1 Introduction

The release of Veterans Health Information System and Technology Architecture (VistA) Registration, Eligibility & Enrollment (REE) Registration (DG) Host File DG_53_P1056.KID, which includes Registration (DG) patch DG*5.3*1056, Income Verification Match (IVM) patch IVM*2.0*201, and Enrollment Application System (EAS) patch EAS*1.0*203, supports the enhancements for the Enterprise Health Benefits Determination (EHBD) program. This patch focuses on updates for the Enrollment System Modernization (ESM) Phase 4 project, which supports Enrollment System Community Care (ESCC) and Enrollment System (ES) Sustainment.

2 Purpose

The Release Notes cover the changes to VistA REE DG, IVM, and EAS systems for this release.

3 Audience

This document targets users and administrators of VistA REE and applies to the changes made between this release and any previous release for this software.

4 This Release

This multi-package build is distributed as a Host File. Refer to the Software and Documentation Retrieval Instructions section of the patch descriptions for information on obtaining the Host File DG_53_P1056.KID and related documentation.

The following sections provide a summary of the enhancements and modifications to the existing software for VistA REE with the release of patches DG*5.3*1056, IVM*2.0*201, and EAS*1.0*203.

4.1 New Features and Functions Added

There are no new features or functions added to VistA REE for DG*5.3*1056, IVM*2.0*201, and EAS*1.0*203.

4.2 Enhancements and Modifications

Patch DG*5.3*1056 updates VistA to remove the word "permanent" from mailing address labels and prompts. VistA Registration menu options now display the label "Mailing Address" instead of "Permanent Mailing Address" in patient demographic screens.

Patch DG*5.3*1056 also modifies VistA to capture data about the user who makes any change to a Veteran's contact information.

Patch IVM*2.0*201 updates VistA to send user-identifying information to ES, via Health Level Seven (HL7) messaging, when a Veteran's contact information is changed by a VistA user.

Patch EAS*1.0*203 changes the field label for the patient address from "Permanent Mailing Address" to "Mailing Address" in the display available from the menu option View Patient Address.

Table 1 shows the enhancements and modifications included in the DG_53_P1056.KID release as tracked in Atlassian Jira.

Table 1: DG_53_P1056.KID Enhancements and Modifications

Jira Epic #	Summary
VES-7481	Populate Originating Source in ES with VAMC ID (VistA)
VES-10509	Remove the "Permanent" Label on Mailing Address (VistA)

List of Updates

DG*5.3*1056 makes the following enhancements to VistA REE:

PART 1: REMOVE PERMANENT LABEL ON MAILING ADDRESS

Part 1.1: Data Entry Modifications

1. In the Patient Address Update [DG ADDRESS UPDATE] entry in the OPTION file (#19), "(P) permanent address" is replaced with "(M) mailing address" under DESCRIPTION.

NUMBER: 10413	NAME: DG ADDRESS UPDATE
MENU TEXT: Patient Address Update	TYPE: run routine
CREATOR: DGADMIN,ONE	PACKAGE: REGISTRATION
DESCRIPTION: This option enables the user to update a veteran's (M) mailing address, (T) temporary address, or (B) both. If the user chooses (M) or (B), a record will be added to the IVM ADDRESS CHANGE LOG #301.7 File capturing the prior mailing address information.	
ROUTINE: ADDR^DGADDUTL	
UPPERCASE MENU TEXT: PATIENT ADDRESS UPDATE	

Figure 1: DG ADDRESS UPDATE

Part 1.2: Data Dictionary Changes

1. In the COUNTRY field (#.1173) in the PATIENT file (#2), the word "permanent" is replaced with "mailing" under DESCRIPTION.

In addition, a HELP-PROMPT is added.

PART 2: POPULATE ORIGINATING SOURCE

VistA REE is modified to capture user data for any change to a Veteran's contact information. The user data is captured by an add, update, or delete of any contact information associated with the following data:

- Work phone number
- Residential phone number
- Cellular phone number
- VistA Bad Address Indicator
- Email address
- Residential Mailing Address
- Confidential Mailing Address

The fields within the address classes are:

- Address line 1
- Address line 2
- Address line 3
- City
- State
- Province
- Country
- County
- Postal Code
- ZIP +4

Note: The Mailing Address and bad address indicator fields currently capture user data when a change is made to those fields; thus, no modifications are needed.

1. Eight new fields are added to the PATIENT (#2) file to store the identifier of the user who made a change to contact information.
 - a. RESIDENTIAL ADDR CHANGE USER
 - b. CONFIDENTIAL ADDR CHANGE USER

- c. RESIDENCE NUMBER CHANGE USER
 - d. PHONE [WORK] CHANGE USER
 - e. PHONE [WORK]CHANGE DT/TM
 - f. EMAIL ADDRESS CHANGE USER
 - g. CELLULAR NUMBER CHANGE USER
 - h. CONFIDENTIAL PHONE CHANGE USER
2. A trigger is added to SEVEN fields in the PATIENT (#2) file in order to capture user data when a change is made to contact information. The PHONE NUMBER [WORK] has a second trigger added to capture the change date and time.
- a. RESIDENTIAL ADDR CHANGE DT/TM
 - b. CONFIDENTIAL ADDR CHANGE DT/TM
 - c. RESIDENCE NUMBER CHANGE DT/TM
 - d. PHONE NUMBER [WORK]
 - e. EMAIL ADDRESS CHANGE DT/TM
 - f. CELLULAR NUMBER CHANGE DT/TM
 - g. CONFIDENTIAL PHONE NUMBER

IVM*2.0*201 makes the following modification to VistA REE:

VistA is updated to send user-identifying information (User Name, DUZ) and the change date/time in the newly created ZUD segment of the HL7 ORU/ORF-Z07 message for an add, update, or delete of any contact information associated with the following data elements:

- a. Street Address
- b. Confidential Address
- c. Cell Phone Number
- d. E-Mail Address
- e. Home Phone Number
- f. Residential Address
- g. Business Phone Number
- h. Confidential Phone Number

The address class contains the below elements:

- a. Address line 1
- b. Address line 2
- c. Address line 3
- d. City
- e. State
- f. Province
- g. Country
- h. County
- i. Postal Code
- j. Zip+4

The new ZUD segment is as follows

		VISTA
		File# 2 - PATIENT
		File# 200 - NEW PERSON
SEQ	ELEMENT NAME	
---	-----	-----
1	SEQUENCE NUMBER	
2	CONTACT INFO TYPE	Seq 2 will be populated with one of the following codes to identify the type of information: SAD = Street Address Change CAD = Confidential Address Change CPH = Cell Phone Number Change PNO = Pager Number Change EAD = E-Mail Address Change PHH = Home Phone Number Change RAD = Residential Address Change PHB = Business Phone Change PHC = Confidential Phone Change
3	LAST UPDATED DATE/TIME	UPDATE DATE/TIME (#) Date/time the contact information was updated
4	UPDATED BY	VistA User Name (200.01)
	Format:	
	LAST~FIRST~MIDDLE~SUFFIX	
5	USER NUMBER	VistA User Number (200.001)

EAS*1.0*203 makes the following enhancement to VistA REE:

In the display available from menu option View Patient Address [EAS VIEW PATIENT ADDRESS], the field label for the patient address is changed from "Permanent Mailing Address" to "Mailing Address".

```

Select OPTION NAME: EAS VIEW PATIENT ADDRESS          View Patient Address
View Patient Address
Select PATIENT NAME:  DGPATIENT,ONE  (PREFERRED NAME)  ##-##-##
### #####          NO      SC VETERAN
Enrollment Priority: GROUP 5      Category: IN PROCESS      End Date:

DEVICE: HOME//      UCX/TELNET

                Patient Name: DGPATIENT,ONE
                Mailing Address: 555 ANYSTREET
                                ANYCITY, ANYSTATE 48104
                                UNITED STATES

                Bad Address Indicator:
                Mailing Add Change Date: MAY 27, 2021@16:41:21
                Mailing Add Change Source: VAMC
                Mailing Add Change Site: TEST INSTITUTION
    
```
