## Introduction

---

The Teratogenic Medications Order Check Interim Solution was originally released as VistA patch PXRМ\*2\*22 in July 2012. The interim solution is intended to have regular updates for clinical content, primarily to add newly approved medications with FDA Pregnancy Categories that warrant an order check. This patch, PXRМ\*2\*34 represents the first such update. Included in this update are new medications, order check text changes consistent with the Notification of Teratogenic Medications project, support for reversal of tubal ligations, and updates to the taxonomies that define a women's medical inability to conceive a pregnancy.

This patch also includes an update to a single dialog element for the Epilepsy Initial note that was released with PXRМ\*2.0\*30. That element had a mapped Health Factor Category, instead of a mapped Health Factor. This element updates that mapped item.

## Pre-Installation

---

### *Required Software for PXRМ\*2\*34*

Package/Patch	Namespace	Version	Comments
Clinical Reminders	PXRМ	2.0	Fully patched
Health Summary	GMTS	2.7	Fully patched
Kernel	XU	8.0	Fully patched
NATIONAL DRUG FILE	PSN	4.0	Fully patched
Pharmacy Data Management	PSS	1.0	Fully patched
Outpatient Pharmacy	PSO	7.0	Fully patched
VA FileMan	DI	22	Fully patched

# Installation

---

*This patch can be installed with users on the system, but it should be done during non-peak hours. Estimated Installation Time: 10-15 minutes*

*The installation needs to be done by a person with DUZ(0) set to "@."*

**NOTE: We recommend that a Clinical Reminders Manager or CAC be present during the install, so that if questions occur during the install of Reminder Exchange entries, a knowledgeable person can respond to them.**

1. Retrieve the host file from one of the following locations (with the ASCII file type):

Albany	REDACTED	REDACTED
Hines	REDACTED	REDACTED
Salt Lake City	REDACTED	REDACTED

2. Install the patch first in a training or test account.

Installing in a non-production environment will give you time to get familiar with new functionality and complete the setup for reminders and dialogs prior to installing the software in production.

3. Load the distribution.

In programmer mode type, D ^XUP, select the Kernel Installation & Distribution System menu (XPD MAIN), then the Installation option, and then the option LOAD a Distribution. Enter your directory name.KID at the Host File prompt.

## Example

```
Select Installation Option: LOAD a Distribution
Enter a Host File: PXRM_2_0_34.KID
KIDS Distribution saved on
```

From the Installation menu, you may elect to use the following options:

4. Backup a Transport Global

This option will create a backup message of any routines exported with the patch. It will NOT back up any other changes such as DDs or templates.

- a. Compare Transport Global to Current System

This option will allow you to view all changes that will be made when the patch is installed. It compares all components of the patch (routines, DDs, templates, etc.).

## 5. Install the build.

From the Installation menu on the Kernel Installation and Distribution System (KIDS) menu, run the option Install Package(s). Select the build PXRM\*2.0\*34 and proceed with the install. If you have problems with the installation, log a Remedy ticket and/or call the National Help Desk to report the problem.

```
Select Installation & Distribution System Option: Installation
Select Installation Option: INSTALL PACKAGE(S)
Select INSTALL NAME: PXRM*2.0*34
```

Answer "NO" to the following prompt:

Want KIDS to INHIBIT LOGONs during install? NO// **NO**

**NOTE: DO NOT QUEUE THE INSTALLATION**, because this installation asks questions requiring responses and queuing will stop the installation. A Reminders Manager or CAC should be present to respond to these.

### Installation Example

See [Appendix A](#).

## 6. Install File Print

Use the KIDS Install File Print option to print out the results of the installation process. You can select the multi-package build or any of the individual builds included in the multi-package build.

```
Select Utilities Option: Install File Print
Select INSTALL NAME: PXRM*2.0*34
```

## 7. Build File Print

Use the KIDS Build File Print option to print out the build components.

```
Select Utilities Option: Build File Print
Select BUILD NAME: PXRM*2.0*34
DEVICE: HOME//
```

## 8. Post-installation routines

After successful installation, the following init routines may be deleted:

PXRMP34E  
PXRMP34I

# Post-Install Set-up Instructions

---

## 1. Activate the Reminder Order Check Rules

The installation of patch PXRМ\*2\*34 will revert the STATUS of the Reminder Order Check Rules “VA-TERATOGENIC MEDICATIONS ORDER CHECK (CAT D) RULE” and “VA-TERATOGENIC MEDICATIONS ORDER CHECK (CAT X) RULE” to TEST. If your site is using these order checks, the rules will need to be re-activated to PROD status. Shown below are the steps to make this change, which should be done for both rules. The option represented here is Add/Edit Reminder Order Check Rule [PXRМ ORDER CHECK RULE EDIT].

Select <u>Reminder Order Check Menu</u> Option: <b>RE</b> Add/Edit Reminder Order Check Rule
Select Reminder Order Check Rule by: (N/R/T/Q): N// <b>N</b> ORDER CHECK RULE NAME
Select Reminder Order Check Rule: ?
Answer with REMINDER ORDER CHECK RULES RULE NAME
Choose from:
1 VA-TERATOGENIC MEDICATIONS ORDER CHECK (CAT D) RULE
2 VA-TERATOGENIC MEDICATIONS ORDER CHECK (CAT X) RULE
CHOOSE 1-2: 1 VA-TERATOGENIC MEDICATIONS ORDER CHECK (CAT D) RULE
<u>RULE NAME</u> : <b>VA-TERATOGENIC MEDICATIONS ORDER CHECK (CAT D) RULE</b>
<u>DISPLAY NAME</u> : <b>Known or Potential Teratogen (FDA Cat. D or Cat. C w/other data)</b>
<u>STATUS</u> : <b>PROD</b>
<sup>^</sup> <i>change to PROD to activate Production Mode instead of Testing Mode</i>
 <u>CLASS</u> : <b>NATIONAL</b>
<u>SPONSOR</u> :
<u>REVIEW DATE</u> :
