# Introduction

## Background

The International Classification of Diseases (ICD) is a clinical coding system developed, monitored, and copyrighted by the World Health Organization (WHO). In the United States (US), the National Center for Health Statistics (NCHS), part of the Centers for Medicare and Medicaid Services (CMS), is the agency responsible for overseeing of the clinical modification to the ICD code set.

On January 16, 2009, the Centers for Medicare & Medicaid Services (CMS) released a final rule for replacing the 30-year-old ICD-9-CM code set with International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) and International Classification of Diseases, Tenth Revision, Procedure Coding System (ICD-10-PCS) with dates of service, or date of discharge for inpatients, that occur on or after the industry activation date. The classification system consists of more than 68,000 codes, compared to approximately 13,000 ICD-9-CM codes. There are nearly 87,000 ICD-10-PCS codes, while ICD-9-CM has nearly 3,800 procedure codes. Both systems also expand the number of characters allotted from five and four respectively to seven alpha-numeric characters. This value does not include the decimal point, which follows the third character for the ICD-10-CM code set. There is no decimal point in the ICD-10-PCS code set. These code sets have the potential to reveal more about quality of care, so that data can be used in a more meaningful way to better understand complications, better design clinically robust algorithms, and better track the outcomes of care. ICD-10-CM also incorporates greater specificity and clinical detail to provide information for clinical decision-making and outcomes research.

**VA's Transition to ICD-10:** Implementation of ICD-10-CM and PCS is an immense undertaking, requiring system and business changes throughout all HIPAA-covered entities of the health care industry, including the U.S. Department of Veterans Affairs (VA). All inpatient discharges and outpatient encounter dates on or after the compliance date will require ICD-10 codes as the standard code set for recording and reporting diagnosis and inpatient procedures. This transition will impact Information Technology (IT) systems, secondary data stores, forms and business processes and stakeholders at all levels of the organization.

## Clinical Reminders ICD-10 Update Project

The Clinical Reminders ICD-10 Update project is updating the Clinical Reminders application to allow the use of ICD-10 codes. A very general approach has been taken, wherein Clinical Reminders taxonomies are being restructured to be Lexicon-based instead of pointer-based. This allows the use of any coding system supported by the Lexicon package. In addition to adding ICD-10 codes, SNOMED CT codes are being added. With the release of CPRS 29, SNOMED CT codes can be collected by Problem List and Clinical Reminders will be able to search for them.

## Patches in this project build

### PXRM\*2.0\*26

This build changes Clinical Reminders taxonomies from being pointer-based to being Lexicon-based. A number of things are done to accomplish this. The Reminder Taxonomy data dictionary (file #811.2) is restructured, a new taxonomy management system is introduced, and taxonomy evaluation is changed to accommodate the new structure. For Reminder Dialogs, users will no longer be able to add ICD-9-CM and/or CPT-4 codes to a Reminder Dialog, but will need to create a Taxonomy, assign codes, and then add the Taxonomy to the Reminder Dialog.

See the User Manual and the Taxonomy Management and Dialog Management sections of the Clinical Reminders Manager's Manual for details of changes made by PXRM\*2.0\*26.

Under the Lexicon-based structure, codes are no longer entered as a range, eliminating the need for taxonomy expansion. The post-install routine in PXRM\*2.0\*26 will convert all existing taxonomies and reminder dialogs to the new structure.

### DG\*5.3\*862 - PTF ICD-10 CHANGES FOR CLINICAL REMINDERS

This build updates the Clinical Reminders Index cross-references in the PTF file (#45) to accommodate ICD-10 diagnosis and procedure codes. It restructures the PTF portion of the Clinical Reminders Index to a generic format that can support all ICD coding systems. This format is:

```
^PXRMINDX (45, CODING SYSTEM,"INP", CODE, NODE, DFN, DATE, DAS)
^PXRMINDX (45, CODING SYSTEM,"PNI", DFN, NODE, CODE, DATE, DAS)
```

Where CODING SYSTEM is a three-character abbreviation as defined in the Coding Systems file (#757.03) and CODE is the code, not the pointer. For details, see the Clinical Reminders Index Technical Guide/Programmer's Manual (PXRM\_INDEX\_TM).

The post-install routine will start a background job to rebuild the file #45 index in the new format.

### GMPL\*2.0\*44 - PROBLEM LIST ICD-10 CHANGES FOR CLINICAL REMINDERS

This build updates the Clinical Reminders Index cross-references in the Problem file (#9000011) to accommodate ICD-10 CM diagnosis codes and SNOMED CT codes. It restructures the Problem List portion of the Clinical Reminders Index to a generic format that can support ICD and SNOMED CT coding systems. This format is:

```
^PXRMINDX (9000011, CODING SYSTEM,"ISPP", CODE, STATUS, PRIORITY,
DFN, DLM, DAS)
^PXRMINDX (9000011, CODING SYSTEM,"PSPI", DFN, STATUS, PRIORITY,
CODE, DLM, DAS)
```

Where CODING SYSTEM is a three-character abbreviation as defined in the Coding Systems file (#757.03) and CODE is the code, not the pointer. For details, see the Clinical Reminders Index Technical Manual (PXRМ\_INDEX\_TM).

The post-install routine will start a background job to rebuild the file #9000011 index in the new format.

## Taxonomy Management Changes

Reminder taxonomies, stored in file #811.2, provide a convenient way to create a set of coded values and give the set a name. For example, the VA-DIABETES taxonomy contains a list of ICD diagnosis codes that signify the patient has a diagnosis of diabetes.

***In the past***, taxonomies were based on pointers to the ICD diagnosis file (#80), the ICD Operation/ Procedure file (#80.1), and the CPT file (#81). Multiple ranges of codes (low code to high code) could be defined for each of these coding systems. When editing was finished, each range of codes was expanded to include all the codes from the low code to the high code. Some coding systems such as SNOMED CT do not assign any meaning to the codes, so they cannot be grouped by code and the concept of a range of codes is meaningless. In some cases, for coding systems that do support the concept of a range, code set updates have inserted an unrelated code into a range.

***New Approach:*** For the above reasons, patch PXRМ\*2\*26 changes taxonomies so that they are Lexicon-based. This is a general approach that allows Clinical Reminders taxonomies to support any coding system defined in Lexicon's Coding Systems file (#757.03), provided Lexicon maintains the coding system and patient data using the coding system is stored in VistA.

For each coding system it includes, the Coding Systems file defines a three-character abbreviation, nomenclature, source title, and source (e.g., ICD, ICD-9-CM, International Classification of Diseases, Diagnosis, 9th Edition, and US Department of Health and Human Services). The three-character abbreviation provides a convenient way to refer to coding systems and is used by Clinical Reminders Taxonomies. The following coding systems are supported by Clinical Reminders:

Abbreviation	Nomenclature
10D	ICD-10-CM
10P	ICD-10-Procedure
CPT	CPT-4
CPC	HCPCS
ICD	ICD-9-CM
ICP	ICD-9-Procedure
SCT	SNOMED CT

**NOTE: PXR\*2\*26 doesn't add ICD-10 diagnosis codes to the taxonomies.**

## **Taxonomy Management Dialog Changes**

***In the past,*** users created Reminder Dialogs containing ICD-9-CM and/or CPT-4 codes. When using codes as Finding Items or Additional Finding Items in CPRS, the end user didn't select codes; codes were automatically filed to VistA when the element/group was selected in the Reminder Dialog.

A Taxonomy could only be used as a Finding Item; it created a pick list of codes for the user to pick from in CPRS. The display in CPRS was controlled by the set-up in the Reminder Finding Parameter File (#801.45) and the Reminder Taxonomy File (#811.2). These controls determined if the Taxonomy should assign codes to the current encounter or an historical encounter. The controls also determined what prompts were assigned to the Reminder Dialog in CPRS.

***New approach:*** Users will no longer be able to add ICD-9-CM and/or CPT-4 codes to a Reminder Dialog. Users will need to create a Taxonomy, assign codes, and then add the Taxonomy to the Reminder Dialog. To maintain similar end user functionality in CPRS, a new prompt called Taxonomy Pick List Display has been added to the dialog editor. This controls how Taxonomies should display in CPRS.

### **New Fields**

***Taxonomy Pick List:*** This field controls if and what pick lists should appear in CPRS. The possible values are based on the setup of the Taxonomy in the Finding Item Field. If a pick list is set to not display, the active codes marked to be used in a dialog will automatically be filed to PCE for the encounter date for that element when the finish button is clicked. Possible values for this field:

- All = A pick list will display for each code type (ICD/10D and CPT) in taxonomy.
- DX Only = A pick list will display only for ICD/10D codes
- CPT Only = A pick list will display only for CPT codes
- NONE = No pick list for either ICD or CPT. All codes in taxonomy are entered into PCE

***Diagnosis Header:*** This field displays text that will be used for the Taxonomy Checkbox. The prompt is only available if the Taxonomy Selection Value is set to All. The default value is from the Reminder Finding Type Parameter.

***Procedure Header:*** This field displays text that will be used for the Taxonomy Checkbox. The prompt is only available if the Taxonomy Selection Value is set to All. The default value is from the Reminder Finding Type Parameter.

Also, after PXR\*2.0\*26 is installed, users will no longer be able to set one Taxonomy Element to prompt for both Current and Historical Encounter Data. Users will need to create an element for each encounter type, Current and Historical. If the element

Resolution Type is set to Done Elsewhere, then the editor will prompt the user to accept the default prompts for the taxonomy which includes prompts for historical data. Any other resolution type or no resolution type will prompt data for the current encounter date.

For the ICD-10 implementation, Reminder Dialogs will display ICD-9-CM or ICD-10-CM codes in a pick list based on the code set versioning rules. Reminder Dialogs determine what codes to display using the following rules:

- Current encounters= active codes for that encounter date; Addendums will use the parent note Encounter date.
- Historical encounters= active codes for system date

**Also note** that previously dialogs were set to both current and historical encounters. Dialogs are now set to current encounters only. Please review dialogs before using in CPRS.

## Dialog conversions

- Taxonomies are automatically generated for all dialogs that use ICD-9 diagnosis codes or CPT codes as a finding or additional finding.
- Dialogs with preexisting taxonomies will have the settings from file 801.45 move to the element/group level.
- Dialogs with codes only will generate new taxonomies and the codes will be replaced with taxonomies.
- Dialog elements/groups that are updated will have the edit history updated with the changes due to the data conversion.
- Three MailMan messages will be generated due to the data conversion:
  - A pre-conversion message lists dialogs, elements, and groups to be updated with pre- patched structure.
  - A post-conversion message lists dialogs, elements, and groups with the new structure.
  - A message listing error messages during dialog conversion.

# Pre-Installation

This patch includes pre-install steps to be completed a day before the actual install of PXRМ\*2.0\*26 by the IRМ staff and a Reminder Manager. These pre-install steps are highly recommended due to the data conversion for both taxonomies and dialogs. Please coordinate between the IRМ staff and your Reminder Manager to complete.

- Run the “Check All Reminder Dialogs for Invalid Items” report. This identifies any dialogs that require clean-up before the data conversion, as they may cause errors during the install.
- Run the Finding Usage Report, to be used for troubleshooting purposes after the data has been converted.
- Review the Finding Type Parameter List and verify that there is a meaningful description defined for the Prefix/Suffix for each Enabled Resolution Status for CPT and POV parameters.
- Verify that at least one Reminder Manager is assigned to the Clinical Reminders mail group.

## 1. Check All Reminder Dialogs for Invalid Items.

This will list issues with the set-up of any of the Reminder Dialog. You can use this report to do any clean-up before installing PXRМ \*2.0\*26. Also, it can be used to troubleshoot any error messages that are auto-generated from the post conversion message. See example in [Appendix D](#).

- Access the Dialog Management menu and select the Reminder Dialog Reports.
- Select “All” to run the Check All Active Reminder Dialog for Invalid Items.
- Review report output with the table below and clean up, as needed.

```
Select Reminder Dialog Management <TEST ACCOUNT> Option: DR Dialog Reports

OR      Reminder Dialog Elements Orphan Report
ER      Empty Reminder Dialog Report
ALL     Check all active reminder dialog for invalid items
CH      Check Reminder Dialog for invalid items

Select Dialog Reports Option: ALL Check all active reminder dialog for
invalid items
```

	Clean-up Needed	Clean-up Not Needed
Disabled dialog items in the dialog		<b>X</b>
Incomplete sequences in the dialog	<b>X</b>	
All sub-items in the dialog are pointing to a valid entry on the system	<b>X</b>	
All finding items, additional finding items, and orderable items are pointing to a valid entry on the	<b>X</b>	

system		
Result groups are pointing to a valid MH Test and a MH scale has been defined for the result group	<b>X</b>	
An odd number of “ ” characters in a dialog text field. If this is the case, it would not be possible to determine which part is a TIU Object	<b>X</b>	
Progress Note Text and the Alternate Progress Note text fields have valid TIU Objects and TIU Template Field	<b>X</b>	

## 2. Run Finding Usage Reports on ICD-9 Diagnosis and CPT-4 Procedures, with “All” selected.

See example in [Appendix C](#).

- Access the Reminder Reports menu on the Reminder Manager’s Menu.
- Enter “FUR” from the Select Reminder Reports Option.
- Select Taxonomy, ICD9 Diagnosis and Procedure reminder findings and “All.”
- Review and retain these reports, as these can be used for troubleshooting after PXRM\*2.0\*26 has been installed.
  - Identify which dialogs use codes as finding items or additional finding.
    - For Taxonomy “types” of finding....
      - Identify which dialogs use taxonomies as finding items.
      - Used to update taxonomies with ICD-10 codes.

```
Select Reminder Managers Menu Option: RP Reminder Reports
RD      Reminders Due Report
RDU      Reminders Due Report (User)
RDT      User Report Templates
EPT      Extract EPI Totals
EPF      Extract EPI List by Finding and SSN
EQT      Extract QUERI Totals
GEC      GEC Referral Report
REV      Review Date Report
FUR      Finding Usage Report
Select Reminder Reports Option: FUR
Clinical Reminders Finding Usage Report

Select from the following reminder findings (* signifies standardized):
```

### 3. Check Dialogs and Taxonomies for Reused Codes

A reused code is a code that the standards development organization has inactivated and then sometime later reactivated with a different meaning. An example is the CPT code 90714.

Code	Activation	Inactivation	UID	Description
90714	06/01/1994	04/01/1999		Active Immunization of Typhoid Vaccine
	07/01/2005			Tetanus and Diphtheria Toxoids (TD) Adsorbed, Preservative Free, when Administered to Individuals 7 Years or Older, for Intramuscular use

When a reused code is included in a taxonomy and marked as “Use in Dialog”, a defect in CPRS GUI version 29 always causes the description from the first activation period, regardless of the encounter date, to populate the Provider Narrative in PCE. CPRS GUI version 30.A, which is expected to be released in August 2014, corrects this defect.

This defect more heavily impacts reminder taxonomies containing CPT codes for immunizations but is not limited to a specific code set. Reused codes can be found in the ICD-9, CPT, and HPCS code sets. You can run the Finding Usage report in step two and see if any reused codes on the list below are in the results. Also, use the Finding Usage report to find any taxonomies that are being used in a dialog. If any such taxonomies are found, use taxonomy inquiry to determine if the taxonomy contains any reused codes; if it does, use one of the workarounds described below.

Before CPRS GUI version 30.A is released, you can prevent incorrect provider narrative text being stored for a reused CPT or HCPCS code using the workarounds below. Note that prior to the installation of PXR\*2\*26, HCPCS codes are treated as CPT codes in Clinical Reminders.

Workaround 1: For immunizations and skin tests, setup the reminder dialog to use the immunization or skin test instead of the CPT code via a taxonomy. The PCE Code Mapping File capability can be used to automatically store the CPT code. You will need to make sure that the CPT code is properly mapped in the code mapping file. If you need assistance with this, please enter a Remedy ticket.

Workaround 2: In all other cases, instead of using a dialog to file the code, use the CPRS Encounter Form.

The Standards and Terminology Service Team has provided the following list of reused codes:

#### 9 ICD-9 diagnosis codes

282.40 282.43 282.44 282.45 282.46 282.47 284.01 284.09

284.89

6 ICD-9 procedure codes

L8628 L8629 L8680 L8690 Q0161 T2049

#### 4. Review Procedure (CPT) and Diagnosis (POV) Finding Type Parameter

Access Reminder Dialog Management, Dialog Parameters, General Finding Type Parameter option.

- Select the Item Finding Type Parameter and review the Prefix/Suffix values for Procedure (CPT) and Diagnosis (POV) finding types. These are pre-populated by the software but can be edited at the element. The intent of this step is to verify that the values display a meaningful description in CPRS.

FINDING TYPE PARAMETER NAME: POV - Diagnosis (Taxonomy)		
Resolution Status	Prefix//Suffix & Prompts/Values/Actions	Status
1 DONE AT ENCOUNTER	Diagnosis recorded at encounter/ /. 1] PXR PRIMARY DIAGNOSIS 2] PXR COMMENT 3] PXR ADD TO PROBLEM LIST	Enabled

- Example in CPRS where the prefix and suffix has been edited during the element set-up. 'Dx recorded at encounter.' and 'Px done at encounter.'

☒ Example Procedure (CPT) and Diagnosis (POV) headers:
 

☐ Dx recorded at encounter.
 ☐ Px done at encounter.

- Review the Resolution Status type Enabled/Disable values for both CPT and POV entries.

Finding Type Parameter List		Jun 05, 2014@10:14:53	Page: 1 of 1
FINDING TYPE PARAMETER NAME: CPT - Procedure (Taxonomy)			
Resolution Status	Prefix//Suffix & Prompts/Values/Actions	Status	
1 DONE AT ENCOUNTER	/	Enabled	
	/done.		
	1) PXRQ QUANTITY		
	2) PXRQ COMMENT		
2 DONE ELSEWHERE (HISTORICAL)/		Enabled	
	/previously done.		
	1) PXRQ QUANTITY		
	2) PXRQ VISIT DATE		
	3) PXRQ OUTSIDE LOCATION		
	4) PXRQ COMMENT		

- If both Done at Encounter and Done Elsewhere are enabled, any dialog using a taxonomy that contains codes for the finding parameter will no longer work the same in CPRS.
- With PXRQ\*2.0\*26, the dialog will only support one resolution status per element. The conversion process will set the existing element to Done At Encounter. If the dialog should support both a Done At Encounter and a Done Elsewhere, the site should do the following after the patch has been installed:
  - Create a new element for the Done Elsewhere Status.
  - Create a group that contains both the Done At Encounter and the Done Elsewhere Elements.
  - Replace the current element in the dialog with the new group.

## 5. Reminder Taxonomy Selectable Diagnosis and Selectable Procedure

Reminder taxonomies contain two multiples named SELECTABLE DIAGNOSIS and SELECTABLE PROCEDURE. During the post-init when taxonomies are converted to the new data structure, any codes in these multiples that are not already in the Selected Codes multiple will be moved there with a TERM/CODE of "Copy from selectable diagnosis" and "Copy from selectable procedure"; these codes will be marked as Use In Dialog. After these codes have been moved, you can edit the taxonomy and delete any of the codes you don't want. It should be noted that if the build is installed again, the Selectable Diagnosis and Selectable Procedure codes will be moved again and you will have to delete them again. If your site is a test site, or if you will be installing the build more than once for some other reason, there is an alternative to having to edit the taxonomy after each install. You can use FileMan Search File Entries to find all your taxonomies that contain Selectable Diagnosis or

Selectable Procedure codes. For each of these taxonomies, you can use FileMan Enter or Edit File entries to delete any codes that you do not want moved to the Selected Codes multiple.

## 6. Check for Taxonomies With Nonsensically Large Code Ranges

Extremely large code ranges do not make sense clinically and can cause a store error during the taxonomy conversion process. The store error will prevent the PXR\*2.0\*26 installation from completing, so it is a good idea to make sure you do not have any taxonomies with nonsensically large code ranges. The easiest way to do this is to use FileMan's Search File Entries on file #811.3 (Expanded Taxonomies) and check for large values of the fields NICD0, NICD9, and NICPT; these fields are the total number of codes of each type. A large value would be something over 1500. Here is an example for NICD9:

```
VA FileMan 22.0

Select OPTION: SEARCH FILE ENTRIES

OUTPUT FROM WHAT FILE: EXPANDED TAXONOMIES//

  -A- SEARCH FOR EXPANDED TAXONOMIES FIELD: NICD9
  -A- CONDITION: > GREATER THAN
  -A- GREATER THAN: 1500

  -B- SEARCH FOR EXPANDED TAXONOMIES FIELD:

IF: A//      NICD9 GREATER THAN "1500"

STORE RESULTS OF SEARCH IN TEMPLATE:

SORT BY: NUMBER//
START WITH NUMBER: FIRST//
FIRST PRINT FIELD: .01 EXPANDED TAXONOMY
THEN PRINT FIELD: NICD9
THEN PRINT FIELD:
Heading (S/C): EXPANDED TAXONOMIES SEARCH  Replace
DEVICE:
```

Since these fields are the total number of codes of each type, it may be that there are just a large number of ranges defined and not a single large range. To check for a single large range, do an inquiry on any taxonomy that was found by the FileMan searches and examine each range that is defined. Correct any that are too large to be clinically relevant.

## 7. Verify Mail Group Membership

Verify that there is at least one Reminder Manager assigned to the Clinical Reminder mail group. Inquire to file #800 CLINCIAL REMINDER PARAMETERS SITE PARAMETERS. There is a field: REMINDER MANAGEMENT MAILGROUP: that will list your local mailgroup to check for members.

Problem List GMPL*2.0*43	GMPL	2.0	

## Installation

This section describes how to install the multi-package build that includes patches DG\*5.3\*862, GMPL\*2.0\*44, and PXRM\*2.0\*26.

 **IMPORTANT: Install this build in your production accounts during non-peak/off-hours. The PXRMINDEX Global will be rebuilt for files 45 and 9000011, and reminder evaluation will be disabled while these indexes are rebuilding.**

Estimated installation time is 10- 15 minutes; re-indexing time is 10 minutes to 3 hours.

*The installation needs to be done by a person with DUZ(0) set to "@."*

### 1. Retrieve the host file containing the multi-package build.

Use ftp to access the build (the name of the host file is CR\_ICD-10\_UPDATE .KID) from one of the following locations (with the ASCII file type):

Albany	REDACTED	REDACTED
Hines	REDACTED	REDACTED
Salt Lake City	REDACTED	REDACTED \

Install the patch first in a training or test account.

Installing in a non-production environment will give you time to get familiar with new functionality.

## 2. Back up the Reminder Dialog data (801.41); this is necessary if the data must be restored.

- Back up data using your site's policy for backing up data.
- If the steps are unknown, here is a way it can be done:
  - Go to a command prompt.
  - At the prompt, enter D GOGEN^%ZSPECIAL.
  - At the device prompt, enter the name of the local directory where the file is to be stored with the name of the file. (FILE\_801\_41\_DATA\_BACKUP.GBL)
  - At the Parameters? Prompt, press <enter>.
  - At the Global prompt, enter ^PXRMD(801.41.
  - Verify that the file was created and exists in the directory specified.

### Example

```
DEV5A4:DVFDEV>D GOGEN^%ZSPECIAL

Device: VA5$:[Local Directory]FILE_801_41_DATA_BACKUP.GBL
Parameters? ("WNS") =>
Warning: Use a "V" format to avoid problems with control characters.
Global ^PXRMD(801.41,
Global ^
```

## 3. Prevent Extracts and Reports From Running

- **Check Pending Extracts**
  - Contact your Reminders Manager to assist with this step
  - Access the Reminder Extract Menu and select Reminder Extract Management.
  - For each Extract listed, check the View/Schedule Extract to see if any are scheduled to run around the time of installation. If so, these will have to be re-scheduled. This can be done by using the Taskman Schedule/ Unscheduled Options
- **Check for PXRMD Running/Scheduled Tasks**
  - From TaskMan Management search for any Clinical Reminders or PXRMD tasks.
  - Look to see if there are any scheduled tasks to start or run around the installation time or during the re-indexing of the globals. (Re-indexing may take up to 3 hours after the installation is finished. During the re-indexing clinical reminder evaluation will be disabled.)
  - If any tasks are identified, these must be rescheduled after the re-indexing.
  - When reminder evaluation is disabled a MailMan message will be sent to the Clinical Reminders mail group notifying the members that evaluation has been disabled.

#### 4. Load the distribution.

In programmer mode, type, D ^XUP, select the Kernel Installation & Distribution System menu (XPD INSTALLATION MENU), , and then the option LOAD a Distribution. Enter the directory name where you placed the host file followed by CR\_ICD-10\_UPDATE.KID at the Host File prompt.

##### Example

```
Select Installation Option: LOAD a Distribution
Enter a Host File: VA5$:[DOWNLOADS]CR_ICD-10_UPDATE.KID
KIDS Distribution saved on NOV 27: CR_ICD-10_UPDATE.KID
```

From the Installation menu, you may elect to use the following options:

#### 5. Backup a Transport Global

Use the KIDS Installation option, **Backup a Transport Global [XPD BACKUP]**. This option creates a MailMan message that will back up all current routines on your VistA/M system that will be replaced by the packages in this transport global. (If you need to preserve components that are not routines, you must back them up separately.)

At the **Select INSTALL NAME:** prompt, enter **Clinical Reminders ICD-10 Update 1.0**

##### Example:

```
Select Installation <TEST ACCOUNT> Option: 5 Backup a Transport Global
Select INSTALL NAME: CLINICAL REMINDERS ICD-10 UPDATE 1.0
6/27/13@13:07:40
=> Clinical Reminders ICD-10 Update; Created on Jun 19, 2013@08:20:53

This Distribution was loaded on Jun 27, 2013@13:07:40 with header of
Clinical Reminders ICD-10 Update; Created on Jun 19, 2013@08:20:53
It consisted of the following Install(s):
CLINICAL REMINDERS ICD-10 UPDATE 1.0 DG*5.3*862 GMPL*2.0*44
PXRM*2.0*26
Subject: Backup of CLINICAL REMINDERS ICD-10 UPDATE 1.0 install on Jun 2
Replace
No routines for CLINICAL REMINDERS ICD-10 UPDATE 1.0

Loading Routines for DG*5.3*862
Routine DG53862I is not on the disk...
Loading Routines for GMPL*2.0*44
Routine GMPLP44I is not on the disk...

Send mail to: PXRMPROGRAMMER, ONE
Select basket to send to: IN// PATCH BACKUP
And Send to:

```

## 6. Compare Transport Global to Current System

This option will allow you to view all changes that will be made when the patch is installed. It compares all components of the patch (routines, DDs, templates, etc.).

## 7. Verify Checksums in Transport Global

This option will allow you to ensure the integrity of the routines that are in the transport global. If there are any discrepancies, do not run the Install Package(s) option. Instead, run the Unload a Distribution option to remove the Transport Global from your system. Retrieve the file again from the anonymous directory (in case there was corruption in FTPing) and Load the Distribution again. If the problem still exists, log a Remedy ticket and/or call the national Help Desk (1-888-596-HELP) to report the problem.

### Example

```

CHOOSE 1-2: 2 Verify Package Integrity
Select BUILD NAME: PXR*2.0*26 CLINICAL REMINDERS

Want each Routine Listed with Checksums: Yes// YES
DEVICE: HOME// ;999 TELNET PORT

```

## 8. Install the build

From the Installation menu on the Kernel Installation and Distribution System (KIDS) menu, run the option Install Package(s). Select the build CLINICAL REMINDERS ICD-10 UPDATE 1.0 and proceed with the install. If you have problems with the installation, log a Remedy ticket and/or call the National Help Desk to report the problem.

```

Select Installation & Distribution System Option: Installation
Select Installation Option: INSTALL PACKAGE(S)
Select INSTALL NAME: CLINICAL REMINDERS ICD-10 UPDATE 1.0

```

Answer the following install questions as follows:

- Although typically the answer is "No," you can answer "Yes," to the question:

```

Want KIDS to Rebuild Menu Trees Upon Completion of Install?

```

***Please remember that rebuilding menu trees will increase patch installation time.***

- Answer "No" to the question:

Want KIDS to INHIBIT LOGONs during the install?

- Answer "No" to the question:

Want to DISABLE Scheduled Options, Menu Options, and Protocols?

 The post-inits for DG\*5.3\*862 and GMPL\*2.0\*44 will start a TaskMan job to rebuild their portions of the Clinical Reminders Index. While these indexes are rebuilding, reminder evaluation will be disabled.

 When these indexes are finished rebuilding, reminder evaluation will be enabled and Clinical Reminders should now be available in CPRS. A MailMan message will be sent to the Clinical Reminders mail group notifying the members that evaluation has been enabled.

## Post-Install Instructions

---

### Pre and Post-installation Routines

**Pre-install:** PXRMP\*2.0\*26 renames the option PXRMP TAXONOMY MANAGEMENT to PXRMP TAXONOMY MANAGEMENT (OLD) and makes it unavailable to users.

**Post-install:** During the post-install, a number of conversions are performed, as described earlier in this manual.

After a successful installation, the init routines PXRMP26D, PXRMP26E, PXRMP26I, PXRMP26T, and PXRMP26X can be deleted.

### Mail Messages

- In the **post-install**, DG\*5.3\*862 starts a background job that will rebuild ^PXRMPINDEX (45) in the new format. This job will generate one or two messages to the Clinical Reminders mail group. One message will give the status of the rebuild, and tell if any errors or problems were encountered. If there were problems, another message will be sent with the details of the errors or problems. If bad data is encountered in PTF and you need assistance dealing with it, you can submit a support ticket. After a successful installation, the init routine DG53862I can be deleted.
- In the post-install, GMPL\*2.0\*44 starts a background job that will rebuild ^PXRMPINDEX (9000011) in the new format. This job will generate one or two messages to the Clinical Reminders mail group. One message will give the status of

the rebuild and tell if any errors or problems were encountered. If there were problems, another message will be sent with the details of the errors or problems. During testing, many sites have found that they have some corrupted entries in the Problem List file. Some typical examples seen in the MailMan message are:

```
Subject: CLINICAL REMINDER INDEX BUILD ERROR(S) FOR GLOBAL ^AUPNPROB(

GLOBAL: ^AUPNPROB( ENTRY: 1102 missing date last modified
GLOBAL: ^AUPNPROB( ENTRY: 214464 has the invalid code -1^Invalid IEN for File
GLOBAL: ^AUPNPROB( ENTRY: 214385 has the invalid code -1^Invalid IEN for File
GLOBAL: ^AUPNPROB( ENTRY: 183670 missing DFN
GLOBAL: ^AUPNPROB( ENTRY: 183669 missing DFN
```

It is suggested that a facility representative who has the authority to review content evaluate the status of a problem entry and make updates, including changes to the status of the problem. CACs and/or HIM representatives could be used for this task. Some suggested steps to resolve the corrupted data problems are:

- Use FileMan inquire for each entry with the IEN by entering `NNNN to obtain details of the specific Problem List record.
- Using CPRS and the Problems tab, view the problem to determine the current status.
- If it is active, review the entry to determine if there is any appearance of corrupt or invalid data. It should be noted that the issues found may likely be old and may not have been user-added. Take appropriate corrective action, such as inactivation and/or change of status to remove the invalid data, with annotation in the comments that the entry was reviewed and appears to be invalid, as identified with the GMPL\*2.0\*44 build install. The use of annotation via comments will ensure that proper documentation in the record is retained for any action taken.
- If not active, verify that the problem cannot be currently used, and add notation that the entry appears to be invalid via comments, with no further action. The use of annotation via comments will ensure that proper documentation in the record is retained for any action taken.
- If you require additional assistance you can submit a support ticket.

After a successful installation, the init routine GMPLP44I can be deleted.

- As part of a post-install routine, a MailMan message listing the dialog and the elements of the dialogs that were affected by the conversion will be sent.

## 1. Steps for IRM Managers

- Review PXR\*2.0\*26 Install file entry for any error messages; if found, then contact the Reminder Manager at your site.
- Distribute a copy of the Install File Entry to the Reminder Manager.

## 2. Steps for Reminder Managers

Three MailMan messages are generated as a result of the dialog conversion and sent to the Clinical Reminders mail group. Please review the messages for errors and validate the dialog conversion, using the pre- and post-conversion messages to do a manual side-by-side comparison.

- 1) Review for failed dialog conversions listed as an error MailMan message.

```
Subj: Clinical Reminder Patch 26 Errors.  [#67786] 01/03/14@16:13  9 lines
From: Clinical Reminders Support  In 'IN' basket.  Page 1  *New*
```

```
-----
The following dialog(s) had an error in the update process.
Manual correction is needed.
```

```
█████ ELEMENT NO CODES
```

```
    A taxonomy does not have codes marked to be used in a dialog.
```

```
The following dialogs took an error in UPDATE^DIE.
Manual correction is needed.
```

```
PTH-INTRANASAL FLU H1N1 DONE
```

```
PTH-INTRANASAL FLU H1N1 DONE
```

```
█████ ELEMENT NO CODES
```

- 2) Pre-conversion Mailman message:

```
PB-FLU VACC GIVEN
```

```
=====
```

```
    Resolution Type:
```

```
    Finding Item: ICD9.V04.81
```

```
Additional Finding Items:
```

```

90471   IMMUNIZATION ADMIN        Jan 01, 1999
90658   FLU VACCINE 3 YRS & > IM  Jan 01, 1999

Taxonomy Pick List: No Pick List

Additional Finding Items:

Components:
Sequence: 10 Prompt PXRM PRIMARY DIAGNOSIS Exclude From PN Text:Yes
```

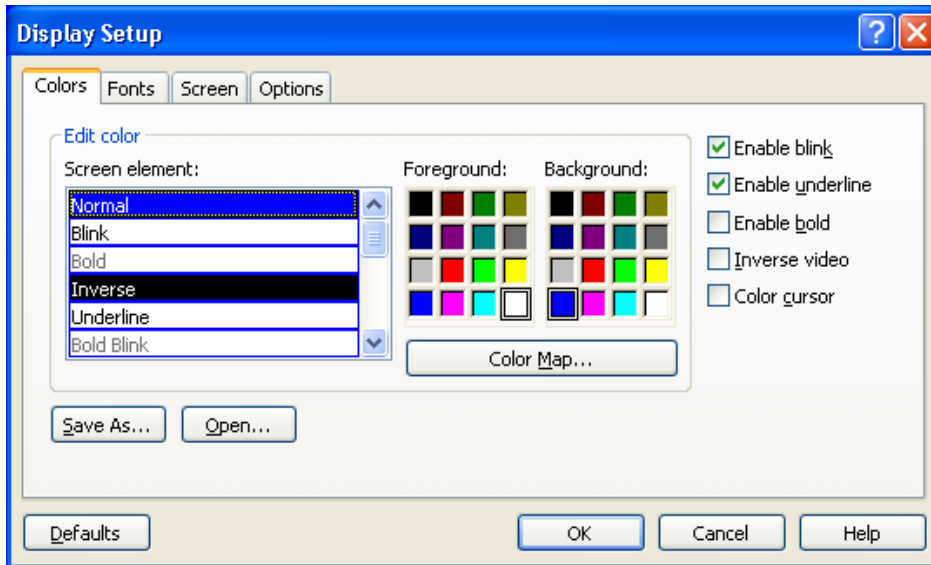

### 3. Check a dialog using taxonomies in CPRS

Check a dialog that contains one of the taxonomies that you compared in the reports, to ensure that the dialog functions as expected. If you spot any problems or have questions, log a Remedy ticket.

### 4. Modify Reflections terminal emulator set-up (optional)

In order to improve the appearance of the new taxonomy management system, it is recommended that users check their Reflections terminal emulator setup, and make sure that the background is changed from the default color white.

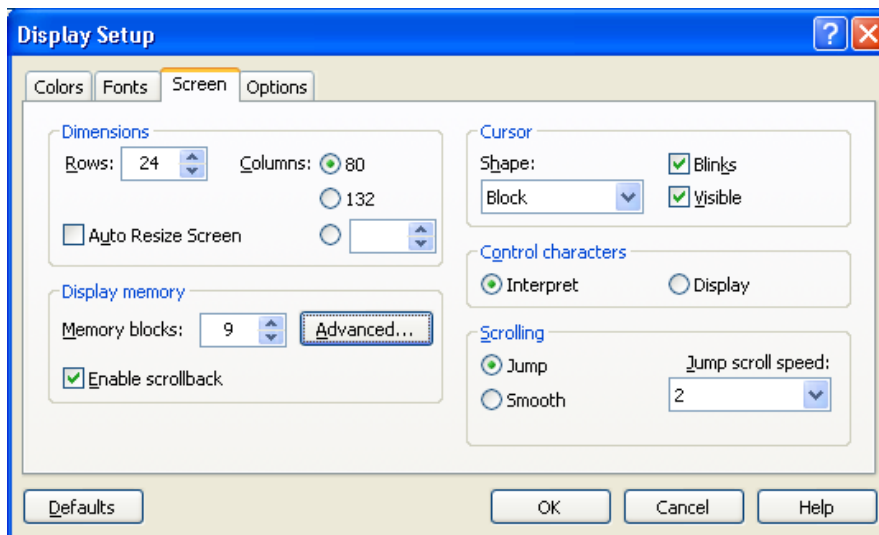

The foreground can be whatever color the user prefers to use with the chosen background.

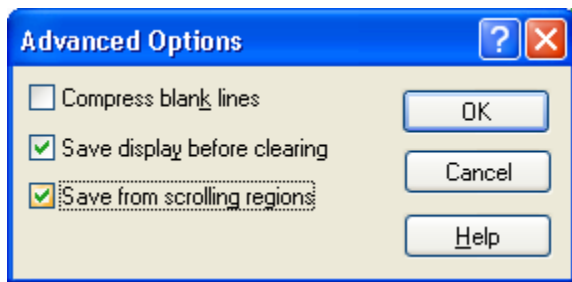

**Figure 1: Terminal Setup**

### Missing text when printing tip

You may notice when printing large amounts of text to the screen, parts of it are missing. To fix this, the Reflections setup must have Save from Scrolling Regions checked. The sequence is: Setup => Display => Screen => Display Memory Advanced.

**Figure 2: Display Setup**

**Figure 3: Save from scrolling regions**

**\*NOTE – KNOWN ANOMALY:**

In List Manager displays, for any action that works with a list, you can select the list and then the action or select the action and then the list. In the first case, the system uses List Manager's list selection, which displays the list as a string of items. If the list has too many items, it generates an error. To prevent this, select the action first.

For example, on the code selection screen, if you do an ICD-10 Lexicon search for diabetes, you will see a list of around 250 codes. If you enter 1-250 at the Select Action prompt, you'll get a range error. However, if you select Add, then you can enter 1-250 and not get an error.

Lexicon Selection		Nov 14, 2013@11:16:15		Page: 57 of 57	
Term/Code: diabetes					
253 ICD-10-CM codes were found.					
+No.	Code	Active	Inactive	Description	
				Gestational Diabetes

Completed record updates for dialog 691 PALL OUTPT 99245 IEN: 2023

Updating record for dialog 691 PALL OUTPT 99244 IEN: 2024  
Adding Taxonomy 691 PALL OUTPT 99244 as a Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALL OUTPT 99244 IEN: 2024

Updating record for dialog 691 PALL OUTPT 99243 IEN: 2025  
Adding Taxonomy 691 PALL OUTPT 99243 as a Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALL OUTPT 99243 IEN: 2025

Updating record for dialog 691 PALL OUTPT 99242 IEN: 2026  
Adding Taxonomy 691 PALL OUTPT 99242 as a Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALL OUTPT 99242 IEN: 2026

Updating record for dialog 691 PALL OUTPT 99241 IEN: 2027  
Adding Taxonomy 691 PALL OUTPT 99241 as a Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALL OUTPT 99241 IEN: 2027

Updating record for dialog 691 PALL OUTPT ENCOUNTER IEN: 2028  
Adding Taxonomy 691 PALL INPT ENCOUNTER as a Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALL OUTPT ENCOUNTER IEN: 2028

Updating record for dialog GP TOB CURRENT USER OPTIONAL ACTIONS FY07 IEN:  
2060  
Adding Taxonomy GP TOB CURRENT USER OPTIONAL ACTIONS FY07 as an Additional  
Find.  
Updating edit history of the dialog.  
Completed record updates for dialog GP TOB CURRENT USER OPTIONAL ACTIONS FY07  
I0

Updating record for dialog GP TOB ED COUNSELING (CURRENT USER) FY07 IEN: 2063

Adding Taxonomy GP TOB CURRENT USER OPTIONAL ACTIONS FY07 as an Additional Find.

Updating edit history of the dialog.

Completed record updates for dialog GP TOB ED COUNSELING (CURRENT USER) FY07 IE3

Updating record for dialog CCHT DISEASE INDICATIONS SUBST ABUSE IEN: 2183

Adding Taxonomy CCHT DISEASE INDICATIONS SUBST ABUSE as a Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog CCHT DISEASE INDICATIONS SUBST ABUSE IEN: 23

Updating record for dialog CCHT DISEASE INDICATIONS PTSD (ICD9) IEN: 2184

Adding Taxonomy CCHT DISEASE INDICATIONS PTSD (ICD9) as a Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog CCHT DISEASE INDICATIONS PTSD (ICD9) IEN: 24

Updating record for dialog CCHT DISEASE INDICATIONS DEPRESSION (ICD9) IEN: 2185

Adding Taxonomy CCHT DISEASE INDICATIONS DEPRESSION (ICD9) as a Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog CCHT DISEASE INDICATIONS DEPRESSION (ICD9) 5

Updating record for dialog CCHT DISEASE INDICATIONS DIABETES (ICD9) IEN: 2186

Adding Taxonomy CCHT DISEASE INDICATIONS DIABETES (ICD9) as a Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog CCHT DISEASE INDICATIONS DIABETES (ICD9) IE6

Updating record for dialog CCHT DISEASE INDICATIONS HTN (ICD9) IEN: 2187

Adding Taxonomy CCHT DISEASE INDICATIONS HTN (ICD9) as a Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog CCHT DISEASE INDICATIONS HTN (ICD9) IEN: 217

Updating record for dialog CCHT DISEASE INDICATIONS COPD (ICD9) IEN: 2188

Adding Taxonomy CCHT DISEASE INDICATIONS COPD (ICD9) as a Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog CCHT DISEASE INDICATIONS COPD (ICD9) IEN: 28

Updating record for dialog CCHT DISEASE INDICATIONS CHF (ICD9) IEN: 2189

Adding Taxonomy CCHT DISEASE INDICATIONS CHF (ICD9) as a Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog CCHT DISEASE INDICATIONS CHF (ICD9) IEN: 219

Updating record for dialog EYE LEGAL BLINDNESS ICD9 369.4 IEN: 3557

Adding Taxonomy EYE LEGAL BLINDNESS ICD9 369.4 as a Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog EYE LEGAL BLINDNESS ICD9 369.4 IEN: 3557

Updating record for dialog EYE MODERATE VISUAL IMPAIRMENT ICD9 369.23 IEN: 3558

Adding Taxonomy EYE MODERATE VISUAL IMPAIRMENT ICD9 369.23 as a Finding Item.

Updating edit history of the dialog.  
 Completed record updates for dialog EYE MODERATE VISUAL IMPAIRMENT ICD9 369.23 8

Updating record for dialog EYE NEAR NORMAL ICD9 369.9 IEN: 3559  
 Adding Taxonomy EYE NEAR NORMAL ICD9 369.9 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog EYE NEAR NORMAL ICD9 369.9 IEN: 3559

Updating record for dialog EYE NORMAL VISION ICD9 367.9 IEN: 3560  
 Adding Taxonomy EYE NORMAL VISION ICD9 367.9 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog EYE NORMAL VISION ICD9 367.9 IEN: 3560

Updating record for dialog ICD9 250.50 IEN: 5341  
 Adding Taxonomy ICD9 250.50 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 250.50 IEN: 5341

Updating record for dialog ICD9 250.51 IEN: 5342  
 Adding Taxonomy ICD9 250.51 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 250.51 IEN: 5342

Updating record for dialog ICD9 250.52 IEN: 5343  
 Adding Taxonomy ICD9 250.52 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 250.52 IEN: 5343

Updating record for dialog ICD9 250.53 IEN: 5344  
 Adding Taxonomy ICD9 250.53 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 250.53 IEN: 5344

Updating record for dialog ICD9 362.01 IEN: 5345  
 Adding Taxonomy ICD9 362.01 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 362.01 IEN: 5345

Updating record for dialog ICD9 362.02 IEN: 5346  
 Adding Taxonomy ICD9 362.02 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 362.02 IEN: 5346

Updating record for dialog ICD9 250.02 IEN: 5349  
 Adding Taxonomy ICD9 250.02 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 250.02 IEN: 5349

Updating record for dialog ICD9 250.01 IEN: 5350  
 Adding Taxonomy ICD9 250.01 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 250.01 IEN: 5350

Updating record for dialog ICD9 250.00 IEN: 5352  
 Adding Taxonomy CCHT DISEASE INDICATIONS DIABETES (ICD9) as a Finding Item.  
 Updating edit history of the dialog.

Completed record updates for dialog ICD9 250.00 IEN: 5352

Updating record for dialog V\*-DG DIAB EYE CODES IEN: 5355  
 Adding Taxonomy V\*-DG DIAB EYE CODES as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog V\*-DG DIAB EYE CODES IEN: 5355

Updating record for dialog ICD9 362.13 IEN: 5364  
 Adding Taxonomy ICD9 362.13 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 362.13 IEN: 5364

Updating record for dialog ICD9 250.03 IEN: 5413  
 Adding Taxonomy ICD9 250.03 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 250.03 IEN: 5413

Updating record for dialog ICD9 362.03 IEN: 6113  
 Adding Taxonomy ICD9 362.03 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 362.03 IEN: 6113

Updating record for dialog ICD9 362.04 IEN: 6114  
 Adding Taxonomy ICD9 362.04 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 362.04 IEN: 6114

Updating record for dialog ICD9 362.05 IEN: 6115  
 Adding Taxonomy ICD9 362.05 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 362.05 IEN: 6115

Updating record for dialog ICD9 362.06 IEN: 6116  
 Adding Taxonomy ICD9 362.06 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 362.06 IEN: 6116

Updating record for dialog ICD9 362.10 IEN: 6117  
 Adding Taxonomy ICD9 362.10 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 362.10 IEN: 6117

Updating record for dialog ICD9 362.07 IEN: 6118  
 Adding Taxonomy ICD9 362.07 as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog ICD9 362.07 IEN: 6118

Updating record for dialog 691 PALLI CONS OUTPT ENCOUNTER GP IEN: 6914  
 Adding Taxonomy 691 PALL INPT ENCOUNTER as a Finding Item.  
 Updating edit history of the dialog.  
 Completed record updates for dialog 691 PALLI CONS OUTPT ENCOUNTER GP IEN: 6914

Updating record for dialog 691 PALLI CONS INPT ENCOUNTER GP IEN: 6915  
 Adding Taxonomy 691 PALL INPT ENCOUNTER as a Finding Item.  
 Updating edit history of the dialog.

Completed record updates for dialog 691 PALLI CONS INPT ENCOUNTER GP IEN: 6915

Updating record for dialog 691 PALLI CONS INFECTIOUS COND TAX GP IEN: 6917  
Adding default Header Text for POV.  
Adding prompts to the dialog.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALLI CONS INFECTIOUS COND TAX GP IEN: 7

Updating record for dialog 691 PALLI CONS RHEUM/VAS/THROM COND TAX GP IEN: 6918  
Adding default Header Text for POV.  
Adding prompts to the dialog.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALLI CONS RHEUM/VAS/THROM COND TAX GP 8

Updating record for dialog 691 PALLI CONS DERMATOLOGIC DX IEN: 6919  
Adding default Header Text for POV.  
Adding prompts to the dialog.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALLI CONS DERMATOLOGIC DX IEN: 6919

Updating record for dialog 691 PALLI CONS RENAL COND TAX GP IEN: 6920  
Adding default Header Text for POV.  
Adding prompts to the dialog.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALLI CONS RENAL COND TAX GP IEN: 6920

Updating record for dialog 691 PALLI CONS GI COND TAX GP IEN: 6921  
Adding default Header Text for POV.  
Adding prompts to the dialog.  
Updating edit history of the dialog.  
Completed record updates for dialog 691 PALLI CONS GI COND TAX GP IEN: 6921

Updating record for dialog 691 PALLI CONS CARDIO COND TAX GP IEN: 6922  
Adding default Header Text for POV.

Adding Taxonomy PALLI CONS DYSPNEA SEVERE (E) as an Additional Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog VA-PALLI CONS DYSPNEA 4 (E) IEN: 8487

Updating record for dialog VA-PALLI CONS DYSPNEA 3 (E) IEN: 8488

Adding Taxonomy PALLI CONS DYSPNEA MILD (E) as an Additional Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog VA-PALLI CONS DYSPNEA 3 (E) IEN: 8488

Updating record for dialog VA-PALLI CONS DYSPNEA 2 (E) IEN: 8489

Adding Taxonomy PALLI CONS DYSPNEA MILD (E) as an Additional Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog VA-PALLI CONS DYSPNEA 2 (E) IEN: 8489

Updating record for dialog VA-PALLI CONS DYSPNEA 1 (E) IEN: 8490

Adding Taxonomy PALLI CONS DYSPNEA MILD (E) as an Additional Finding Item.

Updating edit history of the dialog.

Completed record updates for dialog VA-PALLI CONS DYSPNEA 1 (E) IEN: 8490

Updating record for dialog VA-PALLI CONS DYSPNEA 0 (E) IEN: 8491  
Adding Taxonomy PALLI CONS DYSPNEA MILD (E) as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog VA-PALLI CONS DYSPNEA 0 (E) IEN: 8491

Updating record for dialog VA-PALLI CONS PAIN SEVERE (E) IEN: 8494  
Adding Taxonomy PALLI CONS PAIN SEVERE (E) as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog VA-PALLI CONS PAIN SEVERE (E) IEN: 8494

Updating record for dialog VA-PALLI CONS PAIN MODERATE (E) IEN: 8495  
Adding Taxonomy PALLI CONS PAIN SEVERE (E) as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog VA-PALLI CONS PAIN MODERATE (E) IEN: 8495

Updating record for dialog VA-PALLI CONS PAIN MILD (E) IEN: 8496  
Adding Taxonomy PALLI CONS PAIN SEVERE (E) as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog VA-PALLI CONS PAIN MILD (E) IEN: 8496

Updating record for dialog VA-PALLI CONS PAIN NONE (E) IEN: 8497  
Adding Taxonomy PALLI CONS PAIN NONE (E) as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog VA-PALLI CONS PAIN NONE (E) IEN: 8497

Updating record for dialog HF LIPID LDL 120-129 IEN: 13223  
Adding Taxonomy HF LIPID LDL 120-129 as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog HF LIPID LDL 120-129 IEN: 13223

Updating record for dialog HF LIPID LDL 100-119 IEN: 13224  
Adding Taxonomy HF LIPID LDL 120-129 as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog HF LIPID LDL 100-119 IEN: 13224

Updating record for dialog FLU RECIEVED ELSEWHERE IEN: 442000200  
Adding Taxonomy FLU RECIEVED ELSEWHERE as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog FLU RECIEVED ELSEWHERE IEN: 442000200

Updating record for dialog TX NEW EMPLOYEE CODES IEN: 442000227  
Updating record for dialog IM PNEUMO-VAC DONE ELSEWHERE IEN: 442000250  
Adding Taxonomy IM PNEUMO-VAC DONE ELSEWHERE as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog IM PNEUMO-VAC DONE ELSEWHERE IEN: 442000250

Updating record for dialog IM TD-ADULT DONE ELSEWHERE IEN: 442000265  
Adding Taxonomy HF TD - RECEIVED ELSEWHERE DONE ELSEWHERE as an Additional Find.  
Updating edit history of the dialog.  
Completed record updates for dialog IM TD-ADULT DONE ELSEWHERE IEN: 442000265

Updating record for dialog COLON CANCER IEN: 442000277  
Adding Taxonomy COLON CANCER as a Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog COLON CANCER IEN: 442000277

Updating record for dialog COLONOSCOPY POLYPS IEN: 442000278  
Adding Taxonomy COLONOSCOPY POLYPS as a Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog COLONOSCOPY POLYPS IEN: 442000278

Updating record for dialog TX PRIOR DX OF MI IEN: 442000346  
Adding default Header Text for POV.  
Adding prompts to the dialog.  
Updating edit history of the dialog.  
Completed record updates for dialog TX PRIOR DX OF MI IEN: 442000346

Updating record for dialog HEP A ELSEWHERE IEN: 442000355  
Adding Taxonomy IM HEP B DONE ELSEWHERE as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog HEP A ELSEWHERE IEN: 442000355

Updating record for dialog HEP B ELSEWHERE IEN: 442000366  
Adding Taxonomy HEP B ELSEWHERE as an Additional Finding Item.  
Updating edit history of the dialog.  
Completed record updates for dialog HEP B ELSEWHERE IEN: 442000366

Updating record for dialog TX TOBACCO USE CODES IEN: 442000839  
Adding default Header Text for POV.  
Adding prompts to the dialog.  
Updating edit history of the dialog.  
Completed record updates for dialog TX TOBACCO USE CODES IEN: 442000839

Updating record for dialog TX DEPRESSION SCREEN CODE IEN: 567000234  
Adding default Header Text for POV.  
Adding prompts to the dialog.  
Updating edit history of the dialog.  
Completed record updates for dialog TX DEPRESSION SCREEN CODE IEN: 567000234

Overview  
Created 64 taxonomies  
Updated 135 dialogs  
Converting ADD TO PROBLEM LIST IEN: 4557

## Appendix B: Post-Install Checksums

### Installation Checksums: DG Routines

```
DEV5A4:DEMCUR>D CHECK1^XTSUMBLD
```

```
New CheckSum CHECK1^XTSUMBLD:
```

```
This option determines the current checksum of selected routine(s).  
The Checksum of the routine is determined as follows:
```

1. Any comment line with a single semi-colon is presumed to be followed by comments and only the line tag will be included.
2. Line 2 will be excluded from the count.
3. The total value of the routine is determined (excluding exceptions noted above) by multiplying the ASCII value of each character by its position on the line and position of the line in the routine being checked.

```
Select one of the following:
```

P	Package
B	Build

```
Build from: Build
```

```
This will check the routines from a BUILD file.  
Select BUILD NAME: DG*5.3*862      REGISTRATION  
DG53862I  value = 108880036  
DGPTDDCR  value = 88922399  
done
```

## Installation Checksums: GMPL Routines

```
DEV5A4:DEMCUR>D CHECK1^XTSUMBLD
```

```
New CheckSum CHECK1^XTSUMBLD:
```

```
This option determines the current checksum of selected routine(s).  
The Checksum of the routine is determined as follows:
```

1. Any comment line with a single semi-colon is presumed to be followed by comments and only the line tag will be included.
2. Line 2 will be excluded from the count.
3. The total value of the routine is determined (excluding exceptions noted above) by multiplying the ASCII value of each character by its position on the line and position of the line in the routine being checked.

```
Select one of the following:
```

P	Package
B	Build

```
Build from: Build
```

```
This will check the routines from a BUILD file.  
Select BUILD NAME: GMPL*2.0*44      PROBLEM LIST  
GMPLP44I  value = 86662145  
GMPLPXRM  value = 41114026  
done
```

## Installation Checksums: PXRm Routines

```
DEV5A4:DEMCUR>D CHECK1^XTSUMBLD
```

New CheckSum CHECK1^XTSUMBLD:

This option determines the current checksum of selected routine(s).  
The Checksum of the routine is determined as follows:

1. Any comment line with a single semi-colon is presumed to be followed by comments and only the line tag will be included.
2. Line 2 will be excluded from the count.
3. The total value of the routine is determined (excluding exceptions noted above) by multiplying the ASCII value of each character by its position on the line and position of the line in the routine being checked.
