Introduction

The purpose of this project is to release 1) two new Scheduling reports that identify no-show “high risk for suicide” patients that missed their MH appointments, 2) a new national reminder and reminder dialog that will be used by providers to document results of following up with a high risk for suicide patient that missed a MH appointment, and 3) provide a health summary type with MH-specific supporting information. This functionality is in Increment 1 and 2 of the High Risk MH Patient – Reminder and Flag project.

The first release of the High Risk Mental Health Patient- Reminder and Flag (HRMHP) project includes five patches, which will be installed as a combined build, HIGH RISK MH 1.0. This Installation Guide describes installing and setting up Increments 1 and 2. Increments 3 and 4 will be released in a future build.

SD*5.3*578

This Scheduling patch provides two new MH NO SHOW Scheduling Reports for use by Suicide Prevention Coordinators and other Mental Health professionals. The reports will support following up with High Risk for Suicide patients who missed a scheduled MH appointment.

DG*5.3*836

This Registration Patient Record Flag patch provides new interfaces used by the Scheduling and Reminder patches to determine the High Risk for Suicide flag status on a specified date.

PXRM*2*18

This patch will create a national reminder to notify clinicians of a patient's risk of suicide and will create a dialog the clinicians can use to document follow-up with the high risk patients when they miss MH appointments. This Clinical Reminder patch supports the Scheduling patch by providing a national Reminder Location List of Mental Health stop codes used for scheduled appointments. Additionally, this patch includes miscellaneous clinical reminder maintenance changes. Details of all the Clinical Reminder changes can be found in the Release Notes.

GMTS*2.7*99

This patch installs four Health Summary Components (MAS CONTACTS, MAS MH CLINIC VISITS, MH HIGH RISK PRF HX, and MH TREATMENT COORDINATOR), two Health Summary Types (VA-MH HIGH RISK PATIENT and REMOTE HIGH RISK MH PATIENT), and a single Health Summary Object (VA-MH HIGH RISK PATIENT (TIU)).

TIU*1*260

This patch will install one new Object into the TIU DOCUMENT DEFINITION file (8925.1): MH MISSED APPOINTMENTS 10D.

MH MISSED APPOINTMENTS 10D is used by the VA-MH HIGH RISK NO SHOW FOLLOW-UP reminder dialog to display any No-Show or No-Show and Rescheduled mental health clinic appointments for the past 10 days.

This High Risk MH build can be installed with users on the system. Installation will take between 5 and 15 minutes. A number of Clinical Reminders Exchange entries will be installed and the installer may be prompted for replacement items. Because of this, the build should not be queued and the site's Clinical Reminders manager should be on hand during the install. Details about these Exchange entries can be found below.

IMPORTANT – The reminder term VA-MHV INFLUENZA IMMUNIZATION will be installed with the overwrite action, which means that all locally mapped findings will be removed. Therefore, prior to the installation, sites should use the “Inquire about Reminder Term” option to check this term and verify that it has been mapped with your local findings. If there are no mapped local findings, then after this install, add proper local mappings to complete this reminder term’s definition. If there are local mapped findings in the reminder definition, save the output of the term inquiry for this term into something permanent (such as a document). After the installation, the term will have a single mapped finding, which will look similar to this:

```
Finding Item: INFLUENZA, HIGH DOSE SEASONAL, PRESERV-FREE
              (FI(1)=IM(612013))
Finding Type: IMMUNIZATION
Beginning Date/Time: 8/20/10
```

Use the saved term inquiry as a reference and add back the locally mapped findings that were removed. Do not remove the mapped finding that was installed by the patch.

NOTE: In this document you will see references to both PXRM*2*18 and PXRM*2.0*18. The difference is that PXRM*2*18 is the name of the patch and PXRM*2.0*18 is the name of the build.

Pre-Installation

Pre-Install Setup Steps:

We recommend that the team who will be responsible for implementing this project coordinate before installing the patches, to determine the first two pre-install steps. This team could include MH coordinators, Suicide Prevention Coordinators, Clinical Application Coordinators (CACs), Reminders Managers, and IRM staff.

1. (IRM staff or CAC): Check to see if there is a local Patient Record Flag entry for “HIGH RISK FOR SUICIDE.” Open the “Record Flag Management” menu option on the “Patient Record Flags Main Menu,” and then use the Change Category (CC) action to switch to Flag Category II (Local) and see what’s listed as local flags. HIGH RISK FOR SUICIDE was the PRF name recommended by VHA Directive 2008-036, dated July 18, 2008.

During the DG*5.3*836 install, IRM staff will be asked:

```
Do you want to update the Parameter Definition for the local Patient
Record Flag related to HIGH RISK FOR SUICIDE at this time? YES//
Enter the Local Patient Record Flag that you are using as your "High Risk
for Suicide" flag. If not already defined use the Directive
recommendation: HIGH RISK FOR SUICIDE. If already defined use your current
flag name.
Recommended Flag: HIGH RISK FOR SUICIDE  Replace
```

2. (IRM staff, Mental Health Coordinator, or CAC) During the SD*5.3*578 install, IRM staff will be asked to enter the name for the mail group owner of the new mail group SD MH NO SHOW NOTIFICATION. The owner assigned will be responsible for entering the names of Suicide Prevention Coordinators and/or other MH professionals into the Mail Group. Sites can decide who this owner should be – an IRM staff member, a CAC, or one of the MH-SPC team. Check to see if there’s a mail group expert at your site. NOTE: Self enrollment is not allowed for this mail group.
3. Prior to installing the patch, the HEALTH SUMMARY COMPONENT file (#142.1) needs to be examined for any ABBREVIATION entries that will conflict with the four new components exported with this patch. Each new national component along with its ABBREVIATION is listed here:

NAME	ABBREVIATION
MAS CONTACTS	CON
MAS MH CLINIC VISITS FUTURE	MHFV
MH HIGH RISK PRF HX	MHRF
MH TREATMENT COORIDNATOR	MHTC

The "C" cross-reference for the HEALTH SUMMARY COMPONENT file (#142.1) contains the ABBREVIATION for each component. Examine the global listing for this cross-reference to determine if any local components will need the ABBREVIATION field updated. If an ABBREVIATION conflict is found, the "Create/Modify Health

Summary Components" option of the GMTS IRM MAINTENANCE MENU should be used to edit the local component's ABBREVIATION.

The GMTS patch contains an installation routine (GMTSPI99) that will perform an environment check, do any necessary housekeeping, and then install the new Health Summary items. The environment check will examine the HEALTH SUMMARY COMPONENT file (#142.1) to ensure there will not be any NAME (.01) or NUMBER (.001) collisions with the four new nationally deployed Health Summary Components (MAS CONTACTS, MAS MH CLINIC VISITS FUTURE , MH HIGH RISK PRF HX , and MH TREATMENT COORDINATOR). If any possible collisions are found, the install will be aborted until the issue is resolved. After the issue has been addressed, local IT staff can re-install the patch.

After the environment check, the PRE section of the routine will delete any previous versions of: the Reminder Exchange file used to deploy portions of the Health Summary items, the Health Summary Components, and the Health Summary Types (VA-MH HIGH RISK PATIENT and REMOTE HIGH RISK MH PATIENT). PRE will also re-index the HEALTH SUMMARY TYPE and HEALTH SUMMARY COMPONENT files along with rebuilding the Ad Hoc Health Summary.

After PRE, the POST section of the routine will create stub entries in file #142 for the remote Health Summary Type, and then call the silent Reminder Exchange install utility to install the remaining Health Summary items. Lastly, POST will re-index the HEALTH SUMMARY TYPE and HEALTH SUMMARY COMPONENT files along with rebuilding the Ad Hoc Health Summary.

4. Check for local mappings of **VA-MHV INFLUENZA IMMUNIZATION** (see pages 2 and 14 in this manual for more instructions).

Installation

This manual describes how to install the combined build that includes builds DG*5.3*836, SD*5.3*578, GMTS*2.7*99, TIU*1.0*260, and PXR*2.0*18.

This build can be installed with users on the system, but it should be done during non-peak hours.

The installation needs to be done by a person with DUZ(0) set to "@."

NOTE: DO NOT QUEUE THE INSTALLATION, because this installation asks questions requiring responses and queuing will stop the installation. A Reminders Manager or CAC should be present to respond to these.

NOTE: We recommend that a Clinical Reminders Manager or CAC be present during the install, so that if questions occur during the install of Reminder Exchange entries, a knowledgeable person can respond to them.

1. Retrieve the host file containing the multi-package build, HIGH RISK MH 1.0.

Use ftp to access the build (the name of the host file is HIGH_RISK_MH_1_0 .KID) from one of the following locations (with the ASCII file type):

Albany	ftp.fo-albany.med.va.gov	<ftp://ftp.fo-albany.med.va.gov>
Hines	ftp.fo-hines.med.va.gov	<ftp://ftp.fo-hines.med.va.gov>
Salt Lake City	ftp.fo-slc.med.va.gov	<ftp://ftp.fo-slc.med.va.gov>

2. Install the build first in a training or test account.

Installing in a non-production environment will give you time to get familiar with new functionality and complete the setup for reminders and dialogs prior to installing the software in production.

3. Load the distribution.

In programmer mode type, D ^XUP, select the Kernel Installation & Distribution System menu (XPD MAIN), then the Installation option, and then the option LOAD a Distribution. Enter your directory name and HIGH_RISK_MH_1.0.KID at the Host File prompt.

Example

```
Select Installation Option: LOAD a Distribution
Enter a Host File: [DIR] HIGH_RISK_MH_1.0.KID, where [DIR] is the local
    directory where you have stored the host file.

Loading Distribution...

Verifying installation environment...
Checking Health Summary Component file (#142.1)
TIU*1.0*260
PXR*2.0*18
Use INSTALL NAME: HIGH RISK MH 1.0 to install this Distribution.
```

From the Installation menu, you may elect to use the following options:

a. Backup a Transport Global

This option will create a backup message of any routines exported with the patch. It will NOT back up any other changes such as DDs or templates.

INSTALL NAME: HIGH RISK MH 1.0

b. Compare Transport Global to Current System

This option will allow you to view all changes that will be made when the patch is installed. It compares all components of the patch (routines, DDs, templates, etc.).

c. Verify Checksums in Transport Global

This option will allow you to ensure the integrity of the routines that are in the transport global. If there are any discrepancies, do not run the Install Package(s) option. Instead, run the Unload a Distribution option to remove the Transport Global from your system.

Retrieve the file again from the anonymous directory (in case there was corruption in FTPing) and Load the Distribution again. If the problem still exists, log a Remedy ticket and/or call the national Help Desk (1-888-596-HELP) to report the problem.

```

d. Print Transport Global (optional)

This option will allow you to view the components of the KIDS build.

4. Install the build. (See an example of the install in Appendix A)

NOTE: DO NOT QUEUE THE INSTALLATION, because this installation asks questions requiring responses and queuing will stop the installation. A Reminders Manager or CAC should be present to respond to these.

From the Installation menu on the Kernel Installation and Distribution System (KIDS) menu, run the option Install Package(s). Select the build HIGH RISK MH 1.0 .KID and

proceed with the install. If you have problems with the installation, log a Remedy ticket and/or call the National Help Desk to report the problem.

```
Select Installation & Distribution System Option: Installation
Select Installation Option: INSTALL PACKAGE(S)
Select INSTALL NAME: HIGH RISK MH 1.0
```

Answer "NO" to the following prompts:

```
Want KIDS to INHIBIT LOGONs during install? NO// NO
Want to DISABLE Scheduled Options, Menu Options, and Protocols? NO//
```

Example of questions asked during install:

```
Checking Install for Package SD*5.3*578

Install Questions for SD*5.3*578

Incoming Mail Groups:

Enter the Coordinator for Mail Group 'SD MH NO SHOW NOTIFICATION': XXXXX,XXX

Want KIDS to Rebuild Menu Trees Upon Completion of Install? NO//

Checking Install for Package DG*5.3*836

Install Questions for DG*5.3*836

Do you want to update the Parameter Definition for the local Patient Record Flag
related to HIGH RISK FOR SUICIDE at this time? YES//
Enter the Local Patient Record Flag that you are using as your "High Risk
for Suicide" flag. If not already defined use the Directive
recommendation: HIGH RISK FOR SUICIDE. If already defined use your current
flag name.
Recommended Flag: HIGH RISK FOR SUICIDE Replace
```

Installation Example

See [Appendix A](#).

5. Install File Print

Use the KIDS Install File Print option to print out the results of the installation process. You can select the multi-package build or any of the individual builds included in the multi-package build.

```
Select Utilities Option: Install File Print
Select INSTALL NAME: HIGH RISK MH 1.0
```

6. Build File Print

Use the KIDS Build File Print option to print out the build components.

```
Select Utilities Option: Build File Print
```

Select BUILD NAME: HIGH RISK MH 1.0
DEVICE: HOME//

7. Post-installation routines

The installation will place the following exchange file entries in the Reminder Exchange file #811.8:

VA-INFLUENZA 2010 UPDATES
VA-TEXT INFO SCREEN FOR AAA (RD)
VA MH SCREENING REMINDERS UPDATE
VA-EMBEDDED FRAGMENTS RISK EVALUATION
VA BRANCHING LOGIC REMINDER UPDATES OEF/OIF
VA-INFLUENZA H1N1 UPDATE
VA-MHV INFLUENZA VACCINE
VA-ALCOHOL F/U POS AUDIT-C
VA-MH HIGH RISK NO-SHOW FOLLOW-UP
VA-TB/POSITIVE PPD
VA-PATIENT RECORD FLAG INFORMATION

NATIONAL BLOOD PRESSURE CONDITION CHANGES

The contents of NATIONAL BLOOD PRESSURE CONDITION CHANGES are described in the Systolic/Mean/Diastolic discussion in the Release Notes.

VA-MH NO SHOW APPT CLINICS LL

The VA-MH NO SHOW APPT CLINICS LL location list includes clinic stop codes for MH clinics that are scheduled for face-to-face appointments.

The post-install routine will install all the components of these Exchange file entries on your system. After the installation has finished, if you discover that any of these components weren't installed correctly, you can use the Reminder Exchange option on the Reminders Manager Menu to install them.

Health Summary

The GMTS*2.7*99 post-install routine will create stub entries in file #142 for the remote Health Summary Type, and then call the silent Reminder Exchange install utility to install the remaining Health Summary items. Lastly, POST will re-index the HEALTH SUMMARY TYPE and HEALTH SUMMARY COMPONENT files along with rebuilding the Ad Hoc Health Summary.

HEALTH SUMMARY Components

MAS CONTACTS
MAS MH CLINIC VISITS FUTURE
MH HIGH RISK PRF HX
MH TREATMENT COORDINATOR

HEALTH SUMMARY Types

VA-MH HIGH RISK PATIENT
REMOTE HIGH RISK MH PATIENT

HEALTH SUMMARY OBJECT
VA-MH HIGH RISK PATIENT (TIU)

8. Deletion of init routines

After everything has been successfully installed you may delete the following init routines:
PXRMP18E, PXRMP18I

Post-Install Set-up Instructions

1. Enter names to mail group

Enter the names of Suicide Prevention Coordinators and/or other MH professionals responsible for coordinating follow-up of High Risk for Suicide patients that miss a MH appointment. The mail group owner of the SD MH NO SHOW NOTIFICATION mail group (as entered during the installation process) will need to add these names after the multi-package build is installed. The mail group members added to this mail group will receive the new Scheduling report results (from the nightly background job) in a MailMan Message. This can include all facility SPCs if you're an integrated site.

Example:

```
>D ^XUP

Setting up programmer environment
This is a TEST account.

Select OPTION NAME: XMMGR
    Manage Mailman      menu

        Check MailMan Files for Errors
        Create a Mailbox for a user
        Disk Space Management ...
        Group/Distribution Management ...
        Local Delivery Management ...
        MailMan Site Parameters
        Network Management ...
        New Features for Managing MailMan

Select Manage Mailman Option: Group/Distribution Management ... [XMMGR-GROUP-
MAINTENANCE]

Select Group/Distribution Management Option: Mail Group Coordinator's Edit
[XMMGR-MAIL-GRP-COORDINATOR]
This option allows a mail group coordinator to edit the mail groups that
he or she is the coordinator of (and no others). It does not allow edit
of remote recipients.

Select MAIL GROUP NAME: SD MH NO SHOW NOTIFICATION
Select MEMBER: MHUSER,TWO
Are you adding 'MHUSER,TWO' as a new MEMBER (the 1ST for this MAIL GROUP)?
No// YES
Select MEMBER: MHUSER,THREE
```

2. Assign report options

Assign these report options to the primary or secondary menu options of your Suicide Prevention Coordinators, Mental Health Treatment Coordinator, and other Mental Health Professionals who will be tracking missed appointments for high risk for suicide patients:

- SD MH NO SHOW AD HOC REPORT
 - Scheduling Mental Health AD HOC NO SHOW Report
- SD MH NO SHOW NIGHTLY BGJ
 - No Show Nightly Background Job (tasked job)

3. Add the new health summary types to the CPRS Reports tab display

Follow your facility's rules and conventions for adding these health summary types.

1. VA-MH HIGH RISK PATIENT - This Type contains the four Health Summary Components mentioned above, and is the basis for creating the VA-MH HIGH RISK PATIENT (TIU) Health Summary Object.
2. REMOTE MH HIGH RISK PATIENT - This Type contains the same components as the VA-MH HIGH RISK PATIENT and allows viewing the aforementioned information from remote sites.

Sequencing new Health Summary types is done in the GUI Parameters option.

Example

```
Select CPRS Manager Menu Option: PE CPRS Configuration (Clin Coord)
Select CPRS Configuration (Clin Coord) Option: GP GUI Parameters

Select GUI Parameters Option: HS GUI Health Summary Types

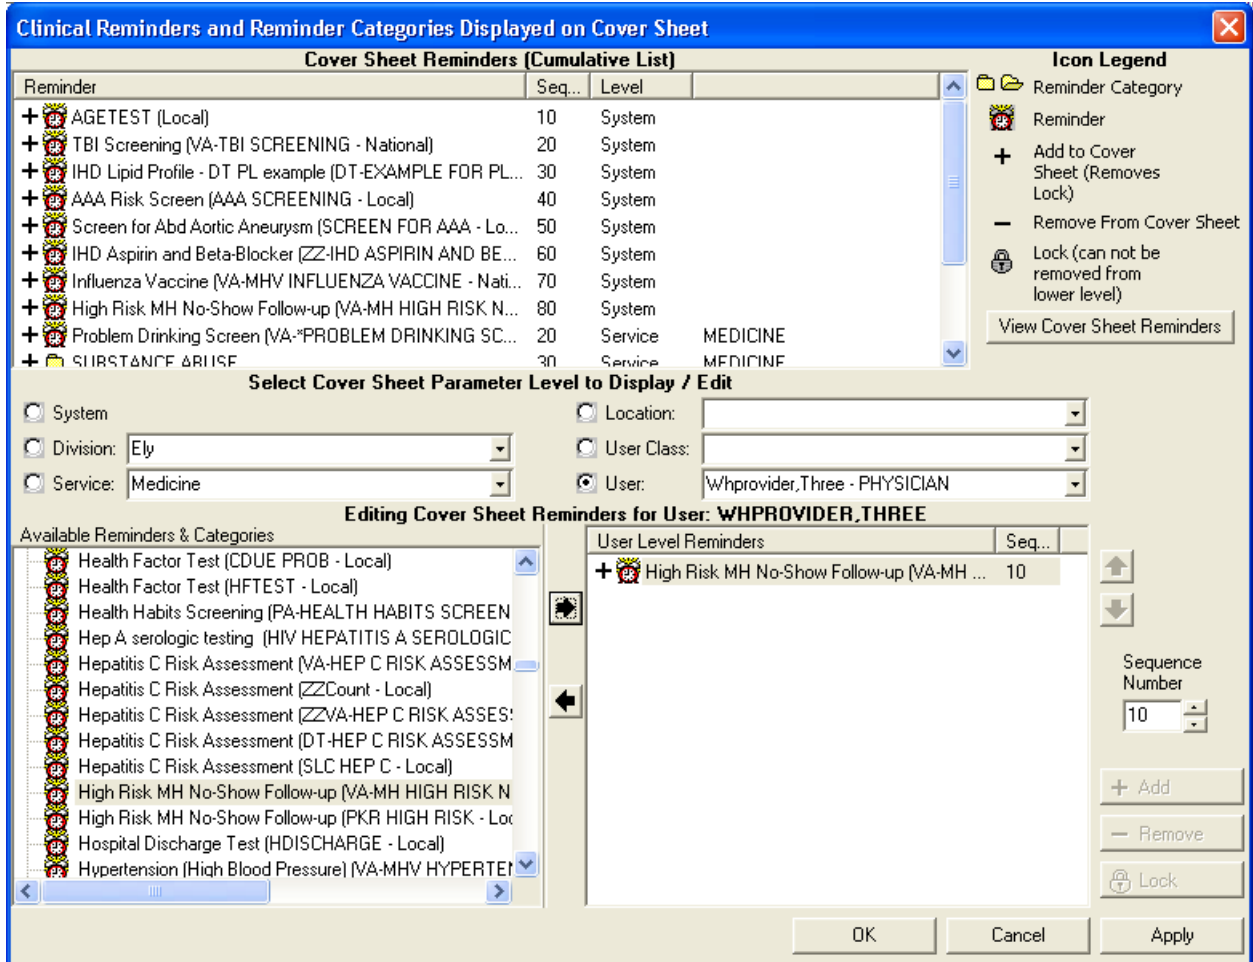

Allowable Health Summary Types may be set for the following:
  2  User          USR  [choose from NEW PERSON]
  3  Division     DIV  [choose from INSTITUTION]
  4  System       SYS  [TEST.FO-SLC.MED.VA.GOV]
  5  Service      SVC  [choose from SERVICE/SECTION]

Enter selection: 4 System   xxx.MED.VA.GOV

- Setting Allowable Health Summary Types for System: PUGET-SOUND.MED.VA.GOV -
Sequence: 20//
Health Summary: VA-HIGH RISK MH PATIENT
Sequence: 21// (your sequence numbers will be different)
Health Summary: REMOTE MH HIGH RISK PATIENT
```

4. Assign the High Risk MH No-Show Follow-up reminder to users' coversheets, following local policies.

Edit Cover Sheet Reminder List Example

- If necessary, edit the Parameter Definition for the PRF FOR SUICIDE PREVENTION. If your site has a different name for this PRF, you'll need to go into the Parameter Tools option (XPAR MENU TOOLS) to change this. NOTE: You may need programmer access to use this option.

```
Select General Parameter Tools Option: EP Edit Parameter Values
--- Edit Parameter Values ---

Select PARAMETER DEFINITION NAME: PRF FOR SUICIDE PREVENTION DGPF SUICIDE FLAG
PRF for Suicide Prevention

----- Setting DGPF SUICIDE FLAG for Package: REGISTRATION -----
Value: HIGH RISK FOR SUICIDE Replace
```

- Update the reminder term with the name of the local PRF flag, after setting up the DG SUICIDE PREVENTION parameter.

```
---- Begin: VA-MH HIGH RISK FOR SUICIDE PRF (FI(2)=RT(811)) -----
```

```

    Finding Type: REMINDER TERM
    Use in Patient Cohort Logic: AND
    Beginning Date/Time: FIEVAL(1,1,"DATE")
    Ending Date/Time: FIEVAL(1,1,"DATE")+1D

    Mapped Findings: CF.VA-PATIENT RECORD FLAG
                    INFORMATION

    Computed Finding Parameter: HIGH RISK FOR SUICIDE^L

    --- End: VA-MH HIGH RISK FOR SUICIDE PRF -----

```

- Use the Reminder Term edit option (Reminder Manager’s Menu)
- Select the VA-MH HIGH RISK FOR SUICIDE PRF reminder term
- Select the Finding CF.VA-PATIENT RECORD FLAG INFORMATION
- Add local PRF name to Computed Finding Parameter followed by “^L”.
- Example:
Computed Finding Parameter: HIGH RISK FOR SUICIDE^L

7. If you are using \$P in a Condition, we recommend that you replace it with the appropriate CSUBs. Several national definitions and terms were originally distributed with Conditions using \$P; as part of this patch they will be updated to use the SYSTOLIC and DIASTOLIC CSUBs.

SYSTOLIC/MEAN/DIASTOLIC and use of CSUB instead of \$P: The Clin4 support team pointed out that the value for blood pressure can come back in either of the following forms: SYSTOLIC/DIASTOLIC or SYSTOLIC/MEAN/DIASTOLIC (the second form is not very common). If the second form comes back, then the DIASTOLIC CSUB would have the value for mean, and if \$P was used in a Condition, it would also be the mean. The code was changed so that the DIASTOLIC CSUB will always have the correct value.

8. Add back locally mapped findings if they were removed. As stated in Pre-Installation instructions, the reminder term VA-MHV INFLUENZA IMMUNIZATION was installed with the overwrite action, which means that all locally mapped findings were removed. Therefore, prior to the installation, you were advised to use the “Inquire about Reminder Term” option to check this term and verify that it was mapped with your local findings. If there are no mapped local findings, then after this install, add proper local mappings to complete this reminder term’s definition After the installation, the term will have a single mapped finding which will look similar to this:

```

    Finding Item: INFLUENZA, HIGH DOSE SEASONAL, PRESERV-FREE
                (FI (1)=IM(612013))
    Finding Type: IMMUNIZATION
    Beginning Date/Time: 8/20/10

```

Use the saved term inquiry as a reference and add back the locally mapped findings that were removed. Do not remove the mapped finding that was installed by the patch.

Appendix A: Installation Example

NOTE: DO NOT QUEUE THE INSTALL!!

Appendix B – Nightly Background Job and Ad Hoc Report Examples

This is a sample of the High Risk Mental Health NO Show Nightly Report. This report is generated at the end of the Scheduling Nightly Background job, and will be sent in a Mailman message to those persons added to mail group SD MH NO SHOW NOTIFICATION. All persons in this mail group will receive the High Risk Mental Health NO SHOW report that is generated from the scheduling nightly background job. An option to manually run the no show background job if there was an error in running the report, has also been created called SD MH NO SHOW NIGHTLY BGJ (High Risk MH No-Show Nightly Report).

The Background job will list the patients who had a status of “NO-SHOW,” “NO SHOW WITH AUTO-REBOOK,” and “No Action Taken” for the day before that have the patient record flag “High Risk for Mental Health.” It will list patients for all mental health clinics/stop codes that are defined in the Remote location list ‘VA-MH NO SHOW APPT CLINICS LL’. The VA-MH NO SHOW APPT CLINICS LL location list includes clinic stop codes for MH clinics that are scheduled for face-to-face appointments.

This report will list future scheduled appointments for 30 days in the future.

This is how the report will display to the screen when reading mailman.

High Risk MH No-Show Ad hoc Report

This option (SD MH NO SHOW AD HOC REPORT) will list by one, many or All stop codes or only Mental Health stop codes defined in the Reminder Location List file under the 'VA-MH NO SHOW APPT CLINICS LL' entry.

A series of prompts will be asked of the user to refine the report.

- The user will be asked to select a beginning and ending date: this will list the report within a certain date range.
- The division will be asked of the user: The report can list by one, many or all divisions.
- The user will then be asked to choose how the report should sort: by (M)ental Health Quick List, which will list only those clinics defined in the Reminder Location list, or by (C)linics or (S)top codes both of which will further prompt the user to refine the sort. If ?, ?? is entered by the user, a help prompt will be displayed.
- If the user selects to sort by (S)top codes, a prompt asking them to select stop codes by listing (A)ll stop codes, (mental health as well as non mental health) or (M)ental Health stop codes only (that are defined in the Reminder Location List) and are stop codes in the division/s chosen to list in this report. Both selections will allow the user to choose one, many, or all stop codes.
- A prompt asking the number of days in the future to list the future scheduled appointment is asked and will list the future scheduled appointments that many days in the future.

When the report displays or prints:

- The division/Stop Code Name – Name/Number will display on the report once for all patients who have no showed for that Stop Code and division. It will display again, when the stop code or division changes.
- A total page will be displayed at the end of the report.

Special Note: At the Select Stop Code prompt, the stop code may be selected by the stop code file number (as example, selecting 188 below) or by the AMIS Reporting stop code (500 – 599 code numbers). An example of each is shown below.

No Show displays for (A)ll stop codes:

Notice that when the user is prompted Select Stop codes: ALL//, if the user enters ??, the prompt displays all stop codes for mental health that are associated with the stop codes listed in the Reminder Location List VA-MH NO SHOW APPT CLINICS LL and non mental health stop codes to select (green highlight). The user can also hit return at that prompt and stop Codes for all stop codes will display.

Ad Hoc No Show Report by Mental Health Clinic

This is a sample of the High Risk Mental Health NO Show Ad Hoc report, (option SD MH NO SHOW AD HOC REPORT, that will list by one, many, All clinics or only Mental Health clinics defined in the Reminder Location List file under the ‘VA-MH NO SHOW APPT CLINICS LL’ entry.

A series of prompts will be asked of the user to refine the report.

- The user will be asked to select a beginning and ending date: this will list the report within a certain date range.
- The division will be asked of the user: The report can list by one, many or all divisions.
- The user will then be asked to choose how the report should sort: by (M)ental Health Quick List, which will list only those clinics defined in the Reminder Location list, or by (C)linics or (S)top codes both of which will further prompt the user to refine the sort. If ?, ?? is entered by the user, a help prompt will be displayed.
- If the user selects to sort by clinic, a prompt asking them to select clinics by listing All clinics, (mental health as well as non mental health) or Mental Health clinics only (that are defined in the Reminder Location List) and are clinics in the divisions chosen to list in this report. Both selections will allow the user to choose one, many, or all clinics.
- A prompt asking the number of days in the future to list the future scheduled appointment is asked and will list the future scheduled appointments that many days in the future.

When the report displays or prints:

- The division/Clinic name will display on the report once for all patients who have no showed for that clinic and division. It will display again, when the clinic or division changes.
- A totals page will be displayed at the end of the report.

Ad Hoc No Show Report for All Clinics

This is an example of how the No Show displays for All clinics. Notice when the user selects (C)linics as the sort, the user is asked to select (A)ll or (M)ental Health clinics only. If the user selects (A)ll and enters ?? at the list prompt, all mental health as well as non-mental health clinics can be selected, or if the user hits return, all clinics will be selected and will display on the report.
