Introduction

PXRM*2*8 distributes the new National VA-TBI SCREENING reminder definition and dialog. This reminder has been developed and sponsored by the Office of Patient Care Services.

Web Sites:
http://vaww1.va.gov/pcs/ VHA Patient Care Services (PCS)
http://vista.med.va.gov/reminders National Clinical Reminders site

For more detailed information about use of this TBI Screening reminder, please review the PowerPoint at:
http://vista.med.va.gov/reminders/TBI%20SCREENING%20REMOINDER%20PPT%203-14-07.ppt
Pre-Installation

Clinical Reminders patch PXRM*2.0*8 adds one new reminder and dialog, along with taxonomies, reminder terms, and health factors to support the TBI project.

File installed

811.8 REMINDER EXCHANGE

Data is added to the following files:

801.41 REMINDER DIALOG
811.5 REMINDER TERM
811.9 REMINDER DEFINITION

Routine Installed

PXRMP8I

Estimated Installation Time

This patch can be loaded with users on the system. Installation will take less than two minutes. Installation should be coordinated with the person who manages Clinical Reminders at your site and be scheduled during a time of lower system usage.
Installation

This build can be loaded with users on the system. Updating of cross-references for the new data added to the files will occur during the install.

The install needs to be done by a person with DUZ(0) set to "@."

1. Retrieve the PXRM*2.0*8 build

   Use FTP to access the build, PXRM_2_0_8.KID, from one of the following locations:

<table>
<thead>
<tr>
<th>Location</th>
<th>FTP Server</th>
<th>URL</th>
</tr>
</thead>
</table>

2. Install the build first in a training or test account.

   Installing in a non-production environment will give you time to get familiar with new functionality and complete the setup for reminders and dialogs prior to installing the software in production.

3. Load the distribution.

   In programmer mode, D ^XUP, select the Kernel Installation & Distribution System menu (XPD MAIN), then the Installation option, then the option LOAD a Distribution. Enter your directory name and PXRM_2_0_8.KID at the Host File prompt.

   **Example**

   ```
   Select Installation Option: LOAD a Distribution
   Enter a Host File: PXRM_2_0_8.KID
   KIDS Distribution saved on
   Comment: TBI Reminder
   ```

   From the Installation menu, you may elect to use the following options:

   a. **Verify Checksums in Transport Global**

   This option will allow you to ensure the integrity of the routines that are in the transport global. If there are any discrepancies, do not run the Install Package(s) option. Instead, run the Unload a Distribution option to remove the Transport Global from your system. Retrieve the file again from the anonymous directory (in case there was corruption in FTPing) and Load the Distribution again. If the problem still exists, log a Remedy ticket and/or call the national Help Desk (1-888-596-HELP) to report the problem.
b. Print Transport Global
   This option will allow you to view the components of the KIDS build.

4. Install the package.

From the Installation menu on the Kernel Installation and Distribution System (KIDS) menu, run the option Install Package(s). Select the package PXRM*2.0*8 and proceed with the install. If you have problems with the installation, log a Remedy ticket and/or call the National Help Desk to report the problem.

| Select Installation & Distribution System Option: Installation |
| Select Installation Option: INSTALL PACKAGE(S) |
| Select INSTALL NAME: PXRM*2.0*8 |

Answer "NO" to the following prompts:

Want KIDS to INHIBIT LOGONs during install? YES// NO
Want to DISABLE Scheduled Options, Menu Options, and Protocols? YES// NO

NOTE: Do NOT queue the installation, because this installation may contain a question requiring a response and queuing will stop the installation. (If for some reason, your site doesn’t have GMRCOR CONSULT finding item, you’ll be prompted to enter an existing Order Dialog name.)

Installation Example

Setting up programmer environment
Terminal Type set to: C-VT220

Select OPTION NAME: XPD MAIN Kernel Installation & Distribution System menu
   Edits and Distribution ...
   Utilities ....
   Installation ...

Select Kernel Installation & Distribution System Option: Installation
Select Installation Option: Install Package(s) [XPD INSTALL BUILD]

Select INSTALL NAME: PXRM*2.0*8
   Loaded from Distribution 3/7/07@15:51:24
   => NATIONAL VA-TBI SCREENING REMINDER ;Created on Mar 07, 2007@15:14

This Distribution was loaded on Mar 07, 2007@15:51:24 with header of NATIONAL VA-TBI SCREENING REMINDER ;Created on Mar 07, 2007@15:14
It consisted of the following Install(s):
   PXRM*2.0*8
Checking Install for Package PXRM*2.0*8

Install Questions for PXRM*2.0*8
Incoming Files:
811.8 REMINDER EXCHANGE (including data)
Note: You already have the 'REMINDER EXCHANGE' File.
I will OVERWRITE your data with mine.

Want KIDS to INHIBIT LOGONs during the install? YES// NO
Want to DISABLE Scheduled Options, Menu Options, and Protocols? YES// NO

Enter the Device you want to print the Install messages.
You can queue the install by enter a 'Q' at the device prompt.
Enter a '^' to abort the install.

REQUIRED BUILDS: ACTION:
PXRM*2.0*4 Don't install, leave global
```

8. **Post-installation routine**

The post-install routine, POST^PXRMP8I, installs the “packed” components of the VA-TBI SCREENING reminder and VA-TBI SCREENING reminder dialog onto your system, via reminder exchange tools. The reminder exchange entry being installed is called VA-TBI-SCREENING.

After the installation has finished, if you discover that the components weren’t installed correctly for some reason, you can use the Exchange options on the Reminders Manager Menu to install the components of the “packed” reminder.

The init routine PXRMP8I may be deleted once the installation has completed. Sites should use the Kernel “Delete Routines” option [XTRDEL] to delete this routine.
Setup of TBI Dialog

The TBI reminder is applicable to all patients whose last service separation date is after 9/11/01 and to active duty patients.

NOTE: This reminder uses the same reminder term that was included in the VA-IRAQ & AFGHAN POST-DEPLOY SCREEN reminder to determine whether active duty patients should be screened or not. The reminder term VA-ACTIVE DUTY is included in this reminder and is available to cause patients to be part of the cohort. This term contains the computed finding VA-PATIENT TYPE, which can be used to include active duty patients. Sites that do not screen active duty patients may remove the computed finding from this reminder term.

This reminder is resolved if the patient did not serve in OEF/OIF, as recorded by using this reminder dialog or the VA-IRAQ & AFGHAN POST-DEPLOY SCREEN dialog. Therefore, the denominator for this reminder is the same as that used for the VA-IRAQ & AFGHAN POST-DEPLOY SCREEN – this number DOES NOT represent the number of patients who served in OEF/OIF. Please note that this reminder and the VA-IRAQ & AFGHAN POST-DEPLOY SCREEN reminder are not constructed to run reports on those patients who actually served in OEF/OIF.

- NOTE: Some local sites use additional reminders that have more appropriate denominators and look at patients with known OEF/OIF service who need TBI screening, or who screened positive for TBI and need follow-up, or have positive PTSD screens or positive depression screens.

When a veteran’s screen is positive, the positive findings should be reviewed with the patient by an appropriately trained clinician and a consult for further evaluation recommended. In general, it is best if the clinician personally completes the screen, particularly as the questions asked are of clinical value. If clinic support staff collects answers to the initial questions on the screen, positive screens must be brought to the attention of the responsible clinician immediately and reviewed with the patient. Consults should not be automatically submitted without discussion between clinician and the patient.

Setup Steps
After installing Patch 8, follow the steps below to implement your TBI screening reminder and dialog.

The following dialog elements are meant to be used for ordering a consult to the team at your facility that does further evaluation of patients with possible TBI.

VA-TBI OI CONSULT FOR KNOWN TBI
VA-PDIQ POLYTRAUMA CONSULT
At the time of install, the Reminder Dialog will use the GMRCOR CONSULT finding item as the consult order dialog for both of these dialog elements. Sites should substitute a quick order or an order menu for ordering consults to the TBI team at your facility. If no such service is available yet, then sites may wish to leave the GMRCOR CONSULT in the element until a consult becomes available.

The mapping of the Quick Order should be done by the site Clinical Reminder Manager.

1. Mapping a site-specific quick order

To map a site-specific quick order to the above elements, do the following from the Reminder Managers menu.

Summary of steps:
1. Select DM Reminder Dialog Management.
2. Select DI Reminder Dialogs.
3. Type CV for Change View.
4. Type E for Dialog Elements.
5. Type SL for Search List.
6. Type the name of the element from above.
7. At the Find Next prompt, type No.
8. Type the item number next to the dialog element, VA-TBI OI CONSULT FOR KNOWN TBI.
9. At the finding Item Prompt, enter Q. plus the name of the site-specific Quick Order or order menu.
11. Repeat the above steps for the other dialog element, VA-PDIQ POLYTRAUMA CONSULT.

Detailed Example

1. Select DM Reminder Dialog Management from the Reminder Managers Menu.
2. Select DI Reminder Dialogs

Select Reminder Managers Menu Option: DM  Reminder Dialog Management

3. Type CV for Change View.

Select Reminder Dialog Management Option: DI  Reminder Dialogs

Select Reminder Dialog Management Option: DI  Reminder Dialogs

4. Type E, for Dialog Elements

Select one of the following:

D  Reminder Dialogs
E  Dialog Elements
F  Forced Values
G  Dialog Groups
P  Additional Prompts
R  Reminders
RG  Result Group (Mental Health)
RE  Result Element (Mental Health)

TYPE OF VIEW: R// E  Dialog Elements

5. Type SL for Search List.

6. Type the name of the dialog element, VA-TBI OI CONSULT FOR KNOWN TBI.
8. Type the item number next to the element, then press Enter

9. At the finding Item Prompt, enter Q. plus the name of the site-specific Quick Order or order menu.

11. Repeat the above steps for the other dialog element, VA-PDIQ POLYTRAUMA CONSULT

2. Add the nationally distributed reminders to the CPRS Cover Sheet
   a. Open a patient chart, click on the reminders clock, and when the available Reminders window opens, click on Action, and then select “Edit Cover Sheet Reminder List.”

   b. When the Cover Sheet Reminder List opens, find the TBI screening reminder.
c. Click on the TBI Screening (VA-TBI SCREENING) reminder and click the Add button (or double-click the reminder).

3. Verify that the dialog functions properly
   Test the TBI Reminder dialog in CPRS and verify the following:
   - Correct Progress Note text is posted
   - Finding Item gets sent to PCE
   - Reminder is satisfied

   Check the Clinical Maintenance component display in CPRS after testing the dialog to ensure that all the activities are reflected in the clinical maintenance display.
Clinical Maintenance: TBI Screening

--STATUS-- --DUE DATE-- --LAST DONE--

Frequency: Due every 907 - Once for all ages.
Patients who served in combat in either Iraq (Operation Iraqi Freedom) or in Afghanistan (Operation Enduring Freedom) should be screened for Traumatic Brain Injury.

Cohort:
Reminder Term: VA-IRAQ/AFGHAN PERIOD OF SERVICE
Computed Finding: Veteran Last Separation Date
06/04/2006 value - 3060604; Last Service Separation date:
06/04/2006 Branch of Service: ARMY

Resolution: Last done 03/08/2007
The patient's most recent service separation date is more recent than their last screening - if the patient was discharged after 9/11/01 then rescreening is needed after any new period of service.
Reminder Term: VA-IRAQ/AFGHAN SERVICE
Health Factor: IRAQ/AFGHAN SERVICE
03/08/2007

Information:
Reminder Term: VA-TBI SCREENING COMPLETED SCREENING RESOLUTIONS
Health Factor: TBI-BLAST

![Reminder Resolution: TBI Screening](image)

Did the Veteran ever serve in Operation Iraqi Freedom (OIF) or in Operation Enduring Freedom (OEF), either on the ground, in nearby coastal waters, or in the air above, after September 11, 2001?
- OIF - Iraq, Kuwait, Saudi Arabia, Turkey
- OEF - Afghanistan, Georgia, Kyrgyzstan, Pakistan, Tajikistan, Uzbekistan, The Philippines

- No - No service in OEF or OIF
- Yes - Service in OEF or OIF in the past

*Indicates a Required Field*
Did the Veteran ever serve in Operation Iraqi Freedom (OIF) or in Operation Enduring Freedom (OEF), either on the ground, in nearby coastal waters, or in the air above, after September 11, 2001?

- OIF - Iraq, Kuwait, Saudi Arabia, Turkey
- OEF - Afghanistan, Georgia, Kyrgyzstan, Pakistan, Tajikistan, Uzbekistan, The Philippines

- No - No service in OIF or OEF
- Yes - Service in OIF or OEF in the past

Complete all open items

**TRAUMATIC BRAIN INJURY SCREENING**

Has the veteran already been diagnosed as having TBI during OIF/OEF deployment?

- Yes
- No

- Patient declines or is unable to answer screening questions.

**TBI SCREENING**

The patient reports service in Operation Iraqi Freedom or Operation Enduring Freedom.

Health Factors: IRAQ/AFGHAN SERVICE

*Indicates a Required Field
Did the Veteran ever serve in Operation Iraqi Freedom (OIF) or in Operation Enduring Freedom (OEF), either on the ground, in nearby coastal waters, or in the air above, after September 11, 2001?

- OIF - Iraq, Kuwait, Saudi Arabia, Turkey
- OEF - Afghanistan, Georgia, Kyrgyzstan, Pakistan, Tajikistan, Uzbekistan, The Philippines

- No - No service in OEF or OIF
- Yes - Service in OEF or OIF in the past

Complete all open items

**TRAUMATIC BRAIN INJURY SCREENING**

Has the veteran already been diagnosed as having TBI during OIF/OEF deployment?

- Yes

Screening complete. If the patient has not had follow-up evaluation for TBI, you should consider ordering a consult.

- Order Consult for Known TBI
- No

**SEER Notes**

TBI Screening:

The patient reports service in Operation Iraqi Freedom or Operation Enduring Freedom.

**Health Factors:** IRAQ/AFGHAN SERVICE, TBI-PREVIOUS TBI DX

*Indicates a Required Field*
TRAUMATIC BRAIN INJURY SCREENING

Has the veteran already been diagnosed as having TBI during OIF/OEF deployment?

☐ Yes
☐ No

Section 1: During any of your OIF/OEF deployment(s) did you experience any of the following events?

☐ Blast or Explosion (IED, RPG, Land Mine, Grenade, etc)
☐ Vehicular accident/crash (any vehicle, including aircraft)
☐ Fragrant wound or bullet wound above the shoulders
☐ Fall

ALSO choose one of the responses below:

☐ No, none of the above (Negative Screen)
☐ Yes, one or more of the above.

See Notes:

TBI Screening:
The patient reports service in Operation Iraqi Freedom or Operation Enduring Freedom.

Health Factors: IRAQ/AFGHAN SERVICE

* Indicates a required field
**Reminder Resolution: TBI Screening**

Also choose one of the responses below:
- No, none of the above (Negative Screen)
- Yes, one or more of the above.

Section 2: Did you have any of these IMMEDIATELY afterwards?
(Check all that apply)
- Losing consciousness / "knocked out"
- Being dazed, confused or "seeing stars"
- Not remembering the event
- Concussion
- Head injury

Also choose one of the responses below:
- No, none of the above (Negative Screen)
- Yes, one or more of the above.

☑ Patient declines or is unable to answer screening questions.

**TBI Screening**
The patient reports service in Operation Iraqi Freedom or Operation Enduring Freedom.

**Health Factors:** IRAQ/AFGHAN SERVICE, TBI SECTION 1 - YES

* Indicates a required field
