Registration (CDR) the credentialing agency of the Academy of Nutrition and Dietetics. Note: Applicants who hold the RDN credential have met the education requirement (e.g. bachelor’s degree or higher) of CDR, as such this occupation is considered professional and scientific with a positive education requirement and the procedures in Part I, Chapter 4 of this Handbook will be followed when applying Veteran’s preference.

   (2) **Exception for Dietitians who do not possess the RDN credential.**

      (a) Non-credentialed Dietitians who meet the basic qualification requirements and have fulfilled the requirements below, but do not possess the RDN credential, may be given a temporary full-time appointment not to exceed one year under the authority of 38 U.S.C. § 7405(c)(2).
i Non-credentialed Dietitians must have fulfilled each of the following:

A Earned a bachelor's or higher degree from a U.S. regionally accredited college, university or foreign equivalent (refer to ii below).

B Completed an ACEND® accredited experiential or supervised practice program and provide a verification statement from the program director that conveys eligibility to take the CDR registration exam as a prospective RDN. A list of ACEND® accredited programs is located on the ACEND® website or at ACEND Accredited Programs Directory.

ii Foreign Education. To be creditable, college and/or university degrees earned outside the U.S and its territories must be evaluated by ACEND® and meet ACEND®'s International Dietitian Education standards which are designed to provide graduates with the knowledge and competencies to sit for the CDR credentialing exam.

(b) Non-credentialed Dietitians may only be appointed at the GS-07 or GS-09 grade level and may not be promoted/converted until they obtain their RDN credential.

(c) Non-credentialed Dietitians must provide care under the supervision of a RDN at or above the full performance level.

(d) Temporary appointments of non-credentialed Dietitian will not be extended beyond one year or converted to a new temporary appointment.

(e) Failure to Obtain Registration. In all cases, Dietitians must actively pursue meeting registration requirements starting from their appointment date. At the time of appointment, servicing Human Resources (HR) staff in collaboration with the supervisor, will provide non-registered Dietitians the written requirement to obtain registration, the date by which they must acquire it and the consequences for not doing so by the deadline. Failure to obtain registration within one year from the date of appointment will result in removal from the Dietitian, GS-0630 occupation and may result in termination of employment.

c. Loss of Credential. In collaboration with HR Office staff, management officials must immediately relieve employees who fail to maintain the required registration/certification of duties and responsibilities associated with the
occupation and/or assignment, which may also result in separation from employment.

d. **Grandfathering Provision.** Employees in VHA in this occupation, under a permanent, appropriate and legal placement on the effective date of the qualification standard, are considered to have met all qualification requirements for the grade and/or assignment held, including positive education and registration/certification, where applicable. Employees appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, either on a temporary or permanent basis until they fully meet the basic requirements of the standard. The following provisions apply to employees who do not meet all the qualification requirements:

   (1) Employees may be reassigned, promoted up to and including the full performance (journey) level or changed to a lower grade within the occupation, but may not be promoted beyond the journey level or be newly placed in a supervisory or managerial position.

   (2) Employees must meet the assignment-specific certification/education requirements to be placed in Dietitian (Advanced Level Practice) or Dietitian (Dietetic Internship Director) assignments.

   (3) Employees initially grandfathered into this occupation who subsequently obtain additional education and/or registration/certification that meet all the qualification standard’s basic or assignment-specific requirements must maintain the required credentials as a condition of employment in the occupation/assignment.

   (4) Employees retained in this occupation under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of re-entry in the occupation.

e. **Physical Requirements.** See VA Directive and Handbook 5019, Employee Occupational Health Service for requirements.

f. **English Language Proficiency.** Dietitian candidates must be proficient in spoken and written English in accordance with 38 U.S.C. § 7403(f).

4. **OFFICIAL POSITION TITLES.** All positions must use an approved title and grade level as described below and duties must meet the definition of the assignment:

   a. Dietitian (Clinical), GS-07

   b. Dietitian (Clinical), GS-09
c. Dietitian (Clinical), GS-11

d. Dietitian (Informatics), GS-07

e. Dietitian (Informatics), GS-09

f. Dietitian (Informatics), GS-11

g. Supervisory Dietitian (Informatics), GS-11

h. Dietitian (Advanced Level Practice), GS-12

i. Dietitian (Dietetic Internship Director), GS-12

j. Dietitian (Facility Program Coordinator), GS-12

k. Supervisory Dietitian (Food Operations), GS-12

l. Supervisory Dietitian (Clinical Nutrition), GS-12

m. Supervisory Dietitian (Clinical Nutrition), GS-13

n. Supervisory Dietitian (Food Operations), GS-13

o. Supervisory Dietitian (Facility Program Coordinator), GS-13

p. Dietitian (VISN Program Coordinator), GS-13

q. Dietitian (National Program Coordinator), GS-13

r. Supervisory Dietitian (Chief, Nutrition and Food Services), GS-13

s. Supervisory Dietitian (Chief, Nutrition and Food Services), GS-14

t. Dietitian (VISN Program Coordinator), GS-14

u. Dietitian (National Program Coordinator), GS-14

5. GRADE DETERMINATIONS. All individuals assigned to this occupation must meet all the basic qualification requirements in paragraph 3 a-f and all the requirements defined in the specific assignment.

a. Dietitian (Clinical), GS-07.

(1) Experience or Education. None beyond the basic requirements.

(2) Assignment. Employees in this assignment serve in a Dietitian (Clinical) entry-level developmental position. They work under the guidance of a Dietitian who is at the full performance level or above, performing
increasingly complex tasks designed to prepare them for promotion. Clinical Dietitians conduct nutrition assessments for patients with lower acuity using the NCP while developing skills to apply evidence-based nutrition practice guidelines. Clinical Dietitians learn to interpret research, apply whole health principles and develop patient-centered goals. They develop skills in accurate record keeping of clinical activities and complete patient encounters using approved systems. Clinical Dietitians comply with The Joint Commission (TJC) requirements and other accrediting agency standards to ensure safe and quality patient care. They collaborate with the Food Operations Section to enhance the Veterans’ dining experience and ensure patient satisfaction.

b. **Dietitian (Clinical), GS-09.**

   (1) **Experience.** At least one year of experience equivalent to the next lower grade level.

   OR

   (2) **Education.** Master’s degree from a regionally accredited university or college.

   (3) **Knowledge, Skills and Abilities.** In addition to the experience or education above, the candidate must demonstrate the following KSAs:

      (a) Knowledge of various accrediting and regulatory requirements.

      (b) Knowledge of virtual technology to provide nutrition care.

      (c) Ability to deliver patient care using the NCP (e.g., assessment, diagnosis, intervention, monitoring and evaluation).

      (d) Ability to apply evidence-based nutrition practices to improve patient outcomes.

      (e) Ability to develop patient-centered goals.

      (f) Ability to collect data for performance improvement studies.

      (g) Ability to collaborate with stakeholders.

   (4) **Assignment.** Employees in this assignment serve in a Dietitian (Clinical) developmental position. They perform increasingly complex tasks under general supervision. Clinical Dietitians conduct nutrition assessments using the NCP. They develop skills in applying evidence-based nutrition practice guidelines, interpreting research and utilizing whole health principles to develop patient-centered goals and improve outcomes. Clinical Dietitians also utilize virtual care technology to improve access to care. They
maintain accurate record keeping of daily clinical activities and patient encounters using approved systems. Clinical Dietitians comply with TJC and other accrediting agency standards to ensure safe and quality patient care. They collect data related to performance improvement activities within Nutrition and Food Services (NFS) and assist in implementing new initiatives. Clinical Dietitians collaborate with the Food Service Section to enhance the Veterans’ dining experience, support patient satisfaction and serve as a liaison between clinical units and the food service section.

c. **Dietitian (Clinical), GS-11.**

(1) **Experience.** At least one year of experience as an RDN equivalent to the next lower grade.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

   (a) Skill in delivering patient care using the NCP (e.g., assessment, diagnosis, intervention, monitoring and evaluation).

   (b) Skill in interpreting research to apply evidence-based nutrition practices to improve patient outcomes.

   (c) Skill in developing patient-centered goals.

   (d) Skill in analyzing data for performance improvement studies.

   (e) Skill in collaborating with stakeholders.

   (f) Ability to comply with various accrediting, regulatory and agency authorities.

(3) **Assignment.** Employees in this assignment serve in a Dietitian (Clinical) full performance level position. Clinical Dietitians conduct comprehensive nutrition assessments for Veterans using the NCP (e.g., assessment, diagnosis, intervention, monitoring and evaluation), assuring high-quality nutrition care. They apply evidence-based nutrition practice guidelines, interpret research and utilize whole health principles to develop patient-centered goals and improve outcomes. Clinical Dietitians also utilize virtual care technology to improve access to care. They are accountable for independent and accurate record keeping, autonomous coverage of daily clinical activities and efficiently completing patient encounters using approved systems. Clinical Dietitians are knowledgeable of and ensure work accomplishments comply with TJC and other accrediting agency standards and ensure continuous improvement of safe and quality care. They collect and analyze data related to performance improvement activities within NFS, lead activities in the implementation of new initiatives.
and collaborate with stakeholders. Clinical Dietitians frequently collaborate with the food service section and leadership staff to enhance the Veteran's dining experience, support patient satisfaction and serve as a liaison between clinical units and the Food Service Section.

d. **Dietitian (Informatics) GS-07.**

   (1) **Experience or Education.** None beyond the basic requirements.

   (2) **Assignment.** Employees in this assignment serve in a Dietitian (Informatics) entry-level developmental position. Informatics Dietitians work under the guidance of a Dietitian at the full performance level or above, performing increasingly complex tasks designed to prepare them for promotion. Informatics Dietitians acquire skills in food service technology, working toward coordinating and implementing technology into the operation. They gain skills in the operation of VHA-supported software programs and/or commercial off-the-shelf software (COTS) to support the effective management of food operations and patient meal services. Informatics Dietitians gain skills in using technology for meal production, meal service and temperature control. They learn to create and revise menus, complete nutrient analyses and ensure menus follow required diet guidelines. Informatics Dietitians participate in a menu committee. They learn to standardize recipes and estimate the cost to ensure they are economical and within budgetary constraints. Informatics Dietitians review educational materials and references for compliance with policy and procedures for the Nutrition Communication Center (NCC). They assist in the review of NCC productivity reports and support downtime procedures and train employees. Informatics Dietitians gain knowledge of technical and technological developments in nutrition informatics and dietetics and oversee/complete all aspects of employee training related to computer systems, menus and informatics. They assist in the department Automated Data Processing Application Coordinator (ADPAC) role. They review and update the NFS SharePoint site. Informatics Dietitians collaborate with the clinical nutrition section to enhance the Veterans dining experience and support patient satisfaction.

e. **Dietitian (Informatics), GS-09.**

   (1) **Experience.** At least one year of experience equivalent to the next lower grade level.

   OR

   (2) **Education.** Master’s degree from a regionally accredited university or college.
(3) **Knowledge, Skills and Abilities.** In addition to the experience or education above, the candidate must demonstrate the following KSAs:

(a) Knowledge of nutritional standards and requirements.

(b) Ability to manage computer software programs relative to food service systems.

(c) Ability to develop training and reference materials.

(d) Ability to evaluate data to improve outcomes.

(e) Ability to provide training related to food service systems technology.

(f) Ability to collaborate with stakeholders.

(4) **Assignment.** Employees in this assignment serve in a Dietitian (Informatics) developmental position. Informatics Dietitians perform increasingly complex tasks under general supervision. They develop skills to plan, coordinate and implement food service technology as well as offer recommendations for improvement within the service. Informatics Dietitians develop skills in the management of VHA-supported software programs and/or COTS to support food operations and patient meal services. They utilize technology for meal production, meal service and temperature control. Informatics Dietitians create and revise menus, complete nutrient analyses and ensure menus follow required diet guidelines and are signed off on by a higher-level Dietitian. They assist in leading a menu committee. Informatics Dietitians have become increasingly independent in standardizing recipes and ensuring costs are within budget. They develop and maintain educational materials and references, ensuring they comply with policy and procedures as needed for the NCC. Informatics Dietitians review NCC productivity reports and support downtime procedures, helping ensure procedures remain updated so that employees can be trained on the implementation. They are knowledgeable of technical and technological developments in nutrition informatics and dietetics and oversee/complete all aspects of employee training related to computer systems, menus and informatics. Informatics Dietitians participate as the service ADPAC between administration, food services, clinical staff and the Office of Information Technology (OIT) regarding clinical information system processes. They review and update the NFS SharePoint site. Informatics Dietitians collaborate with the clinical nutrition section to enhance the Veteran’s dining experience, support patient satisfaction and serve as a liaison between the food service section and the clinical units.

f. **Dietitian (Informatics), GS-11.**
(1) **Experience.** One year of experience as an RDN Dietitian equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill in managing computer software programs relative to food service systems.

(b) Skill in applying nutritional knowledge to develop menus ensuring nutritional standards are met.

(c) Skill in developing training and reference materials.

(d) Skill in evaluating data to improve outcomes.

(e) Skill in providing training related to food service systems technology.

(f) Skill in collaborating with stakeholders.

(3) **Assignment.** Employees in this assignment serve in a Dietitian (Informatics) full performance level position. Informatics Dietitians are thoroughly knowledgeable of and responsible for planning, coordinating and implementing food service technology as well as ensuring continuous evaluation and improvement within the service. They independently manage VHA-supported software programs and/or COTS to support the effective management of food operations and patient meal services including entering and maintaining ingredients, recipes, nutritional data and menus. Informatics Dietitians fully oversee the technology used for meal production, meal service and temperature control. They lead a menu committee. Informatics Dietitians ensure recipes are standardized, costed and within budgetary constraints. They create, revise and sign off on menus, complete nutrient analyses of regular and modified menus and ensure menus follow required diet guidelines. Informatics Dietitians oversee and are responsible for developing and maintaining training and reference materials for the NCC. They manage productivity reports and complete audits for the NCC. Informatics Dietitians coordinate and support downtime procedures for the NCC, ensuring procedures remain up to date. As a subject matter expert in nutrition informatics and food service technology, Informatics Dietitians use their expertise to complete all aspects of training related to computer systems, menus and informatics for NFS employees. They frequently collaborate with the clinical nutrition section and leadership staff to enhance the Veteran’s dining experience and support patient satisfaction. Informatics Dietitians act as a department ADPAC serving as the liaison between administration, food services, clinical staff and OI&T regarding clinical information system processes. They manage and update the service SharePoint site.
Supervisory Dietitian (Informatics), GS-11.

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

   (a) Skill in managing computer software programs relative to food service systems.

   (b) Skill in applying nutritional knowledge to develop menus ensuring nutritional standards are met.

   (c) Skill in developing training and reference materials.

   (d) Skill in evaluating data to improve outcomes.

   (e) Skill in providing training related to food service systems technology.

   (f) Skill in collaborating with stakeholders.

   (g) Ability to supervise subordinate staff (i.e., plan, organize, delegate, direct, control and review activities and performance).

(3) **Assignment.** Employees in this Supervisory Dietitian assignment serve as a Supervisory Informatics Dietitian and oversee the NCC. The incumbent must spend 25% or more of their time providing administrative and technical supervision. They serve as technical advisors to staff and represent the NCC on projects, committees and/or workgroups. Supervisory Informatics Dietitians supervise NCC wage grade and/or GS employees at grades 6 or below; and provide oversight, leadership and personnel management. They exercise full authority to plan, direct and assess the workload and competence of all subordinate staff members. Supervisory Informatics Dietitians use electronic programs to produce reports, analyze data and improve personnel efficiency and productivity in the NCC. They are thoroughly knowledgeable of and responsible for planning, coordinating and implementing food service technology as well as ensuring continuous evaluation and improvement. Supervisory Informatics Dietitians independently manage VHA-supported software programs and/or COTS to support the effective management of food operations and patient meal services including entering and maintaining ingredients, recipes, nutritional data and menus. They fully oversee the technology used for meal production, meal service and temperature control. Supervisory Informatics Dietitians lead a menu committee and
ensure recipes are standardized, costed and within budgetary constraints. They create, revise and sign off on menus, complete nutrient analyses of regular and modified menus and ensure menus follow required diet guidelines. Supervisory Informatics Dietitians oversee and are responsible for developing and maintaining training and reference materials for the NCC. They manage productivity reports and complete audits for the NCC. Supervisory Informatics Dietitians coordinate and support downtime procedures for the NCC, ensuring procedures remain up to date. As a subject matter expert in nutrition informatics and food service technology, they complete all aspects of training related to computer systems, menus and informatics for NFS employees. Supervisory Informatics Dietitians frequently collaborate with the clinical nutrition section and leadership staff to enhance the Veteran dining experience and support patient satisfaction. They act as a service ADPAC as the liaison between administration, food services, clinical staff and O&IT regarding clinical information system processes. Supervisory Informatics Dietitians manage and update the service SharePoint site.

h. **Dietitian (Advanced Level Practice), GS-12.**

1. **Experience.** One year of experience equivalent to the next lower grade level.

2. **Certification.** Must hold an advanced practice certification from a nationally recognized certifying body such as the Commission on Dietetic Registration, the Association of Diabetes Care and Education Specialists or the National Board of Nutrition Certification. The certification must be directly related to the assignment being filled. For example, where the assignment requires diabetes management, a Board Certified-Advanced Diabetes Management or Certified Diabetes Care and Education Specialists certification is qualifying. Commonly held certifications include Board Certified Specialist in Renal Nutrition; Board Certified Specialist in Gerontological Nutrition; Registered Dietitian Nutritionist-Advanced Practitioner; Certified Nutrition Support Clinician.

3. **Knowledge, Skills and Abilities.** In addition to the experience and certification above, the candidate must demonstrate the following KSAs:

   a. Skill in leading a team in the implementation of nutrition-related activities.

   b. Skill in utilizing evidence-based practice guidelines to establish or modify goals and improve patient outcomes.

   c. Ability to communicate in writing to develop policies and standard operating procedures.
(d) Ability to serve as a nutrition expert, providing technical guidance, direction and staff development.

(e) Ability to lead research or performance improvement studies.

(f) Ability to present complex nutrition information to a large group of health care providers to persuade and influence provision of care.

(4) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time. Employees in this assignment serve as an Advanced-Level Dietitian. They conduct comprehensive nutrition assessments for Veterans using the NCP assuring high-quality nutrition care under an advanced and expanded scope of practice. Advanced-Level Dietitians lead a multi-disciplinary team developing nutrition-related services, policies, procedures and/or protocols. They provide consultative services regarding advanced therapies and research in providing quality nutritional care. Advanced-Level Dietitians develop, monitor and direct practice-specific benchmarks based on standards of care or national initiatives. They utilize knowledge, expertise, principles and/or current research to plan, implement and evaluate organizational initiatives. Advanced-Level Dietitians lead the implementation of new nutrition initiatives or a change in practice to achieve strategic goals. They establish goals, measure outcomes and report progress toward meeting goals to medical center committees, health care teams and/or professional groups. Advanced-Level Dietitians lead staff, create and validate competencies and develop training activities. They lead nutrition research studies or performance improvement and communicate findings through reports, abstracts, presentations and/or peer-reviewed professional publications. Advanced-Level Dietitians present at seminars, workshops and lectures to convey current nutrition information on new and changing concepts. This assignment must represent substantial additional responsibility over and above that required at the full performance grade level and cannot be used as the full performance level of this occupation.

i. Dietitian (Dietetic Internship Director), GS-12.

(1) Experience. Three years of experience post registration.

(2) Education. Master’s degree or higher from an accredited university or college.

(3) Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:
(a) Skill in utilizing data for program improvement to ensure compliance with various accrediting, regulatory and agency authorities.

(b) Ability to coordinate class schedules, training activities, seminars and supervised practice experience within the health care system and affiliated sites.

(c) Ability to implement all aspects of an internship program including developing program goals and objectives, curriculum and policies and procedures to ensure compliance with accreditation and regulatory requirements.

(d) Ability to oversee the process for the selection of students for the internship program.

(e) Ability to evaluate progress towards meeting core competencies.

(4) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. Employees in this assignment serve as Dietetic Internship Director. They are responsible for administering all aspects of an accredited dietetic internship program. Dietetic Internship Directors oversee the daily operations of the program and ensure education, curriculum, policies and procedures are in compliance with the ACEND® requirements and are compatible with regulations and procedures for Associated Health Trainees set forth by the VA Office of Academic Affiliations. They develop, document, track and assess program goals to ensure the program produces measurable results through data evaluation and improved program outcomes and customer experience. Dietetic Internship Directors are responsible for writing the self-study for re-accreditation and facilitating the ACEND® site visit. They are responsible for maintaining up-to-date program information accessible through online sources, coordinating program marketing events such as an intern open house, outreach and selection of dietetic interns. This includes establishing an intern selection committee, selection criteria for application to the program and reviewing and evaluating all applications prior to selection. Dietetic Internship Directors are responsible for planning and coordinating intern rotations, class schedules and outside seminars with preceptors, presenters and community affiliations. This may include establishing, administering, maintaining and coordinating affiliations with community programs (local food bank; Women, Infants and Children; etc.) and/or with affiliated universities for the combined master's intern program curriculum. They coordinate maintenance of affiliation agreements between the VA facility and affiliated agencies and resolve policy, program and project issues associated with combined master's program and outside affiliations.
Dietetic Internship Directors provide and/or coordinate preceptor training and ensure ongoing preceptor competency. They provide direction, orientation, coaching, in-service training and ongoing education programs related to the dietetic internship program. Dietetic Internship Directors ensure timely completion of rotation evaluation and meet with interns to ensure progress towards program completion. They issue the trainee verification statement of internship completion and maintain permanent records as required by ACEND®. In accordance with ACEND® requirements, Dietetic Internship Directors in VA must be full-time employees.

j. **Dietitian (Facility Program Coordinator), GS-12.**

   (1) **Experience.** One year of experience equivalent to the next lower grade level.

   (2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

   (a) Knowledge of program administration establishes program goals and objectives, coordinates activities, evaluates accomplishments and solves problems.

   (b) Skill in developing quality improvement or research activities.

   (c) Skill in developing training and reference materials.

   (d) Ability to develop policies and procedures.

   (e) Ability to provide program-specific coordination to include leadership, technical advice and staff development.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. Employees in this assignment serve as Facility Dietitian Program Coordinator leading a multi-disciplinary team. Dietitian Program Coordinators may provide direct patient care by developing and implementing comprehensive nutrition therapy, practicing within their scope/clinical privileges. They are administratively responsible for a specialty program and provide program-specific leadership, guidance and direction, technical advice and staff development. Dietitian Program Coordinators oversee responsibilities for program, policy and procedure development, set goals, monitor and redefine priorities and may have an active role in the fiscal management for the program. They direct or participate in the design of research activities or quality improvement studies, including data collection and analysis. Dietitian Program
Coordinators have oversight of and are responsible for developing and maintaining training and reference materials. They maintain program information through approved social media outlets. Dietitian Program Coordinators may supervise up to two employees. This assignment must represent substantial additional responsibility over and above that required at the full performance grade level and cannot be used as the full performance level of this occupation.

k. **Supervisory Dietitian (Food Operations), GS-12.**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Knowledge of standards to assess staff compliance and implement performance improvements.

(b) Skill in establishing goals and objectives to coordinate activities, evaluate accomplishments and solve problems.

(c) Skill in applying nutritional knowledge to ensure menus meet nutrition standards.

(d) Ability to utilize Evidence-Based Nutrition Practice Guidelines in order to develop, implement and coordinate best practices.

(e) Ability to serve as a food operations expert, providing technical guidance, direction and staff development.

(f) Ability to supervise subordinate staff (i.e., plan, organize, delegate, direct, control and review activities and performance).

(g) Ability to analyze data in order to recommend allocation of resources.

(3) **Assignment.** For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must spend 25% or more of their time providing administrative and technical supervision over staff who are at the full performance level or below. Employees in this Supervisory Dietitian (Food Operations) assignment oversee a food service and production operation. They serve as professional and technical advisor to staff and other health care professionals and represents the food operations section on projects, committees and/or workgroups. Supervisory Dietitians supervise wage system positions including at least a
supervisor or leader and other wage grade positions. They provide food service systems-specific leadership and exercise a full range of supervisory and personnel management authorities and responsibilities in planning, directing and assessing the work and competence of subordinate staff. Supervisory Dietitians provide administrative management and direction of the Food Operations Section. They develop procedures and guidelines for food operations, monitor compliance with regulatory standards, policies and procedures and lead the action planning process to attain goals and resolve deficiencies. Supervisory Dietitians are responsible for implementing the Hazard Analysis and Critical Control Point program, ensuring that requisitioning, receipt/storage, preparation and service of food conforms to quality/quantity standards. They evaluate food operations to ensure proper allocation of resources, devise solutions and implement action plans to resolve issues and meet service goals and objectives, leading to improved patient satisfaction and quality food operations. Supervisory Dietitians are integral in ensuring menus meet nutritional and budgetary requirements. They assess technological equipment innovations and review specifications, making recommendations for equipment purchases. Supervisory Dietitians build and implement contingency plans within the section, ensuring continuity of food operations during internal and external emergencies and unusual circumstances. They manage emergency feeding cache and ensure menus and supplies meet facility and TJC requirements. Supervisory Dietitians execute the training plan for the food operations section. They ensure evidence-based guidelines are integrated into food operations. Supervisory Dietitians collaborate closely with the clinical nutrition section to enhance the Veteran’s dining experience and support the strategic goals of the clinical nutrition section.

I. **Supervisory Dietitian (Clinical Nutrition), GS-12.**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Knowledge of accrediting requirements in clinical nutrition to assess staff compliance and implement performance improvements.

(b) Skill as a nutrition expert to provide technical guidance, direction and staff development.

(c) Skill in Evidence-Based Nutrition Practice Guidelines to develop, implement and coordinate best practices.
(d) Skill in establishing goals and objectives to coordinate activities, evaluate accomplishments and solve problems.

(e) Ability to supervise subordinate staff (i.e., plan, organize, delegate, direct, control and review activities and performance).

(f) Ability to analyze data in order to recommend allocation of resources.

(3) **Assignment.** For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must spend 25% or more of their time providing administrative and technical supervision over staff at the full performance level or below and may supervise advanced practice and/or program coordinator Dietitian(s). Supervisory Dietitians Clinical Nutrition in this assignment oversees the Clinical Nutrition Section and serve as the professional and technical advisors to staff and other health care professionals. They represent the Clinical Nutrition Section on projects, committees and/or workgroups. Supervisory Dietitians provide Clinical Nutrition Section-specific leadership and exercise a full range of supervisory and personnel management authorities and responsibilities in planning, directing and assessing the work and competence of subordinate staff. They provide administrative management and direction of the clinical nutrition section. Supervisory Dietitians develop procedures and guidelines for clinical operations and monitor compliance with regulatory standards and policies and procedures. They lead the action planning process to attain goals and resolve deficiencies. Supervisory Dietitians build and implement contingency plans within the section, ensuring continuity of clinical operations in all internal and external emergencies. They execute the training plan for the clinical section and ensure staff remain updated on advances and changes in medical nutrition therapy. Supervisory Dietitians analyze data (i.e., event capture, clinic utilization) to recommend the allocation of clinical nutrition resources. They ensure evidence-based guidelines are integrated into clinical practice. Supervisory Dietitians collaborate closely with the food service section to enhance the Veteran dining experience and support the strategic goals of the food service section.

m. **Supervisory Dietitian (Clinical Nutrition), GS-13.**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:
(a) Skill in written communication including policy development and standard operating procedures.

(b) Skill in strategic planning to develop goals, objectives and action plans.

(c) Skill in analyzing data to monitor progress towards improving and sustaining outcomes.

(d) Ability to negotiate.

(e) Ability to supervise subordinate staff (i.e., plan, organize, delegate, direct, control and review activities and performance).

(3) Assignment. For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must spend 25% or more of their time providing administrative and technical supervision over Dietitians at the GS-12 level or below. Supervisory Dietitians in this Clinical Nutrition assignment report to the NFS Chief. They make decisions based on intricate and unrelated information and assumptions from inconclusive or variable data in all aspects of nutrition operations. They provide clinical nutrition section-specific leadership and exercise a full range of supervisory and personnel management authorities and responsibilities in planning, directing and assessing the work of subordinate staff. Supervisory Dietitians establish a training plan for the clinical section. They develop and lead clinical nutrition operations, establish strategic goals and ensure priorities align with the strategic plan of the NFS department, VISN and national programs. Supervisory Dietitians identify and prioritize problems, set long and short-term goals, develop action plans and analyze data to evaluate progress to improve outcomes. They are responsible for developing and updating policies and procedures and establishing and overseeing a system for regulatory compliance. Supervisory Dietitians solicit support and/or negotiate with facility managers to influence decision-making and garner support to ensure clinical nutrition operations succeed. They collaborate closely with the food operations section to enhance the Veteran’s dining experience and to support the strategic goals of the food service section and NFS.

(1) Experience. One year of experience equivalent to the next lower grade level.

(2) Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:
(a) Knowledge of business administration practices such as budget planning, contracting and food and supply purchasing to operate a food service program successfully.

(b) Skill in written communication including policy development and standard operating procedures.

(c) Skill in strategic planning to develop goals, objectives and action plans.

(d) Skill in analyzing data to monitor progress towards improving and sustaining outcomes.

(e) Ability to supervise subordinate staff (i.e., plan, organize, delegate, direct, control and review activities and performance).

(f) Ability to negotiate.

(3) **Assignment.** For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must spend 25% or more of their time providing administrative and technical supervision over staff who are at the full performance level or above. Employees in this Supervisory Dietitian Food Operations assignment report to the NFS Chief. They supervise a complex Veteran-Centric food operation consisting of four distinct sections (Informatics, Food Service, Production and NCC). Supervisory Dietitians make decisions based on intricate and unrelated information and assumptions from inconclusive or variable data in all aspects of food operations. They provide food-operations-specific leadership and exercise a full range of supervisory and personnel management authorities and responsibilities in planning, directing and assessing the work of subordinate staff. Supervisory Dietitians establish a training plan for the food operations section. They develop and lead food operations, establish strategic goals and ensure priorities align with the strategic plan of the NFS department, VISN and national programs. Supervisory Dietitians identify and prioritize problems, set long and short-term goals, develop action plans and analyze data to evaluate progress to improve outcomes. They are responsible for developing and updating policies and procedures and establishing and overseeing a system for regulatory compliance. Supervisory Dietitians manage the budget and other resources, anticipating future trends and inflation, new service opportunities, recommendations for growth, efficiencies and strategic efforts are factored into resource requests and brought to the Chief. They direct staff in the management of contracts, subsistence, supply purchasing for NFS and submitting reports to the NFS Chief. Supervisory Dietitians solicit support and/or negotiate with facility managers to influence
decisions to support food operations section success. They collaborate closely with the clinical nutrition section to enhance the Veteran dining experience and to support the strategic goals of the clinical nutrition section and NFS.

do. **Supervisory Dietitian (Facility Program Coordinator), GS-13.**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Knowledge of program administration to establish and modify program goals and objectives, coordinate activities, evaluate accomplishments and solve problems.

(b) Skill in developing quality improvement or research activities.

(c) Skill in developing training and reference materials.

(d) Ability to supervise subordinate staff (i.e., plan, organize, delegate, direct, control and review activities and performance).

(e) Ability to develop policies and procedures.

(f) Ability to provide program-specific coordination to include leadership, technical advice and staff development.

(3) **Assignment.** For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must spend 25% or more of their time providing administrative and technical supervision over staff at the GS-11 or above. Supervisory Dietitians in this assignment serve as a Supervisory Dietitian Program Coordinator at a facility and report to a GS-13 or above. Supervisory Dietitian Program Coordinators lead a multi-disciplinary team. Supervisory Dietitian Program Coordinators provide program-specific leadership and exercise a full range of supervisory and personnel management authorities and responsibilities in planning, directing and assessing the work of subordinate staff. They establish performance standards and evaluate the overall performance of employees; define competency requirements, identify developmental and training needs and take necessary actions to ensure subordinate personnel maintains and enhance technical expertise. Supervisory Dietitian Program Coordinators formulate budget and staffing requirements in managing organizational changes and ensuring multi-year and long-range national
mission directives and program goals/objectives are met. They are administratively responsible for a specialty program. Supervisory Dietitian Program Coordinators may provide direct patient care as they develop and implement comprehensive nutrition therapy, practicing within their scope/clinical privileges. They provide program-specific guidance and direction and technical advice and staff development. Supervisory Dietitian Program Coordinators have oversight responsibilities for program and policy and procedure development, set goals and monitor and redefine priorities and may have an active role in fiscal management for the program. They direct or participate in designing clinical research activities or quality improvement studies, including data collection and analysis. Supervisory Dietitian Program Coordinators oversee and are responsible for developing and maintaining training and reference materials. They maintain program information through approved social media outlets.

(1) Experience. One year of experience equivalent to the next lower grade level.

(2) Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill in developing quality improvement or research activities.

(b) Skill in developing training and reference materials.

(c) Ability to develop policies and procedures.

(d) Ability to provide program-specific coordination to include leadership, technical advice and staff development.

(e) Ability to administer a program including establishing and modifying program goals and objectives, coordinating activities, evaluating accomplishments and solving problems.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. Dietitian Program Coordinators in this assignment serve at the VISN and lead multiple facilities in initiatives focused on specific areas of care within a larger program. Programs may include Healthy Teaching Kitchen (HTK) Program, employee wellness, MOVE, food insecurity, etc. VISN Dietitian Program Coordinators may provide direct patient care as they develop and implement comprehensive nutrition therapy, practicing within their scope/clinical privileges. They are administratively responsible for a specialty program and provide program-specific leadership, guidance and
direction, technical advice and staff development. VISN Dietitian Program Coordinators have oversight responsibilities for program, policy and procedure development, set goals, monitor and redefine priorities and may have an active role in the fiscal management of the program. They direct or participate in the design of research activities or quality improvement studies, including data collection and analysis. VISN Dietitian Program Coordinators oversee and are responsible for developing and maintaining training and reference materials. They maintain program information through approved social media outlets. VISN Dietitian Program Coordinators may supervise up to two employees.

q. **Dietitian (National Program Coordinator), GS-13.**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill in developing quality improvement or research activities.

(b) Skill in developing training and reference materials.

(c) Ability to develop policies and procedures.

(d) Ability to provide program-specific coordination to include leadership, technical advice and staff development.

(e) Ability to administer a program including establishing and modifying program goals and objectives, coordinating activities, evaluating accomplishments and solving problems.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. Dietitian Program Coordinators in this assignment serve at the national level and lead multiple facility initiatives focused on specific areas of care within a larger program. Programs may include HTK Program, employee wellness, MOVE, food insecurity, national food service software, national subsistence procurement, national contracts, national information security, etc. National Dietitian Program Coordinators may provide direct patient care by developing and implementing comprehensive nutrition therapy, practicing within their scope/clinical privileges. They are administratively responsible for a specialty program and provide program-specific leadership, guidance and direction, technical advice and staff development. National Dietitian Program Coordinators have oversight responsibilities for program, policy and procedure development, set goals, monitor and
redefine priorities and may have an active role in the fiscal management for the program. They direct or participate in the design of research activities or quality improvement studies, including data collection and analysis. National Dietitian Program Coordinators have oversight of and are responsible for developing and maintaining training and reference materials. They maintain program information through approved social media outlets.

r. **Supervisory Dietitian (Chief, Nutrition and Food Services), GS-13.**

   (1) **Experience.** One year of experience equivalent to the next lower grade level.

   (2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

   (a) Knowledge of security measures within food operations to ensure patient and staff safety.

   (b) Knowledge of business administration to include budgeting, contracting and purchasing.

   (c) Knowledge of organizational structure to assess impact on program operations.

   (d) Skill in strategic planning to develop goals, objectives and action plans.

   (e) Skill in written communication to include policy development and standard operating procedures.

   (f) Skill in analyzing data to monitor progress towards improving and sustaining outcomes.

   (g) Ability to lead a diverse group of professionals to facilitate collaboration, organizational development and establish and achieve strategic goals.

   (h) Ability to oversee the planning of new initiatives or projects addressing patient care delivery systems and system reorganizations.

   (i) Ability to supervise subordinate staff (i.e., plan, organize, delegate, direct, control and review activities and performance).

   (j) Ability to negotiate.

   (3) **Assignment.** For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity,
difficulty, variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must spend 25% or more of their time providing administrative and technical supervision over staff from both clinical nutrition and food operations sections, one of which may be a GS-13 Dietitian and NFS administrative staff. Supervisory Dietitians in this assignment serve as Chief of NFS. Chief NFS provides leadership and guidance, with wide latitude for the exercise of independent judgment, to ensure the diverse activities of the department are closely coordinated, integrating clinical nutrition and food operations. They exercise a full range of supervisory and personnel management authorities and responsibilities in planning, directing and assessing the work of subordinate staff. Chief NFS establishes performance standards and evaluate overall performance of employees; define competency requirements, identify developmental and training needs and take necessary actions to ensure subordinate personnel maintains and enhance technical and leadership expertise. They serve as the technical advisor and subject matter experts in nutrition and food operations. Chief NFS develops budget and staffing requirements to manage organizational changes and ensure national directives and goals/objectives are met. They communicate and advocate with executive leadership for resources. Chief NFS develops the NFS strategic plan, establishing service priorities that address the goals and strategic direction of the medical center, VISN and national programs. They are responsible for developing and updating policies and procedures and establishing and overseeing a system for regulatory compliance. Chief NFS establishes the department’s organizational structure, defining the lines of authority essential to carry out the mission of the service. They oversee planning new endeavours addressing patient care delivery systems and system reorganizations for new or redesigned operational space, equipment requirements, etc. Chief NFS ensures adherence to the National Dietary Supplement and Subsistence Prime Vendor contracts. They designate the Contracting Officer Representative to negotiate purchase agreements for NFS contracts. Chief NFS actively supports, promotes and oversees the implementation of NFS initiatives at the facility level and engages other service chiefs as needed to ensure success. They participate in VISN and National level NFS initiatives and are responsible for all action items for NFS. Chief NFS evaluates overall NFS effectiveness through the review of operations, quality assurance, performance improvement and benchmarks, making decisions based on intricate and unrelated items of information from inconclusive or variable data. They implement a performance improvement program to improve delivery of quality continually, safe and cost-effective food and nutrition care to all patients/residents, ensuring the dissemination of nutrition-related research and quality improvement within the department and facility. Chief NFS directs resource distribution for food, supply and labor costs focusing on benchmarks, and delegating resource management to others as appropriate. They lead efforts to provide food-forward, Veteran-centric dining options. Chief NFS
implements security measures in all NFS areas to protect against theft, reduce the risk of food terrorism and maintain Veteran and staff safety.

s. **Supervisory Dietitian (Chief, Nutrition and Food Services), GS-14.**

1. **Experience.** One year of experience equivalent to the next lower grade level.

2. **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

   a. Knowledge of security measures within food operations to ensure patient and staff safety.

   b. Knowledge of organizational structure to assess impact on program operations.

   c. Skill in ensuring regulatory requirements are met.

   d. Skill in leading a diverse group of professionals to facilitate collaboration and organizational development.

   e. Skill in leading managers to establish strategic goals.

   f. Ability to oversee the planning of new initiatives addressing patient care delivery systems and system reorganizations.

   g. Ability to lead efforts in business administration to include budgeting, contracting and purchasing.

3. **Assignment.** For all supervisory assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, difficulty, variety and be performed by the incumbent as a major duty at least 25% of the time. The incumbent must spend 25% or more of their time providing administrative and technical supervision over administrative staff who support NFS operations and both a GS-13 Supervisory Dietitian (Food Operations) and GS-13 Supervisory Dietitian (Clinical Nutrition). Supervisory Dietitians in this assignment serve as Chief NFS for a complex NFS department. Chief NFS provides leadership and guidance, with wide latitude for the exercise of independent judgment, to ensure the diverse activities of the department are closely coordinated, integrating clinical nutrition and food operations. They exercise a full range of supervisory and personnel management authorities with responsibilities in planning, directing and assessing the work of supervisors and subordinate staff. Chief NFS establishes performance standards and evaluates overall performance of employees, defines competency requirements, identifies developmental and training needs and takes necessary actions to ensure
subordinate personnel maintains and enhance technical and leadership expertise. They serve as the technical advisor and subject matter experts in nutrition and food operations. Chief NFS develops budget and staffing requirements to manage organizational changes and ensure national directives and goals/objectives are met. They communicate and advocate with executive leadership for resources. Chief NFS develop the NFS strategic plan establishing service priorities that address the goals and strategic direction of the medical center, VISN and national programs. They are responsible for accomplishing priorities and ensuring compliance with VHA directives and medical center policy and procedures. They oversee planning of endeavours addressing patient care delivery systems and system reorganizations for new or redesigned operational space, equipment requirements, etc. Chief NFS ensures adherence to the National Dietary Supplement and Subsistence Prime Vendor contracts. They designate the Contracting Officer Representative to negotiate purchase agreements for NFS contracts. Chief NFS actively supports, promotes and oversees the implementation of NFS initiatives at the facility level and engages other service chiefs as needed to ensure success. They participate in VISN and National level NFS initiatives and are responsible for all action items for NFS. Chief NFS evaluates overall NFS effectiveness through the review of operations, quality assurance, performance improvement and benchmarks, making decisions based on intricate and unrelated items of information from inconclusive or variable data. They facilitate and support NFS participation in performance improvement studies, ensuring the dissemination of nutrition-related research and quality improvement within the department and facility. Chief NFS leads efforts to provide food-forward, Veteran-centric dining options. They implement security measures in all NFS areas to protect against theft, reduce the risk of food terrorism and maintain Veteran and staff safety.

t. **Dietitian (VISN Program Coordinator), GS-14.**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill in providing program-specific leadership through guidance, direction, technical advice and staff development.

(b) Skill in program administration to establish and modify program goals and objectives, coordinate activities, evaluate accomplishments and solve problems.

(c) Skill in interpreting information from complex sources to improve and sustain outcomes.
(d) Skill in leading a diverse group of professionals to facilitate collaboration and organizational development.

(e) Ability to lead efforts in business administration practices such as budget planning, contracting, food and supply purchasing to successfully operate a food service program.

Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. VISN Program Coordinators in this assignment serve as the technical advisor and liaisons between the National NFS Program Office and facilities within the VISN. They ensure the integration of clinical nutrition and food operations within the overall health care model at the VISN. VISN Program Coordinators represent NFS on interdisciplinary VISN task forces, committees and projects of broad scope and significance to the VA health care mission. They interpret VHA policy, directives and memorandums and identify the impact on NFS programming. VISN Program Coordinators serve as a consultant to facility NFS leadership in matters of NFS operations. They analyze and evaluate program data, identifying VISN-wide trends and training needs to enhance the quality of service. VISN Program Coordinators ensure facility NFS leadership analyzes data and reports, establish action plans; and assist facilities with addressing barriers. They ensure facility implementation and monitor facility compliance with clinical practice guidelines and standards, working with sites to establish corrective actions. VISN Program Coordinators provide oversight to and direct contracts involving NFS across the VISN. VISN Dietitian Program Coordinators may supervise up to two employees.

Dietitian (National Program Coordinator), GS-14.

(1) Experience. One year of experience equivalent to the next lower grade level.

(2) Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill in business administration practices such as budget planning, contracting and purchasing.

(b) Skill in interpreting information from complex sources.

(c) Skill in leading a diverse group of professionals to facilitate collaboration and organizational development.

(d) Skill in serving as a nutrition expert.
(e) Ability to administer a national nutrition and food program.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. National Program Coordinators in this assignment may report to the VHA Office of NFS Executive Director or Deputy. They are the technical advisor and liaison between the NFS program office and the Nutrition Field Advisory Board, VISN level offices and high-level officials within and outside the agency. National Program Coordinators are recognized agency experts providing guidance to high-level officials, administrators and health care providers on a wide range of clinical nutrition and food operation matters. They represent the NFS Program office by organizing, chairing and participating in multi-disciplinary task forces and work groups. National Program Coordinators ensure the integration of clinical nutrition and food operations as they manage, control and coordinate activities. They utilize the extensive knowledge and expertise as a consultant in clinical nutrition, dietetics education and professional oversight, food service and business practices, marketing and informatics, performance improvement and research. National Program Coordinators are responsible for establishing NFS contracts, procurement and enhancements of COTS software and related hardware. They provide training and staff development, troubleshoot issues and anticipate future trends and requirements. National Program Coordinators analyze and evaluate national program data, identify trends and lead process improvement initiatives. They make decisions that significantly affect existing or developing programs. National Program Coordinators develop new policies, standards, methods and techniques for administering nutrition services across VHA.

6. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade and/or assignment.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health in VHA Central Office prior to placement in the position.

c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement or when specific credentials are identified as necessary to meet minimum requirements, unless an exception is annotated in the qualification standard.
Authority: P.L. 111-163, Caregivers and Veterans Omnibus Health Services Act of 2010, 38 U.S.C. §§ 7401, Appointments in Veterans Health Administration; 7402, Qualifications of appointees; 7403, Period of appointments; promotions; 7405, Temporary full-time appointments, part-time appointments, and without-compensation appointments; 7407, Administrative provisions for section 7405 and 7406 appointments.]
APPENDIX G21. KINESIOThERAPlIST QUALIFICATION STANDARD
GS-0635
Veterans Health Administration

1. COVERAGE. This [qualification] standard applies to all Kinesiotherapist, [GS-0635], positions in the Veterans Health Administration (VHA). [Kinesiotherapists are allied health professionals competent in the administration of scientifically based musculoskeletal, neurological, ergonomic, biomechanical, psychosocial, and task specific functional tests and measures combined with evidence-based modalities and interventions within the scope of practice for kinesiotherapy and scope of standards for kinesiotherapy. These treatments are used to physically, physiologically and psychologically improve the human function/movement and well-being of the clients served. Kinesiotherapists provide acute, sub-acute or post-acute skilled rehabilitative therapy, restorative care and/or wellness interventions focusing on therapeutic exercise, mobility, reconditioning and physical education. Kinesiotherapists emphasize the psychological as well as physical interventions to enhance behavior change components for a holistic approach to rehabilitation.] The work requires the application of knowledge of the concepts, principles, and practices of kinesiotherapy [including, but not limited to, appropriate assessments, evaluation, and treatments including:] therapeutic corrective exercises[, mobility interventions, education, issuance and training for adaptive equipment, assistive technology, and durable medical equipment.] Kinesiotherapists evaluate the history of patients by interviews, tests, and measurements; and use such findings [to develop and implement [goal-driven] kinesiotherapy programs for individual patients. [Assessment and treatment can be performed in traditional rehabilitation settings such as: clinics, hospital-based, residential, telephone consultations, wellness settings, and/or through complementary settings like virtual health care (telemedicine, secure messaging, and electronic consultations).]

2. [DEFINITIONS.

a. Appointing Official. The human resources management officer is delegate appointing authority to process and authenticate notifications of personnel actions, and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

b. Approving Official. The Veterans Integrated Service Network (VISN) director facility director, or designee is the approving official and will determine whether to approve or deny the appointment of employees in hybrid occupations.

c. Journey Level. The full performance level for this qualification standard is GS-11.]

d. Creditable Experience. To be creditable, the experience must demonstrate
possession of the knowledge, skills, and abilities (KSAs) [associated with current professional kinesiotherapy practice. This may be evidenced by one or more of the following:]

(1) One year of active practice, [ ] paid or non-paid employment, as a [professional] kinesiotherapist as defined by the [American Kinesiotherapy Association (AKTA) or Council of Professional Standards for Kinesiotherapy (COPSKT)]. Experience gained as a graduate kinesiotherapist is creditable provided the candidate has passed the registration examination.

(2) Academic course work leading to an advanced degree in [exercise science, kinesiology, human performance or a related field.

e. **Quality of Experience.** Experience is only creditable if it was earned post degree and meets the following:

(1) Work as a graduate kinesiotherapist directly related to the position to be filled.

(2) The work to be credited is at a level comparable to kinesiotherapy experience at the same or next lower grade level than the grade level being considered for placement.

f. **Part-Time Experience.** Part-time experience as a professional kinesiotherapist is credited according to its relationship to the full-time workweek. For example, a kinesiotherapist would receive one week of full-time credit for each two weeks of half-time work.

g. **Graduate Education.** Graduate degrees may be substituted for experience up to the GS-11 level. [ ] To substitute education for experience, the education must have been completed after the individual met the basic requirements for appointment [and must be registered].

h. **Content Specialty.** [The] areas of [recognized specialization in] kinesiotherapy include, but are not limited to: cardiopulmonary [rehabilitation; driver rehabilitation specialist; ergonomic specialist; geriatrics specialist; health coaching; assistive technology professional; functional capacity evaluation specialist; aquatic rehabilitation; amputee; and seating/mobility specialist.]

3. **BASIC REQUIREMENTS.**

a. **Citizenship.** [Be a] citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a)).

b. **Education.**
(1) A bachelor’s degree [or higher from a program accredited by the Commission on Accreditation of Allied Health Education Program, with a concentration/emphasis in kinesiotherapy.]

OR

(2) A bachelor’s degree or higher with a concentration/emphasis in kinesiotherapy or exercise science related field and registered as a kinesiotherapist in good standing with the COPSKT.

OR

(3) A master’s degree or higher with a degree in exercise science, kinesiology, human performance or a related field, which has been approved by COPSKT and a certificate verifying completion of a Center of Excellence (COE) Kinesiotherapy clinical training program. The completion of the certificate ensures that COPSKT has approved the degree program as part of the application process for the COE internship.

**NOTE:** See Exception at paragraph 3e.

c. **Foreign Graduates.** Graduates of a foreign program must meet the requirements in subparagraph 3b if they have a full unrestricted and current registration to practice kinesiotherapy in a State, Territory, or Commonwealth (i.e., Puerto Rico) of the United States or in the District of Columbia. They must have at a minimum, proof of a degree from an accredited college or university (or foreign equivalent, as verified through an independent credentialing evaluation company).

d. **Registration.** All applicants must be registered in kinesiotherapy in good standing with the COPSKT.

e. **Exception.** Non-registered applicants at the GS-7 and GS-9 level who otherwise meet the eligibility requirements for appointment, may be given a temporary appointment as a graduate kinesiotherapist under the authority of 38 U.S.C. § 7405(a)(1)(B). Pursuant to 38 U.S.C § 7405(c)(2)(B), the appointment cannot exceed two years if the non-registered applicant’s registration is pending with the COPSKT. Applicants who fail to obtain registration during this temporary full-time appointment must be terminated. For grade levels at or above the full performance level, the candidate must be registered.

f. **Failure to Obtain Registration.** In all cases kinesiotherapists must actively pursue meeting registration starting from the date of appointment. At the time of appointment, the supervisor must provide the unregistered kinesiotherapist with a
written requirement to obtain registration, the date by which the registration must be acquired, and the consequences for not becoming registered by the deadline. Failure to become registered within two years from the date of appointment, will result in removal from the GS-0635, Kinesiotherapist series; and may result in termination of employment.

g. **Loss of Credential.** Registered kinesiotherapists who fail to continue their registration in good standing, and maintain the required registration, must be removed from the occupation, which may result in termination of employment.

h. **Grandfathering Provision.** [ ]All persons employed in VHA [as a Kinesiotherapist] on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

[(1) Such employees ] may be reassigned, promoted up to and including the full performance (journeyman) level, or [changed to a lower grade] within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard, may not have their temporary appointment extended or be reappointed on a temporary or permanent basis until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or license/certification/registration that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

[(4) Kinesiotherapists who are converted to title 38 hybrid status] under this provision,[and subsequently leave the occupation, will lose their] protected status, and must meet the full VA qualification standard requirements in effect at the time of re-entry to the occupation.

i. **Physical Requirements.** See VA Directive and Handbook 5019.

j. **English Language Proficiency.** Kinesiotherapist candidates must be proficient in spoken and written English to be appointed as authorized by [38 U.S.C. § 7403 (f).]
4. GRADE REQUIREMENTS. In addition to the basic requirements, the following criteria must be used when determining the appropriate grade and assignment of candidates.

a. [Kinesiotherapist,] GS-7

(1) **Experience.** None beyond the basic requirements.

(2) **Assignment.** Individuals at this grade level serve as an entry level kinesiotherapist. The entry level kinesiotherapist receives guidance from more experienced staff members. They are responsible for but not limited to: examination, evaluation, treatment intervention, and prevention of musculoskeletal, neuromuscular, cardiopulmonary, and integumentary impairments, functional limitations, and disabilities.

b. [Kinesiotherapist,] GS-9

(1) **Experience/Education.** [One] year of experience equivalent to the next lower grade level or [education equivalent to] two full years of [progressively higher level] graduate education or a master’s degree [from a university or college in the field of kinesiotherapy or an exercise science related field.]

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all the following KSAs:

(a) Knowledge of policies and procedures of kinesiotherapy.

(b) Knowledge of assistive devices to make recommendations, including fit and function of assistive devices [with the ability to recognize appropriate prosthetic/orthotic devices for the patient.

(c) Knowledge of evaluation and assessment tools] in applying therapeutic techniques.

(d) Skill in instructing patients and families in a [therapeutic] exercise program.

(3) **Assignment.** Individuals at this grade level serve as [developmental kinesiotherapists. They are responsible for examination, evaluation and treatment interventions that demonstrate a clear progression of clinical knowledge and experience by providing modified treatment interventions based on the patient’s response (e.g. identifying individual risks, contra-indications, and advancement and progression of challenging treatment interventions) that utilize the application of innovative procedures and problem solving. Deviations from regular procedures, unanticipated
problems, and unfamiliar situations are referred to more experienced staff for a decision or assistance. Assignments at this level will include developmental duties of increasing scope and diversity as compared to the entry level. It is expected that kinesiotherapists at this grade, perform more complex work while receiving less frequent supervision than at the entry level.]

c. **[Kinesiotherapist], GS-[11]**

(1) **Experience/Education.** One year of experience equivalent to the next lower grade level or a Ph.D. or equivalent doctoral degree or three academic years of progressively higher-level graduate education leading to a degree in kinesiotherapy or an exercise science related field. ]

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) [Skill in communicating and coordinating with patients, families, caregivers, and other health care professions to facilitate the multidisciplinary treatment process].

(b) Knowledge [of evidence-based kinesiotherapy to provide skilled rehabilitation interventions to] a wide variety of patients having diverse and multiple disabilities.

(c) [Ability to conduct independent assessments using highly specialized evaluations and diagnostic tests.]

(d) Knowledge of [learning principles, behavioral intervention, and innovational] techniques [for patient and caregiver education.]

(e) Ability to adapt assessment tools and treatment to the complexity of the diagnosis or disabilities and demonstrate the clinical reasoning necessary to identify the need for further in-depth specific assessment of function and utilization of non-standard methods and techniques.

(f) Ability to use clinical reasoning necessary to identify the need for further in-depth specific assessment and/or continuation of treatment.

(3) **Assignment.** This is the full performance level for the kinesiotherapist. Kinesiotherapists independently conduct assessments and develop treatment plans to the complexity of the diagnosis or disability using appropriate functional tests and measurements according to established evidence-based professional practices. The kinesiotherapists provide integrated and progressive skilled rehabilitative treatment modalities across the continuum of care. Duties may include, but are not limited to, any of the following: pre-
habilitation, acute, sub-acute, transitional, home-based, post rehabilitative, and wellness programs. Administer musculoskeletal, neurological, ergonomic, biomechanical, psychological, and task specific functional tests and measures in order to reach maximum outcomes. Coordinate and collaborate within a multidisciplinary team to provide comprehensive care, employ multiple treatment approaches and to accomplish complex treatment objectives. The kinesiotherapist may perform duties such as, accurately test, analyze, evaluate, and record measurements of vitals, muscular strength, endurance, range of motion, coordination, static/dynamic balance, cardiovascular endurance, gait analysis, posture, gross sensory impairment, functional mobility, activities of daily living, and prosthetic and orthotic gait, care and training. Provide education to patients, caregivers and other health care professionals regarding policies and procedures for guidance to maneuver through the health care system. Kinesiotherapists monitor and report on work status, program quality, performance improvement data, and make recommendations for process improvement.

d. Kinesiotherapist, GS-12

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to coordinate and maintain academic agreements and assignments for student affiliations with universities, colleges, and other academic organizations.

(b) Knowledge of contemporary kinesiotherapy across multiple areas of practice and provide clinical guidance to staff kinesiotherapists within the department.

(c) Ability to provide consultation to other health care practitioners and outside groups about the practice of kinesiotherapy and areas of expertise.

(d) Ability to synthesize (create) clinical processes and practice in order to guide and train the students’ clinical/educational experience and skills.

(e) Knowledge of AKTA practice guidelines and COPSKT certification requirements.

(f) Ability to apply appropriate problem-solving methods and techniques.
(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Clinical education coordinator positions generally would be found in Complexity Level 1 (High Complexity) or in facilities of lesser complexity levels where there is an affiliation with kinesiotherapy programs. The kinesiotherapist at this level develop and administer clinical training programs for students, facility, staff, and/or physical medicine and rehabilitation therapy disciplines. This assignment occurs at active, affiliated VHA facilities where specialized clinical treatment programs are provided. Duties include, but are not limited to: establishing, negotiating, and maintaining affiliation agreements and Memorandum of Understandings (MOUs). Serve as a liaison with the university in determining when students may be sent for training, the number of students to be sent, areas of training and assignment; designing, conducting, and evaluating educational experiences for students, associated health trainees, and other personnel assigned to clinical program(s) for training. Arrange and serve as instructors for staff in-service training programs, and serve on curriculum committees of colleges and universities, and have substantive input into the course content for students. The kinesiotherapists are responsible for the selection of appropriate preceptors, monitor timely evaluations of students, provide counseling as needed, and keep schools apprised of student performance. Review student performance, discuss deficiencies, and address any questions or concerns with student trainee and/or preceptor; and develop an action plan to address any problems, concerns, or deficiencies identified.

e. **Kinesiotherapist (Clinical Specialist), GS-12**

(1) **Experience.** In addition to meeting the basic requirements, one year of experience equivalent to the next lower grade level and one of the following:

(a) Evidence of a minimum of 2,000 hours of clinical practice directly in the specialty area within the last 5 years; or

(b) Certification in the specialty area from an accreditation body approved by COPSKT; or

(c) An additional advanced degree in a related field; or

(d) Completion of a fellowship program.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge [in a range] of specialized [interventions and treatment modalities used in a specialized treatment area of kinesiotherapy.]
(b) Ability to serve as a consultant/mentor for health care providers regarding the delivery of care within a specialized area of kinesiotherapy.

c) Skill to perform and interpret specialized evaluative procedures and tests in the treatment outcomes in the assigned specialty area.

d) Skill in developing protocols and procedures for intervention programs based on current kinesiotherapy theory, recent research, and evidence-based practice.]

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. [The areas of recognized specialization include but are not limited to: cardiopulmonary rehabilitation; driver rehabilitation specialist; ergonomic specialist; geriatrics specialist; health coaching; assistive technology professional; functional capacity evaluation specialist; aquatic rehabilitation; amputee; and seating/mobility specialist. The clinical specialist is an advanced level practitioner with specialized knowledge and demonstrated clinical competence related to a particular diagnosis, patient population, or treatment area and has an increased depth and breadth of practice skills obtained through training and/or experience in specialty area. Participate in the professional development of colleagues as a preceptor and educator in the area of specialization. Demonstrate leadership within the area of expertise by refining programs and introducing new approaches for providing treatment in developing, initiating and refining treatment programs through current research and best practices of the profession. These individuals must demonstrate skills and techniques in a specialty area and/or specific population who have varying degrees of highly complex physical, psychological and/or physiological disorders.

f. Lead Kinesiotherapist, GS-12

(1) Experience. One year of experience equivalent to the next lower grade level.

(2) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to act as a consultant and mentor in evaluating and treating patients in specialty program areas by providing professional oversight and consultation for staff therapists, students, and interns.

(b) Knowledge of current evidence-based practice for kinesiotherapy across multiple clinical areas and to provide clinical guidance to staff.
(c) Ability to act as a liaison between staff therapists and supervisor by coordinating clinical activities, program development, outcome management, and strategic planning.

(d) Ability to implement, revise, update, evidence-based protocols, procedures and approved competencies for kinesiotherapy services.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Make recommendations to the supervisor on actions affecting team and individual awards and recognition. Provide recommendations to the supervisor of any clinical changes to policy and procedure. Kinesiotherapists are responsible for the direct day to day operation of the kinesiotherapy staff to ensure compliance of clinical procedures, treatment goals, and standards of practice. Serve as mentor, consultant, and advisor to less experienced staff and clinical team members and resolve complaints of employees. The lead participates, monitors and provides feedback on performance improvement activities and may implement initiatives or program changes. Ensure that the organization’s strategic plan, mission, vision, and values are communicated to the clinical staff and integrated into the work plans, products, and services. Identify, distribute, and balance the workload and tasks among employees in accordance with established workflow and skill level. The kinesiotherapists make adjustments to accomplish the workload in accordance with established priorities to ensure timely accomplishment of assigned team tasks. Utilize staff, equipment, and space to resolve operational problems which may interfere with the delivery of kinesiotherapy services. The lead monitors and reports on the status and progress of work, checking on work in progress and reviewing completed work to see that the supervisor's instructions on work priorities, methods, deadlines and quality have been met.

**g. Supervisory Kinesiotherapist, GS-12**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to balance multiple responsibilities, set priorities, delegate tasks, meets multiple deadlines, analyze organizational problems, and develop and implement effective solutions.

(b) Ability to analyze organizational and operational problems to develop and implement solutions that result in efficient operations and use data
effectively to manage workload, quality, performance, and productivity within the service.

(c) Skill in interpersonal relationships in dealing with employees, team leaders, and managers to include conflict management.

(d) Ability to guide the staff in the utilization of evidence-based practices and clinical practice guidelines in a professional area, and to guide the staff in applying these tools.

(3) Assignments. For all assignments above the full-performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Kinesiotherapists are responsible for the supervision, administrative management, and direction of program services and full oversight for planning and directing the staff assignments in a variety of clinical settings. These positions have responsibility for general or technical supervision of key clinical and training programs. Typical duties include: assigning work; monitoring clinical performances of staff; resolving staff conflicts; identifying continuing education and training needs; and preparing performance standards and ratings. Interview candidates for positions, recommend appointments, advancements, or when appropriate, disciplinary actions. The supervisor accepts, amends, or rejects completed work and ensures accuracy requirements are met. Ensure compliance with accrediting agency and regulatory requirements, establish and monitor the quality of the pre-analytical processes as part of the overall service’s quality management program, and takes corrective action as needed. The supervisor ensures orientation and competency assessment of assigned staff. Develop policies and procedures, manage document control, position descriptions, and functional statements, and is responsible for professional and administrative management of an assigned area to include time and leave management. The supervisor conducts department meetings at regular intervals to convey information to staff. The supervisor maintains interdepartmental relations with other services to accomplish medical center goals and may provide clinical treatment in more complex cases.

NOTE: The GS-12 Supervisor may supervise all grade levels below the GS-12 grade level.

h. Kinesiotherapist (Program Coordinator), GS-12

(1) Experience. One year of experience equivalent to the next lower grade level.

(2) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:
(a) Knowledge and skills necessary to provide patient care and to provide advice to staff on planning and implementation of comprehensive treatment programs.

(b) Knowledge of VA policies and procedures to represent the medical center.

(c) Knowledge and skills to analyze, evaluate, and monitor issues concerning the efficiency and effectiveness of programs that will impact activities or functions such as: supplies, equipment, budget, and recruitment.

(d) Skill in providing clinical and administrative oversight of a multidisciplinary team.

(e) Ability to collaborate with strategic planning committees at local, VISN, or national level for new ventures addressing patient care delivery systems, facilities management, systems reorganization, etc.

(f) Ability to provide guidance and advise program administrators, members of the community, and medical center leadership.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The program coordinator is generally found in Complexity Level 1 (High Complexity) facilities, or in facilities of lesser complexity levels where expanded services are performed. The kinesiotherapist program coordinator has full responsibility for managing the day to day activities of the clinic for all phases of a facility specialty program to include assessing, planning, and evaluating the delivery of care. The areas of recognized specialization include but are not limited to: cardiopulmonary rehabilitation; driver training; functional capacity evaluations; aquatic rehabilitation; amputee; and seating/mobility specialist. Plan work operations that affects staff and other resources, resolve problems related to work performed, and are accountable for the quality, timeliness, productivity, and progress reports of services provided in the program. Formulate new or revised facility and/or departmental policy relating to the specialty program area. The program coordinators assist with special projects such as strategic planning, performance improvement plans, and coordination and training of interdisciplinary team members. The kinesiotherapist program coordinator may be responsible for the coordination of clinical assignments for multiple professionals comprising an interdisciplinary team. Collaborate with leadership, other therapy supervisors, and staff to facilitate efficient and effective delivery of appropriate patient centered care along the continuum for all patients. Develop and modify standard operating procedures and ensure
standard operating procedures are applicable to the assigned program and are appropriate and current.

[i. Supervisory Kinesiotherapist, GS-13

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to supervise, motivate, and effectively manage staff by organizing work, setting priorities, and delegating tasks and setting responsibilities.

(b) Ability to disseminate appropriate information through various media as a consultant or mentor.

(c) Skill in interpersonal relationships in dealing with employees, other team leaders, and managers.

(d) Knowledge of specialized programs and the ability to perform the administrative duties of special programs and/or components of a kinesiotherapist section.

(e) Knowledge of decision-making principles necessary to adjust programs on a day to day basis, to develop short term and long range goals, and/or to plan for future utilization of human resources, and the reassignment of staff to enhance/develop the value of existing or new programs.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Supervisors are found in Complexity Level 1 (High Complexity) facilities, or in facilities of lesser complexity levels where expanded services are performed. Monitor and modify clinical program development and resources (e.g., personnel, space, equipment, and supplies), in order to ensure that the objectives of treatment and delivery of care have been achieved. Ensure that best practices and procedures are implemented and utilized. The supervisory kinesiotherapists monitor evaluation, treatment, encounter data, collect and report workload and other required statistical data, and patient documentation practices using current research and/or studies to assure delivery of quality care. Supervisors are responsible for providing administrative supervision for planning, directing, organizing, coordinating, implementing, controlling and evaluating the overall administrative operations and clinical procedures, guidelines and protocols of the department. Supervisory kinesiotherapists identify and recommend continuing education and training needs for the
kinesiotherapy staff. Monitor and approve or disapprove training and leave requests. Evaluate the work performance of subordinates, provide feedback to employees, and annual written performance appraisal evaluation. The supervisors develop and update performance evaluation standards and functional statements, making recommendations for appointments, awards, advancement, and when appropriate, disciplinary actions. Recruit and select candidates for hiring, recommending promotions, reassignments, or other personnel changes to higher level management. Resolve grievances and appeals that have been elevated through the chain of command to the supervisory level.

( NOTE: The GS-13 Supervisor may supervise all grade levels below the GS-13 level.)

j. Kinesiotherapist, GS-13

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of evidence-based practices and clinical practice guidelines, rehabilitation principles, methods, and techniques in multiple professional areas. This includes the ability to use these resources to guide the program staff in providing clinically appropriate treatment interventions and performance improvement.

(b) Knowledge of regulatory agencies/bodies, laws, and regulations governing health care organizations as well as knowledge of VA handbooks, directives, and medical center's policies, procedures and guidelines.

(c) Skill in interpersonal relationships and conflict resolution in dealing with a diverse range of employees, team leaders, administrators, and clients.

(d) Ability to translate extensive rehabilitation knowledge and skills in providing clinical and administrative oversight of multidisciplinary rehabilitation programs.

(e) Ability to translate extensive rehabilitation knowledge into cogent and useful policy.

(f) Knowledge of coordinating administrative business operations in order to manage budgets for a program or large integrated service.
(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. An individual in this assignment manages multi-disciplinary sections within the medical center that provide rehabilitative services. Plans, develops, and implements short term and long-term goals, and objectives as part of strategic planning to ensure the provision of quality rehabilitative services to meet the needs of the patient population being served. The rehabilitation program manager coordinates the development and implementation of budget, administration, policies and procedures, position management, staffing, physical resources, and recommends priorities to the chief. This position may have supervisory responsibilities over multiple therapy disciplines and/or section chiefs and oversight of non-physician clinical functions. Monitors and ensures program compliance with various accrediting and regulatory standards and medical center policies. The program manager interviews and selects applicants, setting performance standards, evaluating performance, disseminating necessary information, assigning work, addressing performance, and/or conduct issues, etc. Ensures the coordination of rehabilitation related services provided, as well as an optimal collaboration with other healthcare providers within the facility. Reviews and analyzes efficiency, productivity, access, and utilization data related to performance improvement and patient satisfaction to ensure desired outcomes are achieved. This individual oversees the work of subordinate employees and assures the accuracy of reports submitted by therapy supervisors, clinical specialists, clinical education coordinators, or team/program leaders.

**k. Supervisory Kinesiotherapist, GS-14**

(1) **Experience.** One year of experience equivalent to the next lower grade level.

(2) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Skill in effectively motivating and managing a diverse clinical staff applicable to service level department in a large, complex, or multi-division facility, including inherent strategic planning and fiscal management.

(b) Ability to supervise/manage, plan, organize, delegate, direct, control, and review the activities of subordinate groups that have diverse functions, establish and monitor productivity standards and production groups and performance priorities.

(c) Knowledge of the management principles required to establish program goals and objectives, set strategic direction, plan and manage budgets to
administer a program, coordinate associated activities, evaluate program accomplishments, redefine priorities, and modify objectives.

(d) Knowledge of reconciling contradictory requirements based upon regulations and standards of various regulatory, medical or other professional credentialing groups.

(e) Knowledge of pertinent analytical and evaluative methods sufficient to analyze complex issues and provide workable solutions and alternative solutions to executive leadership that supports timely and sound decision making.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. An individual in this assignment manages multi-disciplinary sections within the medical center that provide rehabilitative services which include but are not limited to kinesiotherapy, physical therapy, occupational therapy, etc. The work is considered to be technically authoritative. The service chief has broad and overall responsibility for the service-level department. The service chief has full responsibility for clinical practice, program management, fiscal management, education, human resources management, and supervision for the service. Autonomously manage substantive parts of specialized, complex, professional services which significantly impact the care provided to patients. Provide leadership with objective, independent assessments and recommendations for policy, operational and administrative issues and initiatives requiring decision and action. Service chiefs monitor work performance to ensure production and accuracy requirements are satisfied. Interpret a wide variety of data and process data related to program planning and specialized needs of the service line and medical center. Ensure policies or projects have been fully coordinated, vetted and staffed. Advise leadership on implications, key issues, relationship to interest groups, both internal and external, and recommend courses of action. The service chief coordinates and negotiates resolutions to complex problems. Prepares special reports and responses, congressional responses, briefing papers, issue briefs, and decision papers for the medical center leadership, which may be highly sensitive, confidential, and of a complex nature as requested. Negotiates affiliation agreements with academic partners, sets training objectives, and delegates responsibilities to subordinate section.

I. Kinesiotherapist, GS-14

(1) Experience. One year of experience equivalent to the next lower grade level.

(2) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:
(a) Knowledge of operations and systems to resolve policy implementation issues and medical center directors/chefs of staff, VISN management, and various professional service representatives.

(b) Ability to oversee program development of assigned specialized VISN/regional clinical programs.

(c) Knowledge of and skill in health care services management and inter-relationships within health care and rehabilitation organizations (i.e. applying healthcare management principles to planning, execution, and administration of Veterans’ system wide programs).

(d) Skill in managing advocacy roles and planning activities within the VA and the greater rehabilitation community.

(e) Knowledge of interdisciplinary rehabilitation specialty activities and scopes of function in order to interact with VA officials and the larger rehabilitation community.

(f) Knowledge of the VA organization, documentation protocols, and channels of communication necessary to write and coordinate directives, handbooks, manuals, program guides, criteria and standards, and any other administrative issue relevant to rehabilitation.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The VISN/regional rehabilitation program manager serves as the program official, advisor, and analyst. Develop and implement the organizational vision and provide leadership, consultation, and operational guidance in compliance with established regulations, policies, and procedures. Applies specialized knowledge of health care and management for planning, organizing, and directing rehabilitation services. Implements national initiatives for the care and treatment of VHA patients, educational programs, program evaluation, quality assurance, budgeting, financing, and policy and procedure formulation. The program manager coordinates activities and functions at the VISN/regional level of rehabilitation programs or related specialty programming such as but not limited to: health promotion and disease prevention; aquatic rehabilitation; driver rehabilitation instructor recruitment and training; polytrauma and amputation program management; external review processes; prosthetic and assistive technology program oversight; and tele-rehabilitation. This individual designs, leads, and implements strategic planning across VISN/regional rehabilitation services and provides guidance to the individual program level for facility
implementation. Develops policy and procedures related to delivery of rehabilitation and related services and provide reporting and data analysis of performance outcomes at the local and VISN/regional level. Coordinates and completes action items from VA Central Office. Provides field support through mentoring activities and tracking of outcome trends. Resolves patient or caregiver concerns or inquiries, reviews requests for patient medical record amendments, and prosthetic equipment requests that have been elevated from the local level to the VISN/regional level. Serves as the technical expert in resolving and developing administrative data trails regarding rehabilitation program issues. Resolves policy implementation issues with appropriate field leaders. Authors and coordinates white papers and issue briefs as clarification documents and provides technical expertise representing any of the clinical rehabilitation specialty disciplines regarding recruitment, retention, certification, scope of practice, and clinical outcome data.

m. Kinesiotherapist, GS-15

(1) Experience. One year of experience equivalent to the next lower grade level.

(2) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of operations and systems to resolve policy implementation issues for medical center directors/chiefs of staff, service chiefs, VISN/regional management, Central Office staff and various professional service representatives.

(b) Ability to oversee program development of assigned specialized national clinical programs.

(c) Knowledge of health care services management and the inter-relationships within health care and rehabilitation organizations (i.e., applying healthcare management principles to planning, execution, and administration of Veterans’ system wide programs).

(d) Skill in managing advocacy roles and planning activities within the VA and the greater rehabilitation community.

(e) Knowledge of interdisciplinary rehabilitation specialty activities and scopes of function in order to interact with VA officials and the rehabilitation community.

(f) Knowledge of the VA organization, documentation protocols and channels of program guides, criteria and standards, and any other administrative issue relevant to rehabilitation.
(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The national rehabilitation executive serves as one of multiple key program officials, advisors and analysts within the National Program Office of Physical Medicine and Rehabilitation Service under Rehabilitation and Prosthetic Services in VA Central Office. This executive develops and implements the organizational vision across VHA. Provides leadership, consultation, and operational guidance in compliance with established external agencies and policies and procedures within rehabilitation services. Manages and plans national initiatives having a high degree of visibility and a significant impact on rehabilitation healthcare services and delivery. The executive applies specialized knowledge of health care and rehabilitation management for planning, organizing and directing national initiatives in the care and treatment of patients, educational programs, program evaluation, quality assurance, budgeting, financing, and policy and procedure formulation. Collaborates and coordinates services with other federal and state agencies, external professional organizations, program offices and services within VHA. Designs, leads, and implements strategic planning across rehabilitation services at the executive level and provides consultation at the individual program level for facility implementation. The executive develops national policy and procedures related to the delivery of rehabilitation services including VHA directives, handbooks, manuals, rehabilitation program implementation and training guides, information letters, clinical practice guidelines, standards and criteria (such as, but not limited to, national space criteria and chief business office documentation criteria). Provides field support through mentoring and consultative activities as a technical expert. Monitors and tracks outcome trends and facilitates validation and efficiency of workload and productivity. Represents the national program office in planning initiatives in a myriad of assignments dealing with rehabilitation issues that cross multiple organizational lines as well as federal and state agencies. The executive resolves policy implementation issues with the appropriate VA Central Office, VISN, regional and facility field leaders or external review organization representatives. They author and coordinate requests for information, and VHA reviews cost estimates for proposed legislation, white papers and issue briefs, as clarification documents. The executive provides technical expertise representing any of the clinical rehabilitation specialty disciplines; including, but not limited to recruitment, retention, certification, scope of practice and clinical outcome data.]

5. **DEVIATIONS.**

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for kinesiotherapists in VHA
whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will educational requirements be waived.

c. [Under no circumstances will registration be waived at the full performance level (GS-11) and above.]

d. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

APPENDIX G22. OCCUPATIONAL THERAPY ASSISTANT QUALIFICATION STANDARD

GS-0636

Veterans Health Administration

1. COVERAGE. [The following are requirements for appointment and placement as an] Occupational Therapy Assistant (OTA), [GS-0636] in the Veterans Health Administration (VHA). OTAs, [under the clinical direction of and in partnership with an] Occupational Therapist (OT) provide preventative, remediation and rehabilitative services to persons with mental, physical, emotional, or developmental impairments. OTAs participate with the OTs in planning and implementing complex treatment programs and apply occupational therapy procedures to patients.

2. DEFINITIONS.

a. Journey Level. The full performance level for this qualification standard is the GS-08 grade level.

b. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills and abilities (KSAs) associated with the scope of OTA practice. [OTAs may have gained this experience as an OTA, rehabilitation aide, volunteer or in the medical health services field.]

c. Part-Time Experience. Part-time experience is creditable according to its relationship to the full-time workweek. For example, one week of full-time credit is equivalent to two weeks of half-time work.

d. [Specialty areas. Clinical specialties may include, but are not limited to, assistive technology, driving and community mobility, environmental modification, low vision, safe patient handling, research, neurology (e.g., brain injury, spinal cord injury), geriatrics and mental health.]

3. BASIC REQUIREMENTS

a. Citizenship. [Be a] citizen of the United States. Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with [38 U.S.C. § 7407(a).]

b. Education. [Individuals must meet at least one of the requirements below:]

(1) Associate’s [or higher] degree in occupational therapy from a college or university accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA).
(2) [Completion of a military training program in an OTA program accredited by the ACOTE.]

c. **Certification.** OTAs must have written documentation that they have passed the entry-level certification examination for OTAs administered by the National Board for Certification in Occupational Therapy (NBCOT).

d. **Licensure.** OTAs must hold a full, current, and unrestricted state license to practice occupational therapy in a State, Territory, a Commonwealth of the United States (i.e. Puerto Rico) or in the District of Columbia.

e. **Loss of Credential.** [Management officials, in collaboration with Human Resource (HR) Office staff] must remove employees in this occupation who fail to maintain the required state or territorial licensure and the NBCOT certification, both current and in good standing, which may result in termination of employment.

f. **Exceptions for Non-Certified or Non-Licensed Occupational Therapy Assistant.**

   (1) OTAs who graduated from an ACOTE approved occupational therapy assistant program but do not possess the NBCOT certification and/or licensure requirements, may be appointed, pending licensure and/or NBCOT certification, on a full-time temporary appointment under the authority of 38 U.S.C. § 7405(a)(1)(B) and not to exceed two years in accordance with the timeframe in 38 U.S.C. § 7405(c)(2).

   (2) OTAs may only be appointed at the entry grade level and may not be promoted/converted until licensure and/or certification are obtained.

   (3) OTAs may provide care only under the direct supervision of a licensed OTA or OT who meets all state regulatory requirements.

   (4) Temporary OTA appointments may not be extended beyond two years.

gh. **Failure to Obtain License.** In all cases, uncertified and/or unlicensed OTAs must actively pursue meeting certification requirements and/or State prerequisites for licensure starting from the date of their appointment. At the time of appointment, the HR Office staff will provide the uncertified and/or unlicensed OTA the written requirements for licensure and/or certification, the date by which the license and/or certification must be obtained and the consequences for not becoming licensed and/or certified by the deadline. OTAs who fail to obtain a license and/or certification by the prescribed date will be removed from their OTA, GS-0636 position, which may result in termination of employment.

h. **Grandfathering Provision.** All individuals employed in VHA in this occupational series or in another occupational series that are also performing the duties as
described in the qualification standard on the effective date of this qualification standard are considered to have met all qualification requirements for the grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees may be reassigned, promoted up to and including the full performance (journey) level or changed to lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) Employees in an occupation that requires a licensure/certification/registration only at higher grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher grade levels.

(3) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis until they fully meet the basic requirements of the standard.

(4) Employees who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

(5) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

j. English Language Proficiency. OTA candidates must be proficient in spoken and written English [in accordance with 38 U.S.C. § 7403(f).]

4. GRADE DETERMINATIONS. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

[ ]

a. Occupational Therapy Assistant, GS-05

   (1) Experience. [None beyond the basic requirements.]
(2) **Knowledge, Skills and Abilities.** [None.]

(3) **Assignment.** [Employees at this grade level serve in an OTA entry level developmental position under direct clinical direction and partnership of an OT. The treating OT is available on a regularly scheduled basis to review the practice of the OTA and support the OTA in the performance of his/her services. OTAs perform preliminary chart review including medical history and looking for contraindications for treatment. They provide functional and purposeful intervention to enhance safety, wellness, performance in activities of daily living (ADL) and instrumental activities of daily living (IADL), education, work, play, leisure and social participation. OTAs recommend treatment changes based on changes in physical, mental, and/or medical status of the patient. They follow guidelines from the AOTA, The Joint Commission (TJC) and current VHA policy and protocols as instructed by supervisor.]

b. **Occupational Therapy Assistant, GS-06**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** [In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Knowledge of evidence-based occupational therapy practice.

(b) Knowledge of basic group techniques and interpersonal communication

(c) Skill in written communication to document data, progress/change in status, discharge status, and patient or caregiver education.

(d) Skill in oral communication to document data, progress/change in status, discharge status, and patient or caregiver education.

(e) Ability to assist in the development of treatment goals/objectives.

(f) Ability to implement a patient care plan incorporating activity analysis theory.]

(3) **Assignment.** Employees at this grade level serve in an OTA [developmental] position. OTAs receive ongoing guidance from more experienced staff members and require clinical direction by the treating OT. They complete a preliminary review/examination of patient data to select, adapt and implement basic intervention plans for the prevention, remediation and rehabilitation of non-complex diagnoses. OTAs recommend changes in treatment based on changes in physical, mental and/or medical status of the patient. They prepare and present written and oral patient care reports. OTAs perform non-direct patient care tasks including, but not limited to, coordinating schedules with team members and monitoring inventory of clinical supplies. They
actively participate in patient/family meetings to identify patient’s needs, report on patient goals and progress. OTAs communicate patient progress and any additional patient needs/treatment modifications to the OT. OTAs may provide clinical supervision (Note, this does not constitute supervisory control) to OTA students that will include promoting clinical reasoning and reflective practice, as well as ethical practice and professional competency development.

c. **Occupational Therapy Assistant, GS-07**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** [In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill in promoting occupational therapy services effectively, providing training and interventions within the assigned areas

(b) Ability to perform in depth chart review to identify treatment goals and implement treatment plans.

(c) Ability to use problem-solving skills when providing therapeutic interventions for patients.

(d) Ability to provide multi-step instructions to patients, caregivers and other health care professionals adapting instructions to meet the learning needs of the individual.]

(3) **Assignment.** Employees at this grade level serve in an OTA [developmental] position. OTAs receive guidance from more experienced staff members and/or treating OT, for patients with comorbidities and/or requiring complicated interventions. They grade and adapt treatment interventions to maximize patient's functional status. OTAs provide education regarding ways to structure activities and areas of occupation for patients to family members, other care professionals and program staff. They interact with patient and family to explain therapy procedures and discuss treatment plans to comply with indicated regimens and post discharge activities. OTAs may provide clinical supervision (Note, this does not constitute supervisory control) to OTA students and other healthcare practitioners. This will include promoting clinical reasoning and reflective practice, as well as ethical practice and professional competency development. They provide department in-service training and provide caregiver and home management training to patients and families. OTAs assist in the orientation of, and may function as a preceptor to, employees and students new to the unit as assigned and promotes occupational therapy within the facility.
d. [Occupational Therapy Assistant, GS-08]

(1) **Experience.** One year of creditable experience comparable to the next lower grade level.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Ability to implement delegated assessments.

(b) Ability to provide reports of observations and patient performance.

(c) Ability to use complex therapeutic techniques and interventions, utilizing problem-solving skills to maximize patient’s functional status.

(d) Ability to modify therapeutic interventions for simple and complex cases with a wide range of diagnoses and disabilities.

(e) Ability to recommend complex adaptive and assistive devices and durable medical equipment.

(f) Ability to consult with health care practitioners about the patient’s treatment plan and the occupational therapy scope of practice and services.

(3) **Assignment.** Employees at this grade level serve as a full performance level OTA. OTAs at this level receive minimum guidance from the OT and seek guidance for more complex patients and specialized treatment procedures. They contribute to the screening, evaluation and re-evaluation process by administering delegated assessments and reporting observations and patient performance to the OT. OTAs plan, coordinate and administer occupational therapy treatment for prevention, remediation and rehabilitation of diverse diagnoses in all practice areas to both individuals and groups as well as develop and implement new programs. They recommend and modify assistive devices and instruct patients on their care and use to ensure optimal performance. OTAs independently provide patient education on areas of occupation, assistive devices and orthotics based on patient’s and families’ level of cognition, cultural and/or behavioral variables. OTAs collaborate with the interdisciplinary team to make recommendations for the patient’s rehabilitation, reintegration and disposition needs. They develop, participate in and ensure compliance with quality improvement activities through participation in medical center/section committees as delegated.

e. **Occupational Therapy Assistant, GS-09**

(1) **Education and Experience.** One year of creditable experience comparable to the next lower grade level which demonstrates the knowledge, skills and abilities
related to the duties of the position being filled. In addition, the candidate must
demonstrate one of the following:

(a) A minimum of 2000 hours of clinical practice directly in the specialty area and
completion of 60 contact hours of continuing education directly related to the
specialty area. This time must be within the past five years; or

(b) Certification in specialty area; or

(c) An additional academic degree related to the healthcare mission.

(2) Knowledge, Skills and Abilities. In addition to the experience and education
requirements above, the candidate must demonstrate the following KSAs.

(a) Skill in the utilization of delegated assessment tools to assist in developing
individualized treatment plan related to specialty area.

(b) Skill in developing protocols and procedures for specialized intervention
techniques and programs.

(c) Ability to independently implement treatment plan using specialty skills and
complex techniques.

(d) Ability to provide complex evidence-based interventions related to clinical
specialty.

(e) Ability to provide consultation and mentoring to other healthcare practitioners
and stakeholders in area of specialty.

(3) Assignment. For all assignments above the full performance level, the
higher-level duties must consist of significant scope, complexity (difficulty),
variety, and be performed by the incumbent at least 25% of the time.
Employees at this grade level serve as advanced OTAs with additional
education and experience for treatment of patients with multiple comorbidities
and diagnoses. Advanced OTAs apply advance practice skills to treat patients
with complex diagnoses, including independently choosing personalized
seating and positioning, creating and fabricating adaptive devices, etc.
Advanced OTAs possess a higher-level of clinical competence and serve as a
consultant to other OTAs. They serve as subject matter experts in
comprehensive rehabilitation programs such as, but not limited to, assistive
technology, driving and community mobility, environmental modification, low
vision, safe patient handling, research, neurology (e.g., brain injury, spinal
cord injury), geriatrics and mental health. Advanced OTAs may participate in
clinical research/outcomes studies, applying related interventions, testing new
products/techniques and protocol and program development. They mentor
other staff to facilitate skill development related to area of expertise.
Advanced OTAs provide education within the facility related to diverse specialty areas and on new trends in area of expertise. They promote occupational therapy within the facility, community, and/or nationally.

f. **Lead Occupational Therapy Assistant, GS-09**

(1) **Experience.** One year of creditable experience equivalent to the next lower grade level which demonstrates the knowledge, skills and abilities related to the duties of the position being filled.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

   (a) Ability to organize work, set priorities and delegate tasks/responsibilities to meet deadlines.

   (b) Ability to mentor/coach other staff in advanced clinical guidelines and best practices.

   (c) Ability to manage staffing requirements and priorities and coordinate work assignments to complete duties in a timely manner.

   (d) Ability to assist with OT program development, outcome management and strategic planning.

   (e) Ability to serve as a liaison between OT staff and department leadership.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at least 25% of the time. Lead OTAs work with the supervisor to monitor and make work assignments, provide input on performance, resolve daily workplace issues and maintain efficient workflow. Lead OTAs will lead three or more GS-8 OTA positions. Lead OTAs coordinate staff assignments with therapy department leadership for long-term strategic planning and coverage. They communicate between staff and department leadership and serve as a liaison between occupational therapy and other departments. Lead OTAs serve as a consultant to other OTAs and provide clinical practice guidance to other occupational therapy staff. Lead OTAs duties may also include managing the staff and/or clinical education program. Lead OTAs utilize appropriate reports and/or mechanisms (e.g., OT consult completion, OT productivity, employee accident forms) to identify system problems or noncompliance to standards. They maintain personal productivity and assists the section in maintaining/increasing effectiveness and efficiency in meeting its objectives.

g. **Occupational Therapy Assistant (Program Coordinator), GS-10**
(1) **Experience.** One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Knowledge of contemporary occupational therapy within specialty program to provide advocacy, consultation and education to internal and external stakeholders.

(b) Skill in management, administration and/or education methodologies, e.g., monitoring and tracking data, using available resources effectively and generating reports for leadership.

(c) Ability to coordinate the operations of multi-disciplinary teams and departments.

(d) Ability to obtain resources and evaluate effectiveness to ensure operation and performance improvement of the program.

(e) Ability to develop programs, policies and procedures to meet specialty area goals and external accreditation requirements.

(f) Ability to serve as a facilitator in coordinating program initiatives among multiple teams and departments.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at least 25% of the time. OTAs (Program Coordinator) at this level have experience that demonstrates advanced practice skills and judgment across one or more areas of occupational therapy. OTAs at this level manage all aspects of a distinct program of service within the facility, Veteran Integrated Service Network (VISN), or national and/or regional level. OTAs may be assigned broad administrative responsibility for one or more specialty practice areas, such as, but not limited to, assistive technology, brain injury, spinal cord injury, chronic pain, geriatrics, student clinical education/fellowship/residency programming and mental health. They oversee operations and/or management of key clinical, training, research, and/or administrative programs. OTAs (Program Coordinator) develop and implement programs, policies and procedures to meet program goals, policy and external accreditation requirements at the facility, VISN, national and/or regional level. They monitor outcomes and implement strategies for program improvement. The OTA (Program Coordinator) develops and implements short- and long-term goals and objectives consistent with the program’s strategic plan.
h. **Supervisory Occupational Therapy Assistant, GS-10**

(1) **Experience.** One year of experience comparable to the next lower level which demonstrates the knowledge, skills and abilities related to the duties of the position to be filled.

(2) **Knowledge, Skills and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:

   (a) Knowledge of national, state and local regulations, policies and procedures.

   (b) Skill in effective communication and conflict resolution.

   (c) Ability to apply knowledge of contemporary occupational therapy across multiple areas of practice to provide clinical guidance.

   (d) Ability to provide the full range of administrative and supervisory duties which include assigning work, performance evaluations, selection of staff, recommendation of awards, advancements and disciplinary actions.

   (e) Ability to analyze data to optimize quality, performance and productivity of staff and services.

   (f) Ability to delegate authority to accomplish program goals and adapt to changing priorities.

   (g) Ability to manage advocacy roles and planning activities within the VA and the greater rehabilitation community.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at least 25% of the time. Responsible for the supervision, administrative management and direction of the OT program in a rehabilitation service or equivalent service-level department which consists of at least three clinical employees and other assigned staff. Supervisory OTAs demonstrate autonomy in performing supervisory responsibilities that include, but are not limited to, assigning work to employees, monitoring workload and clinical volume, reviewing work of employees to assure accuracy and validity of submissions, assuring adequate clinical staffing, imposing disciplinary measures, recommending awards and monitoring clinical privileges of assigned staff. They analyze and review data (e.g., productivity, workload, documentation, etc.) to identify programmatic issues and develop solutions/strategies resulting in performance improvement. Supervisory OTAs provide requested facility and/or departmental reports to hospital management and monitors the standard of clinical services delivered. The develop and implement policies and
procedures to address focused clinical needs and the overall services delivered and provided within the section.]

5. **DEVIATIONS.**

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade and/or assignment.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health in VHA Central Office prior to placement in the position.

c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement or when specific credentials are identified as necessary to meet minimum requirements, unless an exception is annotated in the qualification standard.

Authority: 38 U.S.C. §§ 7401, Appointments in Veterans Health Administration; 7402, Qualifications of appointees; 7403, Period of appointments; promotions; 7405, Temporary full-time appointments, part-time appointments, and without-compensation appointments; 7407, Administrative provisions for section 7405 and 7406 appointments.
APPENDIX G23. PHYSICAL THERAPY ASSISTANT QUALIFICATION STANDARD

GS-0636

Veterans Health Administration

1. COVERAGE. [The following are requirements for appointment as a] Physical Therapy Assistant (PTA), GS-0636 in the Veterans Health Administration (VHA). These requirements apply to all VHA PTAs in the General Schedule (GS)-0636 series. Under the direction of a Physical Therapist (PT), the PTA provides services that promote the prevention, remediation and rehabilitation of acute and chronic physical dysfunction. The PTA participates with the PT in planning and implementing complex treatment programs and applies physical therapy procedures to patients.

[2.] DEFINITIONS.

a. Journey Level. The full performance level for this qualification standard is the GS-8 grade level.

b. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills and abilities (KSAs) associated with the current scope of PTA practice. Experience must have been gained as a licensed PTA.

c. Part-Time Experience. Part-time experience is creditable according to its relationship to the full-time work week. For example, an individual employed 20 hours per week, or on a half time basis, would receive one full-time work week of credit for each two weeks of service.

d. [Specialty Practice Areas. Specialty areas may include but not limited to neuromuscular, musculoskeletal, cardiopulmonary, integumentary, assistive technology, brain injury and spinal cord injury (SCI).]

[3.] BASIC REQUIREMENTS. To qualify for appointment to this position, all applicants must possess the following:

a. Citizenship. Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

b. Education. Individuals must meet at least one of the requirements below:

(1) [] Associate degree from an accredited community college, junior college, college or university in a physical therapy assistant education program accredited by the Commission on Accreditation in Physical Therapy Education;
OR

(2) [Graduate of foreign physical therapy assistant degree programs that meet the educational requirement and have successfully passed the National Physical Therapy Exam (NPTE) for PTAs.

OR

(3) Graduate of military physical therapy assistant programs that meet the educational requirement and have successfully passed the NPTE for PTAs.]

c. **Licensure.** Current, full, active and unrestricted license as a PTA in a State, Territory or Commonwealth (i.e. Puerto Rico) of the United States, or District of Columbia.

1. **Exceptions for Non-Licensed Physical Therapy Assistant.**

   (a) Non-licensed applicants who otherwise meet the minimum qualification requirements, but who do not possess state licensure, may be appointed, pending licensure, as a graduate PTA on a full-time temporary appointment under the authority of 38 U.S.C. § 7401(a)(1)(B) and not to exceed two years in accordance with the timeframe in 38 U.S.C. § 7405(c)(2)(B).

   (b) Non-licensed individuals shall only provide care under the direct supervision of a licensed PTA or PT who meets all state regulatory requirements.

   (c) Non-licensed individuals may only be appointed at the entry level and may not be promoted/converted until licensure is obtained.

   (d) Temporary appointments of non-licensed PTAs may not be extended beyond two years or converted to a new temporary appointment.

   (e) **Failure to Obtain Licensure.** In all cases, non-licensed PTAs must actively pursue meeting requirements for licensure starting from the date of their appointment. At the time of appointment, the supervisor will provide the non-licensed PTA with the written requirements for licensure, including the time by which the license must be obtained and the consequences for not becoming licensed by the deadline. Failure to obtain licensure during this time period may result in termination of employment.

2. **Loss of Credential.** A PTA who fails to maintain the required licensure must be removed from the occupation, which may also result in termination of employment.
d. **Grandfathering Provision.** [Please carefully review the qualification standard to determine the specific education and/or licensure/certification/registration requirements that apply to this occupation.]

All individuals employed in VHA in this occupational series [or in another occupational series performing the duties as described in the qualification standard] on the effective date of the qualification standard are considered to have met all qualification requirements for the [ ] grade held, including positive education and licensure/trademark/registration/certification. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

1. Employees may be reassigned, promoted up to and including the full performance (journey) level or changed to lower grade within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

2. [Employees in an occupation requiring a licensure/certification/registration only at higher grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher-grade levels.]

3. Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of this standard.

4. Employees who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

5. Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

e. **Physical Requirements.** See VA Directive and Handbook 5019, Employee Occupational Health Service for requirements.

f. **English Language Proficiency.** [PTA candidates must be proficient in spoken and written English in accordance with 38 U.S.C. § 7403(f).]

4. **GRADE DETERMINATION.** In addition to the basic requirements outlined in paragraph 3, the following criteria must be met when determining the grade of candidates.
a. **[Physical Therapy Assistant], GS-05**

   (1) **Experience.** [None beyond the basic requirements.]

   (2) **Assignment.** This is the entry level developmental position. PTAs receive ongoing guidance from more experienced staff members and require general clinical [direction] by the treating physical therapist. The [treating] physical therapist is available on a regularly scheduled basis to review the practice of the PTAs and support the PTAs in the performance of their services. PTAs perform preliminary chart review including medical history and contraindications for treatment. They treat patients through basic exercise, massage, gait and balance training and other therapeutic interventions. PTAs recommend changes in treatment based on changes in physical, mental and/or medical status of the patient. PTAs instruct, motivate and assist patients to learn and improve functional activities.

b. **[Physical Therapy Assistant], GS-6**

   (1) **Experience.** One year of creditable experience equivalent to at least the next lower grade[ ].

   (2) **Demonstrated Knowledge, Skills and Abilities.** [In addition to the basic requirements, the candidate must demonstrate the following KSAs:]

      (a) Knowledge of evidence based physical therapy practice.

      (b) [Ability to perform] physical therapy data collection and use of objective measures in order to carry out patient plan of care.

      (c) [Ability to modify treatment approaches, within the scope of the established treatment plans, to reflect patients’ changing needs.]

      (d) Skill in promoting physical therapy services by providing training and interventions within the assigned areas.]

   (3) **Assignment.** PTAs at this grade level serve [in developmental positions] [under general direction from PTs]. They receive ongoing guidance from more experienced staff members and require general clinical [direction] by the treating physical therapist. [PTAs develop a broad base of practical knowledge to assist the PT in reaching pre-determined patient goals.]

c. **[Physical Therapy Assistant], GS-7**
(1) **Experience.** One year of experience equivalent to the next lower grade.

(2) **Demonstrated Knowledge, Skills and Abilities.** [In addition to the basic requirements, the candidate must demonstrate the following KSAs:]

(a) Ability to perform in depth chart review to implement treatment plans.

(b) Ability to independently use objective measures to assess progress, in accordance with the plan of care for complex patient cases.

(c) Knowledge of contemporary physical therapy practice.

(d) Ability to consult with the PT to assess progress, modify treatment and set discharge plan.

(3) **Assignment.** [This is a developmental level for PTAs. PTAs receive ongoing guidance from more experienced staff members and receive general direction by the treating PT. PTAs draw upon a broad base of practical and experiential knowledge in order to assist the PT in reaching pre-determined patient goals. PTAs work independently but still under the general direction of PTs. They observe patients’ ability to perform specified tasks in order to provide ongoing assessment of information on patients’ physical and functional status. PTAs work with the physical therapy staff to assess progress, modify treatment and set discharge plan. They provide clinical direction for PTA students.]

d. **[Physical Therapy Assistant], GS-8**

(1) **Experience.** [One year of experience equivalent to the next lower grade.]

(2) **Demonstrated Knowledge, Skills and Abilities.** [In addition to the basic requirements, the candidate must demonstrate the following KSAs:]

(a) Ability to independently implement treatment plan using knowledge of techniques related to the patient’s disability and needs.

(b) Ability to independently provide varied and multifaceted physical therapy interventions based on the established care plan (e.g., therapeutic exercise, balance, body mechanics, flexibility, strength, gait training, neuromotor development, physical agents, functional training, etc.).

(c) Knowledge of physical therapy data collection and assessment techniques in order to perform specific interventions and to monitor and capture progress of the patient/client.

(d) Ability to instruct patient on varied interventions to provide materials to enhance compliance with home programs.
(e) Ability to modify treatment techniques based on the learning needs and perceptions of the patient.

(f) Ability to identify critical changes (e.g., vital signs, pain, mobility and alertness) in patient conditions to determine their medical and functional status.

(g) Ability to work with PTs and other interdisciplinary healthcare team members to evaluate patient information for planning, modifying and coordinating treatment programs and discharge planning.

(3) Assignment. This is considered the journey level for PTAs. PTAs at this level collaborate with the primary PT then draw upon a broad base of practical knowledge and a well-developed treatment skill set in order to reach predetermined patient goals by independently modifying techniques within the established plan of care. They implement the plan of care for patient cases, advance the program and continually review the patient’s condition to determine their medical and functional status. They provide evidenced based skilled interventions including, but not limited to, therapeutic exercise, therapeutic activities, therapeutic modalities, gait training, transfer training, manual treatment, neuromuscular re-education, self-care and management training, patient/caregiver’s education and group therapy. They meet with the physical therapy staff and other healthcare team members to evaluate and discuss patient information for planning, modifying and coordinating treatment programs and discharge planning.

e. Physical Therapy Assistant, GS-9

(1) Experience. One year of experience equivalent to the next lower grade. In addition, the candidate must demonstrate one of the following:

(a) A minimum of 2000 hours of clinical practice directly in the specialty area, and completion of 60 contact hours of selected continuing education coursework. This time must be within the past five years; or

(b) Advanced Practice Proficiency (APP) in the specialty area recognized by the American Physical Therapy Association (APTA); or

(c) An additional academic degree related to the health care mission.

(2) Demonstrated Knowledge, Skills, and Abilities. In addition to the basic requirements, the candidate must demonstrate the following KSAs:

(a) Ability to mentor other staff in advanced clinical guidelines and best practices.
(b) Ability to serve as a subject matter expert (SME) for healthcare providers in specialty practice areas regarding physical therapy care.

(c) Ability to present advanced knowledge in the therapeutic interventions and clinical practice guidelines with the healthcare team.

(d) Ability to interpret and apply clinical practice guidelines.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. PTAs at this level apply advanced practice skills to treat complex patients. PTAs possess an advanced level of clinical competence and serve as a SME in specialty practice areas. They serve as a subject matter expert in a rehabilitation program such as, but not limited to, geriatrics, amputee, brain injury, cardiac rehabilitation, orthopedics, neurological, safe patient handing, or any other functional debilitative conditions. They possess advanced practice skills and experience with a wide range of patient complexity. They apply advanced methodologies to a vast array of functional impairments and patients. They independently recommend and apply evidence-based treatment approaches within the plan of care.

f. Lead Physical Therapy Assistant, GS-9

(1) Experience. One year of experience equivalent to the next lower.

(2) Demonstrated Knowledge, Skills and Abilities. In addition to the basic requirements, the candidate must demonstrate the following KSAs:

(a) Ability to lead staff, which includes planning, organizing and assigning work and coordinating clinical workflow.

(b) Ability to mentor staff in advanced clinical guidelines and best practices.

(c) Ability to assist with PT program development, outcome management and strategic planning.

(d) Ability to serve as a liaison between PT staff and department leadership.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. Lead PTAs work with the supervisor to monitor and make work assignments, provide input on performance, resolve daily workplace issues and maintain efficient workflow. Leads no less than three GS-8 PTA positions. Lead PTAs coordinate staff assignments with therapy department leadership for long term strategic planning and coverage. They communicate between staff and
department leadership and serve as a liaison between physical therapy and other departments. Lead PTAs apply advanced methodologies and treatment theories in the provision of care to a vast array of functional impairments and patients. They serve as consultant to other PTAs and provide clinical practice guidance to other physical therapy staff. Lead PTAs are generally found in highly complex level facilities or in a large rehabilitation program with multiple PTAs on staff.

g. **Physical Therapy Assistant (Program Coordinator), GS-10**

(1) **Experience.** One year of experience equivalent to the lower grade.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the basic requirements, the candidate must demonstrate the following KSAs.

(a) Skill in program management/administration to include direction, development, consultation, negotiation and compliance.

(b) Ability to apply advanced knowledge of the program to interdisciplinary team functions, goals and outcomes across multiple areas of practice.

(c) Ability to serve as a consultant to internal and external stakeholders regarding the program.

(d) Ability to serve as facilitator in coordinating program initiatives among multiple teams and departments.

(e) Ability to evaluate the effectiveness of the program and make performance improvement adjustments as indicated.

(f) Ability to mentor and train others in the assigned program area.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and variety and be performed by the incumbent at least 25% of the time. PTAs at this level manage all aspects of a distinct program or service within the facility, Veterans Integrated Service Network (VISN), national and/or regional level. They serve as a subject matter expert in a rehabilitation program such as, but not limited to, geriatrics, amputee, brain injury, cardiac rehabilitation, orthopedics, neurological, clinical education or any other functional debilitative conditions. The program coordinator is knowledgeable about facility, regional and national policies to ensure compliance. Program coordinators oversee operations and/or management of key clinical, training, research and/or administrative programs. They develop and implement programs, policies, and procedures to meet program goals, policy and external accreditation requirements at the VISN, national and/or regional
level. They monitor outcomes and implements strategies for program improvement. They are also responsible for developing and implementing short- and long-term goals and objectives consistent with the program’s strategic plan.

h. **Supervisory Physical Therapy Assistant, GS-10**

(1) **Experience.** One year of experience equivalent to the lower grade.

(2) **Demonstrated Knowledge, Skills and Abilities.** In addition to meeting the basic requirements, the candidate must demonstrate the following KSAs:

   (a) Knowledge of contemporary physical therapy across multiple areas of practice.

   (b) Ability to apply knowledge of contemporary physical therapy to provide clinical guidance to PTAs within the department.

   (c) Knowledge of human resources management, including such functions as the ability to interview and select qualified applicants, monitor and evaluate performance, and maintain effective labor management relations within scope of responsibility.

   (d) Ability to supervise a diverse PTA staff or others under their direction to include setting priorities, delegating tasks and solving problems in order to meet multiple deadlines and identifying/addressing organizational problems.

   (e) Skill in forging positive interpersonal relationships and conflict resolution.

   (f) Ability to analyze clinically appropriate data effectively to optimize quality, performance and productivity within the section.

   (g) Ability to manage advocacy roles and planning activities within the rehabilitation community.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and variety, and be performed by the incumbent at least 25% of the time. Supervisory PTAs are responsible for the supervision, administrative management and direction of the PTA program in a rehabilitation service or equivalent service-level department which consists of three or more PTAs and other assigned clinical, clerical and support staff. They provide supervision of key PTA clinical and training programs, including the overall technical oversight of the staff that they administratively supervise. They are responsible for the development and implementation of policies and procedures to address focused clinical needs and the overall services
delivered and provided within the section. They demonstrate autonomy in performing supervisory responsibilities that include, but are not limited to, assigning work to employees, monitoring workload and clinical volume, reviewing work of employees to assure accuracy and validity of submissions, assuring adequate clinical staffing, imposing disciplinary measures, recommending awards and monitoring clinical privileges of PTAs.]

5. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade and/or assignment.

b. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health in VHA Central Office prior to placement in the position.

c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement or when specific credentials are identified as necessary to meet minimum requirements.

Authority: 38 U.S.C. §§ 7401, Appointments in Veterans Health Administration; 7402, Qualifications of appointees; 7403, Period of appointments; promotions; 7405, Temporary full-time appointments, part-time appointments, and without-compensation appointments; 7407, Administrative provisions for section 7405 and 7406 appointments.
1. **COVERAGE.** The following are the requirements for appointment as a Medical Technologist (MT) in the Veterans Health Administration (VHA). These requirements apply to all VHA MTs in the General Schedule (GS)-644 series. In the health care community, MTs are generally referred to as “medical laboratory scientists (MLS) or clinical laboratory scientists (CLS),” and these terms are considered to be synonymous where stated in this qualification standard.

2. **BASIC REQUIREMENTS**

   a. **Citizenship.** Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. **Education and/or Experience Combination**

      (1) A bachelor’s degree or higher from an accredited college or university in medical laboratory science, medical technology, clinical laboratory science or in a related science (e.g., laboratory sciences such as chemistry, biochemistry, biology, microbiology, immunology, etc.).

      AND

      completion of a medical technology clinical practice program. Clinical practice programs completed after 1974 must have been accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), Commission on Accreditation of Allied Health Education Programs (CAAHEP, formerly CAHEA), or the Accrediting Bureau of Health Education Schools (ABHES). The professional curriculum may have consisted of a post-baccalaureate certificate program or be integrated into a four-year program of study that culminated in a baccalaureate degree.

      OR,

      (2) A bachelor’s degree from an accredited college/university, including 16 semester hours of biological science (with one course in microbiology), 16 semester hours of chemistry (with one course in organic or biochemistry) and one course in mathematics,

      AND

      two years of post-certification clinical laboratory experience (e.g., blood banking, chemistry, hematology, microbiology, immunology, clinical microscopy, etc.) within the last ten years as a certified Medical Laboratory Technician by the American Society for Clinical Pathology Board of Certification (ASCP-BOC), American Society of Clinical Pathology Board of Registry (ASCP-BOR) or American Medical Technologists (AMT). This experience must include performing moderate and/or high complexity testing in blood banking, chemistry, hematology, microbiology immunology and clinical microscopy (or categorical experience which matches categorical certification) in a clinical laboratory.

      OR,
(3) A bachelor’s degree from an accredited college/university, including 16 semester hours of biological science (with one course in microbiology), 16 semester hours of chemistry (with one course in organic or biochemistry) and one course in mathematics,

AND

five years of clinical laboratory experience within the last ten years performing moderate and/or high complexity testing in blood banking, chemistry, hematology, microbiology, immunology and clinical microscopy (or categorical experience which matches categorical certification) in a clinical laboratory.

c. **Foreign Graduates.** Graduates of foreign baccalaureate degree programs meet the educational and/or experience requirements if the degree is found to be equivalent to degree programs recognized by the NAACLS or clinical laboratory experience as described in paragraph 2b(2) or (3) above. This finding may be based on either of the following:

(1) A letter from a college or university with a baccalaureate program recognized by the NAACLS stating that the individual’s foreign degree has been evaluated and been found to be equivalent to its bachelor of medical technology degree.

(2) A letter from ASCP-BOC or AMT stating that the individual is eligible for the certification examination.

d. **Certification.** Candidates must have either (1) or (2) below:

(1) Candidates must currently possess the appropriate certification as a MT, MLS, or CLS given by the ASCP-BOC, ASCP-BOR, or AMT.

(2) For positions up to the full performance level, candidates must currently possess the categorical or specialist technologist level certification from the certification agencies listed above, such as, but not limited to, chemistry (C/SC), hematology (H/SH), microbiology (M/SM), molecular biology (MB/SMB) and blood bank (BB/SBB). Technologists with categorical or specialist certifications may only perform duties within the area of the laboratory specific to their categorical certification (e.g., an individual with a chemistry (C) certification can only perform duties in chemistry).

(3) **Exception.** Non-certified applicants who otherwise meet the eligibility requirements for certification may be given a temporary appointment up to the full performance level not to exceed one year as a graduate medical technologist under the authority of 38 U.S.C. § 7405(c)(2)(B). This appointment may not be extended. For grade levels above the full performance level, the candidate must be certified in accordance with paragraph 2d(1) above.

(4) **Failure to Obtain Certification.** In all cases, MTs must actively pursue meeting prerequisites for certification from the date of their appointment. At the time of appointment, the supervisor will provide the MT with the written requirement to obtain certification, the date by which the certification must be acquired, and the consequences for not becoming certified by the deadline. Failure to become certified within one year from date of appointment will result in removal from the GS-0644 MT series.
Failure to obtain certification during that period is justification for termination of the temporary appointment.

(5) **Loss of Credential.** Once certified, MTs must maintain their certification. Loss of certification will result in removal from the occupation and may result in termination of employment.

e. **Grandfathering Provision.** All MTs employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to the position, the following provisions apply:

1. MTs that do not meet the basic requirements for education and certification may be reassigned, promoted up to and including the full performance (journey) level, or changed to lower grade within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

2. MTs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed on a temporary or permanent basis until they fully meet the basic requirements of the standard.

3. MTs initially grandfathered into this occupation who subsequently obtain certification that meets all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

4. If MTs who were retained in this occupation under this provision leave the occupation, the MT loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

g. **English Language Proficiency.** MTs must be proficient in spoken and written English in accordance with chapter 2, section D, paragraph 5a, this part.

3. **GRADE REQUIREMENTS**

   a. **Creditable Experience**

   1. **Knowledge of Current Professional Laboratory Practice.** For positions at or above the full performance level, the experience must have demonstrated the use of knowledge, skills and abilities as a MT and may be paid or non-paid employment.

   2. **Quality of Experience.** Experience is only creditable if it is equivalent to at least the next lower grade level and is directly related to the position being filled.
(3) **Part-time Experience.** Part-time experience as a MT is creditable according to its relationship to the full-time workweek. For example, a MT would receive 1 week of full-time credit for each 2 weeks of half-time work.

(4) **Graduate Education.** Graduate education and graduate degrees may be substituted as specified at each grade level. Education must have been from an accredited college or university in a field related to MT (e.g., biochemistry, chemistry, microbiology, immunology, hematology, immunohematology, biological science, physiology, allied health education, health systems administration, infection control and preventive medicine), which was accredited at the time the candidate completed the program.

b. **Grade Determinations.** The following criteria must be met when determining the grade of candidates.

(1) **GS-7** (Entry Level)

(a) **Experience.** None beyond the basic requirements.

(b) **Assignments.** Employees at this level serve in an entry level MT career development position practicing under close supervision of an MT at or above the full performance level.

(2) **GS-9** (Full Performance Level)

(a) **Experience.** Must have 1 year of creditable experience equivalent to the next lower grade level, which is directly related to the position to be filled.

    **OR,**

(b) **Education.** Must have Master’s degree or 2 academic years of progressively higher-level graduate education in medical technology or directly related field.

(c) **Demonstrated Knowledge, Skills and Abilities.** In addition to the experience or education above, the candidate must demonstrate the following KSAs:

1. Comprehensive knowledge of professional MT principles, practices, concepts and theories providing for sound independent work.

2. Comprehensive knowledge of laboratory quality control and assurance procedures and principles of performance improvement in order to manage reagent and supply inventories and document control systems.

3. Knowledge of laboratory equipment and ability to maintain, troubleshoot and repair instrumentation.

4. Ability to plan, organize, set priorities, work as a team member and effectively complete assignments.
5. Ability to use independent technical judgment to analyze and interpret laboratory results.

6. Ability to read, interpret and apply complex written instructions.

7. Skilled in informatics, laboratory data flow and the understanding of laboratory processes.

8. Ability to communicate, consult and interact with other members of the healthcare team, external relations, customer service and patient education.

(d) Assignment. This is considered the full performance level for nonsupervisory positions. A MT at this level carries out the day-to-day operations in the laboratory. This would include routine testing, quality control, routine maintenance of instrumentation and troubleshooting. The MT develops, performs, evaluates, interprets, correlates and validates the accuracy of laboratory procedures and results ensuring all laboratory regulatory requirements are met. Testing procedures are performed on a variety of biological specimens and/or environmental samples using manual or automated techniques, following practices and regulations governing biosafety and biosecurity in the workplace. These require a broad exercise of independent judgment and responsibility, including organizing and setting priorities with minimal technical supervision. The work performed is in a variety of laboratory disciplines, such as chemistry, microbiology, immunology, hematology, and immunohematology. Such positions include requirements to monitor quality control systems and measures; collaborate in the diagnosis and treatment of patients; and provide education for laboratory healthcare professionals and the public in a professional, courteous and effective manner.

3) GS-10

(a) Experience. Must have 1 year of creditable experience equivalent to the next lower grade level, which is directly related to the position to be filled.

(b) Demonstrated Knowledge, Skills and Abilities. In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Comprehensive knowledge of and skill in applying a wide range of concepts, principles and methodology of the field to perform advanced techniques.

2. Ability to modify or adapt established methods, procedures or techniques to resolve difficult or complex problems.

3. Knowledge of the application of laboratory regulatory requirements.

4. Ability to provide or coordinate staff development and training.

(c) Assignments. MTs at this level generally have a higher level of professional oversight responsibilities and may have responsibility for a specific large-scale automated analytical instrument system; a specific area of laboratory functions, such as employee competency records, supply functions, laboratory safety, quality control review, new method development or employee or student training; or provide professional and technical advice to other technicians and technologists on alternate tours of
duty. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time.

1. **Team Leader.** MTs at this level have professional oversight responsibilities of a laboratory team. The team leader facilitates team or unit processes by working in collaboration with team members to ensure that tasks, priorities and goals are coordinated with laboratory management. The incumbent also provides technical advice to staff and other health care members and oversees work assignments and work flow. The team leader is responsible for ensuring that staff follow all policies and procedures and is a subject matter authority when there are questions of a technical or professional nature. The incumbent may be responsible for reporting personnel absences and may be responsible for staff schedules and other assignments delegated by the departmental supervisors.

2. **Advanced Staff Technologist.** MTs at this level perform more complex laboratory functions. Duties may include specific targeted laboratory responsibilities or projects such as laboratory safety officer, analyzer specialist, or quality control file maintenance. Duties may include, but are not limited to, any of the following: serves as primary operator on new test systems, assumes responsibility to maintain operations including preventive maintenance and training of technicians and technologists on the operation of the new test systems; assists in writing procedures and other documents as directed; oversight of the clinical training experiences of technical and professional level technologist or technician training programs in order to fulfill educational and professional requirements (where training programs exist); provides technical training and guidance to students, residents, staff and other employees; recommends updated guidelines and policies in compliance with regulatory requirements for non-routine or complex assignments; coordinates the laboratory competency program; and coordinates the Clinical Laboratory Improvement Act (CLIA) laboratory proficiency/survey program.

(4) **GS-11**

(a) **Experience.** Must have 1 year of creditable experience equivalent to the full performance level (GS-9), which is directly related to the position to be filled.

OR,

(b) **Education.** Must have 3 full years of progressively higher-level graduate education or a Ph.D. or equivalent doctoral degree in medical technology or a directly related field.

(c) **Assignments.** These assignments require specialized training and experience and have wide latitude for exercising independent judgment. Employees must have advanced knowledge of specialized and complex subject matter extending beyond the duties of test performance. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time.

1. **Technical Specialist.** The incumbent serves as an expert providing authoritative advice and consultation for more markedly difficult, complex, unique and/or emerging tests requiring special knowledge. Examples include, but are not limited to, molecular/deoxyribonucleic acid (DNA)/genetic testing, bone marrow examination, and flow cytometry. Advises all organizational levels on various
aspects of specialized testing, including appropriateness that takes into consideration clinical context. Advises on alternate testing to overcome ambiguities in the clinical diagnoses. Analyzes emerging trends and technology and adopts appropriate methods and testing. Applies policies, precedents, regulatory, licensing and accrediting requirements to establish, monitor and maintain the specialized testing. The technical specialist often works independently and is given freedom of action under the general guidance of a pathologist or other laboratory practitioner. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

a. Advanced knowledge and understanding of concepts, principles, methodology of medical laboratory technology, regulatory and accrediting agency requirements, medicolegal requirements and pertinent statistics sufficient to perform complex diagnostic tests.

b. Skill to apply new scientific/technical developments and theories to laboratory testing.

c. Advanced knowledge of instructional techniques to instruct newly hired technologists and clinical pathology residents in proper performance of tests and applications of the laboratory procedures.

d. Ability to develop procedures for new tests and modify existing procedures and methods in order to resolve problems relative to complex and difficult situations.

e. Advanced knowledge of a particular discipline or function with wide latitude for exercising sound independent judgment.

2. Laboratory Education Coordinator. Incumbents provide authoritative representation and interaction with cooperating or affiliated universities or colleges, resource organizations and state and federal officials in order to coordinate program goals, objectives and policies. They spend a significant amount of time administering clinical training programs for medical technology students, facility staff and others assigned for medical technology training. They design, teach and evaluate the training programs. These assignments occur at active affiliated VHA facilities or for VHA NAACLS Clinical Laboratory Programs. Individuals establish, negotiate and maintain affiliation agreements and schedule students for appropriate rotation. They also may serve on curriculum or admission committees of the affiliated colleges. They may coordinate formal in-service and continuing education programs for the laboratory staff, students and residents. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

a. Knowledge of medical technology concepts, principles and practices sufficient to plan and direct an educational program for students and continuing education programs for the staff.

b. Skill in using educational design, development, evaluation techniques and teaching methods.

c. Knowledge of the education program’s affiliation agreements and accreditation requirements.

d. Advanced knowledge of a particular discipline or function, such as blood banking or molecular diagnostics, to be recognized as a technical authority for instruction.
e. Knowledge of training methods and teaching skills in order to conduct continuing education sessions for staff development. The training sessions may be technical in nature or may focus on teaching techniques so that staff can improve their technical skills.

3. **Quality Management Technologist.** Provides authoritative consultative services to management at all levels of the organization as it applies to quality management in a clinical laboratory setting. Maintains a laboratory quality management program and ensures monitoring of components and customer feedback. Identifies, defines and resolves issues associated with complex aspects of the collected data. Monitors laboratory quality control systems and performance indicators. Interacts with management officials and vendors providing inter-laboratory quality assurance and laboratory proficiency testing. Develops validation plans for equipment and methodology evaluations and evaluates statistical data collected. Responsible for laboratory continuous readiness for regulating agency inspections and accreditation from agencies such as the Joint Commission (JC) and the College of American Pathologists (CAP). In addition to the experience or education above, the candidate must demonstrate the following KSAs:

   a. Advanced knowledge of the concepts, principles and practices of medical technology sufficient to perform the full range of duties involved in planning, coordinating and evaluating laboratory services.

   b. Knowledge of quality management standards.

   c. Knowledge of accrediting agencies and regulatory requirements pertaining to laboratory operations.

   d. Comprehensive knowledge of statistical evaluation and analysis.

   e. Knowledge of laboratory operations and relationships to the organization.

   f. Comprehensive knowledge of laboratory quality control/assurance policies, procedures and principles, as well as safety practices and regulations.

4. **Lead Medical Technologist.** Facilitates team or unit processes by working in collaboration with team members to ensure that tasks, priorities, goals and achievements are coordinated with management. Responsible for all aspects of operation in their area of specialty including preparation and maintenance of records and reports, analysis of testing methodologies, training, instrumentation and compliance. Acts as a liaison to other departments of the medical center for the appropriate laboratory specialty. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

   a. Knowledge of medical technology applicable to a wide range of duties to solve complex problems involving diverse aspects of clinical laboratory practice.

   b. Knowledge of regulatory, licensing and accrediting agency requirements and statutes governing clinical laboratory operations in order to plan, implement or monitor laboratory programs and services.

   c. Ability to manage and coordinate daily work activities and assignments in a section.

   d. Skill to maintain, troubleshoot and repair laboratory instrumentation.
e. Ability to provide technical oversight in order to manage personnel and work assignments in a manner that assures completion of the laboratory workload.

5. **Supervisory Technologist.** The incumbent has full supervisory responsibility for smaller, less complex laboratories or laboratories having no GS-11 positions subordinate to the supervisor. Employees in this assignment perform the full range of supervisory duties for one or more sections of the laboratory, including responsibility for assignment of work performed; performance evaluations; recommendations for appointment, awards, advancement and disciplinary actions; identification of continuing education and training needs. The individual ensures compliance with accrediting agency and regulatory requirements; establishes and monitors the quality of the pre-analytical processes as part of the overall laboratory quality management program, and initiates corrective action. This individual will develop policies and procedures, manage document control, develop performance standards, position descriptions and functional statements. Responsible for professional and administrative management of an assigned area, to include budget execution, orientation and competency assessment of assigned staff. The supervisor will maintain effective interdepartmental relations with other services in order to accomplish medical center goals. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

a. Knowledge of Federal and state laws, regulations and accrediting/regulatory requirements in order to develop plans and procedures for the laboratory.

b. Knowledge of laboratory quality management procedures and principles sufficient to establish and monitor a laboratory quality management program and/or education and training of laboratory staff.

c. Demonstrated leadership and managerial skills including skill in interpersonal relations and conflict resolution in order to deal with employees, team leaders and managers.

d. Ability to perform the full range of supervisory duties which includes responsibility for assignment of work, performance evaluations, selection of staff, recommendation of awards, advancements and disciplinary actions.

e. Ability to plan, organize, set short and/or long term goals and conduct studies on technical and administrative problems, including personnel shortages, organizational structure, new technology, etc.

f. Knowledge of concepts, principles and methods of clinical laboratory technology and operations.

(5) **GS-12**

(a) **Experience.** Must have 1 year of creditable experience equivalent to the next lower grade level, which is directly related to the position to be filled.

(b) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time. Candidates at this grade level are in one of the following assignments:
1. **Supervisory Technologist.** The incumbent has full supervisory responsibility in a complexity index group 1 laboratory or in a complexity index group 2 laboratory that performs at least 1 million Standard Billable Tests annually (reported to the Laboratory Management Index Program). The incumbent supervises a large staff of nonsupervisory personnel including at least one GS-11 subordinate. Recommends appointment, plans and assigns work, provides advice and counsel and evaluates work of subordinates. The supervisor is responsible for monitoring test analyses and specimen examinations to ensure acceptable levels of performance and initiate corrective action. Verifies orientation, training and competency assessment of assigned staff. Develops and updates technical policies and procedure manuals. Ensures all staff and affiliate staff are in compliance with accrediting and regulating bodies. Adjusts staffing levels or work procedures to accommodate resource allocation decisions made at the executive level. This individual manages document control, develops performance standards, position descriptions and functional statements, and is responsible for professional and administrative management of an assigned area to include budget execution. The supervisor will maintain effective interdepartmental relations with other services to accomplish medical center goals. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

   a. Knowledge of Federal and state laws and regulations, laboratory accrediting and regulatory requirements in order to develop new policies and guidelines, formulate plans and the ability to judge effectiveness of the operation.

   b. Knowledge of laboratory quality management procedures and principles sufficient to establish and monitor a laboratory quality management program and/or education and training of laboratory staff.

   c. Knowledge of, and ability to, provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluations; selection of staff; recommendation of awards, advancements, and disciplinary actions.

   d. Ability to analyze organizational, technical and administrative problems to develop and implement solutions that result in efficient overall laboratory operation.

   e. Skill in interpersonal relations and conflict resolution to deal with employees, team leaders and managers.

   f. Ability to manage fiscal matters, forecast resource and equipment needs and administer the allocated budget.

   g. Ability to set short and/or long term goals for the section and conduct studies on technical and administrative problems, including personnel shortages, organizational structure, new technology, etc.

2. **Ancillary Testing Coordinator (ATC).** The incumbent develops and recommends policies and procedures for the procurement and service requirements for ancillary testing (testing outside the physical confines of the main laboratory as mandated by VHA) including ensuring CLIA licenses are maintained in off-site facilities such as Community Based Outpatient Clinics (CBOC). The ATC consults with program managers or equivalent of clinical services to identify ancillary testing needs and to analyze emerging trends and technology and adopts appropriate methods, serving as a recognized technical expert
to provide authoritative advice, training, troubleshooting, quality assessment and ancillary testing program consultation. The ATC develops technical bulletins, procedures, training materials and other program materials, ensuring accreditation and compliance with all regulatory agencies for patient testing, result reporting and proficiency testing including reports, monitors and continuous performance improvement initiatives. Evaluates ancillary testing activities to assess ongoing day-to-day compliance with established protocols and guidelines identifying, defining and resolving issues associated with complex aspects of the data and problems associated with unique aspects of the ancillary testing management program. The ATC has knowledge of accrediting agencies and regulatory requirements, performs and evaluates instruments, performs validation studies, recommends policy/protocol changes to correct deficiencies and improve the program, develops and implements corrective action when deficiencies are identified and coordinates inventory management, supply acquisition and contracts. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

a. Knowledge of medical technology concepts, principles, practices and methodologies sufficient to perform the full range of maintenance of technical, quality assurance and safety accreditation/testing programs.

b. Skill in applying new scientific/technological developments and theories to laboratory testing and a grasp of complex laboratory testing issues.

c. Knowledge of mathematics and statistics as related to quality control, quality assurance, proficiency testing, inspection and accreditation, and continuous quality improvement.

d. Knowledge of the types of surveillance, ability to collect data necessary to monitor variables that affect quality of services, and skill in evaluating, interpreting and teaching others to use quality control procedures and implementing corrective actions.

e. Knowledge of Federal, VHA, and state laws, regulations, reference standards, medicolegal responsibilities, and certifying and accrediting agency requirements in order to carry out the work in each ancillary testing site.

f. Knowledge of laboratory information technology systems and inter-connectivity.

3. Laboratory Information Manager. The incumbent develops and recommends new policies and procedures regarding the installation and use of the laboratory information system (LIS) in conjunction with the overall hospital information system (HIS). Provides authoritative advice and consultation on the information system as they apply to the clinical laboratory. Advises all organizational levels on functions and capabilities of the LIS. Implements and maintains coding and mapping for laboratory test ordering, reporting, billing and workload recording taking into account compliance principles. Analyzes emerging trends, software and technology and adopts appropriate methods for local programs to meet agency goals. Serves as the local expert for national software developers for the testing and validation of software packages. Responsible for compliance with regulatory agency requirements as related to information systems and performs audits as needed. Provides consultation and training of personnel on computer functions, including ordering options, and responsible for the maintenance of computer security keys. In addition to the experience or education above, the candidate must demonstrate the following KSAs:
a. Knowledge of concepts, principles and methodology of clinical laboratory technology in relation to laboratory information systems.

b. Knowledge and understanding of laboratory operations and their relationship to the organization sufficient to provide advisory, inspection, training and problem-solving services on specific projects, programs or functions.

c. Ability to adapt, implement, and integrate the use of software to specific laboratory applications and processes, including the use of office automation software.

d. Knowledge of laboratory computer system analysis, program techniques, computer language, and program design sufficient to implement various laboratory associated packages and sustain operation of the laboratory system.

e. Ability to independently plan, organize, set priorities, work as a team member and effectively complete assignments.

f. Knowledge of compliance and regulatory requirements for laboratory functions.

4. Laboratory Manager. The incumbent works in a smaller, less complex laboratory and is responsible for managing and supervising all phases of laboratory service operations. Provides guidance and serves as an authority and subject matter expert on laboratory medicine, including research, agency policies, new techniques and procedures. Develops guidelines, assesses laboratory effectiveness, establishes and maintains quality assurance and performance improvement programs. Consults with local and network officials. Develops and manages program budget and resource utilization, inventory, acquisition and contracting processes. Assists and participates in educational programs affiliated with institutions providing training for individuals in laboratory or other related medical fields of study. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

a. Ability to balance the administrative and clinical functions in order to coordinate and manage programs and resources.

b. Knowledge and skill in management/administration, which includes strategic and tactical program planning, coordination, interpretation, supervision, consultation, negotiation, problem solving, formulation of policy and guidelines and monitoring of laboratory programs.

c. Ability to effectively communicate, both orally and in writing, on technical information with a wide variety of individuals including senior VHA managers in the medical center, Veterans Integrated Service Network (VISN) level staff and VHA Central Office staff.

d. Skill in applying analytical and evaluative methods and techniques to the measurement and improvement of program effectiveness and/or organizational productivity.

e. Skill to develop new or modified work methods, organizational structures, records and files, management processes, staffing patterns, etc.
f. Knowledge of regulatory, licensing, and accrediting agency requirements, and statutes governing clinical laboratory operations used in planning, implementing and monitoring laboratory programs and services.

g. Skill in administrative management (e.g., budgeting, contracting, procurement and property management) in accordance with VHA regulations.

5. **Regional Technical Specialist.** The incumbent serves as a recognized expert and provides authoritative consultative services to management at all levels of the organization advising on various aspects of the specialized testing, coordinating VISN or regional specialized services such as, but not limited to, quality management or information management. The Regional Technical Specialist develops new policies and procedures regarding LIS/HIS, conducts studies and recommends changes to correct deficiencies and improve the specialty area and creates and applies re-engineering and continuous performance improvement initiatives. The incumbent analyzes emerging trends, software and technology and adopts appropriate methods. Identifies, defines and resolves issues associated with complex aspects of data or unique/controversial aspects of the testing where no direct precedent exists. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

a. Advanced knowledge and understanding of regulatory and accrediting agency requirements, concepts, principles and practices of medical technology sufficient to perform the full range of duties involved in planning, coordinating and evaluating laboratory services.

b. Ability to apply laws, policies, precedents, regulatory, licensing and accrediting requirements in order to establish, monitor and maintain the specialized testing.

c. Advanced knowledge and understanding of medicolegal and compliance requirements sufficient to provide direction for complex diagnostic testing.

d. Knowledge of laboratory information systems and programming techniques in order to develop, adapt and maintain computer systems for accomplishing diagnostic laboratory work and quality assurance.

e. Knowledge of the types of surveillance needed to monitor variables that affect quality of services including quality control, quality management, proficiency testing, inspection and accreditation and continuous quality improvement. Skill in evaluating, interpreting and teaching others to use quality control procedures and implement corrective actions.

f. Ability to develop new test procedures and modify existing procedures and methods in order to resolve problems relative to complex and difficult situations.

(6) **GS-13**

(a) **Experience.** Must have 1 year of creditable experience equivalent to the next lower grade level, which is directly related to the position to be filled.
(b) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time. Candidates at this grade level are in one of the following assignments.

1. **Regional Commissioner Technologist.** The incumbent serves as an authority to multiple laboratories in a region to ensure compliance with inspection and accreditation requirements and regulations. Provides direction and guidance to resolve technical problems and provides interpretation of existing regulations. Coordinates with VHA Central Office to assure that each testing site is in compliance with inspection and accreditation requirements and regulations, and assists laboratories in the correction of any cited inspection deficiencies. The Regional Commissioner Technologist is responsible for coordinating the CLIA license applications for all VHA laboratories in the region. Serves as a consultant to national program officials and provides professional, technical and training support. Requires verbal, written and electronic communication with accrediting and regulatory bodies. Works under the direction and guidance of the VHA Office of Enforcement in VHA Central Office. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

   a. Advanced knowledge of laboratory regulations that pertain to quality control, quality management, and proficiency testing in order to assess and assist with laboratory compliance of quality programs in each facility assigned to that region.

   b. Ability to differentiate and interpret accrediting and regulatory requirements in order to provide guidance to laboratories on regulatory requirements and assess compliance for each laboratory assigned to that region.

   c. Knowledge of laboratory operations and the laboratory’s role within the total organization.

   d. Ability to create and deliver educational presentations to a variety of individuals on matters that pertain to inspection and accreditation rules, regulations and standards of all laboratory accrediting agencies.

2. **Laboratory Manager.** The incumbent shares with the chief of laboratory service/medical director full responsibility for managing and supervising all phases of laboratory service operations in a complexity index group 1 laboratory or in a complexity index group 2 laboratory that performs at least 1 million Standard Billable Tests annually (reported to the Laboratory Management Index Program). The incumbent supervises a large staff of nonsupervisory and supervisory personnel including at least one GS-12 subordinate. Provides guidance and serves as an authority and subject matter expert on laboratory medicine, including research, agency policies, new techniques and procedures. Develops guidelines, assesses laboratory effectiveness, establishes and maintains quality assurance and quality management programs. Consults with or serves as a consultant for local, network and national programs and/or officials. Manages regulatory affairs and compliance. Develops and manages program budget and resource utilization, inventory, acquisition and contracting processes. Assists and participates in educational programs affiliated with institutions providing training for individuals in laboratory or other related medical fields of study. In addition to the experience or education above, the candidate must demonstrate the following KSAs:
a. Advanced knowledge of concepts, principles and methodologies of a major clinical laboratory program and operations in order to assess program effectiveness and provide authoritative guidance for operations, personnel, and management.

b. Ability to work collaboratively with other disciplines, upper management, VISN level staff and/or VHA Central Office.

c. Ability to plan and execute short- and long-range programs and/or goals through project management and tactical/strategic planning.

d. Skill in administrative management (e.g., budgeting, contracting, procurement and property management) in accordance with VHA regulations.

e. Ability to provide advisory, planning and surveillance services to clinicians, laboratory directors and supervisors on specific functions, programs or problems that are particularly difficult, widespread or persistent.

f. Ability to solve complex problems involving unique or controversial aspects of medical technology or laboratory management, new or unconventional methods, program changes or conflicts between scientific/technological requirements, regulatory or program requirements (e.g., cost effectiveness).

g. Knowledge of, and ability to, provide the full range of supervisory duties which includes responsibility for assignment of work, performance evaluations, selection of staff, and recommendation of awards, advancements, and disciplinary actions.

3. **Regional Manager.** The incumbent serves as a manager or administrator for Pathology and Laboratory Medicine Service at the VISN or regional level. Acts as a liaison to other sites of the VISN and medical center for the appropriate laboratory areas. Coordinates VISN Pathology and Laboratory Medicine performance measures, data collection, performance improvement activities, initiatives and projects, as well as instrumentation acquisitions and other VISN contracts. Coordinates discussion between VISN laboratories to ensure compliance with rules and regulations of assorted regulatory agencies such as CAP, JC, American Association of Blood Banks (AABB), and Occupational Safety and Health Administration (OSHA) when dealing with new and evolving technology and regulations. Researches methods, performs statistical analysis, monitors quality assurance, prepares and presents reports, and maintains administrative information. In addition to the experience or education above, the candidate must demonstrate the following KSAs:

a. Advanced knowledge of concepts, principles and methodology of medical technology programs and operations sufficient to assess program effectiveness in order to provide authoritative guidance for operations, personnel, and management.

b. Knowledge of accrediting and regulatory agency requirements regarding consolidated oversight of clinical laboratories, and ability to delineate and interpret accreditation standards.

c. Knowledge of laboratory operations and relationships to the organization.
d. Ability to work collaboratively with other disciplines, upper management, VISN level staff and/or VHA Central Office.

e. Ability to plan and execute short and long range programs.

f. Skill in administrative management (e.g., budgeting, contracting, procurement, and property management).

g. Ability to provide advisory, planning, and surveillance services to clinicians, laboratory directors and supervisors on specific functions, programs or problems that are particularly difficult, widespread or persistent.

h. Ability to solve complex problems involving unique or controversial aspects of medical technology or laboratory management, new or unconventional methods, program changes, or conflicts between scientific/technological requirements, regulatory or program requirements (e.g., cost effectiveness).

4. DEVIATIONS

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for medical technologists in VHA whose composite record of accomplishments, performance and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the certification or educational requirements as a medical technologist be waived.

c. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. §§ 7402, 7403.}
APPENDIX G25. DIAGNOSTIC RADIOLOGIC TECHNOLOGIST QUALIFICATION STANDARD
GS-0647

Veterans Health Administration

1. COVERAGE. The following are the requirements for appointment as a Diagnostic Radiologic [Technician or] Technologist (DRT) in the Veterans Health Administration (VHA). These requirements apply to all VHA DRTs in the GS-0647 series.

2. BASIC REQUIREMENTS.

a. Citizenship. Be a citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with VA Handbook 5005, Part II, chapter 3, section A, paragraph 3g.)

b. Certification. All applicants must be certified in general radiologic technology by the American Registry of Radiologic Technology, Radiography (ARRT) (R). Advanced ARRT certification is required for assignments that include computed tomography (CT), magnetic resonance imaging (MRI), [or Mammography (M) duties performed independently, as applicable]. Advanced certification indicates that the incumbent [can operate independently] and has demonstrated specific clinical competency in the appropriate specialty and taken and passed the designated examination. [In modalities that require advanced certification, to support their continued development, technologists who do not possess an advanced certification may be provided on the job training with oversight from a certified radiologic technologist.]

c. Education. Completion of a full-time training course of at least 24 months in duration (or the equivalent) in a post-high school diagnostic radiologic technology program, evidenced by a certificate or an associate degree, accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT) or from [other accrediting agencies as recognized by the Department of Education (DOE).]

[NOTE: Assignment to the clinical program director requires meeting JRCERT minimum educational standards as noted in the assignment description.]

(1) Credentialing Standards. Public Law 97-35, the Consumer-Patient Radiation Health and Safety Act of 1981, requires that persons who administer radiologic procedures meet the credentialing standards in 42 CFR Part 75, Standards for the Accreditation of Educational Programs and the Credentialing of Radiographic Personnel. Essentially, they must have successfully completed an educational program that meets or exceeds the standards described in that regulation and is accredited by an organization recognized by the U.S. Department of Education and be certified as radiographers in their field.

(2) Exception for Non-Certified, Entry Level Candidates. Non-certified DRTs who otherwise meet the eligibility requirements for ARRT (R) certification may be given a
temporary appointment as a graduate DRT under the authority of 38 U.S.C. § 7405(c)(2)(B). The appointing official may waive the requirement of certification for a period not to exceed two years for a DRT that provides care under the supervision of a certified DRT at or above the full performance level. This exception only applies at the GS-5 entry level technician. For grade levels above the entry level, the candidate must be certified. Temporary appointments of non-certified DRTs may not be extended beyond two years or converted to a new temporary appointment.

(3) **Loss of Credential.** An employee in this occupation who fails to obtain certification within two years, or who fails to maintain the required certification must be removed from the occupation, which may also result in termination of employment.

d. **Grandfathering Provision.** All persons employed in VHA as a DRT on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and certification that are part of the basic requirements of the DRT occupation. For employees who do not meet all of the basic requirements in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) DRTs that require a certification, may be reassigned, promoted up to and including the full performance (journeyman) level, or changed to lower grade within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

(2) DRTs that require a certification only at higher grade levels must meet the certification requirement before they can be promoted to those higher grade levels.

(3) DRTs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(4) DRTs initially grandfathered into this occupation, who subsequently obtain additional education and/or certification that meet all of the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

(5) Employees who are retained as a DRT under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of reentry as a DRT.

**NOTE:** Each uncertified VHA DRT who was permanently employed on June 21, 1986, and whose competence in the safe administration of ionizing radiation was affirmed, in writing, by a VA licensed physician not later than January 1, 1987, is
considered fully qualified. These employees may be promoted, changed to lower grade, or reassigned within the GS-0647 occupational series. Any employee initially retained in this manner who leaves this job series loses protected status and must meet the full requirements in effect at the time of reentry.

e. **Physical Requirements.** See VA Directive and Handbook 5019.

f. **English Language Proficiency.** DRTs must be proficient in spoken and written English as required by 38 U.S.C. 7402(d), and 7407(d).

3. **GRADE REQUIREMENTS.**

a. **Creditable Experience**

(1) **Knowledge of Current Radiologic Technology Practice.** To be creditable, experience must have demonstrated possession of the knowledge, skills, abilities, and other characteristics (also referred to as clinical competencies) associated with current radiologic technology practice. This may have been evidenced by the equivalent of one year of active practice, which is paid or non-paid employment as a DRT as defined by ARRT.

(2) **Quality of Experience.** Experience is only creditable if it was earned after completion of the basic certification requirements identified in paragraph 2b above. Experience as a graduate DRT is creditable provided the candidate functioned as a DRT and subsequently passed the certification examination.

(3) **Part-Time Experience.** Part-time experience as a DRT is creditable according to its relationship to the full-time workweek. For example, a DRT would receive one week of full-time credit for each two weeks of half-time work.

b. **Specialized Assignments.** Specialized areas of radiologic technology include general diagnostic radiologic technology (R), bone densitometry (BD), mammography (M), diagnostic ultrasound (S), computed tomography (CT), magnetic resonance imaging (MR), [interventional radiologic technology (IR)], quality management (QM), [picture archival communication system (PACS) technologist, MRI safety officer (MRSO), imaging administrator, clinical program director, and clinical instructor.]

(1) **General Radiologic Technology (R).** DRTs perform procedures and examinations in hospitals or clinics under the direction of radiologists and other medical officers. The objective of the examinations and procedures is to produce radiographic studies that are used in medical diagnosis and interpreted by medical officers to locate injuries, foreign bodies, pathological conditions, or lesions within the body. They prepare and administer contrast media and medications in accordance with State and Federal regulations. All DRTs must be knowledgeable in computerized [and digital radiography (CR/DR),] and picture archiving and communications systems (PACS).
(2) **Bone Densitometry (BD).** This non-invasive test measures bone mineral content to diagnose a systemic skeletal disease (osteoporosis) characterized by low bone mass and microarchitectural distortion of bone tissue, with a consequent increase in bone fragility and susceptibility to fracture.

(3) **Mammography (M).** The complex nature of breast disease involves multiple imaging modalities. This specialty involves the specific knowledge and abilities to perform complex imaging of the breast. Mammographers must be able to employ specialized mammographic image techniques such as magnification views and implant views of the breast. The mammographer is required to be completely familiar with, and adhere to, all U.S. Food and Drug Administration (FDA) guidelines regulating the practice of mammography, radiation safety, and quality assurance requirements. Mammographers are subject to the Mammography Quality Standards Act of 1992 (MQSA) and regulated by the FDA. [DRT assignments that include performance of independent duties in this subspecialty require advanced ARRT (M) certification.]

(4) **Ultrasound ([Diagnostic/Vascular] Sonography) (S), ([VS]).** Positions should be assigned to the DRT, GS-0647 series, when both ultrasound and other modalities which require the delivery of ionizing radiation are performed. Positions in which ultrasound duties are performed exclusively (no other modalities are performed), should be assigned to the medical instrument technician, GS-0649 series, since ultrasound duties solely do not require the delivery of ionizing radiation. Diagnostic ultrasound uses high frequency sound waves and other diagnostic techniques for medical purposes. The practitioner must be competent in the production, use, recognition, and analysis of ultrasound images and patterns used for patient diagnosis and treatment. The sonographer is regarded as the expert source of all ultrasound imaging, and the interpreting radiologist relies heavily on the skills, knowledge, and abilities of the sonographers in providing a final interpretation. Within this specialization, there is a diverse range of ultrasound imaging sub-specialties. These include: 1) diagnostic medical sonography – abdominal, neurologic, obstetrical/gynecologic, [musculoskeletal (MSK), a breast; and 2) vascular sonography-arterial and venous doppler, spectral analysis, and calculating ankle brachial index (ABI)].

(5) **Computed Tomography (CT).** This specialty modality requires specific knowledge of cross sectional human anatomy and its application in spiral, and/or, multi-slice computer tomography, inclusive of 3-D reconstruction scans, including drainages, biopsies, and peripheral vascular examinations. The technologist requires specific knowledge and training in the location, appearance, and function of the various major and minor systems susceptible to radiological illumination; to interpret the examination request accurately; to understand the functioning and inter-relationship of the various organs; to use the methods and techniques which will identify organs appearing on the digital display monitor, or on film, and the various stages of the examination to judge the acceptability of the image and/or scan for diagnostic use and to emphasize the
aspects of interest to the physician. [DRT assignments that include performance of independent
duties in this subspecialty require advanced ARRT certification.]

(6) **Magnetic Resonance Imaging (MR).** This specialty modality requires additional knowledge of
superconducting magnets, the physics of superconducting magnets, and how they relate to the
human anatomy in medical imaging. The technologist must be educated in the safety factors
governing a magnetic environment that patients, visitors, and equipment enter. The practitioner
must have specialized knowledge of cross sectional anatomy and how it relates to the soft tissues
and vessels of the human body. The technologist must also have specialized knowledge in the
radio-frequency surface coils required for each specific anatomical area to be imaged. [This
assignment may also perform basic magnetic resonance safety program duties. Technologists
must be knowledgeable in contrast media, power injectors, and PACS. DRT assignments that
include performance of independent duties in this subspecialty require advanced ARRT (MR)
certification.]

(7) **Interventional Radiography (IR).** Technologists working in this special assignment may function
as vascular interventional (VI), cardiac interventional (CI) and/or cardiovascular-interventional (CV)
technologists which use specialized equipment to perform diagnostic angiographic procedures and
complex vascular and nonvascular interventional and therapeutic procedures. This specialty
requires additional knowledge of vascular systems and major vessel anatomy. The technologist
must be knowledgeable in the specialized equipment employed for digital subtraction systems and
interventional procedures. The technologist administers contrast media under the supervision of
the staff radiologist and confers with the radiologist to establish requirements regarding contrast
agents, vital signs, medications, and physiologic monitoring to perform procedures. IR technologist
must be knowledgeable in digital imaging and PACS.]

(8) **Quality Management Technologist (QM).** [The technologist] performs daily inspection of
radiographic units to ensure proper mechanical functionality. [ ] [The technologist] ensures daily
functionality of CR readers. [The technologist] provides in-service training to technologists and
other personnel involved in the operation and maintenance, CR readers, DR panels and other
PACS type of operations maintained within the department. [The technologist] coordinates [ ]
scheduling of preventative maintenance for modalities either through biomedical engineering or
local contractor service. [The technologist] works with physicists to ensure compliance with
radiation safety program and for acceptance testing of all new installations of equipment. [The
technologist] maintains accurate records, as required by management, for quality assurance
analysis, quality control, performance improvement, and other related purposes.

(9) **Clinical Instructor.** The incumbent performs technical work in support of diagnostic radiology
and is responsible for the oversight of an affiliated DRT educational program. Duties may
include assigning daily workplans, coordinating evaluations, conducting
imaging labs, assessing performance and assigning grades. The instructor has knowledge of the affiliation requirements and oversees the VA standards to ensure compliance.

10. **Clinical Program Director.** The incumbent functions as an educational program director for a hospital based JRCERT accredited radiological technology training program and oversees the development of an assessment plan that meets programmatic accreditation standards. The incumbent maintains educational records and prepares for site visits from JRCERT. The incumbent has direct responsibility for program design, policy development, personnel administration, budget, marketing, and public relations.

11. **Picture Archival Communication System (PACS) Technologist.** Technologists working in this special assignment use their knowledge of radiology workflow and processes in conjunction with a specialized technical skillset to support and troubleshoot image processing, display, and storage systems. The PACS technologist also provides oversight and support of PACS display workstations, interfaces, secondary applications, speech recognition and other hardware that is critical to departmental efficiency and throughput.

12. **MR Safety Officer (MRSO).** This special assignment requires additional knowledge of superconducting magnets, the physics of superconducting magnets, and how they relate to the human anatomy and the magnetic effect on non-removable devices. Technologists operating as an MRSO work to support and maintain an MR safety program. Duties of the position include management of an effective screening program, development of MRI-safe scan protocols, and training of MR and Non-MR staff on MR safe practices.

13. **Imaging Program Administrator.** This special assignment oversees the direction of a consolidated imaging program that includes diagnostic radiology, nuclear medicine, and/or radiation oncology programs. Responsibilities include oversight of business operations and planning for complex medical centers with strong academic affiliations; annual budget information; monitoring expenditures; identifying variances; recommending corrective actions. The position is also essential to the development of strategic short- and long-term business, oversees patient safety, reporting of adverse occurrences, near misses; and implements, maintains, and enforces departmental programs, policies, procedures and protocols.

4. **GRADE DETERMINATIONS.** In addition to the basic requirements for appointment, the following criteria must be used when determining the appropriate grade assignment of candidates:

a. **[Diagnostic Radiologic Technician], GS-5 [ ]**

(1) **Experience or Education.** None beyond the basic requirements.
(2) **Assignment.** DRTs at this level operate and monitor commonly used equipment performing routine procedures under general supervision. The technician functions somewhat independently in carrying out these standardized procedures of limited complexity. Deviations from regular procedures, unanticipated problems, and unfamiliar situations are referred to the supervisor for a decision or help. Some assignments at this level also include developmental duties involving more complex procedures designed to prepare the technician for promotion to higher grades in a functional area. Such duties are performed under closer supervision.

b. **[Diagnostic Radiologic Technologist], GS-6 [ ]**

(1) **Experience or Education.** At least one year of experience equivalent to the next lower grade level or the successful completion of one full academic year of graduate education leading to a degree in radiography or other directly related field to diagnostic radiology/imaging.

(2) **Assignment.** Employees at this grade level serve as developmental DRTs, performing examinations which are routine and standardized in nature. They explain exams to patients in terms they can understand as well as potential hazards. They must also troubleshoot equipment used for diagnostic radiology and exercise extreme caution in the handling and safeguarding of all radiation producing equipment. DRTs must report major equipment malfunctions within a timely manner to service representatives and assist higher graded technologists in performing more complicated examinations.

(3) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of basic technique standards for minimum radiographic exposure.

(b) Knowledge of anatomy and positioning.

(c) Knowledge of all patient safety procedures.

(d) Knowledge of radiographic producing equipment.

(e) Ability to learn basic computer functions.

c. **[Diagnostic Radiologic Technologist], GS-7 [ ]**

(1) **Experience or Education.** At least one year of experience equivalent to the next lower grade level that demonstrates the clinical competencies described at that level; or the successful completion of one full academic year of graduate education leading to a degree in radiography or other directly related field to diagnostic radiology/imaging; or successful completion of an advanced registry program, with certification, in addition to a 4-year baccalaureate degree program in radiography or
other directly related field to diagnostic radiology/imaging. Education may relate to the duties of a specific position or to the occupation but must be appropriate for the position being filled.

(2) Assignment. DRTs at this level perform a full range of duties but receive guidance and directions regarding unfamiliar or unusual situations for more complex patient issues. Candidates at this grade level may be qualified to provide services in specialized areas of radiologic technology and/or general radiologic technology services.

(3) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of the technical adequacy of the digital image, including the ability to adjust the image quality in the digital system.

(b) Knowledge of different contrast material required for the requested study.

(c) Knowledge of radiation protection standards, minimum radiographic exposure techniques, appropriate beam limitation to anatomical area, and employing lead shielding when performing standard radiographic and fluoroscopic procedures.

(d) Knowledge of computed radiography, CR readers and Digital Imaging systems.

(e) Knowledge of PACS and basic computer skills.

d. [Diagnostic Radiologic Technologist], GS-8 [ ]

(1) Experience. At least one year of experience equivalent to the next lower grade level that demonstrates the clinical competencies described at that level.

(2) Assignments. Employees at this grade level serve as staff DRTs at the full performance level. Candidates at this grade level must be qualified to independently provide services in specialized areas of radiologic technology and/or general radiologic technology services with only occasional oversight or direction for highly complex issues.

(3) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate all of the following KSAs:

(a) Ability to check system for operation and assess acceptable performance based on established guidelines.

(b) Knowledge of calibration parameters and the ability to make adjustments as needed.
(c) Knowledge of patient’s clinical record, diagnosis, and laboratory results.

(d) Ability to monitor patient’s physiologic changes during the procedure and keep the radiologist informed.

(e) Skill in using tact, diplomacy, and courtesy in dealings with the customer base, patients, staff, family, visitors, and volunteers.

(f) Knowledge of anatomy and physiology, and cross-sectional anatomy, recognizing unusual images, and determining proper positioning to best demonstrate areas of interest.

e. [Diagnostic Radiologic Technologist], GS-9 [ ]

(1) **Experience.** At least one year of experience equivalent to the next lower grade level, directly related to the position being filled that demonstrates the clinical competencies described at that level.

(2) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. DRTs at this grade level may be appointed to one of the following assignments:

(a) **[Diagnostic Radiologic Technologist].** Employees at this level are fully functional as an advanced DRT and carry out their assigned tasks independently. DRTs at this level may have varying assignments including special and complex imaging procedures beyond the full performance level, clinical instruction, and basic QM type duties within the program. Regardless of the nature of the specific assignment, the work must be of sufficient scope and complexity to meet the knowledge, skills, and abilities to perform at this level. The candidate must demonstrate all of the following technical KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

   i. *Ability to balance the needs of patients and staff while still performing complex scans and procedures.

   ii. Knowledge of techniques for gathering relevant information from the medical record, significant others, and health care providers.

   iii. *Ability to assess factors that may contraindicate the procedure.

   iv. Knowledge of basic first aid and basic life support practices related to radiography.

   v. Knowledge of physical assessment, aseptic techniques, intravenous methods and techniques and universal precautions.
vi. Knowledge of pre-procedural, procedural, and post-procedural care of patients.

(b) **Lead Diagnostic Radiologic [ ] [Technologist].** Functions as a lead DRT for a group of DRTs at the full performance level and below, providing input on performance, resolving daily workplace issues, and maintaining efficient workflow. Provides a full range of general radiologic imaging exams, has a general knowledge of the different modalities within the diagnostic radiologic area, and is accountable to the next higher-level supervisor. The candidate must demonstrate all of the following technical KSAs:

i. Ability to provide technical oversight and assign personnel and tasks to be accomplished in a manner that assures completion of the workload utilizing the personnel to the greatest advantage thus providing the optimal level of patient care within the workday.

ii. Ability to plan, direct, and distribute work assignments to DRTs at lower grade levels.

iii. Skill in instructing and training DRTs on newly acquired equipment.

iv. Ability to plan and project staffing needs.

v. Skill to independently perform general and specialized diagnostic radiologic procedures in advanced levels of complex treatment situations.

(c) **Supervisory Diagnostic Radiologic Technologist.** The incumbent functions as a supervisor for a group of DRTs at the full performance level and below, which may include support staff. The incumbent advises employees of the performance requirements of their positions, informs them of their progress in meeting the requirements, and prepares formal evaluations of employee performance. The incumbent conducts corrective interviews with employees, referring disciplinary problems to higher levels of management; resolves informal complaints of employees; and deals with union representatives as appropriate. Supervisory DRTs plan and direct programs at medical centers and/or satellite outpatient clinics and have full supervisory responsibility. Assignments at this level include but are not limited to: assigning and evaluating the work of subordinate staff; resolving complex problems to ensure patient services are met; evaluating new products, equipment, and systems to make recommendations for improved operations; identifying educational or training needs; recommending final decisions on selections; evaluating performance and recommending disciplinary action when necessary. The incumbent has professional responsibility for planning and directing the DRTs activities and is responsible for extracting and analyzing data to provide reports in support of performance measures to senior management. The candidate must demonstrate all of the following technical KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):
i. *Ability to organize work, set priorities, delegate tasks and responsibilities.

ii. Skill in interpersonal relationships in dealing with employees, team leaders, and managers.

iii. *Skill in assessing qualifications and abilities of current and prospective employees.

iv. *Ability to consult with radiologist to develop standard and non-standard treatment/exam protocols.

v. Ability to independently perform general and specialized diagnostic radiologic procedures in advanced levels of complex treatment situations.

f. **[Diagnostic Radiologic Technologist], GS-10**

(1) **Experience.** At least one year of experience equivalent to the next lower grade level directly related to the position being filled that demonstrates the clinical competencies described at that level.

(2) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. DRTs at this grade level may be appointed to one of the following assignments:

(a) **[Magnetic Resonance Safety Officer (MRSO)]**. Employees who are qualified to work in the MRI modality (advanced certification) have expert specialization at this grade level. The MRSO operates with full responsibility for training, developing, and directing the MR safety program. Duties may include coordination of MR safety committee meetings, evaluation of hospital equipment to ensure MR safe operation, and oversight of employee and patient MR screening programs. Coordinates training of hospital staff and ensures maintenance of educational documentation. MRSO certification is highly desirable for this level of complexity. The candidate must demonstrate all of the following technical KSAs:

i. Knowledge of safety requirements for physical space pertaining to MR imaging area.

ii. Ability to establish and monitor access and safety requirements for the physical zones.

iii. Ability to develop and ensure that adequate written safety procedures, work instructions, emergency procedures, and operating instructions are issued and enforced.
iv. Knowledge of hazards posed by magnetic fields on implants, medical devices, hospital equipment and retained foreign bodies, and the development of measures taken against those hazards.

v. Ability to train medical, technical, nursing and all other relevant staff groups (including ancillary workers) in all procedural aspects related to MR safety.

(b) **Picture Archive Communication System (PACS) Technologist.** The PACS technologist provides support and troubleshoots system application issues and instructs users in the proper operation of digital image processing, storage, and display systems. The technologist performs VistA radiology, VistA imaging, and PACS support activities and general ADPAC duties including user access control. The technologist coordinates contingency plans during equipment downtimes and initiates repair requests with appropriate services or vendors. The technologist provides oversight of hardware relating to PACS display workstations, applications, speech recognition hardware, and other medical imaging hardware. The technologist provides training to radiologists, technologists, and other clients in the proper and efficient use of imaging hardware and software of the integrated PACS and VistA imaging systems. The technologist provides instruction and guidance in daily operations of the ancillary systems such as: speech recognition dictation, dose reporting systems, contrast reporting systems, etc. The incumbent may function as a DRT which may include complex modalities such as CT, MR, mammography, ultrasound, and/or IR. The candidate must demonstrate all of the following technical KSAs:

i. Ability to provide support and troubleshoot system application and hardware issues and instruct users in the proper operation of digital image processing, storage and display systems.

ii. Ability to perform VistA radiology, VistA imaging, and PACS support activities and general ADPAC duties including user access control.

iii. Ability to initiate repair requests with appropriate services or vendors.

iv. Knowledge of PACS system infrastructure and functionality.

v. Ability to provide training to all user levels in the efficient use of imaging hardware and software of the integrated PACS system.

vi. Knowledge of specific positioning, technique, and imaging procedures so he/she will be able to perform and reconcile image information correctly and efficiently during technical post processing and evaluation.
(c) **Advanced Diagnostic Radiologic Technologist.** Employees are trained to work in one or more
difficult and complex modalities performing procedures related to these modalities as well as
performing general diagnostic procedures. At this grade level, any assignment in a single modality
must demonstrate significant complexity. Such assignments are unique, perhaps with expert
specialization in complex areas of radiologic technology, Mammography Quality Standards Act
(MQSA) regulations, and intermediate QM type duties within the program. The candidate must
demonstrate all of the following technical KSAs:

  i. Knowledge of radiation protection standards, devices and techniques, including concepts of
     accumulated dosage, dose monitoring, and genetic changes.

  ii. Ability to utilize advanced imaging software that supports complex imaging programs and recognize
      changes in equipment and procedures that might result in increased exposures, and ability to
      recommend methods to prevent such exposures.

  iii. Knowledge of basic physics including concepts of energy, electric power, magnetic fields, and
       properties of x-ray, to understand the operation of the equipment.

  iv. Knowledge and skill in positioning of patients for a wide variety of highly complex imaging (CT, MRI,
      IR, ultrasound, mammography) studies.

(d) **[Lead] Diagnostic Radiologic [ ] [Technologist].** [The incumbent] functions as a lead DRT for a
    group of DRTs [at the GS-9 level and below]. [The incumbent] provides a full range of general
    radiologic imaging exams, has a broad knowledge of the different modalities within the diagnostic
    radiologic area, and is accountable to the next higher-level supervisor. The candidate must
demonstrate all of the following technical KSAs and demonstrate the potential to acquire the
assignment-specific KSAs designated by an asterisk (*):

  i. Ability to provide feedback to supervisor on technical aspects of work.

  ii. *Ability to resolve informal employee complaints.

  iii. *Ability to monitor and report on the status and progress of work and make adjustments to
       accomplish the workload in accordance with established procedures.

  iv. Ability to perform general and specialized diagnostic radiologic procedures in advanced levels of
      complex treatment situations.

(e) **Supervisory Diagnostic Radiologic Technologist.** [The technologist] functions as a supervisor
    for a group of DRTs at the GS-9 level and below which may include support staff. [The
    technologist] evaluates new products and equipment, making

II-G25-13
recommendations to supervisor concerning upgrades/new purchases that would improve operations.  [The technologist] informs higher level management of anticipated staffing variances and informally recommends promotions, reassignments, or other personnel changes such as retention or release of probationary employees, and recognition of superior performance in the diagnostic radiologic area.  [The technologist] directs the development and implementation of services and treatment to patients through the supervision, mentoring, and oversight of assigned clinical staff.  Experience must demonstrate practice skills in a specialty area or in administration demonstrating progressively more professional competency and judgment. The candidate must demonstrate all of the following technical KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

i. *Ability to analyze organizational, technical, and administrative problems and to develop and implement solutions that result in efficient section operation.

ii. Ability to evaluate quality management procedures and processes.

iii. *Ability to analyze and use data effectively to manage workload, quality, performance, and productivity.

iv. *Skill in developing new policies and guidelines as needed.

v. Skill in problem solving and conflict resolution.

g. [Diagnostic Radiologic Technologist], GS-11 [ ]

(1) Experience. At least one year of experience equivalent to the next lower grade level directly related to the position being filled that demonstrates the clinical competencies needed to provide services as a quality control technologist, DRT team leader, supervisory radiologic technologist, [PACS technologist, clinical program director], or an assistant chief radiologic technologist.

(2) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. DRTs at this grade level may be appointed to one of the following assignments:

(a) [PACS Technologist]. This position serves as a liaison for the Office of Information and Technology (OI&T), Biomedical Engineering staff and clinical users to ensure the PACS system is configured to optimize imaging including distribution capabilities; develops methods and programs to evaluate, monitor and maintain digital imaging and voice recognition systems; serves as team leader in planning, developing, and instructing users in the operation of PACS network elements, the integration of these with related systems, and recommends corresponding upgrades. This position researches and or/analyzes problems, issues, or program requirements supporting
the functions of a digital imaging system; performs complex system administrator functions such as: oversight of RIS (Hospital Information System/Radiology Information System) links necessary to interface with the HIS (Hospital Information System), Application Entity (AE) titles, individual and user group creation, and access management, system filters, exam code dictionaries, DICOM configuration testing, hanging protocols, voice file exchange, and other duties associated with this position. The incumbent ensures compliance with all national and VA information and security requirements, including archiving of images to VistA imaging. This position may independently function as a DRT, which may include complex modality such as CT, MR, mammography, ultrasound, and IR. The candidate must demonstrate all of the following technical KSAs:

i. Knowledge of contingency plans during equipment downtimes.

ii. Ability to act as liaison for Radiology with biomedical engineering and OI&T.

iii. Ability to develop methods and programs to evaluate, monitor, and maintain digital imaging and voice recognition systems.

iv. Ability to lead a team of multidisciplinary members in accomplishing strategic planning and integration of PACS and network elements.

v. Ability to perform complex system administrator functions such as: oversight of RIS (Hospital Information System/Radiology Information System) links, AE titles, individual and user group creation and access management, etc.

vi. Knowledge of VA and other national guidelines pertaining to PACS network, VistA imaging, and database security.

vii. Knowledge of specific positioning, technique, and imaging procedures so he/she will be able to perform and reconcile image information correctly and efficiently during technical post processing and evaluation.

(b) **Quality Management Technologist.** This position has full oversight responsibility of departmental Quality Management program and may also include oversight of a departmental Quality Improvement (QI) program. That may include directing the work of lower graded staff. The technologist performs daily inspection[s] of radiographic units to ensure proper mechanical functionality [ ] and] ensures daily functionality of CR readers. [The technologist provides in-service training for technologists and other personnel involved in the operation and maintenance of CR readers, DR panels, and other PACS type of operations maintained within the department. The technologist] coordinates scheduling of preventative maintenance for modalities either through biomedical engineering or local contractor service. The technologist works with physicists to ensure compliance with radiation safety program and for acceptance testing of all new
installations of equipment. The technologist maintains accurate records, as required by management, for quality assurance analysis, quality control, performance improvement, and other related purposes. The candidate must demonstrate all of the following technical KSAs:

i. Knowledge of all Joint Commission on Accreditation of Healthcare Organizations (JCAHO), Occupational Safety and Health Administration (OSHA), and VA standards regarding radiology quality assurance and other technical functions.

ii. [Ability] to train staff on quality assurance and control.

[iii. Knowledge of inventory management systems.]

iv. Knowledge of x-ray and other image-producing machinery in order to design and operate a complete radiology quality assurance program.

v. Knowledge of physics and [physical properties of CR and DR panels and image production to diagnose difficulties in x-ray machinery and post processing equipment.

(c) **Clinical Program Director.** The director functions as an educational program director for a hospital based JRCERT accredited radiological technology training program. The director oversees the development of an assessment plan that meets programmatic accreditation standards. The director ensures maintenance of educational records and prepares for site visits from JRCERT. The director develops or revises curriculum to meet changing program needs. The director prepares and maintains course outlines and objectives, instructs and evaluates students, and reports progress. The director has direct responsibility for program design, policy development, personnel administration, budget, marketing, and public relations. The director implements the selection process for hiring program faculty and staff. Initiates and coordinates evaluation of faculty and staff. Provides oversight of course scheduling. The director supervises subordinate staff and evaluates the clinical instructors. This position must meet minimum educational requirements established by JRCERT to direct an accredited radiologic technology training program (two years DRT experience and a masters' degree as noted in JRCERT requirement). The candidate must demonstrate all of the following KSAs:

i. Ability to create and revise program policies that meet accreditation standards required for program growth and improvement.

ii. Ability to independently perform the duties of a fully functional general radiographic DRT.
iii. Ability to effectively communicate both orally and in writing with students, faculty, staff, and clinical health organizations.

iv. Skill in curriculum development, supervision, instruction, evaluation, and academic advising.

v. Ability to create and administer a program budget meeting needs for growth and improvement.

vi. Ability to establish, monitor, and oversee long- and short-range goals of program, curriculum, course descriptions, policies and procedures used to evaluate student performance, processes of assessment and program evaluation.

vii. Ability to provide the full range of supervisory duties, which includes responsibility for assignment of work, performance evaluations, selection of staff, and recommendation of awards, advancements, and disciplinary actions.

[(d)] Lead Diagnostic Radiologic [Technologist]. [The technologist] functions as a lead technologist for a group of DRTs [at the GS-10 level and below. The technologist performs] a full range of general radiologic treatment procedures and possesses broad knowledge of the different modalities within the diagnostic radiologic area. The technologist is accountable to the next higher-level supervisor. The candidate must demonstrate all of the following technical KSAs: and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

i. *Skill in directing on-the-job training for employees.

ii. *Ability to evaluate work performance of lower level employees and recommend performance ratings.

iii. *Skill in technical planning and oversight to set and adjust work priorities, and [ensure] that work requirements are met based on employee capabilities.

iv. Ability to provide care appropriate to the age of the patients served, including knowledge of growth and development.

v. *Knowledge of medical center, VHA, and government-wide human resources management regulations, policies, and procedures.

[(e)] Supervisory Diagnostic Radiologic Technologist. The incumbent functions as section supervisor for a group of advanced DRTs at the GS-10 level and below, which may include support staff. The incumbent evaluates new products and equipment and makes recommendations to the supervisor concerning upgrades/new purchases that would improve operations. The incumbent develops and maintains
protocol manuals for procedures performed in the section. The incumbent is responsible for implementation and adherence to all safety practices and policies for the section. The incumbent directs the development and implementation of services and treatment to patients through the supervision, mentoring, and oversight of assigned clinical staff. Experience must demonstrate practice skills in a specialty area or in administration demonstrating progressively more professional competency and judgment. The candidate must demonstrate all of the following technical KSAs:

i. Ability to analyze organizational, technical, and administrative problems and to develop and implement solutions that result in efficient section operation.

ii. Ability to analyze and use data effectively to manage section workload, quality, performance, and productivity.

iii. Skill in problem solving and conflict resolution.

iv. Ability to supervise technologists performing a wide variety of difficult radiographic exams (CT, MRI, Special Procedures, Mammography, Ultrasound).

v. Ability to interview and evaluate candidates for positions, evaluate subordinate performance, recommend appointments, advancements, or recommend or take appropriate disciplinary actions.

vi. Skill in participating in organizational facility initiatives, workgroups, and/or committees.

(f) **Supervisory Diagnostic Radiologic Technologist.** This assignment is restricted to employees serving as a full assistant chief to a GS-12 chief radiologic technologist. Individuals in this assignment share full responsibility for managing the radiologic technology section. The candidate must demonstrate all of the following technical KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

i. Knowledge of overall radiology department operations, and the ability to judge effectiveness of the operation.

ii. *Ability to monitor and evaluate subordinate supervisor’s performance.

iii. *Ability to formulate plans, delegate authority, and follow-up on delegated tasks.

iv. Knowledge of new and recent developments in the field.
(g) **Supervisory Diagnostic Radiologic Technologist.** Employees in this assignment assume full administrative and professional responsibility for planning and directing the radiologic technology program at a medical center or independent outpatient clinic that does not meet the level of complexity described at the GS-12 level for a chief radiologic technologist and has significant supervisory responsibility for staff. The candidate must demonstrate all of the following technical KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

i. *Ability to develop and initiate new imaging services that apply current research findings.*

ii. Ability to participate as an instructor in the facility’s in-service clinical training findings.

iii. [Ability] to interview and evaluate candidates for positions in the section and recommend appointments, advancements, or, when appropriate, disciplinary actions.

iv. Ability to evaluate performance, identify continuing education and training needs, etc.

v. *Ability to analyze organizational, technical, and administrative problems and to develop and implement solutions that result in efficient section operation.*

vi. [Skill in participating in organizational facility initiatives, workgroups, and/or committees.

vii. Ability to draft and/or recommend organizational policies and/or directives.]

h. [Diagnostic Radiologic Technologist], GS-12

(1) **Experience.** At least one year of the following types of experience comparable to the next lower grade level that fully meets the KSAs at that level.

(2) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. DRTs at this grade level may be appointed to one of the following assignments:

(a) **Supervisory [Diagnostic Radiologic Technologist] [ ].** Assignment to this grade level is restricted to those serving as the chief radiologic technologist at medical facilities with comprehensive and complex radiographic and imaging programs. Employees in these assignments plan and direct the radiologic technology program at active, affiliated medical centers with critical care and emergent inpatient services, and have full supervisory responsibility for a large staff
of subordinate personnel, including GS-10 DRTs, at least one subordinate team leader or supervisor at the next lower grade level, and may include clerical or administrative support staff. At this level, the radiologic technology program typically includes the full variety of comprehensive and complex modalities. The candidate must demonstrate the following technical KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

i. *Ability to perform the full range of supervisory duties, including responsibility for assignment of work performed; performance evaluations; recommendations for appointments, awards, advancements, and, when appropriate, disciplinary actions; and identification of continuing education and training needs.

ii. [Ability] to serve as a consultant to other facility personnel in evaluating and planning radiologic technology services for the most complex cases.

iii. *Ability to participate in research studies and/or as a consultant to others conducting research.

iv. *Ability to consult with staff and resident physicians through patient presentation, attending ward rounds, and specialty clinics and/or conferences, etc.

v. *[Ability] to assess, plan, and evaluate the delivery of radiologic technology services at the facility.

(b) **Radiology Administrator.** Assignment to this grade level is restricted to those serving as the radiology administrator at medical facilities with comprehensive and complex radiographic and imaging programs. Employees in these assignments plan and direct the technical and administrative operations of the radiology program at active, affiliated medical centers, and have full supervisory responsibility for a large staff of subordinate personnel, including GS-10 DRTs, at least one subordinate team leader or supervisor at the next lower level, and may include clerical and administrative support personnel. At this level, the radiologic technology program typically includes the full variety of specialties. The candidate must demonstrate all of the following technical KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

i. *Knowledge of the fiscal matters of the radiology program, including VHA funds and several additional fund controls, and ability to administer the scarce medical specialist contracts for professional services.

ii. *[Ability] to make short and long-term supply, equipment, and major space alteration recommendations, and prepare specifications for radiographic equipment purchases and remodeling requests.
iii. Ability to recommend program effectiveness improvements to meet VHA and JCAHO accreditation standards.

iv. *Ability to make and implement major managerial recommendations for the radiology program, such as organizational improvements including changes in structure and delegation; maintain realistic cost/benefit ratios; and policy and procedure changes to improve service to patients.

v. *Ability to perform the full range of supervisory duties, including responsibility for assignment of work performed; performance evaluations; recommendations for appointments, awards, advancements, and when appropriate, disciplinary actions, and identification of continuing education and training needs.

(i) **[Diagnostic Radiologic Technologist], GS-13**

1. **Experience.** At least one year of experience comparable to the next lower grade level that fully meets the KSAs at that level.

2. **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

[(a) **National/Regional Technologist.** Technologists at this level function as program specialists responsible for the management of VISN or national initiatives having a high degree of visibility and a significant impact on VHA health care delivery. Examples include VISN or national initiatives in the care and treatment of patients, educational programs, program evaluation, quality assurance, etc. These programs typically include collaboration with other Federal and State agencies, professional organizations, etc. Due to the scope of regional/national responsibilities, it is expected there may be one regional level technologist per VISN, if and where warranted, but no more than two. In addition, the candidate must demonstrate all of the following technical KSAs:

i. Knowledge of VISN or national initiatives and/or intra-agency workgroups or committees.

ii. Ability to develop and/or recommend national policies and/or directives.

iii. Ability to perform VHA Central Office special projects and activities.

iv. Skill in managing resources at a complex facility or organization, i.e., space, equipment, supplies, personnel a regional or national level.]

[(b) **Imaging Program Administrator.** A technologist in this position is responsible for the direction of a highly complex consolidated imaging program that includes
diagnostic radiology, and one or both of nuclear medicine, and/or radiation oncology programs. The incumbent ensures professional competence and performance of clinical and clerical staff by establishing professional standards, protocols, and policies and procedures. This position has full supervisory responsibility for a large staff of subordinate personnel in various disciplines and sections noted above, including at least one subordinate supervisor at the next lower level, and may include various clerical and administrative support personnel. Responsibilities include oversight of business operations and planning for significantly complex medical centers with strong academic affiliations that includes both graduate medical education (GME) and medical imaging training programs. Responsibilities also include oversight of multiple complex imaging services and providing annual budget information; monitoring expenditures; identifying variances; and recommending corrective actions. With the facility leadership, this position develops strategic short- and long-term business, market and operational plans focused on the growth of clinical, academic, and financial performance. The incumbent monitors and evaluates progress toward implementing strategic goals and objectives. The incumbent is responsible for contributing information to strategic plans and reviews, implementing production, productivity, quality, and patient-service standards; resolving problems; and identifying system improvements. This position is accountable for outcomes management and associated performance targets, including but not limited to patient satisfaction surveys, industry performance benchmarks and quality outcomes. The incumbent works closely with departmental staff to improve quality results by evaluating accuracy and quality of services; and providing assistance in the implementation of new techniques, equipment, and procedures. The incumbent oversees, supports, and makes contributions to patient safety, implementing systems to conduct Root Cause Analysis and correction of errors, reporting of adverse occurrences, near misses, and safety concerns. The incumbent develops, implements, maintains, and enforces departmental programs, policies, procedures, and protocols. The incumbent ensures and maintains required documentation for compliance with safety, environmental and infection control standards, and with local, state, and federal regulations. The incumbent monitors compliance with standards, identifies variances or inabilitys to meet established targets, and implements action to ensure that targets are met. In addition, the candidate must demonstrate all of the following technical KSAs:

i. Ability to provide the full range of supervisory duties which includes responsibility for assignment of work, performance evaluations, selection of staff, and recommendation of awards, advancements, and disciplinary actions.

ii. Skill in administrative management (e.g., budgeting, contracting, procurement and property management) in accordance with VHA regulations.

iii. Ability to work collaboratively with other disciplines, upper management, VISN level staff and/or VHA Central Office.
iv. Ability to plan and execute short and long-range programs and/or goals through project management and tactical/strategic planning as well as develop and oversee complex quality programs addressing outcome management and performance benchmarks.

v. Knowledge of concepts, principles, and methodologies of a significantly high-level imaging program that includes complex subsections such as diagnostic radiology, nuclear medicine and/or radiation oncology operations in order to assess program effectiveness and provide authoritative guidance for operations, personnel, and management.

vi. Ability to develop, implement, maintain, and enforce departmental programs, policies, procedures and protocols to ensure and maintain required documentation for compliance with safety, environmental and infection control standards, and with Joint Commission, FDA, NRC-NHPP, ACR, HIPPA, and other federal regulations.]

5. DEVIATIONS.

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for DRTs in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the education and/or ARRT certification/registration (e.g., ARRT(R), and/or Advanced ARRT certification) be waived.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

Authority: 38 U.S.C. §§ 7402, 7403
APPENDIX G26. THERAPEUTIC RADIOLOGIC TECHNOLOGIST QUALIFICATION STANDARD

GS-0648

Veterans Health Administration

1. COVERAGE. The following are the requirements for appointment as a Therapeutic Radiologic Technologist (TRT) in the Veterans Health Administration (VHA). TRTs assist in the localization of tumors and deliver high doses of ionizing radiation as prescribed by the radiation oncologists. These requirements apply to TRTs in the General Schedule (GS)-0648 series who are certified in therapeutic radiologic technology by the American Registry of Radiologic Technology (ARRT). Appendix G66 outlines the qualification standards for TRTs who are certified medical dosimetrists responsible for a treatment plan and assigned to functional statements outlining those specific duties.

2. DEFINITIONS.

a. Journey Level. The full performance level for this qualification standard is the GS-9 grade level.

b. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills, abilities, and other characteristics (KSAs), also referred to as core competencies associated with current therapeutic radiologic technology practices.

c. Part-Time Experience. Part-time experience as a TRT is creditable according to its relationship to full-time workweek. For example, a TRT would receive one week of full-time credit for each two weeks of half-time work.

d. Quality of Experience. Experience is only creditable if it is post-certification (as noted in paragraph 3c below) experience as a TRT directly related to the position being filled. Qualifying experience must be at a level comparable to TRT experience at the next lower grade level. For all assignments above the full performance level, the higher-level duties must consist of significant scope, administrative independence, complexity and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time. Experience as a graduate TRT is creditable provided the candidate functioned as a TRT and subsequently passed the certification examination.

e. TRT Professional Definitions. Specialized areas of therapeutic radiologic technology include basic and complex therapeutic treatment delivery, simulation, advanced treatment delivery modalities and mold room.
(1) **Basic and Complex Therapeutic Radiologic Treatment Delivery.** The practice of radiation therapy is performed by healthcare professionals responsible for the administration of ionizing radiation for treating diseases, primarily cancer. Radiation therapy requires an interdisciplinary team of radiation oncologists, radiation therapists, medical radiation physicists, medical dosimetrists, and nurses. The radiation therapist administers the radiation to the patient throughout the course of treatment. Radiation therapy integrates scientific knowledge, technical competence, and patient interaction skills to provide safe and accurate treatment with compassion. A radiation therapist recognizes patient conditions essential for the successful completion of simulation and treatment. Radiation therapists must demonstrate an understanding of human anatomy, human physiology, pathology and medical terminology. In addition, comprehension of oncology, radiobiology, radiation physics, radiation oncology techniques, cross sectional anatomy, radiation safety and the psychosocial aspects of cancer are required. They must maintain a high degree of accuracy in positioning and treatment techniques. TRTs must possess, use and maintain knowledge about radiation protection and safety. They assist the radiation oncologist to localize the treatment area and deliver high doses of ionizing radiation as prescribed by the radiation oncologist. The basic treatment deliveries consist of two-dimensional and three-dimensional treatment plans. The complex treatment deliveries consist of the advanced treatment delivery modalities as listed below and new emerging technologies on the horizon.

(2) **Simulation.** Simulation utilizes multiple imaging modalities to generate images of the human anatomy with emphasis placed on areas relevant to the treatment fields. This includes selecting and designing multiple types of positioning and immobilization devices to maximize accuracy for reproducibility during treatment process. During simulation the TRTs address complications brought about by the patient’s condition and disease process. These images obtained through the simulation procedure are transferred to dosimetry for a reproducible deliverable treatment plan. Precise documentation of the procedure and set-up are essential for accuracy of the prescribed treatment.

(3) **Advanced Treatment Delivery Modalities:** Advanced treatment delivery modalities consist of the most advanced techniques, the current state of the art, and standard care provided in the community. These include:

(a) Intensity Modulated Radiation Therapy (IMRT)

(b) Imaged Guided Radiation Therapy (IGRT)

(c) Volumetric Modulated Arc Therapy (VMAT)

(d) Stereotactic Body Radiation Therapy (SBRT)
(e) Stereotactic Radiosurgery (SRS)

(f) Stereotactic Radiotherapy (SRT)

(g) High Dose Rate Brachytherapy (HDR)

(h) Low Dose Rate Brachytherapy (LDR)

(i) 4D Simulation

(j) Gated Radiation Therapy

(k) Deep Inspiration Breath Hold (DIBH)

(l) Optical Surface Imaging System (OSIS)

(4) **Mold Room.** Mold room technology utilizes materials and methodologies to design and fabricate molds as prescribed by the radiation oncologist. Mold room functions are varied and dependent on complexity and facility needs which may include electron cut outs, blocking, and other specialized devices.

3. **BASIC REQUIREMENTS.**

   a. **Citizenship.** Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with 38 U.S.C. § 7407(a).

   b. **Education.** Individuals must have successfully completed a program in therapeutic radiologic technology, evidenced by a certificate or an associate’s or higher degree accredited by the Joint Review Committee on Education in Radiologic Technology or other accrediting bodies recognized by the U.S. Department of Education (ED) and the subsequent completion of a 12-month ED accrediting body-approved program in therapeutic radiologic technology. Public Law 97-35 requires that persons who administer radiologic procedures meet the credentialing standards in 42 C.F.R. Part 75. They must have successfully completed an educational program meeting or exceeding the standards described in that regulation and is accredited by an organization recognized by the ED, and be radiation therapists certified by the ARRT in Radiation Therapy (T).

   c. **Certification.** All applicants must be certified in therapeutic radiologic technology by the ARRT in Radiation Therapy (ARRT (T)).

      (1) All applicants must be certified in therapeutic radiologic technology by the ARRT in Radiation Therapy (ARRT (T)).

      (2) **Exception.**
(a) Non-certified applicants who otherwise meet the eligibility requirements for TRT certification may be given a temporary appointment under 38 U.S.C. § 7405 (a)(1)(B) for up to one year at the entry level only as a graduate TRT under the authority of 38 U.S.C. § 7405 (c)(2)(B).

(b) Graduate TRTs may only be appointed at the entry grade level and may not be promoted/converted until certification is obtained.

(c) Temporary graduate TRT appointments may not be extended beyond one year or converted to a new temporary appointment.

(d) **Failure to Obtain Certification.** In all cases, TRTs must actively pursue meeting the requirements for certification starting from the date of their appointment. Failure to become certified within one year from the date of appointment will result in removal from the GS-0648 TRT series and may result in termination of employment.

(3) **Loss of Certification.** Once certified, a TRT who fails to maintain the required certification must be removed from the occupation, which may result in termination of employment.

d. **Grandfathering Provision.** All persons employed in VHA in this occupational series or in another occupational series that are also performing the duties as described in the qualification standard are considered to have met all qualification requirements for the grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Employees in an occupation not requiring a licensure/certification/registration, may be reassigned, promoted or demoted within the occupation.

(2) Employees in an occupation requiring a licensure/certification/registration, may be reassigned, promoted up to and including the full performance level, or demoted within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

(3) Employees in an occupation requiring a licensure/certification/registration only at higher grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher-grade levels.

(4) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.
(5) Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

**NOTE:** Each uncertified TRT permanently employed on June 21, 1986, and whose competence in the safe administration of ionizing radiation was affirmed, in writing, by a VA licensed physician not later than January 1, 1987, is considered fully qualified. These employees may be promoted, up to and including the journey level, demoted or reassigned within the GS-0648 occupational series. Any employee initially retained in this manner who leaves this job series loses protected status and must meet the full requirements in effect at the time of reentry.

f. **English Language Proficiency.** TRTs must be proficient in spoken and written English. See 38 U.S.C. § 7403(f).

4. **GRADE DETERMINATIONS.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:

a. **Therapeutic Radiologic Technologist, GS-6**

   (1) **Experience.** None above the basic requirements.

   (2) **Assignment.** Employees at this grade level serve as a staff TRT in an entry-level developmental position. They complete basic radiation therapy and basic clinic duties. They receive guidance and oversight from experienced staff members and require direct supervision.

   (3) **Demonstrated Knowledge, Skills, and Abilities (KSA):** None at this level.

b. **Therapeutic Radiologic Technologist, GS-7**

   (1) **Experience.** At least one year of experience equivalent to the next lower grade level directly related to the position being filled.

   (2) **Assignment.** TRTs at this grade level serve as a staff TRTs in a developmental position. They perform a substantially full range of basic clinical duties and basic treatment delivery modalities, but receive guidance, direct oversight, and directions regarding complex treatment delivery, unfamiliar, or unusual situations for complex patient clinical issues. Assignments at this level include setting up of the treatment room with prescribed immobilization devices and; supplies for each individual patient before treatment and treating basic and some advanced radiation treatment modalities on a linear accelerator. TRTs perform daily quality
measures, machine warm up procedures, interpretation of output levels compared with established thresholds and other assignments.

(3) **Demonstrated Knowledge, Skills, and Abilities.** Candidates must demonstrate all the KSAs below:

(a) Knowledge to set-up the treatment room to deliver basic and some complex radiation treatments on a linear accelerator, as prescribed by the radiation oncologist.

(b) Knowledge of machine warm up procedures for interpreting output levels compared with established thresholds and radiation safety principles.

(c) Ability to perform patient chart reviews using an electronic medical record and using the Record and Verify System or other similar treatment delivery systems.

(d) Knowledge of operating computed tomography (CT) Simulator to preform simulations that is demonstrated by following directives, designing custom immobilization for reproducible set-ups, obtaining optimal imaging, and completing accurate and precise patient documentation.

(e) Skill in communicating all aspects of patient care with the radiation oncology team.

(f) Knowledge of utilizing an on-board imaging system (i.e., Linac's or comparable system) to interpret the images.

(g) Skill in performing radiation safety practices including when to report discrepancies and ensuring compliance with regulatory requirements, quality standards, accrediting agencies, policies and department standard operating procedures.

c. **Therapeutic Radiologic Technologist, GS-8**

(1) **Experience.** At least one year of experience equivalent to the next lower grade level that demonstrates the knowledge, skills, and abilities/core competencies described at that level.

(2) **Assignment.** Staff TRTs at this developmental level perform a substantially full range of basic clinical duties and basic treatment delivery modalities. They will receive guidance and directions regarding most complex treatment delivery modalities, and unfamiliar or unusual situations for complex patient clinical issues. Assignments at this level include but are not limited to setting-up of the treatment room with prescribed immobilization devices and supplies for each individual patient before treatment. They deliver treatments providing basic and some advanced radiation treatment modalities on a linear accelerator. Staff
TRTs conduct daily quality measures, machine warm up procedures, interpretation of output levels compared with established thresholds and other assignments. Regardless of the nature of the specific assignment, the work must be of sufficient scope and complexity to meet the knowledge, skills, and abilities to perform at this level.

(3) **Demonstrated Knowledge, Skills and Abilities.** Candidates must demonstrate all the KSAs below:

(a) Skill in setting up the treatment room to deliver basic and some complex radiation treatments on a linear accelerator, as prescribed by the radiation oncologist.

(b) Ability to perform machine warm up procedures and interpret output levels compared with established thresholds and radiation safety principles.

(c) Ability to perform moderately complex patient chart reviews by using the electronic medical record and the Record and Verify System or other similar treatment delivery systems.

(d) Ability to operate the CT Simulator to perform simulations, design custom immobilization for reproducible set-ups, obtain optimal imaging and provide accurate and precise patient documentation.

d. **Therapeutic Radiologic Technologist, GS-9**

(1) **Experience.** At least one year of experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Assignment.** Employees at this level serve as staff TRTs at the full performance level independently carrying out most procedures which have varying assignments, including advanced treatment modalities and procedures. TRTs at this level may be independently assigned to most areas of radiation therapy and to some advanced therapies. Assignments at this level include but not limited to: providing emergency treatment delivery, simple Monitor Unit dose calculation as assigned; scheduling simulation and treatment procedures; handling and storing radioactive materials; educating patient, family and staff on the administration of ionizing radiation; inspecting equipment for safety, operability and troubleshooting basic problems and machine issues. Regardless of the nature of the specific assignment, the work must be of sufficient scope and complexity to meet the knowledge, skills and abilities to perform at this level.

(3) **Demonstrated Knowledge, Skills and Abilities.** Candidates must demonstrate all the KSAs below:
(a) Skill in independently setting up the patient in preparation for basic and complex radiation treatments on a linear accelerator, as prescribed by the radiation oncologist.

(b) Skill in independently performing machine warm-up procedures to interpret output levels compared with established thresholds adhering to the principles of radiation safety and all aspects of quality assurance.

(c) Skill to independently perform patient chart reviews and effectively document records utilizing an electronic medical records system and the Record and Verify System or other similar treatment delivery systems.

e. Therapeutic Radiologic Technologist, GS-10

(1) **Experience.** At least one year of experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, range of variety and be performed by the incumbent at least 25% of the time. Employees at this level serve as advanced staff TRTs independently carrying out procedures which have varying assignments. This includes basic and advanced treatment modalities and procedures, which exceed the full performance level. Employee will be assigned the responsibility of emergency on-call treatments, if applicable, and perform simple Monitor Unit calculations. Other assignments include but are not limited to performing CT simulations, troubleshooting for basic problems and machine issues, maintaining treatment rooms and equipment in a clean, neat and safe condition and assisting patients to and from the treatment room. Regardless of the nature of the specific assignment, the work must be of sufficient scope and complexity to meet the knowledge, skills and abilities to perform at this level.

(3) **Demonstrated Knowledge, Skills and Abilities.** Candidates must demonstrate all the KSAs below:

   (a) Skill in independently performing machine warm up procedures and interpreting output levels compared with established thresholds adhering to the principles of radiation safety and all aspects of quality assurance.

   (b) Ability to independently perform patient chart reviews using an electronic medical record and the Record and Verify System or other similar treatment delivery systems.

   (c) Ability to independently perform all basic and complex CT simulations, including independently operating the CT equipment, following directives, designing custom immobilization for reproducible set-ups, obtaining optimal
imaging, completing accurate data transfer for treatment planning and providing accurate and precise patient documentation.

(d) Ability to utilize a Linac's On Board Imaging system to interpret complex images.

f. **Lead Therapeutic Radiologic Technologist, GS-11**

(1) **Experience.** At least one year of experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Assignments.** The lead TRT functions as a team leader for a group of TRTs who provide the full range of general and complex therapeutic radiologic oncology treatment procedures. The lead TRT provides technical oversight, distributes work assignments and provides input on performance and competencies. Assignments at this level include, but are not limited to: approving leave requests for a few hours or in emergency situations; instructing and training TRT staff on newly acquired equipment; providing orientation to staff, students, residents and others as requested; and assisting with staff scheduling, quality assurance, compliance, authoring, reviewing and updating procedures and policies. In addition, the lead TRT serves as the technical mentor, trainer and coach for the staff. The lead TRT is accountable to the next higher-level supervisor.

(3) **Demonstrated Knowledge, Skills and Abilities.** Candidates must demonstrate all the KSAs below:

(a) Ability to provide technical oversight, assure compliance with standard operating procedures, distribute work assignments to lower level radiation therapists and provide input for performance appraisals and competencies.

(b) Skill in effective communication of all aspects of patient care with the radiation oncology team to include facilitating all essential communication to the Chief Radiation Therapist or leadership regarding clinical and operational issues.

(c) Ability to independently deliver, mentor and provide oversight to lower level TRTs with basic and complex radiation treatments on a linear accelerator, as prescribed by the radiation oncologist.

(d) Ability to instruct and train TRTs on the Record and Verify System (or other similar treatment delivery systems), newly acquired equipment, devices and products within the service.

(e) Ability to resolve informal employee disputes and concerns using problem solving skills.

(f) Ability to develop local policies and standard operating procedures.
(g) Ability to perform lead responsibilities such as facilitating quality improvement activities, conducting in-service and staff meetings, conducting other departmental meetings as requested.

(h) Skill in facilitating chart rounds.

g. **Supervisory Therapeutic Radiologic Technologist, GS-11**

(1) **Experience.** At least one year of experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Assignment.** Functions as a supervisor for a group of TRTs at the full performance level and below who provide general and complex therapeutic radiologic radiation oncology services. Assignments at this level include but are not limited to: plans and implements work schedules to assure an even flow and distribution of work, adjusts work assignments as needed for daily operation; recommends methods to improve productivity and continuously reviews treatment procedure and delivery. They oversee attendance and leave of employees, including approval of sick and annual leave requests. They address employee performance and conduct concerns. They inform higher-level management of anticipated staffing variances and recommend promotions, reassignments, or other personnel changes, such as retention or release of probationary employees, periodic step increases and recommending recognition of superior performance in the therapeutic radiologic area.

(3) **Demonstrated Knowledge, Skills and Abilities.** Candidates must demonstrate all the KSAs below:

(a) Ability to manage daily operations of the department to include supervising radiation therapy staff; coordinating staffing, workload and schedules; setting priorities; and delegating tasks and responsibilities.

(b) Ability to ensure department compliance with the national program office, radiation accrediting agencies, hospital and outside governing body standards through the management of quality improvement programs and adherence to departmental policies and standard operating procedures.

(c) Ability to supervise employees as evidenced by assessing qualifications and abilities of current and prospective employees; interviewing and selecting candidates; providing training and/or departmental orientation; overseeing technical operations; assessing employees for promotions; and reviewing competency and conducting performance appraisals.

(d) Ability to provide technical oversight to lower level TRTs for the completion of tasks such as CT simulation, treatment delivery, Record and Verify System (or...
other similar treatment delivery systems), newly acquired equipment, devices and products within the service.

(e) Ability to successfully communicate with the radiation oncology team and internal and external customers to manage the needs of patients and accomplish the mission.

h. **Supervisory Therapeutic Radiologic Technologist, GS-12**

(1) **Experience.** At least one year of experience equivalent to the next lower grade level directly related to the position being filled.

(2) **Assignments.** Supervisory TRTs function as supervisors with full administrative and professional responsibility for planning and directing the work of TRTs at the advanced level and below who perform basic and complex therapeutic radiologic services. Supervisory TRTs provide oversight to support staff. They adjust, coordinate and balances staffing levels daily as needed to ensure patient care needs are met. They address employee performance and conduct concerns. Supervisory TRTs develop and update departmental operational policies and procedures and ensures adherence to hospital standard operating procedures and policies. They work closely with the physicists to maintain timely records of equipment use, issues, schedules preventive maintenance inspections and other activities. They oversee the technical competency of the TRT staff and keep current with technical protocols, radiation safety and quality management activities. They ensure all staff and affiliate staff follows compliance with accrediting and regulating bodies. They evaluate work and procedures of subordinate staff. They provide input on required staffing levels that impact resource allocation decisions made at the executive level. Supervisory TRTs provide estimates for budgeting to assist with the fiscal management of the radiation oncology service.

(3) **Demonstrated Knowledge, Skills and Abilities.** Candidates must demonstrate all the KSAs below:

(a) Ability in managing daily operations of the department to include supervising radiation therapy staff; coordinating staffing, workload and schedules; setting priorities; and delegating tasks and responsibilities.

(b) Ability to coordinate and develop the quality improvement program to include evaluating and implementing departmental policies and standard operating procedures to ensure compliance with the national program office, radiation accrediting agencies, hospital and other outside governing body standards.

(c) Ability to perform administrative duties to include, but not limited to: reviewing qualifications and abilities of current and prospective employees; interviewing and selecting candidates; providing training and departmental orientation;
overseen technical operations; granting promotions; and reviewing competencies and conducting performance appraisals.

(d) Ability to provide oversight to lower level TRTs with tasks such as CT simulation, treatment delivery, Record and Verify System (or other similar treatment delivery systems), newly acquired equipment, devices and other products within the service.

(e) Ability to successfully communicate with the radiation oncology team, internal customers and external customers to manage the needs of patients and to accomplish the mission.

(f) Ability to adhere to radiation safety practices which include identifying and investigating treatment variations; reporting incidents; participating in quality assurance; addressing required reports, tasks and action items; and completing other requests using research and systematic data collection.

(g) Knowledge of budget allocations and using resources within the budget, procuring of day-to-day supplies, investigating new equipment options and planning for long-term replacement needs.

5. DEVIATIONS.

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for TRTs whose composite record of accomplishments, performance and qualifications, as well as current assignment warrants such action.

b. The placement of individuals in grade levels or assignments not described in the qualification standard must be approved by the Under Secretary for Health in VA Central Office, pursuant to delegated authority from the Secretary.

c. Under no circumstances will the educational or credential requirement be waived for those occupations with a positive education requirement, or when specific credentials are identified as necessary to meet minimum requirements.

Authority: 38 U.S.C. §§ 7401, 7402, 7403, 7405 38 U.S.C. §§ 7401, Appointments in Veterans Health Administration; 7402, Qualifications of appointees; 7403, Period of appointments; promotions; 7405, Temporary full-time appointments, part-time appointments and without-compensation appointments; 7407, Administrative provisions for section 7405 and 7406 appointments.
1. **COVERAGE.** The following are requirements for appointment as a Medical Instrument Technician (MIT) in the Veterans Health Administration (VHA). This series includes positions that perform diagnostic examinations or medical treatment procedures as part of the diagnosis and treatment of patients. The work involves operating or monitoring diagnostic and therapeutic medical instruments and equipment associated with cardiac catheterization, pulmonary examinations and evaluations, heart bypass surgery/heart-lung transplant surgery (perfusion), electrocardiography, electroencephalography, polysomnography, hemo dialysis, ultrasonography, [ ] vascular sonography[, and gastroenterology]. Positions in this series require knowledge of the capabilities and operating characteristics of one or more kinds of instruments and a practical knowledge of human anatomy and physiology. Positions also require a practical understanding of medical data generated by patient/equipment connections. Some positions may also require a practical knowledge of chemistry, pharmacology, physics, and mathematics.

Coverage under this standard and assignment of individuals to this occupation are restricted to the specific subspecialties identified above and those DIRECTLY DERIVED from these current subspecialties. For example, electroencephalography and polysomnography technicians perform duties using the same types of equipment and measure brain waves, the primary difference being the wake or sleep state of the patient. No individual will be assigned to this series (GS-649) without an approved parenthetical title.

Any additional parenthetical specialties developed as the result of new technologies must be directly derived from current specialties and must be approved by the Office of Human Resources Management, [Recruitment & Placement Policy] Service ([059]) in VA Central Office (VACO). Only after a decision has been made to include the identified new specialty in this qualification standard, and an approved parenthetical title and code have been developed, will an individual be assigned to this series.

2. **BASIC REQUIREMENTS**

   a. **Citizenship.** Citizenship of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

   b. **Education.** There are no specific educational requirements for this occupation. Education may be substituted for experience only at the GS-4 and GS-5 levels. See the grade requirements part of this standard for information regarding educational substitutions.

   c. **Licensure or Certification.** Licensure or Certification is not required for this occupation; however, it is strongly desirable at GS-6 or above as evidence of possession of the essential knowledge, skills, and abilities. For certain functional areas at the higher levels or supervisory assignments, specific certifications appropriate to the specialty are indicated in this standard under “Titles and Certification/Registrations”.

II-G27-1
For all specialties identified in this standard, Basic and Advanced Cardiac Life Support certifications are desirable. Training which does not result in official certification does not meet this definition.

d. **Grandfathering Provision.** The following is the standard grandfathering policy for all Title 38 Hybrid qualification standards. Some of these provisions may not apply to this occupation. Please carefully review the qualification standard to determine the specific education and/or licensure/certification/registration requirements that apply to this occupation.

All persons employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

Such employees in an occupation that does not require a licensure/certification/registration, may be reassigned, promoted, or demoted within the occupation.

Such employees in an occupation that requires a licensure/certification/registration, may be reassigned, promoted up to and including the full performance (journey) level, or demoted within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

Such employees in an occupation that requires a licensure/certification/registration only at higher grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher grade levels.

Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

If an employee who was retained in an occupation listed in 38 U.S.C. § 7401(3) under this provision leaves that occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. **Physical Requirements.** See VA Directive and Handbook 5019.

f. **English Language Proficiency.** Medical Instrument Technicians must be proficient in spoken and written English in accordance with chapter 2, section D, paragraph 5a, this part.
3. GRADE REQUIREMENTS

   a. Definitions: For purposes of this qualification standard the specialty areas of this occupation have been grouped into [seven] functional areas. These are:

   Cardiovascular (Electrocardiograph Technician, Cardiac Catheterization Technician)
   Medical (Hemodialysis Technician)
   Surgical (Perfusion Technician, Anesthesia Technician)
   Neurology (Electroencephalograph Technician, Polysomnography Technician)
   Pulmonary (Pulmonary Function Technician), and
   Imaging (Diagnostic Ultrasound Technician, Echocardiograph Technician, and Vascular Technician) [Gastroenterology (GI Technician)]

   Medical Instrument Technicians at GS-6 and above will have a functional assignment and reference should be made to the appropriate appendix for qualifications evaluation.

   Grade level criteria, KSAs (core competencies), and typical assignment information for all GS-4 and GS-5 levels are defined generically in this part of the qualification standard. For higher level positions where the grade level/assignment is based on supervisory and/or managerial responsibilities, criteria are also included in the general portion of this qualification standard (for individuals in multiple function assignments) and/or the specific appendices.

   For non-supervisory positions at GS-6 and above and for supervisory positions in a single specialty, the grade level criteria, KSAs, and types of assignments are discussed in appendices matching the title areas listed below. Reference should be made to the appropriate appendix in evaluating the qualifications of individuals for this occupation.

   (1) Titles and Certifications/Registrations: All individuals assigned to this occupation MUST have an approved parenthetical title. For individuals at the GS-4 and GS-5 levels, the approved title will be Medical Instrument Technician (Trainee). For supervisory positions over two or more approved specialties, the approved title will be Supervisory Medical Instrument Technician (Multiple Function). Supervisors over a single specialty will have that specialty as the parenthetical title; for example, Supervisory Medical Instrument Technician (Cardiac Catheterization). Non-supervisory individuals whose assignments involve two or more specialty areas will be assigned the parenthetical title for the predominant specialty considering both the intended function and qualifications background of the individual.

   (a) Anesthesia Technicians perform logistical and technical support to anesthesiologists and nurse anesthetists. They maintain anesthesiology supplies and equipment, set-up anesthetizing locations and operate, monitor, and collect data from anesthesia related equipment. In some cases Anesthesia Technicians will perform clinical laboratory functions, equipment preventive maintenance/repair, and specialized cardiac procedures such as cardiac output measurement, intra-aortic balloon pumping, vessel cannulation, and autotransfusion services. Certification at two distinct levels is offered by the American Society of Anesthesia Technologists and Technicians (ASATT). (See Appendix A)

   (b) Cardiac Catheterization Technicians perform, under a physician’s direction, diagnostic tests, both invasive and noninvasive, of the pulmonary system (lung) and the cardiovascular system (heart and circulation). They operate, monitor, and collect data from instruments used in procedures such as
cardiac catheterization, angiography, valvuloplasty, angioplasty, electrophysiology studies, cardiac pacing, or cardiac pacemaker or leadwire insertion. Registration is offered by Cardiovascular Credentialing International (CCI) as a Registered Cardiovascular Invasive Specialist (RCIS). (See Appendix B)

(c) **Diagnostic Ultrasound Technicians** operate diagnostic ultrasonic scanning equipment to produce cross sectional and two dimensional pictures of internal organs and body structures used to diagnose diseases and other medical conditions. Registration is offered by Cardiovascular Credentialing International (CCI) or by the American Registry of Diagnostic Medical Sonographers (ARDMS). (See Appendix C)

Positions should be assigned to the Diagnostic Radiologic Technologist (DRT), GS-647 series, when both ultrasound and other modalities which require the delivery of ionizing radiation are performed. Positions in which ultrasound duties are performed exclusively (no other modalities are performed), should be assigned to the Medical Instrument Technician, GS-649 series, since ultrasound duties solely do not require the delivery of ionizing radiation.

(d) **Echocardiography Technicians** operate diagnostic equipment to graphically record the position and motion of the heart walls or the internal structure of the heart and neighboring tissue by the echo obtained from beams of ultrasonic waves directed through the chest wall. Registration is offered by Cardiovascular Credentialing International (CCI), as a Registered Cardiac Sonographer (RCS) or by the American Registry of Diagnostic Medical Sonographers (ARDMS) as a Registered Diagnostic Cardiac Sonographer (RDCS). (See Appendix D)

(e) **Electrocardiograph Technicians (EKG)** operate instruments used to record electrocardiograms, exercise tolerance tests, 24-48 heart monitoring and scanning, and pacemaker evaluations. Certification is offered by Cardiovascular Credentialing International (CCI) as a Certified Cardiographic Technician (CCT). (See Appendix E)

(f) **Electroencephalograph (EEG) Technicians** operate the electroencephalograph and other devices such as evoked potential equipment to record the electrical activity of the brain. Registration is offered by the American Board of Registration of EEG, CNIM & EP Technologists (ABRET) or the American Association of Electrodiagnostic Techs (AAET). (See Appendix F)

(g) **Hemodialysis Technicians** operate and monitor kidney dialysis instruments to provide dialysis treatment to patients with kidney failure or to maintain patients with irreversible kidney disorders. The agencies that offer national certification are Nephrology Certification Commission (NNCC), Board of Nephrology Examiners, Inc., Nursing and Technology (BONENT), National Nephrology Certification Organization (NNCO), and the International Certification Commission for Clinical Engineering and Biomedical Technology (ICC) in conjunction with the United States Certification Commission (USCC). (See Appendix G)

(h) **Perfusion Technicians** operate the heart-lung apparatus to take over functions of the patient’s heart and lungs during coronary bypass surgery, heart and/or lung transplantation surgery, valve replacement, or respiratory failure. Certification is offered by the American Board of Cardiovascular Perfusion (ABCP). (See Appendix H)
(i) **Polysomnography Technicians** operate the electroencephalograph and other devices to record the electrical activity of the brain during sleep. Registration is offered by the Board of Registered Polysomnographic Technologists (BRPT). (See Appendix I)

(j) **Pulmonary Function Technicians** operate instruments to perform blood gas analysis; bronchoscopy with lung sampling; cardiopulmonary exercise stress tests; lung volume tests including spirometry (both pre and post medication); total lung capacity, functional residual capacity, and flow volume loops. Certification (RPFT) is offered by the National Board of Respiratory Care. (See Appendix J)

(k) **Vascular technicians** or **vascular sonographers** operate diagnostic equipment using ultrasound to record vascular information such as vascular blood flow, blood pressure, limb volume changes, oxygen saturation, cerebral circulation, peripheral circulation, and abdominal circulation. Registration is offered by Cardiovascular Credentialing International, (CCI) as a Registered Vascular Specialist (RVS) or by the American Registry of Diagnostic Medical Sonographers (ARDMS) as a Registered Vascular Technologist (RVT). (See Appendix K)

(l) **Gastroenterology (GI) Technicians** assist the practitioner in endoscopic procedures, such as esophagogastroduodenoscopy (EGD), colonoscopy, endoscopic retrograde cholangiopancreatography (ERCP), and endoscopic ultrasound. The technicians ensure proper performance of equipment, set up equipment, and reprocess endoscopic reusable medical equipment (RME). Certification is offered by the Society of Gastroenterology Nurses and Associates (SGNA) for level one and level two training. GI endoscope reprocessing certification is offered through the Certification Board of Sterile Processing and Distribution (CBSPD). (See Appendix L)

(2) **Creditable Experience - Knowledge of Current Medical Instrument Technician Practices.** To be creditable, the experience must have required the use of knowledge, skills, abilities and other characteristics associated with current Medical Instrument Technician practice appropriate to the identified specialty area. [Specialized developmental experience obtained under supervision of appropriately certified individuals may be credited at higher levels and is addressed in individual appendices.]

(3) **Quality of Experience.** Experience is only creditable if it is equivalent to at least the next lower grade level and is directly related to the position/specialty to be filled.

(4) **Part-time Experience.** Part time experience is credited according to its relationship to a full time work week. For example, an individual employed 20 hours per week, or on a ½ time basis would receive one work week credit for each two weeks of service.

(5) **Fellowships.** N/A

(6) **Internships.** N/A

b. **Grade Determinations.** In addition to the basic requirements for employment, the criteria discussed in the applicable headings, or that defined in the appendices, must be met when determining the grade of candidates.
c. **Education/Training.** To be creditable education must have been gained in an accredited Community College, College, or University.

[(1) **Training.**] Completion of appropriate training such as in-service training programs, on the job training, training acquired while in the Armed Forces, government sponsored developmental training programs, and/or training under physicians certified in the functional area will be allowed on a month-for-month basis through the GS-5 level.

[(2)] **Foreign Education:** To be creditable, education completed outside the U.S. must have been submitted to a private organization that specializes in the interpretation of foreign educational credentials and such education must have been deemed at least equivalent to that gained in conventional U.S. programs.
d. Basic Developmental Levels

(1) GS-4

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the position to be filled. Six months of this experience may have been in medically related fields such as nursing assistant, practical nursing, or similar fields. The remaining six months must have been in operating diagnostic and therapeutic equipment covered by this occupation. Experience gained in the operation of equipment for animal diagnosis or treatment may be credited at this level. In addition, the candidate must demonstrate the following KSAs:

OR,

1. Education. Successful completion of two years of education above high school or an associate’s degree with a major field of study directly related to the medical instrument technician occupation.

(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of basic medical terminology.

2. Ability to learn the components, operating characteristics, and settings of the equipment to be used.

3. Ability to learn typical patient reactions to the basic procedures involved and ability to recognize signs of distress.

4. Ability to learn the standard positions for the procedure being conducted.

5. Ability to communicate orally and in writing.

(c) Assignments. At this level assignments are trainee in nature. The medical instrument technician trainee is performing limited routine assignments of a developmental nature under close supervision.

(2) GS-5

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the position to be filled. This would be experience in operating equipment related to the particular specialization for which application is made or in related functional areas. Experience gained in the operation of equipment for animal diagnosis or treatment may be credited through this grade level. In addition, the candidate must demonstrate the following KSAs:
OR,

(b) **Education.** Successful completion of [4 academic years above high school leading to a bachelor’s degree with courses related to the occupation, or] a bachelor’s degree in a major field of study appropriate to medical instrument technician functions.

c) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of standard medical terminology to interpret physician orders or instructions.

2. Knowledge of common physical disabilities and ability to position patients for the examination or treatment.

3. Ability to learn the normal and abnormal results for routine procedures to recognize and report obvious abnormalities.

4. Ability to operate the equipment to administer routine/standard diagnostic treatment or procedures.

5. Ability to perform standard operator maintenance on the equipment including the ability to disassemble, clean, reassemble, and calibrate the machine.

d) **Assignment.** Medical Instrument Technicians (Trainee) at this level operate and monitor commonly used equipment performing routine procedures under normal supervision. The technician functions somewhat independently in carrying out these standardized procedures of limited complexity. Deviations from regular procedures, unanticipated problems, and unfamiliar situations are referred to the supervisor for a decision or help. Some assignments at this level also include developmental duties involving more complex procedures designed to prepare the technician for promotion to higher grades in a functional area. Such duties would be performed under closer supervision.

e. **Non-Supervisory positions at GS-6 and above.** For medical instrument technician positions with functional specialty titles, see the appropriate appendix for creditable experience, KSAs, and assignment definitions.

f. **Supervisory Medical Instrument Technician.** Supervisory positions in single specialties will be addressed in the applicable appendix, for example supervisory medical instrument technician (cardiac catheterization).

Typically, assignments for supervisory positions will be one grade (first line supervisor) or two grade (second line supervisor) levels above the full performance level of the employees supervised. The full performance levels are clearly identified in the separate appendices.

Supervisory medical instrument technician positions having oversight for two or more functional specialties will have “Multiple Function” as the parenthetical title. Grade levels for these positions should be determined by the full performance level of the positions supervised and other program management responsibilities. Individual appendices indicate the full performance level of identified specialties. Levels and complexity of supervisory positions are described below.
(1) First Level Supervisor

(a) Experience. At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This experience must demonstrate possession of the knowledge required in order to provide medical instrument technician services in the functional specialties supervised. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of the more complex examination and treatment procedures and techniques.

*2. Ability to manage and supervise employees in two or more functional specialties.

*3. Knowledge of Joint Commission on Accreditation of Healthcare Organizations (JCAHO) and other regulatory requirements.

4. Ability to communicate effectively and professionally with employees at varying grade levels.

*5. Ability to provide, or provide for, staff development and training.

(c) Certification. At this level, it is highly desirable that supervisors possess certification in one or more appropriate functional areas.

(d) Assignment. Typically these positions are established one grade above the full performance level of the technicians supervised. Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing Medical Instrument Technician services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

(2) Higher Level Supervisor

(a) Experience. At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be specialized experience as a first level supervisor which demonstrates possession of the knowledge required to provide medical instrument technician services in the functional specialties supervised as well as supervisory knowledge, skills, and abilities. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) Demonstrated Knowledge, Skills, and Abilities
1. Advanced knowledge of complex and non-standard treatment and examination procedures and
techniques.

*2. Ability to plan and assist in the establishment of a completely integrated treatment and examination
program.

*3. Ability to evaluate new products and equipment and make recommendations concerning developments
which would improve operations.

*4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls,
contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated
budget.

*5. Knowledge of and ability to provide the full range of supervisory duties which would include
responsibility for assignment of work to be performed; performance evaluation; selection of staff; and
recommendation of awards, advancements, and, when appropriate, disciplinary actions.

(c) Certification. At this level, it is highly desirable that supervisors possess certification in two or more
functional specialties. Participation in recognized professional organizations as a Board examiner, in the
development of curricula for training, or testing for the Board is evidence of competence.

(d) Assignment. Individuals at this level plan and direct programs at affiliated medical centers and their
satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory
personnel and at least one subordinate team leader or supervisor. Typically these duties include assigning and
evaluating the work of subordinate staff resolving problems which may interfere with patient examination
or treatment; providing medical instrument technician services in more complex and non-standard cases;
evaluating new products and equipment and making recommendations concerning developments which
would improve operations; participating as an instructor in the facility’s clinical training program; making
final decisions on selections based on recommendations from subordinate supervisors or leads; evaluating
performance; taking disciplinary action when necessary; and identifying educational or training needs. For
all assignments above the full performance level, the higher-level duties must consist of significant scope,
complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

4. DEVIATIONS

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade
determination requirements for medical instrument technicians in VHA whose composite record of
accomplishments, performance, and qualifications, as well as current assignments, warrant such action based
on demonstrated competence to meet the requirements of the proposed grade.

b. [The placement of individuals in grade levels not described in this standard must be approved by the
Under Secretary for Health, or designee, in VHA Central Office.]

Appendix A – Medical Instrument Technician (Anesthesia)

(1) GS-6

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills and Abilities**

1. Knowledge of human anatomy and physiology (specifically cardiac and pulmonary).

2. Knowledge and application of safety and infection control processes.

3. Ability to serve as a circulating technician for supplies and to assist with documentation of hemodynamic patient data.

4. Knowledge of anesthesiology supplies and equipment appropriate to less complex anesthetic procedures, such as those found in Ambulatory Surgery.

(c) **Certification.** No certification is required; however, it is desirable that employees at this level have Basic Cardiac Life Support (BCLS) certification.

(d) **Assignment.** The anesthesia technician at this level aids anesthesiologists and nurse anesthetists in less-complex anesthetic procedures such as regional anesthesia (epidural and spinal), laryngeal mask anesthesia, and monitored anesthesia care under close supervision. Technicians will exercise minimal independent judgment in anesthesia technology duties.

(2) GS-7

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills and Abilities**

1. Knowledge of the fundamentals of standard equipment operation, calibration and function.

2. Knowledge of correct use of non-invasive patient monitoring equipment specific to anesthesiology.

3. Ability to appropriately interact with patients during anesthetic procedures.

4. Knowledge of anesthesiology supplies and equipment appropriate to routine anesthetic procedures, such as those found in typical inpatient settings.

(c) **Certification.** No certification is required; however, it is desirable that employees at this level have Basic Cardiac Life Support (BCLS) certification.
II-G27-12

(d) **Assignment.** The anesthesia technician at this level assists anesthesiologists and nurse anesthetists in routine anesthetic procedures under general supervision. The technician will connect and operate non-invasive hemodynamic monitoring equipment, blood and fluid warmers (e.g., Hot Line and Ranger) and patient warming devices (e.g., Bair Hugger). The technician will exercise moderate independent judgment in anesthesia technology duties.

(3) **GS-8**

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills and Abilities**

1. Knowledge of the correct use of invasive patient monitoring equipment specific to anesthesiology.
2. Knowledge of basic electrocardiography (EKG).
3. Skill and ability to troubleshoot equipment, often while the patient is anesthetized.
4. Skill and ability to maintain sterility during procedures.
5. Knowledge and understanding of arterial pressure line wave forms including the ability to recognize and distinguish normal from abnormal, artifact from abnormality, and forewarn the physician or anesthetist of an impending life-threatening situation.
6. Knowledge of anesthesiology supplies, medications, and equipment appropriate to more difficult anesthetic procedures such as those found in inpatient settings with more acutely ill patients.

(c) **Certification.** No certification is required; however, it is desirable that employees at this level have Basic Cardiac Life Support (BCLS) certification.

(d) **Assignment.** This represents the full performance level. The anesthesia technician at this level assists anesthesiologists and nurse anesthetists in difficult anesthetic procedures under minimal supervision. The technician will connect and operate invasive hemodynamic monitoring equipment (e.g., arterial pressure monitors), anesthesia machines, ventilators, intubation bronchoscopes, and ultrasonic scanning devices. Technicians prepare and administer medications as directed by the attending physician. They mentor and train lower graded technicians, nurses, medical students, and anesthesia residents on anesthesia technology procedures and assist the supervisor/manager with quality control and performance improvement activities. The technician will exercise a high degree of independent judgment in anesthesia technology duties.

(4) **GS-9.** In addition to the core competencies defined at the GS-8 full performance level, positions at this level may be lead, supervisory, or non-supervisory with specialized advanced knowledge and duties.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would include specialized experience as an anesthesia technician which demonstrates possession of the knowledge,
skills, and abilities required to provide all aspects of anesthesia technician services including specialized duties. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1 through 6 are appropriate for all positions at this level. KSAs 7 and 8 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge and comprehensive understanding of laboratory testing procedures to include maintenance, calibration, and quality control procedures. This includes the ability to perform these lab tests accurately and correctly.

2. Advanced knowledge of electronics and anesthesia equipment with skill in repairing and maintaining this equipment and repairing complex problems.

*3. Comprehensive knowledge of central venous and pulmonary artery (Swan-Ganz) catheterization procedures including measuring cardiac outputs and intra-aortic balloon counterpulsation procedures (i.e., balloon pump).

4. Knowledge and ability to assist with airway management techniques.

*5. Knowledge of JCAHO and other regulatory requirements.

6. Ability to communicate effectively and professionally with employees at varying grade levels.

*7. Ability to manage and supervise employees.

*8. Ability to provide, or provide for, staff development and training.

(c) **Certification.** Anesthesia technician certification through the American Society of Anesthesia Technologists and Technicians (ASATT) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** Perioperative programs at some facilities require that anesthesia technicians perform duties that exceed the full performance level. The anesthesia technician at this level performs difficult and responsible anesthesia technology duties with considerable latitude for the exercise of independent judgment. The technician may perform clinical laboratory tests for the unit (i.e., blood gas, activated clotting time and glucose) or perform more difficult equipment repairs. The technician may also participate in large-vessel cannulations (with subsequent monitoring) characteristic of open-heart, transplant and major vascular surgeries. These assignments are expected to be relatively few in number ad must represent substantial additional responsibility over the full performance level.

2. **Lead Anesthesia Technician.** There may be some perioperative programs that do not need a technician functioning at the full supervisory level. However, daily guidance of the anesthesia technicians
may still be required and can be accomplished through a lead technician. Typically, the lead technician will only have the responsibility of seeing that the work flows smoothly, assuring coverage if needed and assigning work. Authority to approve leave, take disciplinary action, etc. will only be assigned to full supervisory positions.

3. **Supervisory Anesthesia Technician.** Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing anesthesia technician services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of the more complex procedures and techniques in the practice of anesthesiology such as extracorporeal blood salvage, washing and return to patient (also known as autotransfusion or cell saving) and arterial and/or venous cannulation for the establishment of arterial pressure monitoring or intravenous fluid/medication delivery.

2. Ability to plan and assist in the establishment of a completely integrated treatment and procedure program.

3. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts and equipment expenditures), forecast resource and equipment needs and administer the allocated budget.

5. Knowledge of and ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements and, when appropriate, disciplinary actions.

(c) **Certification.** Anesthesia technician certification through the American Society of Anesthesia Technologists and Technicians (ASATT) is highly desired. Basic Cardiac Life Support (BCLS) and
Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level. Participation in recognized professional organizations as a Board examiner, in the development of curricula for training, or testing for the Board is evidence of competence.

(d) **Assignments.** In addition to the core competencies defined at the GS-9 level, positions at this level may be supervisory or non-supervisory with specialized advanced knowledge and duties. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** Perioperative programs at some facilities require that anesthesia technicians perform duties that exceed the full performance level. The anesthesia technician at this level performs highly difficult and responsible anesthesia technology duties with considerable latitude for the exercise of independent judgment. The anesthesia technician may perform autotransfusion services to ensure that the patient is receiving the safest possible blood transfusion (his/her own blood) and that the regional blood bank supply is not unnecessarily depleted. Additionally, the anesthesia technician may be an integral part of the Anesthesia Care Team and prepare the patients for surgery by establishing arterial or venous access for the anesthesiologists and nurse anesthetists.

2. **Supervisory Anesthesiology Technician.** Individuals at this level plan and direct programs at affiliated medical centers and their satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory personnel and at least one subordinate team leader or supervisor. Typically these duties include assigning and evaluating the work of subordinate staff; resolving problems which may interfere with patient examination or treatment; providing anesthesia technician services in more complex and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads; evaluation performance; taking disciplinary action when necessary; and identifying educational or training needs.
Appendix B – Medical Instrument (Cardiac Catheterization)

(1) GS-6

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of cardiac anatomy, physiology, and basic electrocardiography.

2. Knowledge of sterile techniques, catheterization laboratory supplies, and equipment used in the procedures.

3. Ability to circulate, assist, monitor, and document hemodynamics and electrocardiograms during the procedure.

4. Knowledge of and ability to prepare intra-aortic balloon catheters.

(c) **Certification.** Basic Cardiac Life Support (BCLS) certification is desirable.

(d) **Assignment.** The cardiac catheterization technician at this level aids physicians in aspects of cardiac catheterization and related invasive procedures such as coronary angioplasty, pulmonary angioplasty, and intra-aortic balloon insertion. The technician must be able to recognize cardiac arrhythmias and take appropriate action.

(2) GS-7

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to assist with insertion of temporary transvenous pacemaker catheters.

2. Ability to maintain intra-aortic balloon pump equipment during procedures.

3. Ability to complete individual cases by pulling sheaths and holding pressure to obtain hemostasis.

4. Ability to assist with closure devices.

5. Ability to appropriately educate patients and patient families regarding procedures and post-catheterization care.
(c) **Certification.** Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable.

(d) **Assignment.** Cardiac catheterization technicians at this level aid physicians in all aspects of standard cardiac catheterization and related invasive procedures such as coronary angioplasty, pulmonary angioplasty, and intra-aortic balloon insertion. They select, set up, and calibrate surgical instruments, catheters, radiographic contrast injectors, and radiographic imaging devices. They prepare cardiac medication for administration by the physician and must be able to recognize cardiac arrhythmias and take appropriate action.

(3) **GS-8**

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to scrub, circulate, and monitor advanced procedures (including electrophysiological) to include rotoblation, intravascular ultrasound, RADI or wave-wire, angiojet, filter wires, myocardial biopsies EPS, permanent pacemaker insertions, AICD insertions, and biventricular pacemaker insertion.

2. Advanced knowledge of equipment, medications, and supplies used in the Cardiac Catheterization Laboratory and the ability to set-up, calibrate, operate, and troubleshoot this equipment.

3. Knowledge and understanding of wave forms from the great vessels and all chambers of the heart including the ability to recognize and distinguish normal from abnormal, artifact from abnormality, and forewarn the physician of an impending life-threatening situation.

4. Knowledge of quality control and performance improvement indicators for the Cardiac Catheterization Laboratory and ability to prepare and analyze quality control of test results.

(c) **Certification.** Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable.

(d) **Assignment.** This represents the full performance level. Cardiac catheterization technicians at this level function as full members of the Cardiac Catheterization Laboratory Team. They scrub, circulate, operate equipment, etc., on the most complex examination and treatment procedures including procedures such as endocardial biopsy, radio frequency ablation procedures, and intra-aortic balloon pump therapy for very critical patients. They prepare and administer cardiac medications as directed by the attending physician. They mentor and train lower graded technicians, nurses, nursing students, and cardiopulmonary technology students on cardiac catheterization laboratory procedures and assist the supervisor/manager with quality control and performance improvement activities.

(4) **GS-9.** In addition to the core competencies defined at the GS-8 full performance level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.
(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be experience which demonstrates possession of the knowledge required in order to provide all aspects of cardiac catheterization technician services. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of the more complex examination and treatment procedures and techniques in order to provide training and supervision in these procedures, to evaluate and initiate performance improvement projects, and to write policies, procedures, and protocols, that pertain to the Cardiac Catheterization Laboratory.

*2. Knowledge of JCAHO and other regulatory requirements.

3. Ability to communicate effectively and professionally with employees at varying grade levels.

*4. Ability to manage and supervise employees.

*5. Ability to provide, or provide for, staff development and training.

c) **Certification.** Registration by Cardiovascular Credentialing International (CCI) as a registered Cardiovascular Invasive Specialist (RCIS) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** Non-supervisory medical instrument technician (cardiac catheterization) may have assignments that because of their nature substantially exceed the full performance level. The Professional Standards Board will review proposed non-supervisory special assignments for the GS-9 level and make a determination regarding their appropriateness. These assignments are expected to be relatively few in number and must represent substantial additional responsibility over the full performance level.

2. **Lead Medical Instrument Technician (Cardiac Catheterization).** In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.

3. **Supervisory Cardiac Catheterization Technician.** Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing cardiac catheterization technician services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.
(5) **GS-10.** In addition to the core competencies defined at the GS-9 level, positions at this grade may be supervisory or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be experience that demonstrates possession of the knowledge required to provide the most complex cardiac catheterization technician services and/or supervisory knowledge, skills, and abilities. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Advanced knowledge of complex and non-standard treatment and examination procedures and techniques.

*2. Ability to plan and assist in the establishment of a completely integrated treatment and examination program.

*3. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

*4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.

*5. Knowledge of and ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions.

(c) **Certification.** Registration by Cardiovascular Credentialing International (CCI) as a registered Cardiovascular Invasive Specialist (RCIS) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** There may be a rare non-supervisory position supporting this grade level. Such a position would typically include maintaining all data and research protocols for cardiac procedures and investigations as well as writing policies, procedures, and protocols for a cardiac catheterization laboratory.

2. **Supervisory Cardiac Catheterization Technician.** Individuals at this level plan and direct programs at affiliated medical centers and satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory personnel and at least one subordinate team leader or supervisor. Typically these duties include assigning and evaluating the work of subordinate staff resolving problems which may interfere with patient examination or treatment; providing cardiac catheterization technician services in more complex
and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.
Appendix C – Medical Instrument Technician (Diagnostic Ultrasound)

NOTE: Positions should be assigned to the DRT, GS-647 series, when both ultrasound and other modalities which require the delivery of ionizing radiation are performed. Positions in which ultrasound duties are performed exclusively (no other modalities are performed), should be assigned to the Medical Instrument Technician, GS-649 series, since ultrasound duties solely do not require the delivery of ionizing radiation.

(1) GS-6

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of medical terminology and human anatomy in order to receive and interpret physician requests for routine, standardized ultrasonography procedures.

2. Knowledge of tissue harmonics and soundwave propagation within the body to adjust TGC (Time Gain Compensation) for optimal image quality.

3. Knowledge of the physics of velocity, frequency of soundwaves, and their physical properties.

4. Ability to set up and adjust the ultrasound equipment to meet the conditions of the examination and the patient and to operate the equipment for standardized, routine procedures.

5. Ability to interact with patients explaining procedures and positioning the patient for the procedure.

(c) **Certification.** Basic Cardiac Life Support (BCLS) certification is desirable.

(d) **Assignment.** At this level, medical instrument technicians (diagnostic ultrasound) perform examinations which are routine and standardized in nature. They position the patient as needed for the best test results, set up and adjust the ultrasound equipment to meet the condition of the examination and patient, move and adjust depths and types of scan in accordance with procedures, perform operator preventive maintenance and care of equipment, and assist higher graded technicians in performing more complicated examinations.

(2) GS-7

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided the individual with the knowledge, skills, and abilities to independently conduct difficult but standardized diagnostic ultrasonography examinations. In addition, the candidate must demonstrate the following KSAs:
(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to set up and adjust the ultrasound equipment to meet the conditions of the examination and the patient and to operate the equipment for more complex, but standardized procedures.

2. Knowledge of zoom, expansion, prospectus, color Doppler, and pulsed echo Doppler.

4. Ability to alter standard, but complex procedures and protocols to meet patient needs and physical limitations.

(c) **Certification.** Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable.

(d) **Experience.** At this level the medical instrument technician (diagnostic ultrasound) performs complex, standardized procedures independently. They have the knowledge to alter procedures, equipment settings, transducers used, etc., to accommodate patient needs and still produce a quality image for diagnostic purposes. They will also be required to assist with the performance of more complicated procedures and non-standardized procedures in a developmental capacity.

(3) **GS-8**

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided the overall knowledge, skills, and abilities to conduct diagnostic ultrasound examinations in complex and unusual cases. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to perform diagnostic ultrasound examination on multiple areas of the body, including, but not limited to, the abdomen, pelvis, transvaginal, chest, small parts, thyroid, breast, and scrotum.

2. Ability to perform vascular studies such as vertebral, renal artery, aortic aneurysm, portal-systemic shunts, etc.

3. Ability to assist radiologists with biopsy procedures determining the location, depth, and required needle angle for the lesion to be sampled.

4. Ability to assist in surgical procedures and fluid aspirations.

(c) **Certification.** Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable.

(d) **Assignment.** This represents the full performance level for medical instrument technician (diagnostic ultrasound). At this level the technician is required to perform a full range of procedures including special
complicated examinations for which there are no standard instructions or procedures. They perform independent portable ultrasound examinations in the intensive care units, emergency room, surgery, and throughout the Medical Center when required. They also work independently on evenings, nights, and weekend tours of duty as scheduled and/or when on call.

(4) GS-9. In addition to the core competencies defined at the GS-8 full performance level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be specialized experience which demonstrates possession of the knowledge required in order to provide all aspects of diagnostic ultrasonography services. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of the more complex examination and treatment procedures and techniques in order to provide training and supervision in these procedures, to evaluate and initiate performance improvement projects, and to write policies, procedures, and protocols that pertain to diagnostic ultrasonography.

*2. Knowledge of JCAHO and other regulatory requirements.

3. Ability to communicate effectively and professionally with employees at varying grade levels.

*4. Ability to manage and supervise employees.

*5. Ability to provide, or provide for, staff development and training.

(c) **Certification.** Registration by Cardiovascular Credentialing International (CCI) or by the American Registry of Diagnostic Medical Sonographers (ARDMS) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** Non-supervisory diagnostic ultrasound technicians may have assignments that because of their nature substantially exceed the full performance level. The Professional Standards Board will review proposed non-supervisory special assignments for the GS-9 level and make a determination regarding their appropriateness. These assignments are expected to be relatively few in number and must represent substantial additional responsibility over the full performance level.

2. **Lead Diagnostic Ultrasound Technician.** In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.
3. **Supervisory Diagnostic Ultrasound Technician.** Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing diagnostic ultrasound technician services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

(5) **GS-10.** In addition to the core competencies defined at the GS-9 level, positions at this grade may be supervisory or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Advanced knowledge of complex and non-standard treatment and examination procedures and techniques.

*2. Ability to plan and assist in the establishment of a completely integrated treatment and examination program.

*3. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

*4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.

*5. Knowledge of and ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions.

(c) **Certification.** Registration by Cardiovascular Credentialing International (CCI) or by the American Registry of Diagnostic Medical Sonographers (ARDMS) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** There may be a rare non-supervisory position supporting this grade level. Such a position would typically include knowledge of standards of medical practice in applicable medico-legal responsibilities in diagnostic ultrasound procedures; developing protocols and clinical research projects;
developing and updating technical policy and procedure manuals; as well as teaching the correct methodology of diagnostic ultrasound procedures, theory of operations, and theory of interpretation of results to trainees.

2. **Supervisory Diagnostic Ultrasound Technician.** Individuals at this level plan and direct programs at affiliated medical centers and their satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory personnel and at least one subordinate team leader or supervisor. Typically these duties include assigning and evaluating the work of subordinate staff resolving problems which may interfere with patient examination or treatment; providing diagnostic ultrasonography technician services in more complex and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.
Appendix D – Medical Instrument Technician (Echocardiography)

(1) GS-6

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of the anatomy and physiology of the heart and great vessels.

2. Knowledge of cardiac arrhythmias and their relationship to hemodynamic conditions of the cardiac cycle.

3. Knowledge of basic cardiac ultrasound physics and the acoustic mechanisms by which high quality cardiac images are obtained.

4. Ability to set up and adjust the ultrasound equipment to meet the conditions of the examination and the patient and to operate the equipment for standardized, routine procedures.

5. Ability to interact with patients explaining procedures and positioning the patient for the procedure.

(c) Certification. Basic Cardiac Life Support (BCLS) certification is desirable.

(d) Assignment. Echocardiography technician assignments at this level involve performing routine, standardized cardiac ultrasound examinations under the supervision of a fully qualified cardiac sonographer. The work involves generating adequate gray scale images to define cardiac borders and learning to perform Doppler integration of cardiac valves for determination of flow velocities.

(2) GS-7

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided the individual with the knowledge, skills, and abilities to independently conduct difficult but standardized echocardiographic examinations. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Ability to scan transthoracic echocardiograms in all views with colorflow and some Doppler.

2. Ability to conduct cardiac testing to determine the severity and variety of cardiac problems, i.e., valvular dysfunction, myocardial wall kinesia, effusions, endocardial lesions, etc.

3. Knowledge of the set-up for transesophageal echocardiograms.
4. Ability to set up and adjust the ultrasound equipment to meet the conditions of the examination and the patient and to operate the equipment for more complex, but standardized procedures.

(c) Certification. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable.

(d) Assignment. At this level, medical instrument technicians (echocardiography) perform a range of standard, but complex, echocardiographic examinations with responsibility for calibrating all instruments prior to the procedure. They are expected to keep an accurate record of tests, daily logs, and videotapes. They maintain cidex logs.

3. GS-8

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided the overall knowledge, skills, and abilities to conduct diagnostic echocardiography examinations in complex and unusual cases. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills and Abilities

1. Ability to produce diagnostic quality images and Doppler frequency shift recordings using M-mode, two-dimensional, pulsed and continuous wave Doppler spectral display, and colorflow Doppler imaging.

2. Knowledge of normal echocardiographic findings and deviations produced by a wide variety of cardiovascular diseases.

3. Ability to perform complex procedures such as cardiac studies of the four chambers of the heart and valves using sector scanning techniques to detect stenotic and incompetent valves, chamber enlargement, and pericardial effusion and cardiovascular studies deriving pressure gradients across obstructed valves, etc.

4. Ability to perform complementary ultrasonic examinations (including noninvasive) transthoracic, Bubble studies and contrast echocardiography, (invasive) stress echocardiography, and transesophageal echocardiography.

5. Ability to adapt transducer positioning, instrument controls, and examination techniques to the individual patient being studied and the problem being evaluated including recognizing pertinent abnormalities and documenting abnormal findings.

(c) Certification. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable.

(d) Assignment. This represents the full performance level. Echocardiography technicians at this level identify and record anomalies indicative of disease, injury, or other medically significant condition from ultrasound imaging and simultaneous recordings of the Doppler. They incorporate the causes and results of a variety of symptoms and conditions into a plan of ultrasonic diagnostic examination. They change and develop sounding techniques to accommodate such variables as limited patient mobility, variation in
physical condition or dimension of the patient, presence of prosthesis or foreign objects, and ultrasonic response of different body parts. They produce diagnostic quality images and Doppler frequency recordings using M-mode, two-dimensional, and Doppler ultrasound.

(4) **GS-9.** In addition to the core competencies defined at the GS-8 full performance level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be experience which demonstrates possession of the knowledge required in order to provide all aspects of echocardiography services. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of the more complex examination and treatment procedures and techniques in order to provide training and supervision in these procedures, to evaluate and initiate performance improvement projects, and to write policies, procedures, and protocols, that pertain to Echocardiography.

*2. Knowledge of JCAHO and other regulatory requirements.*

3. Ability to communicate effectively and professionally with employees at varying grade levels.

*4. Ability to manage and supervise employees.*

*5. Ability to provide, or provide for, staff development and training.*

(c) **Certification.** Registration by Cardiovascular Credentialing International (CCI) as a Registered Cardiac Sonographer (RCS) or by the American Registry of Diagnostic Medical Sonographers (ARDMS) as a Registered Diagnostic Cardiac Sonographer (RDCS) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** Non-supervisory echocardiography technicians may have assignments that because of their nature substantially exceed the full performance level. The Professional Standards Board will review proposed non-supervisory special assignments for the GS-9 level and make a determination regarding their appropriateness. These assignments are expected to be relatively few in number and must represent substantial additional responsibility over the full performance level.

2. **Lead Echocardiography Technician.** In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.
3. **Supervisory Echocardiography Technician.** Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing Echocardiography Technician services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

(5) **GS-10.** In addition to the core competencies defined at the GS-9 level, positions at this grade may be supervisory or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Advanced knowledge of complex and non-standard treatment and examination procedures and techniques.

*2. Ability to plan and assist in the establishment of a completely integrated treatment and examination program.

*3. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

*4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.

*5. Knowledge of and ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions.

(c) **Certification.** Registration by Cardiovascular Credentialing International (CCI) as a Registered Cardiac Sonographer (RCS) or by the American Registry of Diagnostic Medical Sonographers (ARDMS) as a Registered Diagnostic Cardiac Sonographer (RDCS) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** There may be a rare non-supervisory position supporting this grade level. Such a position would typically include independently carrying out the most complex laboratory procedures such
as real-time 3D cardiac ultrasounds utilizing on-line and off line computer enhancement and
reconstruction technology and 3D reconstruction using off-line computers for rendering real-time 3D
images to specified parameters as well as teaching the correct methodology of echocardiography
procedures, theory of operations, and theory of interpretation of results to trainees.

2. **Supervisory Echocardiography Technician.** Individuals at this level plan and direct programs at
affiliated medical centers and satellite outpatient clinics and have full supervisory responsibility for a large
staff of non-supervisory personnel and at least one subordinate team leader or supervisor. Typically these
duties include assigning and evaluating the work of subordinate staff resolving problems which may interfere
with patient examination or treatment; providing echocardiography technician services in more complex and
non-standard cases; evaluating new products and equipment and making recommendations concerning
developments which would improve operations; participating as an instructor in the facility’s clinical training
program; making final decisions on selections based on recommendations from subordinate supervisors or
leads; evaluating performance; taking disciplinary action when necessary; and identifying educational or
training needs.
Appendix E – Electrocardiograph Technician (EKG)

(1) GS-6

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills and Abilities**

1. Ability to recognize special patient needs such as disabilities, impaired mobility, and complicating medical conditions in order to prepare and position the patient for the prescribed procedure.

2. Knowledge of the specialized equipment and accessories appropriate to Holter monitoring and ability to perform such tests.

3. Knowledge of universal precautions and sterilization techniques and ability to follow CDC guidelines in cleaning equipment.

4. Ability to monitor the patient for adverse reactions and take appropriate action.

5. Ability to operate the equipment to perform standard and routine highly specialized procedures including exercise stress testing.

(c) **Certification.** No certification is required; however, it is desirable that employees at this level have BCLS (Basic Cardiac Life Support) certification.

(d) **Assignment.** Medical instrument technicians (EKG) at this level receive and interpret physician’s requests for diagnostic procedures and/or treatments; explain the procedure to the patient to secure the patient’s confidence and cooperation; document the patient’s record; independently perform standardized testing monitoring the patient for adverse reactions; and operate, calibrate, and clean and/or sterilize commonly used equipment. Assignments at this level require knowledge of standard medical terminology as well as common diseases and their specific affects.

(2) GS-7

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided knowledge of the equipment, standard tests and procedures, and typical readings including arrhythmias and abnormalities. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of typical patient reactions and signs of distress including the ability to recognize, report and treat potentially lethal arrhythmias.
2. Knowledge of common equipment settings and standardized procedures plus knowledge of common errors and corrective measures.

3. Ability to modify procedures/positions to obtain the correct results with patients with complicating conditions such as amputations, Parkinson’s disease, structural defects, and scar tissue.

4. Ability to act as a mentor or preceptor to lower graded technicians.

5. Ability to conduct in-service training on the EKG equipment and related instrumentation.

(c) **Certification.** No certification is required; however, it is desirable that employees at this level have BCLS (Basic Cardiac Life Support) and ACLS (Advanced Cardiac Life Support) certifications.

(d) **Assignment.** This represents the full performance level. Medical instrument technicians (EKG) at this level operate and monitor electrocardiographic equipment to perform specialized examinations and studies involving exercise stress testing, ambulatory monitoring of arrhythmias, and indirect carotid pulse tracings on chronic patients. They monitor tracings to identify arrhythmias and when gross abnormalities appear, when to repeat certain procedures, when to stop test procedures, and when to get the immediate attention of a physician. They evaluate test results to determine appropriate machine adjustments and use alternative techniques and procedures when established procedures do not accomplish acceptable results. This includes adapting equipment and accessories to yield the best results during the examination. They edit and select an appropriate sample portion of the tracing for further interpretation by the physician.

(3) **GS-8.** In addition to the core competencies defined at the GS-7 full performance level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be experience which provided knowledge of advanced specialized procedures, the pharmacology related to this occupation, and knowledge of related acute disorders and diseases and their effects on organs and methods of treatment. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, 3, and 4 are appropriate for all positions at this level. KSAs 5 and 6 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of pharmacology related to specialized procedures.

2. Ability to provide briefings and orientations to hospital staff including physicians.

3. Knowledge of a variety of related acute disorders and diseases, their effects on organs, and methods of treatment.

4. Ability to perform more complex procedures such as SAECG (Signal Averaged ECG), Tilt table monitoring, electrophysiology monitoring, and event monitoring.
*5. Ability to provide, or provide for, staff development and training.

*6. Ability to manage and supervise employees.

(c) Certification. No certification is required; however, it is desirable that employees at this level have BCLS (Basic Cardiac Life Support) and ACLS (Advanced Cardiac Life Support) certifications.

(d) Assignments. Medical instrument technicians (EKG) at this level perform complicated examinations or treatments for which there are no standard instructions or procedures. They utilize knowledge of anatomy and physiology including an in-depth understanding of the functioning of the major systems and internal organs to interpret requests and to recognize the need for additional tests or a different position. Knowledge of pharmacology including the classification and administration of drugs, patient responses, and common dosages as related to this specialty is required. The technician has the ability to perform Signal Averaged ECG, Tilt table monitoring, electrophysiology monitoring, and event monitoring. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. Special Assignments. Non-supervisory medical instrument technician (EKG) may have assignments that because of their nature substantially exceed the full performance level. The Professional Standards Board will review proposed non-supervisory special assignments for the GS-8 level and make a determination regarding their appropriateness. These assignments are expected to be relatively few in number and must represent substantial additional responsibility over the full performance level.

2. Lead Medical Instrument Technician (EKG). In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.

3. Supervisory Medical Instrument Technician (EKG). Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing medical instrument technician (EKG) services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

4. GS-9. In addition to the core competencies defined at the GS-8 level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.

(a) Experience. At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) Demonstrated Knowledge, Skills, and Abilities. KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.
1. Knowledge of the more complex examination and treatment procedures and techniques such as SAECG, ETT, Tilt table monitoring, electrophysiology monitoring, and event monitoring in order to provide training and supervision in these procedures, to develop analysis interpretation formats, and to receive inquiries concerning results.

*2. Knowledge of JCAHO and other regulatory requirements.

3. Ability to communicate effectively and professionally with employees at varying grade levels.

*4. Ability to provide, or provide for, staff development and training.

*5. Ability to manage and supervise employees.

(c) Certification. Certification by Cardiovascular Credentialing International (CCI) as a Certified Cardiographic Technician (CCT) is highly desirable at this level. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. Special Assignments. Non-supervisory medical instrument technician (EKG) may have assignments that because of their nature substantially exceed the GS-8 level. The Professional Standards Board will review proposed non-supervisory special assignments for the GS-9 level and make a determination regarding their appropriateness. These assignments are expected to be few in number and must represent substantial additional responsibility.

2. Lead Medical Instrument Technician (EKG). In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.

3. Supervisory Medical Instrument Technician (EKG). Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing medical instrument technician (EKG) services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.
Appendix F – Medical Instrument Technician (Electroencephalography)

(1) GS-6

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of basic medical terminology, neuroanatomy, neurophysiology, and EEG interpretation.

2. Ability to position patients for the examination or treatment including using standard alternate positions for patient with common physical disabilities.

3. Ability to operate the appropriate EEG equipment to administer routine, standardized diagnostic or treatment procedures.

4. Knowledge of normal and abnormal results to recognize and report obvious abnormalities during procedures.

5. Knowledge of universal precautions and basic sterilization methods to clean instruments to prevent the spread of infectious diseases.

6. Knowledge of EEG and peripheral equipment to conduct routine maintenance and adjustment checks.

(c) **Certification.** No certification or registration is required; however, it is desirable that employees at this level have BCLS (Basic Cardiac Life Support) certification.

(d) **Assignment.** Operates and monitors EEG equipment in the EEG Lab, intensive care units, operating room, and the patient’s bedside. Performs a full range of standard, routine EEG examinations including routine awake and sleep recordings, electrocerebral silence recordings, multiple sleep latency recordings, intraoperative monitoring, electrocorticography. Performs nerve conduction studies using electromyography equipment. Prepares recordings for interpretation and performs a preliminary review and interpretation of the recordings.

(2) GS-7

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the positions to be filled. This would be experience which provided the individual with the knowledge, skills, and abilities to independently conduct difficult but standardized electroencephalography examinations. In addition, the candidate must demonstrate the following KSAs:
(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to perform more complex electroencephalography studies such as evoked potential (visual, auditory, somatosensory) and transcranial Doppler studies.

2. Knowledge of medication effects related to electroencephalography studies and clinical situations requiring medication.

3. Knowledge of life threatening or medically emergent testing or patient situations.

4. Ability to recognize artifacts (patient or environmental) and document, eliminate, or take proper measures to monitor the artifact.

(c) **Certification.** No certification or registration is required; however, it is desirable that employees at this level have BCLS (Basic Cardiac Life Support) and ACLS (Advanced Cardiac Life Support) certifications.

(d) **Assignment.** At this level, the medical instrument technician (EEG) independently performs routine but complex procedures and has advanced knowledge in certain areas. They are able to deal with difficult or more complex patients. They are able to identify and correct most artifacts. Procedures are fully explained to the patient and family members to set them at ease. Interpretative skills are sufficient to allow identification of more serious conditions requiring rapid intervention.

(3) **GS-8**

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided knowledge of the more complex procedures, the pharmacology related to this occupation, and knowledge of related acute disorders and diseases and their effects on organs and methods of treatment. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to interpret testing data to evaluate critical information for surgeons and other medical staff during testing procedures.

2. Knowledge of anatomy and physiology of the nervous system and the ability to understand the relationship of EEG and evoked potential testing in detecting states of disease and health.

3. Knowledge of behavior assessment during seizure attacks in order to insure adequacy of recordings during seizure discharges.

4. Knowledge of a variety of advanced EEG equipment and peripheral equipment such as equipment for brain mapping, video EEG telemetry systems with seizure detection computers, and spike analysis software.

5. Knowledge of anticonvulsant medications and their effects on the EEG as well as other frequently used pharmaceuticals.
6. Ability to adapt neurodiagnostic devices, parameters, and procedures to complex, unusual, and often critical situations.

(c) Certification. No certification or registration is required; however, it is desirable that employees at this level have BCLS (Basic Cardiac Life Support) and ACLS (Advanced Cardiac Life Support) certifications.

(d) Assignment. This represents the full performance level. Medical instrument technicians (EEG) at this level are expected to provide independent performance of a full range of procedures. The technician consistently delivers high quality studies for the most complex and non-routine procedures in difficult or demanding environments such as research, intraoperative monitoring, or intensive care monitoring. Procedures are tailored to clinical questions to be answered and may require additional monitors, electrodes, or other devices as clinically indicated. The technician interprets study results and brings to the attention of the physician or supervisor more subtle abnormalities that may require intervention. The technician will highlight portions of recordings of clinical importance for review by the clinical neurophysiologist and will accurately describe the concurrent behavior of the patient. Positive interaction with other health care staff to inform them of the indications for testing; the value, possible outcomes, and limitations of testing; and the policies of the laboratory are expected.

(4) GS-9. In addition to the core competencies defined at the GS-8 full performance level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.

(a) Experience. At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) Demonstrated Knowledge, Skills, and Abilities. KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of the more complex examination and treatment procedures and techniques in order to provide training and supervision in these procedures.

*2. Knowledge of JCAHO and other regulatory requirements.

3. Ability to communicate effectively and professionally with employees at varying grade levels.

*4. Ability to manage and supervise employees.

*5. Ability to provide, or provide for, staff development and training.

(c) Certification. Registration by the American Board of Registration of EEG, CNIM &EP Technologists (ABRET) or the American Association of Electrodiagnostic Technologists (AAET) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.
(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** Non-supervisory Electroencephalography Technicians may have assignments that because of their nature substantially exceed the full performance level. The Professional Standards Board will review proposed non-supervisory special assignments for the GS-9 level and make a determination regarding their appropriateness. These assignments are expected to be relatively few in number and must represent substantial additional responsibility over the full performance level.

2. **Lead Electroencephalography Technicians.** In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.

3. **Supervisory Electroencephalography Technician.** Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing medical instrument technician (EEG) services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

5. **GS-10.** In addition to the core competencies defined at the GS-9 level, positions at this grade may be supervisory or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be experience which demonstrates possession of the knowledge required to provide the most complex EEG Technician services and/or supervisory knowledge, skills, and abilities. Participation in recognized professional organizations as a Board examiner, in the development of curricula for training, or testing for the Board is evidence of competence. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Advanced knowledge of the most complex and non-standard treatment and examination procedures and techniques.

*2. Ability to plan and assist in the establishment of a completely integrated treatment and examination program.

*3. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

*4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.
5. Knowledge of and ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions.

(c) Certification. Registration by the American Board of Registration of EEG, CNIM &EP Technologists (ABRET) or the American Association of Electrodiagnostic Technologists (AEET) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. Special Assignments. There may be a rare non-supervisory position supporting this grade level. Such a position would typically include carrying out laboratory procedures independently in complex environments such as the operating room, monitoring suites, and clinical research laboratories as well as teaching the correct methodology of neurodiagnostic procedures, theory of operations, and theory of interpretation of results to trainees.

2. Supervisory Electroencephalography Technician. Individuals at this level plan and direct programs at affiliated medical centers and satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory personnel and at least one subordinate team leader or supervisor. Typically these duties include assigning and evaluating the work of subordinate staff resolving problems which may interfere with patient examination or treatment; providing Medical Instrument Technician (EEG) services in more complex and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.
Appendix G – Medical Instrument Technician (Hemodialysis)

(1) GS-6

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Skill in setting up, operating, and performing calibrations as required on a variety of dialysis equipment.

2. Skill in performing and interpreting test results (dialysate chemistries, water treatment testing for contaminates, etc.) including the ability to analyze deviations from the expected norm and responding appropriately.

3. Knowledge of American Association of Medical Instrumentation (AMMI) standards and unit policies as they relate to water treatment.

4. Knowledge of physiological and psychological changes and conditions related to end stage renal disease.

5. Ability to calculate dialysis baths according to the physician’s orders per patient by mixing critical concentrates, i.e., calcium, potassium, and bicarbonate.

6. Knowledge of Basic Cardiac Life Support (BCLS).

(c) Certification. No certification is required; however, it is desirable that employees at this level have BCLS (Basic Cardiac Life Support) certification.

(d) Assignment. Hemodialysis Technicians at this level operate and monitor dialysis systems for chronic patients; check patient condition and determine the proper treatment procedures, technique, and machine adjustments; understand medical treatment for patients with renal failure; administer prescribed medication and observe the patient for desired action or adverse reaction; and recognize and react to signs and symptoms that signal the onset of complications of dialysis including hypotension, disequilibrium, seizures, and arrhythmias.

(2) GS-7

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided knowledge the equipment, standard procedures, and typical machine problems and/or patient reactions to treatment. In addition, the candidate must demonstrate the following KSAs:
(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to assist the physician in more complex procedures such as central venous catheter insertion.

2. Ability to assist in training patients in home/self-care by teaching components of machine operation including water treatment and monitoring patients for compliance.

3. Ability to act as a mentor or preceptor to lower graded technicians.

4. Ability to analyze deviations from the expected, determine whether the deviations are machine or patient related, and respond according to the findings.

(c) **Certification.** No certification is required; however, it is desirable that employees at this level have BCLS (Basic Cardiac Life Support) and ACLS (Advanced Cardiac Life Support) certifications.

(d) **Assignment.** At this level in addition to providing hemodialysis for chronic patients, hemodialysis technicians assist the physician during central venous catheter insertion, assist in the training of patients for home dialysis/self-care, and act as a mentor or preceptor to lower graded hemodialysis technicians. At this level, the technician accepts responsibility and accountability for his/her own actions.

(3) **GS-8**

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided knowledge of the more complex procedures, the pharmacology related to this occupation, and knowledge of related acute disorders and diseases and their effects on organs and methods of treatment. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of the hemodialysis process and equipment needed for home/self care including knowledge of common machine problems and repairs to such equipment.

2. Knowledge of the equipment and procedures for peritoneal dialysis.

3. Ability to assist the physician with percutaneous renal biopsies and peritoneal catheter insertion.

4. Ability to provide instruction to dialysis patients in home/self care and in the maintenance of the equipment.

5. Ability to provide instruction for physicians, nurses, and other personnel in dialysis procedures, equipment operation and maintenance, etc.

(c) **Certification.** No certification is required; however, it is desirable that employees at this level have BCLS (Basic Cardiac Life Support) and ACLS (Advanced Cardiac Life Support) certifications.
(d) Assignment. This represents the full performance level. At this level the hemodialysis technician serves as a member of a dialysis team performing dialysis on acutely ill patients including those within an intensive care setting. Assignments involve performing both peritoneal and hemodialysis procedures. The dialysis technician may participate in percutaneous renal biopsies, watching the patient during the procedure and properly processing the specimen. Assists the physician in peritoneal catheter insertions and observes the patient for vital signs and provides post operative care. Provides instruction and monitors patients for home dialysis. Performs training of physicians, nurses, and technicians on hemodialysis and peritoneal dialysis techniques.

(4) GS-9. In addition to the core competencies defined at the GS-8 full performance level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.

(a) Experience. At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) Demonstrated Knowledge, Skills, and Abilities. KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of the more complex examination and treatment procedures and techniques such as those provided for acutely ill patients and peritoneal dialysis in order to provide training and supervision in these procedures.

*2. Knowledge of JCAHO and other regulatory requirements.

3. Ability to communicate effectively and professionally with employees at varying grade levels.

*4. Ability to manage and supervise employees.

*5. Ability to provide, or provide for, staff development and training.

(c) Certification. Certification by one of the following organizations is highly desirable at this level: Nephrology Certification Commission (NNCC), Board of Nephrology Examiners, Inc., Nursing and Technology (BONENT), National Nephrology Certification Organization (NNCO), and the International Certification Commission for Clinical Engineering and Biomedical Technology (ICC) in conjunction with the United States Certification Commission (USCC). Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. Special Assignments. Non-supervisory hemodialysis technicians may have assignments that because of their nature substantially exceed the full performance level. The Professional Standards Board will review
proposed non-supervisory special assignments for the GS-9 level and make a determination regarding their appropriateness. These assignments are expected to be relatively few in number and must represent substantial additional responsibility over the full performance level.

2. **Lead Hemodialysis Technician.** In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.

3. **Supervisory Hemodialysis Technician.** Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing dialysis technician services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

(5) **GS-10.** In addition to the core competencies defined at the GS-9 level, positions at this grade may be supervisory or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Advanced knowledge of the most complex and non-standard treatment and examination procedures and techniques.

*2. Ability to plan and assist in the establishment of a completely integrated treatment and examination program.

*3. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

*4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.

*5. Knowledge of and ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions.

(c) **Certification.** Certification by one of the following organizations is highly desirable at this level: Nephrology Certification Commission (NNCC), Board of Nephrology Examiners, Inc., Nursing and Technology (BONENT), National Nephrology Certification Organization (NNCO), and the International Certification Commission for Clinical Engineering and Biomedical Technology (ICC) in conjunction
with the United States Certification Commission (USCC). Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** There may be a rare non-supervisory position supporting this grade level. Such a position would typically include advising physicians on the creation of dialysate formulations not commercially available, determining contract requirements for all dialysis equipment, and evaluating the home environment and coordinating the modifications necessary for home dialysis.

2. **Supervisory Hemodialysis Technician.** Individuals at this level plan and direct programs at affiliated medical centers and their satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory personnel and at least one subordinate team leader or supervisor. Typically these duties include assigning and evaluating the work of subordinate staff resolving problems which may interfere with patient examination or treatment; providing dialysis technician services in more complex and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.
Appendix H – Medical Instrument Technician (Perfusion)

(1) GS-9

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This represents the entry level for medical instrument technician (perfusion) positions. Applicants must demonstrate experience, education, or training which provided the basic knowledge, skills, and abilities to maintain extracorporeal circulation during heart surgery. This may evidenced by certification by the American Board of Cardiovascular Perfusion (ABCP) as a Certified Clinical Perfusionist. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of the equipment and supplies needed for safe conduct of cardiopulmonary by-pass.

2. Knowledge of counter pulsation life support and insertion, maintenance, and removal of the intraaortic balloon pump.

3. Knowledge of blood sparing equipment (its uses, indications, and contraindications), blood banking procedures, blood storage and administration, and blood components (including platelet gel and sequestration).

4. Ability to operate ventricular assist devices (VAD) and assist with implantation, transportation, and removal of the device.

5. Knowledge of blood gases (using alpha stat or ph stat measures) and ability to analyze and apply lab results to patients under direct care on by-pass or VAD.

(c) Certification. Certification by the American Board of Cardiovascular Perfusion (ABCP) as a Certified Cardiovascular Perfusionist (CCP) is highly desirable.

(d) Assignment. Medical instrument technicians (perfusion) at this level operate the heart-lung machine, intra-aortic balloon pump, cell saver and blood salvaging equipment, and ventricular assist devices during open heart and coronary by-pass surgery. They analyze blood gasses and laboratory results in preparation for cardiopulmonary by-pass or while conducting cardiopulmonary by-pass.

(2) GS-10

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the positions being filled. This would be experience as a clinical perfusionist which provided the knowledge, skills, and abilities to function as a full member of the surgical team on the most critical and complex cases. In addition, the candidate must demonstrate the following KSAs:
(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of occupation specific pharmacology and ability to give drug therapy and medications as necessary to maintain homeostasis.

2. Ability to maintain intra-operative and initial post-operative files of extracorporeal circulation data records and patient response postoperatively.

3. Ability to provide instruction for physicians, nurses, residents, medical and nursing students, and other personnel in perfusion procedures, equipment operation and maintenance, etc.

(c) **Certification.** Certification by the American Board of Cardiovascular Perfusion (ABCP) as a Certified Cardiovascular Perfusionist (CCP) is highly desirable.

(d) **Assignment.** This represents the full performance level. Medical instrument technicians (perfusion) at this level operate the heart-lung machine, intra-aortic balloon pump, cell saver and blood salvaging equipment, and ventricular assist devices during open heart and coronary by-pass surgery for patients representing the most complex and critical cases. They analyze blood gasses and laboratory results in preparation for cardiopulmonary by-pass or while conducting cardiopulmonary by-pass. They may also operate the equipment during heart transplantation. This could include participating as part of the team for retrieval and transportation of the donor heart. They also provide training to lower grade perfusion technicians, cardiac catheterization technicians, and ICU staff regarding all aspects of perfusion services.

(3) **GS-11**

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the position to be filled, and must fully meet the KSAs at that level. This would be experience as a clinical perfusionist which provided the knowledge, skills, and abilities to function as a chief technician and/or program manager. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities**

*1. Knowledge of quality assurance and performance improvement measures for perfusion programs.*

*2. Ability to identify training needs for lower graded staff and provide, or provide for this training.*

(c) **Certification.** Certification by the American Board of Cardiovascular Perfusion (ABCP) as a Certified Cardiovascular Perfusionist (CCP) is highly desirable.

(d) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Medical Instrument Technicians (Perfusion) at this level function as Chief Technicians and/or program directors for the perfusion program. They are responsible for evaluating quality control and developing performance improvement programs for the program. They provide administrative oversight for lower graded Perfusion Technicians and for other personnel assigned to the program.
Appendix I – Medical Instrument Technician (Polysomnography)

(1) GS-6

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of standard, computerized polysomnographs for recording continuous all night physiological data including EEG, EOG, EKG, EMG and respiratory parameters.

2. Knowledge of standard devices such as oximeters, respiratory effort devices, nasal pressure devices, thermistors, thermocouples, continuous positive airway pressure (CPAP) machines, and laboratory computers including the ability to calibrate and operate the equipment and recognize and eliminate recording artifacts.

3. Knowledge of medical terminology and medical record organization to review medical records, sleep study orders, consent forms, medical charts, etc.

4. Knowledge of polysomnographic procedural protocols (including overnight sleep studies, MSLT, MWT, PAP, etc.).

5. Knowledge of basic anatomy and physiology and the international 10-20 electrode placement system in order to conduct the sleep studies.

(c) Certification. No certification or registration is required at this level. Basic Cardiac Life Support (BCLS) certification is desirable.

(d) Assignment. Polysomnography (PSG) Technicians at this level perform a full range of standard, routine examinations including overnight sleep studies, MSLT (Multiple Sleep Latency Test), MWT (Maintenance of Wakefulness Test), and PAP (Positive Airway Pressure Titration).

(2) GS-7

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided the individual with the knowledge, skills, and abilities to independently conduct difficult but standardized polysomnography examinations. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of CPAP function and operation to select and fit appropriate PAP patient interface devices.

2. Ability to independently titrate and document PAP level to achieve therapeutic goals.

4. Knowledge of Bi-Level pressure titrations.

5. Ability to recognize changes seen during the PSG tracing and identify all stages of sleep. This includes the ability to score and analyze sleep stages in clinical polysomnography recordings.

(c) Certification. No certification or registration is required. Basic Cardiac Life Support (BCLS) certification is desirable.

(d) Assignment. At this level the Polysomnography Technician performs a full range of standard, but complex, polysomnography examinations with responsibility for properly and accurately calibrating all instruments prior to the beginning of the PSG tracing and selection of appropriate electrode montages and sensitivity and filter settings to elicit the best possible tracings. They independently determine the need for CPAP during all night sleep studies for sleep apnea. They may administer nerve conduction velocity tests.

(3) GS-8

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided a knowledge of the more complex procedures as well as knowledge of the uncommon and/or rare sleep disorders. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Advanced knowledge or the International Classification of Sleep Disorders and the ability to recognize uncommon and/or rare sleep disorders.

2. Ability to summarize and report polysomnographic data in narrative form.

3. Knowledge of event characteristics (e.g., respiratory, cardiac, sleep stage, seizures, etc.) and ability to take appropriate action.

4. Ability to provide briefings and orientation to hospital staff including physicians.

(c) Certification. No certification or registration is required. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) Assignment. This represents the full performance level. At this level Polysomnographic Technicians are able to interact fully with the patient and physician to diagnose sleep disorders including those that are uncommon or rare. They are able to conduct full sleep studies including overnight studies and evaluate the relationship of events, sleep stages, and possible medical conditions which influence or result from events occurring during sleep. They anticipate problems likely to occur during the sleep study and prepare for such situations, make changes in established procedures, or recommend alternative courses of action. They are able to mentor lower graded technicians.
(4) **GS-9.** In addition to the core competencies defined at the GS-8 level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be experience which demonstrates possession of the knowledge required to provide all aspects of polysomnography services. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of the more complex examination and treatment procedures and techniques in order to provide training and supervision in these procedures, to evaluate and initiate performance improvement projects, and to write policies, procedures, and protocols, that pertain to Polysomnography.

2. Knowledge of JCAHO and other regulatory requirements.

3. Ability to communicate effectively and professionally with employees at varying grade levels.

4. Ability to manage and supervise employees.

5. Ability to provide, or provide for, staff development and training.

(c) **Certification.** Registration by the Board of Registered Polysomnographic Technologists (BRPT) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** Non-supervisory polysomnography technicians may have assignments that because of their nature substantially exceed the full performance level. The Professional Standards Board will review proposed non-supervisory special assignments for the GS-9 level and make a determination regarding their appropriateness. These assignments are expected to be relatively few in number and must represent substantial additional responsibility over the full performance level.

2. **Lead Polysomnography Technician.** In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.

3. **Supervisory Polysomnography Technician.** Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing polysomnography technician services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new
staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

(5) **GS-10.** In addition to the core competencies defined at the GS-9 level, positions at this grade may be supervisory or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be experience which demonstrates possession of the knowledge required to provide the most complex polysomnography technician services. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Advanced knowledge of complex and non-standard treatment and examination procedures and techniques.

   *2. Ability to plan and assist in the establishment of a completely integrated treatment and examination program.

   *3. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

   *4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.

   *5. Knowledge of and ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions.

(c) **Certification.** Registration by the Board of Polysomnographic Technologists (BRPT) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** There may be a rare non-supervisory position supporting this grade level. Such a position would typically include producing preliminary polysomnographic interpretations and recommendations for presentations at case conferences as well as developing, updating, and annually reviewing all sleep laboratory policies and procedures to assure that the laboratory operates according to national standards of practice.
2. **Supervisory Polysomnographic Technician.** Individuals at this level plan and direct programs at affiliated medical centers and satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory personnel and at least one subordinate team leader or supervisor. Typically these duties include assigning and evaluating the work of subordinate staff resolving problems which may interfere with patient examination or treatment; providing polysomnography technician services in more complex and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.
Appendix J – Medical Instrument Technician (Pulmonary Function)

(1) GS-6

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of proper administration of metered dose inhalers and the various medications associated with bronchodilation including understanding of the contraindications and dangers of such pharmaceutical agents.

2. Knowledge of the proper use and placement of pulse oximetry equipment and sensors.

3. Knowledge of universal precautions and aseptic techniques for cleaning equipment to provide a safe environment for performing tests.

4. Ability to perform routine, standardized pulmonary function tests.

5. Ability to recognize adverse reactions to treatment that may indicate the need to terminate procedures and to call the physician’s attention to unusual reactions to administered medications.

(c) Certification. No certification or registration is required; however it is desirable that technicians at this level have Basic Cardiac Life Support (BCLS) certification.

(d) Assignment. Technicians at this level perform routine pulmonary function tests in a hospital or clinic. They administer inhaled medications for the purpose of bronchodilator response. They operate, calibrate, and maintain commonly used instruments such as blood gas analyzers, oximeters, and gas nebulizers. They conduct standardized tests such as forced and slow vital capacity, blood gas analysis, and flow volume loops. They instruct patients when and how to perform breathing exercises. They calculate and measure blood gas values. They use aseptic methods to draw blood samples from patients and properly use and clean equipment.

(2) GS-7

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided knowledge the equipment, standard tests and procedures, and typical readings. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Ability to perform arterial punctures, analyze blood gases, and interpret blood gas measurements including the ability to determine if the sample is accurate for reporting, assess for inaccuracy, and correct inaccurate samples.
2. Knowledge of lung mechanics and ability to perform a variety of spirometry and complex pulmonary function tests on both ambulatory and non-ambulatory patients.

3. Ability to determine the order of priority for administering multiple pulmonary function tests, choose the most appropriate equipment and techniques for the type of ventilatory problem, and determine the proper sequence of steps to complete the testing.

4. Ability to measure the pulmonary function of patients for the purpose of diagnosing disease, determining responsiveness to treatment, and assessing disability.

(c) Certification. No certification or registration is required; however, Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable for employees at this level.

(d) Assignment. Assignments at this level require the technician to have knowledge of the basic principles of pulmonary physiology sufficient to understand impairment of lung function and to be able to utilize that information in the design of individualized tests to help solve specific problems. They perform complex but standardized tests and procedures. They fully explain procedures to the patient and are aware of possible complications and adverse reactions to the performance of pulmonary function testing.

(3) GS-8

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which provided knowledge of the more complex procedures, the pharmacology related to this occupation, and knowledge of related acute disorders and diseases and their effects on organs and methods of treatment. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Ability to perform special procedures pulmonary function testing which may include cardiopulmonary exercise testing, exercise induced asthma testing, Shunt testing, and/or P-100 testing.

2. Knowledge of airway management, pulmonary pharmacology, CPR, and oxygen administration.

3. Knowledge of bio-testing procedures, syringe quality control procedures, and ability to analyze results for compliance.

4. Ability to perform quality control on blood gas analyzers as required by accrediting bodies.

5. Ability to provide training to lower graded pulmonary function technicians and students including teaching the correct methodology of pulmonary function procedures and theory of interpretation of results.

(c) Certification. No certification or registration is required; however, Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable for employees at this level.

(d) Assignment. This represents the full performance level. At this level assignments are characterized by performance of the complex, non-routine Pulmonary Function tests and procedures. Technicians are
expected to provide emergency airway management when patients deteriorate in the Laboratory including bronchodilator nebulization, provision of supplemental oxygen, bag-and-mask ventilation, cardiopulmonary resuscitation and to assist with or perform airway intubation and defibrillation.

(4) GS-9. In addition to the core competencies defined at the GS-8 full performance level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.

(a) Experience. At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) Demonstrated Knowledge, Skills, and Abilities. KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of the more complex examination and treatment procedures and techniques such as cardiopulmonary pulmonary exercise testing, exercise induced asthma testing, Shunt testing, and/or P-100 testing in order to provide training and supervision in these procedures, to develop analysis interpretation formats, and to receive inquiries concerning results.

*2. Knowledge of JCAHO and other regulatory requirements.

3. Ability to communicate effectively and professionally with employees at varying grade levels.

*4. Ability to manage and supervise employees.

*5. Ability to provide, or provide for, staff development and training.

(c) Certification. Certification by the National Board of Respiratory Care as a Certified Pulmonary Function Technologist (CPFT) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. Special Assignments. Non-supervisory pulmonary function technicians may have assignments that because of their nature substantially exceed the full performance level. The Professional Standards Board will review proposed non-supervisory special assignments for the GS-9 level and make a determination regarding their appropriateness. These assignments are expected to be relatively few in number and must represent substantial additional responsibility over the full performance level.

2. Lead Pulmonary Function Technician. In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.

II-G27-54
3. **Supervisory Pulmonary Function Technician.** Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing pulmonary function technician services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

(5) **GS-10.** In addition to the core competencies defined at the GS-9 level, positions at this grade may be supervisory or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Advanced knowledge of complex and non-standard treatment and examination procedures and techniques.

*2. Ability to plan and assist in the establishment of a completely integrated treatment and examination program.

*3. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

*4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.

*5. Knowledge of and ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions.

(c) **Certification.** Certification by the National Board of Respiratory Care as a Certified Pulmonary Function Technologist (CPFT) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable for employees at this level.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

Supervisory Pulmonary Function Technician. Individuals at this level plan and direct programs at affiliated medical centers and satellite outpatient clinics and have full supervisory responsibility for a
large staff of non-supervisory personnel and at least one subordinate team leader or supervisor. Typically these duties include assigning and evaluating the work of subordinate staff resolving problems which may interfere with patient examination or treatment; providing pulmonary function technician services in more complex and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.
Appendix K – Medical Instrument Technician (Vascular)

(1) GS-6

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the position to be filled. This would be experience which demonstrates the knowledge, skills, and abilities to perform routine, standardized vascular ultrasound procedures where the technician is not expected to deviate from established procedures. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to perform standardized, routine vascular ultrasound procedures and/or examinations of upper and lower extremity, abdominal, and extra-cranial cerebrovascular vessels.

2. Knowledge of anatomy and physiology including location and function of major body organs and structures as they relate to vascular ultrasonography.

3. Ability to prepare preliminary reports from the examination including documentation of procedural difficulties in the medical record.

(c) **Certification.** Basic Cardiac Life Support (BCLS) certification is desirable.

(d) **Assignment.** Assignments at this level are characterized by the performance of routine, standardized vascular ultrasound procedures and techniques in accordance with instructions.

(2) GS-7

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the positions to be filled. This would be experience which demonstrates that the technician has the knowledge, skills, and abilities to perform complex procedures requiring the ability to select appropriate equipment based on symptomology and the objective of the examination and the ability to adapt procedures and techniques to enhance diagnostic results. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Ability to perform noninvasive vascular ultrasound procedures or examinations of upper and lower extremity, abdominal, and extra-cranial cerebrovascular vessels which require adaptation of procedures or instruments.

2. Knowledge of anatomy and physiology including location and function of major body organs and structures as they relate to vascular ultrasonography. This would also include knowledge of physiological influences on the hemodynamics of blood flow.

3. Knowledge of pharmacology and chemistry to understand drug reactions, action, effects, and method of administration specifically related to vascular ultrasonography.
4. Knowledge of disease entities that impact the vascular system and their influence on the test results to select the appropriate procedures.

5. Ability to obtain a patient history and perform and appropriate physical assessment based on patient presentation and type of exam to include observation, inspection, auscultation, and palpation.

(c) Certification. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable.

(d) Assignment. At the GS-7 level the medical instrument technician (vascular) is expected to perform complex noninvasive vascular testing for diagnostic purposes. These procedures are performed with a variety of testing equipment and modalities to include B mode scanning, duplex imaging, Doppler spectral analysis, photoplethysmography, and upper and lower extremity, digit, and penile blood pressures. The technician must be able to deviate from normal technique when necessary.

3) GS-8

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, abilities, and other characteristics related to the duties of the position to be filled. This would be experience which demonstrates the knowledge, skills, and abilities to perform noninvasive vascular ultrasound procedures as a senior technician. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of cross-sectional and longitudinal vascular anatomy in normal and abnormal vessels, anatomical planes and tissue structures, physiologic effects of disease entities that impact the vascular system, signs and symptoms of acute and chronic vascular disease, and the characteristic appearance of aneurysms, pseudoaneurysms, thromboses, stenoses, occlusions, AV fistulae, and morphology of atherosclerotic plaque formulation.

2. Ability to provide Doppler information of peripheral vessels; demonstrate characteristic differences related to the organs they supply; accurately quantify carotid artery stenoses; and identify and correlate specific waveform analysis, plethysmographic tracings, velocity changes, and pressure gradients characteristic of normal, obstructed, or occluded vessels or grafts.

3. Ability to perform intracranial (transcranial) vascular examinations.

4. Ability to operate the instruments to extract the highest quality image utilizing the appropriate transducer frequency, Doppler angle, focal zones, gain, depth, color map, wall filter, and sample volume.

5. Ability to provide objective data to document progression or regression of disease.

(c) Certification. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable.
(d) **Assignment.** This represents the full performance level. At the GS-8 level the medical instrument technician (vascular) functions as a senior technician. They are expected to perform the full range of vascular ultrasound procedures including the most complex and non-routine and to make appropriate adjustments in established procedures and techniques to obtain the results required for clinical diagnosis and documentation. At this level the technician would also have the ability to perform intracranial (transcranial) vascular examinations.

(4) **GS-9.** In addition to the core competencies defined at the GS-8 full performance level, positions at this grade may be lead, supervisory, or non-supervisory with specialized advanced knowledge and assignments.

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. This would be experience which demonstrates the knowledge, skills, and abilities to fully perform all vascular ultrasound tests and examinations and to function as a technical director of the vascular laboratory and provide oversight and/or guidance to other technicians. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Knowledge of the more complex examination and treatment procedures and techniques in order to provide training and supervision in these procedures, to evaluate and initiate performance improvement projects, and to write policies, procedures, and protocols, that pertain to vascular ultrasonography.

*2. Knowledge of JCAHO and other regulatory requirements.

3. Ability to communicate effectively and professionally with employees at varying grade levels.

*4. Ability to manage and supervise employees.

*5. Ability to provide, or provide for, staff development and training.

(c) **Certification.** Registration by Cardiovascular Credentialing International (CCI) as a Registered Vascular Sonographer (RVS) or by the American Registry of Diagnostic Medical Sonographers (ARDMS) as a Registered Vascular Technologist (RVT) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are also desirable.

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Special Assignments.** Non-supervisory vascular technicians may have assignments that because of their nature substantially exceed the full performance level. The Professional Standards Board will review proposed non-supervisory special assignments for the GS-9 level and make a determination regarding their appropriateness. These assignments are expected to be relatively few in number and must represent substantial additional responsibility over the full performance level.
2. Lead Vascular Technician. In certain programs, either because of their size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate.

3. Supervisory Vascular Technician. Individuals in this assignment assume full administrative and professional responsibility for planning and directing the work of subordinate technicians. Typically these duties include assigning and evaluating the work of subordinate staff; providing Vascular Sonography services in more complex cases; reviewing and making recommendations regarding new and emerging procedures; providing instruction and training to new staff; interviewing candidates for positions; recommending selections, advancements, promotions; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

(5) GS-10. In addition to the core competencies defined at the GS-9 level, positions at this grade may be supervisory or non-supervisory with specialized advanced knowledge and assignments.

(a) Experience. At least 1 year of experience comparable to the next lower grade level, which is directly related to the duties of the position to be filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) Demonstrated Knowledge, Skills, and Abilities. KSAs 1, 2, and 3 are appropriate for all positions at this level. KSAs 4 and 5 are to be used in accordance with their appropriateness for the specific assignment.

1. Advanced knowledge of the most complex and non-standard treatment and examination procedures and techniques.

*2. Ability to plan and assist in the establishment of a completely integrated treatment and examination program.

*3. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

*4. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget.

*5. Knowledge of and ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions.

(c) Certification. Registration by Cardiovascular Credentialing International (CCI) as a Registered Vascular Sonographer (RVS) or by the American Registry of Diagnostic Medical Sonographers (ARDMS) as a Registered Vascular Technologist (RVT) is highly desirable. Basic Cardiac Life Support (BCLS) and Advanced Cardiac Life Support (ACLS) certifications are desirable.

(d) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.
1. **Special Assignments.** There may be a rare non-supervisory position supporting this grade level. Such a position would typically include knowledge of standards of medical practice in applicable medico-legal responsibilities in vascular ultrasound procedures as well as teaching the correct methodology of vascular ultrasound procedures, theory of operations, and theory of interpretation of results to trainees.

2. **Supervisory Vascular Technician.** Individuals at this level plan and direct programs at affiliated medical centers and their satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory personnel and at least one subordinate team leader or supervisor. Typically these duties include assigning and evaluating the work of subordinate staff resolving problems which may interfere with patient examination or treatment; providing vascular sonography services in more complex and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

II-G27-62

[A]ppendix L – Gastroenterology (GI) Technician

(1) GS-6

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, and abilities related to the duties of the position to be filled. In addition, the candidate must demonstrate the following KSAs:

(b) **Demonstrated Knowledge, Skills and Abilities**

1. Ability to set up endoscopy equipment, ensuring endoscopes and ancillary equipment functions properly.

2. Ability to aid the physician with standard and routine procedures such as colonoscopy and esophagogastroduodenoscopy (EGD).

3. Knowledge of medical terminology and human anatomy in order to assist practitioner with routine standardized gastroenterology procedures.

4. Ability to interact with patients explaining procedures and positioning the patient for the procedure, recognizing disabilities or impaired mobility and assisting the patient as necessary.

5. Ability to reprocess and maintain specialty critical reusable medical equipment (RME), following approved Standard Operating Procedures (SOPs) and universal precautions.

6. Ability to use basic computer systems and programs to record patient and endoscopic data, adhering to patient privacy and information security policies.

7. Ability to manually clean and disinfect non-critical reusable equipment and surfaces, dispose of one-time-use equipment and trash per facility policy, and restock supplies such as linens, suction equipment, and cleaning products.

(c) **Certification.** No certification is required; however, it is desirable that employees at this level have Basic Life Support (BLS) certification.

(d) **Assignment.** Technicians at this level aid the staff with procedures which are routine and standardized in nature. They explain the procedure to the patient to secure the patient’s confidence and cooperation; position patients for procedures; and restock linen and consumable supplies. They set-up, clean, and ensure proper performance of the endoscopic equipment; and prepare the procedure rooms for turn-over, adhering to universal precautions and SOPs. The technician logs procedure and reprocessing data, adhering to patient privacy and information security policy. Assignments at this level require knowledge of basic medical terminology as well as common gastrointestinal anatomy.
(2) GS-7 GI Technician (Full Performance Level)

(a) Experience. At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, and abilities related to the duties of the position to be filled. This would be experience which provided knowledge of proper performance of endoscopic equipment and procedures. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Knowledge of endoscopic equipment and use in basic and complex endoscopic procedures.
2. Knowledge of anatomy and physiology related to the GI system, with ability to recognize and report obvious abnormalities during procedures.
3. Ability to assist physician with specialized, complex procedures.
4. Knowledge of universal precautions and disinfection techniques and ability to follow SOP’s to clean reusable medical equipment (RME).
5. Ability to collaborate, communicate, and demonstrate customer service skills and interpersonal skills with all healthcare professionals to ensure quality and continuity of care.
6. Ability to use basic computer systems and programs to record patient and endoscopic data, adhering to patient privacy and information security policies.
7. Ability to deliver patient care, including vital sign measurements and medication administration.

(c) Certification. No certification is required; however, it is desirable that employees at this level have BLS certification.

(d) Assignment. This represents the full performance level. Technicians at this level function with minimal instruction, assisting the staff with complex specialized procedures such as ERCP and endoscopic ultrasound (EUS). They are proficient with GI endoscopic equipment and ensure proper performance of endoscopic equipment; select alternate equipment or adjust equipment settings to accommodate patient needs and produce high quality technique. They collect, process, and label all specimens; train other technicians in basic endoscopic procedures; work in and outside the GI unit offering technician support during emergent and on-call endoscopic cases; and assist the nurse in patient care duties such as obtaining vital signs, dressing and documenting all pertinent information in the patient’s records. They inventory and maintain par levels of specialty equipment for the endoscopy unit.
(3) **GS-8** (Positions at this grade may be lead or non-supervisory with specialized advanced knowledge and assignments.)

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, and abilities related to the duties of the position to be filled. This would be experience which provided knowledge of advanced specialized gastroenterology procedures. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities.** KSAs 1, 2, 3, and 4 are appropriate for all positions at this level. KSA 5 is to be used as appropriate for the specific assignment.

1. Knowledge of complex gastroenterology procedures, such as ERCP with spy glass, ablation procedures, mucosal resection procedures, fine needle aspiration procedures and capsule studies.

2. Ability to provide briefings and orientations to hospital staff including physicians.

3. Knowledge of regulatory and advisory agencies such as Joint Commission, Occupational Safety and Health Administration (OSHA), Society of Gastroenterology Nurses and Associates (SGNA), American Society for Gastrointestinal Endoscopy (ASGE), and applicable laws such as the Health Insurance Portability and Accountability Act (HIPPA).

4. Knowledge of medical terminology related to GI and biliary systems used to identify pathology or for specimen identification and procedure documentation and knowledge of advanced anatomy and physiology to recognize obvious abnormalities during procedures.

*5. Ability to provide staff development and training.

(c) **Certification.** No certification is required; however, it is desirable that employees at this level have SGNA core level one and two certifications (BLS and ACLS).

(d) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

1. **Advanced GI Technician.** Non-supervisory GI technicians may have assignments that because of the nature of the duties, substantially exceed the full performance level. They assist with the most highly complex procedures such as mucosal resection and ablation, fine needle aspiration, and double balloon colonoscopy, using a variety of highly complex ancillary equipment. They train technicians and other staff to assist with endoscopic procedures; may assist with daily assignments of technicians, procedural room assignments, and ordering of specialty equipment. They may trial new equipment and coordinate major repairs or installation of equipment with vendors and other facility departments; arrange vendor training and other educational in-services for the endoscopy staff. They may serve on GI related committees, incorporating practice improvement measures.
2. **Lead GI Technician.** In certain programs, either because of size and scope or because of a lack of specific supervisory positions, lead positions may be appropriate to provide daily guidance to the GI technicians. Lead Technicians will be the “superusers” responsible for answering questions for all staff on the endoscopic equipment. They will have the responsibility for daily workload assessments, assigning work, and assuring proper staffing coverage; provide performance input for evaluation and award purposes; evaluate training records; and determine educational needs of the technician staff. They assist the practitioner with the most complex and non-standard procedures consisting of difficult endoscopic intubation through strictures. They assist special needs patients through the endoscopic procedure, ensuring those with physical or mental limitations are given the necessary physical or non-medicinal interventional support measures. They participate in quality improvement measures, recommending and implementing practice changes when indicated.

(4) **GS-9 Supervisory GI Technician**

(a) **Experience.** At least 1 year of experience comparable to the next lower grade level which demonstrates the knowledge, skills, and abilities related to the duties of the position to be filled. This would be experience which provided knowledge of advanced specialized gastroenterology procedures. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Advanced knowledge of complex gastroenterology procedures, such as ERCP with spy glass, ablation procedures, mucosal resection procedures, fine needle aspiration procedures and capsule studies.

2. Ability to provide briefings and orientations, staff development and training to hospital staff including physicians.

3. Knowledge of professional, legal, and ethical standards inherent to patient safety and rights.

4. Ability to plan and assist in the establishment of integrated treatment and examination programs.

5. Ability to evaluate new products and equipment and make recommendations concerning developments which would improve operations.

6. Ability to manage the fiscal matters of the functions supervised (which would include fund controls, contracts, and equipment expenditures), forecast resource and equipment needs, and administer the allocated budget

7. Ability to provide the full range of supervisory duties which would include responsibility for assignment of work to be performed; performance evaluation; selection of staff; and recommendation of awards, advancements, and, when appropriate, disciplinary actions.
(c) **Certification.** No certification is required; however, it is desirable that employees at this level have SGNA core level one and two certifications (BLS and ACLS).

(d) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Individuals at this level plan and direct programs at affiliated medical centers and their satellite outpatient clinics and have full supervisory responsibility for a large staff of non-supervisory personnel. Typically these duties include assigning and evaluating the work of subordinate staff; resolving problems which may interfere with patient examination or treatment; providing GI Technician services in more complex and non-standard cases; evaluating new products and equipment and making recommendations concerning developments which would improve operations; participating as an instructor in the facility’s clinical training program; making final decisions on selections based on recommendations from subordinate supervisors or leads; evaluating performance; taking disciplinary action when necessary; and identifying educational or training needs.

**Authority:** 38 U.S.C. §§ 7402403.}
APPENDIX G-28. PHARMACY TECHNICIAN QUALIFICATION STANDARD
GS-661
Veterans Health Administration

1. COVERAGE. This standard applies to all pharmacy technician positions in the Veterans Health Administration (VHA). Under the supervision of a pharmacist, pharmacy technicians perform routine pharmacy functions including receiving prescriptions from patients in writing or electronically from physicians. Pharmacy technicians prepare prescriptions by counting, pouring, weighing, measuring, and mixing the medication if necessary. Pharmacy technicians maintain patient profiles, prepare insurance claim forms, stock, and take inventory of medications. Pharmacy technicians prepare medications for inpatients in various settings, including sterile product preparation.

2. BASIC REQUIREMENTS

a. Citizenship. Citizen of the United States. (Noncitizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

b. Education or Experience. A high school diploma or equivalent; or at least 3 months experience.

c. Certification. Certification by the National Pharmacy Technician Certification Board (PTCB) is required at grades GS-6 and above.

d. Loss of Credential. An employee in this occupation who fails to obtain licensure/certification/registration within the required time frame, or who fails to maintain the required licensure/certification/registration must be removed from the occupation, which may also result in termination of employment.

For occupations which require an active credential (licensure/certification/registration) at all grade levels, at the discretion of the appointing official, an employee may be reassigned to another occupation for which he/she qualifies if a placement opportunity exists. For occupations which require an active credential (licensure/certification/registration) in assignments above the full-performance level only, at the discretion of the appointing official, an employee may remain at an appropriate lower grade level in the occupation when both of the following apply: the credential is not a requirement and a placement opportunity exists.”

e. Grandfathering Provision. The following is the standard grandfathering policy for all Title 38 hybrid qualification standards. Some of these provisions may not apply to this occupation. Please carefully review the qualification standard to determine the specific education and/or licensure/certification/registration requirements that apply to this occupation.

All persons employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:
Such employees in an occupation that does not require a licensure/certification/registration, may be reassigned, promoted, or demoted within the occupation.

Such employees in an occupation that requires a licensure/certification/registration, may be reassigned, promoted up to and including the full performance (journey) level, or demoted within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

Such employees in an occupation that requires a licensure/certification/registration only at higher grade levels must meet the licensure/certification/registration requirement before they can be promoted to those higher grade levels.

Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.

If an employee who was retained in an occupation listed in 38 U.S.C. § 7401(3) under this provision leaves that occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

g. English Language Proficiency. Pharmacy technicians appointed to direct patient care positions must be proficient in spoken and written English in accordance with chapter 2, section D, paragraph 5a, this part.

3. GRADE REQUIREMENTS

a. Definitions

(1) Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills, abilities, and other characteristics associated with the scope of pharmacy technician practice.

(2) Quality of Experience. To be creditable, pharmacy technician experience must be documented on the application and verified in an employment reference, or through other independent means.

(3) Part-time Experience. Part-time experience as a pharmacy technician is credited according to its relationship to the full-time workweek. For example, a pharmacy technician would receive 1 week of full-time credit for each 2 weeks of half-time work.

(4) Grade Determinations. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates:
(1) GS-2

(a) Experience. None beyond the basic requirement.

(b) Assignment. Employees at this grade level serve in a pharmacy technician/aide-training level position.

(2) GS-3

(a) Education or Experience. Completion of 1 year of post-high school coursework related to medicine (e.g. chemistry, biology, college mathematics, etc.), or successful completion of a 1 year accredited pharmacy technician training program, or 6 months of general experience, that may have included experience in another medical field (licensed practical nurse, laboratory technology, etc.). In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Ability to maintain appropriate files.

2. Ability to prepare sterile compounds under supervision.

3. Ability to communicate with patients and other health professions.

(c) Assignments. Employees at this grade level serve in a pharmacy technician/aide training level position.

(3) GS-4

(a) Education or Experience. Successful completion of 2 years above high school with courses related to pharmacy or pharmacy technology, or 1 year of general experience that may have included experience in another medical field (licensed practical nurse, laboratory technology, etc.) Successful completion of a course for medical technicians, hospital corpsmen, medical service specialists, or hospital training obtained in a training program conducted by the Armed Forces or the U.S. Maritime Service under close medical and professional supervision is creditable on a month-for-month basis for general experience. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Ability to process and fill prescriptions under supervision.

2. Ability to operate and maintain dispensing equipment.

3. Ability to operate pharmacy information systems.

4. Ability to maintain appropriate files.
5. Ability to prepare sterile compounds under supervision.

(c) Assignments. Pharmacy technicians at the GS-4 level perform all duties expected of employees at the GS-3 level; however, they are expected to exercise greater judgment, require less supervision, and to operate in accordance with all established policies, procedures, and techniques.

(4) GS-5

(a) Education or Experience. Successful completion of a 4-year course of study above high school leading to a bachelor’s degree that included at least 24 semester hours of courses related to pharmacy or pharmacy technology; successful completion of pertinent specialized training courses in pharmaceutical and pharmacy services while serving in the Armed Forces is creditable on a month-for-month basis up to the 1 year of experience required for the GS-5 level; or at least 1 year of experience at the next lower level that demonstrates the core competencies (KSAs) described at the GS-4 level. In addition, the candidate must demonstrate the following KSAs:

(b) Demonstrated Knowledge, Skills, and Abilities

1. Ability to operate and care for automated dispensing devices and equipment.

2. Knowledge of, and ability to perform, aseptic technique.

3. Knowledge of basic inventory procedures.

4. Knowledge of pharmacy information systems.

(c) Assignments. This is the full performance level for pharmacy technicians. Employees at this grade level serve as staff pharmacy technicians receiving little guidance from more experienced staff members for more complex patients and procedures, and require minimal supervision.

(5) GS-6

(a) Experience. One year experience at the next lower level, and must fully meet the KSAs at the next lower level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) Certification. PTCB certification is required at this grade level and above.

(c) Demonstrated Knowledge, Skills, and Abilities

1. Ability to solve problems and make recommendations, e.g., troubleshoot operational problems and refer for appropriate action.

2. Knowledge of the operation and care of automated equipment.
3. Knowledge of, and ability to follow, written instructions for compounding with aseptic technique for hazardous materials such as oncology agents.

4. Knowledge, and ability to perform, compounding with aseptic technique for routine sterile products.

5. Knowledge of policies and procedures for inventory management in specialized areas such as emergency carts.

6. Knowledge of the computerized prescription process demonstrated by the ability to input prescriptions and medication orders.

(d) **Assignments.** Pharmacy technicians may be assigned to any area of the pharmacy including expanded distributive function assignments; for example assignment as team leaders for specific process improvement teams involving technical areas or performing more highly complex duties including preparation of oncology agents for clinical pharmacy specialists. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time.

(6) **GS-7**

(a) **Experience.** One year experience at the next lower level and must fully meet the KSAs at the next lower level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities**

*1. Ability to evaluate, analyze workflow, and coordinate work activities.

2. Ability to independently gather, evaluate, and analyze data to generate reports and/or for other projects/statistical purposes.

3. Knowledge of pharmacy policies and procedures sufficient to train and orient new employees and other staff.

4. Comprehensive knowledge of the operation and care of specialized pharmaceutical equipment.

5. Comprehensive knowledge of the procurement and formulary process.

6. Comprehensive knowledge of investigational drug policies and procedures.

7. Comprehensive knowledge of controlled substance policies and procedures, and the ability to identify and investigate discrepancies in these policies and procedures.

8. Comprehensive knowledge of, and ability to, analyze data in VA information systems.
(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Pharmacy technicians at this grade level may be assigned as a supervisor; lead technician in a particular area of the pharmacy; a controlled substance technician; an investigational drug technician; a procurement/inventory management technician; a clinical pharmacy technician; or similar assignment with this level of complexity. The GS-7 level is for select, complex pharmacy technician positions, as established by each health care facility. To be advanced, employees must meet all of the following standards, provided the standard is part of their assignment.

Determinations concerning placement of positions at this grade level shall take into consideration the skill mix and the availability of supervision in the work unit. Although these positions are under the supervision of a pharmacist, employees in such settings successfully and consistently demonstrate the exercise of independent technical judgment (without the need for readily available supervision) as well as comprehensive and thorough working knowledge of the most complex or difficult practices and procedures. Such individuals may also serve as leaders or co-leaders in a Pharmacy Service or for a specific unit or section.

(7) **GS-8**

(a) **Experience.** One year experience at the next lower level and must fully meet the KSAs at the next lower level. In addition, the candidate must demonstrate the following technical KSAs and the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(b) **Demonstrated Knowledge, Skills, and Abilities**

1. Knowledge of human resource management policies and procedures, and the ability to supervise various levels of pharmacy technicians and other technical personnel (for supervisory assignments).

2. Ability to apply management and leadership principles.

3. Ability to communicate orally and in writing.

4. Extensive working knowledge of the pharmacy operation.

5. Ability to assess staff needs and provide appropriate training.

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Pharmacy technicians at this level may be assigned supervisory positions or assignments as lead technicians in a highly complex area of the pharmacy. The GS-8 level is for very select, complex pharmacy technician positions as established by each health care facility. To be advanced, employees must meet all of the following standards, provided the standard is part of their assignment.

Determinations concerning placement of positions at this grade level shall take into consideration the skill mix and availability of supervision in the work unit. Although these positions are under the
supervision of a pharmacist, employees in such settings successfully and consistently demonstrate the exercise of independent technical judgment (without the need for readily available supervision) as well as comprehensive and thorough working knowledge of the most complex or difficult practices and procedures. Such individuals may also serve as supervisors or in an equivalent assignment in a Pharmacy Service, or for a specific unit or section.

4. DEVIATIONS

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for pharmacy technicians in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements on the proposed grade.

b. Under no circumstances will the certification requirements be waived.

c. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

APPENDIX G29. AUDIOLOGIST QUALIFICATION STANDARD
GS-0665
Veterans Health Administration

1. COVERAGE. The following are requirements for appointment as an Audiologist in the Veterans Health Administration (VHA). These requirements apply to all VHA Audiologists in the General Schedule (GS)-0665 series. Audiologists provide clinical service to Veterans and other beneficiaries in VHA medical centers, clinics, domiciliaries, nursing care facilities, community care settings, Community-Based Outpatient Clinics, Veterans Outreach Centers, Veterans Integrated Service Network (VISN) offices and VHA Central Office. In performing these duties, audiologists demonstrate professional knowledge of and skill in applying a wide range of theories, principles and methodologies of the practice of audiology.

2. DEFINITIONS.

a. Appointing Official. The Human Resources (HR) Officer is delegated appointing authority to process and authenticate notifications of personnel actions and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

b. Approving Official. The VISN Director or Facility Director is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

c. Creditable Experience.

(1) Current Professional Audiology Practice. Individuals may obtain creditable, audioligic work experience through paid or non-paid employment providing audioligic work or by participating in a supervised postdoctoral audiology training program (i.e., fellowship or residency). Audioligic work experience must occur after all academic requirements are met and the doctoral degree is awarded. “Professional audiology practice” includes but is not limited to the following audiology-oriented job duties: providing professional clinical services, conducting research, carrying out education and training activities, and carrying out the program.

(2) Quality of Experience. Experience is only creditable if it is postdoctoral experience performing the duties of a professional audiologist and must be directly related to the duties to be performed. Qualifying experience must also be comparable to or exceed professional audiology experience at the next lower level.
(3) **Part-time Experience.** Part-time experience is creditable according to its relationship to a full-time workweek. For example, an audiologist employed 20 hours per week or on a half-time basis, would receive one full-time workweek of credit for each two weeks of service.

(4) **Postdoctoral Degree Fellowships.** Postdoctoral fellowships or residencies are training programs in an advanced area of clinical practice. Training that an individual gained as a fellow or resident after the college or university awarded the doctoral degree is creditable experience.

d. **Journey Level.** The full performance level for this qualification standard is GS-12.

3. **BASIC REQUIREMENTS.**

a. **Citizenship.** Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).

b. **Education.**

(1) Doctor of Audiology (AuD) from an audiology program recognized by the Council on Academic Accreditation (CAA) of the American Speech-Language-Hearing Association (ASHA). The CAA is the only accreditation agency recognized by the U.S. Department of Education (USDE) and the Council for Higher Education Accreditation to accredit entry-level audiology programs. HR office staff and management officials may verify the program accredited from CAA at www.caa.asha.org.

OR

(2) Other doctoral degree in hearing science or a directly related field from an institution accredited by an accrediting institution recognized by the USDE.

**NOTE:** Effective January 1, 2007, the CAA in Audiology and Speech-Language Pathology of ASHA accredits only doctoral degree or AuD programs in audiology.

c. **Licensure.** Individuals must hold a full, current and unrestricted license to practice audiology at the doctoral level in a United States state, territory, commonwealth or the District of Columbia.

(1) Non-licensed audiologists who otherwise meet the eligibility requirements for licensure may be given a temporary appointment as a graduate audiologist at the GS-11 grade under the authority of 38 U.S.C. § 7405(c)(2) for a period not to exceed two years from the date of employment on the condition that these audiologists provide care only
under the supervision of fully licensed audiologists. Individuals appointed as graduate audiologists may not be promoted to the GS-12 level without being fully licensed.

(2) The Under Secretary of Health, or designee, in VHA Central Office may waive the requirement for licensure under the authority of 38 U.S.C. § 7405 of a candidate who will be assigned to a research, academic or administrative position with no patient care responsibilities. In such instances, HR office staff can only appoint these candidates in exceptional circumstances where their credentials demonstrate high professional attainment or expertise in the specialty area.

(3) All audiologists who perform compensation and pension examinations perform direct patient care duties and must possess a full, current and unrestricted license to practice audiology and must meet the experience requirements under Section 2. D. See 38 C.F.R. § 4.85.

d. **Failure to Obtain Licensure.** In all cases, the graduate audiologists must actively pursue obtaining the required licensure from the date of their appointment. HR office staff will provide unlicensed audiologists with written requirements to obtain licensure, the date by which the license must be acquired and the consequences for not becoming licensed by the deadline. Written notices must be provided prior to the entrance on duty date. Failure to obtain the required credentials by the prescribed date will result in termination of employment.

e. **Loss of Credential.** In collaboration with HR office staff, management officials must immediately relieve employees of the duties and responsibilities associated with the occupation who fail to maintain the required licensure, which may also result in separation from employment.

f. HR office staff must appoint audiologists in accordance with the provisions in Chapter 3, Section B, paragraph 16 of this part, who have or have ever had, their audiology licenses revoked, suspended, denied, restricted, limited or issued/placed in a probationary status.

g. **Grandfathering Provision.** All individuals employed in VHA in this occupational series or in another occupational series performing the duties described in the qualification standard on the effective date of the qualification standard are considered to have met all qualification requirements for the grade held, including positive education and licensure. For employees who do not meet all the basic requirements of this standard but previously met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:
(1) Audiologists may be reassigned, promoted up to and including the full performance (journeyman) level or changed to a lower grade within the occupation, but may not be promoted beyond the journeyman level or placed in supervisory or managerial positions.

(2) Audiologists who are converted to title 38 hybrid status under this provision and subsequently leave the occupation lose protected status and must meet the full VA qualification standard requirements in effect at the time of re-entry to the occupation.

(3) Audiologists who are appointed temporarily prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they meet the basic requirements of the standard.

(4) Audiologists initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

h. **Foreign Education.** To be creditable, education completed outside the U.S. must have been submitted to a private organization specializing in the interpretation of foreign educational credentials. Such education must have been deemed at least equivalent to that gained in conventional U.S. programs.

i. **Physical Requirements.** See VA Directive and Handbook 5019.

j. **English Language Proficiency.** Audiologist candidates must be proficient in spoken and written English as required by 38 U.S.C. § 7403(f).

4. **GRADE DETERMINATIONS.** In addition to the basic requirements for employment, candidates must meet the following grade-determining criteria for appointments at grade levels specified.

a. **Audiologist, GS-11.**

(1) **Education.** None beyond the basic requirements.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the basic requirements, the candidate must demonstrate all of the following KSAs:

   (a) Knowledge of principles and techniques in the assessment and treatment of auditory and balance disorders.
(b) Ability to perform functions associated with contemporary audiology scope of practice as defined by the American Academy of Audiology or the ASHA.

(c) Ability to interact with patients, families and other health care professionals.

(3) **Assignment.** Employees at this grade level serve in audiologist entry-level developmental positions. Audiologists perform audiology assessment and treatment intervention, exercise clinical judgment, adapt clinical procedures and techniques and document in the medical record appropriate information related to patient care.

b. **Research Audiologist, GS-11.**

(1) **Education.** None beyond the basic requirements.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the basic requirements and the KSAs required in subparagraph 4.a.(2) above, the candidate must demonstrate all of the following KSAs:

(a) Knowledge of project-specific clinical and research literature to assess the current state of the research and identify areas that require additional research.

(b) Ability to apply basic scientific methods, basic research design and statistics to conduct research.

(3) **Assignment.** Employees at this grade level serve in a research audiologist entry-level developmental position. Research audiologists serve as research assistants. They conduct research under the direct supervision of principal investigators or co-principal investigators of higher-grade levels.

c. **Audiologist, GS-12.**

(1) **Experience.** In addition to the requirements at the GS-11 level, completion of one year of professional experience comparable to the next lower grade level

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the KSAs required at the full performance level, the following KSAs are required:

(a) Skill in determining nature, type and severity of hearing/communication /vestibular disorders.
(b) Skill in counseling patients and family members regarding management of hearing/communication/vestibular disorders

c) Ability to provide professional advice and consultation in areas related to professional audiology to other health care professionals.

d) Ability to independently apply professional contemporary audiologic treatments to the full range of patient populations.

(3) **Assignment.** This is the full performance level for staff audiologists. At this level, audiologists are licensed to practice independently in the provision of audiologic services, consulting with peers and supervisors as appropriate. Audiologists serve as consultants to other health care professionals and are recognized subject matter experts (SME) on matters related to hearing, tinnitus and balance disorders. The supervisor may assign staff audiologists to any VHA program and setting, such as inpatient or outpatient medicine, primary care, surgery, hearing health, neurology, rehabilitation medicine, geriatrics, compensation and pension. Audiologists diagnose audiologic disorders, conduct audiologic or neuro-audiologic assessments, treat auditory disorders through a various modalities and provide adjunctive interventions for the treatment of medical disorders. Audiologists consult with medical center staff on various patient care issues. Staff audiologists may be involved in program evaluation, teaching, training and research activities. Among the modalities provided are individual, family and group audiologic rehabilitation.

d. **Research Audiologist, GS-12.**

(1) **Experience.** In addition to the requirements at the GS-11 level, completion of one year of professional experience comparable to the next lower grade level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the KSAs required in subparagraph 4.c.(2) above, the following are required:

(a) Skill in applying research methods and statistical analysis to document findings.

(b) Ability to execute research independently.

(3) **Assignment.** This is the full performance level for research audiologists. Research audiologists at this grade level assist principal investigators or co-principal investigators in peer-reviewed VHA, National Institutes of Health (NIH), or comparably rigorous intramural or extramurally funded research programs may serve as investigators on small or unfunded projects of limited complexity or scope. They conduct research under the
e. **Research Audiologist, GS-13.**

   (1) **Experience.** At least two years of experience as a professional audiologist, with at least one year comparable to the next lower grade level.

   (2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

   (a) Skill in preparing peer-reviewed publications based on research findings.

   (b) Ability to produce funding through a grant as a principal investigator or co-investigator.

   (3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Research audiologists at this level are actively involved as principal investigators or co-principal investigators in peer-reviewed VA, NIH or comparably rigorous intramural or extramurally funded research programs. Research audiologists formulate or research problems of considerable scope and complexity. They work with substantial independence in identifying, defining and selecting problems for study.

f. **Audiologist (Clinical Specialist), GS-13.**

   (1) **Experience.** At least two years of experience as a professional audiologist, with at least one year comparable to the next lower grade level.

   (2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the KSAs required at the full performance level, the following KSAs are required:

   (a) Advanced knowledge in a focused area of contemporary audiology practice to provide oversight of a specialty program.

   (b) Skill to evaluate the specialty program to ensure deadlines and goals are met.

   (c) Skill to coordinate initiatives and build consensus among interdisciplinary team members.
(d) Ability to monitor and report on work progress in the specialty program to adjust workload and processes.

(e) Ability to serve as the SME and provide education relating to the specialty program.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Audiologists (clinical specialists) provide leadership and direct oversight in the design, development, implementation, planning and management of the specialty program. They serve as coaches or facilitators for the interdisciplinary team and are responsible for training all support staff and trainees as it relates to the specialty program. These individuals serve as the SME in matters regarding the specialty program.

g. Lead Audiologist, GS-13.

(1) Experience. At least two years of experience as a professional audiologist, with at least one year comparable to the next lower grade level.

(2) Demonstrated Knowledge, Skills and Abilities (KSAs). In addition to meeting the experience or educational requirements for this grade level, the candidate must fully demonstrate the following KSAs:

(a) Ability to lead a diverse clinical team on work methods, practices and procedures.

(b) Ability to coordinate assignments, special projects and objectives to lead work.

(c) Ability to monitor work, evaluate programs, and adjust to accomplish the workload.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Lead audiologists will lead three or more audiologists to accomplish the work through leadership, team building skills, group facilitation, coaching and integration of work products and processes. Lead audiologists provide comprehensive clinical services, coordinate special projects, as well as oversee the day-to-day core clinic operations. These individuals ensure the work assignments of the clinical team are completed and make adjustments to accomplish the workload in accordance with established priorities. Audiologist clinic coordinators and lead audiologists collect,
analyze and incorporate data to monitor and evaluate the efficiency, utilization, quality and effectiveness of clinic services.

h. **Supervisory Audiologist, GS-13.**

1. **Experience:** At least two years of experience as a professional audiologist, with at least one year comparable to the next lower grade level.

2. **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the KSAs required at the full performance level, the candidate must demonstrate the KSAs identified below.

   a. Skill in conflict resolution to facilitate positive working relationships between employees, team leaders and managers.

   b. Skill in applying evidence-based practices in a professional area.

   c. Ability to analyze organizational and operational challenges to develop and implement solutions.

   d. Ability to develop the abilities and strengths of current employees.

   e. Ability to balance responsibilities, set priorities and delegate tasks to meet multiple deadlines.

   f. Ability to analyze data to manage workload, quality, performance and productivity within the section.

3. **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Supervisory audiologists in this assignment serve as section chiefs. They supervise staff, plan, schedule and assign work. Section chiefs have broad program management responsibilities for a specific program or programs that are designed to deliver specialized, complex, highly professional services, which are important program components of the facility and significantly impact the health care provided to Veterans. Programs include but are not limited to hearing health, compensation and pension examination (C&P) programs, inpatient, outpatient and residential audiologic rehabilitation, neuro-audiologic assessments, diagnosis and treatment of tinnitus, externship and postdoctoral fellowship training programs, and management of an off-campus site. Typically, at facilities of lower complexity, section chiefs have audiology program oversight and serve as the audiology executive responsible for coordinating operations throughout the facility and its affiliated clinics. The type of programs managed and the scope of responsibility are critical aspects of the
assignment at this level. Section chiefs manage key clinical, training, research or administrative programs including the day-to-day activities of these programs. Section chiefs in this assignment supervise and provide input for strategic plans to ensure the provision of high-quality services to meet the needs of the Veterans. They develop and implement short and long-term goals and objectives consistent with the program’s strategic plan. They provide oversight of administrative and programmatic resources and deploy those resources to support the program needs. They develop and implement programs, policies and procedures to meet program goals, VHA policy and external accreditation requirements. They monitor outcomes using data-driven quality assurance processes and implement strategies for improvement based on data analysis.

i. **Supervisory Audiologist, GS-13.**

(1) **Experience.** At least two years of experience as a professional audiologist, with at least one year comparable to the next lower grade level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the KSAs required at the full performance level, the following KSAs are required:

   (a) Skill in communicating established performance benchmarks to a service or equivalent organizational department.

   (b) Skill in implementing continual performance improvement activities to meet performance benchmarks

   (c) Ability to perform a full scope of managerial responsibilities.

   (d) Ability to lead audiologists, speech-language pathologists and/or professionals within associated disciplines.

   (e) Ability to develop contingencies to ensure continual service operations.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Assistant chiefs in this assignment serve as full assistants to a service chief, share the full scope of delegated managerial responsibilities and serve as the acting service chief in the absence of the service chief. They make decisions affecting staff and other resources. They may be delegated full administrative and clinical responsibility for planning and directing the staff assignments in various clinical settings. They encourage professional development, create an environment of learning and serve as a mentor to
staff audiologists. Assistant chiefs are responsible for the supervision, administrative management and direction of the program services assigned to them. Assistant chiefs may ensure compliance with accrediting agency and regulatory requirements, monitor staff performance, and develop and implement programs based on Veterans' needs and current research findings. Duties include but are not limited to resolving staff conflicts that might interfere with the service delivery, identifying continuing education and training needs and other clinical and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. They may interview candidates for positions, and recommend appointments, advancements or disciplinary actions when appropriate. They may develop position descriptions and functional statements and are responsible for professional and administrative management of an assigned area. They may make selections, assign personnel and serve as a mentor to help employees develop their full potential. Assistant chiefs in this assignment maintain interdepartmental relationships with other services to accomplish medical center goals as well as foster and maintain community contacts. They may develop and initiate new assessment and treatment programs and may develop policies and procedures. Assistant chiefs in this assignment independently provide audiologic services at all levels of complexity and consult with peers and supervisors as appropriate.

j. **Supervisory Audiologist, GS-13.**

(1) **Experience.** At least two years of experience as a professional audiologist, with at least one year comparable to the next lower grade level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs)** In addition to the KSAs required at the full performance level, the candidate must demonstrate the KSAs identified below.

   (a) Skill to evaluate programs to ensure efficient and appropriate integration of care.

   (b) Ability to develop contingencies and align resources to achieve program goals.

   (c) Ability to effectively interpret and apply facility, VISN and national audiology and speech pathology services policies.

   (d) Ability to effectively create service-level policies and priorities to align with facility strategic plan.

   (e) Ability to supervise professional staff.
(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. These positions serve as service chiefs managing stand-alone services, product lines or service lines. They typically have line and staff authority for resource allocations within the area of responsibility and ensure the efficient operation of the organizational unit. They have broad and overall responsibility for the service-level department and full responsibility for clinical practice, program management, education, human resource management and supervision for the service, as appropriate. They autonomously manage substantive parts of specialized, complex, professional services that significantly impact Veterans’ care. They provide leadership with objective, independent assessments and recommendations for policy, operational and administrative issues and initiatives requiring decision and action. Service chiefs are responsible for planning, assessing and evaluating programs to ensure coordination between care delivered by the program and the overall delivery of health care within the facility. They interpret and process a wide variety of data related to program planning and the specialized needs of the Veteran, the service and the medical center. They assure compliance with accrediting agency and regulatory requirements and corrective action is initiated as needed. Service chiefs in this assignment ensure policies or issues have been fully coordinated, vetted and staffed. They advise leadership on policy implications, key issues and relationships to internal and external interest groups and recommend courses of action. They maintain interdepartmental relationships with other services to accomplish medical center goals. Service chiefs in this assignment coordinate and negotiate resolutions to complex problems. They may prepare special reports and responses, Congressional responses, briefing papers, issue briefs and decision papers for the medical center leadership, which may be highly sensitive, confidential and of a complex nature as requested. They are responsible for professional and administrative management of an assigned area, including budget execution. Service chiefs in this assignment develop policies and procedures and may develop performance standards, position descriptions and functional statements. They conduct performance appraisals and perform other clinical and administrative responsibilities related to the management of staff to ensure that the mission of the service and the medical center has been satisfied. They may set training objectives and delegate responsibilities to subordinate sections.
k. **Supervisory Audiologist, GS-14.**

(1) **Experience.** At least three years of experience as a professional audiologist, with at least one year comparable to the next lower grade level, must fully meet the KSAs at that level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

(a) Skill in promoting collaboration to accomplish goals.

(b) Skill in translating management goals and objectives into efficient service operations.

(c) Skill in balancing operational resources to ensure appropriate delivery of service operations.

(d) Ability to supervise a diverse staff.

(e) Ability to effectively interact and collaborate with local, VISN and/or national leadership.

(f) Ability to establish and monitor productivity standards, production and performance priorities to achieve management goals and objectives.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Audiologist service chiefs at this level typically manage programs in Complexity Level 1 (high complexity) facilities. The service or organizational entity is a major component of the medical center and the services or programs supervised are highly professional, technical and complex. They are responsible for all professional, management and administrative aspects of the service or organizational entity. They have broad and overall responsibility for a service-level organizational unit and have full responsibility for clinical practice, program management, education, human resource management and supervision for the service. They autonomously manage substantive parts of specialized, complex, professional services that significantly impact Veterans’ care. They provide leadership with objective, independent assessments and recommendations for policy, operational and administrative issues and initiatives requiring decision and action. They monitor work performance to ensure that requirements are satisfied; interpret and process a wide variety of data related to program planning and specialized needs of the Veterans, the service and the medical center; and ensure policies or issues have been fully coordinated, vetted and staffed. Audiologist service chiefs advise
executive leadership on implications, key issues and relationships to interest groups (both internal and external) and recommend courses of action. They coordinate and negotiate resolutions to complex problems. They assure compliance with accrediting agencies and regulatory requirements and corrective action is initiated as needed. They are responsible for professional and administrative management of an assigned area, including budget execution. They maintain interdepartmental relationships with other services to accomplish medical center goals. They may prepare special reports and responses, Congressional responses, briefing papers, issue briefs and decision papers for the medical center leadership, which may be highly sensitive, confidential and of a complex nature. They develop policies and procedures and may develop performance standards, position descriptions and functional statements. They monitor the clinical performance of staff, conduct performance appraisals and perform other clinical and administrative responsibilities to ensure that the mission of the service and the medical center has been satisfied. They may set training objectives for staff and delegate responsibilities to subordinate sections.

I. **Research Audiologist, GS-14.**

   (1) **Experience.** At least three years of experience as a professional audiologist, with at least one year comparable to the next lower grade level and must meet the KSAs at that level.

   (2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

      (a) Skill to apply advanced scientific methods in research design and execution, which may include multiple variables and/or multiple sites and/or innovative technologies.

      (b) Skill to lead a research team with diverse backgrounds, research interests and points of view.

      (c) Ability to manage large research budgets.

      (d) Ability to evaluate critically the research of others in peer review or editorial settings.

   (3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Research audiologists at this level are actively involved as principal investigators or co-principal investigators in peer-reviewed VA, NIH, or comparably rigorous intramural or extramurally funded research programs.
They are involved in peer review activities for VHA and non-VHA research, e.g., grant review for VHA or NIH proposals, local research service committees, i.e., Research and Development, Health Services Research and Development, Institutional Review Board, etc. or serve as consulting editors for peer-reviewed journals. At this grade level, research audiologists have responsibility for formulating and guiding research on problems that are difficult to define or require unconventional or novel approaches or sophisticated research methods. Research audiologists at this grade level have achieved significant professional recognition by making scientific contributions to research with potential for significant impact in audiology, hearing science or related disciplines. They have typically authored one or more publications of considerable interest and value to the field in the peer-reviewed professional literature; have a consistent record of presentation of findings at national scientific meetings; may have earned an academic appointment at an affiliated medical school or local university, usually at the rank of associate professor or equivalent; and have and responsibility for funded research projects.

m. Supervisory Audiologist, GS-14.

(1) **Experience.** At least three years of experience as a professional audiologist, with at least one year comparable to the next lower grade level, must fully meet the KSAs at that level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the KSAs required at the full performance level, the candidate must demonstrate the KSAs identified below:

   (a) Skill in working with interdisciplinary teams within a specialty program. Skill to serve as a consultant/liaison to local, regional or national coordinators and or national program offices as well as other providers regarding the delivery of audiology care within the specialty program area.

   (b) Skill in developing and coordinating treatment programs within the specialty field nationally or within the region.

   (c) Ability to manage a large, diverse staff.

   (d) Ability to serve as facilitator and/or negotiator in coordinating program initiatives among local, regional or national coordinators and interdisciplinary teams to improve quality of care for patients.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time.
Audiologist program coordinators manage all aspects of a distinct audiology program at the VISN or national level and are generally assigned to the national program office in VA Central Office. These assignments may include but not be specifically limited to specialized programs such as tele-audiology, hearing center of excellence and polytrauma/TBI. Audiologist program coordinators are responsible for developing policies, quality resources and specialty functions unique to the program to optimize program and patient outcomes. They ensure program compliance using expert knowledge of facility, regional and national policies. Audiologists in this role are responsible for strategic planning to ensure the provision of high-quality services that meet the needs of Veterans being served. They are also responsible for developing and implementing short and long-term goals and objectives consistent with the programs’ strategic plan. Additionally, their responsibilities include operation and management of key clinical, training research or administrative programs. Audiologist program coordinators develop and implement programs, policies and procedures to meet program goals, policy and external accreditation requirements at the regional, VISN or national level. They monitor outcomes and implement strategies for program improvement.

n. **Supervisory Audiologist, GS-15.**

(1) **Experience.** At least four years of experience as a professional audiologist, with at least one year comparable to the next lower grade level and must fully meet the KSAs at that level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the KSAs required at the full performance level, the candidate must demonstrate the KSAs identified below.

(a) Knowledge of military hearing loss and auditory system injuries and disorders, speech-language pathology disorders and of related statistics, population health surveillance, military medicine and health policy to provide guidance from a national program office.

(b) Skill to effectively communicate existing Federal agency policies and regulations for developing strategies and priorities for a collaborative interagency program.

(c) Skill in senior management policy development, strategic planning and setting priorities consistent with organizational goals and objectives.

(d) Ability to provide consultation and develop strategies regarding evidence-based practices and clinical practice guidelines in the areas...
of post-deployment hearing loss and auditory system injuries and disorders.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. The national program director is responsible for defining objectives and providing national VA policy guidance in administering a system-wide audiology and speech-language pathology (ASP) program. The program director is responsible for analyzing and evaluating VA ASP programs, including developing plans, procedures and recommendations to ensure efficient functioning of these programs related to the continuum of care. The program director works with all levels of staff within VA Central Office, VA field staff, field representatives of other Federal agencies, state and local governments and community-based organizations to identify needs and develop strategies for Veterans with, or at risk for, auditory and vestibular system injuries/disorders and speech-language pathology disorders. They serve as an information resource and advisor to senior government officials on matters of national significance. The program director collaborates with other disciplines’ executive leads within VA, external professional associations and regulatory agencies outside VA to develop national policies and procedures for advancing ASP throughout the entire VA system. The program director serves as a resource to VA ASP programs by applying advanced knowledge of multifaceted health care delivery systems and their relationship to external review organizations and hospital and service-level operations. The program director will make decisions with wide latitude using independent judgment. The program director serves as an expert in clinical treatment modalities as well as administrative and clinical support systems regarding hearing loss/auditory/vestibular system injuries and disorders and speech-language pathology disorders.

5. **DEVIATIONS.**

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the education or certification requirement be waived.

c. The Under Secretary for Health, or designee, in VHA Central Office must approve placement of individuals in grade levels or assignments not described in this standard prior to placement in the position.
Authority: P.L. 111-163, Caregivers and Veterans Omnibus Health Services Act of 2010; 38 U.S.C. §§ 7401, Appointments in Veterans Health Administration; 7402, Qualifications of appointees; 7403, Period of appointments; promotions; 7405, Temporary full-time appointments, part-time appointments, and without-compensation appointments; 7407, Administrative provisions for §§ 7405 and 7406 appointments.]
[APPENDIX G30. SPEECH-LANGUAGE PATHOLOGIST QUALIFICATION STANDARD
GS-0665
Veterans Health Administration

1. COVERAGE. The following are requirements for an appointment as a Speech-Language Pathologist (SLP) in the Veterans Health Administration (VHA). These requirements apply to all VHA SLPs in the General Schedule (GS)-0665 series, including those assigned to medical centers, clinics, domiciliaries, nursing care facilities, community care settings, Community-Based Outpatient Clinics, Veteran Outreach Centers, Veterans Integrated Service Network (VISN) offices and VHA Central Office. In performing these duties, VHA SLPs demonstrate professional knowledge of and skill in applying a wide range of theories, principles and methodology of the practice of speech-language pathology in a medical setting.

2. DEFINITIONS.
   
a. Accredited. A college or university recognized by a regional accreditation organization and a speech-language pathology academic program recognized by the Council on Academic Accreditation of the American Speech-Language-Hearing Association.

b. Appointing Official. The Human Resources (HR) Officer is delegated appointing authority to process and authenticate notifications of personnel actions and authority to effect management-approved employment actions on behalf of officials, employees and facilities for which service is provided.

c. Approving Official. The VISN Director or Facility Director is the approving official and will determine whether to approve or disapprove the appointment of employees in the hybrid occupations.

d. Board Certification. Board certification is voluntary and demonstrates advanced knowledge, skills and experience above the requirements for state licensure. Board certification demonstrates exceptional expertise in a specialty or specific clinical practice area. Examples include but are not limited to Board Recognized Specialist in Swallowing and Swallowing Disorders (BRS-S) or Board Certification by the Academy of Neurologic Communication Sciences and Disorders (BC-ANCDS). Continuing Education alone does not meet the requirements for Board Certification.

e. Clinical Fellowship. The speech-language pathology clinical fellowship, often referred to as a Clinical Fellowship Year, is considered a training period and is the transition period between being a student enrolled in a master’s level communication sciences and disorders program and being an independent provider of speech-language pathology clinical services. The clinical fellowship
involves a mentored professional experience after the completion of academic coursework. Training which is gained after the degree was awarded by a college or university is considered to be creditable experience. A clinical fellowship is 36 weeks of full-time (35 hours per week) experience (or the equivalent part-time experience), totaling a minimum of 1,260 hours. After the clinical fellowship, the individual may be awarded an unrestricted license.

f. Creditable Experience. To be creditable, the experience must have required the use of knowledge, skills and abilities associated with the assessing, diagnosing, treating and preventing communication and swallowing disorders with contemporary professional speech-language pathology practice. This knowledge may be evidenced by one of the following:

(1) At least one year of active professional practice or equivalent. Active professional practice means paid or non-paid employment as a professional SLP engaged in the practice of speech-language pathology as defined by the appropriate licensing board.

(2) Academic course work leading to a doctoral degree in speech-language pathology, communication disorders and sciences or a related field.

g. Journey Level. The full performance level for this qualification standard is GS-12.

h. Quality of Experience. Experience is only creditable if it is both of the following:

(1) Work as a professional SLP related to the position to be filled; and

(2) The work is at a level comparable to speech-language pathology experience at the next lower grade level.

i. Part-Time Experience. Part-time experience as a professional SLP is credited according to its relationship to the full-time work week. For example, an SLP employed 20 hours a week, or on a 1/2-time basis, would receive one full-time workweek of credit for each 2 weeks of service.

3. BASIC REQUIREMENTS.

a. Citizenship. Be a citizen of the United States (U.S.). Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with 38 U.S.C. § 7407(a).
b. **Education and Experience.**

(1) A master’s degree, or its equivalent, in speech-language pathology, communication disorders or a directly related field from an accredited college or university and one year of creditable experience (see paragraph 2.g.).

or

(2) A doctoral degree in speech-language pathology, communication disorders and sciences or a related field, from an accredited college or university.

c. **Licensure.** Individuals must hold a full, current and unrestricted license in a U.S. state, territory, commonwealth or the District of Columbia.

(1) Non-licensed applicants who otherwise meet the eligibility requirements for SLP licensure may be appointed to a temporary position as a graduate SLP under the authority of 38 U.S.C. § 7405 (c)(2). Individuals appointed as graduate SLPs may not be promoted to the GS-12 level without being fully licensed.

(2) The requirement for licensure may be waived by the Under Secretary for Health or designee in VHA Central Office for individuals engaged in research or academic assignments involving no direct patient care duties, in accordance with current activities.

(3) An SLP who has, or ever has had their speech-language pathology license revoked, suspended, denied, restricted, limited or issued/placed on probationary status may be appointed only in accordance with the provisions in Chapter 3, section B, paragraph 16 of this part.

d. **Failure to Obtain Licensure.** In all cases, graduate SLP must actively pursue obtaining the required licensure from the date of their appointment. The Human Resource office staff will provide the unlicensed SLP written requirement to obtain licensure, the date by which the license must be acquired and the consequences for not becoming licensed by the deadline. The written notice must be provided prior to the entrance on duty date. Failure to obtain the required credentials by the prescribed date may result in termination of employment.

e. **Loss of Credential.** Management officials, in collaboration with HR Office staff, must immediately relieve employees of the duties and responsibilities associated with the occupation who fail to maintain the required certification, both current and in good standing, which may result in separation from employment. An SLP who has, or has ever had, their SLP license revoked, suspended, denied, restricted, limited or issued/placed in a probationary status may be appointed
only in accordance with the provisions in Chapter 3, section B, paragraph 16 of this part.

f. **Grandfathering Provision.** All persons employed in VHA in this occupational series or in another occupational series that are also performing the duties as described in the qualification standard on the effective date of this qualification standard are considered to have met all qualification requirements for the grade held, including positive education and licensure. For employees who do not meet all the basic requirements required in this standard but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) SLPs may be reassigned, promoted up to and including the full performance level or changed to a lower grade within the occupation, but may not be promoted beyond the full performance level or placed in supervisory or managerial positions.

(2) If SLPs who are retained under this provision leave the occupation, they will lose protected status and must meet the full VA qualification standard requirements in effect at the time of re-entry to the occupation.

(3) SLPs initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure that meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment.

(4) SLPs who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

g. **Foreign Education.** To be creditable, education completed outside the U.S. must be deemed at least equivalent to that gained in a conventional U.S. program by a private organization specializing in the interpretation of foreign educational credentials.

i. **English Language Proficiency.** SLP candidates must be proficient in spoken and written English in accordance with 38 U.S.C. § 7403(f).

4. **GRADE REQUIREMENTS.** In addition to the basic requirements, the following criteria must be met when determining the grade of candidates.
a. **Speech-Language Pathologist, GS-11.**

(1) **Education.** None beyond the basic requirements.

(2) **Knowledge, Skills and Abilities (KSAs).** In addition to the basic requirements, the candidate must demonstrate all of the following KSAs:

   (a) Knowledge of principles and techniques in assessing and treating disorders of speech, language, cognitive-communication and swallowing.

   (b) Knowledge of instrumentation and technologies for assessing and treating communication and swallowing disorders.

   (c) Ability to adapt clinical procedures and techniques to accommodate unique patient conditions, needs and goals.

(3) **Assignment.** SLPs at this entry developmental grade level assess and treat patients with routine speech, language, voice, cognitive-communication and swallowing disorders following the principles of evidence-based practice and perform clinical procedures with respect to age-specific, unique patient conditions and needs. When assessing and treating patients with complex or rare speech, language, voice, cognitive communication and swallowing disorders, SLPs may require consultation with an SLP at the full performance or higher level.

b. **Research Speech-Language Pathologist, GS-11.**

(1) **Education.** None beyond the basic requirements.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the basic requirements, the candidate must demonstrate all of the following KSAs:

   (a) Ability to apply basic scientific methods, basic research design and statistics to conduct research.

   (b) Ability to recruit research subjects.

   (c) Ability to administer study protocol.

   (d) Ability to perform data quality assurance activities including reviewing participant files and data verification.

(3) **Assignment.** Research SLPs at this entry developmental level screen and recruit eligible study participants based on criteria specified in the research study protocol. They document informed consent and reliably and validly administer study measures, including assessments of language, speech,
voice, swallowing and cognitive-communication and enter data into study databases, following applicable Institutional Review Board (IRB), informed consent, Health Insurance Portability and Accountability Act and applicable Federal regulations for the protection of human subjects. They participate in data quality assurance activities including review of participant files and data verification.

c. **Speech-Language Pathologist, GS-12.**

(1) **Experience.** In addition to the basic requirements at the GS-11 level, completing one year of professional experience comparable to the next lower level and possessing a full, current and unrestricted license to practice speech-language pathology.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

(a) Skill in applying principles and techniques of diagnosis and treatment associated with contemporary speech-language pathology following evidence-based practice for adult patients exhibiting the full range of speech to the full range of patient populations.

(b) Skill in administering and interpreting instrumental swallowing evaluations.

(c) Ability to assess the effectiveness of clinical outcomes and adapt clinical procedures and techniques to accommodate unique patient conditions.

(3) **Assignment.** This is the full performance level. At this level, SLPs independently provide evidence-based assessment and treatment interventions to individuals with a wide range of speech, language, voice, cognitive-communication and swallowing disorders. Staff SLPs select, administer and interpret standardized and non-standardized assessment measures. They integrate assessment findings into a patient-centered treatment plan of care and evaluate the effectiveness of interventions by collecting and documenting treatment outcomes. SLPs may be assigned to work in a specific clinical area such as traumatic brain injury, head and neck cancer, movement disorders or spinal cord injury. They may provide clinical training experiences for trainees and students and participate in research activities.

d. **Research Speech-Language Pathologist, GS-12.**

(1) **Experience.** In addition to the basic requirements at the GS-11 level, completion of one year of professional experience comparable to the next
lower level and possession of a full, current and unrestricted license to practice speech-language pathology.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

(a) Skill in applying scientific methods, research design and statistics to conduct research.

(b) Skill in disseminating research findings and products in peer-reviewed publications and at scientific and professional meetings.

(c) Ability to manage a research budget for each research project.

(d) Ability to execute regulatory documents, modifications, approvals, renewals and other required reporting for research programs.

(3) **Assignment.** This is the full performance level. At this level, research SLPs function independently within the broad scope of a speech-language pathology research program in language, speech, voice, swallowing or cognitive communication. Duties may include collecting, analyzing and interpreting data; creating and updating participant study files; or developing research protocols. Research SLPs may independently perform a variety of administrative tasks, including management of budget, personnel and development, submission of regulatory documents and entry of results into study databases. The research SLPs may disseminate research findings by preparing items such as slides, posters and articles for peer-reviewed publications and presenting at scientific and professional meetings.

e. **Speech-Language Pathologist (Clinical Specialist), GS-13.**

(1) **Experience/Education.** In addition to the basic requirements at the GS-12 level, completion of one year of professional experience comparable to the next lower level and completion of one or more of the following:

(a) Board certification such as BRS-S Disorders or BC-ANCDS; or

(b) Completion of a residency or fellowship post-graduate degree; or

(c) College credits (three or more courses) above the graduate degree in the areas relevant to the advance practice.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:
(a) Advanced knowledge in a focused area of contemporary speech pathology practice for contemporary and evidence-based practice in differential diagnosis and treatment.

(b) Skill in interpreting advanced specialized clinical management programs in focused areas of contemporary speech-language pathology practice.

(c) Ability to provide consultation and continuing education in a specific SLP disorder area.

(3) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. SLP clinical specialists apply advanced knowledge of scientific principles and contemporary and evidence-based clinical practice in a specific disorder area. SLPs in this assignment use professional judgment to diagnose patients with the most complex disorders not typically seen in routine clinical practice; develop and implement evidence-based and individualized clinical management programs; and render professional opinions. These patients may present with multiple physical, sensory, motor, cognitive or other complicated communication or swallowing disorders that require advanced clinical decision-making skills using complex data. On a regional or national level, SLP clinical specialists serve as subject matter experts for a specific clinical area, adding knowledge to the profession by providing expert consultation, continuing education and mentoring to colleagues, clinical fellows and students.

(4) Differentiating Full Performance Level from Clinical Specialist Level. This is done based on the differences between independent practice, which is required for all SLPs at the full performance level and a clinical specialist. An SLP practicing at the independent level has a generalized knowledge of practice, whereas the SLP clinical specialist has specialized knowledge of practice typically related to a particular diagnosis or patient population. The SLP clinical specialist can be further differentiated from the independent SLP by their ability to expand clinical knowledge in the profession, provide consultation and guidance to colleagues, role model effective speech-language pathology practice skills and teach or mentor less experienced SLPs. An SLP with advanced knowledge, clinical skills and personal qualifications that meet the standard for the SLP clinical specialist must be assigned to a position that requires use of the practice skills to be considered for the SLP grade.
f. **Speech-Language Pathologist, GS-13.**

   (1) **Experience.** In addition to the basic requirements at the GS-12 level, completion of one year of professional experience comparable to the next lower level.

   (2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

   (a) Knowledge of scientific principles and contemporary, evidence-based practice in differential diagnosis and treatment of speech, language, voice, swallowing and cognitive-communication disorders as it relates to a specialized clinical program.

   (b) Skill in prioritizing program goals and objectives.

   (c) Ability to build consensus among clinical team members with divergent backgrounds, interests and points of view.

   (d) Ability to gather and evaluate outcome data to determine program quality and effectiveness.

   (e) Ability to serve as a resource to other health care providers regarding a specialized clinical program.

   (3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. SLPs with special clinical program responsibilities plan, guide and facilitate the work of a specialized, intra- or interdisciplinary clinical team to accomplish program goals and establish well-coordinated work operations. At this level, SLPs are responsible for communicating team goals and objectives to other medical center staff; and serve as a resource to other health care providers. SLPs with special clinical program responsibilities evaluate the program’s work by developing quality improvement indicators and monitoring outcome data, making adjustments as needed.

g. **Lead Speech-Language Pathologist, GS-13.**

   (1) **Experience.** In addition to the basic requirements at the GS-12 level, completion of one year of professional experience comparable to the next lower level.
(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

(a) Skill in coordinating team initiatives and building consensus among clinical team members with divergent backgrounds, interests and points of view.

(b) Ability to direct the work of others to accomplish program goals and missions.

(c) Ability to evaluate program quality to ensure that speech-language pathology practice is consistent with evidence-based practice.

(d) Ability to communicate effectively with staff, professionals in other services and leadership to convey speech-language pathology program goals and status.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Lead SLPs will lead three or more SLPs to accomplish the work through the application of leadership, team building skills, group facilitation, coaching and integration of work products and processes. SLP team leads at this level ensure that the assignments of the clinical team are carried out in accordance with policies and procedures of the medical center and principles of contemporary and evidence-based clinical practice. SLPs with this assignment monitor and report on the status and progress of the team's work and make appropriate adjustments to ensure high quality and timely completion of the assigned workload. SLP team leads provide input to the service chief, section chief or supervisory SLP regarding personnel, productivity or other program management issues.

h. **Research Speech-Language Pathologist, GS-13.**

(1) **Experience.** In addition to the basic requirements at the GS-12 level, completion of one year of professional experience comparable to the next lower level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

(a) Skill to translate research findings into evidence-based clinical practice.

(b) Skill in applying advanced knowledge of contemporary speech-language pathology and related disciplines to research projects.
(c) Skill in critically evaluating the research of others in peer review or editorial activities.

(d) Ability to apply advanced scientific methods in the of innovative research design.

(e) Ability to lead a research team.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Research SLPs at this level are responsible for independently or collaboratively developing, conducting, analyzing and interpreting the findings of peer-reviewed VHA or other funded or unfunded research projects speech, language, voice, cognitive communication or swallowing and then demonstrating application to clinical practice. At this level, research SLPs typically lead a research team. They convey scientific concepts, methodological principles and research findings to individuals with diverse technical expertise and translate findings into evidence-based practice.

(1) Experience. In addition to the basic requirements at the GS-12 level, completion of one year of professional experience comparable to the next lower level.

(2) Demonstrated Knowledge, Skills and Abilities (KSAs). In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

(a) Skill to translate contemporary and evidence-based speech pathology practice knowledge into clinical procedures.

(b) Skill in effective conflict resolution.

(c) Ability to analyze organizational and operational problems to develop and implement solutions.

(d) Ability to provide clinical and administrative oversight and ensure that section activities are aligned with management goals and objectives.

(3) Assignment. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Speech pathology section chiefs/ supervisors at this level manage a speech-language pathology section within a larger service. Section chiefs/ supervisors maintain
oversight of the section’s diagnostic and rehabilitative speech pathology services. In addition, they implement policies and procedures consistent with management goals, objectives and the medical center mission. Section chiefs/supervisors set priorities and assign responsibilities to accomplish speech-language pathology section goals, ensuring proper coordination between care delivered by the section and the overall health care delivery within the facility. Section chiefs/supervisors maintain oversight for continuous performance improvement within the section. They perform supervisory duties, including initiating personnel actions, conducting performance management; planning, scheduling and assigning work; managing leave; assessing competency; appraising performance; and recommending clinical privileges or scope of practice.

j. **Supervisory Speech-Language Pathologist, GS-13.**

(1) **Experience.** In addition to the basic requirements at the GS-12 level, completion of one year of professional experience comparable to the next lower level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

(a) Skill in applying effective management practices to direct the work of organizational units within a service.

(b) Skill in communicating established performance benchmarks to a service or equivalent organizational department.

(c) Skill in implementing continual performance improvement activities to meet performance benchmarks.

(d) Skill in conflict resolution in dealing with a diverse range of employees.

(e) Ability to analyze data to manage workload, quality, performance and productivity within the service.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Assistant chiefs serve as assistants to the service chief, department head or person of similar organizational rank and share a full scope of delegated managerial responsibilities. Assistant chiefs perform supervision, administrative management and direction of both professional areas in a unified audiology and speech-language pathology service or a speech-language pathology service-level department. Assistant chiefs assess the qualifications and
abilities of current and prospective employees; and oversee the professional practice of peers, including recommending clinical privileges or scope of practice of clinical staff. Assistant chiefs identify and address organizational problems; set priorities; communicate assignments and objectives; advise on work methods, practices and procedures; develop performance standards and conduct performance appraisals. They analyze and use data to effectively manage resources, workload, quality, performance, productivity and access within the service. Assistant chiefs provide oversight and assistance in the training and supervision of students, trainees and fellows; and identify continuing education needs of staff.

k. **Supervisory Speech-Language Pathologist, GS-13.**

   (1) **Experience.** In addition to the basic requirements at the GS-12 level, completion of one year of professional experience comparable to the next lower level.

   (2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

      (a) Skill in applying budgetary, regulatory, productivity and quality standards such as those established by the Joint Commission or the Comprehensive Accreditation for Rehabilitation Facilities to guide provision of clinical services effectively.

      (b) Skill in communicating service achievements, resource requirements and short and long-term plans to facility leadership.

      (c) Ability to manage a diverse clinical staff in a service-level department or equivalent organization structure.

      (d) Ability to align resources to achieve program goals.

   (3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Service chiefs at this level are responsible for the management of a unified audiology/speech pathology service or equivalent organizational unit in a small to mid-size medical center. Service chiefs perform supervision, administrative management and direction of all professional areas in a multi-discipline service, ensuring they are consistent with management goals, policies and mission and aligning them with contemporary and evidence-based clinical practice. Service chiefs perform supervisory duties, including initiating personnel actions, conducting performance management; planning, scheduling and assigning work; managing leave; assessing competency;
appraising performance; and recommending clinical privileges or scope of practice. Service chiefs identify and address organizational problems, set priorities, communicate assignments and objectives; advise on work methods, practices and procedures; develop performance standards; and conduct performance appraisals. They analyze and use data to effectively manage resources, workload, quality, performance, productivity and access within the service. Service chiefs have the ultimate responsibility for the training and supervision of students, trainees and fellows and for continuing education needs of staff.

I. Supervisory Speech-Language Pathologist, GS-14.

(1) **Experience.** In addition to the basic requirements at the GS-13 level, completion of one year of professional experience comparable to the next lower level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

(a) Skill to translate management goals and objectives into efficient service operations.

(b) Skill in providing clinical and administrative oversight of service operations within complex facilities and/or multiple sites.

(c) Skill in conflict resolution to facilitate positive working relationships between employees, team leaders and management.

(d) Ability to effectively collaborate with local, VISN and national leadership.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Service chiefs at this level are responsible for managing a unified audiology and speech-language pathology service or equivalent organizational unit in a large, complex or multi-site medical center. They ensure that services provided are of high quality and are consistent with contemporary and evidence-based clinical practice. In providing direction for a specialized and complex service-level department, Service chiefs formulate objectives and priorities and implement plans consistent with the organization’s long-term interest, capitalizing on opportunities and managing risks. Service chiefs must demonstrate active problem and conflict resolution skills and maintain effective interdepartmental relationships to accomplish the medical facility’s mission and goals. Service chiefs manage budgets, determine resource needs, allocate resources and ensure appropriate service productivity,
efficiency and cost-effectiveness. They perform supervisory duties such as preparing personnel actions, performance management; planning, scheduling and assigning work; managing leave; assessing competencies; appraising performance; and recommending clinical privileges or scope of practice. Service chiefs ensure orientation and training programs are established for staff development and oversee academic affiliations, internship and fellowship programs.

m. Speech-Language Pathologist, GS-14.

(1) **Experience.** In addition to the basic requirements at the GS-13 level, completion of one year of professional experience comparable to the next lower level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

   (a) Skill in applying concepts, principles and methodology in a clinical program sufficient to serve as a recognized agency expert and program authority.

   (b) Skill utilizing, evidence-based practice and clinical practice guidelines in multiple professional areas for example audiology and speech pathology and to guide the program staff in applying these tools.

   (c) Skill in analyzing complex organizational problems to develop and implement effective solutions.

   (d) Skill in communicating effectively with persons of divergent backgrounds, interests and points of view.

   (e) Ability to serve as a consultant and liaison to local, regional or national coordinators regarding the delivery of rehabilitation care within the specialty program area.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Speech-language pathologists at this level manage all aspects of a distinct speech-language pathology program or service at a regional, VISN or national level and are generally assigned to a national program office at VA Central Office. This assignment would include but not be specifically limited to activities such as a funded telehealth program, center of excellence, polytrauma/Traumatic Brain Injury, coordination of regional or national quality improvement programs and assists in developing educational webinars and conferences.
SLPs perform policy development and identify quality resources and specialty functions unique to the program to optimize program and patient outcomes. SLP program coordinators are knowledgeable about the facility, regional and national policies to ensure compliance. This assignment requires administrative direction and decision-making skills but does not necessarily require formal supervisory responsibility for personnel. SLPs in this role are responsible for strategic planning to ensure the provision of high-quality services meets the needs of the Veterans being served. They are also responsible for developing and implementing short and long-term goals and objectives consistent with the national program office strategic plan. Their responsibilities include operating and managing key clinical, training, research or administrative programs.

n. **Research Speech-Language Pathologist, GS-14.**

(1) **Experience.** In addition to the basic requirements at the GS-13 level, completion of one year of professional experience comparable to the next lower level.

(2) **Demonstrated Knowledge, Skills and Abilities (KSAs).** In addition to the experience requirements, the candidate must demonstrate all of the following KSAs:

(a) Skill in applying advanced scientific methods in designing and executing creative and innovative research.

(b) Skill to lead a research team with diverse backgrounds, interests and points of view.

(c) Ability to manage large research budgets.

(d) Ability to evaluate the research of others in peer review or editorial settings critically.

(3) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. Research SLPs at this level are actively involved as a principal investigator or co-principal investigators in peer review VA, National Institutes of Health (NIH) or other rigorous intramural or extramural funded research programs. The research SLPs are involved in peer review activities for VHA and non-VHA research, including grant reviews for local research committees, VHA Office of Research, NIH, IRB and peer review journals. At this grade level, the research SLPs formulate and guide research on problems that may require novel approaches or sophisticated research methods for significant impact in speech-language pathology or related disciplines.

(1) Experience. Completion of one year of professional experience equivalent to the next lower grade level directly related to the position being filled.

(2) Demonstrated Knowledge, Skills and Abilities (KSAs). In addition to the experience requirements, the candidate must demonstrate the KSAs identified below:

(a) Knowledge of speech, language, voice, swallowing and cognitive-communication disorders; military hearing loss and auditory system injuries and disorders; and of related statistics, population health surveillance, military medicine and health policy to guide a national program office.

(b) Skill to effectively communicate existing Federal agency policies and regulations for developing strategies and priorities for a collaborative interagency program.

(c) Skill in senior management policy development, strategic planning and priority-setting consistent with organizational goals and objectives.

(d) Skill in leading senior management officials in policy development.

(3) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity and range of variety and be performed by the incumbent at least 25% of the time. The national program director is responsible for defining objectives and providing national VA policy guidance in administering a system-wide audiology and speech-language pathology (ASP) program. The program director is responsible for analyzing and evaluating VA ASP programs, including developing plans, procedures and recommendations to ensure efficient and effective functioning of these programs related to the continuum of care. The program director works with all levels of staff within VA Central Office, VA field staff, field representatives of other Federal agencies, state and local governments and community-based organizations to identify needs and develop strategies for Veterans with, or at risk for, auditory and vestibular system injuries/disorders and speech-language pathology disorders. Serves as an information resource and advisor to senior government officials on matters of national significance. Collaborates with other disciplines’ executive leads within VA, external professional associations and regulatory agencies outside VA to develop national policies and procedures for advancing ASP throughout the entire VA system. The program director serves as a resource to VA ASP programs by applying advanced knowledge of multifaceted health care delivery systems and their relationship to external review organizations, hospital and service-level operations. As a health care provider with a high
degree of demonstrated leadership, motivation, self-direction and initiative, the program director serves as an expert in clinical treatment modalities as well as administrative and clinical support systems regarding speech, language, voice, swallowing and cognitive-communication disorders and hearing loss, auditory and vestibular system injuries and disorders.

5. DEVIATIONS.

a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the educational requirements be waived. Under no circumstances will the licensure requirements be waived, except as provided in paragraph 3.c. above.

c. The placement of individuals in grade levels or assignments not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

1. COVERAGE. The following are requirements for appointment as an audiologist/speech-language pathologist (A/S-LP) in the Veterans Health Administration (VHA). These requirements apply to all VHA A/S-LPs in the General Schedule (GS)-665 series. VHA A/S-LPs provide clinical service to veterans and other VA beneficiaries in VA medical centers, clinics, domiciliaries, nursing care facilities, community care settings, Community-Based Outpatient Clinics, Veterans Outreach Centers, Veterans Integrated Service Network (VISN) offices, and VHA Central Office. In performing these duties, VHA A/S-LPs demonstrate professional knowledge of, and skill in applying, a wide range of theories, principles, and methodology in both the practice of audiology and speech-language pathology.

[a.] Only those individuals who hold an “audiologist/speech-language pathologist” position title prior to March 17, 2006 are subject to the provisions of this standard. Initial appointments of new employees as an “audiologist/speech-language pathologist” will not be permitted. In unusual circumstances, A/S-LPs may be appointed or re-appointed under this standard using waiver procedures. See Section 4, Paragraph 4 “Deviations,” this part.

[b.] Supervisory A/S-LPs will be appointed under either the Audiologist Qualification Standard or Speech-Language Pathologist Qualification Standard. The applicable qualification standard will depend on the position and the nature of the work. In cases where a supervisory A/S-LP has administrative or managerial responsibilities over both audiology and speech-language pathology areas, the applicable standard will be determined by (1) the qualifications of the person applying for the position, (2) the predominance of work in each area, and (3) the needs of the facility.

2. BASIC REQUIREMENTS

a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)

b. Education. A master’s degree or its equivalent in audiology or hearing science from an accredited college or university; or, a master’s degree, or its equivalent, in speech-language pathology, communication sciences and disorders, or a related field, from an accredited college or university. “Accredited” means a college or university [recognized] by a regional accreditation organization and an audiology or speech-language pathology program [recognized] by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA).

NOTE: [Effective] January 1, 2007, the Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology of the ASHA [ ] accredit[s] only doctoral degree programs in audiology or hearing science.

c. Licensure. For those grades that require licensure (GS-12 and above), [ ] the incumbent must hold a full, current, and unrestricted license in both [disciplines] in a State, Territory, Commonwealth, or the District of Columbia. [ ]
(1) The A/S-LP must maintain full, current, and unrestricted licensure/registration.

*[NOTE: All A/S-LPs who perform compensation and pension (C&P) examinations are considered to be performing direct patient care duties, and must possess a full, current, and unrestricted license to practice A/S-LP (38 CFR 4.85).]*

(2) An A/S-LP who has, or has ever had, his/her audiology and/or speech pathology license revoked, suspended, denied, restricted, limited, or issued/placed in a probationary status may be appointed only in accordance with the provisions in Chapter 3, section B, paragraph 16 of this part.

[(3)] **Loss of Credential.** An employee in this occupation who fails to obtain licensure/certification/registration within the required time frame, or who fails to maintain the required licensure/certification/registration must be removed from the occupation, which may also result in termination of employment.

[(4)] The requirement for licensure may be waived by the Under Secretary for Health or designee in VHA Central Office for individuals engaged in research or academic assignments involving no direct patient care duties, in accordance with current activities.

d. **Grandfathering Provision.** All A/S-LPs employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and licensure/certification/registration that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

[(1)] Such employees may be reassigned, promoted up to and including the full performance (journey) level, or demoted within the occupation, but **may not** be promoted beyond the journey level or placed in supervisory or managerial positions.

[(2)] Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

[(3)] Employees initially grandfathered into this occupation, who subsequently obtain additional education and/or licensure/certification/registration that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.
[(4)] If an employee who was retained in an occupation listed in 38 U.S.C. § 7401(3) under this provision leaves that occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

e. **Physical Requirements.** See VA Directive and Handbook 5019.

f. **English Language Proficiency.** A/S-LPs must be proficient in spoken and written English in accordance with chapter 2, section D, paragraph 5a, this part.

3. **GRADE REQUIREMENTS**

a. **Creditable Experience**

   [(1)] **Knowledge of Contemporary Professional Audiology and Speech-Language Pathology Practices.** To be creditable, the experience must have required the use of knowledge, skills, abilities and other characteristics associated with contemporary professional audiology and speech-language pathology practice. This knowledge may be evidenced by one or more of the following:

   [(a)]. At least 1 year of active professional practice or its equivalent. Active professional practice means paid or non-paid employment as a professional audiologist and speech-language pathologist engaged in the practice of audiology and speech-language pathology as defined by the appropriate licensing boards.

   [(b)]. Academic course work leading to a doctoral degree in audiology, speech-language pathology, or directly related fields.

   [(2)] **Quality of Experience.** Experience is creditable if it is both of the following:

   [(a)]. Work as a professional audiologist and speech-language pathologist related to the position to be filled; and

   [(b)]. The work is at a level comparable to audiology and speech-language pathology experience at the next lower grade level.

   [(3)] **Part-Time Experience.** Part-time experience as a professional A/S-LP is credited according to its relationship to the full-time workweek. For example, an A/S-LP employed 20 hours a week, or on a 1/2-time basis, would receive 1 full-time work week of credit for each 2 weeks of service.

b. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining grades.

(1) **GS-9**

(a) **Education and Experience.** None beyond the basic requirements.

(b) **Assignment.** Employees at this level serve in A/S-LP career development positions.
(2) GS-11

(a) **Education and Experience.** Completion of 1 year of professional experience as an A/S-LP equivalent to the next lower level; or 3 years of progressively higher level graduate education leading to a doctoral degree; or a doctoral degree in audiology or speech-language pathology, communication sciences and disorders, or a related field. For positions involved in research A/S-LP assignments involving no direct patient care, no additional education or professional experience is required beyond those identified at the GS-9 level. In addition, the candidate must demonstrate the [knowledge, skills and abilities (KSAs) identified for the assignment].

(b) **Assignments.** A/S-LPs at this grade level may be appointed to one of the following assignments:

1. **Staff Audiologist/Speech Language Pathologist.** Staff A/S-LPs at this grade level perform clinical assessment and treatment intervention. If unlicensed in either field, the individual must function under the supervision of a licensed A/S-LP, audiologist, or speech-language pathologist. If licensed in one field only, the A/S-LP must be supervised by a licensed A/S-LP or licensed audiologist or speech-language pathologist depending on the unlicensed specialty. [The following KSAs are required:

   a.] Knowledge of contemporary audiology and speech-language pathology practice;

   [b.] Ability to communicate orally and in writing;

   [c.] Ability to communicate information effectively to patients, families, and other health care professionals;

   [d.] Knowledge of the principles and techniques in the assessment and treatment of auditory and balance disorders and the diagnosis and treatment of dysphagia;

   [e.] Knowledge of, and ability to develop and implement, comprehensive treatment plans; and

   [f.] Ability to function as a constructive member of a team.

2. **Research Audiologist/Speech-Language Pathologist.** Research A/S-LPs at this grade level serve as research assistants [conducting] research under the direct supervision of principal investigators or co-principal investigators of higher grade level. [In addition to the KSAs in subparagraph 1. above, the following KSAs are required:

   a.] Knowledge of, and ability to apply, appropriate basic scientific methods, basic research design, and statistics;

   [b.] Ability to communicate orally and in writing; and

   [c.] Knowledge of anatomy, physiology, acoustics, speech, language, voice, swallowing, communication, psychoacoustics, and auditory/vestibular pathophysiology, and project-specific knowledge of clinical and research literature.
(3) GS-12

[(a)] **Licensure.** The incumbent must hold a full, current, and unrestricted license in both areas in a State, Territory, Commonwealth, or the District of Columbia.  

(b) **Education and Experience.** Completion of 1 year of professional experience comparable to the next lower level and possession of a full, current, and unrestricted license to practice both audiology and speech-language pathology. For positions involved in research audiology/speech-language pathology assignments involving no direct patient care, completion of a doctoral degree in audiology, speech-language pathology, communication, hearing science, or a related field is fully qualifying. In addition, the candidate must demonstrate the [KSAs identified for the assignment].

(c) **Assignments.** A/S-LPs at this grade level are considered to be at the full performance level and may be appointed to one of the following assignments:

1. **Staff Audiologist/Speech-Language Pathologist.** Staff A/S-LPs at this grade level must demonstrate professional knowledge of, and skill in applying, a wide range of theories, principles, and methodology of the practices of both audiology and speech-language pathology to a wide range of populations. [Individuals may perform ancillary assignments, including program management duties on an occasional basis, where the complexity and amount of work is not substantial (less than 25% of the time). The following KSAs are required:

   a.] Ability to develop coherent treatment strategies;

   [b.] Ability to incorporate new clinical procedures sufficiently to perform clinical services independently;

   [c.] Ability to conduct assessments, provide treatment interventions; and provide consultation to other health care professionals;

   [d.] Knowledge of contemporary audiology and speech-language pathology practices; and

   [e.] Ability to perform functions associated with contemporary audiology and speech-language pathology scope of practice.

2. **Research Audiologist/Speech-Language Pathologist.** Research A/S-LPs at this grade level assist principal investigators or co-principal investigators in peer reviewed VA, National Institutes of Health (NIH), or comparably rigorous intramural or extramurally funded research programs and may serve as investigators on small or unfunded projects of limited complexity or scope. At this grade level, research A/S-LPs have responsibility for conducting research under the general administrative direction of principal investigators or co-principal investigators of higher grade levels. Research A/S-LPs at this grade level may have authored one or more publications, or presented research findings at a national meeting; and may have earned an academic appointment at an affiliated medical school or local university, usually at the rank of instructor, lecturer, or equivalent. [In addition to the KSAs in subparagraph 1. above, the following KSAs are required:
a] Ability to execute research independently;

[b.] Knowledge of clinical and research literature;

c] Knowledge of the principles and techniques in the assessment and treatment of auditory and balance disorders, and communication and swallowing disorders; and

d] Knowledge of anatomy, physiology, language, voice, swallowing, acoustics, applied acoustics, communication, neuroscience and auditory/vestibular pathophysiology.

e] **Ancillary Assignments.** Individuals may perform program management duties on an occasional basis, where the complexity and amount of work is not substantial enough to qualify for the GS-13 level.

[(4)] GS-13

[a] **Licensure.** The incumbent must hold a full, current, and unrestricted license in both areas in a State, Territory, Commonwealth, or the District of Columbia. 

(b) **Education and Experience.** Completion of 1 year of professional experience equivalent to the next lower grade level directly related to the position being filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following professional KSAs and demonstrate the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. A/S-LPs at this grade level may be appointed to one of the following assignments:

1. **Audiologist/Speech-Language Pathologist Team Leader.** A/S-LP clinical team leaders are responsible to program or service managers for ensuring that the work assignments of the other members of the clinical team are carried out by performing a range of duties such as distributing and balancing workload among employees in accordance with established work flow or job specialization; assuring timely accomplishment of the assigned workload; assessing the status, quality, and progress of work; making day-to-day adjustments in accordance with established priorities; obtaining assistance from supervisors or managers on problems that arise. Team leaders exercise authority that is routine or technical in nature but does not require the consistent exercise of independent judgment. 

The following KSAs are required:

a.] Knowledge of contemporary audiology and speech-language pathology practice;

[b.] Ability to articulate and communicate to the clinical team the assignment, project, problem to be solved, actionable events, and objectives, as well as advise on work methods, practices and procedures;

[c.] Ability to coach the clinical team in the selection and application of appropriate problem solving methods and techniques;
II-G31-7

*[d.] Ability to monitor and report on the status and progress of work; evaluate program quality to ensure that methods, deadlines and quality have been met; and make adjustments to accomplish the workload in accordance with established priorities; and

*[e.] Ability to serve as coach, facilitator and/or negotiator in coordinating team initiatives and consensus building activities among clinical team members with widely divergent backgrounds, interests, and points of view.

2. **Research Audiologist/ Speech-Language Pathologist.** Research A/S-LPs at this grade level are actively involved as principal investigators or co-principal investigators in peer reviewed VA, NIH, or comparably rigorous intramural or extramurally funded research programs. At this grade level, research A/S-LPs have responsibility for formulating or conducting research on problems of considerable scope and complexity. Research A/S-LPs at this grade level work with substantial freedom in identifying, defining, and selecting problems for study. At this grade level, research A/S-LPs are mature, competent, and productive workers. They have typically authored one or more publications of considerable interest in the peer-reviewed literature; demonstrated a consistent record of presentation of findings at national scientific meetings; may have earned an academic appointment at the affiliated medical school or local university, usually at the rank of assistant professor or equivalent; and have responsibility for funded research projects. 

[The following KSAs are required:

[a.] Knowledge of, and ability to apply, advanced scientific methods in the design and execution of creative and innovative research;

[b.] Ability to convey scientific concepts and methodological principles to individuals with diverse levels of technical expertise;

[c.] Ability to apply advanced theories and techniques; and

[d.] Advanced knowledge of contemporary audiology and speech-language pathology practice and related disciplines.

(5) **GS-14**

(a) **Licensure.** The incumbent must hold a full, current, and unrestricted license in both areas in a State, Territory, Commonwealth, or the District of Columbia. [ ]

(b) **Education and Experience.** Completion of 1 year of professional experience equivalent to the next lower grade level directly related to the position being filled, and must fully meet the KSAs at that level. In addition, the candidate must demonstrate the following professional KSAs and demonstrate the potential to acquire the assignment specific KSAs designated by an asterisk (*):

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. A/S-LPs at this grade level may only be appointed to research assignments.
1. Research Audiologist/Speech-Language Pathologist. At this grade level, research A/S-LPs are actively involved as principal investigators or co-principal investigators in peer reviewed VA, NIH, or comparably rigorous intramural or extramurally funded research programs. They are involved in peer review activities for VA and non-VA research, e.g., grant review for VA or NIH proposals, local research service committees, e.g., Research and Development (R&D), Health Services Research and Development (HSR&D), Institutional Review Board (IRB), etc.; or serve as consulting editors for peer-reviewed journals. At this grade level, research A/S-LPs have responsibility for formulating and guiding research on problems that are difficult to define or require unconventional or novel approaches, or sophisticated research methods. Research A/S-LPs at this grade level have achieved significant professional recognition by making scientific contributions to research with potential for significant impact in audiology, hearing science, speech-language pathology, or related disciplines. They have typically authored one or more publications of considerable interest and value to the field in the peer-reviewed professional literature; have a consistent record of presentation of findings at national scientific meetings; may have earned an academic appointment at an affiliated medical school or local university, usually at the rank of associate professor or equivalent; and have responsibility for funded research projects. [The following KSAs are required:

a.] Knowledge of, and ability to apply, advanced scientific methods in the design and execution of highly creative, innovative, or complex research;

[b.] Ability to lead and motivate a research team with diverse backgrounds, research interests, and points of view;

[c.] Ability to manage large research budgets;

[d.] Knowledge of, and ability to evaluate critically, the research of others in peer review or editorial settings;

[e.] Ability to convey scientific concepts and methodological principles to individuals with diverse levels of technical expertise;

[f.] Ability to apply advanced theories and techniques, demonstrating exceptional depth of knowledge of clinical research literature;

[g.] Advanced knowledge of contemporary audiology and speech-language practice and related disciplines;

[h.] Advanced knowledge of anatomy, physiology, physiology of speech, acoustics, applied acoustics, communication, neuroscience, psychoacoustics, auditory/vestibular pathophysiology, language, voice, swallowing, and neuroanatomy;

[i.] Advanced knowledge of normal and abnormal auditory and balance function; and

[j.] Advanced knowledge of normal and abnormal communication and swallowing function.
4. DEVIATIONS

a. The appointing official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for A/S-LPs in VHA whose composite record of accomplishments, performance, and qualifications, as well as current assignments, warrant such action based on demonstrated competence to meet the requirements of the proposed grade.

b. Under no circumstances will the educational or licensure requirements be waived, except as provided in paragraph 2c.

c. The placement of individuals in grade levels not described in this standard must be approved by the Under Secretary for Health, or designee, in VHA Central Office.

1. COVERAGE. The following are requirements for appointment as an orthotist, prosthetist, or orthotist/prosthetist in the Veterans Health Administration (VHA). The 667 series includes positions that administer, supervise, or perform work involving designing, fabricating, or fitting orthotic or prosthetic devices to preserve or restore function to patients with disabling conditions of the limbs and spine, or with partial or total absence of limbs.

   a. The work requires:

      (1) Knowledge of anatomy, physiology, body mechanics, the application and function of orthoses and/or prostheses, and of the materials and technology available for use in, and fabrication of, such devices;

      (2) Skill in the use of tools, materials, and specialized equipment; and

      (3) The ability to deal effectively with patients and their problems and to work with other members of the medical team.

   b. Included in this series is such work as:

      (1) Planning, developing, and directing an orthotics and prosthetics program at the national, Veterans Integrated Service Network (VISN), or local level;

      (2) Serving as an integral member of the professional team providing advice to physicians with regard to development of a treatment plan, selection and prescription of devices, and furnishing information concerning such matters as new developments in the fields of orthotics and prosthetics; and

      (3) Assisting in, or leading, research and investigative studies such as those of experimental materials, microprocessor based components, myoelectric components, and emerging technologies.

   c. The administrative aspects of the work require an understanding of statistical information and principles, budget development and management, vendor evaluation, human resources, inventory management, the National Prosthetic Patient Database, Decision Support System, a knowledge of the Prosthetic National Software package, and knowledge of accreditation and certification requirements for orthotic and prosthetic laboratories and staff.

2. BASIC REQUIREMENTS

   a. Citizenship. Citizen of the United States. (Non-citizens may be appointed when it is not possible to recruit qualified citizens in accordance with chapter 3, section A, paragraph 3g, this part.)
b. **Education**

(1) A bachelor's degree or higher in orthotics and prosthetics from a Commission on Accreditation of Allied Health Education Programs (CAAHEP) accredited program.

OR,

(2) A bachelor's degree or higher in any major along with a post-graduate orthotics or prosthetics certificate from a CAAHEP accredited program.

c. **Foreign Graduates.** Graduates of foreign degree programs must have proof of a minimum of a Bachelor’s degree from an accredited college or university (or foreign equivalent, as verified through an independent credential evaluation company), with a specialization in orthotics and prosthetics.

d. **Board Certification.** Candidates must be board certified by the American Board for Certification in Orthotics and Prosthetics (ABC) or the Board for Orthotist/Prosthetist Certification (BOC) as an orthotist, prosthetist, or orthotist/prosthetist. The board certificate must be current and the applicant must abide by the certifying body's requirements for continuing education. Certification as a technician, pedorthist, assistant or fitter does not meet this requirement.

e. **Loss of Credential.** An employee in this occupation who fails to maintain the required certification must be removed from the occupation which may result in termination of employment. At the discretion of the appointing official, an employee may be reassigned to another occupation for which he/she qualifies if a placement opportunity exists.

f. **Grandfathering Provision.** Orthotists, prosthetists, or orthotist/prosthetists employed in VHA in this occupation on the effective date of this qualification standard are considered to have met all qualification requirements for the title, series and grade held, including positive education and certification that are part of the basic requirements of the occupation. For employees who do not meet all the basic requirements required in this standard, but who met the qualifications applicable to the position at the time they were appointed to it, the following provisions apply:

(1) Orthotists, prosthetists, or orthotist/prosthetists that do not meet the basic requirements for education and certification may be reassigned, promoted up to and including the full performance (journey) level, or demoted within the occupation, but may not be promoted beyond the journey level or placed in supervisory or managerial positions.

(2) Employees who are appointed on a temporary basis prior to the effective date of the qualification standard may not have their temporary appointment extended or be reappointed, on a temporary or permanent basis, until they fully meet the basic requirements of the standard.

(3) Employees initially grandfathered into this occupation who subsequently obtain additional education and/or certification that meet all the basic requirements of this qualification standard must maintain the required credentials as a condition of employment in the occupation.
(4) If an employee who was retained under this provision leaves the occupation, the employee loses protected status and must meet the full VA qualification standard requirements in effect at the time of reentry to the occupation.

g. **English Language Proficiency.** Orthotists, prosthetists, or orthotist/prosthetists must be proficient in spoken and written as required by 38 U.S.C. 7402(d).

### 3. GRADE REQUIREMENTS

a. **Creditable Experience**

   (1) **Knowledge of Current Orthotist/Prosthetist Practices.** To be creditable, the experience must have demonstrated the use of knowledge, skills, and abilities associated with current professional orthotic and/or prosthetic professional practice.

   (2) **Quality of Experience.** The experience must be post-degree, from an accredited training program and include work as a professional orthotist/prosthetist directly related to the position to be filled. Experience satisfying this requirement may be paid or non-paid employment. For all assignments above the full performance level, the higher level duties must consist of significantly larger scope, administrative independence, complexity (difficulty) and range of variety as described in this standard at the specified grade level and be performed by the incumbent at least 25% of the time.

   (3) **Part-Time Experience.** Part-time experience as a professional orthotist/prosthetist is creditable according to its relationship to the full-time workweek. For example, an orthotist/prosthetist would receive 1 week of full-time credit for each 2 weeks of half-time work.

b. **Titles.** For purposes of this qualification standard the reference “orthotist/prosthetist” is intended to mean orthotist, prosthetist, or orthotist/prosthetist.

   (1) **Orthotist.** An allied health professional specifically trained to provide or manage the provision of a custom designed, fabricated, modified, and fitted orthosis based upon independent or consultative clinical assessment of the patient’s unique needs and desires, as well as their expectations pursuant to a physician’s prescription.

   (2) **Prosthetist.** An allied health professional specifically trained to provide or manage the provision of a custom designed, fabricated, modified, and fitted prosthesis based upon independent or consultative clinical assessment of the patient’s unique needs and desires, as well as their expectations and pursuant to a physician’s prescription.

   (3) **Orthotist/Prosthetist.** An allied health professional specifically trained to provide or manage the provision of custom designed, fabricated, modified and fitted orthoses and prostheses based upon the independent or consultative clinical assessment of the patient’s unique needs and desires, as well as their expectations and pursuant to a physician’s prescription.
c. **Grade Determinations.** In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

(1) **GS-5 (Entry Level)**

(a) **Experience.** None beyond the basic requirements.

(b) **Assignment.** Assignments at this grade level are entry level trainee in nature where the individual receives developmental assignments designed to build upon the base knowledge, skills, and abilities. The orthotist/prosthetist at this level receives training and instruction to develop proficiency in essential occupational tasks such as taking measurements, patient communication, and fabrication and fitting of simple appliances. The work is performed under close supervision.

(2) **GS-7**

(a) **Experience.** One year of creditable experience as an orthotist/prosthetist equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities (KSAs).** In addition to the experience above, the candidate must demonstrate the following KSAs:

1. Knowledge of medical terminology, anatomy, physiology, biomechanics, kinesiology, physics, and etiology of diseases.

2. Knowledge of psychology and age-related competency.

3. Knowledge of materials science including materials such as plastics, composites, metals, and leather commonly used in fabrication.

4. Ability to use hand and power tools in the fabrication of devices.

5. Ability to communicate orally and in writing.

(c) **Assignment.** Assignments at this grade level represent a developmental level where the individual continues developing the more complex knowledge, skills, and abilities to prepare for substantially independent functioning at the GS-9 grade level. The work includes consultation with the physician, therapist, and/or senior orthotist/prosthetist staff members to obtain and understand the prescription; taking measurements for fabrication and fitting for common disability levels including orthoses for the trunk and cervical spine, leg braces, and prostheses for short or long stumps; and fabrication and fitting of those appliances. Supervision is close for developmental assignments and more general in nature for assignments for which the individual has demonstrated competency. The supervisor is present at final fittings.
(3) **GS-9**

- **Education.** Education equivalent to 2 full years of progressively higher level graduate education or master’s or equivalent graduate degree in orthotics and/or prosthetics, provided the applicant’s total background demonstrates the core competencies for GS-9 level assignment.

  OR,

- **Experience.** Completion of 1 year of experience equivalent to the next lower grade level which demonstrates possession of the knowledge, skills, and abilities needed to provide orthotic/prosthetic services in a hospital setting.

- **Demonstrated Knowledge, Skills, and Abilities.** In addition to the education or experience above, the candidate must demonstrate the following KSAs:

  1. Ability to attend clinics and participate as a member of the treatment team. This includes knowledge of medical terminology, anatomy, physiology, biomechanics, kinesiology, physics, and etiology of diseases as well as knowledge of psychology and age-related competencies.

  3. Ability to conduct clinical patient analyses such as gait, range of motion, life style, etc., for patients with complex but typical conditions.

  4. Ability to take necessary measurements, casts, or scans to develop positive molds of the affected area of the body to create orthoses and/or prostheses.

- **Assignments.** Employees at this level perform a broad range of orthotic and prosthetic services designing custom devices using standard components to optimize patient performance for difficult and complex but typical conditions. Assignments include clinic attendance to provide information on standard and stock items which are readily available. The work involves identification of the biomechanical condition; explaining procedures to patients to reduce anxiety and gain support and cooperation; detailed patient assessment including conducting gait analysis, range of motion, coordination and balance, and motor skills; interviewing patients for lifestyle assessments; taking necessary measurements, casts, or scans to develop positive molds; recognizing physical abnormalities, deviations, and complicating conditions; fabricating, fitting, and evaluating these custom devices; and maintenance of the patient’s record. The work may include use of Computer Assisted Design/Computer Assisted Manufacturing (CAD/CAM) systems.

(4) **GS-11 (Full Performance Level)**

- **Experience.** Completion of 1 year of experience as an orthotist/prosthetist equivalent to the next lower grade level that demonstrates possession of the knowledge, skills, and abilities needed to provide orthotic/prosthetic services in a hospital setting.

- **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs:
1. Ability to attend clinics and participate as a fully participating member of the treatment team with considerable influence in the development of the treatment plan. This includes advanced knowledge of medical terminology, anatomy, physiology, biomechanics, kinesiology, physics, and etiology of diseases as well as knowledge of psychology and age related competencies.

2. Ability to conduct clinical patient analyses such as gait, range of motion, life style, etc., for patients with a wide range of complex medical conditions which include unusual problems or complications, and to design unique or innovative devices to accommodate those conditions.

3. Ability to recognize physical abnormalities, deviations, and complicating conditions with potentially life threatening implications.

(c) Assignments. This is considered to be the full performance level. The orthotist/prosthetist communicates and interacts with physicians, allied health professionals, patients, and caregivers in various interdisciplinary clinical settings, rehabilitation medicine, orthopedics, neurosurgery, vascular care, podiatry, oncology, etc., as a subject matter expert to develop the orthotic and/or prosthetic treatment plan. The work includes complex patient analyses in accordance with established procedures for patients with unusual conditions, multiple complex conditions, interrelated conditions, etc.; assessment of the patient for indications/contra-indications and discussion of the assessment with the physician/requesting provider for the purpose of developing the overall treatment plan with considerable influence in the development of that plan; consideration of new and emerging technologies in designing unique or innovative devices to accommodate or treat a wide range of complex medical conditions which include unusual problems or complications. The orthotist/prosthetist at this level is expected to recognize physical abnormalities, deviations, and complicating conditions with potentially life threatening implications.

(5) GS-12

(a) Experience. Completion of 1 year of experience equivalent to the next lower grade level as an orthotist/prosthetist functioning as a full member of the clinical team which includes significant involvement in treatment plan development for the most complex types of conditions.

(b) Demonstrated Knowledge, Skills, and Abilities. In addition to the experience above, the candidate must demonstrate the following KSA and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

1. Knowledge of regulatory requirements established by the ABC, BOC, the National Committee for Orthotic/Prosthetic Education (NCOPE), the International Association of Orthotists and Prosthetists (IAOP), the American Academy of Orthotists and Prosthetists (AAOP), Joint Commission on Accreditation of Healthcare Organizations (JCAHO), etc.

*2. Knowledge of administrative functions including budget development and management, inventory management, space and workload planning, as well as knowledge of the National Prosthetic Patient Database (NPPD), knowledge of the Prosthetic National Software (PNS) package, Decision Support System (DSS), and knowledge of accreditation requirements for orthotic and prosthetic laboratories and certification requirements for individuals.
*3. Ability to analyze data and provide reports using CPRS, Vista, DSS, HCPCS codes and other patient database information.

*4. Ability to provide training to orthotists/prosthetists in new technologies and innovations in devices.

*5. Ability to manage and supervise employees. (To be used if the assignment is supervisory in nature.)

(c) Assignments. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty) and range of variety and be performed by the incumbent at least 25% of the time. Candidates at this grade level are in one of the following assignments:

1. Advanced Practitioner. The orthotist/prosthetist assignment at this level is intended for smaller, independent laboratories. In addition to functions typical of the GS-11 grade level, the assignment involves responsibility for assuring the accreditation of the laboratory, regulation compliance, and a variety of administrative duties such as developing a budget; managing inventory and resources; overseeing contract employees; planning the orthotics and prosthetics clinical schedule; conducting site surveys of commercial vendors; devising short and long range goals in accordance with local, VISN, and VHA Central Office direction; and conducting quality assurance activities; etc. The orthotist/prosthetist communicates and interacts with physicians, allied health professionals, patients, and caregivers in various interdisciplinary clinical settings, rehabilitation medicine, orthopedics, neurosurgery, vascular care, podiatry, oncology, etc., as a subject matter expert to develop the orthotic and/or prosthetic treatment plan. The work includes complex patient analyses in accordance with established procedures for patients with unusual conditions, multiple complex conditions, interrelated conditions, etc.; assessment of the patient for indications/contra-indications and discussion of the assessment with the physician/requesting provider for the purpose of developing the overall treatment plan with considerable influence in the development of that plan; consideration of new and emerging technologies in designing unique or innovative devices to accommodate or treat a wide range of complex medical conditions which include unusual problems or complications. The orthotist/prosthetist at this level is expected to recognize physical abnormalities, deviations, and complicating conditions with potentially life threatening implications.

2. Supervisory Orthotist/Prosthetist. The orthotist/prosthetist at this level serves as supervisor of an orthotics/prosthetics laboratory assessing, planning, and evaluating the orthotic/prosthetic program at the facility level to ensure proper coordination between the delivery of orthotic/prosthetic services and the overall delivery of health care. Responsibilities include assuring the accreditation of the laboratory, regulatory compliance, and a variety of administrative duties such as developing a budget, managing inventory and resources, overseeing contract employees, supervising assigned staff, etc. The assignment includes performance of the full range of supervisory duties. This includes responsibility for assignment of duties; development of performance standards and performance evaluations; and recommendations for appointment, awards, advancement, and when appropriate, disciplinary action; etc. At this level, the orthotist/prosthetist serves as a consultant within orthotic and prosthetic treatment service and with other facility health care staff in evaluating health care delivery to patients.
(6) GS-13

(a) **Experience.** Completion of 1 year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSA and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

1. Knowledge of regulatory requirements established by ABC, BOC, NCOPE, IAOP, AAOP, JCAHO, Centers for Medicare and Medicaid Services (CMMS), Occupational Safety and Health Administration (OSHA), etc., in order to provide advice to VISN management of the implementation of those requirements.

*2. Knowledge of administrative functions including budget development and management, inventory management, space and workload planning, as well as knowledge of the National Prosthetic Patient Database, a knowledge of the Prosthetic National Software package, CPRS, DSS and knowledge of accreditation requirements for orthotic and prosthetic laboratories and knowledge of certification requirements for clinical staff in order to develop VISN guidelines and policies, allocate resources within the VISN, and project future workload for the VISN.

*3. Ability to analyze data and provide reports using HCPC codes and other patient database information from VISN orthotic and prosthetic laboratories and to provide such reports to VISN management.

*4. Ability to serve as a consultant to orthotists/prosthetists within the VISN on emerging technologies, the most difficult and complex cases, changes in policy, etc.

*5. Ability to supervise. (To be used if the assignment is supervisory in nature.)

(c) **Assignments.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. Candidates at this grade level are in one of the following assignments:

1. **Advanced Practitioner.** Non-supervisory orthotists/prosthetists at this level would be rare; however, in some cases may be justified. The assignment must represent a substantial increase in responsibility over assignments at the GS-12 grade level. An example of an assignment that may possibly warrant this grade level is functioning as a VISN resource/consultant for orthotics and prosthetics and manager of a clinical fabrication facility. The orthotist/prosthetist serves as a referral source for questions from satellite facilities.

2. **Supervisory Orthotist/Prosthetist.** The orthotist/prosthetist at this level serves as the supervisor and laboratory manager for large laboratories or multiple satellite laboratories. In addition to the responsibilities described at the GS-12 level, this assignment includes serving as a VISN
resource/consultant for orthotics and prosthetics; performing or overseeing testing and evaluation of design concepts; overseeing and evaluating contract orthotics and prosthetics vendors.

(7) **GS-14 VHA Central Office National Clinical Manager/ National Director**

(a) **Experience.** Completion of 1 year of experience equivalent to the next lower grade level.

(b) **Demonstrated Knowledge, Skills, and Abilities.** In addition to the experience above, the candidate must demonstrate the following KSAs and demonstrate the potential to acquire the assignment-specific KSAs designated by an asterisk (*):

1. Ability to manage and supervise prosthetic and orthotic laboratories, conduct site visits, and review the functional level of each lab.

2. Knowledge of ABC, BOC, OSHA, and JCAHO standards and Prosthetic and Sensory Aids Service policies and ability to apply these in the daily operations of orthotic and prosthetic laboratories.

3. Ability to provide training in new technologies involving CAD/CAM systems and devices such as computerized foot orthoses, myoelectric prostheses, and energy storing components, neuro and brain machine interface systems.

4. Ability to apply knowledge of the theories and principles used in orthotics and prosthetics to teach custom design and fabrication of devices that are innovative, complex, and/or unusual in nature.

5. Ability to function as a team member or leader with orthotists, prosthetists, and other professionals on committees to review local and national agenda items and to make recommendations based on the review.

6. Ability to develop reports and present at the national level to VHA leadership, Congressional members, and organizations such as AAOP, AOPA, and VSOs.

(c) **Assignment.** For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity (difficulty), and range of variety, and be performed by the incumbent at least 25% of the time. The national clinical manager/national director is responsible for the planning, development, and implementation of a VHA nationwide delivery system for orthotic/prosthetic appliances; and related services. The assignment involves establishing performance standards for VA orthotic and prosthetic laboratories; assessment of VA orthotist/prosthetist certification; accreditation of VA orthotic/prosthetic laboratories; establishing and implementing an educational plan for clinical and technical orthotic and prosthetic laboratories staff; representing the VA as a liaison to Center for Medicare and Medicaid Services; establishing uniform competency assessment procedures for VA orthotic and prosthetic laboratories; developing and monitoring orthotic/prosthetic resident NCOPE accreditation and university preceptorship programs; establishing and implementing a communication system for clinical staff; and acting as a VA orthotic and prosthetic laboratory representative on prosthetic clinical management workgroups.
4. DEVIATIONS

   a. An approving official may, under unusual circumstances, approve reasonable deviations to the grade determination requirements for an employee whose composite record of accomplishments, performance, and qualifications, as well as current assignment, warrants such action based on demonstrated competence to meet the requirements of the proposed grade.

   b. Under no circumstances will the certification or education requirements be waived.

   c. The placement of individuals in grade levels or assignments not described in this standard may only be approved by the Under Secretary for Health, or designee, in VHA Central Office prior to placement in the position.

Authority: 38 U.S.C. §§ 7402, 7403]
APPENDIX G33. MEDICAL RECORD[S] ADMINISTRATOR/MEDICAL RECORDS ADMINISTRATION SPECIALIST QUALIFICATION STANDARD

GS- [0]669
Veterans Health Administration

1. COVERAGE. The following are the requirements for appointment as a [Medical Records Administration Specialist (MRAS) and] Medical Records Administrator (MRA) (collectively referred to as “MRA” or “the occupation”) in the Veterans Health Administration (VHA). These requirements apply to all VHA MRAs in the General Schedule (GS)- [0669] series. MRAs in VHA perform or supervise work concerned with the management of a [health] record program or the provision of services related to medical record administration/health information services. [MRAs] manage, preserve, analyze, and supervise the use of diagnostic and therapeutic [health] records/health information management. They develop policies and procedures and provide advice on the use of [health] records and health information management. [ ] [Excluded from the GS-0669 qualification standard] are positions [such] as [privacy,] compliance, [records manager, medical records technician ((MRT) (Release of Information)), MRT (Health Information Technician), MRT (Coder), clinical documentation improvement specialist, MRT (Cancer Registrar),] or [other occupations which have their own qualification standard.] In the health care community, MRAs are generally referred to as “health information managers [(HIM) or health information management specialists] [(HIMS),]” and [these terms are] considered to be synonymous where stated in this qualification standard.

[2. DEFINITIONS.]

a. Coding Certification. Mastery certification obtained through the American Health Information Management Association (AHIMA) or the American Association of Professional Coders (AAPC). To be acceptable for qualification, the specific certification must represent a comprehensive competency in the occupation. Stand-alone specialty certifications do not meet the definition of mastery level coding certification and are not acceptable for qualifications. Certification titles may change and certifications that meet the definition of mastery level coding certification may be added/removed by the above certifying bodies; however, current mastery level coding certifications include: Certified Coding Specialist (CCS), Certified Coding Specialist (CCS) – Physician-based (CCS-P), Certified Professional Coder (CPC), Certified Outpatient Coder (COC), and Certified Inpatient Coder (CIC).

b. Creditable Experience. Experience is only creditable if it is in health information management and is directly related to the position to be filled. To be creditable, the candidate’s experience must have demonstrated the use of knowledge, skills, and abilities associated with current practice. Experience satisfying this requirement must be active practice, which is paid/non-paid employment as an MRT/MRA or related field such as medical coding, qualitative and quantitative health record analysis, Health Insurance Portability & Accountability Act privacy and release of information, or preparation, maintenance, and management of health records.
c. **Health Data Analyst Certification.** This is limited to certification obtained through AHIMA. To be acceptable for qualifications, the specific certification must certify mastery in health data analysis. Certification titles may change and certifications that meet the definition of health data analyst certification may be added/removed by the above certifying body; however, current health data analyst certification includes Certified Health Data Analyst (CHDA).

d. **Health Information Management (HIM) Certification.** Higher-level health information management certification is limited to certification obtained through AHIMA. To be acceptable for qualifications, the specific certification must represent a comprehensive competency in the occupation. Certification titles may change and certifications that meet the definition of HIM certification may be added/removed by the above certifying body; however, current HIM certifications include Registered Health Information Technician (RHIT) and Registered Health Information Administrator (RHIA).

e. **Journey Level.** The full performance level for this qualification standard is non-supervisory GS-11 grade level.

f. **Part-Time Experience.** Part-time experience as a professional MRA is creditable according to its relationship to the full-time workweek. For example, an MRA would receive one week of full-time credit for each two weeks of half-time work.

g. **Quality of Experience.** To be creditable, experience must be documented on the application or resume and verified in an employment reference, or through other independent means.]

[3.] **BASIC REQUIREMENTS.**

a. **Citizenship.** [Candidates must be a citizen] of the United States. Non-citizens may be appointed when it is not possible to recruit qualified candidates in accordance with 38 U.S.C. § 7407(a).

b. **Education or Experience:**

   (1) **Experience.** Three years of [creditable] experience in the field of medical records that included the preparation, maintenance, and management of [health] records and health information systems [demonstrating a knowledge of medical terminology,] medical records [procedures, medical coding, or medical, administrative, and legal requirements of health care delivery] systems.

   OR,

   (2) **Education.** [Successful completion of a bachelor’s degree or higher from an accredited college or university [recognized by the U.S. Department of Education, with a major field of study in health information management, or a related degree
with a minimum of 24 semester hours in health information management or health information technology.]

OR,

(3) **Experience/Education Combination.** Equivalent combinations of [creditable] experience and education that equals 100 percent may be used to meet basic requirements. [For example, two years above high school from an accredited college or university, with 12 semester hours in health information technology/health information management, plus one year and six months of creditable experience that included the preparation, maintenance, and management of health records and health information systems meets an equivalent combination.]

c. **Certification.** Persons hired or reassigned to MRA positions in the GS-0669 series in VHA must meet one of the following:

(1) Coding Certification through AHIMA or AAPC.

**NOTE.** See paragraph 2a above for a detailed definition of Coding Certification.

OR,

(2) HIM Certification through AHIMA.

**NOTE.** See paragraph 2d above for a detailed definition of HIM Certification.

OR,

(3) Health Data Analyst Certification through AHIMA.

**NOTE.** See paragraph 2c above for a detailed definition of Health Data Analyst Certification.

**NOTE.** HIMs Certification is required for all positions above the full performance level.

d. **Loss of Credential.** Following initial certification, credentials must be maintained through rigorous continuing education, ensuring the highest level of competency for employers and patients. An employee in this occupation who fails to maintain the required certification must be removed from the occupation which may result in termination of employment. At the discretion of the appointing official, an employee may be reassigned to another occupation for which he/she qualifies, if a placement opportunity exists.

e. **Grandfathering Provision.** All persons employed in VHA [as an MRA] are considered to have met all qualification requirements for the title, series, and grade held, including positive education, and [registration and/or] certification [ ] that are part
of the basic requirements of the occupation. For employees who do not meet all the basic requirements [ ] in this standard, but who met the qualifications applicable to the position at the time they were appointed [ ], the following provisions apply:

[(1)] Such employees [ ] may be reassigned, promoted up to, and including, the full performance ([journeyman]) level, or [changed to lower grade] within the occupation, but may not be promoted beyond the [journeyman] level or placed in supervisory or managerial positions.

[(2)] Employees who [were] appointed on a temporary basis, prior to the effective date of the qualification standard, may not have their temporary appointment extended or be reappointed on a temporary or permanent basis until they fully meet the basic requirements of the standard.

[(3)] Employees initially grandfathered into this occupation who subsequently obtain additional education and/or licensure/[registration/certification[, and] meet all the basic requirements of this qualification standard, must maintain the required credentials as a condition of employment in the occupation.

[(4)] MRAs who are converted to title] 38 [hybrid status] under this provision [and subsequently leave the] occupation [lose] protected status and must meet the full VA qualification standard requirements in effect at the time of reentry [, as a medical records administrator].

[g]. English Language Proficiency. MRAs must be proficient in spoken and written English. See 38 U.S.C. § 7403(f).

[4.] GRADE REQUIREMENTS.

a. Grade Determinations. In addition to the basic requirements for employment, the following criteria must be met when determining the grade of candidates.

[NOTE. For all assignments above the full performance level, the higher-level duties must consist of significant scope, complexity, range of variety, and be performed by the incumbent at least 25% of the time.

(1) Medical Records Administration Specialist[,] GS-5. None beyond basic requirements.

[(a) Assignment. ] Employees at this grade level serve in an MRA career development position under close supervision. [MRAs are responsible for generating multiple HIM reports. They participate in various health record review activities to ensure the integrity of the health record according to established policies.

II-G33-4
(2) Medical Records Administration Specialist.] GS-7

(a) Experience. In addition to the basic requirements, [one] year of [creditable] experience equivalent to the next lower grade level. [ ]

OR,

(b) Education. (Advanced Entry-Level Placement). Applicants who meet the GS-5 grade level may be appointed at the GS-7 grade level, if they possess a bachelor’s degree from an accredited college or university in a major field of study in health information management, with an exemplary academic record as demonstrated by:

i. A 3.0 or higher-grade point average (GPA) out of a possible 4.0 GPA (“B” or better), as recorded on their official transcript or as computed based on four years of education, or as computed based on courses completed during the final two years of the curriculum; or

ii. A 3.5 GPA or higher out of a possible 4.0 GPA (“B+” or better) based on the average of the required courses completed in the major field of study, or the required courses completed in the major field of study during the final two years of the curriculum.

AND]

(c) Demonstrated Knowledge, Skills, and Abilities.

i. [Knowledge of current] classification systems [, such as International Classification of Diseases, Current Procedural Terminology,] and [the Healthcare Common Procedure Coding System (HCPCS)].

ii. Ability to effectively communicate (written and verbal) with medical center staff, patients, and external entities.]

iii. Ability to use data collection and analytical techniques for purposes of review, quality control, studies and analysis [of health information.]

[iv. Ability to utilize computer applications with varied functions to produce a wide range of reports, to abstract records, collect and analyze data and present results in various formats.

v. Ability to work independently, adapt to shifting priorities, and meet deadlines.]

(d) Assignment. Employees at this level [ ] serve in [an] MRA career development position [with] guidance [from the supervisor or designee] in day-to-day
assignments. [MRAs are responsible for generating, analyzing, and presenting multiple HIM reports. They monitor health record data integrity per established policies, procedures, and industry standards. They prepare workload and production reports and monitor trends to identify efficiencies and deviations. Additionally, they participate in various health record review activities. The MRA typically participates in various facility and regional committees requiring health information management subject matter expertise.

(3) Medical Records Administration Specialist.] GS-9

(a) **Experience.** [One] year of [creditable] experience equivalent to the next lower grade level that demonstrates the knowledge, skills, abilities, and other characteristics described at that level.

OR,

(b) **Education.** Education equivalent to [two] full years of progressively higher level graduate education or a master’s [degree] or equivalent graduate degree from an accredited college or university in a field directly related to health information management.

[AND]

(c) **Demonstrated Knowledge, Skills, and Abilities**

[i. Knowledge of medical and legal requirements related to health information management and health records.]

ii. Ability to provide technical advice and [guidance] on health information management practices.

iii. Skill in extracting data from various sources and analyzing health information to create reports.

iv. Skill in researching, interpreting, and [applying] health information management guidelines.

[v. Knowledge of performance and process improvement techniques to develop new or improved solutions in health information management.

(d) **Assignments.** Employees at this level serve in an MRA career development position with limited guidance, from the supervisor or designee, in day-to-day assignments. MRAs are responsible for generating and analyzing multiple HIM reports and identifying best practices or opportunities for improvement. They perform workflow analyses, recommend process improvements, and implement changes to improve the productivity and quality controls of the HIM department.
They monitor reports, trends, and health record data integrity according to established policies, procedures, and industry standards. MRAs participate in various health record review activities. They also participate in various facility and regional committees requiring health information management subject matter expertise.

(4) Medical Records Administration Specialist, GS-11

(a) Experience. [One] year of [credible] experience equivalent to the next lower grade level that demonstrates all of the KSAs described at that level. [ ]

OR,

(b) Education. Education equivalent to three full years of progressively higher-level graduate education or a Ph.D., or equivalent doctoral degree from an accredited university or college in the field of health information management.

[AND]

(c) Demonstrated Knowledges, Skills, and Abilities

i. Skill in [performance] and process improvement [techniques to develop and implement new or improved solutions in health information management.

ii. Ability to advise management and staff, at various levels, regarding health record documentation requirements and health information management practices based on current industry standards, policies, statues, laws, and regulations.

iii. Ability to plan, justify, develop, evaluate, assess, monitor, and advise on current health information management processes and recommend changes in policies or procedures.

iv. Ability to determine and evaluate compliance with legal, ethical, and regulatory guidelines and accrediting bodies, as they apply to health information management.

v. Ability to acquire, manage, analyze, interpret, and transform data into accurate, consistent, and meaningful information.

(d) Assignments. This is considered the full performance level for MRA positions (MRA/HIM Specialist). MRAs work independently in day-to-day assignments. They perform data mining; complex data analysis; and interpret and transform data into accurate, consistent, and timely information in support of the business and operational needs of the HIM department and the organization. They present findings and recommendations to the Chief of HIM (CHIM) and facility leadership.
MRAs perform workflow analyses, recommend process improvements, identify and implement best practices, and implement changes as needed to improve the productivity and quality controls of the HIM department. They prepare workload and production reports, monitor trends to identify efficiencies and outliers, and recommend appropriate actions which may involve collaborating with staff at all levels for resolution. The MRA designs and performs quality improvement projects related to health information management to identify and recommend ways of eliminating, combining, simplifying or improving procedures and processes. They compile diagnostic, procedural, and statistical data, and present reports locally, regionally, or nationally. MRAs lead various health record review activities. They participate in various facility, regional, and/or national committees requiring health information management subject matter expertise. The MRA exhibits broad organizational knowledge, communicates and provides training and education to individuals and groups, at multiple levels, both internal and external to the facility.

(5) Medical Records Administrator, (Assistant Chief (ACHIM)), GS-11

(a) Experience. One year of creditable experience equivalent to the next lower grade level that demonstrates all the KSAs described at that level.

OR,

(b) Education. Education equivalent to three full years of progressively higher-level graduate education or a Ph.D., or equivalent doctoral degree, from an accredited university or college in the field of health information.

AND

(c) Certification. Employees at this level must have a HIM Certification.

NOTE. See paragraph 2d of this appendix for detailed definitions of HIM Certification.

AND

(d) Demonstrated Knowledges, Skills, and Abilities

i. Skill in performance and process improvement techniques to develop and implement new or improved solutions in health information management.

ii. Ability to advise management and staff at various levels regarding health record documentation requirements and health information management practices based on current industry standards, policies, statutes, laws, and regulations.
iii. Ability to plan, justify, develop, evaluate, assess, monitor, and advise on current health information management processes and recommend changes in policies or procedures.

iv. Ability to determine and evaluate compliance with legal, ethical, and regulatory guidelines and accrediting bodies as they apply to health information management.

v. Ability to plan, justify, develop, evaluate, assess, monitor and/or advise on current HIM processes and recommend changes in policies or procedures.

vi. Ability to successfully apply principles and techniques of sound resource management (i.e., staffing, space, contracts, equipment).

vii. Ability to provide the full range of supervisory duties, to include assignment of work, completing performance evaluations, selection of staff, and recommendation for awards, advancements, and disciplinary actions, when appropriate.

(e) Assignments. This assignment is considered above the full performance level. This assignment serves as the Assistant Chief of Health Information Management (ACHIM) in VA Medical Centers designated as complexity level 2 or 3 as designated in the VHA, “2014 Facility Complex Model”. The ACHIM assists the Chief HIM (CHIM) in establishing policies, responsibilities, and requirements for HIM related matters, such as health record documentation, coding and clinical documentation improvement, records management, release of information, file room/scanning, transcription and medical speech recognition, as well as the overall management of health information and Veterans health records. The ACHIM assists the CHIM in identifying and setting short-range and long-range goals, program objectives, and tasks to meet the mission and vision of the medical center. They monitor and manage HIM workflow to ensure program objectives are met. They also assist with planning, developing, directing, and evaluating health information and other functions. They oversee implementation and adherence to HIM industry standards, policies, procedures, laws, regulations, and accrediting bodies. The ACHIM ensures the facility is in compliance with applicable standards by completing HIM audits, healthcare data reports, and statistical information, for timely and accurate reporting. They establish, implement, and monitor HIM performance through metrics, productivity measures, benchmarking, and other applicable tools. This MRA position ensures quality and efficiency for all areas and processes of the HIM department.

(6) Medical Records Administrator (Assistant Chief (ACHIM)), GS-12

(a) Experience. One year of creditable experience equivalent to the next lower grade level that demonstrates all the KSAs described at that level.
(b) **Certification.** Employees at this level must have a HIM Certification.

**NOTE.** See paragraph 2d of this appendix for detailed definitions of HIM Certification.

(c) **Demonstrated Knowledge, Skills, and Abilities**

i. Skill in managing various projects and processes, which includes the ability to develop new or improved solutions to complex technical problems in health information management.

ii. Ability to advise management and staff [on a wide range of] health information [management practices] based on current [industry] standards, [policies, statutes, laws, and regulations].

iii. Ability to plan, justify, [develop, evaluate,] assess, [monitor,] and/or advise on [ ] current health information management processes, and recommend changes in policies or procedures.

iv. Ability to [determine] and [evaluate compliance with legal, ethical, and regulatory guidelines, and accrediting bodies as they] apply [to] health information [management.]

v. Ability to [ ] successfully apply principles and techniques of sound [resource] management [(i.e., staffing, space, contracts, equipment).]

[vi. Ability to provide the full range of supervisory duties to include assignment of work, completing performance evaluations, selection of staff, and recommendation of awards, advancements, and disciplinary actions.

(d) **Assignments.** This assignment serves as the Assistant Chief in VA Medical Centers for all categories (1a, 1b, and 1c) within the complexity level 1 as designated in the VHA, “2014 Facility Complexity Level Model”. The ACHIM assists the CHIM in establishing policies, responsibilities, and requirements for HIM related matters, such as health record documentation, coding and clinical documentation improvement, records management, release of information, file room/scanning, transcription and medical speech recognition, as well as the overall management of health information and Veterans’ health records. They assist the CHIM in identifying and setting short-range and long-range goals, program objectives, and tasks to meet the mission and vision of the medical center. The ACHIM monitors and manages HIM workflow to ensure the program objectives are met. The ACHIM assists with planning, developing, directing, and
evaluating health information and other functions. They oversee implementation and adherence to HIM industry standards, policies, procedures, laws, regulations, and accrediting bodies. They ensure the facility is in compliance with applicable standards by completing HIM audits, developing healthcare data reports, and statistical information, for timely and accurate reporting. They establish, implement, and monitor HIM performance through metrics, productivity measures, benchmarking, and other applicable tools. The ACHIM ensures quality and efficiency for all areas and processes of the HIM department.

(7) Medical Records Administrator (Chief (CHIM)),] GS-12

(a) Experience. One year of [creditable] experience equivalent to the next lower grade level that demonstrates the KSAs described at that level.

[AND]

(b) Certification. Employees at this level must [have a HIM Certification].

NOTE. See paragraph 2d of this appendix for detailed definitions of HIM Certification.

AND]

(c) Demonstrated Knowledge, Skills, and Abilities

i. Ability to [determine] and [evaluate compliance] with [legal, ethical, and regulatory guidelines] and [accrediting bodies, as they apply to health information] management.

ii. Skill in [evaluating,] developing [and implementing] new policies [,] procedures, [and] programs.

[iii. Ability] to [provide] program [oversight, including advisory and technical expertise on a range of health information management practices and guidelines to staff at various levels.

iv. Ability to develop and conduct training on health information management programs, policies, procedures, and performance improvement activities.

v. Ability to effectively procure and manage HIM resources (i.e. space, staffing, education, budget, etc.).

vi. Ability] to provide the full range of supervisory duties [to] include assignment of work; completing performance evaluations; selection of staff; and recommendation of awards, advancements, and [ ] disciplinary actions.
Customer service skills necessary to effectively communicate (written and verbal) and interact with all levels of hospital personnel, physicians, patients, and outside agencies.

Ability to deal effectively with sensitive and/or complex situations.

(d) **Assignments.** This assignment serves as the CHIM, which] is the highest-level professional position at the facility, with responsibility for the management and direction of the health information management program. [This assignment is only for facilities designated as complexity level 2 or 3 as designated in the VHA, “2014 Facility Complexity Level Model”, with full program management and supervisory responsibility to direct professional MRAs, technical MRTs, and other support staff in health information management.

CHIMs provide technical advice, planning, and evaluation regarding health information management issues that impact the overall program on a regular and recurring basis. Multi-division, integrated health care systems under the leadership of a single director are considered to be a single facility, with one CHIM. A position with program responsibility over less than the single health care system does not have full program responsibility for the health information management program.

The CHIM establishes policies, procedures, responsibilities, and requirements for HIM-related matters, such as health record documentation, coding and clinical documentation improvement, release of information, file room/scanning, records management, transcription and medical speech recognition, as well as the overall management of health information and Veterans health records. They oversee implementation and adherence to HIM industry standards, policies, procedures, laws, regulations, and accrediting bodies. They ensure that the facility is in compliance with applicable standards by completing HIM audits, developing healthcare data reports, and statistical information, for timely and accurate reporting. They monitor HIM performance through dashboards, productivity standards, and benchmarking. The CHIM participates in establishing and implementing strategic facility and HIM Department goals, controlling program activity costs, budgeting, procurement, and property management to achieve goals and improve processes. They monitor and manage HIM workflow to ensure program objectives are met. They effectively communicate and negotiate with staff at all levels of the organization. The CHIM communicates with medical center staff and external organizations to promote compliance with regulations, guidelines, policies, and procedures to meet the goal of excellent patient care. They ensure quality and efficiency for all areas and processes of the HIM department. They develop and implement HIM departmental short-term and long-term budgets, to include contracts, equipment, space, training, and staffing plans.

(8) Medical Records Administrator (Chief (CHIM)),] GS-13
(a) **Experience.** [One] year of [creditable] experience equivalent to the next lower grade level that demonstrates the KSAs described at that level.

[AND]

(b) **Certification.** Employees at this level must have a HIM Certification.

**NOTE.** See paragraph 2d of this appendix for detailed definitions of HIM Certification.

AND

(c)] **Demonstrated Knowledge, Skills, and Abilities**

[i. Ability to determine and evaluate compliance with] legal, ethical [and regulatory guidelines and accrediting bodies.] as they apply to health information management.

ii. Ability to provide sound, technical guidance to [ ] staff [at various levels] about major program, legal, or procedural changes related to health information management.

[iii. Skill in revising facility policies and] procedures to improve health information management services and to evaluate, modify, and/or adapt new methods to meet regulatory requirements.

iv. Skill in [ ] analyzing [complex] data[, interpreting and trending results for effective management of the HIM program.]

v. [Skill in management/administration, which includes program planning, coordination, interpretation, supervision, consultation, negotiation, problem solving, and monitoring [of HIM processes.

vi. Ability to delegate authority, evaluate and oversee people and programs, accomplish program goals, and adapt to changing priorities.

(d) **Assignments.** This assignment is the Chief Health Information Management (CHIM), which] is the highest-level professional position at the facility with responsibility for the management and direction of the health information management program. [This assignment is only for the CHIM in VA Medical Centers for all categories (1a, 1b, and 1c) within the complexity level 1 as designated in the VHA, “2014 Facility Complexity Level Model”, with full program management and supervisory responsibility to direct professional MRAs, technical MRTs, and other support staff in health information management.
CHIMs] in this assignment provide technical advice, planning, and evaluation about health information management issues impacting the overall program on a regular and recurring basis. [Multi-division, integrated health care systems under the leadership of a single director are considered to be a single facility with one CHIM. A position with program responsibility over less than a single health care system does not have full program] responsibility for the [ ] health information management program.

[The CHIM establishes policies, procedures, responsibilities, and requirements for HIM-related matters, such as health record documentation, coding and clinical documentation improvement, release of information, file room/scanning, records management, transcription and medical speech recognition, as well as the overall management of health information and Veterans health records. They oversee development, implementation and adherence to HIM industry standards, policies, procedures, laws, regulations, and accrediting bodies. They ensure the facility is in compliance with applicable standards, by completing HIM audits, developing healthcare data reports, and statistical information, for timely and accurate reporting. The CHIM monitors HIM performance through dashboards, productivity standards, and benchmarking. They participate in establishing and implementing strategic facility and HIM Department goals and controlling program activities and cost, budgeting, procurement, and property management, to achieve goals and improve processes. The CHIM monitors and manages HIM workflow to ensure program objectives are met.

(9) Medical Records Administrator, GS-13]

(a) **Experience.** [One] year of [creditable] experience equivalent to the next lower grade level that demonstrates the KSAs described at that level.

[AND

(b) **Certification.** Employees at this level must have a HIM Certification.

**NOTE.** See paragraph 2d of this appendix for detailed definitions of HIM Certification.

AND

(c) The] candidate must demonstrate the following professional KSAs [as well as the supervisory KSA (*) if applicable:

(d) **Demonstrated Knowledge, Skills, and Abilities**

   i. Ability to maintain effectiveness and adapt proficiently to changes in the environment, work structure, processes, tasks, or requirements.
ii. Skill in developing new policies and procedures for administering health information management programs to improve program effectiveness and/or apply newly developed programs or theories to problems that require new approaches.

iii. Knowledge of the legal, ethical, and professional standards, as they apply to health information management.

iv. Ability to provide sound, technical guidance to the professional staff and executive leadership regarding major programs, legal, or procedural changes related to health information management.

v. Skill in conducting studies, analyzing data, and presenting results.

vi. Skill in management/administration, which includes program planning, coordination, interpretation, consultation, negotiation, problem solving, and monitoring.

vii. Ability to provide the full range of supervisory duties to include assignment of work; completing performance evaluations; selection of staff; and recommendation for awards, advancements, and disciplinary actions, when appropriate.
